Web analytics—also referred to as Web metrics, e-Metrics, or e-analytics
—is the science of Internet audience measurement and analysis. It deals
with the identification, gathering & formatting of Web usage data, the
computation and presentation of metrics, and the exploitation of the
results, in order to measure web site success. Meaningful insight is
gained from traffic and visitor analytics data. It not only covers the unique
measurement challenges associated with segmentation, but also comes
with strategic recommendations for focusing the entire analytics process
- from where to begin to what your larger, overall web analytics goals
should be (Google Analytics, IBM ShowCase Web Analysis).
