HUMANITARIAN STUDIES (HUST)

HUST 1999. Tutorial. (1 Credit)
Independent study.

HUST 2001. Introduction to Community and Global Public Health. (4 Credits)
Community and Global Public Health transcends boundaries and disciplines. As such, this course will examine health from a holistic and high-level point of view, reviewing elements of culture, geography, environment, political stability, and poverty, among others, as they relate to disparity, prevention, and cure of disease, and access to health care. Students will learn about the determinants of health; the inequities that drive disparity; the indicators used to measure population health; and the key disciplines, structures, and stakeholders that work to understand and address all these components to improve health and reduce morbidity and mortality. Students will be required to review relevant publications, research pressing Community and Global Public Health issues, and contribute to meaningful discussion about social justice and moral, political, and economic concerns associated with health and disease, applying principles of social and biological sciences as the foundation for their perspectives. Students will gain skills in communication, public speaking, time management, research, writing and creative thinking that are indispensable to any future career. Ultimately, students will gain an understanding of Community and Global Public Health, what it is, who it involves, what disciplines and skills are required to find solutions, and how their interests and passions may intersect with and contribute directly to the objectives of the sector. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HPSE, ISIN.

HUST 2999. Tutorial. (2 Credits)
Independent study.

HUST 3999. Tutorial. (3 Credits)
Independent study.

HUST 4001. The Humanitarian System: Past, Present, and Future. (4 Credits)
In this course, students will consider both theoretical and applied approaches to humanitarian action. The course will be centered on ways of thinking and actions that bridge these two responses. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, INST, ISIN, MEST, PJCR, PJST, SOIN, URST.

HUST 4100. Refugee and Asylum Law. (4 Credits)
This course will examine the evolution of international law governing refugees and asylees from the establishment of the United Nations to the present, and the forms of relief available to refugees and asylees, both immediate and long term. This course will also examine the national responses to the influx of refugees and asylees in four specific countries to be used as case studies: Australia, Hungary, Sweden, and the United States. Legal remedies often reflect the mores and values of nations; accordingly, we will explore the moral and ethical questions presented by the migration policies and asylum law systems of the countries to be studied, including the practice of mandatory and remote detention, extraterritorial adjudication, safe third-country agreements, and the attendant violations of civil and human rights. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HPSE, LALS, LASS, PJEC, PJST.

HUST 4200. Forced Migration and Humanitarian Action. (4 Credits)
Forced migration is a central issue in the provision of humanitarian and assistance. This course will examine the causes of forced migration, including violent conflict, natural disasters, development projects, human trafficking and others, and will use a variety of case studies to examine international responses to forced migration, the migrant experience, legal and human rights around migration, and the role of human agencies and NGOs in responding to forced migration. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HPSE, INST, ISIN, LAHA, LALS, PJCR, PJST.

HUST 4500. Evolution of Development and Humanitarian Aid Systems. (4 Credits)
This course digs deeply into the political economy, politics, infrastructure, design, incentives, and dilemmas related to the current international development and humanitarian aid system. Blending both practitioner and theoretical perspectives, this course takes a critical approach to the evolution of aid systems, with reflection on historical and economic context, interests and motivations, and perceptions of success and failure, among other topics. There is special emphasis on the perspectives and vantage points of affected populations. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN, PJEC, PJST, SOIN.
Prerequisite: HUST 4001.

HUST 4501. Humanitarianism and Global Health: Unequal Access for the Displaced and Marginalized. (4 Credits)
This course will examine the greater impact of global health crises on marginalized groups—conflict affected, displaced, women, the elderly and LGBTQ communities. Exploring through case studies the way international actors—including development institutions, UN agencies, states, private companies, foundations and humanitarian actors—respond to health crises. Trauma, epidemics disease, access to food, gender and human rights will be topics of concern. Four-credit courses that meets for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESEL, HPSE, INST, ISIN, PJSJ, PJST.
HUST 4800. International Humanitarian Internship. (4 Credits)
The Undergraduate course on Humanitarian Action: Theory and Application offers an introduction to humanitarian aid work and provides an understanding of the complexities and challenges the key actors face in an applied context. The course focuses on teaching the common principles of the world of humanitarian affairs, with a cross-cutting, interdisciplinary perspective that also analyzes gender, age differences, human rights frameworks, and indigenous cultural approaches to conflict and post-conflict phenomena. In addition to these teach topics, students would have an opportunity to intern at prominent international humanitarian organizations in New York. These would help them gain the necessary exposure and understanding of the dynamics of such organizations and their mission. Students would be required to meet with, and relate their experiences with the professor periodically and be mentored on how best to utilize the skills they gain to further advance their interests in humanitarian aid work. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN, SOIN.
Prerequisites: HUST 4001 and HUST 4500.

HUST 4801. Summer Humanitarian Internship. (1 Credit)
This course offers students the opportunity to reflect on internship with an international humanitarian on intergovernmental organization in New York City.

HUST 4888. Senior Thesis Seminar. (4 Credits)
The seminar is designed to assist Humanitarian Studies Major students through the main stages of their thesis: formulating appropriate questions; undertaking effective research to answer those questions; organizing, analyzing and communicating findings and arguments. The seminar is a single-semester course, taken in students' senior year. The students will meet weekly to discuss problems of common interest under the guidance of faculty members from a variety of disciplines drawn from the major committee. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: SOIN.
Prerequisites: HUST 4001 and HUST 4500.

HUST 4999. Tutorial. (4 Credits)
Independent study.

HUST 5005. NOHA Network on Humanitarian Action Study Abroad. (0.5 to 12 Credits)
This is an administrative registration for students participating in the NOHA Network on Humanitarian Action Study Abroad program.

HUST 5013. Fundamentals of Humanitarian Action. (3 Credits)
This course will introduce students to the principles of humanitarian action through three modules on (1) Defining Humanitarian Assistance, (2) Management, and (3) Strategic Planning. The aim of the course is to provide an overview of the critical aspects of international humanitarian coordination from an organizational perspective.
Attributes: PMMA, PSIC, PSJH, PSNM.

HUST 5014. Humanitarian Resource Management and Administration. (3 Credits)
This course will introduce students to the operational aspects of humanitarian response and focus primarily on the role of human resources (HR) and financial management. In response to the continuing professionalization of the humanitarian sector, this course will provide students with a common understanding of hiring practices, budgets management, and donor relations in a humanitarian intervention.
Attribute: GSSE.

HUST 5015. Information Management. (0 to 3 Credits)
This course will introduce students to the principles and strategies behind the effective flow of information in a humanitarian setting. Gathering and managing information is crucial in order to understand the cause of the emergency, identify impacted populations, and determine crisis-afflicted geographical locations. The aim of this course is for students to understand the components of a successful information management network within a humanitarian intervention and identify how information can contribute to future preparedness.
Attributes: PSIC, PSJH, PSNM.

HUST 5016. Monitoring and Evaluation in Humanitarian Response. (0 to 3 Credits)
This course will introduce students to the principles and theoretical frameworks behind data collection and analysis in the context of humanitarian response. It will cover qualitative and quantitative research methods used in humanitarian program monitoring and evaluation (M&E). The aim is to give students an overview of basic methodologies utilized in the field as well as the tools to determine appropriate M&E strategies in various humanitarian settings.
Attribute: PMMA.

HUST 5025. Cash, Commodities, and Services in a Humanitarian Response. (0 to 3 Credits)
For decades, humanitarian assistance was delivered by the supply of commodities and services, often by international humanitarian organizations. More recently, technological advances have made it practical, and cost-effective, to provide humanitarian assistance through cash transfers. This development has both been welcomed as the new way forward and viewed with some suspicion by others who view it as lacking in accountability. This course will examine the roles played by cash transfers, commodities, and services in response to humanitarian crises, along with the advantages and disadvantages of each. The course will also examine the mechanisms now in place for the further development and regulation of cash transfers.
Attribute: HUCB.
HUST 5035. Forced Migration: The Humanitarian Challenge of the Decade. (0 to 3 Credits)
Millions of people worldwide have been forcibly displaced across countries and continents for a wide range of reasons, including armed conflict and natural disasters. Some have become refugees or Internally Displaced Persons (IDPs), while others live as irregular migrants. Some have been trafficked and live as victims of modern slavery. All find their futures dependent on political decisions and local perceptions driven by the media. This course will equip students to understand the complexity of forced migration and its relevant legal and protection framework, including International Refugee Law and the Guiding Principles on Internal Displacement. It will also address recent developments and the shift in emphasis from solving the problem of forced migration to the provision of durable solutions. This course is recommended for students who are interested in forced migration or who may wish to work in the areas of protection and response to affected populations. It is also recommended for humanitarian practitioners who are already working in this field and want to improve their knowledge and understanding of these complex issues.
Attributes: HUHR, PSIC, PSJH.

HUST 5045. Humanitarian Advocacy: Communicating the Need and Motivating the Response. (0 to 3 Credits)
Humanitarians work in hostile environments where people are struggling for survival in situations of armed conflict or natural disasters. In such environments, people may have been forced to flee their homes with few—if any—belongings and may have suffered or witnessed human rights violations. Their plight needs to be communicated to the world in a way that will motivate the deployment of the protection and aid they so desperately need. This course will prepare students for the task of advocacy in humanitarian environments. It will focus on the identification of the most vulnerable members of a large group of survivors and the communication of their needs. It will equip students with the skills required to effectively communicate with local authorities as well as the international donor community. Students will learn to write in a different way than the academic style expected in other courses, focusing on effective advocacy messaging. This course is recommended for students who may envision working directly in advocacy for responding to humanitarian needs. It is also recommended for humanitarian practitioners who wish to prepare for a role in advocacy or are already working in this area.
Attributes: HUCB, PMMA.

HUST 5061. Disaster Management. (0 to 3 Credits)
From hurricanes to epidemics, from conflict to climate change, the economic and social impacts of natural and man-made hazards are increasing around the world. Disaster management is the professional discipline that lessens these impacts by reducing disaster risk. This course will promote understanding of the principal determinants of disasters and provide an evidence-based approach to the interdisciplinary and multi-sectoral frameworks required to efficiently and effectively manage humanitarian disasters. It will cover key concepts in disaster management policy and practice, including hazard risk, vulnerability, resilience, and governance through the cycle of prevention, mitigation, preparedness, response, and early recovery. It will also integrate epidemiology, health economics, and public administration into the disaster management mix for the first time. Using case studies of recent humanitarian crises, students will have a more complete understanding of the direct and indirect drivers of disaster risk and how they interact, enabling them to think critically about the appropriate allocation and management of resources in times of crisis.
Attribute: HULI.

HUST 5075. Leadership and Management in Humanitarian Assistance. (0 to 3 Credits)
When responding to humanitarian emergencies, managers need the right skills to work in exceptional, rapidly changing, and sometimes dangerous situations. While some conventional techniques may be employed, having skills that take into account the environment and the emotional impact of emergencies on teams and individuals is crucial. This course will teach students the skills required to manage teams responding to humanitarian crises. For students planning to work in such environments, it is recommended that they reflect on whether they envisage being in leadership roles or might need to understand the role of those under whose management they will work. The course is also recommended for humanitarian practitioners at all levels who want to improve their leadership and management skills.
Attributes: HULI, PMMA, PSIC, PSJH.

HUST 5082. Integrity, Accountability and Transparency in Humanitarian Operations. (0 to 3 Credits)
This course will examine the values, principles, and ethical standards that humanitarian personnel must follow when engaged in humanitarian work. Adherence to these values, principles, and standards is critical in developing and maintaining beneficiary confidence, promoting a strong public image, cultivating an effective workforce, and nurturing accountability and transparency. At the end of this course, students will have a better understanding of the meaning of ethics in the context of humanitarian work; the standards of conduct applicable to humanitarian personnel; how to systematically approach ethical problem situations; key ethical and corruption risks pertaining to the humanitarian sector; how to report and deal with ethical breaches, including sexual and other interpersonal misconduct; how to make ethical decisions; and where to seek help.
Attributes: HUHR, PSIC, PSJH.

HUST 5085. Security Management: Delivering Aid in Potentially Dangerous Situations. (0 to 3 Credits)
This course will examine security management of humanitarian personnel working in high-risk environments. Students will analyze the most common security threats and trends and the ways to be proactive in order to reduce exposure to such threats. Students will also analyze organizational duty of care and learn to develop compliant security plans and to conduct security risk assessments. The concept of acceptable risk will be explored, as will the idea of balancing security risks with program delivery. Upon gaining an understanding of security planning, students will be introduced to techniques for critical incident management to reduce the impact of such events. In the final module, students will be taught how to better protect themselves during high-risk events to increase their chances of survival if deployed to work in high-risk environments.
Attribute: HULI.

HUST 5200. Protection for Vulnerable Populations. (3 Credits)
This course will provide students with a comprehensive introduction to international practices and norms concerning the protection of vulnerable populations in humanitarian emergencies. The past 20 years of international humanitarian interventions has given rise to standardization of humanitarian activities, with a particular emphasis on protection practices. Students will gain an understanding of the landscape of organizations and entities involved in designing these frameworks and assess their efficacy and continued relevance to protecting vulnerable groups.
Attributes: GSSC, HUHR, PMMA.
HUST 5205. Children in Armed Conflict. (3 Credits)
This course will provide students with a comprehensive introduction to the impact of armed conflict on children. In the 21st century, armed conflict continues to put millions of children in harm's way, exposing them to human rights violations, including recruitment and use by armed forces and armed groups, military detention and ill treatment, rape and other forms of sexual violence, forced displacement, family separation, and physical injuries. Children also suffer from trauma and other serious and long-lasting psychological consequences resulting from the violence they have experienced. In addition to these direct violations, children are equally affected by indirect violations of their rights, including attacks on schools and hospitals and denial of humanitarian access. Students will examine the international legal framework for the protection of children in armed conflict and the international humanitarian response system designed to assist their physical and mental well-being. Students will critically assess these mechanisms for their efficacy and continued relevance for protecting children during war.
Attributes: GSSE, HUHR, PMMA, PSIC, PSJH.

HUST 5210. Access to Education During Crisis and Conflict. (3 Credits)
This course will provide students with an introduction to the growing field of education in emergencies. With as many as 40 million children living in countries affected by crisis and conflict it has become increasingly important for humanitarian practitioners to understand the complexities of planning and implementing educational programming in these settings. Building on the theoretical frameworks covered in the course, students will evaluate the relationship between education, international development and humanitarian aid through the use of theoretical texts and case studies from around the globe.
Attribute: HUHR.

HUST 5215. Accountability for Sexual and Gender-Based Violence in Humanitarian Settings. (3 Credits)
Sexual and gender-based violence (SGBV) is a well-documented public health and human rights issue that is under-resourced and poorly responded to in most countries across the globe. In crisis settings, existing systems for physical and social protection are further destabilized or destroyed. SGBV is commonplace in many societies but can contribute to conflict, is exacerbated by conflict, is frequently used as a weapon of war, and is poorly responded to in post-conflict settings, despite having lasting consequences on individuals, families, and communities. In this course, students will consider why SGBV is such a challenging topic in the context of conflict and examine how the domestic and international communities have handled accusations of SGBV or documented cases of SGBV. In particular, we will identify how SGBV has been defined in domestic and international laws, and how it has been handled in post-conflict settings using a range of judicial and non-judicial approaches. This course will use a range of case studies and will emphasize the perspectives of affected populations.
Attributes: HCWL, HUHR, PJGS, PJST, PMMA, WGSS.

HUST 5300. International Responses to Migration. (3 Credits)
This course will provide students with an enhanced awareness and understanding of the complex interaction between migration and humanitarian interventions from the point of view of the migrant, national authorities, and the international humanitarian community. With the crisis in the MENA region, particularly in Syria, and the mass migration to southern Europe it is imperative for students to understand the different motivations and determinants of action from regional (EU), national and local stakeholders as well as the diverse circumstances of the migrating populations. Students will be encouraged to critique the influence and motivations of mass and social media on the understanding of the economic, political, legal, and cultural factors of migration.
Attributes: HULI, PMMA, PSIC, PSJH.

HUST 5310. Urban Humanitarian Operations. (0 to 3 Credits)
This course will examine the interconnected systems that make up today's urban contexts, the impact on urban populations when these systems are disrupted by conflict and disasters, and the programmatic models used by humanitarians to respond to the needs of conflict and disaster-affected populations. Students will analyze programmatic models that are specific to urban contexts, as well as those traditionally used in camp and rural settings that can be modified for use in urban areas. Through case studies, students will also analyze existing best practices and ways of increasing the resilience of affected populations in both formal and informal urban settlements. At the end of this course, students will be able to create a desk review summary and stakeholder analysis of an urban context, plan a multi-cluster/sector initial rapid assessment (MIRA) of a disaster- or conflict-affected urban setting, and develop a cluster- or sector-specific urban program plan.
Attribute: HULI.

HUST 5350. Climate Change in the West African Sahel: Impact on Water and Migration. (3 Credits)
This course will examine the impact of climate change on societies, cultures, and economies in the West African Sahel, which includes Burkina Faso, Chad, Mali, Mauritania, Niger, and Nigeria. The Sahel, a transitional zone between the Sahara Desert and the savanna in sub-Saharan Africa, has been particularly affected by climate change, which has led to unpredictable rainfall and drought. This is also an area of significant out-migration to other parts of Africa and Europe. Considering the movement of Sahelian populations in search of areas with heavier rainfall or irrigation, this course aims to examine the interdependence existing between climate change, conflict, and migration in order to confront the challenges facing rural and urban development in the Sahel. The course goes beyond approaches focused on the physical and chemical aspects of water to develop a constructive perspective, valuing local and international responses to climate change and water management.
Attributes: HULI, PSEV, PSJH, URSG.

HUST 5410. Gender Integration in Humanitarian Action. (3 Credits)
This course will introduce students to the myriad ways in which gender impacts the experience of both the humanitarian crises and subsequent intervention. Students will explore the legal, political, cultural, and economic frameworks that contribute to gender inequality as well as those that provide support for vulnerable groups. Emphasis will be placed on the tension between international guidelines/norms, program implementation, and unanticipated consequences of gender programming.
Attributes: HUCB, PSIC, PSJH.
HUST 5500. Mental Health in Complex Emergencies. (0 to 3 Credits)
Over the past several years, the IIHA has run a popular 12-day course largely for mental health professionals. We will now be offering a distance learning course covering similar materials over a 15-week semester. This is a training course for mental health professionals and program staff who wish to establish mental health or psychosocial programs in a humanitarian context within conflict and post-conflict areas. This course is also open to Fordham graduate students in humanitarian studies or other relevant disciplines. It will aim to provide practical orientation and training, including how to conduct rapid assessments, designing and setting up mental health services or psychosocial programs (exploring the differences between them), and clinical work and therapeutic approaches in non-Western contexts. It will address the issues of cultural validity, conflict resolution and negotiation, taking care of oneself and dealing with burnout. This course will also introduce potential field workers to essentials such as personal security, logistics, and practical aspects of humanitarian work in the field.
Attributes: HUCB, PMMA.

HUST 5600. International Humanitarian Law: Policy and Practice. (3 Credits)
This course will explore the development and application of International Humanitarian Law (IHL), also known as the law of armed conflict. IHL is a set of rules that, in times of armed conflict, seeks to protect people who are not or are no longer participating in hostilities, and to restrict the means and methods of warfare. The rules of IHL aim to balance military necessity against fundamental principles of humanity. IHL also provides a normative framework to facilitate the delivery of aid by humanitarian organizations engaged in mitigating the suffering caused by armed conflict. Students will examine the rules of international customary law, as well as treaty law, which form the legal bases for IHL; in particular the four Geneva Conventions of 1949 and their two additional protocols of 1977, and the Hague Regulations of 1907. Students will also study the principles of proportionality and distinction between military objectives and civilian objects, as well as the prohibition against means of combat that lead to unnecessary suffering and superfluous injury, which underpin this body of law. Questions to consider throughout the course include: What is international humanitarian law? How is it created, interpreted, applied, and enforced, and how does it evolve? How does it intersect with other branches of public international law, mainly international criminal law and international human rights law? This course will use case studies to illustrate principles and concepts.
Attribute: HUHR.

HUST 5801. Humanitarian Internship. (1 Credit)
Students will have an opportunity to intern at prominent international humanitarian organizations, helping them gain the necessary exposure and understanding of the dynamics of such organizations and their mission. Our location enables students to pursue internships at and exposure to various United Nations agencies, diplomatic missions, international nongovernmental organizations, and prominent research and think-tank institutions. Students will complete an internship tutorial that matches their concentration area.

HUST 5990. Master’s Thesis Research I. (2 Credits)
Students should develop a thesis topic with a Fordham faculty advisor and a reader who has significant practical experience in humanitarian affairs, ideally after completing Module 2. This project is the culminating demonstration of the knowledge and skills gained throughout the MIHA coursework. The thesis will focus on practical examples of past mistakes, contributing possible solutions to the existing literature. The research methods necessary to writing the thesis are taught within the context of each module. Thesis projects should incorporate learning from previous MIHA courses, followed by final editing, defense and approval.

HUST 5991. Master’s Thesis Research II. (2 Credits)
This project is the culminating demonstration of the knowledge and skill gained throughout the MIHA coursework. The thesis will focus on practical examples of past mistakes, contributing possible solutions to the existing literature. The research methods necessary to writing that thesis are taught within the context of each module. Thesis projects should incorporate learning from previous MIHA courses, followed by final editing, defense and approval.

HUST 5992. MSHS Thesis. (2 Credits)
In order to successfully complete the M.S. in Humanitarian Studies, students will be expected to synthesize the cumulative knowledge gained from their coursework, additional research, and internship experience (if appropriate) to write an original, substantive, and academic final thesis. The subject will be agreed upon between the student and their faculty advisor in conjunction with a humanitarian aid professional recognized by the Institute for Humanitarian Affairs.

HUST 5993. MSHS Thesis Research. (0 Credits)
In order to successfully complete the M.S. in humanitarian studies, students will be expected to synthesize the cumulative knowledge gained from their coursework, additional research, and internship experience (if appropriate) to write an original, substantive, and academic final thesis. This course will allow students to complete research for their thesis.

HUST 6000. International Diploma in Humanitarian Assistance. (0 to 8 Credits)
The International Diploma in Humanitarian Assistance (IDHA), the flagship program of the Institute of International Humanitarian Affairs, equips mid-career professionals to drive the humanitarian sector of the future in a more effective, sustainable, and dignified direction. Students will also develop a holistic perspective on global humanitarian issues to propel them to the next level in their careers, helping them create positive social change both in and out of the field.

HUST 8999. Independent Study. (1 Credit)
This is a graduate tutorial/independent study registration for humanitarian studies.

HUST MTNC. IHA Maintenance of Matriculation. (0 Credits)
Students must maintain continuous registration throughout their studies in the graduate program. International Humanitarian Action students working toward the Master of Arts Degree are to use this registration during each semester when not participating in module.
