PH.D. IN BUSINESS

The Gabelli School of Business Ph.D. program offers highly qualified students a unique opportunity to study alongside leading scholars in the heart of Manhattan. This full-time, research-intensive program provides the requisite empirical and theoretical skills necessary for students to become academic scholars. A specialized curriculum and faculty mentorship position students to contribute to business scholarship at the highest level.

The Gabelli School Ph.D. is intended for individuals who envision themselves as researchers or faculty members at universities and other institutions around the world. Ph.D. students complete coursework, pass a series of exams and, of course, propose, write, and defend a dissertation. Students will specialize in one of the Gabelli School’s traditional academic areas, such as finance or management. Upon admission, students select one of two interdisciplinary curriculum tracks:

- Capital Markets
- Strategy and Decision-Making

The Capital Markets track combines the traditional aspects of economic theory with the quantitative rigor of finance and accounting. The Strategy and Decision-Making track encompasses all aspects of the contemporary study of decision-making with theories of management, marketing, information systems, business ethics, business media, and operations.

Students in each track complete specialized coursework and receive relevant professional skills training. Program graduates can expect to research and teach in multiple fields in the discipline.

To learn more about the Ph.D. in Business program, please visit the Fordham website.

Admissions

Each application to the Gabelli School of Business Ph.D. program receives a thorough and complete evaluation.

Applicants are evaluated on two primary criteria:

1. Demonstrated past success in university programs
2. Potential ability in the field as an academic scholar

It is expected that most applicants to the Ph.D. program will hold a graduate degree from an accredited university in business or a related field, such as an M.S. in economics, finance, mathematics, operations research, psychology, or statistics.

Transfer students from other Ph.D. programs, particularly in economics, are strongly encouraged to apply. Students may receive consideration for transferred credits based on previous coursework and degrees. Applicants without graduate degrees or with general questions about their eligibility are encouraged to email businessphd@fordham.edu.

Application Materials

Applicants must provide all of the following materials:

Statement of Purpose
This one- to two-page statement should introduce the applicant, provide a summary of past academic achievements, indicate the applicant’s current academic interests, identify what he or she hopes to accomplish, and explain the choice of both a business Ph.D. in general and the Gabelli School program in particular.

CV/Résumé
An updated CV or résumé should detail all relevant academic and/or professional experience and achievements.

Writing Sample
A writing sample demonstrating strong research and writing skills is required. The writing sample should ideally be a research paper in the area of the applicant’s interest, such as a master’s thesis or a seminar paper.

Transcripts and GPA
Official transcripts in support of all previously earned degrees must be sent to Fordham directly from the issuing institution. It is expected that applicants have maintained a minimum GPA of 3.5. All international transcripts and related documents must be evaluated by World Education Services (WES). Given the time involved in the evaluation process, unofficial transcripts may be submitted as placeholders; however, any admissions decision is conditional upon eventual evaluation of all international transcripts.

Letters of Recommendation
Three letters of recommendation are required; at least two of these must be written by professors or academic research practitioners.

GMAT/GRE
A valid GMAT or GRE score is required. The minimum expected GMAT score is 700, and the minimum expected GRE score is 160 quantitative reasoning / 160 quantitative reasoning / 5 analytical writing.

TOEFL/IELTS
International applicants who have not earned their previous degree(s) at a university in the United States or another English-speaking country must submit a valid TOEFL or IELTS score. The minimum expected TOEFL score is 105, and the minimum expected IELTS score is 7.5.

Interview
Applicants who meet the above requirements may be interviewed by the doctoral program committee.

Application Fee
The application fee is $75.

Requirements

The Gabelli School Ph.D. program consists of 90 credits, which students complete with guidance from their advisers. Most students complete the program in five years, though advanced students transferring in from another doctoral program may receive consideration for credits already earned. Upon successful completion of the program, students receive a Doctor of Philosophy in Business degree (Ph.D.). Students also earn a Master of Philosophy in Business degree (M.Phil) and a Master of Science (M.S.) degree in recognition of earlier milestones in the program.

Coursework

The major focus of Years 1 and 2 is the completion of 54 credits of coursework. All students complete 24 credits in common core courses. Students in each focus complete 15 credits in specialized seminars and 15 credits in specialized electives. Upon completion of 30 credits
of coursework, students are eligible to be awarded a Master of Science degree.

Comprehensive Exams

Students sit for two comprehensive exams: the first at the conclusion of Year 1 and the second at the conclusion of Year 2.

The Year 1 comprehensive exam is a written exam designed to measure a student's fundamental understanding of business, with an emphasis on economics, management, and quantitative and empirical methods.

The Year 2 comprehensive exam is a written field exam. Students work with advisors to determine two appropriate reading lists at the end of Year 1 and read for the exam during Year 2. The field exam measures knowledge of the field(s) and determines readiness to move on to the dissertation phase. Both exams are graded Pass/Fail.

Year 2 Paper

At the conclusion of Year 2, students present a paper to the faculty during a doctoral program workshop, which will be graded by a Pass/Fail faculty vote. The paper may be an extension of a course paper or a research paper pursued independently. This paper provides an opportunity for students to build presentation and workshop skills, and should ideally serve as an eventual component of the dissertation.

Independent Study

The focus of Year 3 is ensuring that students hone their research and writing skills before moving onto the dissertation phase. Students complete 12 credits of independent study in close collaboration with their advisors, which includes the development, research, and writing of a dissertation proposal. Students defend their dissertation proposal to their prospective dissertation committee at the conclusion of Year 3. Upon completion of Year 3, students are awarded a Master of Philosophy in Business (M.Phil).

Dissertation

Years 4 and 5 are devoted to the research and writing of a dissertation. This consists of 24 credits of dissertation work. The dissertation is a large-scale, closely supervised research project typically consisting of three to four article-length papers, preferably along a similar topic, with extensive research, writing, and revision expected. Students offer regular progress updates to their dissertation committee members, who in turn meet with the doctoral program director to ensure sufficient progress. Upon successful completion and defense of the dissertation, students are awarded a Doctor of Philosophy in Business (PhD).

Teaching

Teaching is a key component of the Ph.D. program.

In preparation for the rigors and standards of life as an academic, all students attend a seminar on pedagogy in Year 2. This seminar briefs students on specific techniques in teaching business at the highest level, as well as on the academic and cultural standards of education at universities in the United States.

Following this pedagogical training, Ph.D. students have access to a variety of supervised and independent teaching opportunities. These include teaching courses, working as teaching assistants for faculty, and guiding students in independent research. Teaching commitments are determined based on a student's previous teaching experience, area of focus, and academic standing.
