One additional course		3
<b>Total Credits</b>		<b>15</b>

Students considering a career in investment management should be aware of the importance of obtaining their Chartered Financial Analyst (CFA) designation from the CFA Institute in Charlottesville, Virginia. The CFA is awarded upon satisfactory completion of a series of examinations on ethical, financial, economic, legal, fixed income, and equity valuation and portfolio-management issues. Details of the CFA program can be obtained from the finance faculty. Graduate business courses included in the investment management specialization cover many topics required for the CFA tests.

Completion of the MBA concentration in Finance (p. 1) does not directly grant CFA professional licensure in any State or territory. CFA Institute eligibility requirements requires that a candidate must have a bachelor's (or equivalent) degree, or be in the final year of his or her bachelor's degree program at the time of registration. Enrollment in the CFA Program or registration for any level of the exam are found at the CFA website: [www.cfainstitute.org](http://www.cfainstitute.org). The final CFA Charterholder designation requires successfully passing all three levels, (Levels I, II, III) of the exam, and meet the experience requirement specified by the CFA Institute.

To learn more about the CFA charter, please refer to the CFA Institute website.
