

# HEALTHCARE MANAGEMENT SECONDARY CONCENTRATION

---

Over the past decade, the healthcare industry has added 2.6 million jobs nationwide.

Healthcare's employment growth rate was 22.7 percent in that time. All other industries? A mere 2.1 percent.

Fordham MBA students are uniquely positioned to capitalize on opportunities in this dynamic field, where there is great demand for professionals who understand how helping people and doing good business intersect.

We are also seeing major growth in healthcare innovations and entrepreneurship, which is a focus of the Global Healthcare Innovation Management Center ([fordham.edu/ghimc](http://fordham.edu/ghimc)).
