

FINANCE (M.S., ON CAMPUS AND ONLINE)

Overview

Note: This program was formerly named the M.S. in Global Finance. Program curricular changes are effective with students beginning their degrees in Spring 2022 and beyond.

An intensive curriculum, with flexibility built in.

The Master of Science in Finance (M.S.F.) is designed for students who want to specialize in finance. The focused curriculum, complemented by relevant electives, can be completed in as little as one year. For students who want to spend a longer time in the program to accommodate internships or other work experience, there is an option to extend the duration.

To learn more about the M.S. in Finance, visit our website.

CIP Code

52.1399 - Management Sciences and Quantitative Methods, Other. You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

Requirements

The degree requires 30 credits, which cover the core financial knowledge and skills required for computational finance, asset management, corporate finance, and risk management.

Courses for full-time, on-campus students start in the fall and go through three semesters. On-campus students take core courses in the fall, and specialization courses are taken in the spring. On-campus students can choose to complete the last semester of electives either in the summer or the following fall, to accommodate an internship.

Courses for online students are offered in the fall, spring, and summer semesters. Several core courses are taken first, followed by elective courses.

Prerequisites

We'll take a look at your background and decide if you would benefit from some foundational coursework before pursuing the M.S.F. Some students may be asked to take the courses below prior to the start of the program. Students whose examination results do not meet the minimum standards will be required to take foundation course(s) first and postpone relevant core courses.

- GFGB 6002 Basics of Finance (1 credit)
- GFGB 6003 Basics of Economics (1 credit)
- GFGB 8005 Business Communication for Finance- A and GFGB 8006 Business Communication for Finance - B (1 credit total, on-campus students only)
- GFGB 6011 Basics of Accounting (1 credit)

- GFGB 6012 Basics of Statistics (1 credit)
- GFGB 601F Finance Primer (1 credit, on-campus students only)

Depending on a student's background, this foundational coursework may add up to 6 credits (for on-campus students) or up to 4 credits (for online students) to the 30 credits required for the degree, but these courses add significant value.

Curriculum

Course	Title	Credits
Required Courses		
GFGB 6006	Corporate Finance Applications	3
GFGB 6007	Investment Applications	3
GFGB 7039	Computational Finance	3
<i>One of the following two options</i>		3
