

HEALTH ADMINISTRATION (M.S.)

Fordham's M.S. in Health Administration program will provide you with the concrete skills and comprehensive industry knowledge required for you to become an innovator in healthcare administration—in hospitals, private practice, public health, healthcare unions, insurance companies, and many other settings.

The CAHME accredited program joins together the resources of three of Fordham's highly-respected graduate schools—the Graduate School of Arts and Sciences, the Gabelli School of Business, and the Graduate School of Social Service—to deliver an exciting, multifaceted curriculum taught by distinguished faculty and seasoned healthcare professionals. The one-year MS in Health Administration leads to a degree from the Graduate School of Arts and Sciences.

Program Basics

- Complete the program in 12 months—while working full time—with our executive-style curriculum; classes are held approximately two weekends per month from late-August to late-July (including intensives and online instruction), for a total of 14 courses and 31 credits
- Build relationships through the program's cohort model, which brings together a diverse group of students from all facets of the American healthcare industry
- Attend classes at our conveniently-located Lincoln Center campus in midtown Manhattan

M.S. in Health Administration Learning Goals

Upon completion of the M.S. in Health Administration program, our graduates will:

- master foundational theoretical and practical knowledge of the complex leadership and administrative challenges of contemporary healthcare systems;
- develop core competencies in complex decision-making and person- and patient-centric care using diagnostic and analytical reasoning and a problem-solving approach to learning;
- engage in advanced research utilizing robust methodologies and techniques to formulate supportable conclusions and communicate findings clearly and persuasively.
