Provisional Accounting (M.S.)

The technical skills you need.
The experience employers want.

These days, the right technical skills and certifications are just the minimum. Employers seek candidates who also have proven their ability to apply accounting knowledge to real-world situations.

For that reason, the Gabelli School Master of Science in Professional Accounting program features interactive learning experiences, requiring students to perform in circumstances that mimic current working conditions. Communication, presentation, and critical-thinking skills receive special emphasis, while internships ensure that students graduate with the experience that top-tier firms are looking for.

The program offers two schedule choices—a one-year full-time program and a part-time program spread over a longer time frame. The part-time program is ideal for professionals who don’t want to leave their jobs while they pursue a degree.

C.P.A. Certification Disclosure

The M.S. in Professional Accounting does not meet the educational requirements for Certified Public Accountant (C.P.A.) licensure alone in any state, but may supplement an undergraduate degree in public accounting to meet the C.P.A. licensure educational requirements of your licensure state of interest. Requirements for the C.P.A. license are subject to state-specific requirements and typically require more than successful completion of educational requirements. C.P.A. licensure candidates must satisfy pertinent additional requirements, contingent on state specifics, including but not limited to completing the C.P.A. application process, submitting payment for all relevant fees, passing licensure examinations, and professional experience.

Because undergraduate accounting programs vary, please visit the National Association of State Boards of Accounting website (https://nasba.org/) to make certain this holds true for your specific bachelor’s degree.

To learn more about the M.S. in Professional Accounting, visit the Fordham website.

C.P.I. Code

52.0301 - Accounting.
You can use the C.P.I. code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about C.P.I. codes and other information resources.

Requirements

Prerequisites

M.S. candidates who have not had any professional training or academic coursework using basic U.S. tax concepts (for example, those who have not taken an U.S. Internal Revenue Service-based tax course in their undergraduate studies) will have the opportunity to take ACGB 7184 Individual and Business Entity Taxation, for 3 credits, as a prerequisite.

Depending on past professional training or academic coursework, the following three-credit prerequisite courses may be required:

- ACGB 6111 Financial Accounting & Reporting Data Analysis
- ACGB 7120 External Financial Information and Reporting
- ACGB 7105 Financial Accounting
- ACGB 7155 Managerial Accounting Analysis
- ACGB 7184 Individual and Business Entity Taxation

These courses should be taken, as needed, during the first semester. Though this increases the number of credits and courses required for the M.S. degree, these courses add significant value.

Curriculum

The M.S. in Professional Accounting is a 30-credit program. Students’ curriculum is driven by the selection of one of two tracks (details below). The program cannot be pursued without one of these two tracks.

Recommendations for electives should be determined in conjunction with the program’s academic adviser.

Tracks

Students pursuing the M.S. in Professional Accounting must also pursue one of two tracks listed below. One of the tracks, in Accounting Technology Analytics, also exists as a freestanding Advanced Certificate program.

The track curricula are taken entirely as overlap with the M.S. in Professional Accounting, so that students complete the program with one of the tracks below without taking any additional coursework.

The two tracks are:

- Accounting, Auditing, and Advisory (p. 1)
- Accounting Technology Analytics (p. 1)

The requirements for each track, when pursued as part of the M.S. in Professional Accounting, are described on the “Tracks” tab (p. 1).
