An emphasis on “soft” skills translates into a very solid advantage.

Effective communication. Creative problem-solving. Strategic vision. At the Gabelli School, we believe it takes a lot more than technical prowess to excel in taxation. We teach our students how to become respected leaders in a corporate setting, preparing them for a more challenging and rewarding career trajectory.

Taught by working professionals in the taxation field, the Master of Science in Professional Taxation (M.S.T.) curriculum emphasizes up-to-the-minute tax law and trends, giving students experience solving real-world challenges. The 10-course, 30-credit program consists of six required taxation courses and four tax/accounting electives. If you choose the full-time, three-term structure, the curriculum can be completed in just 12 months. You can also select electives in areas such as corporate tax, international tax, small business tax, estate tax, or gift tax, that may be relevant to your interests.

The M.S.T. has two schedule choices, a one-year, full-time program, or a part-time program spread over a longer time frame, such as two years—ideal for professionals who don’t want to leave their jobs while they pursue the degree.

**CPA Certification**

The degree can also supplement an undergraduate degree in public accounting, offering an edge over your less specialized peers and helping you to meet the credit requirement to sit for the New York State Certified Public Accountant (CPA) examination. (Visit the National Association of State Boards of Accountancy website to see if the M.S.T., combined with your baccalaureate degree, would satisfy the New York State CPA requirements.)
