BIOLOGICAL SCIENCES (M.S.)

Requirements

Designed as a two-year program for full-time students, the curriculum requires 34 credits for students who choose to concentrate in ecology and 35 credits for those who choose cell and molecular biology. Both tracks include two core courses in ecology and two core courses in cell and molecular biology in the first year, so students will get exposure to both subject areas. Requirements include core courses, breadth courses, concentration courses, and a language requirement. A comprehensive examination is also required.
