

BIOTECHNOLOGY ENTERPRISE (ADV CERT)

Overview

Are you prepared to pioneer groundbreaking solutions in the fast-paced, cutting-edge biotechnology industry? This sector stands at the precipice of unprecedented scientific breakthroughs, from gene editing to personalized medicine, and Fordham University's advanced certificate in biotechnology enterprise provides a solid foundation for a career in this innovative field. Our cutting-edge 15-credit advanced certificate in biotechnology enterprise gives students an overview of how the biotech industry operates. It's designed to equip you with scientific knowledge, specialized technical skills, and practical expertise essential for thriving in this rapidly evolving landscape. Fordham's transdisciplinary approach seamlessly blends foundational scientific principles with their real-world applications across the biotechnology ecosystem.

Admissions
