

# INTERNATIONAL POLITICAL ECONOMY AND DEVELOPMENT (M.A.)

## Requirements

Completion of twelve courses (36 credits) beyond the bachelor's degree is required, including four core courses (12 credits), one quantitative methods course (3 credits), and seven electives (21 credits). Satisfactory completion of an internship for those lacking relevant professional experience and a comprehensive examination are also required.

Full-time students can complete the program in three semesters while part-time students can complete the program in two years, including two summers.

## Curriculum

Course	Title	Credits
<b>Core: Political Science</b>		
Two courses from any of the following:		6
<i>Foundational</i>

Four concentration courses <sup>3</sup>		12
Three free electives <sup>4</sup>		9
<b>Practical Training <sup>5</sup></b>		
<b>Comprehensive Examination <sup>6</sup></b>		
Total Credits		36

<sup>1</sup> Students who lack intermediate training in microeconomics and macroeconomics must take ECON 5011 Economic Analysis.

<sup>2</sup> Depending on the student's preparation, permission may be granted to take a more advanced quantitative methods course in place of Applied Econometrics.

<sup>3</sup> Information about concentrations can be found below.

<sup>4</sup> Free electives should be chosen in consultation with an advisor.

<sup>5</sup> Information on the Practical Training requirement is available on the Fordham website.

<sup>6</sup> More information on the comprehensive examination can be found on our page on the Fordham website.

## Core Courses

The two economics courses and the two political science courses must be chosen from two of the available fields, as listed above. It is recommended, but not required, that the student cover all three fields. Depending on the student's preparation, the director may grant permission to take a more advanced level course instead of a particular core course. The student, however, should be aware that the comprehensive examination is based primarily on the material presented in the economic and political science core courses.
