

CONSTRUCTION MANAGEMENT (M.S.)

Admissions

Admission to the Master of Science in Construction Management is highly selective. Requirements include superior performance in attaining the bachelor's degree from an accredited institution. Successful candidates must demonstrate strong writing skills with the ability to effectively communicate concepts and ideas subtly and succinctly. Basic verbal, quantitative, and communications skills are assessed prior to matriculation, and any deficiencies corrected prior to beginning the program's core courses. A GMAT/GRE is not required but may be submitted by students for consideration towards admissions. The committee also considers the nature and extent of previous work with preference given to those possessing a minimum of two or more years of professional experience.
