

# REAL ESTATE DEVELOPMENT (M.S.)

## Overview

The Master of Science in Real Estate Development is designed to ensure that every graduate will have a grasp of the specialized legal, physical, analytical, and management concepts and skills required in the multidisciplinary, creative, and entrepreneurial world of real estate development. Important core elements include real estate finance, investment, law, land use, entitlements, design, planning, market analysis, feasibility analysis, construction, and project management.

## CPI Code

04.1001 - Real Estate Development.

You can use the CIP code to learn more about career paths associated with this field of study and, for international students, possible post-graduation visa extensions. Learn more about CIP codes and other information resources.

## Admissions

Admission to the Master of Science in Real Estate Development is highly selective. Requirements include superior performance in attaining the bachelor's degree from an accredited institution. Successful candidates must demonstrate strong writing skills with the ability to effectively communicate concepts and ideas subtly and succinctly. Basic verbal, quantitative, and communication skills will be assessed prior to matriculation, and any deficiencies corrected prior to beginning the program's core courses. A GMAT/GRE is not required but may be submitted by students for consideration toward admission. The committee will also consider the nature and extent of previous work, with preference given to those possessing a minimum of two or more years of professional experience.

## Who Should Apply

Applicants should have a bachelor's degree in business, accounting, finance, economics, design or construction or related field, and one year of professional experience; or a bachelor's degree in another field and two years of professional experience in real estate, design, construction, business, or a related field. Ideal candidates include the following:

- Real estate asset management personnel who want to go to the next level in their career.
- Real estate developers, investors, owners, and attorneys who want to further their professional skills.
- Design and construction industry professionals who want to better understand the broader perspective of the real estate developer or sponsor of a project.
- Current or former M.S. in Real Estate, M.S. in Construction Management, Advanced Certificate in Real Estate Finance, and Advanced Certificate in Construction Management students who wish to add a specialized designation in Real Estate Development.

## About the Curriculum

### Core

The 27-credit core curriculum is designed to give students an in-depth mastery of the academic disciplines and applied functional areas necessary to every real estate development professional's success.

The core leaves students with essential analysis, critical thinking and decision-making skills while creating a common student experience that fosters community. Students are required to complete all 10 courses in the core.

### Electives

The 6-credit elective course requirement offers students the opportunity to immerse themselves in specialized topics of their choice. Students may assemble their own elective sequences or select the courses that are part of the Advanced Certificate in Construction Management or the Advanced Certificate in Real Estate Finance.

### Capstone

The 3-credit capstone (REAL 6400) is the culmination of all the knowledge and skills acquired throughout the program. Students must be able to assimilate all that they have learned in the core courses and apply it within the context of a real-world setting. Subject to advisor pre-approval, students will undertake an applied project under the direction of a faculty supervisor, that upon completion, will demonstrate professional level mastery of the subject matter involved.
