This course will explore how the market structure has fundamentally changed after the 2008 liquidity and credit crisis, and how that crisis has affected liquidity, balance sheets, risk taking, and returns across the entire financial services industry. The new reality is that regulation has changed the landscape of Wall Street and the dynamic of how the sell-side and buy-side will interact in the foreseeable future.
GFGB 7033. Corporate Finance. (3 Credits)
Studies corporate finance and its specific decisions. Topics include evaluating capital expenditure proposals, forecasting financing requirements and selecting sources of financing. The course also discusses working capital management, dividend policy and contingency planning, and addresses the additional challenges of multinational firms.

GFGB 7034. Finl Statement Analysis. (3 Credits)
Gives students a better understanding of financial statements and the information they communicate on the operating, investing and financing activities of corporations. Focuses on the impact of financial accounting principles, disclosure standards and alternative accounting practices on financial reports. Examines and evaluates traditional and non-traditional methods of financial statement analysis.

GFGB 7035. Intl Trade & Development. (3 Credits)
The first half of the course focuses on the theories and practices of world trade. Topics include comparative advantage, the changing trade competitiveness of nations and protectionism. During the second half, the focus shifts to developing countries: the process of economic development, including the contribution of foreign investment and technology as well as investment and trade opportunities, policies and regulations.

GFGB 7036. Research in Value Invest. (3 Credits)
Prof. Johnson, a leading expert in the field of Value Investing, will lead a small, project based seminar that focuses on best practices in the field. Selective enrollment by approval of the instructor.

GFGB 7037. Applied Investment Principles. (3 Credits)
This course provides applications that follow Principles of Finance or Global Investment Principles. EXCEL models will be applied to CAPM modeling of Risk and Return, to Factor Models, and to Portfolio Attribution. Data may be drawing from Boomerang, Yahoo Finance, and other sources.

GFGB 7038. Applied Quant Invest Strateg. (1.5 Credits)
This course provides applications that follow Financial Econometrics, using SAS or similar software. The techniques from that course will be reviewed, extended, and applied to stock return and accounting data. The focus will be on anomalies, predictions, and multifactor models.

GFGB 7039. Computational Fin for MSGF. (3 Credits)
The course will introduce students to programming in R and Python, and will provide many basic finance applications.

Attributes: ABFF, GFCR.

GFGB 7040. Lectures in Applied Port Mgt. (3 Credits)
This advanced Portfolio Management course quickly reviews Modern Portfolio Theory (MPT) conceptual underpinnings and builds on MPT 1.0. It delves into contemporary liability driven asset allocation, MPT 2.0 and portfolio management industry practices, issues and concerns. Lectures, problem solving, and self-study along with extensive hands-on tools using Microsoft Excel based models will be used to provide a practitioner’s perspective. We will review and demo contemporary asset allocation optimization and forecasting techniques, new asset class pricing and valuation, performance and risk attribution, tail risk measurement and management tools etc. using real time vendor based (third party) solutions. As prerequisites - the student should have class exposure to investment and portfolio analysis, Excel, stats, and basic regressions.

GFGB 7041. British Economy and Brexit. (3 Credits)
This intensive course is designed to give students an in-depth understanding of Brexit including the implications for the British economy and the companies that operate in it. Students meet three times as a class in preparation for travel to England, scheduled for May 10-20, 2017. This course may count toward a Finance or Management concentration. Please see your program director or dean-adviser for further registration information.

GFGB 7042. Sustainability and Finance. (3 Credits)
In this course we explore how the evolving needs of society are changing the way financial theories, tools, and techniques are conceived and applied.

GFGB 7043. Financial Innov & Institu. (3 Credits)
This course will introduce major financial institutions, such as commercial and investment banks, insurance companies, mutual funds, hedge funds, and credit rating agencies with a focus on their risk contributions to the modern financial system. We will examine their credit risk in depth, and how to model and analyze credit risk and products. We will also understand new financial sector regulations and systemic risk by focusing on Dodd-Frank, market based stress-testing, Comprehensive Capital Analysis and Reviews (CCAR), and other methods. This course will help prepare students for the job market at financial institutions and regulators.

GFGB 7044. Auto Trading Systems - Intro. (3 Credits)
This course discusses key issues involved in the design of an Auto (Algorithmic) Trading Systems, and provides hands-on experience. The end product is a prototype Auto Trading System designed by students that successfully trades in the real market (stock, futures, option) using live data feeds from exchanges. Issues covered include: typical structures of trading systems; efficient processing of live information; minimizing trade slippages; handling large number of securities; asynchronous information processing; GUI interfaces; etc. Industry experts are invited to discuss new developments. Key programming techniques will be reviewed at the beginning, very briefly. The course is suitable for students in MSGF, MSQF, and other master level students with programming skills equivalent to one formal course (e.g. R, Matlab, VBA, etc). Students with less programming skill may take the course if approved by instructor.

GFGB 7045. Investing in European Union. (3 Credits)
The EU is the largest market for US exports and foreign direct investment. The objective of the course is to familiarize students with the process of regional integration and monetary unification in Europe and the opportunities and challenges which this has created for foreign investors. Regulatory differences between the US and EU in competition laws and financial sector will related to the investment climate for foreign companies. The course will highlight that despite the deep economic and financial integration in the EU, significant country- and regional differences exist. This will be assessed through the analysis of several Harvard Business case studies covering different country- and industry experiences.
GFGB 7046. Fintech - An Introduction. (3 Credits)

Fintech is a new and emerging field of technology that is disrupting the way that many companies are conducting business. Fintech has already “forever” changed many sectors including mobile payments, social media, money transfers, loans, fundraising, travel, trading and asset management. It has completely revolutionized the way companies are developing products, conducting research, establishing directed sales and marketing plans, and utilizing start-up technology. Businesses are using FinTech to expand their products and services at a fraction of its previous cost. Entrepreneurs are utilizing FinTech as a central foundation for research, funding, and product development. Customers are already utilizing FinTech as part of their daily lives - mobile apps, social media, banking, online shopping, entertainment and gaming. This course will introduce students to the breadth of FinTech, and touch upon the technical underpinnings.

GFGB 7047. Stress Tests and Cap Adequacy. (3 Credits)

The financial crisis of 2007-08 taught us all a lesson: that preparedness is everything. How resilient and prepared will we be, and how fast will we be able to recover? This is the key focus of this course: how to plan for moments of distress so that firms such as yours have capital of a sufficient quality to survive potential storms. We will demonstrate how to create a robust capital plan and test it for moments of hypothetical stress. We will investigate exactly how a bank holding company and an insurance company should conduct their capital plan, highlighting the significant differences between the two industries. By the end of the course, you will be able to create a capital plan for your business on your own.

GFGB 7048. Dynamics of Banking & Fin Mkts. (3 Credits)

This course is designed to provide students a well-rounded and hands-on perspective on the practical functioning and decisions in financial markets and banking.

GFGB 7049. Global Financial Markets and the Macro-Economy. (3 Credits)

The overarching goal of this course is to give students an understanding of the forces affecting real income growth, inflation, and asset prices in the world economy. The specific topics the course will address include: the operation of monetary and fiscal policy; how those policies affect financial markets and the broader economy; the determinants of countries’ long-term rates of growth; the factors behind the recent financial crises in the U.S. and EU; the features of currency crises, business cycles, and financial crises historically; and the relationships linking global interest rates, exchange rates, and inflation rates. The course will combine economic theory and empirical evidence to provide a toolbox of skills that students can use to analyze these and similar issues going forward.

GFGB 7050. Machine Learning for Finance. (3 Credits)

Machine learning (ML) methods of data analysis and prediction are transforming the financial landscape. This course provides a broad overview, knowledge, and practical skills of Machine Learning (ML), focusing on applications in Finance. The course will introduce various ML methods including supervised and unsupervised learning, as well as deep and reinforcement learning. Students will understand the general landscape of available ML algorithms and learn to implement the most appropriate solutions of a given problem. The course will use Python programming and open source Python packages, and requires knowledge of statistics. Class sessions will provide the basics of Python.

Attribute: ABFF.

GFGB 7051. EconTech: Econ & Data Mining. (3 Credits)

The overall financial markets and individual company performance are largely driven by the growth rate of the economy, which in turn is affected by monetary, fiscal, and currency policies. Our understanding and forecasting ability are based on analyzing and mining available data. This course will examine data and data mining to better understand a range of policy and output variable, and how they interact under different regimes.

Attribute: ABFF.

GFGB 7052. Empirical Value Investing. (3 Credits)

This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed.

GFGB 7053. Investor Relations. (3 Credits)

A corporate Investor Relations program formulates and communicates the financial performance and strategic direction of diversified corporations to the global investment community. Investor Relations professionals are well versed in accounting, compliance, finance, governance, marketing and communications. They collaborate with senior management and the Board of Directors to convey and interpret corporate matters to the public. This course will teach students the skills and competencies required to become a corporate Investor Relations professional. The course utilizes a course textbook, case studies, investor relations guest speakers and participation in investor relations events.

GFGB 7054. Wharton-Impact Investment Workshop. (3 Credits)

Students will attend workshops on ESG (Environmental, Social, and Corporate Governance) and Impact Investing. They will compete in teams of three to five against other national schools to construct a 100% Impact Portfolio. Since this is a two-semester competition, only students who participated in Fall may register in Spring.

GFGB 7055. MSGF Research Seminar. (3 Credits)

Students will learn from industry practitioners how textbook concepts are applied in the finance industry. Guest lecturers will cover areas which include wealth management, equity research, portfolio management, investment banking, risk management and FinTech.

GFGB 7056. Blockchain Tech & App Dev. (3 Credits)

The main objective of this course is to familiarize you with the ecosystem, technologies, and development skills surrounding Blockchain. The course starts with foundational concepts such as distributed state machine, hash tree, P2P network, GPU processing, cryptocurrency, and cryptography. Using both simulated sandbox and locally installed environments, the course then guide you through the development, front-end integration, and deployment of Blockchain-based smart contracts. Other topics covered include rapid prototyping, design patterns, and agile process to maximize the success likelihood for Blockchain projects. Prerequisites: Proficiency in computer programming; basic knowledge in analysis and linear algebra.

GFGB 7057. Contemp Develop in Corp Fin. (3 Credits)

This course will cover a number of important topics of current interest to the corporate finance industry, such as : executive compensation and governance; utilizing and responding to fintech; importance of the growth of intangible assets; importance of large corporate cash holdings invested in risky assets, such as hedge funds and private equity.

Prerequisite: GFGB 6006.
GFGB 7058. Behavioral Finance. (3 Credits)
Over the past several decades, the field of finance has developed a successful paradigm based on the notions that investors and managers are generally rational and that the prices of securities are generally efficient. In recent years, however, anecdotal evidence as well as theoretical and empirical research has shown this paradigm to be insufficient to describe various features of actual financial markets. In this course we will use psychology and more realistic settings to guide and develop alternative theories of financial markets. We will examine how the insights of behavioral finance complement the traditional paradigm and shed light on investors' trading patterns, the behavior of asset prices, corporate finance, and various financial market practices through lectures, case studies, and our own discussions.

GFGB 7059. Student Managed Investment Fund: ESG-Impact. (3 Credits)
In this joint graduate and undergraduate course, students will apply their investment and portfolio skills in the analysis and selection of a real set of securities and opportunities. Selection will focus on ESG investments and/or those that stress societal impact.

GFGB 7060. Practical Exploration of M&A. (1.5 Credits)
This class will provide an introduction to the essential elements of large cap M&A transactions from the perspective of real, recent examples taught by a senior investment banker.

GFGB 7061. Corporate Valuation. (1.5 to 3 Credits)
The objective of the course is to learn firm, debt, and equity valuation methods from both a conceptual and practical framework. It combines both accounting and finance into practical valuation frameworks. Adequate accounting and finance backgrounds are required. Working knowledge of Excel is important.

GFGB 8001. Iss in Fin: Modern Fin’al Ana. (1.5 Credits)
Learn how the financial services industry applies valuation techniques in a deal context! In this mini-course, you will demystify the theory behind the analytics and ultimately appreciate the “art” and “science” of valuation analytics. What is a company worth? What is someone willing to pay? The answers depend on: who the seller is; who the potential buyer(s) is; the context of the transaction and the current market conditions. The seminar is ideal for individuals are currently working in or are considering a career in the following disciplines: • Financial services industry (investment banking, consulting, research, etc.) • Finance or strategic development group of a corporation – mid-sized thru multinational • Marketing, brand management or a non-finance field… namely anyone interested in gaining a solid foundation in valuation analytics in a condensed, real-world context.

GFGB 8002. Fin’Imts: Cncpts/Methods/Trd. (1.5 Credits)
This course provides a real-life, hands-on experience of financial market activity and its impact on the broader economy. Throughout the course, students will participate in a trading game to assess and manage real world factors such as counterparty risk, liquidity, leverage, etc.

GFGB 8004. Iss in Fin: Delevgd Finance. (1.5 Credits)
This course discusses the use of debt in Leverage Buyouts, recapitalization, restructuring and refinancing, including Debtor-in Possession (DIP) financing. Students develop practical insights by utilizing case studies from several public highly leveraged firms; practical insights are critically reviewed.

GFGB 8005. Business Communication for Finance — A. (1.5 Credits)
Effective communication is the ability to convey your ideas in a logical and convincing manner in order to persuade others to take an action, modify their viewpoint, or at least be open to your perspective. This requires practice for many different situations, whether it is to promote an investment, prioritize your project, or convince your manager why you deserve a promotion. Simply being fluent in a language is not enough to communicate effectively. One must also know how to construct a compelling narrative to address the priorities, sensitivities, and concerns of your audience. As the world becomes more technical and data-driven, it is the ability to effectively communicate, verbally and in writing, which will be the differentiator to progress in your career. Teamwork, leadership, and management are all skills rooted in strong communications skills – again, just being able to speak a language in not enough to be an effective presenter, negotiator or salesperson. The only way to improve is through practice, so the course will be focused on student presentations on a varied set of topics, from current events to investment ideas.

GFGB 8006. Business Communication for Finance - B. (1.5 Credits)
This class will enable qualified students to more fluently converse with professionals on a variety of financial topics, and will improve students’ ability to achieve success as they enter the business community.

GFGB 8007. Computational Finance for MSGF - R. (1.5 Credits)
This course will introduce students to the R programming language, with applications to finance.
Mutually Exclusive: GFGB 8008.

GFGB 8008. Computational Finance for MSGF - Python. (1.5 to 3 Credits)
This course will introduce students to the Python programming language, with applications to finance.
Mutually Exclusive: GFGB 8007.

GFGB 8009. Mergers and Acquisitions. (1.5 Credits)
Mergers and acquisitions constitute some of the most important growth, diversification, and globalization strategies for firms. Finance, specifically corporate finance, plays an important role in M&A because the completion of a deal requires careful attention to valuation, risk management, and the designing of an appropriate payment package. That design is an important part of a deal for reasons ranging from accounting and tax to synergies and stock price. In this course, students will examine these features through a number of cases and readings. We will also briefly discuss issues of corporate governance, securities law, and corporate law whenever the context requires us to do so.

GFGB 8010. Advanced Finan Modeling. (1.5 Credits)

GFGB 8011. Blockchain. (1.5 Credits)

GFGB 8012. Digital Currencies. (1.5 Credits)

GFGB 8013. Acct &Corp Fin-Valuа&Modeling. (1.5 Credits)
This course expands on valuation techniques discussed in Modern Financial Analysis and Valuation Techniques. Students will have the opportunity to learn the modeling techniques used by today's Wall Street practitioners associated with Discounted Cash Flow Analysis, Merger Analysis, Purchase Price Allocations and Synergy DCFs. COREQUISITE: GFGB 8001.

GFGB 8014. Empirical Value Investing - A. (1.5 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The ‘A-section’ will examine several topics / methods. It is a pre-req for the ‘B-section,’ which will investigate the same issues more fully.
GFGB 8015. Empirical Value Investing - B. (1.5 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The ‘A-section’ is a pre-req for the ‘B-section,’ which will investigate the same issues more fully.

GFGB 8016. Disruption in Finan Services. (1.5 Credits)
Graduate students will learn directly from industry experts how new technologies, changing demographics and investor preferences are significantly impacting the delivery of wealth management, creation of investment products and capital market mechanisms. From the global adoption of crypto currencies to the trillion dollar tsunami of money flowing into passively managed ETFs, students will be exposed to the current and future implications of these ‘disruptions’ and gain helpful insight and intelligence impacting their careers. We will focus on one “disruption” per week with subject matter experts explaining the economic and cultural implications for both winners and losers. This course will be valuable to all students navigating future employment opportunities in financial services.

GFGB 8017. Fintech Lending & Payments. (3 Credits)
This course will consider modern on-line methods of lending and borrowing that may be outside of the traditional banking environment. The main players in the space will be analyzed, as well as their websites. Students will learn their business models, methods of credit analysis, and measures of return to investors.

GFGB 8018. Fund Strategies and Performance. (3 Credits)
This course examines how money is managed by organizations such as university endowments, pension funds, mutual funds, hedge funds, and private equity funds. It provides an advanced treatment of asset allocation and equity portfolio strategies, and a performance evaluation of U.S. mutual funds and hedge funds. The course provides a deeper understanding of the measurement of risk and its relationship to return, as well as of multi-factor models. Implementation issues, including statistical estimation, back-testing, portfolio construction, and performance evaluation, are covered. Some programming skill (likely Python/SAS) will be important, and partly taught.

GFGB 8951. Internship & Project Report. (1.5 to 6 Credits)
Residential students have the option of including up to 6 credits of internships as part of their program of study. Please note that an internship is not required as part of the program; students may complete any two MBA or MSGF courses in lieu of an internship.

GFGB 8999. Independent Study. (1 to 3 Credits)
Independent study.

Quantitative Finance Courses

QFGB 8900. Greenpoint/Finastra Project. (0 Credits)
The goal of this program is conceptual learning and hands-on research with real-life portfolios and enterprise systems, including the Finastra Capital Markets Fusion Platform. At the end of the program students are expected to have enriched their learning—and their CVs—with projects that have direct industry applicability and through achievements that will enhance their employment prospects and career growth. The research will include FRTB QIS on a portfolio, model sensitivity of PLA tests, impact of specific portfolio features, and risk parameters on FRTB SA and IMA charges.

QFGB 8901. Accounting I. (1 to 3 Credits)
Provides a basic understanding of the preparation and analysis of corporate financial statements. Introduces generally accepted accounting principles (GAAP) and the standard-setting process. Discusses current issues in the reporting process, such as the benefits and problems of the Sarbanes-Oxley Act.

QFGB 8902. Basics of Economics. (1 to 3 Credits)
Covers both microeconomics and macroeconomics. Microeconomics topics include theory of demand and the nature of profit and utility-maximizing market equilibrium that constitute the economic basis of finance theory and applications. The macroeconomics segment defines the major components of the economy, outlines a simple model of long-run, real economic behavior with competitive, market clearing prices, then establishes a companion model of short-run adjustments without flexible pricing.

QFGB 8903. Basics of Finance. (1 to 3 Credits)
Provides a conceptual framework for decision-making processes in many diverse areas of finance. Concepts including time value of money, stock and bond valuation, project and firm valuations, risk and return measures, portfolio management, basic CAPM and APT, diversification and hedging are reviewed. Basic theoretical aspects of corporate finance, such as dividend policy and capital structure, are also introduced.

QFGB 8905. Math for Quantitative Finance. (1.5 Credits)
Reviews the basics of mathematics in preparation for advanced courses in the MSQF program. Topics include: Special functions, Multivariate calculus, Optimization, Integration, Differential equations (ODE and PDEs), and Linear algebra.

QFGB 8906. Probability and Statistics. (1.5 Credits)
Reviews the basics of probability and statistics in preparation for advanced courses in the MSQF program. Topics include special distributions like binomial, poisson, normal, lognormal, gamma, beta, and fat-tailed distributions.

QFGB 8907. Introduction to Web Technology: Blockchain. (0 Credits)
Blockchain technology is affecting the financial services industry and considered to be the biggest disruption in payments, financial contracts, and almost all other aspects of the financial services industry. The goal of this course is to give students a basic understanding of and hands-on experience with the web technology tools necessary for blockchain technology. This 0-credit course will be offered in the fall and must be taken prior to Blockchain Application Development course offered in the spring, which will involve development of a real blockchain application via various hands-on projects. Second-year M.S. in quantitative finance students are encouraged to take this introductory course in the second half of the fall term. The instructor will be a top industry expert in blockchain technology and its applications in the financial services industry.

QFGB 8911. Adv Financial Modeling. (2 Credits)
Provides the foundation for developing skills in the quantitative analysis of financial decisions, primarily using Microsoft Excel. Topics include business planning, forecasting, sensitivity and scenario analyses, risk and return measures, portfolio analysis, binomial option pricing and Value-at-Risk (VaR) analysis. Empasizes practical skills to produce computer models that are useful for a variety of decision-making purposes.

Attribute: BUAN.
QFGB 8914. Basic of Derivatives. (2 Credits)
Introduces deferred delivery (i.e. exchange-traded futures and OTC - traded forward) markets and option markets. The course covers the following: (1) briefly examines the institutional features of these markets; (2) discusses hedger, arbitrageur and speculator strategies; (3) provides and analytical foundation for the pricing of these contracts; (4) reviews some of the available empirical evidence concerning these markets; and (6) uses the data to perform small-scale suggestive tests of the theories and strategies.

QFGB 8915. Introduction to Stochastic Calculus. (2 Credits)
Focuses on the practical applications of stochastic differential equations subject to appropriate boundary conditions, solving valuation problems, and using measure-transformations as required in advanced financial engineering practice to value assets within a risk-neutral framework. Builds a theoretical foundation for continuous-time models that are essential for the pricing and hedging of financial derivatives.

QFGB 8923. Machine Learn & Econometrics. (2 Credits)
Covers estimation of parametric and non-parametric techniques commonly used in finance, applying high-frequency financial databases. Discusses properties of financial data, linear time series data analysis, basic theory of statistical inference with linear models, general linear models, conditional Heteroskedasticity models, nonlinear models and Bayesian inference and estimation.

QFGB 8924. Equity Style Derivatives. (2 Credits)
Designed to complement and extend the topics discussed in Basics of Derivatives (QF 8914), this course includes all types of derivatives where a commodity, equity, or currency is the underlying asset. Hull's software and a Bloomberg/Reuters terminal are used for pricing options and gathering data. The data to perform small-scale suggestive tests of theories and strategies is used.

QFGB 8925. Simulation Applications. (2 Credits)
Introduces state-of-the-art computational techniques essential for implementing financial models, pricing derivatives, obtaining numerical solutions to estimation problems, and simulating stochastic systems in risk management. Provides conceptual framework for gaining experience on simulation design and implementation using METLAB. This course builds a skill set that combines financial modeling, data analysis, and computation.

Attributes: ASDM, BUAN.

QFGB 8926. Finance Theory. (2 Credits)
Introduces financial theory with a particular emphasis on portfolio choice and the fundamentals of asset pricing. Focuses on both the partial equilibrium theory (CAPM), and the general equilibrium theory (Arrow-Debreu Pricing Theory) with brief introductions on the arbitrage-based theories. Introduces the basics of asymmetric information and how the problems it imposes can be mitigated via security design. It also emphasizes understanding of the theories of Discrete-Time Asset Pricing; studies the application of the theory of stock options to real options and complex corporate liabilities; and explores the basic foundation of the GMM tests of asset-pricing theories.

QFGB 8927. Introduction to C++. (2 Credits)
This course will introduce quantitative finance students to programming in C++.
QFGB 8943. Large-Scale Data Modeling. (2 Credits)
Explores financial modeling topics using large data sets and various econometric techniques applied in a variety of financial problems. Topics include modeling the yield curve in the US and other countries, application of pattern recognition techniques in developing stock-rating systems, factor models in portfolio construction, and portfolio performance evaluation. Emphasis on project analysis using SAS to process large data sets and develop appropriate models for solving real problems in equity and fixed-income research.

Attribute: BUAN.

QFGB 8944. Credit Risk Mgmt. (2 to 3 Credits)
Introduces modern credit risk models with particular focus on credit derivative instruments. Focuses on derivative market methods, rather than accounting analyses of business risks. Exposes students to institutional practices and commonly used data. Students will be expected to thoroughly understand professional software output, along with the risks and rewards of credit product strategies.

QFGB 8946. C++ for Finance. (2 Credits)
This course uses C++ to solve Finance problems. Two types of students will take this course. One type is the student with a strong computer programming background (perhaps an engineering undergraduate), but who has not taken C++ or applied it to finance problems. The other type may have been a finance undergraduate student who has little computer programming experience before entering the MSQF program. The latter student must take the spring introduction to C++ course offered by the computer science department before taking this course in their second fall term.

QFGB 8947. Advanced Derivative Pricing. (2 Credits)
This course covers advanced option pricing.

QFGB 8948. Quantitative Methods for Portfolio Management. (2 Credits)
Introduces the scope of the quantitative concepts used in asset management, with focus on practical application, challenges and limitations in constructing optimal portfolios, evaluating performance and portfolio risk. Involves extensive discussions of case studies and group project.* *Subject to NY Approval.

QFGB 8949. Advanced Financial Econometric. (2 Credits)
This course takes up Bayesian estimation of small-scale financial sector and macro-econometric models. Counter-factual simulations will also be used, as well as monte-carlo methods for evaluating confidence intervals. In addition to Bayesian estimation, the course will make use of extensive data sets to investigate topics such as contagion effects across countries in financial markets, and neural networks for predictive accuracy. * *Subject to NY Approval.

QFGB 8950. Alternative Investments. (2 Credits)
The course is an introduction to the rapidly evolving universe of alternative investments. Delivered in modules, the course covers a broad array of alternative strategy classes(Quantitative/Systematic, Fundamental Long/Short, Global Macro, Private Equity) ranging across all major asset classes (Equities, Fixed Income, Currencies, Commodities, Derivatives).* *Subject to NY Approval.

QFGB 8951. Internship and Project Report. (2 to 4 Credits)
A professional project report and presentation are the final outputs of this course. Students complete these projects under the supervision of a faculty member. Both individual and group-projects are possible.

QFGB 8952. Business Comm for Quants A. (1 Credit)
Covers the basics of professional speaking and writing. Develops oral and written presentation skills essential for successful careers. Coordinated with summer term internship to give students the opportunity to apply their new communication skills in a business setting.

QFGB 8953. Research Seminar 1. (1.5 Credits)
This fall course features a series of lectures from the finance industry. They discuss research projects that their companies are working on.

QFGB 8954. Research Seminar 2. (1.5 to 3 Credits)
This spring course features a series of lectures from the finance industry. They discuss research projects that their companies are working on.

QFGB 8955. Computational Finance. (2 Credits)
This course provides a hands-on in-depth introduction to the Python language as well as surveys tools used in data and computational science, focusing on their application to the field of quantitative finance.

Attribute: BUAN.

QFGB 8957. Applied Capital Markets and Financial Regulations. (3 Credits)
This course will explore how the market structure has fundamentally changed after the 2008 liquidity and credit crisis, and how this crisis has impacted on liquidity, balance sheets, risk taking, and returns across the entire financial services industry. The new reality is that regulation has changed the landscape of Wall Street and the dynamic of how the sell-side and buy-side will interact in the foreseeable future.

QFGB 8958. Lectures in Applied Port Mgt. (3 Credits)
This advanced Portfolio Management course quickly reviews Modern Portfolio Theory (MPT) conceptual underpinnings and builds on MPT 1.0. It delves into contemporary liability driven asset allocation, MPT 2.0 and portfolio management industry practices, issues and concerns. Lectures, problem solving, and self-study along with extensive hands-on tools using Microsoft Excel based models will be used to provide a practitioner’s perspective. We will review and demo contemporary asset allocation optimization and forecasting techniques, new asset class pricing and valuation, performance and risk attribution, tail risk measurement and management tools etc. using real time vendor based (third party) solutions. As prerequisites - the student should have class exposure to investment and portfolio analysis, Excel, stats, and basic regressions.

QFGB 8959. Machine Learning for Finance. (2 Credits)
This course explores the world of Machine Learning and financial applications. We will investigate how it uses large amounts of structured or unstructured data to discover patterns and hidden topics, transforming raw data into knowledge for decision making. We will investigate real and practical examples from finance, tracing parallels between data science, statistics, and data analytics.

Attribute: BUAN.

QFGB 8960. Advanced C++ for Finance. (2 Credits)
Advanced C++ for finance.

QFGB 8961. Business Comm for Quants B. (1 Credit)
Covers the basics of professional speaking and writing. Develops oral and written presentation skills essential for successful careers.

QFGB 8962. Dynamics of Banking & Fin Mkt. (3 Credits)
This course is designed to provide students a well-rounded and hands-on perspective on the practical functioning and decisions in financial markets and banking.
QFGB 8963. Stress Tests and Cap Adequacy. (3 Credits)
The financial crisis of 2007-08 taught us all a lesson: that preparedness is everything. How resilient and prepared will we be, and how fast will we be able to recover? This is the key focus of this course: how to plan for moments of distress so that firms such as yours have capital of a sufficient quality to survive potential storms. We will demonstrate how to create a robust capital plan and test it for moments of hypothetical stress. We will investigate exactly how a bank holding company and an insurance company should conduct their capital plan, highlighting the significant differences between the two industries. By the end of the course, you will be able to create a capital plan for your business on your own.

QFGB 8964. Arpm Bootcamp-Intensive Quant. (3 Credits)
Consolidates portfolio and risk manager’s expertise into a structured and rigorous quantitative framework. Empowers avid learners with background in hard sciences to gain the deep technical knowledge necessary to operate across the complex world of quantitative trading, asset management, and risk management. Topics include data science and machine learning; classical / Bayesian multivariate statistics, and econometrics; financial analytics; market, credit & liquidity risk management; estimation error and model risk; and much more. ARPM Lab online (theory, case studies, Python & MATLAB code, slides, exercises). Obtain ARPM Certificate of Attendance & 40 GARP CPD.

QFGB 8965. Trading - Market Making and Algorithms. (3 Credits)
This course will introduce students to basic market microstructure, algorithmic trading, and quantitative investment strategies. Mathematical and statistical techniques along with their computational implementation in R or Python will be used throughout the course.
Prerequisites: QFGB 8911 and QFGB 8923 and QFGB 8926.

QFGB 8966. Behavioral Finance. (2 Credits)
Over the past several decades, the field of finance has developed a successful paradigm based on the notions that investors and managers are generally rational and that the prices of securities are generally efficient. In recent years, however, anecdotal evidence as well as theoretical and empirical research has shown this paradigm to be insufficient to describe various features of actual financial markets. In this course we will use psychology and more realistic settings to guide and develop alternative theories of financial markets. We will examine how the insights of behavioral finance complement the traditional paradigm and shed light on investors’ trading patterns, the behavior of asset prices, corporate finance, and various financial market practices through lectures, case studies, and our own discussions.

QFGB 8967. Bank Capital and CCAR. (2 Credits)
This course will provide an overview of the range of risks that banking institutions undertake to perform their role as credit intermediaries. It will delve into the choices that bank managers make to measure the risks they undertake, and will explore the approaches that a bank can take to translate risk measurement into stress tests of a bank’s capital position. Students will have an opportunity to apply methodologies discussed while developing a model to stress test a bank’s exposure to market, credit, or operational risk for the purpose of testing the adequacy of a bank’s capital position.

QFGB 8968. Blockchain Technology and Application Development. (3 Credits)
The main objective of this course is to familiarize you with the ecosystem, technologies, and development skills surrounding Blockchain. The course starts with foundational concepts such as distributed state machine, hash tree, P2P network, GPU processing, cryptocurrency, and cryptography. Using both simulated sandbox and locally installed environments, the course then guides you through the development, front-end integration, and deployment of Blockchain-based smart contracts. Other topics covered include rapid prototyping, design patterns, and agile process to maximize the success likelihood for Blockchain projects. The lab portion of this course involves weekly submissions of programming exercises, assignments, and project deliverables. Prior knowledge required: Proficiency in computer programming; basic knowledge in analysis and linear algebra.
Attributes: BUAN, ISEL.

QFGB 8969. Systematic Investment Strategies. (2 Credits)
This lecture series will cover a variety of topics on quantitative investment management. We start with an overview of the evolution of the current state of affairs, both with respect to individual strategies as well as topics related to their management within the context of a portfolio. We will first cover the basic set of thematic strategies (e.g., value/reversion, momentum/trend, carry, volatility, etc.) across different asset classes with some representative specific strategies covered in detail. We will then consider extensions and refinements. We will also cover various portfolio construction approaches for baskets of systematic strategies and their consequences. The lecture series will feature readings from “Wall Street” practitioner research series at the major asset managers and investment banks, with guest lecturers from industry on specific topics. Students will be expected to participate via data collection, strategy construction, and back-testing analysis, etc.

QFGB 8970. Programming with Python. (3 Credits)
Do you want to be able to solve business problems through programming and coding? This courses introduces key programming concepts, techniques, and tools. Students will learn programming and coding using the widely used Python programming language. This section of Programming with Python will include additional finance applications.

QFGB 8971. Artificial Intelligence. (3 Credits)
The goal of this course is to acquaint you with the objectives and methods of researchers and practitioners in artificial intelligence. We will explore numerous aspects of computational models of intelligence including search and problem solving, planning, machine learning, logic and reasoning, machine perception and robotics, natural-language processing, speech recognition, vision, and cognitive science. We’ll also discuss genetic algorithms, fuzzy logic and deep machine learning including neural networks. The ethics of artificial intelligence is also addressed. The course is organized as a survey, with hands-on assignments in open source artificial intelligence tools.
QFGB 8972. Deep Machine Learning. (3 Credits)
The goal of this course is to acquaint you with the objectives and methods of deep machine learning (DML). We will explore and learn the basic types of deep neural networks including convolutional, recurrent, and generative adversarial, and the type of data each is designed for. Key additional topics include learning techniques to improve training, preventing overfitting, and finding best practices for minimizing error. Students will study the major technology trends driving DML. A key takeaway is a working knowledge of the vocabulary of concepts and algorithms in DML. The challenges and issues surrounding the use of DML including design issues, ethics, governance, ownership of data, privacy, and security standards. Quality control and validation are also discussed. Emphasis is on business applications. The course is organized as a seminar-style course, with hands-on assignments in DML tools. Familiarity with basic calculus and linear algebra expected.

QFGB 8973. Cybersecurity Analytics for Business. (3 Credits)
Cyber attacks pose an increasing threat to the nation's critical infrastructure, including computer networks, cyber-human systems, business applications, sensor networks, and mobile devices. This course provides an introduction to data analytics for multiple aspects of information security and focuses on using data analytics methods for discovering anomalies pertaining to cyber threats through hands-on exercises in programming, visualization, statistical analysis, machine learning, and big data analytics tools.

QFGB 8999. Independent Study. (1.5 to 3 Credits)
Independent study.

Information Systems

The information systems (IS) curriculum develops students into leaders who can create business value and gain competitive advantage by harnessing the power of technology and business analytics. With their deep understanding of both business and technology—and an industry-current skill set—IS graduates are highly sought after by employers.

Digital technologies enable companies to optimize their business processes, create new products and services, design innovative business models, and either leverage their competitive advantage or respond to threats. Electronic commerce, social networking, mobile computing, digital goods and services, cloud computing, and big data are among the trends that are transforming commerce and shaping a new economy.

Programs

The following are the current options to pursue a degree in information systems:

- M.B.A. Concentration in Information Systems (p. 672)
- M.S. in Information Technology (p. 681)
- M.S. in Business Analytics (p. 677)
- M.B.A. Secondary Concentration in Electronic Business (p. 669)
- M.B.A. Concentration in FinTech (p. 670) (Interdisciplinary)
- M.B.A. Secondary Concentration in Blockchain (p. 668) (Interdisciplinary)

For students pursuing an IS degree, the faculty recently redesigned the curriculum to most effectively position students for the workplace roles that are in greatest demand, creating three career-oriented tracks. Students can select courses from among them or choose one as a specialty.

Business Analytics Track

Business analytics is a fast-growing area in enterprises of all kinds. This track will prepare students to collect, clean, structure, integrate, and analyze data to drive management insight, informed decision-making and superior business performance. Its courses provide familiarity with concepts, frameworks, software tools and techniques, and trends in business analytics.

Digital Business Innovation Track

This track focuses on technology as an engine for business transformation. Students acquire an in-depth understanding of digital business trends such as e-commerce, mobile commerce, cloud computing, and social technologies, and learn how to employ them at established companies or in startups. Students will be able to understand and exploit disruptive digital innovation.

Enterprise Architecture Track

A great organization is built on great business systems. The enterprise architecture track prepares students to design and build those systems—and to implement them, manage them, and leverage them to propel a company forward. Coursework equips students to handle enterprise-wide integration, enable information sharing, devise novel services and create innovative business models. This track also includes course options about information technology applications within a specific industry, such as health care.

More information on the tracks can be found in the MBA concentration page (p. 672).

Courses

Information Systems (ISGB) Courses

ISGB 6910. Business Tech & Analytics. (3 Credits)

FT MBA CORE/ PMBA FLEX CORE COURSE (Formerly 'Business IT')

This course focuses on applied tech and analytics skills for business managers/leaders, and strategic use of digital technologies in business. It will help students meet two objectives: (1) Make effective business decisions involving digital technologies and data; (2) Build essential hands-on software skills. We will use and demo a number of hands-on tools useful for managers and business leaders. Students will analyze case studies and will learn to become valuable participants in business decisions involving digital technologies. They will learn how to evaluate business applications, propose digital innovation ideas and work on a semester-long project to make data-driven decisions or develop a proposal/prototype for a company. Topics include enterprise applications, systems development processes, data management, data visualization, data mining, web analytics, IT for competitive advantage, e-commerce, creating a web presence, network effects and platform strategies, digital business models, digital innovation foundations & tech trends, cloud strategies, mobile commerce, social business technologies, adtech and cybersecurity. The course emphasizes applied active learning and a global perspective, informed by industry speakers from the vibrant NYC tech ecosystem. (This is an MBA core course, and a recommended course for other MS students interested in an introduction to business tech and analytics).

Attributes: BUAN, ISEL.
ISGB 7901. E Business Strategies & Appl. (3 Credits)
This course introduces students to concepts, issues, technologies and trends essential to conducting business in the Internet-based digital economy. The main question answered is: How do you create a successful web presence for your company? The course emphasizes marketing aspect of e-business and hands-on skills on building effective business websites. The course reviews common e-business models (e.g., e-tailing, digital content, digital social media, etc) and applications such as web-based customer relationship management (CRM) and e-procurement. It addresses search engines, web analytics & metrics and discuss cutting-edge issues including e-retailing, content providers, Internet advertising technologies, e-payment systems, regulatory & tax issues, security & privacy concerns and mobile commerce. This course has a global focus through case studies in a variety of business sectors, including retailing, financial services, information services and global e-commerce. Hands-on skills include use of HTML, CSS, Javascript, Wordpress, and other related technologies and platforms. In a group project, students will propose an e-commerce business strategy and create a website to implement it.
Attributes: ABEB, ABEP, ABIB, ISDB.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7902. System Analysis & Design. (3 Credits)
(Formerly Systems Development) Companies launch systems development projects when they seek to develop new digitally-enabled services or to solve a multitude of business problems, such as inefficient business processes, poor information sharing etc. This course provides a comprehensive and up-to-date coverage of systems analysis and design and related systems development and software engineering issues in business. This course emphasizes technical skills, managerial skills, approaches, software tools, challenges, opportunities, and success factors in systems development within global companies and startups. Topics include: systems development lifecycle, agile development, open source and global development, capturing and managing system requirements, data and process modeling using the Unified Modeling Language (UML) standard, architectural and detailed design, testing and quality assurance, redesigning and optimizing business processes using cutting-edge BPM methods and software tools. The course addresses both the traditional (structured) and object-oriented approaches to systems development. It teaches the language that connects IT with business units, and cultivates essential skills for IS professionals and other business managers involved in developing new IT business solutions. Hands-on skills acquired include modeling using UML and structured methods, Microsoft’s Visio, IBM’s Rational Suite and IBM’s BPM software and other cloud-based or open-source modeling and development tools and platforms.
Attributes: ABFI, BUAN.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7905. Web Applications Development. (3 Credits)
(Formerly Web Technologies and E-Business Applications) Begins with a brief review of e-business models and applications, such as online purchasing, customer relationship management, electronic marketplaces, application service providers, supply chains, enterprise resource planning and enterprise portals. Studies enabling technologies, such as Web, XML, Semantic Web, HTML, wireless web and XML web services. Also discusses web-based platforms for e-commerce, B2B trade and mobile applications. Reviews emerging XML standards, such as ebXML, RosettaNet and Biztalk, and web-based platforms, including Dot Net and J2EE. Students experience the systems development lifecycle while developing a website to meet business requirements and review real-life examples and case studies.
Attributes: ABEB, ABER ISEA.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7910. Info Systems Strategy & Mgmt. (3 Credits)
Focuses on issues of aligning business and technology strategies. Addresses how IT supports business strategy and business processes, the role of the CIO, systems integration, outsourcing, the value of IT, selection of technologies IT strategy and infrastructure, dealing with emerging technologies and organizational issues surrounding technology implementations. This is the Information Systems area capstone course.
Attributes: ABEGS, ABIB, BUAN.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7922. Healthcare IT. (3 Credits)
This course introduces students to the subject of health information technology (HIT) and describes the organizational context surrounding the implementation, use, and management of HIT. Students examine the concepts, applications, and strategies of HIT. Key concepts include the role of HIT in enabling quality, safety, and efficiency of health care delivery. The course also surveys the various types of HIT, including electronic health records, clinical decision support systems, master patient indexes, analytics, and telemedicine, among others. The organizational issues of user acceptance, value measurement, alignment, workflow analysis, and management are discussed. And contemporary developments—including the trend toward service-oriented architectures/ web services and meaningful use—are highlighted. The key challenges of security, privacy, and compliance with regulations are also examined.
Attributes: ABHM, BUAN, ISEA, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7924. Mobile E-Commerce and Apps. (3 Credits)
Roughly two-thirds of the world’s population participates in the new mobile economy. Leveraging the mobile marketplace requires a conceptual understanding of mobile-commerce as well as the practical skills needed to create the next generation of wireless enabled goods and services. This course will provide both, using a combination of global case studies and hands-on experience in building mobile applications for handheld devices.
Attributes: ABEB, ABER BUAN, ISDB, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.
ISGB 7932. Accounting Info System. (3 Credits)
The purpose of this course is to introduce students to the subject of computer-based accounting information systems. The four critical objectives are a sound understanding in business processes, transaction cycles, internal controls and the systems components of each.
Attributes: BUAN, ISEL, ISER.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7933. Audit Data Analytics. (3 Credits)
Introduces audit and accounting students to data analytics foundations, methods and tools. It reviews industry applications and trends. Students will do hands-on projects analyzing audit and other accounting data.
Attributes: BUAN, GB02, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7934. Artificial Intelligence. (3 Credits)
The goal of this course is to acquaint you with the objectives and methods of researchers and practitioners in Artificial Intelligence. We will explore numerous aspects of computational models of intelligence including search and problem solving, planning, machine learning, logic and reasoning, machine perception and robotics, natural-language processing, speech recognition, vision, and cognitive science. We'll also discuss genetic algorithms, fuzzy logic and deep machine learning including neural networks. The ethics of Artificial Intelligence is also addressed. The course is organized as a survey, with hands-on assignments in open source artificial intelligence tools.
Attributes: BUAN, GB02, ISEL.
Prerequisites: BYGB 7967 or ISGB 7967 and BYGB 7977 or ISGB 7977 and BYGB 7990 or ISGB 7990.

ISGB 7942. Optimization Models in Bus. (3 Credits)
Optimization models seek to find the best decisions given a set of constraints. Applications are in diverse areas of business, including finance, logistics and marketing. The course will introduce different kinds of models, including network, linear programming, mixed-integer programming, and non-linear programming, and demonstrate their use in different areas of business. Students will learn how to use optimization software, including solvers and modeling languages.
Attributes: BUAN, ISEL.

ISGB 7943. Programming with Python. (3 Credits)
Do you want to be able to solve business problems through programming/coding? This courses introduces key programming concepts, techniques and tools. Students will learn programming/coding using the widely used Python programming language.
Attributes: ABEP, ABFI, BUAN, GB01, ISEL.

ISGB 7944. Sports Analytics. (3 Credits)
Sports businesses achieve superior performance and gain competitive advantage by leveraging data and analytics. The course explores technologies, tools and analytics projects in Sports business.
Attributes: BUAN, GB02, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7945. IT and Sustainability. (3 Credits)
(Formerly Business Design Through IT). This course discusses the transformative role of information and communication technologies (ICTs) in enabling sustainability. ICTs’ effect on sustainability dimensions are felt at both the macro, societal level, as well as at the business level. These include ICTs’ positive impact on development, education, environment, health care, power, transportation, and others. Simultaneously, ICTs themselves are subject to sustainability practices, for example, green computing. Additional topics include the design of smart cities, digital divide, the knowledge society, rebound effects, governance, and world development indicators. Students working in groups will analyze several contemporary cases from a global perspective and also develop an IT-based sustainability plan.
Attributes: ABEB, ABER ABGS, ISDB, SOIN.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7955. Project Management. (3 Credits)
Provides the skills project managers need to complete projects on time and on budget. Technology improvements in organizations are implemented through projects, and strong project management skills are a key success factor for companies to achieve the expected benefits from their technology investments. Topics include setting and maintaining project scope, developing work plans, estimating required resources, developing work programs, organizing project teams, super-users, monitoring and controlling projects, maintaining relationships with users and management, status reporting and key factors for realizing the anticipated benefits from the investment. Students use a computer-based project management tool as part of this course.
Attributes: BUAN, ISEA.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7967. Data Mining for Business. (3 Credits)
Discusses data mining techniques and their use in strategic business decision making. A hands-on course that provides an understanding of the key methods of data visualization, exploration, association, classification, prediction, time series forecasting, clustering, induction techniques, neural networks, and other methods. Students work in teams on solving a business problem of their choice, using data mining tools and applying them to real data.
Attributes: ABFI, ASDM, GB01.
Prerequisites: ISGB 6910 (may be taken concurrently) or GBA Waiver Information Systems with a score of 070.

ISGB 7973. Database Management. (3 Credits)
Covers the basics of database management, a critical element of all IT organizations. Databases are the foundation for operational/transaction systems and for management decision-making. Topics include types of databases and the database environment, database analysis and data modeling, database design with relational models, implementation issues such as SQL, data administration, the Internet database environment and distributed databases.
Attributes: ABFI, GB02, ISEA.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.
ISGB 7975. Business Analytics for Managers. (3 Credits)
Introduces the concepts of business analytics and such related concepts and techniques as business intelligence, data analytics, data warehousing, data-mining and online analytical processing (OLAP). The course explores the process, contents, and context of managerial decision-making and looks at how business analytics can help in improving management decision-support effectiveness in the various functional areas of business such as marketing, finance and manufacturing. Managers in general—not just IT professionals—stand to gain from the discussion. Students gain hands-on experience in the use of a comprehensive set of Business Intelligence (BI) tools.
Attributes: ASDM, GB01, ISBA, ISEA, ISEL, ISET.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7977. Text Analytics. (3 Credits)
The course introduces the concepts of text analytics, unstructured information analysis and management for better decision making by deriving valuable insights from your enterprise content regardless of source or format. It allows deep, rich text analysis of information. Content analytics can help organizations surface undetected problems, fix content-centric process inefficiencies, improve customer service and corporate accountability, reduce operating costs and risks and discover new revenue opportunities. Student groups will implement a comprehensive content analytic project (SPSS Text Analytics/Content Analytics 2.0/UIMA).
Attributes: ABFI, ISBA, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7978. Web Analytics. (3 Credits)
Web analytics—also referred to as Web metrics, e-Metrics, or e-analytics—is the science of Internet audience measurement and analysis. It deals with the identification, gathering & formatting of Web usage data, the computation and presentation of metrics, and the exploitation of the results, in order to measure website success. Meaningful insight is gained from traffic and visitor analytics data. It not only covers the unique measurement challenges associated with segmentation, but also comes with strategic recommendations for focusing the entire analytics process—from where to begin to what your larger, overall web analytics goals should be (Google Analytics, IBM ShowCase Web Analysis).
Attributes: ABEF, ABEP, GB02, ISBA, ISDB, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7980. Bus Modeling w/Adv Sprsheets. (3 Credits)
Covers the vital role of advanced spreadsheet methods in business modeling and decision-support. Students learn to build and analyze decision-making models using a spreadsheet package (Excel), with extensive hands-on use of the package and add-ins. Students model and solve representative practical problems covering key business functions such as accounting and finance, sales and marketing, management and operations and human resources. Topics include various advanced spreadsheet functions, "what-if" analysis, list and data management tools, Solver and sensitivity analysis, simulation and forecasting models.
A basic understanding of Microsoft Excel is required for this course.
Attributes: BUAN, GB02, ISBA, ISEL.

ISGB 7985. Data Warehousing. (3 Credits)
Provides an advanced, comprehensive overview of data warehousing along with in-depth discussion of critical issues in planning, design, deployment and ongoing maintenance. Students gain a clear understanding of techniques for data extraction from source systems, data cleansing, data transformations, data warehouse architecture and infrastructure, and the various methods for information delivery. Additional concepts discussed include data marts, real-time information delivery, data visualization, requirements gathering methods, multi-tier architecture, OLAP applications, Web click-stream analysis, data warehouse appliances, and data-mining techniques. Students undertake hands-on exercises and projects in commercial data warehousing modeling and implementation tools and perform case analyses.
Prerequisite: ISGB 6910.
Attributes: ISBA, ISEA, ISEL, ISET.
Prerequisites: ISGB 6910 or INSY 6910 or ICGB 6910 or GBA Waiver Information Systems with a score of 070 and ISGB 7973.

ISGB 7988. Business Performance and Risk Management. (3 Credits)
This course aims to develop a good understanding of knowledge required and techniques available to enable managers to measure and manage business performance within their organization. The role of business analytics in enabling business performance and risk management is emphasized. The application of analytics to such concepts as balanced scorecard strategy maps, KPI, corporate metrics, corporate governance information communication and dissemination, compliance and regulation assessment and reporting and information assurance is a hallmark of this course. The social, ethical, and behavioral dimensions of the role of technology in analytics and performance management are discussed. Students will work on case studies and also engage in a capstone project involving analytics with a tool such as Cognos Insights.
Attributes: GB02, ISBA, ISEL, ISER.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7989. Info Tech in Transnatl. (3 Credits)
Provides practical guidelines for managers to integrate international business with IS planning and operations. As businesses increasingly operate globally, corporations with transnational business strategies must also develop transnational Information Systems. Today’s managers need to coordinate international telecommunications and IS operations as well as exploit the organizational and economic opportunities Information System creates for businesses that operate globally.
INTERNATIONAL BUSINESS COURSE.
Attribute: ABIB.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.
ISGB 7990. Big Data Analytics. (3 Credits)
As organizations today generate and store massive amounts of data, they face the key challenge of analyzing the data to gain key insight to make informed decisions. Traditional relational models of data storage and use appear to be ill-suited for these large data sets. Alternative distributed, cloud-based approaches have emerged to handle these big data sets. Frameworks such as the Hadoop platform including the Hadoop Distributed File System (HDFS) and MapReduce (M/R) framework at its core, allows for distributed processing of large data sets across clusters of computers using the Map and Reduce programming model. It is designed to scale up from a single server to thousands of machines, offering local computation and storage. This exploratory course discusses the contemporary topic of big data analytics and introduces Hadoop and related technologies in an introductory fashion. Topics include big data analytics life cycle, technologies, development and management, privacy and security, governance, examples and others. Students will work on workshops and assignments in Hadoop on the Amazon Web Services cloud.
Attributes: ABFI, GB02, ISBA, ISEL.
Prerequisite: ISGB 7967.

ISGB 799D. Cybersecurity for Business. (3 Credits)
This class will explore the concepts of cyber risk management within an enterprise. The course will help a manager develop a solid understanding of cyber risk and successful mitigation strategies to reduce an organization's risk profile. The course will include topics such as IT control assessments, static and dynamic application security, network security, information security policies and standards, threat modeling and analysis, risk/benefits of BYOD (Bring your own device), IOT (The Internet of things), and many other real-time cyber topics.
Attributes: BUAN, ISEL.
Prerequisite: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 799L. Study Tour: Germany. (3 Credits)
The study tour to Germany will be held from March 21 - April 1 during the spring/Easter break. It allows students to learn about the business environment in Germany and the European Union. Through academic presentations, company visits, and visits to cultural and historic sites, students will learn how the current business practices in Germany have been influenced by its rich culture, the world wars and the formation of the European Union and technology led globalization. The study tour will include stays in Marburg, Frankfurt, and Munich. There is no prerequisite for the course and it is open to MBA and MS students in good standing. Course related readings and pre-trip and post-trip assignments will be available in the first week of the spring semester. Expenses for the trip, including airfare are expected to be around $2,700 per student (in addition to the tuition for the course). Please contact Prof. Saharia at saharia@fordham.edu with any questions.
Attribute: ABIB.

ISGB 799P. Sports Analytics. (3 Credits)
Sports businesses achieve superior performance and gain competitive advantage by leveraging data and analytics. The course explores technologies, tools and analytics projects in Sports business.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 799R. IT Audit and Information Assurance. (3 Credits)
This course will present an overview of the various elements of IT Audit and Information Assurance. Basic IT audit and information assurance concepts will be discussed and analyzed. General IT and application controls will be covered along with how the controls underlie SOX Section 404 Legislation. The course will also examine business processes, technologies and controls relating to financial reporting. Key components of information systems, including operating system security, database controls, network safeguards, systems development and application maintenance will also be covered. Technology processes supported under COBIT 5 will be discussed along with risk assessment techniques. The challenges around information assurance, data governance and privacy will be explored in detail.
Attributes: BUAN, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 799S. C++ Programming. (3 Credits)
This course will teach Object Oriented programming using the C++ programming language. Students will learn the fundamentals of developing coherent, expressive programs. Students will work on a realistic albeit simplified financial application project.
Prerequisite: ISGB 6910.

ISGB 799V. R Statistical Programming. (3 Credits)
This is a programming course using the R programming language. Applications will focus on data analytics and statistical programming.
Attributes: BUAN, GB01, ISEL.

ISGB 799W. Java Programming. (3 Credits)
This course provides an introduction to business applications programming concepts, techniques and tools. Students will acquire practical skills and experience with object-oriented development using the Java language, one of the most widely used programming languages. Topics include the elements of the language, common Java classes, object-oriented programming including inheritance and interfaces, object-oriented design, and database integration. Case studies in e-commerce and finance will show how Java can leverage the wide variety of available libraries and web services. Course work includes individual assignments and group projects.

ISGB 799X. FinTech - An Introduction. (3 Credits)
FinTech is a new and emerging field of technology that is disrupting the way that many companies are conducting business. FinTech has already “forever” changed many sectors including mobile payments, social media, money transfers, loans, fundraising, travel, trading and asset management. It has completely revolutionized the way companies are developing products, conducting research, establishing directed sales and marketing plans, and utilizing start-up technology. Businesses are using FinTech to expand their products and services at a fraction of its previous cost. Entrepreneurs are utilizing FinTech as a central foundation for research, funding, and product development. Customers are already utilizing FinTech as part of their daily lives - mobile apps, social media, banking, online shopping, entertainment and gaming. This course will introduce students to the breadth of FinTech, and touch upon the technical underpinnings.
Attributes: BUAN, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.
ISGB 799Y. Blockchain Tech & App Dev. (3 Credits)
The main objective of this course is to familiarize you with the ecosystem, technologies, and development skills surrounding Blockchain. The course starts with foundational concepts such as distributed state machine, hash tree, P2P network, GPU processing, cryptocurrency, and cryptography. Using both simulated sandbox and locally installed environments, the course then guide you through the development, front-end integration, and deployment of Blockchain-based smart contracts. Other topics covered include rapid prototyping, design patterns, and agile process to maximize the success likelihood for Blockchain projects. The lab portion of this course involves weekly submissions of programming exercises, assignments and project deliverables. Other topics covered include rapid prototyping, design patterns, and agile process to maximize the success likelihood for Blockchain projects. Prior knowledge required: Proficiency in computer programming; basic knowledge in analysis and linear algebra.
Attributes: ABBC, BUAN, ISEL.

ISGB 799Z. Deep Machine Learning. (3 Credits)
The goal of this course is to acquaint you with the objectives and methods of deep machine learning (DML). We will explore and learn the basic types of deep neural networks including convolutional, recurrent, and generative adversarial, and the type of data each is designed for. Key additional topics include techniques to improve training, preventing overfitting, and best practices for minimizing error. Students will study the major technology trends driving DML. A key takeaway is a working knowledge of the vocabulary of concepts and algorithms in DML. The challenges and issues surrounding the use of DML including design issues, ethics, governance, ownership of data, privacy, security standards, and quality control & validation are also discussed. Emphasis is on business applications. The course is organized as a seminar-style course, with hands-on assignments in DML tools. Familiarity with basic calculus and linear algebra expected.
Attributes: BUAN, GB02, ISEL.
Prerequisites: ISGB 7990 and (BYGB 7967 or ISGB 7967).

ISGB 79AA. Advanced Python for Financial Programming. (3 Credits)
This course on advanced Python programming for financial analytics covers finance topics such as an introduction to the capital markets, including their instruments and analytics (equities, fixed income, currencies, and derivatives); portfolio analysis, including use of simulation for risk analysis, optimization for portfolio balancing, and principal components for risk factor determination; machine learning applications in finance, including fraud detection and loan approval; and real-time data and high-frequency trading. Python topics include integrating Python with spreadsheets (Excel and Google Sheets), databases, web pages, and web services; hands-on exposure to a diverse set of Python financial analysis packages; and techniques and tools for building Python-based systems: defining requirements, system design, unit testing, and source code control.
Attributes: BUAN, GB02, ISEL.
Prerequisite: ISGB 7990.

ISGB 79AB. Programming for Analytics. (3 Credits)
This course covers both Python and R as programming languages. The Python portion of the course empowers professionals to process data, handle complex computations, automate procedures, and conduct research efficiently on a massive scale. This course also introduces and advances the understanding of the R programming language in a statistical environment. Students will understand the fundamental syntax and logic of both languages, and learn how both are applied to solve business problems algorithmically.

ISGB 79AC. Cybersecurity Analytics for Business. (3 Credits)
Cyber attacks pose an increasing threat to the nation’s critical infrastructure, including computer networks, cyber-human systems, business applications, sensor networks, and mobile devices. This course provides an introduction to data analytics for multiple aspects of information security and focuses on using data analytics methods for discovering anomalies pertaining to cyber threats through hands-on exercises in programming, visualization, statistical analysis, machine learning, and big data analytics tools.
Attributes: BUAN, GB02, ISEL.

ISGB 79AD. Digital Forensics. (3 Credits)
This course provides students with an introduction to digital forensic science and the systematic process of acquiring, authenticating, and analyzing digital evidence. Technical and managerial topics will be explored, providing students with both theoretical and practical hands-on experience using forensic equipment and software. The topics of e-discovery, data retention, data disposal, litigation, internal investigations, regulatory compliance, and incident response will be covered.

ISGB 79AE. Robotic Process Automation. (3 Credits)
Robotic Process Automation (RPA) is the application of technology that allows employees in a company to configure software (a 'bot') to capture and interpret existing applications when processing transactions, manipulating data, triggering responses, and communicating with other digital systems. RPA observes a user’s actions when interacting with software and mimics those actions over time. This course will introduce you to the key concepts of RPA and discuss how organizations can automate internal processes to improve productivity and move employees up the work value chain. The managerial issues covered include cultural and technical challenges, value proposition of RPA, privacy and security, training, ownership and governance, etc. The business and societal implications of the effects of automation will also be discussed.

ISGB 8999. Independent Study. (1 to 3 Credits)

ISGB 899A. Disrupting Financial Services. (1.5 Credits)
Graduate students will learn directly from industry experts how new technologies, changing demographics and investor preferences are significantly impacting the delivery of wealth management, creation of investment products and capital market mechanisms. From the global adoption of crypto currencies to the trillion dollar tsunami of money flowing into passively managed ETFs, students will be exposed to the current and future implications of these 'disruptions' and gain helpful insight and intelligence impacting their careers. We will focus on one “disruption” per week with subject matter experts explaining the economic and cultural implications for both winners and losers. This course will be valuable to all students navigating future employment opportunities in financial services.

Business Analytics (BYGB) Courses

BYGB 7811. Finance Analytics Internship. (3 Credits)
Financial planning and analysis to consolidate disparate data sources.

BYGB 7967. Data Mining for Business. (3 Credits)
Discusses data mining techniques and their use in strategic business decision making. A hands-on course that provides an understanding of the key methods of data visualization, exploration, association, classification, prediction, time series forecasting, clustering, induction techniques, neural networks, and other methods. Students work in teams on solving a business problem of their choice, using data mining tools and applying them to real data.
Prerequisite: BYGB 6910.
BYGB 7973. Database Management. (3 Credits)
Covers the basics of database management, a critical element of all IT organizations. Databases are the foundation for operational/transaction systems and for management decision-making. Topics include types of databases and the database environment, database analysis and data modeling, database design with relational models, implementation issues such as SQL, data administration, the Internet database environment and distributed databases.
Prerequisite: BYGB 6910.

BYGB 7975. Bus Analytics for Managers. (3 Credits)
BYGB 7977. Text Analytics. (3 Credits)
BYGB 7978. Web Analytics. (3 Credits)
Web analytics—also referred to as Web metrics, e-Metrics, or e-analytics—is the science of Internet audience measurement and analysis. It deals with the identification, gathering & formatting of Web usage data, the computation and presentation of metrics, and the exploitation of the results, in order to measure web site success. Meaningful insight is gained from traffic and visitor analytics data. It not only covers the unique measurement challenges associated with segmentation, but also comes with strategic recommendations for focusing the entire analytics process - from where to begin to what your larger, overall web analytics goals should be (Google Analytics, IBM ShowCase Web Analysis).

BYGB 7988. Bus Perf Mgmt Risk Analytics. (3 Credits)
BYGB 7990. Big Data Analytics. (3 Credits)
BYGB 8999. Tutorial. (3 Credits)
Tutorial in Business Analytics.

Leading People and Organizations

The leading people and organizations area at the Gabelli School of Business focuses on the following areas:

- Ethical leadership
- Career management, focused on personal and professional calling
- Innovation, including social innovation
- Entrepreneurship, including social entrepreneurship
- Global sustainability management

The area’s faculty research has global visibility and is frequently cited in professional journals and the popular press. Some faculty focus mainly on individual-level factors such as character, trustworthiness, or mindfulness. Others look at the group level of what makes highly functional teams work. Many examine how organizations of all kinds can better contribute to solving social problems. Overall, the area’s research aims to create insights on how people can manage better.

Faculty contribute to this goal by participating on editorial boards, editing globally prominent journals, and serving in leadership roles in the Academy of Management and other professional associations.

Programs

The following options highlight ways in which you can earn a graduate degree in leading people and organizations:

- M.S. in Management (p. 682)
- M.B.A. Concentration in Management (p. 673) (interdisciplinary)
- M.B.A. Secondary Concentration in Global Sustainability (p. 671)
- M.B.A. Secondary Concentration in Entrepreneurship (p. 669) (interdisciplinary)

Courses

LPGB 6610. Introduction to Modern Management. (1 Credit)
This course introduces students to the current challenges managers are facing. It provides frameworks of competing theories on human nature and explores their consequences for managing organizations.

LPGB 6613. Leading People and Organizations. (3 Credits)
FT MBA CORE/ PMBA FLEX CORE COURSE. Presents theories of designing the structure and processes of organizations, as well as the elements of the global competitive environment within which such organizations operate and ways of relating to this environment. Explores critical issues related to the individual and the firm. Focuses on defining management’s role and responsibilities in the continual improvement of quality, productivity, and the competitive position of the enterprise. Previous course title: Fundamentals of Management.

LPGB 7610. Leadership and Change. (3 Credits)
Prepares students to meet the requirements of today’s economy, where leadership demands a combination of personal capabilities and insights, as well as in-depth knowledge of organizational change processes and practices. Through readings, cases, class discussions, self-assessment exercises, and leader-directed learning projects, participants gain important insights into their own management style and develop essential knowledge and skills for successful implementation of major change initiatives.
Attribute: ABEP.

LPGB 7615. Cross-Cultural Negotiation and Communications. (3 Credits)
Explores how cultural differences and international settings affect business communication and negotiation - key skills for managers who seek to get solutions accepted and implemented. The dimension of culture is used to increase the student-managers’ self-awareness and reflection and to build flexibility in their conceptual understandings and skills. Emphasizes specific strategies, styles and techniques that help the negotiator/communicator.
Attributes: ABGS, ABIB.

LPGB 7616. Training and Development. (3 Credits)
An introduction to preparing, offering, and evaluating interventions for personnel training and organizational development. Topics include needs assessment, adult learning, instructional design, and transfer of training from the corporate classroom to the work site.

LPGB 7617. Assessment in Human Resources. (3 Credits)
Prepares students to conduct measurements, assessments, and reports of human resources programs and practices. Topics include job analysis, organizational development surveys, compensation reviews, organizational culture, and benchmarking.

LPGB 7619. Leading Organizational Change. (3 Credits)
Students learn to analyze organizational environments to identify challenges and constraints, to understand stakeholders’ attitudes about the status quo, to understand and manage change according to several change models, and to align business strategies with organizational systems and structures. Elements of strategy, planning, and implementation are included.

LPGB 7623. Contemporary Issues in HR. (3 Credits)
This course provides an in-depth exploration of a current topic, issue, or practice in the area of strategic human resource analysis. The course uses cases, readings, and applied exercises to examine the topic and its implications for HR practice.
LPGB 7625. Team Dynamics. (3 Credits)
Focuses on examining and developing interpersonal skills consistent with modern business's evolution toward an integrated, self-managing, team-oriented structure. This structure emphasizes group problem-solving, interpersonal communication and leadership among peers. There are two face-to-face class sessions. The rest of the class is taught through asynchronous online modules.

LPGB 7637. Entrepreneurial Mindset. (1.5 or 3 Credits)
This hands-on course is designed to guide students through the necessary steps of developing, testing and launching a new business idea, with an emphasis on embracing an entrepreneurial mindset that is transferable to any role or industry. Projects are customizable to accommodate the needs/demands of students and where they are on their personal entrepreneurial journey. Contemporary methodologies (i.e. Lean Startup) and technology tools are incorporated to build and manage the startup process from concept to market launch.

Attributes: ABEP, ABGS.

LPGB 7638. Career Management. (3 Credits)
Helps students plan and control their personal and career development by surveying theoretical concepts and research findings. Through discussions, case analyses and interpretation of diagnostic tests, students acquire the personal insights necessary to complete a self-assessment and career/life plan.

LPGB 7670. Mgmt of Human Resources. (3 Credits)
Studies the personnel function in private and public organizations from the viewpoint of the manager. Topics include recruiting, employment, wage and salary administration, management development, performance appraisal, job evaluation and design, career development, employee turnover, manpower planning, training and affirmative action.

LPGB 7811. Management Internship. (1 to 3 Credits)
This course is intended for students with a Management internship in this term that wish to receive academic credit for it. The course will begin with an orientation session and will be followed by additional meetings with students. The course instructor will provide additional details to enrolled students.

LPGB 8999. Independent Study. (0 to 3 Credits)

LPGB 769A. Leadership for the 21st Century. (3 Credits)
The challenges of leading organizations, especially businesses, in the current era are vast. Globalization requires competitive strategies and cultural sensitivity, the worsening environmental crisis calls for sustainable practices, and increasing social problems and inequalities increase pressure for social responsibility beyond traditional profit making. Many current management paradigms have to be rethought and remodeled to deal with these challenges effectively. In this course we look at challenges to organizations on the systemic level (environmental and social pressures), the organizational level (employee commitment and stakeholder trust), and the individual level (happiness) and examine ways of dealing with them proactively.

Attribute: ABGS.

LPGB 769T. Me,. Inc.. (3 Credits)
If you were to conduct your life like a well-run business, what would it look like? The key to unlimited personal and professional success in daily life is in incorporating the best practices of exceptional companies into everyday living. This course begins by sharing basic business principles of the most successful and enduring companies and how they can be applied to your personal life. From there, this practical course will show you how to envision the kind of success you want and craft an 'exceptional living plan' - much like a business plan - that will get you there.

LPGB 76AB. Personal Leadership Development. (3 Credits)
This course will explore emotional intelligence and leadership with an emphasis on self awareness and self management. Various instruments will be used to help students define clearly their personality, motive profile, signature strengths, values and belief systems. Once a level of self awareness is achieved, we will turn to self management to help students make choices that enhance their lives, improve their leadership, and make better career decisions.

LPGB 76AE. Turnaround Management. (1.5 or 3 Credits)
In today's demanding and fast-paced environment, there is a premium on individuals who can produce outstanding results on a continuing basis. Business as usual is not sufficient to sustain organizational vitality over the long term. Increasingly, leaders are expected to deliver growth and productivity improvements while satisfying clients, motivating employees, and meeting the needs of a myriad of internal and external stakeholders. This course is designed to prepare students to lead organizations to higher levels of performance by applying critical elements of leadership theory and practice.

LPGB 76AG. Managing Innovation Change. (3 Credits)
This course is geared towards deepening the understanding of the challenges, techniques, and burdens associated with initiating and implementing major change in an organization.

LPGB 76AI. Managing Transnational Firm. (3 Credits)
Organizations are complex systems. Different theories of designing structure and processes of such organizations are presented. The elements of the global competitive environment within which such organizations operate and ways of relating to this environment.

LPGB 76AS. Boards and C-Suite Decision Making. (3 Credits)
This course is designed to enhance the MBA's understanding of the theory and reality of decision making at the most senior levels of the corporate organization. It will focus on decision-making among the Board of Directors, CEO/CFO and other senior management in a variety of contexts and will include international as well as U.S. perspectives. In addition to lectures and case studies, current CEOs, CFOs, and Directors will share their experiences with the class.

LPGB 76AV. Developing the Sustainability Mindset. (3 Credits)
This hands-on workshop/seminar is designed for individuals ready to take leadership roles in contributing to solutions to our species' greatest challenge - dealing with the climate-change/global-unsustainability situation already impacting our lives, careers, businesses, and societies.

Attributes: ABGS, SOIN.

LPGB 76AW. Leadership & Trust. (3 Credits)
This course will cover some evolving concepts of leadership and then concentrate on how leaders build trust among followers and other stakeholders and how they architect high trust teams and organizations. The course will be centered around Dr. Hurley's new book The Decision to Trust, which was named one of the best leadership books of 2011 by the Washington Post.

Attribute: SOIN.
LPGB 76BG. New Models of Mgmt. (3 Credits)
This new course will explore the management systems, management processes, and global context required for the 21st century. There is ample evidence that the ‘business as usual’ management systems, processes, leadership, and goals of the 20th century are inappropriate for the realities of the 21st century. Building upon the conceptual framework of three technologies (systems) of managing - traditional management, managing for quality and productivity, and managing for global sustainability - this course will explore the possibilities and emerging realities of management systems and leadership for global sustainability. Particular attention will be paid in the course to developing among class members the management skills necessary for this new system of managing and, most importantly, the mindset necessary to provide leadership for this emerging future.

LPGB 76BJ. From Managing Creativity to Leading Innovation: A Survey Course. (3 Credits)
Knowing how and where to innovate and to do so in a way that is sustainable financially, socially, and environmentally makes you invaluable to any employer. In this course you will learn tools and gain insights that can equip you to understand the process of innovation at a deeper level, by understanding its complexity and the multiple levels it can and needs to occur to be successful (including individual creativity, product/service innovation, business model innovation, governance innovation, social/sustainable innovation at the systems level).

LPGB 76BN. Jesuit Leadership and Culture. (3 Credits)
Experience the Spiritual Process that made Saint Ignatius of Loyola; Reflect and Discern on your own Leadership Style and how it compares to the Jesuit Culture of Leadership; Understand the Importance of Team Building in recreating a successful Walking Pilgrimage; Learn the Foundation of Jesuit History.

LPGB 76BQ. Entrepreneurship Bubble: Coworking, Incubators, Startup Contests, and the Purpose Bubble. (3 Credits)
This course provides a focus on the entrepreneurship and innovation bubbles as well as the shortcomings of startup structures. Topics include sources of funding and organizing such as: incubators, coworking spaces, open floor plans, angel investors, venture capital, IPO’s, and governmental mechanisms. Upon completion, students will be able to effectively analyze the weakness of an entrepreneurial venture and innovation processes.

LPGB 76BT. Org Development & Change. (3 Credits)
This is a workshop-oriented, applied course on diagnosing and managing organizational development, especially in a climate of uncertainty. Cases, lectures, guest speakers, and exercises will cover a wide variety of OD applications, practical interventions, and approaches to change evaluation.

LPGB 76BU. Design Thinking. (3 Credits)
Design thinking is an iterative problem-solving process of discovery, ideation, and experimentation that, when combined with business models, provides decision-makers with effective tools for innovation and transformation. This hands-on course will guide students in the use of a variety of design-based tools and techniques to clarify and solve human-centered organizational, business, and public service challenges.

LPGB 76BV. Leading the Sustainable Business Organization. (3 Credits)
This course will outline current challenges and opportunities of modern, sustainable business management. It will focus on leadership opportunities for the advanced business student and highlight best and emerging practices of leadership in the 21st century (incl. Tesla, Unilever, Patagonia and social enterprise).

LPGB 76BW. Applied Innov Consulting. (3 Credits)
This course is a real-life consulting engagement for students with a leading Fair trade company (Fairtrasa). Its CEO, Patrick Struebi, will present real-life challenges his company is facing and selected student teams will work on developing innovative solutions guided by peers and faculty. This course is a capstone for the management consulting concentration and the social innovation concentration, as well as the sustainable business minor.

LPGB 76BX. Social Innov Master Class. (3 Credits)
This class is a special offering for students deeply interested in understanding and experiencing the promise of social innovation. In partnership with leading global organizations like the Schwab Foundation, Ashoka, and the World Economic Forum, students will learn from global leaders in the field how social innovation can shape business strategy for the 21st century.

LPGB 76BY. Leading For Impact. (3 Credits)
Have you ever wondered why Tesla, Patagonia and Toms have achieved such remarkable success while generating positive impact for society? This course focuses on social innovation and how businesses can generate social and environmental impact, besides being financially sustainable. Students in this course will learn about the world’s most pressing challenges and how new business models such as sharing economy (Uber, AirBnB), circular economy, IOT, etc. can create innovative solutions that generate positive impact for millions. Students will be provided with a comprehensive overview of the latest social business models and how their own creative ideas may be turned into a viable business venture. This course includes Community Engaged Learning (CEL) and students will be working on projects with community partners.

LPGB 76BZ. Managing Human Performance. (3 Credits)
This course examines compensation theory and practice, including strategic compensation planning as well as the development and management of compensation/reward systems, such as direct wages, indirect payments, and employee benefits. Topics include: economic and behavioral theories of compensation; job-based and knowledge-based pay systems; individual, group/team, and organizational performance pay plans; employee benefits; pay equity; executive compensation; and system administration and implementation issues.

LPGB 76CB. Sustainable Bus Master Class. (3 Credits)
This three-credit intensive will help prepare students to be leaders in the rapidly emerging world of sustainable business. The world today is in crisis: 65 million refugees on the move, fleeing climate change and failed states; the climate crisis has thrown millions into collapse, and will get far worse; we are living in the sixth great extinction, with millions of species going extinct; inequality is so bad that 8 men have as much wealth as the bottom 3.5 billion people on earth?. These and related crises are threatening economies across the planet, and business everywhere.
LPGB 76CD. Soft Skills for Success. (3 Credits)
Functional knowledge (e.g. finance, IT, marketing, etc.) must be combined with implementation skills in order to create value. For example, a product manager who knows marketing but who cannot influence his or her advertising agency will not have a great career. Similarly, an investment banker who is great at financial engineering will not be successful unless they can negotiate effectively with people on all sides of the deal. The same with an accounting major who understands the accounting or tax rules but cannot lead the audit team or the many groups that report into the CFO. These implementation skills are often referred to as “soft skills”. This course will cover 8 key soft skills (reading people, influence, self-management, difficult conversations, conflict, negotiation, leading teams, execution) in quick burst format to enhance your skills and maximize your career prospects in a short period of time. 1. Reading people – Understanding how people differ and how you should approach them to be effective. 2. Influencing people – How to increase the odds that people will act to promote your interests. 3. Managing self to maximize impact – How to understand our strengths and weakness and act to maximize the former and mitigate the latter. 4. Having difficult conversations – How to conduct conversations that may prove emotional or threatening but that need to happen to increase joint understanding, head off conflict and increase productivity. 5. Conflict resolution – How to resolve conflicts among people productively. 6. Negotiation – How to help others serve your interests and you serve theirs in ways that create value. 7. Leading teams and managing meetings – How to understand group dynamics, increase productivity and stay on track when you lead groups of people. 8. Execution – managing in such a way that you under-promise and over-deliver results to increase trust and confidence in your leadership.

LPGB 76CE. Business and the Green Real Deal. (3 Credits)
This course seeks to discern the role of energy choices and systems in responding to the climate challenge, and to specify and critically assess opportunities for business enterprise to take initiative in responding constructively to the climate challenge. Students will be organized into small teams. Each team will prepare a business case for an innovation that responds constructively to some aspect of the climate challenge.

LPGB 76CF. Innovation and Resilience. (3 Credits)
This course focuses on the process of innovation, including the resilience required to weather inevitable ambiguity, risk, mistakes, and even failures along the journey. Topics include: identifying opportunities, managing creativity, evaluating ideas, decision-making in uncertain environments, and resilience.

LPGB 869A. Leadership Forum. (1.5 Credits)
Do you think you can lead? Leading in today’s complex environment is probably more of a challenge than at any other time in our history. The challenge is distinguishing between a true leader and a good manager. Additionally, how do leaders handle work/life balance? The Fordham Leadership Forum brings together many successful CEOs to articulate their road to success and the obstacles they needed to overcome, as well as great institutional leaders who will discuss how fortuity lead to them becoming heads of their respective institutions. Who should take this course? If you intend to eventually run a company, begin your own, or move up within the institution in which you are presently employed, this is probably the right course for you. Sander Flaum is well known as a leader within the pharmaceutical industry, having been the Marketing Head of a large pharmaceutical company as well as CEO of the No. 2 global advertising agency in healthcare. He now runs a marketing and sales effectiveness firm which also trains the ‘rising stars’.

LPGB 869B. Leading Global Corporations. (1.5 Credits)
In this course we will focus on three specific areas: managing large-scale organizational change, creating cultures of integrity for sustainable growth, and developing the inner qualities of the global leader. Attribute: ABIB.

LPGB 869D. Research For Final Project. (1.5 Credits)
Under the guidance of a faculty member(s), students will work as a team to analyse and dissect issues and generate recommendations for each group member and their specific action plan. This course will thus allow for some type of ‘return on investment’ for the student.

LPGB 869H. Team Dynamics. (1.5 Credits)
This course is designed to help students understand teams, be a more productive team member, build and lead teams, and manage team conflict. While the theory aspects of the course come from organization theory and behavior, the practice component involves face to face and virtual team interactions, where students experience the relevance of key group dynamics concepts.

Marketing

The marketing curriculum is designed to provide the necessary foundation for students planning careers in various subfields of marketing such as brand management, market research, and marketing analytics. The area offers a wide variety of courses that reflect the recent changes and challenges in the global marketplace with an emphasis on the creation of value for consumers, businesses, and the society at large.

Given the increasing use of analytics and big data in strategic marketing decisions, and the interdisciplinary approach expected from marketing professionals, the marketing area continuously updates its curriculum by offering creative and cutting-edge courses to better prepare students for their future marketing careers. Globalization, creativity, and ethical decision-making that benefits not only companies but also individuals and the society at large are common themes across Fordham’s marketing courses and extracurricular activities.

Programs

The following options highlight ways in which you can earn a graduate degree in marketing:

- M.B.A. Concentration in Marketing (p. 674)
- M.S. in Marketing Intelligence (p. 683)
- Online M.S. in Strategic Marketing Communications (p. 687) (Interdisciplinary)

Courses

In today's fast-changing global business world, marketing jobs—from entry to executive level—require a mix of knowledge, skills, and practical experiences with a wide variety of topics. Marketing students need to have better theoretical, analytical, and methodological training to remain competitive in a demanding job market. The marketing area offers courses in three categories that are different in terms of their focus, objectives, coverage, and delivery to better prepare students for their future careers: Knowledge-Generation (KG) courses; Skill-Building (SB) courses; and Industry-Exposure (IE) courses.
While there are no formal requirements for distribution, M.B.A. students concentrating in marketing are advised to have a balanced course load that represents all categories when they choose their marketing electives.

**Knowledge-Generation (KG) courses:** Knowledge-generation courses are designed to provide students with the theoretical knowledge that they will need in their careers. Students learn different theories and conceptual models relevant to marketing practice. Knowledge acquisition is strengthened through discussion of real-life examples and cases that demonstrate how those theories are applied to practice. KG courses are taught primarily by full-time faculty with doctorates and professional business experience.

**Skill-Building (SB) courses:** Skill-building courses help students acquire various conceptual, methodological, analytical, and managerial skills that they will need for solving marketing problems and making marketing decisions. Students learn how to use a range of quantitative techniques or prepare comprehensive plans as required by jobs in different sub-fields of marketing. SB courses are taught by either full-time faculty with doctorates or by part-time instructors with extensive professional experience using the skills taught in those courses.

**Industry-Exposure (IE) courses:** Industry-exposure courses aim to teach students about the marketing practices and managerial experiences in various marketing contexts. The focus of these courses is not theoretical knowledge but rather application of the knowledge and skills learned in other courses. Students get firsthand exposure to marketing operations and practices in certain industries or countries. IE courses are taught primarily by part-time instructors who have extensive professional experience within relevant sub-fields or regions/nations.

**Marketing Courses**

**MKGB 6710. Customer-Driven Marketing. (3 Credits)**
FT MBA CORE/ PMBA FLEX CORE COURSE This course introduces students to marketing both as a company orientation and as a company function, and emphasizes why and how successful marketing needs to be customer-driven. Interactive class discussions focus on the role and importance of marketing for the entire organization, individuals and society at large. Students learn how marketing interacts with other business functions within a company, as well as how marketing contributes to both the company bottom-line and customers’ well-being. Topics covered include the strategic marketing process; the creation, communication, delivery and exchange of value; market segmentation, targeting, and positioning; and the mixing. Lectures, comprehensive case analyses, in-class exercises, and team projects are used to provide a complete understanding of customer-driven marketing practices within a global framework. (Previous title: Marketing Management).

**Prerequisites:** BEGB 6220 or GBA Waiver Managerial Eco with a score of 070.

**Mutually Exclusive:** MKGB 6711, MMGB 6711.

**MKGB 6711. Marketing in the Digital Age. (3 Credits)**
This course introduces the ways in which marketing creates value in the interactions with other business functions, stakeholders and consumers. It emphasizes why and how successful marketing needs to be customer-driven, especially in the digital age where consumer engagement through various channels is key to a firm’s success. Topics covered include the strategic marketing process; the exchange of value; market segmentation, targeting, and positioning, and the marketing mix in the digital economy.

**Mutually Exclusive:** MKGB 6710.

**MKGB 6720. Understanding Digital Consumer. (3 Credits)**
Consumer behavior is rapidly changing as channels and shopping offer more options and more data points. This course prepares students for marketing to digital consumers, covering the latest social science research and theories to better understand consumer behavior. The course focuses on applications in managerial decision-making for digital consumers. Topics include motivation, learning, memory, perception, attitude formation and change, perception, consumer and social well-being that aid predicting consumer behavior in traditional marketplaces and on digital platforms.

**Mutually Exclusive:** MKGB 7720.

**MKGB 6730. Contemporary Research Methods. (3 Credits)**
This course provides a fundamental understanding of analytical methods and their application in marketing and communications. It covers analytical tools needed to quantify market potential, empirically establish customer needs, and optimize efficiencies of market communications. It discusses the research process and the identification, collection, analysis and dissemination of consumer data. Topics include problem definition, using secondary data, quantitative and qualitative methods, preparation and evaluation of surveys, and data analysis.

**Mutually Exclusive:** MKGB 7730.

**MKGB 7720. Consumer Behavior. (3 Credits)**
Analyzes the latest social science research and theories to better understand consumer behavior. Special attention is directed to applications in managerial decision-making. Topics including motivation, learning, memory, perception, attitude formation and change and decision-making are covered to explain and predict how consumers behave in the marketplace.

**Attribute:** ABGS.

**Prerequisites:** MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

**Mutually Exclusive:** MKGB 6720.

**MKGB 7721. Marketing Management for China. (4.5 Credits)**

**MKGB 7723. Strategic Branding. (3 Credits)**
Demonstrates the strategic importance of branding by focusing on the various ways the brands acquire and sustain value in the marketplace. Analyzes relevant and comprehensive theories, and all the necessary tools, ideas and concepts to uncover the brands’ identities and help managerial branding decisions. Topics discussed include socio-cultural perspectives on branding and brand management, emotional branding, financial considerations and consequences of branding decisions.

**Previously Titled:** BIG BRAND MARKETING.

**Prerequisites:** MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

**MKGB 7730. Research Methods. (3 Credits)**
Provides a fundamental understanding of research methods and their application in different business functions, offering perspectives from both the provider and user of information needed for managerial decision-making. Discusses the research process with an emphasis on the identification, collection, analysis and dissemination of business and consumer data. Topics include problem definition, the use of secondary data, various quantitative and qualitative methods, preparation and evaluation of surveys, and basics of data analysis. **REQUIRED COURSE FOR MARKETING CONCENTRATION.**

**Attributes:** ASDM, BUAN.

**Mutually Exclusive:** MKGB 6730.
MKGB 7746. Business to Bus Mktg. (3 Credits)
Examines marketing as it is applied to business markets and organizational buying/selling with an emphasis on how they differ from consumer markets. Discusses specific issues and problems faced by firms in having organizations as customers. Basic marketing issues as market identification and segmentation, pricing, logistics, advertising and sales promotion are explored within the business-to-business environment.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7750. Global Marketing. (3 Credits)
Examines proven theories and practices of global marketing, as well as the research tools and techniques that can help marketers develop strategic decisions in global markets. Provides a comprehensive overview of global marketing environment and the critical factors involved in choosing the appropriate market-entry strategies for selected foreign markets. Demonstrates successful marketing practices from various emerging markets and regions.
Attribute: ABIB.
Prerequisites: MKGB 6710 (may be taken concurrently) or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7755. Integrated Marketing Communications. (3 Credits)
This course analyzes the planning, execution, and measurement of advertising campaigns, with a focus on developing ad campaigns and media planning that maximize consumer engagement. Topics include the role of advertising in the marketing mix, tools, techniques and processes used in creating advertising strategy, media planning, legal issues and ethical considerations in advertising. An emphasis is placed on creative ways to foster awareness and maintain consumer involvement through digital media platforms and other marketing tools. MKGB 7720 (or MKGB 6720) is suggested as prior coursework.
Attribute: ABEP.
Prerequisites: MKGB 6710 or MKGB 6711 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7765. Sales Management. (3 Credits)
Focuses on personal selling and salesforce management in the context of large and small organizations. Examines the sales process and its relationship to overall marketing strategy, evaluation of salesforce performance and the function of sales manager. Explore such topics as sales planning, forecasting as well as recruiting, selecting, motivating and compensating a salesforce.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7775. Mktg of Finl Services. (3 Credits)
Provides a scientific understanding of tactics and strategies associated with the marketing of financial services. Emphasizes the role of industry deregulation, intensified competition, and the emergence of new technologies and products on the emerging marketing practices used by financial services institutions. Explore consumers' unique decision-making styles in financial matters, the effects of technology deployment, and the fiduciary constraints that guide marketing activities in the markets for commercial banking services, mutual funds, investment banking services, insurance and other forms of financial services.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7782. Comm Corp Image Responsibility. (3 Credits)
Analyzes various means and tactics available to public relations practitioners and demonstrates the value of pragmatic public relations activities for businesses. Explores social and ethical concerns about generating publicity and how resulting public perceptions can create or deepen corporate crises. Current practices of planning for and managing crises are demonstrated via a number of guest speakers. Also offered as CMGB 7531.
Attribute: ABGS.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7785. Marketing Strategy. (3 Credits)
Presents an integrated framework on how company marketing decisions can be guided by the environment in which the company is operating, the company's own strengths and weaknesses, and the future prospects in the marketplace. Provides a synthesis of current research findings on strategic marketing theory through the text and other material, and put theories into practice by the students through the use of computer simulations and case analyses. Enables students to develop the techniques needed to optimize marketing activities related to pricing, advertising, distribution and product development.
Prerequisites: MKGB 7730 or MKGB 6730.

MKGB 7792. New Product Development. (3 Credits)
Provides a sequential methodology for identifying new product opportunities, designing products and services to meet consumer needs. Examines processes and methods used for managing different stages of product development, from idea generation to market testing. Discuss ethical and financial considerations of new product development processes for the business and society at large.
Attributes: ABEP, ABGS.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7795. Direct Marketing. (3 Credits)
Surveys the various media and methods of direct marketing. Explores the power of direct marketing to access specific markets with refined advertising messages and to gauge more successfully the effectiveness of those messages. Topics include direct mail, catalogs, telemarketing, electronic media, mailing lists, copywriting and copy and media testing.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7797. Data-Driven Marketing Decisions. (3 Credits)
The course aims at offering students advanced analytical marketing and decision making skills in order to help them address marketing managerial decisions. Adopting a 'learn by doing' approach, the course provides students with hands-on training that will allow them to simulate data-driven marketing decisions and formulate sound recommendations.
Attributes: ASDM, BUAN, ISEL.
Prerequisite: MKGB 7730.
MKGB 779N. Sports Marketing. (3 Credits)
It is estimated that the sports industry generates over $200 billion a year in revenue and it is still growing. Sports products are more than just the sporting event, the athlete and the arena and now encompass items such as sporting goods and equipment, licensed merchandise and clothing lines, collectibles and memorabilia, personal training/fitness centers and health services, sports camps and instruction as well as sports information and media. In addition, sports products include the successful and strategic management of operations/facilities, overseeing revenues and investments as well as bringing events to the attention of the public through advertising, sales, promotion and sponsorships. This course is designed to provide the sport business student with an overview of the major marketing issues facing the sports industry. As one can see, this is a diverse and growing industry centered around THE ASSOCIATION OF SPORT. With this as a background, this course will focus on the industry, the market opportunities and strategies for seizing those opportunities.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 779T. Marketing Mgt & Strategy. (3 Credits)
Introducing the fundamental concepts and processes essential for marketing goods, and services in today's competitive environment. This course presents an integrated framework on how such strategic decision should be made. The course is anchored on three tools: Strategic Marketing Theory, Computer Simulation and Application and Cases. 
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 779V. Strategic Product Planning. (3 Credits)
This course aims to introduce students to product planning process, including product line and mix strategies. It covers topics that are relevant to 'product' part of marketing mix and management. It focuses on the development and application of value-enhancing strategies used by successful product managers.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 779Y. Multicultural Marketing. (3 Credits)
This course delves into how marketers can successfully reach multicultural markets. There will be an overview of marketing principles and a discussion of the impact of race, ethnicity and culture on consumer behavior. The course will take a deep dive into the important marketing considerations for the 3 major multicultural target groups in the U.S. specifically, Hispanic Americans, African Americans and Asian Americans. Through this highly interactive class, students will be educated on the evolving role of marketing in today's diverse culture. Students will learn tools for marketing to Hispanic American, African-American and Asian-American market segments, and analyze and understand the nuances of multicultural marketing communication.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 77AA. Marketing Decision Models. (3 Credits)
Demonstrates the benefits of using systematic analytic and modeling based approach to marketing decision-making and equips. Enables students to work on marketing data with a heavily applied approach and construct models to aid managerial decisions about which strategies to choose.
Attribute: BUAN.
Prerequisite: MKGB 7730.

MKGB 77AF. Services Marketing. (3 Credits)
This course provides in-depth analysis of the unique challenges and opportunities in marketing services to consumers and businesses. Students learn to identify, create and develop winning services marketing strategies. Topics include positioning services in the marketplace, developing the right target market for service companies, buyer behavior and delivery of service quality in both consumer and business markets.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 777N. Study Tour: Cuba. (1.5 Credits)
As European, Chinese, and Latin American firms build there, Cuba is looking for domestic models that will preserve its egalitarian tradition and its rich historic culture. In this study tour, through class meetings, assigned readings, guest speakers and visiting Cuba, students will learn about this unique culture and economy while it is faced with the challenges of a socialist economic system developing a budding entrepreneurial private sector.
Prerequisites: MKGB 6710 or MIGB 6710.

MKGB 77AH. The Art of Social Business. (3 Credits)
Social Media is not a technology, a tool, or a trend; it is a fundamentally new way for businesses to connect with all of the people that matter at an unprecedented scale. People have embraced social platforms faster than any other form of communication, forcing organizations to ultimately reconstruct their business models. The course will provide students with a foundation of new social business practices across different industries. It will introduce new concepts and theories on how to transform existing business structures or develop new models that are social and personalized at the core. Students will learn how all disciplines within companies, especially marketing and marketing-related functions, are now being socialized (e.g. Marketing, Advertising, New Product Development, HR, Finance, R&D, Operations, etc.) The course will also address how a company's culture is impacted by creating more connectivity across employees and its customers. Specific areas that will be covered include: Brand and Media Management, Creative and Advertising, Data and Measurement, which will also touch upon consumer privacy. Course work will include readings, in-depth discussions, and three group projects.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 77AI. Innovation in Bus & Energy. (3 Credits)
The purpose of the course is to frame and critique opportunities for business to create innovations in energy systems. Consequently, the course will seek to induce the student to learn about energy systems in different parts of the world, as well as energy systems supporting different sectors of contemporary economies. This course will encourage students to think broadly, which should influence how to gather information and determine what information to gather as specifying context is key to understanding whether an innovation could be viable.
Attribute: ABGS.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 77AG. Study Tour: Cuba. (1.5 Credits)
As European, Chinese, and Latin American firms build there, Cuba is looking for domestic models that will preserve its egalitarian tradition and its rich historic culture. In this study tour, through class meetings, assigned readings, guest speakers and visiting Cuba, students will learn about this unique culture and economy while it is faced with the challenges of a socialist economic system developing a budding entrepreneurial private sector.
Prerequisites: MKGB 6710 or MIGB 6710.
MKGB 77A.J. Marketing Laboratory. (3 Credits)
This course is based on a simulation to get students in virtual and simulated market environment for data driven, strategic marketing decisions. The Marketing laboratory (ML) presents a context rich environment, beginning with an initial scenario (some history), the teams work through plans, execution, and adaptation to the vagaries of an environment that changes as teams begin to pursue their various strategies, and opportunities to compete against, collaborate with, and even ignore other teams in the space.
Prerequisite: MKGB 7730.

MKGB 77AK. Multiplatform Adv’tg Sales. (3 Credits)
This course will apply to anyone interested in the Sales, Advertising, Marketing and Product Management professions. The content is designed to educate students on what it takes to be successful in today's highly competitive and complex advertising sales profession. Students will be provided with an overview of multiplatform advertising properties including print, digital, social and TV, as well as analytics related to advertising sales and audience metrics.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 77AL. Innov in Business & Energy. (3 Credits)
This course aims to frame and critique opportunities for business to create innovations in energy systems. It discusses how contemporary energy systems have evolved and how energy infrastructures vary across regions of the world. It also examines how business decision makers can think about choices of energy and energy systems by encouraging students to think broadly in terms of innovation possibilities.
Attribute: ABGS.

MKGB 77AM. Digital Marketing. (3 Credits)
Digital Marketing is designed to provide students with a thorough knowledge of the digital marketing process. Throughout this course, students will be taught various digital marketing techniques and strategies so they have will have a strong knowledge base once this course is complete.
Prerequisites: MKGB 6710 or MIGB 6710.

MKGB 77AN. Design Thinking. (3 Credits)
Design thinking is an iterative problem-solving process of discovery, ideation, and experimentation that, when combined with business models, provides decision-makers with effective tools for innovation and transformation. This hands-on course will guide students in the use of a variety of design-based tools and techniques to clarify and solve human-centered organizational, business, and public service challenges.

MKGB 77AP. Business Strategy Simulation. (3 Credits)
This course is built upon a decision-making laboratory that creates a context-rich simulated business environment in which teams of students manage simulated businesses. The course not only promotes the synthesizing of knowledge conveyed through the curriculum, it also presents a means for practicing approaches to dealing with rapid and systemic change in a business environment.
Prerequisite: MKGB 6710.

MKGB 77AQ. Marketing Management and Strategy Part 1. (1 Credit)
This one-credit course focuses on the definition of marketing and on understanding the field's importance for the entire business. It discusses different company orientations and explains how marketing orientation is different from other similar orientations, and how it contributes to overall business performance and societal well-being. Furthermore, it aims to give students an overview of marketing management processes and responsibilities.

MKGB 77AR. Marketing Management and Strategy Part 2. (1 Credit)
This one-credit course focuses on the necessary marketing related analyses that businesses need to perform before they create their strategies and tactics. It includes a detailed analysis of relevant environmental factors, an in-depth understanding of consumer behavior, and identification and analysis of competitors. Cases and real-life examples are used to ensure student understanding of the topics covered.

MKGB 77AS. Marketing Management and Strategy Part 3. (1 Credit)
This one-credit course focuses on different components of the marketing mix. It explains how businesses make tactical decisions regarding their product development and marketing, pricing, managing distribution channels and designing communication and promotion activities. Cases and real-life examples are used to ensure student understanding of the topics covered.

MKGB 77AT. Business and the Green Real Deal. (3 Credits)
This course seeks to discern the role of energy choices and systems in responding to the climate challenge, and to specify and critically assess opportunities for business enterprise to take initiative in responding constructively to the climate challenge. Students will be organized into small teams. Each team will prepare a business case for an innovation that responds constructively to some aspect of the climate challenge.

MKGB 7811. Marketing Internship. (1 to 3 Credits)
This course is intended for students with a Marketing internship for this trimester that wish to receive academic credit for it. The course will begin with an orientation session and will be followed by additional meetings with students. The course instructor will provide additional details to enrolled students.

MKGB 8701. Marketing Analytics. (1.5 Credits)
This mini-course exposes students to a variety of marketing metrics including those related to brand performance in-store (e.g., Nielsen measures used in CPG/brand management) and on-line and the use of those marketing metrics in marketing decision making. The course will cover basic data manipulation and analysis of secondary data from syndicated sources such as Nielsen and IRI. Co-requisite: MKGB 6710 REQUIRED COURSE FOR MARKETING CONCENTRATION Offered in Fall/Spring only.
Attribute: ABEP ASDM.
Prerequisites: MKGB 6710 (may be taken concurrently) or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 8703. Revealing Consumer Insights. (1.5 Credits)
Applies theories of anthropology and ethnography to the study of consumer behavior and purchase decisions. Topics include the study of cultures and subcultures, ethnographic research designs, customer immersion, and contemporary ethnographic writing.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 8709. Digital Marketing Analytics. (1.5 Credits)
Provides students with a hands-on experience with using various analytical methods and tools to explore digital marketing, including social media marketing and google analytics.
Prerequisite: MIGB 6710 (may be taken concurrently).
MKGB 879A. Fashion Marketing. (1.5 Credits)
This course examines the marketing mix through the lens of the fashion industry. Topics to be covered include merchandising, new product development with an emphasis on private label and celebrity brands, customer loyalty programs, and licensing. We will also explore the key issues and challenges of the fashion business model and discuss emerging trends such as m-commerce, social media and apps.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879E. Luxury Marketing. (1.5 Credits)
This course will provide excellent support for those planning a career in luxury marketing, brand management, retailing and distribution and communications. It covers areas such as history and trends of the luxury sector; marketing of luxury goods and services; strategy evaluation for luxury businesses; luxury consumer behavior; luxury product and brand management; luxury marketing communications and retailing and channel management within the luxury sector.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879G. Retail Buying and Merchandising. (1.5 Credits)
This course explores the creative, financial and analytical aspects of merchandising and buying. During this mini-course students will build a merchandise assortment for the fall 2012 season while exploring: The fundamentals of retail math; The nuts and bolts of inventory management and sales performance/analysis; The influence of fashion trend; The impact of historical performance; and The importance of merchandise planning and store allocation.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879K. Event Marketing. (1.5 Credits)
Event Marketing is a significant and powerful component in the world of Integrated Marketing. It is vital to PR campaigns, product launches and building brands; and just as with more traditional disciplines, Event marketing is a medium to acquire new customers and establish brand loyalty. Students in this class will learn fundamental principles of event marketing, various ways event marketing is utilized in today’s marketplace, core category essentials including strategy, creative end production, and the measurement of the success of an Event Marketing campaign.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879L. Marketing to Young Consumers. (1.5 Credits)
This course examines special considerations in developing and marketing products designed for infants, preschoolers, kids and tweens. Topics include: Concept/product development and testing with children and the youth and advertising to the children among others.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879P. Science of Shopping. (1.5 Credits)
This course will examine the anthropological dimensions of retail shopping from four interconnected perspectives: practical, relational, socio-economic and sensory-physical. Students will learn the pragmatics of shopping – how people manage to navigate a store; they will explore shopping malls in terms of self-identity, social class and feelings of community; they will look at the rituals of Christmas shopping; they will evaluate the sensory dimensions of a store in experiential shopping.
From exploring the interplay of these variables, students should receive a practical and theoretical understanding of the retail experience for consumers and its importance to our culture. Students will read a range of materials, write essays and conduct primary ethnographic research in shopping locations.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879R. Psychology of Pricing. (1.5 Credits)
When is it better to price a product at $3.99 compared to $4.00? Should an e-tailer include shipping charges in their products’ prices or add them separately? Among a marketer's tools, price is arguably the most important because it is the only one that represents revenue, rather than a cost, to the firm. Yet decisions like these are often wrought with complexity and uncertainty. This mini course brings structure to the issue through explorations of consumers’ beliefs, feelings, and behaviors with respect to prices and pricing tactics.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879T. Mktg with Big Data. (1.5 Credits)
“Big data” describes the enormous numbers of large data sets that are generated through social media, client payment systems, consumer buying patterns and GPS satellite mapping. This course will discuss utilized to manage the terabytes of data produced daily, the methods used to spot trends, and the myriad ways that Big Data can enhance marketing strategies and optimize the ROI of a firm's marketing budget.
Attributes: BUAN, ISEL.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879U. Consumer Social Responsibility. (1.5 Credits)
This mini-course is aimed at exploring the consumer’s role in shaping the social environment and, as such, focuses on demand-side issues of social responsibility. At the end of this course, students should have a better understanding of how the tools of marketing can be used to prompt socially responsible consumption. As a result, students should better understand themselves both as business people and as individuals.
Attribute: ABGS.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879V. Multiplatform Adv'tg Sale. (1.5 Credits)
This mini course will apply to anyone interested in the Sales, Advertising, Marketing and Product Management professions. The content is designed to educate students on what it takes to be successful in today’s highly competitive and complex advertising sales profession. Students will be provided with an overview of multiformat advertising properties including print, digital, social and TV, as well as analytics related to advertising sales and audience metrics.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.
MKGB 879W. Cuba in Transition. (1.5 Credits)
Cuba is looking for business models and partnerships that will preserve its egalitarian tradition and its rich historic culture. In this course, through class meetings, assigned readings, and guest speakers, students will learn about the unique Cuban culture and economy that is faced with the challenges of a socialist economic system developing a budding entrepreneurial private sector.
Corequisite: MKGB 6710.

MKGB 879X. Applied CRM. (1.5 Credits)
Customer Relationship Management (CRM) is the strategic process of selecting the customers a firm can most profitably serve and of shaping the interactions between a firm and their customers. The goal is to optimize the current and future value of the customers for the company. This course introduces students to CRM strategy, teaches the range of metrics used for customer analytics and includes applied, hands-on usage of a real-world CRM system. Students in this course will gain experience in the strategies and application of CRM for business and marketing effectiveness.
Attributes: BUAN, ISEL.

MKGB 8999. Independent Study. (1.5 to 3 Credits)

Marketing Intelligence Courses

MIGB 6710. Customer-Driven Marketing. (3 Credits)
This course introduces students to marketing both as a company orientation and as a company function, and emphasizes why and how successful marketing needs to be customer-driven. Interactive class discussions focus on the role and importance of marketing for the entire organization, individuals and society at large. Students learn how marketing interacts with other business functions within a company, as well as how marketing contributes to both the company bottom-line and customers’ well-being. Topics covered include the strategic marketing process; the creation, communication, delivery and exchange of value; market segmentation, targeting, and positioning; and the marketing mix. Lectures, comprehensive case analyses, in-class exercises, and team projects are used to provide a complete understanding of customer-driven marketing practices within a global framework.

MIGB 7720. Consumer Behavior. (3 Credits)
Analyses the latest social science research and theories to better understand consumer behavior. Special attention is directed to applications in managerial decision-making. Topics include motivation, learning, memory, perception, attitude formation and change and decision-making are covered to explain and predict how consumers behave in the marketplace.

MIGB 7722. Data Driven Mktg Decisions. (3 Credits)
Analyses the latest social science research and theories to better understand consumer behavior. Special attention is directed to applications in managerial decision-making. Topics including motivation, learning, memory, perception, attitude formation and change and decision-making are covered to explain and predict how consumers behave in the marketplace.
Attribute: ASDM.

MIGB 7785. Marketing Strategy. (3 Credits)
Marketing Strategy.

MIGB 779H. Marketing Decision Models. (3 Credits)
Marketing Decision Models.

MIGB 779Z. Applied Project. (3 Credits)
Applied Project.

MIGB 8701. Marketing Analytics. (1.5 Credits)
This course exposes students to a variety of marketing metrics, including those related to brand performance in-store (e.g., Nielsen measures used in CPG/brand management) and online, and the use of those marketing metrics in marketing decision-making. The course will cover basic data manipulation and analysis of secondary data from syndicated sources such as Nielsen and IRI.

MIGB 8702. Exp Career Dev Portf I. (0 Credits)

MIGB 8703. Reveal Consumer Insights. (1.5 Credits)

MIGB 8704. Qualitative Research. (1.5 Credits)

MIGB 8705. Applied CRM. (1.5 Credits)
Customer Relationship Management (CRM) is the strategic process of selecting the customers a firm can most profitably serve and of shaping the interactions between a firm and their customers. The goal is to optimize the current and future value of the customers for the company. This course introduces students to CRM strategy, teaches the range of metrics used for customer analytics and includes applied, hands-on usage of a real-world CRM system. Students in this course will gain experience in the strategies and application of CRM for business and marketing effectiveness.

MIGB 8706. Experimental Design. (1.5 Credits)
MIGB 8707. Language of Consumers. (1.5 Credits)

MIGB 8709. Digital Marketing Analytics. (1.5 Credits)
Provides students with a hands-on experience with using various analytical methods and tools to explore digital marketing, including social media marketing and google analytics.

MIGB 8712. Exp Career Dev Portf II. (0 Credits)

MIGB 8730. Introduction to Marketing Research. (1.5 Credits)
Provides a fundamental understanding of marketing research methods and their applications, offering perspectives from both the provider and user of information needed for managerial decision-making. Discusses the marketing research process with an emphasis on the identification, collection, analysis, and dissemination of data. Topics include problem definition, the use of secondary data, various quantitative and qualitative methods, preparation and evaluation of surveys, and basics of data analysis.
Prerequisite: MIGB 6710.

MIGB 8731. Survey & Questionnaire Design. (1.5 Credits)
Provides the framework, skills, and tools to develop valid and reliable marketing research techniques. Working in support of marketing objectives, this course examines practical executions of research surveys with consumers and businesses. Enables students to structure and scale research surveys with a variety of implications and methods of analysis, measurement, and evaluation.

MIGB 8999. Tutorial. (1.5 Credits)

Operations

Operations refers to the design, operation, and improvement of the systems that create and deliver a firm's primary products and services. It integrates all aspects of the product and service lifecycle, from product and process design, procurement, planning, and production, to logistics, distribution, and returns. From start to finish, this execution process makes a direct, significant impact on a firm's competitive advantages and financial performance.

Courses in the operations area equip students with a solid understanding of core operations concepts and decisions, rigorous analytical thinking
and skills, and a creative mindset so they can deal with all of the complex issues of a supply chain. Moreover, courses incorporate new elements such as sustainability, risk management, and innovation, making them especially relevant to today's increasingly interdependent and competitive global economy.

For students interested in specific business settings, the area also provides courses that explain the operations function in those industries, such as operations in health care.

**Programs**

Students interested in operations coursework can pursue the interdisciplinary M.S. in management (p. 682).

**Courses**

**OPGB 6627. Operations Management. (3 Credits)**
MBA FLEX CORE COURSE. Studies the operations of both manufacturing and service organizations with the objective of simultaneously optimizing the quality and productivity of the operations systems. Develops techniques for strategic planning and system design, such as quality control, aggregate and capacity planning, project planning, scheduling and control, material and inventory management and just-in-time production.

**Attributes**: BUAN, ISEL.

**OPGB 8999. Independent Study. (3 Credits)**
Independent Study.

**OPGB 76AA. Transnational Mgt&Sys Oper. (3 Credits)**
The operations function for both manufacturing and service organizations is studied with the objective of the simultaneous optimization of the quality and productivity of the operating systems. Techniques for strategic planning and system design.

**OPGB 76AP. Project Management. (3 Credits)**
Provides the skills project managers need to complete projects on time and on budget. Technology improvements in organizations are implemented through projects, and strong project management skills are a key success factor from companies to achieve the expected benefits from their technology investments. Topics include setting and maintaining project scope, developing work plans, estimating required resources, developing work programs, organizing project teams, super-users, monitoring and controlling projects, maintaining relationships with users and management, status reporting, and key factors for realizing the anticipated benefits from the investment. Students use a computer-based project management tool as part of this course.

**OPGB 76BB. Studies in Quality Management. (3 Credits)**

**OPGB 76BR. Health Care Operations Mgt. (3 Credits)**
Health Care Operations Management is a discipline that integrates scientific principles of operations management to determine the most effective and efficient methods to support patient care delivery. The biggest challenge in health care is to provide high quality care while at the same time keeping costs down. As such, all health care sectors must be driven by process management, quality improvement, information technology, knowledge management, and resource alignment. This course addresses these challenges in many ways, from the design of patient flow to streamlined process, from resource management to supply chain management, from quality control to patient safety, from forecasting to capacity planning, and from continuous improvement to project management.

**OPGB 76CA. Accounting Controls. (3 Credits)**
The primary focus of the class will be on the use of data-driven analytics to help managers make key operating and strategic decisions. A secondary focus will be on the use of data-driven analytics for the purpose of internal control.

**OPGB 76CB. Process Management and Six Sigma. (3 Credits)**
A process is the collection of activities and operations that transform inputs into outputs. This course focuses on learning how to improve organizational processes by using the globally recognized problem-solving methodology known as Lean Six Sigma. Students in this course will learn the five phases of the Lean Six Sigma method and will have the chance to apply the techniques and tools learned in class in real-world projects. Students that meet the requirements of classroom lectures and tests, case studies, and projects will earn Six Sigma White/Yellow Belt Certificates issued by Ernst & Young; students are also encouraged and supported to get Six Sigma certificates from the American Society for Quality (ASQ).

**Strategy**

Whether you're working at a law or financial firm, advertising or insurance agency, hospital, pharmaceutical company, or other type of organization, strategy and statistics are key to an organization's overall performance. Strategy creates a vision and emphasizes resources needed for firms to develop a competitive advantage. Statistics provides the data and tools executives need to make decisions. Together, these disciplines work continuously to support the firm’s long-term sustainability and growth.

At the Gabelli School, students can specialize in either field, preparing for careers as consultants, analysts, general managers, statisticians, strategy staff, and advisors.

The application of statistical analysis is showcased through the M.S. in Applied Statistics and Decision-Making (p. 677) program, through which students gain skills in statistical theory, methods, and computation.

For students interested specifically in managing goals and making recommendations in health care, there are dedicated options at all levels: undergraduate students can complete a secondary concentration in the business of health care; graduate students can choose a secondary concentration in health care. Additionally, the area prepares students in the interdisciplinary M.S. in Health Administration (p. 752).

**Programs**

- M.S. in Applied Statistics and Decision Making (p. 677)
- M.B.A. Secondary Concentration in Healthcare Management (p. 672)
- M.B.A. Concentration in Management (p. 673) (Interdisciplinary)
- M.B.A. Secondary Concentration in Entrepreneurship (p. 669) (Interdisciplinary)
- M.B.A. Secondary Concentration in Blockchain (p. 668) (Interdisciplinary)
Courses

Strategy (SAGB) Courses

SAGB 7618. Organization Theory. (3 Credits)
While discussion of business is often couched in economic terms, more often than not business is influenced by sociological and psychological factors. In this class, you will study the key dimensions of what is known as 'Macro OT' (sociological perspectives) and 'Micro OT' (psychological perspectives). Macro OT coverage will include Institutional Theory (legitimacy, certifications, and isomorphism), Network Theory (structure, position, tie type, and network dynamics), and Social Movement Theory and Media Construction (performances). Micro OT coverage will include Search Theory and Organizational Learning Theory (exploration vs. exploitation), Decision-making Biases (confirmation bias, anchoring, etc.) and Agency Theory (monitoring and incentive alignment). Other Meso Theoretical Constructs covered include Identity, Myths and Artifacts, Roles, and Deviance/Conformity.

SAGB 7622. Consulting Skills. (3 Credits)
Students develop the skills involved in each phase of the consultation process: contracting with clients, gathering critical performance data, diagnosing the information for improvement opportunities, providing feedback to the client, and building strategies for intervention. This course prepares students for different types of client-consultant relationships, internally and externally.

SAGB 7626. BIMBA: Global Policy. (4.5 Credits)
SAGB 7641. British Economy and Brexit. (3 Credits)
This intensive course is designed to give students an in-depth understanding of Brexit, including the implications for the British economy and the companies that operate in it. Students meet three times a class in preparation for travel to England. This course may count toward a Finance or Management concentration. Please see your program director or dean-adviser for further registration information.

SAGB 7660. Strategy. (3 Credits)
FT MBA CORE/ PMBA FLEX CORE COURSE. Focuses on defining an organization’s mission, establishing its objectives, developing strategies for achieving those objectives, and assuring implementation and continual updating of long-term plans. This course integrates the knowledge and skills developed in the core courses. (Previous title: Business Policy)

SAGB 7661. Strategy. (3 Credits)
This course introduces the strategic management framework, integrating the perspectives of different functional areas in understanding a firm’s performance. Learning goals involve the development of diagnostic reasoning skills, the practice of strategy communication skills, and the application of a toolkit to analyze issues relevant to the development of an appropriate strategy for a firm. Lectures, case studies, and project work are part of the pedagogy of this course.

SAGB 7671. Industry Analysis and Strategic Planning. (3 Credits)
Discusses techniques for analyzing the long-term attractiveness of different industries and develops a framework to understand the nature of competition and the relative competitive position of firms within industries. Emphasizes global factors that affect industry attractiveness and competitive positioning. In particular, highlights the impact of differences in and the competitive advantages of nations and trade, as well as the development of global standards for the long-term profit potential of industries. While this course emphasizes the industry level, it also includes competitive factors of firms within industries to introduce a framework for strategic planning at the firm level.

Attribute: ABIB.

SAGB 8999. Independent Study. (3 Credits)
Independent Study.

SAGB 769K. History of Business. (3 Credits)
This course will focus on the interrelationships between the business community and the development of the United States of America. The course is divided into three sections that will cover such topics as the colonization of America by the Europeans, industrialization in the United States and the civil war, and creating an environment of business regulation.

SAGB 769Y. Value Innovation. (3 Credits)
This course will introduce students to blue ocean strategy and value innovation: the strategic logic of high growth. Students will learn how to develop value innovation strategies that reshape industries and lead to the creation of new market space. The course will include lectures, class team work, and case studies.

SAGB 76AD. Quantitative Methods and Decision Analysis. (3 Credits)
A study of quantitative methods and decision making analysis.

SAGB 76AX. Strategic Management and the Pharmaceutical Industry. (3 Credits)
This course will introduce students to the skills and techniques in researching highly regulated industries, using the pharmaceutical industry as an example. The industry is going through major transformations, with the basic business model being threatened. This course will analyze the reasons for this and will help in defining newly emergent business models in the Pharmaceutical industry. The uncertainties created by turbulence in the political, economic, social, and techno-scientific systems will be highlighted as will the creative solutions being attempted.

Attribute: ABHM.

SAGB 76AY. Introduction to Healthcare Systems. (3 Credits)
This course will describe the different elements of the healthcare system and highlight the role of the payers, providers, patients, healthcare service workers, and the industry (pharmaceutical, devices, supplies, and diagnostics) within the context of a larger social system governed by local regulations and different demographic realities. While the emphasis will be on the United States, key differences with other systems such as in Europe, Canada, Brazil, and China will also be presented. The role of key associations in the U.S. such as the AMA, IOM, PhRMA, patient advocacy groups, and unions will be described. Emerging trends in the system in the United States will be presented as will the impact of other countries on the U.S.

Attribute: ABHM.
SAGB 76BC. Judgment and Decision Making. (3 Credits)
Decision-making is a central human activity, but how good are we at it? Scientific evidence suggests that our decisions are often biased and flawed, resulting in disappointing or even disastrous outcomes. This course draws upon contemporary research in economics and psychology to answer two questions: (1) how should we rationally approach decision-making, and (2) why is it that our actual decision-making is so often irrational?

SAGB 76BH. History of International Business. (3 Credits)
History of International Business explores the transition from an agrarian to a modern business economy of four nations: China, Russia/Soviet Union, Germany and Japan. Each of these nations came to understand that economic modernization was vital for true independence in the world of the nineteenth and twentieth centuries. How they faced their unique challenges shaped the futures of their nations, often bringing down governments and forcing radical reformation of their societies. History of International Business will explore these efforts and relate them to the continuing challenges of the twenty-first century economy.

SAGB 76BK. The Rose Program. (3 Credits)
This course is intended for students who want to learn more about regulation in the financial services industry and want to get actively involved in shaping the regulatory space. Top performing project teams will present their proposals to a panel of Wall Street executives and will be invited to Washington, D.C. (all expenses paid) to present to regulators.

SAGB 76BL. History of Labor in America. (3 Credits)
This course will examine the development of the labor movement in America, starting with its colonial roots in the eighteenth century, through the rapid growth of the movement in the nineteenth century as America industrialized, to the increasing politicization of the movement as it reached the height of its influence in the twentieth century, and ending with an analysis of the modern decline of organized labor. Discussions will include the changing legal climate within which the unions operated, the often hostile business climate against which the unions organized, and the struggles against internal corruption within the unions.

SAGB 76BM. Innovation in Business and Energy. (3 Credits)
This course aims to frame and critique opportunities for business to create innovations in energy systems. It discusses how contemporary energy systems have evolved and how energy infrastructures vary across regions of the world. It also examines how business decision makers can think about choices of energy and energy systems by encouraging students to think broadly in terms of innovation possibilities.

Attribute: ABGS.

SAGB 76BO. Urban Lab. (4.5 Credits)
This interdisciplinary course explores groundbreaking issues in urban research with the goal of inspiring new ways to think about the city's future and Fordham's role in helping to shape that future. The course includes a lab component focused on applied research and scholarship, deep engagement with the urban community, and the development of innovative solutions. Students will work with civic and community organizations, public agencies, and urban experts to identify, evaluate, and implement effective policies and programs in specific topic areas.

SAGB 76BP. Current Topics in Healthcare. (3 Credits)
Healthcare management operates in a very dynamic environment. As healthcare policies change with new administrations so do the priorities of providers and payers. The patients feel the impact of these changes the most, while the industry has to continuously re-assess the validity of its business models. Further, new technologies, scientific breakthroughs, and system innovations keep healthcare administrators on their toes. This course provides an opportunity to discuss the most prevalent issues in healthcare as they are happening. Guest lecturers and professors provide their views on different challenges that the healthcare industry faces including policy, operations, risk taking and decision-making uncertainties, and the developing solutions. Students will participate in these discussions and do a final paper on one of the topics of their choosing. Each formal lecture will be followed by one or two in-depth discussion sessions.

SAGB 76BS. Blockchain: Industry Disruptor and Creator. (3 Credits)
Blockchain (the technology underlying Bitcoin and Ethereum) is a transformative technology that will up-end existing industries and spawn completely new ones. In this course, students will study the fundamentals of blockchain and examine its potential impact on industries as diverse as banking, energy, music, and non-profits.

Attributes: ABBC, ABER, ABFO.

SAGB 76BT. Business Strategy Simulation. (3 Credits)
The design of this course is built upon a decision-making laboratory that creates a context-rich simulated business environment in which student teams manage simulated businesses. The course promotes the synthesizing of knowledge conveyed through the curriculum, and it also presents a means for practicing approaches to dealing with rapid and systemic change in a business environment.

SAGB 869J. Managing Innov&Change I. (1.5 Credits)
Today’s firms are faced with a number of unique challenges that demand an increasing pace, volume and complexity of organizational changes. Firms have to learn to manage incremental innovations and change, and rapidly respond to disruptive innovations and discontinuous change. This course is geared towards understanding the organization behavior component of the challenges, techniques and burdens associated with initiating and implementing major change in an organization.
SAGB 869K. Managing Innov&Change II. (1.5 Credits)
Today's firms are faced with a number of unique challenges that demand an increasing pace, volume and complexity of organizational changes. Firms have to learn to manage incremental innovations and change, and rapidly respond to disruptive innovations and discontinuous change. This course is geared towards understanding the strategy component of the challenges, techniques and burdens associated with initiating and implementing major change in an organization.

Design Management (DGGB Courses)

DGGB 6800. Pre-MBA Basic Statistics. (0 Credits)
Pre-MBA Basic Statistics.

DGGB 6810. Math Methods for Bus. (3 Credits)
(MBA program prerequisite) Studies the fundamental methods of mathematics applied in business statistics and operations research. The course concentrates on linear algebra and differential and integral calculus.

DGGB 6820. Statistics. (3 Credits)
MBA CORE COURSE Introduces the basic statistical concepts essential for business research and decision-making. These include descriptive statistics, probability distributions, statistical inference and simple and multiple regression.
Attributes: BUAN, ISEL.
Mutually Exclusive: MMGB 6820.

DGGB 6830. Statistics and Decisions. (3 Credits)
Introduces the statistical concepts essential for business decision making. Topics include: Random Variables, normal distribution, sampling distributions; confidence intervals; one and two sample hypothesis tests; simple linear regression; multiple regression; categorical data analysis; ethics in statistics. These concepts will be implemented using state of the art statistical software.

DGGB 7811. System Design Internship. (1 to 3 Credits)

DGGB 7844. Stat Methods and Comp I. (3 Credits)
This course is designed to introduce statisticians to statistical programming and data analysis. Topics will include: hypothesis testing, regression models, experimental design and simulation. The statistical topics are integrated into the programming content.
Attributes: BUAN, ISEL.

DGGB 7850. Forecasting Models. (3 Credits)
Introduces and discusses forecasting systems capable of interconnecting separate areas of business. Efficient forecasting systems, based on modern analytical and simulation techniques, can provide necessary insights into the behavior of strategic variables over time.
Attribute: ASDM.
Prerequisites: DGGB 6820 or GBA Waiver Statistics with a score of 070.

DGGB 8999. Independent Study. (3 Credits)

Applied Statistics & Decision-Making (SDGB) Courses

SDGB 7811. Applied Statistics Internship. (1 to 3 Credits)
This is an experiential elective within the Applied Statistics program, requiring faculty guidance for academic credit from professional training.

SDGB 7840. Applied Regression Analysis. (3 Credits)
Focuses on preliminary data analysis, model formulation and estimation, and reliability and sensitivity analysis to understand causal links between various elements of a relationship as the foundation for effective system design and control. Multivariate regression models and techniques of experimental design provide the basis for exploring these links. Discusses applications to all areas of business.
Attribute: BUAN.
Prerequisites: DGGB 6820 or DGGB 6830.

SDGB 7841. Statistical Theory I. (3 Credits)
This course provides an Introduction to mathematical Statistics and a foundation for acquiring the skills to apply advanced statistical models to many important areas of decision-making in business. The course focuses on developing an understanding of random variables, their distribution functions, and sampling theory.
Attributes: BUAN, ISER.
Prerequisite: DGGB 6820.

SDGB 7842. Statistical Theory II. (3 Credits)
This course provides an Introduction to mathematical Statistics and a foundation for acquiring the skills to apply advanced statistical models to many important areas of decision-making in business. The course focuses on developing an understanding of Hypothesis testing, Nonparametric Statistics, Bayesian Statistics, Multivariate Methods and Linear Models and their applications.
Prerequisites: DGGB 781A or SDGB 7841.

SDGB 7843. Judgment and Decision Making. (3 Credits)
Decision-making is a central human activity, but how good are we at it? Scientific evidence suggests that our decisions are often biased and flawed, resulting in disappointing or even disastrous outcomes. This course draws upon contemporary research in economics and psychology to answer two questions: (1) how should we rationally approach decision-making, and (2) why is it that our actual decision-making is so often irrational?
Attribute: BUAN.

SDGB 7844. Stat Methods and Comp I. (3 Credits)
This course is designed to introduce statisticians to statistical programming and data analysis. Topics will include: hypothesis testing, regression models, experimental design and simulation. The statistical topics are integrated into the programming content.
Attributes: BUAN, ISER.

SDGB 7845. Sampling Theory. (3 Credits)
This course provides a foundation in sample design and data collection for decision making. We study theoretical principles and applications, starting with definition of the population characteristic of concern, the frame, sampling methods, sample size, and sampling plan. We study also sampling and non-sampling errors and biases, problems of non-response, the half-open interval, and other methods to assure validity and usefulness of our data.

SDGB 7846. Advanced Financial Econometric. (3 Credits)
This course takes up Bayesian estimation of small-scale financial sector and macro-econometric models. Counter-factual simulations will also be used, as well as Monte-carlo methods for evaluating confidence intervals. In addition to Bayesian estimation, the course will make use of extensive data sets to investigate topics such as contagion effects across countries in financial markets, and neural networks for predictive accuracy. *Subject to NY Approval*
SDGB 7847. Machine Learning for Stats. (3 Credits)
The course will give students an opportunity to implement statistical techniques in ‘R’ to better understand how they work. Emphasis will be on implementation and intuition rather than on background theory and analytical methods. The course will offer a lab-style approach to numerical analysis and optimization methods used to fit statistical models. Topics will include gradient descent/ascent for regression and classification, Newton’s method, expectation maximization for mixture models, numerical maximum a-posteriori estimation via EM. Students will have the chance to implement techniques and become proficient in ‘R’ by writing functions and classes that perform standard analyses.

Attribute: BUAN.

SDGB 7848. Observational Studies. (3 Credits)
In real-world settings, analysts must draw inferences about causes and effects from observational data, such as those generated from a nonrandomized study. For example, how do we truly determine whether charter schools produce better student outcomes, or whether a marketing campaign for a product has increased consumer awareness? This course will cover select classes of statistical methods to help analysts design and analyze observational studies, for real-world decision-making. Topics will include propensity scores, predictive, modeling, and stimulation-based inference; the R statistical software will serve as the primary computational tool for this course, so a basic knowledge is required.

Attribute: BUAN.

SDGB 7849. Experimental Design. (3 Credits)
This course examines the design, implementation, and analysis of empirical research methods. Topics include experimental and quasi-experimental designs; validity within designs; sampling; and data analysis.

SDGB 7850. Statistical Risk Analysis. (3 Credits)
This course examines various aspects of risk as revealed or concealed in business, society, and personal situations by utilizing tools in probability theory, statistical analysis, decision theory, and cognitive and behavioral sciences. Students will learn basic risk metrics and models, along with methods for risk analysis and management. Through case studies mirroring Western and Chinese societies and ranging from health & safety, social inequality, finance, to sports and entertainment, students will gain deeper understanding of risk and become better decision makers. Interdisciplinary in nature, this course invites students to think unconventionally of problems that are at the frontier of the globalized and information-saturated world.

SDGB 7851. Measurement and Data Visualization. (3 Credits)
Businesses use metrics not only to track, evaluate, and incentivize their employees and customers but also to monitor and improve their organizations. To inform their decisions, they may, for example, look at company records, run an experiment, speak to employees and customers, or make site visits. All of these activities generate data, requiring decisions to be made on how to collect, summarize, analyze, and present these disparate pieces of information. In this course, we consider how to approach these issues, from developing appropriate metrics and heuristics, to thinking about data quality, to creating accessible visualizations.

Attributes: BUAN, ISEL.

SDGB 8999. Applied Stats & Decision. (3 Credits)

Academic Programs

- Master of Business Administration Programs (p. 665)
- Master of Science Programs (p. 676)
- Doctoral Programs

Advanced Certificate Programs

Advanced Certificate programs provide advanced study in business. They are designed for people who already hold an M.B.A. or comparable graduate degree and want to pursue post-graduate study in a very specific area.

These programs are approved by and registered with the New York State Department of Education. To earn one, students must earn a B or better in all courses with a minimum 3.0 GPA. Certificates must be completed within three years of beginning the program. Fordham awards certificates in September, February, and May.

The Gabelli Graduate School of Business currently offers the following Advanced Certificate programs:

- Accounting Technology Analytics (Adv Cert) (p. 659)
- Business Analytics for Managers (Adv Cert) (p. 660)
- Financial Computing (Adv Cert) (p. 660)

To learn more about Advanced Certificate programs, visit the Fordham website.

Accounting Technology Analytics (Adv Cert)

One of the most significant changes in the global business environment is the ever-increasing availability of Big Data. Data analytics is changing the role of the accounting professionals in business decision-making. Students must adapt to the changing business environment to ensure future success as professional accountants, internal auditors, internal management accountants, non-financial/sustainability accounting professionals, and technology leaders. The Advanced Certificate in Accounting Technology Analytics focuses on developing students’ analytical skills and capabilities, including the ability to identify the right questions in the relevant context, apply the ETL process to the relevant data, employ appropriate data analytics tools and techniques, and interpret and communicate findings to stakeholders.

Requirements

Completion of the Advanced Certificate program requires 15 credits. These are comprised of four required 3-credit courses plus a 3-credit elective. Any course that overlaps toward M.S. program requirements may also be applied to the M.S. program, contingent on the student’s appropriate admission and enrollment to that program.

The courses below may also be taken as a track for students in the M.S. in Professional Accounting (p. 684) program. If taken as a track, graduates of the M.S. in Professional Accounting that hold an F1-visa will become eligible for a STEM-OPT extension.
Business Analytics for Managers (Adv Cert)

Overview
15 credits
NYSED 40804

Business analytics (BA) is the application of quantitative and qualitative methods and tools to data in order to gain insight and make informed decisions. The confluence of an increasingly complex world, the vast availability and rapid proliferation of data, and the urgent need to stay ahead of the competition has sharpened the focus on using analytics within organizations. Popular literature is abuzz with news of how business analytics is helping organizations in every industry use information to their advantage. Business analytics help businesses to meet such objectives as growth and competitive differentiation, to engage in better business performance management, to evaluate choices regarding products and pricing, and to make operations more efficient and effective. In particular, analytics is helping organizations both to anticipate and initiate change by uncovering unexpected associations and patterns. Its growing importance in organizations is creating a demand for business people who are trained in the technologies and methodologies of business analytics.

The Gabelli School of Business's Advanced Certificate in Business Analytics for Managers program is specifically targeted to managers looking to delve into the business analytics arena and prepares students for exciting and lucrative career opportunities by enhancing their capabilities for data- and model-driven decision-making. It takes advantage of the limited time students have for their studies by acutely focusing on specific areas of business analytics according to their interests and their organization's immediate needs. The 15-credit certificate will set students up with the courses they need to transfer to a possible future M.S. program or to pursue their careers with very focused skills. The program integrates the fields of analytics techniques, data management, information technology, modeling, and statistical analysis through core classes and electives that train students to become effective analysts and informed users of business data. The program prepares students to develop quantitative and qualitative skills required in data-driven industries such as banking, consumer products, energy, government, health care, insurance, manufacturing, and pharmaceuticals.

The curriculum consists of five courses (two required core and three electives) spanning two to three semesters, resulting in a 15-credit advanced certificate in business analytics for managers.

Admissions

Admissions requirements include:

- Completed and signed application
- Application fee
- Written statements
- Official undergraduate transcript (and graduate transcript)
- Two reference letters
- Resume

Financial Computing (Adv Cert)

With the surge of high frequency trading and complex investing models, more and more sophisticated computing techniques and skills are required in the finance industry besides traditional quantitative models. For example, strong C++ based software development and machine-learning skills are essential for a financial engineer in automated trading.

To meet such an urgent strong demand for knowledge in advanced financial computing, the Department of Computer and Information Science in the Graduate School of Arts and Sciences and the Gabelli School of Business have partnered to offer an advanced certificate in financial computing. This certificate program aims at
training and sharpening students’ computing skills in handling real world large-scale financial data in addition to financial software development. The state-of-the-art, rigorous, and personalized course work/projects guarantee students’ future success in the job market. Our alumni have won high-salary ‘Quant’ and financial data analytics positions in Wall Street.

The audiences of the financial computing certificate program are future ‘Quant’ or business analytics professionals. We especially welcome students enrolled in the following programs or with the equivalent backgrounds to apply for this certificate program:

- MSQF (Master of Science in Quantitative Finance) in Graduate School of Business Administration
- MSCS (Master of Science in Computer Science) in Graduate School of Arts and Sciences
- MSBA (Master of Science in Business Analytics) in Graduate School of Business Administration
- MSGF (Master of Global Finance) in Graduate School of Business Administration
- Other qualified graduate students.

Please note: The Advanced Certificate in Financial Computing is available only to current Fordham University students.

Requirements
The advanced certificate in financial computing consists of 15 credits including a practicum: Projects and Internships in Financial Computing. Required courses may be substituted for equivalent coursework with the approval of an advisor.

**Doctoral Programs**

- D.P.S. in Business (p. 661)
- Ph.D. in Business (p. 663)

**D.P.S. in Business**
The Doctor of Professional Studies (D.P.S.) in Business program offers doctoral-level education for the practitioner community.

Updated: 07-27-2020
This program—similar in nature to a Doctor of Business Administration program—is designed for experienced individuals who seek higher-level roles in business, entrepreneurship, or education.

The curriculum prepares graduates for future pursuits in private or public corporations, nonprofit organizations, financial institutions, universities, or government agencies.

Students may focus their studies in one of three areas:

- Strategy and Decision-Making
- Capital Markets
- Business Economics

The typical time to complete the D.P.S. is four years. Advanced students, such as those who come in with prior transferable coursework, may be able to finish in three years. The maximum timeline is six years; the fifth and sixth years are an option available only to students who are unable to write and successfully defend the dissertation by the end of the fourth year.

This program is currently offered in collaboration with Peking University in Beijing.

Learn more about the D.P.S. in Business program.

**Admissions**

A minimum 3.2 grade point average is desired of applicants to the program.

Applicants who earned their previous degree(s) in a language other than English must demonstrate proficiency in English via standardized tests, such as the GMAT and TOEFL. Applicants with graduate degrees can apply for alternative procedures to demonstrate English proficiency, such as equivalent English language tests as a part of the graduate program of study.

The Gabelli School admissions team selects candidates to interview based on their review of three primary criteria:

- Demonstrated success in university-level degree programs
- Demonstrated success in professional experiences
- Assessed potential to complete the D.P.S. program and to contribute to development in an organization or a community of business practice

**Requirements**

To graduate with a D.P.S., students must complete the required courses and minimum credit hours with a GPA of at least 3.500 and submit a written dissertation approved by a doctoral dissertation committee.

The D.P.S. program consists of 70 total credit hours, which includes a combination of coursework credits and dissertation credits.

**Coursework**

All students will complete 42 credit hours of trimester-based coursework (fall, spring, and summer) in the first two years, comprising 24 credit hours of core courses and 18 credit hours of specialized electives.

The specialized electives are what enables each student to focus on one of the three primary areas: Strategy and Decision-Making, Capital Markets, or Business Economics.

The first two years are broken down as follows:

- Year 1: five core courses (15 credits) and two electives (6 credits)
- Year 2: three core courses (9 credits) and four electives (12 credits)

*Dissertation Proposal Preparation Seminar (CBDP 9010) is an optional, credited preparatory seminar that counts as an elective, during which students receive guidance on developing their dissertation proposals.*

**Dissertation**

All students will complete 28 credit hours of dissertation work in years three and four.

Of these, 6 credit hours are toward the preparation and defense of the dissertation proposal, and 22 credit hours are toward the preparation and final defense of the dissertation.

Updated: 07-27-2020
appllicants are evaluated on two primary criteria:

1. Demonstrated past success in university programs
2. Potential ability in the field as an academic scholar

It is expected that most applicants to the Ph.D. program will hold a graduate degree from an accredited university in business or a related field, such as an M.S. in economics, finance, mathematics, operations research, psychology, or statistics.

Transfer students from other Ph.D. programs, particularly in economics, are strongly encouraged to apply. Students may receive consideration for transferred credits based on previous coursework and degrees. Applicants without graduate degrees or with general questions about their eligibility are encouraged to email businessphd@fordham.edu.

Application Materials
Applicants must provide all of the following materials:

Statement of Purpose
This one- to two-page statement should introduce the applicant, provide a summary of past academic achievements, indicate the applicant’s current academic interests, identify what he or she hopes to accomplish, and explain the choice of both a business Ph.D. in general and the Gabelli School program in particular.

CV/Résumé
An updated CV or résumé should detail all relevant academic and/or professional experience and achievements.

Writing Sample
A writing sample demonstrating strong research and writing skills is required. The writing sample should ideally be a research paper in the area of the applicant’s interest, such as a master’s thesis or a seminar paper.

Transcripts and GPA
Official transcripts in support of all previously earned degrees must be sent to Fordham directly from the issuing institution. It is expected that applicants have maintained a minimum GPA of 3.5. All international transcripts and related documents must be evaluated by World Education Services (WES). Given the time involved in the evaluation process, unofficial transcripts may be submitted as placeholders; however, any admissions decision is conditional upon eventual evaluation of all international transcripts.

Letters of Recommendation
Three letters of recommendation are required; at least two of these must be written by professors or academic research practitioners.

GMAT/GRE
A valid GMAT or GRE score is required. The minimum expected GMAT score is 700, and the minimum expected GRE score is 160 verbal reasoning / 160 quantitative reasoning / 5 analytical writing.

TOEFL/IELTS
International applicants who have not earned their previous degree(s) at a university in the United States or another English-speaking country must submit a valid TOEFL or IELTS score. The minimum expected TOEFL score is 105, and the minimum expected IELTS score is 7.5.

Interview
Applicants who meet the above requirements may be interviewed by the doctoral program committee.

To learn more about the Ph.D. in Business program, please visit the Fordham website.

Admissions
Each application to the Gabelli School of Business Ph.D. program receives a thorough and complete evaluation.
Application Fee
The application fee is $75.

Requirements
The Gabelli School Ph.D. program consists of 90 credits, which students complete with guidance from their advisors. Most students complete the program in five years, though advanced students transferring in from another doctoral program may receive consideration for credits already earned. Upon successful completion of the program, students receive a Doctor of Philosophy in Business degree (Ph.D.). Students also earn a Master of Philosophy in Business degree (M.Phil) and a Master of Science (M.S.) degree in recognition of earlier milestones in the program.

Coursework
The major focus of Years 1 and 2 is the completion of 54 credits of coursework. All students complete 24 credits in common core courses. Students in each focus complete 15 credits in specialized seminars and 15 credits in specialized electives. Upon completion of 30 credits of coursework, students are eligible to be awarded a Master of Science degree.

Comprehensive Exams
Students sit for two comprehensive exams: the first at the conclusion of Year 1 and the second at the conclusion of Year 2.

The Year 1 comprehensive exam is a written exam designed to measure a student’s fundamental understanding of business, with an emphasis on economics, management, and quantitative and empirical methods.

The Year 2 comprehensive exam is a written field exam. Students work with advisors to determine two appropriate reading lists at the end of Year 1 and read for the exam during Year 2. The field exam measures knowledge of the field(s) and determines readiness to move on to the dissertation phase. Both exams are graded Pass/Fail.

Year 2 Paper
At the conclusion of Year 2, students present a paper to the faculty during a doctoral program workshop, which will be graded by a Pass/Fail faculty vote. The paper may be an extension of a course paper or a research paper pursued independently. This paper provides an opportunity for students to build presentation and workshop skills, and should ideally serve as an eventual component of the dissertation.

Independent Study
The focus of Year 3 is ensuring that students hone their research and writing skills before moving onto the dissertation phase. Students complete 12 credits of independent study in close collaboration with their advisors, which includes the development, research, and writing of a dissertation proposal. Students defend their dissertation proposal to their prospective dissertation committee at the conclusion of Year 3. Upon completion of Year 3, students are awarded a Master of Philosophy in Business (M.Phil).

Dissertation
Years 4 and 5 are devoted to the research and writing of a dissertation. This consists of 24 credits of dissertation work. The dissertation is a large-scale, closely supervised research project typically consisting of three to four article-length papers, preferably along a similar topic, with extensive research, writing, and revision expected. Students offer regular progress updates to their dissertation committee members, who in turn meet with the doctoral program director to ensure sufficient progress. Upon successful completion and defense of the dissertation, students are awarded a Doctor of Philosophy in Business (PhD).

Teaching
Teaching is a key component of the Ph.D. program.

In preparation for the rigors and standards of life as an academic, all students attend a seminar on pedagogy in Year 2. This seminar briefs students on specific techniques in teaching business at the highest level, as well as on the academic and cultural standards of education at universities in the United States.

Following this pedagogical training, Ph.D. students have access to a variety of supervised and independent teaching opportunities. These include teaching courses, working as teaching assistants for faculty, and guiding students in independent research. Teaching commitments are determined based on a student’s previous teaching experience, area of focus, and academic standing.

International Programs
For Fordham graduate students are immersed in the fully global business community that awaits them.

Our growing list of global partners at the graduate level include:

- Antwerp Management School, Belgium
- SDA Bocconi, Italy
- Koc University, Turkey
- Peking University, China
- Skema Business School, France
- Xavier Institute of Management, India

Each year, we organize various study tours—one-week international trips led by faculty, packed with corporate meetings and historical investigations. China, Turkey, Germany, Poland and Ireland are recent destinations. Cuba is on the horizon.

- About 60 percent of Fordham graduate business students come from outside the United States. You will have classmates from all over the world—building your global professional network with each project and course.
- Non-degree visiting students from China, Spain, Turkey, Italy, and other nations share their culture and views for as briefly as one week or as long as three terms.

International Programs
- M.S. in Global Finance (p. 679)
- M.B.A. Secondary Concentration in International Business (p. 673)
- International Business Bridge (p. 688)
- International Student Resources (p. 694)
Master of Business Administration Programs

Want to switch careers into an industry you’ve long admired? Want to build skills to be able to advance your career in your present firm? Want to change the world with a new business idea?

Fordham can help you achieve those goals.

No matter your background, there’s a Gabelli M.B.A. program for you. You’ll join a tight-knit community that prepares you to take the next step—at your current company, in a new city, or across the globe.

To support this investment in your future, the Gabelli School has established M.B.A. scholarships that are available to exceptional applicants.

Explore the programs in more depth and find out what a Fordham M.B.A. means for you.

Programs

- Full-Time Cohort M.B.A. (p. 666)
- Professional M.B.A. (p. 675)
- Executive M.B.A. (p. 665)

concentrations

Five-course concentrations and three-course secondary concentrations are the way to customize your degree.

Primary Concentrations

- Accounting Concentration (p. 667)
- Communication and Media Management Concentration (p. 668)
- FinTech Concentration (p. 670)
- Finance Concentration (p. 670)
- Information Systems Concentration (p. 672)
- Management Concentration (p. 673)
- Marketing Concentration (p. 674)
- Public Accountancy Concentration (p. 675)

With the exception of Public Accountancy, all primary concentrations can also be pursued as secondary concentrations.

Secondary Concentrations

- Blockchain Secondary Concentration (p. 668)
- Corporate Compliance Secondary Concentration (p. 668)
- Electronic Business Secondary Concentration (p. 669)
- Entrepreneurship Secondary Concentration (p. 669)
- Global Sustainability Secondary Concentration (p. 671)
- Healthcare Management Secondary Concentration (p. 672)
- International Business Secondary Concentration (p. 673)

One-on-one meetings with graduate academic advisors will be indispensable as you make decisions about whether to pursue a concentration or secondary concentration, and if so, which. Our advisors offer special expertise in navigating requirements and ensuring that your academic program matches your post-MBA plans. The deadline for full-time MBA students to determine your selected concentrations and notify your academic advisor of your selections is the end of the add/drop period for the fall semester of your second year of the full-time MBA program. Consult your advisor for your deadline if you are completing the Professional MBA program.

Executive M.B.A.

Accelerated Format for Experienced Professionals

- 22 months, one three-day weekend per month
- Designed for mid-range professionals on the leadership track
- Cohort format: students complete program together
- Applicants must have seven years of work experience

Choice of Campus

- Lincoln Center location: start in September
- Westchester location: start in January
- Each cohort designs its own “international capstone” week abroad

International Capstone

Each 22-month Executive MBA experience concludes with an international capstone trip, the culmination of an in-depth, consulting-style business project. The students in the Executive MBA cohort collaborate to choose the country they’ll focus on, and the business problem their consulting work will solve. Then, once their consulting work is done, they get on a plane. In addition to presenting their project on site, they benefit from cultural events and lectures on how to do business within their country of choice.

Focus on Management and Strategy

- EMBA students complete a full concentration in management systems
- Additional courses in finance and business communication
- Discussion of current ethical issues in business

Interested in our Executive MBA? The associate dean is happy to meet with you to discuss the program. Meetings can be set up at a location convenient to your office. Contact Francis Petit through email (petit@fordham.edu) or phone (212-636-7429) to arrange a personalized information session.

To learn more about the Executive MBA, visit the Fordham website.

Requirements

Executive MBA (EMBA) students proceed through all of these courses together during their 22 months in the program. Experience-based, team-oriented projects are featured throughout.
Full-Time Cohort M.B.A.

The Full-Time MBA is the Gabelli School of Business' flagship two-year program in management and leadership. Selectively enrolling only 75 students per year, the Full-Time MBA combines industry-inspired hands-on coursework, individualized attention, and extraordinary network development—all in the heart of New York City.

This is a true New York MBA.

Industry-Inspired Academics

The Gabelli School of Business Full-Time MBA program is led by a faculty director who—in addition to his highly regarded academic research—maintains strong ties to industry and continually adapts the MBA curriculum to meet the demands of today's employers.

From the month-long Gabelli Launch orientation that begins the two-year sequence to the capstone Immersion Week simulation that draws on every ounce of management knowledge Gabelli MBAs have acquired, the Full-Time MBA curriculum is designed to over-prepare students for the challenges of the business world.

Full-time MBA students will:

- Travel to Buenos Aires, Argentina, to act as consultants to nonprofits and NGOs within their first month of the program

- Complete a curriculum that balances structure with independence, building on foundation courses in economics, statistics, accounting, finance, management, and strategy with individually chosen electives

- Develop and defend their own conclusions about business ethics in a course called Markets, Business, and Society

- In an applied project, work on a consulting team for a real business client or create a business plan and prototype for a new startup

- Visit the offices of high-level executives whose real-world insight enhances the experience of attending business school in New York

To learn more about the Full-Time MBA, visit the Fordham website.

Requirements

The Full-Time MBA consists of a streamlined 60 credits, completed full-time in two years.

Year 1 provides all core business courses up front, giving you an advantage as you interview for internships. Year 2 gives you the freedom to choose courses based on your interests and career goals.

Year 1: Strategic, Fixed Core Schedule

- Pre-Term: Gabelli Launch (4 week pre-term)
- Fall Term: 6 core courses
- Winter Session: Immersion Week
- Spring Term: 3 core courses, Consulting Project, 1 elective/concentration course

Year 2: Flexible Courses, Chosen for Concentration and Career

- Pre-Term: Internship
- Fall Term: 2 core courses, 3 elective courses
- Winter Session: Convergence Week
- Spring Term: 4 elective courses

Requirements for the Full-Time Cohort MBA are as follows:

1 These electives can be any class level 7000- or 8000- that Gabelli offers. A list of courses by discipline can be found in the Courses section on each academic areas page (p. 611).
Students who wish to pursue two primary concentrations must complete 66 credits.

Concentrations

Five-course concentrations and three-course secondary concentrations are the way to customize your degree.

Primary Concentrations

- Accounting Concentration (p. 667)
- Communication and Media Management Concentration (p. 668)
- FinTech Concentration (p. 670)
- Finance Concentration (p. 670)
- Information Systems Concentration (p. 672)
- Management Concentration (p. 673)
- Marketing Concentration (p. 674)
- Public Accountancy Concentration (p. 675)

With the exception of Public Accountancy, all primary concentrations can also be pursued as secondary concentrations.

Secondary Concentrations

- Blockchain Secondary Concentration (p. 668)
- Corporate Compliance Secondary Concentration (p. 668)
- Electronic Business Secondary Concentration (p. 669)
- Entrepreneurship Secondary Concentration (p. 669)
- Global Sustainability Secondary Concentration (p. 671)
- Healthcare Management Secondary Concentration (p. 672)
- International Business Secondary Concentration (p. 673)

One-on-one meetings with graduate academic advisors will be indispensable as you make decisions about whether to pursue a concentration or secondary concentration, and if so, which. Our advisors offer special expertise in navigating requirements and ensuring that your academic program matches your post-MBA plans. The deadline for full-time MBA students to determine your selected concentrations and notify your academic advisor of your selections is the end of the add/drop period for the fall semester of your second year of the full-time MBA program. Consult your advisor for your deadline if you are completing the Professional MBA program.

Accounting Concentration

Requirements

Primary Concentration

A concentration consists of five advanced-level courses from the accounting area, and is 15 credits. ACGB 7105 Financial Accounting is highly recommended for students who are pursuing this concentration.

Secondary Concentration

The secondary concentration consists of any three advanced-level courses from the accounting area, and is nine credits.

An advanced-level course is any course with the code ACGB that is a 7000 level or higher. A list of courses in accounting and taxation can be found on their academic area page (p. 612).

CPA examination

Fordham’s MBA in Public Accountancy (p. 675) prepares students to sit for the CPA exam and provides students with all of the credit hours that are required.

Applicants are advised to visit the National Association of State Boards of Accountancy website before beginning any program, to check if the combination of the master’s degree and their specific undergraduate degree will meet the minimum qualifications.

Specializations

Specializations

Specializations represent groups of courses that reflect the interests of students pursuing particular careers. They are not formal requirements, but represent the general recommendation of the faculty for pursuing particular career areas.
Financial Management
The following is a suggested course selection for those seeking careers in financial management:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACGB 7105</td>
<td>Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACGB 7125</td>
<td>Financial Statement Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ACGB 7128</td>
<td>Advanced Financial Statement Analysis</td>
<td>3</td>
</tr>
<tr>
<td>ACGB 7136</td>
<td>International Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACGB 7155</td>
<td>Managerial Accounting Analysis</td>
<td>3</td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>15</td>
</tr>
</tbody>
</table>

Other five-course combinations may be suitable for those seeking other careers, such as marketing management, internal audit, or management consulting.

Blockchain Secondary Concentration
Blockchain. In short, it’s a public ledger used for cryptocurrency transactions. It’s also a fast-growing technology that has the potential to affect business sectors as diverse as banking, energy, music, and nonprofit. With thousands of blockchain-related jobs available in New York City alone, candidates who can use the technology to improve a company’s efficiency are in high demand.

The secondary concentration in blockchain gives Gabelli School graduate students the opportunity to master the skills needed to stand out in this space. Students will learn the fundamentals of blockchain, examine the role of cryptocurrencies as a funding mechanism, and explore the legal and regulatory issues surrounding the field.

Graduate students who pursue the secondary concentration in blockchain are encouraged to join the Fordham Fintech Network; attend a meeting of the Enterprise Ethereum Alliance, which meets regularly at Lincoln Center; or participate in one of the numerous meetups on blockchain and cryptocurrencies taking place around New York City.

In addition, students have the chance to attend conferences with industry leaders without leaving campus. Each spring, the Gabelli School presents the Blockchain Disruptor Conference, and Fordham’s Institute of International Humanitarian Affairs holds the annual Humanitarian Blockchain Summit.

Requirements
To earn this secondary concentration, students must earn 9 credits of courses from the list below.

Courses in this group have the ABBC attribute.

<table>
<thead>
<tr>

Communication and Media Management Concentration

Requirements
Primary Concentration
The concentration in communication and media management consists of five courses, for a total of 15 credits.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>One of the following courses:</td>
<td></td>
<td>3</td>
</tr>
<tr>
<td>CMGB 7500</td>

<td></td>
</tr>
<tr>
<td>Four advanced communication and media management courses</td>
<td>12</td>
<td></td>
</tr>
<tr>
<td>Total Credits</td>
<td></td>
<td>15</td>
</tr>
</tbody>
</table>

Secondary Concentration
The secondary concentration consists of any three advanced communication and media management courses for a total of nine credits.

Corporate Compliance Secondary Concentration
Corporate compliance is an increasingly important area for organizations that encourages ethical conduct and a commitment to compliance with the law. As of 2015, 82 percent of organizations now undertake some sort of enterprise-wide compliance risk assessment, according to a Deloitte study.

This secondary concentration in corporate compliance allows Gabelli School graduate students to build the skills needed to hold compliance and risk positions.

Graduate students who pursue the secondary concentration in corporate compliance are encouraged to hold an internship in the field, to join the Graduate Finance Society, and to become a member of the Securities Industry and Financial Markets Association.

Requirements
To earn the secondary concentration, students must take three 3-credit courses for a total of 9 credits.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>

<td></td>
<td>9</td>
</tr>
</tbody>
</table>
The finance faculty recommends that students in this concentration also choose their other electives to touch on compliance- and risk-related topics.

**Electronic Business Secondary Concentration**

In today's economy, it's more challenging to find examples of business that isn't electronic. The touch points between technology and commerce are too numerous to count.

This secondary concentration indicates that a student has made an academic investment in learning about innovative, tech-driven improvements in business—and has explored the opportunities, ethical questions, and resulting forces created by technological advances.

Students who pursue the Electronic Business secondary concentration are encouraged to join the Fordham Media and Entertainment Alliance, which was formed to enhance relationships between the community and the media and entertainment industry. The alliance creates ongoing access to industry professionals through panel discussions, networking events, site visits, and seminars.

**Requirements**

To earn the Electronic Business secondary concentration, students must earn nine credits from three upper-level classes that are coded as Electronic Business courses.

*Courses in this group have the ABEB attribute.*

NOTE: Either version of Law of Traditional and New Media (BLGB 7325 or CMGB 7556) class may be taken, but not both.

**Entrepreneurship Secondary Concentration**

In a business environment where startups have changed the landscape profoundly in the last decade, an understanding of entrepreneurship is key.

Entrepreneurship at Fordham is broader than simply starting a new business, it’s a mindset. It’s the creativity of approach and ability to spot opportunities that enable even those who take their MBAs to work at large, established corporations to be the ones with fresh thinking that moves their companies forward.

Entrepreneurship students have access to the Fordham Foundry, the University's small-business incubator, where they can receive support toward launching their own businesses.

**Requirements**

To earn the Entrepreneurship secondary concentration, students must take one required 3-credit required course and an additional six credits from upper-level courses that are coded for Entrepreneurship, for a total of three classes for nine credits.

Updated: 07-27-2020
Finance Concentration

Requirements

Primary Concentration

The concentration in finance consists of five advanced courses for a total of 15 credits. Courses are recommended to be selected based on a specialization, as detailed in the next page.

FNGB 7421 Prins of Modern Finance is a prerequisite course for many advanced-level courses and is strongly recommended.

Secondary Concentration

The secondary concentration consists of any three advanced level courses from the finance area, for a total of nine credits. Courses can be any class with the code FNGB that is a 7000 level or above. A list of courses can be found in the academic areas page (p. 621).

Specializations

Specializations represent groups of courses that reflect the interests of students pursuing particular careers. They are not formal requirements, but represent the general recommendation of the faculty for pursuing particular career areas.

Corporate Financial Management

Appropriate for students interested in corporate financing decisions and financial analysis.

Students considering a career in investment management should be aware of the importance of obtaining their Chartered Financial Analyst (CFA) designation from the CFA Institute in Charlottesville, Virginia. The CFA is awarded upon satisfactory completion of a series of examinations on ethical, financial, economic, legal, fixed income, and equity valuation and portfolio-management issues. Details of the CFA program can be obtained from the finance faculty. Graduate business courses included in the investment management specialization cover many topics required for the CFA tests.

Management of Financial Institutions

Suggested for students interested in careers in banking.

FinTech Concentration

This concentration will give students a deeper exposure and skill set in the evolving use of technology to deliver financial services, commonly referred to as FinTech. Students can opt for the technical aspects of these innovations, or, on the application of such technology. We expect students majoring in finance to focus on the applications of FinTech, such as the use of Blockchain in setting up cryptocurrencies, machine learning for data analytics, and artificial intelligence in investment management. I.S. students would typically focus more on the computational aspects and applications. Expertise in the use of FinTech will allow students to access opportunities in this high-demand area.

Updated: 07-27-2020
Requirements

The Primary Concentration in FinTech is a 15 credit program, not including two prerequisite courses. Of the 15 credits, one class is a required introductory class to FinTech, and the rest are electives.

Prerequisites

Before taking any courses for the concentration, students must first complete the following courses:

- Core Information Systems: ISGB 6910 Business Tech & Analytics
- Core Finance: FNGB 6411 Intro Financial Sys & Methods

Curriculum

<table>

1 Students focusing in Finance should take the FNGB course, and students focusing on Information Systems should take the ISGB course.

Additional notes

- No more than 4.5 credits of the follow courses may apply toward this concentration
  - BLGB 739M Blockchain, Virtual Currencies, and Tokens: An Examination of Business and Legal Issues
  - SAGB 76BS Blockchain: Industry Disruptor and Creator
  - FNGB 849I Blockchain
  - FNGB 849J Digital Currencies
- Double-counting:
  - No more than 3 credits may also apply toward the secondary concentration in Blockchain
  - No more than 4.5 credits may apply toward the primary concentration in Finance
  - Some courses have pre-requisites which may not necessarily apply to the concentration.

Global Sustainability Secondary Concentration

People, planet, and profit—this “triple bottom line” is starting to matter to more companies as consumers demand that corporations care about more than making money.

It’s no longer just the Starbucks and the Whole Foods that integrate sustainability into their business model: You find it just as often at Coca-Cola, Adidas, Tiffany & Co., Unilever, GE, and the largest multinational banks.

The Global Sustainability secondary concentration shows employers that a student has made an academic investment in understanding the complex issues facing companies that are trying to run successful businesses while keeping the environment and human dignity in mind.

Select courses from outside the graduate business school—offered by other Fordham graduate divisions—also can be taken toward the Global Sustainability secondary concentration. For more information, please consult your academic advisor.

Students who pursue the GS secondary concentration are encouraged to join Net Impact. This student group provides a forum for future business leaders to discuss new opportunities to create meaningful careers that create value for both the business leaders and for society.

Requirements

To earn the Global Sustainability secondary concentration, students must earn nine credits from three upper-level classes that are coded as Global Sustainability courses. These courses are listed below.

Courses in this group have the ABGS attribute.

<table>

### Healthcare Management Secondary Concentration

Over the past decade, the healthcare industry has added 2.6 million jobs nationwide. Healthcare's employment growth rate was 22.7 percent in that time. All other industries? A mere 2.1 percent.

Fordham M.B.A. students are uniquely positioned to capitalize on opportunities in this dynamic field, because healthcare has a demand for professionals who understand where helping people and doing good business intersect.

### Requirements

The Healthcare Management secondary concentration encompasses three courses for a total of nine credits, each in a different discipline, to provide students with the essential elements of healthcare management.

**Courses in this group have the ABHM attribute.**

<td>3</td>
</tr>
</tbody>
</table>

Three advanced-level courses, suggested to be chosen from a Specialization

Total Credits 15

#### Secondary Concentration

The secondary concentration consists of any three advanced level courses \(^1\) for a total of nine credits.

\(^1\) An advanced-level course is any course with the code ISGB that is a 7000-level or higher. A list of courses in Information Systems can be found in their academic areas page. (p. 639)

### Specializations

Specializations represent groups of courses that reflect the interests of students pursuing particular careers. They are not formal requirements, but represent the general recommendation of the faculty for pursuing particular career areas.

### Business Analytics

Students prepare for careers in business analytics, a fast-growing area in all businesses. Students will be able to collect, clean, structure, integrate, and analyze data to drive management insight, informed decision-making and superior business performance. This track provides familiarity with concepts, frameworks, software tools and techniques, and trends in business analytics.

**Courses in this group have the ISBA attribute.**

<table>

</tbody>
</table>

Updated: 07-27-2020
Students may also select from ISGB 7967 Data Mining for Business or ISGB 7973 Database Management as possible courses even though they do not have the ISBA attribute.

**Digital Business Innovation**

Prepares students to drive business transformation through digital business technologies. Students will acquire an in-depth understanding of cutting-edge digital business trends such as e-commerce, mobile commerce, cloud computing, social technologies, and tech startups. Students will be able to understand and exploit disruptive digital innovation.

**Courses in this group have the ISDB attribute.**

<table>

</tr>
<tr>
<td>ISGB 7978</td>
<td>Web Analytics</td>
<td>3</td>
</tr>
</tbody>
</table>

Students specializing in the digital business innovation track should also consider taking the Technology and Innovation Management course as one of their electives.

**Enterprise Architecture**

Prepares students to architect and build business systems, as well as to implement, manage, and leverage enterprise systems within organizations. The resulting systems will provide foundations for redesigned business processes, enterprise-wide integration and information sharing, novel services, and innovative business models. This track also includes a number of industry-specific courses that provide an in-depth understanding of IT applications within a specific industry, such as healthcare.

**Courses in this group have the ISEA attribute.**

<table>

</tr>
<tr>
<td>ISGB 7985</td>
<td>Data Warehousing</td>
<td>3</td>
</tr>
</tbody>
</table>

Students specializing in the enterprise architecture track should also consider taking the Supply Chain Management course as one of their electives.

**International Business Secondary Concentration**

Regardless of your chosen concentration, a focus on international business will prepare you to operate in our increasingly globalized commercial environment.

Completing an International Business secondary concentration indicates that you have prioritized the cross-cultural competencies that are prized by any organization that works across borders.

Students who pursue the international business secondary concentration are encouraged to join the Fordham Global Professional Society. This club recognizes the unique needs of individuals planning careers in international business and supports the development of the skill set needed to understand the mechanics of international business and the unwritten rules of cross-cultural management.

**Requirements**

To earn the International Business secondary concentration, students must earn nine credits from three upper-level classes that are coded as International Business courses. These courses are listed below.

**Courses in this group have the ABIB attribute.**

NOTE: Some courses are cross-listed in multiple departments. Cross-listed courses can only be taken once, but may be taken from any course code.

**Management Concentration**

**Concentration in Management**

The concentration in management consists of any five advanced-level management courses for a total of 15 credits. It is recommended that students choose these courses based on the specializations detailed in the next page.
Secondary Concentration in Management

The secondary concentration consists of any three advanced-level management courses\(^1\) for a total of nine credits.

\(^1\) An advanced-level course is any OPGB, LPGB, or SAGB course that is 6000-level or higher, or any course in DGGB that is 7000-level or higher.

Specializations

Specializations represent groups of courses that reflect the interests of students pursuing particular careers. They are not formal requirements, but represent the general recommendation of the faculty for pursuing particular career areas.

Leading People and Groups

This specialization develops the knowledge and skills to achieve high performance through people and teams. It emphasizes developing leadership, self-awareness, and other forms of awareness to achieve maximum impact with human resources in executing strategy. Skill and knowledge to make the most of group and team dynamics are covered, as well as theories of how to energize and motivate oneself and others.

</tr>
</tbody>
</table>

\(^1\) Advanced-level courses are any MKGB course that is 7000-level or higher. A list of courses in Marketing can be found their the academic areas page (p. 648).

Experiential Course

The marketing area puts a special emphasis on the value of learning by doing. Marketing concentrators are encouraged to pursue an “experiential course” that may be counted toward their concentration. These may include:
Specializations

Specializations represent groups of courses that reflect the interests of students pursuing particular careers. They are not formal requirements, but represent the general recommendation of the faculty for pursuing particular career areas.

Students may take any combination of courses that lead to the appropriate number of credits in the concentration.

### Public Accountancy Concentration

The MBA in Public Accountancy combines the breadth of instruction in general business principles with the common body of knowledge recommended by the American Institute of Certified Public Accountants. The program is intended for both business and liberal arts graduates. Graduate students seeking both the MBA degree and CPA credential benefit from the broadly based core instruction of the MBA and the expertise developed in the specialized public accounting courses.

The program consists of 69 credits. Students gain the high sense of responsibility and professional competence expected in the accounting profession. It also prepares them for the business challenges many CPAs encounter in their careers. Students who studied business as undergraduates may find that they automatically are waived out of certain required courses by the admissions office or may take a waiver exam for this purpose.

Students who complete the MBA in Public Accountancy are eligible to fulfill the curriculum requirements to sit for the Certified Public Accountant Examination. For more specific information with regard to the exam and state licensure requirements, students should visit the website of the National Association of State Boards of Accountancy.

### Requirements

#### Primary Concentration (for CPA Licensure)

The course requirements for the MBA in Public Accountancy consist of eight advanced-level discipline courses and four breadth courses for a total of 36 credits.

### Advanced-level Discipline Courses

**Total Credits 12**

1. An advanced-level Finance course is any course with the designation FNGB that is a 7000 level or higher.

A list of finance courses can be found in the Finance and Business Economics (p. 620) academic area page.

### Professional M.B.A.

The Gabelli School’s Professional MBA is designed for people who plan on keeping their jobs while they go through school. This program provides you with a next-level credential that will capitalize on your work experience—not duplicate it. It can be finished in as little as three years, nine trimesters. Classes meet after work or on weekends, and the Gabelli School’s class schedule allows you to make the most of your time at our Columbus Circle campus by taking two courses in the same evening.

Updated: 07-27-2020
Program Overview

The Professional MBA program is ideal for individuals with three to seven years of work experience who seek a well-rounded, upper-level business education while maintaining a full-time job. Please note: this program is limited strictly to a part-time plan of study; Professional MBA candidates may take a maximum of two classes (six credits) per term.

The new curriculum includes a slate of core courses to build a strong foundation across all business disciplines and electives that offer a choice of courses targeted to your interests.

Professional MBA students can choose among seven primary concentrations as a focus for their studies, and can specialize the degree further with a secondary concentration.

For more information on the Professional MBA, visit the Fordham website.

Requirements

The Professional MBA is a 52-credit program. Professional MBA students take two courses per trimester. The Gabelli School offers three terms each year—fall, spring, and summer—to enable your progress.

The layout of the program is as follows:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Students who wish to pursue two primary concentrations must complete 58 credits.

There is also an additional Orientation Bootcamp that takes place at the start of the program.

Concentrations

Five-course concentrations and three-course secondary concentrations are the way to customize your degree.

Primary Concentrations

- Accounting Concentration (p. 667)
- Communication and Media Management Concentration (p. 668)
- FinTech Concentration (p. 670)
- Finance Concentration (p. 670)
- Information Systems Concentration (p. 672)
- Management Concentration (p. 673)
- Marketing Concentration (p. 674)
- Public Accountancy Concentration (p. 675)

With the exception of Public Accountancy, all primary concentrations can also be pursued as secondary concentrations.

Secondary Concentrations

- Blockchain Secondary Concentration (p. 668)
- Corporate Compliance Secondary Concentration (p. 668)
- Electronic Business Secondary Concentration (p. 669)
- Entrepreneurship Secondary Concentration (p. 669)
- Global Sustainability Secondary Concentration (p. 671)
- Healthcare Management Secondary Concentration (p. 672)
- International Business Secondary Concentration (p. 673)

One-on-one meetings with graduate academic advisors will be indispensable as you make decisions about whether to pursue a concentration or secondary concentration, and if so, which. Our advisors offer special expertise in navigating requirements and ensuring that your academic program matches your post-MBA plans. The deadline for full-time MBA students to determine your selected concentrations and notify your academic advisor of your selections is the end of the add/drop period for the fall semester of your second year of the full-time MBA program. Consult your advisor for your deadline if you are completing the Professional MBA program.

Master of Science Programs

Many jobs call for training in one particular business niche. To prepare students to land those positions, Fordham’s Master of Science programs provide targeted knowledge and skills.

These M.S. programs can often be completed quickly to allow rapid re-entry into the professional world—some in as little as nine months. Click on each program to learn more.

- Applied Statistics and Decision Making (M.S.) (p. 677)
- Business Analytics (M.S.) (p. 677)
- Dual Degree in Business Analytics (M.S.) and Information Technology (M.S.) (p. 678)
- Global Finance (M.S., on campus and online) (p. 679)
- Health Administration (M.S.) (p. 680)
- Information Technology (M.S.) (p. 681)
- Management (M.S., on campus and online) (p. 682)
- Marketing Intelligence (M.S.) (p. 683)
- Media Management (M.S.) (p. 684)
- Professional Accounting (M.S.) (p. 684)
- Professional Taxation (M.S.) (p. 686)

Updated: 07-27-2020
• Quantitative Finance (M.S.) (p. 686)
• Strategic Marketing Communications (M.S. Online) (p. 687)

Applied Statistics and Decision Making (M.S.)

This program is on PAUSE and will not have an entering class for the 2020-2021 academic year. Applications for the 2021-2022 academic year will be accepted starting September 1, 2020.

Are you enticed by the fact that statistics experts are getting hired everywhere, but you feel that your true calling lies in biomedical research? Do you have a knack for numbers but a devotion to public policy?

These unique combinations find a home in the Gabelli School’s Master of Science in Applied Statistics and Decision Making (M.S.S.D.) program. The curriculum is general enough to offer a solid foundation in data science and flexible enough to marry it to the specific area that interests a student most—whether it’s a business discipline or not.

This works in your favor in ways you might not even realize: Companies are looking for candidates who demonstrate a clear passion for their chosen field.

Fordham M.S.S.D. students can choose between a one-year, full-time program, or a part-time, two-year option that accommodates work schedules or internships.

To learn more about the M.S. in Applied Statistics and Decision Making, visit the Fordham website.

Requirements

Prerequisites

M.S.S.D. students need basic knowledge of statistics and calculus when they start the program. If you don’t have that, we can help. Students who need prerequisites can take them at the Gabelli School prior to beginning the M.S.S.D. coursework.

Curriculum

The schedule below illustrates how the M.S.S.D. is structured for a full-time student who aims to complete the degree in one year. Part-time students work with our program director and academic advisor to stretch the M.S.S.D. over a longer time frame that makes sense for their professional schedules. This is a ten course, 30-credit program, with five required courses and a choice of five electives.

- Six credits of electives from the courses in the table below

Business Analytics (M.S.)

The Gabelli School Master of Science in Business Analytics (M.S.B.A.) will help you to see the big picture that your future employer is going to ask you to draw. The curriculum teaches you to pull valuable conclusions from a wide range of information types: big data, business performance data, web and text content, and more.

The M.S.B.A. has two schedule choices: a one-year full-time program or a part-time program spread over a longer time frame, such as two years—ideal for professionals who don’t want to leave their jobs while they pursue the degree.
To learn more about the M.S. in Business Analytics, visit the Fordham website.

**Requirements**

The 30-credit program consists of 10 courses (seven required and three electives), across three semesters. You can earn the M.S.B.A. in one-year of full-time study or two years of part-time study. The schedule below outlines the full-time format; part-time students coordinate their coursework with guidance from the program director and academic advisor.

**Dual Degree in Business Analytics (M.S.) and Information Technology (M.S.)**

Completion of this dual program consists of 15 courses (eleven required and four electives), that can be taken across five semesters. Each degree program’s requirements are fulfilled separately, but many courses are double-counted when enrolled as a dual-degree program. The schedule below outlines the full-time format; part-time students coordinate their coursework with guidance from the program director and academic advisor.

1. Any course in with the subject code ISGB counts as an elective.

**Global Finance (M.S., on campus and online)**

An intensive curriculum, with flexibility built in.

The Master of Science in Global Finance (M.S.G.F.) is designed for students who want to specialize in finance. The focused curriculum, complemented by relevant electives such as Emerging Markets, can be completed in as little as one year. For students who want to spend a longer time in the program to accommodate internships or other work experience, there is an option to extend the duration.

To learn more about the M.S. in Global Finance on campus, visit this website.

To learn more about the M.S. in Global Finance online program, visit this website.

### Requirements

The degree requires 36 credits, which cover the core financial knowledge and skills required for raising capital, asset management, and risk management.

Courses for full-time, on-campus students start in the fall and go through three semesters. On-campus students take core courses in the fall, and specialization courses are taken in the spring. On-campus students can choose to complete the last semester of electives either in the summer or the following fall, to accommodate an internship.

Courses for online students start in the fall, spring, and summer semesters. Several core courses are taken first, followed by elective courses. A three-day on-campus residency is also required for online students.

### Prerequisites

We’ll take a look at your background and decide if you would benefit from some foundational coursework before pursuing the M.S.G.F. Some students may be asked to take the courses below prior to the start of the program. Students whose examination results do not meet the minimum standards will be required to take relevant foundation course(s) first and postpone core courses.

- GFG 6002 Basics of Finance
- GFG 6003 Managerial Economics
- GFG 6011 Basics of Accounting
- GFG 6012 Basics of Statistics

Health Administration (M.S.)

Fordham’s M.S. in Health Administration program will provide you with the concrete skills and comprehensive industry knowledge required for you to become an innovator in healthcare administration—in hospitals, private practice, public health, healthcare unions, insurance companies, and many other settings.

The program joins together the resources of three of Fordham’s highly-respected graduate schools—the Graduate School of Arts and Sciences, the Gabelli School of Business, and the Graduate School of Social Service—to deliver an exciting, multifaceted curriculum taught by distinguished faculty and seasoned healthcare professionals. The one-year MS in Health Administration leads to a degree from the Graduate School of Arts and Sciences.

Program Basics

- Complete the program in 12 months—while working full time—with our executive-style curriculum; classes are held two weekends per month from late-August to late-July (including intensives and online instruction), for a total of 14 courses and 31 credits
- Build relationships through the program’s cohort model, which brings together a diverse group of students from all facets of the healthcare industry
- Attend classes at our conveniently-located Lincoln Center campus in midtown Manhattan

To learn more about the M.S. in Health Administration, visit the Fordham website.

Requirements

All courses are scheduled for intensive, Saturday/Sunday format.

Updated: 07-27-2020
The Gabelli School's Master of Science in Information Technology (MSIT) curriculum is focused on creating value through technology. You'll learn how to develop innovative new processes, products, and business models while helping to integrate new technology into your company’s culture.

The program allows students to specialize in one of four career-oriented tracks, according to their interests:

- **Enterprise Risk Management**: a field that has exploded since the 2008 financial crisis. Employers are looking for IS professionals who go beyond collecting risk information: They want experts who understand the relevance of that information to the current business environment.

- **Enterprise IT Management**: a quickly growing area dedicated to helping companies gain more value from investments made in IT capabilities, infrastructure, and resources.

- **Digital Business Innovation**: focuses on creating major change for companies through e-commerce, mobile commerce, cloud computing, social technologies, and tech startups.

- **Business Analytics**: centered around the processes of collecting, cleaning, structuring, integrating, and analyzing data to drive management insight, informed decision-making, and superior business performance.

These career tracks were chosen for their exceptional employment opportunities in today's job market, as well as their relevance to a wide range of industries.

The MSIT has two schedule choices, a one-year full-time program and a part-time program spread over a longer time frame, ideal for professionals who don’t want to leave their jobs while they pursue the degree.

### Requirements

The MSIT degree requires 10 graduate-level courses for a total of 30 credits. Students must take six core courses (18 credits) and four elective courses (12 credits). The program allows students to specialize in one of four career-oriented tracks, according to their interests. They can choose from Enterprise Risk Management, Enterprise IT Management, Digital Business Innovation, or Business Analytics.

### Prerequisites

Students who completed a non-business undergraduate major are required to do a self-study module on IT and business to ensure that they have a basic understanding of the material covered in our Business IT course. In addition, data mining and other data analytics courses may require an understanding of basic statistics.

### Curriculum

Students who have advanced experience or a deep academic background may substitute up to two of the core courses with advanced information systems electives, with permission from the area chair.

Students may choose elective courses that meet their individual interests and career aspirations. Conversations with the program director and academic advisor will help in this process.

Management (M.S., on campus and online)

The on-campus M.S. in Management is on PAUSE and will not have an entering class for the 2020-2021 academic year. Applications for the 2021-2022 academic year will be accepted starting September 1, 2020.

The M.S. in Management is a one-year full-time program offered on campus. The M.S. in Management can also be completed online in one year or 15 months.

Corporate Visits

On campus program students may attend corporate visits as an overlay to classroom work; online program students will visit firms as part of their residency requirement.

Recent visits include:
- American Sustainable Business Council
- Organisation for Economic Co-operation and Development (OECD)
- Patagonia
- Tesla
- Unilever

Guest Speakers

We also regularly welcome guest speakers into the classroom for both the on campus and online programs. Some recent speakers:
- Hunter Lovins, author and advocate for sustainable development
- Vincent Stanley, author and director of philosophy for Patagonia

Updated: 07-27-2020
• Patrick Struebi, social entrepreneur
• Andrew Winston, consultant, author, and TED speaker

To learn more about the M.S. in Management on campus, visit this website.

To learn more about the M.S. in Management online program, visit this website.

Requirements

The M.S. in Management is 30 credits, with 24 credits of required courses and 6 credits of electives. The M.S. in Management on-campus program can be completed in one year over two semesters. The M.S. in Management online program can be completed in one year or 15 months, with four terms being offered each year.

Marketing Intelligence (M.S.)

Academic training vs. on-the-job experience. At the Gabelli School, we say, why not both?

You could sit in a lecture hall and learn about the science of customer relationship management. Will that alone teach you how to incorporate it into a marketing plan and sell it to your CFO? You could work for years mining data for a Fortune 500 company. Will that job ever give you the chance to break down marketing theory with your peers?

Our Master of Science in Marketing Intelligence (MSMI) adds an experiential learning component to a challenging slate of coursework. As a Fordham marketing intelligence student, here’s what you get:

Experiential Learning

• Applied projects: Serve on a student consulting team for a real New York City company. Learn about its business challenges, develop a data-driven analysis and solution, and present your findings to company executives. They could like one of your ideas so much that they put it into practice—or ask you to call their recruiters before you graduate.
• Workshops: The MSMI is all about getting you a great job. Four career workshops help you to design a job-search action plan that is specific to your interests—and that will help you succeed.

Coursework

The MSMI spans two interrelated areas:

• Strategic marketing, which covers the overall framework of the marketing field, as well as current science in strategic, innovative decision-making.
• Data analytics, encompassing the software and analytical skills needed to navigate today’s job market.

Because MSMI students enter the program at various stages of their careers, we’ve designed the curriculum to adapt to each person’s level and goals. The full-time and part-time options accommodate a range of schedules.

To learn more about the MS in Marketing Intelligence, visit the Fordham website.

Requirements

The 36 credit program MSMI program is outlined below as it plays out for full-time students. Part-time students work with the program director and academic advisor to structure the MSMI requirements around their professional lives. Please note that in addition to the required courses, MSMI students can choose specialized electives in their fields of interest.

Updated: 07-27-2020
Prerequisites
Before beginning the sequence above, students should have successfully completed courses in statistics and calculus, and they should have an adequate background in basic computer skills and data-analysis software. If you don’t have these foundations yet, don’t worry—we’ll support you in acquiring them before the program starts.

Media Management (M.S.)
Take your classroom learning straight to real-world challenges.

The Gabelli School of Business emphasizes real-world skills. Our accomplished faculty give students the perspective they need to apply lessons from coursework to contemporary business problems, not only in the context of New York, but also in the global marketplace.

The Master of Science in Media Management (MSMM) curriculum covers a range of topics relevant to today’s media landscape, from international media systems to sports media to social media. MSMM students benefit from direct access to our faculty’s original research, and they attend media events throughout the year to discuss trends with New York executives and build their professional networks.

To learn more about the MS in Media Management, visit the Fordham website.

Requirements
The 36-credit MSMM can be completed in three semesters. Coursework is flexible enough to meet the needs of varied student backgrounds, from students who have just finished their undergraduate degrees to people who already have a work history in media.

</tbody>
</table>

2 Students may also take any Special Topics Communications and Media Management courses as an elective. These are any courses which have the course code CMGB and is coded 75XX or is designated a special topics course with the prefix ST in the course name. A list of Communications and Media Management courses can be found in the academic areas page.

CPA Certification
The M.S. in Professional Accounting may supplement an undergraduate degree in public accounting to meet the 150-credit-hour educational requirement for the New York State Certified Public Accountant (CPA) examination. Because undergraduate accounting programs vary, however, please visit the National Association of State Boards of Accounting website to make certain this holds true for your specific bachelor’s degree.
STEM-OPT Eligibility

The M.S. in Professional Accounting includes two possible tracks. Graduates students holding an F-1 visa who earn the M.S.A. with the Accounting Technology Analytics track will be eligible for a STEM-OPT extension.

To learn more about the M.S. in Professional Accounting, visit the Fordham website.

Requirements

Prerequisites

M.S. candidates who have not had any professional training or academic coursework using basic U.S. tax concepts (for example, those who have not taken an U.S. Internal Revenue Service-based tax course in their undergraduate studies) will have the opportunity to take ACGB 7184 Individual and Business Entity Taxation, for 3 credits, as a prerequisite.

Degree candidates whose native language is not English and who have not completed an undergraduate or graduate program in the United States or United Kingdom will have the opportunity to take MSGB 809A Adv Pres and Public Speaking and MSGB 809B Advanced Corporate Communications, both for 1.5 credits.

Depending on past professional training or academic coursework, the following three-credit prerequisite courses may be required:

- ACGB 6111 Fundamentals of Accounting I
- ACGB 7120 Ext Finl Info & Rptg
- ACGB 7105 Financial Accounting
- ACGB 7155 Managerial Accounting Analysis
- ACGB 7184 Individual and Business Entity Taxation

Please note: The 3-credit courses and both 1.5-credit courses listed above, as needed, should be taken during the first semester. This increases the number of credits taken prior to completing the M.S., but these courses add significant value.

Curriculum

The M.S. in Professional Accounting is a 30-credit program. Students’ curriculum is driven by the selection of one of two tracks (details below). The program cannot be pursued without one of these two tracks. Recommendations for electives should be determined in conjunction with the program’s academic adviser.

Tracks

Students pursuing the M.S. in Professional Accounting must also pursue one of two tracks listed below. One of the tracks, in Accounting Technology Analytics, also exists as a freestanding Advanced Certificate (p. 659) program.

The track curricula are taken entirely as overlap with the M.S. in Professional Accounting, so that students complete the program with one of the tracks below without taking any additional coursework. (STEM-OPT eligibility for students holding an F-1 visa is only available to students pursuing the M.S. in Professional Accounting with track in Accounting Technology Analytics).

The two tracks are:

- Accounting, Auditing, and Advisory (p. 685)
- Accounting Technology Analytics (p. 685)

The requirements for each track, when pursued as part of the M.S. in Professional Accounting, are described on the ‘Tracks’ tab (p. 685).

Prerequisites

Degree candidates who have not had any professional training or academic coursework using basic U.S. tax concepts (for example, those who have not taken an U.S. Internal Revenue-based tax course in their undergraduate studies) will have the opportunity to take ACGB 7184 Individual and Business Entity Taxation for 3 credits, as a prerequisite.

Degree candidates whose native language is not English and who have not completed the full four years of an undergraduate program in the United States or United Kingdom will have the opportunity to take MSGB 809A Adv Pres and Public Speaking and MSGB 809B Advanced Corporate Communications, each for 1.5 credits, also as a prerequisite.

Depending on past professional training or academic coursework, the following prerequisite courses may also be required:

- ACGB 6111 Fundamentals of Accounting I
- ACGB 7105 Financial Accounting
- ACGB 7171 Auditing of Accounting Systems I
- ACGB 7120 Ext Finl Info & Rptg
- ACGB 7184 Individual and Business Entity Taxation

These 3 credit and 1.5 credit courses should be taken, as needed, during the first semester. Though this increases the number of credits and courses required for the M.S. degree, these courses add significant value.

1 Students can choose any tax course related to their interests, or any advanced-level accounting course except for ACGB 6111, ACGB 7105, and ACGB 7184. Having the option to pursue specific interests through electives is a feature that sets the Gabelli School's M.S.T. program apart.

Quantitative Finance (M.S.)

Our students appreciate the challenge. Their employers appreciate the results.

Students in the Gabelli School Master of Science in Quantitative Finance (M.S.Q.F.) program are asked to work hard, and when they get their first job they come back and thank us for it.

That's when they realize just how well our coursework has prepared them to excel in the challenging and fast-paced finance industry.

But don't just take our word for it. The Global Association of Risk Professionals (GARP) calls the Gabelli School M.S.Q.F. "a highly rigorous

To learn more about the M.S. in Professional Taxation, visit the Fordham website.
program provided by top-notch faculty with strong connections to the financial community.” Chris Donohue, managing director of GARP’s research and educational programs, writes that “upon completing this program, its students will be well-positioned to pursue the FRM designation and for the global risk management profession in general.”

Gabelli School students benefit from our partnerships with GARP and the Chartered Financial Analyst (CFA) Institute.

To learn more about the MS in Quantitative Finance, visit the Fordham website.

**Requirements**

Students can complete the program in as few as 12 months, but most choose an 18- to 24-month schedule, because additional time greatly enhances the M.S.Q.F. experience and allows time for employment. From September to May of the first year, students are expected to enroll full-time. After that students can take classes in the evenings while maintaining a full-time job or internship.

- Calculus 3 (Multivariate Calculus)
- Linear Algebra
- Ordinary Differential Equations
- Computer Programming

**Strategic Marketing Communications (M.S. Online)**

Professional development often feels like the last thing that working marketing and communications staff have the time to do.

The Gabelli School’s M.S. in Strategic Marketing Communications curriculum makes career advancement not only accessible—via an online format—but also worthwhile.

The program incorporates real-world cases and situations that will mirror the business challenges you encounter every day, giving you the space to explore, discuss, and experiment with new approaches in an academic setting.

It’s the perfect lab to workshop, test, and perfect strategies that you can then put to work for your organization—or use to move up into a new role.

In our curriculum, online coursework comes together with hands-on, applied projects that give you the chance to work in teams with fellow students. Together, and with guidance from our faculty, you will find novel ways to communicate the value of a brand.

To learn more about the Online M.S. in Strategic Marketing Communications, visit the Fordham website.

**Requirements**

The M.S. program combines coursework from two of the Gabelli School’s academic areas: communications and media management (p. 617) and marketing (p. 648). Students complete 15 credits in each area and then earn the final 3 credits through a hands-on project. A three-day on-campus residency is also required.

Pre-Degree Programs

People come to business school from all kinds of different academic backgrounds. Fordham is dedicated to opening the door to business to all students—whether they studied liberal arts as undergraduates, completed their prior education in another country, or are simply not completely sure yet whether advanced business study is for them.

If any of these might apply to you, explore our preparatory programs:

- Pre-M.B.A. Program (p. 688): Ideal for students who are considering an M.B.A. but are not ready to commit. Pre-M.B.A. students take three courses that will count toward their Fordham M.B.A. if they do eventually decide to go for the full degree.
- International Business Bridge (p. 688): Perfect for recent non-U.S. college graduates who wish to improve their English language skills, business knowledge, and study skills before entering a U.S. business degree program.

To learn more about pre-degree programs, please visit the Fordham website.

International Business Bridge

The International Business Bridge (IBB) is a unique program for international students who hold the equivalent of a four-year bachelor’s degree. In certain cases, it replaces the final year of university; please check with your university and with the Gabelli School to make this determination.

Does your application package need a boost before you apply to a U.S. business school?

Fordham created the International Business Bridge program (IBB) to help international students get ready for a graduate-level U.S. business degree program.

In just two semesters, the Fordham IBB will help you:

- Improve your English skills
- Build a foundation in business theory and practice
- Prepare for graduate-level business coursework

This program is an excellent precursor to a graduate business degree at Fordham or at another highly regarded U.S. university in which your GMAT score will be required.

Admissions

Specific admissions requirements and tuition for IBB can be found online. For more information about IBB or its specific admissions requirements, please contact Greg Cooper, Director, at ibb@fordham.edu or Barrilero1 on WeChat.

Gabelli TALK

Gabelli TALK is a comprehensive English language and cultural immersion program designed to help incoming graduate business students develop communicative competence in English to function more effectively in academic, professional, and social settings. Students participating in Gabelli TALK have early access to resources at the Gabelli School of Business (e.g., career development), have more time to secure housing, and have the chance to meet and interact with faculty, staff, alumni, and other students—before classes begin.

For more information about Gabelli TALK, please contact Dr. Philippe Barr at pbarr2@fordham.edu or pbarr2 on WeChat.

Requirements

IBB students take ten courses across two terms:

<table>
<thead>
<tr>
<th>Course</th>

</tr>
</tbody>
</table>

Because each term is tailored to students’ individual needs, program and course content may vary from session to session.

For more information about IBB or its specific admissions requirements, please contact Greg Cooper, Director, at ibb@fordham.edu, Barrilero1 on WeChat, or +1-212-636-7301.

Pre-MBA Program

The Pre-MBA is an exciting opportunity to begin taking MBA courses before committing to the Professional MBA degree. If you have never taken a business course or have less than four years of work experience, the Pre-MBA program might be right for you. Pre-MBA courses can be applied to your degree if you choose to apply and are accepted to the Professional MBA program. Plus, successful completion of all courses with a grade of “B” or higher makes you eligible for a GMAT/GRE waiver.
Please note: the Pre-MBA program is only open to students that plan to pursue our Professional (Part-time) MBA.

Requirements
Please note that Pre-MBA students may take only the four core classes specified and may only enroll for two consecutive trimesters.

The courses available to Pre-MBA students are:

- ACGB 6111 Fundamentals of Accounting I
- DGGB 6820 Statistics
- BEGB 6220 Econ Analysis & Bus Decisions
- BLGB 6321 Markets, Business & Society

Pre-MBA students who decide to apply to our Professional MBA degree program must go through the regular admissions process. If admitted, any Pre-MBA courses completed will count toward the Professional MBA degree and overall GPA.

The Pre-MBA program is only available to domestic students. International students interested in a preparatory business program should see information for the International Business Bridge.

Please note: the Pre-MBA program is a non-degree seeking program and is not eligible for financial aid or scholarships.

Academic Advising

Academic advising is a developmental, collaborative, and supportive partnership between students and academic advisers. Together we will explore your academic, career, and life goals, and identify the courses, enrichment activities, engagement opportunities, and resources you may leverage to make informed decisions and achieve results.

Our academic advising team comprises assistant and senior assistant deans along with administrative and graduate assistants who are here to help you throughout your time at the Gabelli School. We partner with faculty, administrators, and other offices across the Fordham community to ensure our students are receiving holistic support and resources central to their academic and personal success.

In keeping with the Jesuit spirit of cura personalis, we believe the development and care of your whole self is vital to thriving academically. We encourage you to be actively engaged in your personal growth while taking advantage of the many opportunities available to you as a Gabelli School student in the heart of New York City.

We have centralized our guidance programs below to help get you started on your academic and personal journey here at Gabelli:

- Graduate Academic Advisers and the Advising Help Desk
- Advising Partnership
- Student Resources and Clubs
- Programs of Study
- Academic Honor Code Guidelines

If you are in need of general assistance after visiting the links above, please contact the Gabelli School of Business Office of Graduate Advising at 212-636-6104 or gsbgraduate@fordham.edu (on-campus students) or gsbgradonline@fordham.edu (online students).

Rachel Dobkins
Senior Assistant Dean
Office of Graduate Advising
Gabelli School of Business

To learn more about academic advising, please visit Fordham’s graduate academic advising website.

Admissions

Applying for graduate school may seem daunting, but the Gabelli admissions staff is here to help you and reduce any anxiety you might have. We are in the office year-round to answer any questions—about admissions, financial aid, or academic programs—and we work hard to make the admissions process as efficient and transparent as possible.

To learn more about the admissions process and requirements, please visit the Gabelli School of Business Graduate Admissions website.

Awards and Honors

Alumni Awards

Gabelli School of Business Alumni Award
Recognizes one or more Fordham alumni who, in the last academic year, have given meritorious service to advance graduate business education at the Gabelli School.

Student Awards

Academic Area Awards
These awards recognize distinguished academic achievement by MBA and MS students in the following areas:

- Accounting and Taxation
- Communications and Media Management
- Finance and Business Economics
- Law and Ethics
- Information Technology and Operations
- Leading People and Organizations

Updated: 07-27-2020
Academic Program Excellence Awards
These awards recognize MBA and MS students with exemplary academic records who are dedicated to excellence in their program of study:

- Executive MBA
- Full-time Cohort MBA
- Professional MBA
- MS Accounting
- MS Statistics and Applied Decisions Making
- MS Information Technology
- MS Management
- MS Marketing Intelligence
- MS Media Management
- MS Global Finance
- MS Quantitative Finance
- MS Taxation

Graduate Business Student Leadership Award
The graduating class selects a peer who has provided outstanding volunteer support to the graduate student body, exemplifying the Jesuit value of being “men and women for others.”

Entrepreneurship Award
Honors a student who possesses the entrepreneurial traits of open-mindedness, creativity, innovation, and resilience.

Center for Digital Transformation Fellowship Award
Recognizes students who were chosen as graduate-level fellows of the Center for Digital Transformation, engaging in research and service around the goal of advancing society through technology.

Exemplar Service Award
Recognizes one or more graduate students who epitomize our identity and whose influence and achievements have a significant impact on Gabelli School student life and beyond.

Capstone Awards
Dean's Award for Excellence
Given to a graduate student who has exemplified excellence in his or her academic work and demonstrates great career promise.

Dean's Award for Service
Given to a student who has demonstrated outstanding support of the mission of the Gabelli School of Business.

International Advancement Award
Given to a graduate student who has advanced the Gabelli School's mission of “sending Fordham out into the world, and bringing the world to Fordham.”

Faculty Awards
The following awards are determined by a vote among the graduating class.

The Stanley Fuchs Award
In memory of Stanley Fuchs, former area chair of law and ethics and a devoted teacher and student advocate, this award is presented to a full-time faculty member who has had a significant impact on the student body.

The Gladys and Henry Crown Award for Faculty Excellence
Given to a full-time faculty member whose exceptional performance and dedication to the Gabelli School's ideals warrant special recognition.

The Dean's Award for Faculty Excellence
Given to an adjunct faculty member whose exceptional performance and dedication to the Gabelli School's ideals warrant special recognition.

Honor Societies
Alpha Mu Alpha
The national honor society for students of marketing is sponsored by the American Marketing Association. Only marketing students of high academic achievement who attend an institution accredited by the AACSB International are eligible for membership. Nominations for this honor are given to MBA marketing concentrators and MS in Marketing Intelligence students who are in the top 20 percent of their program.

Alpha Sigma Nu
This is the most prestigious honor society of Jesuit institutions of higher education. Membership is limited to students in the top 15 percent of their class and who possess the outstanding qualities of scholarship, loyalty, and service.

Beta Gamma Sigma
The national honor society for business students is comparable to Phi Beta Kappa in the arts and Sigma Xi in the sciences. Fordham participates through the Zeta of New York Chapter. Graduating students of outstanding academic accomplishment are nominated for membership.

Omicron Delta Epsilon
Only students with the highest scholastic achievement in the areas of economics and finance are recognized for admission to this international economics society.

Phi Kappa Phi
A national interdisciplinary honor society, Phi Kappa Phi admits students of high academic achievement from all the academic and professional colleges and schools of the University. A small number of students from each graduating class are nominated for membership.

Financial Management Association National Honor Society
The FMA NHS is the only international honor society strictly for students of finance. The purpose of the FMA NHS is to acknowledge outstanding finance students and to provide opportunities for professional interaction among academics, practitioners, and students; promote the development and understanding of research; and enhance the quality of education in finance.

Gabelli School of Business Dean's List
The dean's list records graduate business students who have achieved a perfect 4.0 cumulative GPA at the time of graduation.

Career Development Center
This center, known to students as the CDC, provides end-to-end career services for Gabelli School of Business graduate students. Our goal is to help you translate your Fordham academic experience into meaningful, productive academic-year internships and post-graduation jobs.
Students are strongly encouraged to make an appointment with our career advisers. On-campus students may visit the CDC located on the first floor of 140 West 62nd Street at Lincoln Center. Online students meet with a career adviser through online appointments.

To learn more about the Career Development Center, visit the Fordham website.

**Honor Code**

**Statement of Academic Integrity**

Every graduate student enrolled in Fordham University’s Gabelli School of Business is bound to abide by its honor code. As a Gabelli School graduate student, you are part of a community dedicated to the disciplined and rigorous pursuit of knowledge and communication of truth. You are expected to uphold the highest standards of academic integrity. Any work that you claim to be your own must be your own; you must give appropriate credit where credit is due; and you must be fair and honest in all of your interactions with other members of the Fordham University community.

**Gabelli School Graduate Student Standards of Academic Integrity**

Academic integrity is the pursuit of scholarly activity in an honest, truthful, and responsible manner. Violations of academic integrity include, but are not limited to, plagiarism, cheating on exams, falsification, unapproved collaboration, and destruction of library materials. Below are instances of violations of the honor code with which all graduate students at the Gabelli School should be familiar and which they must avoid.

**Plagiarism**

Plagiarism occurs when a student attempts to present as his or her own work what has come from another source without proper attribution. Plagiarism takes place whether such theft is accidental or deliberate. It is no defense to claim that one has “forgotten” to document ideas or material taken from another source. Examples of plagiarism include, but are not limited to:

i. Using the ideas of another person, whether or not such ideas are paraphrased, from whatever source, including oral, print, broadcast, or computer-mediated communication;

ii. Rewriting borrowed material by simply dropping a word here and there, substituting a few words for others, or moving around words or a sentence;

iii. Presenting borrowed material, whether a phrase, sentence, or whole paragraphs, without placing quotation marks around the borrowed material in the approved style and providing an appropriate citation to the source;

iv. Presenting as one's own an assignment, paper, or computer program partially or wholly prepared by another person, whether prepared by another student, a friend, or a business or online service that sells or distributes such papers and programs;

v. Failing to use proper citation for information obtained from print sources or the internet, according to citation criteria specified by the instructor, or in cases where instructor guidance is not given, by standard manuals of style (e.g. The Chicago Manual of Style).

**Cheating**

Cheating occurs when a student uses course materials, information, or devices (e.g., programmable calculator, cell phone) when the use of any such aid has not been expressly authorized by the instructor (or has been prohibited). Examples of cheating include, but are not limited to: i. Having or using unauthorized materials, information, or an unauthorized device at an examination, test, or quiz;

ii. Copying from another student at an examination, test, or quiz, or copying another student’s homework assignment, data, research paper, or laboratory report;

iii. Permitting another student to copy from a homework assignment, research paper, computer program, project report, examination, test, or quiz;

iv. Obtaining and/or using an unauthorized examination, test, or quiz prior to its administration;

v. Having another person act as proxy to take an examination, test, or quiz or to complete a homework assignment, research paper, computer program, or project.

vi. Knowingly making false claims on a student’s resume, biographical summary, or CV.

**Falsification**

Falsification occurs when a student makes false statements that mislead others. Examples of falsification include, but are not limited to:

i. The submission or presentation of a falsified excuse for an absence from a course requirement, examination, test, or quiz;
ii. The presentation of false identification or credentials in order to gain admission to a course, examination, test, quiz, or degree program;

iii. The creation of a false or misleading citation;

iv. The manipulation or falsification of data for an academic assignment.

**Unapproved Collaboration**

Certain coursework and assignments, such as team projects, research or term papers, and laboratory work, may involve collaboration. Unless expressly permitted or prescribed by the faculty member, students shall not engage in collaboration on any graded assignment. It is the student’s responsibility to ask for clarification from a faculty member as to what extent, if at all, collaboration with others is allowed.

**Other Violations of Academic Integrity**

Additional violations of academic integrity include, but are not limited to:

i. Theft, destruction, or tampering with library materials, audio and videotapes, or computer hardware or software;

ii. Submission of a research paper or project to more than one course during the time in which a student is attending Fordham University, without the explicit permission from all the instructors involved;

iii. Submission of work previously done at another institution, whether modified or not, without the permission of the instructor.

iv. Accepting tuition remission or any other form of payment in exchange for work or services to be provided and then failing to provide the agreed upon work or services within a reasonable time frame unless excused by the faculty member or supervisor involved.

**Fordham Graduate School of Business Academic Integrity Honor Court**

To foster a trusting environment that is essential for learning, it is the responsibility of both students and faculty to maintain and to promote the intellectual community at the Fordham University Gabelli School of Business. To ensure that all members of that community are represented in the process, an Academic Integrity Honor Court (Honor Court) composed of two (2) faculty members and one (1) student will be established to adjudicate alleged violations of the honor code. The Honor Court will oversee the procedures and case reviews involving all alleged violations of the honor code associated with courses taught in the Gabelli School of Business.

**Responsibilities**

The responsibilities of the Honor Court are: i) to record and verify receipt of Academic Integrity Violation Reports signed by the faculty member and the student; ii) to further investigate the incident if the student challenges the decision of the faculty member and schedule a case review; iii) to report the violation to the dean of the Gabelli School of Business (dean); iv) to provide annual reports of academic integrity violations and final sanctions to the dean; v) to review periodically the functioning of the Honor Court, including the Standards of Academic Integrity and the Honor Court Procedures, to determine if changes are needed and communicate any recommendations to the dean; and vi) to work with relevant student groups to develop workshops to promote and maintain academic integrity at the Gabelli School of Business.

**Membership**

The dean will solicit nominations for membership on the Honor Court, including substitute faculty members and students. The dean will then appoint two (2) faculty members and one (1) student from the Gabelli School of Business and identify substitute faculty members and students who are willing to serve, if needed. The Honor Court will be chaired by one faculty member selected by the dean from among the two faculty appointed. Agreement to serve on the Honor Court is a serious commitment. Faculty members will serve a term of three (3) years with an initial staggering of term to ensure continuity and the student member will serve a term of one (1) year. The acting chair of the Honor Court will serve in that capacity for a one (1) year period with the possibility of yearly renewals up to three years.

**Case Reviews**

Case reviews are to be conducted by a quorum composed of the full Honor Court. The chair will verify members’ attendance. A member of the Honor Court may be excused from a particular case review when a conflict of interest is disclosed to the chair. In that event, a substitute faculty member or student, as the case may be, will be appointed by the dean from the approved list of substitutes. In the event that an academic integrity violation is filed against a student just prior to graduation and the student challenges the faculty member’s claim, the chair of the Honor Court is empowered to convene an emergency Honor Court. This emergency Honor Court will consist of two (2) faculty members and one (1) student.

**Confidentiality**

Faculty, administrators, and students engaged in academic integrity procedures involving honor code violations shall treat as confidential all information disclosed during such procedures, as well as the fact of occurrence of the case review. Persons nominated to the Honor Court as members will only be permitted to serve after they sign a non-disclosure agreement that limits the discussion of cases to Honor Court members and the dean on a “need to know basis” only.

**Statement of Honor Court Procedures**

**Initial Handling of the Alleged Honor Code Violation**

A. When an instructor suspects that a student has engaged in academic dishonesty, the instructor shall hold a conference with the student regarding the basis for the suspected violation and the sanction(s) to be imposed according to the Sanctions for Violations of the Honor Code.

B. The instructor shall fill out an Academic Integrity Violation Report (Report) and attach the appropriate documentation to justify reporting a violation. The instructor and the student will meet to discuss the charge. As a consequence of the discussion, the instructor may inform in writing the chair of the Honor Court and the student that the charge(s) has (have) been removed. Alternatively, as a consequence of the discussion, the instructor may inform the student that the charges remain, and in such a case the instructor will inform the student that he/she must notify the chair of the Honor Court by email or in writing within 24 hours of his/her having received the charge(s) from the instructor. Both the instructor and student will sign the report. Within two weeks of signing the report the student will either acknowledge in writing to the chair of the Honor Court that he/she has committed a violation of Honor Code and accepts the instructor’s sanctions, or indicate that he/she intends to challenge the instructor’s claim. The student may submit documentation to support a refusal to acknowledge commission of a violation of the honor code. Failure of the student to sign the report without an expressed challenge.

**Updated: 07-27-2020**
made to the instructor’s claim shall be deemed an acknowledgement of
the violation and an acceptance of the sanctions.

C. The report and documentation will be sent directly to the chair of
the Honor Court. The chair will then notify the other members of the
Honor Court that a report has been filed and apprise the members of the
student’s signed statement.

D. If the student has signed an affirmative statement of violation
and acceptance of the instructor’s sanctions in accordance with this
Statement of Honor Court Procedures, then the dean will be notified as
such. Under this circumstance, no case review by the Honor Court will be
held, and the case report will be sent directly to the dean.

E. In all cases, the instructor will file a grade of ‘NGR’ pending the
actions of the Honor Court and notification from the chair of any relevant
sanction that is imposed by the dean.

The Student Challenge and Case Review
F. If the student intends to challenge the instructor’s claim, he/she must
declare that intent to the chair of the Honor Court in writing within two
weeks of the initial conference between the instructor and the student.
This challenge declaration must include a descriptive statement that
explains his/her reasons for the challenge.

G. Upon receipt of the student’s declaration to challenge, the chair, in
consultation with the department/area chair or the program director,
will seek a second reviewer in order to conduct a blind review of the
report and the student’s letter. The reviewer should be a member of the
department or interdisciplinary program from which the report originated.
The second reviewer will submit his/her evaluation to the chair of the
Honor Court. A second reviewer from outside the University will be
utilized only when circumstances warrant.

H. Upon the receipt of the second reviewer’s evaluation, the chair
shall schedule a case review with the other Honor Court members, the
instructor submitting the charges, and the student charged.

I. The Honor Court will review the case materials and the written
statement of the student. The student will be given the opportunity to
appear before the Honor Court to present an oral argument. The chair
of the Honor Court may request the faculty member to appear before
the Honor Court to present an oral argument. In any case where the
student may be expelled for committing the charged violation, both the
student and faculty member shall have the right to call witnesses and
to cross-examine witnesses. All such witnesses shall testify under
oath. All proceedings in which witnesses testify shall be recorded. After
reviewing the case materials, and listening to oral arguments and such
testimony as is presented, the Honor Court will deliberate and vote on
whether a violation of the honor code has occurred. A majority vote will
be considered an affirmative determination that a violation of the honor
code has occurred. The chair will notify the student, the instructor, and,
in cases of an affirmative determination, the dean of the Honor Court’s
evaluation.

Meeting with the Dean and Administration of Sanctions
J. Upon receipt of the Honor Court case report, the dean will meet with
the student to discuss the Honor Court’s evaluation of the student’s case
and, in the case of an affirmative determination, impose appropriate
sanctions in accordance with the Sanctions for Violations of the Honor
Code according to the seriousness of the offense. The dean will also warn
the student of sanctions for any future violations of the honor code. A

report of the imposed sanctions will be made to the Honor Court for its
records.

Record Keeping
K. The Honor Court will keep for its records and analysis all reports and
actions taken by the Honor Court. These records are education records
and are therefore subject to federal rules and regulations outlined in
FERPA (Family Educational Rights and Privacy Act). Records kept for the
purpose of analysis and program evaluation by the Honor Court will have
all personal identifying information removed.

The Right to Grieve Grades When Alleged Violations of
the Honor Code Are Pending
L. Any other grades given for work in the same course, unless the grade
itself is the sanction, can be grieved in accordance with the established
policy of the Gabelli School of Business only after any and all questions
of violations of the honor code have been resolved through the Honor
Court procedures outlined above.

Procedure for a Student to Report an
Honor Code Violation
If a student witnesses a violation of the honor code or otherwise has a
reason to believe that a violation has occurred, he or she may choose
among several possible courses of action:

A. Talk with the student urging him/her to report himself/herself to the
instructor of the course or to the chair of the Honor Court.

B. Discuss the observed action with the instructor, not naming those
involved, to obtain guidance and determine if an observed act merits
action under the honor code.

C. Submit a written report to the chair of the Honor Court. If the student
wishes to remain anonymous, the Honor Court will honor that request
during the initial inquiry prior to a case review.

Sanctions for Violations of the Honor Code
If a Fordham University Gabelli School of Business student is found in
violation of the honor code, the following sanctions shall be imposed:

First Offense
i. The student shall receive an F on the assignment/examination. The
student may in addition receive an F in the course at the discretion of the
instructor. In the event that the student receives an F in the course and
elects to withdraw from the course prior to the withdrawal deadline, the
student shall receive the grade of WF, a grade which is equivalent of an
earned F in the cumulative quality point index.

ii. The case shall then be documented in the student’s file, where it
will remain until the time of the student’s graduation from Fordham
University, at which time the material will be removed from his or her file.
Any records kept for the purpose of analysis and program evaluation
by the Honor Court and not destroyed will have all personal identifying
information removed.

Second Offense
i. The student shall receive an F for the course and shall be subject to
suspension or expulsion from the Gabelli School of Business, at the
discretion of the dean. In the event that the student receives an F in the
course and elects to withdraw from the course prior to the withdrawal deadline, the student shall receive the grade of WF, a grade which is equivalent of an earned F in the cumulative quality point index. If the student is expelled, the notation – Withdrawn– will appear on his/her transcript.

ii. The case shall be documented in the student’s file, where it will remain until the time of the student’s graduation from the Gabelli School of Business, at which time the material will be removed from his or her file. Any records kept for the purpose of analysis and program evaluation by the Honor Court and not destroyed will have all personal identifying information removed.

Third Offense
i. If the student is found guilty of a third violation of the honor code, the student will receive an F for the course and will be expelled from the Gabelli School of Business, at the discretion of the dean. In the event that the student receives an F in the course and elects to withdraw from the course prior to the withdrawal deadline, the student shall receive the grade of WF, a grade which is equivalent of an earned F in the cumulative quality point index. If the student is expelled, the notation – Withdrawn– will appear on his/her transcript.

ii. Any records kept for the purpose of analysis and program evaluation by the Honor Court and not destroyed will have all personal identifying information removed.

International Students

International students are a priority at Fordham. Representing 60–70% of our graduate business population, international students are an important part of the fabric of our community.

We offer a unique slate of services to help international students make the transition to graduate study in the United States. Please follow this menu to learn more:

- Admissions: Specific information about international student admissions
- Graduate Housing: Overview on Fordham-owned apartments for graduate students
- International Student Guide Book: Information from our graduate academic advising team
- Office for International Services: Fordham’s University-wide resource center for international students
- Global Peer Advisors: Connect with a helpful student mentor
- Student organizations at the graduate business school

Policies and Procedures

The policies and procedures explained in this section are indispensable to a student’s orderly progress through the M.B.A. or M.S. degree program. Students enrolled in in-person degree programs needing clarification of, or assistance with, any item in this section should contact the Office of Graduate Advising at gsbgraduate@fordham.edu. Students enrolled in online degree programs should contact Kerri Mizrahi, director of online learning, at kmizrahi@fordham.edu.

Campus Security

The Advisory Committee on Campus Security will provide upon request all campus crime statistics as reported to the U.S. Department of Education. The U.S. Department of Education Website is www.ed.gov. Fordham University provides campus crime statistics on its website. Requests for a hard copy can be directed to the University Associate Vice President for Public Safety by phone at 718-817-2222 or in writing at

Associate Vice President
Public Safety
Thebaud Annex
Fordham University
441 East Fordham Rd.
Bronx, NY 10458

For more information
Visit the Public Safety web page.

Cancellation of Classes

If classes are canceled because of weather, the Office of the Vice President of Administration will transmit the message to the University weather emergency numbers: 800-280-SNOW and 212-636-7777. The University’s radio station, WFUV (90.7 FM), will make announcements every 15 minutes. Separate announcements will be made for the Westchester campus.

Cancellation of classes does not necessarily mean the University is closed. Even though classes may be canceled, all other academic and
administrative services and functions in the University are expected to be open according to their regular schedules.

If weather conditions cause the University to close before the start of the workday, that will be communicated via the University’s switchboards and radio station WFUV (90.7 FM).

Cancellation of classes for on campus program courses may not result in cancellation of classes for online degree programs. Students enrolled in online degree programs should consult with professors to determine if classes are canceled, whether due to inclement weather or holiday schedules.

Change of Address

Students must promptly notify the University of any change of address.

You may change your non-permanent addresses on my.fordham.edu under the Student or Alumni tab. Select Banner Self-Service, then select the ‘Personal Information’ folder and ‘Update Addresses and Phones.’

If you are requesting a change of permanent address, please visit or contact the office of Academic Records and submit a completed Change of Address form. Note: Your Permanent Address is used for official mail correspondence by many University offices, including the Offices of Student Financial Services and Academic Records.

Please be sure to include your name and Fordham Identification Number (A#) with any correspondence to our office. We require proof of address to be submitted with the request, such as copy of a license, tax form, or utility bill (in the custodial parent/guardian’s name if the student is a dependent).

Class Attendance

While each instructor determines the policy governing class attendance, the school expects that all students will attend class regularly. Any student who anticipates being absent for more than two weeks should contact his or her academic adviser.

Individual faculty members may have more stringent policies on class attendance. Please refer to the class syllabus for more specific guidance on individual class attendance policies.

Computer Policy

Courses in all areas often require the use of computers. Though the graduate business school and Fordham University provide facilities on campus, students are urged to acquire or have access to a personal computer. To assist students, Gabelli IT evaluates and recommends particular software and hardware configurations. Additional information is available on the Gabelli IT homepage. Students enrolled in online degree programs must have access to the appropriate equipment as specified by their online degree program.

Cooperative Program with the School of Law

A cooperative program with the School of Law enables business students to take certain law courses for credit toward the M.B.A. degree. Please contact your academic advisor for more information and to make sure that these courses fit into your program of study. Students who are pursuing the J.D./M.B.A. degree are not eligible for the cooperative program.

Course Changes (add/drop)

Students should register themselves for courses in Banner, our online registration system accessed through My.Fordham.

From the start of the registration window up until the add/drop deadline listed in the academic calendar, students may make changes to their course registrations via the same system. During add/drop, students may drop a course without penalty.

After the conclusion of the add/drop period, students must submit the course withdrawal/late registration form on My.Fordham to make any changes to their course registrations. Registration changes following the add/drop deadline carry penalties as communicated in the withdrawal policy and in accordance with the academic calendar. Students must send written instructor permission for late registration to their adviser, and the course must not be full for their late registration form request to be approved.

For additional guidance and questions about course registration, please contact graduate advising.

Course Load

The normal course load for a full-time, on-campus student is four or five courses (12 or 15 credits) per trimester. The typical course load for a student enrolled in an online degree program is two or three courses (6 or 9 credits) per quarter. International students with a student visa must register for a minimum of three courses (9 credits) to be in compliance with the requirements of the F1 visa.

On-campus part-time students usually take two courses (6 credits) per trimester (and online degree program part-time students usually take one to two courses, or 3 to 6 credits, per quarter), but course loads vary depending upon a student’s responsibilities outside the program. A student must register for at least 6 credits to be eligible for loans.

Students employed full-time are advised to register for no more than three courses (9 credits) per term.

Degree Requirements

Fordham’s graduate business school awards degrees and advanced certificates only upon completion of the degree requirements set forth in the course bulletin, as specified or qualified in a student’s official Academic Advising Sheet. A student should consult an academic adviser prior to registering for a final term to be certain that all degree requirements will have been met by the term’s end.

Directory Information

The University, at its discretion, may provide the following directory information: student’s name, addresses, telephone numbers, electronic mail addresses, photograph, date and place of birth, major field of study, dates of attendance, class level, enrollment status (e.g., undergraduate or graduate; full-time or part-time), participation in officially recognized activities and sports, weight and height of members of athletic teams, degrees, honors and awards received, the most recent educational agency or institution attended, and other such information. A student who wishes the University to withhold directory information from disclosure must notify the Office of Academic Records or Law School.
Registrar in writing within 10 days after the first day of class each semester.

**Discipline**

All graduate business students are governed by the provisions of the University Code of Conduct adopted by the faculty. A copy of the code is available online or in the Office of the Dean of Students, 140 West 62nd Street, Room G33. Students should be familiar with its contents.

A student's continued enrollment and graduation, the awarding of academic credits, and the granting of any certification or degree are strictly subject to the disciplinary powers of the University. The University reserves the right in its discretion at any time to cancel a student's registration, to refuse to award academic credits, or to deny a certification or a degree.

The disciplinary authority of the University is vested in the President of the University in such cases as he or she deems proper and, subject to the reserved powers of the President, Deans, or other officers upon whom jurisdiction may from time to time be conferred.

**Equity In Athletics Disclosure Act**

In accordance with the "Equity in Athletics Disclosure Act," effective July 1, 1996, information regarding the intercollegiate athletics program is available for review upon request to the:

Senior Associate Athletic Director for Business Affairs  
Fordham University, Rose Hill Gymnasium  
Bronx, New York 10458  
Telephone: 718-817-4300

**Grades and Academic Standing**

**Academic Standing**

Students are expected to meet the following academic standards throughout the duration of their academic degree programs at the Gabelli School of Business:

- A cumulative grade point average (GPA) of 3.0 is required for graduation.
- Students must earn grades of C or higher for all courses taken at the business school.
- A maximum of two grades of D are accepted for a degree, and these must be offset by grades of B, B+, or A.
- Any students who receive more than two grades of F will be dismissed from the program.
- Students must repeat all required courses in which a grade of F is earned.
- Students may elect to repeat an elective course in which a grade of F is earned, or alternatively may replace the failed credits with a new elective.
- All grades of F remain on students' academic transcripts and are factored into the GPA, even when courses are repeated for improved grades.

Each semester, the academic advising team reviews every student's academic progress and standing. Students who meet the below criteria will be placed on academic probation for one full-time semester or the equivalent completion of nine credits over a period of terms. If, at the end of the probationary period, the student has not raised their index to the required level of 3.000, the student may be dismissed from the program. Criteria for academic probation are as follows:

- Earn a cumulative and/or in-semester GPA below 3.000
- Receive a grade of F
- Earn 67% or less of their attempted credits (e.g., enrolled in 12 credits and withdraws from and/or receives grades of INC for 8 credits)

**Grading System**

The grading system consists of the following grades; the numbers assigned to each grade appear on the student’s transcript.

- A 4.00
- A- 3.67
- B+ 3.33
- B 3.00
- B- 2.67
- C+ 2.33
- C 2.00
- C- 1.67
- D 1.00
- F 0.00 Failure

Note: A failure is not removable from the record, though credit can be obtained by repeating the course with a passing grade.

The following symbols may also be entered on student records:

**INC**: Incomplete  
Indicates that a course requirement has not been met. Changed to F unless resolved by the deadline specified in the academic calendar.

**ABS**: Absent from Final Examination  
Indicates that the student was absent from the final examination. Changed to F unless resolved by the deadline specified in the academic calendar.

**W**: Withdraw  
Indicates withdrawal from a course with permission.

**AUD**: Audit  
Indicates registration for a course with no degree credit.

**NGR**: No Grade Reported  
Changed to F unless resolved by the deadline specified in the academic calendar.

**Incomplete (INC)**  
A grade of INC may be given to a student who has met all the requirements of a course, except for completion of certain assigned papers or reports that the student has been compelled to postpone for reasons beyond his or her control. These reasons must be satisfactory to the instructor, and the instructor and student must discuss and agree upon a plan and deadline for satisfactory course completion. The missing coursework and the course grade must be submitted within 45 days of the last scheduled day of examinations. Failure to do so will result in an...
F. Students are advised to confirm with the instructor that a grade change has been submitted to the academic advisor. Grades will not be changed after the deadline.

Deferred Examinations (ABS)
A student who has been prevented by illness or other serious circumstance from taking the final examination will receive an ABS on his or her grade report for the term, provided that: (1) the student has, prior to the examination, informed the instructor, preferably in writing, of the reason for the absence; and (2) the instructor judges the student’s attendance and progress during the term to be satisfactory. A grade of ABS must be removed within 45 days of the last scheduled day of examination; otherwise, the grade automatically becomes an F. Students are advised to confirm with the instructor that a grade has been submitted to the academic advisor the deadline. Grades will not be changed after the deadline. Students are sent corrected grade reports by enrollment services.

Change of Grade
The deadlines for changing an INC or ABS grade are stated in the preceding sections. The deadline for any other grade change is 60 days from the issue date printed on the student’s grade report.

Satisfactory Academic Progress Policy (SAP)
Each school of Fordham University has established minimum standards of satisfactory academic progress (SAP) that students must maintain as they pursue their degree or certificate. The University measures SAP annually at the end of the spring semester.

To be eligible for scholarship or federal aid, such as Federal Direct Subsidized and Unsubsidized Loans or Graduate PLUS Loans, each student must be making SAP according to the school’s standards. The SAP requirements are as follows for the Gabelli Graduate School of Business:

- Minimum 3.00 GPA required
- Must be registered for a minimum of six credits
- Must successfully maintain an earned credit ratio of 67% of attempted credits
- Complete the course of study for their degree within six years
- Incompletes, withdrawals, and noncredit remedial courses will count against attempted but not earned hours
- Transfer credits that count toward the student’s current program will count as both attempted and completed hours
- No credit check for leave of absence students and maintenance of matriculation students
- The Fordham University Gabelli Graduate School of Business does permit appeals when students lose FSA eligibility because they failed to make satisfactory progress. To appeal, students should schedule a meeting with the senior assistant dean of graduate advising (on-campus programs) or director of online learning (online programs).

Graduation
Students must check their DegreeWorks page at my.fordham.edu each semester to ensure they are making academic progress consistent with their projected date of graduation. It is the responsibility of all students to ensure that their DegreeWorks page accurately reflects their expected semester of graduation, and to notify their academic adviser of any adjustments to their indicated expected graduation date by submitting the Graduation Date Change Request Form available at fordhamsac.com. Students must also be alert to any deadlines for graduation date changes communicated in the Graduation Date Change Request Form and by their academic advisor.

Students can graduate in August, February, or May. The school holds only one diploma ceremony, in May. Our August and February graduates are encouraged to attend the May ceremony.

To be considered for graduation, a student must also apply for graduation according to the guidelines and deadlines communicated by the Academic Records office. Approval for graduation is given only when degree requirements, the minimum residency, and the time limit for the degree have been met.

For additional questions about graduation and the diploma ceremony, on-campus students may contact the academic advising office at gsbgraduate@fordham.edu (%20gsbgraduate@fordham.edu), and online students may contact the Assistant Director of Online Learning at gsgradonline@fordham.edu.

Grievance Procedure for Discrimination
Any enrolled student has the right to bring a grievance for alleged discriminatory treatment on the part of any Fordham administrative office, department, or procedure or by any student organization. The student alleging discriminatory treatment has the right to prompt investigation of the charges, resulting in redress of grievances where cause is found. Internal grievance channels provide for the investigation and adjudication of charges by members of the Fordham community.

Internal procedures are established for grievances in academic matters and in nonacademic matters. In either instance, in order to be valid, a grievance must be filed within 30 days of the action against which the grievance is directed. Grievances or questions may be directed to the associate dean of graduate studies.

Internship Policy
Graduate business students who obtain internships and wish to apply them toward their program may do so only after they have completed all of their prerequisite and core courses, except for students enrolled in the M.S.G.F. degree program (unless restricted by compliance regulations for international students).

Prior to completing an internship, students should meet with their advisor to determine if their degree program allows for internship credit, and if so, which program requirements it fulfills.

- M.B.A. students may receive internship course credit for a maximum of two internships. Regular per-credit tuition fees apply.
- M.S. students may receive internship course credit for a maximum of one internship if their degree program allows.
- M.S.G.F. degree program students may receive internship course credit for a maximum of two internships.

To complete a three-credit internship during the fall or spring term, students should:
1. Obtain an internship application form from the Office of Graduate Advising.
2. Complete the form.
3. Gain approval from the area chair and one full-time professor from the academic area most closely related to the internship.
4. Return the form to the front desk of the Office of Graduate Advising.

For summer internships, students must contact their advisor to be registered for the internship course from the appropriate area of study.

**Internships for International Students**

All international students wishing to complete an internship for credit must abide by the Curricular Practical Training (CPT) instructions provided by the Office for International Services (OIS). To apply for CPT, complete the Gabelli School CPT Form available on fordham sacrament, and your academic advisor will be in touch to confirm your application and submit it to OIS for processing.

You may not begin work before receiving authorization from OIS. Please expect and allow processing time of 1-2 business days for the Office of Graduate Advising to have your application prepared for OIS. Then expect and allow 7-10 business days for OIS to review and issue authorization; OIS will notify you when your new I-20 is processed and ready for pick-up or mailing. The start and end dates of your internship must be indicated in your employment offer letter, occur within the semester dates outlined in the academic calendar for the semester in which you will complete your internship, and allow the above stated time for processing. If your internship will take place over multiple academic semesters, you should prepare to resubmit your application in preparation for the consecutive semester for seamless continuation of your internship.

Should you have additional questions, please do not hesitate to reach out to your academic advisor. Please note that if your application is underway with OIS and you have waited the appropriate 7-10 business days of processing time after your academic advisor has sent your application to OIS to complete your request, you should direct your questions to ois@fordham.edu.

**Maintenance of Matriculation**

All students must register each term to be in continuous attendance at the graduate school. Students in good standing who are unable to register for classes in a specific term, regardless of the reason, must register to maintain matriculation status for that term. Students must notify their academic adviser of their intent to maintain matriculation prior to the last day of add/drop for a given semester. There is a fee of $40 for maintaining matriculation.

Students are permitted to maintain matriculation for a maximum of six terms, as long as all degree requirements are completed within six calendar years of matriculation (first term of entry). Any student who does not register either for regularly scheduled classes or for maintaining matriculation will be withdrawn from the program. An exception to this policy is made for joint-degree students when they are registered for classes at their other program (i.e., JD/M.B.A.).

**Maintaining Status for International Students**

International students must be enrolled in at least 9 credits per semester to be considered full-time students and maintain their visa status.

International students who wish to take fewer than 9 credits (full-time enrollment) in a given semester, may do so only during a recognized ‘vacation term,’ after completing at least 2 full-time semesters, or during their final semester if they have fewer than 9 credits remaining to complete to meet graduation requirements.

Following a ‘vacation term,’ international students must either be enrolled full-time or completing their final semester. Students are eligible for one ‘vacation term’ for every two semesters of full-time enrollment. Students will need to be registered for maintenance of matriculation during a ‘vacation term’ only if they are not enrolled in any classes (0 credits of enrollment). Students should consult with their academic adviser for additional guidance.

**Non-Medical/Personal Leave of Absence**

A Leave of Absence (non-medical) from Fordham temporarily pauses your enrollment as a student for non-medical reasons. You remain a Fordham student who is not enrolled for the semesters of leave; you must also be enrolled in maintaining matriculation for each semester of your leave of absence. For a non-medical leave of absence, returning to class requires advance notification to your academic adviser of your intentions to coordinate your semester of return. You would then discuss your course registration plans with your academic adviser.

You may request that a non-medical leave of absence begin only prior to or following an academic semester. A non-medical leave of absence may not begin during a semester.

If you are interested in pursuing one of these options, please contact your academic adviser to discuss your situation.

The University Withdrawal and Leave of Absence (Non-Medical) Application is available for download.

**Medical Leave of Absence**

Fordham University is concerned about its students’ health and well-being, and is interested in students receiving appropriate physical or mental health care when necessary. A student experiencing physical or psychological conditions that significantly impair his/her ability to function successfully or safely as a student may decide that a period of time away from Fordham University for treatment or recovery is warranted.

This time away from the University may help to restore functioning to a level that will enable the student to return and perform successfully in the classroom and within the campus community.

For more information regarding the Medical Leave of Absence process and policy, please refer to the University guidelines available on this linked page, and be sure to consult with your academic adviser.

**Notice Regarding the Clery Act**

Fordham University is committed to the safety and security of members of the Fordham community. As part of this commitment and in fulfillment of our obligations under the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, Fordham publishes an annual security and fire safety report. The report contains information about the incidence of fires and certain categories of crime on Fordham campuses as well as important information about Fordham University safety and security policies, tips for staying safe, and important telephone numbers. Hard copies of the report are available upon request by contacting the
Orientation

Congratulations on your acceptance to one of the Gabelli School graduate programs! We refer to orientation as Gabelli Launch. Gabelli Launch is a highly interactive and informative multi-day event designed to help you orient to the Gabelli School, Fordham University, and New York City. We want to provide you with all the tools you will need to be successful here.

For students starting in the fall, Gabelli Launch for incoming M.S. students is usually held during mid-August. Full-time M.B.A. students start their multi-week Gabelli Launch traditionally at the end of July. And Professional M.B.A. Gabelli Launch is typically held the weekend before classes start. For students starting in the spring, Gabelli Launch is held in January, prior to classes starting. Online master's programs will participate in a fully online Gabelli Launch.

Gabelli Launch is tailored towards the needs of each incoming class and is a mix of online and in-person information sessions, workshops, and events. The details for your Gabelli Launch experience will be made available to you via Blackboard. You will receive an email alerting you when Gabelli Launch is available on Blackboard.

All students matriculating at the Gabelli School are required to attend in-person Gabelli Launch and engage in all online Gabelli Launch activities and materials on Blackboard.

Registration and Payment Policy

Before attending any class, students must complete the required online registration during the time designated on the academic calendar for term registration. This includes a statement of the courses the student plans to attend, together with other information necessary for University records. No student registered in the graduate business school shall at the same time be registered in any other school or college, either at Fordham University or elsewhere, without the consent of the associate dean of graduate studies.

Students who meet the registration deadline will receive an invoice from the bursar's office requiring payment by a specified date. A late payment fee is assessed if full payment or a satisfactory payment arrangement is not made by the due date.

Tuition and fees must be paid on or before the due date. The University reserves the right to cancel registration, or bar further registration and not release any transcript or record, until all financial obligations are satisfied. Delinquency of outstanding balances, including those from deferred or other payment plans, are subject to collection by the University or its designated agent.

Students will be liable for any accounts. Checks should be made payable to Fordham University. There will be a $20 handling charge if a check is returned from the bank for insufficient funds or for any other reason. Should this occur, the University may require settlement of any subsequent obligations with cash or a certified check.

Reserved Rights

The University reserves the right, at its discretion, at any time, to deny matriculated status, to cancel a student's registration, to refuse to award academic credits, or to deny or rescind a certificate or a degree in accordance with the University Statutes and its academic policies. All forms of dishonesty, including cheating and plagiarism, will result in appropriate disciplinary action, including denial or revocation of a degree or certificate.

Standards of Academic Integrity

Fordham graduate business students are part of a community dedicated to the disciplined and rigorous pursuit of knowledge and communication of truth. Academic integrity is the pursuit of scholarly activity in an honest, truthful, and responsible manner.

Students are expected to uphold the highest standards of academic integrity. Any work that a student claims to be his or her own must be his or her own; students must give appropriate credit where credit is due; and students must be fair and honest in all interactions with other members of the Fordham University community. Violations of academic integrity include, but are not limited to, plagiarism, cheating on exams, falsification, unapproved collaboration, and destruction of library materials.

The graduate business school has established an Academic Honor Code outlining the school's standards of academic integrity, and every enrolled student is bound to abide by this code. An Academic Integrity Honor Court comprised of faculty and student members will review and adjudicate any alleged violations of the Honor Code. The Honor Court may impose sanctions if a violation has occurred, according to the seriousness of the offense.

Students should be familiar with Honor Code policies. Full copies of the Honor Code, review process, and disciplinary procedures are distributed to students at orientation and are available in the academic advising office, the assistant director for online learning's office, and on the school website.

Student Identification Cards

All members of the Fordham University community are required to have their University ID card in their possession while present at a University facility. ID cards must be surrendered upon request of clearly identified University personnel in the performance of their assigned duties. This includes campus security. The schedule for obtaining an ID card is posted prior to every registration period.

Students enrolled in online degree programs can access a digital ID card; a physical ID card can be requested from ID Services, and may be picked up directly at ID Services, or during the required on-campus residency.

Student Records and Policy

This academic bulletin is not intended to be a complete listing of Fordham University guidelines and policies. For a more specific explanation and discussion of this section, write to the University Registrar, Fordham University, Bronx, NY 10458.
Student Rights Under FERPA

Notification of Rights under FERPA
The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a written request for access. A student should submit to the Office of Academic Records—Fordham University Enrollment Group at the Rose Hill Campus, the Lincoln Center Campus, or the Law School Registrar, if applicable, a written request that identifies the record(s) he or she wishes to inspect. The Office of Academic Records—Enrollment Group will make arrangements for access and notify the student of the time and place where the records may be inspected.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading. A student may ask the University to amend the record if he or she believes it is inaccurate or misleading. The student should write the University Registrar, or the Law School Registrar, clearly identifying the part of the record he or she wants changed, and specifically why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. One of the exceptions which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as on a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

Upon the request of officials of another school in which a student seeks or intends to enroll, the University may disclose educational records without the student’s consent.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Fordham University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is

   Family Policy Compliance Office
   U.S. Department of Education
   400 Maryland Avenue, SW
   Washington, D.C. 20202-5920

Time Limit for Degree
The school expects that M.B.A. and M.S. degree requirements will be completed within six years of a student’s matriculation. This time period includes any leaves of absence. The school also expects that students will be current in the content of the M.B.A. and M.S. degree program at the time the degree is awarded. For this reason, in exceptional cases when students are permitted to exceed the six-year time period, additional coursework may be necessary, and previously completed coursework may not be considered.

Students who withdraw from the University or lapse in their studies beyond the six-year time period and wish to return to their studies must reapply for admission in keeping with the withdrawal policy outlined in the academic bulletin. Coursework completed during the student’s original program of study may not be transferred to their new program of study upon return.

Transcript of Record
An official transcript is one bearing the seal of the University and the signature of the University registrar.

Official academic transcripts may be issued to educational institutions, employers, scholarship/grant/fellowship organizations, application services, government agencies, etc., or to students (for personal use) provided the student discloses the intended final recipient. Current students may view their unofficial transcript online by using their credentials on my.fordham.edu. Official transcripts cannot be emailed or faxed to recipients.

Students and alumni who request an official transcript for personal use may not forward it to another party; doing so renders the transcript unofficial. Transcripts should always be issued to the intended final recipient.

The University offers secure electronic transcripts as well as mailed (paper) transcripts. Full details are available from the Office of Academic Records.

Students may request an unofficial transcript listing courses and credits and marked “Unofficial.” Students may also view their unofficial transcript via my.fordham.edu. The University accepts no responsibility for the accuracy of an unofficial transcript after it has been issued.

Transcripts may be requested from the Office of Academic Records following their outlined procedures. They should be requested well in advance of the date desired. No transcripts will be issued for students who have unpaid financial obligations to the University. A fee for immediate processing is charged for each transcript, payable at the time of request. The University reserves the right to change the fee at any time without notice.

The Office of Academic Records may use its discretion to limit the number of transcripts requested at any one time.

Fordham University will make every effort to promptly fill all requests for transcripts but will not assume responsibility for delays. All inquiries concerning issuance of transcripts must be made to the Office of Academic Records within three months of the original request.

Fordham University students who attended prior to 1990, or attended Marymount College prior to 2000, will only be able to receive hard copy transcripts.
Withdrawals and Refunds

Course Withdrawals

The University’s refund policies and procedures ensure equitable refunds to students who withdraw from all or a portion of their courses in a given term or when payment is in excess of the total charges. Application fees are not refundable. Registration, late payment, student activities, laboratory, maintenance of matriculation, technology, enrichment, residency, and/or other special fees are not refundable after classes begin.

Please refer to the Academic Calendar to determine the Gabelli School refund schedule for the current term. Students who wish to withdraw from individual courses following the add/drop period and within the withdrawal period indicated in the Academic Calendar should submit the Course Withdrawal/Late Registration Form on My.Fordham. Students are not permitted to withdraw from any courses after the last date for course withdrawals noted in the Academic Calendar.

A student who is withdrawing, either from all or a portion of their courses in the Gabelli School of Business, should also contact the Office of Enrollment Services and the Financial Aid Office to confirm no balances are due.

The refund calculation is based on the following circumstances:

1. First-time and continuing students not receiving Title IV (federal) assistance are subject to the Institutional Refund Policy.
2. For continuing students receiving Title IV assistance, refunds must be calculated using both the federal policy and the institutional policy. The calculation that gives the largest refund to the federal programs must be applied.
3. First-time students attending Fordham University, receiving Title IV assistance, and withdrawing during the first nine weeks of the term are subject to a Federal Pro Rata Refund Calculation as mandated by the Higher Education Amendments (HEA) of 1992.
4. Students who received aid as cash must repay those aid programs.

Note: For students who received Title IV assistance, refunds must be returned to the programs in the following order: Unsubsidized Stafford Loan; Subsidized Stafford Loan; Plus Loan; Perkins Loan; Pell; SEOG; other Title IV aid; other federal aid; Fordham grants and scholarships; TAP; and other student aid. The following refund policies are based on 100-percent tuition payment. The refund period begins the first day of the term. The refund is reduced by an administrative fee equal to the lesser of five percent of tuition charges or $100.

Refund Policy Appeal Process

A student may request an appeal by writing to the associate dean of graduate studies. The request should include all relevant information describing the special circumstances upon which the appeal is based.

Voluntary University Withdrawal

Students in good standing may voluntarily withdraw from the Gabelli School of Business and Fordham University by submitting the University Withdrawal Form and a letter stating the reason(s) for withdrawal to the senior assistant dean of graduate advising of the Gabelli School of Business. Once this documentation is received, the student will be withdrawn from the program. Students who have submitted notification of withdrawal but wish to return to the program, reenroll, or switch to another academic program at the Gabelli School of Business must wait a minimum of two semesters and then reapply for admission through the traditional admissions process. Readmission is not guaranteed.

A student who is withdrawing from their program in the Gabelli School of Business, should also contact the Office of Enrollment Services and the Financial Aid Office to confirm no balances are due.

Administrative University Withdrawal

Students who are not on an approved leave of absence, do not register for regularly scheduled classes, or do not register for maintaining matriculation status will be withdrawn from the Gabelli School of Business, and will need to reapply for admission through the traditional admissions process. Readmission is not guaranteed. An exception to this policy is made for joint-degree Fordham University students when they are registered for classes at their other program (i.e., JD/M.B.A.).

University-wide Services

Fordhamsac.com

The Gabelli School Office of Graduate Advising regularly updates and provides guidance on student resources, clubs, and University services available as summarized on this page. This page is intended to be a valuable resource for you to bookmark and use as your first point of reference when seeking out University and Gabelli School resources.

Office of Student Involvement (OSI)

The graduate business school works closely with the University’s Office of Student Involvement (OSI) to provide services such as a New York City resource center; an off-campus housing list; a shuttle service between Fordham campuses; discounted and complimentary tickets to Broadway and off-Broadway shows; and discount movie tickets. OSI also provides permission for business school offices and student organizations to post notices on floors other than the business floor.

OSI is located at 140 West 62nd Street, Room G33, and its telephone number is 212-636-6250.

Student Involvement Office Hours:
Monday to Thursday 10 a.m. to 7 p.m.
Friday 10 a.m. to 5 p.m.

Library

The Quinn Library, at 140 West 62nd Street, has extensive reference materials, books and most of the important periodicals in the areas of business economics, including *The Wall Street Journal* and *The New York Times* available electronically and on microfilm. The staff is available to assist students in their research, and the entire collection is accessible through an online catalog.

The Quinn Library supports in-depth business research through many online databases, including: *LexisNexis*, a source of full-text news, business, and legal information; *Disclosure Database*, providing comprehensive financial data on publicly traded U.S. and overseas companies; *Investext*, a source of company and industry research; and *Standard & Poor’s Netadvantage*, which offers a broad spectrum of company and investment information. These databases can also be accessed off-site.

Quinn Library Telephone Numbers
Circulation 212-636-6052
Reserve 212-636-6061

Updated: 07-27-2020
from abroad. Serving as a resource for international students and needed to obtain a U.S. entry visa to students and exchange visitors, the Office of International Services issues the certificate of eligibility.

The Office of International Services
Saturday 10 a.m. to 6 p.m.

Business students may also use the William D. Walsh Family Library on the Rose Hill Campus.

The Writing Center
The Lincoln Center Campus Writing Center is located in Quinn Library, Room 233. Individual tutoring is available to assist students with any type of course-related writing from conception to composition to completion. The center’s goal is not only to help students perfect an individual assignment, but also to help them to develop the tools needed to become better writers. Writing Center service is free, and day, evening, and online appointments are available by reservation. To schedule an appointment students must first create an account here.

Students may contact the Writing Center by calling 646-868-4009. Walk-ins are welcome whenever space is available. Hours are:

Mon 9:30 a.m. – 7:30 p.m.
Tues 9:30 a.m. – 7:30 p.m.
Wed 9:30 a.m. – 7:30 p.m.
Thurs 9:30 a.m. – 7:30 p.m.
Fri 9:30 a.m. – 2:30 p.m.

Computer Centers and Technology Support
The Gabelli School of Business has two dedicated computer centers at 140 West 62nd Street: the Gabelli Trading Room in room 150, and the Teaching and Learning Lab in room 323. Computer centers at the Lincoln Center campus include the Quinn Library and on the third floor of Lowenstein. Computer center facilities, resources, and tech support are available to all members of the Fordham community with a valid Fordham University ID card. Computer-system users must adhere to University technology use policies. Each center has desktop computers and printers available for student use. Wireless Internet is available in classrooms, offices, and study areas throughout the Lincoln Center campus. Conference and meetings rooms have video conferencing capabilities and smart technology.

The Gabelli computer centers serve students by providing hardware and software for educational projects, research, mock trading, and experimentation, and also offers assistance and tech support for word processing, spreadsheets, database, graphics, presentations, project management, modeling, and forecasting.

Computer Center Hours
Monday to Friday 8 a.m. to 8 p.m.
Saturday 10 a.m. to 6 p.m.

Office of International Services
The Office of International Students issues the certificate of eligibility needed to obtain a U.S. entry visa to students and exchange visitors from abroad. Serving as a resource for international students and scholars, the office facilitates adjustment to life in the United States through orientation and assistance with immigration matters, such as employment and travel authorization. Personal advice on banking, health insurance, and Social Security cards is available. In conjunction with the International Student Association, the office sponsors and provides access to programs to promote cross-cultural and international awareness.

Federal regulations and Fordham University policy require that individuals in F and J status (including F-2 and J-2 dependents) have health insurance. All students will be automatically enrolled in Fordham’s health insurance plan and charged for health insurance each semester when they register. Students may waive Fordham’s policy by bringing a copy of their policy (in English) or insurance card to the office upon arrival. The policy must reflect amounts in U.S. dollars and meet the following minimum requirements:

F Status
- Unlimited in coverage per accident or illness
- $50,000 in coverage for medical evacuation to the student’s home country
- $25,000 in coverage for repatriation of remains in the event of death

J Status
- $100,000 in coverage per accident or illness
- $50,000 in coverage for medical evacuation to the student’s home country
- $25,000 in coverage for repatriation of remains in the event of death

There will be a deductible not to exceed $500 per accident or illness. Students who are eligible to waive Fordham’s policy must submit a new waiver every September that they are enrolled at Fordham. For more information, please email OIS at ois@fordham.edu, or call 212-636-6270.

English as a Second Language Classes at Fordham
Fordham’s IALC, located on the Lincoln Center campus at 45 Columbus Avenue, 3rd Floor, offers English as a Second Language classes at six levels of English proficiency—from beginning to the university preparatory level. Placement tests are administered upon request throughout the year, and academic advisement for appropriate course selection is provided.

The IALC offers international students and New York’s international community an academically challenging American English curriculum. The full-time intensive program and part-time courses enable students to improve their English language skills in a limited amount of time. The core curriculum consists of traditional ESL classes in reading, writing, and grammar; speaking, listening, and vocabulary; and classes that combine all skills. Content-based courses covering topics such as business English are also available to students at advanced levels. At every level, correct grammar usage within the context of writing and speaking is emphasized. The average class size is 10, so students receive individual attention. Academic workshops focusing on grammar, American pronunciation, TOEFL preparation, and conversation are offered free to all registered IALC students. Students have opportunities to experience a variety of cultural activities, and to participate in a language exchange program with native-English speaking Fordham University students.
For more information or to schedule a placement test, call 212-636-6353 or email esl@fordham.edu.

**Graduate Student Housing**

Fordham University maintains studio and one-bedroom apartments for graduate students that are located a few short blocks away from the Lincoln Center campus. These apartments are close to major public transportation, supermarkets, and restaurants. Students living in these apartments also form a close community with other Fordham graduate students and gain valuable life experience. Further information can be found on the business school’s web site.

**Campus Ministry**

Campus Ministry serves the entire community at Lincoln Center: students, faculty, staff, and administration. It seeks to foster the intellectual, social, and spiritual development of the Lincoln Center community. Its outreach is ecumenical: persons of all faiths are welcome. Questions of faith often arise in the business of academic life, and Campus Ministry is available to help individuals find answers. The office offers spiritual direction, pastoral counseling, and a safe place to explore life’s questions. It provides opportunities for worship, retreats, and service and collaborates with student clubs and outside organizations to provide events that help heighten the community’s awareness of God’s presence. People of all faiths are invited and welcome to enjoy the chapel’s peace and solitude.

Campus Ministry is located at 113 West 60th Street, Room 217. The telephone number is 212-636-6267.

Campus Ministry

Monday to Friday 10 a.m. to 6 p.m.

**Office of Disability Services**

Fordham University treats students with disabilities in a nondiscriminatory manner, and will make reasonable accommodations and provide appropriate auxiliary aids and services to assist otherwise qualified individuals with disabilities in achieving access to its programs, services, and facilities in accordance with Section 504 of the Federal Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990.

Applicants who have been accepted for admission or current students who are seeking accommodation for a disability should complete the online form which can be found here. After submitting the form, students should call the Office of Disability Services at the phone number indicated at the bottom of the form to set up an intake appointment.

Disability Services locations: Lincoln Center Campus, Lowenstein Room 207, 212-636-6282, or Rose Hill Campus, O’Hare Hall, 718-817-0655.

**Counseling and Psychological Services**

Counseling and Psychological Services seeks to promote student development. Counseling Services is staffed by three psychologists, a consulting psychiatrist, and several doctoral students in clinical psychology. It provides individual counseling and psychotherapy in confidence and at no charge to help students who are experiencing personal problems. A referral list of private mental health practitioners and agencies is also available, as well as brochures and other literature on a range of topics.

By appointment, a student may take the Strong-Campbell Interest Inventory and the Myers-Briggs Type Indicator. These tests can help in making academic, occupational, or personal decisions. Each semester Counseling Services offers small-group workshops on study skills, stress management, test anxiety reduction, time management, and interpersonal skills. Programs and lectures are also sponsored throughout the academic year on mental health topics.

Counseling and Psychological Services is located in 140 West 62nd Street, Room G02, 212-636-6225.

Students enrolled in online programs can access Counseling and Psychological Services via Perspectives, which is available through the online portal. More information is available in the online program orientation.

Counseling and Psychological Services Hours

Monday to Thursday 9 a.m. to 7 p.m.

Friday 9 a.m. to 5 p.m.
GRADUATE SCHOOL OF ARTS AND SCIENCES

The Graduate School of Arts and Sciences of Fordham University fosters the cultivation of knowledge, wisdom, and a deeper understanding of the human condition. Guided by its Catholic and Jesuit traditions, we aspire to prepare students for teaching and leadership in a global society, by welcoming learners from diverse religious, economic, and cultural backgrounds into full participation in a scholarly endeavor.

As a Graduate School of Arts and Sciences:

We are committed to discovery through research and scholarship marked by theoretical sophistication, critical thinking, and compelling discourse.

We challenge students to fulfill their scholarly potential, and prepares students to advance knowledge by their research, transmit it by their teaching, and deploy it productively in their contributions to society.

We guarantee the freedom of inquiry required for rigorous thinking and the quest for truth.

We educate students within the context of liberal studies, in order to enlarge the scope of their inquiries, and to help them perceive the place and use of their work amid the network of all disciplines.

As a graduate school in a Catholic University:

We encourage inquiry into the relation of religious faith to the intellectual, scholarly, and professional lives of faculty and students. Such dialogue is not limited to those who are themselves members of a particular religious tradition.

We are committed to the humanism of the Catholic intellectual tradition. We emphasize the religious and philosophical traditions that have nurtured the humanities, sciences, and social sciences, in order to encourage exploration of the interactions between reason and faith across the disciplines.

We promote ethical reflection by its students and faculty, recognizing that knowledge becomes wisdom only when guided by moral principles.

As a graduate school in a Jesuit University:

We welcome students as valued members of the intellectual community through collegial and collaborative interactions. We practice cura personalis, emphasizing respect for each individual and affirming the dignity of each member of the community.

We are committed to rigorous intellectual inquiry that synthesizes the contributions of many disciplines. We seek to go beyond rigid specialization toward an integration of particular specializations into the realm of 'wisdom and learning' consistent with the complexities of the modern world.

We emphasize study not simply for its own sake, but also for service, striving to achieve a balance between study as an end in itself and as a means to other ends. We encourage attention, in all phases of study, work, and life, to the plight of the disadvantaged.

We draw upon on the world-wide community of Jesuit universities to offer distinctive opportunities for exchange and collaboration. We foster international understanding and respect for other cultures and different peoples.

As a graduate school in New York City:

New York City provides a gathering place for people and ideas from across the globe. The Graduate School of Arts and Sciences takes advantage of the resources of the city to develop and disseminate new ideas across the world.

We participate fully in the life of the city, fostering partnerships for scholarship and research with the institutions making their home in the city.

We provide faculty and students with opportunities to contribute their acquired/accumulated wisdom for the benefit of the city, its esteemed institutions, and its diverse populations.

### Biological Sciences

The graduate program in the department of biological sciences at Fordham offers courses and research opportunities leading to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in biological...
The goal of the program is to ensure a broad education in biology and specialized training for those pursuing careers in research or teaching. There are two areas of concentration: (1) Cell & Molecular biology and (2) Ecology & Systematics.

For more information about graduate-level Biological Sciences, please visit our page on the Fordham website.

Admissions
Masters and Ph.D.
Applicants must:

- hold a bachelor's degree in the biological sciences or related major
- have a minimum undergraduate GPA of 3.0 (out of 4.0)
- have an acceptable combined GRE score
- Include each of the following items

Resume
Up to two pages in length (submit via the online application).

Statement of Intent
The 'Statement of Intent' requires students to answer the following questions and also imposes a 300 word maximum for each question

- Why do you want to join Fordham's Graduate Biology Program?
- How will a Graduate degree in Biology help you in your career goals?
- Describe your research experiences to date.
- Describe your research interest.

Official Transcripts
Official degree transcripts confirming prior degree conferral should be ordered at least one month prior to the application deadline. Please ensure that they are sent directly to the Office of Admissions via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458.

Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.

Official GRE Scores
These should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259. GRE Subject score is recommended but not required.

Recommendations
Three letters of recommendation submitted directly by referees via the online application.

English Proficiency
International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results.

Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259.

Certificates
Applicants should have completed a B.A./B.S. in biological science or other natural/environmental science, or equivalent coursework. An undergraduate GPA of 3.0 or higher is required. GRE scores are not required. Applicants without the required background will be advised to take necessary prerequisite courses. Applications are accepted on a rolling basis, and students may begin their studies in any term, including summer.

Programs
- Biological Sciences (M.S.) (p. 709)
- Biological Sciences (Ph.D.) (p. 709)
- Conservation Biology (Adv Cert) (p. 710)

Courses

BISC 5510. Conservation Biology. (3 Credits)
Theory and practice of conservation biology. Topics will include maintenance of species diversity, design of reserves, captive management, genetic considerations, and factors affecting extinction rates.
Attributes: ABGS, CEED, CENS.

BISC 5511. Conservation Law and Policy. (3 Credits)
This course provides an introduction to the practice of both law and policy analysis, with a focus on issues associated with the conservation of biodiversity. Part I focuses on the law, and students will learn the basics of legal research, legal reasoning, and legal analysis. Part II focuses on policy analysis, and students will learn the basics of the policy process and basis policy analysis. This course will examine a wide range of laws, policies, regulations, treaties, and institutions designed to address local, national, and global conservation problems. Topics to be covered include protection of biodiversity, regulatory approaches to conservation, and international conservation law.
Attributes: CEED, CENS, HECS, URSG.

BISC 5512. Freshwater Algae Identification. (0 Credits)
This course will embark on a study of the largest, most diverse, and arguably the most important group of plants on earth: the algae. Algae form the base of aquatic food webs, and are both the cause of water quality issues and tool in ecological assessments used to protect inland waters.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.
BISC 6525. Biostatistics. (3 Credits)

BISC 6535. Ecological Methods. (2 Credits)
Methods and principles of ecological research, combining field and laboratory approaches, statistical and graphical data analysis, as well as modeling. Exercises emphasize techniques used to estimate the abundance and dispersion of organisms, describe habitat variables, estimate biomass, and production, characterize stoichiometric properties, and quantify energy fluxes. Assignments include research reports, data analysis and peer-review of research papers. All assignments emphasize benefits and limitations of specific techniques as well as interpretation of results in a theoretical context.

BISC 6734. Cell Biology of Eukaryotes. (4 Credits)
The focus will be on major principles of cell organization as related to cell function in multicellular organisms with emphasis on animal cells. Physiological and biomedical aspects of cell structure and function will be discussed. Experimental approaches employing diverse microscopic, biomedical, and biophysical techniques will also be examined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: BISC 7502.

BISC 6999. Research for M.S. in Biological Sciences. (1 to 6 Credits)
Faculty-mentored independent Ph.D. thesis research. Six credits required for M.S.

BISC 7501. Population and Community Biology. (4 Credits)
The course focuses on the evolution and ecology of populations, including both intra- and interspecific interactions. Particular emphasis is placed on evolution, species, speciation, gene flow, adaptation, behavior ecology, life histories, population growth, community structure, species diversity, niche theory, and competition, predation, parasitism, and mutualisms within and among species. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

BISC 7502. Eukaryotic Molecular Biology. (4 Credits)
The course will explore principles of gene structure and expression in eukaryotes. It starts with the review of structure of biopolymers (DNA, RNA, proteins) and techniques employed in Molecular Biology. Further topics will include genome organization (nucleosomes, chromatic, and chromosomes), genome maintenance (replication, mutability, and repair), genome expression (transcription and translation), and genome regulation (regulatory proteins and RNAs). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: DATA.

BISC 7503. Community and Ecosystem Ecology. (4 Credits)
Focus on biotic and abiotic interactions in ecosystems. Emphasis is placed on food webs, habitat selection, succession, spatial variation in species diversity, species diversity and ecosystem functions, patterns and processes associated with ecosystem function and energy flow. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: BISC 7501.

BISC 7529. Principles of Geographical Information Science. (4 Credits)
This course covers basic concepts and theories of Geographical Information Science (GISc), and provides actual hands-on experience with a Geographical Information Systems (GIS) software package for computer mapping and data analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: DATA.

BISC 7530. Principles of Geographical Information Science II. (4 Credits)
This course will explore in depth topics of GIS for the Natural Sciences and will give students the opportunity to design and conduct an independent GIS project. Through a series of discussions, demonstrations, hands-on exercises, and the development of a GIS project, students will learn more advanced spatial techniques and their applications to the Natural Sciences. The course is intended to provide the student with a solid grounding in GISc research design and methodology by designing and conducting an independent GIS project. Class session will be conducted as seminars, with discussion regarding the use of GISc in current research, and weekly group feedback on project design and implementation issues. Projects are to be substantive and original research efforts conforming to generally acceptable professional geographical practices and techniques. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

BISC 7801. Methods in Cell and Molecular Biology. (1 Credit)
Study of methodologies employed in the field of cell molecular biology.

BISC 7804. Techniques in Molecular Biology. (4 Credits)
The study and practice of methodologies employed in the analysis of proteins, RNA and DNA. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: BISC 7801.

BISC 7999. Research for Ph.D. in Biological Sciences. (1 to 6 Credits)
Faculty-mentored independent Ph.D. dissertation research. Thirty credits required for Ph.D.

BISC 8051. Project and Internship. (3 Credits)
With supervision and approval of a participating ecology faculty member, a student will develop an independent project or work in some form of on-the-job internship in conjunction with a collaborating conservation agency, such as, The American Museum of Natural History, Wildlife Conservation Society, New York Botanical Garden, NYS Department of Environmental Conservation, Natural Resource Council, Bronx River Alliance, Riverkeeper, US Environmental Protection Agency, or NYC Department of Environmental Protection.

BISC 8530. Seminar: Ecology/Evolution I. (1 Credit)
Discussion of current topics in ecology and evolution.

BISC 8710. Seminar in Genetics. (3 Credits)
Lectures and discussion of current genetics research and research design.

BISC 8750. Seminar in Cell Biology. (3 Credits)
Lectures and discussion of current cell biology research and research design.

BISC 8801. Biological Colloquium I. (0 Credits)

BISC 8999. Independent Study. (1 to 5 Credits)
Faculty-mentored independent research tutorial.
BISC 9999. Dissertation Direction. (1 Credit)
Direction of PhD dissertation research after 30 credits of BISC 7999 have been completed.

Please note:
- For M.S. students, only one grade of "C" may count towards the Core requirements.
- BISC 7501 Population & Community Biology is the prerequisite for BISC 7503 Community and Ecosystem Ecology.
- BISC 7502 Eukaryotic Molecular Biology is the prerequisite for BISC 6734 Cell Biology of Eukaryotes.

Degree Requirements

1. A minimum of 34 (Ecology & Systematics concentration) and 35 (Cell & Molecular concentration) course credits including at least 2 credits of research tutorial. For the M.S. degree with thesis, credits must include a minimum of 6 M.S. research credits, submission of a thesis document approved by the thesis committee, and an oral defense of the thesis is also required. All research tutorial credits and M.S. tutorial credits earned during years 1 and 2 count as course credits. It is not unusual for students to take more than 35 credits to complete their degree.

2. Reading knowledge of a foreign language (a computer language or statistics may be substituted for a foreign language).

3. Acceptable performance on the M.S. comprehensive examination (BISC 0936), which is achieved by a score of 70% or higher (grade of Pass).

4. Maintenance of a 3.0 GPA.

Biological Sciences (Ph.D.)
Requirements

The curriculum requires 64 credits for students who choose to concentrate in Ecology & Systematics and 65 credits for those who choose Cell & Molecular biology. Both concentrations include two core courses in ecology and two core courses in cell and molecular biology, usually taken in the first year, so students will get exposure to both subject areas.

Requirements include core courses, breadth (non-core) courses, concentration courses, and a language requirement, which can be fulfilled with a biostatistics course. Two comprehensive examinations (one of which is completed through the dissertation proposal defense) and a dissertation are also required.

</tbody>
</table>

Any course with the subject code BISC (p. 61), numbered 5000-8998 (not otherwise applied to other requirements) may fulfill this requirement.

Please note:
- For students in the Ecology & Systematics concentration, BISC 7501 Population & Community Biology and BISC 7503 Community and Ecosystem Ecology are considered concentration-specific core course subject to testing in the comprehensive exam. For students in the Cell & Molecular concentration, these courses are considered breadth core courses, and are not subject to testing in the comprehensive exam.
- For students in the Cell & Molecular concentration, BISC 7502 Eukaryotic Molecular Biology and BISC 6734 Cell Biology of Eukaryotes are considered concentration-specific core course subject to testing in the comprehensive exam. For students in the Ecology & Systematics concentration, these courses are considered breadth core courses, and are not subject to testing in the comprehensive exam.

1. Ph.D. students may count at most one grade of 'C' towards the Core requirements, provided the Core courses is not in their area of concentration, as follows:
   - For Cell & Molecular Biology concentration students, BISC 7502 Eukaryotic Molecular Biology and BISC 6734 Cell Biology of Eukaryotes are designated as concentration courses (thus, a grade of B- or higher is required in these courses).
   - For Ecology & Systematics concentration students, BISC 7501 Population & Community Biology and BISC 7503 Community and Ecosystem Ecology are designated as concentration courses (thus, a grade of B- or higher is required in these courses).

2. A grade of B is required in BISC 6525 Biostatistics for the course to fulfill the GSAS Language Requirement.

3. See 'Electives/Research Tutorials' for the courses that may fulfill this requirement.

4. Any course with the subject code BISC, numbered 5000-8998, except BISC 6999 Research for M.S. in Biological Sciences (that not counted towards other requirements), may count as an elective. Students with an earned Fordham M.S. in Biological Sciences with a successfully defended thesis may apply BISC 6999 towards this requirement.

5. Please note:
   - For students in the Ecology & Systematics concentration, BISC 7501 Population & Community Biology and BISC 7503 Community and Ecosystem Ecology are considered concentration-specific core course subject to testing in the comprehensive exam. For students in the Cell & Molecular concentration, these courses are considered breadth courses, and are not subject to testing in the comprehensive exam.
   - For students in the Cell & Molecular concentration, BISC 7502 Eukaryotic Molecular Biology and BISC 6734 Cell Biology of Eukaryotes are considered concentration-specific core subject to testing in the comprehensive exam. For students in the Ecology & Systematics concentration, these courses are considered breadth courses, and are not subject to testing in the comprehensive exam.

### Degree Requirements

1. A minimum of 64 (Ecology & Systematics concentration) and 65 (Cell & Molecular concentration) course credits including at least 2 credits of research tutorial. All research tutorial credits earned during years 1 and 2 count as course credits.

2. Reading knowledge of a foreign language (a computer language or statistics may be substituted for a foreign language).

3. Acceptable performance on the M.S. comprehensive examination (BISC 0936), which is achieved by a score of 85% or higher (grade of High Pass).

4. Maintenance of a 3.5 GPA.

### Conservation Biology (Adv Cert) Requirements

The advanced certificate in conservation biology can be completed in 8 to 11 months and is awarded after completion of 15 graduate credits, including two core courses, two elective courses from an approved list, and an individually designed practicum, which may consist of a supervised independent research project or a sponsored internship with a governmental or nonprofit organization.

Total Credits: 15

For those students concurrently completing a M.S. or Ph.D. in biological sciences, the following courses cannot be counted as elective courses toward the certificate:

- BISC 7501 Population & Community Biology
- BISC 7502 Eukaryotic Molecular Biology
- BISC 7503 Community and Ecosystem Ecology
- BISC 6535 Ecological Methods
Center for Ethics

In this era of increased need for ethical discourse in academic, professional, and public spheres, the Center activities draw upon theological, philosophical, scientific and other areas of inquiry to foster interdisciplinary dialogue and scholarship on moral values and ethical issues of contemporary social import. The Center embodies the University’s commitment to intellectual excellence by offering educational and research opportunities and public programming enriched through moral values, religious concerns, scientific and scholarly study, and active engagement in creating a caring and just world.

Founded as an interdisciplinary, cross-university unit, the Center sponsors national conferences, professional workshops, and ethics seminars that create synergy among scholars, scientists, religious leaders, community advocates, industry leaders and policy makers for exploring rigorously and respectfully grounds of individual and collective moral thought and action. Through its funded research programs (including the Fordham HIV and Drug Abuse Prevention Research Ethics Training Institute) the Center provides opportunities for faculty and students to engage in empirical and theoretical study of ethical issues in health care, science, and public policy. The Center’s academic programs (including the Master’s Program in Ethics and Society, Graduate Certificate in Health Care Ethics, and the Undergraduate Minor in Bioethics) affirms the complementary roles of faith and reason drawing upon courses in theology, philosophy, social and physical science, law, economics, political science, business and other fields to provide multidisciplinary education to advance the common good.

Admissions

Requirements

To apply for the Center of Ethics graduate programs include:

- Bachelor’s degree from an accredited college or university
- Undergraduate GPA of 3.0 or higher
- Coursework, experience, or training in at least one of the core areas of ethics scholarship (philosophy, theology, or the social or natural sciences)

Application Documents and Materials

- A statement of intent detailing both your academic aims and interests at Fordham (1-2 pages)
- GRE General Test scores* and, for all nonnative speakers of English, TOEFL scores
- Three letters of recommendation
- Resume or CV
- Application Fee (currently $70)
- Official degree transcripts confirming prior degree conferral are required for all applicants, regardless of matriculation status. These should be ordered at least one month prior to the application deadline for your program of interest, and should be sent directly to the Office of Admissions via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458. Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.

*The GRE requirement may be waived for some applicants, including those who have been out of school for more than 6 years and/or are working in a job related to their chosen field of study or department.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.

Programs

- Ethics and Society (M.A.) (p. 713)
- Health Care Ethics (Adv Cert) (p. 714)

Courses

CEED 5050. Ethics and Society: Cross Disciplinary Perspectives. (3 Credits)
This introductory course will present methods of ethical inquiry from different disciplines and will demonstrate how these disciplines interactively and independently apply these methods to issues of contemporary social import. Relevant moral and ethical frameworks will be introduced, along with background on issues of current social importance. The intent of this course is to provide students with an introduction to the knowledge and critical thinking skills that will enable them to identify and understanding the ethical decisions that affect the welfare of individuals and society and the integrity of their professions.
Attributes: HECH, HECS,HUHR, PMMA.

CEED 5100. Healthcare Ethics. (3 Credits)
The aim of this course is explore issues in healthcare from the point of view of ethical theory. Some of the issues to be examined are the role of the medical practitioner within the context of healthcare currently, medical experimentation, informed consent, ethical questions surrounding life and death, and justice in the healthcare system.
Attribute: HECS.

CEED 5200. Philosophy of Medicine: Practioners, Conscience, and Moral Responsibility. (2 Credits)
The aim of this course is to examine the role of the medical practitioner within the context of current medicine. First, we will consider the history of the medical profession and the role of bioethics in medicine. Next, we will consider the ethical practice of medicine and the role of conscience. Finally, we will take up questions of moral responsibility in medicine, focusing on two challenging practical situations.

CEED 5250. Bioethics Analysis of Clinical Case Studies. (3 Credits)
This course will focus on the fundamental principles of bioethics analysis and on the application of these principles to clinical case scenarios. Through this analysis, recommendations of the best course of treatment and action can be determined and justified in even the most difficult of clinical case scenarios. You will learn how to recognize a true ethical dilemma and how to resolve it. This will be an interactive course that will involve case discussions and debate as a mock ethics committee. Students will gain insight into the process and application of ethical principles and theories in the resolution of these critical ethical dilemmas.
Attributes: BIOE, CEMP, HECS.
CEED 5367. Ethical Din. of Financial Risk. (3 Credits)
This course will provide a critical, historically-informed introduction to ethical theories and their relevance for financial risk management. The course will introduce students to the theoretical foundations and practical implications of ethics-related concepts in so far as they are relevant to financial risk management; for example the notion of fiduciaries and fiduciary relationships.

CEED 5600. Special Topics in Ethics and Society. (3 Credits)
This course will provide students with interdisciplinary perspectives on contemporary issues in ethics and society across the humanities and the social and natural sciences. Class readings and discussions will provide students with the tools to apply ethical principles, theories, and decision-making to issues of social import across diverse contexts and populations.
Attributes: CEED, CETH.

CEED 5800. Moral Foundations of Capitalism. (3 Credits)
This course will provide an interdisciplinary examination of alternative-and largely incompatible-twentieth-century defenses of the morality of capitalism, with a concentration on economic, Objectivist, and Christian arguments, considered historically, economically, politically, and philosophically. Readings from Adam Smith, Karl Marx, authors for and against slavery, John Maynard Keynes, Theodore Roosevelt, Herbert Hoover, Austrian School economists, Milton Friedman, Dinesh D’Souza., and George Gilder. The course will include a reading of Ayn Rand’s Atlas Shrugged and conclude with an application of studies theories to a few recent public policy issues.

CEED 5900. Ethics and Society Field Practicum. (3 Credits)
The goal of practicum is to provide an opportunity for advanced students in Fordham’s Master’s in Ethics and Society to spend one day per week during a semester for ‘shadowing’ professionals who are engaged in services that require ethical decision-making. Students selected for the practicum will first be required to complete relevant ethics and society coursework and/or possess relevant experience. Throughout the semester, students will meet with the director of the master’s program on a bi-weekly basis to discuss their experiences. Enrollment is by special permission only.
Attribute: CETH.
Prerequisite: CEED 5050.

CEED 6000. Health Care Ethics Capstone. (3 Credits)
This course will examine students to ethical issues and solutions encountered in social science, public health, and medical research on HIV and drug abuse involving vulnerable populations in the United States and developing countries. Lectures are taught by an interdisciplinary faculty. Topics informed consent, confidentiality and disclosure, assessing population sensitive risks and benefits when using qualitative, survey, epidemiological in-person and online methodologies.
Attributes: CENS, PSYC.

CEED 6100. Theories and Applications in Contemporary Ethics. (3 Credits)
This intensive, three-day, graduate-level course is designed to provide cross-disciplinary perspectives on moral theory and applied ethics. Using a team-teaching approach, this course brings together faculty from at least six different disciplines to provide foundational knowledge about moral theory with contemporary applications. In addition to seminars on foundations in moral philosophy, moral theology, and moral psychology, the course features lectures and case discussions on issues of current social importance. Previously, students have focused on the following topics: decisions at the end of life, economic social justice, and responsibility in conducting research with vulnerable populations. Course requirements include a mastery of the reading materials, active participation, and topic-oriented thought papers during the three-day workshop. In addition, successful completion of the course requires a post-workshop paper summarizing the integration of course material into the students’ graduate work.
Attribute: PMMA.

CEED 6290. Health Disparities and Social Inequalities. (3 Credits)
This course focuses on the psychosocial correlates and consequences of health disparities involving individuals and groups that have been historically marginalized by society and in some cases by the health sciences and professions. Readings and class discussions will examine the relationship of contextual factors such as poverty, racial/ethnic discrimination, environmental hazards, incarceration, institutionalization and public policy to social and health inequities faced by children and adults with HIV/AIDS, mental illness, intellectual disabilities, and substance abuse disorders. The role of psychology in the emerging health and human rights paradigm in the United States and globally will also be explored.
Attributes: CENS, HECS.

This course will examine the theoretical foundations and practical implications of natural law theory. Because ‘natural law theory’ is often taken to mean many different things, one of the course’s first aims will be to establish a common vocabulary for identifying and distinguishing the various kinds of natural law theory (e.g. ‘natural law theory’ as a kind of moral theory, as a kind of legal theory, and as kind of theory about human rights). Our ensuing discussion will open onto a series of questions that will guide us through the rest of the course: ‘What is the nature of justice?’ ‘What are the different kinds of justice and what does it mean to have a right?’ ‘What do rights and justice have to do with one another?’ ‘What is the nature of law?’ ‘What is the difference between positive law and natural law?’ ‘Is law reducible to the will of the strongest, or is it the case-as the natural law traditions holdsthat unjust law is no law at all?’ ‘What is meant by ‘the good’ and ‘the common good?’ ‘What is the nature, scope, and justification of authority (both legal authority and other kinds of authority)?’ ‘What is the nature and purpose of punishment?’ ‘And how are we to make sense of the natural law tradition in light of our contemporary understandings of autonomy, governmental neutrality, and reasonable pluralism?’ The course will not only introduce the classical natural law tradition (based mainly on the thought of Aristotle and Aquinas), but will place this classical tradition in dialogue with contemporary thinkers. The ultimate aim of the course will be to achieve an understanding of the natural law tradition and its relevance for a variety of contemporary legal issues. No prior acquaintance with philosophy or jurisprudence is assumed, the relevant concepts will be developed in class.
Attributes: CEMP, HUHR.
Courses in this group have the CEMT attribute.

Moral Theology
Courses in this group have the CEMP attribute.

Additional Electives

Any course listed as a requirement fulfilling course above, as well as the list under electives, can be taken as an elective. Other elective courses may be taken in Biological Sciences, Communication and Media Studies, Economics, Latino and Latin American Studies, Law, Philosophy, Political Science, Psychology, Sociology, Social Work, and Theology.

Students may also complete CEED 5900 Ethics and Society Field Practicum as an elective.

Individualized tutorials (which count as a course) may also be arranged in areas of interest for which there may not be a specific course. Examples of individualized tutorials include 'Business Ethics', 'Religion, Gender and Sexuality' and 'Moral Instincts and Moral Behaviors.'

Health Care Ethics (Adv Cert)

The Advanced Certificate program's curriculum consists of four courses: three discipline-based courses and one capstone course. At least one of the discipline-based courses must be from a humanities discipline, and at least one must be from a social sciences discipline; the third discipline-based course may be from either a humanities or a social sciences discipline.

The fourth required course is an interdisciplinary and team-taught capstone course which results in a final mentored paper on a topic related to the student's interest. The capstone course is taught in conjunction the Center for Ethics Education Annual Symposium and Spring Lecture Series. Some previous capstone paper topics include:

- 'Somatic Cell Nuclear Transfer (SCNT): A Scientific, Philosophical, Theological, and Practical Approach'
- 'Customizing Conception: The Ethics of Pre-implantation Genetic Diagnosis'
- 'Is That Allowed?: Stem Cells and Double Effect Reasoning'
- 'Social Justice in the Provision of Health Care to the Uninsured'
- 'Evaluating the Claim of a Right to Health Care in the American Political Tradition'
- 'Ethical Implications Related to Hope and the Therapeutic Misconception in Clinical Trials'

The Center also hosts national and international leading scholars in the area of Health Care Ethics who deliver university-wide lectures and meet with faculty and students in the Center's academic programs.

The program is administered under the auspices of the Center for Ethics Education, and may be completed within a year or at your own pace. The Center was created in 1999 to promote high-quality teaching, research, and service through the intellectual appreciation of moral values and critical thinking regarding ethical practices.

Classical Languages and Civilizations

The Ph.D. in Classics and the Master of Arts in Classics programs have been placed on hiatus and will not be accepting applications at this time.

The Graduate Program in Classics at Fordham University offers a broad range of courses in the languages, literatures, and history of Greece and Rome, and in the literature of the medieval period. Fordham University is also a member of a Graduate Classics Consortium with the City University of New York (CUNY) and New York University (NYU), in which each institution offers a number of graduate courses each semester. This arrangement enables graduate students to choose from a wider variety of course offerings each semester, use the libraries of the other universities, and consult with their faculty.

For more information about the graduate programs in the Classical Languages and Literature department, please visit our page on the Fordham website. More information is also available in our Student Handbook.

Admissions

The Ph.D. in Classics and the Master of Arts in Classics programs have been placed on hiatus and will not be accepting applications at this time.

All students, including those aspiring to the Ph.D., are initially admitted to M.A. candidacy. Students become Ph.D. candidates upon completing the M.A. coursework and receiving the approval of the Department to continue their studies. Students may choose or be advised to terminate their degree with an M.A. degree. College-level proficiency in Greek and Latin is expected for admission to the M.A. and Ph.D. programs. Students applying for the Ph.D. in medieval Latin need not have college-level proficiency in ancient Greek.

Applications seeking an M.A. and/or Ph.D. in classics must submit the following:

Resume

Up to two pages in length (submitted electronically via the online application)

Official Transcripts

Official degree transcripts confirming prior degree conferral should be ordered at least one month prior to the application deadline. Please ensure that they are sent directly to the Office of Admissions via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458. Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.

Official GRE Scores

should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code #2259)

Statement of intent

Up to 500 words, submitted electronically, via the online application. Describe your interest in the program, what you hope to gain personally and professionally from the program, and your commitment to the field. Please highlight relevant professional, personal, and academic experience (submit via the online application).

Writing Sample

5 - 20 pages in length, submitted electronically, via the online application

Three letters of recommendation

submitted directly by referees via the online application

English Proficiency

International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student's International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results.

Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.

Courses

CLAS 6400. Matter and Gender in Classical Antiquity. (3 Credits)
In the face of the rising popularity of 'new materialisms,' this class examines the emergence of the notion of 'matter' in classical antiquity. We will undertake close readings of key ancient primary texts, including various Presocratics; Plato's Timaeus; Aristotle's Physics, Metaphysics, and Generation of Animals; and Lucretius' De Rerum Natura, tracing the discourses of materiality that arise in concert with tropes of sex and gender. The guiding question here is: What can matter's genealogical ties to the feminine tell us about the materialization of bodies and genders? At the same time, we will attend to the topographies and texture of ancient thinking about nature and materiality more broadly. Alongside a narrative of 'emergence' we will also consider hermeneutic questions: What are the ethico-political stakes of 'retrieval' of antiquity and how can we determine our relationship to these distant texts? And how does a consideration of ancient modes of thought help to enrich contemporary discourses of matter and gender? To help orient our study we will draw on contemporary thinkers including Irigaray, Kristeva, Loraux, Sallis, Caverero, as well as critically engaging Bachofen's 19th century conception of Mutterrecht. Some background knowledge of psychoanalytic theory is advised, as is knowledge of Greek, however all readings will be in translation.

CLAS 6466. Late Latin Poetry. (3 Credits)
A survey of late-antique Latin poetry, in particular Claudian, Ausonius, Rutilius, and the Centones.

CLAS 6535. Introduction to Digital Literary Studies. (3 Credits)
This graduate seminar introduces students to the digital tools, resources, and methods used in producing publishable data-driven scholarship in classical philology and literary criticism. The course provides a forum for students to develop hands-on skills in computer programming for literary studies (using Python), focused primarily on string manipulation, text mining and analysis, and data visualization, and with a strong emphasis on research design, reproducibility and replicability, and changing modes of scholarly communication in the Humanities. The course culminates in a series of Digital Classics 'case studies,' through which students will be invited to use the skills acquired in the course to reproduce landmark data-driven studies in Classics by N. A. Greenberg, D. Packard, D. Clayman, and the Tesserae Project, among others. The course is open to students with no prior programming experience. While the case studies will be drawn largely from scholarship in Classics, the training acquired in the class will be useful to any GSAS student at Fordham working with digitized corpora and textual data. Moreover, students will have the opportunity to work on material in Latin, Ancient Greek, English, and/or, with the permission of the instructor, another language of their own choosing.

CLAS 7000. Latin Survey at NYU. (3 Credits)
A survey of Latin literature offered by NYU.

CLAS 7440. The City of Rome: The Archaeology, History, and Topography of an Imperial City. (3 Credits)
Topics in Roman Art and Archaeology: The City of Rome: The Archaeology, History, and Topography of an Imperial City (at CUNY)

CLAS 7556. Island Archaeology. (3 Credits)
This graduate seminar focuses on the practice of classical archaeology on Mediterranean island sites.

CLAS 7580. The Trajanic Moment. (3 Credits)
This course explores the reign of the Roman emperor Trajan from a variety of different perspectives.

CLAS 7800. Greek Orators. (3 Credits)
In this course, students will read one or more examples of oratorical works from Classical Athens in the original Greek. We will also read extensively from other ancient sources in translation and from a broad range of modern scholarship on Athenian oratory to examine the different types and purposes of oratory in Athens, as well as the social, historical, legal, and cultural milieus in which such speeches were transmitted.

CLAS 7999. Proseminar: Classics as a Profession, Methods and Ethics. (3 Credits)
This weekly seminar invites participants to think deeply and critically about the breadth of the field of classics and how both personal and shared ethics intersect with our methods and approaches. A sample of possible weekly topics includes: (1) What is Classics? What’s wrong with "Western Civ"?; (2) Our Disciplinary Histories; (3) Race, Ethnicity, and Reception Studies; (4) Gender, Politics, and Classics; (5) Sexualities, Then and Now; (6) Disability Studies, Trauma Awareness, and Accessibility; (7) Intersections Between Religions and Classics; (8) Material Culture and Cultural Heritage; (9) Papyrology and its Ethical Questions; (10) Numismatics and its Ethical Questions; (11) The Evolving Field of Language Teaching and Language Textbooks; (12) Demystifying Peer-Review and Role of Public Scholarship in the 21st Century; (13) Researching in Community Grants, Large Projects, and the Ethics of Professional Collaboration and Interactions. Throughout the course, we will return repeatedly to the question of how to cultivate healthy mentee/mentor relationships and peer-to-peer support systems. Alternate weekly topics may be developed in collaboration with enrolled students. The seminar will have a limited number of guest participants, but will emphasize discussion of pre-circulated readings, over lecture-style presentations. Students will have wide latitude in developing a final project appropriate to their individual career goals. This might be a traditional term paper, or could include such projects as developing future class curriculum, preparing a grant proposal or fellowship application, creating sample job market materials, writing abstracts for submission to various conferences, or preparing a previous term paper for submission to a journal for peer-review.

CLAS 8800. Greek Epigraphy. (3 Credits)
An introduction to the principles and practices of Greek epigraphy. Students will learn the basic tools and techniques of the epigrapher, including reading and transcribing inscriptions as well as, editing epigraphic texts, to gain the skills needed to interpret the epigraphic record and its publications. In addition, students will be introduced to the vast diversity of the epigraphic record and the difficulties faced in interpreting such evidence. They will have the opportunity study particular inscriptions which have created or solved problems of historical or archaeological interpretation, thereby impacting our understanding the ancient Greek world.

CLAS 8802. Ephephrasis. (3 Credits)
At NYU.

CLAS 8803. Education in Greece and Rome. (3 Credits)
At NYU.

CLAS 8804. Greece and the Med in the Archaic and Classical Periods: Materials Methods and Debates. (3 Credits)
At NYU.

CLAS 8806. Homer's Iliad at CUNY. (3 Credits)
Classic Consortium.

CLAS 8807. Homer's Odyssey. (3 Credits)
This course offers an in-depth study of the Odyssey.

Updated: 07-27-2020
CLAS 8885. Archaeology of Maritime World. (3 Credits)
Survey of the archaeologies of the Maritime World.

CLAS 8886. Antiquity at Risk: Conflict Archaeology. (3 Credits)
This course explores the risk of studying classical antiquity in dangerous places. It emphasizes conflict archaeology, conservation, international law and cultural heritage.

CLAS 8887. Ancient Science. (3 Credits)
A survey of ancient science in ancient Greece and Rome.

CLAS 8998. Classics Internship. (1 to 3 Credits)
This course offers Classics graduate students (MA/PhD) the chance to work in an area of the discipline of Classics outside the conventional curriculum of the MA/PhD tracks. The number of credits (1-3) will be determined and approved in advance by the Chair of Classics.

CLAS 8999. Tutorial. (0 to 4 Credits)

CLAS 9999. Dissertation Direction. (1 Credit)

Communication and Media Studies

Our one-year program combines academic inquiry and hands-on experience. You'll engage with media theory while building your own portfolio and learning from some of the top public broadcasting professionals in the country, including program partners and pioneers in public radio and television, WFUV and WNET.

Choose between two concentrations:

- Multiplatform Journalism (p. 725): including audio, video, and interactive web content production and distribution
- Strategic Communication (p. 725): for nonprofits, the public sector, or social enterprises, including social media marketing, public relations, fundraising, and advocacy

This program is designed as a one-year program for full-time students, but evening courses allow for daytime employment, fieldwork, or internships. The curriculum requires (p. 725) four core courses (two of which are 1.5-credit intensives), two specialized concentration courses, two fundamentals courses, two elective courses or internships, and a master's project, for a total of 30 credits. Courses in both concentrations are available at both the Bronx and Manhattan campuses.

For more information about communication and media studies, visit our page on the Fordham website.

Updated: 07-27-2020
Admissions
Consult the M.A. in public media (p. 724) page for program admissions requirements.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.

Programs
• Public Media (M.A.) (p. 724)
  • Multiplatform Journalism Concentration (p. 725)
  • Strategic Communications Concentration (p. 725)

Courses
Graduate coursework in communications is offered through the M.A. in public media (p. 724) program.

Our Courses
PMMA 5001. Public Interest Media Theory and Practice. (3 Credits)
Serving as a core introductory course for the Public Media MA program, this class examines central topics in the study and practice of media in the public interest. Students consider what is the role of media and communication in promoting (or constraining) positive social change, and what unique roles do journalists and strategic communication professionals play throughout this process? What do we mean, exactly, by concepts such as public media, the public interest, social justice, and civic engagement? How do historical and contemporary power dynamics, information technologies, and economic structures shape the types of stories that dominate the public sphere, and how do resistant voices find ways to disrupt those narratives over time? Course readings and multimedia materials are drawn from a wide variety of academic disciplines and professional sectors, while course assignments ask students to grapple with real-world topics, aiming to not only analyze social problems but also identify potential solutions.

PMMA 5002. Public Journalism. (3 Credits)
This course will teach students how to operate effectively as a multimedia reporter for public or nonprofit media in a converged world. It also covers the basic tenets, conventions, and traditions of journalism in the public interest. This will largely be a hand-on journalism course. The course will mostly cover print, audio, and video. It will also cover data journalism, watchdog journalism, augmented journalism, social media, ethics, law, diversity, and other issues essential to the profession today. This course is open to senior undergraduates majoring or concentrating in journalism with the instructor’s permission.

PMMA 5003. Strategic Communication. (3 Credits)
Scholars and practitioners alike have devoted decades to the study of how organizations communicate to achieve their goals. They have analyzed advertising and public relations since the inception of these professions; they have also sought to investigate the protests of activists and the tactics of NGOs. This class will follow this intellectual tradition, weaving together insights from sociology, psychology, business, media studies, and a number of other disciplines to explore strategic communication in the contemporary world. To help direct this course, in keeping with the mission of the Public Media MA program, the focus will be on how strategic communication can be used to advance social justice and the public interest. This entails not simply studying the campaigns of organizations doing good but also confronting tough questions about how these well-intentioned groups can communicate in ways that are ethical, effective, and equitable.

PMMA 5011. Multimedia Tools. (1.5 Credits)
In this weeklong intensive course, students learn the basics of photography, audio recording/editing, and video recording/editing. By the end of this course, students will be comfortable creating and editing their own media and using the equipment necessary to do so. Best practices for the use of cameras, recorders, and video equipment will also be covered. Students will create their own multimedia project and present it at the conclusion of the intensive.

PMMA 5012. Fundamentals of Web Design. (1.5 Credits)
This is a hands-on course in designing and developing in digital spaces. By the end of this course, students will receive beginner knowledge in areas of digital design thinking, web development, UX/UI design, data analysis, and prototyping. Students will also acquire experience using the web content management system called Wix for the purposes of creating an online portfolio and/or interactive webpages. The “final project” of the intensive is (1) media/journalism or media/advocacy strategic plan backed by data that addresses a social issue and (2) a supplementary digital or physical prototype of the idea (i.e., app, charts/graphs, proposal, etc.).
PMMA 5101. Freedom of Expression. (3 Credits)
This course examines the history and theory of freedom of expression in the United States. We will trace the philosophical and political origins of free speech, examining key assumptions about human nature, individual liberty, and the role of government in a Democracy underlying the First Amendment. The Constitutional Framers gave us an incredible gift of freedom. But with that freedom comes responsibility. This class explores that tension. When, if ever, should expression be regulated in a Democratic society? When should the rights of the individual be curtailed to protect the group? Should all forms of media have the same degree of freedom? What special challenges are posed by the development of new communication technologies? Are there any types of speech that should be restricted? If so, which ones, and who should decide? Are there certain circumstances when free speech should be curtailed in order to support other interests, such as diversity, equality or respect for differences in religious beliefs? Should limits on speech be allowed in the name of national security? Should certain forms of expression be prohibited during wartime? What kind of restrictions can be placed on public protests? Should propaganda be legal? An investigation of our nation's history – and the major Supreme Court cases dealing with freedom of expression – suggests that despite often lofty rhetoric about liberty, Americans actually have a great deal of ambivalence about free speech. By studying the application of First Amendment theory to various situations, such as flag burning, hate speech, restrictions on public protests, leaks of classified material and dissent during wartime, we will explore just how much freedom we actually have, and how much we really want to have.
Attributes: CEED, CENS, PMTC.

PMMA 5102. Press, Politics, and Public Policy. (3 Credits)
This course covers the interaction between the American mass media, politics, and public policymaking. We examine some of the most important interactions between the press and politicians to answer questions about the role of the media in American society.
Attribute: PMTC.

PMMA 5103. Environment and the Media. (3 Credits)
This course focuses on the intersections between contemporary environmental issues, communication and media systems, culture, and social change. This class will explore the unique contributions that perspectives from communication and media theory can bring to the study of “the environment” and “the natural world.” The course will also consider how these perspectives can inform strategic communication practices that aim to bolster long-term global environmental sustainability. Case studies will cover a diverse set of environmental topics, including climate change, environmental justice, the global industrial food system, public understandings of scientific risk, human-animal relations, and environmental media and journalism.
Attributes: CEED, CENS, PMTC.

PMMA 5104. Theories of Media, Culture, and Society. (3 Credits)
This course uses primary sources to deepen students’ understanding of the inter-relationship between media, culture, and society. One of the main objectives is therefore to build students’ reading and analysis skills by exposing them to difficult theoretical material in an environment designed to help them learn to read this kind of text.
Attribute: PMTC.

PMMA 5105. Media Ethics. (3 Credits)
This course will examine the practices of mass media from the standpoint of producers and the public, with focus on intellectual property, privacy, confidentiality, conflict of interest, censorship, corporate responsibility, and new technologies.
Attribute: PMTC.

PMMA 5106. Race, Gender, and Digital Media. (3 Credits)
This course examines the theory, history, politics, and aesthetics of digital media. We will utilize an intersectional feminist approach to explore race, gender, and broader questions of identity and difference from early computing to social networking. Topics include diversity in the tech industry, virtual communities, and online activism. Ultimately, the class will discuss the role that digital media plays in promoting—or preventing—civic engagement and social change.
Attributes: CEED, CENS, PMTC, URSG.

PMMA 5140. Themes in Urban Public Policy and Power. (3 Credits)
We see around us a city constantly in a state of change, dynamic change in which multiple actors compete daily. What are they competing for? And why? What does power mean for those actors? How is it to be defined? Who wins, who loses, and why? What are some of the policy issues that confront actors in a city whose only constant is change? We will look at a series of urban issues and ideas, often with a focus on New York City. We will also hear from and be able to talk with guest speakers with unique histories and perspectives. This should help inform our thinking about the issues we discuss, their historical and political context, and their salience.

PMMA 5201. Social Media and Civic Engagement. (3 Credits)
This theoretical course focuses on how social media impacts political participation, crowdsourcing (and the role of mobile), the role of digital networks in contemporary social movements, networked/participatory citizenship.
Attribute: PMTC.

PMMA 5202. Digital Media and Social Responsibility. (3 Credits)
This course examines the choices and responsibilities that shape personal identity and common humanity for those who regularly employ the tools of digital media and computer technology. Regular use of digital media enables individuals to separate from their physical selves and from the community spaces in which they have traditionally lived. This course focuses on the resulting ethical tensions.
Attribute: PMTC.

PMMA 5203. Technology & Public Comm.. (3 Credits)
This course focuses on the study of technology in the context of public communication, and is primarily concerned with the role that media, technology, and symbol systems play in shaping communication, consciousness, and culture, from the evolution of our innate capacity for speech and language, to the development of writing systems, to the invention of the printing press with movable type, to our contemporary electronic media environment.
Attribute: PMTC.

PMMA 5204. Civic Media. (3 Credits)
Participating in local life can be difficult. Information is hard to obtain and validate, local meetings are difficult to attend, networks are challenging to build. Increasingly, governments, advocacy groups, community organizers, and individual citizens are looking to digital tools to increase and improve the conditions in which we live and enhance our opportunities to engage. We will look at academic research surrounding citizenship and engagement in a digital era and cover research into many genres of civic media, from citizen journalism to hackathons, tech for development, activist art hacker culture, and games for good. This class will not only explore the various goals campaigns are using digital tools to meet, but will also focus on what type of citizen these tools are enabling and encouraging people to become.
Attributes: CEED, CENS, PMSC, PMTC.
PMMA 5205. Social Entrepreneurship. (3 Credits)
This course provides an overview of the use of business and entrepreneurial skills to drive social change. Students will analyze different definitions of social entrepreneurship, examine the fundamental theories and frameworks of social entrepreneurship, and engage with current debates around social change. Social ventures around the New York City area will be used as case studies of sustainable solutions to social problems.
Attribute: PMT.

PMMA 5206. Social Media and Political Campaigns. (3 Credits)
Social media has changed political campaigns in ways both incremental and monumental. This course will lead students in analyzing the practices, strategies, and tactics of contemporary campaigning in order to learn best practices across a variety of social media channels, understand how such practices impact traditional theories of political communication, and assess their role in our democracy. This class will be oriented around changes seen in the 2016 and 2018 elections, and will emphasize both how to do the work of social media campaigning as well as how to study it. Over the course of the semester, we will focus on cutting-edge issues like bots and misinformation, meme production, microtargeting in social media ads, gamification, using Twitter to drive earned media, and more. Students will read both practitioner and academic approaches to each topic, and will develop a final project that can be either applied or research-based.
Attributes: PMSC, PMTC.

PMMA 5207. Mapping Injustice. (3 Credits)
This course centers “mapping” as an organizing theme for understanding and engaging social justice and injustice because of its expanding role in literally and metaphorically arranging contemporary life. The everyday adoption of new spatial media—such as web-based mapping platforms, geosocial apps, and locative data—increasingly orient how society understands the past, experiences the present, and plans for the future. To map social (in)justice is to consider how spatial media can help draw together dichotomies such as medium/method, art/science, and ontology/epistemology so as to trace, represent, and rework matters of inequity.
Attribute: HUHR.

PMMA 6101. Audio Narrative (Reporting and Production). (3 Credits)
This course takes place off campus at WNYC Studios (Varick Street in Hudson Square, Manhattan). From spot news to feature reporting, students in this course will learn how to produce audio journalism with public media values. The class will focus on how to craft and report compelling, attention-holding narratives. The course will cover the fundamentals of strong audio journalism, including quality sound gathering, strong interview techniques, writing for the ear, and authentic vocal delivery.
Attributes: PMMJ, PMT.

PMMA 6102. Video Narrative (Reporting and Production). (3 Credits)
This course is a workshop for students who want to elevate their skills in creating videos that have strong story lines and exhibit best practices in reporting and production. Students will learn the elements that go into making compelling videos, including story selection, casting and interviewing your characters, shooting strong visuals, and writing and editing for clarity and impact. You'll also learn to weave facts and issues into the narrative and make sure your stories are journalistically sound.
Attributes: PMMJ, PMT.

PMMA 6103. Data Journalism and Interactive Graphics. (3 Credits)
This class will blend theories of digital media and journalism with journalistic practice and the development of skills related to both understanding and translating big data. This emerging discipline touches on information and interactivity design, mapping, graphing, animation tools, and data analysis. In this class, we will apply these interdisciplinary areas of study to the practices of reporting and editing as they relate to gathering, analyzing, and visualizing interactive data-driven stories. We will focus not only on official journalism, but also include awareness-raising efforts by advocacy/civic groups.
Attributes: DATA, PMMJ.

PMMA 6104. Alternative and Advocacy Journalism. (3 Credits)
Students will learn how to produce, aggregate and disseminate journalistic content with the explicit goal of making disadvantaged communities better informed, connected to one another, and able to influence policy decisions. We will focus the voice-giving role played by citizen journalism, giving special attention to the content, economics, and community-building role played by ethnic, youth, homeless, incarcerated media sectors, and the role played by digital media.
Attributes: HUHR, PMMJ, PMSC.

PMMA 6105. Cross-Platform Journalism. (3 Credits)
*This course takes place off campus at WNET Studios—(8th Ave & 50th St)* This course is offered in collaboration with WNET, New York's public television station. The course will focus on teaching students to craft video pieces for public television, including story generation, interviewing, reporting, writing, shooting video and editing. The course will also cover how to create content for digital media including websites and social media platforms. Students will learn best practices in broadcasting and discuss ethical issues facing multimedia journalists, particularly those in public media.
Attribute: PMMJ.

PMMA 6106. Online Journalism. (3 Credits)
This course centers on the most current trend facing journalism today: the Internet's effect on the content of news media and the work of reporters. The course begins with a survey of open source journalism and convergence culture, examining the collision between old and new media, and the mass amateurization of professional communication. We will consider the transformation of journalism in the digital age in light of the apparent shrinking size of articles, the reduction in readers' attention span, and the decline of deep reading.
Attribute: PMMJ.

PMMA 6107. Opinion Writing. (3 Credits)
This course explores the great American tradition of opinion writing and commentary in traditional print and evolving online formats in order to gain an understanding of contemporary social, professional and intellectual concerns in the practice of journalism. This is as much an exploration of critical thinking as it is of writing, so there will also be emphasis on aspects of philosophy, logic and argumentation. The course will attempt to cover print, broadcast and all forms of new media.
Attribute: PMMJ.

PMMA 6108. Advanced Interviews and Profiles. (3 Credits)
This course will teach students advanced reporting and profile writing for different multimedia journalism platforms. Heavy emphasis will be placed on the art of interviewing. Students will learn how to compose interviews, invite subjects to interact with them on the meaningful level, and engage with public issues.
Attribute: PMMJ.
PMMA 6109. First Person Journalism. (3 Credits)
First person journalism is nothing new. As part of the New Journalism movement, reporters like Tom Wolfe and Joan Didion have been infusing their storytelling with subjectivity for decades. Still, the digital shift in journalism and explosion of social media has brought a new wave of first person journalism to the web. This course will explore the history of first person journalism and help students use first person perspective to bring reported pieces to life. Students will look critically at the form to consider the limitations of personal narrative in journalism. On that note, this course will not be limited to personal narratives. Students will also work on reported stories in which their experiences as journalists and citizens impacts their storytelling structure.
Attribute: PMMJ.

PMMA 6110. Digital Storytelling. (3 Credits)
This class explores storytelling in emerging platforms. From the still image and the soundscape, we will evolve to discuss the tools and narrative forms across digital film-making, game design and interactive web narratives. Exposure to and workshops in integrated storytelling technologies will enable students to create story projects of their own.
Attribute: PMMJ.

PMMA 6201. PR for the Public Interest. (3 Credits)
This course is designed to simulate the real-world public relations needs of an organization in the non-profit, advocacy or public interest sectors. It covers the wide range of PR needs and functions such organizations have, preparing students to succeed in organizational environments from large, established charities or NGOs to start-ups, from grassroots advocacy groups to blended businesses involving social entrepreneurship.
Attribute: PMMJ.

PMMA 6203. Marketing and Branding in the Public Interest. (3 Credits)
Social marketing seeks to integrate research, best practice, theory, audience, and partnership insight to inform the delivery of social change programs that are effective, efficient, equitable and sustainable. This course offers a strategic framework for developing a social media advocacy campaign, using social and digital media to help shape public debate, mobilize public action and to speak directly to those with influence to help bring about social change.
Attributes: CEED, CENS, PMSC, PMTC.

PMMA 6204. Cross-Platform Comm Strategies. (3 Credits)
This course will use theory and practice to learn the skills needed to produce cross-platform campaigns that successfully target and reach key populations. Additionally, we will focus on the socio-technical conditions that make this approach necessary and practical in today’s media environment. We will highlight areas of viral content, the politics of platforms, translating messages across channels, and creating spreadable media within the context of advocacy, electoral and nonprofit sectors.
Attribute: PMSC.

PMMA 6205. Online Analytics and Metrics. (3 Credits)
In this course, you will learn how to use data to construct, analyze, and circulate stories that are important to you. Analytics from email CMS systems, websites, and social media can tell you about who’s reading your content, what messages are working (and which aren’t), and help you increase or refine their reach. This course will focus on theories behind using data to assess refine, and target messages, and cover best practices for doing so through hands-on work with a variety of commonly-used platforms.
Attributes: DATA, PMSC.

PMMA 6206. Persuasion and Public Opinion. (3 Credits)
This course blends theory and practice to explore how we convince others to change their attitudes or behavior in order to accomplish specified goals. Working in multiple contexts, the course is designed to help students become better analysts and evaluators of persuasive messages in several social and political arenas; better persuaders—better at recognizing opportunities for influence, and at employing effective strategies for convincing others and building support; and more versatile at persuasion across a variety of communication channels and media platforms.
Attributes: HUCB, PMSC.

PMMA 6207. International Communication. (3 Credits)
This course aims to provide students with an international perspective to better understand communication theories and practices in different parts of the world. This global vision is especially important for communication scholar-practitioners, who will need to examine different actors, relationships, and trends in the global communication landscape as they get ready for their own role in their future career. This course will combine conceptual learning and class projects to help students gain both a theoretical foundation and firsthand research experience about international communication. Topics such as globalization, media and technology, audience, advocacy, and much more will be discussed in this course.
Attributes: HUCB, PMSC.

PMMA 6208. Data and Communication. (3 Credits)
Obtaining, interpreting, visualizing and displaying data are essential skills for communication professionals in the 21st Century. Featuring hands-on practice and examples, this course explores a wide range of data based communications, ranging from campaign strategy to data journalism and advertising tactics. Students will work on in-depth projects that require a demonstrable understanding of data, visualization, strategy, testing and evaluation.
Attributes: PMSC, PMTC.

PMMA 6209. Storytelling for Public Good. (3 Credits)
In this class, students will focus on how to craft stories that inform, mobilize, or persuade, and ultimately serve the public interest. Special attention will be paid to the role of narrative in both journalism and advocacy and changing channels of storytelling, including film and television, long form and citizen journalism, interactive documentaries, and games for social change.
Attribute: PMSC.

PMMA 6210. Cross Platform Production. (3 Credits)
This course will provide students with a variety of production skills for media-oriented professions, including shooting and editing for sound, still image, and video, with an eye toward editing for a variety of digital platforms. Students will be expected to produce professional quality content over the course of the semester. This will build upon the Public Media program’s summer workshop course.
Attribute: PMSC.

PMMA 6398. Internship. (3 Credits)
The internship will be chosen by the student, working in conjunction with the graduate director. This internship is to be supervised by an appropriate faculty member, and will involve regular meetings, bi-monthly reports, and a final written summary of the internship experience.
PMMA 6399. Internship II. (3 Credits)
Students have the possibility to do an internship for three credits per semester, for a total of up to six credits for the program. The internship will be chosen by the student, working in conjunction with the graduate director and Fordham University’s career center. This internship is to be supervised by an appropriate faculty member, and will involve regular meetings, bi-monthly reports, and a final written summary of the internship experience.

PMMA 6619. Special Master’s Project. (3 Credits)
This course represents the culmination of the student’s course of study. He/She will create a final project based on projected future plans and career path.

PMMA 8999. Independent Study. (1 to 4 Credits)

Courses in Other Areas
Courses in this group have the PMMA attribute and count as electives towards the M.A. in Public Media.

Public Media (M.A.)

Admissions

Application Requirements

- Official GRE scores are required if an applicant wishes to be considered for GSAS merit-based financial aid. The GRE is not required for admission to the program in general.
- The successful candidate for admission typically has an undergraduate GPA of 3.0 or better.
- Statement of intent that helps us understand your interest in our program (no more than 3 double-spaced pages, submitted via the online application). The statement should respond to the following prompt:
  - “With an ethos of, ‘Media with a mission,’ the Public Media MA (PMMA) program focuses on training multi-platform journalists and strategic communication professionals to use media as a force for social change. In what ways does this mission connect to your personal and/or professional interests? What experiences in your undergraduate and/or professional career have prepared you for the PMMA? What personal and/or career objectives will this graduate program help you pursue?”
- Resume/CV (submit via the online application)
- Three letters of recommendation: academic and/or professional (submitted directly by referees via the online application. We suggest that at least one come from a professor on the full-time faculty of your undergraduate institution with whom you have studied.)
- Official degree transcripts confirming prior degree conferral are required for all applicants, regardless of matriculation status. These should be ordered at least one month prior to the application deadline for your program of interest, and should be sent directly to the Office of Admissions (fuga@fordham.edu) via secure electronic delivery.
  - If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458.
  - Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.
  - Please ensure that all official transcripts from previously attended post-secondary institutions are submitted in English, or are accompanied by a certified English translation. Transcripts and credentials conversion information is available on the GSAS International Students page.
  - English proficiency: International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results.
  - Official TOEFL or IELTS scores should be sent directly by the student to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259.
    - We will expect our most competitive applicants to have scores above 100 on the TOEFL and 7.5 overall (with 6.5 in each sub-score) or above on the IELTS. Please consult the English Proficiency web page for additional information. A waiver can be requested by emailing fuga@fordham.edu, based on your educational history at a U.S.-based institution and if the official language of your country of origin/nationality is English.
    - If your native language is not English, an interview by video may be required.
  - One to three writing samples, submitted electronically. These may be analytical (like a paper for a course) or journalistic.
  - Up to three samples from a multimedia portfolio. The portfolio offers applicants the opportunity to showcase multimedia, digital, visual, audio, written or web-based production materials as part of the application process (e.g., a website, short film or video, piece of multimedia journalism, audio piece or podcast, a data visualization or motion graphic).
    - If you are a non-native English speaking applicant, you must submit a video submission as one of your portfolio samples demonstrating your English language skills. This should be between 2 and 5 minutes in length and will ideally have you speaking directly to the camera, using either prepared remarks or speaking extemporaneously about a topic of your choice (for instance, your interest in the program or previous experience that has prepared you for the program).

Merit Funding

Highly qualified applicants may qualify for:
- a graduate assistantship package which provides a stipend, a 50% tuition scholarship and an internship at WFUV
- two partial tuition scholarships of $10,000 each
Courses in this group have the PMTC attribute.

Requirements

Course | Title | Credits
---|---|---
**Four required Core courses:**
PMMA 5011 | Multimedia Tools (August) | 1.5
PMMA 5012 | Fundamentals of Web Design (January) | 1.5
PMMA 5001 | Public Interest Media Theory and Practice | 3
PMMA 5003 | Strategic Communication | 3
or PMMA 5002 Public Journalism

**Two concentration courses in the student’s chosen track:**

- **Multiplatform Journalism**
  - Strategic Communication
  - Two Fundamentals courses from the list below

- **Two electives courses chosen in consultation with your advisor**

PMMA 6619 | Special Master’s Project | 6

Total Credits: 30

1. These practical courses are intensive week-long courses that meet pre-term and focus on multimedia topics.
2. Students take the core course that correlates with their concentration.
3. More information on concentrations can be found on the concentrations tab (p. 725).
4. A listing of Fundamentals courses is below.
5. Information on elective options is below.
6. More information and guidelines on the master’s project can be found on our page of the Fordham website.

Fundamentals courses

Courses in this group have the PMTTC attribute.

Course | Title | Credits
---|---|---
PMMA 5101 | Freedom of Expression | 3
PMMA 5102 | Press, Politics, & Public Policy | 3
PMMA 5103 | Environment and the Media | 3
PMMA 5104 | Theories of Media, Culture, and Society | 3
PMMA 5105 | Media Ethics | 3
PMMA 5106 | Race, Gender, and Digital Media | 3
PMMA 5201 | Social Media & Civic Engagement | 3
PMMA 5202 | Digital Media and Social Responsibility | 3
PMMA 5203 | Technology & Public Comm. | 3
PMMA 5204 | Civic Media | 3
PMMA 5205 | Social Entrepreneurship | 3
PMMA 5206 | Social Media and Political Campaigns | 3
PMMA 6101 | Audio Narrative (Reporting and Production) | 3
PMMA 6102 | Video Narrative (Reporting and Production) | 3
PMMA 6103 | Marketing and Branding in the Public Interest | 3
PMMA 6208 | Data and Communication | 3

Elective courses

Students may choose to enroll in an elective in GSAS related to public media and strategic communication (with the PMMA attribute listed below), take additional coursework within the PMMA program, or take a course outside GSAS in the Gabelli School of Business, Fordham Law School, the Graduate School of Education, or the Graduate School of Social Service. These courses should be selected in consultation with your advisor.

Students may also choose to take a PMMA internship: PMMA 6398 or PMMA 6399. Students can do an internship for three credits per semester, for a total of up to six credits for the program. The internship will be chosen by the student, working in conjunction with the graduate director and Fordham University’s career center. This internship is to be supervised by an appropriate faculty member, and will involve regular meetings, bi-monthly reports, and a final written summary of the internship experience.

Courses in this group have the PMMA attribute.

Course | Title | Credits
---|---|---
CEED 5050 | Ethics and Society: Cross Disciplinary Perspectives | 3
CEED 6100 | Theories and Applications in Contemporary Ethics | 3
CLGL 0204 | Access to Justice Seminar | 2
POSC 5140 | Themes in Urban Public Policy and Power | 3
POSC 5238 | Strategies of Political Communication | 3-4
POSC 5245 | Political Communications: Earned Media In the Age of Digital and Social Media Boom | 3
POSC 5246 | Technology and Campaigns | 3
POSC 5247 | Data Analytics for Political Campaigns | 1
URST 5000 | Issues in Urban Studies | 3
URST 5020 | Urban Political Processes | 3

Concentrations

Public Media master’s students choose between a concentration in either Multiplatform Journalism or Strategic Communication.

The concentration section of the required curriculum consists of two courses in the concentration area, with a list of courses offered by our department in each area. Students are strongly encouraged, though not required, to choose courses related to their concentration of choice for their electives and when choosing their Fundamentals courses.

Multiplatform Journalism

Multiplatform journalism includes the production and distribution of audio, video, and interactive web content. Concentrators will gain knowledge of the workings and history of commercial and nonprofit media, deep knowledge of journalistic norms and ethical standards, and a complete palette of multimedia reporting skills.

Courses in this group have the PMMJ attribute.

Course | Title | Credits
---|---|---
PMMA 6101 | Audio Narrative (Reporting and Production) | 3
PMMA 6102 | Video Narrative (Reporting and Production) | 3
PMMA 6103 | Data Journalism and Interactive Graphics | 3
PMMA 6104 | Alternative and Advocacy Journalism | 3

Updated: 07-27-2020
Official Transcripts

Official degree transcripts confirming prior degree conferral should be ordered at least one month prior to the application deadline. Please ensure that they are sent directly to the Office of Admissions via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458. Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts. Please ensure that all official transcripts from previously attended post-secondary institutions are submitted in English, or are accompanied by a certified English translation. Transcripts and credentials conversion information is available on the GSAS International Students page.

Resume/CV

Submitted via the online application

Statement of Intent

Up to 500 words, submitted electronically, via the online application.

Recommendation

Two letters of recommendation submitted directly by referees via the online application

English Proficiency

International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results.

Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259. TOEFL minimum 85, IELTS equivalent 6.5. Applicants with TOEFL scores below 85 may still apply

GRE Requirements

The GREs are not required, unless you are interested in applying for financial aid.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.

Programs

- Computer Science (M.S.) (p. 735)
- Cybersecurity (M.S.) (p. 736)
- Data Science (M.S.) (p. 737)
- Financial Computing (Adv Cert) (p. 739)
- Advanced Certificate in Financial Econometrics (Interdisciplinary) (p. 777)

Courses

CISC 5009. Network Essentials. (3 Credits)

This graduate course covers the essentials of designing, building and maintaining a local area network, incorporating all elements of the seven layers of the ISOOSI Model. Students will learn various aspects of networking fundamentals including TCP/IP, network topology, network design, hardware configuration, software configuration, installation, and maintenance. Students will gain hands-on experience by performing the tasks necessary to engineer a working network from the ground up.

Attributes: CSCY, CSNS, DATA.
CISC 5020. Computer Graphics. (3 Credits)
This course provides a rigorous introduction to computer-based graphical techniques. Core programming and mathematical concepts related to computer graphics are covered as needed. The emphasis will be on the hands-on implementation and synthesis of software applications that employ graphics. After completing this course, students will be proficient in developing and implementing graphics modules; have an understanding of software and hardware interfaces relating to continuous accessing of visual screen objects; be able to understand GUI interfaces; and have a working knowledge of the major mechanisms related to 2D and 3D computer graphics development, including animation, projection, and color migrations.

CISC 5030. Internet and Web Programming. (3 Credits)
This course covers web programming in the internet and interactive environment. Students will gain understanding of operating system usage on a server and interactive web design. Languages used will include PERL, HTML, CGI, and JavaScript.
Attributes: CSNS, CSSO.

CISC 5100. Foundations of Comp Sci. (3 Credits)
This course is designed to give a solid foundation for the study of computer science at the graduate level. It covers a wide variety of subjects including recursion and induction, analysis of algorithms, graph theory, pattern searching and processing, logic, complexity and optimization.

CISC 5109. Big Data Analytics. (3 Credits)
This course focuses on solving big data analytics problem in real world such as finance, healthcare, and social media, by applying state-of-the-art big data analytics techniques and tools. It also aims to fostering and enhancing students' data analytics and software development capabilities in handling big data. After taking this class, students should be able to employ big data management and analytics tools to conduct problem solving and investigation in big data fields. The following topics will be covered in this class: Principle of big data analytics, Apache Spark, Spark machine learning, high-frequency trading, EHR and TGGA data mining, social network data analytics, and big data visualization techniques, etc. This course assumes students grasp at least one programming language (e.g. Python/R)
Attributes: CSAI, CSDA.

CISC 5120. Optimization Methods. (3 Credits)
This course deals with numerical methods for convex optimization problems that arise in information sciences. The study begins with properties of convex sets and analyzes a number of unconstrained and constrained extremal problems. There will be a review of linear systems and introduction to practical implementation aspects for large-scale, nonlinear problems. The course will also consider optimality criteria, duality theory, and applications in machine learning and modeling.

CISC 5200. Computer Language Theory. (3 Credits)
An introduction to computer language theory; finite state automata and regular expressions, pushdown automata and context-free languages, Turing machines, undecidability problems and Chomsky hierarchy; and an introduction to computer complexity and the study of NP-complete problems.

CISC 5220. Data Structures. (3 Credits)
This course provides a survey and analysis of the major types of structures in programs that handle data; arrays, stacks, queues, linked lists, trees and graphs. Recursive, iterative, search and sorting techniques are also studied. This 'bridge' course is intended for graduate students lacking an undergraduate CS degree and will not be counted toward the requirements for the MSCS degree.

CISC 5250. Computer Organization. (3 Credits)
Study of the design of a computer system, including instruction decoding and execution, memory organization, caching, I/O channels and interrupt systems. RISC and CISC paradigms. Microcoding, pipelining, multiple instruction issue and multiprocessor.

CISC 5300. Computer Programming C++. (3 Credits)
C and C++ programming: The course will focus on object-oriented programming using C++. Topics include objects, methods, Abstraction, Encapsulation, Inheritance and Polymorphism. Particular emphasis will be given to real-life programming problems.
Attribute: ASDM.

CISC 5325. Database. (3 Credits)
With the proliferation of abundant data, knowledge of database systems has become a key requirement of employers across many industries and sectors. Topics covered in this course include the basic concepts and architecture of database systems, the Relational Data Model concepts, integrity constraints, schemas, views, SQL, and the several sets of skills needed to automate database queries. This class includes hands-on experience in the classroom, exercising key skills in SQL such as aggregation, organizing, filtering, and table joining. It includes the use of popular systems such as Pandas/Python/Jupyter Notebook and others to interface to popular databases. Automation of query operations is addressed, including automating data preparation; cleaning; SQL statements for data insertion; updating, aggregating, filtering, merging, organizing, and funneling results seamlessly into forms ready for visualization and analysis; and SQL parameter tuning based on data. Some skills in Excel for database-related work are also covered.

CISC 5330. Financial Programming. (3 Credits)
This is an introductory programming course using C++ that features the object-oriented language, in addition to data structures. The basics of programming, including data types, pointers, arrays, control structures, and functions are covered. The course then continues to more advanced topics such as dynamic memory managements, data structures, the Standard Template Library, and object-oriented programming: classes (encapsulation), inheritance, and virtual functions (polymorphism). Programming examples and exercises will be drawn from the field of finance. Additional topics include: an introduction to design patterns, as well as relational database programming with SQL.
Attributes: ASDM, CSSO.

CISC 5352. Financial Programming and Applications. (3 Credits)
This course aims at developing students' capabilities in financial programming. It assumes prior knowledge of C++ programming. The topics in this course include foundations of financial programming, financial models and its implementations (e.g., ARCH, ARMA), algorithmic trading, machine learning methods in algorithmic trading, high frequency financial data analytics, post-trade profitability analysis, financial big data analytics (TAQ), and Monte Carlo Simulations. After taking this class, students should be able to implement complex financial models, develop trading algorithms, and develop financial trading and business analytics software.
Attribute: DATA.
CISC 5380. Programming with Python. (3 Credits)
This course is an introduction to the Python programming language for students without prior programming experience. Students will learn how to use Python both interactively and through a script. The topics covered include variables, strings, numbers, control statements (conditional statements and loops), lists and sequences, functions, dictionaries, recursive functions, classes, and iterators and generators. Python is a programming language with a relatively simple syntax and a powerful set of libraries. After completion of this course, students will be competent in using Python libraries to process numerical and textual data. Working with Python packages for statistical and numerical data analysis, as well as the natural language processing problems, is explored. Matplotlib, a Python 2D plotting library which produces publication-quality figures in a variety of hard-copy formats, is used throughout the course.

Attribute: CSSO.

CISC 5400. Discrete Structures. (3 Credits)
An introduction to Discrete Mathematics; propositional and predicate logic, first and second principle of mathematical induction, sets, counting, inclusion/exclusion principle, binomial theorem, relations and functions, introduction to matrix algebra, introductory graph theory.

CISC 5410. Mobile Device Programming. (3 Credits)
This course provides a hands-on introduction to mobile device (smartphone, tablet) programming. Students will learn about mobile operating systems and API frameworks and will develop mobile programs with an emphasis on user interface design, multimedia, web application, sensors, and networking. Design criteria such as energy awareness, security, and privacy will be emphasized.

Attributes: CSNS, CSSO.

CISC 5420. Applied Statistics and Probability. (3 Credits)
This course provides an introduction to applied statistics and probability theory. It is intended for students who may have some basic background in probability, at the level of CISC 5400 Discrete Structures, but not a full semester course in statistics. This course will cover discrete random variables, probability distributions, sampling schemes, the central limit theorem, confidence intervals, hypothesis testing, correlation analysis, and Analysis of Variance (ANOVA). Students will also gain experience using a statistical package.

CISC 5450. Mathematics for Data Science. (3 Credits)
This course is an introduction to the mathematical concepts that are essential to data science. Course content covers three fundamental areas of mathematics: probability, statistics, and linear algebra. Topics include probability spaces, conditional probability, independence, discrete and continuous random variables, multivariate random variables, expectation, descriptive statistics, Bayesian statistics, hypothesis testing and inference, set theory, binomial theory, vector spaces, inner product and norms, matrix operations, Eigenvalues, graph connectivity, and combinatorial space.

Attributes: DATA, DATI.

CISC 5500. Data Analytics Tools and Scripting. (3 Credits)
This course teaches the basic tools used in data science, particularly the scripting skill in a few widely used languages: Bash, SQL, and R. Starting with their syntax features, we will proceed from how to use these tools’ automating data-wrangling tasks to making use of data analysis and visualization libraries. For Bash, the focus is common system administration tasks, including job controlling. For SQL, we introduce the fundamental concepts of relational databases, as well as common tasks of data querying, data manipulation, and data definition. For R, we emphasize its data-centered features and how to utilize a large variety of packages. The class includes many hands-on practices in projects of various scales. With this training, students will be well prepared for more advanced and specialized topics in data science.

Attributes: CSDA, CSSO, DATA, DATI, PMTM.

CISC 5520. Programming Languages. (3 Credits)
This course introduces the basic concepts behind programming languages, illustrating those concepts with concrete examples, and exploring the reason why languages were designed in certain ways. Languages using static and dynamic typing and functional and object-oriented languages are compared. Students completing this course will be able to learn new programming languages quickly and choose the most appropriate language for a given task. Students will be exposed to several diverse programming languages.

Attribute: CSSO.

CISC 5550. Cloud Computing. (3 Credits)
This course provides the needed knowledge to understand the technologies and services that enable cloud computing, discusses different types of cloud computing models and investigates security and legal issues associated with cloud computing. Topics include Cloud infrastructure components and interfaces, essential characteristics of Cloud platforms, common deployment modes, techniques for deploying and scaling cloud resources and security implication of cloud resources.

Attributes: CSNS, CSSQ, CYSM, DATA.

CISC 5595. Operating Systems. (3 Credits)
This course studies how operating systems manage computer hardware, thereby supporting application programs. Topics covered include multiprogramming, synchronization, inter-process communication, memory management, file systems and I/O device management. The concepts and theories presented in this class are reinforced by actual system programming projects.

CISC 5640. NoSQL Database Systems. (3 Credits)
This course will introduce the students to the core concepts of NoSQL, a new class of non-relational database management systems. NoSQL databases are used to perform CRUD operations over massively distributed big data systems. This course will explore the limits of RDBMS and the technical scenarios where NoSQL databases triumph over RDBMS. We will study the core concepts of four different NoSQL databases: key-value, column family, document, and graph. For each of these databases, we will take a closer look at their technical aspects including their business needs for different big data systems. This course has several hands-on labs accompanied by relevant projects designed for learning DynamoDB for key-value, MongoDB for document, Cassandra for column family, and Neo4j for graph NoSQL databases. Finally, we will discuss the techniques for choosing one of the four NoSQL databases to meet the requirements of a specific use case.

Attribute: DATA.
CISC 5650. Cybersecurity Essentials. (3 Credits)
This course provides a holistic perspective on the structure of the cyber space ecosystem, the interoperability of the physical and social networks, and methods and techniques in building a functional cyber space which is secure and sustainable. Topics include:  
- Global networking and communication, data mining and information fusion, secure cyber network and intrusion detection, forensic computing and investigation, incident response and risk management, security and privacy, security and privacy, and policy and assurance. The course will also feature expert lectures and case-based projects on cyber security in several areas including health care, finance, media, government, defense, and critical infrastructures.
Attributes: CSCY, DATA.

CISC 5660. Data Science for Cybersecurity. (3 Credits)
Cybersecurity attacks have typically involved enormous amounts of data, and the need for more sophisticated methods and tools for analyzing that data has only increased with the advent of more sophisticated and varied attacks. This course will introduce data science (machine learning and data mining) methods for manipulating, visualizing, and analyzing large amounts of data, with specific applications to cybersecurity.
The methods will cover classification (decision trees, naïve Bayes, neural networks, etc.), clustering (K-means), and anomaly detection, and applications will be drawn from the following cybersecurity areas: malware and spam detection; phishing attacks; intrusion detection; web security; authorization attacks; and behavioral biometrics. Students will become familiar with data science toolkits and will apply the methods they learn to real world data sets. No prior machine learning or data mining experience is required, although students should have familiarity with computer programming.
Attribute: CSCY.

CISC 5700. Cognitive Computing. (3 Credits)
This course covers method, practices and appreciation of cognitive computing. Topics include: structured vs. unstructured information management, data correlation vs. information diversity, concepts vs. keyword search, description vs. predictive analysis, NLP and semantic integration, deep Q&A, and computing data rest vs. in motion.
Attributes: CSAI, CSDA, DATA, PMTM.

CISC 5710. Introduction to Behavioral and Physical Biometrics. (3 Credits)
The need to ensure the security of computer systems and information is of paramount importance in our increasingly digital world. However, traditional passwords and keys often do not provide an adequate level of security, and consequently, biometric authentication and identification methods are becoming increasingly popular. This course will survey a wide variety of physiological and behavioral biometric methods and technologies. The physiological biometrics that will be covered include fingerprints, face, iris, retina, and ear shape, while the behavioral biometrics covered are based on gait, keystroke dynamics, voice, signature analysis, and general usage/activity patterns. The relative strengths and weaknesses of the various forms of biometrics will be evaluated. Other topics that will be covered include implementation issues, the use of machine learning for building biometric models, metrics for biometric evaluation, spoofing, privacy and ethical issues, the relation to forensic science, and the use of biometrics in the judicial system.
Students will also gain hands-on experience through laboratory and homework exercises and a course project.
Attribute: CYSM.

CISC 5725. Network Administration. (3 Credits)
Provides and introduction to system administration tools and principles. Students will learn how to set up a Local Area Network through hubs, switches, and routers (wired or wireless), and will learn how to configure a network server to provide common services such as HTTP, DNS, and secure remote access. There will be a strong emphasis on laboratory work and students will work in groups to complete a series of network administration projects.
Attributes: CSCY, CSNS.

CISC 5728. Security of e-Systems and Networks. (3 Credits)
This course deals with the fundamental concepts and tools of security of e-based systems and networks and its range of applications. Among the topics to be covered in this course include: security of e-commerce, e-business, e-service, e-government, authentication of users, system integrity, confidentiality and digital signature, e-security tools such as public key infrastructure (PKI) systems, bio-metric-based security systems, trust management systems in communications networks, intrusion detection systems, protecting against malware and computer network security risk management.
Attributes: CSCY, CSNS, CYSM.

CISC 5750. Information Security and Ethics. (3 Credits)
The goal of this course is to give students a comprehensive introduction to information security and its applications in relations to ethics. It covers topics in cryptography, access control, network and operating system securities, software security, database security, cyberlaw and ethics. The students are assumed to have basic knowledge in programming and discrete structures.
Attributes: CSCY, DATA.

CISC 5770. Intelligence in Cybersecurity. (3 Credits)
This course will focus on the role of intelligence in cybersecurity. Students will become familiar with the application of cyber-threat intelligence in an enterprise environment, and how organizations employ this discipline to formulate cybersecurity strategies and strengthen defenses. The course will examine the intelligence cycle and its role in enterprise cybersecurity, with an emphasis on the analysis phase. The class will consider sources of threat intelligence, including open and paid feeds, open source intelligence (OSINT), and vendor services, and will develop an understanding of the uses of each. Through a series of practical exercises, students will learn about structured analysis methods, and will be introduced to analytic tools that include the Cyber Kill Chain, Diamond Model of Intrusion Analysis, and MITRE ATT&CK framework. Students will learn to use these tools to analyze cyber intrusions and threat-actor tactics, techniques, and procedures (TTPs), and to apply them across the tactical, operational, and strategic levels of intelligence. Upon completion of the course, students will have a solid foundation in the skills necessary to analyze, contextualize, and prioritize a variety of cyber threats.
Attribute: CYSM.
CISC 5790. Data Mining. (3 Credits)
This course covers methods, algorithms, and applications of data mining. Topics include: representation, measurement, and visualization of data; analysis of large data set using information fusion and statistical combinatorial, and computational techniques; data mining algorithms and models (e.g. decision trees, neural networks, associative rules, support vector machines, machine learning, and genetic algorithms); descriptive vs. predictive modeling; and management of large diversified database systems. Applications are drawn from a variety of areas including information retrieval, market analysis and CRM, e-commerce, financial computing, economic forecasting, social choices, security and safety analysis, bioinformatics, and virtual screening for drug discovery and development.
Attributes: ASDM, CSDA, DATA, DATI, IPED, PMTM.

CISC 5800. Machine Learning. (3 Credits)
This course covers the mathematical and algorithmic underpinnings of core methods in machine learning. Students learn to develop and implement classifiers and learners, using calculus and linear algebra, and they consider learning on fully labeled, partially labeled, and unlabeled data. Students also analyze and implement dimensionality reduction methods. Topics include gradient ascent/descent, support vector machines, neural networks, hidden Markov models, information criteria, factor/component analysis, and expectation-maximization.
Attributes: CSAI, CSDA, DATA, DATI.
Prerequisites: CISC 5450 and CISC 5380 and (CISC 5790 or CISC 6930).

CISC 5825. Computer Algorithms. (3 Credits)
The study of a broad variety of important and useful algorithms for solving problems suitable for computer implementation. Topics include mathematical algorithms, sorting and searching, string processing, geometric algorithms, graph algorithms, combinatorial optimization techniques, and other advanced topics; average and worst-case analysis, time and space complexity, correctness, optimality, and implementation.

CISC 5835. Algorithms for Data Science. (3 Credits)
This course is an introduction to algorithms, especially those that are essential to data science. This course covers algorithms for sorting and searching, as well as greedy algorithms, dynamic programming, and graph algorithms. In addition, this course will focus on time and space analysis of algorithms (including big-O time and space analysis), recurrences, loop invariants, lower bounds, hashing, and NP-completeness. Some advanced data structures—such as trees, stacks, and queues—will be reviewed.
Attributes: CSAI, CSDA, DATA, DATI.

CISC 5850. The Social Network. (3 Credits)
This course is an introduction to social networks which entails the structure, the function, and various applications. Topics include the Internet, information networks and the World-Wide Web, information retrieval and search engine optimization, social media analysis, crowd sourcing, social activity and voting, graph theory and social networks, network dynamics, text mining, natural language processing, and concept search. Emphasis will be on the social network itself.
Attributes: CSAI, CSSO, CYSM.
Prerequisites: CISC 1600 or CISC 1400.

CISC 5900. Information Fusion. (3 Credits)
A study of the structure and function of information fusion. Efficient and effective combination of data or information from a variety of diverse sources, sensors, features, and decisions. Applications and case studies of information fusion and decision making to a plethora of disciplines including science and engineering, cybersecurity and digital networks, medicine and health, social choices and human cognition, business and finance, and management and innovation.
Attributes: CSAI, CSDA, DATA, DATI, PMTM.

CISC 5920. Compiler Construction. (3 Credits)
An introduction to syntax-directed translation of high-level languages into executable code. This course covers both theoretical and practical aspects. Topics include lexical analysis, syntax analysis, intermediate code generation, and optimization; time permitting, object code generation and memory use will be covered. Students who take this course should have completed courses in discrete mathematics and data structures (it is recommended to have also completed a course in computer language theory/theory of computation).

CISC 5950. Big Data Programming. (3 Credits)
Big data analytics has been an emerging field in data mining, health care, bioinformatics, and business analytics. This course provides students both theoretical background and hands-on computing techniques in big data analytics and its applications. The students will learn how to collect, query, and analyze data, and will study related visualization and storage techniques from a computing standpoint. Students will also be exposed to theoretical models in big data analytics. This course covers topics in big data essentials, big data management, algorithms in big data mining and knowledge discovery, and big data applications in health information, social media, finance, mobile computing and other fields. The students are expected to complete several large big data projects and present their results.
Attributes: CSAI, CSSO, DATA, DATI.
Prerequisites: CISC 5380 and (CISC 5790 or CISC 6930).

CISC 6000. Deep Learning. (3 Credits)
This course is an introduction to deep learning, a branch of machine learning typified by deep neural networks. Deep learning is behind many recent advances in AI, ranging from text mining and image recognition to machine translation, planning, and even game playing and autonomous driving. In this course, we will cover a range of topics including basic neural networks, Convolutional network, RNN, LSTM, GAN, Autoencoder and Restricted Boltzmann Machine (RBM). Various learning techniques such as Adam, Dropout, BatchNorm, Xavier initialization, CD-K sampling, etc., will also be explored throughout the course. This is a programming intensive course. Students are required to be proficient in Python programming and have knowledge of basic Machine Learning algorithms and techniques.
Attribute: DATA.
Prerequisite: CISC 5800.
CISC 6070. Red Teaming. (3 Credits)
The intent of this course is to provide students, who are familiar with the foundational knowledge of cybersecurity and penetration testing, with the skills and technology necessary to conduct sophisticated attacks against well-resourced defenders. Students will learn and practice techniques to gain initial access, establish persistence, move laterally, and gain high-level privileges in order to complete objectives. Throughout the course, discussions of modern defensive techniques and capabilities will be discussed as well as known countermeasures. Students who successfully complete the course will be able to participate in red team operations across verticals and be prepared to perform research into discovering and improving techniques. Most importantly, students will be able to understand and improve in-place cybersecurity defenses utilizing an attacker-oriented mindset.

Attributes: CSCY, CYSM.

CISC 6080. Capstone Project in Data Science. (3 Credits)
The goal of this class is to sharpen students’ skills in data science by designing and implementing a capstone project. Through this class, students should gain a deep understanding of state-of-the-art data science technologies and current knowledge. Students are required to finish a large capstone project and are expected to present and write one or more research papers in this class.

CISC 6081. Data Science Practicum. (3 Credits)
This course is for students who desire experience in applying the knowledge and skills acquired in their coursework and laboratory sessions. Students are responsible for arranging a practicum/internship with a business or organization that is related to data science.

CISC 6085. Master’s Thesis in Data Science I. (3 Credits)
Exceptional students may choose to write a master’s thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student’s proficiency in the subject material. A thesis supervisor will be assigned by the department and an oral defense is required.

CISC 6086. Master’s Thesis in Data Science II. (3 Credits)
Exceptional students may choose to write a master’s thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student’s proficiency in the subject material. A thesis supervisor will be assigned by the department and an oral defense is required.

CISC 6090. Capstone Project in Cybersecurity. (3 Credits)
The goal of this class is to sharpen students’ skills in Cybersecurity by designing and implementing a capstone project. After this class, students should gain a deep understanding of state-of-art cybersecurity, technologies and knowledge. Students are required to finish a large capstone project and are expected to present and write one or more research papers in class.

CISC 6091. Cybersecurity Practicum. (3 Credits)
This course is for students who desire experience in applying the knowledge and skills acquired in their course work and laboratory sessions. Students are responsible for arranging a practicum/internship with a business or organization that is related to cybersecurity.

Attribute: CYSM.

CISC 6095. Master’s Thesis in MSCY I. (3 Credits)
Exceptional students may choose to write a master’s thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student’s proficiency in the subject material. A thesis supervisor will be assigned by the department and an oral defense is required.

CISC 6096. Master’s Thesis in Cybersecurity II. (3 Credits)
Exceptional students may choose to write a master’s thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student’s proficiency in the subject material. A thesis supervisor will be assigned by the dept. and an oral defense is required.

CISC 6100. Software Engineering. (3 Credits)
Emphasis is placed on software design process, software implementation, software testing and maintenance. System and software planning, requirement analysis, and software concept will be discuss. Topics covered include detailed design tools, data structure-oriented design, program design, program implantation, and testing.

Attribute: CSSO.

CISC 6170. Special Topics in Data Science. (3 Credits)
This course concentrates on special state-of-art topics in the field of data science. The course content will change from semester to semester.

CISC 6200. Computer Elements & Arch. (3 Credits)
Study of the structure, behavior and design of computers; review of the organization of a computer to the gate, register and processor levels, processor design including parallelism, control design and microprogramming, memory organization, computer system organization including multiple CPU systems. The hardware/software interface and its implications for operating system design will be addressed.

CISC 6210. Natural Language Processing. (3 Credits)
Natural language processing (NLP) is one of the most important technologies of the information age, and a crucial part of artificial intelligence. It is the branch of machine learning and data science that deals with text and speech. This course is designed to introduce how to use computational and statistical methods to gain insight into observed human language phenomena and make computers perform various tasks with human languages. The learning outcomes for students are to learn about major NLP issues and solutions, to become agile with NLP training. Students are required to complete several large projects and present their results in class.

Attribute: DATA.
Prerequisite: CISC 5800.

CISC 6300. Computational Finance. (3 Credits)
This course covers the state-of-the-art quantitative models and their implementations in financial engineering with an emphasis on the computational methods of handling large-scale financial data or big data. The major topics include fixed-income pricing, derivatives and equity instruments, financial time series analysis, numerical PDE methods, Monte Carlo simulations, algorithmic trading models, and related topics. This course assumes students have proficiency in C++ and basic knowledge in quantitative finance models, or equivalent experience/training. Students are required to complete several large projects and present their results in class.

Attribute: CSSO.
CISC 6345. Advanced Database Systems. (3 Credits)

This course aims to enhance students’ software development capabilities and machine learning skills in financial computing. After taking this class, the students should be able to implement complicated financial models or trading algorithms. This course assumes audiences have proficiency in C++ and have basic knowledge in quantitative finance models. The following topics will be covered in this class. Introduction to Financial Software Design; Boost C++; Black-Scholes-Merton variants; Finite difference methods and trees in Option pricing; Monte Carlo Simulations; Machine Learning Models for Trick data; Implementing High-Frequency Trading Systems, and Post-Trade Profitability Analysis.

Attribute: DATA.

Prerequisite: CISC 5350.

CISC 6350. Advanced Financial Programming. (3 Credits)

This course presents students with a thorough background in the method of designing and programming advanced robotic and man-machine interaction. This course assumes audiences have proficiency in C++ or equivalent programming knowledge. The knowledge in quantitative finance models is recommended but not required. Students are required to complete several large projects and present their results in class.

Attributes: CSSO, DATA.

CISC 6352. Advanced Computational Finance. (3 Credits)

This course covers the state-of-the-art quantitative models and algorithms and their implementations in financial engineering with an emphasis on the computational methods of handling large-scale financial data or big data. The major topics include derivatives and equity instruments, financial times series analysis, numerical PDE methods, Monte Carlo simulations, algorithmic trading and high frequency trading (HFT) models, risk management of HFT, and related topics. This course assumes students have proficiency in C++ or equivalent programming knowledge. The knowledge in quantitative finance models is recommended but not required. Students are required to complete several large projects and present their results in class.

Attributes: CSSO, DATA.

CISC 6375. Object Software Design. (3 Credits)

This course is designed as an advanced course in Software Engineering. It includes the following: Short introduction to Object Oriented (OO) technology; Comparisons of C++ and Smalltalk for OO development; the definition of system requirements using OO techniques; the evaluation and selection of OO methods, techniques, and management tools; the collection analysis and testing and use of project metrics; the establishment of requirements for testing and quality assurance. The course will use examples of OO technology in the development of Information Systems and of Real-Time Systems.

Attribute: CSSO.

CISC 6376. Software Design Patterns. (3 Credits)

This programming-intensive course provides an in-depth view of software design patterns, which are reusable solutions to common software problems. The course will begin by providing the rationale and benefits of software design patterns. Example problems will then be studied to investigate the development of good design patterns. Specific design patterns, such as the Observer, State, Adapter, Strategy, and Abstract Factory patterns, will be discussed and utilized in significant programming assignments. Students will become familiar with common design patterns, learn to use design patterns appropriately, and improve their object-oriented design and programming skills. Students will also learn to work collaboratively on significant programming projects. Prior knowledge of Object-Oriented Programming is required; CISC 6375 Object Software Design is recommended.

CISC 6400. Robotics and Animation. (3 Credits)

This course presents students with a thorough background in the method and practice of designing and programming advanced robotic and graphical systems, and will include topics such as motion planning, navigation and mapping, visual perception, depth perception (sonar, stereovision, laser ranging), sensor fusion, behavior-based systems, action planning, and multi-agent systems.

Attributes: CSAI, CSSO.

CISC 6500. Bioinformatics. (3 Credits)

This course studies the relation of (interaction between) molecular biology and information science and the impact and applications of combinatorics, computing, and informatics on the biomedical sciences and clinical processes. Topics include: DNA sequence and alignment, database searching and data analysis, phylogenetic analysis and evolution, genomic and proteomics, structure and function, gene regulatory networks and metabolic pathways, microarray technology, and gene expression algorithms.

Attributes: CSSO, DATA.

CISC 6525. Artificial Intelligence. (3 Credits)

Introduction to the study of the ideas and techniques that enable computers to function intelligently; heuristic approach, cognitive processes, general information processing and problem solving, learning and reasoning; representation, adaption and use of knowledge; analysis and simulation of inductive and deductive processes, natural language, robotics and man-machine interaction.

Attributes: CSAI, DATA.

CISC 6550. Systems Neuroscience. (3 Credits)

This is an introductory course in the study of the structure and function of the brain at the cellular, systems, and cognitive levels. It covers the cells of the nervous systems and how they process information such as electrical and chemical signals. It studies the aggregate, or networks, of neurons, how a brain develops and establishes its complex circuitry, and how they produce higher brain functions such as vision, movement, memory, and learning, perception, emotion, and consciousness. Both invertebrate and vertebrate nervous systems will be included.

Attributes: CSSO, DATA.

CISC 6597. Capstone Project in Computer Science. (3 Credits)

The goal of this class is to provide the practical opportunity for students to combine skills they have learned during their computer science program and use them to design and implement a capstone project. Students are required to address all design, implementation, testing, and evaluation aspects of a large capstone project. They are expected to present and write one or more research papers in class detailing this work. Through this class, students should gain a deep understanding of state-of-art computer science technologies and knowledge, how they can be deployed in a practical application, and how they can be professionally documented and communicated.

CISC 6600. Secure Cyber Networks. (3 Credits)

This graduate course covers the essentials of designing and building a secure local area network, incorporating all elements of the seven layers of the ISO-OSI Model. Students will learn the capabilities, limitations, and vulnerabilities of a cyber network. Students will gain hands-on experience by implementing a secure network environment that is robust in preventing various adversary actions including, among others, extreme hacking and virus propagation.

Attributes: CSCY, CSSO, CYSM.
CISC 6630. Wireless Security. (3 Credits)

CISC 6635. Exploratory Data Analysis and Visualization. (3 Credits)
Data may essential and helpful to inform decision-making and impact public or corporate policy, never the less when visualized with proper context, data has the power to make a change in the world. This course explores the underlying theory and practical concepts in creating visual representations of large amounts of data. It covers core topics in data visualization including: data representation, visualization toolkits, information visualization, flow visualization, and volume rendering techniques. This course will include a significant project component that will typically require programming.
Prerequisite: CISC 5500.

CISC 6640. Privacy and Security in Big Data. (3 Credits)
This course targets the security and privacy issues associated with systems that process and store large amounts of data. The main concern is to process this data in a timely manner without compromising security and privacy of the users. Real world examples will be studied and analyzed to enable students to apply the suitable technological tools and techniques to protect the system and evaluate the suggested solutions. Covered topics include access control mechanisms, privacy protocol and methods, data confidentiality and integrity, security challenges and attacks on big data systems.
Attributes: CYSM, DATA.

CISC 6650. Forensic Computing. (3 Credits)
Computing and digital technology has greatly transformed society and the way we live. Today, our world is filled with an array of complex multiprocessor and interconnected machines that we've all become accustomed to. This course studies technologies and practices for investigating the use, misuse and the adversarial potential of computing systems and digital devices. It will provide unparalleled insight into the digital forensics and legal world, emphasized with practical laboratory projects.
Attributes: CISC, CYSM, DATA.

CISC 6660. Applied Cryptography. (3 Credits)
This course provides an introduction to cryptographic primitives and techniques that comprise the heart of secure protocols that are used in computer and network security. The course has the target of introducing students to the practical applications of cryptography with an overview of its theoretical basis. Students are expected to have some programming familiarity and basic mathematical skills. Covered topics include steganography, block and stream ciphers, secret key encryption (DES, AES, RC-n), primes, random numbers, factoring, and discrete logarithms; Public key encryption (RSA, Diffie-Hellman, Elliptic curve cryptography); Key management, hash functions, digital signatures, certificates and authentication protocols.
Attribute: CYSM.

CISC 6680. Intrusion Detection and Network Forensics. (3 Credits)
This course provides students both theoretical knowledge and hands-on techniques in identifying intrusion detection and network traffic analysis. The students will learn how to identify different attacks through different traceback techniques and grasp network analysis methods and tools to conduct information retrieve from a network forensic standing point. This course covers topics in network forensics, intrusion detection and response, malware forensics, case studies, and related topics in cyber law and ethics. This class assumes the students have basic knowledge in network, and Linux/Unix operating systems. The students are expected to complete several programming oriented team projects and present their results.
Attributes: CSCY, CSNS, DATA.

CISC 6690. Cybersecurity in Business. (3 Credits)
Special emphasis on understanding the value cybersecurity and computer science professionals play in a business organization through the review of the major components and roles in a typical business and the demands and expectation of each. Business components studied include: marketing and sales; production and/or delivery; supporting functions (e.g IT, HR, etc.) and governance and control. Subject areas covered are the understanding of information assets, vulnerabilities and threat vectors related to those assets and the decision-making process supporting investments and maintenance of cybersecurity best practices. Students will better understand their role in a business organization and have a ready framework for cybersecurity decision making as a result of the class. In addition, students can expect to develop an appreciation for the characteristics of a business that best aligns with their personal goals and objectives.
Attribute: CYSM.

CISC 6700. Medical Informatics. (3 Credits)
Databases, information systems, and computer-based approaches have greatly transformed the research of medicine and the practice of physicians in the proper diagnosis and management of patients with a variety of common diseases and disorders. This course will cover the development and evaluation of methods for managing medical data and the integration of diverse and multifaceted hardware and software systems to provide enhanced value in medicine and healthcare. Informatics is not only embraced for imaging and diagnosis but also for clinical practice, decision making, quality and safety, and clinical research.
Attribute: CSDA.
Mutually Exclusive: HINF 6101.

CISC 6725. Computer Networks. (3 Credits)
This course provides an introduction to computer networks, network components, and message transport technologies; transmission links and protocols, SDLC, X.25, BSC, and start/drop; and network architectures, topological design and analysis, local area network design, voice, and integrated networks, and network reliability.
Attribute: CSNS.

CISC 6735. Wireless Networks. (3 Credits)
This course covers the fundamental techniques in the design, operation, and evaluation of wireless networks. Among the topics covered: first, second, third, fourth generation wireless systems, fifth generation-LTE systems cellular wireless networks, medium access techniques, physical layer, protocols (AMPS, IS-95, IS-136, GSM, SPRS, EDGE, WCDMA, cdma2000, etc.) satellite systems, fixed wireless systems, personal area networks (PANs) including Bluetooth and HRF systems, wireless local area networks, (WLANs) technologies, architectures, protocols, and standards, mobility management, wireless sensor networks, and cognitive radio networks and advanced topics. This course is intended for graduate students who have some background on computer networks.
Attribute: CSNS.

CISC 6745. Data Visualization. (3 Credits)
Data may be essential and helpful in inform decision-making and impact public or corporate policy, never the less when visualized with proper context, data has the power to make a change in the world. This course explores the underlying theory and practical concepts in creating visual representation, visualization toolkits, information visualization, flow visualization, and volume rendering techniques. This course will include a significant project component that will typically require programming.
Attribute: DATA.
CISC 6750. IOT Forensics and Security. (3 Credits)
With the exponential growth of Internet of Things (IoT) technology, the forensic examination and security of these objects has garnered increased attention. Moreover, digital forensic examiners have been presented with a unique set of challenges in order to understand how such devices secure, store and process data. This course is structured utilizing modules which will provide students with extensive hands experience in an interactive lab environment that will delve into the issues in IoT forensics and security. Through experimental testing participants will investigate and review the security of home IoT devices. The testing will include: traffic capture, device scanning and the analysis of wireless signals. In addition, a review and analysis of privacy exposure will be conducted, outlining the security vectors and malware used to attack and control IoT devices. Subsequent modules will be comprised of explanation, theory and numerous hands on exercises, culminating in discussion regarding the IoT technology stack and how it impacts digital forensics. Through use of existing digital forensic tools and methodology, we will introduce students to the application of digital forensics in the IoT framework by examining ordinary home devices. Examinations will provide students with hands on experience into a hunt for artifacts, identifying formats of stored data, encoding methods, while documenting their efforts throughout the process. Respective analysis of collection techniques, device workflow and the object data repositories will provide participants with an understanding of the full forensic value of these devices.
Attribute: CYSM.

CISC 6795. Java Programming. (3 Credits)
This course covers Java programming and internet computing with various applications. Topics include: Java programming, object-oriented programming, graphical user interfaces (GUI's) and Applications, multimedia, files and streams, and server communications.
Attributes: CSNS, CSSO.

CISC 6800. Malware Analytics and Software Security. (3 Credits)
This course is the introduction to the fields of the malware analytics and software security at the early graduate level. It covers one of the most important aspects of the cybersecurity - the software perspective of the issue. It approaches the issue from mainly two ends, namely analyzing malicious software, which is intended to compromise the security requirements, and the software development strategies and tactics to prevent vulnerability in the face of attacks. This course will have enough technical details in exemplary scenarios for the students to dissect real world problems, but the main purpose is to establish enough theoretical and background knowledge so that they know where to start an endeavor and how to make an effective investigation or design for new software security problems.
Attributes: CSCY, CYSM.

CISC 6850. Leadership and Management in Cybersecurity. (3 Credits)
In the highly interconnected and instrumented society, big data with great volume, variety and velocity can be an asset but also a liability for individuals and organizations. This course covers a variety of technological, systematic, and policy issues in the management if cyber risk for individual citizens, governmental organizations, and business enterprises. Students will meet with global leaders in cyber security on projects and case studies related to best practices and real life experiences.
Attribute: CYSM.

CISC 6860. Cybersecurity: Technology, Policy, and Law. (3 Credits)
CISC 6875. Parallel Computations. (3 Credits)
Introduction to parallel and multiprocessor/multicore computation, parallel architectures and programming, clusters and grids, parallel algorithms on different models of interconnection networks, network topologies, network reliability and fault tolerance.
Attribute: CSSO.

CISC 6880. Blockchain Technology. (3 Credits)
A blockchain consists of participants who generate transactions, miners who aggregate the transactions and forge blocks for the chain, and the blockchain itself. The blockchain is updated based on some algorithm predetermined by group consensus, and it acts as a decentralized, immutable database. This course will cover fundamentals and advanced topics in blockchain technology. We will discuss each component in a blockchain system, how the components interact, and the general structure and functions of a blockchain. The course will also discuss security mechanisms of blockchain, blockchain system design, blockchain applications and implementations, cryptocurrencies, smart contracts, and the challenges of blockchain.
Attribute: CYSM.

CISC 6920. Incident Response and Risk Management. (3 Credits)
The goal of this course is to provide students knowledge and hands-on forensic techniques in incident detection, analysis, response, and risk management. The course covers topics in incident handling procedures, forensic evidence collection techniques, forensic report writing, investigations in trademark and copyright infringement, corporate espionage, and related topics in cyber law and ethics. The students are assumed to have basic knowledge in Forensic computing. Students are expected to finish team projects, write research paper and present their results.
Attributes: CSCY, CYSM.

CISC 6950. Algorithms and Data Analysis. (3 Credits)
This course will cover data mining and machine learning algorithms for analyzing large data sets as well as the practical issues that arise when applying these algorithms to real-world problems. It will balance theory and practice—the principles of data mining methods will be discussed but students will also acquire hands-on experience using state-of-the-art data mining software to solve scientific and business problems. Students will learn about data mining algorithms for: classification and prediction (decision trees, neural networks, nearest-neighbor, genetic algorithms, Naive Bayes), clustering (K-means), association rule mining (Apriori) and algorithms for handling complex data types (text-mining, image-mining, etc.). In addition, the process for mining/analyzing data will be covered. Each student will, with the aid of the instructor, select and complete an application-oriented or research-oriented course project.
Attributes: ASDM, CSDA, PMTM.

CISC 6991. Internship. (1 to 3 Credits)
This internship course offers students the opportunity to exercise the computer science skills they have learned in a professional environment. Students will be asked to write one or more reports on their internship as the semester proceeds, culminating in a final project report.
CISC 7050. Penetration Testing. (3 Credits)
The course introduces principles and methods in penetration testing and related techniques. This course focuses on understanding and implementing state-of-the-art penetration testing technologies. This course covers topics in penetration testing methods and framework, scanning techniques, penetration test techniques for different network threats and related topics. Students are expected to finish several large team projects, write research paper, and present their results.
Attributes: CSCY, CYSM.

CISC 7999. Dissertation Research in Computer Science. (4 Credits)
Faculty mentored independent dissertation research. 16 Credits required for Ph.D.
Prerequisite: CISC 0960.

CISC 8050. Projects & Internships. (3 Credits)
A course designed to concentrate on special and state-of-the-art topics in computer science; topics are changed from time to time to reflect the rapid change of computer and information technology.

CISC 8070. Projects & Internships in Cyber. (3 or 4 Credits)

CISC 8100. Special Topics in Comp.Science. (3 Credits)
A course designed to concentrate on special and state-of-the-art topics in computer science; topics are changed from time to time to reflect the rapid change of computer and information technology.

CISC 8150. Special Topics in Cybersecurity. (3 Credits)
A course designed to concentrate on special and state of the art topics in cybersecurity; topics are changed from time to time to reflect the rapid change of cybersecurity technology and knowledge.
Attribute: CYSM.

CISC 8598. M.S. Computer Science Thesis I. (3 Credits)
Exceptional students may choose to write a master’s thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student’s proficiency in the subject material. A thesis supervisor will be assigned by the department and an oral defense is required. The student should take this course as the first of two thesis courses.

CISC 8599. M.S. Computer Science Thesis II. (3 Credits)
Exceptional students may choose to write a master’s thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student’s proficiency in the subject material. A thesis supervisor will be assigned by department and an oral defense is required. The student should take this course as the second of the two thesis courses.

CISC 8998. Experiential Learning. (1 to 6 Credits)
This course recognizes credits for professional knowledge in the area of cyber security acquired by the student prior to entering the graduate program.

CISC 8999. Tutorial. (1 to 4 Credits)
Each student either takes an internship at one of the medical schools, hospitals and health organizations or works on a project related to method and practice at the intersection of Biomedicine and Informatics. Students also attend a weekly seminar on a variety of topics in biomedical informatics featuring speakers from academia, industry, and government with diverse perspectives in business, technology, and management.

### Computer Science (M.S.)

#### Requirements

##### Background courses

Students with insufficient background for graduate-level computer science courses may need to take background coursework. Credits do not apply toward the M.S. program. Students entering the program without an undergraduate degree in computer science may need to take one or more of the following, depending on their background:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CISC 5220</td>
<td>Data Structures</td>
<td>3</td>
</tr>
<tr>

<td>Computer Programming C++</td>
<td>3</td>
</tr>
<tr>
<td>CISC 5400</td>
<td>Discrete Structures</td>
<td>3</td>
</tr>
</tbody>
</table>

##### Degree Requirements

The master's degree requires 30 credits of coursework beyond the bachelor's degree, which includes 24 credits of coursework and six credits of a culminating project. It can be completed by a full-time student in three or four semesters. Students are required to choose a concentrations based on their interests. A B-average (3.000) must be maintained in courses taken for the master's degree.

## Cybersecurity (M.S.)

### Overview

The Cybersecurity Master’s program curriculum consists of 10 courses (30 credits) that can be completed over 12 months, following a hybrid (on-campus and online) delivery model. Students who track with their entry cohort can complete the program in three semesters (fall, spring, summer). Students may select to complete a thesis through two courses instead of a capstone project and fifth elective. Classes will be offered in the evenings and during the weekends.

### Prerequisites

All undergraduate majors are welcomed. Professional knowledge or experience equivalent to the following four courses is required:

- CISC 5009: Network Essentials
- CISC 5030: Internet and Web Programming
- CISC 5410: Mobile Device Programming
- CISC 5550: Cloud Computing

---

*Updated: 07-27-2020*
1. Computer Programming with basic algorithms (in C, C++, Java, R or Python) (e.g., CISC 5300 Computer Programming C++ or CISC 5380 Programming with Python)
2. Applied Statistics and Probability (e.g., CISC 5420 Applied Statistics and Probability)
3. Discrete Mathematics including basic combinatorics and graph theory (e.g., CISC 5400 Discrete Structures)

Bridging courses are available for students who are missing one or more of the aforementioned prerequisites. With the permission of the Program Director, these courses can be taken concurrently with the cybersecurity courses. If you are required to take these courses, it will be stated in your admissions letter and the courses must be taken during the first semester.

**Data Science (M.S.)**

**Overview**

**Program Highlights**

*• Designed to meet the demands of an ever-evolving job market*
*• Develop in-depth knowledge of manipulating large data sets and building computational models*
*• Explore specific areas of interests, such as Cybersecurity, Economics, Biology, Psychology, Computational Finance, and Urban Studies*
*• Hands-on experience with cutting-edge technologies such as Tableau, Spark, Deep Learning, and Natural Language Processing*

**Program Basics**

*• Curriculum requires 10 courses for a total of 30 credits, including five core courses, four electives, and a Capstone Project. *
*• A master's thesis is optional – if taken, it consists of two subsequent courses which replace the Capstone Project and one elective. *
*• One (1) internship (optional – if taken, this replaces the Capstone Project) *
*• Designed as a one- to two year program *
*• Evening courses to accommodate working professionals *

**Admissions**

**Prerequisites**

*• Applicants with undergraduate degrees in non-computer science areas are welcome.*
*• An undergraduate degree in a field emphasizing quantitative skills is expected, such as a degree in computer science, information science, engineering, math, physical science, health science, business, economics, psychology, social science or urban and city planning.*
*• Knowledge of discrete math, probability and statistics, including permutations, combinations, descriptive statistics, and basic probabilities concepts.*
*• Basic programming knowledge and a familiarity with Python programming is expected. This knowledge can be acquired via completion of CISC 5380 Programming with Python.*

Admitted students **who seek to bypass** CISC 5380 Programming with Python must take a placement examination, which is administered by the department prior to the beginning of each entry term. The exam covers fundamentals of Python programming language. Students who earn a grade lower than a B are required to enroll in CISC 5380 Programming with Python in their first semester of study. This bridge course can be taken concurrently with courses that fulfill degree requirements.
Guidelines and Information

Completed applications will include each of the following items:

Official degree transcripts confirming prior degree conferral should be ordered at least one month prior to the application deadline. Please ensure that they are sent directly to the Office of Admissions (fuga@fordham.edu) via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458. Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts. Please ensure that all official transcripts from previously attended post-secondary institutions are submitted in English, or are accompanied by a certified English translation. Transcripts and credentials conversion information is available on the GSAS International Students page.

Official GRE scores are required if an applicant wishes to be considered for GSAS merit-based financial aid. GREs for this program are otherwise recommended. The scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code #2259.

Resume/CV (submit via the online application)

Statement of intent (up to 500 words, submitted electronically, via the online application)

Three letters of recommendation (submitted directly by referees via the online application)

English Proficiency

International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)–Cambridge English Proficiency Level language testing results.

Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259. TOEFL minimum 85*, IELTS equivalent 6.5. Please consult the English Proficiency web page for additional information.

*Tuition Rate for Professional Master’s Programs

Please visit the GSAS Tuition and Fees page to view the tuition rate for the Computer and Information Science programs.

Application Deadlines

For information see Application Deadlines.

Conditional Acceptances

There are no conditional acceptances, only changes to degree requirements such as added coursework taken while students are in the program.

Requirements

Degree Requirements

The master’s program in Data Science requires 30 credits of coursework (10 classes), which will typically be completed in one to two years. Classes are offered in the evenings and during weekends. Please consult the Admissions Requirements page for more information about applying to the program.

Updated: 07-27-2020
Financial Computing (Adv Cert)

With the surge of high frequency trading and complex investing models, more and more sophisticated computing techniques and skills are required in the finance industry besides traditional quantitative models. For example, strong C++ based software development and machine-learning skills are essential for a financial engineer in automated trading.

To meet such an urgent strong demand for knowledge in advanced financial computing, the Department of Computer and Information Science in the Graduate School of Arts and Sciences and the Gabelli School of Business have partnered to offer an advanced certificate in financial computing. This certificate program aims at training and sharpening students’ computing skills in handling real world large-scale financial data in addition to financial software development. The state-of-the-art, rigorous, and personalized course work/projects guarantee students’ future success in the job market. Our alumni have won high-salary ‘Quant’ and financial data analytics positions in Wall Street.

The audiences of the financial computing certificate program are future ‘Quant’ or business analytics professionals. We especially welcome students enrolled in the following programs or with the equivalent backgrounds to apply for this certificate program:

- MSQF (Master of Science in Quantitative Finance) in Graduate School of Business Administration
- MSCS (Master of Science in Computer Science) in Graduate School of Arts and Sciences
- MSBA (Master of Science in Business Analytics) in Graduate School of Business Administration
- MSGF (Master of Global Finance) in Graduate School of Business Administration
- Other qualified graduate students.

Please note: The Advanced Certificate in Financial Computing is available only to current Fordham University students.

Requirements

The advanced certificate in financial computing consists of 15 credits including a practicum: Projects and Internships in Financial Computing. Required courses may be substituted for equivalent coursework with the approval of an advisor.

Economics

The Department of Economics at Fordham offers M.A. and Ph.D. degree programs. Our courses are taught in small classes led by our widely published and recognized tenured or tenure track faculty. We provide individualized, personal mentorship to all members of the graduate program.

Graduate students have a variety of concentrations and elective courses to choose from, including game theory, programming, economic history, health economics, and more. We offer concentrations in development, international, financial, and monetary economics. Our M.A. students take a preparatory course in mathematics as well as either financial or applied econometrics.

Ph.D. students take our advanced mathematics course plus three courses in econometrics, both theory and applied. We also offer a distinctive, one-semester teaching practicum, which prepares students to become effective instructors. We hold a yearly workshops for our Ph.D. students to perfect their presentations skills and we have courses designed to teach dissertation writing and research methods. We also have a detailed job market preparation guide and twice yearly meetings for our students to prepare them for the job market.

For more information about Graduate-level Economics, please visit our page on the Fordham website.

Admissions

Completed applications will include each of the following items:

Official Transcripts

Official degree transcripts confirming prior degree conferred should be ordered at least one month prior to the application deadline. Please ensure that they are sent directly to the Office of Admissions via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458. Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts. Please ensure that all official transcripts from previously attended post-secondary institutions are submitted in English, or are accompanied by a certified English translation. Transcripts and credentials conversion information is available on the GSAS International Students page.

Official GRE Scores

Scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code #2259

Resume/CV

Submitted via the online application.

Statement of Intent

Up to 500 words, submitted electronically, via the online application.

Three letters of Recommendation

Submitted directly by referees via the online application.

English Proficiency

International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL).

GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results. Please utilize the instructions on the GSAS English Proficiency page to transmit your TOEFL or IELTS scores. Please note: exemptions from this requirement can be requested by the applicant in her/his application. Kindly consult the GSAS English Proficiency page for exemption guidelines.

For more information about admissions to the Graduate School of Arts and Sciences, please visit our page on the Fordham website.

- Advanced Certificate in Financial Econometrics and Data Analysis (p. 777) (Interdisciplinary)
Courses

ECON 5005. Fair Trade Entrepreneurship. (3 Credits)
Fair trade is a global response to social injustice and poverty. Whether it is capital for “startups” or markets for fair trade coffee, the fair trade movement promotes socially and environmentally responsible business practices here and abroad. This course reviews the fair trade movement's successes and failures to find alternatives to business as usual that reduce poverty and build a sustainable global economy. Students focus on country specific examples of fair trade and microfinance social innovation that reduce poverty by creating viable livelihoods. Marketing, insurance, finance and management can all be applied to build a socially justice and sustainable global economy. “We urgently need a humanism capable of bringing together the different fields of knowledge, including economics, in the service of a more integral and integrating vision” Pope Francis argues in his recent Encyclical Letter, this course explores this vision.

Attributes: CEED, CENS, LALS, LASS.

ECON 5006. Programming Economics and Finance. (3 Credits)
This course introduces the student to various computer programs and their applications in economics and in finance. The course begins with a general review of programming skills using MATLAB. It then presents other statistical and econometric packages such as SAS and STATA. The course concludes with a review of the LATEX program.

ECON 5011. Economic Analysis. (3 Credits)
This course provides a survey of macroeconomic and microeconomic theory intended to prepare those international political economy and development (IPED) students who did not major in economics as undergraduates for IPED’s core courses in economics.

Attribute: IPED.

ECON 5015. Economic Development Policy. (3 Credits)
Using economic methodology, this course examines the interaction between political and economic institutions in the determination of economic policy in developing countries. Topics may include population control, urban bias, agrarian reform, trade policies, foreign aid, and macroeconomic adjustment policies.

Attributes: CEED, CENS, HUCB, IPED, URSG.
Prerequisite: ECON 5011.

ECON 5020. African Economic Development. (3 Credits)
The key objective of this course is to develop an understanding of the economic development problems of Africa, the trade patterns and financial relationships of Africa to the rest of the world. With examples, application, and country case studies, the course covers major development challenges and the possible solutions, the growing influence of African economics in industrialized and developing countries as well as future prospects.

ECON 5032. Economic Theory and Application of Transfer Pricing. (3 Credits)
The reorganization of corporations into large multinational units with diverse operations has given renewed interest in the issue of transfer pricing of goods and services as they move between corporate units. Transfer pricing gives rise to a host of taxation and economic issues. In this course, we focus on economic models for transfer pricing using agency theory and game theory and discuss Hirshleifer’s theories of corporate organization. We then discuss a variety of tax issues that arise under different pricing schemes and work through case studies to provide a well-rounded perspective of how theory relates to practice. Undergraduate seniors who wish to enroll in ECON 5032 must have successfully completed ECON 3118, and obtain the written permission of the professor, graduate department program director and senior class dean to register for this course.

ECON 5040. Strategic Financial Management. (3 Credits)
An introduction to the basic questions facing an investor evaluating firm policy. The course covers debt/equity choice, dividend policy, and principle/agent problems within the firm. The value of the firm under different financial and managerial structures. Current research is surveyed to determine how investors interpret various financial arrangements such as dividend policy, taxes, and stock offerings. Specific attention will be paid to information and incentives of each party in a financial contract in the context of structuring the firm, running the firm efficiently, and if all else fails, bankruptcy.

ECON 5105. Topics in Economic History. (3 Credits)
The course aims to examine how to apply the core ideas and methods of economics to a wide range of hisorical issues, while at the same time broadening and deepening the exchange of ideas between economists and historians.

Attribute: HIST.

ECON 5260. Epidemics and Development Policy. (3 Credits)
A study of epidemics in developing countries, their transmission, control and governmental policy.
Attributes: CEED, CENS, HUCB, INST, IPED, ISIN.

ECON 5280. Urban Economics. (3 Credits)
The field of urban economics addresses a wide variety of urban questions and topics. At the most general level, the field introduces space into economic models and studies the location of economic activity. Urban economics typically addresses four sets of questions: development of urban areas, patterns of development within metropolitan areas, the spatial dimensions of urban problems, and the spatial aspects of local government.

Attributes: CEED, CENS.

ECON 5415. Gender & Economic Development. (3 Credits)
Analyze the social nature of gender and economic development in a cross-cultural perspective. Topics include household labor, occupational segregation and earnings, inequality in market work, poverty, family structure, public policy and gender equity. The course draws on material from economics and other social sciences to analyze the social nature of gender and economic development in a cross-cultural perspective. Topics include women's household labor; occupational segregation and earning inequality in market work; the intersections of gender, class, race, and ethnicity; women and poverty; family structure; public policy and gender equity.

Attributes: CEED, CENS.
ECON 5442. Emerging Markets: South Africa. (3 Credits)
Intended for students from South Africa participating in Fordham's ADV EMRA program, this course is offered every August at the University of Pretoria. Students will collect and analyze economic and financial data on South Africa and compare it with similar data on the emerging markets as well as with more established markets. In addition, students will have the opportunity to interact with South African business, labor and government representatives as well as with US business and government representatives. At the end of the course students will attempt to determine the prospects for foreign equity investment for a particular country.

ECON 5450. Crises, Adjustment and Poverty. (3 Credits)
This course explores how low income countries cope with large fluctuations in foreign aid, resource revenues, and private capital flows. Financial crises, IMF adjustment programs, conditionality, social budgeting, and poverty focused employment/transfer programs are explored using case studies from Africa, Asia, Latin America and Eastern Europe.
Attributes: CEED, CENS, HUCB, IPED.

ECON 5500. Financial Analysis. (3 Credits)
An examination of the pricing of financial instruments and the working of the markets for stocks, bonds, options, and futures contracts.
Attribute: IPED.

ECON 5510. International Economic Policy. (3 Credits)
Using economic methodology, this course examines the interaction between political and economic institutions in the determination of international economic policy. Topics may include protectionism, strategic trade policy, sanctions, and macroeconomic coordinations.
Attributes: INST, IPED, ISIN.
Prerequisite: ECON 5011.

ECON 5515. Int'l Monetary Policy. (3 Credits)
This graduate level course in international macroeconomics and finance is part of the Core Courses of the IPED program. It is designed to help students develop an understanding of international capital markets and provide a conceptual framework for the analysis of macroeconomic policy in an open economy.
Attribute: IPED.

ECON 5540. Emerging Markets. (3 Credits)
Intended primarily for IPED students interested in analyzing the dynamics of emerging financial markets in Africa, Asia, and Latin America. The course compliments POGA 6991- Political Risk Analysis. Students must prepare a country study regarding one country's basic macroeconomic performance, foreign exchange market, and stock market. Use of a computer and the Internet are incorporated into the course to gather data and analyze it statistically. Intended primarily for IPED students, this course explores the dynamics of emerging financial markets in Africa, Asia, Eastern Europe, and Latin America. Complementing and expanding upon the skills learned in POGA 6991 Political Risk Analysis, students learn how to prepare a country study regarding their country's leading macroeconomic indicators, the stability of its foreign exchange market, and the likely returns and risks associated with its stock market. Real time data is obtained from the university's Bloomberg Terminal and the Internet. Additional data is available from standard written and CD-ROM statistical sources. Students are taught how to analyze this data using standard statistical software to forecast trends as well as to estimate returns, volatility and cross correlations. An optimal portfolio of equity investments in emerging markets is estimated. Interest in analyzing the dynamics of emerging financial markets in Africa, Asia, Eastern Europe, and Latin America.

ECON 5541. Emerging Mkts: South Africa. (3 Credits)
Students will analyze economic and financial data in order to judge the prospect for foreign equity investment in South Africa. Students will also meet with union business, government and political leaders. This course can substitute for ECON 5540 Emerging Markets in the EMRA certificate requirements.

ECON 5542. Emerging Mkts: South Africa. (3 Credits)
Intended for students from South Africa participating in Fordham's ADV EMRA Program, this course is offered every August at the University of Pretoria. Students will collect and analyze economic and financial data on South Africa and compare it with similar data on other emerging markets as well as with more established markets. In addition, students will have the opportunity to interact with South African business, labor and government representatives as well as with US business and government representatives. At the end of the courses students will attempt to determine the prospects for foreign equity investments for the particular country.

ECON 5545. Microfinance in Emerging Economies. (3 Credits)
This class will present the basic concepts related to microfinance, its origins and evolution. The class will analyze the main Emerging Economies microfinance models. It will review how Microfinance institutions (MFIs) are organized and how they differ from the banking sector providing loans to micro-entrepreneurs. The class will present a detailed analysis of successful MFIs, its results in terms of micro-business development and its impact on development and social inclusion. It will present the products and instruments used and how MFIs make them attractive and accessible for their clients and at the same time, profitable creating a self sustainable business model.
Attribute: ASSC.

ECON 5551. Domestic and International Banking. (3 Credits)
A survey of domestic, and international banking activities and regulations, foreign exchange futures and options, foreign exchange rates, Eurocurrency markets, interest rate swaps, American banking regulations, hedging foreign exchange and interest rate risk, and financial innovation.
Attribute: IPED.

ECON 5570. Global Financial Markets. (3 Credits)
The course describes the markets and regulatory structures in which firms operate and the types of financial instruments used in developed and developing countries. Examines sources of risk investors face as well as how the financial system itself plays a role in development. An examination of financial markets in developed and developing countries. This course describes the markets and regulatory structures in which firms operate to raise funds and the type of financial instruments used. Attention is paid to sources of risk investors face domestically and internationally and the pricing of that risk. The course also looks at how firms operate under the financial constraints of a developing economy as well as how the financial system itself may play a role in affecting the rate of development. Satisfies IPED students the GBA certificate prerequisite of FN6411 Financial Environment. Designed to complement topics covered in ECGA 5551 Domestic and International Banking.
Attributes: INST, IPED, ISIN.
ECON 5590. Health Economics. (3 Credits)
The aim is to evaluate health expenditures and health policies in both the US and in Developing Countries using a common framework that integrates equity and efficiency. The course covers cost minimization, cost-effectiveness analysis, cost-utility analysis and cost-benefit analysis. All theories are matched with an application related to an actual policy expenditure decision. Applications related to the US include valuing physician service, alcohol treatment, inpatient care, diagnostic related groups (DRGS), psychiatric hospitals, Medicare payments, and bills charged to patients. Applications of special interest to developing countries include vaccinations, Disability Adjusted Life Years (DALYS) and the global burden of disease, user fees and various interventions for HIV/AIDS.

ECON 5600. Health and Development. (3 Credits)
This course introduces students to the field of health and development. The objective is to cover a range of theoretical and empirical topics relevant to understanding health and healthcare policies in developing countries. Microeconomic techniques are used to understand the demand and supply of health, the measurement of health over the human life cycle (in-utero, early childhood, adolescence, working-age population, aging population), and the role of public policy in improving the demand and supply of health over the human life cycle. In this interdisciplinary course, students will be exposed to studies from many related fields, in particular development studies, public health, and disability studies. For select topics, students will learn how to measure and analyze data that contributes to health policy debates (related to subsidies, incentives, insurance, and others) in developing countries. The course is aimed toward students interested in understanding health and health care policies in developing countries.

ECON 5700. Mathematical Methods in Economics I. (3 Credits)
The primary objective of this course is to provide incoming Ph.D. students with solid mathematical foundations necessary for the first-year sequence of theory and econometric courses. This course is designed on the presumption that students will have already been exposed to some of this material in previous studies.

ECON 5710. Mathematical Analysis in Economics. (3 Credits)
An introduction to linear algebra and differential calculus, as used in economics. Topics include matrix algebra, determinants, solutions of systems of linear equations, differentiation, single variable optimization, and an introduction to multivariate and constrained optimization.

ECON 5740. GIS Mapping: Stata and R Prog. (3 Credits)
This course studies the mapping of long data sets into geographical information systems (GIS) by programming SATA and R.

ECON 5750. Game Theory. (3 Credits)
In this course we examine economic and social networks and their corresponding economic effects. We cover the measurement and common regularities of social network properties and popular models of network formation. We apply these tools to topics of interest which may include: Labor Markets, The Spread of Infectious Diseases, The Spread of Financial Information, The Spread of New Technologies/ Fads/ Fashions, Marketing, Social Norms, Game Theory and Other Strategic Interactions, Immigration and Social Capital, Industrial Organization.

ECON 5760. Computational Macroeconomics/Finance. (3 Credits)
The aim of this course is to explore methods used to compute numerical solutions to dynamic stochastic general equilibrium (DSGE) models with applications to both macroeconomics and finance. The course begins with a rigorous exploration of numerical methods including function approximation, numerical differentiation and integration, non-linear equations, numerical optimization, and the simulation of multivariate Markov processes. Utilizing these tools, we will pursue solution methods such as perturbation methods, discrete state space methods, and parameterized expectations.

ECON 5771. Project Assessment. (3 Credits)
Uses the logical framework analysis frequently mandated by USAID to design a results based system to monitor and evaluate small community development projects.

ECON 5808. Microfinance and Migration. (3 Credits)
Migration, access to credit (microfinance) and remittances can create employment and education opportunities for poor families, particularly women. Interdisciplinary case studies from Mexico, the DR, the Bronx, Amsterdam, Nigeria, China, Bangladesh and India show how race, class and gender affect employment outcomes.

ECON 6010. Microeconomic Theory I. (3 Credits)

ECON 6020. Macroeconomic Theory I. (3 Credits)
Classical, Keynesian, and contemporary analysis of income, employment, and price determination. Rational expectations in macro models. Dynamics of inflation and inflationary expectations.

ECON 6030. Global Managerial Economics. (3 Credits)
The application of economic theory and decision science tools by global firms to find optimal solutions to managerial decisions problems. The topics covered are new managerial theories of organizations in the globalized world of today; the theory and estimation of demand, production and costs, and their relationship to output and prices under various market structures.

ECON 6240. Financial Economics. (3 Credits)
A study of the fundamental methods and pricing techniques in Financial Economics. The course studies valuation of fixed income securities, stocks, and derivative contracts. Course description updated (Item 6) Fall 06. An analysis of asset pricing and financial market structure.

ECON 6310. Monetary Policy. (3 Credits)
The impact, transmission, and incidence of monetary policy, central bank control of the money supply, rational expectations, and the effectiveness of monetary policy.

ECON 6320. Monetary Theory. (3 Credits)
This course is designed as an advanced macroeconomics course for students interested in pursuing monetary or macroeconomics topics beyond core topics in a graduate course. The course develops a baseline, simplified, general equilibrium model with money and then considers a fully specified New Keynesian general equilibrium model. The course covers a number of traditional issues in monetary theory: price and wage rigidity as well as unemployment. It also covers recent issues: financial frictions and search frictions in the labor market.
ECON 6340. Financial Theory. (3 Credits)
The theory of financial decision making, risk, and risk aversion, advanced asset pricing models, empirical regularities of financial markets.
Prerequisites: ECON 6710 or ECON 6700.

ECON 6440. Development Economics. (3 Credits)
The objective of this course is to provide students with an understanding of the causes and consequences of economic deprivation. In this course, the household is the major unit of analysis. The course covers topics in poverty, health, education, program evaluation (randomized control trials and selected non-experimental evaluation methods), microfinance, and the interplay between development and psychology. We will draw lessons from policy experiments in developing countries to understand what ‘works’ and what does not.

Attribute: IPED.

ECON 6460. Agriculture and Development. (3 Credits)
Topics in agricultural economics including food security and environmental issues.
Attributes: ABGS, CEED, CENS, IPED.

ECON 6470. Growth and Development. (3 Credits)
A survey of growth models and statistical evidence to determine what causes growth rate to vary among countries and over time. Topics include the source of economic growth, growth with balance of payments adjustments, capital inflows and growth, and north-south growth models. Prerequisites ECGA 5410 and ECGA 5710. Growth models and statistical evidence are surveyed to determine what causes growth rates to vary among countries and over time. Topics include the sources of economic growth, growth with balance of payments adjustment, capital inflow and growth, and North-South growth models. Prerequisites: Economic Development Policy and Applied Econometrics or the equivalent.
Attributes: INST, IPED, ISIN.
Prerequisites: ECON 5710 or ECON 5700.

ECON 6480. Environmental and Resource Economics. (3 Credits)
This course considers environmental/protection and natural resource management as elements of international policy development and planning.
Attribute: IPED.

ECON 6490. Foreign Aid and Development. (3 Credits)
This course examines both the economic and the political role of foreign aid in development. Economic topics may include economic growth, agricultural development, food aid, the environment, health, education, and emergencies. Political topics may include alliance building, conflict resolution, and governance.
Attributes: CEED, CENS, HULI, INST, IPED, ISIN.

ECON 6510. International Trade. (3 Credits)
Attribute: IPED.

ECON 6530. International Economics of Growth and Development. (3 Credits)
International Economics of Growth and Development studies those aspects of development that are related to international economics. Subjects covered can include the connection between economic growth and international trade, the terms of trade and economic development, export instability and economic development, import substitution versus export promotion, international labor migration, and international capital flows.

ECON 6560. International Finance. (3 Credits)
Attributes: INST, IPED, ISIN.

ECON 6700. Mathematical Methods in Economics II. (3 Credits)
This course covers advanced mathematical techniques used in economics, including exponential and logarithmic functions, integration, multivariate and equality-constrained optimization, dynamic equations and systems of dynamic equations, as well as more advanced optimization techniques.

ECON 6770. Microfinance in Emerging Economies. (3 Credits)
This class will present the basic concepts related to microfinance, its origins and evolutions. The class will analyze the main Emerging Economics microfinance models. It will review how Microfinance Institutions (MFIs) are organized and how they differ from the banking sector providing loans to micro-entrepreneurs. The class will present a detailed analysis of successful MFI's, its results in terms of micro-business development and its impact on development and social inclusions. It will present the products and instruments used and how MFI's make them attractive and accessible for their clients and at the same time, profitable creating a self sustainable business model.

ECON 6910. Applied Econometrics. (3 Credits)
Basic techniques of econometric theory, including applications in consumer theory, theory of the firm, and in macroeconomics, as well as a review of statistical methods. Some computer work is assigned.
Attributes: DATA, IPED.

ECON 6950. Financial Econometrics. (3 Credits)
Hypothesis testing, and modeling, with respect to financial data.
Attributes: ASDM, DATA.

ECON 6970. Applied Microeconometrics. (3 Credits)
The primary goal of the course is to improve students’ ability to conduct high-level empirical research, combining economics, econometrics, and data. The course will specifically cover instrumental variables estimation, regression discontinuity, propensity score matching, control function approach, randomized control trials, static panel data models, and dynamic panel data models. The course is intended to be particularly useful for advanced Ph.D. students and master’s students planning to write or currently writing a thesis. The course will mainly draw on a series of high-quality journal publications from the field of applied microeconomics that use the aforementioned applied econometric techniques for causal inference.
Prerequisite: ECON 6910.

ECON 7010. Microeconomic Theory II. (3 Credits)
Advanced topics in demand and production theory, human capital, theories of interest, technological change, general equilibrium, and welfare economics.
ECON 7020. Macroeconomic Theory II. (3 Credits)
Macroeconomics II is focused on the dynamic behavior of households, firms, and the aggregate economy. The course consists of three parts. The first part focuses on the theory of consumption behavior and savings at the individual and aggregate level. The second part of the course investigates overlapping-generations models (OLG) focusing on both endowment and production economies. Finally, the course reviews real business cycle theory and concludes by exploring some relatively recent developments in the formulation and computation of heterogeneous agent models.

ECON 7910. Econometrics I. (3 Credits)
An examination of the standard linear model and generalized least squares. Hypothesis formulation, model specification, estimation and testing techniques, using matrix algebra.

ECON 7920. Econometrics II. (3 Credits)
An advanced treatment of select topics in econometrics, including sophisticated simultaneous equation estimation, asymptotic distribution theory, time series analysis, forecasting and Bayesian inference.

ECON 7995. Teaching Introductory Economics. (0 Credits)
This course is intended for graduate-student Teaching Fellows. It provides training in all aspects of teaching introductory courses in Macro and Microeconomics. The faculty instructor will visit each Teaching Fellow's classroom to observe and advise on the TF's lecture style and technique. Participants in this course will meet periodically to discuss all aspects of teaching, including the preparation of a syllabus, the use of instructor software, writing and grading exams, and developing assessments.

ECON 8100. Economics Internship. (0.5 Credits)
The Economics Internship course provides Economics graduate students the opportunity to accumulate relevant professional experience and practical training that they may need.

ECON 8570. Seminar in International Economics. (3 Credits)
The seminar requires the preparation of a research paper on an aspect of international trade or international finance, such as the gains from trade, trade policies, economic integration, foreign direct investments, international migration, growth trade, trade and development; exchange rate dynamics, international financial flows, and the international monetary system. Requirements: International Trade (ECON 6510) and International Finance (ECON 6560)

ECON 8600. Research and Writing in Economics. (3 Credits)
The course will aim to develop key skills for economics research. These skills will be imparted through lectures, discussions, presentations, homework assignments, and as part of a research paper the students will be required to prepare and present. The course will also provide a forum for students to present and discuss ideas, literature reviews and methodologies.

ECON 8999. Independent Study. (0 to 4 Credits)

ECON 9999. Dissertation Direction. (1 Credit)

**Economics (M.A.) Requirements**
The Master’s in Economics program requires 30 credits of coursework (10 classes) and the passing of a comprehensive exam. Full-time students usually complete the M.A. within a 12-month period. Classes are offered in the evenings at 5:30 p.m. and 7:30 p.m. at Fordham University Rose Hill campus. M.A. candidates must maintain a 3.0 [B] average in their course work.

**Prerequisites**
An undergraduate degree in a field emphasizing economics and/or quantitative skills is expected, such as a degree in economics or international political economy, or a degree in math, finance, psychology, computer science, or business with a minor in economics. The following courses or equivalent should be taken prior to beginning the M.A. in Economics program:

- Intermediate-Level Macroeconomics and Microeconomics
- Math for Economists OR Calculus I and Linear Algebra
- Statistics I and Statistics II (Statistical Decision Making)

If these classes were not completed with a previous degree, then the required classes will be added to a student's admission. These classes must be taken in the first semester or prior to beginning the program (e.g., during the summer or previous semester).

* Economics M.A. and Ph.D. students cannot use a course marked with an asterisk (*) as an elective unless they obtain prior approval from the associate chair for graduate studies in economics.

Comprehensive Examination

The comprehensive exam in economics tests knowledge of microeconomics and macroeconomics and is taken after completion of ECON 6010 and ECON 6020. It is a three-hour written certification examination and is offered twice per year, in January and at the end of May/early June. Students are exempt from the M.A. certification if they pass the Ph.D. certification examinations in economic theory.

Economics (Ph.D.)

Requirements

Candidates must complete 63 credits [21 courses] beyond the bachelor's degree, including at least 33 credits [11 courses] beyond the Economics M.A. taken at Fordham (p. 745), or 45 credits [15 courses] beyond an M.B.A. or a non-Fordham M.A. in Economics or in a related field. Ph.D. candidates must maintain a 3.5 [B+] average in course work to remain in the program.

Candidates must certify in Macroeconomic Theory and Microeconomic Theory in addition to three of the four fields of concentration offered by the department. Certification in economic theory. Two of the fields are certified through written examination. Certification in the third field is achieved by receiving a 3.5 [B+] or higher in the course work in that field. Each examination may be repeated once.

### English

The Department of English at Fordham offers M.A. and Ph.D. degree programs. In addition to offering small, seminar-style courses led by our widely published and recognized faculty, we provide individualized, personal mentorship to all members of the graduate program. Ph.D. students take our distinctive, two-semester teaching practicum, which prepares them to become effective instructors. M.A. students complete capstone writing projects while working closely with faculty mentors in their chosen fields of interest. We also run numerous workshops on dissertation writing, publishing, and other topics related to professionalization, and we have a dedicated faculty member who serves as our job placement officer.

Ph.D. students with a prior master's degree are eligible to receive five years of funding, while those without prior master's are eligible for six years of funding. M.A. students may apply for competitive funding for the two-year program.

### Admissions

Completed applications include:

#### Statement of Intent

Your Statement of Intent should characterize your identity as a literary scholar and your aspirations as a graduate student of literature at Fordham. It should detail your intellectual preparation for such study in an undergraduate and/or Master's degree program, and describe in specific terms your current research interests—the questions, texts, authors, genres, periods, and/or traditions in which you are most engaged. (Maximum 500 words).

#### Writing Sample

Your writing sample should be an original scholarly essay of 15-25 pages, preferably written for an upper-level literature course. This essay should reflect your scholarly interests and intellectual potential. It may be submitted either in a word processing program file or as a PDF file.

### Recommendations

Three letters of recommendation submitted via the online application

### Transcript

International transcripts should be translated.

### CV or resume

Include your full legal name, permanent and local/current addresses and contact numbers, and any relevant professional and scholarly experience (max 5 pages).

### GRE General Test

Institution Code 2259. The GRE Subject Test in Literature is NOT required for M.A. or Ph.D. applications.

### English Proficiency

TOEFL test results must be submitted by International Applicants: International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results.

Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259.

NOTE: Students who have completed a degree (undergraduate or graduate) at an English-language university are exempt from the TOEFL requirement.

### Ph.D. Applicants

Ph.D. applicants are not required to hold an M.A., and all admitted Ph.D.’s are funded.

Ph.D. candidates must select an Area of Interest from:

- Old English
- Medieval
- Early Modern/Renaissance
- Eighteenth-Century British
- Nineteenth-Century British
- Twentieth and Twenty-First Century British
- Early American
- Nineteenth Century American
- Twentieth and Twenty-First Century American

For more information about admissions to the Graduate School of Arts and Sciences, please visit this page on the Fordham website.

### Programs

- English (M.A.) (p. 748)
- English (Ph.D.) (p. 749)

Updated: 07-27-2020
English (M.A.)

Requirements

Course Title Credits

Distributive Requirements

One class in each period: 9

- Literature before 1500
- Literature 1500-1850
- Literature 1850-present

Difference and Intersectionality course 3

Electives

Five electives, chosen from any graduate-level English course 15

Capstone

ENGL 8996 Master's Capstone 3

Language Requirement

Demonstrate reading knowledge of a foreign language, through one of the following: 3

- FREN 5090 French for Reading
- ITAL 5090 Italian for Reading
- SPAN 5090 Spanish for Reading

- GERM 5001 Graduate Reading in German I
  & GERM 5002 and Grad.Readg.in German II
- LATN 5090 Latin for Reading
- ZZGA 0941 GSAS Language Exam 1

Total Credits 30

1. Students may enroll in courses in other departments with permission of the English Director of Graduate Studies.
2. Student must have completed at least two English M.A. courses to register for the 3-credit Capstone. More information about the capstone is available on our page on the Fordham website.
3. Some of our students fulfill this requirement in this way, but more often they opt for one of the other modes of fulfillment, listed on our website (options 3 and 4 are very common).

Students should select their courses carefully and consult periodically with the Graduate Director to ensure that they are fulfilling all requirements. Not all courses are offered every year; students must fulfill their requirements from courses offered during their tenure within the program.

Literature before 1500 courses

Courses in this group have the ENG1 attribute.

Course Title Credits

ENGL 5111 Race, Religion, and Monstrosity in Medieval Literature 3

ENGL 5208 The English Language 1154-1776 3

ENGL 5210 Intro Old Norse Lang & Lit 3

ENGL 5211 Introduction to Old English Language and Literature 3

ENGL 5216 Three Medieval Embodiments 3

ENGL 5261 Malory: Cultures of the C15 3

ENGL 5264 Chaucer 3

ENGL 5300 Occitania: Language and Power 3

ENGL 5616 Medieval Communities and Modern Thought 3

ENGL 5621 Medieval to Early Modern Drama 3

ENGL 5625 Medieval British Historical Writing 3

ENGL 5626 Late Medieval Autobiography: T. Hoccleve, O. Bokenham, M. Kempe 3

ENGL 5624 French of England: Texts and Literacies in a Multilingual Culture 3

ENGL 6231 Late Medieval Women 3

ENGL 6235 Medieval Travel Narrative 3

ENGL 6237 The French of England II 3

MVST 5095 Medieval Pilgrimage 4

MVST 5300 Occitania: Language and Power 4

MVST 5305 Writing East: Outremer and Identity in the Middle Ages 4

MVST 5707 Meditation, Contemplation, and the Spiritual Senses 4

Literature 1500-1850 courses

Courses in this group have the ENG2 attribute.

Course Title Credits

ENGL 5022 Shakespeare's History Plays 3

ENGL 5104 Natural History and Ecology 3

ENGL 5225 Jane Austen in Context 3

ENGL 5315 Periodization: Early Modern and Other Literatures 3

ENGL 5345 Theatrical Enterprise in Early Modern England 3

ENGL 5541 Climate Change and Literature 3

ENGL 5542 Early Black Atlantic Archives 3

ENGL 5616 Romanticism and Private Life 3

ENGL 5622 Eighteenth Century Travel 3

ENGL 5718 Modern Language Politics 3

ENGL 5841 Early American Media 3

ENGL 5845 Early American Novel 3

ENGL 5849 Pre-1900 American Literature 3

ENGL 5930 Neuro-Literature in Historical Perspective 3

ENGL 5985 Introduction to Early Modern Studies 3

ENGL 5989 Major Early Modern Texts and the Dynamics of Space and Place 3

ENGL 6101 Rereading Close Reading:Hist Perspectives,Contemporary Challenges/Shakespeare's Poetry,Spenser,Don 3

ENGL 6103 News and Plays: 1660-1779 3

ENGL 6212 Medieval to Early Modern Drama 3

ENGL 6216 Late Medieval Autobiography: T. Hoccleve, O. Bokenham, M. Kempe 3

ENGL 6236 Romanticism and Peace 3

ENGL 6250 Postcolonial Middle Ages 3

ENGL 6506 The Joseph Johnson Circle 3

Updated: 07-27-2020
ENGL 6751 The New Formalism and Early Modern Literature 3
ENGL 6800 God and Mammon in British America 3
ENGL 7007 Displacing the Renaissance: Travel, Race, and Colonialism 3
ENGL 7021 Romanticism and Ecocriticism 3
ENGL 7829 Fict Pub Sph: Am Lit 1776-1900 3

Literature 1850-Present courses
Courses in this group have the ENG3 attribute.

English (Ph.D.) Requirements

Students must complete thirteen (13) courses (39 credits). Those entering with an M.A. degree are required to complete 10 courses (30 credits). Students must also complete two courses (0 credits) or examinations for reading knowledge of two foreign languages, pass a Ph.D. comprehensive examination, and complete a dissertation and oral dissertation defense. Doctoral students have eight (8) years to complete all of the requirements for the degree. Students must maintain satisfactory academic progress, including a minimum 3.5 GPA and maintenance of continuous enrollment.

Curriculum

Students should select their courses carefully and consult periodically with the Graduate Director to ensure that they are fulfilling all requirements. Not all courses are offered every year; students must fulfill their requirements from courses offered during their tenure within the program.
Language Requirements

Before taking their PhD Comprehensive exam:

PhD students must demonstrate reading knowledge of two foreign languages. PhD students must fulfill at least one language requirement by the beginning of Fall semester of the 2nd year (i.e., within the Fall, Spring, or Summer of the 1st year in the program). The second language requirement should then be fulfilled before the beginning of Fall semester of the 3rd year and before, or at least within, the semester in which the PhD comprehensive exam is taken.

Before completing their MA Capstone.

Students must demonstrate reading knowledge of one foreign language. Students may fulfill their language requirements in several ways:

1. Pass a zero-credit Graduate Reading Courses (see GSAS Tuition and Fees for cost). Students should check my.fordham.edu for the current graduate reading language courses.

2. Pass an exam with the Graduate School of Arts & Sciences’ Modern Languages and Literatures (MLL) or Classics Departments (see GSAS Tuition and Fees for cost). Taking an exam might be a good option for those students who have studied a language at another institution. Exams at Fordham are not listed on transcripts until successfully passed.

3. Pass an exam administered by the English Department. Exams in Spanish, French, German, Hebrew, Icelandic, Latin, Swedish, Danish, Irish, and other languages may be taken without fee within the English Department any time during the academic year. Contact the DGS to set up an appointment.

4. For incoming PhD students who hold an MA, we accept proof of one foreign language requirement fulfilled during the course of their MA work.

5. For incoming and currently enrolled students, we accept graduate-level foreign language courses (such as ‘French for Reading’) taken at other institutions. Students must submit a copy of the course syllabus to the DGS for approval.

6. We accept an undergraduate degree earned in a foreign language in fulfillment of one language requirement. For instance, if a student’s undergraduate school was in Rome and the coursework was conducted in Italian, that student’s undergraduate transcript would fulfill one language requirement (no testing is required).

Scheduling An Exam At Modern Languages and Literatures

To schedule an exam download and review the Modern Languages and Literatures (MLL) Assessment Policy and Schedule from under English website Forms and Resources page. For an exam in Latin, contact the Classics Department Chairperson.

PhD Comprehensive Exam

Timeframe

PhD students will take the oral portion of the Comprehensive Exam at the end of their second year in the program, either in May or in late August.
In May, the Exam will take place on the designated Reading Day, as indicated on the FCHR academic calendar. In late August, it will take place on one of two Exam Days, the two non-holiday weekdays before the first day of fall semester classes.

The May Exam is strongly recommended as it allows students to begin developing their dissertation proposals during the summer before they begin teaching.

**Format**

The PhD Comprehensive Exam consists of two components:

- A revised course essay
- A two-hour oral exam covering one major field and two minor fields

**Exam Committee**

The PhD Comprehensive Exam Committee will consist of four English department faculty members, one of whom serves as the Committee Chair.

The student, in consultation with the Director of Graduate Studies (DGS), will select the Committee Chair, and, in consultation with the Committee Chair, one Committee Member. The two remaining Committee Members will be selected by the DGS.

Committees must be finalized during the Fall semester prior to the May or August exam date (see Planning and Registering for Exams below and in the New PhD Comprehensive Examination Document).

**Planning and Registering for Exams**

To register, students:

- Begin planning their exams in consultation with the DGS by the beginning of the Fall semester of the second year.
- Review the PhD Comprehensive Examination Document.
- Use DegreeWorks to verify that all your degree requirements have been met or are in progress.
- Follow the instructions on the PhD Comprehensive Exam Registration Form (CERF) and submit a completed, signed hard copy and an emailed Word file version of the CERF to the graduate administrator.
- In the Fall semester, if taking the May exam, register for the Spring semester ENGL 0930 PhD Comprehensive Examination-English through my.fordham.edu.
- If taking the August exam and not taking any credit bearing coursework, register for the Spring semester for ENGL 0912 Requirement Preparation and then register for the Fall for ENGL 0930 PhD Comprehensive Examination-English.
- These registrations must be completed through my.fordham.edu by the add/drop deadline for continuing students as indicated on the GSAS Academic Calendar.

**Exam Results**

After the oral exam has taken place, the committee will grade the student’s entire Exam as a whole and immediately communicate the result to the student. Written and oral portions of the exam will be graded together and a student will receive only one Exam grade.

GSAS grades include Pass, High Pass, and Failure. All grades require the agreement of at least three of the four examiners.

A Pass grade requires the oral and written expression of a sound conceptual grasp of literary history and form, as well as evidence of a solid familiarity with the individual works discussed. Successful students are able to respond productively to questions and argue points with clarity and specificity, while demonstrating competent knowledge of their major and minor fields.

A High Pass grade requires a higher order of synthetic understanding, historical range, original insight, theoretical sophistication, and detailed recollection. In assigning a High Pass, Exam Committees look for evidence of serious and sustained independent thinking.

Students who fail the exam may retake it once, within six months of the first attempt. The first failure does not appear on a student’s transcript. Students may read faculty comments on their exams after submitting a written request to the graduate administrator.

Students whose Exam is only marginally passable but not indicative of the ability to complete a dissertation will receive a departmental grade of Low Pass. Because this grade is officially recorded as a Pass, it allows for a student to receive the MPhil degree. But students receiving a Low Pass will not be allowed to continue work toward the PhD

For further information about the PhD Comprehensive Exam, please review the PhD Comprehensive Exam Document and consult the GSAS Policies and Procedures Guidebook available through the GSAS website and the English Department website (under Forms and Resources).

**Dissertation Prospectus**

**Information and Instructions**

Within two weeks of passing the Comprehensive Exam, you should identify and confirm a dissertation mentor. Send an email to your mentor, copying the graduate administrator (GA) and the Director of Graduate Studies (DGS), and asking the mentor to reply to all (GA, DGS, and student), so the department has a record of the mentorship.

Enrollment in the mentor-appropriate Proposal Development is required (one credit) for all semesters up to and including the semester in which the prospectus is approved with the exception of the one semester immediately following the exam. In that semester you may enroll in ENGL 0950 Proposal Development, a non-assigned section of this administrative course.

**English PhD Teaching Practicum**

The required 10th course for English PhD students consists of sequenced pedagogy training spanning two semesters.

**Description**

ENGL 5999 Colloquium: Pedagogy Theory/Practice 1 is the first part of the Teaching Practicum and is to be taken in the spring of the English PhD student’s 2nd year (before teaching). This part includes individual interviews, assignment of written work, and practice teaching. Each student will have a mentor, complete a portfolio of materials, and create multiple assignments.

ENGL 5999 is graded as Pass or Fail. Once students receive a grade of Pass for ENGL 5999, they will be approved to take the second part of the course in the fall semester (when English PhD students begin to teach). The second part, ENGL 6004 Colloquium: Pedagogy Theo/Pra (taken in the fall of the English PhD student’s 3rd year), introduces students to different pedagogical approaches and methods.
Registration
Students take the first part of the Teaching Practicum (ENGL 5999) in the spring of their 2nd Year. Students register themselves through my.fordham.edu with the CRN for that particular semester. Students must receive a grade of Pass in ENGL 5999 for enrollment in the second part of the Practicum.

Students register for the second part of the Practicum, ENGL 6004, in my.fordham.edu using an override provided to them by the Graduate Administrator.

Although the seminar introduces students to a variety of pedagogical issues, meetings will focus on the teaching of English Composition/Rhetoric, a course that is essential to Fordham’s Writing Program.

Over the course of their careers at Fordham University, students who have successfully completed the sequenced training will have the opportunity to teach English Composition/Rhetoric and, in some cases, literature courses.

Dissertation Chapter Meeting
Information and Instructions
No later than eight months after the approval of the dissertation prospectus, the student must have a group meeting with the dissertation adviser and committee members to discuss a draft of a dissertation chapter. Meetings that happen well before the eighth month are permitted and encouraged.

The exact parameters of the meeting are up to the adviser and committee members, but, in most cases, the meeting need not extend beyond an hour. Meetings may take place in person, via Skype, on the phone, or in any other format that the adviser and committee members determine to be appropriate.

The adviser and committee members will not issue a formal evaluation or grade as a result of the meeting (i.e., the meeting is not an exam). Rather, the point of the meeting is to promote timely completion of a chapter draft and to provide concerted, coordinated feedback at an early stage in the dissertation writing process. Because the goal is to facilitate the writing process, the adviser and student also have flexibility in deciding what constitutes a chapter draft and what will be presented to the committee.

If a dissertation chapter meeting is not held within eight months of the approval of the prospectus, the student must send the DGS a plan for completion of the chapter draft and holding of the meeting endorsed by his or her adviser.

If the eight-month deadline for the meeting falls during a period when school is not in session (i.e., winter break, spring break, Easter break, or summer break), the chapter draft is still due within eight months. The meeting, however, can be postponed to the next available opportunity (for example, if the eight-month deadline falls in July, the chapter draft would still be due in July, but the meeting could be held in September).

Health Administration
Steeped in Fordham’s Jesuit ethos of cura personalis, which emphasizes care of the whole person and deep reverence for her or his human potential, our program will prepare you to be an ethically informed and highly skilled leader who is equipped to build new models of care while maintaining a patient-centered approach.

- Engage deeply in healthcare management’s most dynamic issues, including finance, communication and negotiation, operations, electronic medical records, leadership, law and regulatory issues, and ethics
- Enrich your coursework with the resources of the Global Healthcare Innovation Management Center, run by the program’s director, Falguni Sen, Ph.D.
- Participate in a yearlong case study, developing practical knowledge and ethical decision-making skills
- Complete a capstone project that is closely mentored and focused on policy-relevant research
- Network at events featuring thought leaders in the field

Admissions
Completed applications for the M.S. in Health Administration will include each of the following items:

Resume
Up to two pages in length (submit via the online application).

Official Transcripts
Official degree transcripts confirming prior degree conferral should be ordered at least one month prior to the application deadline. Please ensure that they are sent directly to the Office of Admissions via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458. Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.

Statement of Intent
In up to 500 words, describe your interest in the program, what you hope to gain personally and professionally from the program, and your commitment to the field. Please highlight relevant professional, personal, and academic experience (submit via the online application).

Recommendations
Two letters of recommendation submitted directly by referees via the online application.

English Proficiency
International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results.

Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259.
A waiver can be requested based on your educational history at a U.S.-based institution and if the official language of your country of origin/nationality is English.

If your native language is not English, a Skype interview may be required for non-native English speaking applicants.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.

Programs

• M.S. in Health Administration (p. 754) (Interdisciplinary)

Courses

HADM 5000. Health Administration: The Individual and the Profession. (2 Credits)
The intensive consists of four modules. Module 1 introduces students to the structure of the course and its learning goals, and presents the overall global socioeconomic and regulatory context within which healthcare in all of its dimensions of patients, providers, payers, and industry operates. Module 2 introduces the students to a proprietary case study of a physician-owned practice and allows students to understand more deeply the complex elements of the healthcare system in the U.S. Module 3 introduces students to understanding how we and especially healthcare professionals make decisions. Finally, Module 4 allows the students to discover their own potentials as leaders in the field of healthcare. This is the beginning of the cohort program and students will spend an intensive three days consisting of primarily an in-person instructional program complemented by some online mentoring. Students will receive a set of readings several weeks prior to the course and will be expected to come prepared with the readings completed.

HADM 5075. Introduction to Health Administration. (2 Credits)
This course covers current challenges faced by the U.S. healthcare delivery system and how health policy, both historically and today, has sought to address these challenges. We will consider healthcare concerns associated with population and public health. We will also explore the logistics of the healthcare system, including how it is organized, who makes up the workforce, how healthcare is financed, how it is managed, and the role of information technology in this sector.

HADM 5100. Healthcare Ethics. (3 Credits)
This course provides an overview of foundational ethical principles for healthcare administration and will present a methodology for your employment to resolve contemporary healthcare ethics questions with healthcare settings, specifically working within the context of emerging healthcare trends and legislation. There will be an online work component from 4:00 pm to 5:15 pm on Sundays, which students can complete in the library or off campus.

Attribute: HECS.

HADM 5200. Understanding Data. (2 Credits)
The quantitative skills and statistics part of this course will be approached from the perspective of a "producer" as opposed to a "consumer" of numerical analyses. The fundamental concept of statistics is "randomness." This idea will be explored by discussing populations versus samples, parameters versus statistics, data collection methods, measurement, graphing, statistical significance, and statistical models. To evaluate studies, a framework is developed that builds on these basic statistical concepts. This approach is then applied to examples from public health, medicine, and health policy. In the final component of the course, students will work in groups to analyze a study and report on its strengths and weaknesses. Before starting the course, students will be asked to read an academic journal article. Throughout the course, students will periodically break into groups to apply the concepts covered in the modules to the study from the journal article. These exercises will provide students with training on basic statistics and how to read studies.

HADM 5300. Strategy and Operations. (2 Credits)
The purpose of this course is to provide you with the skills in strategic planning and operations management necessary to perform an administrative role. This course will also discuss the increasing role of 'quality management' in hospitals and identify the impact of changes in reimbursement based on the importance of efficiency metrics such as readmission rates.

HADM 5400. Leadership and Change. (2 Credits)
This course examines managerial and change leadership concepts, issues, roles, and functions as applied to the role of the healthcare professional in various organizational settings. This course takes into consideration theories, frameworks, and models of leadership and an understanding of the leadership/relationship management skills necessary to build a superior organization.

HADM 5500. Healthcare Law. (2 Credits)
The purpose of this course is to introduce you to the legal issues you are likely to face in managing a healthcare organization. It is important for you to be familiar with basic legal principles affecting how healthcare institutions are operated, how legal rules and doctrine are formulated, and how to interact effectively with attorneys.

HADM 5600. Behavioral Health and Primary Care. (2 Credits)
This course offers a broad overview of theoretical foundations and empirical research findings related to the experiences of health and illness. We will examine intervention strategies targeting individuals, families, work settings, and communities will be examined and critiqued.

HADM 5700. Population Health, Public Health, and Outcome Measures. (3 Credits)
This course examines how Healthcare Reform brought into focus the need for population and public health in improving healthcare.

HADM 5800. Patient Centered Integrated Care. (2 Credits)
This course provides an understanding of patient-centered healthcare and the role of providers and the environment. The course recognizes the importance of different professions within the health workforce and the role of healthcare professionals working collaboratively on interdisciplinary teams to enhance patient-centered healthcare.

HADM 5900. Healthcare Finance. (2 Credits)
This course will address the current challenges faced by various healthcare organizations, specific to financial management and will focus on the interconnectivity the role that finance plays across the continuum of healthcare. You will learn the time value of money and how the understanding and pricing of costs is essential to the financial management among healthcare organizations.
HADM 6000. Negotiating and Communicating in Healthcare. (2 Credits)
This course draws from social ecological models of health promotion as a way to situate the work of health administrators within multi-level contexts. It also interrogates how an evolving media landscape—one that includes mainstream print and broadcast outlets, but also social media, ethic media, and other diverse platforms.

HADM 6100. Health Information Technology. (2 Credits)
This course introduces you to the subject of health information technology (HIT) and describes the organizational context surrounding the implementation, use, and management of HIT. It prepares you for the more advanced coursework by examining the concept applications, and strategies of HIT.

HADM 6200. Capstone: Project Formulation. (0 Credits)
This is an ongoing project that you will engage in from the beginning of the program and will end with a capstone-type presentation. You will identify problems and solutions in the workplace. If you are not employed in a healthcare-related workplace, you will be provided with an internship either at a healthcare facility or at one of Fordham’s research centers in order to apply your learning to a real-life situation.

HADM 6300. Capstone: Project Design and Methods. (0 Credits)
This is an ongoing project that you will engage in from the beginning of the program and will end with a capstone-type presentation. You will identify problems and solutions in the workplace. If you are not employed in a health care-related workplace, you will be provided with an internship either at a healthcare facility or at one of Fordham’s research centers in order to apply your learning to a real-life situation.

HADM 6400. Capstone: Solution and Presentation. (3 Credits)
This is an ongoing project that you will engage in from the beginning of the program and will end with a capstone-type presentation. You will identify problems and solutions in the workplace. If you are not employed in a health care-related workplace, you will be provided with an internship either at a health care facility or at one of Fordham’s research centers in order to apply your learning to a real-life situation.

Health Administration (M.S.)
Fordham’s M.S. in Health Administration program will provide you with the concrete skills and comprehensive industry knowledge required for you to become an innovator in healthcare administration—in hospitals, private practice, public health, healthcare unions, insurance companies, and many other settings.

The program joins together the resources of three of Fordham’s highly-respected graduate schools—the Graduate School of Arts and Sciences, the Gabelli School of Business, and the Graduate School of Social Service—to deliver an exciting, multifaceted curriculum taught by distinguished faculty and seasoned healthcare professionals. The one-year MS in Health Administration leads to a degree from the Graduate School of Arts and Sciences.

Program Basics

• Complete the program in 12 months—while working full time—with our executive-style curriculum; classes are held two weekends per month from late-August to late-July (including intensives and online instruction), for a total of 14 courses and 31 credits

• Attend classes at our conveniently-located Lincoln Center campus in midtown Manhattan

To learn more about the M.S. in Health Administration, visit the Fordham website.

Requirements
All courses are scheduled for intensive, Saturday/Sunday format.

Total Credits 31

1 This pre-program intensive class begins on a Friday and ends on a Sunday.

History
Our graduate program is personalized and student-oriented, with small classes taught by our world-renowned faculty. Because of our selective admissions, we attentively mentor the graduate students we admit, guiding them to research rigorously, and to write and speak about history dynamically.

Benefiting from our small classes and intensive one-on-one training, our students produce scholarship of the highest quality using a wide array of sources and techniques. This translates to our extremely competitive job market placement for Ph.D. students and continued success both within and outside of the academy for M.A. students.

Our department offers two degrees: an M.A. and a Ph.D., with concentrations in medieval history and modern history. While students most often specialize in topics relating to Europe and the Americas, the department regularly offers courses on transnational and global themes. The range of possibilities is further broadened by Fordham’s many interdisciplinary programs, which foster productive discussion across fields.
We take great pride in our students’ development. As a member of our department, you will have the opportunity to:

Learn the skills of the historian
Our graduate program develops your skills in critical analysis, archival research, and persuasive writing. Because of the large size and diversity of our faculty, you will have the opportunity to study a broad selection of historical periods, topics, and methodologies alongside experts in the field.

Become an exemplary teacher
Our department emphasizes the importance of pedagogy. If enrolled in our Ph.D. program, you will receive one-on-one training from a faculty member to prepare you for teaching undergraduate courses. Subsequently, you will gain invaluable experience teaching your courses.

Education for the whole person
Our Fordham community emphasizes the significance of the Jesuit principle of cura personalis, or care for the whole person. With seminars of an average of nine students, we provide intimate classroom experiences to ensure you receive personal attention from your professors and hone your unique skills.

Develop a practical skill set
A Fordham graduate degree in history also offers you a transferable set of skills for work outside of the academy. Our faculty have experience in such historical activities as textual editing, oral history, and archival description, and they are eager to assist you in developing a range of professional skills, such as college and high-school teaching, documentary editing, and journalism.

Study in New York City
At Fordham, you reap the innumerable benefits of studying in New York, one of America’s most exciting cities and a global cultural and financial capital: living in a vibrant and culturally diverse atmosphere; exploring an urban landscape that is, in itself, historical; and researching in a wide range of local universities, museums, and libraries. Few areas around the globe rival New York in the educational—and recreational—opportunities it can provide you.

For more information
For more information about Graduate-level History, please visit our page on the Fordham website.

Admissions
The History Department welcomes applications for its graduate programs at the M.A. and Ph.D. level. Applicants for the Ph.D. must have an M.A. at Fordham or another institution. Our department also welcomes students from the New York doctoral consortium and will also accept applications from those who wish to take individual courses as non-matriculated students.

M.A. in History
We welcome full- and part-time students to apply.

Admission requirements for the M.A.
• Bachelor’s degree from an accredited college or university (unless applying to the Accelerated M.A. Program)
• Six courses in history in undergraduate program

  • GPA of at least 3.0 (B)
  • Graduate Record Examination (GRE)
  • For foreign students, English proficiency exams such as the Test of English as a Foreign Language (TOEFL)
  • A writing sample of 7-12 pages
  • Three letters of recommendation which speak to the candidate’s suitability for graduate study (most often from former professors)
  • Official transcripts of school records

Accelerated M.A.
We also offer an early admissions M.A. program for outstanding undergraduate history students at Fordham whose grade point averages meet or exceed 3.2. Students submit their applications in the spring of their junior year and enter the program in the senior year, when they take three graduate courses. These courses count toward the B.A. and are accepted for the M.A. at Fordham.

With credit for the three courses, students are able to complete a history M.A. in their fifth year of schooling. Students from Rose Hill, Lincoln Center, and Professional and Continuing Studies are eligible to opt for early admissions into the M.A. program, though all courses are given at the Rose Hill campus.

Ph.D. in History
We also strongly recommend that you contact a faculty member in your field director via email, letter, or phone. A list of faculty in the History Department is available online. All non-matriculated students who are interested in taking classes should fill out an application form.

Admission Requirements for the Ph.D.
• Master’s degree in history from an accredited college or university
• Official transcript of school records
• GPA of at least 3.5 (B+)
• Graduate Record Examination (GRE)
• For foreign students, English proficiency exams such as the Test of English as a Foreign Language (TOEFL)
• A writing sample of 7-12 pages
• Three letters of recommendation

Graduate Funding and Prizes
Graduate students have several options for funding, both from internal and external sources, as well as student loans.

The Loomie Prize is awarded annually to the student with the best seminar paper produced during the previous academic year. This award comes with a cash prize and certificate.

• M.A. in History (p. 764)
  • Medieval History Concentration
  • Modern History Concentration
• M.A. in Global History (p. 763)
• Ph.D. in History (p. 765)
Courses

HIST 5100. Disasters, Planning and Prediction in Global History. (4 Credits)

By considering disasters and the regimes of planning and prediction that have been used to prevent and manage them, this course examines the historical interplay between modes of human agency and the perceived “push back” of the phenomenal world. We will also explore how understandings of disasters and control have shaped historical narratives. Students will engage environmental history, urban history, religious studies, the history of science and technology, and material culture. Topics will cover a wide range of geographic areas from the early modern to contemporary periods. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5102. Archives and Narratives of Global History. (4 Credits)

This course investigates the relationship between global history and particular forms of knowledge production. We will discuss classic and cutting-edge scholarship on the archives and how scholars have grappled with its possibilities and limitations. We will also consider how different ways of narrating history can attend to the silences and revelations of our sources. The interdisciplinary group of authors whose work we will discuss may include Shahid Amin, Natalie Zemon Davis, Brent Edwards, Saidiya Hartman, Lisa Lowe, Carina Ray, Ann Laura Stoler, and Zeb Tortorici. Students will also create their own research projects over the course of the semester.

Attribute: MVSG.

HIST 5105. The Black Radical Tradition in Comparative Perspective: U.S. and the Caribbean. (4 Credits)

This course explores the long history of black radicalism through a comparison of the United States and the Caribbean as centers of revolutionary movements that engaged problems of democracy, racism and citizenship in the global black diaspora.

Attributes: CEED, CENS.

HIST 5200. Renaissance Spain: Festive Republics, Rights, Liberties and Inquisitions. (4 Credits)

Renaissance era Christians in Castile, the great central region of the Iberian Peninsula that forms the core of modern Spain, were guaranteed their rights and liberties as citizens of city-republics through written charters. These city-republics sent delegates to the Cortes, the representative assembly that consulted with the King. Collective life in the cities, whether confraternities celebrating their saints, or open town council meetings of all citizens, created the corpus mysticum of the commonwealth that for Spaniards was the city. This seminar examines urbanism, collective public life, and the growth of the modern state in Renaissance Spain through topics such as: the influence of Islam on Iberian cities, conflict between cities and crown, confraternities and saints’ celebrations, public welfare, the creation of the archive, and religious minorities and the inquisition.

HIST 5201. The Renaissance of the Twelfth Century. (4 Credits)

This seminar will explore the history and historiography of one of medieval Europe’s most intellectually fertile and creative period, the so-called renaissance of the twelfth century. Particular attention will be given to the historical construction of this period and how it was changed, and continues to change, amid the discovery and editing of new texts, more nuanced categories of historical analysis, and new advances in interdisciplinary research. Students will be expected to give presentations on both primary and secondary sources over the course of the semester. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5202. Medieval Interfaith Relations. (4 Credits)

Interfaith relations are today a valuable and potentially urgent category of historical analysis. This seminar explores relations among Christians, Muslims, and Jews across Europe and the Mediterranean from early medieval papal policy to rise of the Ottoman Turks, with a particular focus on religion, intellectual, and cultural instances of interfaith conflict and coexistence. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: MVSG.

HIST 5203. Medieval Hagiography. (4 Credits)

This research seminar introduces students to the challenges and pitfalls of using saints’ lives and other hagiographical writings (miracula, furta sacra, etc.) as sources for medieval history. It aims to familiarize students with competing historical approaches to these genres and to provide a practical guide to the scholarly resources necessary to exploit them as historical sources.

Attribute: MVSG.

HIST 5204. Medieval Environmental History. (4 Credits)

This seminar is intended to familiarize graduate students with current themes and trends in medieval environmental history. Weekly reading assignments comprise historical monographs and scholarly articles in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: MVST.

HIST 5209. Luther and Reformation. (4 Credits)

October 31, 2017 marks the 500th anniversary of one of the great cultural movements that shook the History of the world: the release of Martin Luther’s Ninety-Five Theses. Lither disturbed the political, social, and religious structures of Western Europe. Until his death in 1546, he challenged the papacy, the Catholic Church, the Holy Roman Empire, and Henry VIII. The Reformation he began both inspired and outraged. It represented the triumph of technology through the printing press. After Luther, nothing was exactly the same ever again. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5300. History Theory and Methods: The Historian’s Tools. (4 Credits)

This course will introduce students to a range of intellectual traditions informing historical analysis and writing. Students will study major social thinkers and how historians have grappled with the implications of their ideas. The course aims to develop essential skills as professional readers, analysts researchers and writers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
HIST 5310. Occitania: Language and Power. (4 Credits)
This team-taught interdisciplinary course introduces students to the cultural world of a medieval 'south': Occitania, a region defined by language stretching from the foothills of the Alps to the pathways across the Pyrenees and from the Mediterranean almost to the Loire. Students will study the Old Occitan language and its manifestations in documentary writing, historical narrative, and the poetry of the troubadours from the eleventh until the thirteenth centuries. In order to best understand the context for this literature, course topics will include urban and rural communities, gender and power, the Albigensian crusade and its aftermath, and the beginning of vernacular book production.

HIST 5400. Gender and History. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5405. Modern Ireland 1690-1923. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5410. Race and Gender in Modern America. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5411. Gender and Sexuality in Early America. (4 Credits)
Readings in the history of gender and sexuality discourse in Early America and the British Atlantic world of the 17th and 18th centuries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5420. Sin, Crime and Sex in History. (4 Credits)
Sin and forgiveness were at the heart of the Christian message. In European tradition, sin and crime were closely related. This course examines the history of sin and crime from ancient Christianity to the present, focusing on the rise of sexual delicts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5421. Religion and the Renaissance World. (4 Credits)
Early modern societies around the globe defined themselves in relation to religious beliefs and exercises. This seminar will focus on the nature of 'religion' itself in the eyes of early moderns, particularly Europeans, as well as on the faiths and rituals that defined and separated cultures and peoples. The seminar will concentrate primarily on the three dominant religions of the European world (Christianity, Islam, and Judaism). At the same time, we will be constantly aware of one significant and distinctive feature of early modernity: the frequently hostile and always bewildering encounter of different, even unknown, religions during the course of exploration, settlement, and conquest stretching from Rome to Jerusalem to Tenochtitlan to Beijing and back.

HIST 5472. Inventing Total War. (4 Credits)
The course will explore the development of total war in the 20th century, with particular emphasis on Germany. The dissolution of legal limits on violence and compulsion on the battlefield and at home will be examined.

HIST 5506. European Nationalisms and Early Modern (Jewish) History. (4 Credits)
Modern historiography, including Jewish historiography, and history as an academic discipline are products of modern national movements. The narratives they produced provided tools for shaping national and ethnic identities in the modern era, and had long lasting ramifications not only for the study of history but also for the inclusion or exclusion of specific groups in modern European societies. This course will explore how the writing of history has been linked to the larger questions of national identity, and nationalism, and to questions of political inclusion and exclusions. We will read the early Jewish historians from Germany, Poland, and Palestine/Israel and explore how their visions of premodern Jewish history were shaped by larger questions that were also occupying other European historians and intellectuals. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5516. Nationalisms and Racisms in Modern Europe. (4 Credits)
The seminar will focus on the history and historiography on the construction of 'race' and nation in modern Europe (from the Enlightenment onwards) and in particular on the multiple connections and intersections between nationalism(s) and racism(s). As issues of cultural identity and questions of immigration and national belonging have become hotly contested in today’s European societies, the historiography on these subjects has been steadily growing. We will discuss different historical approaches, theories, and methodologies that emerge from the growing body of works addressing these issues and pay particular attention to socio-cultural histories and to transnational and comparative perspectives. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5517. Fascism. (4 Credits)
Study and investigation of fascism as intellectual and political movement in 20th Century Europe.

HIST 5520. European Mass Culture. (4 Credits)
Examines cultural development in Europe in the 19th and 20th century with special reference to mass cultural characteristics, role of technology, and political content.

HIST 5553. Book History: Texts, Media and Communications. (4 Credits)
This course examines themes, topics and methods in the history of the book. Book history is defined broadly to encompass the history of media and communication in general, as well as textual analysis. Topics may range across time periods, from the Middle Ages to the present day, and across continents. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5560. History of Modern Science in Global Context. (4 Credits)
Science is often understood as a hallmark of both modernity and 'Western' culture, but neither its methods nor its contents make sense without a more expansive approach to both time and place. By examining both the changing form and production of natural knowledge and the shifting uses and meanings of 'science' as a category, this course will problematize conventional understandings of modernity, objectivity, and progress and raise challenging questions about historical approaches to period, geography, causation, and exchange.
HIST 5563. Readings in Environmental History. (4 Credits)
A reading course for graduate students on environmental history. This course will introduce students to the most important scholarship in environmental history, both recent works and those that shaped the field in the last century. It is primarily an Atlantic course but will also offer readings related to East Asia, India, and the Middle East. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESEL, ESCH.

HIST 5566. Technology and Empire. (4 Credits)
This course, 'Science, Technology, and Imperialism,' will explore the crucial relationship between science and imperialism, with a particular focus on European imperial expansion from the eighteenth to the twentieth centuries. Students will use a wide variety of primary and secondary texts to raise and reframe fundamental questions about the role of science and technology as 'tools of empire.' For example, the course will explore how the equation of European science and technology with 'progress' depended to a large degree on European perceptions of the colonized. Using multiple viewpoints from Europe, Africa, and India, the course will provide a fresh and unique view on the history of Imperialism that will locate science and technology as fundamental to understanding such contested concepts as conquest, progress, and modernity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5568. Stalinism: Life and Death in Soviet Russia. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5574. U.S. Foreign Relations. (4 Credits)
This graduate reading course covers the history and historiography of U.S. foreign relations from 1898 to the present. Topics include Open Dorr imperialism, the First and Second World Wars, the Cold War, decolonization, the Vietnam War, and the War on Terror. Students will situate the United States, its domestic cultures, and its foreign policies to different regions, in a global perspective. In addition, students will study the economic, social, intellectual, political, and moral bases of U.S. foreign relations. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5575. The United States and the World in the Twentieth Century. (4 Credits)
This course examines U.S. foreign relations over the course of the twentieth century, with an emphasis on the myriad ways in which peoples, cultures, economies, national governments, non-state organizations, and international institutions interact. Key themes include American foreign policy, capitalism and economic policy, cultural relations, domestic politics, and perceptions of the world. The course will proceed chronologically and will examine major moments and trends: modern warfare, the Great Depression, the origins and trajectory of the Cold War, the nuclear arms race, decolonization and U.S.-Third World relations, the Vietnam War, and America's wars in the Middle East. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5576. World Relations. (4 Credits)
This course will explore the study of relations in the 20th century, with an emphasis on the myriad ways in which peoples, cultures, economies, national governments, non-state organizations, and international institutions interact. Key themes include American foreign policy, capitalism and economic policy, cultural relations, domestic politics, and perceptions of the world. The course will proceed chronologically and will examine major moments and trends: modern warfare, the Great Depression, the origins and trajectory of the Cold War, the nuclear arms race, decolonization and U.S.-Third World relations, the Vietnam War, and America's wars in the Middle East. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5577. History and Fiction in the American West. (4 Credits)
This graduate seminar, open to advanced undergraduates, that considers the historical narratives, major thinker, and controversies between the 17th and 18th centuries but focus largely on its most iconic manifestations in the 19th century. The course examine race, gender, violence, and social order, among other topics.

HIST 5578. Irish History in the 20th Century. (4 Credits)
This course will explore the study of relations in the 20th century, with an emphasis on the myriad ways in which peoples, cultures, economies, national governments, non-state organizations, and international institutions interact. Key themes include American foreign policy, capitalism and economic policy, cultural relations, domestic politics, and perceptions of the world. The course will proceed chronologically and will examine major moments and trends: modern warfare, the Great Depression, the origins and trajectory of the Cold War, the nuclear arms race, decolonization and U.S.-Third World relations, the Vietnam War, and America's wars in the Middle East. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5579. History and Fiction in the American West. (4 Credits)
This course will explore the study of relations in the 20th century, with an emphasis on the myriad ways in which peoples, cultures, economies, national governments, non-state organizations, and international institutions interact. Key themes include American foreign policy, capitalism and economic policy, cultural relations, domestic politics, and perceptions of the world. The course will proceed chronologically and will examine major moments and trends: modern warfare, the Great Depression, the origins and trajectory of the Cold War, the nuclear arms race, decolonization and U.S.-Third World relations, the Vietnam War, and America's wars in the Middle East. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5644. Writing Early America: Historians Who Have Shaped the Discipline. (4 Credits)
This course will include the most significant works in early American history and culture written during the last fifty years. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5645. Readings in Early America and the Atlantic World. (4 Credits)
This graduate readings course will provide students with an introduction to the historiography of early America from contact through the era of revolutions. Major themes include the contesting and connecting of geographies of areas in the continent, the everyday experiences of work across lines of race, class, and gender, and the rise and fall of continental and Atlantic empires. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5725. History of American Cities. (4 Credits)
Readings in US urban history. Topics that may be covered include the growth and development of American cities, their people and diverse communities, urban politics, the urban crisis of the late twentieth century, ideas about what makes for a good city, and the economic, cultural, political, and social role of cities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5727. History and Fiction in the American West. (4 Credits)
This course uses history and literature to study the moving western frontier in the United States. Readings explore its early origins in the 18th and 19th centuries but focus largely on its most iconic manifestations in the 19th century. The course examine race, gender, violence, and social order, among other topics.

HIST 5730. History of Capitalism. (4 Credits)
A graduate seminar, open to advanced undergraduates, that considers the historical narratives, major thinker, and controversies between the 17th and 18th centuries but focus largely on its most iconic manifestations in the 19th century. The course examine race, gender, violence, and social order, among other topics.

HIST 5731. History of Wealth & Poverty: U.S. and Comparative. (4 Credits)
Americans have long debated the meaning of wealth and poverty, questioning whether such conditions are natural (and acceptable), or the product of exploitative practices, corruption, or biased governmental policy (and potentially alterable). Over time they have questioned the relationships among economic inequality, free markets, democracy, thriving families and communities, and the welfare state. We will explore these and other questions focusing on the U.S. since 1865 but with substantial comparisons to Europe, Africa, and Latin America. The class takes an intersectional perspective that brings questions of race and gender, as well as social class, to bear on the topic. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
HIST 5733. The Country and the City in American History. (4 Credits)
This course explores the history of the country and the city as natural environments and symbolic landscapes through the works of historians, artists, and poets. It covers the period from the Revolution through the twentieth century, with special attention to the nineteenth century. Topics include Appalachia, slavery, and sharecropping; Lewis Mumford and Jane Jacobs; romantic landscape painting and Central Park. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5734. U.S. Culture and Society to 1877. (4 Credits)
This course examines American culture and society through important scholarly works in the field. It is designed to provide an introduction to major historical debates and the methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in American history. Topics to be covered include the role of social institutions and the significance of class, gender, culture and race, particularly in connection to colonial life, the revolutionary period, the early republic, the Civil War, and Reconstruction.

HIST 5910. Law and Empire in the Iberian World. (4 Credits)
Law and Empire in the Iberian World explores the centrality of legal practices in the expansion of the Iberian Empire, a legal culture which produced the world’s largest trove of archival documents. Topics will include the legal cultures in early modern Spain and the Americas; the debate over just war and the legality of conquest; how indigenous peoples were legally incorporated into Spanish crown, and how they used law to their advantage (including establishing legally found towns, litigation with the Spanish court system, use of wills and other legal documents); legal questions of honor and ethnicity as related to marriage and office holdings; the legal relationship between the American Viceroyalties and the crown of Castile; and place of role of law and litigation in creating civil society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5913. Golden Age Spain & Amer. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: LALS.

HIST 5918. After Colonialism: Latin America. (4 Credits)
This course focuses on the 19th and 20th centuries. The course is designed to provide an introduction to major historical debates and methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in Latin American History. Readings include primary sources in translation as well as key studies of the era. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5919. United States and Latin American Borderlands. (4 Credits)
This course explores the concept of the borderlands in United States and Latin America history. It uses various categories of analysis, such as race, gender, and hegemony, to discuss the interaction among groups of people as they meet along political and geographic borders. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5920. United States and Latin American Borderlands. (4 Credits)
This course explores the concept of the borderlands in United States and Latin American history. It uses various categories of analysis, such as race, gender and hegemony, to discuss the interaction among groups of people as they meet along political and geographic borders. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5921. Social Mvts Global Pers. (4 Credits)
This course examines social movements in the twentieth century. It focuses on events in Latin American, Europe, and the United States, among other regions. It allows students to assess the advantages and limitations using a global approach to historical analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5923. Atlantic World: Empires, Diasporas, and Migrations. (4 Credits)
Introduces students to themes and methods of Atlantic World History, 16-20th centuries. Possible themes include: The making of Iberian, English and French Empires; Indigenous, African, and European encounters; Atlantic Legal Cultures; the Slave Trade; Slavery, and Emancipation; the African Diaspora; Religion; Gender and Sexuality; Race relations; Migration. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5924. Latin American History and Culture. (3 Credits)
This course provides a general survey of Latin American history and culture from the pre-colonial period to the present. It introduces graduate students to major topics, such as conquest and colonization, colonial institutions, racial and gender practices, slavery and Indian labor, the development of regional and national identities, independence movements, nation building and the rise of caudillos, foreign interventions, twentieth-century revolutions and social and political movements, among others.

HIST 5925. Global Migrations. (3 Credits)
This course uses a global approach to examine major migratory movements since the 15th century, particularly since the mid-19th century. It analyzes factors that caused such emigrations and the conditions that led specific groups to certain geographic areas. It also studies the experiences of migratory groups as they arrived and adapted to their new homelands. It includes migrations from several areas of the world, primarily, but not exclusively, involving Europe and the United States.

HIST 5961. The Age of Suleyman 1453-1574. (4 Credits)
The course aims to introduce the students to various aspects of social, political, cultural and intellectual history of the Ottoman Empire in the late 15th and 16th centuries. By focusing on the multifaceted and multidirectional nature of interaction across political, religious, cultural and linguistic boundaries between the Islamic and Christian worlds in late medieval and early modern period, the course will delineate the Ottoman state and empire formation within the theoretical and historiographical framework of the early modern Mediterranean. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Updated: 07-27-2020
HIST 6076. Noble Culture and Society. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 6077. The Angevin Empire. (4 Credits)
From the Middle of the twelfth until the first quarter of the thirteenth centuries, one dynasty, the house of Anjou, were the effective rulers of an enormous agglomeration of kingdoms and principalities which stretched from the North Sea to the Mediterranean and encompassed England, large parts of Ireland, Wales, and nearly half of the territory which today constitutes modern France. Following a wave of renewed scholarly interest in the politics and culture of this period, this class will explore this short-lived but powerful empire, its lands, peoples and rulers. Together we will explore the lives of dynamic individuals within the Angevin court; Angevin court culture, the governance of a medieval ‘empire’; dynastic politics and diplomacy; the Third Crusade; and England and France after the loss of Normandy.
Attributes: MVSG, MVST.

HIST 6078. The Crusader States: The Latin Kingdom of Jerusalem 1099-1291. (4 Credits)
This course charts the social, political, and cultural history of the feudal principalities that were established by Latin Christians in the Eastern Mediterranean in the wake of the First Crusade. Students will be introduced to the narrative and documentary sources through which the history of the Latin Kingdom has been constructed, as well as the archaeology and art of the Levant during the period of Frankish occupation and settlement. In addition, we will engage with the major historiographical debates concerning the constitutional organization of the Latin kingdom, the relationship between the Frankish crusaders and Muslim and eastern Christian populations over whom they ruled, and the ‘colonial’ character of the Latin settlements. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6135. E Med Confl & Peacemaking. (4 Credits)
In the Early Middle Ages of the West (500-1050), judges presiding over courts in the modern sense of the word did not exist. Written laws were not implemented unilaterally from above, and the facts of a case were investigated not as much as a painstaking reconstruction of alleged misconduct, but rather by way of collective oaths and duels. Another form of proof was the hot-iron ordeal, in which defendants placed their hand in a pot of boiling water to have guilt or innocence determined by the healing process. The course will provide a forum for the reading and discussing of recent historiography on the subject and explore the question of what made these forms of conflict peaceful resolutions ‘rational’ and reasonable in the eyes of early medieval contemporaries. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6136. Disease in the Middle Ages. (4 Credits)
The course will explore disease in the West from about 500 to 1500, including sudden epidemics like the Black Death, endemic illnesses such as leprosy, and the rise of literate university medicine alongside the academic laggards of surgery and midwifery. Particularly attention will be paid to issues that highlight the close nexus between medical and social practices. What accounted for the medieval rise of many enduring institutions in the health sector, for example, faculties of medicine and university-trained health practitioners with the lucrative title of ‘doctor’? What rendered medical know-how ‘scientific’ at the time and gave it its strong public appeal? What is the relationship between modern ‘empirical’ medicine and its older ‘scholastic’ counterpart?.
Attribute: MVSG.

HIST 6152. Medieval Women and Family. (4 Credits)
Studies in the social, economic and religious roles of women and the organization of the family in European society from the early to the later Middle Ages. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 6153. Medieval Economy and Society. (4 Credits)
This course focuses on the major economic trends of the period from the Germanic invasions through the ‘agricultural depression’ on the 15th century. We will also consider the social impact of changes in seigneurial and peasant agriculture, the ‘commercial revolution’, the rise of the textile industry, the Great Famine, the Black Death, and the Hundred Years War. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 6172. Late Medieval and Early Modern Ireland. (4 Credits)
This course will examine the history of Ireland from the height of the so-called Gaelic Revival in the mid-14th century to the violent collapse of Gaelic rule and the completion of the Tudor conquest in the early 17th century. Beginning in the late medieval period with an exploration between English and Gaelic worlds, the class will then chart the portracted incorporation of Ireland into a highly centralized early modern English state under the Tudors. With emphasis placed on the latest scholarly.
HIST 6256. Torture and Western Culture. (4 Credits)
This course examines a very difficult subject that sheds an unsettling light on the history of Europe and the United States. Torture in the twenty-first century world is ubiquitous, and the very public controversy surrounding American practices is only shocking to those who do not pay attention to the world. Our goal in this seminar is to examine the history of torture in its European-American context and to determine just where current practices fit into that history. We will also ponder whether torture is a practice that can (and should) be eradicated, or whether we must adjust to the presence of torture as a permanent feature of the world and American landscape. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: CEED, CETH.

HIST 6305. The English Reformation. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6310. Early Modern European Intellectual and Political History. (4 Credits)
This course will consider the development of early modern Europe thought and politics from the 16th through the 18th centuries. Coverage may include the intellectual and political implications of the Renaissance and the Reformation, the rise of the early modern state and its expansion, popular revolts, Scientific Revolution, political theory, absolutism, republicanism, war and empire, the Enlightenment and the French Revolution. The course is designed to provide an introduction to major historical debates and methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in Early Modern European History. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6315. Early Modern European Society and Cultural History. (4 Credits)
This course will consider the development of early modern European society and culture from the 16th through the 18th centuries. Coverage may include the social and cultural implications of the Renaissance and the Reformation, the divergence of popular and elite culture, the social dimensions of expanding population and trade, print and literacy, the economics foundations of social change, popular revolts, the impact of empire on society and culture, the Enlightenment and the French Revolution. The course is designed to provide an introduction to major historical debates and methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in Early Modern European History. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6355. Late European Political and Intellectual History. (4 Credits)
This course will explore central themes in the development of European political and intellectual life during the 19th and 20th centuries. At the discretion of the instructor students would be expected to explore topics including but not limited to liberalism, conservatism, romanticism, nationalism, modernism, counter-enlightenment, fascism, socialism, Western Marxism, memory, gender, constructions of sexuality, colonialist and racial ideologies, consumerism, and the late-twentieth century counter-cultures. The goal of the course would be to ensure students a reasonable command of the issues associated with the selected themes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6360. Late European Social and Cultural History. (4 Credits)
This course will explore central themes in the development of European social and cultural life during the 19th and 20th centuries. At the discretion of the instructor students would be expected to explore topics including but not limited to liberalism, conservatism, romanticism, nationalism, modernism, counter-enlightenment, fascism, socialism, Western Marxism, memory, gender, constructions of sexuality, colonialist and racial ideologies, consumerism, and the late-20th century counter-cultures. The goal of the course would be to ensure students a reasonable command of the issues associated with the selected themes. Instructors are expected to ensure a representative distribution of themes across time periods. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6520. Europe Global. (4 Credits)
Perspectives on 19th/20th century Europe in light of imperialism/colonialism, trade & commerce, transnational & global networks of migration, exchange, ideas. Focus on socio-cultural and economic influences between Europe and underworld.

HIST 6530. European City: 1700-2000. (4 Credits)
Upper level study of European urban history, concentrating on theoretical and interpretive approaches to the study of the city and urban life. Methods or research, evidence, and analysis form basis of seminar discussions and student research. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6531. Bombay–Shanghai–London. (4 Credits)
This course surveys the history and connecting links between Bombay–Shanghai–London in the 19th and 20th centuries. It concentrates on the exchange and movement of people, goods, culture, and information within the context of empire, and considers the coexistence of local and global influences and the uneasy balance with cosmopolitanism. The course places emphasis on economic culture, material culture, and built environment. It is suitable for students in urban history, global history, European history, Chinese history, and Indian history. Weekly readings and research papers are required.

Attribute: URSG.

HIST 6662. Sexuality in America. (4 Credits)
Readings in the literature of the history of sexuality in American from the Colonial Era to the end of the 20th century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
HIST 6710. The Civil War. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6721. US Culture and Society Since 1877. (4 Credits)
An exploration of American culture and society through important scholarly works in the field. The course is designed to provide an introduction to major historical debates and the methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in American history. Topics to be covered may include the role of social institutions and the significance of class, gender, culture, and race, particularly in connection to colonial life, the revolutionary period, the early republic, the Civil War, and Reconstruction. Instructors are expected to ensure a representative distribution of themes across time periods. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6724. US Thought and Politics to 1877. (4 Credits)
An exploration of American intellectual and political history through important scholarly works in the field. The course is designed to provide an introduction to major historical debates and the methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in American history. Topics to be covered may include the formation of American ideology, political movements, and the contributions of major ideological and intellectual figures, particularly in connection to the rise of the U.S. as an economic and military power, the Progressive era, the world wars, the Great Depression, the Cold War, the civil rights movement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6725. United States Thought and Politics Since 1877. (4 Credits)
An exploration of American intellectual and political history through important scholarly works in the field. The course is designed to provide an introduction to major historical debates and the methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in American history. Topics to be covered may include the formation of American ideology, political movements, and the contributions of major ideological and intellectual figures, particularly in connection to the rise of the U.S. as an economic and military power, the Progressive era, the world wars, the Great Depression, the Cold War, the civil rights movement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6726. The United States and Human Rights: An International History. (4 Credits)
This course examines the history of human rights during the American Century. Emphasizing analysis rather than advocacy, it examines the legal and moral origins of human rights, its political structures, and the international culture of humanitarianism. Through a series of case studies of human rights organizations and U.S. diplomacy toward individual states, the course will help students understand the trajectory of human rights in the 20th century. Students will undertake independent research on an issue, location, and period of their choosing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6731. US Immigration and Ethnicity. (4 Credits)
This course will examine several important issues that have engaged the attention of historians of immigration and ethnicity. These include perennial concerns as the nature of the processes of settlement and Americanization, and the evolution of American views on citizenship and immigration policy. Also among the issues to be discussed are recent trends in thinking about the invention of racial identities and about ethnic diasporas and 'transnationalism.' Finally, the course will cover several cases of the stresses of ethnic identity in wartime. Readings will include recent scholarly monographs and articles, as well as several examples of ethnic memoir literature. Note that the course is organized thematically, and that readings have therefore been chosen because they reflect on the themes under discussion. As a result, not all ethnic groups are covered adequately. Students will have a chance to deal with the ethnic groups of their choice in their independent work. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6853. America Between the Wars. (4 Credits)
The course will focus upon political, economic and social events and trends in America during the era between the two World Wars of this century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 7025. PSM: Medieval Religious Cultures. (4 Credits)
Debates in the study of medieval religious culture and approaches to its study will be examined through works on the cult of saints, popular religion, and liturgy and ritual. Issues presented in the current literature will be tested by the close reading of selected primary sources. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 7056. PSM: Med Political Cultures. (4 Credits)
This course, the first part of a two-semester proseminar/seminar sequence will introduce students to recent debates and different approaches to cultures of power and political processes in western Europe in the central middle ages. Among the many topics we might consider are lordship, status and authority, political assembly and consultation, courtliness and persuasion, rulership and sanctity, and the rise of accountability. Students will become familiar with a wide range of source material, from diplomatic and documentary collections to historical narratives and courtly literature. With this solid foundation in the current historiography and available research tools, students will be expected to identify a suitable topic for a sustained research project. Completing this project will be the objective of the seminar course to be offered in the Spring. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: CEED, CETH.

HIST 7201. US Culture and Society Since 1877. (4 Credits)
An exploration of American culture and society through important scholarly works in the field. The course is designed to provide an introduction to major historical debates and the methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in American history. Topics to be covered may include the role of social institutions and the significance of class, gender, culture, and race, particularly in connection to colonial life, the revolutionary period, the early republic, the Civil War, and Reconstruction. Instructors are expected to ensure a representative distribution of themes across time periods. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 762. The United States and Human Rights: An International History. (4 Credits)
This course examines the history of human rights during the American Century. Emphasizing analysis rather than advocacy, it examines the legal and moral origins of human rights, its political structures, and the international culture of humanitarianism. Through a series of case studies of human rights organizations and U.S. diplomacy toward individual states, the course will help students understand the trajectory of human rights in the 20th century. Students will undertake independent research on an issue, location, and period of their choosing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: HUHR, HUST.
HIST 7070. Medieval Intellectual Cultures. (4 Credits)
This course takes a broad approach to medieval intellectual history, focusing not just on the texts and ideas that were central to medieval intellectual life but also on the cultural conditions that enabled scholarship and creativity to flourish. Beginning with the late antique absorption of classical learning, the seminar will over the course of two semesters examine a range of intellectual cultures spanning the western Middle Ages. A particular focus of the class will be the study of the liberal arts and the evolution of teaching practices. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 7110. PSM: Church Law & Med Soc. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 7150. PSM: Medieval England. (4 Credits)
This is the last half of a year-long course that focuses on the social, economic, and administrative history of England from the eleventh through fifteenth centuries. Special emphasis is placed upon 1) how to identify and exploit a wide variety of primary sources (such as wills, cartularies, court rolls, account rolls, chronicles, among others); 2) how to use major historical collections (such as Rolls Series, VCH, Record Commissioners, Royal Historical Manuscripts Commission, the Ordnance Survey, Selden Society, and others); and 3) gaining an awareness of the regions and landscape of medieval England, as well as the contributions of historical geography. Besides treating thematic issues such as the church and society, law and legal system, the growth of government and administration, maritime trade and industry in town and country, the weekly discussions will also consider economy among the peasantry, townspeople, and the landowning elite. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8000. Research Colloquium. (1 Credit)
Required for MA and PhD students in Modern History and taken in conjunction with a research tutorial, this colloquium attends to the professional and presentation aspects of their research project as well as providing a forum for progress reports and feedback.

HIST 8025. Sem: Medieval Relig Cultures. (4 Credits)
Participants will build on the reading and topics from HSGA7025 (Proseminar: Medieval Religious Cultures) to prepare research papers based on sources and debates in the study of medieval religious cultures. Weekly readings will be selected by the participants from materials for their papers; later in the semester, they will present drafts of their own papers, and prepare critiques of others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8056. Sem: Med Political Cultures. (4 Credits)
In the Spring semester, students will spend the semester working on research papers based on the topics identified in the Fall. At class meetings, students will have the opportunity to present their research and to read and critique each others' writing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8070. Medieval Intellectual Cultures. (4 Credits)
Student continue to work on the project they defined in the Proseminar to this course. Classes convene intermittently to discuss progress on the ongoing research projects and for presentations on untranslated or little-known primary source (either recently made available or long forgotten) that deserve greater. Students complete the seminar by giving a 20-minute conference paper on their research project and on their research project and writing a thesis-length original research paper that could be published as a scholarly article. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8110. Sem: Church Law & Med Soc. (4 Credits)
This course will consist of a two-semester proseminar/semester sequence inviting graduate students to formulate and conduct original research projects in the field of medieval church law. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8150. Sem: Medieval England. (4 Credits)
Continuation of HSGA 7150. The first half of the course focuses on database analysis, writing skills, research methods, and public speaking. Students also work on a final research paper that was formulated in HSGA 7150. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8999. Independent Study. (0 to 4 Credits)
HIST 9999. Dissertation Direction. (1 Credit)

Global History (M.A.)

Understand the human experience through new, transnational approaches
The human drama has been enacted upon a grand stage for thousands of years, but the story of the world's peoples and cultures has only recently come to be understood in a global perspective.

Dramatic changes in transportation and communications technology have contributed to the emergence of a "globalized" society. Historians are now beginning to re-examine fundamental aspects of the human experience explicitly from the perspective of movement and exchange.

Program Highlights

- Pursue original research in fields related to your global interests
- Engage in interdisciplinary coursework that draws upon the strengths of other Fordham departments and programs
• Take advantage of small classes taught by our world-renowned faculty
• Reap the benefits of studying in New York, offering additional research opportunities from a wide range of local universities, museums, and libraries

Program Basics
• Attend full-time courses, offered during the day and evening, at our Rose Hill Campus in the Bronx, NY
• Take a minimum of three global history elective courses in addition to a course on “theories and methods” for historians
• Conduct a unique “special project” as an alternative to a final research paper

Intellectual and Professional Advancement
If you are interested in pursuing further study, this program allows you to take unique advantage of our world-renowned faculty to identify research projects that would make you an extremely competitive candidate for admission to the country’s top Ph.D. programs in History.

Further, this program will also enhance your credentials and training for teaching in the New York State high school Social Studies curriculum; or prepare you for careers in fields related to global business, public policy, development, and humanitarian organizations.

Admissions
Completed applications for the M.A. in Global History will include each of the following items:

Resume
Up to two pages in length (submit via the online application)

Official transcripts
Official degree transcripts confirming prior degree conferral should be ordered at least one month prior to the application deadline. Please ensure that they are sent directly to the Office of Admissions (fuga@fordham.edu) via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458. Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.

Official GRE scores (should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259)

Statement of intent (should not exceed 500 words, submitted via the online application)

Writing Sample (10 - 20 pages in length, submitted via the online application)

Three letters of recommendation (submitted directly by referees via the online application).

English Proficiency
International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL).

GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results.

Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259. Please consult the English Proficiency web page for additional information.

Application Deadlines
For information, see the web site information with application Deadlines.

Contact fuga@fordham.edu with any admission-related questions.

1 Global History courses are any graduate-level History class (HIST 5000+) with the appropriate attribute for Global History. A list of classes that fulfill this requirement may be obtained from the department.

2 General History courses are any graduate-level History class, or a class with the code HIST 5000+. A list of these courses can be found on our department page (p. 756).

3 The independent study is a research project conducted in lieu of a thesis paper.

History (M.A.)

Requirements

Master’s students are required to complete eight classes (30-32 credits), which can be completed with one year of full-time study (three courses each in the fall and spring, and two courses over the summer). At least six of these courses must be taken within the history department, and students must maintain a ‘B’ (3.0) average in their coursework to qualify for their degree. MA students are also required to complete a research paper (40-60 pages) on which they will be orally examined by two professors. Each field of study has a different procedure for this final research paper.

Courses should be selected in consultation with the Director of Graduation Studies.

Medieval History Concentration

Students concentrating in medieval history will develop a proposal and research paper through the proseminar/seminar sequence.

upon completion of coursework and language requirements (see below),
one that they intend to pursue in the Ph.D. program.

Students applying for the doctoral program who have received an M.A.
in history from another university can be admitted straight into the Ph.D.
program but may be required to take some additional courses to make
up for any deficiencies in academic preparation. Students are generally
expected to have concentrated in the same field at the M.A. level as the
one that they intend to pursue in the Ph.D. program.

Upon completion of coursework and language requirements (see below),
Ph.D. students will take a comprehensive examination. Reading lists for
the examination are developed by the student in conjunction with the
student's mentor and examination committee.

Within a year of successfully passing the comprehensive exam, the
candidate must present a dissertation prospectus for the approval of
the mentor and dissertation committee. After the completion of the
dissertation, its oral defense, and submission to the dean, the Ph.D. is
awarded.

Requirements

Beyond the M.A. degree requirements (p. 764), the following must be
completed:

- Eight courses (minimum 30 credits) in addition to M.A. courses
  - Two of these eight courses must consist of the year-long
  preseminar/seminar sequence.
- Reading proficiency in two foreign languages (including statistics/
databases). Medieval concentrators must also prove proficiency in
Latin or another research language.
- Comprehensive oral examination in four fields, at least three of which
must be in the area of concentration; the fourth field may be in any
other historical field or in another discipline, such as art history,
literature, medieval studies, philosophy, political science, or theology.
- Dissertation proposal development (1 credit) and acceptance
(3 credits) to be completed within one year of comprehensive
examination.
- Dissertation and defense.

Humanitarian Affairs

Through multi-disciplinary coursework in subjects spanning the field of
humanitarian affairs, the Institute of International Humanitarian Affairs
(IIHA) equips students with the tools required to respond thoughtfully
and effectively in humanitarian crises. The IIHA combines the theoretical
and practical aspects of humanitarian affairs to generate debate, initiate
discourse, and encourage information sharing among participants and
faculty.

For more information about Graduate-level Humanitarian Affairs,
please visit our page on the Fordham website.

Admissions Requirements

- A statement of interest connecting the student's goals for the
  program with the expertise and activities of the degree, up to 500
words.
- Official degree transcripts confirming prior degree conferral are
  required for all applicants, regardless of matriculation status. These
should be ordered at least one month prior to the application deadline
for your program of interest.
- Resume/CV
- Official GRE scores (Graduate School of Arts and Sciences – Code
  #2259)
- Writing sample (5 - 20 pages)
- Three letters of recommendation (two of which must be academic,
  submitted directly by referees)
Humanitarian Affairs

Candidates for the M.S. in Humanitarian Studies are expected to have a 3.0 or higher undergraduate GPA based on a 4.0 scale.

International Humanitarian Action

Candidates applying for the Master in International Humanitarian Action must have:

- Successful completion of the International Diploma in Humanitarian Assistance (IDHA).
- At least five years experience in humanitarian assistance or a related field.
- GREs are accepted but not required.
- A bachelor’s degree from an accredited college or university is required.

To apply for the MIHA:

- Create an application
- Select "Graduate School of Arts and Sciences."
- Select "Masters in Humanitarian Action"

To apply to the Advanced Certificate in International Diploma in Humanitarian Assistance (IDHA):

- Create an application
- Select "Graduate School of Arts and Sciences."
- Select "Advanced Certificate in International Diploma in Humanitarian Assistance"
- Select either Spring, Summer or Fall

To apply to the Advanced Certificate in International Diploma in Operational Humanitarian Assistance:

- Create an application
- Select "Graduate School of Arts and Sciences"
- Select "Advanced Certificate in International Diploma in Operational Humanitarian Assistance"

To apply to the Advanced Certificate in International Diploma in the Management of Humanitarian Action:

- Create an application
- Select "Graduate School of Arts and Sciences"
- Select "Advanced Certificate in International Diploma in the Management of Humanitarian Action"

To apply to an IIHA short course or professional training:

- Create an application
- Select "Graduate School of Arts and Sciences"
- Select "International Humanitarian Action"
- Select "Non Degree/Non Matriculated"
- Indicate the desired course(s) on form.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.

Programs

- M.A. in International Humanitarian Action (p. 772)
- Advanced Certificate in Humanitarian Assistance (p. 771)
- Advanced Certificate in Operational Humanitarian Assistance (p. 772)
- Advanced Certificate in Management of Humanitarian Action (p. 772)
- M.S. in Humanitarian Studies (p. 770)
- Communities and Capacity Building Thematic Area
- Human Rights Thematic Area
- Livelihoods and Institutions Thematic Area

Courses

HUAF 5000. The Humanitarian Toolbox. (0 to 2 Credits)
This course offers an intensive comprehensive and unified training program suitable for humanitarian aid professionals, allowing them to understand all of the available actors and resources with in a humanitarian crisis. This multi-disciplinary course is made up of lectures, workshops, and case studies.

HUAF 5001. Current Humanitarian Issues. (0 to 2 Credits)
This course will build on what is learned in HUAF 5000 and introduces historical, political, medical, managerial, legal and communication skills.

HUAF 5010. Humanitarian Negotiation. (0 to 3 Credits)
Many humanitarian aid professionals believe that negotiation is perhaps the activity in which they spend most time both in field and headquarters situations. Almost everything that humanitarian workers need to achieve has to be negotiated with donors, host governments, local structures, communities, beneficiaries, other humanitarian agencies and their own staff. This course gives students an understanding of negotiation theory together with practical historical and current applications. All types of negotiation are examined, from road blocks and negotiations in situ for access to negotiations for peace agreements far from the conflict. Theoretical lectures will be supported with group scenario based exercises.

HUAF 5012. Contemporary Issues in Humanitarian Action. (3 Credits)
This course will introduce students to the pressing issues and acute challenges of contemporary humanitarian response through three modules on (1) Threats and Vulnerabilities, (2) Accountability in Humanitarian Response, and (3) Innovations in Humanitarian Response. The aim of the course is to examine how the international community forms consensus regarding best practices, and how this, in turn, informs humanitarian practice.

HUAF 5013. Fundamentals of Humanitarian Action. (3 Credits)
This course will introduce students to the principles of humanitarian action through three modules on (1) Defining Humanitarian Assistance, (2) Management, and (3) Strategic Planning. The aim of the course is to provide an overview of the critical aspects of international humanitarian coordination from an organizational perspective.
HUAF 5014. Humanitarian Resource Management and Administration. (3 Credits)
This course will introduce students to the operational aspects of humanitarian response and focus primarily on the role of human resources (HR) and financial management. In response to the continuing professionalization of the humanitarian sector, this course will provide students with a common understanding of hiring practices, budget management, and donor relations in a humanitarian intervention.

HUAF 5015. Information Management. (3 Credits)
This course will introduce students to the principles and strategies behind the effective flow of information in a humanitarian setting. Gathering and managing information is crucial in order to understand the cause of the emergency, identify impacted populations, and determine crisis-affected geographical locations. The aim of this course is for students to understand the components of a successful information management network within a humanitarian intervention and identify how information can contribute to future preparedness.

HUAF 5016. Monitoring and Evaluation in Humanitarian Response. (3 Credits)
This course will introduce students to the principles and theoretical frameworks behind data collection and analysis in the context of humanitarian response. It will cover qualitative and quantitative research methods used in humanitarian program monitoring and evaluation (M&E). The aim is to give students an overview of basic methodologies utilized in the field as well as the tools to determine appropriate M&E strategies in various humanitarian settings.

HUAF 5020. Humanitarian Aspects of Migration. (0 to 2 Credits)
Migration, whether forced displacement or economic migration of the poorest, is often a major factor in either escaping from poverty, persecution, and danger, or moving into yet more dangerous situations. In attempting to find livelihoods and safety, people often become victims of smugglers or traffickers. Students will be given an enhanced awareness and understanding of the complex interaction between migration and humanitarian interventions from the point of view of the migrant, the authorities of the host nation or region, and of the humanitarian worker.
Attribute: IHUA.

HUAF 5025. Cash, Commodities, and Services in a Humanitarian Response. (0 to 3 Credits)
For decades, humanitarian assistance was delivered by the supply of commodities and services, often by international humanitarian organizations. More recently, technological advances have made it practical, and cost-effective, to provide humanitarian assistance through cash transfers. This development has both been welcomed as the new way forward and viewed with some suspicion by others who view it as lacking in accountability. This course will examine the roles played by cash transfers, commodities, and services in response to humanitarian crises, along with the advantages and disadvantages of each. The course will also examine the mechanisms now in place for the further development and regulation of cash transfers.
Attribute: HUCB.

HUAF 5030. Humanitarian Logistics. (0 to 2 Credits)
Logistics is one of the most critical components to successful humanitarian assistance. Delivering the right assistance to the right beneficiaries at the right time requires both skills and an understanding of the supply chain. Logicians must continually add to their knowledge and learn the latest best practices in the field. This course will explain logistics, explore the ways that logistics can affect humanitarian support, and give students an opportunity to analyze case studies and develop methods for improving delivery of support.

HUAF 5031. Community Participation. (0 to 2 Credits)
The humanitarian aid community must cooperate with the national authorities to build or rehabilitate the basic infrastructure needed for access, shelter, and the provision of life-sustaining services. This work often has to be carried out on an emergency basis in far from ideal circumstances. This course will provide advanced knowledge of the technical requirements for the infrastructure needed in humanitarian emergencies. Students will be exposed to vital managerial decisions they must consider as they supervise teams of technical experts. Following the implementation of immediate infrastructure needs there remains the responsibility of humanitarian agencies to provide a range of basic services until such time as either the service is no longer required, the population has returned to its place of origin or the governmental agencies have the means and manpower to provide the services. This phase is often known as 'care and maintenance'. Students will have a clear understanding of the implications of these 'open ended commitments' to a population and potential exit strategies.
Attribute: URSR.

HUAF 5035. Forced Migration: The Humanitarian Challenge of the Decade. (0 to 3 Credits)
Millions of people worldwide have been forcibly displaced across countries and continents for a wide range of reasons, including armed conflict and natural disasters. Some have become refugees or Internally Displaced Persons (IDPs), while others live as irregular migrants. Some have been trafficked and live as victims of modern slavery. All find their futures dependent on political decisions and local perceptions driven by the media. This course will equip students to understand the complexity of forced migration and its relevant legal and protection framework, including International Refugee Law and the Guiding Principles on Internal Displacement. It will also address recent developments and the shift in emphasis from solving the problem of forced migration to the provision of durable solutions. This course is recommended for students who are interested in forced migration or who may wish to work in the areas of protection and response to affected populations. It is also recommended for humanitarian practitioners who are already working in this field and want to improve their knowledge and understanding of these complex issues.
Attribute: HUHR.

HUAF 5040. Communications and Media in Humanitarian Affairs. (0 to 2 Credits)
This course examines the history of representation of humanitarian crisis, and considers the impact of media accounts on the potential for humanitarian action. The role of photojournalism, and the images and narratives of broadcast and press reporting will be evaluated in the context of humanitarian goals and necessities. The dynamics between depiction and public perception, image and empathy, and narratives of compassion and inclusion will be articulated within the larger context of global security and human rights. As conflict, suffering and issue of life and death remain significant global realities, this course details the conditions, practices, messages, obligations, ethics, and limits of telling the stories of those in crisis.
Attribute: IHUA.
HUAF 5045. Humanitarian Advocacy: Communicating the Need and Motivating the Response. (0 to 3 Credits)
Humanitarians work in hostile environments where people are struggling for survival in situations of armed conflict or natural disasters. In such environments, people may have been forced to flee their homes with few—if any—belongings and may have suffered or witnessed human rights violations. Their plight needs to be communicated to the world in a way that will motivate the deployment of the protection and aid they so desperately need. This course will prepare students for the task of advocacy in humanitarian environments. It will focus on the identification of the most vulnerable members of a large group of survivors and the communication of their needs. It will equip students with the skills required to effectively communicate with local authorities as well as the international donor community. Students will learn to write in a different way than the academic style expected in other courses, focusing on effective advocacy messaging. This course is recommended for students who may envision working directly in advocacy for responding to humanitarian needs. It is also recommended for humanitarian practitioners who wish to prepare for a role in advocacy or are already working in this area.
Attribute: HUCB.

HUAF 5055. Human Rights and Human Crises. (0 to 2 Credits)
The course is designed to give students a comprehensive understanding of the foundations and principles of human rights and humanitarian law. Through specific case studies, students will be able to understand the legal aspects involved in humanitarian work, and will provide students with more confidence in their legal abilities when providing humanitarian aid.
Attribute: IHUA.

HUAF 5060. Disaster Management. (0 to 2 Credits)
The course prepares aid workers for the challenges and difficulties associated with both natural and man-made disasters. Students will study past disasters as well as current disaster management techniques and trends toward potential future disasters. After completing this course, students will have a more complete understanding of the different tools and techniques used to respond to crises.
Attribute: IHUA.

HUAF 5070. Leadership & Management in HA. (0 to 2 Credits)
Despite humanitarian agencies’ not-for-profit status, they must be managed and administrated on sound business principles. Students learn the managerial methods and skills required to become senior managers and directors of humanitarian organizations.

HUAF 5075. Leadership & Management in Humanitarian Assistance. (0 to 3 Credits)
When responding to humanitarian emergencies, managers need the right skills to work in exceptional, rapidly changing, and sometimes dangerous situations. While some conventional techniques may be employed, having skills that take into account the environment and the emotional impact of emergencies on teams and individuals is crucial. This course will teach students the skills required to manage teams responding to humanitarian crises. For students planning to work in such environments, it is recommended that they reflect on whether they envisage being in leadership roles or might need to understand the role of those under whose management they will work. The course is also recommended for humanitarian practitioners at all levels who want to improve their leadership and management skills.
Attribute: HULI.

HUAF 5080. Accountability in Hum Act. (0 to 2 Credits)
This course will explore the concept of accountability within humanitarian intervention. In particular, it will look at the contemporary significance of accountability and what specific events have led to a shift from donors and recipients of aid as the agents of accountability.

HUAF 5081. Holding Humanitarian Responders Accountable. (0 to 2 Credits)
The ability to handle external relations successfully has a growing impact—particularly at higher levels of management—on the ability of organizations to deliver humanitarian assistance. In this course, students are given the knowledge and skills to respond to the various external relationships that enable humanitarian agencies to operate successfully in a competitive and often hostile environment. Through case studies, the course teaches techniques for dealing with politically motivated and highly stressed interlocutors.

HUAF 5085. Delivering Humanitarian Response in Dangerous Situations. (0 to 3 Credits)
This course is designed to prepare humanitarians—individual practitioners, managers, and security staff—to work in high-risk environments. Students completing this course will be able to identify the most common security threats and trends in these risks, allowing them to be proactive in reducing their exposure. They will understand the organizational duty of care, learn how to develop compliant security plans, and conduct a security risk assessment. The concept of acceptable risk will be presented, as will the idea of balancing security risk with program delivery. Upon gaining an understanding of security planning, students will be introduced to techniques for critical incident management to reduce the impact of such events. In the final module, students will be taught how to better protect themselves during high-risk events to increase their chance of survival.

HUAF 5090. Ethics of Humanitarian Assistance. (0 to 2 Credits)
Humanitarian aid professionals are confronted with ethical questions in every area of their work. This course will explore these ethical questions, examine alternative ethical grounds for action, and seek to provide humanitarian professionals with a framework for evaluating practical ethical issues that arise, especially through past and current case studies.

HUAF 5095. Strategic Issues in Humanitarian Action. (0 to 2 Credits)
The theory and practice of humanitarianism continuously evolves in response to changes in the international political and economic environment and ongoing evaluation of humanitarian efforts. This course explores humanitarian affairs throughout the past century as a base for evaluating recent developments that will play a vital role in shaping humanitarian action in the future. High-level representatives from the political, international, military, religious, medical, legal and academic sectors contribute to lectures and discussions. Students discuss and develop strategies for responding to and mitigating complex emergencies.
HUAF 5100. Civil Military Cooperation. (0 to 2 Credits)
This course will give students an understanding of the practical workings, opportunities and constraints involved in the cooperation between the military and humanitarian organizations in the delivery of humanitarian assistance. The course begins with the study of the legal, political and structural bases for Civil Military Cooperation which is focused on the practical, rather than the theoretical application. Faculty and students will have the opportunity to share their experience of working in Civil Military situations and the teaching part of the course will culminate in a series of case studies in which the actual working of Civil Military Cooperation in a wide range of types of military deployments will be compared. Students will participate in a half day simulation exercise in which they will gain experience in the outworking of a Civil Military Cooperation in the context of a prepared scenario.
Attribute: IHUA.

HUAF 5150. Mental Health in Complex Emergencies. (0 to 2 Credits)
This is a 12-day training course for mental health professionals and program staff who wish to establish mental health or psychosocial programs in a humanitarian context within conflict and post-conflict areas. The course will aim to provide a practical orientation and training, including how to conduct rapid assessments, designing and setting up mental health services or psychosocial programs (exploring the differences between them), clinical work and therapeutic approaches in non-western contexts. It addresses the issues of cultural validity, conflict resolution and negotiation, taking care of oneself and dealing with burnout. The course will also introduce potential field workers to essentials such as personal security, logistics, and practical aspects of humanitarian work in the field.
Attribute: IHUA.

HUAF 5155. Education in Emergencies. (0 to 2 Credits)
30 million children live in conflict-affected countries. The program looks at the design and implementation of education projects from the emergency phase to post conflict situations, with a special emphasis on the mechanisms required to improve the quality of education during and after humanitarian crises.
Attribute: IHUA.

HUAF 5160. Urban Disaster, Vulnerability and Displacement: Humanitarian Action and Response. (0 to 2 Credits)
Explores global urbanization trends and the challenges created by urban disasters. The course focuses on the hurdles faced by vulnerable and displaced populations in cities and urban settlements and examines how the humanitarian community can better respond to man-made and natural disasters in both formal and informal urban settings. Discussion and debate with experts on urban disaster and populations at risk. Emphasis on humanitarian best practices and potential opportunities to increase resiliency and sustainability in complex urban settlements.
Attribute: IHUA.

HUAF 5200. Protection for Vulnerable Populations. (3 Credits)
This course will provide students with a comprehensive introduction to international practices and norms concerning the protection of vulnerable populations in humanitarian emergencies. The past 20 years of international humanitarian interventions has given rise to standardization of humanitarian activities, with a particular emphasis on protection practices. Students will gain an understanding of the landscape of organizations and entities involved in designing these frameworks and assess their efficacy and continued relevance to protecting vulnerable groups.
Attribute: HUHR.

HUAF 5210. Access to Education During Crisis and Conflict. (3 Credits)
This course will provide students with an introduction to the growing field of education in emergencies. With as many as 40 million children living in countries affected by crisis and conflict it has become increasingly important for humanitarian practitioners to understand the complexities of planning and implementing educational programming in these settings. Building on the theoretical frameworks covered in the course, students will evaluate the relationship between education, international development and humanitarian aid through the use of theoretical texts and case studies from around the globe.
Attribute: HUHR.

HUAF 5300. International Responses to Migration. (3 Credits)
This course will provide students with an enhanced awareness and understanding of the complex interaction between migration and humanitarian interventions from the point of view of the migrant, national authorities, and the international humanitarian community. With the crisis in the MENA region, particularly in Syria, and the mass migration to southern Europe it is imperative for students to understand the different motivations and determinants of action from regional (EU), national and local stakeholders as well as the diverse circumstances of the migrating populations. Students will be encouraged to critique the influence and motivations of mass and social media on the understanding of the economic, political, legal, and cultural factors of migration.
Attribute: HULI.

HUAF 5310. Urban Disasters and Displacement. (3 Credits)
This course will provide an overview of global urbanization trends and explore the challenges created by urban disasters, particularly in areas that receive a high number of displaced and unregistered populations. Students will analyze the current humanitarian response within these urban settings, while discussing existing best practices and potential opportunities to increase the resilience of affected communities in both form and informal urban settlements.
Attribute: HULI.

HUAF 5400. Disaster Risk Reduction. (3 Credits)
This course will provide students with a comprehensive overview of the phases of humanitarian action in order to understand strategies for disaster risk reduction (DRR). Emphasis will be placed on the multifaceted nature of disasters and complex emergencies and the need for community participation as well as the need for local, regional and international coordination. Students will be introduced to and encouraged to critique both current DRR guidelines and the implementation of past guidelines as well as recognize the sources of organized best practices.
Attribute: HUCB.

HUAF 5410. Gender Integration in Humanitarian Action. (3 Credits)
This course will introduce students to the myriad ways in which gender impacts the experience of both the humanitarian crises and subsequent intervention. Students will explore the legal, political, cultural, and economic frameworks that contribute to gender inequality as well as those that provide support for vulnerable groups. Emphasis will be placed on the tension between international guidelines/norms, program implementation, and unanticipated consequences of gender programming.
Attribute: HUCB.
HUAF 5500. Mental Health in Complex Emergencies. (0 to 3 Credits)
Over the past several years, the IIHA has run a popular 12-day course largely for mental health professionals. We will now be offering a distance learning course covering similar materials over a 15-week semester. This is a training course for mental health professionals and program staff who wish to establish mental health or psychosocial programs in a humanitarian context within conflict and post-conflict areas. This course is also open to Fordham graduate students in humanitarian studies or other relevant disciplines. It will aim to provide practical orientation and training, including how to conduct rapid assessments, designing and setting up mental health services or psychosocial programs (exploring the differences between them), and clinical work and therapeutic approaches in non-Western contexts. It will address the issues of cultural validity, conflict resolution and negotiation, taking care of oneself and dealing with burnout. This course will also introduce potential field workers to essentials such as personal security, logistics, and practical aspects of humanitarian work in the field.

Attribute: HUCB.

HUAF 5801. Humanitarian Internship. (1 to 3 Credits)
Students will have an opportunity to intern at prominent international humanitarian organizations, helping them gain the necessary exposure and understanding of the dynamics of such organizations and their mission. Our location enables students to pursue internships at and exposure to various United Nations agencies, diplomatic missions, international nongovernmental organizations, and prominent research and think-tank institutions. Students will complete an internship tutorial that matches their concentration area.

HUAF 5990. Master's Thesis Research I. (2 Credits)
Students should develop a thesis topic with a Fordham faculty advisor and a reader who has significant practical experience in humanitarian affairs, ideally after completing Module 2. This project is the culminating demonstration of the knowledge and skills gained throughout the MIHA coursework. The thesis will focus on practical examples of past mistakes, contributing possible solutions to the existing literature. The research methods necessary to writing the thesis are taught within the context of each module. Thesis projects should incorporate learning from previous MIHA courses, followed by final editing, defense and approval.

HUAF 5991. Master's Thesis Research II. (2 Credits)
This project is the culminating demonstration of the knowledge and skill gained throughout the MIHA coursework. The thesis will focus on practical examples of past mistakes, contributing possible solutions to the existing literature. The research methods necessary to writing that thesis are taught within the context of each module. Thesis projects should incorporate learning from previous MIHA courses, followed by final editing, defense and approval.

HUAF 5992. MSHS Thesis. (2 Credits)
In order to successfully complete the M.S. in Humanitarian Studies, students will be expected to synthesize the cumulative knowledge gained from their coursework, additional research, and internship experience (if appropriate) to write an original, substantive, and academic final thesis. The subject will be agreed upon between the student and their faculty advisor in conjunction with a humanitarian aid professional recognized by the Institute for Humanitarian Affairs.

HUAF 6000. International Diploma in Humanitarian Assistance. (0 Credits)

HUAF 6020. Int Emergency Relief. (3 Credits)
The course will be centered on presenting, discussing and reflecting on the main questions faced by the humanitarian community, examining these issues from a multi-disciplinary approach, finding new and creative answers and recommending practical tools to improve the effectiveness of humanitarian action. The meaning, methodological challenges, and ethical dilemmas of humanitarian action will be cross themes of the course so that by the end of the program, the students should have: An understanding of the main challenges and dilemmas facing the international humanitarian community through its practice in the field. A comprehensive knowledge of the history of the humanitarian practice, its main actors, and terms-relations in place to configure the landscape of the complexity of this field. A creative approach to discover the relationship between humanitarian response and the long-term development perspective. An appreciation of the complexity of this field.

HUAF 6030. Humanitarian Innovation. (0 to 2 Credits)
This course offers an in depth analysis of the strategic processes governing data and innovation strategies in modern humanitarian organizations, the first course of this kind in New York City. The course will introduce participants to a comprehensive understanding of how to select and adopt tools, strategies and techniques for data and innovation management. Topics covered include innovation portfolio creation and management, date management and processing, data ethics, real time data analytics, humanitarian technology design, and integration of GIS systems in project implementation. Participants will develop the core skills required by modern humanitarian organizations to be competitive and effective even if compared to corporate standards.

HUAF 8999. Independent Study. (1 to 3 Credits)
This is a graduate tutorial/independent study registration for humanitarian studies.

Humanitarian Studies (M.S.)
Requirements
The Master of Science in Humanitarian Studies degree is a 30-credit program constituted by five core courses, four elective courses to be taken across three thematic areas, an internship or independent study, and a master's thesis.

Four elective courses across the following thematic areas: 12

- Human Rights
- Communities and Capacity Building
- Livelihoods and Institutions
Courses in this group have the HUCB attribute.

Students concentrating in this area will work through practical skills to mitigate and respond to complex emergencies at a local level. Communities and Capacity Building Area

Courses in this area examine humanitarian response at the subnational level, including how processes are created, relationships are founded, skills are shared, and institutions are built, strengthened, and stabilized. Students concentrating in this area will work through practical skills to mitigate and respond to complex emergencies at a local level.

Courses in this group have the HULI attribute.

Internship

Our New York City location enables students to pursue internships and exposure to various United Nations agencies, diplomatic missions, international nongovernmental organizations, and prominent research and think-tank institutions.

Independent Study

Students have the choice of doing a one-credit independent study instead of an internship.

Thematic Areas

Human Rights Area

Courses in this area examine the preservation of human rights in humanitarian activities. A clear understanding of these rights and privileges is critical to those working within the humanitarian sector, and students concentrating in this area will emerge with skills and critical thinking in how to preserve those rights and privileges in those who are at risk.

Courses in this area examine humanitarian response through a macro-structural lens, incorporating global processes and a critical exploration of how international actors can support and enrich national and local societies in times of crisis. Students concentrating in this area will focus on causality and larger response mechanisms.

Livelihoods and Institutions Area

Courses in this area examine humanitarian response at the subnational level, including how processes are created, relationships are founded, skills are shared, and institutions are built, strengthened, and stabilized. Students concentrating in this area will work through practical skills to mitigate and respond to complex emergencies at a local level.

Courses in this area examine the preservation of human rights in humanitarian activities. A clear understanding of these rights and privileges is critical to those working within the humanitarian sector, and students concentrating in this area will emerge with skills and critical thinking in how to preserve those rights and privileges in those who are at risk.

Courses in this group have the HUHR attribute.

Courses in this group have the HULI attribute.

Livelihoods and Institutions Area

Courses in this area examine humanitarian response at the subnational level, including how processes are created, relationships are founded, skills are shared, and institutions are built, strengthened, and stabilized. Students concentrating in this area will work through practical skills to mitigate and respond to complex emergencies at a local level.

**International Diploma in Management of Humanitarian Action (Adv Cert)**

While our courses can be taken stand-alone, they can also be taken in pursuit of an advanced certificate certified by New York State’s Education Department. Upon successful completion of any of these programs, students will receive a Professional Certificate from Fordham University’s Graduate School of Arts and Sciences (GSAS) that is equivalent to 8 graduate level academic credits. Courses are designed to accommodate the schedules and work patterns of humanitarian workers through one-, two-, and four-week intensive sessions held in exciting locations around the world, including Amman, Barcelona, Kathmandu, New York City, and Vienna. These credits are accepted towards our Master of Arts in International Humanitarian Action (MIHA) and may be transferred to other academic institutions.

**International Humanitarian Action (M.A.)**

**Overview**

32-credit program divided into four modules: Humanitarian Assistance; Operational Humanitarian Assistance; and Management of Humanitarian Action, and Humanitarian Leadership. Modules 1, 2, and 3 can be taken as independent advanced certificates. The M.A. program can be completed in two to five years, depending on students’ availability and schedules. Courses are designed to accommodate the schedules and work patterns of humanitarian workers through one-, two-, and four-week intensive sessions held in exciting locations around the world.
including Amman, Barcelona, Kathmandu, New York City, and Vienna. Individual courses and diplomas can also be taken as stand-alone training sessions outside of the degree work.

International Political Economy and Development

Over the years, the IPED Program has produced many graduates who have gone on to satisfying careers in international banking and finance, government service, and international relief and development work in the non-profit sector. Our graduates have also compiled a very distinguished record of obtaining prestigious awards ranging from Fulbrights to US Presidential Management Fellowships. The consistent success of our graduates has given Fordham’s IPED Program an international reputation for academic excellence.

Admissions

The Master’s Program in International Political Economy and Development (IPED) accepts approximately 25 students each year. We seek students from different parts of the world that possess intellectual ability as well as enthusiasm for understanding the political, economic, and social challenges of the current economic world order.

Admission requirements for the M.A. program are the following:

- Bachelor’s degree or equivalent, with a GPA of 3.0 or higher
- A 500-1500 word statement of purpose that indicates how the IPED program would prepare you to reach your future career goals. It should also indicate if you are applying for any special fellowships (Amrepe, Global Markets, Public Service, Peace Corps).
- Official degree transcripts confirming prior degree conferral are required for all applicants, regardless of matriculation status. These should be ordered at least one month prior to the application deadline for your program of interest.
- Three letters of recommendation. When communicating with your recommendation letter writers, please provide them with at least one month’s advance notice to submit their recommendations. To facilitate this process, enter each recommender’s name and her/his email address directly into the online application. They will be notified electronically of your request. Please note: you may submit your application even if the submission of your recommendation letters is in progress.
- Previous professional work experience, which includes long-term volunteer service with organizations like the Peace Corps, is playing a larger role in the admissions process, especially for those who wish to specialize in international development studies.
- Graduate Record Examination (GRE) scores
- International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results. To be admitted to the IPED Program applicants should score at least 154 on the quantitative GRE, 156 on the verbal GRE, and 4.0 on the analytical GRE. For international students, TOEFL scores substitute for the verbal and analytical GRE scores. The minimum acceptable TOEFL score is 100. For the last three years, the average GRE scores for matriculated students were 160 verbal, 157 quantitative, and 4.6 analytical. The average cumulative undergraduate grade point average for our matriculated students was 3.48.

*Applicants who do not wish to be considered for university merit based financial aid may substitute LSAT scores or GMAT scores in place of the GRE. These individuals are still eligible for financial aid in the form of loans.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.
Programs

- M.A. in International Political Economy and Development (p. 777)
- Advanced Certificate in Emerging Markets and Country Risk Analysis (p. 776)
- Advanced Certificate in Financial Econometrics and Data Analysis (Interdisciplinary) (p. 777)

Courses

IPED 5550. The UN & Int'l Security. (3 to 4 Credits)

IPED 5560. Conflict Resolution. (3 Credits)
Wars are responsible for the greatest violation of basic human rights, destruction and human suffering. This course studies various attempts at mediation, negotiation, and peace-building that have been used to resolve the conflicts, sometimes without success.
Attribute: HUHR.

IPED 5771. Project M&E: Philippines. (3 Credits)
This course trains students to monitor and evaluate small community development projects. The Philippines, because of its rich and vibrant civil society, offers access to a large number of community organizations and projects focusing on, among other areas, fisherfolk, farmers, indigenous people, women, the rural poor, and the environment. A key component of the course requires students to form research teams that will conduct actual field surveys of local community development projects in the surrounding rural provinces outside metropolitan Manila.

IPED 6000. Latin America: Current Trends. (3 Credits)
The objective of this course is to help students develop the basic tools for political analysis in the context of an overview of the current political environment and economic circumstances of Latin America's main players. The course will provide information and guidelines for understanding the present situation within each of the main influential countries in the region and the interrelationship among these countries. The relationship with the United States and other extraregional players with increasingly important roles in the region, as well as the influence of the Organization of American States will also be explored.

IPED 6010. Emergency Relief Workshop. (0 Credits)
A two day workshop on emergency relief done in cooperation with Fordham's Institute on International Humanitarian Assistance.

IPED 6020. Int'l Emergency Relief. (3 Credits)
(Replaces HAGA 6020). Course studies relief efforts in situations where the capacity to sustain life is threatened frequently by political factors associated with high levels of violence.

IPED 6500. Boren Fellowship Preparation. (0 Credits)
Boren Fellowships provide students opportunity to add important international and language component to their graduate education through specialization in area study, language study, or increased language proficiency in areas of the world that are of significance to U.S. interest. The student will study a less commonly taught language and would be involved in research in a field of study deemed critical to U.S. national security.

IPED 6502. Boren Fellowship: Jordan. (0 Credits)
Boren Fellowships provide students opportunity to add important international and language component to their graduate education through specialization in area study, language study, or increased language proficiency in areas of the world that are of significance to the U.S. interest. The student will study a less commonly taught language and would be involved in research in a field of study deemed critical to U.S. national security.

IPED 6503. Boren Fellow: China. (0 Credits)
Boren Fellowships provide students opportunity to add important international and language component to their graduate education through specialization in area study, language study, or increased language proficiency in areas of the world that are of significance to U.S. interest. The student will study a less commonly taught language and would be involved in research in a field of study deemed critical to U.S. national security.

IPED 6504. Boren Fellow: Mozambique. (0 Credits)
Boren Fellowships provide students opportunity to add important international and language component to their graduate education through specialization in area study, language study, or increased language proficiency in areas of the world that are of significance to the U.S. interest. The student will study a less commonly taught language and would be involved in research in a field of study deemed critical to U.S. national security.

IPED 6505. Boren Fellow: Senegal. (0 Credits)
Boren Fellowships provide students with an opportunity to add an important international and language component to their graduate education through a specialized area study, language study, or increased language proficiency in areas of the world that are of significance to the U.S. interest. Students study a less-commonly taught language and are involved in research in a field of study deemed critical to U.S. national security. The Boren Fellowship assignment for this student recipient is in Senegal.
Attribute: IPED.

IPED 6520. Int'l Law & Development. (3 Credits)
Covers international organizations, human rights and environmental law.
Attribute: ABGS.

IPED 6700. IPED Fellow: Burkina Faso. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6701. IPED Fellow: Ecuador. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6702. IPED Fellow: East Timor. (0 Credits)
The International and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6704. IPED Fellow: Ghana. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6705. IPED Fellow: Honduras. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6706. IPED Fellow: Jerusalem. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6707. IPED Fellow: Rwanda. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6708. IPED Fellow: Sierra Leone. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6709. IPED Fellow: Malawi. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6710. IPED Fellow: Cameroon. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6711. IPED Fellow: Uganda. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6712. IPED Fellow: Senegal. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6713. IPED Fellow: Mali. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6715. IPED Fellow: Holy See Mission. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in key international development and humanitarian issues with the Permanent Mission of the Holy See to the United Nations. The student will serve in the Mission's office in New York to assist in the Mission's work in dealing with issues on migration and globalization.

IPED 6716. IPED Fellow: Guinea. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6717. IPED Fellow: Philippines. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6718. IPED Fellow: Haiti. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6719. IPED Fellow: Malawi. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development, and project assessment.
IPED 6720. IPED Fellow: Kenya. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development, and project assessment.

IPED 6721. IPED Fellow: Zambia. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development, and project assessment.

IPED 6740. Project Accounting. (1 Credit)
This course is a one-credit, four week review of basic accounting concepts used by project managers working for international relief and development organizations as well as for economic analysts in government and the private sector. Regular and complete accounting courses needed for business careers are offered in the Graduate School of Business.

IPED 6750. Project Design. (1 Credit)
This course is intended to help students (a) understand the origins, purposes and logic of results-based project and program management, (b) know what its major tools are and how they can be used and abused, (c) understand the challenges that the social sector (especially health and education) in developing countries poses to result-based management, and (d) to understand recent trends in international development cooperation that affect project and program management.

IPED 6760. Project Proposal Development. (1 Credit)
A practical course on the written and oral presentation of projects. Students preparing project proposals for Fulbrights and other prestigious awards may take the course at no course for zero credit.

IPED 6901. Women & Public Policy Fellowship. (0 Credits)
The Women & Public Policy Fellowship is an intensive leadership development program offered by the Center for Women in Government and Civil Service (CWGSC). The program is designed to maximize the skills and contributions of women who seek to achieve excellence in public service. The fellowship prepares women for leadership roles in public policy by fostering the knowledge and promoting the skills necessary to become accomplished public service leaders. The fellowship provides policy-related placements in New York State agencies, the Legislature, and statewide nonprofit advocacy organizations.

IPED 8080. IPED Internship. (3 Credits)
IPED 8081. IPED Internship. (1 Credit)
Intended for students who are engaged in an internship in a work that is related to their IPED field of study during the semester/term.

IPED 8085. IPED Internship. (0.5 Credits)
IPED 8090. IPED Intern Fellow. (0 Credits)
IPED 8999. Independent Study. (0 to 6 Credits)

Emerging Markets and Country Risk Analysis (Adv Cert)

Requirements

The Certificate in Emerging Markets and Country Risk Analysis is a ten week summer program running through June and July with classes two days a week in the evenings. It is earned by successfully completing one Political Science course and one Economics course. For students without a strong background in finance, a financial management course is also required, which will meet an additional two evenings a week during the first session. The certificate is available as an addition to a Masters degree or as a stand-alone certification. Some years, there is the option for students who are also pursuing an MA to substitute one course for an equivalent course taken at the University of Pretoria in South Africa during August.

Plan of Study

<table>

<th>Term 2</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 5540 or ECON 5541</td>
<td>Emerging Markets or Emerging Mkts: South Africa</td>
</tr>
</tbody>
</table>

POSC 6991 will meet two nights a week during the first summer session from 6:00pm - 9:00pm, typically on Mondays and Wednesdays. ECON 5540 will meet during the second summer session during the same time. Students who are required to take ECON 5040 will take it during the first summer session, and it will meet from the same times on the other two days a week, typically Tuesdays and Thursdays. To earn the certificate, the student must achieve a cumulative grade point average of 3.0 (B) or better in the classes taken for the certificate.

While students are earning this certificate, they are strongly urged to take advantage of their time in New York by doing an internship. Most students pursue an internship with a major financial firm or bank. For visiting or stand-alone students, internships should be worked out prior to coming to New York. Be sure to take advantage of career placement offices. You may also wish to consult the latest edition of Peterson’s Guide to Internships. A highly recommended internship would be as a summer analyst with the New York Federal Reserve Bank. Their deadline is normally January 31.

The course ECON 5541 Emerging Mkts: South Africa is sometimes offered during August at the University of Pretoria in South Africa. It is the same course as ECON 5540 but with a focus on South Africa as an emerging market. It is open only to a select number of students from Fordham University and the University of Pretoria. In addition to covering the same academic material as our regular course on Emerging Markets, this course will also allow you to meet with various business and government leaders from the South African community. Field trips to the South African Reserve Bank and the Johannesburg Stock Exchange are just two examples. Furthermore, when the academic component of the course is completed, we finish our time in South Africa with a safari...
to Krueger National Park. If you are a Fordham student interested in this course, please visit the IPED office early in the Spring semester.

If you are a visiting graduate student, be sure to confirm with your home school, and prior to your attendance at Fordham, how much credit you may transfer into your home program.

Financial Econometrics and Data Analysis (Adv Cert)

The Advanced Certificate in Financial Econometrics and Data Analysis is offered as a partnership between the Computer and Information Science Department and the Economics Department. Students pursuing a masters degree in Economics, International Political Economy and Development who are specializing in International Banking and Finance, or any degree granted by the Computer and Information Science department are uniquely qualified to pursue this certificate. This certificate may also be pursued as a stand-alone program.

Requirements

The Advanced Certificate in Financial Econometrics and Data Analysis is earned by having an appropriate background in finance and successfully completing one Economics course and one Computer and Information Science course with a cumulative grade point average of 3.0 (B) or better.

Total Credits 6

Courses taken towards earning this certificate may double count toward core and/or elective requirements for an MA degree. It is encouraged for students who have open electives to take Financial Econometrics (ECON 6950) if they choose to take Applied Econometrics (ECON 6910) for the certificate requirement.

International Political Economy and Development (M.A.)

Requirements

Completion of twelve courses (36 credits) beyond the bachelor’s degree is required, including four core courses (12 credits), one quantitative methods course (3 credits), and seven electives (21 credits). Satisfactory completion of an internship for those lacking relevant professional experience and a comprehensive examination are also required.

Full-time students can complete the program in three semesters while part-time students can complete the program in two years, including two summers.

ECON 6910 | Applied Econometrics | 2 |

Electives

Four concentration courses 3 | 12 |
Three free electives 4 | 9 |

Practical Training 5

Comprehensive Examination 6

Total Credits 36

1 Students who lack intermediate training in microeconomics and macroeconomics must take ECON 5011 Economic Analysis.

2 Depending on the student’s preparation, permission may be granted to take a more advanced quantitative methods course in place of Applied Econometrics.

3 Information about concentrations can be found below.

4 Free electives should be choose in consultation with an advisor.

5 Information on the Practical Training requirement is available on the Fordham website.

6 More information on the comprehensive examination can be found on our page on the Fordham website.

Core Courses

The two economics courses and the two political science courses must be chosen from two of the available fields, as listed above. It is recommended, but not required, that the student cover all three fields. Depending on the student’s preparation, the director may grant permission to take a more advanced level course instead of a particular core course. The student, however, should be aware that the comprehensive examination is based primarily on the material presented in the economic and political science core courses.

Concentrations

International Development Studies

This specialization is designed to prepare individuals for work with relief and development organizations as project managers in both the non-profit and government sector.

### Foreign Language and Overseas Experience
Most development organizations require professional proficiency in a foreign language as well as overseas experience. Students in this specialization should use their summer after their first year of study to intern overseas in a developing country with an appropriate non-profit or government agency. Please be aware of IPED’s Language Immersion Study Awards, Summer Internship Stipends and International Peace and Development Travel Scholarships.

### International Banking and Finance
These four courses are required to earn the specialization:

<table>

</tbody>
</table>

The following foundational courses may also be taken:

- ECON 5011 | Economic Analysis |
- ECON 5710 | Mathematical Analysis in Economics |
- ECON 6010 | Microeconomic Theory I |
- ECON 6020 | Macroeconomic Theory I |
- ECON 6910 | Applied Econometrics |

The following are other subject-pertinent courses:

- ECON 5020 | African Economic Development |
- ECON 5260 | Epidemics and Development Policy |
- ECON 5415 | Gender & Economic Development |
- ECON 5450 | Crises, Adjustment and Poverty |
- ECON 5500 | Financial Analysis |
- ECON 5540 | Emerging Markets |
- ECON 5551 | Domestic and International Banking |
- ECON 5570 | Global Financial Markets |
- ECON 5771 | Project Assessment |
- ECON 6240 | Financial Economics |
- ECON 6440 | Development Economics |
- ECON 6460 | Agriculture and Development |
- ECON 6470 | Growth and Development |
- ECON 6480 | Environmental and Resource Economics |
- ECON 6490 | Foreign Aid and Development |

1 The Project Accounting requirement may be waived if the student possesses a background in accounting.
Medieval Studies

Known for its excellence in diverse fields of medieval research, Fordham University offers the master of arts degree in medieval studies and a doctoral-level medieval concentration. Fordham's intimate size and tradition of devotion to teaching offers students an intellectual climate in which faculty members, well-known and active in the scholarly community, encourage and support students in their academic pursuits. The University offers graduate assistantships and fellowships to a limited number of students.

Embracing the full sweep of artistic, literary, scholastic and cultural issues that make medieval civilization such a rich field of study, the degree programs draw on the expertise of faculty in the departments of art and music history, classics, English, history, modern languages and literature (French, German, Italian, and Spanish), philosophy, political science, and theology. Each year the Center offers several specifically interdisciplinary courses that bring together specialists in different fields, on the assumption that our understanding and appreciation of medieval civilization is particularly enriched by a multi-disciplinary perspective. Technical preparation is key to these interdisciplinary studies, so the graduate program emphasizes diverse research skills that range from examining primary documents to creating and managing databases.

The program is administered through its Director and through the Center for Medieval Studies, located at the Rose Hill campus. The Center houses a small library and discussion area available to students. The main University library is especially strong in its medieval holdings. Fordham’s location in New York City affords easy access to other major libraries (such as the Pierpont Morgan Library and the New York Public Library), museums (for example, The Cloisters and the Metropolitan Museum of Art), and other institutions of higher learning. A University-operated campus shuttle makes regular trips between the Lincoln Center and Rose Hill campuses throughout the day and evening.

The Center supports the exchange of views and information through its annual conferences, lecture series, publications, and professional workshops. Fordham faculty are also invited to address colleagues and students informally, and graduate students have also presented lectures.

For more information about Graduate-level Medieval Studies, please visit our page on the Fordham website.

Admissions

The Doctoral Certificate in Medieval Studies is available only to current Fordham students.

Completed applications to the M.A. in Medieval Studies will include each of the following items:

Resume/CV
Up to two pages in length (submit via the online application).

Official transcripts
Official degree transcripts confirming prior degree conferral should be ordered at least one month prior to the application deadline. Please ensure that they are sent directly to the Office of Admissions via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458. Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.

Statement of Intent
Up to 500 words submitted electronically via the online application. Describe your interest in the program, what you hope to gain personally and professionally from the program, and your commitment to the field. Please highlight relevant professional, personal, and academic experience.

Writing Sample
5 - 20 pages submitted electronically via the online application.

Recommendations
Three letters of recommendation submitted directly by referees via the online application.

Official GRE Scores
Should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code #2259

English Proficiency
International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results. Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code #2259.

Financial Aid
Graduate assistantships and fellowships are available to all applicants to graduate departments on a merit basis. Several of these graduate assistantships are specifically reserved for first year students in the Medieval Studies master’s program. These graduate assistantships include the tuition for 30 credit hours of coursework, a stipend towards health insurance and a stipend for nine months (currently $22,685), in return for working for the Center for Medieval Studies or another academic unit for around 18 hours a week. University, Loyola and Bennet Fellowships, awarded on a merit basis to incoming students, include higher stipends. PhD students enrolled in the Medieval Studies Doctoral Certificate program are also eligible to apply for a Senior Teaching Fellowship, which provides an additional year of funding. Graduate students in Medieval Studies are encouraged to apply for research and travel grants through GSAS. The Graduate Student Association also offers the Professional Development Grant each semester. The GSAS also offers Summer Assistantships on a competitive basis.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.
**Programs**

- MA in Medieval Studies (p. 783)
- Doctoral Advanced Certificate in Medieval Studies (p. 783)

**Courses**

**Medieval Studies department courses**

**MVST 5024. Medieval Political Thought. (3 to 4 Credits)**

This course is a seminar specifically designed around an exhibition at the Metropolitan Museum of Art opening in March 2012. Byzantium and Islam: Age of Transition (7th-9th century). This exhibition offers a unique opportunity to study not only the impact on the visual arts of the interaction of the Byzantine and Islamic cultures at this critical historical period, but also to examine the art of architecture of Carolingian France and Visigothic Spain from this perspective. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**MVST 5050. World of Late Antiquity: Introduction to History, Art, and Culture. (4 Credits)**

This course offers an introduction to the history, art and culture of the Late Antique world from the third to the sixth century. We will explore the older narratives of decline in this period alongside powerful alternatives proposed by scholars more recently, drawing on both primary sources and monuments and critically examining the secondary literature that studies them. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**MVST 5064. The Divine Comedy: Poetry, Theology, and the Medieval Imagination. (4 Credits)**

This seminar offers an in-depth study of the poetic and theological imagination of Dante's Divine Comedy. We will combine close reading of selected cantos with primary and secondary works illuminating key aspects of Dante's literary and theological invention. Issues will be discussed within the historical and ideological contexts of the relevant theological and poetic debates in Dante's time. We will consider Dante's theological influences, such as Augustine, Boethius, Bernard of Clairvaux, and Bonaventure, and explore theological topics such as medieval Christian practices of pilgrimage, scholastic debates about atonement and the afterlife, cosmology, and the relationship between erotic love and divine union in Christian mystical theology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**MVST 5070. Manuscript Culture. (4 Credits)**

Introduction to principles, materials, and study of medieval manuscripts and primary documents as well as to problems of evaluation of the cultural contexts of their production and use. Ancillary topics will include manuscript illumination, the resources of codicology and paleography, the preparation and evaluation of modern editions, the assessment of readership and patronage, material philology and the materialism of the middle ages, the development of libraries. Students will do hands-on work with primary sources at the Morgan Library, the rare book collection of the New York Public Library, and the rare books and manuscripts collection in Walsh Library. Final projects will be tailored to the students' primary research areas and expertise. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**MVST 5077. Editing Medieval Texts. (4 Credits)**

This is a course in the theory and practice of editing, especially as it relates to medieval texts, with most of the examples coming from Middle English. We'll give attention to documentary, historical, and aesthetic approaches, and we will spend some time exploring digital methods and concerns. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**MVST 5080. Interdisciplinary London: Medieval Manuscripts, Sources, Methods. (4 Credits)**

An introduction to methodologies in Medieval studies through a focus on the primary sources and material culture of medieval London. The course will center on how an interdisciplinary approach that draws on a range of sources (textual, visual, and material) and methods (employed in archaeology, digital humanities, history, literary studies, and paleography/codicology) can enrich our understanding of one medieval place and its people. Training in paleography is an important element of the course. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**MVST 5095. Medieval Pilgrimage. (4 Credits)**

Pilgrimage will be conceptualized broadly, entertaining a variety of aims for travel and also considering the pilgrimage form as a purely conceptual exercise as well as a journey with more practical aims. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**MVST 5100. Cultures of Music and Sound in the Medieval World. (4 Credits)**

Music and Sound enriched every facet of pre-modern life, liturgy and ritual above all. This interdisciplinary seminar introduces medievalists - especially those without formal musical education- to the cultures of medieval and Renaissance music. It should enable students from any discipline to engage music and the sonic more fully in their research and teaching. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

*Updated: 07-27-2020*
MVST 5101. Modern Sounds, Early Music. (3 Credits)
Medieval and Renaissance music’s fragmentary survival has inspired scholars, performers, composers, and artists to realize what remains according to varying creative urges and ideological preoccupations. This course examines the cultures of early music as well as their living legacies. Studying musical traditions from 1000 to 1600, we build a technical vocabulary for discussing music and seek to understand how historical change affects aesthetics, music-making, and listening from 1000 to the present. We also study the reception of medieval music—how it has been rejected, restored, recreated, and reimagined—to consider how ‘the medieval’ is historically produced. No prior musical experience required.

MVST 5102. Theorizing Medieval Sound: Medieval Sonic Worlds. (4 Credits)
In this interdisciplinary seminar, we read widely and listen actively to the texts, musics, and objects of the European Middle Ages to find out just how closely we can come to encountering medieval sonic worlds. Using an electric array of primary, secondary, and theoretical works, we study medieval sound cultures and the production of sonorous meanings for medieval listeners in all their complexity. At the same time, we investigate how open-minded engagement with the sonorous Middle Ages can challenge us to rethink prevailing popular and scholarly attitudes towards the body, the senses, media, and the past.

MVST 5200. Medvl Iberian Lit & Soc. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 5201. The Renaissance of the 12Th Ce. (4 Credits)
This graduate seminar explores the religious, intellectual, literary, and cultural contours of the ‘long’ 12th Century with equal weight given to the diversity of medieval sources that survive and to modern historiographic interpretations. The class will include visits to the Coisters museum and to the Morgan library. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 5202. Medieval Monsters: Terrors, Aliens, Wonders. (4 Credits)
Taught in conjunction with an exhibition of medical manuscripts at the Morgan Library & Museum, this course examines the vital role played by monsters in medieval art and culture. The course is taught by the curators who will include gallery visits and meetings at the Morgan and will involve original research and work on an online exhibition.

MVST 5205. Court Culture Med Iberia. (4 Credits)
This course will explore the cultural, social, political and religious tensions that helped to form medieval Iberian courtly communities from the 10th to the 15th centuries. The unique situation of Iberia during this period, when the centralized and consolidation of sovereignty occurred in different religious and cultural contexts (Islamic and Christian) and political territories (Castile, Aragon) allows for a diverse, rich and contrasted analysis of medieval court culture. Our approach will be multidisciplinary and include literary texts, artistic manifestations, legal codes, religious writings, and chronicles. Among the courts to be studied will be the Omeyan court of the 10th century Cordoba, the Muslim kingdoms of 11th century Granada and Zaragoza, the Christian courts of Alfonso X of Castile and Jaume I of Aragon, and the late medieval court of Isabella Ferdinand. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 5300. Occitania: Language and Power. (4 Credits)
This course introduces students to the cultural world of a medieval "south": Occitania. Texts in Old Occitan include documentary writing, historical narrative, and the poetry of the troubadours. Topics include urban/rural communities, gender and power, the Albigensian crusade and its aftermath and the beginning of vernacular book production.
Attributes: ENG1, ENME.

MVST 5305. Writing East: Outremer and Identity in the Middle Ages. (4 Credits)
As the stage for the central events of the Gospel narrative, the lands of the eastern shore of the Mediterranean long occupied a central place in the collective imagination of Latin western Europe. Over the course of the Middle Ages, however, increasingly frequent encounters resulting from trade, pilgrimage, and crusade not only enriched the European image of the East, but vastly enhanced the significance to how medieval Christians approached the eastern Other. This course will trace the rise of a discourse of differences centered in what was called in England and France, 'Outremer,' the land beyond the sea. Together with medieval literary productions, histories, letters and travel narratives, we will read works from the growing body of scholarship on this important topic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENG1, ENME.

MVST 5310. Chivalric Romance. (4 Credits)
This seminar will look at the genre of the chivalric romance at the intersection of different vernacular traditions and genres. What happens to Chretien de Troyes’ classics when they are adapted to the language and culture of another country? And how does the romance relate to the chanson de geste, the saint's life, the lai, or the fabliau? What if the protagonist is not a knight but rather a woman? Or a peasant? A Saracen? A pope? Or a combination of some of the above? The goal of this seminar will be to provide an overview of the wide range of romance themes and adaptations in Europe, including their reception to the present day. Students are expected to read and a well-annotated Middle English romance in the original. All other texts can be prepared in translation, while some of the class time will be dedicated to closely reading some crucial passages in the original Latin, Old French, and Middle High German. Open to seniors with a G.P.A. of 3.0 or better. Please consult your advisor.

MVST 5570. Medieval Crusades. (4 Credits)
This course adopts an interdisciplinary approach to the study of the medieval crusades in the Levant, southern France, Iberia, and the Baltic, with attention paid to the Islamic and Byzantine perspectives. The sources to be discussed include chronicles, charters, sermons, literary texts, songs, and hagiography, as well as architectural and artistic monuments and objects. Among the themes to be treated are crusader motivations, crusades and memory, European 'colonization', women and family in crusading society, crusading liturgies, the military orders, and diplomacy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
MVST 5707. Meditation, Contemplation, and the Spiritual Senses. (4 Credits)
The late Middle Ages saw an astonishing proliferation of texts, practices, and styles of devotion seeking to draw human beings closer to God through the body. New emphasis on Christ’s humanity and Aristotelian natural philosophy prompted the rediscovery of the five corporeal senses and their cognitive processes in devotional literature. In this course, we will examine the languages, knowledges, desires, and anxieties surrounding the senses in a diverse corpus of texts, probing them for their theological import as much as for their literary design. Major authors: Aristotle, Augustine, Origen, Hugh of St. Victor, Bonaventure, Richard Rolle, Chaucer, Margery Kempe, Meditationes Vitae Christi. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENG1, ENME.

MVST 5708. Struggling Toward God: Meditation and Prayer in the 11th- and 12th-Century Monastery. (4 Credits)
This course explores the dimensions of medieval monastic contemplation in the heyday of Benedictine and Cistercian spiritual writing, the 11th and 12th centuries. The course will aim to answer the following questions: What did extra-liturgical prayer and meditation look like for medieval monks and nuns? Where, when, and how was it practiced? Was there a set way to engage with monastic meditation, or were there a variety of medieval monastic meditative experiences in the 11th and 12th centuries? What did monks and nuns perceive as the limitations of monastic prayer and meditation? What extra-textual tools did monks and nuns rely upon to stimulate their practices of meditation? And what does monastic meditation reveal about the emotional lives of Benedictine and Cistercian monks and nuns in the high Middle Ages? Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 6209. Themes in Preconquest Lit. (4 Credits)
This course is an advanced-level seminar on the language and literature of Anglo-Saxon England. We will read (in Old English) texts including poetry, homilies, saints’ lives, and chronicles. Substantial attention will also be given to Anglo-Saxon paleography and relevant critical literature, with the aim of providing students with the resources needed for the scholarly study of OE. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 6232. Fr of Eng: Doc & Lit Cult. (4 Credits)
This course focuses on law, mercantile, medical and other forms of documentary and civic texts in the French of England, as well as literary texts, both the well-known and the under-researched: texts with Middle English versions will be included wherever possible. For newcomers to the subject, a linguistic practicum, which should be regarded as obligatory, is offered in the hour preceding the class meeting: some knowledge of modern French is a must. Some linguistic work together with seminar student presentations and discussion takes place in each class. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 6700. Medieval Scholasticism. (4 Credits)
This interdisciplinary graduate course will provide an introduction to the history, theology, and philosophy of the Scholastic movement in the High Middle Ages. Topics to be considered include: the economic, social, political, religious, and educational transitions that together constitute the 'renaissance of the twelfth century'; the rise of open urban schools and the development of the university; and characteristic modes of thought and discourse in scholastic theology and philosophy. Thinkers to be examined include Anselm of Canterbury, Hugh and Richard of St. Victor, Peter Abelard, the school of Laon, Peter Lombard, Albert the Great, Thomas Aquinas, Bonaventure, John Duns Scotus, and William of Ockham. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 8100. Internship for Medievalists. (1 Credit)
This is the obligatory tutorial to be taken in conjunction with any internship taken at libraries, museums, or other institutions of professional interest to medievalists. The student will meet with the instructor regularly to reflect on their internship experience and document their work in an appropriate format (journal, blog etc)

MVST 8500. Independent Research. (1 to 4 Credits)

MVST 8501. Independent Research. (1 Credit)

MVST 8999. Tutorial. (0 to 4 Credits)

Courses in other areas
Aside from courses with the subject code, the following courses have the MVSG attribute and count toward the masters and certificate in Medieval Studies.

Medieval Studies (Adv Cert)

Requirements

- Four graduate-level courses selected from among the medieval course offerings of the Medieval Studies program and the Center's participating departments. The courses should be chosen to create two minor fields (two courses in each field), both of which must be outside the student's own doctoral department. See the MA page for guidance on selecting concentrations.
- A course in Latin Paleography.
- A reading knowledge of Latin (or Greek where appropriate).
- A reading knowledge of two vernacular languages (other than English).
- Upon completion of all course and language requirements, the student must pass comprehensive exams in the two minor fields.

The assessment of reading knowledge in a foreign language follows the guidelines set out by the Graduate School of Arts and Sciences. The comprehensive exams in the minor fields generally consist of a three-hour written exam for each field, with questions set and marked by the student's instructors in the minor field courses. In doctoral departments which allow students to choose a minor field outside the department, candidates for the doctoral certificate may opt to take one of the minor fields according to the guidelines of the home department (for example, an oral exam if the student is doing a Ph.D. in History). Minor field exams will normally be graded high pass, pass, or fail. Students who fail one or more of the minor field exams are allowed to retake each exam once, normally within one calendar year of the first attempt.

Upon the successful completion of these requirements and a successful defense of a dissertation written under a mentor from the major department, the student will receive the Doctoral Certificate in Medieval Studies at Commencement ceremonies when the Ph.D. is awarded.

Medieval Studies (M.A.)

The master's degree appeals to those interested in a broader spectrum of medieval subjects than is available within a specific discipline. Its 30-credit requirement allows the serious student to complete course work in one year of full-time study. The curriculum for the master of arts degree comprises courses designed especially for the program, as well as a wide variety of offerings in the graduate wings of participating departments.

Requirements

All courses taken must be graduate-level courses, or 5000+. Please consult your academic advisor to assist with course selection.

Capstone

One of the following:

- MVST 0936 Master's Comprehensive Examination-Medieval Studies
- Research Paper

Total Credits 0

1 A list of graduate-level classes with the MVST subject code or MVSG attribute code can be found on our department page (p. 780).
2 Concentrations can be disciplinary, or coming from the same subject code, or they can be thematic, or two courses from different departments on the same subject. Please consult your advisor for previously used combinations, and to choose what is best for you.
3 Those electing to pass the examination must have given evidence in a graduate-level course of their ability to write a developed paper.

Updated: 07-27-2020
Philosophy

For more than 150 years, Fordham's philosophy department has trained students and teachers in the Jesuit tradition. As part of that tradition, our program is grounded in a strong understanding of the history of philosophy from the ancient world to the contemporary.

Fordham highly values philosophical pluralism. Our faculty represent diverse schools and perspectives, and students enjoy an uncommonly well-rounded philosophical education. All graduate students take courses spanning the history of philosophy, including contemporary philosophy.

Fordham's philosophy department is renowned for its strengths in Continental philosophy, Epistemology, Ethics, Medieval Philosophy, Metaphysics, and Philosophy of Religion.

The Jesuit tradition emphasizes eloquium perfecta, effective and clear writing and speaking. Fordham's philosophy graduate students are therefore strongly encouraged to publish and present their original research. Our coursework emphasizes papers over examinations, and we conduct yearly seminars on professional writing.

As a Fordham graduate student, you are at the heart of one of the most vibrant philosophical communities in the world. Through the New York City Graduate School Consortium, our students can take classes for Fordham credit at NYU, Rutgers, Columbia, Princeton, and the CUNY Graduate Center, and attend the numerous symposia, conferences, and lectures that take place in the New York area.

At Fordham, you will gain a wealth of experience in teaching philosophy. Our doctoral students regularly begin teaching introductory philosophy courses in their second or third year, and we provide training through pedagogy seminars and faculty mentorship.

For more information about Graduate-level Philosophy, please visit our page on the Fordham website.

Admissions

Candidates are expected to have at least 24 undergraduate credits in philosophy, preferably a major. Non-philosophy majors should have solid training in some other demanding discipline, such as mathematics, science, classical Latin or Greek; an undergraduate GPA of not less than 3.3 for seven semesters is required, with an average of 3.5 in philosophy. Completed applications will include each of the following items:

- Official degree transcripts confirming prior degree conferred should be ordered at least one month prior to the application deadline. Please ensure that they are sent directly to the Office of Admissions via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458. Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.
- Resume/CV
- Statement of intent (500 - 750 words, submitted electronically via the online application)
- Writing sample (5 - 20 pages, submitted electronically via the online application)

- Three letters of recommendation (submitted directly by referrers via the online application)
- Official GRE scores (should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code #2259).
- English Proficiency - International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS), Cambridge English Proficiency Level language testing results. Competitive applicants will have earned TOEFL scores above 100 and/or an IELTS score of 7.5 or higher.

The department may prescribe additional coursework for students whose backgrounds are deficient, in which case the time limit for completion of coursework will be extended.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.

Programs

- PhD in Philosophy (p. 793)
- MA in Philosophy (p. 791)
- MA in Philosophical Resources (p. 790)

Courses

PHIL 5001. Introduction to Plato. (3 Credits)
Study of Plato's developing thought, starting with the materials he inherited from poetic and philosophical forerunners, and analyzing how his original ethical-political interests compelled him to confront epistemological, metaphysical, and theological concerns. Course will focus mainly, but not exclusively, on early and middle dialogues.

Attributes: CEED, CEMP, CLAS, MVSG, PGAN.

PHIL 5002. Nineteenth Century Philosophy. (3 Credits)
Post-Kantian developments in philosophy from Hegel to Nietzsche.

Attribute: PGCM.

PHIL 5003. Natural Law Ethics. (3 Credits)
A study of the natural law tradition in ethics: its origins in classical philosophy, its integration with Christian thought in the Middle Ages, and its application to selected contemporary problems. A study of the principles of natural law ethics and its applications to selected current moral problems. The course includes a treatment of the historical origins of the theory of natural law, with special emphasis on the relevant texts of Thomas Aquinas from the Summa Theologiae. Among the topics treated will be the relation of morality to positive law and to divine law, the nature and limits of authority; the common good, the nature of the human person, virtue and vice, and such principles as subsidiarity double effect, and finality.

Attributes: CEED, CEMP, HECH, PGOC.

PHIL 5005. Classical Modern Philosophy. (3 Credits)
A study of the history of philosophy from Descartes to Kant.

Attribute: PGCM.

PHIL 5009. Introduction to Aristotle. (3 Credits)
An introduction to the thought of Aristotle through the study of the De Anima and the Metaphysics.

Attributes: CEED, CEMP, MVSG, PGAN.
PHIL 5010. Introduction to St. Thomas Aquinas. (3 Credits)
This course will be a general introduction to Aquinas’s philosophical thinking. We shall pay special attention to his philosophy of God. We shall also turn to what he says about questions such as the scope of human knowledge, the nature of the human being, and the nature and significance of human action. As well as being expository, the course will consider the cogency of Aquinas’s position on various topics. It will also try to relate what Aquinas says to what other philosophers, especially modern philosophers, have had to say. The course will not presuppose any previous detailed knowledge of Aquinas on the part of students.
Attributes: CEED, CEMP, MVSG, PGMD.

PHIL 5012. Introduction to St. Augustine. (3 Credits)
This seminar provides a systematic survey of the main themes of St. Augustine’s philosophy and theology. Topics will include faith and reason, divine ideas, time, eternity, and creations, the theology of the Holy Trinity, the nature of the soul, the freedom of the will and divine predestination, good and evil, original sin and divine grace, and the human history as the history of salvation. The unifying theme of the discussion will be a synthetic account of St. Augustine’s Neoplatonic Christian anthropology, occasionally contrasted with St. Thomas Aquinas’ Aristotelian Christian anthropology. The discussion will be organized around student presentations and two term papers on topics other than one’s presentation topics.
Attributes: CEED, CEMP, MVSG, PGMD.

PHIL 5051. Existentialism and Critical Phenomenology. (3 Credits)
This course studies the 20th-century French existential phenomenologists as germinal for the contemporary critical turn in phenomenology. Readings will be both classical and contemporary, and authors may include Husserl, Sartre, Merleau-Ponty, Beauvoir, Fanon, Ahmed, Guenther, Al-Saji, Ortega, and Salamon.
Attribute: PGCC.

PHIL 5075. Continental Philosophy and Faith. (3 Credits)
A survey of significant movements in 20th century European philosophy in regard to their consideration of and impact on questions of faith or religion, especially in regard to postmodern culture, the ‘death’ of the subject, and the grounding of rationality.
Attribute: PGCC.

PHIL 5098. Sem: Philosphic Integration 1. (3 Credits)
This course supports the student in constructing an adequately grounded and coherent personal synthesis of the five systematic areas of philosophy, i.e., metaphysics, epistemology, philosophy of the human person, philosophy of God, and ethics. Appropriate course work in each of these areas, as well as in the history of philosophy, is presupposed. For students in MAPR program.

PHIL 5099. Sem: Philosophic Integration 2. (3 Credits)
A continuation of PHIL 5098, Seminar: Philosophical Integration I.

PHIL 5100. Logic I. (3 Credits)
An introduction to symbolic logic.

PHIL 5114. Normative Ethical Theory. (3 Credits)
This is a masters-level introduction to major theoretical approaches in normative ethics, including virtue ethics (mainly in the Aristotelian tradition), utilitarianism, deontological or rights-based theories, and contractualism. It does not cover natural law theories or alterity ethics. The main readings will focus on contemporary examples of these normative theories with some attention to applications, historical sources may be included as needed, but our discussion will focus on the strengths and weaknesses of the theories rather than on historical developments. The course assumes no particular background, though it is helpful if students have read some Aristotle, Kant, and Mill before.
Attributes: CEED, CEMP, HECH, PGCA.

PHIL 5209. Ancient Philosophy. (3 Credits)
This course studies major figures at the foundation of Western philosophy, reflecting on the questions the philosophers posed and the teachings they developed in response. Pre-Socratics, Plato, Socrates and Aristotle, as well as Stoics and Epicureans are among those to be examined. There will be opportunities to connect the ideas of Greek and Roman antiquity with early Eastern philosophies as well as later Western philosophies.
Attribute: PGAN.

PHIL 5305. Confronting Moral Controversy. (3 Credits)
Moral and political controversy is everywhere, but it can seem like it never gets anywhere. Our society is deeply divided over certain controversial topics— for example, abortion, affirmative action, animal rights, free speech, pornography, and climate change. This course will ask students to confront these moral controversies, and it will focus primarily on developing three crucial skills. First, students will learn to read and interpret influential articles by moral philosophers on these issues. Second, students will develop the ability to argue productively about these controversial issues with other students who might not share their opinions. Third, each student will develop and defend a moral principle (or set of principles) that can justify their own particular moral views. Students should leave the course better equipped to deal with moral and political controversy in their lives and careers.
Attributes: CEED, CEMP, CETH, PGCA.

PHIL 6025. Philosophy's Origins. (3 Credits)
Starting with the beginnings of Philosophy in Greek antiquity (i.e, the testimonies and fragments of works transmitted from the early pre-Socratics of the 6th century B.C.E, the seminar takes up three intersecting topics. The first considers commentary from the classical Greek era to the 20th century on how and why this new inquiry, ‘philosophy’, originated. The second, related topic is the role, indeed the centrality, of the topic of ‘origins’ for the early Greek thinkers themselves. The third seminar topic is the concept of ‘origins’.
Attribute: PGAN.

PHIL 6120. Democratic Political Economy. (3 Credits)
This course investigates the contributions philosophy has to make to the interdisciplinary project of developing a general, context-sensitive, and justice-oriented framework for democratic political economy. The thinkers discussed come from a variety of traditions, including analytic philosophy, pragmatism, feminism, critical theory, African-American philosophy, and indigenous philosophy.
Attribute: PGOC.
PHIL 6190. Feminist Political Philosophy. (3 Credits)
We will balance a study of feminist critiques with a study of feminist
contributions to reimagining political theories, institutions, and practices.
We will focus our study around a current scholarly debate in the field,
while inquiring into the philosophical context of this debate in canonical
texts and figures.
Attribute: PGOC.

PHIL 6215. French Phil of Education. (3 Credits)
An examination of philosophies of education in recent French thought,
paying particular attention to the teaching of philosophy itself. Authors
studied include Bourdieu, Derrida, Le Doeuff, and Ranciere.
Attribute: PGCC.

PHIL 6242. Language and Identity. (3 Credits)
In this course we will examine the relationship between language and
identity, primarily as it is theorized by three thinkers writing in French:
Jacques Derrida, Edouard Glissant, and Barbara Cassin.

PHIL 6251. American Pragmatism. (3 Credits)
A survey of the central themes and figures of American Pragmatism from
Peirce to the present.
Attribute: PGOC.

PHIL 6252. American Philosophy. (3 Credits)
From transcendentalism to naturalism- Emerson, Royce, Peirce, James
and Dewey.
Attribute: PGOC.

PHIL 6270. Pragmatist Ethics. (3 Credits)
This course will consider the elements of ethics present in the tradition
of American pragmatism from roughly 1860 to 1960. We will engage with
texts from some or all of the following thinkers: Charles Peirce, William
James, , Jane Addams, W.E.B. Du Bois, John Dewey, Ella Lyman Cabot,
George Santayana, Josiah Royce, George Herbert Mead, Alain Locke, and
Clarence Irving Lewis.
Attribute: PGOC.

PHIL 6410. Understanding and Wisdom. (3 Credits)
The course will mainly deal with contemporary work from epistemology
and philosophy of science on these topics, but we will also look at some
ancient traditions that are relevant, as well as spend a few classes
looking at continental and hermeneutical approaches.
Attribute: PGCA.

PHIL 6420. Expertise. (3 Credits)
Specialization and division of labor have scored tremendous gains
in human knowledge. We live in a world of expertise and experts. But
the mere existence of expertise does not settle all of the practical and
intellectual questions we face about properly taking advantage of
expertise—and not being taken advantage of by experts who mislead
and misinform. Over the past couple of decades, philosophical questions
about expertise, trust in experts, and the abuse of expertise have gained
attention, and that growing literature will be our focus in this seminar.
Here are some of the questions we will consider. What is the nature of
expertise and the function of experts? Does the nature of expertise vary
by field or domain? How can non-experts effectively identify expertise?
What is required for non-experts to trust experts reasonably or rationally?
How can experts effectively signal their credentials and reliability to
non-experts? When should conflicts of interest undermine the value of
expertise or our trust in experts? What are the various misuses of
expertise, and how can these be mitigated? Can there be expertise
about philosophical topics? In the main, our readings will be from social
epistemology and the philosophy of science, but some readings will be
drawn from the social sciences, psychology, and the history of science.
Attribute: PGCA.

PHIL 6436. Philosophy of Time and Persistence. (3 Credits)
This course is an exploration of the contemporary analytic debates
regarding the nature of time and ontological persistence, with special
focus on the relationship between the human person and time.
Attribute: PGCA.

PHIL 6457. Mind-Body Problem. (3 Credits)
'The mind-body problem' refers loosely to the philosophical difficulties
involved in integrating the image of ourselves as free, rational beings
having beliefs, desires, hopes, fears, joys, loves, etc. with the image
of ourselves as complex biochemical systems. We consider some of
these difficulties with an eye to understanding how they have shaped
approaches to human nature both in philosophy and in scientific
disciplines such as psychology, and then consider whether any of these
difficulties can be overcome using the resources available to the currently
dominant philosophical theories. Finally, we examine the claim that
there are viable historical alternatives to these theories capable of
circumventing the mind-body problem altogether.
Attribute: PGOC.

PHIL 6460. Intentionality. (3 Credits)
This course explores the key concept of intentionality both in its medieval
and in its modern varieties, as it functions in various medieval and
modern theories of cognition and mental representation.
Attribute: PGMD.

PHIL 6471. Responsibility and Blame. (3 Credits)
In this course: we will examine the nature of moral responsibility, the
nature of blame, and the connection between them. We will ask questions
such as the following. Does moral responsibility require free will? Can we
understand blame exclusively in terms of attitudes such as resentment
and indignation, or must blame have an outward manifestation? Does
understanding the nature of blame shed light on the nature of moral
responsibility?
Attribute: PGCA.

PHIL 6472. Responsibility, Blame, and Forgiveness. (3 Credits)
In this course, we will examine the nature of moral responsibility, the
nature of blame, and the connection between them. We will ask questions
such as the following. Does moral responsibility require free will? Can we
understand blame exclusively in terms of attitudes such as resentment
and indignation, or must blame have an outward manifestation? Does
understanding the nature of blame shed light on the nature of moral
responsibility?
Attribute: PGCA.

PHIL 6505. Medieval Philosophical Theories of the Fall. (3 Credits)
This course will be devoted to the study of some medieval interpretations
of the Christian doctrines of the fall of the devil and of original sin.
The focus will be philosophical. We will study the positions of Anselm
of Canterbury, Thomas Aquinas and John Duns Scotos. Some of the
questions taken into account will be: ‘Is it possible to choose evil for evil’s
sake?’ and ‘What is the motive of a morally wrong action?’
Attribute: PGMD.

PHIL 6580. Virtue Epistemology. (3 Credits)
Virtue epistemologists are especially interested in what it is that makes
people intellectually excellent- what it is, for example, that makes a
person a responsible inquirer, of what is that makes his or her beliefs
amount to knowledge. In this class we will consider the main positions and
some of the most recent developments in the area of virtue epistemology.
Attribute: PGCA.

PHIL 6630. Discourse Ethics. (3 Credits)
This seminar will trace the development of Jurgen Habermas’s ‘discourse
ethics.’ We will also analyse alternative versions of discourse ethics in the
work of Karl- Otto Apel, Albrecht Welmer, Seyla Benhabib, and Rainer Forst,
and consider challenges from communitarians like Charles Taylor and
contractualists such as Thomas Scanlon and Stephen Darwall.
Attribute: PGCC.
PHIL 6805. Topics in Phil of Rel. (3 Credits)
This course will introduce and discuss a range of topics in the philosophy of religion. Topics to be considered will include: the propriety and possibility of natural theology; arguments for God's existence; the problem of evil; the attributes of God; life after death.
Attribute: PGCA.

PHIL 6850. Hermeneutics. (3 Credits)
This course provides a general introduction to contemporary hermeneutics, with a special focus on the problem of the relation between subject and text.
Attribute: PGCC.

PHIL 7009. Plotinus. (3 Credits)
This course will examine in detail Plotinus' original positions in metaphysics, epistemology, psychology, and ethics as presented in the Enneads along with his polemics against the Stoics, Epicureans, Peripatetics, and quasi-philosophical schools such as the Gnostics.
Attribute: PGCC.

PHIL 7012. Plato's Dialogues. (3 Credits)
By most counts, Plato wrote 28 dialogues that are recognized as genuine. These dialogues vary greatly in length, content, and approximate time of composition. Most people, including philosophers, have an acquaintance with only a few of these dialogues, for instance, the Phaedo, Meno, Apology, and Republic, all of which probably belong to one period of Plato's writing. An accurate understanding of Plato's philosophy must be based on the study of his entire philosophical corpus. This might be said of any philosopher, but Plato is unique because he never reveals what his own philosophical commitments are. We need all the help we can get to understand him. It would be impossible to study all 28 dialogues in one semester. The Laws, for instance, are 339 tedious Stephanus pages long. It is assumed that some dialogues are familiar to students. The course will therefore cover as many unfamiliar but nevertheless important dialogues as possible from all periods of Plato's writing. The general content and purpose of each dialogue will be debated, and then central, especially significant passages will be discussed in some detail with the help of secondary literature. Student involvement with what will be covered and how to interpret it is expected.
Attribute: PGAN.

PHIL 7018. Ancient Psychology. (3 Credits)
This course examines ancient accounts of human cognitive and moral psychology. The primary focus will be on Plato and especially Aristotle, since their accounts are the most complete, but Epicurean and Stoic psychology will also receive attention.
Attribute: PGAN.

PHIL 7031. Alienation and Reification. (3 Credits)
This seminar traces the development of two central concepts in critical social theory with the aim of evaluating their current relevance for social criticism. We begin with Marx and Lukacs and then consider their influence on Frankfurt School theorists such as Horkheimer, Adorno, and Habermas. We conclude with recent attempts by Honneth and Jaeggi to rejuvenated the two concepts within social philosophy.
Attribute: PGAN.

PHIL 7039. Aquinas's Philosophy of God. (3 Credits)
This course is devoted to explaining and commenting on Aquinas's philosophy of God and presented in texts such as his Summa Contra Gentiles, his Summa Theologiae, and his De Potentia.
Attribute: PGMD.

PHIL 7042. Buridan on the Soul. (3 Credits)
This course is going to be based on the new edition of the Latin text and annotated translation of Buridan's 'Questions on Aristotle's De Anima' along with a companion volume of critical essays, analyzing his sometimes astonishingly modern ideas concerning the nature, powers and workings of human and animal souls, consciousness, and understanding, shedding a stark light on the historical origins and conceptual roots of some of the most persistent problems in post-Cartesian philosophy of mind.
Attribute: PGMD.

PHIL 7058. Bonaventure's Metaphysics. (3 Credits)
This course is a survey of the metaphysics of Bonaventure, one of the important representatives of Scholastic thought. Students will investigate major elements of his ontology and natural theology. Particular attention will be given to his treatment of the transcendentals, analogy, and his apophaticism.
Attribute: PGMD.

PHIL 7069. Medieval Logic and Metaphysics. (3 Credits)
This seminar is going to approach medieval logic and metaphysics not as a piece of history, but as genuine philosophy, to be taken seriously by a contemporary philosopher. The course is going to present an extended argument to show that if medieval metaphysical notions are reconstructed against their proper theoretical background (supplied by the sophisticated logical theories of the medievals, as opposed to modern analytic theories or vague historical intuitions), then they can provide us with a comprehensive, unified conceptual framework for discussing our genuine concerns which is unmatched in our fragmented “post-modern” culture. Although this course is primarily offered for philosophers, philosophically-minded medievalists and theologians may profit from it as well, especially if they are interested in tackling the logical subtleties of medieval metaphysical and theological discussions.
No previous training in modern (or traditional) logic will be assumed. Main topics of discussion include: meaning (signification) and reference (supposition) in medieval logic; universals and common natures; mental language; nominalism, realism and ontological commitment; the concept of being and theories of the copula; the existence and essence of God; the immateriality of the intellective soul and the hylomorphic mereology of human nature; essentialism, nominalism and skepticism in late-medieval philosophy.
Attribute: PGMD.

PHIL 7071. Aquinas: Questions on God. (3 Credits)
An exposition and critical discussion of 'Summa Theologies', la, 1-26.
Attribute: PGMD.

PHIL 7076. Metaphysical Themes in Duns Scotus. (3 Credits)
This course focuses on central metaphysical issues in the thought of Duns Scotus, such as being, substance, essence and individuation.
Attribute: PGMD.

PHIL 7080. Medieval Views on Cognition and Certainty. (3 Credits)
In this course, we will study some medieval thinker's views on cognition and certainty. The main focus will be on the debate of cognition and the role of divine illumination in the years following Thomas Aquinas's death in authors such as Henry of Ghent, John Duns Scotus, and Peter Auriol. Some consideration will be given to the influence that the later medieval debate had on early modern philosophy.
Attributes: MVSG, PGMD.
PHIL 7106. Kant I. (3 Credits)
The aim of this course is to achieve an appreciation of, and some facility with the problems and mode of philosophizing that dictate the arguments in Kant’s Kritik der reinen Vernunft. Accordingly, the course is organized along thematic lines that, while corresponding to specific passages and sections of the Kritik, provide a route through the text as a whole. After an initial introduction to the structure and context of the work as a whole, the course will focus primarily on the positive doctrines of Kant’s critical or transcendental philosophy as presented in the Transcendental Aesthetic and the Transcendental Analytic of the Transcendental Logic. 
Attribute: PGCM.

PHIL 7110. Descartes and Spinoza. (3 Credits)
Primarily a study of Descartes’ Meditations, preceded by a reading of his Regulae and Discourse on Method, and a study of Spinoza’s Ethics, preceded by a reading of his Emendation on the Understanding and selections from other works.
Attribute: PGCM.

PHIL 7112. The Limits of Thought in Kant and Post-Kantian Philosophy. (3 Credits)
In the Critique of Pure Reason, Kant argues that the categories provide a priori knowledge of appearances but cannot yield knowledge of things in themselves. Kant’s claim raises a general question about the limits of conceptual thought. This course will examine the development of this question in Kant and post-Kantian thought.

PHIL 7140. Kant and German Idealism. (3 Credits)
This course will examine Kant’s detailed treatment of issues in the Critique of the Power of Judgement and will examine how thinkers like Hegel, Schelling, and Schiller helped to develop the German Idealist tradition in the wake of Kant’s third and final critique.
Attribute: PGCM.

PHIL 7145. Phenomenology and Religious Experience. (3 Credits)
This course is a philosophical investigation into major traditional and contemporary forms of religious life and experience, such as asceticism, liturgy, monasticism, mysticism, spirituality, and fundamentalism.
Attribute: PGCC.

PHIL 7149. Hegel’s Phenomenology. (3 Credits)
A reading of Hegel’s Phenomenology of Spirit, in the context of his other writings and in conversation with various other philosophers.
Attribute: PGCM.

PHIL 7153. Husserl’s Later Thought. (3 Credits)
An investigation of Husserl’s later philosophy by way of a careful reading of Cartesian Meditations and the Crisis.
Attribute: PGCC.

PHIL 7156. Husserl and Heidegger. (3 Credits)
This course will examine the relation between Husserl and Heidegger at two points of direct contact: (1) Heidegger’s discussion of Husserl’s phenomenology in his 1925 Marburg lectures, and (2) the failed attempt at collaboration in co-authoring an article on phenomenology for Encyclopaedia Britannica. We shall examine the first by reading the relevant sections of Husserl’s Logical Investigations and the first volume of Ideas for a Pure Phenomenology and Phenomenological Philosophy, volume 1, before turning to the first part of Heidegger’s History of the Concept of Time. We shall examine the latter by reading the various drafts of the article and the relevant correspondence as presented in Psychological and Transcendental Phenomenology and the Confrontation with Heidegger (1927–1931). Where appropriate, we shall also look at relevant selections from Husserl’s “Ideas,” volume 2, his Cartesian Meditations and Crisis as well as Heidegger’s Being and Time.
Attribute: PGCC.

PHIL 7157. Phenomenology. (3 Credits)
This course will examine some of the major themes in the phenomenological literature: methodology; intentionality; and self-awareness; embodiment; subjectivity; agency and action; the Other; and social cognition. Readings will include both historical and contemporary figures.
Attribute: PGCC.

PHIL 7159. Kierkegaard. (3 Credits)
Sources, development, influence of Kierkegaard’s thought.
Attribute: PGCC.

PHIL 7161. Nietzsche. (3 Credits)
Detailed investigation of principal Nietzschean themes.
Attributes: PGCC, PGCM.

PHIL 7164. First Philosophy: Nietzsche, Heidegger, and the Presocratics. (3 Credits)
This seminar focuses on Friedrich Nietzsche’s lectures on The Pre-Platonic Philosophers and his essay on the tragic age in addition to Martin Heidegger’s lecture courses and essays on Pre-Socratic thinking. Research emphasis highlights contemporary readings of the Presocratics.
Attributes: PGCC, PGCM.

PHIL 7166. Recognition and Intersubjectivity. (3 Credits)
This course will examine the notion of recognition, as well as the related notion of intersubjectivity, in philosophical discourses extending from the late eighteenth century to the present time.
Attribute: PGCM.

PHIL 7203. Merleau-Ponty. (3 Credits)
This course is a study of the development of the major themes of Merleau-Ponty’s thought. Topics may include Merleau-Ponty’s adaptation of phenomenology through his study of perception and embodiment, his philosophy of language and his engagement with structuralism, the relationship of phenomenology and ontology in his thought, his account of intersubjectivity, his account of time and institution, his engagement with psychoanalysis, his philosophy of the natural world and animality, his engagement with other thinkers such as Bergson or Sartre, his account of childhood and development, his political philosophy, and his influence on contemporary traditions such as critical phenomenology or theories of embodied cognition.
Attribute: PGCC.

PHIL 7204. Wittgenstein and Later Wittgenstein. (3 Credits)
A focus on Wittgenstein’s classic texts (Tractatus, Philosophical Investigation, On Certainty) along with later receptions of Wittgenstein’s work.
Attribute: PGCC.

PHIL 7210. Whitehead. (3 Credits)
An analysis of the development of the philosophy of organism in Whitehead’s earlier works and its full expression in Process and Reality.
Attribute: PGGC.

PHIL 7215. Wittgenstein’s ‘Philosophical Investigations’. (3 Credits)
Following an introduction to the life and writings of Ludwig Wittgenstein (1889–1951), this course will consist of a detailed reading and discussion of his Philosophical Investigations. We will work through this text in class while trying to understand what it is saying. We will also aim to reflect on its philosophical value.
Attribute: PGCA.
PHIL 7229. Derrida. (3 Credits)
A study of major texts of Jacques Derrida dealing with such themes as writing, difference, and deconstruction, as well as his relation to traditional and contemporary figures.
Attribute: PGCC.

PHIL 7235. Husserl's 'Ideas II'. (3 Credits)
This course is a close reading of Book II of Husserl's Ideas Pertaining to a Pure Phenomenology and to a Phenomenological Philosophy, subtitled "Studies in the Phenomenology of Constitution".
Attributes: PGCC, PHCO.

PHIL 7236. The Emotions and Moral Perception. (3 Credits)
This course will examine phenomenological (and some comparable non-phenomenological) accounts of (1) the nature of the emotions and (2) their role in evaluation, in general, and moral evaluation, in particular.
Attribute: PGCC.

PHIL 7240. Contemporary Metaethics. (3 Credits)
Metaethics steps back from substantive moral debates to ask questions about morality itself. We will consider a range of positions in order to see the benefits and limitations of different ways of answering these questions, and each student will work at developing her or his own answers throughout the term.
Attribute: PGCC.

PHIL 7230. Self-Cultivation Philosophies. (3 Credits)
Self-cultivation philosophies propound a program of development for radically improving the lives of human beings on the basis of an understanding of human nature. We will study the nature and variety of these practice-oriented philosophies through an examination of prominent examples from ancient India, China and Greece as well as more recent approaches in Western philosophy.
Attribute: PGCC.

PHIL 7234. Humility and Arrogance. (3 Credits)
This course examines epistemological questions concerning humility and arrogance, taken in a broad sense to include open-mindedness, overconfidence, intellectual hubris, and dogmatism. What is humility and does it enhance our inquiry? Is arrogance ever beneficial in our pursuit of truth? Readings for the course focus on good inquiry, expertise, disagreement, and the nature of epistemic virtues and vices.
Attribute: PGCA.

PHIL 7350. Evidential Undermining. (3 Credits)
Sometimes we gain confidence that a belief is false. Sometimes we gain evidence that our grounds for a belief are not good grounds. The latter is a case of 'evidential undermining'. We will explore several important recent arguments that purport to show that particular moral, philosophical, and religious beliefs face evidential undermining.
Attribute: PGCA.

PHIL 7370. Moral Emotions. (3 Credits)
This course explores historical engagements with the question of what role the emotions should play in our moral lives, focusing on, but not limited to, work from the Early Modern period. Topics to be covered may include: sympathy/empathy, pity and compassion, resentment and gratitude, shame and guilt, and pride and humility.
Attribute: PGCM.

PHIL 7459. Heidegger's Being and Time, Black Notebooks. (3 Credits)
We will read Heidegger's 1927 Sein und Zeit, which may be found in English in a range of translations, along with several other works in order to situate a reading of the recently published Black Notebooks, and even more recently translated for publication in English. The topic is not merely the controversial and scandalous question of what is called Heidegger's anti-Semitism but also the status of his published and unpublished writings in addition to the question of the question of the question of being.
Attribute: PGCC.

PHIL 7465. The Emotions. (3 Credits)
This course will examine and evaluate competing theories of the emotions, their relation to evaluation or values, their relation to action, and their relation to moral judgment and decision-making.
Attribute: PGCA.

PHIL 7580. Biopolitics and Necropolitics. (3 Credits)
Foucault, in The History of Sexuality, Volume 1, states that the 18th century witnessed the emergence of a new kind of power concerned with the control of life. This description of contemporary politics has given rise to rich debates on the question of the meaning of life and death in relation to power: What kind of life is at stake in this description, and where is death in this account? What is the impact of race and gender in the analyses of power that Foucault provides? We will start with Foucault's lecture courses from the Collège de France from 1976 to 1978, where he develops his accounts on biopower and security. We will then bring these in dialogue with other accounts that focus primarily on the role of death, or what has come to be called "necropolitics," as a kind of power that is concerned with regulation of death in politics. Readings include work from Giorgio Agamben, Achille Mbembe, Jasbir Puar, Judith Butler, and Saidiya Hartman.
Attribute: PGCC.

PHIL 7605. Philosophical Aesthetics. (3 Credits)
This course provides a general introduction to the study of philosophical aesthetics, with readings of works by figures from the history of Western philosophy up to today. Issues to be addressed might include the question of 'art' itself, the meaning of the so-called 'end of art;' the role of the museum and gallery in the so-called 'art world,' the question of 'high' and 'low' art, feminist aesthetics, and environmental aesthetics.
Attribute: PGCC.

PHIL 7650. Aristotelian Ethics. (3 Credits)
This course, 'Aristotelian Ethics' is centrally concerned with Aristotle's book, 'The Nicomachean Ethics.' We will work through the book in detail, mostly in the order that the text is presented. Along the way, we shall examine some relevant secondary literature in the field.
Attributes: CEED, CEMP, PGAN.

PHIL 7664. Philosophy of Literature. (3 Credits)
Philosophy of Literature is devoted to studying the tensions and connections between philosophical analysis and the evocations and descriptions of literary experience. We will consider the philosophy of hermeneutics insofar as this grounds literary interpretation; the philosophical problems concerning the status of the author and the reader in respect to the generation of meaning; the ethics of literary representation; and the ontology of literary language. Our readings will be drawn from such sources as Gadamer, Sartrre, Bachelard, Heidegger, eiser, Natanson, Nehamas, Hamburger, and Blanchot.
Attribute: PGCC.
PHIL 7675. Moral Genealogies. (3 Credits)
In this course, we’ll explore the many ways in which moral ideas, beliefs, responses, practices, and institutions can be analyzed historically. Can such analysis deliver substantive and interesting normative conclusions? We will try to find out by studying such figures as Hobbes, Hume, Rousseau, Feuerbach, Nietzsche, Freud, and Foucault, as well as contemporary analytic ‘debunking’ arguments made by Richard Joyce, Sharon Street, and Peter Singer.

Attribute: PGOC.

PHIL 7730. Recent Work in Epistemology. (3 Credits)
This seminar will examine recent articles and books in contemporary epistemology. The seminar’s themes will likely include: the nature of reasons and evidence, the challenge of skepticism, and the purpose of epistemological theorizing. The seminar’s texts will feature perspectives from traditional, social, feminist, and virtue epistemology.

Attribute: PGCA.

PHIL 7752. Divine Providence. (3 Credits)
This course will offer an exploration of the analytic tradition’s treatment of divine providence, focusing on traditional problems and contemporary solutions. The course will cover puzzles regarding free will and divine foreknowledge, along with Thomist, Molinist, Ockhamist, and Open Theist solutions to such problems. In so doing, the course will delve into contemporary debates on free will, grounding, modalities, and propositions, as those debates determine what is an acceptable solution to questions about divine providence.

Attribute: PGCA.

PHIL 7758. Human Dignity. (3 Credits)
This seminar will focus on recent philosophical work on the concept of dignity. Issues discussed will include the connection between the idea of human dignity and equal status, the role of dignity in constitutional law, how various modes of social suffering and moral injury are tied to the concept of dignity, and the relation between the concepts of human dignity and human rights.

Attribute: PGCA.

PHIL 7760. Dimensions of Political Justice. (3 Credits)
An intensive introduction to key themes in contemporary analytic political philosophy, including contractarian and consequentialist theories of justice; human capabilities and other possible grounds for universal basic rights; collective action problems, market failures and public goods; other problems for libertarian conceptions of legitimate government (including equal opportunity, reward according to merit, and initial acquisition); and (time permitting) issues in global justice including globalizing democracy.

Attributes: CEED, CEMP, PGCA.

PHIL 7857. Topics in Contemporary Metaphysics. (3 Credits)
The full course title is ‘Topics in Contemporary Metaphysics.’ In this course one central topic of current work in analytic metaphysics will be investigated thoroughly. The topics change every time the course is offered.

Attribute: PGCA.

PHIL 8001. Sem: Phil Education. (3 Credits)
Detailed investigation of methods in the teaching of philosophy and preparation for teaching Fordham core courses.

PHIL 8050. Proseminar: Philosophy Research/Writing. (0 to 3 Credits)
A detailed study of methods for successful philosophical research and writing.

PHIL 8070. Professional Writing Seminar. (0 Credits)
This seminar is designed to assist advanced graduate students in Philosophy and prepare for successful academic careers doing research and publishing in Philosophy. Participants will meet regularly to discuss student work and strategies for effective professional writing and success in publishing. This will assist them in preparing articles for publication in professional philosophy journals as well as developing writing samples for job applications. The seminar will be open to PhD candidates who have successfully defended a dissertation proposal. Students may repeat the course.

PHIL 8999. Independent Study. (0.5 to 4 Credits)
PHIL 9999. Dissertation Direction. (1 Credit)

Philosophical Resources (M.A.) Requirements
The M.A. in Philosophical Resources program is undergoing a reimagining and will not be accepting applications for Fall 2020.

The MAPR program in philosophy is designed primarily for Jesuit scholastics, although it is open to others who seek to enhance their philosophical knowledge but do not satisfy the stand-alone MA program’s entrance requirement of 24 undergraduate credits in philosophy. The degree requires 36 hours of course work in philosophy for 12 courses. A cumulative grade point average of at least 3.0 in coursework. Only six credits of 2.0 (C) will be credited toward the degree. Twelve credits of C eliminate a student from the program.

PHIL 0936 Master’s Comprehensive Examination-Philosophy 0

Total Credits 36

1 The Integration Seminar includes a requirement for a paper that integrates the work done in two courses taken in the program.
Students must demonstrate a reading knowledge of one language other than English, either through graduate reading courses or by taking departmentally administered language exams. Students who satisfy the requirement by taking a graduate reading course must earn a grade of B or higher in the course.

Philosophy (M.A.)

Requirements

All master's students in philosophy take 30 credit hours, including one course in each of the major historical areas of philosophy. To remain in the program, master's students must maintain a minimum of a 3.0 GPA (based on a 4.0 scale).

Students must obtain the approval of the Director of Graduate Studies when selecting courses.

**Updated: 07-27-2020**
Philosophy (Ph.D.)

Ph.D. students entering with a master’s in philosophy take 30 hours (10 classes) of coursework. Students entering the Ph.D. program without a master’s in philosophy take 48 hours (16 classes) of coursework. All students, regardless of whether they enter with a prior master’s, must take nine courses in the four historical areas. Students entering with a master’s in philosophy will have their transcript evaluated to determine which of these requirements have been satisfied in their master’s coursework. Ph.D. students earning a master’s in cursu must satisfy the distribution requirement for the master’s by the time they complete the qualifying paper requirement.

Students entering without a master’s may take only three 5000-level courses. Students entering with a master’s may only take 6000-level courses or above. To remain in the program, students must maintain a GPA of at least 3.5 (based on a 4.0 scale).

Students must obtain the approval of the Director of Graduate Studies when selecting courses.

Total Credits: 30-48

1. If these requirements are fulfilled with an M.A., you may substitute completion of the course with an additional elective.
2. Elective courses can be any graduate-level course in the Philosophy department. For students entering with a master’s, courses must be 6000-level or above.
3. More information about these requirements are outlined on our page on the Fordham website.

## Political Science

Fordham’s Political Science program will prepare you to understand and navigate successfully the political processes and institutions that define and shape our increasingly complex and interdependent world.

For more information about the Political Science department, please visit our page on the Fordham website.

## Admissions

### Requirements

- Resume/CV
- Statement of Intent (up to 500 words). Please include your name on all pages of your document.
- Writing Sample (5-20 pages in length)
- Two letters of recommendation
- Official degree transcripts confirming prior degree conferral are required for all applicants, regardless of matriculation status. These should be ordered at least one month prior to the application deadline for your program of interest. Please note: you may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.

Please note: GRE scores are only required if you are seeking GSAS financial aid.

### English Proficiency

International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results.

Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259. Please consult the English Proficiency web page for additional information.
For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.

Programs

- M.A. in Elections and Campaign Management (p. 796)
- Advanced Certificate in Public Opinion and Survey Research (p. 797)

Courses

POSC 5100. American Political Behavior. (3 Credits)
The nature and sources of mass political behavior, with a focus on questions of mass-elite linkages derived from democratic theory; political attitudes, their origin and measurement; mass participation—electoral and non-electoral—and its systemic consequences.
Attributes: AMST, ASHS, DATA.

POSC 5130. Political Institutions and Processes. (3 Credits)
Legislative, executive, and judicial powers. The formation and implementation of public policy. Institutional norms and behavior in American national government.
Attribute: DATA.

POSC 5140. Themes in Urban Public Policy and Power. (3 Credits)
We see around us a city constantly in change, dynamic change, in which multiple actors compete daily. What are they competing for? And why? What does power mean for those actors? How is it to be defined? Who wins, who loses, and why? What are some of the policy issues that confront actors in a city whose only constant is change? We will during the weeks that follow look in a survey fashion at a series of urban issues and ideas, often with a focus on New York City. We will also hear from and be able to talk with guest speaker personalities with unique histories and perspectives. This should help inform our thinking about the issues we discuss, their historical and political context, and their salience.
Attributes: HECS, PMMA, URSG.

POSC 5238. Strategies of Political Communication. (3 to 4 Credits)
How to build campaign messages based on an understanding of vote determinants, research tools, and candidate psychology.
Attribute: PMMA.

POSC 5240. Fundamentals of Political Campaign Management. (3 to 4 Credits)
Will introduce the basic elements of political campaign management, focusing on the role and the responsibilities of the modern campaign manager at all levels of campaigns; local, congressional, statewide, and national.

POSC 5243. Campaign Finance and Ethics. (3 or 4 Credits)
Designed to introduce students to the current campaign finance laws that regulate elections for federal and non-federal political candidates.
Attributes: CEED, CENS.

POSC 5244. Elections and Campaign Management Internship. (3 Credits)
A professional-level internship in a political consulting firm or campaign organization, which will give students direct, practical experience and where they can apply what they have learned in classes to a real world setting.

POSC 5245. Political Communications: Earned Media In the Age of Digital and Social Media Boom. (3 Credits)
This course will explore how campaigns develop strategies to attract media attention, publicity, and news coverage. Topics include speechwriting, press releases, press conferences, and social media communications.
Attribute: PMMA.

POSC 5246. Technology and Campaigns. (3 Credits)
This course will explore the use of modern technology in campaigns. Students will learn how to capitalize on developments in technology and new media for electioneering purposes to target, mobilize and persuade voters. Students will also learn how to use campaign management software, database management and GIS mapping technologies, to execute effective campaigns.
Attribute: PMMA.

POSC 5247. Data Analytics for Political Campaigns. (1 Credit)
This course will explore how campaigns can use data analytics to target and deliver voter appeals and mobilization efforts. Topics include: micro-targeting, data analysis, polling research and quantitative analysis.
Attribute: PMMA.

POSC 5248. Technology and Campaigns. (3 Credits)
This class is designed to take students through the entire process of conducting both telephone and Internet public opinion surveys, with a specific look at political polling method. It applies academic and practical research to teach question writing and selection, survey construction, managing and fielding questionnaires, and analyzing and writing about data. Its goal is to provide students with a working knowledge of how to conduct and analyze their own surveys as well as how to evaluate others’ surveys.
Attribute: DATA.

POSC 5250. Introduction to Quantitative Analysis. (3 Credits)
An introduction to the major theoretical frameworks of quantitative research. This course will give students first-hand experience at the fundamentals of research design and quantitative methodologies used in American political science.

POSC 5251. Political Survey Research. (3 Credits)
This course will explore how campaigns can use data analytics to target and deliver voter appeals and mobilization efforts. Topics include: micro-targeting, data analysis, polling research and quantitative analysis. Its goal is to provide students with a working knowledge of how to conduct and analyze their own surveys as well as how to evaluate others’ surveys.
Attribute: DATA.

POSC 5250. Fundamentals of Political Campaign Management. (3 Credits)
This course will explore how campaigns can use data analytics to target and deliver voter appeals and mobilization efforts. Topics include: micro-targeting, data analysis, polling research and quantitative analysis. Its goal is to provide students with a working knowledge of how to conduct and analyze their own surveys as well as how to evaluate others’ surveys.
Attribute: DATA.

POSC 5255. Public Opinion Certificate Practicum. (3 Credits)
This course will explore how campaigns can use data analytics to target and deliver voter appeals and mobilization efforts. Topics include: micro-targeting, data analysis, polling research and quantitative analysis. Its goal is to provide students with a working knowledge of how to conduct and analyze their own surveys as well as how to evaluate others’ surveys.

POSC 5257. Survey Research Data Analysis. (3 Credits)
This course will explore how campaigns can use data analytics to target and deliver voter appeals and mobilization efforts. Topics include: micro-targeting, data analysis, polling research and quantitative analysis. Its goal is to provide students with a working knowledge of how to conduct and analyze their own surveys as well as how to evaluate others’ surveys.
Attribute: DATA.

POSC 5259. Special Topics: Campaigns. (3 Credits)
This is the capstone course for the M.A. in Elections and Campaign Management. Students, in groups, design campaign plans from start to finish. It is restricted to students in the M.A. program.
POSC 5301. Modern Political Thought. (3 to 4 Credits)
This course considers the relationship between religion and politics by reading Euro-American political thinkers such as Spinoza, Leibniz, Kant, Hume, and Locke. We also consider how post-Enlightenment philosophers—such as Michel Foucault, Jürgen Habermas, Tariq Ramadan, and Abdullahi Ahmed An-Na’im—address the Islamic revival.
Attributes: CEED, CENS.

POSC 5500. Comparative Pol Analysis. (3 Credits)
Problems of stability and change in the First, Second, and Third Worlds are examined with relation to socioeconomic factors that affect, and are affected by, institutions, processes, and policies.
Attributes: INST, IPED, URSG.

POSC 5560. Conflict Resolution. (3 or 4 Credits)
This course will focus on the nature of international and regional conflict during the post-Cold War period in terms of both current theory and the reality of recent conflict situations. Topics will include analysis of the causes of contemporary conflicts; assessment of current international, regional and national approaches to conflict resolution; psychological implications of civil and ethnic conflicts; challenges of multiparty international mediation; and consideration of the role played by international, regional and community level institutions in addressing conflict situations. Particular emphasis will be placed on what theories and ideas actually work when put in to practice.
Attributes: CEED, CENS, INST, IPED, IRST.

POSC 5600. Analysis of Int'l Pol. (3 Credits)
Designed to stimulate and clarify our theorizing about foreign policy and global politics; also it presents a critical overview of many of the key perspectives and problems that characterize such analysis.
Attributes: INST, IPED.

POSC 6520. International Business and Governments. (3 Credits)
Overview of the major principles, theories and issues regarding the role of contemporary international business within an interdependent world political economy. Course topics include corporate strategy, identity, governmental policies, diplomacy, foreign policy, ethics, meida, entrepreneurship, and trade. Specific case-study materials will be used to supplement academic literature.

POSC 6530. Political Economy of Development. (3 Credits)
This course provides an introduction to the politics and comparative study of international development, both human and economic. A central question will help organize the course: why have some countries developed successfully, while others have not? Whereas much of Western Europe, North America and East Asia have experienced economic development, much of Africa has not. Latin America, Eastern Europe and Eurasia are hybrids, with both pockets of success and failure. While defining what success or failure may mean in light of globalization, our collective focus will be on how best to understand such differences.
Attributes: HULI, IPED, URSG.

POSC 6552. Political Economy of the Middle East. (3 Credits)
Comparative analysis of Middle Eastern actors, institutions, and processes since World War II, paying special attention to the role of international forces in shaping national development and to the role of the Middle East as a major international actor and arena.
Attributes: IPED, MEST.

POSC 6640. Pol of Global Econ Rel. (3 to 4 Credits)
Implications of growing intertwining of foreign and domestic policies, economic and political aspects of international relations. Special attention to the growth of dependency and interdependence, importance of transnational actors (such as multinational corporations), and distribution of benefits and influence between poor and rich areas in the international order.
Attributes: ABGS, CEED, CENS, IPED.

POSC 6991. Political Risk Analysis. (3 Credits)
This course is primarily a research/writing course that culminates in an original paper where you will be required to analyze the political risks associated with a country of your choosing. While there will be only a minimal number of lectures, the instructor will serve as your individual mentor as you develop and present your paper. As part of the process of writing this paper, you will study methods used to assess and manage the political risks associated with foreign investment and international business; learn how to assess the domestic political climate of a country by examining factors such as the level of political violence, the stability of the government, and the existence of political democracy, and make an overall assessment of a country’s economic climate by evaluating key macroeconomic indicators. You will also learn the importance of studying foreign relations of a country in order to evaluate the likelihood of any conflict it might have with its neighbors.

POSC 8998. Gbvt and Pgl of North Africa. (3 Credits)
This course is an independent study for IUDC Consortium students from member schools. The course addresses the political systems of the North African Region.

POSC 8999. Independent Study. (1 to 4 Credits)

Elections and Campaign Management (M.A.)

Students enrolled in the Master’s Program in Elections and Campaign Management at Fordham University follow a curriculum that balances core technical courses in quantitative analysis and survey research with political science courses that cover central subjects in electoral behavior, political institutions, communication, and ethics. The program requires completion of 30 credits, including 7 courses in the major, 2 electives, and completion of an internship. Students are required to complete a professional-level internship in a political consulting firm or a campaign organization.

Public Opinion and Survey Research (Adv Cert)

The Political Science department's advanced certificate in public opinion and survey research (ACPOSR) will offer students intense one-year training in how to conduct public opinion polls. In doing so, the program will prepare them for careers in public opinion research. The field of opinion research is a vibrant one with a positive outlook, making it appealing for individuals seeking career training. Vault.com, a professions analytics firm, rates employment prospects in the field of public opinion as good, and one whose prospects for growth are faster than average.

The ACPOSR will take students through the fundamentals of opinion research—from quantitative methods through a practicum in which students will participate in an actual survey—preparing them for a wide variety of careers in public opinion. The survey practicum will set Fordham’s program apart from other certificate programs in survey research by allowing students to run the Fordham American Faith survey, an annual survey of the American public on religion, culture, and politics. The program will also be uniquely positioned to train students given the presence of the Political Science department’s elections and campaign management (ECM) program, which already offers some of the core courses needed, and which could provide a potential source of students for ACPOSR. Students completing both the ECM degree and the ACPOSR will receive a thorough training in election campaign management and polling.

Psychology

Our graduate degrees are a highly selective, research-intensive program, offering an M.S. in applied psychological methods or clinical research methods and three doctoral areas of specialization: clinical, applied developmental, and psychometrics and quantitative psychology. Each of these programs is registered with the State of New York and is highly integrated, with our esteemed faculty serving in all programs.

For more information about graduate-level psychology, please visit our page on the Fordham website.

Admissions

We have a highly competitive and selective admissions process to all three programs. Requirements for admission are a B.A. or B.S. from an accredited university (or international equivalent) and GRE scores taken within the past 5 years. We highly value research experience, and we expect an undergraduate GPA of 3.5 (B+) or better for Ph.D. applicants and a 3.3 for master’s applicants, as well as upper-percentile GRE scores. Most successful candidates to the Ph.D. programs have substantial research experience in an area directly relevant to the program they seek admission to.

Our Ph.D. programs only admit students on a full-time basis, with the M.A. degree typically awarded as the first step in doctoral training. Prospective students are expected to demonstrate substantial grounding in general psychology, as well as in their specialization. Master’s degree students can enroll full-time or part-time.

Requirements

- Resume: up to two pages in length
- Official transcripts: confirming prior degree conferral. Should be ordered at least one month prior to the application deadline. You may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.
- Official GRE scores (Code #2259)
- Official GRE subject score: NOT required but strongly recommended, particularly for students who do not have a B.A. in psychology for the clinical and applied developmental programs.
- Statement of intent: up to 500 words
- Writing sample: 5–20 pages in length
- Three letters of recommendation
- English proficiency: International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation. Official TOEFL or IELTS scores should be sent directly by the testing service. A waiver can be requested based on your educational history at a U.S.-based institution and if the official language of your country of origin/nationality is English.

Programs

- Ph.D. in Clinical Psychology
- Ph.D. in Applied Developmental Psychology (p. 805)
- Ph.D. in Psychometrics and Quantitative Psychology (p. 810)
- M.S. in Clinical Research Methods (p. 809)
- M.S. in Applied Psychological Methods (p. 806)
  - Program Evaluation Concentration
  - Tests and Measures Concentration
Courses

PSYC 5100. Psychometric Theory. (3 Credits)
This course mainly covers what is commonly referred to as the classical test theory (CTT). It intends to provide you with the conceptual and technical skills necessary to develop and evaluate psychological tests and measures, and to provide foundations for further study of measurement theory, including but not limited to factor analysis and item response theory. A list of topics covered in this course include introduction to CTT, reliability, and validity of a test, and item analysis. The lab will assist software implementations (including Excel, SPSS, AMOS, and possibly R) and provide students hands-on experiences on how to plan psychometric analysis for a newly developed scale.
Attribute: PSYM.

PSYC 5335. Social Development. (3 Credits)
This course explores social development from infancy through young adulthood. Focusing on biological bases, social groups, peers, family, community, and culture, the course will explore multiple facets of social development. The course materials include primary readings, and the course format will be discussion based. At the end of the course, students are expected to have a solid foundation in the primary domains of social development as well as an understanding of the importance of social development across the lifespan.
Attribute: CLMB.

PSYC 5710. Issues in Social Psychology. (3 Credits)
The person in society: interdisciplinary approaches; personality and culture: subculture, class, and community. Development and the self-concept and motivational elements in the acquisition of language, attitudes, and values. Group membership, role behavior, and group dynamics.
Attributes: CLMB, PMPE.

PSYC 5715. Psychology of Complex Emergencies. (0 to 4 Credits)
This course covers psychological aspects of complex emergencies and responder preparedness. Topics include team building, negotiation, and motivation of responders and aid-workers, preparing for emergencies, coping with violence for aid-workers, refugees, IDPs, and children in crisis, gender issues, and general psycho-social health of beneficiaries and aid-workers. (course is only open to IDHA)

PSYC 6005. Ethics in Psychology. (3 Credits)
This course provides general and specific guidance for ethical conduct in the science and practice of psychology. Using case examples and readings the coursework covers the clinical practice of psychology, research, teaching, supervision of trainees, development of assessment instruments, conducting assessments, school psychology, educational counseling, organizational consulting, forensic activities, social intervention, administration, and other activities. Also explored is the history and current role of the federal government, state licensure boards, and the American Psychological Association and other organizations in establishing guidelines and professional codes of ethics for research, teaching, and practice in psychology. The course helps students apply these codes and regulations to traditional areas of psychology and to emerging areas such as telecommunications and managed care.
Attributes: CEED, CENS, HECS.

PSYC 6010. Research Ethics and Social Justice. (3 Credits)
This course will examine approaches to responsible research practices in socio-behavioral research, with particular attention to research involving human participants. The course will provide foundations in research ethics and methods in research ethics decision-making that exemplify scientifically valid and ethically sound research method planning, implementation, and dissemination.
Attributes: CEED, CENS, URSG.

PSYC 6020. Health Psychology. (3 Credits)
An introduction to the study of psychological factors in health and illness, which examines the major models, research methods, interventions, and issues in health psychology/behavioral medicine. Topics include stress-illness, compliance, psychoimmunology, social support, and coping in disorders such as cardiovascular disease, pain, cancer, gastrointestinal disorders, diabetes, and obesity.
Attributes: CEED, CENS, CLRM, CPCE, HECS.

PSYC 6030. Trauma and Family Violence. (3 Credits)
This course will focus on understanding the cause and effects of trauma and family violence, such as child abuse and neglect, rape, and domestic violence. Diagnostic assessment, prevention and treatment issues will be emphasized.
Attributes: CLRM, CPCE, HUHR.

PSYC 6050. Behavioral Medicine. (3 Credits)
Teaches students the clinical and research skills required in a medical setting. The overarching goal is for students to gain competency working with patients presenting with a range of medical conditions (as primary or secondary diagnosis).
Attributes: CLRM, CPCE, CIP.

PSYC 6060. Research Practicum I. (3 Credits)
This course is comprised of three parts: A practical research experience (‘research practicum’), in which the student is placed in a research setting and participates (ina substantive way) in ongoing clinical research (10-20 hours per week for at least one entire semester) A bi-weekly meeting with the course instructor and other students who are completing the research practicum (2 hours every other week) Supplemental readings to facilitate the student’s independent research (approximately 5-10 hours per week).

PSYC 6066. History and Systems. (3 Credits)
This course surveys the history of the major systems of psychology from pre-Socratic philosophers to contemporary cognitive science and neuroscience. Key men and women who contributed to the development of theories and methods used to study personality, emotion, intelligence, cognition, and psychobiology are discussed within their historical, religious, cultural, and political contexts.
Attributes: CEED, CENS, CLMB.

PSYC 6070. Research Practicum II. (3 Credits)
This course is the second in a 2-course sequence designed to expose the student to the process of conducting applied clinical research and facilitate his or her own independent research project. This course is typically taken during the semester in which the student intends to complete the Master’s Thesis. The research project that forms the basis of the students MA thesis is developed in consultation with the faculty mentor and research supervisor (note that under some circumstances both these roles may be fulfilled by the same individual. Decisions regarding the specific research project, including the length and depth of the introduction, the nature and sophistication of statistical analyses, and the format for compiling the results into a final document, will ultimately rest with the faculty mentor and reader.
PSYC 6106. Cognitive Assessment with Lab. (3 Credits)
Intensive supervised practice in administration, interpretation, and reporting of individual intelligence tests for children and adults. Students will learn and practice the administration and scoring of major developmental assessment instruments.
Attribute: PSYM.

PSYC 6119. Personality Assessment with Lab. (3 Credits)
Administration and introductory interpretation in personality assessment and research, concentrating on the Rorschach and TAT. Students will learn and practice the administration and scoring of major personality assessment instruments.
Attribute: PSYM.

PSYC 6140. Developmental Assessment. (3 Credits)
Theory of assessment procedures based on developmental norms. Supervised practice in administration and interpretation of assessments, concentrating on the Brazelton, the Bayley, and the McCarthy Scales.

PSYC 6170. Multicultural Seminar. (3 Credits)
Focus on multicultural perspective for understanding and working with diverse populations. Will examine issues of gender, race/ethnicity, sexual orientation, religion, etc. in the provision of psychological services.
Attribute: CLMB.

PSYC 6184. Behavioral Assessment with Lab. (3 Credits)
This course will establish an understanding of behavioral assessment and its implications for intervention, evaluation and research. Theoretical foundations, methods, and application of behavioral assessment to case formulation and treatment will be emphasized.
Attributes: CLRM, CPAE, CPCE.

PSYC 6190. Forensic Assessment. (3 Credits)
Psychologists who work in legal settings are often confronted with questions and diagnostic dilemmas that rarely arise in traditional clinical settings. As a result, a number of specialized assessment techniques have been developed over the past few decades, many of which are designed to address specific psycho-legal issues. In this course, students will develop a theoretical understanding and practical experience selecting and administering specialized forensic assessment instruments. The course will be roughly equally divided between understanding the theoretical underpinnings and psycho-legal utility of forensic assessment instruments as well as practical issues in their administration, scoring, and interpretation. The types of forensic assessment instruments covered include tests of malingering and deception, risk assessment tools and techniques, sex offender and psychopathy assessment, and personality assessment in the context of forensic evaluations. In addition, more specialized instruments, such as those designed to assess competence to stand trial, will be reviewed.
Attributes: CPAE, CPCE.

PSYC 6205. Clinical Geropsychology. (3 Credits)
This course considers the implications of the melding of gerontology and clinical psychology for the delivery of psychological services to the elderly. Topics considered include: (a) personality, cognition, and physical changes in aging; (b) psychopathology (e.g., depression, anxiety, psychosis, Alzheimer’s disease) in the elderly; (c) assessment issues and methods with older adults; and (d) psychotherapy and consultation approaches with the elderly and their support systems.
Attributes: CLRM, CPCE, CPIE.

PSYC 6210. Psychotherapy Theories. (3 Credits)
Comprehensive overview of most of the major contemporary approaches to psychotherapy, with special emphasis on underlying assumptions, techniques employed, and goals.

PSYC 6225. Personality Theories and Research. (3 Credits)
This course covers major theories and empirical literatures in contemporary personality psychology. These include evolutionary, biological, social-cognitive, and psychometric perspectives on the dimensions and functions of personality. Meanwhile, we address diverse methodological approaches—such as observational, experimental, and behavior-genetic designs—in research on personality and its correlates. Throughout, we aim to connect students’ own research activity to recent substantive and methodological developments in personality science.
Attributes: CLMB, PMPE.

PSYC 6245. Cognitive Behavioral Therapy. (3 Credits)
The course covers major theories of cognitive and behavioral therapy, as well as empirical evidence to support methods. Assessment, conceptualization, and treatment planning employing cognitive behavioral therapy is emphasized. Applications with special populations are covered, and we also cover how cognitive behavioral therapy is part of a systematic evidence-based approach to evaluation and treatment.
Attributes: CLRM, CPCE, CPIE.

PSYC 6250. Dialectical Behavior Therapy. (3 Credits)
This seminar reviews the major principles, strategies, and methods of Dialectical Behavior Therapy (DBT). The course includes an overview of the theories underlying DBT treatment, discussion of the existing research supporting DBT as an evidence-based treatment for severe emotion dysregulation and chronic suicidality, and practice of basic skills and techniques used within this therapeutic modality. Class sessions include didactics, discussion, video demonstrations, and behavioral rehearsal of DBT skills.
Attribute: CPIE.

PSYC 6251. Foundations of Neuropsychology. (3 Credits)
This course will review the practice of neuropsychological assessment and its history, functional neuroanatomy, evidence-based neuropsychological practice, and the foundations for resea and theory of clinical neuropsychology (including the connection between neuropsychological evaluation and the practical implications of neuropsychological conditions), diagnosis of neurocognitive disorders, and neuropsychological intervention techniques. Finally, this course reviews non-neurologic considerations in CNS functioning and neuropsychological evaluation, including multicultural, ethical and forensic issues in clinical neuropsychology.
Attributes: CLRM, CPAE, CPCE.

PSYC 6253. Neuropsychological Assessment With Lab. (3 Credits)
This course will review the practice of neuropsychological assessment and basic concepts related to classes of cognitive functions. We will discuss psychometric principals germane to neuropsychological assessment as well as the use of neuropsychological assessment for clinical practice. Laboratory activities will support the acquisition of knowledge related to the practice of neuropsychological practice, including test selection, administration, scoring, date interpretation, and report writing.
Attributes: CPAE, CPCE.
PSYC 6257. Child Neuropsychology. (3 Credits)
The relationship between development of brain structure and cognitive functions are discussed. Tests used to assess a variety of functions including memory, attention, achievement, visual spatial skills, executive function, and motor function are presented. Learning disabilities, attention deficits, pediatric neurological disorders, and other relevant topics are covered.
Attributes: CPAE, CPCE.

PSYC 6259. Topics in Developmental Cognitive Neuroscience. (3 Credits)
This seminar covers topics in developmental cognitive neuroscience across the lifespan. Topics include neural correlates of cognitive development (memory, face perception, executive functioning), structural and functional brain changes associated with aging, and normal and pathological (e.g. Alzheimer’s disease) cognitive changes associated with aging.

PSYC 6275. Family Psychology. (3 Credits)
Provide basic knowledge of family systems theory as a pre-requisite for understanding family psychology and family therapeutic intervention. Provides a survey of research models and findings relevant to family processes and therapeutic practice.
Attribute: CLRM.

PSYC 6280. Brief Psychotherapy. (3 Credits)
This course will provide an overview of the major approaches to brief psychotherapy. Various theoretical perspectives are included: psychodynamic, cognitive, behavioral, and interpersonal.
Attributes: CPCE, CPIE.

PSYC 6285. Evidence-Based Psychodynamic Therapy. (3 Credits)
This course develops students’ understanding of psychodynamic psychotherapy. The course covers what psychodynamic therapies are, including the foundation, application, and variety of models within this broad umbrella. The course will provide an in-depth exploration of the empirical research for this treatment approach. Students will evaluate the inherent differences in researching psychodynamic therapies given the oftentimes not-observable variables of study. There will be an emphasis on healthy debate and discussion in evaluation of the psychotherapy research to be discussed. This course will also focus on the existing outcome research for psychodynamic psychotherapy as compared to other non-psychodynamic models. Students will critically analyze evidence-based therapy models for different symptomatology, including anxiety, depression, and personality disorders.
Attributes: CLRM, CPIE.

PSYC 6290. Health Disparities and Social Inequity. (3 Credits)
This course focuses on the psychosocial correlates and consequences of health disparities involving individuals and groups that have been historically marginalized by society and in some cases by the health sciences and professions. Readings and class discussions will examine the relationship of contextual factors such as poverty, racial/ethnic discrimination, environmental hazards, incarceration, institutionalization and public policy to social and health inequities faced by children and adults with HIV/AIDS, mental illness, intellectual disabilities, and substance abuse disorders. The role of psychology in the emerging health and human rights paradigm in the United States and globally will also be explored.
Attributes: CEED, CENS, CLRM, CPCE, HECS, PMPE.

PSYC 6298. Psychoanalytic Theory. (3 Credits)
Theory, research methods, and therapy of the psychoanalytic movement will be explored, including the work of Freud and ego psychological, neo-neostructuralist, Jungian, interpersonal, object relational, self, archetypal, and existential orientations. Attention will focus on clinically relevant topics such as human development, personality, dreams, and psychopathology, using case material for illustrations.
Attributes: CLRM, CPCE, CPIE.

PSYC 6300. Developmental Psychology: Foundations. (3 Credits)
This course will cover the historical and theoretical foundations of developmental psychology and the emergence of the discipline of Applied Developmental Psychology. Major historical and contemporary theories of development and key topics and research will be considered across domains, with emphasis on core readings, developmentalists, and turning points in the field.
Attributes: CLRM, CPCE, CPIE.

PSYC 6310. Culture, Ethnicity, and Race. (3 Credits)
‘Culture, Ethnicity, Race and Development’ reviews how these concepts have been defined in psychological research. We then examine how these social influences affect youth development by focusing on topics in four areas: theories of ethnicity and race in human development, family, social dynamics and cultures.
Attributes: CEED, CENS, HUCB.

PSYC 6330. Cognitive Development. (3 Credits)
Theories and research in structuralism, neo-structuralism, information processing, connectionism and contextuality are investigated.
Attributes: CLMB, PMPE.

PSYC 6350. Applied Developmental Psychology. (3 Credits)
This course will provide an introduction to the roles and activities of professionals in applied developmental psychology. Topics will include definitions of the field, ethical issues, public policy, research design, and program evaluation.
Attributes: CEED, CENS, HECS.

PSYC 6370. Cognition and Affect. (3 Credits)
A development and comparative examination of significant cognitive theories and research Structuralist, contextualist, information processing, and connectionist perspectives as well as research from infant to elderly cognition are covered.
Attribute: CLMB.

PSYC 6380. Anxiety Disorder Seminar. (3 Credits)
The course addresses the etiology of various anxiety disorders- research related to anxiety disorders and treatment options. This course is an in-depth coverage of the major anxiety disorders, beginning with etiological and maintaining factors, as well as information processing and behavioral features, and ending with psychosocial treatment and case management. Special attention is given to specific cases an illustrative of each condition, and complicating factors involved in case management.
Attributes: CLRM, CPCE, CPIE.

PSYC 6385. Depression and Suicide. (3 Credits)
This course seeks to provide you with an overview of the etiology, diagnosis, and treatment of depression and suicidality. We will examine various models of vulnerability to depression, including psychodynamic, behavioral, cognitive, and interpersonal models. Research findings in these areas will also be examined. Furthermore, this course will provide you with an overview of the epidemiology, assessment, and treatment of suicidal thinking and behavior.
Attributes: CLRM, CPCE, CPIE.
PSYC 6390. Global Mental Health. (3 Credits)
This course provides a survey of models, mechanisms, and critiques surrounding Global Mental Health. Materials are drawn from the burgeoning global mental health literature (e.g., Vikram Patel, Jorgen Unutzer, Helena Verdell) transcultural psychiatry (Author Kleinman, Laurene Kirmayer), post-conflict psychosocial mental health field (Ager, de Jong), and mental health capacity building. A section on methods in the middle of the course provides opportunities for students to review research design. Requirements will include weekly reflection papers, a term paper, and an exam. Outside speakers may be invited for selected lectures.
Attributes: CLRM, CPCE, CPIE, HUCB.

PSYC 6530. Developmental Psychopathology. (3 Credits)
This course will consider developmental disabilities and psychopathologies and the contexts, both natural and designed, that exacerbate or ameliorate these conditions. The ideas of disability, pathology, and dysfunction, and the contrasting ideas of ability, health, and functionality will be considered in relation to each other.
Attributes: CLRM, CPCE.

PSYC 6654. Introduction to Neuroscience. (3 Credits)
An exploration of the neuro-anatomical, physiological, and chemical substrates of human behaviors, including movement, sensation, perception, cognition, emotion, and personality. Both typical and atypical behaviors will be considered, as will developmental issues.
Attribute: CLMB.

PSYC 6670. Psychopharmacology I. (3 Credits)
This course covers the major psychiatric medication used in direct service delivery setting for mental health care. Special attention will be give to the role of psychotropic medication in the conduct of psychological services, including case management and treatment facilitating/interfering matters.
Attributes: CLRM, CPCE.

PSYC 6802. Introduction to Psychology Statistics w/ Lab. (3 Credits)
This course will replace PSYC 6800 and PSYC 6801. Most psychological research depends on statistical methods. This course aims to provide an introduction of a variety of statistical methods for psychological research.

PSYC 6830. Psychology Research Methodology. (3 Credits)
The course will cover a variety of topics involving research methodology and design. Pitfalls and potential solutions to many experimental and quasi-experimental methodologies will be addressed. Students will complete their own research project during this course, including design, finding subjects, experimentation, analysis, and write-up.

PSYC 6850. Evaluation of Psychological and Social Programs. (3 Credits)
Review of the literature relating to the scientific evaluation of psychological programs in the areas of mental health, addiction, compensatory education, and societal innovation. Extensive discussion of the use of quasi-experimental designs, and numerous methodological issues and pragmatic problems associated with evaluation studies.
Attributes: CLRM, DATA, SOIN.

PSYC 6900. Psychometric Theory. (3 Credits)
This courses introduces several testing and measurement theories, including classical test theory, generalizability theory, and item response theory. The course will cover the statistical underpinnings, software implementation, and applications in real settings.

PSYC 7010. Psychology and Criminal Law. (3 Credits)
This course is designed to provide an overview of the interaction between psychology and the criminal law. We will focus primarily on the three major aspects in which psychologists are involved in the criminal justice system: competence to stand trial evaluations, mental state at the time of the offense (mens rea and the insanity defense), and the assessment of risk/prediction of future dangerousness. Because the interaction of psychology and law is by definition interdisciplinary, this course is co-taught by a forensic psychologist (Professor Rosenfeld) and attorney (Professor Cohen), and is open to both psychology graduate students law students. The content of the course is evenly divided between understanding the legal issues involved and the application of psychological principals to these legal issues. In additional, specific topics such as forensic psychological assessment and expert testimony will be discussed.
Attributes: CEED, CENS, CLRM, CPCE.

PSYC 7020. Psychology and Civil Law. (3 Credits)
This course covers a number of the areas in which psychologists consult on forensic matters outside of the criminal arena. The semester will be divided relatively evenly between the reviewing case law and legal standards and issues related to clinical practice. Specific legal issues discussed include the concept of torts and malpractice, causation, best interest standards, and standards of proof. The first application of these issues pertains to civil law, including the role of psychologists in personal injury and sexual harassment cases, and disability law. The second area of focus concerns the role of psychologists in the family court, including a child custody and visitation evaluations, termination of parental rights, and divorce mediation. Finally, we discuss issues that arise in the elderly and medically ill such as informed consent, decision-making competence, physician-assisted suicide, and testamentary capacity. Overarching issues such as psychological testing, report preparation, and expert testimony are discussed in the context of these topics.
Attributes: CEED, CENS, CLRM, CPCE, HECS.

PSYC 7030. Psychology and Juvenile Justice. (3 Credits)
This course provides an overview of the interaction between psychology and the juvenile justice system focusing on four areas: 1) developmental theories and trajectories of antisocial behavior, 2) assessment and identification of risk and protective factors among justice system-involved youth, 3) clinical evaluations related to legal questions, and 4) empirically supported treatment/program.
Attributes: CLRM, CPCE.

PSYC 7111. Psychopathology. (3 Credits)
An overview of the primary types, causes, and symptoms of a working knowledge of the basic tools used in clinical diagnosis, including diagnostic evaluation skills in the assessment of specific psychological disorders, as well as case formulation skills from different theoretical perspectives.

PSYC 7121. Clinical Diagnosis. (3 Credits)
This course is designed to promote the development of a working knowledge of the basic tools used in clinical diagnosis, including diagnostic evaluation skills in the assessment of specific psychological disorders, as well as case formulation skills from different theoretical perspectives.
PSYC 7122. Developmental and Prevention Science. (3 Credits)
This course introduces students to theories and research concerned with the integration of the developmental and prevention sciences to understand and address social-emotional and cognitive problems with a focus on middle childhood. Focusing first on theoretical perspectives from developmental science and key principles in prevention science, including risk and resilience in development, the course will then examine issues related to developmental transitions and contexts of development as well as challenges in targeting preventive interventions on multiple domains and mechanisms of development, and the science and practice of developmental preventive interventions in organizational, community, political-economic, and policy contexts. The course materials include primary readings, and the course is discussion based. Students will gain an understanding of core principles and research demonstrating the many ways developmental and prevention sciences are mutually informative.
Attributes: CLRM, PMPE.

PSYC 7250. Treatment of Substance Abuse. (3 Credits)
This course will cover theories and supporting research data concerning the development and maintenance of substance abuse disorders. It will concentrate heavily on specific techniques and regimes developed especially for the treatment of substance abuse disorders. Emphasis will be placed on psychosocial forms of treatment.
Attributes: CLRM, CPCE, CPIE.

PSYC 7500. Computerized Multistage Testing. (3 Credits)
This course provides a general overview of adaptive and multistage test (MST)’s important concepts. The MST design is described, why it is needed, and how it differs from other test designs, such as linear test and CAT designs, and how it represents a middle ground between the linear and intern-level adaptive tests. It will illustrate and discuss the processes of test design, assembly, routing, scoring, applications, and operational implementation considerations, as well as the most recent development on software for simulations to aid the operational implementation.

PSYC 7804. Regression with Lab. (3 Credits)
This course covers all types of regression analyses and related ideas. Hands on experience and development of expertise in conducting regression analyses.
Attributes: CLMB, DATA.

PSYC 7806. Multidimensional Scaling. (3 Credits)
A consideration of the theory and applications of the scaling of data, univariate and multivariate, metric and non-metric in psychology and related sciences. Emphasis is on the various theoretical models for scaling data multi-dimensionally and their computer program analogues.

PSYC 7811. Missing Data Analysis. (3 Credits)
Missing data is common in behavioral research. This course covers the concepts of missing data (e.g., mechanisms of missing data, categorizations of missing data), research designs in minimizing missing data, planned missing data designs, and statistical methods in handling missing data with different types of data (cross-sectional, longitudinal, categorical, multilevel). Software implementation of these techniques will be introduced and covered.
Prerequisite: PSYC 7804.

PSYC 7812. Factor Analysis. (3 Credits)
Theories of trait organization and techniques of factor analysis. Critical evaluation of major research on the identification of aptitude and personality traits.
Attributes: CLRM, PMTM, PSYM.

PSYC 7815. Cluster Analysis. (3 Credits)
Cluster Analysis is a generic term for a range of methods that use criteria, and algorithms for discovering and defining groups of similar objects, subjects, concepts, stimuli, or other entities. Current methods and their comparative evaluation are presented in the contest of behavioral science applications. The interrelationship of cluster analysis with factor analysis, multidimensional scaling and discriminant analysis is discussed. Students are expected to use the computer to analyze behavioral science data in the course.
Attribute: PSYM.

PSYC 7816. Introduction to Multivariate Analysis. (3 Credits)
This course covers elements of matrix theory, multivariate regression, exploratory factor analysis, principal component analysis, discriminant analysis, the generalized T-distribution, multivariate analysis of variance, and canonical regression. It also includes a treatment of pattern, profile analysis, and a brief introduction of correspondence analysis.
Attribute: CLMB.

PSYC 7821. Advanced Multivariate Analysis for Psychology. (3 Credits)
This course will cover the major multivariate statistical techniques used in social and behavioral sciences. The topics covered are similar to those in introduction to Multivariate Analysis; the multivariate normal distribution, the multivariate general linear model (MANOVA, Multivariate Multiple Regression, MANCOVA), discrimination and classification, canonical correlation analysis, and methods of analyzing covariance and correlation structures such as principal components and factor analysis. The coverage on this class goes beyond application of these techniques by focusing on their statistical and theoretical foundations, and by emphasizing matrix algebra computations.

PSYC 7827. Models of Decision and Choice. (3 Credits)
This course will cover normative and descriptive models of individual choice and decision-making beginning with Expected Value and concluding with Cumulative Prospect Theory. The course will emphasize the interface and exchange between theory and experimentation. In particular we will focus on the ways in which theory has changed and adapted in response to empirical behavioral results.

PSYC 7830. Structural Equation Modeling. (3 Credits)
The course and lab familiarizes students with methodology topics include: determination of model parameters, fitting models to data, etc., LISREL, EQS, AMOS, MPlus and SEPATH.
Attributes: DATA, PMTM.

PSYC 7832. Meta-Analysis. (3 Credits)
This course will introduce participants to the methodology of systematic reviews of scientific literatures and meta-analysis—a set of techniques designed to synthesize research findings across studies as the basic units of data analysis. The course will cover all major synthesis (meta-analysis) with special attention to the unique features of such analyses. Participants will read and critique published meta-analyses and will gain experience with some meta-analysis software.
Attributes: CLRM, PSYM.
PSYC 7835. Categorical Data Analysis. (3 Credits)
The goal of this course is to introduce statistical models for categorical data, which are common in behavioral sciences. These include binary data (sick vs. not), ordinal data (coarse Likert scales), nominal data (answers yes, answers no, answers "don't know"), and count data (how many events in a given amount of time). The course will introduce relevant statistical theory for categorical distributions; cover models such as logistic, Poisson, ordinal or nominal regression, etc., and show how they fit in the framework of the generalized linear model (GLM); and discuss the interpretation of these models.
Attributes: ASDM, PSYM.

PSYC 7850. Hierarchical Linear Models. (3 Credits)
This course introduces linear models (regression, ANOVA and ANCOVA) for populations having a hierarchical structure. An example of such a structure would be students grouped in universities. Here there is assumed to be a population of universities and, for each university, a population of students. Suppose there is some outcome variable of interest (perhaps GPA in this example). Predictors for this variable might be available at the student level (admission test scores) as well as the university level (selectivity). Hierarchical linear models provide an appropriate framework for exploring data obtained from such a structure (involving a sample of universities and a sample of students from each of the sampled universities). Bayesian, non-Bayesian, and Empirical Bayesian approaches will be discussed and compared.
Attributes: CLRM, PMTM.

PSYC 7880. Statistical Mediation Analysis. (3 Credits)
This course will provide a comprehensive introduction to statistical mediation analysis including estimation of effects, consideration of assumptions, and limitations of method. Course topics will cover computer intensive applications of mediation, including multivariate models with multivariate models with multiple indicators and mediators, as well as longitudinal and hierarchical models. The goal of this course is to prepare students for applying mediation to their own program of research.

PSYC 7890. Qualitative Methods. (3 Credits)
This course examines strategies available for the analysis of data not appropriately addressed by typical statistical methodologies. This course provides knowledge of qualitative research methods and skills necessary to carry out this kind of research in psychology. Principles, procedures, ethics, and illustrative studies in phenomenology, grounded theory, narrative psychology, hermeneutics, heuristic research, psychoanalysis, action research, programs of evaluation, and feminism will be explored. Hands-on activities include the formulation of research problems, design, data collection, analysis, validation, and report writing.
Attribute: CLMB.

PSYC 7920. Item Response Theory. (3 Credits)
This course focuses on item response theory psychometric models, including two- and three-parameter models. Theory and application are discussed and studied, using the various models.
Attributes: CLRM, DATA.

PSYC 7940. Bayesian Statistics. (3 Credits)
This course provides students with an understanding of the philosophy, concepts, and mathematical theories for Bayesian statistics. It also covers the Bayesian applications of common statistical techniques in psychological and behavioral research, such as regression. The course will also teach students using popular statistical software packages for Bayesian analysis.
Attribute: PMTM.

PSYC 7950. Correspondence Analysis. (3 Credits)
Correspondence Analysis (CA) is often regarded as principal component analysis of categorical data. The categorical data refer to contingency tables or any Likert-type data. Different from ordinary factor or component analysis that estimates factors or dimensions from column-wise variables, CA is eligible to estimate dimensions from row variables (actually row categories), in addition to estimating the column dimensions. CA also estimates the relationship (i.e., phi correlation) between the rows and columns, using the chi-squared statistics, and presents the relationship in a graphical display. CA may be considered as simultaneous principal component analysis for both rows and columns.
Attribute: PMTM.

PSYC 7960. Equating Test Scores. (3 Credits)
Test equating methods are used to produce scores that are comparable across different test forms. The course will provide a detailed overview of the observed-score equating (OSE) methods and framework, and of the IRT OSE method; the assumption that underlie different methodologies and the relevant data collection designs will also be discussed. In this course, theoretical issues will be considered along with numerical examples and software demonstrations using real data.
Attribute: PSYM.

PSYC 7965. Experimental Design. (3 Credits)
This class exposes students to the basic principles of experimental design and the appropriate tools for analysis of results from experimental studies. We will cover single- and multi-factor designs, blocking and repeated measures designs, analysis of covariance and the special statistical issues associated with multible comparisons and non-orthogonal designs.
Attributes: ASDM, PMTM.

PSYC 7990. The Teaching of Psychology. (3 Credits)
Theory and practice of college teaching will be reviewed. Topics will include lecturing, demonstrations, assessment methods, out of class writing assignments, syllabus preperation, local requirements and values.

PSYC 8001. Internship in Applied Psychological Methods. (3 Credits)
Students will identify a research project or program evaluation project in collaboration with their site supervisor and their internship mentor, and complete that project, drawing upon skills learned during the course of the Master's program. Students will have one semester to complete this project.

PSYC 8013. Psychometric Topics Seminar I. (0 Credits)
This seminar is intended for students in the psychometrics and quantitative psychology Ph.D. program. Students are required to take five semesters of PSYC 8013 and 1 semester of PSYC 8014. The seminar includes invited talks, research presentations, journal article/book chapter open discussions, and professional development topics related to psychometrics and quantitative psychology.

PSYC 8014. Psychometric Topics Seminar II. (3 Credits)
This seminar is intended for students in the psychometrics and quantitative psychology Ph.D. program. Students are required to take five semesters of PSYC 8013 and 1 semester of PSYC 8014. The seminar includes invited talks, research presentations, journal article/book chapter open discussions, and professional development topics related to psychometrics and quantitative psychology.

PSYC 8015. Identification of Child Abuse. (0 Credits)
The seminar will deal with the identification and reporting of child abuse. The sequelae of child abuse and maltreatment (medical, psychological, and legal) will be discussed. New York State laws and regulations dealing with reporting responsibilities will receive special emphasis.
PSYC 8023. Clinical Topics Seminar. (0 Credits)
All students attend this Clinical Topics Seminar (CTS) for 6 semesters (the first three years). CTS is intended to serve multiple goals, including facilitating the professional development of graduate students through, among other things, formal didactic presentations, opportunities to give formal research presentations (of the MA thesis, in the fall semester of the third year) and case conferences (in the spring semester of the third year), and guest lectures by faculty and invited speakers. Other topics rotate across different semesters and years (e.g., specific topic presentations that are covered sequentially and in more depth on a rotating three-year cycle).

PSYC 8025. Research Colloquium. (0 Credits)
Students will learn about research being conducted by faculty members, other graduate students, and invited speakers from other institutions.

PSYC 8040. Independent Research. (3 Credits)
This course offers opportunities for students to work with individual faculty on individual projects of their own design.

PSYC 8043. ADP Research Apprenticeship I. (3 Credits)
A research apprenticeship for all students in the Applied Developmental Program, taken within the first two years of study. Students, working under the direct supervision of a Developmental faculty member, gain firsthand experience in design, implementation, and analysis of a research project pertaining to the development of infants, children, adolescents, mid-life, or older adults.

PSYC 8044. ADP Research Apprenticeship II. (3 Credits)
A continuation of PSGA 8043.

PSYC 8045. ADP Research Apprenticeship III. (3 Credits)
A continuation of research apprenticeship I and II for all students in the Applied Developmental Program taken within the first two years of study. Students working under the direct supervision of a Developmental faculty member, gain firsthand experience in design, implementation and analysis of research, project pertaining to the development of infants, children, adolescents, mid-life, or older adults.

PSYC 8050. Pre-Doctoral Thesis. (3 Credits)
Under the direction of a faculty mentor, student conducts a short-term research project, analyzes results, and prepares a report in a journal article format.

PSYC 8060. Research Seminar I. (1 to 3 Credits)
Prior to beginning work on dissertation, each doctoral student prepares a written proposal of the research project and discusses it orally at a meeting of the seminar. Required of all doctoral students.

PSYC 8070. Research Seminar II. (3 Credits)
Each doctoral student is required to make a written and oral progress report on the dissertation research after completion of data gathering analysis.

PSYC 8080. Clinical Psychology Internship. (1 Credit)
To be taken only after completion of all other degree requirements.

PSYC 8081. Applied Dev. Internship. (1 Credit)
PSYC 8082. Psychometric Internship. (1 Credit)
PSYC 8020. Clinical Externship I. (3 Credits)
This course provides a didactic and group supervision structure that addresses students developing the range of clinical skills that sequentially prepare them for an internship and, eventually, independent practice as a psychologist. The focus of Externship I/II is on basic interviewing and therapy skills, intervention planning, and effective use of supervision to guide clinical service delivery. The clinical externship is completed by students in their second year of doctoral training. Didactics and group supervision focus on both assessment and treatment skills that are incorporated into students' clinical training at external externship sites.

PSYC 8203. Clinical Externship II. (3 Credits)
Continuation of PSYC 8202.

PSYC 8212. Clinical Externship III. (3 Credits)
This course provides a didactic and group supervision structure that addresses students developing the range of clinical skills that sequentially prepare them for an internship and, eventually, independent practice as a psychologist. The focus of Externship III/IV is on continued growth in interviewing and therapy skills, intervention planning, case conceptualization, report writing, and effective use of supervision to guide clinical service delivery. Didactics and group supervision focus on both assessment and treatment skills that are incorporated into students' clinical training at external externship sites as well as within the program training clinic.

PSYC 8213. Clinical Externship IV. (3 Credits)
Continuation of PSYC 8212.

PSYC 8221. Clinical Externship V. (1 Credit)
This course provides a didactic and group supervision structure that addresses students developing the range of clinical skills that sequentially prepare them for an internship and, eventually, independent practice as a psychologist. The focus of Externship V/VI is on continued growth in interviewing and therapy skills, intervention planning, case conceptualization, report writing, and effective use of supervision to guide clinical service delivery. Didactics and group supervision also address exposure and experience to models of supervision and case consultation. Students receive hands-on experience conducting supervision through a peer supervision process and gain practical experience in case consultation via their external externship training.

PSYC 8223. Clinical Externship VI. (1 Credit)
Continuation of PSYC 8221.

PSYC 8271. Child Psychotherapy. (3 Credits)
This course will provide foundational knowledge relevant to conducting individually oriented child and adolescent therapy. The course will address issues such as the unique challenges that are involved in working with children and adolescents, evidence-based approaches to child and adolescent treatment, and major psychological disorders that children and adolescents experience, and how to intervene. Attributes: CLRM, CPCE, CPIE.

PSYC 8350. Applied Dev Psy Prac I. (3 Credits)
Supervised work in the application of developmental psychology to field settings. Students complete a project, such as a needs assessment or program design and evaluation practicum site. Prerequisites: PSGA 6350 (may be taken concurrently) and PSGA 6000 (may be taken concurrently).

PSYC 8351. Applied Dev Psy Prac II. (3 Credits)
Continuation of PSGA 8350.
PSYC 8999. Independent Study. (1 to 3 Credits)
Under the direction of a faculty mentor, student conducts a research project not directly related to either the second-year project (PSGA 8050) or the doctoral dissertation.

PSYC 9999. Dissertation Direction. (1 Credit)

Applied Developmental Psychology (Ph.D.)

The curriculum of the ADP program focuses on human development (bio-psycho-social) in contexts and over time; prevention/intervention and health promotion; theories and methods of developmental assessment; and program evaluation. Coursework emphasizes the importance of applying research, as two courses require field placements (program evaluation and the practicum). These ADP program field experiences serve to foster relationships with the communities of the Bronx, the NYC metropolitan area, and beyond. Because human development occurs in contexts, all courses and field experiences include a deep understanding and discussions of inter-individual differences in intra-individual change, multiculturalism, vulnerable populations, as well as ethical and moral issues in all three areas of research, applications, and policy.

**Concentrations:** (Chose one of three)

Two Required and one elective course from one of the following concentrations:

- Development within Family, School, and Neighborhood Contexts
- Development in the Context of Race, Ethnicity, and Culture
- Health, Illness, and Well-being across the Lifespan

Total Credits: 66

Concentrations

The ADP program requires students to focus their coursework and research and field experiences in one of the following three areas: Development within Family, School, and Neighborhood Contexts; Development in the Context of Race, Ethnicity, and Culture; and Health, Illness, and Well-being Across the Lifespan. Faculty can associate with more than one concentration and are able to mentor students across concentrations.

Development within Family, School, and Neighborhood Contexts Concentration

Health, Illness, and Well-being Across the Lifespan Concentration

Three courses are required.
Applied Psychological Methods (M.S.)

Overview

The applied psychological methods master’s degree program currently requires 30 semester hours for the M.S. degree. After no more than one semester, students specialize in one of two concentrations. The program focuses on the evaluation of programs and program delivery, social policy, organizational change, and specific content areas such as education, development, or cognition. It also focuses on applying advanced statistical approaches to real-world problems, using techniques such as item response theory, structural equation modeling, and hierarchical linear modeling.

Students will complete a total of three core courses (9 credits), and six specialization courses (18 credits), and a one-semester internship (3 credits). Full-time students are expected to take three or four 3-credit courses a semester, part-time students one or two. Internships may be arranged following one semester of completed work. Any substitutions must be reviewed and approved by the director of the M.S. program. Additional coursework completed over the summer or transferred from a prior institution may reduce the number of courses required per semester.

Clinical Psychology (Ph.D.)

Overview

The doctoral training program in clinical psychology is a single program that prepares students for and makes them eligible to take the New York State Licensing Examination in Psychology. Students can specialize in one of four areas through elective courses, selecting an appropriate externship, and conducting either their M.A. or doctoral research in that area.

Students are expected to be in residence for their first four years, typically taking three to four courses in addition to Clinical Topics Seminar and Research Colloquium per semester. Most students also take some courses over the summer, with up to two summer courses covered by their tuition scholarship. In total, students are required to complete 60
course credits. Externship, Research Practicum, Dissertation, and an APA-accredited internship bring the total to the 85 credits required for graduation. Courses taken over the summer or transferred from a prior institution may reduce the number of courses per semester or provide greater flexibility in selecting and scheduling electives.

Clinical Psychology Placement

Students are admitted to the clinical program within the psychology department rather than to a faculty member’s lab. However, students interested in working with a particular faculty member are strongly encouraged to indicate this interest in their admission materials, as the vast majority of students enter the program with a clearly identified mentor.

The clinical program also admits students who do not declare which faculty member would be their academic and/or research adviser as part of the admissions process. These students are free to select the faculty members most able to direct the research interest they cultivate during their first year. Students are welcome to work with another faculty member on their doctoral dissertation should their research interests change during their time in the program.

Updated: 07-27-2020
Clinical Research Methodology (M.S.)

Students will complete a total of 36 credits, including four required “core” courses, primarily focusing on essential elements of clinical psychology research. In addition, students will take two scientific “breadth” courses, reflecting the scientific underpinnings of psychology, and four elective courses. The final 6 credits are comprised of the Master’s thesis research, including a “research practicum” experience in which the student works in the lab of a faculty member or collaborator. Students are expected to complete the program in two years, taking four courses each semester in the first year, and two classes per semester in their second year, two of which will fulfill the research practicum and completion of the M.S. thesis.

Although the “research” credits are typically taken in the second year, students are expected to begin working on research throughout their time in the program, whether with a faculty member or in an external research setting. In addition, students should plan on beginning to develop the Master’s thesis in the first year. Note that this intended curriculum is not mandatory; some students may elect to complete the program more rapidly (e.g., by taking summer courses and/or completing the thesis in the Fall of their 2nd year) and others may proceed through the program more slowly.

Research Practicum

As one of the primary aims of the CRM program is to provide students with rich research experience, each student is required to complete a semester-long practicum in their second year in order to collect data for their M.S. thesis. Therefore, although each student enrolled in the CRM program will be paired with a full-time Fordham faculty member, most students will also receive substantial mentorship from colleagues and affiliates at outside agencies, many of whom maintain collaborative relationships with Fordham faculty. Practicum sites will be selected based on the student’s interests and goals. For example, a student interested in forensic psychology may complete his or her research practicum at the Kirby Forensic Psychiatric Center, under the primary supervision of that institution’s chief psychologist (who is also an adjunct faculty member). A student interested in health psychology, on the other hand, could complete his or her research practicum at Mount Sinai Medical Center or Memorial Sloan Kettering Cancer Center.

Psychometrics and Quantitative Psychology (Ph.D.)
Overview
Fordham’s doctoral program in psychometrics and quantitative psychology (PQP) offers the opportunity to acquire a variety of advanced and sophisticated measurement, evaluation, and statistical skills, preparing our graduates for careers in industry, research, or teaching. The program requires 81 credits beyond a bachelor’s degree (51 credits for students who hold an M.S. or M.A. degree in a relevant field), a comprehensive exam, and a Ph.D. dissertation.

Requirements

| IV. PhD Comprehensive Exam |
| PSYC 0930 Psychology Doctoral Comprehensive Examination 1 |
| V. Proposal Acceptance 3 |
| PSYC 0960 Proposal Acceptance |

Updated: 07-27-2020
Applicants for graduate study must have received a baccalaureate degree or some professionally oriented degrees, such as the Master of Fine Arts. Fordham GSAS admits students to research degrees, including the Master of Arts (M.A.), with specific departmental or program recommendations, and the approval of the dean. Any change of program and/or degree requires a new application, the recommendation of the department or program, and the approval of the dean. Matriculated students are those individuals who have been accepted into a graduate degree program or advanced certificate program, are registered for classes or the equivalent, and are actively working toward a degree or certificate offered by GSAS.

Students may not be matriculated in more than one degree program simultaneously, whether internal or external to GSAS, except in those instances where a joint- or dual-degree program has been established. Under certain circumstances, a student may be enrolled in an advanced certificate program while being simultaneously matriculated in a degree program (see Advanced Certificates (p. 813)). Any other exceptions to this policy must be approved in writing by the dean.

For certain graduate programs, prospective students must possess a prior degree in order to matriculate in that program. Students who are in the process of completing such a degree (whether at Fordham or at another institution) at the time of their acceptance must subsequently submit an official transcript indicating that the degree has been awarded. If an official transcript is not received by mid-term of the student's first semester, a hold will be placed on the student's registration and records. Any exceptions to this policy must be approved in writing by the dean.

Deferral or Change of Program and/or Degree
It is GSAS policy not to permit a deferral of admission, though admitted students may seek permission to delay matriculation by no more than one semester. If an accepted student wishes to reapply the following academic year, they must do so by submitting a new online application; they are not guaranteed admission upon re-application. Any exceptions must be approved in writing by the dean. Application materials (e.g., letters of recommendation, Graduate Record Examination (GRE) scores) typically remain on file for up to 18 months after their initial submission.

Any change of program and/or degree requires a new application, the recommendation of the department or program, and the approval of the dean.

Conditional Admission, Provisional Admission, and Modified Degree Requirements
Students admitted on a conditional basis must maintain a specified grade point average (GPA) or otherwise meet specified coursework requirements. Any exception to this policy must be approved in writing by the dean. Admission recommendations to the graduate school are made by faculty within the program in question, and are based on the applicant’s potential and preparation for graduate work in the chosen field as well as the availability of faculty and facilities for the applicant’s proposed research interests. After receiving the faculty’s recommendations, the final decision regarding admission is made by the dean (see Authority (p. 836)). Fordham typically does not award degrees in the same field and at the same level in which a student has already earned a degree. For instance, if a student holds an M.A. in history from another university, they will not be admitted into the master’s program in history within GSAS. The exception to this is the Department of Biology, which may choose to admit a student with a previous graduate degree in biology.

Applications to GSAS can only be submitted online.

Any change of program and/or degree requires a new application, the recommendation of the department or program, and the approval of the dean.

The exception to this is the Department of Biology, which may choose to admit a student with a previous graduate degree in biology.

Applications to GSAS can only be submitted online.
requirements to resolve any academic deficiencies in their preparation. Such students are considered matriculated upon their registration/enrollment (see Matriculation (p. 811)).

Upon satisfactory completion of the conditions outlined in the student’s letter of acceptance, or when specified in a letter to the student from the department or program, the student is released from conditional admission status and will remain a matriculated student in good standing for so long as the normal requirements of GSAS and of the department or program are met (see §7 Degree Requirements). The department chairperson or program director will initially determine when the required conditions have been met, subject to the approval of the graduate school.

Students who do not complete the stated conditions satisfactorily will be dropped from the rolls of the University. Waivers to any specified conditions must be approved in writing by the dean.

Students may also be offered provisional admission, under which they are required to complete certain conditions, including but not limited to the submission of letters of recommendation or test scores, before admission will be granted. Students will not be considered matriculated until these conditions are met.

The graduate school reserves the right to modify degree requirements to include additional coursework for students whose academic preparation is deemed by the faculty in some way to be deficient. In particular, students for whom English is a second language (ESL students), may be required to complete additional English-language coursework (see International Students (p. 812)).

International Students

In addition to the rules and regulations of the University, international students are expected to follow the rules and regulations established by the Department of Homeland Security and the U.S. Citizenship and Immigration Services (USCIS).

For further information and guidance, international students should contact the Office of International Services (OIS), which is a resource center for students and scholars from outside the United States. Information regarding immigration regulations and the benefits foreign students are eligible for under immigration law may be obtained from this office. All international students who have F or J immigration status are required to register with the OIS.

English Proficiency

International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results.

Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences (Code #2259).

Exemptions from this requirement can be requested by the applicant in their application or in writing to the dean. Exemptions are generally permitted for international applicants who...

1. are native English speakers from countries where English is an official language; and/or

2. have completed, within the past five years, at least two years of study at an undergraduate or graduate institution in the United States or in a country where English is the official language of instruction. GSAS retains the right to request language evaluation from any applicant. The Fordham English Language Test (FELT), administered by Fordham’s Institute of American Language and Culture (IALC), may be required for those students whose English proficiency scores do not meet GSAS program requirements. Additional coursework may also be recommended by the Institute of American Language and Culture (IALC). (See Conditional Admission, Provisional Admission, and Modified Degree Requirements (p. 811).)

Students are permitted to register for two GSAS courses during the academic term in which they are completing any IALC-recommended coursework, which generally occurs during their first semester of study.

Please note: Tuition costs associated with the learning of English as a second language are the responsibility of the student and will not be covered by a GSAS tuition scholarship. GSAS merit-based tuition scholarships are not applicable to the costs of additional coursework recommended by the IALC.

Non-Matriculated (Non-Degree) Students

Permission to register as a non-matriculated or non-degree student is awarded by GSAS and granted on a course-by-course basis.

Individuals who wish to register as non-matriculated/non-degree students must complete the online application located on the GSAS website and secure the necessary approvals. Continuing non-degree/non-matriculated students must complete the GSAS non-degree/non-matriculated application each semester, and submit the completed form to the Department Chairperson or Graduate Program Director for initial approval. The department will submit the form to the Office of Academic Programs and Support for review, final approval and registration. Falsifying any information on this application, failing to file the application each semester, or failing to secure the necessary approvals will invalidate registration. The student remains liable for tuition and fees notwithstanding the validity of the registration.

Students who qualify for non-matriculated or non-degree registration will have earned an undergraduate degree with at least a B average in their major field of study and may fall into one of the following categories:

- students not seeking a degree who wish to take courses for personal enrichment
- students who wish to take courses pending application to a degree program
- students who wish to take courses in order to transfer these credits to another graduate program in which they are matriculated

Students who are denied admission to the Graduate School of Arts and Sciences as matriculated students may not enroll in courses on a non-matriculated basis without the written approval of the dean. GSAS and Fordham University have no obligation to admit any individual who has registered as a non-matriculated student or to grant a degree to such a student, no matter how many credits have been completed.

Non-matriculated students may take up to 12 credits in GSAS, with the approval of the department chairperson and the dean. Approval for non-matriculated status for more than 12 GSAS credits is not normally granted. If extraordinary circumstances justify non-matriculated status for more than 12 credits, the student must obtain the explicit written recommendation of the department chairperson and the written approval
of the dean. No more than 12 credits taken as a non-matriculated student may ultimately count toward any GSAS program of study; any exception to this policy requires the written approval of the dean.

Non-matriculated students who register for the first time are considered new non-matriculated students upon registration. Those who have registered for up to two years are considered continuing non-matriculated students. Students who have not registered for two academic years are again considered new non-matriculated students upon subsequent registration and must submit a new application for non-degree study.

Advanced Certificates
Non-matriculated students who wish to enter an advanced certificate program must apply online.

Matriculated students who wish to enter an advanced certificate program must apply online. The department evaluates the application for approval and then submits it to the GSAS Office of Admissions to be processed.

For more information on advanced certificate programs and how to apply, see the GSAS Graduate Programs page.

Accelerated Master’s Programs
Qualified Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC), Fordham School of Professional and Continuing Studies (PCS), and Gabelli School of Business (Gabelli) juniors may apply for the accelerated master’s to select GSAS programs. Accelerated master’s students apply during their junior (or equivalent) year, and take up to three courses in their senior year to count toward both the bachelor’s and the master’s degree. After an additional year of degree requirements (4+1), students are awarded a joint B.A./M.A. or B.S./M.S. degree.

Please refer to the specific program or the accelerated master’s programs web page for eligibility requirements (such as minimum GPA) and program participation. Programs that offer the accelerated master’s are listed on the accelerated master’s programs web page.

Appendix A: Notification of Rights under the Family Educational Rights and Privacy Act (FERPA)
The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are:

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a written request for access. A student should submit to the Office of Academic Records—Enrollment Group at the Rose Hill campus, the Lincoln Center campus, the Westchester campus, or the law school registrar, if applicable, a written request that identifies the record(s) s/he wishes to inspect. The Office of Academic Records—Enrollment Group will make arrangements for access and notify the student of the time and place where the records may be inspected.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading. A student may ask the University to amend a record that he/she believes is inaccurate or misleading. The student should write the University registrar, or the law school registrar, clearly identifying the part of the record s/he wants changed, and specifically why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of her/his right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. One of the exceptions which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or an official committee, such as on a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. Upon the request of officials of another school in which a student seeks or intends to enroll, the University may disclose educational records without the student’s consent.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Fordham University to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

<table>

</tbody>
</table>

DIRECTORY INFORMATION
The University, at its discretion, may provide the following Directory Information: student’s name, address, telephone number, electronic mail address, photograph, date and place of birth, major field of study, dates of attendance, grade level, enrollment status (e.g. undergraduate or graduate; full time or part time), participation in officially recognized activities and sports, weight and height of members of athletic teams, degrees, honors and awards received, and the most recent educational agency or institution attended, and other such similar information. A student who wishes the University to withhold directory information from disclosure must notify the University registrar or law school registrar in writing within ten days after the first day of class each semester.

Updated: 07-27-2020

Appendix B: Notice Regarding the Clery Act
Fordham University is committed to the safety and security of members of the Fordham community. As part of this commitment and in fulfillment of our obligations under the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, Fordham publishes an annual security and fire safety report. The report contains information about the incidence of fires and certain categories of crime on Fordham campuses as well as important information about Fordham University safety and security policies, tips for staying safe, and important telephone numbers.

Eu mel ludus vivendum.

(NOTE: double spaced, it is recommended not to exceed 350 words; do
not include a page number)

G.3 Vita

VITA

Jane Elizabeth Smith, daughter of Jared and Sarah Smith, was
born on August 12, 1966, in Omaha, Nebraska. After graduating in 1982 from Central Catholic School in
Omaha, she entered Political Chances
University as the recipient of the Presidential Classroom Scholarship. In
1986, she received the Bachelor
of Science degree in Psychology.

From September 1986 to June 1989 she worked for Transitional
Services, an issue oriented think-tank.

She then entered Fordham University in 1989, and earned her Master of
Arts degree in Psychology in 1991.

During her time at Fordham, she was awarded a University Fellowship
and an Alumni Dissertation Award.

While working toward her doctoral degree in Psychology, under the
mentorship of Dr. William James, she
worked for Lawson's Hospital. In January 1995, she began working as a
consultant on political correctness for
MADD Magazine.

(NOTE: do not include a page number)

Communications to and from GSAS

Fordham Email

GSAS considers electronic mail (‘email’) sent to and from a
student’s Fordham University e-mail account as an official means of
communicating important and time-sensitive GSAS-related information,
such as notifications about funding and tuition scholarship applications.
Students are responsible for checking and reading all of their Fordham
e-mails, and GSAS will consider students to be in receipt of and informed
of all email correspondence sent to their Fordham email accounts.
Students who choose to forward their University emails to a non-
University email system shall be solely responsible for any consequences
arising from such forwarding arrangements, including any failure by the
non-University system to deliver or retain University emails.

Monthly Newsletter
Through our professional development initiative, GSAS Futures, GSAS sends monthly e-newsletters to update students on professional development opportunities, upcoming deadlines for internal and external grants, and other important announcements. Students who would like to be added to the monthly newsletter should send an email to gsasfutures@fordham.edu.

How to Reach GSAS (And Who Does What)
Please refer to the GSAS website’s ‘Contact Us’ page, which provides all contact information and areas of responsibility for individual GSAS staff.

Degree Requirements
Candidates for graduate degrees must comply with the requirements of both the Graduate School of Arts and Sciences and the department or program in which they are matriculated in order to be considered in good standing. GSAS policies represent only the minimum requirements, and departments and programs may impose additional requirements and higher standards. Students should review their department or program’s website for information regarding requirements. Please visit the GSAS Graduate Programs page for a list of the departments and programs.

Students must meet GSAS requirements, unless granted an exemption by the dean after consultation with the department chairperson or program director.

General Requirements
Students matriculated in master’s degree programs are often permitted to choose between two ways of meeting degree requirements. With departmental approval, candidates may elect to:

1. Complete satisfactorily 24 credits of coursework and an approved thesis (with six credits of thesis research); or
2. Complete satisfactorily 30 credits of coursework without a thesis.

Master’s students must maintain a B average (or 3.0 cumulative GPA) in master’s-level coursework (see Satisfactory Academic Performance). Please refer to GSAS Graduate Programs for information on specific program requirements.

Students matriculated in doctoral programs are typically required to complete a minimum of 60 credits of graduate-level coursework as well as a dissertation. Doctoral students must maintain a B+ average (or 3.5 cumulative GPA) in doctoral coursework.

Students admitted to a Ph.D. program with a master’s degree are required to complete a minimum of 30 additional credits within their matriculated program and will not be admitted with a GPA below a “B+” (or 3.5 cumulative GPA) in their master’s coursework.

Students in advanced certificate programs must maintain a “B” average (or 3.0 cumulative GPA) in coursework taken for the advanced certificate degree.

With authorization of the dean, up to 12 credits of graduate work completed at Fordham may be applied to fulfill the requirements of degrees granted in other departments or programs.

Students who wish to substitute courses from other institutions for specific departmental or programmatic requirements must submit a Waiver of Requirements Form, available at GSAS Student Resources.

No more than 12 credits toward a degree may be taken during summer sessions, unless the student is registered for a special summer program.

Transfer of Credits
Students may submit graduate work completed at other institutions during the five years prior to matriculation for partial fulfillment of course requirements, subject to the approval of the department chairperson or program director, and the dean.

To request a transfer credit, students must consult with the Director of Graduate Studies or Program Director of their department or program and complete the Transfer of Advanced Credit Form, available at GSAS Student Resources.

This form must be submitted to the chairperson or program director for initial approval, accompanied by an official transcript of the intended transfer credits. Transfer credits applied to the master’s degree or advanced certificate program must reflect a grade of B (3.0) or higher, and transfer credits applied to the doctoral degree or advanced certificate program must reflect a grade of B+ (3.5) or higher. Once approved at the department/program level, the form must be submitted to the Office of Academic Programs and Support for final review and approval by the dean.

No more than six transfer credits (up to a two course equivalent) will be accepted toward the completion of any GSAS academic degree or advanced certificate program, except as specified through formal agreement between GSAS and a partner institution, or between GSAS academic degree programs and/or advanced certificate programs.

Transfer credits will not be approved until students have successfully completed at least 12 credits of coursework in their matriculated degree program (6 credits in the case of an advanced certificate program), and must reflect the GPA requirements (see General Requirements) at the time of transfer.

Grades from transfer credits are not included in the calculation of a student’s Fordham GPA.
Advanced credit will not exempt students from any part of their comprehensive examinations.

Time Limit on Completion of Degree
Students must complete the requirements for their degree, including thesis or dissertation work, in a timely and expeditious manner. This is, within five years of first matriculation for master’s students, and within eight years of first matriculation for doctoral students (see Master’s Degree and Doctoral Degree). Direct doctoral students (students who receive a master’s degree in curso from Fordham) have a time limit of 10 years to complete their degree. The 10-year time limit also applies to students entering a Ph.D. program immediately after receiving a
master's degree from Fordham. Time limits on the completion of degree are rigorously enforced.

In addition to having an important academic purpose, the number of years to degree is monitored by the New York State Department of Education (NYSSED) and other institutions concerned with graduate programs, and is often one indicator of the quality of a graduate program.

Students failing to maintain continuous enrollment (e.g., having voluntarily withdrawn from their degree program) who seek to reenroll such that they would exceed or have already exceeded the original time limits of their degree, must apply for readmission (see Readmission (p. 826)). As part of their application, students must present a timetable for successfully completing all renewed degree requirements, retaking expired courses, re-demonstrating language/research competency (see §7.5 Language Requirements), retaking comprehensive examinations (see §7.6 Comprehensive Examinations), and resubmitting the dissertation proposal. If permission to resume studies is granted, failure to adhere to this timetable could result in dismissal.

**GSAS Standards for Satisfactory Academic Performance and Satisfactory Academic Progress; Federal Satisfactory Academic Progress (SAP)**

The Graduate School of Arts and Sciences measures a student’s good standing in terms of two benchmarks: academic performance and academic progress:

**Academic performance** refers to a student’s maintenance of a given cumulative grade point average (see Satisfactory Academic Performance below) and is primarily applicable to the coursework portion of a student’s degree program.

**Academic progress** refers to a student’s continued matriculation and timely completion of degree requirements (see Satisfactory Academic Progress below), and most often measures a student’s progress following his or her satisfactory completion of program coursework.

In order to be eligible for funding, a student must meet both GSAS academic performance and academic progress standards as well as U.S. Department of Education Satisfactory Academic Progress (SAP) criteria, which identify strict guidelines to assess student eligibility for assistance. Conversely, a student who fails to meet GSAS satisfactory academic performance and/or progress goals will in most cases fail to qualify for federal loans.

Students who do not meet the standards for satisfactory academic performance and/or satisfactory academic progress are automatically placed on academic probation without notice. If the deficiency is not corrected, the dean, in consultation with the department chairperson or program director, may dismiss the student from the University.

**Satisfactory Academic Performance**

Minimum satisfactory academic performance is defined as having a cumulative grade point average of at least 3.0 (B average) in a master’s program and of at least 3.5 (B+ average) in a doctoral program, as well as enrollment in the full time equivalent of coursework (see Full-Time Status of Certification (p. 828) and Appendix D). Students failing to complete the full time equivalent of coursework may also fail to meet the conditions for satisfactory academic progress (see Satisfactory Academic Progress below).

Any student receiving GSAS funding or tuition scholarships must also maintain a cumulative 3.5 (B+ average) as a minimal requirement for continuation of aid.

Students who fall below the required grade point average may not take comprehensive examinations without the dean’s permission (see §7.6 Comprehensive Examinations).

Note also that administrative F grades (see §6.2 Incomplete Coursework) are computed as F grades (0.0) for the purpose of determining the cumulative grade point average.

**7.4.2 Satisfactory Academic Progress**

Minimum satisfactory academic progress is defined as completing at least one requirement pertaining to either comprehensive examinations or a dissertation/thesis per year, following the semester in which coursework is completed (see §5.3 Registration Procedures and Special Categories, §7.7 Master’s Degree, and §7.8 Doctoral Degree).

For master’s students, requirements include the comprehensive examination and the thesis or capstone in certain departments (see §7.7 Master’s Degree).

For doctoral students, requirements include the comprehensive examination, the dissertation proposal, dissertation chapters, and the dissertation defense (see §7.8 Doctoral Degree).

Departments or programs may impose interim requirements for satisfactory academic progress at any time. Markers of unsatisfactory progress may include an excessive number of withdrawals, incompletes, semesters on maintenance, leaves of absence, or other delays in meeting the requirements for the degree.

Students who do not make satisfactory academic progress toward a degree may be dropped from the rolls of the university, even if they continue to meet satisfactory academic performance requirements and/or have not exhausted their time limit toward the degree.

Students who do not complete at least one requirement each year are automatically placed on academic probation without notice. Such students must fulfill the requirement and file, within one semester of being put on academic probation, a mandatory timetable for completing all remaining requirements. The timetable must include at least one deadline per semester (e.g., “complete chapters 1 to 3 of the dissertation in the 2013 fall semester”). If the requirement remains unfulfilled by the end of the semester, or if subsequent timetable deadlines are not met, the dean, in consultation with the department chairperson or program director, may dismiss the student from the University.

**Doctoral students who have not secured approval of their dissertation proposal at least five semesters before the expiration of their time limit are automatically placed on academic probation without notice.** Such students must secure approval of the dissertation proposal and a timetable for completion of the dissertation within one semester of being put on probation. If either the proposal or timetable are not approved by the end of the semester, the dean, in consultation with the department chairperson or program director, may dismiss the student from the University.
An individual student’s requirements for academic progress may be affected by the time remaining until the student reaches the time limit for degree completion (see §7.3 Time Limit on Completion of Degree).

### 7.5 Language Requirements

Students should consult their departments or programs regarding language and/or skills requirements and how these are to be met.

Master’s students are often required to possess a reading knowledge of either French or German. Other languages may be substituted with the permission of the department chairperson or program director, and the dean, if appropriate to the student’s field of scholarship.

Doctoral students are typically required to possess a reading knowledge of two modern languages (usually French and German, or other languages appropriate to the student’s field of scholarship). At the discretion of the department or program and with the approval of the dean, a student may be allowed to substitute necessary research skills, such as computer programming or statistics, for a second language. In some cases, more than two languages may be required, if deemed necessary for the student’s research.

Individual departments or programs determine what constitutes satisfaction of the language requirement, though in most instances this may be accomplished either by passing a graduate-level Language for Reading course with a final grade of B or higher, or by passing one of the language examinations offered by the Department of Modern Languages with a grade of B or higher (refer to individual departments for details). Such exams are usually administered the week before the beginning of the fall and spring semesters, and are roughly equivalent in difficulty to the final examinations of graduate-level Language for Reading courses.

Students who wish to take language exams should schedule an appointment by contacting the modern languages department at least two weeks before the beginning of either the fall or spring semester. Completed exams will be corrected within two weeks, and departments or programs will be notified of students’ grades.

Language requirements must be fulfilled before GSAS will certify comprehensive examination results. Students are encouraged to fulfill language and other skill requirements as early as possible, for use in coursework and research.

Language requirements satisfied at other institutions are typically not accepted in fulfillment of GSAS language requirements.

### 7.6 Comprehensive Examinations

Many departments and programs require both master’s and doctoral students to complete comprehensive examinations (written, oral, or both). Students should consult their department chairperson or program director to verify the dates on which comprehensive examinations are administered.

Applications for all comprehensive examinations must be approved in writing by the chairperson or program director two weeks prior to the examination date. In order to qualify for comprehensive examinations, students must be in good academic standing (see §7.4 GSAS Standards for Satisfactory Academic Performance and Satisfactory Academic Progress; Federal Satisfactory Academic Progress (SAP)) with a GPA at or above the minimum requirement for the degree (3.0 for master’s students, 3.5 for doctoral students). Additionally, students must have completed their language requirements and must have completed or be in the process of completing required coursework for their degree program before comprehensive exams will be certified. If a student takes a comprehensive examination without meeting these prerequisites, the results will not be certified by the dean or posted to the student’s official record.

If a student fails the master’s or doctoral comprehensive examination, the failure is not posted to the student’s final transcript, and the student may be permitted to take a second examination the following semester (or later) with the recommendation of the department chairperson or program director and the approval of the dean.

If a student fails to pass the comprehensive examination a second time, they are not permitted to retake the examination. The failure is posted to the student’s final transcript, and they will be dismissed from the program.

Details for retaking comprehensive examinations, in whole or in part, should be discussed with the department chairperson or program director. Candidates taking comprehensive examinations for the second time pay the fee listed in the GSAS fee schedule.

### 7.7 Master’s Degree

All requirements for the master’s degree must be completed within five years of the first semester of matriculation in the GSAS. Time limit requirements apply to both full and part time students.

The GSAS requirements for master’s students are as follows:

1. Completion of the appropriate number of graduate credits (see §7.1 General Requirements)
2. A language requirement (see §7.5 Language Requirements)
3. An exit requirement, which may comprise one or more of the following: comprehensive exams, special project, thesis, research, internship, and the like. If the exit requirement is a thesis, presentation of the thesis to a member of the dean’s office is also required (see §7.7.2 Presentation of Master’s Thesis to GSAS)

Individual departments and programs may impose additional requirements.

At the end of their third year, the dean’s office typically will inform students that they are approaching the five-year time limit and of the nature of the extension policy. At the beginning of their fifth year, the dean’s office typically will inform students that they have only one year remaining.

Students who plan to seek an extension to the five-year time limit must apply before the conclusion of their fifth academic year. Such a request must be directed in writing through the department chairperson or program director, and must receive the written approval of the dean. Requests for extensions must include a timetable, approved by the chairperson or director for the completion of degree requirements. Failure to adhere to the timetable or to meet other conditions may result in dismissal.

Students requesting an extension to their five-year limit must:

1. Re-demonstrate language competency if more than three years have elapsed since the original completion of their language requirement.
2. Demonstrate the currency of their knowledge for any courses taken prior to the request for extension, and departments may require that they retake certain courses.
3. Retake and pass comprehensive examinations in the department or program's current format if more than three years have elapsed since any portion of the comprehensive examination was originally passed.

4. Meet any additional requirements imposed by the dean after consultation with the department chairperson or program director, and must maintain continuous enrollment (see §5.1 Continuous Enrollment Policy) until all requirements are completed.

7.7.1 Master's Thesis

If a student chooses or is required to complete a master's thesis, they must enroll for six credits of thesis research as prescribed by the program (see §5.3.1 Registration Process for Master's Students).

A master's thesis committee must consist, at minimum, of a thesis director (mentor) and one reader. Committee members are specified, along with the thesis topic, on the Thesis Title Approval Form (see GSAS Student Resources), which is submitted to GSAS by the department chairperson or program director. The department chairperson or program director is responsible for ensuring that the committee is professionally appropriate.

When a thesis title and committee have been approved, the student's program will be notified. For any changes made to the thesis title or thesis committee membership, a new form must be prepared and sent to dean's office for approval.

An oral defense of the master's thesis is not required by the Graduate School of Arts and Sciences, but may be a program requirement. If this is a program requirement, the student must be physically present at the defense, and may not participate by any means of distance communication (e.g., Skype, videoconferencing, teleconferencing, telephone).

The master's thesis should be uploaded to ProQuest/UMI using the following link: http://www.etdadmin.com/fordham.

The uploaded thesis should be in its final version, including any changes required by the committee and in the proper format as indicated in Appendix E. All other requirements for the master's degree must be completed before the thesis is uploaded to ProQuest/UMI.

For style requirements, formatting, and the materials required for the completion of the master's thesis, see Appendix E.

Some departments require master's research papers, projects, or internships. The approval forms for these projects are submitted to GSAS as part of the last requirement for the degree. Students in these departments should consult their departments about requirements for these projects.

7.7.2 Presentation of Master's Thesis to GSAS

After the oral defense, students must submit the dissertation paperwork, complete the dean's exit survey, complete the SED survey, and upload their dissertation to UMI Proquest by the deadline listed on the GSAS Academic Calendar, generally the Friday before the last day of classes for May graduation, or two weeks before the August and February graduations. Exceptions to this date will be granted under only unusual circumstances outside the student's control and must be requested by the student's mentor. Dissertations will not be accepted when the University is officially closed.

Final thesis paperwork containing signatures must be submitted to adgsas@fordham.edu by the deadline listed.

Once the thesis and paperwork have been reviewed, students will be informed that they have been cleared for graduation.

Theses uploaded to ProQuest/UMI should be in their final version, including any changes required by the committee, and should be in proper format as indicated in Appendix E. The following contents should comprise the thesis paperwork submitted to adgsas@fordham.edu:

1. One Thesis Prepared under my Direction sheet, signed by the mentor and readers.
2. The Report on Written Thesis Form, signed by the mentor and readers;
3. (If oral defense is required by the department): the Report on Oral Defense Form, signed by the adviser, readers, and one examiner.

7.8 Doctoral Degree

All requirements for the doctoral degree must be completed within eight years of the first semester of matriculation in GSAS for those students who enter with a master's degree from another institution, or within ten years of the first semester of matriculation for those students who are direct doctoral students (students who receive a master's degree in curso from Fordham) or who complete a master's degree from Fordham and then continue directly into a doctoral program. Time limit requirements apply to both full and part time students.

The GSAS requirements for doctoral students are typically as follows:

1. Completion of the appropriate number of graduate credits (see §7.1 General Requirements).
2. A language and/or research skills requirement (see §7.5 Language Requirements).
3. Comprehensive examination (see §7.6 Comprehensive Examinations).
7. Presentation of the dissertation to the dean (see §7.8.5 Presentation of the Dissertation to the Dean).

Individual departments and programs may impose additional requirements.

Students who plan to seek an extension to the doctoral time limit must apply before the conclusion of their final academic year. Such a request must be directed in writing through the department chairperson or program director; must be approved by the dissertation mentor, readers, and the department chairperson; and must receive the written approval of the dean. An extension to the time limit for degree completion will be granted only if, in the dean's judgment, there is sufficient evidence that the degree will be completed expeditiously and that the dissertation will be of high merit.

Extensions beyond the time limit will not be granted to students who have not secured approval of a dissertation topic prior to the expiration of the time limit or who have otherwise not made substantial academic progress toward completion of the degree, except with the permission of the dean.

Requests for an extension of the doctoral time limit must include:

- a sufficient portion of the dissertation to permit an objective evaluation of the quality of the student's work. In the humanities,
reasonable portion is one-half of the dissertation; in the sciences, research through the stage of data collection should be presented; • a timetable for the completion of the remaining portions of the dissertation; • a plan for renewed demonstration of language and/or research skills competency (if needed for dissertation research) if more than five years have elapsed since the original completion of these requirements; • a plan to demonstrate currency of knowledge for any courses taken prior to the request for extension (departments may require that students seeking an extension retake certain courses); and • a timetable for retaking and passing the doctoral comprehensive examinations in the department’s or program’s current format if more than five years have elapsed since any portion of the comprehensive examination was completed.

Students must meet any additional requirements imposed by the dean after consultation with the department chairperson or program director, and must maintain continuous enrollment (see §5.1 Continuous Enrollment Policy) until all requirements are complete. Failure to adhere to the timetable or to meet other conditions may result in unenrollment. Students may petition to have one or more of these requirements adapted to their particular situation, but approval of such a petition is not guaranteed.

7.8.1 Doctoral Dissertation
To many scholars, the dissertation is the distinguishing characteristic of the Ph.D. degree, and the quality of the dissertations is a primary hallmark of the quality of a doctoral program. The doctoral dissertation is expected to make a substantial original contribution to knowledge in its field. The dissertation must be a rigorous and sustained piece of research work whose objective is also to demonstrate that the candidate has gained a mastery that qualifies him or her to be admitted to the community of scholars in the discipline.

For style requirements, formatting, and the materials required for the completion of the dissertation, see Appendix F.

GSAS dissertations are disseminated in several ways. Students submit an electronic copy to ProQuest/UMI for electronic publishing. The record is then available through the Walsh Library’s online database collection. In some cases, a bound copy is delivered to the student’s department for inclusion in the department library.

7.8.2 Dissertation Mentor, Committee and Topic
After completing doctoral comprehensive examinations, it is, at all times, the responsibility of the student to establish and maintain a satisfactory relationship with a faculty mentor approved by the chairperson and the dean while preparing a dissertation. Continuation in the doctoral program is contingent upon the approved mentor’s availability and agreement to the dissertation topic.

The membership of a student’s dissertation committee must consist of at least a mentor and two readers, each of whom must a full-time faculty member in the student’s department or program at Fordham. Members of the committee are specified, along with the dissertation topic, on the Dissertation Title Approval Form (available at GSAS Student Resources), which is submitted to the dean’s office by the department chairperson or program director. The department chairperson or program director is responsible for ensuring that the committee is professionally appropriate.

Upon the dean’s approval of a student’s dissertation title and committee, a copy of the Dissertation Title Approval Form is sent to the student. For any changes made to the dissertation title or committee membership, a Revised Dissertation Title Approval Form (available at GSAS Student Resources) must be prepared by the department chairperson or program director, and sent to the dean’s office for approval. Failure to submit revisions to the dissertation title or committee may result in a delay in graduation.

7.8.3 Early Dissemination of Dissertation Materials
Students sometimes have the opportunity to present or publish their scholarly work or ideas from the dissertation before the dissertation is successfully defended and presented to the dean. Upon consultation with their mentors, students are encouraged to take advantage of these opportunities.

Acceptance of part of the dissertation for presentation or publication does not obligate the dissertation committee, the oral examiners, the dean or Fordham University to accept the dissertation as fulfilling the degree requirements.

7.8.4 Dissertation Defense
Doctoral students must defend orally their completed dissertation before an examination committee consisting of the dissertation committee (normally, the dissertation mentor and two readers), and at least one additional examiner, according to departmental procedures. The department or program chairperson is responsible for ensuring that the examination committee is professionally appropriate, and the dean reserves the right to appoint a representative.

Public notification of the examination, including time, place, and examiners must be sent to the dean’s office at least two weeks in advance.

The physical presence of the student at the defense is required: candidates may not defend the dissertation by teleconferencing, Skype, phone, or any other means of distance communication. The physical presence of the dissertation mentor is, likewise, required. Readers and examiners are expected to appear in person at the defense and to sign the Report on Oral Defense Form there, unless excused according to the procedure below. Exceptions to physical presence and signature policy are approved for a reader only in cases such as those of illness or prolonged absence from the University, and require the recommendation of the department and the written permission of the dean. One examiner may participate by distance methods but only if such participation provides expertise that cannot be otherwise obtained. In all, at least three defense committee members, in addition to the candidate, have to be physically present at the exam and no more than one person (reader or examiner) may participate by distance methods. The physical presence of all committee members at the defense remains the objective GSAS strives toward.

Students should note that the presentation of the dissertation to the dean, not the oral examination, is the last requirement to be satisfied for receiving the degree. Thus, degree completion will not be certified until after the presentation of the dissertation.

7.8.5 Presentation of the Dissertation to the Dean
After the oral defense, students must submit the dissertation paperwork, complete the dean’s exit survey, complete the SED survey, and upload
their dissertation to UMI Proquest by the deadline listed on the GSAS Academic Calendar, generally the Friday before the last day of classes for May graduation, or two weeks before the August and February graduations. Exceptions to this date will be granted under only unusual circumstances outside the student’s control and must be requested by the student’s mentor. Dissertations will not be accepted when the University is officially closed.

Dissertations and paperwork will be reviewed in absentia. However, students are invited to meet the dean during the designated time block, when the dean will be available to answer questions, discuss materials and extend congratulations. Students who are unable to meet with the dean in person during the designated time blocks may request a phone call during the time block.

Dissertations submitted to the dean ought to be in their final version, including any changes required by the committee during the oral defense. The following contents ought to comprise the final version of a doctoral dissertation:

- One Dissertation Prepared under the Direction sheet, signed by the mentor and readers.
- The Report on Written Dissertation Form, signed by the mentor and readers.
- The Report on Oral Defense Form, signed by the mentor, readers and up to two examiners.
- The Survey of Earned Doctorates online survey, is available on the National Science Foundation website. After submission, the student and GSAS will receive an email confirmation.
- Proof of online submission of dissertation at UMI ETD administrator, located here.

7.9 Advanced Certificates

All requirements for advanced certificates must be completed within three years of the first semester of matriculation in the GSAS. Time limit requirements apply to both full and part time students.

7.10 Master of Philosophy (M.Phil.)

The M.Phil. degree is considered a second or senior master’s degree and is usually awarded to Ph.D. candidates who have completed the required coursework, language and research skills requirements, and comprehensive examinations, but who have not yet defended a doctoral dissertation.

Students are eligible to receive an M.Phil. under such circumstances in some, but not all, GSAS departments. Most students regard this degree as a step on the way to the Ph.D. Occasionally, it marks the point at which a student reconsidered matriculation in the program, in which case a student may choose earn the M.Phil. and withdraw from GSAS.

In some cases, students may be advised by the department chairperson or program director, in consultation with other faculty, not to continue beyond the M.Phil. if the student’s performance has been marginal or if evidence suggests that they will have particular difficulty completing a successful dissertation. Some departments also have a so-called Low Pass option on the comprehensive exam, which allows the student to receive the M.Phil. degree that does not qualify him or her to progress on to the dissertation stage.

7.11 Degree Conferral and Commencement

Students who have completed all degree requirements in accordance with the guidelines outlined herein and in accordance with their department/program requirements will receive degrees conferred by the University.

Degrees are conferred in February, May, and August on students who have completed their degree requirements in the fall, spring, or summer semesters, respectively.

To graduate, students must complete and submit an Online Application for Graduation via the my.Fordham.edu University portal by the date indicated on the GSAS Academic Calendar. Failure to submit the Online Application for Graduation by the deadline will result in the degree not being awarded in the desired semester, as will failure to complete requirements pending at the time of application for graduation.

Students who miss the deadline for application or fail to complete pending requirements must continue to register and be registered in the semester directly preceding conferral of the degree, according to the continuous enrollment policy (see §5.1 Continuous Enrollment Policy).

Students who receive degrees in August must be registered for the summer session immediately preceding the conferral of their degrees. If a student is not registered for coursework in the summer session, the appropriate registration to use is Requirement Prep in Summer (see §5.1 Continuous Enrollment Policy).

Commencement ceremonies are held each May, and include the University commencement followed by diploma ceremonies for each school. During the GSAS diploma ceremony, diplomas are distributed to both master’s and doctoral degree candidates, and doctoral degree recipients undergo a traditional hooding ceremony as well.

Students who receive their degrees at any time during the preceding academic year are invited to participate. Students who have submitted the Online Application for Graduation on time will receive information at their Fordham email account (see §2.1 Fordham Email) about commencement and about obtaining the proper commencement apparel.

Master’s candidates who are completing the final requirements of their degree in August may request to walk in May prior to their August graduation date. The request must be made to both the department and GSAS by the deadline for May graduation, which can be found on the GSAS academic calendar.

Discipline and Grievances Policies

GSAS students are subject to the provisions outlined in Article Six of the University Statutes: University Code of Conduct, including those related to academic integrity.

9.1 Academic Integrity Standards

Upholding standards of academic integrity is paramount to the pursuit of academic excellence and intellectual growth. It is integral to fulfilling the University’s mission and ensuring the value and reputation of all Fordham graduate degree programs.

GSAS students are members of a community whose research, teaching, learning, and knowledge production are based on academic integrity and the pursuit of scholarly activity in an honest, truthful, and responsible
manner, carried out in conformance with discipline-specific standards as well as relevant University policies.

Violations of academic integrity include, but are not limited to: plagiarism; cheating; falsification; and inappropriate collaboration. Such transgressions undermine the basis of graduate research degrees, and sanctions levied at this level are severe.

GSAS faculty and students are responsible for familiarizing themselves with each of the following violations of academic integrity, which is not intended to be an exhaustive listing:

- **Plagiarism** can be defined as the theft or appropriation of ideas, words, findings, or passages from another that are not common knowledge, for use as one's own and without proper attribution. Plagiarism occurs whether such theft is accidental or deliberate. It can also vary from exact word-for-word duplication to the use of an idea (if not the words), and may involve devices such as paraphrasing without attribution.

- **Cheating** occurs when an individual uses unauthorized or prohibited resources (e.g., cell phones, smart watches, or other similar devices; programmable calculators; copies of prior examinations or assessments) in fulfillment of her/his academic responsibilities or curricular requirements. It may involve misappropriating information from another's examination, test, laboratory report, or data. It may also include permitting the misappropriation of one's own information by another.

- **Falsification** occurs when an individual submits or presents statements that are false and/or mislead others. Inclusions of falsification include, but are not limited to presenting false identification or credentials to obtain admission into a degree program or course; submitting a falsified excuse for an absence or failing to meet a course or program requirement; or manipulating or falsifying data for an academic assignment or degree requirement.

- **Inappropriate Collaboration** occurs when a student engages in expressly prohibited collaboration with others on academic assessments and submits the resulting work as one's own for the purposes of earning academic credit. Faculty are responsible determining what constitutes permissible collaboration, and students should seek guidance and clarification in advance from their professors regarding this issue.

### 9.1.1 Academic Integrity Violation Allegations

Allegations of an academic integrity violation involving a GSAS student shall be reported in writing by the complainant (e.g., faculty member, course instructor) to the student. The details of the allegations should be specific and clearly described.

Following this initial communication, the student and complainant shall arrange to meet in a timely manner to discuss the allegations. Within ten (10) business days following this meeting, the complainant will make a determination as to whether an academic integrity violation occurred and will notify the student in writing of the bases for her/his determination. If the complainant's allegations are disconfirmed, no further action will be taken, and the matter will be deemed closed.

If the complainant's allegations are confirmed, they shall:

1. Assign to the student a failing grade for the course as well as the assessment, comprehensive examination, language examination, thesis, dissertation prospectus, dissertation, and/or other activities linked to the academic integrity violation. **NOTE:** Not every instance of academic integrity violation allegation occurs within the context of a grade. For example, it is possible for the context to include a non-gradable assignment (e.g., a draft assignment). In such cases, an appropriate sanction will be levied relative to the nature of the assignment.

2. Recommend that the student contact the GSAS Assistant Dean at adgsas@fordham.edu, who will serve as a facilitator and impartial advocate for the process to ensure continuity of policy application.

3. Report the incident in writing to the Department Chair or Program Director and the GSAS Dean for further adjudication.

Unless the student elects to appeal the complainant's determination in accordance with the procedures outlined in §9.1.2 below, the GSAS Dean will initiate an investigation to determine the nature and seriousness of the incident, and apply appropriate additional sanctions, normally suspension or expulsion. The method for conducting the investigation will be at the GSAS Dean's discretion.

**NOTE:** GSAS graduate students serving as instructors of record (e.g., Teaching Associates, Teaching Fellows, Senior or Distinguished Teaching Fellows) for the undergraduate body should refer to the Student Handbook and its policies on academic integrity if a violation involving an undergraduate student is suspected. Please refer to the Undergraduate Academic Integrity Policy for academic integrity violation incidents involving undergraduates.

### 9.1.2 Appealing an Academic Integrity Violation Determination

If a student believes the determination reached by the complainant to be flawed or incorrect, they may request in writing, within ten (10) business days of the receipt of said determination, a review by the Department Chair or Program Director.

The Department Chair or Program Director shall review the student's appeal in a timely manner and make a determination as to whether there is sufficient evidence to validate the original allegations. In situations where the complainant is also serving in either of these administrative roles, they will nominate or otherwise provide a qualified faculty member to carry out the review. Additional information may also be requested from the complainant and/or the student if necessary. Within ten (10) business days following the completion of the review, the basis for determination shall be communicated to the student in writing to the complainant and the student.

In cases where the Department Chair, Program Director, or Faculty Reviewer's determination supports the student's appeal:

- all necessary adjustments will be made to the student's grade, no further action will be taken, and the appeal will be deemed closed.

In cases where Department Chair, Program Director, or Faculty Reviewer's determination upholds the original allegations:

- the failing grade for the course as well as the assessment, comprehensive examination, language examination, thesis, dissertation prospectus, dissertation, and/or other activities linked to the academic integrity violation will stand; and

- the Department Chair or Program Director shall report that the department or program level appeal upheld the allegations; and shall provide all necessary documentation to the GSAS Dean for
further adjudication and to apply subsequent appropriate additional sanctions, normally suspension or expulsion.

If the student is not satisfied with the determination communicated by the Department Chair or Program Director, they may submit a written request within ten (10) days of the receipt of said determination, to the GSAS Dean for a final review of the allegations.

Upon receipt of written request, the GSAS Dean shall invite two current (or, if necessary, former) members of the Academic Affairs Subcommittee to undertake a timely, final investigation and review of the case. The Subcommittee Investigators will be provided with all relevant information and may request additional information from the complainant, Department Chair, Program Director, and/or the student if necessary. The Subcommittee Investigators will communicate in writing their determination in a timely fashion, to the complainant, Department Chair or Program Director, and the student, with a copy to the GSAS Dean.

If the determination reached by the Academic Affairs Subcommittee Investigators supports the student’s appeal:

- all necessary adjustments will be made to the student’s grade, no further action will be taken, and the appeal will be deemed closed.

If the determination reached by the Academic Affairs Subcommittee Investigators upholds the original allegations:

- the failing grade for the course as well as the assessment, comprehensive examination, language examination, thesis, dissertation prospectus, dissertation, and/or other activities linked to the academic integrity violation will stand;
- the Academic Affairs Subcommittee Investigators will address the nature and seriousness of the incident and issue a written recommendation to the GSAS Dean regarding subsequent appropriate academic sanction(s) to be taken, normally suspension or expulsion; and
- the GSAS Dean shall review the Subcommittee Investigators’ recommendation; render her/his decision regarding appropriate academic sanction(s) to be taken; and will notify the student in writing in a timely fashion of her/his decision, which is not subject to further appeal.

NOTE: It may be necessary to make adjustments to the timing of the procedures described in §9.1.1 and §9.1.2 if an alleged academic integrity violation occurs or is reported outside of or in close proximity to the commencement or conclusion of the normal academic semester (e.g., summer, holiday, or vacation periods). In such instances, all relevant parties shall be notified and every effort will be made to ensure that the process proceeds in a timely and efficient manner.

9.2 Department of Psychology

The Department of Psychology abides by the Ethical Principles of Psychologists and Code of Conduct of the American Psychological Association. All faculty and students of the department are expected to be familiar with and comply fully with the principles and code. Students are obligated to seek guidance from the Department Chair or Program Director when necessary to assure their full compliance.

9.3 Nonacademic Discipline

GSAS students are expected to abide by the University Code of Conduct and to follow the applicable rules and regulations as detailed in the Student Handbook, issued by the Office of Student Life, excepting where undergraduate policies directly contradict Graduate School of Arts and Sciences policy. In that case, the graduate policy should be followed.

9.4 Sexual Misconduct Policy and Procedures

9.4.1 Sexual Misconduct Policy

The Graduate School of Arts and Sciences upholds University policy concerning all matters relating to sexual misconduct. All GSAS students shall familiarize themselves with the policy, which includes University procedures for reporting, investigating, and resolving instances of:

- Sex and gender discrimination
- Limitations on consensual relationships
- Sexual harassment
- Rape/sexual abuse
- Sexual exploitation and other sexual misconduct
- Forcible touching
- Stalking
- Dating and domestic violence
- Intimidation and retaliation for reporting

The Fordham Community to which the Sexual Misconduct Policy and Procedures applies includes all students, employees (including faculty), visitors or third parties, and applicants for admission or employment. A third party is someone who is on campus or participating in a Fordham sponsored program, activity, or event.

As noted in Section III of the Sexual Misconduct Policy and Procedures, the policy applies to conduct that takes place on campus, off campus, and at Fordham University-sponsored programs or events, including Fordham University-sponsored study abroad programs or Fordham University academic, learning, and service programs located at off-campus sites. It also covers conduct that takes place off-campus that occurs in the context of an education program or activity of the University as well as conduct that takes place off-campus that has a continuing effect on campus or in an off-campus education program or activity.

9.4.1.1 Limitations on Consensual Relationships

Section VI of the Sexual Misconduct Policy and Procedures states that anyone with supervisory, evaluative, or mentoring authority who controls or influences another person’s employment, academic advancement, extracurricular or athletic team participation, scholarship or financial support, grades, recommendations, wage status, or promotion at the University is prohibited from having a romantic or sexual relationship with that person, regardless of consent.

This prohibition applies to romantic or sexual relationships between GSAS students and their faculty mentors, instructors of record for courses or tutorials in which a GSAS student is enrolled, Directors of Graduate Studies, Department Chairs, Program Directors, and/or any faculty member whose role and/or authority reflects the above-listed criteria.

Faculty, employees, and staff are prohibited from having a romantic or sexual relationship with any undergraduate student, regardless of whether the faculty, employee, or staff member currently exercises or expects to have any pedagogical or supervisory responsibility over the student. For the purposes of this policy, if a graduate student teaches courses to any undergraduate students for a semester, then starting that semester in which the graduate student begins to teach undergraduate
students that graduate student is prohibited from having a romantic or sexual relationship with any undergraduate student. This policy rule applies to that graduate student for as long as that student is enrolled at the University, even if that graduate student is no longer instructing undergraduates.

If anyone is promoted into a position or has a change of circumstances that results in a conflict with this policy limiting consensual relationships, this information must be reported by the faculty, employee, or staff member to a supervisor, a vice president, or the executive director of human resources, who will contact the Title IX coordinator for assistance in resolving the conflict.

9.4.2 Sexual Misconduct Procedures

The University responds to all sexual offenses, stalking, and domestic or dating violence incidents with a trained response team that includes, but is not necessary limited to: staff representing the Department of Public Safety; the Office of Institutional Equity and Compliance; the Office of Student Life (including the Office of Residential Life); the University Health Services; Counseling and Psychological Services; and off-campus resources as needed.

The University encourages all members of the community to report incidents of sexual misconduct. The purpose of reporting is so any victim of any sexual discrimination, sexual misconduct or sexual violence is properly supported by the University and the University can make efforts to stop the discrimination, prevent it from recurring, and remedy the effects.

In addition to the provisions below, please refer to Section VII of the Sexual Misconduct Policy and Procedures for additional details concerning Reporting, Privacy, and Confidentiality. Additional helpful information can be found in the Office of Student Life’s Campus Assault and Relationship Education (CARE) FAQ.

9.4.2.1 Mandatory reporting

Select members of the University community are considered mandatory reporters of alleged or actual sexual misconduct incidents. These individuals include anyone who has the authority to redress sexual misconduct, who has a duty to report incidents of sexual misconduct, or who a student could reasonably believe has this authority or duty.

GSAS students assigned to and serving in a role that carries with it supervisory and/or leadership authority to Fordham students in a University classroom, laboratory, or non-University setting, including but not limited to Graduate Teaching Assistants, Teaching Associates, Teaching Fellows, Senior or Distinguished Teaching Fellows, and/or Lab Assistants, are considered to be mandatory reporters.

Mandatory reporters, as responsible employees, must report all relevant details about any learned incident of alleged or actual sexual misconduct. When a mandatory reporter is either told, observes, obtains knowledge, learns of, or reasonably suspects that another member of the Fordham community is a victim/survivor of sexual misconduct, they shall report as soon as is reasonably possible to the Title IX Coordinator, the Dean of Students (either at Rose Hill or Lincoln Center), or the Department of Public Safety to ensure the victim/survivor is provided with Notification of Rights at the time of first disclosure.

Note: Professional counselors and pastoral counselors working as such within University support units including, but not limited to, Counseling and Psychological Services or Campus Ministry, and whose official responsibilities include providing mental health counseling to University students, including those who act in that role under the supervision of a professional counselor, and University Health Services medical providers, are exempt from Mandatory Reporting requirements. GSAS students who may be serving in any of these roles, or while performing internship/externship requirements, should be guided by the principles and codes of that office and their professional supervisor.

If you are unsure whether or not you are mandated to report an alleged or actual incident of sexual misconduct, please contact the Title IX Coordinator or Deputy Title IX Coordinators, during business hours; or the Department of Public Safety at any time, day or night (24/7, 365 days of the year), in person or by telephone (718-817-2222), and/or through the confidential online reporting system. Representatives will assist you in determining the proper course of action.

9.4.2.2 Complaints

Complaints related to alleged or actual sexual misconduct by a student against faculty, staff, or third parties should be brought to the Title IX Coordinator or to the Human Resources Department, during business hours, or to the Department of Public Safety at any time, day or night (24/7, 365 days a year), in person or by telephone (718-817-2222), and/or through the confidential online reporting system.

Complaints related to alleged or actual sexual misconduct made by students against other students (students include full-time, part-time, undergraduate, graduate or non-matriculated students) should be brought to the Dean of Students, during business hours, for the campus at which the student is enrolled; or brought to the Department of Public Safety at any time, day or night (24/7, 365 days a year), by telephone (718-817-2222), and/or through the confidential online reporting system.

Please refer to Section VII and Section VIII of the Sexual Misconduct Policy and Procedures for additional details concerning both reporting, privacy, confidentiality, and procedures involving complaints by students against faculty, staff, or third parties; and/or by students against other students.

9.4.2.3 Privacy and Confidentiality

The University maintains provisional arrangements for students who wish to speak with a confidential resource and/or not report an alleged or actual sexual misconduct violation to either the Title IX Coordinator, the Department of Public Safety, or the Deans of Students.

These confidential resources include professional counselors in Counseling and Psychological Services, pastoral counselors in the Office of Campus Ministry, and medical providers in University Health Services. Only officials in these support units can accommodate requests for confidentiality.

It is important to note that confidential counselors in these offices will not be able to directly provide other accommodations and support that the Title IX Coordinator, Department of Public Safety, and/or the Deans of Students can arrange (i.e., changes in living, transportation, or working accommodations).

Off-campus confidential resources are also available to students seeking to report an alleged or actual sexual misconduct violation. Please refer to Section VII of the Sexual Misconduct Policy and Procedures for more details.

While representatives from University offices and support units are unable to guarantee confidentiality, they will maintain your privacy to the greatest extent possible. Any information provided to a non-confidential
course will be relayed only as necessary for the Title IX Coordinator, Department of Public Safety, Deans of Students, or their designees, to investigate and/or seek a resolution.

The Family Educational Rights and Privacy Act (FERPA) allows a University to share information with an individual's parents if there is a health or safety emergency or if the individual is listed as a dependent on either parent’s prior year federal tax income form. However, the University will generally not share information about a report of domestic violence, dating violence, stalking, or sexual assault with parents without the reporting individual’s permission.

9.5 Discrimination-Based Grievance Policy and Procedures

9.5.1 Policy

Fordham University protects the right of each student to be free from discrimination on the basis of race, color, creed, age, gender, national origin, marital or parental status, sexual orientation, alienage or citizenship status, veteran status, or disability.

The Director of Institutional Equity and Compliance is the University’s compliance officer for all forms of discrimination and is specifically designated as the University’s 504 Compliance Officer and Title IX Coordinator.

The Title IX Coordinator is responsible for the University’s Title IX compliance efforts and coordinating the University’s response to all complaints involving possible sex discrimination, including educational programs, gender equity in athletics, employment, and admission. This also includes all forms of discrimination, limitations on consensual relationships, sex and gender discrimination, sexual harassment, sexual assault/rape, exploitation and other sexual misconduct, stalking, dating and domestic violence, and intimidation and retaliation for filing such complaints.

Please contact the Title IX Coordinator with any additional questions or concerns:

Kareem Peat
Title IX Coordinator
Cunniffe House, Room 114
Rose Hill Campus 718-817-3112
kpeat@fordham.edu

9.5.2 Procedures

The following grievance procedures, drawn from resources made available by the University’s Institutional Equity and Compliance Office, are applicable to all GSAS students (matriculated and non-matriculated) who believe they have been discriminated against with respect to participation in, access to, or benefits of any academic program or activity within the Graduate School of Arts and Sciences.

For incidents involving alleged or actual sexual misconduct violations, please refer to §9.4 Sexual Misconduct Policy and Procedures.

Please note: Individuals who are concerned for their physical safety or are uncertain who to contact in response to a discrimination-based conflict, complaint, or concern should contact the Department of Public Safety, any time day or night (24/7, 365 days of the year), in person or by telephone (718-817-2222), and/or through the confidential online reporting system.

Where the following provisions may be found ineffective or insufficient, students may file a formal complaint with the University through the Title IX Coordinator. However, if the incident requiring resolution involves physical violence, or a student wishes for other reasons not to proceed with Steps I and II below, they may immediately proceed to Step III.

Step I: Individual

Inform directly the individual (e.g. faculty member, instructor, student, staff) you believe to be responsible of the inappropriate or discriminatory nature of her/his action or behavior, and request cessation of the behavior.

Step II: Department/Program or School

If the action or behavior continues or otherwise escalates, you may convey your concern to a supervisor or other individual with supervisory authority within your department or program (e.g., Department Chair, Program Director, Director of Graduate Studies, Graduate Assistant Supervisor, faculty mentor). The supervisory authority within your department or program should make every attempt to mediate and resolve the incident effectively and expeditiously.

If the grievance relates to an action taken by or behavior of a supervisory authority within your department or program (e.g., Department Chair, Program Director, Director of Graduate Studies, Graduate Assistant supervisor, faculty mentor), you may notify directly a GSAS representative (e.g., GSAS Dean, GSAS Assistant Dean). GSAS will work with the complainant and the supervisory authority to mediate and resolve the incident effectively and expeditiously.

If a discrimination-based conflict, complaint, or concern is conveyed to a Department and/or Program administrator, they are strongly encouraged to inform the GSAS Assistant Dean of Student Professional Development, who is available to serve as student advocate; facilitate collaboration between the department or program, the Office of Institutional Equity and Compliance, and/or the Office of Student Life; and support appropriately all parties.

Step III: University

If Steps I and/or II are found ineffective or insufficient to resolve a discrimination-based conflict, complaint, or concern, a student may file a formal Discrimination Complaint through the Office of Institutional Equity and Compliance, either in person or using the Discrimination Complaint and Intake Form.

9.5.3 Confidentiality

Except when directed by federal or state law, court order, or government tribunal of competent jurisdiction, all those involved in these grievance procedures shall treat as confidential all information disclosed during the procedures, as well as the fact of occurrence of the procedure and result thereof, except as otherwise provided in this process.

Enrollment and Registration

Enrollment Policies and Procedures

Continuous Enrollment Policy

The Graduate School of Arts and Sciences adheres to a continuous enrollment policy, which means that students must register every fall and
spring semester until graduation in order to remain matriculated in their respective M.A., M.S., M.F.A., Ph.D. and certificate programs. Master’s, doctoral, and certificate students intending to graduate in August must register for the summer prior to graduation if not otherwise registered for coursework in order to maintain continuous enrollment. The appropriate registration for the latter is called Requirement Prep in Summer (see Registration Procedures and Special Categories).

Students are considered registered when they are enrolled in coursework, registered for comprehensive exams or preparation, registered for thesis or dissertation-related activities (e.g., proposal development, proposal acceptance, or dissertation direction), or when registered for Maintenance of Matriculation. The only exception to the requirement of continuous enrollment is when a student has been granted an approved leave of absence (see Leave of Absence).

Non-Registration
Matriculated students who are not on an approved leave of absence and who do not register for two consecutive semesters are automatically dropped from the rolls of GSAS without notice.

Students who have been dismissed due to non-registration and who wish to continue their education at GSAS must apply for readmission by submitting an online application, must secure the approval of their department chairperson or program director, and must receive the approval of the dean. Readmission is not guaranteed.

Maintenance of Matriculation
Students may register for Maintenance of Matriculation to retain continuous enrollment at GSAS while away from the University and/or not using University resources, including both faculty and facilities (e.g., library, laboratories, computing technology, online research platforms), and is typically used when a student chooses to spend time away from the University (e.g., in order to take advantage of an employment opportunity).

Time spent registered under Maintenance of Matriculation is counted toward a student’s time limit for the completion of her/his degree, and is charged to the student as a 0.5 credit fee. Students who are registered for Maintenance of Matriculation may not be certified as full time (see Full-Time Status Certification (p. 828)).

Maintenance of Matriculation may not be used while a student is in the process of preparing a requirement: for example, when studying in preparation for the comprehensive exams or when completing a dissertation during the summer prior to graduation. In these cases, Requirement Prep or Requirement Prep in Summer should be used.

Leave of Absence
Students who encounter circumstances that prevent their continuous enrollment may request a leave of absence through their department chairperson or program director. A leave of absence is typically granted only for extraordinary personal reasons outside the student’s control that prevent involvement in graduate studies (e.g., serious medical problems). For occasions such as outside employment opportunities, students should instead register for Maintenance of Matriculation.

A leave of absence will not normally be granted for more than one year, but under extraordinary circumstances may be extended for up to one additional year. A leave greater than two academic years will be considered only when the time period requested is inherent to the activity (e.g., a three-year term of active military duty) and must be stated at the time of the request.

Time spent on a leave of absence counts toward time limits for the completion of a degree, and will therefore not be granted to students whose time limits expire during the period of their leave. If a student requests a leave of absence as a result of being called to active military duty, time spent on leave does not count toward time limits.

Students on academic probation may be granted a leave of absence only on the condition that they correct their academic difficulties during the semester of their return to the University. Departments may recommend additional conditions for a leave of absence whenever a student is on academic probation.

When requesting a leave of absence, students should complete the appropriate Leave of Absence Form, located on the GSAS Student Resources web page, and specify the reason and the time period involved.

Students requesting a medical leave of absence should complete the appropriate Leave of Absence Form, and include a doctor’s note indicating they are under a doctor’s care. Departments will forward the request, and its recommendation, to the dean, who will grant, deny, or modify the recommendation. If the request is approved, the dean will inform the student, the department chairperson, the program director, the Office of Enrollment Services, and the University Reentry team (for medical leaves). The student will then be administratively registered for Leave of Absence. There is no charge for this registration.

Students on a medical leave of absence may be required to complete the University reentry process prior to their return and should familiarize themselves with the deadlines and procedures noted on the University Reentry webpage.

Withdrawal
Students in good standing may voluntarily withdraw from the University by completing the University Withdrawal form published on the GSAS Student Resources web page. Students should send the completed form to their department or program; the department or program will then forward it to GSAS for approval.

A student who has withdrawn voluntarily who wishes to be reinstated in the graduate school must apply for readmission. Readmission is not guaranteed.

Readmission
Students dismissed for failure to make satisfactory academic progress or to maintain satisfactory academic performance (see §7.4), for failure of comprehensive exams (see §7.6), or for an academic integrity violation may not reapply.

Students who have withdrawn voluntarily may apply for readmission by submitting an online admission application. In addition, they should direct their inquiries to the department chair or program director; however, the decision to readmit is a prerogative of the dean.

Readmitted students must meet the current norms of the department, and they must include a plan of study (including a timetable) to meet the program’s current requirements as a part of their application. Additional conditions for readmission may be imposed by the dean in consultation with the department chairperson or program director and/or may follow from policies found elsewhere in this guidebook.
If a student intends to use any courses, examinations, or requirements from her/his original matriculation as contribution towards these requirements, the time limits from their prior matriculation will apply (see §7.3 Time Limit on Completion of Degree). If they are unable to fulfill the requirements for graduation within these original time limits, a request for an extension must be included at the time of reapplication for admission.

**Full-Time Status Certification**

To be certified as full time, students must be registered for their program’s full-time equivalent each semester (see Appendix D for full time equivalency by program).

With the recommendation of the department or program, students taking less than the full-time equivalent of coursework may be certified as full time by virtue of registration for other statuses which qualify as meeting, partially or fully, the requirements for full-time certification. For example, a student who is in the process of studying for comprehensive exams or who is serving as a teaching fellow will typically qualify as full time. Students who wish to be certified as full time while not enrolled in the full-time equivalent of coursework must complete the Maticulated Student Status Certification form available at GSAS Student Resources web page. The granting of full-time status is not guaranteed.

Students engaged in dissertation research who wish to be considered full time must enroll in either Dissertation Mentoring or Dissertation Direction, be certified by their mentor as working full time on a dissertation, and not be employed outside the University more than 10 hours per week.

All students receiving funding or tuition scholarships from the University must be full-time students, and they may forfeit their future eligibility for funding if they fail to maintain full-time status while continuing to receive funding. Students who are registered for Maintenance of Matriculation or who are on academic probation for any reason may not be certified as full time. The only exception to this full-time requirement is the Ricci Tuition Scholarship, which is available to part-time students in the International Political Economy and Development (IPED) program, and the Mayor’s Scholarship, which is available to City of New York employees.

Students should be aware that less than full-time status affects eligibility for GSAS funding, while less than half-time status affects eligibility for federal funding and for deferment of past federal student loans. Please refer to the University Financial Aid Office page for more information.

**Registration Procedures and Special Categories**

Registration materials are provided by the Office of Enrollment Services. Dates for registration are published on the GSAS Academic Calendar as well as on the my.Fordham.edu University portal, under the student tab.

Course listings for each department can be found at the top of the home page of my.Fordham.edu.

Students should consult with their department or program adviser in planning their course of study. An advising hold is placed on all students each semester until the department or program adviser approves course selections, at which time the department or program adviser removes the hold and students are able to complete registration via the my.Fordham.edu University portal.

It is the student's responsibility to bring any questions they may have about the registration process to the department or program.

Failure to register during the proper registration periods (usually late in the preceding semester) can result in miscalculation of funding or tuition scholarships, ineligibility for student housing and loans, and/or cancellation of courses due to low enrollment. Students are encouraged to complete their registration before final exams of the semester preceding the semester for which they are registering and according to the registration deadline noted on the GSAS Academic Calendar. Students who register late will be charged a late registration fee.

**Registration Process for Master’s Students**

Certain master’s programs require students to pass comprehensive examinations as part of their degree requirements. Students must register for Requirement Prep if they are studying for comprehensive examinations during semesters in which they are not enrolled in coursework or actually taking comprehensive examinations. Students are not required to register for Requirement Prep if they are studying for comprehensive examinations while registered under any other status, or if enrolled in coursework while studying.

Master’s students working on a master’s research paper, project, or thesis during a fall or spring semester must register for Requirement Prep or an equivalent status established for this purpose, according to their program guidelines. If such work is carried out during the summer, students register for Requirement Prep in Summer or the equivalent, according to program guidelines.

Biology students engaged in master’s-level research register for BISC 6999 Research for M.S. in Biological Sciences.

**Registration Process for Comprehensive Examinations and Beyond for Doctoral Students (Except Biology)**

Doctoral students who have finished coursework must register for a series of statuses during the process of taking comprehensive examinations, developing a dissertation proposal, and completing dissertation research. Credits associated with these registrations do not count toward the total number of credits required for graduation. The prefix for these registrations is in all cases that of the student’s department or program:

- XXXX 0912 Requirement Prep (fee equivalent of 1 credit)
- XXXX 0914 Requirement Prep in Summer (fee equivalent of .5 credit)
- XXXX 0930 Doctoral Comprehensive (fee equivalent of 1 credit)
- XXXX 0950 Proposal Development (fee equivalent of 1 credit)
- XXXX 0960 Proposal Acceptance (fee equivalent of 3 credits)
- XXXX 0970 Dissertation Mentoring (fee equivalent of 3 credits)
- XXXX 9999 Dissertation Direction (fee equivalent of 1 credit)
- XXXX 0910 Maintenance of Matriculation (fee equivalent of .5 credit)

**STEP I: Requirement Prep and Doctoral Comprehensive**

Doctoral students are required to take and pass a comprehensive examination within two semesters of completing coursework. If the student does not pass the comprehensive examination within four semesters after completing coursework, the student may be dismissed from the program. If the student fails doctoral comprehensive examinations twice, the second failure is considered final and the student is dismissed from the program.

Students who are studying for comprehensive examinations while still completing coursework do not need to register for any special status; however, if they are neither registered for coursework nor taking
comprehensive examinations during the semester in question, they must register for Requirement Prep.

During the semester in which comprehensive examinations are actually taken, students will register for Requirement Prep. Once the grade has been approved by the dean, GSAS will change the Requirement Prep registration to Doctoral Comprehensive.

Students who fail the comprehensive exam must register for Doctoral Comprehensive again in the semester in which the examination is actually retaken. If the student wishes to study for a full semester in preparation for the exam, they should register for Requirement Prep. The fees for these repeat registrations are the same as they are for first-time candidates.

**STEP II: Proposal Development and Proposal Acceptance**

After passing the comprehensive examination, students have up to two semesters to develop a dissertation proposal and have it approved by the department or program. Students may be dismissed for failure to make academic progress if their proposal is not approved within four semesters, and they will automatically be placed on academic probation if proposal approval is not secured at least five semesters before the close of degree time limits (see §7.4 GSAS Standards for Satisfactory Academic Performance and Satisfactory Academic Progress; Federal Satisfactory Academic Progress (SAP)).

Immediately after passing the comprehensive examination, students must register for Proposal Development. They are required to register for Proposal Development each semester until the proposal is approved by the department or program.

During the semester in which the student’s proposal is accepted, and when a Dissertation Title Approval form is approved by the dean, the dean’s office changes the student’s registration from Proposal Development to Proposal Acceptance. Proposal Development is then dropped, and students are charged only for the three credits of Proposal Acceptance.

**STEP III: Dissertation Mentoring and Dissertation Direction**

Following the acceptance of a dissertation proposal, students begin the process of dissertation research and composition under the guidance of a mentor.

For all departments other than Psychology, during the first semester after Proposal Acceptance students are automatically registered for Dissertation Mentoring. After one semester of Dissertation Mentoring, students must register for Dissertation Direction. They must continue to do so each fall and spring semester up to and including the fall or spring semester in which the oral defense of the dissertation is completed. Students defending their dissertation during the summer will be registered for Dissertation Defense by GSAS upon receipt of the defense notification.

For the Psychology Department, students register for Dissertation Direction the semester after the proposal has been accepted and every semester until their progress report meeting. At that time, Dissertation Direction is changed to Dissertation Mentoring.

**STEP IV: Dissertation Presentation and Graduation**

If, after completing the oral defense, additional registrations are required in order to maintain continuous enrollment before the dissertation can be presented to the dean, students must register for Dissertation Direction during the fall or spring semester. Students defending their dissertation during the summer will be registered for Dissertation Defense by GSAS upon receipt of the defense notification. Students requiring additional registrations before presenting a dissertation should not register for Maintenance of Matriculation.

**Maintenance of Matriculation**

Students who are away from the University without an approved leave of absence must register for Maintenance of Matriculation. This registration may not be used when the student is using University resources (for example, consulting faculty or using Fordham’s technological resources and/or the library).

**Registration Process for Comprehensive Examinations and Beyond for Doctoral Students in Biology**

Students in biology are required to consult the department chair or program director prior to any registration. Students who have completed coursework must register for BISC 7999 Research for Ph.D. in Biological Sciences, and must continue to register for BISC 7999 until the required number of research credits (30 for the direct Ph.D. or 12 for the Ph.D. with a prior M.S.) is completed. Biology students must register for BISC 0930 PhD Comprehensive Examination-Biology during the semester in which they take the comprehensive exam, which may be done either while they are completing their research credits or after they have been completed.

Students should take their doctoral comprehensive examinations and have their dissertation proposal accepted within eight semesters of completing coursework. The dean’s office will register students for BISC 0960 Proposal Acceptance for the semester in which their doctoral comprehensive exam has been passed and the dissertation proposal is successfully completed. This means that in certain cases, students will be registered for both BISC 0930 PhD Comprehensive Examination-Biology and BISC 0960 Proposal Acceptance in the same semester. The dean’s office will register students for BISC 0970 Dissertation Mentoring-Biological Sciences in the following semester. In subsequent semesters, students should register for Dissertation Direction until their dissertation oral defense has been passed.

**Registration Changes**

With departmental or program approval, and in accordance with dates specified in the GSAS Academic Calendar, students may add, drop, or change the grade-type of courses without incurring the grade of W (Withdrawal). After that date, students may add courses only by permission of the instructor and department and with the consent of the dean. Students wishing to add or drop a class should contact their department to complete the necessary procedures.

After the appropriate approvals are obtained, the Add/Drop Form will be submitted directly to the Office of Academic Records and the schedule changes will be made. Note that dropping a course may affect federal loan eligibility, and part of received loan monies may have to be returned if the cost of attendance is reduced.

Students will not be permitted to drop courses after the add/drop deadline, and they will instead incur a grade of W (Withdrawal) if they opt to remove themselves from a course. Please note that this policy applies even in cases where withdrawal is made necessary for medical reasons, and that students withdrawing from courses remain responsible for tuition and fees according to the University Institutional Refund Policy.

Students will incur a grade of WF (Withdrawal Fail) if they withdraw from courses after the date specified in the GSAS Academic Calendar (approximately one week before the last final examination of the semester).
Tutorials

Matriculated students in good academic standing who have completed at least eight credits of coursework or the equivalent may register for a tutorial to supplement regularly scheduled courses. Tutorials are not normally approved for students on academic probation. Students must complete the Graduate Tutorial Request form (available at GSAS Student Resources) and obtain approval of the instructor, department chairperson, and the dean. Tutorial request forms are submitted to enrollment services upon approval to complete the registration process.

Tutorials supervised by a faculty member outside of the student's home department or to a student in an interdisciplinary program require approval by the appropriate department chairpersons or program directors. Tutorials are not normally approved where substantial overlap occurs with a current GSAS course offering, and these tutorials may substitute for required courses only in exceptional circumstances. A request for substitution must be stated on the Tutorial Request Form, and a separate, written rationale for the substitution must accompany the form. Only in exceptional cases will students be allowed to register for more than one tutorial per semester.

Audits of Non-Language Courses

Students who audit courses are not required to take the final examination, prepare class assignments, or write term papers. No letter grade is given, but the transcript shows Audit for the course unless the instructor rules that the Audit is not warranted on the basis of attendance. In such a case, the course will not appear on the student's transcript.

Doctoral candidates who have completed the coursework required for their degree and who are registered for proposal development or dissertation direction may audit one course each semester without charge, with approval of the dean. Department advisers may require that such courses be taken for credit if deemed important to the student's academic development.

Some courses (e.g., laboratory or seminar courses) are not open for auditing.

Students registered for a credit-bearing course may change their status to that of an auditor with the written approval of the department chairperson or program director and the dean, in accordance with GSAS Academic Calendar deadlines. Students who do not change their status to that of an auditor and are absent from the final examination without a satisfactory reason will receive an ABS for the course. Unless the ABS grade is changed to a letter grade by the deadline specified in the GSAS Academic Calendar, it is automatically changed to F.

In no case will an audit course be changed into a credit course after the last day for adding courses, as defined in the GSAS Academic Calendar.

Students who audit courses must pay full tuition for them. Students may make a special request to the dean to use University tuition scholarships to cover tuition for audited courses, but such requests are very rarely granted.

The University extends the privilege of auditing courses to scholars with Ph.D. degrees from Fordham and other universities. Applications for audits by scholars outside the University should be made by submitting a Non-Matriculated Application through the GSAS Admissions Department, who will then obtain the dean's approval. There will be a charge of approximately $404 for general and technology fees. If an individual wishes to receive credit for the course, they must pay related fees and tuition for course credit.

GSAS Zero-Credit Undergraduate Language Study

GSAS students in good standing may request permission to register in an undergraduate language course offered by the Department of Modern Languages or Classics Department in the fall or spring semesters (summer courses are not currently covered by this policy). GSAS registrants will be accommodated only after all undergraduates have been placed into courses, and they will be allowed to register only with permission of the instructor. GSAS students may be asked to take a placement test before being assigned to a section. No language course with more than 15 undergraduate students will accommodate GSAS registrants, and no more than 20 GSAS students will be accepted in any given semester. If there are more applicants than seats available, priority will be given to students who need language skills to complete degree requirements, such as dissertation research or language exams (the latter applies only to languages other than French and German, since these languages offer graduate reading courses specifically designed with this goal in mind). GSAS students will complete all course requirements, including written work, exams, and daily class preparation. Students' work will be graded SAT/UNSAT, and they will sign an agreement indicating that they will complete these tasks.

GSAS students are charged only a $100 language fee per semester for these 0-credit registrations; the fee is not covered by any GSAS tuition scholarships or award. Interested students should submit the 0-Credit Language Study Application (available at GSAS Student Resources).

Undergraduates in Graduate Courses

Undergraduate seniors with an adequate grade point average are allowed to register in the Graduate School of Arts and Sciences for 5000-level courses.

In some programs, permission of the department chairperson or program director is required for enrollment. Students should contact the chairperson or program director for information about how to register for 5000-level graduate courses. Undergraduate registration in 6000-level courses is not normally approved.

Graduates in Undergraduate Courses

Graduate students may not take undergraduate courses for graduate credit. Occasionally, undergraduate courses may be taken to meet language requirements (see §7.5 Language Requirements), but these credits do not count toward coursework requirements.

Graduate students may, in some circumstances, attend undergraduate courses as part of a tutorial, but they must register for a graduate-level tutorial (see §5.3.5 Tutorials) and complete graduate-level work, as determined by the course instructor.

Intercampus Registration

Students who wish to register for courses offered by Fordham graduate schools (Graduate School of Education (GSE); Graduate School of Religion and Religious Education (GRE); Graduate School of Social Service (GSS); Gabelli, and the Fordham School of Law) can do so without special authorization from GSAS. Permission from the department or program, however, is still required, and students should consult with their departmental adviser before registering for classes at other Fordham graduate schools for clarification on the application of any credits awarded to their degree.

Students who wish to register for graduate-level courses offered by Fordham graduate schools must obtain written permission from their program director and forward the permission to the appropriate assistant dean at the intercampus school for registration approval and processing.
Consortium: Inter-University Doctoral Consortium (IUDC)

Students who wish to register for courses through the Inter-University Doctoral Consortium (IUDC) must be matriculated in a GSAS doctoral program and must have completed at least one year of full-time doctoral study before taking a consortium course.

Typically, graduate students may take only one consortium course each semester and departments have the right to limit the type of courses and total number of credits taken through the consortium. Other participating universities may place additional restrictions on consortium enrollment. Courses may not be taken through the consortium in the summer.

For consortium courses, grading follows the system of the host institution and grades earned for consortium courses are not calculated into a student’s GSAS cumulative GPA (see §6 Grades). Upon completion of consortium courses, students must obtain an official record of their grades and submit them to the dean’s office; failure to do so may result in not receiving credit for the course.

Deadlines for making Consortium course changes (e.g., add, drop, or changes of grade type) are governed by both the GSAS Academic Calendar as well as host institution deadlines.

To register for consortium courses, students must use the IUDC Registration Form (available at GSAS Student Resources) and obtain all necessary signatures. It is then the student’s responsibility to return a copy of the signed form to the dean’s office. Upon approval, students will be registered for Consortium Registration. Audits are normally not approved for IUDC courses.

Students pay Fordham tuition for consortium courses; these charges are included in the regular bursar bill.

Refunds

The refund of tuition and fee payments, or the cancellation of charges incurred for tuition, fees, or housing are based on schedules issued by enrollment services and published on the Fordham Admissions and Financial Aid website. The fee schedule is based on University policy and is not within the purview of any department or program, or of the dean’s office.

Amounts refunded or canceled are based on the date of withdrawal from courses or other registrations. If students have evidence that withdrawal from a course occurred on a date different from that indicated in official University records, the student may contest the official charges by writing to the dean’s office.

Funding and Tuition Scholarships

8.1 Award Eligibility

The GSAS offers many forms of merit-based funding, including assistantships, fellowships, and tuition scholarships.

The dean of GSAS determines which students receive funding upon the recommendations of academic departments/programs as well as the Distinguished Fellowships Committee. In accordance with the guidelines of the Council of Graduate Schools, students are notified of financial awards by April 1, and must reply by April 15. If the dean does not receive a written acceptance of the aid offer by April 15, the offer may be rescinded. In consultation with academic departments, the dean also assigns students to assistantship assignments outside the academic departments and programs.

Students who wish to be considered for distinguished fellowship awards (see §8.6 Fellowships and Grants) must complete the Distinguished Fellowship Application and submit it to the department or program by the date specified on the web page (usually in early to mid-January). The department or program will select nominees to forward to the GSAS Distinguished Fellowships Committee by the date specified on the web page. Guidelines for each distinguished fellowship are available on the GSAS financial aid website under Distinguished Fellowships.

Students receiving GSAS funding or tuition scholarships must satisfy the following criteria every academic year:

1. Maintain a minimum GPA of 3.5.
2. Meet the requirements of both satisfactory academic performance and satisfactory academic progress (see §7.4 GSAS Standards for Satisfactory Academic Performance and Satisfactory Academic Progress; Federal Satisfactory Academic Progress [SAP]).
3. Be certified as full time by registering for the full time equivalence in credits (see Appendix D) or filling out a Matriculated Students Status Certification form, available on the GSAS Student Resources page, to indicate academic work sufficient for full time status. The only exception is for IPED students receiving a Ricci scholarship.
4. Hold no additional Fordham assignments during the academic year without the written permission of the dean. This rule applies to all the categories of funding addressed in this chapter.

Students receiving funding or tuition scholarships shall inform promptly GSAS of any other University funded awards or alternate appointments (e.g., resident assistantships). Students should also note that University policy limits the number of hours a student can be assigned in any University post to 19 hours per week total. Employment as a staff member of the University while being matriculated as a full time student requires the written permission of the dean, and is rarely granted.

8.1.1 New Students

All new applicants for admission to GSAS programs who wish to be considered for GSAS merit-based funding must have a completed admission application on file by the deadline published in the application materials.

Departments and programs recommend new applicants for funding or tuition scholarships on a ranked basis, the principal criterion for ranking being a candidate’s preparation and potential for outstanding graduate-level work. At minimum, applicants recommended for funding are expected to have a B+ (3.5) average in previous coursework, and to achieve the 75th percentile (for the discipline) in each of the three sections of the GRE.

8.1.2 Continuing Students

All matriculated students who wish to be considered for GSAS merit-based funding, including those who have received past aid, must fill out an application form every year. The application for continuation of aid is available through the department or program and is due by the date on the GSAS Academic Calendar, unless the department specifies an earlier date.

Every effort is made to renew the awards of eligible recipients, but renewals are not guaranteed. Students must reapply for funding every year. The criteria used for awarding aid to matriculated students include:
Teaching fellows must follow the Fordham college deans’ instructional policies as outlined in the Undergraduate Faculty Handbook.

8.3 Teaching Fellowships

Some students receiving funding are selected by their academic departments to be instructors for undergraduate courses in FCRH, FCLC, and PCS, under the supervision of a faculty member, and are designated as teaching fellows. Teaching fellows should commit no more than 18 hours per week during the academic year.

Teaching fellows are typically advanced doctoral students who have completed all coursework and passed the doctoral comprehensive examinations.

Teaching fellows must follow the Fordham college deans’ instructional policies as outlined in the Undergraduate Faculty Handbook.

8.4 Teaching Associates

The rank of teaching associate is awarded to graduate students, other than teaching fellows (see §8.3 Teaching Fellowships), to serve as instructors for undergraduate courses in FCRH, FCLC, and PCS.

Eligible matriculated students in the Graduate School of Arts and Sciences may serve as teaching associates, but under no circumstances may matriculated GSAS students serve as adjunct instructors. Teaching associates are not considered employees of the University and their assignment is part of disciplinary and professional training.

Teaching associates will receive a per-course stipend, a tuition scholarship of up to three credits per semester, and a contribution towards health insurance. No teaching associate may teach more than two courses per semester.

In order to be considered for a teaching associate position, students must apply for financial aid.

Teaching associates must have completed the master’s degree (with preference to students who have completed all requirements except the dissertation proposal and defense), be in good academic standing (in both academic performance and in academic progress (see §7.4 GSAS Standards for Satisfactory Academic Performance and Satisfactory Academic Progress); Federal Satisfactory Academic Progress [SAP]), and must complete the Application for Financial Aid. Nominees must have completed their department’s teaching preparation program (where such exists). Preference for appointment as a teaching associate is generally given to students who have successfully served as teaching fellows, and who will have exceeded the normal award tenure for financial aid.

8.5 Tuition Scholarships

Tuition scholarships are a part of most financial aid awards and are awarded on a per-credit basis. In addition, full- or partial-tuition scholarships may be offered to qualified students in select programs or to match the aid from research grants of faculty members. These scholarships are considered to be GSAS financial aid, and students must meet the eligibility requirements previously described, including full time student status.

Tuition scholarships can only be applied toward coursework that meets degree requirements. They cannot be used to audit courses, take undergraduate courses that do not fulfill a language requirement, take a course that is a condition of admission or for personal enrichment. Charges associated with 0-credit courses (e.g., graduate-level Language for Reading courses) will be covered by the tuition scholarship, but will reduce the number of credits that may be taken in a given academic year.

Partial tuition scholarships are available for high school teachers in select programs and for teachers at Jesuit high schools. In addition, GSAS participates in the Mayor’s Scholarship Program, which provides partial tuition scholarships for employees of the City of New York. Some discounts are also available to members of the clergy and to staff and faculty at partner institutions. Contact the dean’s office for information about eligibility.

Students who receive any form of tuition scholarship must register by the deadlines posted in registration materials or they may forfeit their tuition scholarship. Additionally, students who register late are charged a late registration fee.
Any billing problems associated with tuition scholarships must be brought immediately to the attention of the dean's office (adgsas@fordham.edu).

8.6 Fellowships and Grants
In addition to the above-mentioned scholarships and appointments, the GSAS provides financial aid in the form of a variety of graduate fellowships and grants, including six types of University-sponsored distinguished fellowships: three offered to entering students and three for advanced students.

Some departments have additional fellowships that are restricted to students in their programs. For more information, see the GSAS financial aid website under Distinguished Fellowships.

8.6.1 Distinguished Fellowships for Entering Students
Distinguished fellowships available to first-time applicants to the GSAS include:

• Loyola Fellowship: The Loyola Fellowship was established through the generosity of the Jesuits of Fordham University to encourage graduate study in the humanities and is awarded to incoming students. The Loyola Fellowship allows students to devote full time to their studies during their first year only.

• University Fellowship: University Fellowships are awarded to a select group of incoming students (at either the master's or doctoral level) in recognition of their academic achievements. The University Fellowship typically allows students to devote full time to their studies and applies to their first year only.

• Bennett Assistantship Award: Established to recognize outstanding academic achievements, Bennett Assistantships are awarded to a select group of incoming students (at either the master's or doctoral level). The Bennett Assistantship provides a stipend supplement to graduate assistantship and teaching fellowship financial awards.

8.6.2 Distinguished Fellowships for Advanced Students
Three academic-year distinguished fellowships are available for outstanding doctoral students. These fellowships do not fall under the award tenure policy previously described and thus, in some programs, may increase a student's eligibility for funding by no more than one year. In no case will a student's eligibility for aid be increased by more than one year, even if a student is awarded more than one distinguished fellowship during her/his time at Fordham.

• Research Fellowship: The GSAS Research Fellowship provides support for GSAS students to work as research fellows to conduct research on their own dissertations. The fellowship provides support for students who wish to work closely with faculty members to develop their own dissertation research projects or to learn methods or procedures that they will use in their own dissertation research.

• Senior Teaching Fellowship: Senior Teaching Fellowships typically provide support for students who have already completed a Teaching Fellowship in their department. Responsibilities of Senior Teaching Fellows include teaching three courses per year at Fordham College under faculty supervision. The fellowship is designed for the student who has already completed a teaching fellowship within his or her department and has demonstrated effective teaching skills.

• Alumni Dissertation Fellowships: Alumni Dissertation Fellowships allow students to devote full time work to their dissertations. The Alumni Dissertation Fellowship is the last of the internally administered prestigious awards for advanced doctoral students. Recipients are expected to complete, defend, and present their dissertations in time for a May graduation.

8.6.3 Graduate Student Support Grants (SSGs)
The Graduate Student Support Grants are merit-based awards jointly managed by GSAS and the Graduate Student Association (GSA). These grants provide support for student conference and/or research expenses; select dissertation expenses; and/or alternative learning experiences. Applications are reviewed during two funding cycles: fall and spring. For more information, please visit the SSG website.

8.6.4 Summer Fellowships
GSAS Summer Fellowships provide support for master's and doctoral students seeking to devote the summer to the preparation of proposals to apply for prestigious fellowships, articles for publication, and/or conference papers.

In disseminating these awards, the highest priority will be given to summer projects designed to prepare a student to apply for prestigious fellowships, and secondly to improve a student's professional credentials beyond the normal expectations of the program. Higher priority will be given to students who have not received a prior Summer Fellowship.

8.7 External Prestigious Fellowships
The Graduate School of Arts and Sciences actively supports applications by qualified students for prestigious fellowships offered by external grant organizations for graduate research at various levels, particularly dissertation research. These organizations include, but are not limited to:

• The Fulbright Commission
• The Council for European Studies
• The Department of Education
• The National Science Foundation
• The American Association of University Women
• The Rotary Foundation

Qualified students interested in developing and improving applications for these and other prestigious awards should contact the Office for Prestigious Fellowships.

If awarded an external prestigious fellowship, students must notify their department and the dean's office (adgsas@fordham.edu). Recipients of external prestigious fellowships may be eligible for matching funds from GSAS.

Grades
Permanent and Temporary Grades
For most graduate coursework and graduate tutorials, GSAS assigns letter grades corresponding to a 4-point scale as follows:

• A Outstanding = 4.0
• A- Excellent = 3.75
• B+ Very good = 3.5
• B Good = 3.0
• B- Pass = 2.75
• C Minimal pass = 2.0
• F Fail = 0.0

Updated: 07-27-2020
There are no grades of C+, C−, or D in GSAS. For most research and reading courses, a grade of P (Pass) replaces a letter grade.

Undergraduates taking graduate courses for undergraduate credit will be graded according to the undergraduate grading system.

For certain graduate preparation and development courses (e.g., Requirement Prep; Requirement Prep in Summer; Proposal Development; Proposal Acceptance; Dissertation Mentoring; and Dissertation Direction) GSAS uses the following grades in place of a letter grade. These grades do not affect a student's GPA:

- AP Adequate progress
- LP Lack of adequate progress

For graduate comprehensive exams, the GSAS uses the following grades. These grades do not affect a student's GPA:

- PCE Pass comprehensive exam
- HPCE High-pass comprehensive exam
- PREP Failure of comprehensive exam with option to retake
- FCE Failure of comprehensive exam

For courses taken on a Pass/Fail basis, the following grades are used. These grades do not affect a student's GPA:

- P Pass
- F Fail
- HP (High Pass)

For English Department Capstone ENGL 8996, the GSAS uses the following grades. The grades do not affect a student's GPA:

- PCP Pass capstone
- HPCP High-pass capstone
- FCP Failure of capstone

GSAS also assigns the following permanent and temporary grades as appropriate:

Permanent:

- AUD Audit
- INC Permanent incomplete
- W Withdrawal

Temporary:

- PI Passing incomplete
- FI Failing incomplete
- ABS Missing required or final coursework, or absent from final examination
- NGR No grade reported

Temporary grades automatically changed to permanent grades following the deadlines described in Incomplete Coursework (p. 834) and Absence from Final Examination (p. 835).

For students enrolled in consortium courses (see Registration Procedure (p. 828)), or enrolled in maintenance of matriculation (see Enrollment Policy (p. 826)), GSAS uses a designation of a dash (−). Consortium courses are graded following the system of the host institution, and are not calculated into a student’s GSAS cumulative GPA. Consortium grades will be made available on the student’s official transcript.

**Incomplete Coursework**

It is expected that the requirements and assignments for a graduate-level course will be completed by the date listed for the final examination in that course. Since graduate work is research oriented and the quality of graduate projects is often improved by several revisions, it is understandable that students sometimes wish to extend the time allowed for the completion of coursework. Nonetheless, the status of “incomplete” is assigned solely in the event of circumstances outside of the student’s control, and will not be approved for students simply wishing to revise graduate work.

Applications for incompletes should be made on the official form, available at GSAS Student Resources and shall be made no later than the date of the last class/final examination in that course. Requests for incompletes may be made by filling out the Request for Grade of Incomplete (available at GSAS Student Resources) and requires approval by the instructor, department chair or program director, and the dean.

Students who are on academic probation or those who have had several previous incompletes should submit documentation demonstrating that the circumstances surrounding the request for an incomplete are outside of the student’s control, along with their application.

At the time of submission of grades, the instructor will assign a grade of PI or FI to the student (see Permanent and Temporary Grades (p. 833)). The grade “PI” indicates that the student has not completed all required coursework, but that work turned in to date is of a passing nature. The grade FI indicates that the student has not completed all required coursework and that either insufficient work has been turned in on which to make a judgment, or that the work turned in is not of passing quality.

Upon completion of all required course requirements, the instructor submits a Change of Grade via my.fordham.edu to the dean’s office. When approved, the “PI”/“FI” will be removed and replaced by a permanent grade. If all course requirements are not completed by the date specified in the GSAS Academic Calendar for removal of incompletes, a PI will automatically become a permanent INC, while an FI will become a permanent INC. Students (and professors) should be aware that universities and fellowship sponsors examine transcripts and that receipt of incompletes diminishes a student’s prospects for jobs or fellowships.

Permission to extend a PI beyond the incomplete deadline stated in the GSAS Academic Calendar requires the written approval of the instructor, the department chairperson or program director, and the dean, and reasons offered in support of the application must be substantial. If, following approval of a deadline extension, the requirements are still not met by the new deadline, the grade of PI is automatically changed to an F (called an administrative F). Only in extraordinary circumstances will an administrative F be changed, pursuant to the approval of the dean and the provost.

Permission to extend an FI beyond the incomplete deadline stated in the GSAS Academic Calendar is not normally granted.

If a student does not formally apply for an incomplete, yet fails to satisfy the necessary requirements of the course by the date of the final exam, the instructor will turn in a grade of ABS, which will become an F if not cleared by the ABS deadline in the GSAS Academic Calendar.
Absence from Final Examination

Students who are absent from a final examination must have a valid reason for their absence, or their grade for the examination will be an F. If a student possesses a valid reason for her/his absence, the instructor will record a final grade of ABS. The student must then request a make-up examination on the appropriate form, available from the department/program office, and have it signed by the instructor. The form must then be submitted to enrollment services.

Upon completion of the make-up examination, a grade of ABS will be removed and replaced by a permanent grade. If the make-up examination is not completed by the specified deadline in the GSAS Academic Calendar (generally four weeks after the officially scheduled final examination) the ABS is automatically changed to F. Only in extraordinary circumstances will this administrative F be changed, pursuant to the approval of the dean and the provost.

No Grade Reported

The notation NGR is used by the Office of Enrollment Services to indicate that the instructor reported no grade for a student. Instructors may fail to submit a grade if the student is missing assignments.

An NGR automatically becomes an administrative F at the same time as uncleared ABS grades. Thus, if a student receives NGR, they should contact the instructor immediately.

Change of Grade

Except as outlined in Incomplete Coursework and Absence from Final Examination, grades will be changed only under extraordinary circumstances. This policy also applies to administrative grades.

To change a grade, the instructor must submit the appropriate form to the dean, specifying the reason for the change. If approved by the dean, the grade change request will typically be forwarded to the Provost for final approval. If either office deems the reason for change insufficient, the grade will not be changed.

Grade changes are primarily approved for reason of a clerical error; grade changes for extra work or revised work are not permitted.

Appeal of Academic Grades

A student who believes that an incorrect assessment has been made in connection with specific course (e.g., final course grade) or in connection with a specific course or program assessment (e.g., quiz, examination, research paper, lab report, language examination, or comprehensive exam) may appeal the grade in question by undertaking the following procedure.

NOTE: For situations concerning academic integrity violations and grievance procedures, please refer to §9.1.

Initial Review

1. Academic grade appeals must be made in writing by the student to the instructor of record or faculty member who assigned it, within ten (10) business days of receipt of the contested grade. In the case of a grade assigned by a committee, the student will direct her/his request to the committee chair or, in cases where there is no serving chair, to the Department Chair or Program Director.

2. The recipient of the grade appeal (e.g., instructor of record or faculty member, committee chair, Department Chair, Program Director) shall review the appeal and render a decision based on the merits and her/his academic judgment within ten (10) business days of receipt. The determination shall be communicated in writing to the student in a timely fashion.

3. Should the student remain unsatisfied with the results of the initial review, they may request a secondary review by undertaking the following process:

Secondary Review

1. The student shall file a request for secondary review in writing to the Department Chair or Program Director, within ten (10) business days of receiving the determination of the initial review. In cases where the initial review was carried out by the Department Chair or Program Director, they will identify and assign the responsibility for the review to a qualified faculty member of the department or program.

2. The recipient of the secondary review request shall institute the review within ten (10) business days of receipt and render a decision based on the merits and her/his academic judgment. The secondary reviewer may ask for additional information from the parties to the appeal, and shall have discretion in the methods used to conduct the review. The determination shall be communicated in writing to the student and instructor/faculty member of record in a timely fashion, and any necessary changes to the grade shall be made and recorded.

3. Should the student remain unsatisfied with the results of the secondary review, they may request a final review by undertaking the following process:

Final Review

1. The student shall file a request for final review in writing to the GSAS Dean, within ten (10) business days of receiving the determination of the secondary review.

2. The GSAS Dean shall undertake a final review and render a determination decision based on the merits and her/his academic judgment within thirty (30) days of receipt of the final review request. The GSAS Dean may ask for additional information from the parties to the appeal, and shall have discretion in the methods used to conduct the review. The GSAS Dean’s determination, which is not subject to further appeal, shall be communicated in writing to the student and instructor/faculty member of record in a timely fashion, and any necessary changes to the grade shall be made and recorded.

NOTE: It may be necessary to make adjustments to the timing of the procedures described if an academic grade appeal is lodged outside of or in close proximity to the commencement or conclusion of the normal academic semester (e.g., summer, holiday, or vacation periods). In such instances, all relevant parties shall be notified and every effort will be made to ensure that the process proceeds in a timely and efficient manner.

Preamble and Academic Authority

Preamble

The Graduate School of Arts and Sciences (GSAS), founded in 1916, is located at the historic Rose Hill campus of Fordham University in the Bronx. Most GSAS courses are offered at Rose Hill, but a number of graduate programs offer GSAS courses at other campuses (Lincoln Center or Westchester) or centers (for example, the Louis Calder Center in Armonk, N.Y.).

The GSAS Academic Policies and Procedures Guidebook, hereafter known as the Guidebook, sets forth the academic policies and procedures of the Graduate School of Arts and Sciences. Students should
review their department or program’s website to become familiar with the degree requirements. Please visit the GSAS Graduate Programs web page for a list of the departments and programs. GSAS academic policies and procedures represent only the minimum requirements; departments and programs may impose additional requirements and set higher standards. Students must comply with GSAS requirements as well as meet their department’s or program’s specific or additional requirements.

Unless specifically stated in the Guidebook, it is recommended that all questions concerning academic policies and procedures be addressed first to the department chairperson, director of graduate studies, or program director. Generally, this departmental or program administrator will make all necessary referrals to the dean’s office.

The policies and procedures contained herein are subject to change at any time. Moreover, this guidebook is not intended nor should it be construed to be a binding enforceable contract between the University and students enrolled in the Graduate School of Arts and Sciences. This guidebook is intended to inform students of their academic commitments and responsibilities, and it is expected to be distributed widely and revised periodically.

**Authority**

The continuance of each student upon the rolls of the University, the receipt of academic credits, graduation, and the conferring of any degree or granting of any certificate are strictly subject to the powers and authority of the University, which are vested in the president and his designees.

The operative norms and procedures all students are expected to follow are those described in the University Code of Conduct and published in the Student Handbook issued by the Office of the Vice President for Student Affairs.

The authority of the dean of GSAS is exercised in four primary ways:

1. admission of qualified candidates;
2. granting merit-based funding and tuition scholarships;
3. withholding students’ records and/or dismissing students from GSAS; and
4. granting approval for the conferral of degrees.

For most matters and unless otherwise stated, the dean has delegated authority to implement the policies and procedures stated in the Guidebook to the associate dean and other members of GSAS staff.

**Student Records**

**Change of Name and/or Address**

Correspondence from the University (including but not limited to communication by the Office of Human Resources, Office of Enrollment Services, and other non-GSAS University offices) is sent to the individual student’s mailing address on file in the Fordham University Enrollment Group. It is the student’s responsibility to notify the University of any change of address. Likewise, it is the student’s responsibility to notify the University of any change in the student’s name.

To notify the University of a change of name or address, the student must update her/his information via the my.Fordham.edu University portal. There, the student will also be prompted to complete a Personal Data Change form, which must then be submitted to the Office of Human Resources before the change can take effect.

**Transcript of Record**

An official transcript is one bearing the seal of the University and the signature of the University registrar.

Official academic transcripts may be issued to educational institutions, employers, scholarship/grant/fellowship organizations, application services, government agencies, etc., or to students (for personal use) provided the student discloses the intended final recipient. Current students may view their unofficial transcript online by using their credentials on my.fordham.edu. Official transcripts cannot be emailed or faxed to recipients.

Students and alumni who request an official transcript for personal use may not forward it to another party; doing so renders the transcript unofficial. Transcripts should always be issued to the intended final recipient.

The University offers secure electronic transcripts as well as mailed (paper) transcripts. Full details are available from the Office of Academic Records.

Students may request an unofficial transcript listing courses and credits and marked “Unofficial.” Students may also view their unofficial transcript via my.fordham.edu. The University accepts no responsibility for the accuracy of an unofficial transcript after it has been issued.

Transcripts may be requested from the Office of Academic Records following their outlined procedures. They should be requested well in advance of the date desired. No transcripts will be issued for students who have unpaid financial obligations to the University. A fee for immediate processing is charged for each transcript, payable at the time of request. The University reserves the right to change the fee at any time without notice.

The Office of Academic Records may use its discretion to limit the number of transcripts requested at any one time.

Fordham University will make every effort to promptly fill all requests for transcripts but will not assume responsibility for delays. All inquiries concerning issuance of transcripts must be made to the Office of Academic Records within three months of the original request.

Fordham University students who attended prior to 1990, or attended Marymount College prior to 2000, will only be able to receive hard copy transcripts.

**Consortium Programs**

**Inter-University Doctoral Consortium**

Graduate School of Arts and Sciences doctoral students have the opportunity to take graduate courses in New York area schools participating in the Inter-University Doctoral Consortium (IUDC). The IUDC has been in existence for over 25 years and offers students an enormous array of courses and opportunities for contact with faculty and students in their fields.

Requirements to take IUDC graduate courses:

- To be a doctoral student (terminal masters students and non-Arts and Sciences students are not eligible).
To have completed at least one year of full time study toward the Ph.D.

Inter-University Doctoral Consortium members:

- Columbia University
- Fordham University
- Graduate Center, CUNY
- New York University
- New School for Social Research
- Princeton University
- Rutgers University
- Stony Brook University
- Teacher’s College, Columbia University

To take consortium courses you need the approval of your Department/Program Chair and to complete the Inter-University Doctoral Consortium Registration Form.

For more information please visit the IUDC website.

New York Theological Group Cross Registration Consortium

Graduate School of Arts and Sciences master’s and doctoral students have the opportunity to take graduate courses in New York area schools participating in the New York Theological Group Cross-Registration.

Requirements to take New York Theological Group Cross-Registration graduate courses:

- Be a Graduate School of Arts and Sciences master’s or doctoral student
- Students will be permitted to take courses not available at the home institution in the academic year in which cross-registration is sought and not “core” or “required” courses for the degree at the home institution without the explicit permission of the program coordinator at the home institution
- Students will be allowed to take one course per semester or other academic terms (except for summer language courses if necessary).
- Only GSAS graduate students in good standing shall be eligible to register for classes

New York Theological Group Cross-Registration Agreement members:

- Fordham University, Graduate School of Arts and Science
- Fordham University, Graduate School of Religion and Religious Education
- Union Theological Seminary in the City of New York
- The General Theological Seminary of the Episcopal Church
- St. Vladimir’s Orthodox Theological Seminary
- New York Theological Seminary
- Hebrew Union College – Jewish Institute of Religion
- The Jewish Theological Seminary

To take Theological consortium courses you need the approval of your Department/Program Chair and to complete the Theological Consortium Cross Registration Form.

GSAS Accelerated Master's Programs

Qualified Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC), Fordham School of Professional and Continuing Studies (PCS), and Gabelli School of Business (Gabelli) juniors may apply for the accelerated master’s to select GSAS programs. Accelerated master’s students apply during their junior (or equivalent) year, and take up to three courses in their senior year to count toward both the bachelor’s and the master’s degree. After an additional year of degree requirements (4+1), students are awarded a joint B.A./M.A. or B.S./M.S. degree.

Please refer to the specific program or the accelerated master’s programs web page for eligibility requirements (such as minimum GPA) and program participation. Programs that offer the accelerated master’s are listed on the accelerated master’s programs web page.

Jesuit Pedagogy Seminar

The interdisciplinary colloquium, taught by Michael Baur (Philosophy), Moshe Gold (English) and Christine Firer-Hinze (Theology), offers advanced graduate student teachers an in depth look at Jesuit pedagogy and a chance to explore the characteristics of this nearly 500 year-old tradition.

The seminar meets six times over the course of the spring semester and provides a structure for reading, reflection, discussion and experimentation. As part of the seminar, graduate students are mentored by faculty members who are excellent undergraduate teachers themselves. The mentors are chosen from across the Arts and Sciences, and paired across disciplines. A biologist may be paired with a philosopher, while an economist may be paired with a theologian.

This cross-disciplinary pairing helps to enforce the understanding that Ignatian Pedagogical principles are not limited to just one field or one group such as the humanities. Mentors and graduate students visit each other’s classrooms and exchange syllabi, lesson plans, and grading samples. They then meet to discuss their observation.

The conclusion of the seminar is marked with a public forum in which each participant presents a final project, examining a characteristic of Jesuit pedagogy and applying it within the framework of the course that he or she is currently teaching. The forum allows mentors and those outside of the seminar to witness the work that has been done by the participant within the smaller meetings, and in addition offers the presenter a chance to reflect upon the project and the context in the larger community.

In their evaluations of the seminar, participants report feeling a stronger connection to the Jesuit tradition, their fellow graduate students in other disciplines and the students they teach. Here are some comments from the students:

- ‘...my strongest course evaluations came from students whom I was teaching at the time that I took this seminar.’
- ‘I received some of the best final papers I have ever received. This would not have been possible without the broader context and general attitude of thinking holistically about education.’
- ‘...when I develop things for class now I have a [an] Ignatian cycle in mind: context, experience, reflection, action, evaluation. I also actively work at introducing ideas of justice in the class.’

Updated: 07-27-2020
This spring’s Jesuit Pedagogy will once again bring graduate student teachers together from the departments as diverse as:

- Biology
- Economics
- English
- History
- Philosophy
- Theology

For detailed information on the current seminar, please visit our page on the Fordham website.

Preparing Future Faculty

One of the benefits of undertaking a Ph.D. at Fordham is the extensive teaching training and experience in which you have the opportunity to participate during the course of your program. GSAS is dedicated to aiding you in that journey and assisting your department in helping produce some of the best future faculty in the country. To showcase the outstanding training our students already receive and to deepen and develop those skills, GSAS has created the Preparing Future Faculty (PFF) program.

As a participant in the PFF Program, most of your training will be provided by department faculty and mentors, who will assist you in learning how to teach your specialty and how to balance the requirements of research with teaching. The program emphasizes mentorship, discipline-based pedagogy, digital pedagogy, and diversity training, adding value to the pedagogical training GSAS students already receive.

Program Overview

Designed to allow busy graduate students to participate throughout their academic careers and integrated with departmental training, the PFF Program balances time-tested and forward-looking pedagogical theories, techniques, and practices. Rooted in the Jesuit pedagogical tradition, PFF participants will reflect systematically on their training and the work they are undertaking in the classroom, focusing around six core competencies.

For more in-depth information, visit our page on the Fordham website.

Thesis and Dissertation Guidelines

Policy Changes in Effect During Remote Learning

Please note the following policy changes, which will remain in place throughout the period for which the University has suspended face-to-face instruction.

Effective immediately, GSAS is making the following adjustments to our academic policy/practice, which will remain in place throughout the period for which the University has suspended face-to-face instruction:

- Doctoral dissertation, master’s thesis, and capstone defenses will be held remotely—through video/web conferencing—for the remainder of the spring 2020 semester, and must include the student and all committee members participating.

- All students and committee members participating in a defense by web conferencing must be able, at a minimum, to hear each other at the same time. The University has acquired an enterprise-wide license for Zoom. If you have not received an invitation from Fordham IT to sign up for your Zoom account, please contact Fordham IT as soon as possible at 718-817-3999 to activate and utilize your account.

- While GSAS is recommending that all defenses be conducted through Zoom, other web conferencing options for a defense include WebEx, Skype, GoToMeeting, and Adobe Connect.

- The dissertation defense shall take place on the date and at the time indicated on the defense notification submitted by the department to the dean’s office. Exceptions to this must be requested in advance and will be subject to the dean’s approval.

- For the remainder of the spring 2020 semester, when a dissertation defense notification is received by the dean’s office, the notification will be shared with all GSAS department chairs and DGSs/program directors for dissemination to their faculty and staff. This procedure will temporarily replace the dissertation notification posting on the GSAS dean’s bulletin board, located outside of Keating Hall, Room 222.

- The department administrator/secretary, student, or mentor can schedule the defense meeting on Zoom, select a host, and send defense meeting invitations to the student and each member of the committee. When arranging the defense via web conferencing/Zoom, please proceed in the same manner and roles as currently used by the department when scheduling an in-person defense meeting. The invitation/link to a defense that is open to public viewing should be shared with those who wish to view the defense.

- Documents and other materials that would normally need to be signed or submitted in writing may be submitted by electronic mail. If a document requires a signature, it must be submitted in an email sent from the sender’s fordham.edu account. The defense paperwork will be made available on the GSAS website as writable pdfs with the ability to add electronic signatures. Select the signature area to receive instructions regarding how to set up an electronic signature.

- The doctoral dissertation defense paperwork shall be signed by the mentor and department chair at a minimum, and the master’s thesis and capstone shall be signed by the department chair at a minimum.

- If, due to technical issues, a committee member is not able to electronically sign the forms and email the form to the next committee member for signature, an email indicating your defense date and graduation clearance. The form will be sent with all GSAS department chairs and DGSs/program directors for dissemination to their faculty and staff. This procedure will temporarily replace the dissertation notification posting on the GSAS dean’s bulletin board, located outside of Keating Hall, Room 222.

- If, due to circumstances related to the COVID-19 pandemic, the student or committee member finds that it will be impossible to participate in the defense, an extension to the defense date may be requested by emailing adgsas@fordham.edu. In other instances, the graduation date may need to be moved to a future semester.

If you have any questions, please contact Dean Schwind or Carmela Menta (adgsas@fordham.edu; 718-817-4415). Full details of this policy
and all related forms will be uploaded to the GSAS website by Monday, March 16, 2020.

Theatre

The M.F.A. in Playwriting program has been placed on hiatus and will not be accepting applications at this time.

The Fordham University Theatre Program is highly regarded as one of the most outstanding theatre training programs in the country. The program combines the intimacy of a small conservatory with an exceptional liberal arts education, and the rich resources and opportunities available in the world capital of the performing arts.

For more information about the Theatre department, please visit our page on the Fordham website.

Admissions

The M.F.A. in Playwriting program has been placed on hiatus and will not be accepting applications at this time.

Applicants to the M.F.A. in playwriting must have completed or be in the process of completing a bachelor’s degree and need to apply to and be accepted by the Fordham University Graduate School of Arts and Sciences (GSAS). In addition to the GSAS application materials, applicants to the M.F.A. in playwriting must also submit a playwriting portfolio to Matthew Maguire, director of the M.F.A. program.

Playwriting Portfolio

Your Playwriting portfolio must include:

• Cover letter
• Two plays (at least one should be full length)

Mail your playwriting portfolio to:

Matthew Maguire  
Director, Fordham University/Primary Stages M.F.A. in Playwriting  
Department of Theatre and Visual Arts  
Fordham College at Lincoln Center  
113 W. 60th Street, Room 423F  
New York, NY 10023

GSAS Online Application

The GSAS application requires the following components:

• Letters of Recommendation: Two from former professors, professional playwrights or directors, or employers. Please make every effort to have the letters submitted electronically. If hard copy, each must be signed and sealed across the seal.
• Resume/CV
• Statement of Intent: Maximum 500 words. Place your name on all pages of your Statement of Intent.
• Official Transcripts: Official degree transcripts confirming prior degree conferral are required for all applicants, regardless of matriculation status. These should be ordered at least one month prior to the application deadline for your program of interest. You may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts. Please ensure that all official transcripts from previously attended post-secondary institutions are submitted in English, or are accompanied by a certified English translation.
• International Students: International applicants whose native language is not English are required to complete and submit TOEFL or IELTS scores to GSAS prior to matriculation. Official TOEFL or IELTS scores should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – Code # 2259.

Note that the M.F.A. in playwriting does NOT require GRE scores for admission.

All GSAS application components need to be received at GSAS admissions. Please do not send any GSAS application materials to the theatre program. Please also do NOT mail your playwriting portfolio to GSAS.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.

Programs

• M.F.A. in Playwriting (p. 840)

Courses

THEA 5000. Theatre History I. (4 Credits)
We will seek a perspective on the developments in the theatre from Ancient Greece, Japan, and India, and through the Elizabethans using major plays as our focus. We will explore their context—when, where, and why they were written—the lives of the playwrights, and the culture and the politics of their society.

THEA 5100. Theatre History II. (4 Credits)
The course explores the major developments in Theatre from 1879 to the present using major plays of Ibsen, Strindberg, Chekhov, Wedekind, Stein, Brecht, O’Neill, Artaud, Genet, Beckett, Soyinka, Mishima, Kennedy, Hansberry, Churchill, Parks, and the movements of performance art and Butoh. We explore their context (when, where and why they were written), the lives of the playwrights, and the culture and the politics of their society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 5700. Playwriting Workshop. (4 Credits)
The primary goals of the course are to hone basic craft and to create an environment that will guide the writers’ exploration of their individual voices. We concentrate on four major issues: storytelling, character, structure, and the poetic voice. The course is taught from overlapping perspectives of traditional and alternative techniques. Exercises are rooted in storytelling techniques and character development. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ENGL.
THEA 5750. Playwriting Strategies. (4 Credits)
This course offers a series of workshop classes that focus on writing strategies, generating new work, and giving writers unique tools for confronting and overcoming obstacles and challenges the playwright faces. The playwrights will be introduced to readings and interviews by and about other playwrights on generative writing process, the act of rewriting, and new forms of creating a stage event. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 5800. TV Comedy Writing. (4 Credits)
This course will focus on the art of creating, pitching, and selling a comedy series. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 5810. TV Dramatic Writing. (4 Credits)
This course will focus on the art of creating, pitching, and selling a dramatic series. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 6400. Design for Playwrights. (4 Credits)
Playwrights write texts to be performed in actual space, so the playwright who begins from imagining the place where action occurs is activating the essential core of the dramatic imagination. Playwrights must understand how to collaborate with designers, and benefit enormously from inviting a designer into the creative process early. It advances the playwright’s craft to learn the designer’s craft of line, shape, drawing, model making and findings way to embody thematic ideas in concrete visual images and environments. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 6430. Adaptation. (4 Credits)
Introduction to the craft of adaptation for the stage and screen. Emphasis will be placed on learning to recognize and evaluate the kinds of source material that invite adaptation, and subsequently how to effectively translate elements from that material to craft powerful stories. Class discussion, lectures, readings, and guest seminars will examine source material that includes short stories, novels, biographies, and true stories developed from journalistic sources as well as examples of its successful adaptation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 6500. Shakespeare. (4 Credits)
An exploration of Shakespeare’s plays from a playwright’s perspective on craft. How does Shakespeare achieve what he does? What techniques does he employ to generate his vast range of characters and meanings?

THEA 6770. Screenwriting. (4 Credits)
This course focuses on analyzing and writing screenplays for film and television. Class time is devoted to exercises, lectures, and assignments that focus on creating and improving plots and premise, developing potent characters, understanding and honing structure, and sharpening dialogue. In-class activities and lectures are supplemented with guest seminars, film viewings, and screenplay readings, followed by discussion and analysis on themes of craft, including plot, character, technique, and structures.

THEA 6780. Screenwriting: Idea to Execution. (4 Credits)
Writers will explore the art, craft, and business of writing for the screen, with a focus on the ‘classical’ principles of screenwriting. Each writer will complete the first half of a feature length screenplay. Classes will be a mixture of lecture, discussion, screenplay analysis, writing exercises, discussion of viewed films and in-class workshopping of scripts.

THEA 6980. Contemporary Theatre. (4 Credits)
A playwright is the person who has her ear to the rail, the one who channels the zeitgeist. To that end this class will obsess on the present moment. What is happening in politics now? Literature? Science? Where in New York City theatre and global theatre are these revolutions and innovations finding expression? Writers will see never-before-produced plays, meet with the makers of new work, and use those experiences to write a play that resonates with the present moment.

THEA 6990. The Playwright Prepares. (4 Credits)
This semester focuses on preparing the second-year playwrights for submitting their plays to theatres, film and television studios, contests, and agents. Visiting designers, managing directors, film and television producers will enhance the students’ understanding of the community they are entering. Contemporary theatre issues are also discussed, particularly those related to the role of the playwright in our society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 7000. Production. (4 Credits)
This seminar serves as a foundational course for the full-length thesis productions that spring. Contemporary theater issues are also discussed, particularly those related to the role of the playwright in our society.

THEA 8999. Independent Study. (0 to 4 Credits)

**Playwriting (M.F.A.)**

**Requirements**

The M.F.A. in Playwriting program has been placed on hiatus and will not be accepting applications at this time.

The MFA in playwriting requires a total of 64 credits, 16 credits per semester. All courses are four credits.

Theology

Fordham’s theology department is a national leader in theological education, rooted in the Jesuit vision of social justice and committed to forming teacher-scholars for the 21st century. As a graduate student in theology at Fordham, you’ll work alongside distinguished faculty who are dedicated to student mentoring, original research, and professional development. Our programs provide experiential opportunities and partnerships with institutions in the greater New York City metropolitan area.

In addition to having the largest number of undergraduate majors/minors of any Jesuit college or university, the Department of Theology offers two graduate degrees:

- M.A. in Catholic Theology
- Doctor of Philosophy (Ph.D.)

Whether pursuing undergraduate or graduate education, Fordham students work alongside distinguished scholar-teachers committed to student mentoring and development.

The Degrees

The M.A. provides a general, two-year, graduate-level introduction to theological study with an emphasis on Biblical, Historical, and Systematic approaches. Degree requirements include a six-course core sequence, four electives, and a final project. Typically pursued as a terminal degree, Fordham’s M.A. in Catholic Theology may be completed on a part-time basis.

The Ph.D. is designed for the preparation of scholars: not simply competent teachers of theology, but ones who can also communicate with and contribute to the academic community more broadly. Upon entry, students in Fordham’s Ph.D. program select one of five “Fields of Study”:

- Bible
- Judaism and Christianity in Antiquity
- History of Christianity
- Systematic Theology
- Theological and Social Ethics

All doctoral students receive five years of full funding (tuition remission and living stipends) to support their work, and all students are eligible to compete for internal and external fellowships for additional support. Fordham doctoral students are active scholars, presenting at major conferences and publishing their work on a regular basis. During their third year of study (and with the supervision of a faculty mentor), they begin teaching their own undergraduate courses.

Preparing for Ministry?

As part of the Graduate School of Arts & Sciences, Fordham’s graduate programs in the Department of Theology prepare students for academia and related careers, with an emphasis on original academic research and critical engagement with the scholarly tradition. A separate school within the university, Fordham’s Graduate School of Religion and Religious Education (GSE), also pursues academic theological inquiry, but with an emphasis on practical preparation for careers in ministry, counseling, and other related fields.

For more information about Graduate-level Theology, please visit our page on the Fordham website.

Admissions

Candidates for the M.A. in Catholic Theology are expected to have a GPA of 3.0 or higher, while candidates for the PhD are expected to have a GPA of 3.5.

Completed applications will include each of the following items:

- Official Degree Transcripts: confirming prior degree conferral should be ordered at least one month prior to the application deadline. You may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts. Please ensure that all official transcripts from previously attended post-secondary institutions are submitted in English, or are accompanied by a certified English translation.
- Official GRE Scores: sent directly by the testing service (Code #2259)
- Resume/CV
- Statement of Intent: up to 1000 words
- Writing Sample: 5 - 20 pages
- Three Letters of Recommendation
- English Proficiency: International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS) –Cambridge English Proficiency Level language testing results. Exemptions from this requirement can be requested by the applicant in her/his application.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.

Programs

- Ph.D. in Theology (p. 848)
  - Bible Concentration
  - Judaism and Christianity in Antiquity Concentration
  - History of Christianity Concentration
  - Systematic Theology Concentration
  - Theological and Social Ethics Concentration
- M.A. in Catholic Theology (p. 847)

Courses

THEO 5000. Biblical Hebrew Intro. (4 Credits)
This course is an intensive introduction to the grammar, syntax and vocabulary of Biblical Hebrew. By the end of the course students will be able to read passages from the Hebrew Bible with the help of a dictionary, and will have learned sufficient vocabulary to ensure a rewarding reading experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
THEO 5015. Teaching Theology. (0 Credits)
Classical and contemporary discussions on the practice of teaching theology, particularly as understood in the Roman Catholic tradition, introducing the field of professional theology and its relationship to other disciplines, and engaging in careful, critical reflection on the vocation of the teaching theologian.

THEO 5017. Theology Dissertation Seminar. (0 Credits)
A colloquium for workshop ing dissertation chapters in progress.

THEO 5025. Exodus in Hebrew. (3 Credits)
This course combines exegesis of Exodus in Hebrew with intermediate-level study of biblical Hebrew. We will read chapters 1-24 and 32-34 of Exodus in Hebrew. Our study of the Hebrew language will progress from a review of grammatical forms to a more advanced understanding of the syntax of biblical Hebrew.

THEO 5070. Element ary Coptic I. (3 Credits)
The course introduces students to Coptic, the latest stage of the Egyptian language, by acquainting them with the script, providing them with grammatical foundations, and exposing them from early on to the reading of texts.

THEO 5071. Elementary Coptic II. (3 Credits)
Completion of Coptic grammar and reading of Biblical texts in Sahidic Coptic. Continuation of Elementary Coptic I. Other students welcome subject to instructor approval.

THEO 5072. Christian Texts in Coptic. (3 Credits)
Intermediate and advanced readings in Coptic, which may include biblical, monastic, and Gnostic texts.

THEO 5075. Syriac Language and Literature I. (3 Credits)
This course is the first of a two-semester introduction to Syriac, a dialect belonging to the Aramaic language branch. The first semester will introduce the Estrangula and the Serto scripts, cover grammatical foundations, and expose students from early on to the reading of texts. The second semester will be mostly spent reading Syriac literature, but some time will be devoted to select special topics in Syriac grammar.

THEO 5076. Syriac Language and Literature II. (3 Credits)
This course is the second of a two-semester introduction to Syriac, a dialect belonging to the Aramaic language branch. The first semester introduced both the Estrangula and the Serto scripts, covered grammatical foundations, and exposed students from early on to the reading of texts. The second semester will be mostly spent reading Syriac literature, but some time will be devoted to select special topics in Syriac grammar.

THEO 5080. Introduction to Biblical Greek. (3 Credits)
This course an intensive introduction to the grammar and syntax of New Testament Greek. Sufficient attention will be devoted to vocabulary to enable rewarding experience in reading an exegesis.

THEO 5090. Biblical Aramaic. (3 to 4 Credits)
An introduction to the language through comparison with Hebrew morphology and readings from the Aramaic sections of the Old Testament.

THEO 5230. Advanced Greek. (3 Credits)
This course includes both a rapid review of Greek grammar and syntax, and also intermediate/advanced readings from Hellenistic and/or early Christian texts.

THEO 5300. Hist of Christianity I. (3 to 4 Credits)
Development of central concepts of Christianity from the Apostolic Fathers to the Reformation.

THEO 5301. Hist of Christianity II. (3 Credits)
Catholic and Protestant theologies after the first century of the Reformation, from the 17th to the 20th centuries, including both European and USA theological developments.

THEO 5400. Topics in Islam: Texts and Traditions. (3 Credits)
This course explores major topics in Islam, including notions of revelation, God, law, theological speculation, gender issues, philosophy, mysticism and science. Comparisons with Jewish and Christian materials will be brought to bear on the topics for discussion when relevant.

THEO 5401. Introduction to Islam. (3 Credits)
This course provides a basic introduction to Islam through close readings of the Qu’ran as well as theological, philosophical, legal, exegetical and literary writings. Special focus will be given to comparative themes, such as God, revelation, prophecy, reason, ritual, and ethics. Attention will be paid to sources and pedagogical concerns involved in the creation of undergraduate courses on Islamic topics and themes.

THEO 5405. Teaching Buddhism. (3 Credits)
This course will provide short units on Buddhist thought, Buddhist practice, and Buddhism in America, and it will emphasize strategies for incorporating elements of these units into undergraduate religion courses.

THEO 5500. Religion and American Public Life. (3 Credits)
This course introduces students to the intricate and delicate topic of how religious voices and institutions interact with the public life of the United States. Topics include church-state relations in the courts, voting according to religious conscience, the influence of civil religion, secularization, public theology, culture wars, faith-based lobbying, and religion in the media and popular culture.

THEO 5505. New Methods: American Religion History. (3 Credits)
The past thirty years have produced significant changes in the ways historians, theologians, and ethnographers describe, explain, and theorize Americans’ religious worlds. Problems include how to account for the experiences of women and racial and ethnic minorities, the relationship of doctrine to practice, the legacy of the enlightenment, the religious meanings of objects and places, the importance of borders and identity, and the significance of class in theological expression. This course investigates new answers to these and other questions, assessing them in light of their contributions and limitations in the effort to make sense of North America’s past and present. The work of the semester involves close reading of contemporary historical and ethnographic texts, covering periods from the colonial era to the present. The emphasis rests both on American religious history and on new ways of making sense of religious lives, which may be applicable beyond the North American context.

THEO 5520. Introduction to Systematic Theology. (3 Credits)
An introduction to major schools and methods in contemporary systematic theology.
THEO 5630. Systematic Liberation Theology. (3 Credits)
The course will examine theologies of liberation originating among marginalized peoples of the Americas. In addition to studying their origins and major figures, the course will focus on how liberation theologies rethink a range of themes in systematic theology including: Christology, anthropology, soteriology, and ecclesiology.
Attributes: CEEED, CEMT.

THEO 5640. Introduction to Theological Ethics. (3 Credits)
This introductory course will examine the sources and methods of Christian ethics, as well as contemporary questions in the discipline including gender and identity, racism, and bio-and environmental ethics.
Attributes: CEEED, CEMT.

THEO 5820. Old Testament Interpretation. (3 to 4 Credits)
Introduction to the multi-faceted project of interpreting the religious literature of ancient Israel and the sacred Scriptures of the church, in order to develop competence in a variety of exegetical approaches to the Old Testament. These include patterns of patristic and medieval interpretation, the classic modern methods of scholarly analysis, and selected contemporary approaches.

THEO 5890. New Testament Interpretation. (3 to 4 Credits)
History, literature, and religion of the New Testament, studied in the context of the time and circumstances that produced them.

THEO 6000. History, Theory, and the Study of Religion. (3 Credits)
This course provides a thorough introduction to recent developments in historiography and critical theory as they bear upon the discipline of religious studies and the critical study of theology.

THEO 6026. Ancient Judaism. (3 Credits)
This course provides a survey of the literature and history of both Palestinian and Diaspora Judaism, including late biblical texts, apocrypha, pseudepigrapha, the Qumran Scrolls, Philo, and Josephus.

THEO 6031. The Psalms. (3 Credits)

THEO 6039. Biblical Ethics. (3 Credits)
This course will explore a number of ways that the Bible has been used to inform ethical behavior. Special attention will be paid to the ethical implications of different interpretive approaches to the biblical text, as well as to the fact that the Christian Bible has two testaments, each of which contains a variety of approaches to ethics.
Attributes: CEEED, CEMT.

THEO 6040. The Neighbor: Biblical Witness and Contemporary Ethics. (3 Credits)
With the rise of nationalism and xenophobia, ‘the neighbor’ has reemerged as a category of thought among philosophers and theologians who are seeking a path beyond the polarization of ‘friend’ vs. ‘enemy.’ The course will explore the biblical roots of the disclosure about ‘the neighbor’ in the writings of Levinas, Derrida, Badiou, Santner, Reinhard, Zizek and others. Special attention will be devoted to biblical texts from Leviticus, Ruth, Jonah, the Gospels, and Paul.

THEO 6042. The History of Jerusalem: Jewish, Christian, and Muslim Perspectives. (3 Credits)
In this course, students will learn about the ancient and medieval history of Jerusalem, from its Jebusite inhabitants before the time of King David through Suleiman’s construction of the modern city walls in the 1540s and the later Ottoman years. Students will gain experience analyzing a variety of sources—biblical and qu’ranic texts, exegetical materials, travel narratives, legal documents, maps, poetry, literature, art, archaeology, and architecture—and use a range of different (inter)disciplinary and theoretical lenses through which to study them.
Attribute: CEEED.

THEO 6103. Matthew Mark and Method. (3 Credits)
This graduate seminar offers both detailed analysis of Gospels of Matthew and Mark and a survey of contemporary critical methods as applied to these Gospels. Sessions will examine the two texts through the lenses of Christology; Discipleship and Ethics; Feminist Criticism; Form Criticism; ‘Historical Jesus’; Literary Criticism; Political Theology; Postcolonial Criticism; Redaction Criticism; and Text Criticism.

THEO 6192. Greco-Roman Context/Xtnt. (3 Credits)
This course creates a context for understanding the encounter of early Christianity with Greco-Roman culture by exploring Hellenistic and Roman history, politics, religion, social relations, economics, education, rhetoric, philosophy, literature, and the theatre.

THEO 6194. History Theory & Xtianity. (3 Credits)
This course will provide a thorough introduction to recent developments in historiography and critical theory in light of the so-called ‘linguistic turn.’ It will also explore the methodological relevance of these theoretical shifts for the study of pre-modern Christianity/historical theology.

THEO 6195. Inventing Christianity: Apostolic Fathers, Apologists, and Martyrs. (3 Credits)
A seminar on the literature produced by Christ believers during the second and third centuries CE—the so-called “Apostolic Fathers,” defenses of Christian faith and life, and accounts of the deaths of martyrs. The course seeks to comprehend the diverse ways in which Christian identity was shaped and to reconstruct the social experience of the early Christians.

THEO 6196. Early Christian Ritual. (3 Credits)
This graduate seminar surveys the evidence for ritual practices in the first few centuries of Christianity. Through engagement with theoretical literature on ritual and identity formation, we will explore what can be known about early Christian practices and interrogate our means of knowing it. Much of the course will focus on the rituals of initiation and their diverse interpretations in ancient sources, but other topics will be covered as time allows. Prior study of early Christian history and/or New Testament is recommended.

THEO 6198. Self in Early Christianity. (3 Credits)
An examination of different notions of ‘the self’ in early Christianity with particular attention to ancient ideas about status, gender, ethnicity, and cultural identity, as well as their implications for Christians in the pre-Constantinian era.

THEO 6211. Paul, Prisoner and Martyr: Political Theology in Early Christianity. (3 Credits)
A close reading of the authentic letters of Paul from prison (Philippians and Philmon), supplemented by an investigation of the image of Paul as the ‘prisoner of Christ’ in Colossians, 2 Timothy, 3 Corinthians, the Acts of the Apostles, and the Acts of Paul.
Attribute: MVSG.

THEO 6214. Old Testament Theology. (3 Credits)
An examination of different notions of ‘the self’ in early Christianity with particular attention to ancient ideas about status, gender, ethnicity, and cultural identity, as well as their implications for Christians in the pre-Constantinian era.

THEO 6215. Inventing Christianity: Apostolic Fathers, Apologists, and Martyrs. (3 Credits)
A seminar on the literature produced by Christ believers during the second and third centuries CE—the so-called “Apostolic Fathers,” defenses of Christian faith and life, and accounts of the deaths of martyrs. The course seeks to comprehend the diverse ways in which Christian identity was shaped and to reconstruct the social experience of the early Christians.

THEO 6300. Apostolic Fathers. (3 Credits)
A seminar in the body of first and second century Christian literature known as the ‘Apostolic Fathers,’ so as to gain an understanding of this literature as an expression of the life and thought of its authors and the churces in which it arose and was preserved. A secondary concern of the course involves the use of the Apostolic Fathers as historical sources for the reconstruction of the social experience of the early Christians.
THEO 6305. Introduction to Rabbinic Literature. (3 Credits)
In this course, students will explore the vast corpus of rabbinic literature and the historical, intellectual, religious, social, legal and political circumstances in which rabbinic Judaism developed in Palestine and Babylonia between the first and seventh centuries C.E. Students will gain experience reading different genres of rabbinic texts; become familiar with cutting-edge scholarship in the field; experiment with various methodologies in the study of late antiquity; and learn about a formative period in Jewish history.

THEO 6360. Alexandrian Theology. (3 Credits)
Reading and interpretation of selected writings of Clement of Alexandria, Origen, Athanasius, Didymus the Blind, and Cyril of Alexandria, against the background of the pagan and Jewish traditions of Alexandria.
Attribute: MVSG.

THEO 6365. Cappadocian Fathers. (3 Credits)
A wide-ranging but analytic reading of the most important writings of Basil of Caesarea, Gregory Nazianzus and Gregory of Nyssa, with particular attention to the doctrine of the Trinity, to Christian anthropology, and to spirituality.
Attribute: MVSG.

THEO 6367. Byzantine Christianity: History and Theology. (3 Credits)
The graduate-level survey course introduces students to the theological ideas and historical transitions that captivated the minds of Eastern Christians from the 8th to the 15th centuries. Through a careful reading of primary sources (in English translation) and the scholarly debates about those sources, we will explore the Iconoclastic controversies, the expansion of Christianity to the Slavs, the experience of Christians living under Islamic authority, and a host of issues related to rupture between Eastern and Western Christianity. In most circumstances, successful completion of this course authorizes doctoral students in Theology to teach the undergraduate cognate course.
Attribute: MVSG.

THEO 6400. Theological Anthropology and Human Diversity. (3 Credits)
As the subdiscipline of ‘theological anthropology’ speaks about the nature of our being human, how does it take into account the great variety in evidence among human beings? Particularities of race, religion, culture, disability, sexual orientation and gender will be placed in conversation with classic text.
Attributes: CEED, CEMT.

THEO 6425. St. Augustine in Context. (3 Credits)
This course investigates the life and writings of Augustine of Hippo in the context of late antiquity including philosophical and religious influences upon him as well as the controversies and archeological remains of his ministry.
Attribute: MVSG.

THEO 6426. St Augustine of Hippo. (3 Credits)
An introduction to the life and thought of St. Augustine that will include an examination of his principal theological controversies (e.g. against manichaeism).
Attribute: MVSG.

THEO 6444. Medieval Modernists: Modern Appropriations of Medieval and Ancient Christianity. (3 Credits)
In twentieth century Europe, an astonishing range of intellectuals were animated and energized by the study of pre modern and early modern Christianity. For theologians, historians, philosophers, and literary figures, Christian medieval and patristic sources were galvanizing forces of transformation, and harbingers of ethical, theological, and political renewal. This course investigates the various appropriations of medieval and ancient Christianity from the Catholic nouvelle theologe movement (Henri de Lubac, M.D. Chenu, and Jean Danielou in particular), literature (Charles Peguy), philosophy (Hannah Arendt and Luce Irigaray), and historiography (Michel de Certeau), along with secondary works by Amy Hollywood, Joan Wallach Scott, and others.

THEO 6445. Affect, Emotion, and Religious Experience. (3 Credits)
This course examines recent work in affect theory and the history of emotions (and their philosophical antecedents) as potential resources for historical and theological accounts of religious experience.
Attribute: MVSG.

THEO 6461. Mystical Theology. (3 Credits)
Examines the influences of Neoplatonic philosophy and the writings of Pseudo-Dionysius on medieval Latin Christianity, with attention to both ‘negative’ theological language and reflection on the paths to and modes of union with God. Modern deconstructive, psychoanalytic, and feminist approaches to mysticism will also be considered.
Attribute: MVSG.

THEO 6463. From Lollards to Luther. (3 Credits)
This course offers an introduction to the key themes, events, and thinkers of Christianity during the transition from what historians refer to as the late medieval to what they call the early modern period. Topics will include theological method; humanism; heresy and reform; gender; scripture; and the relationship between the church and civil society.
Attribute: MVSG.

THEO 6465. Asceticism and Monasticism. (3 Credits)
THEO 6466. Hagiography. (3 Credits)
THEO 6480. Xianizing the Barbarians. (3 Credits)
The course examines the ‘Christianizing’ of pagan peoples (Roman, Germanic, Slavic) during the late ancient and medieval periods. We begin with two basic questions: what evidence is there for the ‘Christianization’ of Europe? And how do we explain it?.
Attribute: MVSG.

THEO 6490. Christianity and Violence. (3 Credits)
This course explores the often ambivalent relationship between Christianity and violence in the pre-modern world. Readings include a broad range of primary sources including martyr acts, liturgical hymns, canon law, and Crusader chronicles as well as influential scholarly assessments of the history of Christianity and violence.

THEO 6505. Histories of Colonialism, Empire, Theology. (3 Credits)
This interdisciplinary course traces the interconnected histories of colonialism, European empire, and Christian theology in the 15th-20th centuries, with focus on the 18th-20th centuries. Special attention will be given to questions of historiography and theoretical method: the pairing of material history and philosophical/theological inquiry, the creation of ‘religion’ as a discursive category, the role of Christian theology in funding, resisting, or augmenting imperial projects, and the diversity of Christian forms of like birthed in the circum-Atlantic world.
THEO 6509. Theology and Religious Pluralism: Christian Tradition in a Religiously Plural World. (3 Credits)
This is a course on theological method in light of our contemporary context of religious diversity. The central question of the course is how Christian systematics is impacted by an awareness of religious difference. The investigation will explore Theologies of Religious Pluralism, Comparative Theology and Interreligious Dialogue, among other topics.

THEO 6510. Socially Engaged Theology. (3 Credits)
This course will examine the tradition of theology engaged with social concerns and emerging from within broader social movements. Students will be invited to participate in current social projects with local organizations as part of our exploration.
Attributes: CEED, CEMT.

THEO 6530. Modern Catholicism & Difference: Negotiating With Cultural & Religious Others (From 1534-Present). (3 Credits)
This course explores the ways in which Catholics – laity, monks and nuns, theologians, Church officials – have adapted to change, appropriated and resisted the presence of new neighbors, and built their own complex identities in negotiation with others. What difference does a deep, historical knowledge of modern Catholicism bring to the questions of difference in history we all ask today in the creation of social, political, and religious communities? Starting with the founding of the Jesuit order in 1534, themes will include efforts of the Dominicans in the Middle East, Jesuit missions, Catholic acquiescence and resistance to antisemitism during WWII, racism and racial justice, and more.
Attributes: CEED, CEMT.

THEO 6543. Aesthetics, Religion, and Modernity. (3 Credits)
This course will explore the rise of ‘aesthetics’ as a category to supplant, explain, enrich, and/or revive religious discourse within the philosophical and economic projects of Western modernity. Focus will be given to the historical conditions that made aesthetics a compelling rival or reviver of traditional religious belief and practice in the 18th-20th centuries.

THEO 6544. Belief and Unbelief Tol & Intro. (3 Credits)
Descriptions: This graduate seminar explores two related phenomena: the historical development of varieties of religious belief and unbelief; and the practice of religious tolerance and intolerance in modern Europe and North America. Since course readings focus on major historical transitions in theological, social, cultural, political, and intellectual life, students will encounter a range of methodological approaches and source materials and will develop a broad interpretive framework for understanding Western religious history since the sixteenth century.

THEO 6551. U.S. Religious History. (3 Credits)
This course consists of two parts: a survey of classic works in American religious history, followed by student immersion in archival work at manuscript collections in the New York City area. Students will conduct original historical research on sites of religious significance located in Metropolitan New York.

THEO 6553. Readings in American Religion. (3 Credits)
This course offers an historical study of theology in America that is attentive to contemporary discussions of theory, method, and historiography. Readings include primary and secondary sources in American theology and religious history from the coming of the Europeans to the 1980s. Topics may include: Colonialism and Borderlands Theologies, Puritanism, the American Enlightenment, Slave Religion, Evangelicalism, Transcendentalism, the Black Church, Immigrant Catholicism, New Thought, Mormonism, Social Gospel, Fundamentalism, U.S. Catholic Counterculture, Neo-Orthodoxy, U.S. Buddhism, Civil Rights, Liberation Theology, the Nation of Islam, and Eco-Theology.

THEO 6600. Modern Orthodox Theology. (4 Credits)
Examination of Twentieth-Century Orthodox Theological Texts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEO 6606. Theological Anthropology. (3 Credits)
THEO 6607. Christian Theologies of Salvation. (3 Credits)
The course will examine the Christian doctrine of salvation including themes such as atonement, grace, redemptive suffering, and the hope for liberation. The course will focus on how contemporary theologians critically and creatively dialog with traditional soteriologies to articulate salvation in light of the challenges of our times.

THEO 6612. New Methods in Constructive Theology. (3 Credits)
This course explores current approaches that distinguish the field of constructive theology. Possible topics include: ethnographic research, theopoetics, interreligious theology, techniques for new media and public theology, activism and advocacy, critical theories, and interdisciplinary approaches.

THEO 6615. Rahner, Lonergan, and Transcendental Method. (3 Credits)
Lonergan and Rahner represent two distinctive approaches to what is frequently called ‘transcendental method’ (although Lonergan had reservations about the term as applied to him). This course will examine Lonergan’s often neglected but crucial philosophical work insight, along with Rahner’s more specifically theological writings. The two will be compared with each other as well as with contemporary and post-modern critics.

THEO 6616. Contemp Theol of Trinity. (3 Credits)
An introductory survey of the historical development of the doctrine and an exploration of contemporary interpretations of the Trinitarian mystery in Lonergan, Rahner, and Muhlen.

THEO 6620. God in Contemp Theology. (3 Credits)

THEO 6621. God in Comparative Theology. (3 Credits)
Examination and comparison of notions of God or the Absolute (Brahman, Dharmakaya, etc.) in major theological traditions: Jewish, Christian, Muslim, Hindu, Buddhist. Classic texts will be read.

THEO 6630. Church in Contemp Theol. (3 Credits)
Some contemporary ecclesiologies from the point of view of the Church’s relationship with the world.

THEO 6631. Missiology. Mission of Church in Age of Turmoil and Strife. (3 Credits)
Theology of the Church’s Mission and its practice will be explored from global perspectives.

THEO 6634. Black Theologies and the Decolonial Option. (3 Credits)
This course examines how black American constructive theologians engage with people’s struggles for decolonization and racial freedom. Special attention will be given to recent insights in decolonial theories and the analysis of epistemology, race, gender, being, and economics.

THEO 6642. Political Theology. (3 Credits)
This course will discuss and critically analyze contemporary theories of the political, with attention being given to the recent debate over political liberalism. Texts from a variety of theologians and theological perspectives will be examined, as well as recent attempts at political theology by non-theologians.
THEO 6651. The Liturgy: How Christians Worship. (3 Credits)
This course will focus on the Roman Catholic liturgy – leitourgia – the people’s work for God. We will draw a list of topics concerning three areas: the theory of liturgical reform, the history of the “Mass,” and related concerns for the liturgy, e.g., the role of justice, inculturation, feminist worship, music, and architecture.

THEO 6652. The Liturgy: A Work of Praise and Justice. (3 Credits)
This course focuses on the Christian liturgy as the work of the people in praise of God. The fruit of this work is for the faithful to stand in right relationship with God and with one another, creating a just community.

THEO 6657. Eucharist and World Today. (3 Credits)
This course will put Eucharistic theology and practice dialogue with concerns regarding hunger, violence, and exploitation in our contemporary world.

THEO 6659. Latinx Theology. (3 Credits)
This class will analyze the diverse ways in which Latina and Latino communities in the United States have sought to speak of God and God’s relationship to their marginal existence. The course will examine the origins of Latinx theology, the particular questions that have guided theologians working with Latinx communities, and the critiques and growing edges of the field.

THEO 6671. Contemporary Christology. (3 Credits)
Current trends in Christological theology, including those of the post-Vatican II era (e.g., Rahner, Schillebeeckx, et. al.)

THEO 6674. Ecological Theology. (3 Credits)
In the light of contemporary scientific understandings of the cosmos and attendant ecological concerns, this course will study reinterpretations of Christian doctrine and ethics of the last 40 years that have been in dialogue with these developments.

THEO 6676. Sexual Ethics. (3 Credits)
An in-depth examination and critical appraisal of current discussions in Christian theological reflection relating to human sexuality. Specific attention will be given to emerging paradigms for the ethical evaluation of sexual behaviors, identities, and relationships being advanced in light of developments in social mores and ecclesial consciousness.

THEO 6710. Issues in Fundamental Moral Theology. (3 Credits)
Fundamental moral theology has undergone dramatic shifts in understanding since the moral manuals. It is now characterized by a pluralism in method and perspective that would have been inconceivable. This advanced seminar will examine several issues in the field of fundamental moral theology that have received recent critical attention. Among these will be topics such as conscience and its formation, culturally entrenched social evil, change in magisterial teaching, the concept of natural law, the influence of cultural pluralism on moral formation and reasoning, and the role of the “sensus fidelium” in moral doctrine.

THEO 6721. African American Theological Ethics. (3 Credits)
This course, which surveys African American theological and social ethics, is open to both M.A. and Ph.D. students.

THEO 6731. Christian Ecological Ethics. (3 Credits)
This course examines distinctly Christian approaches to ecological ethics, including comparative historical perspectives, methods, and key topics.

THEO 6732. Ethics and Economics. (3 Credits)
An examination of contemporary economic social issues with the aid of Catholic social teaching, and with a critical use of economic science. The social issues examined include-but are not limited to-poverty, pollution control, protectionism, unemployment, and inflation.

THEO 6733. Theology and Science. (3 Credits)
This graduate-level course attends to the history, methodologies, content of conflict, and major questions that have occurred at the intersections of scientific and theological inquiry.

THEO 6735. Ecological Ethics. (3 Credits)
This course considers the rise of ecological consciousness, environmental history, and ethical reflection in light of western philosophical and theological traditions. It aims to provide students with substantial, foundational knowledge in twentieth and twenty-first century environmental thought as well as emerging approaches to global environmental problems.

THEO 6737. God/Mystery of Suffering. (3 Credits)
David Hume has articulated what many consider to be the problem of evil for the Western theistic traditions. Indeed, for nearly three hundred years, philosophers of religion and philosophers of religion and philosophical theologians have attempted to resolve the problem of the alleged inconsistency of God’s infinite goodness, power, knowledge, and the reality of human suffering, especially innocents’ suffering. The presumption of the present seminar is very simple. Hume’s pithy rendering does not articulate the problem-or at least the whole problem. In light of this presumption, this seminar shall critically examine the various ways Christians have responded to suffering. The goal of this seminar is to have the students be able to understand the history of responses to the problems of evils in the Christian traditions, and to evaluate those responses.

THEO 6738. The Mystical-Prophetic Turn in Modern Catholic Theology. (3 Credits)
The course analyzes the thought of Johann Metz, Gustavo Gutierrez, and David Tracy as responses to the challenges of late modernity. By identifying the authors’ contexts and influences, investigating their central ideas, and engaging their critics, the course explores the philosophical and theological implications of the mystical and prophetic traditions of Christianity retrieved by political, liberation, and public theologies for contemporary thought. Other thinkers to be considered include: Rahner, Lindbeck, Ratzinger, Balthasar, Gadamer, Adorno, Ellacuria, Johnson, Goizueta, Dionysius, John of the Cross, and various biblical authors.

THEO 6740. Catholic Social Thought. (3 Credits)
Catholic social thought as found in the social encyclicals, emphasizing their theological contexts, social scientific constructs, historical background and philosophical presuppositions.

Attributes: CEED, CEMT, SOIN.
THEO 6745. Sociology of Religion. (3 Credits)
In this advanced seminar, students will analyze original texts of the classic theorists of religion—including Emile Durkheim, Max Weber, Clifford Geertz, Peter Berger, Miecke Eliade, Mary Douglas, and Robert Bellah. Topics will include secularization theory, theodicy, ritual, symbolism, religious evolution, and the religious roots of social change. Our investigation of religion in the contemporary world will lead us to investigate religious congregations and phenomena, including civil religion, generational change, popular religiosity, and spirituality.
Attributes: CEED, CEMT, CETH.

THEO 7222. New Perspectives on Paul. (3 Credits)
This course will examine contemporary interpretations of Paul from the post-World War II period to the present. Topics will include the so-called ‘New Perspective’ and recent engagements with Paul in continental philosophy.

THEO 7731. Religion and Revolution. (3 Credits)
Using El Salvador (1975-1995) as a case study, the course will examine theological and socio-political questions that emerge when believers engage in revolutions. Primary focus on theological figures and themes such as Oscar Romero, Jean Donovan, Ignacio Ellacuria, comunidades de base, the preferential option for the poor, and Christology, will be supplemented with interdisciplinary reflection on critical theory (Marx et al.), postidealist epistemology (Zubiri), and postcolonial identity (Bhabha).

THEO 7736. Bioethics. (3 Credits)
This course attempts to put the Roman Catholic and broadly Christian bioethical traditions in conversation with their secular interlocutors toward the end of examining whether or not these traditions have a place in public bioethical discourse and what that contribution might look like. Among the issues to be examined are distribution of healthcare resources, reproductive and other biotechnologies, the moral status of ‘the other’ in bioethics, and withdrawal/refusal of medical treatment.
Attributes: CEED, CEMT, HECH.

THEO 8998. IUDC Consortium Tutorial: Advanced Syriac Readings. (3 Credits)
This course is an independent study/tutorial for IUDC Consortium students from member schools, and offers an exploration of linguistic and theological aspects of Syriac writings from Late Antiquity.

THEO 8999. Independent Study. (0 to 4 Credits)
Independent Study.

THEO 9000. Professional Development Seminar. (0 Credits)
The seminar introduces advanced doctoral students to the job search process, provides help in compiling a strong application dossier, prepares students for interviews and job talks, advises students about negotiating offers, and assists students in strategizing their career paths within and beyond the academy. In addition to a number of seminar meetings, students will receive individualized attention, help editing their application materials, and practice with interviews and job talks.

THEO 9999. Dissertation Direction. (1 Credit)

Catholic Theology (M.A.)
The M.A. in Catholic Theology consists of 10 courses for students concentrating in the historical or systematic areas and 12 courses for students concentrating in Bible. All students take a core of six classes comprised of two courses each from the biblical, historical, and systematic wings of the department. After completing these core classes, students choose to focus in intensive work in one of three fields of study: Bible (six additional courses), Historical Theology (four additional courses), or Systematic Theology (four additional courses). To complete these additional courses, students may enroll in any graduate courses offered by the department (including doctoral seminars) with the permission of the instructors. Students may also take courses outside the theology department (e.g. in history, philosophy, medieval studies, etc.) with permission from their adviser.

Six additional courses required for the Bible concentration
Four additional courses required for the Historical Theology concentration
Four additional courses for the Systematic Theology concentration

Language Requirement

One of the following:
- ZZGA 0941 GSAS Language Exam 1
- FREN 5090 French for Reading
- SPAN 5090 Spanish for Reading
- GERM 5001 Graduate Reading in German I

Final Research Project

Total Credits 18

1 More information about these requirements is below.

Language Requirements

Proficiency in either French or German is also required for the master’s degree (Spanish may be substituted for one of these languages depending on the student’s academic interests). The ability to read theology in a foreign language is important for two reasons: It makes the student a member of a community of theologians that is broader than English-speaking North Americans, and it enriches the theological imagination by offering access to different ways of speaking and hence of thinking.

Students may demonstrate reading proficiency in these languages in one of two ways:
- Passing a translation exam (with a dictionary) offered by the department
- Passing a “French for Reading” (or German or Spanish) course offered at Fordham or at an approved institution

Core Course Examinations

Every M.A. student is required to take a subject examination immediately at the end of each core course to fulfill the requirements of the master’s degree. These exams are the same as the course’s final exam. These exams will be comprehensive in scope in the sense that they will cover the material studied over the duration of the semester. The faculty member who teaches the core course will prepare an exam that offers the
student a choice of essay questions. Students will have two-and-a-half hours to complete the exam.

**Final Research Project**

Each M.A. student will select a paper written for one of their courses and will revise the paper to develop interdisciplinary dimensions of this work in light of conversations conducted with faculty members in two fields of study other than the one in which the paper was originally prepared. So, for example, if a student selects a paper written for a Bible class, she will then develop the paper further with input from two faculty members in different fields (e.g. Historical and Systematics).

The revised paper will be submitted by the Friday of the 12th week of the student’s final semester to the three faculty members involved in the project. In consultation with these three faculty members, the student will schedule a one-hour time period during the last week of the semester for an oral exam on the paper. The oral exam will explore the interdisciplinary and integrative character of the work conducted.

**Theology (Ph.D.)**

**Overview**

The Ph.D. is designed for the preparation of scholars: not simply competent teachers of theology, but ones who can also communicate with and contribute to the academic community more broadly. Upon entry, students in Fordham’s Ph.D. program select one of five fields of study:

- Bible
- Judaism and Christianity in Antiquity
- History of Christianity
- Systematic Theology
- Theological and Social Ethics

All doctoral students receive five years of full funding (tuition remission and living stipends) to support their work, and all students are eligible to compete for internal and external fellowships for additional support. Fordham doctoral students are active scholars, presenting at major conferences and publishing their work on a regular basis. During their third year of study (and with the supervision of a faculty mentor), they begin teaching their own undergraduate courses.

**Admissions**

Candidates for the Ph.D. in theology are expected to have a GPA of 3.5 or higher. Completed applications will include each of the following items:

**Official transcripts**

Official degree transcripts confirming prior degree conferral should be ordered at least one month prior to the application deadline. Please ensure that they are sent directly to the Office of Admissions (fuga@fordham.edu) via secure electronic delivery. If electronic delivery is not available, please request that your transcripts be submitted directly via post, in a sealed envelope, to: Graduate School of Arts and Sciences, Office of Admissions, Fordham University, 441 E. Fordham Rd., Bronx, NY 10458. Please note: You may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.

**Official GRE scores** (should be sent directly by the testing service to the Office of Graduate Admissions, Fordham University, Graduate School of Arts and Sciences – code #2259).

**Resume/CV** (submitted electronically via the online application)

**Statement of intent** (up to 500 words, submitted electronically, via the online application)

**Writing sample** (5 - 20 pages submitted electronically, via the online application)

**Three letters of recommendation** (submitted directly by referees via the online application)

**International Students**

Please ensure that all official transcripts from previously attended post-secondary institutions are submitted in English, or are accompanied by a certified English translation. Transcripts and credentials conversion information is available on the GSAS International Students page.

**English Proficiency**

International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results. Please utilize the instructions on the GSAS English Proficiency web page to transmit your TOEFL or IELTS scores. Please note: Exemptions from this requirement can be requested by the applicant in her/his application, or can be made in writing by the applicant to fuga@fordham.edu. Kindly consult the GSAS English Proficiency web page for exemption guidelines.

Please contact fuga@fordham.edu with any admissions-related questions.

**Requirements**

**Advisor**

Upon entering the Ph.D. program, a student will be assigned an advisor working in the student’s intended Field of Study. This advisor will assist in the selection of courses, monitor the progress of language acquisition, and fill all additional roles necessary for good progress. By the conclusion of the first year of coursework, students may choose another member of the department to fulfill this role. Students certainly may, but are not required to, ask their advisor to serve as the mentor for the dissertation.

**Curriculum**

With the consultation of an advisor, students will take responsibility for planning a curriculum of study that is both broad and specialized. Coursework at the doctoral level, even outside of seminars, demands a more active role on the part of the student: rather than simply absorbing information, the student is expected to contribute to the encounter with texts and ideas, to design projects, and to pursue independent study. A list of offerings for the current semester can be found on our page on the Fordham website. Students must complete at least 66 credits of coursework to earn the Ph.D., with a minimum accumulative GPA of 3.5.

The only general requirement is that students must complete a zero credit course, THEO 5015 Teaching Theology, before they are permitted to
Language Proficiency

In the course of doctoral studies, all students will be called upon to demonstrate reading proficiency in two modern languages and will be expected to use these linguistic skills in reading for classes and papers. Unless otherwise specified, the two required modern languages are French and German (Students in Systematic Theology may substitute Spanish for French or German). This can be completed by taking a reading exam (ZZGA 0941) or by completing reading courses (FREN 5090 or GERM 5001). For some students, a similar knowledge of ancient languages will need to be demonstrated. Check your proposed Field of Study for more information about language requirements.

Graduate Teaching Assistantships

As part of the Graduate Teaching Assistantship (GTA) program, every second-year Ph.D. student will have an opportunity to work with at least one faculty member in a Fordham undergraduate classroom prior to teaching on his or her own in the third year.

Comprehensive Exams

The student is required to choose two general areas of research within his or her primary field of study and one area in a related field of study, which will constitute the minor exam. The fourth exam will be more narrowly focused and should reflect the student's intended subfield of dissertation research. Ordinarily, a student will take the exams (THEO 0930) during the sixth semester.

Dissertation

A doctoral dissertation is the literary exposition of a thesis. The thesis is the theological proposition for which one marshals evidence and arguments. Although scholarship may be focused in different ways in the various field specializations, every dissertation will include some degree of research, at least into the state of a question; and every thesis will include some degree of argument and judgment, at least regarding the theological relevance of one’s data. The dissertation must be methodologically self-conscious. It must justify its method and structure and continually demonstrate their presence. Students must develop a proposal (THEO 0950), have the proposal accepted (THEO 0960), and have continued direction (THEO 0970) from your faculty advisor(s).

Concentrations

Bible

The program in Bible equips students with a sound linguistic and exegetical training for research and teaching. Reading courses in Hebrew, Aramaic, and Greek are fundamental to the program, and study of other ancient languages relevant to the student’s area of research are available through the Inter-University Doctoral Consortium and the New York Theological Group.

In addition to French and German, students in Bible must demonstrate proficiency in Hebrew and Greek through departmental exams and proficiency in Aramaic through a course or tutorial.

A student whose field of study is Bible will take his or her two major exams in Hebrew Bible/Old Testament and New Testament. The dissertation area exam will focus on the testament in which the student is concentrating.

Judaism and Christianity in Antiquity

Judaism and Christianity in Antiquity is a field of study for doctoral training that enables students to understand the encounters of Jews and Christians with other cultures of the Greco-Roman world.

Fordham's program promotes immersion in the rich diversity of ancient communities and traditions, from the Levant and Asia Minor to North Africa and Rome. It provides advanced instruction in the methods, issues, and resources of Second Temple Judaism, New Testament, Rabbinics, and early Christian studies. Our faculty members embrace interdisciplinary research into literary sources, material artifacts, and ritual practices in order to explore theological themes and diverse constructions of identity.

As part of the courses required of all Ph.D. students in theology, students are required to take one course in Ancient Judaism (THEO 6026) and one course in Greco-Roman World (THEO 6192 Greco-Roman Context/Xtnt). Students select two general exams from the following list of five options. Some restrictions apply. See appendix 4 in the Graduate Student Handbook (p. 811). The five options are, The Standard New Testament exam offered in Bible, The Standard Patristics/Early Christianity exam (which covers ca. 250-600 CE) offered in History of Christianity/Historical Theology, An Ante-Nicene Christianity Exam, A Second Temple Judaism Exam, and A Greco-Roman World Exam.

In dissertation research, students are encouraged to push the current boundaries of topics and methods in their chosen fields. Our faculty members embrace research into practices and artifacts, as well as the customary literary sources, in order to explore theological themes and diverse constructions of social identity.

History of Christianity

Faculty members and students in history of Christianity/historical theology examine the ways in which Christians, through the centuries, have engaged their tradition, its beliefs and practices, and the world in which they live. Theology and doctrine, devotional life and practices, liturgy, institutions, cultural productions, and lived religion are all foci for study. Faculty and students focus on specific theologians in particular contexts (e.g., Augustine, Gregory of Nyssa, Henri de Lubac), on historical periods and/or regions (e.g., the early Byzantine era, the medieval west, the United States, 20th century Europe), or on themes throughout Christian history (e.g., asceticism, the papacy, heresy, Jewish-Christian relations, mysticism, gender, embodiment, sacred space).

In addition to French and German, students in historical theology/history of Christianity who intend to write a dissertation in a pre-modern period for which Latin and/or Greek is necessary must demonstrate proficiency in the relevant language(s) by the successful completion of the relevant exam(s).

At the current time, the faculty in historical theology/history of Christianity define the possible areas of research in which a student may select a major or minor exam as follows: Early, Medieval, and Modern. Each area of research has its own bibliography selected by the faculty. A student whose field of study is historical theology/history of Christianity will select two of these areas of research for his or her major exams.

Updated: 07-27-2020
Systematic Theology

Systematic theology engages Roman Catholic theology in historical and contemporary eras, while also facilitating the study of Orthodoxy, Protestantism, and other religious traditions and worldviews. In addition to classical topics (such as theologies of God and Christ), the Systematic theology program enables students to focus on ethics, ecclesiology, ecological theology, feminist theology, liberation theology, liturgical theology, Orthodox theology, philosophical theology, and Catholic social thought.

In an effort to bring more precision and, indeed, comprehensiveness to the comprehensive exams in systematic theology, each student in the field of study will adhere to the following principles concerning the two major exams. The first topic that all students in systematic theology will propose is an overview of 20th and 21st century theology. A bibliography of “Paradigmatic Works” is available as the basis for this question. The second topic that each student will propose is one of the areas of the “grid” in systematic theology. At the current time, these areas are identified as follows: fundamental theology, theology of God, Christology, theological anthropology, ecclesiology, sacramental theology, and moral theology.

Theological and Social Ethics

This newly launched field of study in the Department of Theology enables students to develop rigorous and robust scholarly expertise in theological and social ethics, informed by attention to theory, context, and practice. This field of study integrates and amplifies existing departmental and university strengths in the contemporary and historical study of ethics. Faculty members bring particular acumen in Catholic traditions, feminist and liberationist ethics, bioethics, economic, and environmental ethics.

As part of the courses required of all Ph.D. students in theology, students must enroll in the annual designated doctoral seminar (identified from among annual departmental course listings) and in a one-time praxis-based tutorial (to amplify the student’s experience in considering issues of theological, social, and ethical significance by attending to context and praxis).

All students in TSE are required to pass language exams in French and German. Students may elect to substitute Spanish, depending upon the student’s scholarly research agenda.

The structure of the doctoral exams follows established procedures for the department. The first major exam must be “Major Texts in Theological and Social Ethics.” The second major exam addresses key themes, texts, methods, and/or figures in a particular area but must be sufficiently distinct from the dissertation topic. Students may choose among the options that include: philosophical sources and theological ethics; foundational theological ethics; Catholic social thought; topical exams (bioethics, economic ethics, gender and sexuality, liberationist and feminist, race and white privilege, environmental ethics); and theological ethics in comparative and historical contexts. The minor exam is chosen from existing exams offered by the other fields of study and must be sufficiently distinct from the dissertation topic.

Urban Studies

Cities around the globe are facing complex issues in need of creative solutions. At Fordham, our solutions-oriented interdisciplinary program will prepare you to tackle the challenges confronting urban society in a range of areas:

- Economic development
- Inequality and social justice
- Public health
- Environment and sustainability
- Urban arts and creative industries
- Historic preservation and gentrification
- Technology and the development of “smart” cities.

With New York City as our main laboratory, you'll design a unique course of study tailored to your own interests. You'll engage in fieldwork with real-world implications and emerge with a nuanced understanding of the powerful forces that are shaping our cities, as well as the problem-solving skills required to improve the quality of life for their citizens.

For more information about Urban Studies, please visit our page on the Fordham website.

Programs

- MA in Urban Studies (p. 851)

Courses

**URST 5000. Issues in Urban Studies. (3 Credits)**
Required foundation course for M.A. in Urban Studies. Introduces students to current debates in urban studies and to modern urban theory. Themes covered include: immigration, race and ethnicity, urban culture and history, urban sociology, urban planning, city and globalization.

Attributes: DATA, HULI, PMMA.

**URST 5020. Urban Political Processes. (3 Credits)**
Examines urban political systems concentrating on the primary institutions and processes that comprise the urban milieu. Focuses on the major theories and approaches that attempt to explain urban politics and urban political systems.

Attributes: INST, ISIN, PMMA.

**URST 5030. American Suburb: Rise and Fall. (3 Credits)**
Examination of 19th Century origins of suburb as counterpoint to the city and the role of nature in shaping the design of this new form of country living. The twentieth century transformation of the suburb into the American dream will be evaluated in light of the resultant sprawl and the policy critiques of this pattern of growth. The class project will involve the design of a sustainable suburb for the 21st century.

Attribute: HIST.

**URST 5035. City and Climate Change. (4 Credits)**
This course is an examination of the impact of climate change and sea level rise on cities. It covers international examples as well as American cities, with particular focus on the New York metropolitan area. There are weekly readings and discussion. Experts from various interdisciplinary fields form part of the material developed in this course. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: URSG.

Prerequisite: URST 5000.

**URST 5040. Urbanism. (3 Credits)**
Overview of urban philosophy and urban planning theory in the modern period with emphasis on contemporary scholarship as well as planning methods and techniques. Course scope is international.

Attributes: INST, ISIN.
URST 5045. Informal Cities. (3 Credits)
This course will examine informal organization as it takes place under the impact of political crisis, natural and manmade disasters, and the ongoing crisis of poverty. A variety of sources will be used including written records, films, and imagery.

URST 5066. Urban Health and Environment. (3 Credits)
This course will examine the intersection of urban life, the urban environment, individual and community health, and public policy. In doing so, it will examine the evolution of urban public health problems, the urban environment, and the role and responsibility of the political system to respond to individual and community health issues in urban settings. A variety of approaches to the study of urban public policy as well as selected issues from the study of urban public and environmental health will be highlighted.

Attributes: CEED, CETH, ENST, ESEL.

URST 5070. Environmental History of the American City. (3 Credits)
A survey of New York City’s history that emphasizes its changing economy, ecology, geography, and society over 400 years. Subjects include the political economy of poverty, the global outreach of New York, its capacity to change the environment of other places, and urban redevelopment. Students will conduct preliminary research and prepare a prospectus for a research project.

Attributes: ENST, ESEL, ESHC.

URST 5080. On the Waterfront: Maritime New York History and Policy. (3 Credits)
This course will explore the rich exchange of goods and people which made New York a ‘river city,’ the problematic legacy of that long maritime history, and the complex array of public policy questions that are redefining our relationship to the edge.

URST 5081. Brooklyn Waterfront: The Social Production of Space. (3 Credits)
This course examines the social, economic, ideological, and technological forces that produced the new Brooklyn waterfront. Brooklyn Bridge Park is the case study and focuses on its historic transformation from a ferry landing and the largest private freight terminal in the world into a public waterfront park at the beginning of the 21st century. The course explores the role of public policy, community debates, as well as the historical memory, visual images, and local uses that shaped the new vision of this space. Field work and research at the Brooklyn Historical Society required.

URST 5090. Lincoln Center Arts. (3 Credits)
Considers the performing and visual arts and how they are mediated by the stature of the Lincoln Center complex. Topics include John D. Rockefeller 3rd’s dream, the politics and design of the complex, Robert Moses and Lincoln Square, history of the arts in NYC, politics and economics of the arts.

URST 5095. Space, Place, Immigrant Cities. (3 Credits)
This course will introduce students to the main issues and current debates on immigrants in large urban areas in the U.S. Due to their density, cities represent microcosms of interaction and identity formation among and between different groups. This often manifests itself spatially, as certain neighborhoods become cores of residence and territorial concentration for immigrants. In the process of settling, immigrants also start identifying strongly with their space of settlement. This course will focus on the contemporary manifestations of immigrant settlement in cities, while also paying attention to new settlement patterns in reconfigured metropolitan spaces.

URST 5140. Themes in Urban Public Policy and Power. (3 Credits)
This course surveys a series of issues and ideas in urban public policy in order to understand why urban actors compete, what power means to them, and what sorts of dynamic policy issues they confront.

URST 5252. Urban Theory and the Modern City. (3 Credits)
Provides an overview of key theory themes of the 20th/21st American city and explores the modern city at the crossroads of socio political study and interdisciplinary urban research. Themes include city and society, class and urban space, urban poverty, race and culture, diversity in the global city, crisis and conflict, gender and sexuality, sovereignty, just cities, sanctuary cities, and more.

URST 5900. Global Cities. (3 Credits)

URST 6080. Urban Studies Fieldwork. (1 to 6 Credits)
Required internship or field research in New York City or another large scale US or foreign city, depending on student interest. Students must have completed 12 credits and received approval from program director to enroll in this course. The field study may be related to the required research project. Maintenance- open enrollment.

URST 6200. Research Skills in Urban Studies. (3 Credits)
Introduces students to urban research methods, setting up research design including deriving hypotheses and conclusions and the application of qualitative and quantitative approaches.

Attribute: DATA.

URST 6999. Urban Studies Research. (1 to 6 Credits)
Required research project for Master’s Thesis or project. Prerequisites: 12 completed units, URST 6080, and program approval. Leads to completed thesis or project.

URST 7999. Urban Lab. (4 Credits)
Graduate course with field study component on specific urban topics. Co-taught by faculty across the university and open to all graduate students. Focuses on applied urban research and community engagement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

URST 8100. Urban Studies Internship. (0.5 to 6 Credits)
This is an internship course for graduate students working on internships, and for international students working on their Curricular Practical Training (CPT). .5-6 credits.

URST 8999. Independent Study. (1 to 4 Credits)

Urban Studies (M.A.) Overview

The urban studies program at Fordham University is a unique, 16-month interdisciplinary M.A. program, which introduces students to post-graduate academic learning about urban history, policy, social issues, minority representation, immigration, economics, transit, and design, while also encouraging them to seek out the urban experience. Located right in the heart of New York City, and serving two campuses (the Bronx and Manhattan), the urban studies program represents an exceptional fusion of town & gown. We encourage our students to engage in academic thinking and learning, while also confronting the socioeconomic and political realities of the city and its communities.

During the first year of their studies, our M.A. students complete the core courses, which are intended to lay an interdisciplinary foundation for their own research projects. During the summer, and the last semester of their studies, our students can pursue their own special “menu” of
courses while completing their field research and writing their thesis. We accommodate full- and part-time students, and offer a limited amount of merit-based funding for new applicants.

Urban studies M.A. graduates work in community organizing, education, and local and state politics; they start their own businesses, or pursue urban planning, doctoral, or law degrees. To accommodate part-time students, field research, and internships, all of our core classes are offered after 5 p.m. For their electives, students can create their own schedules, during the day or the evenings, and choose between the Manhattan and the Bronx campuses. They can also take advantage of a broad range of courses from economics, history, political science, sociology, and many more.

Requirements

Depending on the number of courses taken each semester, the degree is a three- or four-semester program for full-time students (for example, three semesters plus field work in the summer). The degree requires completion of 36 credits (12 courses) and a formal master’s thesis. Three core courses establish a common base of knowledge and research skills, in addition to field work and a research project. Students then complete seven elective courses across a variety of disciplines depending on their individual interests.

1 Electives can be choose from any graduate-level urban studies course (p. 850) or any course with the URSG attribute, listed below.

2 Students complete the field work research for their master’s thesis in New York City or in another large-scale city in the United States or foreign country. It may be completed during the academic year or the summer. Before registering for field work, a student must complete the required courses listed above and be in good academic standing. The thesis advisor or the urban studies director must approve and monitor all field work research. The field study must be directly related to the student’s master’s thesis.

3 Each thesis project is mentored by a faculty member specializing in the chosen field of study.

Admissions

Admission Requirements

Candidates for the M.A. in urban studies are expected to have a minimum GPA of 3.0 from an accredited college or university. Completed applications will include each of the following items:

- Resume/CV
- Statement of intent: up to 500 words
- Three letters of recommendation: from professors or employers, submitted directly by referees
- Writing sample: 5 to 7 pages (maximum)
- Official degree transcripts: Transcripts confirming prior degree conferral are required for all applicants, regardless of matriculation status. These should be ordered at least one month prior to the application deadline for your program of interest. You may upload unofficial copies of your transcripts to your application while the Office of Admissions awaits receipt of your official transcripts.
- English proficiency: International applicants whose native language is not English are required to complete and submit to GSAS prior to matriculation their official scores from the Test of English as a Foreign Language (TOEFL). GSAS will also consider a student’s International English Language Testing System (IELTS)—Cambridge English Proficiency Level language testing results.

The GREs are not required, unless you are interested in applying for financial aid.

For more information about admissions to the Graduate School of Arts and Sciences, please visit their page on the Fordham website.
GRADUATE SCHOOL OF EDUCATION

The following Vision and Mission statements, unanimously affirmed by the Graduate School of Education School Council on May 5, 2008, confirm our beliefs about the Graduate School of Education’s purposes and aspirations.

Our Vision
Fordham University Graduate School of Education will enhance its national and international recognition as a leader in the generation and dissemination of knowledge and skills for teachers, counselors, psychologists, school administrators, and other educational practitioners and scholars who serve diverse populations.

Our Mission
In keeping with the University’s Jesuit tradition of rigorous academic endeavor, service to complex urban and metropolitan communities, and dedication to the intellectual, moral, and socio-emotional development of the individual, the Graduate School of Education’s mission is to

- create and nurture an inclusive, dynamic, intellectual, and reflective community that generates knowledge and promotes inquiry and excellence;
- prepare teachers, counselors, psychologists, school administrators, researchers, and other professionals who are committed to social justice, personal responsibility, and equity for all learners;
- apply and expand the theory and knowledge of their disciplines through the use of reflective pedagogy to meet the changing educational needs of children and adults from richly diverse communities;
- serve national and international educational communities regardless of race, cultural background, religion, and ethnicity.

The challenges of the 21st century are complex, and solutions call for thoughtful, knowledgeable leaders and creative, cooperative responses. Working with schools, social agencies, and others, the Graduate School of Education is proactive—identifying emerging issues, providing on-target professional preparation and development programs, and helping practitioners understand and apply the most promising theoretical constructs.

Ideally located in the heart of the New York metropolitan area, the Graduate School of Education has forged strong partnerships with public and private schools, other schools within Fordham, other colleges and universities, business and government groups, and human service organizations.

The Graduate School of Education reflects the Jesuit tradition of academic excellence in a values-laden setting. High standards of scholarship are evident in all of the school’s programs. A dynamic balance exists between theory and practice, and among research, teaching, and community service, maintained through careful faculty recruitment and development. Faculty and student relationships are mutually supportive and reflect the belief that education is paramount in shaping the kind of society we desire and making the world a better place for all people.

- Teaching English to Speakers of Other Languages, Advanced Certificate (p. 861)
- Therapeutic Interventions (M.S.E.) (p. 946)

A brief introduction to each academic program area is followed by specific descriptions of program activities, and admission and graduation requirements. The programs with specializations and electives acknowledge the expertise and interests of faculty and students.

Advanced and Specialist Teaching Programs (M.S.E.)

The Fordham Graduate School of Education offers several programs for certified teachers who seek to develop professional competencies in specialized areas. These programs lead to a master’s degree in education and certification in a specialization.

- Childhood Special Education, M.S.E. (p. 854)
- Early Childhood Special Education, M.S.E. (p. 854)

- Literacy Education (Birth-Grade 6), M.S.E. (p. 855)
- Literacy Education (Grades 5-12), M.S.E. (p. 855)

Childhood Special Education (M.S.E.)

30 credits
NYSED 25434/25444

The master's degree program in Childhood Special Education prepares teachers who already have childhood (grades 1–6) or elementary certification (pre-k–6), offering the knowledge and skills needed for teaching special education in grades 1 through 6. The coursework and field experiences develop competencies in understanding, assessing, and instructing children with mild disabilities and lead to New York state certification as a teacher of Children with Disabilities in Childhood Education.

Admissions

In addition to the general admission and completion requirements for master's-level graduate study, candidates must provide evidence of their initial/provisional or permanent/professional certification as a childhood or elementary teacher.

Early Childhood Special Education (M.S.E.)

30 credits
NYSED 25486/25489

The 30-credit master's degree program in early childhood special education prepares teachers who already have early childhood (birth-grade 2) or elementary certification (pre-k–6), offering the knowledge and
skills needed for teaching special education in programs for children from birth through grade 2.

This program places special emphasis on children with disabilities in preschool and the primary grades. The coursework and field experiences develop competencies in understanding, assessing, and instructing children with disabilities and lead to New York state certification as a teacher of Children with Disabilities in Early Childhood Education.

Admissions
In addition to the general admission and completion requirements for master’s-level graduate study, candidates must provide evidence of their initial/provisional or permanent/professional certification as an early childhood or elementary teacher.

Literacy Education, Birth-Grade 6 (M.S.E.)
30 credits
NYSED 25425/25423

The master's degree for literacy specialists is designed for certified teachers who are preparing for professional responsibilities supporting preschool to sixth-grade teachers in literacy.

Graduates of the program earn a Master of Science degree and are qualified and endorsed for New York state certification as a literacy specialist for birth through grade 6. In addition, they meet the requirement for professional certification in the area of their initial certification. Graduates enhance their understanding of reading-writing-learning connections and become increasingly proficient at helping students from diverse backgrounds become confident, successful, lifelong learners. Included as part of the program is a 50-hour practicum accomplished through one-to-one, small-group, and whole-class experiences.

Admissions
In addition to the general admission and completion requirements for master’s-level study in the Graduate School of Education, applicants must provide evidence of their initial/provisional or permanent/professional certification as an early childhood, childhood, or prek–12 teacher, including completion of 9 credits in Literacy Education and 6 credits in Inclusion/Special Education.

Literacy Education, Grades 5 through 12 (M.S.E.)
30 credits
NYSED 25426/25424

Updated: 07-27-2020
The master’s degree for literacy specialists (Grades 5-12) is designed for certified teachers who are preparing for professional responsibilities supporting teachers of grades 5 to 12. Graduates of the program earn a Master of Science degree and are qualified and endorsed for New York state certification as a literacy specialist for grades 5 through 12 and meet the degree requirement for professional certification in the area of their initial certification.

The program is designed for those preparing for professional responsibilities designing, implementing, and assessing reading and literacy programs for grades 5 through 12. Included as part of the program is a 50-hour practicum accomplished through one-to-one, small-group, and whole-class experiences.

Admissions
In addition to the general admission and completion requirements for master’s level study at the Graduate School of Education, candidates must provide evidence of their initial/provisional or permanent/professional certification as a middle childhood or specialist teacher for grades 7 through 12, 6 credits in Literacy Education, and 6 credits in Inclusion/Special Education.

Certificate and Extension Teaching Programs: Non-degree (Advanced Certificate)

The Fordham Graduate School of Education extension programs are available to certified teachers seeking extensions beyond the area in which they are initially certified. These are also available to current students matriculated in initial certification (M.S.T.) programs who want to add an extension certificate to their current program. All lead to Fordham University endorsement for New York State certification in these extension areas.

- Bilingual Education, Advanced Certificate (p. 856)
- Bilingual Special Education, Advanced Certificate (p. 857)
- Childhood Special Education, Advanced Certificate (p. 857)
- Early Childhood Special Education, Advanced Certificate (p. 858)
- Exceptional Adolescents with Subject Extension, Advanced Certificate (p. 858)
- Middle Childhood Biology 7-9, Advanced Certificate (p. 859)
- Middle Childhood Chemistry 7-9, Advanced Certificate (p. 859)
- Middle Childhood English 7-9, Advanced Certificate (p. 859)
- Middle Childhood Mathematics 7-9, Advanced Certificate (p. 860)
- Middle Childhood Physics 7-9, Advanced Certificate (p. 860)
- Middle Childhood Social Studies 7-9, Advanced Certificate (p. 860)
- Special Education/Teaching English to Speakers of Other Languages, Advanced Certificate (p. 861)
- Teaching English to Speakers of Other Languages, Advanced Certificate (p. 861)

Bilingual Education, Advanced Certificate

15 credits
NYSED 32679/32795 ; ITI 40172

The Bilingual Education Extension program is for teachers who already possess initial, provisional, permanent, or professional certification in early childhood (birth–grade 2), childhood (grades 1–6), or adolescence (grades 7–12). Individuals who do not possess an initial teaching certification but are matriculated in an initial teacher education program at Fordham University may also apply.

The program leads to an endorsement for an extension to the early childhood, childhood, or adolescence certification to teach bilingual education. The program does not lead to an academic degree.

Admissions
In addition to the general admission requirements for the Graduate School of Education, applicants must meet the following requirements:

- Applicants must hold New York state initial, provisional, professional, or permanent certification as a classroom teacher (early childhood, childhood, or adolescence) or show proof of matriculation in a teacher education program (early childhood, childhood, or adolescence)
- Applicants must be competent in a language other than English, as demonstrated by fulfilling one of the following three options:
  a. taking and obtaining a passing score in the ACTFL Language Test (oral and written) in the target language;
  b. sharing documentation in transcripts of having completed undergraduate studies in the target language; or
  c. agreeing to successfully complete two courses in the target language.
• International applicants for whom English is an additional language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current¹ test scores for English language proficiency for admission to the Graduate School of Education:
  • IELTS¹: 7 for general test score; no subtest can be lower than 6
  • TOEFL¹: 577 for paper test, 90 for internet-based test (IBT)
• Applicants must have a minimum of 3.0 GPA in graduate work.
• Applicants must submit two professional/academic recommendations.

¹ Scores can be no more than two years old.

Total Credits 15

¹ Requires completion of 10 hours of fieldwork in a school that has a bilingual education program.

Students pursuing an initial teaching certification degree (MST) who add an Advanced Certificate in Bilingual Education as an extension may, with the approval of their advisor, apply CTGE 5420 Educating Culturally and Linguistically Diverse Learners: Pre K-12 towards both their MST degree and advanced certificate.

Bilingual Special Education, Advanced Certificate

15 credits

NYSED 32725/32799

The Bilingual Special Education Extension Program is for teachers who already possess initial, provisional, permanent, or professional certification in special education. The program leads to an endorsement for an extension to the special education certification to teach bilingual special education. The program does not lead to an academic degree.

Individuals who are matriculated in an initial teacher education program in special education at Fordham University may also apply.

Admissions

In addition to the general admissions requirements for the Graduate School of Education, applicants must have the following:

• a copy of New York State initial/provisional/professional or permanent certification as a classroom teacher (early childhood, childhood, or adolescence) or proof of matriculation in a teacher education program (early childhood, childhood, or adolescence) at Fordham University
• 12 credits in a language other than English
• 3 credits in English Literature
• 3 credits in English Composition/Writing

International candidates for whom English is an additional language are required to take and achieve a passing score in one of two tests: the Test of English as a Foreign Language (TOEFL) or the International English Language Test (IELT). The following scores are the recommended minimum current¹ test scores for English language proficiency for admission to the Graduate School of Education:
  • IELTS¹: 7 for General Test Score; no subtest can be lower than 6
  • TOEFL¹: 577 for paper test, 90 for Internet based (IBT) test
• minimum 3.0 GPA in graduate work
• two professional/academic recommendations

¹ Scores can be no more than two years old.

Total Credits 15

¹ Requires completion of 15-20 hours of fieldwork in a school that has a bilingual education program.

Childhood Special Education, Advanced Certificate

15 credits

NYSED 36085/35086

The Childhood Special Education Advanced Certificate program is for teachers who already possess initial, provisional, permanent, or professional certification in Childhood (grades 1-6) or Elementary Education (pre-k-6). The 15-credit program leads to New York state certificate for teaching Students with Disabilities (grades 1-6). The coursework and field experiences develop competencies in understanding, assessing, and instructing students in special education.

The program leads to a certificate, but not a degree.

15 credits

NYSED 36085/35086

The Childhood Special Education Advanced Certificate program is for teachers who already possess initial, provisional, permanent, or
professional certification in Childhood (grades 1-6) or Elementary Education (pre-k-6). The 15-credit program leads to New York State certificate for teaching Students with Disabilities (grades 1-6). The coursework and field experiences develop competencies in understanding, assessing, and instructing students in special education.

The program does not lead to a degree.

Admissions
In addition to the general admission and completion requirements for master's level graduate study, candidates must provide evidence of their initial/provisional or permanent/professional certification as a childhood or elementary teacher.

Candidates who did not take a special education foundation course prior to admission can take a foundation course concurrently with required courses for the extension program.

Exceptional Adolescents with Subject Extension, Advanced Certificate
15 credits
NYSED 34670/34677

The Students with Disabilities 7-12 Generalist extension is for teachers who already possess initial, provisional, permanent, or professional certification as a Classroom Teacher, Grades 7-12, in at least one Subject Area (biology, chemistry, physics, earth science, social studies, mathematics, or English language arts). The leads to certification to become the teacher of record for a special class in the candidate's certification subject area or support, consult, and collaborative roles. This program does not lead to a degree.

The coursework develops competencies in understanding principles and policies of special education, and proficiency in assessing and providing evidenced-based intervention and instruction for culturally diverse adolescents with a range of disabilities.

Admissions
In addition to the general requirements for admission to the Graduate School of Education, applicants must hold current general education initial, provisional, permanent, or professional certificate in a subject area and a master's degree.

Middle Childhood Chemistry 7-9, Advanced Certificate

12 credits
NYSED 25439/25449

The middle childhood extension program builds on previous coursework in childhood education and leads to certification in chemistry teaching for grades 7–9. The program is open to persons who are completing the M.S.T. in childhood education or who already possess initial/professional certification in childhood education or provisional/permanent certification in elementary education (Pre-K–6).

Admissions

In addition to the general requirements for admission to the Graduate School of Education, applicants must

- Provide evidence of teacher certification in childhood or elementary education, or concurrent pursuit of one of Fordham’s childhood education degree programs; and
- Complete or have completed 30 credits or more in a chemistry major or concentration, including coursework in these areas: inorganic chemistry, organic chemistry, analytic chemistry, physical chemistry, and biochemistry.

Special Education/Teaching English to Speakers of Other Languages, Advanced Certificate

15 credits

NYSED 34103/34104

The English as a Second Language Special Education Extension Program is for teachers who already possess initial, provisional, permanent, or professional certification in special education. Individuals who do not possess an initial teaching certification but are matriculated in an initial teacher education program in special education at Fordham University may also apply.

The program leads to an endorsement for an extension to the special education certification to teach ESL special education. The program does not lead to an academic degree.

Admissions

In addition to the general admissions requirements for the Graduate School of Education, applicants must have the following:

- a copy of NYS initial/provisional/professional or permanent certification as a classroom teacher (special education) or proof of matriculation in a teacher education program (special education) at Fordham University
- 12 credits in a language other than English
- 3 credits in English Literature
- 3 credits in English composition/writing
- International candidates for whom English is an additional language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current test scores for English language proficiency for admission to the Graduate School of Education:
  - IELTS: 7 for General Test Score; no subtest can be lower than 6
  - TOEFL: 577 for paper test, 90 for Internet-based (IBT) test
- minimum of 3.0 GPA in graduate work
- two professional/academic recommendations

1 Scores can be no more than two years old.

Teaching English to Speakers of Other Languages, Advanced Certificate

15 credits

NYSED 32677/32793; ITI 40174

The TESOL Advanced Certificate Program is for teachers holding an initial, provisional, permanent, or professional certificate in early childhood (birth–grade 2), childhood (grades 1–6), or adolescence (grades 7–12 in any one of the subject areas offered at Fordham) education who are interested in expanding their knowledge about working with Emergent Bilingual students (EBs). Individuals who do not possess an initial teaching certification but are matriculated in an initial teacher education program at Fordham University may also apply.

The program leads to a certificate and to endorsement for an extension to teach English as a second language. The program does not lead to an academic degree.
Admissions

In addition to the general admissions requirements for the Graduate School of Education, applicants must have the following:

- a copy of New York state initial, provisional, professional, or permanent certification as a classroom teacher (early childhood, childhood, or adolescence) or proof of matriculation in a teacher education program (early childhood, childhood, or adolescence) at Fordham University
- 12 credits in a language other than English
- 3 credits in English literature
- 3 credits in English composition/writing
- International candidates for whom English is an additional language are required to take and achieve a passing score in one of two tests: the Test of English as a Foreign Language (TOEFL) or the International English Language Test (IELT). The following scores are the recommended minimum current test scores for English language proficiency for admission to the Graduate School of Education:
  - TOEFL: 577 for paper test, 90 for Internet based (IBT) test
  - minimum 3.0 GPA in graduate work
  - two professional/academic recommendations

Scores can be no more than two years old.

Counseling and Counseling Psychology Programs

Overview

Office: Room 1012
Phone: 212-636-6460, 212-636-6477

The Division of Psychological and Educational Services (PES) offers master’s and doctoral programs in Counseling and Counseling Psychology.

Programs in counseling develop knowledge and expertise for individuals for positions in Pre-K–12 schools and in mental health settings for counseling services. At the doctoral level, the Counseling Psychology program leads to academic careers in teaching and research, college counseling centers, hospitals, mental health settings, and independent psychological practice.

Programs in school psychology develop knowledge and expertise for individuals for positions in Pre-K–12 schools, for psychological services to children in health-service settings, for academic and research careers, and for independent psychological practice.

General Requirements

PES applicants must meet the general and specific program requirements described in this bulletin. An interview may also be required to reveal more about the applicant’s personal and professional goals and qualifications.

All students accepted into a PES program are assigned a faculty adviser. Students, however, are responsible for meeting all requirements and deadlines for the completion of their studies in a satisfactory manner.

All Ph.D. students in the division must file for evaluation for permanent matriculation status during the semester after they have completed their first 12 to 15 credits at Fordham.

Admission to any of the PES programs also obligates students to uphold the appropriate ethical standards of the professional organizations, such as the American Psychological Association, and professions for which students are preparing.

Credit for previous graduate work may be granted, depending upon its relevance to the student’s program at Fordham. The following minimum number of credits must be completed in the Fordham Graduate School of Education: 54 credits for master’s in school or mental health counseling programs; 45 beyond the master’s for doctoral degree programs. With approval, students may take some of these credits in other schools of Fordham University. Exemptions from any courses will follow existing GSE procedures.

All PES students must pass a comprehensive assessment before graduation. All students should consult with their advisers regarding the timing and nature of comprehensive assessments.

Students and graduates of Fordham’s counseling and counseling psychology programs are expected to be guided in their professional conduct by ethical principles, such as those described in the codes of their professional associations. They must exercise personal responsibility for continuing self-evaluation and personal and professional development.

The Fordham University counseling psychology program is accredited by the American Psychological Association and is based on the scientist-practitioner model. For more information, contact the

Office of Program Consultation and Accreditation of the American Psychological Association
750 1st Street NE, Washington, DC 20002
Telephone: 202-336-5979
Email: apaaccred@apa.org

The master’s programs in school counseling and mental health counseling are accredited by the Master’s in Psychology and Counseling Accreditation Council (MPCAC).

Counseling Psychology (Ph.D.)
Overview
NYSED 86174
The Ph.D. program in counseling psychology is guided by a reflective, scientist-practitioner model of training and dedicated to the preparation of culturally competent and ethical psychologists. Our doctoral program is designed to provide students with a strong foundation in the major areas of psychological theory and research as well as a deep understanding of how these areas relate to and influence counseling practice. Furthermore, our program emphasizes multicultural counseling competencies, professional ethics, and social justice advocacy.

Program graduates will have satisfied the academic and internship requirements for licensing as a psychologist in New York state. Upon completion of all requirements for the Ph.D. degree, students are qualified for practice either independently or in colleges, agencies, clinics, hospitals, or other clinical settings, and are also prepared for research or academic careers.

The program is structured so that it is open both to those who have already completed a master’s degree or professional diploma program in counseling and to those who have had no previous graduate course work in the field. The number of credits needed to complete the program is based on a student’s standing upon entry.

The Ph.D. degree program in counseling psychology is accredited by the American Psychological Association:
Office of Program Consultation and Accreditation
American Psychological Association
750 1st Street NE, Washington, DC 20002
Phone: 202-336-5979
Email: apaaccrds@apa.org
Web: www.apa.org/ed/accreditation

Admissions
The program actively seeks students who have demonstrated an ability to excel academically, are dedicated to developing their research and clinical competence, and whose primary professional goal is to work in an applied clinical, research, or academic setting within the field of psychology. Students gain the expertise to enter professional practice as psychologists and independent researchers through coursework and extensive supervised experience.

Applicants seeking admission to the Ph.D. program in counseling psychology must meet the general requirements for admission to graduate study in the Graduate School of Education and these program-specific admission criteria:
• possess a baccalaureate or a master’s degree from an accredited college or university
• have academic and professional goals consistent with the objectives and purposes of the program

• show evidence of professional promise (personal, interpersonal, and intellectual characteristics appropriate to the profession and the ability to communicate effectively). Such evidence may be contained in the student’s application for admission or be sought in an interview with the program faculty
• have earned a minimum undergraduate grade point average of 3.0 (B or better) or a minimum graduate grade point average of 3.5 (B+ or better)
• provide a minimum of two reference reports
• have earned satisfactory scores on the Graduate Record Exam (GRE) Aptitude Section; test scores must be less than five years old
• demonstrate satisfactory command of oral and written English
• provide proof of immunization against measles, mumps, meningitis, and rubella

Updated: 07-27-2020
Completion Requirements

Students are admitted into the doctoral program on a provisional basis, and their progress is monitored through the matriculation review process and through periodic review by their mentor, adviser, program coordinator, chairperson, and division faculty in dissertation seminar. Students apply for permanent matriculation during the semester after they complete 12 to 15 credits.

Acceptance into the program carries with it the responsibility to uphold the published ethical standards of the American Psychological Association. Violation of ethical standards may result in termination from the program. The program reserves the right to review the progress of students and to terminate students from the program on the basis of inability to meet academic, personal, or professional standards.

To complete the PhD in counseling psychology, students must meet the following requirements:

- complete the prescribed program of study, including a minimum of 96 credits beyond the baccalaureate, or 45 credits beyond a master's degree in counseling or a collateral field. Additional courses (such as master's degree prerequisite courses; see PhD student handbook for more information) will be required
- maintain a minimum overall grade point average of 3.5 (B+ or better)
- complete PSGE 8001 Research Apprenticeship, including a one-year doctoral research apprenticeship project (minimum of two consecutive semesters) under the supervision of a member of the faculty
- complete an end-of-program comprehensive assessment
- complete PSGE 8999 Dissertation Seminar in Psychological and Educational Services, including the preparation of an original dissertation under the direction of a mentor and committee of faculty
- develop and defend in an oral examination an original dissertation in the area of counseling psychology
- complete a predoctoral internship
- complete all the requirements for the degree within eight years of initial registration in the program

Mental Health Counseling (M.S.E.)

Overview

60 credits

The M.S.E. program in mental health counseling is designed to prepare mental health counselors who will work in mental health clinics, community mental health centers, hospitals, nonprofit counseling agencies, college and university counseling centers, and corporate mental health services (e.g., employee assistance programs, personnel departments, mental health support units) and are eligible to open independent private practices after licensure. This rigorous, applied training program includes 60 course credits (in semester hours) plus a minimum 600-hour mental health counseling internship. The program has a practitioner-scientist orientation and includes a strong multicultural and social justice counseling emphasis.

The program can be completed full time in two years (with summers) or part time in three years (with summers). Graduates of the program are eligible to sit for the National Clinical Mental Health Counselor Licensure exam after the completion of 3,000 hours of supervised post-degree mental health counseling practice.
The M.S.E. in Mental Health Counseling is accredited by the Masters in Psychology and Counseling Accreditation Council (MPCAC) for the period of January, 2015 through January, 2025.

Admissions

Applicants seeking admission to the M.S.E. program in mental health counseling must meet the general requirements for admission to graduate study in the Graduate School of Education and these program-specific admission criteria:

- possess a baccalaureate degree from an accredited college or university
- show evidence of professional promise (personal, interpersonal, and intellectual characteristics appropriate to the profession and the ability to communicate effectively); evidence should be contained in the student’s application for admission, or may be sought in an interview with a member of the program faculty, if deemed appropriate
- have earned a minimum graduate and undergraduate grade point average of approximately 3.0 (B or better)
- provide two reference reports
- demonstrate proof of immunization against measles, mumps, meningitis, and rubella

Requirements

Program of Study

The 60-credit program includes a 600-hour, on-site, supervised internship completed during the fall (PSGE 6651) and spring (PSGE 6653) semesters.

The curriculum includes the following courses:

Total Credits 60

1. PSGE 5621 Foundation of Professional Counseling and Consultation and Clinical Instr Couns Process are co-requisites.
2. PSGE 6630 Group Counseling and PSGE 6632 Pre-Practicum in Groups are co-requisites.
3. PSGE 5631 Couns Theory & Practice and PSGE 5633 Pre-Practicum in Applications of Counseling Theory to Practice are co-requisites.
4. PSGE 5640 Pre-Practicum in Career Counseling and PSGE 6642 Practicum in Career Counseling are co-requisites. Note that PSGE 5641 Pract Career Counseling is equivalent to PSGE 6642 Practicum in Career Counseling.
5. PSGE 6650 Ethics and Professional Issues in Counseling and PSGE 6651 Field Experience I in Mental Health Counseling are co-requisites.

Completion Requirements

To complete the M.S.E. in mental health counseling, students must meet the following requirements:

- strictly adhere to the principles of academic integrity of Fordham University Graduate School of Education and to the ethical principles of the profession
- complete the prescribed program of study, including 60 credits beyond the baccalaureate degree, with a minimum of 54 graduate credits taken at Fordham with the approval of an adviser
- maintain a minimum overall graduate grade point average of 3.0 (B or better)
- complete an end-of-program comprehensive assessment
- complete a 600-hour mental health counseling internship

Students may be terminated from the program if they fail to complete any of these steps.

School Counseling (M.S.E.)

Overview

60 credits

NYSED 32851/33062

The M.S.E. program in school counseling is designed to prepare school counselors who will work in pre-K and K-12 schools. This program meets the course requirements for provisional/initial and permanent/professional certification as a school counselor in New York state. Students who successfully complete all of the program requirements will be recommended for certification as a school counselor.

The required courses in this degree program are only offered at the Lincoln Center campus. All of the courses are offered during the fall.
and spring semesters; some of the courses are offered during the two summer sessions.

The M.S.E. in school counseling is accredited by the Masters in Psychology and Counseling Accreditation Council (MPCAC) for the period of January 2015 through January 2025.

Admissions

Admission Requirements

Applicants seeking admission to the M.S.E. program in school counseling must meet the general requirements for admission to graduate study in the Graduate School of Education and these program-specific admission criteria:

- possess a baccalaureate degree from an accredited college or university
- show evidence of professional promise (personal, interpersonal, and intellectual characteristics appropriate to the profession and the ability to communicate effectively); evidence may be contained in the student's application for admission, or may be sought in an interview with a member of the program faculty, if deemed appropriate
- have earned a minimum undergraduate grade point average of approximately 3.0 on a 4.0 scale
- provide two reference letters
- demonstrate satisfactory command of oral and written English
- provide proof of immunization against measles, mumps, meningitis, and rubella

Requirements

Program of Study

This 60-credit program includes 54 credits in five basic areas, a two-semester field experience, and a one-semester practicum. The following courses are offered as 6-credit modules (two courses taken together, a didactic course paired with a relevant practice course):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSGE 5620 &amp;</td>

In addition to the 60 course credits (in semester hours), students must complete a minimum of 600 hours in an approved school counseling field experience, and a minimum of 100 hours in a practicum. Students are required to obtain their own placements for PSGE 6652 Field Experience in School Counseling I and PSGE 6654 Field Experience in School Counseling II, as well as for PSGE 5632 Social Justice Practicum in Professional School Counseling.  

1. Area III requires PSGE 5620 Introduction to Professional School Counseling I and PSGE 5622 Pre-Practicum in Professional School Counseling I as prerequisites.
2. Area IV requires PSGE 5620 Introduction to Professional School Counseling I and PSGE 5622 Pre-Practicum in Professional School Counseling I as prerequisites.
3. Area V may be taken only after students have completed Areas I, II, III, and IV.
4. No prerequisites needed for courses in Area VI. Full-time students typically take these courses in their second year of study.
Bilingual Extension Option (15 credits)

Students wishing to qualify for the bilingual extension to their certification must meet New York state requirements for field experience in a bilingual context, study of cultural perspectives, the theory/practice of bilingual/multicultural education, and methods of providing service in native language by demonstrating proficiency in a second language on state-administered exams. Students must complete a total of 15 credits in the areas outlined below:

<table>

</tbody>
</table>

Total Credits 15

To qualify for the bilingual extension, field experience must be in a K–12 school setting working with bilingual children under the supervision of a bilingual school counselor.

Completion Requirements

To complete the M.S.E. in school counseling, students must meet the following requirements:

- strictly adhere to the principles of academic integrity of Fordham University’s Graduate School of Education and to the ethical principles of the profession
- complete the prescribed program of study, including 60 credits beyond the baccalaureate degree, with a minimum of 54 graduate credits taken at Fordham (all transfer credits need to be approved by the student’s adviser and program)
- maintain a minimum overall graduate grade point average of 3.0 (B or better)
- complete an end-of-program comprehensive assessment
- complete any required related practica or school counseling internships

Students may be terminated from the program if they fail to complete any of these steps.

Course Listings

The prefixes used for Graduate School of Education courses are:

- ASGE  Administration and Supervision
- CLGE  Contemporary Learning
- CTGE  Curriculum and Teaching
- EDGE  Interdisciplinary Research
- PSGE  Psychology
- UEGE  Urban Education

The numbering system is the key to the course levels, specifically:

- 5000 series  Graduate courses and institutes
- 6000 series  Graduates courses and advanced institutes

- 7000 series  Advanced graduate courses
- 8000 series  Seminars and guided tutorials
- 9000 series  Special courses and process registrations

ASGE 5112. Fundamentals of Educational Administration and Management. (1 to 3 Credits)
A basic course dealing with the role of the school-based administrator in the administration of schools. The course takes up issues related to account management issues, school effectiveness, human resources, communications, and human relations.

ASGE 5119. Fundamentals of Educational Supervision. (3 Credits)
Considers the human, technical, educational, and moral aspects of supervision; possible arrangements and alternatives for supervision; effective practices in supervision; and needed involvement of supervision in school restructuring. Students will consider curricula, pedagogy, professional development and evaluation as part of this course.

ASGE 5902. Management of Continuing and Adult Education Programs. (3 Credits)
This course is designed to provide an understanding of current behavior concepts, theories, and processes of management and supervision as applied to adult-education organizations and agencies.

ASGE 6130. Instructional Leadership. (3 Credits)
Development of leadership in optimal staff performance and emphasis on factors that facilitate learning. Students will develop understand their role as instructional leaders using formal and informal observation protocols and practice assessing lessons using a variety of rubrics.

ASGE 6132. Organizational Behavior. (3 Credits)
Focuses on social/psychological forces influencing the behavior of the individual. Topics include communication, perception, motivation, attitudes, values, adult development, leadership, power, and influence.

ASGE 6145. Leading in a Diverse Society. (1 to 3 Credits)
Provides understanding and knowledge of the various cultural and ethnic groups in America and how they have impacted society and vice versa; explores concepts, issues, and dilemmas related to a multicultural, diverse society from both a historical and contemporary perspective; develops strategies to understand dynamics of the school community; and proposes solutions to meet challenges of a diverse society.

ASGE 6224. The Superintendency. (3 Credits)
Consideration of the chief roles of the superintendent of schools, such as school board relationships; personnel; finance and budgeting; program planning; community relationships; local, state, and federal relationships; and evaluation.

ASGE 6225. Boards of Education. (3 Credits)
The study of the role, responsibilities, power, and legal aspects of dealing with boards of education. Course is designed for board members, and practicing and prospective school administrators.

ASGE 6227. Cases and Simulations in Administration and Supervision. (3 Credits)
This course uses a variety of cases and simulations to provide “situational data” for analysis of issues, problem solving, and leadership development.

ASGE 6322. School Finance. (3 Credits)
Theory and practice of property taxation, tax and educational equity issues, understanding state school aid, and alternatives to existing funding patterns. It also considers the management of financial resources at the district and site level.
ASGE 6325. School Law. (3 Credits)
The legal status of the pupil, the teacher, and the superintendent; liabilities of school boards; inter-relationships of the school and the state. The interrelationships of the school board and municipality, as well as labor laws.

ASGE 6331. Shaping Educational Policy. (3 Credits)
A study of educational management as affected by public policies. Focus on political environments, decision-making processes, and legislation influencing education, as well as strategies and techniques for managing their impact on educational institutions.

ASGE 6338. Ethics of School Administration. (3 Credits)
Using case studies and theoretical analyses, this course examines the ethical issues that school administrators commonly face.

ASGE 6361. Strategic Planning/Change. (3 Credits)
The basic elements and dynamics of planned change are examined. Emphasis is on strategies for achieving change in urban schools, including examples of successful innovation. The course focuses on how school leaders use data and budgets to drive their instruction plans in a K–12 environment.

ASGE 6362. Understanding and Managing Change. (3 to 4 Credits)
Students learn to scan the internal and external environments to identify challenges and constraints, to understand stakeholders' investments in maintaining or challenging the status quo, to understand and manage change in the context of various change models, and to align business strategies with organizational systems and structures.

ASGE 6371. Hist & Descrip Research. (3 Credits)
Techniques in the use of archival materials, primary sources, and secondary publications will be taught in the framework of educational policy research.

ASGE 6461. Critical Issues in Educational Leadership. (0 to 3 Credits)
This course synthesizes research on enduring and emerging issues in administration and supervision, including retrenchment, special education, finance, and desegregation.

ASGE 6520. Internship I. (3 Credits)
Systematic observation and planned participation in the administrative and supervisory activities of an urban or suburban school. Application must be submitted to the division chairperson by the end of the second month of the semester preceding internship.

ASGE 6521. Internship II. (3 Credits)
Systematic observation and planned participation in the administrative and supervisory activities of an urban or suburban school. Application must be submitted to the division chairperson by the end of the second month of the semester preceding internship.

ASGE 6532. Seminar for Nonpublic School Administrators. (1 to 3 Credits)
This is an individualized, project-centered course in which participants will bring together multiple understandings and competencies developed in earlier courses and focus them in a synthetic way on a major problem or issue.

ASGE 6541. Perspectives on Leadership. (3 Credits)
This course is designed to expose participants to various theories of leadership, to have them examine their own experience in working with a leader, to have them probe their own sources of motivation in seeking to exercise leadership, and to have them develop specific leadership skills and approaches in becoming accountable school leaders.

ASGE 6620. Advanced Statistics in Administration and Supervision. (3 Credits)
Covers statistical inference and prediction in research in educational leadership, administration, and policy, including parametric and nonparametric methods, and concepts of measurement and probability.

ASGE 6720. Program Evaluation and Research in Administration and Supervision I. (3 Credits)
Focuses on the nature of research as it applies to studies in educational leadership, administration, and policy. Includes the development of research topics and the selection of appropriate ways to investigate these topics. Students will learn how to use data to drive instruction.

ASGE 7320. Data Analysis & Accountability. (3 Credits)
School administrators are challenged to manage and analyze data to inform instruction and improve student performance. This course teaches the use of data for setting goals, monitoring progress and using data warehousing—thus holding educators accountable for results. Students will analyze and share data in ‘data cycle’ format to inform educators and the public regarding what they receive from the district and/or read in the print and electronic media.

ASGE 7333. Data Inquiry and Analysis. (3 Credits)
This course is designed to develop students’ skills in investigating various sources of quantitative and qualitative data (including large-scale data sets) to explore the complexity of problems of practices, investigate variations in performance within and among groups, and apply data analysis for school accountability, improvement, and reform.

ASGE 7428. Seminar in Leadership. (3 Credits)
Students in this advanced seminar investigate topics and issues in leadership. This course involves the exploration of theoretical frameworks as a means of interpreting problems from the field and suggesting leadership responses to these problems.

ASGE 7429. Social Theories and Educational Institutions. (3 Credits)
This is an in-depth analysis of social theories and their implications for the restructuring of educational and other social institutions. The course focuses on structural-functional theory and other theories and their contemporary critics.

ASGE 7430. Leadership in Educational Policy and Reform. (3 Credits)
In this course, students will deepen their understanding of educational policy and their skills in analyzing and responding to policy challenges as educational leaders and scholars. To gain an understanding of how education policies evolve, students will examine and analyze the political, economic, social, and philosophical processes that contribute to its development, implementation, analysis, and evaluation.

ASGE 7431. Administration and Supervision Seminar. (3 Credits)
An advanced seminar in administration and supervision; exploration and study of comprehensive professional concerns.

ASGE 7432. Seminar in Organizational Theory. (3 Credits)
Focuses on application of organizational theory to school administration. Theories of Weber, Argyris, McGregor, Etzioni, and others will be examined.
ASGE 7435. Strategic Thinking, Planning, and Implementation. (3 Credits)
Every organization needs to grow, and today’s organizations need to do so in a competitive and ever-changing environment. The heart of the change process is in the strategy the organization selects to move forward. In this course, students learn to understand their industry, the competition, and their organization’s core competencies and values. They learn strategic models, including those of Michael Porter, Treacy and Wiersma, Hamel and Prahalad, Kim and Mauborgne, and Richard D’Aveni. Using Nadler and Tushman’s model for Congruence, they learn to align their organizations with the chosen strategy.

ASGE 7436. Transforming Schools, Districts, and Communities. (3 Credits)
Through this course, students explore theory, research, and professional practice in engaging and transforming schools, districts, and communities, particularly to support school improvement and student learning. The course will also explore resource acquisition, management, and use in support of student learning and related political and systems issues.

ASGE 7439. Advanced Seminar for Nonpublic School Administration. (1 or 3 Credits)
This course provides advanced study of administration in nonpublic schools. Issues of finance, curriculum, personnel, physical plant, instruction, and community relations are covered.

ASGE 7440. Seminar in Organizational Behavior. (1 to 3 Credits)
This course focuses on individuals and groups in the organization and on both the micro and macro perspectives of their behavior. The perspective, historical background, methodology, and theoretical framework for the field of organizational behavior will be presented. The emphasis will be on developing leaders with a vision that reflects an understanding of the social and psychological forces influencing the behavior of the individual in organizations and the dynamics, processes, and structures of organizational behavior.

ASGE 7442. Leading Organizational Change. (3 Credits)
This course focuses on the nature of discontinuous change and on managing the paradoxes of change including chaos and order. Several current theories of change will be presented and applied to students’ organizational settings. The emphasis will be on developing leadership skills for crafting a vision, mission, and strategic plan for change, as well as for aligning the organization behind the vision.

ASGE 7444. Leading a Learning Organization. (3 Credits)
This course examines the principles of leadership in a learning organization by exploring theory, research, and practice as related to schools and districts. The course provides opportunities for students to integrate theory and research with practice through simulated experiences, group discussions, reading, observations, interviews, action research, and case studies.

ASGE 7445. Leading Instructional Improvement. (3 Credits)
This course focuses on the practice of instructional improvement in schools and school systems, where “improvement” is defined as increasing the equity and quality of instructional practice and student learning over time. The course equips students with skills in observing, analyzing, and understanding teaching and learning that can be coupled with decisions about how to manage and support learning in the PK–12 sector.

ASGE 7446. Seminar in Organizational Culture, Learning, and Change. (1 to 3 Credits)
This course focuses on the nature of organizational culture: how it comes into being, how to shape a culture, and how to change a culture. Students explore the role of leadership and use of a systems perspective in creating, shaping, and changing organizational culture.

ASGE 7448. Seminar in Ethics and Social Justice. (3 Credits)
Through this course, students develop an ability to discuss and clarify ethical and social justice perspectives to gain an understanding of these same issues within organizations. The course helps students develop policies and strategies to address social justice and ethical issues within their schools, districts, and communities.

ASGE 7449. Introduction to Inquiry and Improvement Science. (3 Credits)
This course provides an overview to scholarly inquiry and practice, and develops foundational knowledge about research design and methods, reviewing research studies and reading peer reviewed research, research ethics and basic concepts in designed-based research and improvement science.

ASGE 7450. Seminar in the Spirituality of Leadership. (3 Credits)
This course focuses on the nature of spirituality and on leading the building of community within organizations. The course will explore spirituality as it basically relates to education. Throughout the course, spirituality will be differentiated from formal religion. The spiritual dimension of educational practice will be presented as it pertains to building community with educators, families, organizations, and cultures.

ASGE 7456. Community of Inquiry 1: Framing Problems of Practice. (1 Credit)
In this initial course, students begin to identify their problem of practice, learn attributes of universal problems, investigate how to differentiate the problem for various groups, and how to collaborate with others to define and investigate their problem.

ASGE 7462. Community of Inquiry 2: Innovative Solutions. (1 Credit)
In this second-year course, students explore tools and practices for creative problem-solving and conflict resolution, particularly in addressing complex challenges or capitalizing on opportunities for improvement, with a focus on generating solutions for their proposed problem of practice.

ASGE 7470. Design-Based Methods and Improvement Science in Education. (3 Credits)
This course moves students from exploring problems of practice to identifying, designing, and planning for the implementation of promising solutions to address these problems. Specifically, students will investigate and apply design-based and improvement-science methods to address a significant educational problem. Students will develop a design-based research prototype, seek implementation support, develop readiness for change and buy-in, and start their innovation.

ASGE 7471. Implementation Research and Program Evaluation. (3 Credits)
This course provides preparation and guidance on implementation research and program evaluation. Students learn how to monitor implementation and conduct program evaluation, particularly for their dissertation of practice. The course addresses theoretical, organizational change and practical issues, and prepares students to conduct an implementation study and program evaluation and communicate the results.
ASGE 7530. Clinical Practice in Administration and Supervision. (3 Credits)
This course provides students with applied field experiences designed to work out solutions to particular problems of practice.

ASGE 7531. Advanced Qualitative Research. (3 Credits)
This course offers students the opportunity to engage in field research activities that focus on initial research design, data collection, and analysis.

ASGE 7721. Applied Quantitative Research Methods. (3 Credits)
This course provides an overview of quantitative methods and research design, and related statistical techniques. Students can explore how to use these skills to investigate problems of practice.

ASGE 7731. Applied Qualitative Research Methods II. (3 Credits)
This course provides an overview of qualitative research perspectives and methods and their use in investigating applied problems of practice, particularly in observing and interviewing students and staff in school and district settings.

ASGE 8001. Research Apprenticeship. (0 Credits)

ASGE 8505. Directed Research in Educational Leadership, Administration, and Policy. (1 to 3 Credits)
Designed for students who are developing research problems or projects for their doctoral studies.

ASGE 8750. Dissertation in Practice Seminar. (3 Credits)
This seminar is for advanced Doctor of Education candidates in the Division of Educational Leadership, Administration, and Policy who have completed all of their coursework. The purpose of the seminar is to assist students in developing an approved dissertation proposal.

ASGE 8751. Dissertation Seminar: Educational Leadership, Administration, and Policy, PhD. (3 Credits)
Seminar for advanced Doctor of Philosophy candidates in the Division of Educational Leadership, Administration, and Policy who have completed all of their coursework. The purpose of the seminar is to assist students in developing an approved dissertation proposal.

ASGE 9990. Independent Study. (1 to 4 Credits)
Designed to enable students to study selected topics in depth and to conduct research. For matriculated students only. An outline of the proposed work must be approved by the adviser. Registration requires approval of the professor directing the study, the division chair, and the director of graduate studies.

CLGE 6100. Special Topics in Contemporary Learning and Interdisciplinary Research. (0 to 3 Credits)
Special topics for CLAIR program.

CLGE 6101. Special Topics in Contemporary Learning and Interdisciplinary Research. (0 to 3 Credits)
Used with unique course title each time offered.

CLGE 6102. Special Topics in Contemporary Learning and Interdisciplinary Research. (1 Credit)
This module will focus on analyzing data gathered in mixed method research.

CLGE 6103. Special Topics in Contemporary Learning and Interdisciplinary Research. (1 Credit)
This module will focus on writing up and presenting mixed methods studies.

CLGE 6104. Special Topics in Contemporary Learning and Interdisciplinary Research. (0 to 3 Credits)
This course shall be used with unique course titles and descriptions each time it is offered.

CLGE 6105. Interview Analysis. (1 Credit)
This module will focus on analyzing interview data.

CLGE 6106. Academic Writing. (1 Credit)
This module will focus on writing for academic purposes.

CLGE 6107. CLAIR Proseminar. (3 Credits)
This one-semester offering is designed to provide students, particularly those with less of an undergraduate and master's-level background in research, with an overview of key skill areas that they will need to master throughout their graduate career. These skill areas include developing research questions; research methodologies; data analysis; written and oral expression; and referencing style. The course will culminate in the development of a research project for the group to design as a cohort. The course will be graded as Pass/Fail, whereby a Pass will be awarded for active engagement in the class discussions and activities throughout the semester, and for successful completion of the final project.

CLGE 6140. Foundations of Interdisciplinary Research I. (3 Credits)
Representative seminal and field/action research studies drawing on the professional literature in psychology, anthropology, linguistics, and education to develop an understanding of diverse research traditions. Attribute: TE.

CLGE 6142. Foundations of Interdisciplinary Research II. (3 Credits)
During this two-semester seminar, doctoral students will be immersed in representative seminal and field/action research studies drawing on the professional literature in psychology, anthropology, linguistics, and education to develop an understanding of diverse research traditions. Participants will explore research designs and processes in published studies for posing questions, and collecting, analyzing, and interpreting data from quantitative and qualitative perspectives. Drawing on the knowledge bases informing an interdisciplinary understanding of learning, we will design our individual and collaborative studies using hypothesis testing and hypothesis-generating stances, mindful of the ethical dimensions of these endeavors.

CLGE 6240. Global Perspectives on Language, Culture, and Equity. (1 to 3 Credits)
Provides theoretical and research exploration of global conceptualizations for communicating and learning in more than one language.

CLGE 6280. Multicultural Competencies and Tools of Awareness, Transformation, and Advocacy. (3 Credits)
Grounded in interdisciplinary theory, research, and practice implications for effective learning, this course is designed to develop: (a) foundational multicultural competencies, particularly in the self-awareness components of empathic resources and hidden biases, and (b) culturally relevant tools for promoting educational achievement for all students, including those vulnerable to discrimination. Students will be challenged to reflect on their own cultural biases, expand their conception of appropriate professional roles, and develop awareness, knowledge and skills necessary to facilitate effective learning opportunities with diverse students. This course incorporates didactic, experiential, cognitive, affective, individual, and small group models of learning.

CLGE 6380. Standardized and Alternate Assessments for Students at Risk or With Disabilities. (3 Credits)
Focus on practices and policies related to the use of standardized and alternative assessment approaches for understanding and supporting student learning, instructional planning, and policy making. Attribute: TE.
CLGE 6400. Learning Through Language. (3 Credits)
An interdisciplinary course focusing on the relationship for teachers and supervisors between language as a tool for learning and language as evidence of learning. Particular emphasis will be placed on the relationship between these concerns and the need for improving the reading and writing proficiencies of students in all levels of education.

CLGE 6440. Understanding Contemporary Literacies. (3 Credits)
Introduces various frameworks of literacy in the contemporary world.

CLGE 6540. Development in Context. (1 to 3 Credits)
This course will review current thinking in developmental psychology as reflected in prevailing developmental theory and current areas of research.

CLGE 6545. Structural, Philosophical and Psychological Examinations of Argument. (0 to 3 Credits)
Explores the form and function of arguments in writing and discourse.

CLGE 6550. Motivation to Learn. (1 to 3 Credits)
This course will focus on taking an in-depth look at achievement motivation from a psychological perspective.

CLGE 6555. Becoming Leaders of Contemporary Learning. (0 to 3 Credits)
Examine contemporary learning through the forces that are generally attributed to reshaping education in the 21st century.

CLGE 7150. Program Assessment and Evaluation II. (1 to 3 Credits)
This courses focuses on how to assess the effectiveness of educational service delivery systems, both in schools and other human service settings.

CLGE 7152. Prgm Assess & Eval II. (1 to 3 Credits)
Focuses on how to assess the effectiveness of educational service delivery systems, both in schools and other human service settings.

CLGE 7175. Internship in Contemporary Learning and Interdisciplinary Research. (0 to 3 Credits)
Students shall engage in professional experiences in the schools and/or education related agencies as interns.

CLGE 7190. Advanced Seminar in Interdisciplinary Research I. (0 to 3 Credits)
Team taught, two semester will scaffold the skills and learning of research apprentices through the process of conducting interdisciplinary, ethnographic, field, and empirical research studies.

CLGE 7192. Advanced Seminar in Interdisciplinary Research II. (0 to 3 Credits)
Team-taught, two semester will scaffold the skills and learning of research apprentices through the process of conducting interdisciplinary, ethnographic, field, and empirical research studies.

CLGE 7194. Adv Sem Interdis Res III. (0 to 1 Credits)
Three semester seminar will scaffold the skills & learning of research apprentices through the process of conducting interdisciplinary, ethnographic, field, & empirical research studies.

CLGE 7220. Closing the Opportunity/Achievement Gap. (3 Credits)
Provides educators, leaders, and policy makers with the skills, knowledge, and dispositions to work with diverse youth populations.

CLGE 7240. Multilingual Literacy: Exploring Literacy in Multiple Languages and Cultures. (3 Credits)
Provides theoretical and research foundations to the intersection of lanugae and culture across literacy practices in multiple educational, social, and geographical contexts.

CLGE 7340. Contemporary Interventions for Struggling Readers and Writers. (3 Credits)
It is estimated that more than 10 million children in the United States have some degree of oral-language-based reading disability. Roughly 80 percent of children referred for special services require support services in reading, writing, and oral language. Best contemporary practices rely on interdisciplinary teams to assess difficulties and plan interventions. This interdisciplinary course draws from the fields of literacy, learning disabilities, psychology, and neuroscience in examining theories and research in reading and writing processes and best practices for universal design.

CLGE 7490. Teaching Composition in the 21st Century: Theory and Practice. (1 to 3 Credits)
This course will explore cognitive and sociocultural perspectives of writing and ask students to consider and practice methods for teaching and researching issues of composition in the 21st century.

CLGE 7520. Cognition, Technology, and Innovation. (0 to 3 Credits)
Overall objective of course is to gain and apply knowledge of human information processing, motivation, and creativity to the design of effective instruction.

CLGE 7570. Positive Trajectories: Resilience and Adaptation. (1 to 3 Credits)
CLAIR. Provides an overview of the extant research on the individual, community, and cultural qualities that facilitate optimal development amount ‘at risk’ learners.

CLGE 8001. Capstone Research Proj. (0 to 1 Credits)
To establish candidacy, CLAIR doctoral students are required to work on a capstone project and schedule a hearing with the capstone committee.

CLGE 8002. Capstone Research Proj. (0 to 1 Credits)
To establish candidacy, CLAIR doctoral students are required to work on a capstone project and schedule a hearing with the capstone project committee. The function of the project is to demonstrate the breadth and depth of scholarship, and the unique talents and experiences of each student. As such, this project should be tailored to the student’s interests and ideally tied to the dissertation. During this experience, the student will select and work closely with a mentor, who will help in the development of the capstone project. This mentor can be the student’s academic advisor or another faculty member with whom the student has research interests in common. Successful defense of the capstone project will establish doctoral candidacy.

CLGE 8003. Capstone Research Project. (0 Credits)
Capstone research project.

CLGE 8110. Dissertation Seminar: Contemporary Learning and Interdisciplinary Research. (3 Credits)
Seminar for advanced doctoral candidates who have completed all coursework for their degree. The purpose of the seminar is to have students develop an approved proposal for their doctoral dissertation.

CLGE 8111. Dissertation Seminar: Contemporary Learning and Interdisciplinary Research. (3 Credits)
Seminar for advanced doctoral students. PRE-REQUISITE: CLGE 8001.
CTGE 9990. Clge Special Topics. (0 to 3 Credits)

CTGE 5065. Integrating Technology Into Elementary Education. (1 Credit)
This course assumes introductory knowledge, skills, and understanding of concepts related to technology including the ability to access, generate, process and transfer information using appropriate technologies as well as familiarity with various software programs. This course will assist students in planning, designing, implementing and assessing learning environments and experiences supported by technology. This course will emphasize computer capabilities for teaching, classroom management, the use of assistive technology and communicating electronically from a K-6 perspective.

CTGE 5066. Teaching Social Studies to Children. (3 Credits)
This course in social studies education provides a conceptual and operational framework for reflective, pre-service teachers, systematically reflecting on research, theory, and practice as these influence teacher decision-making for enhancing student learning in social studies.

CTGE 5155. Special Education Foundations: Past, Present, Future. (3 Credits)
This course will introduce concepts and skills needed for teachers to be able to include students with exceptional needs in regular classes. We will study the nature and needs of students with a full range of abilities and disabilities and the individualized educational program the school must provide for them. The focus of this course will be on adapting environments and instruction to accommodate the needs of diverse student populations. Students will work in small groups to apply critical issues and develop the attitudes and skills needed to work in teams.
Mutually Exclusive: CTGE 6305, PSGE 5301.

CTGE 5157. Assessment Strategies for Young Children with Disabilities. (3 Credits)
This course provides an overview of assessment approaches and practices in early intervention and early childhood special education. Students will obtain skills in administering formal and informal assessments, implementing culturally unbiased instruments and procedures, and interpreting and communicating assessment results for planning intervention and evaluating instruction and programs. The role of the family in the assessment process is emphasized.

CTGE 5159. Assessment of All Children With Disabilities. (3 Credits)
This course prepares students to use formal and informal educational diagnostic methods for assessment, analysis and evaluation of children with disabilities. Issues of non-biased assessment and instructional implications are included.

CTGE 5160. Instructional Modifications for Adolescents in Inclusive Classrooms. (3 Credits)
This course will prepare teachers of adolescents to include students with disabilities and special health care needs in their regular content-area classes. Primary focus is on adapting and individualizing instruction and designing assessments to accommodate these students. In addition, the course will address refining skills for improving reading comprehension of content-area text and for collaborating with others to identify strengths, and preparing students with disabilities and special needs to their highest levels of academic achievement and independence. Prerequisite: CTGE 5154 Including Exceptional Students.

CTGE 5161. Differentiating Instruction for All Students. (3 Credits)
This course focuses on the development of curricula that is provided in a variety of educational settings. This course assumes that a classroom includes students of different physical and cognitive abilities, students of different racial ethnic, religious, and socio-economic origin, and students who demonstrate individual learning styles. The emphasis of this course is on the teaching-learning process via a decision-making model for differentiating instruction. This process considers the materials, presentation style, organization of classroom instruction (small group, individual, etc.), and the use of technology in differentiating curricula. Recognizing instruction as a collaborative process, this course will examine ways to build collaborative skills needed to establish positive professional relationships with parents, psychologists, social workers, administrators, community agencies, and paraprofessionals.

CTGE 5165. Consultation and Co-Teaching in Collaborative Classrooms. (3 Credits)
Develop the knowledge, skills, and professional dispositions related to effective communication and shared problem-solving used daily in supporting students, families, and the community. Practice facilitation roles and responsibilities in key school structures, including IEP meetings, pre-referral intervention assistance teams, RTI teams, paraeducator partnerships, transition planning, and collaborative and/or co-teaching. Learn how to use positive behavior intervention and supports, functional behavioral analysis, and behavioral consultation. Plan how to develop a collaborative classroom culture where diversity strengthens a learning community.

CTGE 5167. Behavior Interventions and Effective Classroom Management. (3 Credits)
This course will prepare teachers in special education to support students with disabilities in multicultural settings through the use of positive behavior intervention and supports, functional behavioral analysis, behavioral consultation, explicit instruction, current issues in behavior management. This course will also enable teachers to establish and create a safe, positive, supportive classroom environment in the classroom through behavior change and management.

CTGE 5170. Assessment of All Learners with Disabilities. (3 Credits)
This course prepares students to use formal and informal educational diagnostic methods for assessment, analysis, and evaluation of children with severe disabilities. Issues of non-biased assessment and instructional implications are included. Students will conduct an in-depth assessment project (RTI) in which they will use multiple assessment methods to evaluate an at-risk student or student identified with special needs in reading, writing, or mathematics, and then make recommendations for services and instruction.

CTGE 5175. Teaching English Language Arts and Social Studies in Inclusive Adolescence Classrooms. (3 Credits)
This course has been developed to meet the new state requirements for teachers of students with disabilities in grades 7–12. Through this course, candidates will develop the skills necessary to provide specifically designed instruction to students with mild, moderate, severe, and multiple disabilities, including those using assistive technology. They will know and be able to use research-based teaching methods of core content areas, including instructional technology, and acquire sufficient pedagogy skills to teach secondary English language arts and social studies in a supportive role. In addition, candidates will learn how to provide access to the general education curriculum through modifications, accommodations, remediation, and acceleration.
Prerequisite: CTGE 5155 (may be taken concurrently).
CTGE 5176. Teaching Math and Science in Inclusive Adolescence Classrooms. (3 Credits)
This course has been developed to meet the state requirements for teachers of students with disabilities in grades 7–12. Through this course, candidates will develop the skills necessary to provide specifically designed instruction to students with mild, moderate, severe, and multiple disabilities, including those using assistive technology. They will know and be able to use research-based teaching methods of core content areas, such as instructional technology, and acquire sufficient pedagogy skills to teach secondary math and science in a supportive role. In addition, candidates will learn how to provide access to the general education curriculum through modifications, accommodations, remediation, and acceleration.
Prerequisite: CTGE 5155 (may be taken concurrently).

CTGE 5200. Field Experience Seminar: Issues in Reflective Practice. (0 Credits)
This seminar is taken concurrently with first field placement. Along with a focus on issues in teaching practices, topics such as behavior, social/emotional learning, and EDTPA are discussed. Field experiences progress from observation to guided practice with small and whole groups of students. Teacher candidates are assigned to field experiences across a variety of settings and grade levels appropriate to their area of study. The seminar is intended as a vehicle for critical and collaborative reflection, through which theory can be integrated with practical experiences. The seminar also provides a structure for organizing workshops in the prevention of child abuse, drug and alcohol abuse, and violence, and for developing the skills and knowledge necessary to provide a sense of community in a safe, respectful, and nurturing classroom environment.

CTGE 5201. Student Teaching Seminar: Issues in Reflective Practice. (3 Credits)
The seminar is taken concurrently with second student-teaching placements. Along with a focus on issues in teaching practices, topics such as behavior, social/emotional learning, and EDTPA are discussed. Student-teaching experiences progress from guided practice with small and whole groups of students to full-time student teaching with ongoing responsibilities for curriculum and instruction. Teacher candidates are assigned to student-teaching experiences across a variety of settings and grade levels appropriate to their area of study. The seminar is intended as a vehicle for critical reflection through which theory can be integrated with practical experiences.

CTGE 5203. Fld Exp Sem in Service. (0 Credits)
This seminar/field placement focuses on integrating theory and practice in a setting and grade level appropriate to the candidate’s area of study. Foci include observing, guided practice with small and whole groups of students with the seminar designed as a vehicle for critical and collaborative reflection.

CTGE 5205. Intern Fellows Seminar. (0 Credits)
CTGE 5210. Field Experience. (0 Credits)
Zero credit and fee for TFA and specific grant programs.

CTGE 5211. Practicum for In-Service Teachers. (0 Credits)
Supervised student teaching in a setting selected under advisement. Analysis of innovative designs and application of theory to practice. Critical analysis of student competency through self-evaluation and supervisory feedback. Open only to students who already possess initial or professional certification.

CTGE 5212. Teaching the Arts in Childhood Education. (1 Credit)
Introduction to creative and expressive development in children, and to the theory and practice of appreciating and producing drama, movement, music, and the visual arts, as well as the integration of the arts into interdisciplinary curricula.

CTGE 5216. L/T in Pr/El Grds: Soc St. (4 Credits)
CTGE 5222. Practicum for In-Service Teachers. (3 Credits)
Supervised student teaching in a setting selected under advisement. Analysis of innovative designs and application of theory to practice. Critical analysis of student competency through self-evaluation and supervisory feedback. Open only to students who already possess initial or professional certification.

CTGE 5224. Rdg Writ Lang Arts. (3 Credits)
CTGE 5227. Teaching Mathematics to Children. (3 Credits)
This course in mathematics education provides a conceptual and operational framework for reflective, pre-service teachers, systematically reflecting on research, theory, and practice as these influence teacher decision-making for enhancing student learning in mathematics.

CTGE 5230. Framework for Education for All Young Children. (3 Credits)
A critical analysis of the theoretical and empirical bases for working in early childhood settings developed for young children with and without disabilities. Overview of legislation, program models, and program review.

CTGE 5232. Early Childhood Curriculum and Assessment. (3 Credits)
Conceptual analysis and evaluation of existing early childhood curricula, including emerging trends and issues, educational assessment of the young child, strategies and issues, formulation and implementation of educational goals and objectives, and instructional and behavioral.

CTGE 5233. Early Learning Through Play. (3 Credits)
This course focuses on creating, implementing, and assessing appropriate play experiences in diverse early childhood classrooms. The development of play and its potential for learning across the curriculum will be addressed, with emphasis on the preschool, kindergarten, and early primary grades. Helping families understand the value of play in early learning also will be included.

CTGE 5234. Family, Community, and All Young Children. (3 Credits)
This course critically examines the ecology of early childhood; the young child as a reactive and proactive agent in dynamic interaction with forces in the physical and social environment (family, home, neighborhood, media, legislation, child advocacy, etc.); the reciprocal relationship between early childhood education, family, and community. Mutually Exclusive: CTGE 6320.

CTGE 5242. Teaching Science and Technology to Children. (3 Credits)
This course will provide opportunities to critically analyze recent concepts, theories, and practices in developing a science curriculum. Current trends, technologies, and technological issues and their impact on society will be explored. Emphasis will be placed upon gaining knowledge bases for the life, physical, and earth sciences. Opportunities will be provided to develop an understanding of instructional technologies as tools for reflective practitioners, and to evaluate their use and effectiveness.

CTGE 5243. Teaching and Assessing Mathematics in Elementary Classrooms. (3 Credits)
This course supports elementary mathematics educators in teaching all children developmentally appropriate topics in algebra, probability, statistics, geometry, and measurement. Attention will be given to designing and implementing a mathematics teacher work sample using manipulatives, technology, problem-solving strategies, and ongoing assessment to improve student learning.
CTGE 5245. Children's Literature in a Multicultural Society. (3 Credits)
Issues of equity and justice are explored through literature. Adult and children's literature are used to examine the concept of cultural pluralism—the values, traditions, and aspirations of various immigrant and ethnic groups. Introduction to various genres and uses of literature in the early childhood and childhood language arts program.

CTGE 5247. Teaching Linguistically and Culturally Diverse Children. (3 Credits)
Theory and practical approaches and strategies to make content relevant and understandable to students in mainstream classrooms, PreK-6th grade, who may lack English language proficiency, experience, and background.

CTGE 5259. Contemporary Social Studies Education. (3 Credits)
This course familiarizes students with the trends and issues facing the specific disciplines in the social studies. The course will examine trends, issues, and implications for the future of American history, global studies, government and politics, economics, anthropology, sociology, and psychology. A strong content base and an appreciation of contemporary issues will enable students to understand the current status of social studies and the implications for the future.

CTGE 5261. Teaching and Assessing Social Studies: Adolescents. (3 Credits)
This course focuses on recent developments and persistent issues of classroom practice in the teaching of secondary social studies, and on developing skills in teaching methods such as reflective inquiry, problem solving, critical thinking, decision-making, and assessment. Disciplines include anthropology, economics, geography, history, jurisprudence, political science, psychology, and sociology.

CTGE 5270. Tchg Biology to Adol. (3 Credits)
This course familiarizes students with a variety of methods and materials for teaching biology in the secondary schools. The development and analysis of the goals and content of a secondary biology course is emphasized using short- and long-range planning, adherence to curricular standards, assessment of student achievement and teacher effectiveness, instructional applications of technology, and other instructional methods and strategies. Course activities provide a basis for the development of competent biology teachers, including familiarity with relevant journals, issues, sources of information and instructional assistance, and opportunities to practice reflection. The goals and objectives of the course are in concert with the National Science Education Standards for professional development of learning biology content, learning to teach biology, lifelong learning, and integrated programs.

CTGE 5271. Teaching and Assessing Biology: Adolescents. (3 Credits)
This course familiarizes students with a variety of methods and materials for teaching biology in the secondary schools. The development and analysis of the goals and content of a secondary biology course emphasized using short- and long-range planning, adherence to curricular standards, assessment of student achievement and teacher effectiveness, instructional applications of technology, and other instructional methods and strategies. Course activities provide a basis for the development of competent biology teachers, including familiarity with relevant journals, issues, sources of information and instructional assistance, and opportunities to practice reflection in action.

CTGE 5272. Teaching and Assessing Science in Adolescent Classrooms (7-12). (3 Credits)
Teaching and assessing science in adolescent classrooms. This course familiarizes students with a variety of methods and materials for teaching science (biology, earth science, physics and chemistry) to adolescents.

CTGE 5275. Integrating Math, Science, and Technology Education. (3 Credits)
This is a culminating course in the secondary math and science education programs. It assumes a strong knowledge base in math and/or science content knowledge, pedagogical content knowledge and pedagogical knowledge. One goal of this course is to gain a deeper knowledge and understanding of models of integrated teaching and learning such as project-based learning, problem-based learning, thematic and interdisciplinary teaching and learning. The second goal is to explore technology through integrated learning activities and projects. In order to gain this knowledge and experience we will engage in dialogue, investigation, analysis and reflection of specific projects that integrate math, science and technology in secondary school. The course will culminate in teams of students developing an MST integrated project to be utilized in their own teaching practice.

CTGE 5276. Clinical Seminar in Adolescence Science Education. (3 Credits)
This course is designed to develop skills and habits of mind that are requisite to reflective practitioners of teaching. Course participants will engage in reflective discourse with peers and mentors to engage in a process of continuous learning in professional practice. The focus of the discussions, assignments, and mentoring/instructional activities will be on developing pedagogical content knowledge and skills needed to positively impact the life and learning of all students.

CTGE 5277. Clinical Seminar in Behavioral Environments for Adolescent Exceptional Learners. (3 Credits)
This course is designed to develop skills and habits of mind that are requisite to reflective practitioners who teach adolescent exceptional learners in behavioral environments. The course content will prepare teachers in special education to support students with disabilities in diverse settings through the use of positive behavior intervention and supports, functional behavioral analysis, behavioral consultation, and current strategies in behavior management. The course focuses on the application of empirically validated social interaction/communication and on behavioral interventions that are consistent with evidence-based practices. In addition, teacher candidates will develop an understanding of the processes integral to researching student knowledge while promoting student learning. This course is aligned to student teaching.

CTGE 5279. Contemporary Science Education. (3 Credits)
This course is designed to provide students with a familiarity with the origins and growth of the ideas of science education. It will also examine past, current, and emerging issues affecting science education.

CTGE 5280. Teaching Chemistry to Adolescents. (3 Credits)
This course integrates the knowledge and processes of chemistry with chemistry teaching and learning. Teachers build and develop reflective teaching and learning practices that will enable them to teach, support, and assess students of diverse interests, abilities, and culture. The goals and objectives of the course are in concert with the National Science Education Standards for professional development of learning chemistry content, learning to teach chemistry, lifelong learning, and integrated programs.
CTGE 5281. Teaching and Assessing Chemistry: Adolescents. (3 Credits)
This course integrates the knowledge and processes of chemistry with chemistry teaching and learning. Teachers build and develop reflective teaching and learning practices that will enable them to assess, teach, and support students of diverse interests, abilities, and cultures.

CTGE 5283. Teaching and Learning Math in the Middle Grades. (3 Credits)
In this course, students focus on understanding the learning challenges and requirements of middle school mathematics. It will focus on topics such as proportional reasoning, rational numbers and operations, and problem solving. Students will explore opportunities for discovery and investigation, strategic thinking, reasoning and justification, and efficient algorithms. They will also examine the use of a variety of tools intended to assist students in their learning.

CTGE 5284. Teaching and Learning Foundational Topics and Math. (3 Credits)
This course focuses on methods that foster student development in their understanding of algebraic and geometric mathematics as well as problem solving and modeling. A model of essential understandings for the developing mathematics teacher is provided in the diagram below. This course will expand a teacher candidate's knowledge in each area but it will focus on knowing and understanding algebraic and geometric thinking.

CTGE 5286. Teaching and Assessing Mathematics in Adolescent Classrooms. (3 Credits)
This course introduces a variety of instructional and assessment strategies for teaching mathematics to adolescents in grades seven through 12. Discussions center on methods of planning, teaching, and managing mathematics classes. This course is taught during the student-teaching experience.

CTGE 5287. Clinical Seminar in Adolescence Mathematics. (3 Credits)
This course is designed to develop skills and habits of mind that are requisite to reflective practitioners of teaching. Course participants will engage in reflective discourse with peers and mentors to engage in a process of continuous learning in professional practice. The focus of the discussions, assignments, and mentoring/instructional activities will be on developing pedagogical content knowledge and skills needed to positively impact the life and learning of all students.

CTGE 5290. Teaching Physics to Adolescents. (3 Credits)
This course integrates the knowledge and processes of physics with physics teaching and learning. Teachers build and develop reflective teaching and learning practices that will enable them to teach, support, and assess students of diverse interests, abilities, and cultures. The goals and objectives of the course are in concert with the National Science Education Standards for professional development of learning physics content, learning to teach physics, lifelong learning, and integrated programs.

CTGE 5291. Teaching and Assessing Physics: Adolescents. (3 Credits)
This course integrates the knowledge and processes of physics with physics teaching and learning. Teachers build and develop reflective teaching and learning practices that will enable them to assess, teach, and support students of diverse interests, abilities, and cultures.

CTGE 5303. Learning Environments for Diverse Adolescents: Reflective Field Experience. (1 to 3 Credits)
This course focuses on the development of the professional portfolio to meet the requirements for a comprehensive examination for the pedagogical portion of the program.

CTGE 5304. Learning Environments for Diverse Adolescents: Reflective Field Experience. (1 to 3 Credits)
This course focuses on the development of the professional portfolio to meet the requirements for a comprehensive examination for the pedagogical portion of the program.

CTGE 5305. Teaching Linguistically and Culturally Diverse Adolescent Students. (3 or 4 Credits)
This course highlights instructional approaches and strategies for teachers of adolescents to promote oral and written English language development in culturally and linguistically diverse students. Emphasis is on creating an integrated classroom where the experiences, capacities, interests, and linguistic and cultural needs of adolescent English language learners are addressed. The course will examine language acquisition and development, as well as the impact of heritage and culture on the progress of English language learners.

CTGE 5307. Research and Assessment While Teaching Adolescents. (3 Credits)
In this course, teacher candidates develop an understanding of the processes integral to assessing student knowledge while promoting student learning. Teacher candidates will review, create, evaluate, and interpret a wide range of standardized and alternative approaches to assessment, acquiring an abundant repertoire of strategies for assessing student learning in the classroom context, and using that information to plan or modify instruction. Students will learn how to use research to examine and reflect on their teaching, and to update knowledge and skills in teaching.

CTGE 5308. Student-Teaching Adolescents: Research and Reflective Practice. (1 to 3 Credits)
This course focuses on the development of the portfolio to meet the requirements for a comprehensive examination for the pedagogical portion of the program.
CTGE 5357. Innovative Curriculum and Teaching Practices and Models. (3 Credits)
Examines innovative curriculum models and teaching methods to improve the learning conditions for students; exemplary programs and practices are discussed, including interdisciplinary teaching, and teaming of students and faculty; implications are drawn for maximizing student learning.

CTGE 5401. Human Development and Learning. (3 Credits)
This course builds a professional learning community focused on understanding adolescent learning and teaching for social justice.

CTGE 5402. Teaching and Learning with Diverse Adolescents: Assessment and Planning. (3 Credits)
This course focuses broadly on learning environments, learner development, collaboration, teaching and assessing, social justice, reflection, and continuous professional growth. This course provides initial preparation and practice in issues and strategies for teaching for social justice in classrooms with diverse students. The major areas of focus are classroom environments, adolescent development, assessment, and backward design. Candidates will reflect together on their clinical placements using standards of teaching and learning including the Danielson continuum and the Common Core State Standards. This course is connected to a three-five days/week internship that includes college-supervised student-teaching experience.

CTGE 5411. Perspectives and Issues in Early Childhood Special Education. (3 Credits)
This course provides an overview of the historical and legal perspectives of special education, early intervention, and early childhood special education services. It introduces various service delivery models employing an interdisciplinary approach. Controversial issues and trends in early intervention, early childhood, and early childhood special education are integrated to enable students to read and critically apply research and recommended practices.

CTGE 5420. Educating Culturally and Linguistically Diverse Learners: Pre K-12. (3 Credits)
In this course Teacher Candidates in Early Childhood, Childhood, and Adolescence Education explore the characteristics, strengths, and needs of students who are culturally diverse and are learning English as an additional language (EAL). It highlights research-based instructional approaches and strategies to promote culturally responsive learning, and oral and written development in EAL across all content areas. The emphasis is on creating an integrated learning environment that enhances culture, language, and content knowledge and builds the academic achievement for all learners.

CTGE 5421. Planning Instruction for Young Children with Disabilities. (3 Credits)
This course shall enable students to structure physical and social environments, and to develop and implement instructional and intervention plans and procedures that are developmentally appropriate and respectful of family, cultural, language, and social diversity.

CTGE 5455. Rdg Skills Child Ld. (3 Credits)
CTGE 5530. Adol Literacy English Lang. (3 Credits)
This course will focus on ‘ways with words’ and how to best promote language usage and literacy through our teaching. Topics explored will include linguistic dimensions/systems of language, relationships between spoken and written words, variations within and across languages, readings and writing processes, and of course, how to best incorporate this knowledge into practice as teachers of English language arts. Students will gain deeper understanding of the English language and systems of grammar.

CTGE 5531. Language and Culture in Adolescent English Language Arts. (2 Credits)
This course will focus on “ways with words” and how to best promote language usage and literacy through our teaching. Topics explored will include linguistic dimensions/systems of language, relationships between spoken and written words, variations within and across languages, reading and writing processes, and how to best incorporate this knowledge into practice as teachers of English language arts. Students will gain a deeper understanding of the English language and systems of grammar.

CTGE 5532. Dev Lit Intermediate Grades. (3 Credits)
Students examine ways of organizing and implementing curriculum and instruction that foster literacy development in a range of students in grade 5-9. Students explore strategies for assessing and improving reading comprehension and writing fluency, develop strategies for motivating intermediate students to read and write, and discover methods for integrating electronic and other non-print texts into the curriculum for developing literacy.

CTGE 5534. Beginning Reading and Writing in Inclusive Classrooms. (3 Credits)
This course focuses on the development of linguistic and cognitive processes in emergent literacy and beginning reading and writing, as well as application in models for the instruction and assessment of reading and writing in young children. The course includes contemporary as well as historic approaches to the relationship between meaning-based literacy activities and word-level reading and spelling. It also includes material on classroom-based interventions for young children at risk of reading failure because of learning differences.

CTGE 5540. Adolescent Literature in a Multicultural Society. (1 to 3 Credits)
An exploration of the role of diverse adolescent literature from multiple genres across the disciplines as a vehicle for introducing students to themselves, their world, and the worlds of other cultures. Works will include those written by women and authors from a variety of cultures. Students will plan curricula that incorporate a variety of instructional strategies, integrating adolescent literature across curriculum areas in order to foster lifelong habits of reading, critical thinking, and judgment in adolescent readers.

CTGE 5545. Rdg Diag: Sec Sch/Adults. (3 Credits)
CTGE 5547. Literacy and Learning Across the Curriculum. (3 Credits)
In this course, students will learn about reading and writing as processes, language and literacy development, the use of literature and meaningful writing activities in content area curriculum, and the acquisition of comprehension, critical thinking and study skills needed for a variety of text types. Assessment of literacy proficiencies will be examined. The focus of this course is on middle and high school application.

CTGE 5548. Literacy Across the Curriculum in Inclusive Classrooms. (3 Credits)
This course has a threefold focus: an in-depth study of strategies for comprehending and creating text; integration of previous coursework in a comprehensive literature-based interdisciplinary theme unit; and an expectation that teachers or teacher candidates will teach, evaluate, and reflect upon this curriculum in their role as teacher-researchers. Topics include background knowledge, questions, and queries; reader response theory; cognitive and metacognitive strategies, interconnections between text structure in reading and text structure in writing; study and research strategies; and multiple print sources, including technology. The course promotes the individualization of curriculum for all children.
CTGE 5549. Assessing and Developing Reading and Writing in Social Studies, Science, and Mathematics. (3 Credits)
In this course, students will learn about reading and writing as processes; language and literacy development; and use of literature and meaningful reading-writing strategies in content-area curriculum; and the acquisition of comprehension, critical thinking, and study skills needed for a variety of text types. Assessment of literacy proficiencies will be examined. The focus of this course is on middle and high school application.

CTGE 5551. Reflective Practice and Field Experience I in an Inclusive Childhood Classroom. (1 to 3 Credits)
This course provides an introduction to schools and schooling practices. The Reflective Seminar is intended as a vehicle for critical reflection through which theory can be integrated with practical experiences. It focuses on several interconnected teaching strands: curriculum design, lesson planning, classroom organization, classroom management, assessment, reflective practice, collaboration and professionalism. Students in this seminar are viewed as reflective practitioners who draw from multiple models in planning for learning and teaching. This planning will build an inclusive community of learners, minimize behavior problems, and provide a welcoming, supportive environment for all children. The course meetings are designed to meet varying needs of our students in either the traditional or alternative programs. The seminar also provides a structure for organizing workshops in child abuse prevention, drug and alcohol abuse prevention, and violence prevention. Field experiences progress from observation to guided practice with small and whole groups of students.

CTGE 5552. Reflective Practice and Field Experience II in an Inclusive Childhood Classroom. (1 Credit)
This course provides an introduction to schools and schooling practices. The Reflective Seminar is intended as a vehicle for critical reflection through which theory can be integrated with practical experiences. It focuses on several interconnected teaching strands: curriculum design, lesson planning, classroom organization, classroom management, assessment, reflective practice, collaboration and professionalism. Students in this seminar are viewed as reflective practitioners who draw from multiple models in planning for learning and teaching. This planning will build an inclusive community of learners, minimize behavior problems and provide a welcoming, supportive environment for all children. The course meeting is designed to meet the varying needs of our students in either the traditional or alternative programs.

CTGE 5553. Reflective Practice and Student Teaching I in an Inclusive Childhood Classroom. (1 Credit)
This course provides an introduction to schools and schooling practices. The reflective seminar is intended as a vehicle for critical reflection through which theory can be integrated with practical experience. It focuses on several interconnected teaching strands: curriculum design, lesson planning, classroom organization, classroom management, assessment, reflective practice, collaboration and professionalism. Students in this seminar are viewed as reflective practitioners who draw from multiple models in planning for learning and teaching. This planning will build an inclusive community of learners, minimize behavior problems, and provide a welcoming, supportive environment for all children. The course meetings are designed to meet varying needs of our students in either the traditional or alternative programs.

CTGE 5554. Reflective Practice and Student Teaching II in an Inclusive Childhood Classroom. (1 Credit)
This course provides an introduction to schools and schooling practices. The reflective seminar is intended as a vehicle for critical reflection through which theory can be integrated with practical experience. It focuses on several interconnected teaching strands: curriculum design, lesson planning, classroom organization, classroom management, assessment, reflective practice, collaboration and professionalism. Students in this seminar are viewed as reflective practitioners who draw from multiple models in planning for learning and teaching. This planning will build an inclusive community of learners, minimize behavior problems, and provide a welcoming, supportive environment for all children. The course meetings are designed to meet varying needs of our students in either the traditional or alternative programs.

CTGE 5631. Science Curriculum and Instruction. (1 to 3 Credits)
Principles of curriculum construction applied to development of science sequences for children of various ages and ability levels, to assist teachers to understand and present basic concepts of science, and to utilize the environment in science teaching.

CTGE 5632. Topics in Science Curriculum. (2 Credits)
This course explores the resources of urban communities for teaching science at elementary and intermediate school levels. Field trips will include visits to urban centers for the study of astronomy, biology, and applied physics.

CTGE 5791. Social Studies Curriculum. (3 Credits)
This course is designed to provide students with the research data, trends, and processes connected with developing an effective social studies curriculum. This course will have both a theoretical and practical focus, which will prepare students for all the steps needed to develop a curriculum—from framing goals and objectives to implementing the curriculum in middle and high school settings.

CTGE 5792. Topics in History, Geography, and Economics. (2 Credits)
Candidates do a brief study of an economics/geography topic and an in-depth study of interdisciplinary theme across time and/or place.

CTGE 5794. Social Studies Scope and Sequence. (1 Credit)
This course prepares candidates to develop a year-long sequence of instruction in one or more 5-12 interdisciplinary content areas.

CTGE 5795. Clinical Seminar in Adolescence Social Studies. (3 Credits)
This course is designed to develop skills and habits of mind that are requisites to reflective practitioners of teaching. Course participants will engage in reflective discourse with peers and mentors to engage in a process of continuous learning in professional practice. The focus of the discussions, assignments, and mentoring/instructional activities will be on developing pedagogical content knowledge and skills needed to positively impact the life and learning of all students.

CTGE 5834. Clinical Seminar in Adolescence Language Arts Education. (3 Credits)
This course is designed to develop skills and habits of mind that are requisite to reflective practitioners of teaching. Course participants will engage in reflective discourse with peers and mentors to engage in a process of continuous learning in professional practice. The focus of the discussions, assignments, and mentoring/instructional activities will be on developing pedagogical content knowledge and skills needed to positively impact the life and learning of all students.

Updated: 07-27-2020
CTGE 5835. Lang Arts/Tchg of Rdg. (3 Credits)
CTGE 5838. Integrated Instruction in Adolescent English Language Arts. (3 Credits)
This course will develop the knowledge, abilities, attitudes, and pedagogical approaches necessary for teaching English language arts to diverse secondary-level students. Emphasis is on selecting and designing instructional strategies, materials, and assessment tools for meeting the needs of all students in inclusive multicultural classes, and helping them meet the learning standards for English language arts.

CTGE 5839. Integrated Inst. Ela. Adol. (2 Credits)
Develop the knowledge, abilities, attitudes, and pedagogical approaches necessary for teaching English language arts to diverse secondary-level students.

CTGE 5840. Second Language Acquisition. (3 Credits)
L2 Acquisition & Assess. Overview of the nature of second language acquisition processes with emphasis on teaching and learning. Areas addressed include: second-language acquisition, sociolinguistic and psycholinguistic factors in learning a second language, second-language proficiency, characteristics of L2 learners, ESL programs, instructional approaches and instructional resources for teachers. Second Language Acquisition (SEC LANG ACQ) title changed September 13, 2011, and again DECEMBER 3, 2012 to SECOND LANGUAGE ACQUISIT.

CTGE 5841. Principles of Bilingual Education. (3 Credits)
Topics include an examination of local, national, and international types of bilingual curricular models and practices; sociolinguistic and psycholinguistic aspects of bilingualism; and approaches to concept development in bilingual students. Graduate students will examine the history of bilingual education in the US, the evolution of different ideologies about language, and their impact on language policies in schools will be conducted.

CTGE 5842. Second Language Acquisition and Assessment. (3 Credits)
Overview of the nature of second language acquisition processes with emphasis on teaching, learning, and assessment. Areas addressed include second language acquisition, sociolinguistic and psycholinguistic factors in learning a second language, second language proficiency and development, and assessment of language competence and performance. In addition, the course will survey characteristics of emergent bilingual students, ESL programs, and instructional approaches and resources.

CTGE 5845. Learning Content Through Language in Multilingual Classrooms. (3 Credits)
This course provides an overview of English language instruction and development across the content areas when working with students who acquire English as an additional language. Particular attention will be given to investigating language demands of academic text; exploring instructional methods and instructional strategies to teach the language of academic text; and designing instruction guided by language standards as well as content standards of social studies, science, and mathematics in culturally and linguistically diverse classrooms.

CTGE 5846. Teaching English Oracy and Literacy to Speakers of Other Languages. (3 Credits)
This course provides an overview of the main theories and research related to the development of oracy and literacy when teaching students for whom English is an additional language. The learning processes of oracy and literacy as well as research-based instructional practices Pre-K to 12th grades will be examined. Attention will be given to the interconnection of these processes, similarities and differences between oral and written discourses, and the influence of the home language on developing oracy and literacy in English as an additional language. In addition, a survey of children and adolescent multicultural literature and its role in developing oracy and literacy will be conducted.

CTGE 5847. Practicum in Teaching English to Speakers of Other Languages. (3 Credits)
Supervised teaching practice of a minimum of 180 hours in English as a Second Language classrooms. Bi-weekly seminars.

CTGE 5848. TESOL Student Teaching I. (0 Credits)
This course will be an initial semester of supervised student teaching in English as a Second Language in an accredited elementary, junior high or high school, including large-class and small-group teaching as well as observations. The seminar will also focus on effective teaching practices.

CTGE 5849. Designing Culturally and Technologically Relevant Instruction. (3 Credits)
This course provides an overview of designing instruction which integrates cultural, academic, and linguistic funds of knowledge that reside in families of culturally and linguistically diverse students and the neighborhoods and communities where schools are located. In addition, an examination of how instruction is enhanced through technological resources that connect learning in individual classrooms to the outside world will be conducted. Emphasis will be given to exploring socio-historical, -cultural, and -political influences on learning and teaching, as well as, enhancing education by bridging the gap between schools, families, neighborhoods, and communities.

CTGE 5850. Observing and Documenting Children's Learning: Reflective and Effective Early Childhood Practices. (3 Credits)
This course will introduce major child-development and learning theories, and different assessment tools for observing and documenting child development and learning. Implications for programming and instruction for young children will be discussed.

CTGE 5851. Bilingual Instruction Across Subject Areas. (3 Credits)
This course is designed to provide an understanding of different pedagogical methods to develop bilingualism across subject areas. Additional attention is given to content curriculum and standards, negotiating academic content in more than one language and instructional strategies to scaffold academic language and text bilingually. The exploration of making cross-disciplinary and cross-linguistic connections in teaching and learning is required.

CTGE 5852. Multilingual Oracy and Literacy. (3 Credits)
This course explores the developmental processes of oracy and literacy in more than one language. Particular attention will be given to differentiating between oral language and oracy, reading and literacy, and monolingual and bilingual oracy and literacy development. The course integrates the study of metalinguistic strategies to support oracy and literacy development across languages and academic text. Graduate students conduct a survey of authentic and translated bilingual literature as well as the use of technology in bilingual classrooms.
CTGE 5853. Practicum in Bilingual/Second-Language Classrooms. (3 Credits)
Application and evaluation of teaching approaches, methods, and techniques in bilingual/second-language classrooms. This course also includes supervised student teaching of a minimum of 180 hours and clinical analysis by students and support personnel.

CTGE 5855. English as a Second Language for Adults. (3 Credits)
This course focuses on the specific needs educators encounter as they prepare to teach adults who acquire English as an additional language. Principles of adult learning theory will be integrated with principles of ESL to provide students an opportunity to explore and reflect on theory meeting practice in this specific curriculum area.

CTGE 5858. TESOL Student Teaching II. (3 Credits)
Teacher candidates are required to complete a second semester of supervised student teaching in English as an additional or new language (EAL/ENL) in an accredited elementary, junior high, or high school under the guidance of a certified ESL teacher. This clinical experience will include making reflective observations, designing lessons and mini units, and teaching individual, small-group, and whole-group lessons. Students are required to provide an in-depth analysis of the performance of EAL/ENL students. In addition, attendance and meaningful participation in a seminar of effective teaching practices is required.

CTGE 5910. Computers and Technology for Educators. (1 to 3 Credits)
This course is designed to help educators explore how to use present and emerging technologies in their classrooms and for their professional and personal development. There are four major emphases in the course: personal computer skills development, computers as aids in record management and research, advanced computer applications, and other technologies available for teaching and learning. No prerequisites or prior experience with computers is necessary.

CTGE 5920. Adult Development and Adult Learning Theory. (3 Credits)
Provides an understanding of theories and research in adult learning and development. Explores the dynamic relationship between the domains of adult learning and development, as well as implications for the practice of adult education.

CTGE 6000. Developing Emerging Literacy. (3 Credits)
This course addresses emerging literacy in children from birth to age eight, with emphasis on the preschool and kindergarten years. It focuses on theoretical underpinnings and development of language, concepts about print, book knowledge, and early drawing and writing. Effective instructional and assessment strategies appropriate for diverse early childhood classrooms are emphasized. Children’s play as a vehicle for literacy development, as well as family literacy, is also included.

CTGE 6001. Innovative Educators. (3 Credits)
In this course, students explore theory and research regarding the parameters for innovating curriculum and instruction in learning environments. Doctoral candidates will explore a variety of conceptualizations of innovation, the role of interdisciplinary collaboration in innovating instruction and curriculum, and ways innovation can serve to address educational inequities. Different cases that illustrate innovative learning environments across different countries and fields will serve to guide in-depth discussions. By synthesizing contemporary research, doctoral candidates will explore emerging innovations in education and construct their own understanding of being innovative educators.

CTGE 6002. Beginning Literacy Development in Inclusive Classrooms. (3 Credits)
Theory- and research-based beginning reading and writing strategies for classroom teachers, K–3. The focus is on understanding the underlying processes that support strategies for young children in transition from spoken to written language, the development of phonemic awareness and invented spelling, the relationship between writing and reading, phonics, and the use of multiple cue systems in early decoding and strategies for the construction of meaning. The course will also include theory and research of special programs for young children with learning differences.

CTGE 6004. Instructional Practices for Writing Across the K76 Curriculum. (3 Credits)
This course will provide teachers of literacy the opportunity to explore writing as a process and to develop instructional practices that may lead to growth in all students’ writing abilities across the childhood curriculum. In addition, students will have the opportunity to evaluate existing writing programs and to propose revisions to the programs to make them more effective.

CTGE 6006. Instructional Practices for Writing Across the K72 Curriculum. (3 Credits)
This course will provide teachers of adolescents the opportunity to explore writing as a process and to develop instructional practices that may lead to growth in all students’ writing abilities across the curriculum in grades 5 through 12. In addition, students will have the opportunity to evaluate existing writing programs and to propose revisions to the programs to make them more effective.

CTGE 6008. Critical Literacy, Inquiry, and Literature for Children. (3 Credits)
Explores how literacy can be used in the classroom as a vehicle for the critical examination of various issues and topics. Examines the use of the disciplines—literatures, sciences, and social sciences—to provide the contents for the inquiry and the communication systems—language, art, music, mathematics, and movement—to provide the processes through which the content is encountered.

CTGE 6010. Critical Literacy, Inquiry, and Literature for Adolescents. (3 Credits)
This course explores how inquiry and literature can be used in the classroom as a vehicle for the critical examination of various issues and topics with adolescents.

CTGE 6012. Assessment and Development of Literacy Processes: Birth?Grade 6: Practicum I. (3 Credits)
Literacy educators adopt reflective teacher-researcher stances as they informally document and assess individual students’ reading and writing achievements while implementing instructional activities to promote literacy development in authentic settings for children from birth to grade 6. They design or select appropriate procedures for documenting, promoting, and evaluating learners’ strategies and proficiencies. Includes 25 hours of supervised practicum experience on site. CTGE 6012 is open only to matriculated students who have completed a minimum of nine credits in the program. Completion of CTGE 6012 requires satisfying Gateway assignments, explained in the program handbook.
CTGE 6014. Assessment and Development of Literacy Processes: Grades 5-12, Practicum I. (3 Credits)

Literacy educators adopt reflective teacher-researcher stances as they informally document and assess individual students’ reading and writing achievements while implementing instructional activities to promote literacy development in authentic settings for students in grades 5-12. They design or select appropriate procedures for documenting, promoting, and evaluating learners’ strategies and proficiencies. Includes 25 hours of supervised practicum experience on-site. CTGE 6014 is open only to matriculated students who have completed a minimum of nine credits in the program. Completion of CTGE 6014 requires satisfying Gateway assignments, explained in the program handbook.

CTGE 6016. Research and Practice for Struggling Readers and Writers: Grades 176, Practicum II. (3 Credits)

Systematic documentation and analysis of literacy behaviors and literacy development of struggling readers and writers. Students adopt a reflective teacher-researcher stance as they implement and evaluate instructional activities intended to promote literacy growth. Includes 25 hours of supervised practicum experience on site. This course typically follows completion of CTGE 6012.

CTGE 6018. Research and Practice for Struggling Adolescent Readers and Writers: Grades 5-12, Practicum II. (3 Credits)

Systematic documentation and analysis of literacy behaviors and literacy development of struggling readers and writers. Students adopt a reflective teacher-researcher stance as they implement and evaluate instructional activities intended to promote literacy growth. Includes 25 hours of supervised practicum experience on site. This course typically follows the completion of CTGE 6014. Completion of CTGE 6018 requires satisfying Gateway assignments, explained in the program handbook.

CTGE 6191. Critique of Research. (3 Credits)

Examination of the principles for the design of educational research. Students will be trained to subject educational research to intensive analysis, defining all possible sources of variation.

CTGE 6192. Research in the Teaching Process. (3 Credits)

Students develop an understanding of processes involved in conducting classroom research through designing and implementing collaborative or individual classroom research projects. Issues include understanding the nature of classroom interactions and the learning process, the effects of specific techniques on learning, and the influence of the classroom environment on learning. Findings are reported through workshops and papers.

CTGE 6195. Theory and Practice in Curriculum and Teaching. (3 Credits)

A critical review of conflicting curriculum theories advanced and implemented in contemporary education. Steps in developing and implementing curriculum theory will be analyzed, and the role of theory in curriculum development will be emphasized from varying perspectives.

CTGE 6200. Special Topics in Educational Technology. (0 to 1 Credits)

This course explores the use of various technologies in teaching and learning. Discussion of and practice with technologies is in service of developing content learning.

CTGE 6201. Teaching through Digital Literacies. (3 Credits)

This course explores various aspects of digital literacies, including the use of multimedia technologies in teaching and learning. Discussion of and practice with technologies is in service of defining digital skills that students must develop to succeed in school and beyond.

CTGE 6203. Cyber Communities for STEM. (1 Credit)

This course is designed to support the development of the habits of mind required to engage in Science/Math/Technology/Engineering (STEM) education from the perspective of both instructor and learner. Course participants will co-construct cyber-based discourse communities designed to contribute to the resources available for STEM educators.

CTGE 6253. STEAM Education in Theory and Practice. (3 Credits)

This course is designed to provide students with a comprehensive introduction to STEAM (Science, Technology, Engineering, the Arts, and Math) education. Doctoral students will learn about the evolution of STEAM education as well as the theories and methodologies that led to its emergence. Discussions of readings will highlight how STEAM interconnects different fields of knowledge and is relevant to the instruction of all learners across a continuum of abilities and talents. Throughout the course, students will critically analyze the current research, trends, and practices of STEAM in contemporary K-12 classrooms.

CTGE 6255. Teaching and Assessing Science, Technology, Engineering, Art & Mathematics (STEAM) in K12. (3 Credits)

This course is designed to conduct a deep cognitive and experiential examination of the Science/Technology/Engineering/Arts/Mathematics Education (STEAM) pedagogy in K-12 education. Consequently, this course seeks to use a conceptual-change approach for developing habits of mind and epistemological orientations requisite to curriculum designers and leaders of STEAM education programs and initiatives.

CTGE 6257. Computational Thinking A: Principles of Computing. (3 Credits)

This course covers various computing aspects of computational thinking. It includes history and future as well as applications of computing. Topics in the following areas will be covered: basic concepts, abstraction, algorithmic problem-solving, recursion, modeling, and simulation, visualization, and limitation. Each topic will be supplemented with a real-world example, case study, and practical work related to education in K-16 classrooms.

CTGE 6258. Computational Thinking B: Essentials of Informatics. (3 Credits)

This course covers various data analytics and informatics aspects of computational thinking. It focuses on the nature of informatics, the need for it, and its applications, particularly in education. It will emphasize the computational approach as a necessary complement to the statistical approach. Topics in the following areas will be covered: data representation, data description with regression, correlation and causality, classification, associate rule, clustering, machine learning, data fusion, cognition, and visualization. Each topic is supplemented with a real-world example, case study, and practical work related to educational settings.

CTGE 6260. Media Tchn Math Science. (3 Credits)

Students will be introduced to multimedia technologies and their use in science and mathematics education. The goals for the course include an understanding of multimedia technologies as tools for teachers (not replacements, not baby sitters). The most effective tools build cognitive theory into their design. Tools that incorporate cognitive theory are said to represent cognitive technologies. A second goal is to empower the student to evaluate educational software along multiple dimensions. An additional goal involves familiarization with modern graphic-user interfaces with a direct-manipulation style of interaction.
CTGE 6261. Media Literacy Technology. (3 Credits)
The course will cover the uses of the computer and other technology in language arts and social studies at the elementary and secondary levels. Among the topics covered will be text processing, computerized tutorials, and computerized simulations. Students will review a range of technology-based instructional activities, as well as create technology-based materials.

CTGE 6262. Application of Computers to Special Education. (3 Credits)
Designed for teachers concerned with the educational needs of students with disabilities. Introduces computer software that is available for use by the teacher of students with the full range of disabilities and other health impairments. Experience using the Internet to access information, lesson plans, and resources helpful to the special education teacher.

CTGE 6265. Emerging Issues in Technology. (3 Credits)
This course is designed to help educators better understand how emerging issues in educational technologies influence their professional environment and pedagogical options. The course will focus on the educational transformations sometimes facilitated by electronic technology use and adoption. Going beyond learning particular techniques for integrating technology into the curriculum, this course takes a wider institutional view of the transformative potential of new technologies in education.

CTGE 6270. Data, Inquiry & Tech. (1 to 3 Credits)
This course for educators is designed to promote deep understanding or 1) the design of school based inquiry teams, and 2) the links between inquiry, student learning outcomes and technology.

CTGE 6290. Cross-Cultural and Educational Perspectives of Learning Communities. (3 Credits)
This course provides graduate students with an opportunity to observe, examine, document, and prepare a reflective document under cross-cultural and educational perspectives and characteristics of communities of learning (i.e. schools, educational systems, educational districts outside U.S.). Students will examine components of its culture, language, and identity and its impact on their educational system. Students will gain a deeper understanding of themselves and others as they explore how cultural values, norms, and practices influence how people think about educational systems in different parts of the world. Since the course is offered abroad, students will experience firsthand the complexities of immersion in another language and culture while developing their own intercultural competence. Topics include: (1) cultural norms and values; cultural lifestyles and their relationships to society value system educational goals and implementation; (2) intercultural competence; (3) cross-cultural communication in and beyond the classroom, including the role of race/ethnicity, social class, and gender; (4) cultural perspectives on school-community relations; and (5) cross-cultural perspectives on parenting and language socialization.

CTGE 6300. Curriculum Evaluation. (3 Credits)
Examination of evaluation strategies, techniques, and models applicable to the school curriculum. Study of the application of objectives to evaluation, development of evaluation designs, systematic approaches to assessment, problems of implementation, and accountability.

CTGE 6305. Dev Delays / Early Interv. (3 Credits)
Provides an overview of the characteristics of disabling conditions in young children. It introduces the psychological, environmental and biological conditions, and the interactions among them that place children at risk for developmental delays and disabilities. Mutually Exclusive: CTGE 5155, PSGE 5301.

CTGE 6310. Educating Students with Disabilities in Elementary Schools. (3 Credits)
This course provides an introduction to understanding children with disabilities and special health care needs. It examines the physical, social, emotional, and learning characteristics of children identified as disabled and their impact on the family. It meets New York State Education Department regulatory requirements for teachers of students with disabilities to understand the needs of students with autism.

CTGE 6320. Col/Consult w/Fam & Prof. (3 Credits)
Primary focus of this course is to understand roles that families, professionals, and communities play in the lives and education of children from various backgrounds. Mutually Exclusive: CTGE 5234.

CTGE 6326. Perspectives on Standardized Language and Literacy Assessment: Policy and Practice. (3 Credits)
Focuses on issues, principles, and current practices in literacy assessment, examination of available measures and evaluation procedures of norm-referenced, language and literacy assessment, relationship of standardized assessment to instruction, and examination of strenghts and weaknesses of such instruments.

CTGE 6330. Communication, Tech Arts. (3 Credits)
Candidates shall develop skills necessary to provide specifically designed instruction to students with mild, moderate, severe, and multiple disabilities using assistive and instructional technology.

CTGE 6340. Interventions Read / Write. (3 Credits)
Draws on the fields of literacy, learning disabilities, psychology, and neuroscience to examine ways to assess the reading and writing skills of students who struggle and to determine evidence based interventions that support their learning. MG, Chair, C&T, October 16, 2014.

CTGE 6350. Positive Behavior Support. (3 Credits)
This course focuses on obtaining the knowledge and skills necessary to develop, implement, and evaluate the impact of positive behavior support on student behavior.

CTGE 6400. Language for School Learning: Implications for Reading and Writing Programs. (3 Credits)
An interdisciplinary course focusing on the relationship for teachers and supervisors between language as a tool for learning and language as evidence of learning. Particular emphasis will be placed on the relationship between these concerns and the need for improving the reading and writing abilities of students in all levels of education.

CTGE 6401. Teaching the Structure of the English Language. (3 Credits)
An introduction to theories of English language phonology, syntax, and semantics and their implications for developing English language understanding, speaking, reading, and writing skills by speakers of other languages. Particular emphasis will be placed on the development of related teaching and learning approaches.

CTGE 6405. Teaching and Assessing Composition Adolescents. (1 to 3 Credits)
This course focuses on the teaching of writing in middle and high school English classes. Topics covered will include theories of writing and writing instruction, assessment of writing, and instructional practices in the teaching of composition.
CTGE 6410. Teaching and Assessing Reading and Literature Adolescents. (3 Credits)
In this course, students examine ways of assessing, organizing and implementing standards-based curriculum and instruction that foster reading development and literacy understanding for adolescents within the full range of abilities. The course provides opportunities to explore formal and informal strategies for assessing and improving reading comprehension and fluency, to develop strategies for motivating adolescents to read a wide range of literatures, and to plan differentiated instruction for reading and the study of literature to promote learning for all students.

CTGE 6415. Special Topics in English Education. (0 to 1 Credits)
This one-credit course focuses on a special topic related to the teaching and learning of English Language Arts.

CTGE 6500. Interdisciplinary Perspectives on Literacy; Linguistic and Cognitive Development. (3 Credits)
The course focuses on literacy as the interrelationship between and among linguistic dimensions (systems of language, spoken-written language, development connections, language variation) and cognitive dimensions (development, teaching, learning, understanding, and interpretations). Addresses competing theories of literacy, language, and learning, and the potential implications for decision-making by literacy leaders.

CTGE 6501. Sociocultural and Developmental Dimensions of Literacy. (3 Credits)
Focuses on the sociocultural of literacy - group uses of literacy, literacy as a tool for knowledge and power - and the developmental dimensions - patterns of learning literacy, role of learner, adult and environment - and their interrelationships.

CTGE 6502. English as a World Language. (3 Credits)
This course explores English instruction and use around the world. Course readings will survey varieties of global Englishes. The purpose of speaking and writing English, by native and non-native speakers, and how these purposes influence teaching and learning are examined. Discussions are held on the international spectrum of English teaching approaches and local conditions that may influence their implementation. Graduate students analyze the impact of English instruction and its use around the world guided by socio-historical, socio-cultural, and socio-political lenses.

CTGE 6504. Teaching and Assessment of Composition for Adolescents. (3 Credits)
This course focuses on the teaching of writing in middle and high school English classes. Topics covered will include theories of writing and writing instruction, assessment of writing, and instructional practices in the teaching of composition.

CTGE 6532. Developing Literacy in Intermediate Grades. (3 Credits)
In this course, students examine ways of organizing and implementing curriculum and instruction that foster literacy development in a range of students in the intermediate grades (grades 5-9). Students explore strategies for assessing and improving reading comprehension and writing fluency, develop strategies for motivating intermediate grade students to read and write, and discover methods for integrating electronic and other non-print texts into the curriculum as a means for developing literacy.

CTGE 6551. Reflective Seminar in Literacy Education. (3 Credits)
As a culminating experience in the Language and Literacy program, students engage in weekly seminar sessions reflecting on evolving personal, professional philosophies and proficiencies. Students will explore approaches to evaluating, organizing and enhancing literacy programs. Teacher research and practice as a literacy leader will result in the creation and presentation of a professional portfolio to a professional panel for evaluation and approval. The portfolio should contain evidence that the student has met each of the program objectives.

CTGE 6593. Administration and Supervision of Literacy and Language Programs. (3 Credits)
The course deals with organization, administration, and problems of organizing a reading program. Attention is also focused on in-service teacher education.

CTGE 6608. Literacy Institute. (0 to 3 Credits)
Important and emerging topics in literacy education; theories, current research and best practice applications for developing literacy proficiencies K-12.

CTGE 6662. Teaching Geometric Concepts. (3 Credits)
CTGE 6781. Instructing Bilingual Special Education Students. (3 Credits)
The course presents a general overview of multiple perspectives in teaching the bilingual/limited English proficient students with special needs: instructional models, individualized instruction, the role of English in teaching, literacy development in both languages, and content-area teaching.

CTGE 6782. Bil Spec Ed: Issues&Trend. (3 Credits)
CTGE 6797. Grant Writing Module. (1 Credit)
This one-credit course will introduce students to essential components of grant writing. Students will get writing tips, learn about many different sources of funding, and prepare a pilot grant project proposal. Successful grant writers and representatives of Fordham's Office of Sponsored Programs will help students acquire skills for successful grant writing.

CTGE 6799. Manuscript Preparation and Presentation at Conference. (1 Credit)
This unit is designed to develop students' knowledge and skill to prepare manuscripts for publication, as well as to prepare and present articles at a conference. The topics covered in this study include the value of orally presenting research; background to writing; reasons to write; and types of articles to write. Scholarly publications are vital in scientific communities for sharing new knowledge and discussing new innovations. Scholarly publications in the forms of peer-reviewed journal papers and conference papers of original research are generally considered highly significant, if not the most significant scholarly achievement. Therefore, this course for all doctoral students provides an implementable method and guidance for scientific publication. The intent is to help students increase the likelihood of their success in publishing manuscripts as a doctoral student and as a new faculty member. The course will apply an interactive step-by-step approach through real practice, enabling students to become familiar with research-related journals in their fields and then to develop a manuscript from concept to final version, providing peer reviews of papers, and submitting a paper to a journal or at a national or international conference. When the schedule permits, experienced editors, reviewers, authors, and publishers will be invited to the lectures to join the discussions with students.
CTGE 6810. Sociopolitical Dimensions of Education. (3 Credits)
This course introduces students to various pedagogical theories and leads to an understanding of how these theories relate to schooling in the 21st century. Several questions will guide the course: What are the relationships among power, knowledge, and social identities in the making of "teachers" and "students"? How is power—particularly in the form of class, race, gender, and other social stratifications—enacted, contested, and perpetuated in school contexts? Who is privileged? Who is disadvantaged?

CTGE 6991. Internship in Curriculum and Teaching. (3 Credits)
Offered as a Guided Tutorial Course. Professional experiences in the schools or educational agencies other than schools, as interns to curriculum coordinators, supervisors, or consultants. Registration with approval of chairperson, faculty supervisor, and agency director.

CTGE 6992. Internship in Curriculum and Teaching. (3 Credits)
A continuation of CTGE 6991: Offered as a Guided Tutorial Course. Professional experiences in the schools or educational agencies other than schools, as interns to curriculum coordinators, supervisors, or consultants. Registration with approval of chairperson, faculty supervisor, and agency director.

CTGE 7000. Special Topics Lang Lit Lrng. (3 Credits)

CTGE 7190. Statistics and Quantification Design. (3 Credits)
Statistical methods applied to curriculum research studies. Strategies for evaluating educational intervention, balancing internal and external validity, obtaining appropriate population samples and implementing multivariate designs.

CTGE 7194. Advanced Qualitative Research. (3 Credits)
In this course, students will examine the nature and characteristics of various qualitative inquiry traditions utilized in educational research. Emphasis will be placed on developing competence in qualitative research design, data collection, analysis, and report writing.

CTGE 7201. Contemporary Thinking about Instruction. (3 Credits)
In this course, students will examine different theories of learning to question those theories' influence on instructional practice. Candidates will examine historical epistemological frameworks that influence instruction, including theories of motivation and engagement used in designing powerful learning experiences, as well as cognitivism, humanism, behaviorism, social cognitivism, and constructivism. In addition, candidates will examine contemporary theories that question social, cultural, and contextual conditions influencing instruction and impacting educational equity, such as sociocultural, critical pedagogy, race theory, and situational theories. Candidates will examine their theories of practice to consider how they approach problems in their professional practice.

CTGE 7204. Informing and Transforming Instruction through Assessment. (3 Credits)
This course will focus on practices and policies related to the use of a variety of assessment approaches for informing instruction to understand and support student learning. Traditional and innovative assessment systems used with students with and without disabilities for progress monitoring, accountability, data-based decision-making at individual, school, and state levels will be explored. The course will further explore the roles of teachers, administrators, and policymakers in developing equitable and meaningful assessment approaches to improve learning environments for all students.

CTGE 7206. Course Development and Teaching Module. (1 Credit)
This one-credit course is designed for students to acquire the knowledge and skill necessary to develop and teach courses at the undergraduate and graduate levels. The course will prepare students to create an inclusive teaching and learning environment in which their students can be open to new ideas, various perspectives, and ways of thinking distinct from their own. Students will also learn the process from planning courses to evaluating their students' learning. By team-teaching a course with a faculty member in the ICI program, students will put their acquired knowledge and skills into practice.

CTGE 7236. Problems and Issues in Early Childhood Education. (3 Credits)
Examination of the concerns that affect practice and the child's ability to learn. Selection of topics current to working with all young children in early childhood settings.

CTGE 7330. Res Sem: Secondary Educ. (3 Credits)

CTGE 7340. Contemporary Academic Interventions for All Learners. (3 Credits)
It is estimated that more than 10 million children in the United States have some degree of reading disability. Roughly 80 percent of children referred for special services require support services in reading, writing, and oral language. Best contemporary practices rely on interdisciplinary teams to assess difficulties and plan interventions. This interdisciplinary course draws from the fields of literacy, learning disabilities, psychology, and neuroscience in examining theories and research in reading and writing processes and best practices for universal design. This course will explore recent advances in (1) the cognitive neuroscience of learning and individual differences, and (2) the universal design of educational technologies and multimedia of these fields, through appropriate readings and through media construction exercises designed to prepare and support participants to meet the challenge of individual differences through academic interventions.

CTGE 7350. Creating Learning Environments through Positive Behavior Supports. (3 Credits)
This course focuses on obtaining the knowledge and skills necessary to develop, implement, and evaluate the impact of Positive Behavior Support on student behavior. The course specifically covers general classroom management, Functional Behavior Assessment (FBA), and Positive Behavior Support (PBS) within the Response to Intervention (RtI). These are foundations of an appropriate behavioral intervention in supporting ALL students in classrooms and schools at large. The students will participate in lecture, discussions, article review, in-class activities, and conducting and presenting a case study.

CTGE 7352. Research Design Module. (1 Credit)
In this course, doctoral candidates will design a pilot study with the guidance of their mentor, and a proposal to conduct a pilot study. Individual attention will be given to identifying a researchable problem, constructing a meaningful research question, and designing a data collection and analysis plan. This course is the first of two parts of the research apprenticeship requirement of the ICI program. It must be completed during the first semester of the apprenticeship.

CTGE 7356. Research Implementation and Dissemination Module. (2 Credits)
This 2-credit module satisfies the second part of the research apprenticeship requirement. It must be taken over two consecutive semesters after successful completion of Research Design Module. Doctoral candidates will implement the pilot study, write a manuscript to disseminate results and findings, and submit it for publication in a scholarly journal.
CTGE 7460. Advanced Seminar in Special Education Curriculum. (3 Credits)
Focus on providing an appropriate curriculum for children, adolescents, and young adults with disabilities. Examination of curriculum evaluation strategies, techniques, and models applicable to both inclusive and special education classrooms. Students address issues of implementation and accountability. Students will apply this information in analyzing their own recent experiences in the classroom.

CTGE 7470. Seminar in Language Disorders in Special Education. (3 Credits)
Critical evaluation of major concerns in selected areas related to language development and remediation in the education of children, adolescents, and young adults with disabilities.

CTGE 7491. Reading and Writing as Psycholinguistic Processes. (3 Credits)
This course examines theories and research on reading and writing processes as these influence and result from cognitive activities. Implications for classroom use of reading and writing as activities for increasing learning.

CTGE 7492. Translingual Pedagogy. (3 Credits)
This course explores translingualism as a construct of multilingual competence. It refers to the multiple ways speakers of more than one language move across languages and communicate in hybrid languages within the context of migration, transnational economic and cultural relations, digital communication, and globalization. In this course, candidates will review research that explores sound pedagogical applications of this construct.

CTGE 7493. Learning and Knowing through Multilingualism. (3 Credits)
This course provides theoretical and research knowledge about the nature of learning and knowing in the 21st century. It explores how curricula are facilitated through language. Students will consider the dynamic relationship between knowledge construction and multilingualism. In addition, they will critically consider historical and contemporary approaches that promote learning academic content, from both linguistic separatist and integrative lenses.

CTGE 7494. Translingual and Transliteracy Practice in Maker Spaces. (3 Credits)
This graduate course seeks to develop new understandings about teaching language and literacy to diverse learners in a collaborative and interdisciplinary environment. Candidates will explore integrated instructional practices that support multilingual and transliteracy learning as well as deepen their understanding of professional mutual development. Key issues about the instruction of language and literacy will be identified and analyzed critically. Instructional projects that combine multilingualism and transliteracy to address these issues will be designed in small interdisciplinary groups and implemented in a makerspace classroom.

CTGE 7497. Translingual and Transliteracy Practice in Makerspace. (3 Credits)
This graduate course seeks to develop new understandings about teaching language and literacy to diverse learners in a collaborative and interdisciplinary environment. Candidates will explore integrated instructional practices that support multilingual and transliteracy learning as well as deepen their understanding of professional mutual development. Key issues about the instruction of language and literacy will be identified and analyzed critically. Instructional projects that combine multilingualism and transliteracy to address these issues will be designed in small interdisciplinary groups and implemented in a makerspace classroom.

CTGE 7568. Advanced Practicum in Special Education. (3 Credits)
Practicum experiences for advanced students, designed to prepare for supervisory roles and for curriculum development specialists; emphasis on the analysis of clinical teaching in a variety of classroom settings.

CTGE 7570. Advanced Study on Problems and Issues in Special Education. (3 Credits)
Focus on current problems and issues in special education related to the development and education of children, adolescents, and young adults with physical, cognitive, and/or emotional disabilities. Emphasis will be focused on communication and language disorders, and literacy development of children with disabilities. Exploration of trends in providing educational services to students with disabilities; application of this information in analyzing our recent experiences in schools.

CTGE 7571. Research Issues and Policy Trends in Special Education. (3 Credits)
Focus on the design and conduct of research in special education. Critique recent research tools and techniques in the field and relate these to current needs for more informative research results in special education. Read examples of research that employ different types of research methodologies. Students will be encouraged to apply these concepts in their own classrooms and schools as a basis for their own field-based research.

CTGE 7574. Critical Transliteracy. (3 Credits)
Central to this course is the exploration of the social, cultural, political, historical, and economic influences on diverse contexts where literacy is concerned. Literacy instruction is explored in K-12 schools and college, as well as in community organizations. Candidates will design explorations that critically examine how issues of power and diversity impact the democratization of the literacy classroom. Critical analysis of the multiple modes of literacy will be discussed as an instructional tool and as a vehicle to voice learners’ knowledge in diverse learning environments.

CTGE 7596. Cognitive, Linguistic, and Sociocultural Dimensions of Literacy. (3 Credits)
History and impact of the cognitive revolution on language and literacy curricula, theories, and research. Overview of historical theories and research on text processing as problem solving (e.g., reader response theory, metacognitive theory, schema theory, information processing theory). Recent neurobiological studies are considered as methods of observing literacy problem solving. Implications for curriculum and teaching. Includes possible links to the development of student research agendas.

CTGE 7599. Creativity in Teaching Environments. (3 Credits)
This course reviews theory, research, and practice concerning instructional design and experience, with the goal of developing learners’ creative problem-solving skills along with discipline content. Discussions will describe principles and practices applied to pre-K-16, and demonstrations of instructional resources will be provided. Candidates will explore ways to apply critical and creative thinking to facilitating learning for all in contested educational environments.

CTGE 7820. Global Perspectives in Multilingual Competency. (3 Credits)
This course provides theoretical and research exploration of global conceptualizations for communicating and learning in more than one language.

CTGE 7843. Scnd Lang Proficiency/Lng. (3 Credits)
Survey of research on how students from diverse backgrounds acquire a second language; psycho-linguistic and sociolinguistic variables involved in curriculum; appraisal of techniques and instruments employed in such research; development of research models. Permission of chairperson or instructor required.
CTGE 7844. Lang/Ed Asmt Mlt Lang St. (3 Credits)
Focuses on theoretical problems in bilingual and second-language studies; examination of available measures and evaluation approaches, for example, language dominance and proficiency instruments; criterion-referenced tests; and construction and application of new techniques and measures for such programs.

CTGE 7845. Curriculum Models: Bilingual/ESL Programs. (3 Credits)
The course provides theoretical and practical knowledge related to planning, development, and implementation of curriculum models and methods in bilingual and English as a second language program. The course focuses on (1) curriculum models and design typologies, (2) analysis of policy issues, (3) language and cultural issues, and (4) second language methods.

CTGE 8001. Research Apprenticeship. (0 Credits)
In the Research Apprenticeship the student is required to work closely with a research apprenticeship faculty advisor to develop and carry out a research project. The student must register each of the 3 semesters and must attend the Research Colloquia each semester. Prerequisite: Permanent Matriculation status plus 21 doctoral credits.

CTGE 8101. Advanced Research in Curriculum and Teaching. (3 Credits)
Designed for advanced doctoral students who are developing dissertation topic areas or who are conducting research projects. The course is usually taken on an independent study basis because of unique student needs.

CTGE 8110. Dissertation Seminar in Curriculum & Teaching. (3 Credits)
Seminar for advanced doctoral candidates who have completed all coursework for their degree. The purpose of the seminar is to have students develop an approved proposal for their doctoral dissertation.

CTGE 8111. Dissertation Seminar in Curriculum & Teaching. (3 Credits)
A continuation of CTGE 8110. Seminar for advanced doctoral candidates who have completed all coursework for their degree. The purpose of the seminar is to have students develop an approved proposal for their doctoral dissertation.

CTGE 8502. Directed Research in Curriculum and Teaching. (3 Credits)
Designed for students who have completed their coursework and are developing research problems or projects for completion of doctoral studies. It may not be used to replace any degree course requirements.

CTGE 9000. Special Topics in Curriculum and Teaching. (3 Credits)
Special topics in curriculum and teaching. (Permission of course instructor required.)

CTGE 9001. Spec Topics C & T. (0 Credits)
Spec Topics C & T.

CTGE 9002. Spec Topics C & T. (0 to 3 Credits)
Spec Topics C & T.

CTGE 9990. Independent Study. (0 to 3 Credits)
Designed to enable students to study selected topics in depth and to conduct research. For matriculated students only. An outline of the proposed work must be approved by the adviser. Registration requires the approval of professor directing study, the division chairperson and the director of graduate studies.

EDGE 6100. Issues and Trends in American Education. (3 Credits)
The course is designed to provide students with the opportunity to become familiar with the important movements, trends, and innovations that are shaping the education profession.

EDGE 6101. Race and Multicultural Education in American Society. (3 Credits)
Examines the concept of cultural pluralism—the values, traditions, and aspirations of various immigrant and ethnic groups; examines the institutionalized nature of prejudice and its impact on the cultural, economic, social status, and mobility patterns of selected ethnic groups.

EDGE 6106. Hre Practicum I. (3 Credits)
This course integrates the knowledge and skills acquired during the program. In this first practicum, students identify an organizational problem and begin the consultation process. They must identify a sponsor, contract for the assignment, collect data and provide feedback to the appropriate organizational members.

EDGE 6107. Hre Practicum II. (3 Credits)
This course continues the process begun in Practicum I. In partnership with the organization, students design and implement an intervention based on the data collected earlier in the consultation process. They must evaluate the performance outcomes associated with the intervention.

EDGE 6226. Design of Interactive Learning Systems. (3 Credits)
Cognitive theory and programming skills are taught that enable students to develop multimedia instructional software in a variety of paradigms (for example, simulation, coaching, hypertext, multimedia, tutorial, and drill and practice). To ensure instructional effectiveness, emphasis is placed on building instructional strategies (based on cognitive theory) into the design. To ensure usability, human-computer interaction issues are considered (again, based on cognitive theory). Prerequisite: PSGE 5220 or consent of instructor.

EDGE 6703. Meas Hum Res Ed. (3 Credits)
Focuses on understanding, using and developing assessment tools in the workplace. Students design an instrument, collect and analyze data, and write and present their findings. Measurement concepts of reliability and validity are discussed in relation to developing or purchasing assessment tools.

EDGE 8001. Doctoral Research Apprenticeship. (0 Credits)
A seminar (two consecutive semesters and a summer) in which the student is required to attend monthly seminars. The student is required to undertake research with a faculty member, culminating in a research project that demonstrates the student’s ability to do doctoral work. Prerequisite: Permanent Matriculation Status.

EDGE 9990. Independent Study. (0 to 4 Credits)
Designed to enable students to study selected topics in depth and to conduct research. For matriculated students only. An outline of the proposed work must be approved by the adviser. Registration only by approval of professor directing study, chairman of the student’s division, and director of graduate studies.

EDGE 9995. Doctoral Maintenance of Matriculation. (0 Credits)
Doctoral Maintenance of Matriculation (0 credit) (DOCTORAL MATINTEANCE)

EDGE 9999. Dissertation Mentoring. (0 Credits)
Consultation with mentor and dissertation committee on defense of completed dissertation work.

PSGE 5203. Introduction to Research. (3 Credits)
Presentation of the basic concepts, tools, and methods of research in education and psychology.

PSGE 5204. Research Methods in Counseling. (3 Credits)
Basic concepts, tools, and methods of research in counseling.
PSGE 5210. Statistical Methods in Education and Psychology. (3 Credits)

PSGE 5301. Psychological Factors in Young Children with Disabilities. (3 Credits)
This course provides an overview of the characteristics of disabling conditions in young children. It introduces the psychological, environmental, and biological conditions, and the interactions among them that place children at risk for developmental delays and disabilities. It discusses the sociocultural and political contexts impacting child development, and the effectiveness of various intervention approaches and models so as to provide students with a knowledge base and skills for interventions. 
Mutually Exclusive: CTGE 5155, CTGE 6305.

PSGE 5302. Psychology of Adolescent Development and Learning. (3 Credits)
Theory and study of development and learning process during the adolescent years. This course examines the cognitive, psychosocial, and character development of children from age 12 to 18 and young adults, their learning abilities and processes; and individual, sociocultural, and other environmental factors affecting their learning and development.

PSGE 5314. Psychology of Classroom Organization and Management. (1 Credit)
The study of teacher-pupil interactions in classrooms. Characteristics of effective learning environments, time and behavior management, classroom climate, and leadership. Causes of student misbehavior and techniques for prevention and correction. Open only to matriculated students in one of Fordham's initial teacher education programs.

PSGE 5316. Psychology of Child Development and Learning. (3 Credits)
This course will review current thinking in the study of child development as reflected in prevailing developmental theory and research. Course readings and assignments will address developmental issues throughout childhood within the physical, cognitive, and socioemotional domains. Special emphasis will be placed on the changes in learning that occur during infancy and childhood.

PSGE 5318. Human Development and Learning: Pre-K?Grade 12. (3 Credits)
This course will provide an overview of psychological principles relevant to the process of learning and teaching as applied to the kindergarten through secondary-school learner. Topics will include theories of human development and learning, models of learning and instruction, and academic assessment.

PSGE 5500. Psychological Factors in Children with Disabilities. (3 Credits)
An introduction to understanding children with disabilities and special health care needs. Study of the physical, social, emotional, and learning characteristics of children identified as disabled.

PSGE 5505. Psychology of Learning Disabilities. (3 Credits)
Identification of social, emotional, and learning characteristics of children diagnosed as brain injured, neurologically impaired, or learning disabled. Exploration of perceptual disabilities, language, and motivational and behavioral aspects of children who have learning problems.

PSGE 5620. Introduction to Professional School Counseling I. (3 Credits)
An introduction to the profession of counseling. The processes and techniques of counseling are studied. Emphasis on the development of active listening skills. Prevention and remediation are addressed. 
Corequisite: PSGE 5622.

PSGE 5621. Foundation of Professional Counseling and Consultation. (3 Credits)
An introduction to the profession of counseling. The processes and techniques of counseling are studied. Emphasis on the development of active listening skills. Prevention and remediation are addressed. Must be taken with PSGE 5623.
Corequisite: PSGE 5623.

PSGE 5622. Pre-Practicum in Professional School Counseling I. (3 Credits)
Guided and supervised experience in individual counseling using a variety of counseling techniques. Must be taken with PSGE 5620.
Corequisite: PSGE 5620.

PSGE 5623. Clinical Instr Couns Process. (3 Credits)
Guided and supervised experience in individual counseling using a variety of counseling techniques. Must be taken with PSGE 5621.
Corequisite: PSGE 5621.

PSGE 5625. Theories Fam Couns: Asst. (0 to 3 Credits)
This course covers leading theories of family counseling and reviews a variety of family assessment procedures and techniques. The course has an applied focus and integrates multicultural and social justice perspectives in understanding and working with families both within and across cultures.

PSGE 5627. Couns College & Post HS. (3 Credits)
This course provides systematic training in counseling for post high school planning including the college admission and selection process. Students will be introduced to concepts and practical skills required for competency in working with diverse populations: the traditionally aged college student applicant, the disadvantaged, the minority student, the gifted, the learning disabled, the student athlete, and the adult.

PSGE 5630. Theories of Counseling for School Counselors. (3 Credits)
This course is designed to review and evaluate various theories of counseling. Students will be able to compare, contrast, and critique the theoretical approaches in terms of each of the theory's strengths, weaknesses and utility for multicultural populations and for furthering social justice advocacy. This course must be taken with PSGE 5632.
Corequisite: PSGE 5632.

PSGE 5631. Couns Theory & Practice. (3 Credits)
This course is designed to review and evaluate various theories of counseling and to encourage students to develop their own conceptualizations of the counseling process. This course must be taken concurrently with PSGE 5633.

PSGE 5632. Social Justice Practicum in Professional School Counseling. (3 Credits)
Students will be placed in a 100-hour social justice oriented practicum in a high need school. They will be conducting both direct and indirect counseling under the supervision of a certified school counselor. During the first half of the class, students will serve as a peer supervision of the pre-practicum experience. In the second half of the class, students will practice advanced counseling skills using a different theoretical orientation each week. This course must be taken with PSGE 5630.
Corequisite: PSGE 5630.

PSGE 5633. Pre-Practicum in Applications of Counseling Theory to Practice. (3 Credits)
This course is the second semester of a two-semester pre-practicum experience. It must be taken concurrently with PSGE 5631 Counseling Theory and Practice. Students will apply various theories of counseling to specific cases though role plays and taped practice counseling sessions. Feedback will be provided by the instructor and peers.
PSGE 6226. Design of Interactive Learning Systems. (3 Credits)
See EDGE 6226.

PSGE 6301. Psychology of Child Development. (3 Credits)
Theory and research on child development including prenatal through preadolescent stages. For teachers and psychologists, this course provides foundation knowledge about the physical, intellectual, and emotional development of children. Applications to learning in and adjusting to school settings are stressed.

PSGE 6308. Cognition and Instruction I: Foundations and Basic Processes. (3 Credits)
Historical and contemporary perspectives on the nature of minds and their relation to current psychological theories and research on cognition. Analysis will center on processes underlying perception and understanding— instructional implications will be discussed.
Prerequisite: PSGE 6312 (may be taken concurrently).

PSGE 6309. Cognition and Instruction II: Problem Solving. (3 Credits)
Analysis of the cognitive theories and research on problem solving. Processes underlying imagery, reasoning, transfer of skills, and cultural influences on problem solving will be discussed. Prerequisite: PSGE 6308.

PSGE 6310. Institute on Applied Cognition. (3 Credits)
The relation between recent developments in the study of cognition to the solving of applied problems. The institute will be organized around a series of lectures led by noted researchers.

PSGE 6311. Applications of Behavior Analysis in Educational Settings. (3 Credits)
Theory and application of psychological principles to modification of social and academic behavior in classrooms and other educational settings.

PSGE 6312. Psychology of Cognition and Affect. (3 Credits)
To introduce students to the theoretical & empirical investigation of human learning. Emphasis is on understanding both the cognitive & affective basis of learning, and on new findings that improve understanding and to maximize the use of these complex human skills in relation to educational & psychological practice.

PSGE 6314. Psychology of Problem Solving and Creativity. (3 Credits)
Definitions of problem solving and creativity; theory, research, and measurement of the creative problem-solving process. Principles and procedures to increase creative thinking.

PSGE 6320. Psychology of Motivation. (3 Credits)
Theoretical and empirical investigation of human motivation and self-determination. Emphasis on understanding emotional and control processes responsible for motivating selected behavior.
Prerequisite: PSGE 6312.

PSGE 6324. Environments for Managing Challenging Behaviors. (3 Credits)
Focus on planning and managing instructional environments for at-risk students and students with disabilities. Students will learn to establish secure learning environments that are structured to facilitate the academic and behavioral success of learners. Contemporary approaches to modifying behavior will be studied.

PSGE 6325. Psychology of Media. (3 Credits)
This course is designed to examine key issues and theoretical perspectives within the interdisciplinary field of media psychology. Course readings will concern the psychological underpinnings of various forms of media, including television, telecommunications, and multimedia, and their impact on the viewer from a psychosocial and cognitive vantage point. Special emphasis will be placed on the child and the adolescent user.

PSGE 6337. Advanced Educational Psychology: Instructional Design. (3 Credits)
Theories and models of instructional design. Applications of theory and research in educational psychology to the analysis and development of instructional programs.
Prerequisite: PSGE 6312.

PSGE 6338. Design and Evaluation of Creativity Programs. (3 Credits)
Design, development, and evaluation of education and training programs to encourage creative thinking and problem solving. General problem-solving skills vs. discipline-based programs. Teacher and staff-development efforts. Selection and measurement of relevant creativity outcomes.

PSGE 6341. Psychology of Personality and Individual Differences. (3 Credits)
Theory and research in differential psychology applied to educational settings. Topics include age, sex, intellectual, socioeconomic, racial, and ethnic differences; cognitive styles; and special-talent abilities.
Prerequisite: PSGE 6312.

PSGE 6345. Social Psychology. (3 Credits)
Social psychological theories, concepts, and research are studied. Topics include interpersonal relations, social learning, social motivation, communication, attitudes, groups and organizations, and social change.

PSGE 6401. Seminar in the Psychology of Bilingual Students. (0 to 3 Credits)
This seminar provides a theoretical foundation for understanding critical issues that impact on the psychological functioning of bilingual children and adolescents in the schools. The main objectives are to develop a multicultural psychological perspective, including an understanding of the acculturation process, nature of bilingualism, bilingual assessment, and bilingual pedagogical issues.

PSGE 6417. Developmental and Intellectual Disabilities. (3 Credits)
This course focuses on the assessment and diagnosis of several disorders of early childhood onset. These disorders include mental retardation, autism, other pervasive developmental disorders, Rett's Disorder, Asperger's Syndrome, and various learning disabilities. The etiologies of these disorders, as well as how they are manifested throughout the life span, will be highlighted by reviewing relevant research and through course discussions.

PSGE 6418. Emotional Disorders of Childhood and Adolescence. (3 Credits)
Survey of causes and consequences of emotional problems of children and implications for educational planning. The major psychiatric and psychological classification systems are studied, as are the effects of social and cultural factors on emotional development.

PSGE 6446. Consultation With Families in a Diverse Society. (3 Credits)
The purpose of this course is to provide students with the skills necessary to be effective consultants with families of young children.
PSGE 6602. Human Development. (3 Credits)
This course presents an overview of human development through the life span. Theories of psychosocial development are emphasized, as are the implications of life stage for counseling assessment and intervention. Multicultural and feminist perspectives on human development are included.

PSGE 6603. Multicultural Issues in Professional Psychology. (0 to 3 Credits)
The course is designed to provide psychologists, counselors, and school personnel with the requisite knowledge for working with clients and students of diverse racial, ethnic, and cultural backgrounds. Intervention techniques for working with a variety of racial/ethnic and special populations are included.

PSGE 6605. Counseling Program Development and Evaluation. (3 Credits)
The purpose of this course is to provide students with an introduction to principles and methods of counseling program development and evaluation. Psychoeducational, therapeutic, developmental, and culturally appropriate interventions will be considered on individual, group, and system levels. The course focuses on developing and evaluating the effectiveness of counseling interventions based on research evidence. Students will apply the knowledge they gain—through course instruction, assigned readings, and focused reviews of literature relevant to their particular counseling interests—to develop a proposal for a counseling intervention program and design a plan for its implementation and evaluation. Prerequisites: PSGE 5620, 5622, 5204.

PSGE 6607. Assessment in Counseling. (3 Credits)
This course is an introduction to basic issues and procedures in counseling assessment and testing across the life span. It is part of the PSGE 6602 – PGSE 6607 counseling module, and the content is geared toward practicing professional counselors in a variety of settings. Multicultural and ethical issues are infused throughout the course content.

PSGE 6609. Advanced Assessment and Appraisal in Counseling. (3 Credits)
This course is required for students in the Mental Health Counseling program. This class focuses on clinical assessment in mental health counseling with an emphasis on objective inventories of personality and psychopathology. Students will be exposed to a number of assessments of personality and psychotherapy, with a particular emphasis on the range of inventories. Students will also learn diagnostic interviewing and semi-structured assessments of psychopathology. Multicultural and ethical issues are infused throughout the course content and process. Must have previously taken PSGE 6607.

PSGE 6615. History and Systems of Psychology. (3 Credits)
This doctoral-level course provides students with an overview of the development of psychological thought, from its culturally indigenous origins in roughly 3000 BC, to Western influences in the late 19th century, through to the present and anticipated future of the field. Major topics include: philosophical influences in psychology, structuralism, functionalism, behaviorism, Gestalt, psychoanalysis, multicultural psychology, and recent theoretical developments. While this course is organized in terms of the major schools of thought that have defined the field of psychology, there is extensive coverage of the history of "constructs" that have shaped the field of psychology, as well as exploration of pioneers in the field across race, gender, sexual orientation, and other individual differences. The course aims to promote a critical analysis of the history of psychology through deconstruction of the cultural and historical milieu that influenced the system of thought or construct under consideration. The place of counseling, vocation, multicultural, and social-justice-oriented psychology will be emphasized.

PSGE 6630. Group Counseling. (3 Credits)
Principles of group dynamics that have implications for group counseling are studied. Must be taken with PSGE 6632.
Attributes: CPCE, CPIE.
Prerequisites: PSGE 5620 and PSGE 5622.
Corequisite: PSGE 6632.

PSGE 6632. Pre-Practicum in Groups. (3 Credits)
The course is an experientially focused group-counseling course in which students participate as both group members and leaders. Must be taken with PSGE 6630.
Corequisite: PSGE 6630.

PSGE 6640. Career Counseling. (3 Credits)
Theories, research, and processes of career development are examined. Must be taken with PSGE 6641.

PSGE 6641. Pract Career Counseling. (3 Credits)
Focus is on assessment techniques and methods of career development. A casestudy approach is used. Must be taken with PSGE 6640.
Prerequisites: PSGE 5620 and PSGE 5622.
Corequisite: PSGE 6640.

PSGE 6642. Practicum in Career Counseling. (3 Credits)
Focus is on assessment techniques and methods of career development. A case-study approach is used. Must be taken with PSGE 6640.
Corequisite: PSGE 6640.

PSGE 6645. General Psychopathology. (3 Credits)
This course will provide a comprehensive overview of psychopathology. The survey will begin by contextualizing notions of psychopathology within the historical milieu of the cultures of psychology and psychiatry. Methodological and taxonomic issues will be explored with an emphasis on the paradigm presented by DSM-IV. The major adult psychiatric disorders (both Axis I and Axis II) will be studied in detail. Related diagnostic and assessment strategies will also be discussed. Through readings and in-class activities, students are expected to develop an understanding of etiological, diagnostic, and treatment issues related to the various disorders addressed.

PSGE 6650. Ethics and Professional Issues in Counseling. (3 Credits)
An integrating seminar in which the role and function of counselors in society are examined. Philosophical and psychological roots of counseling are studied, and the ethical guidelines of the major professional organizations are analyzed. Important issues facing the counselor are also studied. Must be taken with PSGE 6652.
Prerequisites: Areas I, II, III, and IV from the counseling curriculum.
PSGE 6651. Field Experience I in Mental Health Counseling. (3 Credits)
This is the first field experience course (fall only) for master’s students in mental health counseling. Students function as mental health counselors under supervision in a hospital, college, or other agency settings. Experiences vary by site, are individually planned, and may include individual or group counseling, assessment, and attendance at case conferences or staff meetings. Students are responsible for locating and contracting with their own qualifying site, subject to the approval of the coordinator of master’s field experience and their adviser. The course includes group supervision, case presentations, and content specific to developing mental health counseling competencies. Corequisite: PSGE 6650. Prerequisites: PSGE 5620-5622, 5630-5632, 6630-6632, 6640-6641, 6602, and 6607.
Corequisite: PSGE 6650.

PSGE 6652. Field Experience in School Counseling I. (3 Credits)
Students must complete 130 hours of supervised, off-campus experience. Site should be chosen with a view toward the student’s vocational goals. Students will function as counselors under supervision in schools, colleges, hospitals, or mental health agencies. The practicum experience of each student will vary according to his or her site. Ideally, each student will have an opportunity to engage in a wide range of counseling activities—such as individual counseling, group counseling, assessment, attendance at case conferences or other staff meetings—and gradually become acquainted with the total counseling program at the agency or school. Students must provide their own sites, subject to the approval of the field experience coordinator. Generally the course is to be taken during the fall semester of the final year of study. Must be taken with PSGE 6650. Must have previously taken PSGE 5620, 5622, 6640, 6630, 6632, 6602, and 6702.
Corequisite: PSGE 6650.

PSGE 6653. Field Experience II in Mental Health Counseling. (3 Credits)
This is the second field experience course (spring only) for master’s students in mental health counseling. Students function as mental health counselors under supervision in a hospital, college, or other agency settings. Experiences vary by site, are individually planned, and may include individual or group counseling, assessment, and attendance at case conferences or staff meetings. Students are responsible for locating and contracting with their own qualifying site, subject to the approval of the coordinator of master’s field experiences and their adviser. The course includes group supervision, case presentations, and content specific to developing mental health counseling competencies. Prerequisite: PSGE 6651.

PSGE 6654. Field Experience in School Counseling II. (3 Credits)
This course is the second semester of a two-semester practicum experience for school counseling students. Students must complete 300 hours of a year-long field placement in a K-12 school under the supervision of a certified school counselor. In the course, students will present student cases to the class and seek and receive peer and instructor supervision. Students must present the instructor with a copy of the memorandum of agreement as well as the end of semester evaluation. Must have previously taken PSGE 5620, 5622, 6602, 6630, 6632, 6640, 6641, 6652, & 6702.

PSGE 6655. Field Experience III in Mental Health Counseling. (3 Credits)
This course is offered as an option of a third field experience course (summer I only) for those master’s students in mental health counseling who completed the minimum number of supervised hours in the first two practica. Students function as mental health counselors under supervision in a hospital, college, or other agency settings. Students are responsible for locating and contracting with their own qualifying site, subject to the approval of the coordinator of master’s field experiences and their adviser. The course includes group supervision, case presentations, and content specific to developing mental health counseling competencies. Prerequisite: PSGE 6653.

PSGE 6656. Multicultural Counseling. (0 to 3 Credits)
This course is designed to equip students with the awareness, knowledge, and skills for counseling culturally diverse clients. Students will be exposed to leading theories of multicultural counseling and racial/ethnic identity development and will be involved in case study analysis, role plays, and other diverse experiences.

PSGE 6659. Trauma Interp Neurobio. (0 to 3 Credits)
Shall bridge the gap between advances in neuroscience & the practice of psychotherapy topics: the brain & affect regulations, neurobiology of attachment, brain intervention & the neurobiology of psychotherapy.

PSGE 6702. Fundamentals of Educational and Psychological Measurement. (3 Credits)
Survey of measurement methods in education and psychology. Basic psychometric properties of tests, principles of test development, types of tests, and evaluations of tests are studied.

PSGE 7210. Experimental Design. (3 Credits)
Attribute: ASDM.

PSGE 7211. Correlational Design and Analysis. (1 to 3 Credits)
Regression analysis (RA) and the design and interpretation of research using the general linear model (GLM). Interpretation Multiple R, beta coefficients, standard error. Dummy coding and interaction effects. Also, path analytic methods. Prerequisite: PSGE 7210.

PSGE 7213. Application of Multivariate Techniques in Education and Psychology. (3 Credits)
Survey of multivariate statistics, including regression, discriminate function, canonical correlation, multivariate analysis of variance, and factor analysis. Emphasis is on the use of these techniques.
Attribute: ASDM.
Prerequisite: PSGE 7211.

PSGE 7301. Advanced Developmental Psychology. (3 Credits)
Analysis of recent theory and research in developmental psychology. Prerequisite: PSGE 6301 or PSGE 6302.

PSGE 7372. Adv Cert Pro-Seminar in the Professional Practice of School Psychology. (0 Credits)
This course is designed to develop students’ basic skills related to the practice of school psychology. The topics to be covered include professional identity development, school culture, engagement in the supervision process, and professional writing and communications.
PSGE 7412. Personality Assessment. (3 Credits)
Introduction to the theory of personality assessment. Practice in administration, scoring, and interpretation of selected projective techniques used with children, with emphasis on the Rorschach, Thematic Apperception Tests, and Drawings. Registration limited to matriculated students in school psychology with the permission of the instructor.
Prerequisite: PSGE 7508.

PSGE 7413. School Psychology: Advanced Assessment Seminar. (3 Credits)
This advanced seminar on assessment is designed to provide students with theoretical knowledge and applied skills in specialized areas of assessment. The specific topics covered will be offered as separate sections on an alternating basis. The major topics may include advanced personality assessment, neuropsychological assessment, preschool assessment, and dynamic assessment. Prerequisites: PSGE 7508 and permission from the instructor.

PSGE 7418. Non-Biased Assessment and Decision-Making. (3 Credits)
In-depth examination of issues, research, and models in non-biased assessment. Topics will include adaptive behavior, problems in classification, test bias, fairness, and judicial and legislative influences. Attribute: PMTM.

PSGE 7422. Instructional Consultation. (3 Credits)
Assessment and remediation of children with school learning problems. Teacher consultation, observation, task analysis, and evaluation of learning problems. Prerequisites: PSGE 7442 and PSGE 7445.

PSGE 7423. Therapeutic Interventions in the Schools. (3 Credits)
This course is presented in two parts. The first part focuses on treatment efficacy, various therapeutic orientations, ethics, and law. In the second half, practical, empirically based intervention techniques appropriate for school psychological services for children and adolescents are discussed. Current best practices in the treatment of social, behavioral, and emotional problems are emphasized.

PSGE 7424. Advanced Assessment Seminar: Bilingual Assessment. (0 to 3 Credits)
This course is designed to train graduate students in how to conduct bilingual assessments. Conceptualization of assessment incorporating specific ways of taking both culture and language into account shall be reviewed. It will extend prior knowledge of how to minimize bias in assessment and test construction.

PSGE 7425. Advanced Intervention Seminar: Preschool Intervention. (3 Credits)
This course is designed to be a topical seminar that will cover a number of major issues and trends in preschool intervention.

PSGE 7426. Advanced Intervention Seminar: Educational Intervention. (3 Credits)
This course is designed to be a topical seminar that will cover a number of major issues and trends in educational interventions.

PSGE 7427. Advanced Intervention Seminar: Bilingual Intervention. (3 Credits)
The Advanced Seminar in Interventions is designed to integrate the knowledge and competencies gained from courses in learning, cognition, instructional consultation, and instructional design with specific academic instructional techniques designed to improve students’ learning. The focus of this course will include a review of current cognitive theories (e.g., metacognition, study strategies, and motivation) and recent research in academic subjects (e.g., reading, writing, mathematical thinking, and inquiry based learning), and in areas related to bilingual and multicultural education. As part of this course, students will use data from formal and informal assessments to plan and implement a six-week academic intervention with one or more students. This course is to be taken concurrently with a field experience (typically practica or internship) facilitating the application and evaluation of an instructional intervention with multilingual and bicultural students (similar to an RtI model).

PSGE 7428. Advanced Intervention Seminar: Therapeutic Intervention. (3 Credits)
This course is designed to be a topical seminar that will cover a number of major issues and trends in therapeutic interventions. Intensive supervision will be provided.

PSGE 7429. Integration of Assessment Techniques. (3 Credits)
Supervised pre-internship experience in the integrated use of psychoeducational tests; histories; observation; and clinical interviews in the study of children, adolescents, and adults with learning and behavioral problems. Special considerations of assessment of minority children are addressed. The experience is based in the Rosa A. Hagin School Consultation Center and Early Childhood Center, where students will conduct assessments with clients and attend weekly staff meetings. Registration limited to matriculated students in school psychology or with the permission of the instructor. Prerequisites: PSGE 7508, PSGE 7412, and PSGE 7418.
Corequisite: PSGE 7499.

PSGE 7432. Personality Assessment Lab. (0 Credits)
A required 7-hour lab that meets 1 hour every other week. The lab must be taken concurrently with PSGE 7412. Students receive supervised practice in test administration, learn various scoring and data analyzing programs and software, as well as gain experience in case conceptualization and report writing.
Corequisite: PSGE 7412.

PSGE 7435. Neurobiological Bases of Human Behavior. (3 Credits)
Focus is on neuropsychology as a science, and its purpose is to assist psychology students in developing an understanding of the theoretical bases and principles underlying brain-behavior relationships. This course will be designed so that students of school, counseling, and educational psychology will be prepared in and introduced to the theoretical foundations of neuropsychology.

PSGE 7442. Role and Function of the School Psychologist. (3 Credits)
An analysis of the role of the school psychologist. Emphasis is on models for delivering effective services. Consideration of ethical and legal issues.

PSGE 7444. Psychology: History and Ethics. (3 Credits)
The course provides a survey of the development of theoretical issues and methodology of psychology from the early Greek philosophers to current trends, including historical and current approaches from various cultures. Additionally, ethical principles and practice considerations for the science and practice of psychology will be explored through a variety of sources.
PSGE 7445. Theories of School-Based Consultation. (3 Credits)
Theory and practice in school-based consultation, including mental health, ecological/behavioral, and organizational consultation.

PSGE 7452. Clinical Supervision of School Psychologists. (3 Credits)
This course, conducted mainly as a practicum, analyzes the process of supervision and the basic steps in providing supervision of school psychologists. Emphasis is placed on actual supervisory experience, providing supervision to others, with students expected to spend two laboratory hours weekly in addition to regular class. Registration limited to PhD students in school psychology.

PSGE 7456. Evaluation of Psychological Services Delivery Programs. (3 Credits)
Theories, models, and practice of program evaluation in psychological and educational services. Prerequisites: PSGE 5210 and PSGE 6702.

PSGE 7480. Advanced Certificate Internship in School Psychology I. (1.5 to 3 Credits)
Experience in providing school psychological services under qualified supervision which, in conjunction with PSGE 7481, is the equivalent of a full academic year. During the internship, students attend seminars on campus. Completion of appropriate coursework and program permission required. For Advanced Certificate students only.

PSGE 7481. Advanced Certificate Internship in School Psychology II. (1.5 to 3 Credits)
A continuation of PSGE 7480.

PSGE 7482. Advanced Certificate Internship in Bilingual School Psychology I. (1.5 to 3 Credits)
Experience in providing school psychological services to a bilingual population under qualified supervision which, in combination with PSGE 7483, is the equivalent of a full academic year. Completion of appropriate coursework and program permission required. For bilingual Advanced Certificate students only.

PSGE 7483. Advanced Certificate Internship in Bilingual School Psychology II. (1.5 to 3 Credits)
A continuation of PSGE 7482.

PSGE 7490. Doctoral Internship in School Psychology I. (1.5 to 3 Credits)
Experience in providing school psychological services under qualified supervision that, in conjunction with PSGE 7492, combines to be counted as the equivalent of a full academic year. Completion of appropriate coursework and program permission required (open only to PhD-degree students).

PSGE 7492. Doctoral Internship in School Psychology II. (1.5 to 3 Credits)
A continuation of PSGE 7490.

PSGE 7499. Integration of Assessment Techniques Lab. (0 Credits)
A required 7-hour lab that meets 1 hour every other week. The lab must be taken concurrently with PSGE 7429. Students receive supervised practice in test administration, learn various scoring and data analyzing programs and software, as well as gain experience in case conceptualization and report writing.
Corequisite: PSGE 7429.

PSGE 7500. Clinical Practicum in School Psychology. (3 Credits)
Supervised pre-internship field experience in psychological services, eight hours weekly in an agency or school offering clinical services to children or adolescents. Registration limited to matriculated students in school psychology. Program approval required.

PSGE 7501. Clinical Practicum in Bilingual School Psychology. (3 Credits)
Supervised pre-internship field experience in psychological services, eight hours weekly in an agency or school offering clinical services to bilingual or limited English proficient children or adolescents. Registration limited to matriculated students in school psychology. Program approval required.

PSGE 7502. Consultation Practicum in School Psychology. (3 Credits)
Supervised pre-internship fieldwork in delivering consultation services in schools eight hours weekly. Integrating seminar meets on campus. Registration limited to matriculated students in school psychology; completion of appropriate coursework and program approval required.

PSGE 7503. Consultation Practicum in Bilingual School Psychology. (3 Credits)
Supervised pre-internship field experience in delivering consultation services in schools serving bilingual or limited English proficient students, eight hours weekly. Integrating seminar meets on campus. Registration limited to matriculated students in school psychology; completion of appropriate coursework and program approval required.

PSGE 7507. Research Seminar in the Practice of Professional School Psychology. (3 Credits)
This is an advanced seminar designed to enhance skills in research methods useful in gathering and sharing information on the clinical utility of evidence-based practices.

PSGE 7508. Cognitive Assessment. (3 Credits)
This course is designed to provide students with an in-depth knowledge of the process of cognitive assessment, including administration, scoring, and interpretation of several intelligence tests. Students are expected to assess several individuals and to write reports based on these assessments. The knowledge base that students are expected to obtain through this course consists of the history of intelligence testing, current theories of intelligence, alternative approaches to traditional assessment procedures, and issues in the measurement of intelligence.

PSGE 7510. School Psychology Externship I. (0 Credits)
The externship provides an opportunity for students in the school psychology program to enhance research or practice-related skills and competencies above and beyond those typically required in the program. Participants are supervised by a field supervisor at an external setting and by school psychology faculty member(s). The externship could be taken after the completion of appropriate coursework or practica. Prerequisite: permission from instructor.

PSGE 7511. School Psychology Externship II. (0 Credits)
A continuation of PSGE 7510.

PSGE 7518. Cognitive Assessment Lab. (0 Credits)
A required 7-hour lab that meets 1 hour every other week. The lab must be taken concurrently with PSGE 7508. Students receive supervised practice in test administration, learn various scoring and data analyzing programs and software, as well as gain experience in case conceptualization and report writing.
Corequisite: PSGE 7508.

PSGE 7520. Doctoral Externship in School Psychology. (1.5 or 3 Credits)
The externship consists of a specific professional experience during which students enhance the attitudes, knowledge, and skills learned during the program and practiced as part of their practica experience. The focus of the externship is on improving one's skills in a specific area of school psychology practice in preparation for internship or future employment. Goals for the externship should be in keeping with the school psychology program goals.
PSGE 7530. Counseling Psychology Externship I. (0 Credits)
This course is intended for doctoral students in the Counseling Psychology program who wish to gain additional clinical experience by working in the field. Students must have completed the entire doctoral practicum sequence. Prerequisite: PSGE 7531.

PSGE 7531. Counseling Psychology Externship II. (0 Credits)
This course is intended for doctoral students in the Counseling Psychology program who wish to gain additional clinical experience by working in the field. Students must have completed the entire doctoral practicum sequence. Prerequisite: Counseling Psychology Externship I.

PSGE 7532. Counseling Psychology Externship—Summer. (0 Credits)
This course is intended for doctoral students in the Counseling Psychology program who wish to gain additional clinical experience by working in the field. Students must have completed the entire doctoral practicum sequence.
Prerequisites: PSGE 7530 and PSGE 7531.

PSGE 7609. Advanced Personality Assessment. (3 Credits)
Introduction to the theory of projective personality by assessment. Practice in administration, scoring and interpretation of selected projective techniques of children and adults, with emphasis on the Rorschach, Thematic Apperception Tests and Drawings. Registration limited to doctoral students.

PSGE 7612. Assessment in Personality. (3 Credits)
Covers the ethics, administration, scoring and interpretation of both projective and objective personality tests. Students shall receive supervision in these aspects of testing.

PSGE 7613. Intell Asst: Child/Adult. (3 Credits)
Study of the major theories of cognitive and neuropsychological abilities. Intelligence is analyzed as a major individual difference characteristic in clinical and educational settings. Skills developed in the administrative scoring, and analysis of major intelligence measures.

PSGE 7615. Adult Psychopathology. (3 Credits)
The course provides an overview of the etiology, course assessment, and treatment of adult disorders. Psychological, biological, and sociocultural perspectives of psychopathology are examined and differential diagnostic issues are explored. This course is intended for advanced (post-master’s) graduate students. For doctoral students.

PSGE 7619. Advanced Personality Assessment Lab. (0 Credits)
This required seven-hour lab meets for one hour every other week. Students receive supervised practice in test administration, learn various scoring and data analyzing programs and software, and gain experience in case conceptualization and report writing.
Corequisite: PSGE 7609.

PSGE 7620. Theories of Counseling. (3 Credits)
Consideration of the major theories of counseling, including psychodynamic, cognitive, behavioral, and phenomenological models. Common factors and distinct features are analyzed, as is the research supporting the models. Recent integrative efforts are studied.

PSGE 7630. Psychology of Small Groups. (3 Credits)
The principles of group dynamics are analyzed with an emphasis on contemporary theories of group behavior.

PSGE 7640. Psychology of Career Development. (3 Credits)
A critical analysis of theories and research concerning career development. Application of psycho-logical theories to the career development of diverse persons are studied.
Prerequisite: PSGE 6640.

PSGE 7649. Clinical Supervision and Consultation in Counseling Psychology. (3 Credits)
Students will study the developmental processes involved in the training of therapists. The nature of the supervisory relationship will be explored in depth and students will identify skills necessary for sound supervisory practice. Clinical consultation in mental health settings will also be addressed.
Prerequisite: PSGE 7655.

PSGE 7654. Doctoral Practicum in Counseling Psychology I. (3 Credits)
This is the fourth course in the series of 4 practicum courses for doctoral students in counseling psychology. Students engage in closely supervised practice of counseling and psychotherapy in a professional setting for a minimum of sixteen hours each week. Approval of the site and supervisor by the practicum coordinator is required as is the student’s eligibility to start the practicum. Theoretical emphasis of this semester is on integrative approaches to psychotherapy. Taping of counseling sessions is required. Master’s level practicum.

PSGE 7655. Doctoral Practicum in Counseling Psychology II. (3 Credits)
The course is the second half of the field experience in counseling psychology required of students who are matriculated in the counseling psychology program. The course requirements are as described for PSGE 7654.
Prerequisite: PSGE 7654.

PSGE 7656. Doctoral Practicum in Counseling Psychology III. (3 Credits)
This is the third semester of practicum for doctoral students in counseling psychology. Students engage in closely supervised practice of counseling psychology in a professional setting 16 hours each week, including one hour of face-to-face, individual supervision by a doctoral-level psychologist. Approval of the site and supervisor by the practicum coordinator is required. Taping of counseling sessions is required.
Prerequisite: PSGE 7655.

PSGE 7657. Practicum in Supervision in Counseling Psychology. (3 Credits)
Theories and methods of clinical supervision will be studied. This course requires weekly supervision of master’s-level trainees following the class period.
Prerequisite: PSGE 7656.

PSGE 7658. Doctoral Practicum in Counseling Psychology IV. (3 Credits)
This is the fourth course in the series of 4 practicum courses for doctoral students in counseling psychology. Students engage in closely supervised practice of counseling and psychotherapy in a professional setting for a minimum of sixteen hours each week. Approval of the site and supervisor by the practicum coordinator is required as is the student’s eligibility to start the practicum. Theoretical emphasis of this semester is on integrative approaches to psychotherapy. Taping of counseling sessions is required. Prerequisite PSGE 7656.

PSGE 7660. Research: Min Level Achieve. (0 Credits)

PSGE 7667. Internship in Counseling Psychology I. (0 Credits)
A full-year, full-time experience in providing psychological services under qualified supervision in an approved agency (PSGE7668, PSGE7669). A formal application process is required, which must be completed and approved by the program in the year prior to the beginning of the internship. All coursework except the dissertation seminar must be completed before enrolling in this course.

PSGE 7668. Internship in Counseling Psychology II. (0 Credits)
The second term (Fall, Spring, Summer) of the internship requirement that is described in PSGE 7667.
PSGE 7669. Internship in Counseling Psychology III. (0 Credits)
The third term (Fall, Spring, Summer) of the internship requirement that is
described in PSGE 7667.

PSGE 7680. Qualitative Research Methods in Counseling Psychology. (3 Credits)
Qualitative research methods useful in the field of counseling psychology
are examined. An overview of philosophy of science is included.

PSGE 7681. Quantitative Research Methods in Psychology and Education I. (3 Credits)
This first course in a two-semester sequence on applied statistical
methods focuses on quantitative data analysis techniques used in
the social sciences, with special emphasis on designs and methods in
psychological research. Students will also cover analysis of variance
(ANOVA) and multiple regression—the predominant tools for analyzing
experimental and non-experimental quantitative data. Completion of an
extensive statistics project is an essential component of this course.

PSGE 7682. Quantitative Research Methods in Psychology and Education II. (3 Credits)
This second course in a two-semester sequence on applied statistical
methods focuses on quantitative data analysis techniques that are
frequently used in the social sciences, with special emphasis on designs and methods in
psychological research. Topics covered in this course include advanced regression analyses, multivariate approaches
(MANOVA, path analyses), and factor analysis. Completion of an
extensive statistics project is an essential component of this course.

PSGE 7683. Qualitative and Single Case Design Research Methods I. (3 Credits)

PSGE 7684. Qualitative and Single Case Design Research Methods II. (3 Credits)

PSGE 7711. Psychometric Theory. (3 Credits)
Classical and modern test theories, latent trait analysis, scaling methods,
and introductory factor analysis are studied. Prerequisites: PSGE 5210
and PSGE 6702.

PSGE 7712. Recent Trends in Measurement and Evaluation. (3 Credits)
Seminar on issues and developments in testing and evaluation. Original
research and writing are required.
Prerequisite: PSGE 7711.

PSGE 7900. Proseminar in Psychological and Educational Services. (0 Credits)
The proseminar serves as an orientation to the research process, allows
students to learn about faculty research interests and encourages
discussions of research topics. It constitutes an initial developmental
step in the research process and is linked to the Experimental Design and
Statistics Methods courses.

PSGE 8001. Research Apprenticeship. (0 Credits)
In the Research Apprenticeship in Psychological and Educational
Services, the student is required to work closely with a research
apprenticeship faculty sponsor to develop and carry out a research
project over the course of up to three consecutive semesters. The
student must register for PGSE 8001 for the first semester and
PSGE 8002 for subsequent semesters.

PSGE 8002. Research Apprenticeship II. (0 Credits)
In the research apprenticeship in psychological and educational services,
the student is required to work closely with a research apprenticeship
faculty adviser to develop and carry out a research project over the
course of two to three consecutive semesters. The student will register
for this course during subsequent semesters of research apprenticeship.
Attribute: YEAR.
Prerequisite: PSGE 8001.

PSGE 8100. College Teaching Internship in Psychology and Services. (0 Credits)
Supervised field experience as a college-level instructor. On-campus
seminars. Prerequisite: Permission of the program faculty.

PSGE 8672. Social and Ethical Responsibilities in Counseling
Psychology. (3 Credits)
The social, professional, legal, historical, and ethical issues and
standards relevant to the field of counseling psychology will be explored.
This course is taken during the first semester of doctoral study in
counseling psychology.

PSGE 8999. Dissertation Seminar in Psychological and Educational
Services. (3 Credits)
Consultation with faculty on the development and conduct of dissertation
research. Prerequisite: Permission of program faculty.

PSGE 9990. Independent Study. (1 to 3 Credits)
Designed to enable students to study selected topics in depth and to
conduct research. For matriculated students only. An outline of the
proposed work must be approved by the adviser. Registration requires the
approval of the professor directing study, the division chairperson and the
director of graduate studies.

UEGE 5102. Historical, Philosophical, and Multicultural Foundations
of American Education. (3 or 4 Credits)
This introductory course examines the historical and philosophical roots
of public education and discusses how this system is related to the
social, multicultural, political, and economic life of the nation. As a course
in educational foundations, this course examines the concept of cultural
pluralism—the values, traditions, and aspirations of various immigrant
and ethnic groups, and the ways in which those differences influenced
schooling cultures and processes.
Attributes: EP4, VAL.

UEGE 6241. Urban Education: Problems and Perspectives. (3 Credits)
In this course, students analyze issues, trends, and innovations most
likely to shape urban education delivery systems in the future. As part
of this course, students will develop their capacity to advocate for or act
on behalf of children, families, and caregivers, particularly those who are
most marginalized in public schools and other educational institutions
and their communities.

UEGE 6243. The Impact of Prejudice on Minority Groups in America. (3 Credits)
Examines the institutionalized nature of prejudice and the cultural,
economic, and social status of selected minority groups.

UEGE 6330. Urban Sociology and Education. (3 Credits)
An analysis of group values, mobility patterns, and intergroup relations as
they affect metropolitan school systems. Emphasis on the education of
ethnic minority groups.
**Curriculum and Instruction Research and Teaching Programs - Non-Certification (Masters, Adv Certificate, and Doctoral)**

The Fordham Graduate School of Education offers several programs for candidates who are not seeking New York State certification.

- Curriculum and Teaching (M.S.E.) (p. 894)
- English as a World Language (M.S.) (p. 894)
- Innovation in Curriculum and Instruction (Ph.D.) (p. 895)
- Literacy Leadership, Advanced Certificate (p. 896)

**Curriculum and Teaching (M.S.E.)**

30 credits

NYSED 80001/77596

The curriculum and teaching program provides a core of knowledge in professional studies and the opportunity to design, with an academic adviser, unique programs of study or specializations related to professional needs and interests. The program leads to a Master of Science degree in education but does not lead to New York State certification.

**Admissions**

Students must meet the general requirements to study at the Graduate School of Education.

**Requirements**

**English as a World Language (M.S.)**

30 credits

NYSED 25422/25420

This Master of Science degree program is designed for persons who want to develop expertise in teaching English to speakers of other languages but are not pursuing a state teaching certificate.

It is appropriate for those who work in adult, corporate, or community education, and for international educators preparing to teach English as a foreign language.

**Admissions**

In addition to the general admission and completion requirements for master’s-level study at the Graduate School of Education, candidates must have the following:

- a 30-credit major or concentration in English language arts, social studies, science, technology, or mathematics
- candidates for whom English is a second language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum, current test scores for English language proficiency for admission to the Graduate School of Education:
  - IELTS: 7 for General Test Score; no subset can be lower than 6
  - TOEFL: 577 for paper test, 90 for Internet based (IBT) test
  - 12 college credits in a language other than English
  - 3 credits in English Literature
  - 3 credits in English Composition/Writing
  1 Scores can be no more than two years old.

Updated: 07-27-2020
Innovation in Curriculum and Instruction (Ph.D.)

Overview

51 credits
NYSED 06070

With a focus on harnessing complex educational problems, the Innovation in Curriculum and Instruction (ICI) Ph.D. program is designed for individuals who desire to investigate, teach, consult, and lead in the creative design of instructional and curricular solutions. This Ph.D. program aims to prepare candidates to explore, construct, and disseminate knowledge that contributes to the innovation of instruction and curriculum in interconnected professional fields, including in special education, in multilingual education, in transliteracy education, and in science, technology, engineering, art/design, and mathematics (STEAM) education. The program of study promotes pedagogy as inquiry and research that informs the creative design of instruction and curriculum to challenge educational inequities in diverse learning environments. It will be of interest to individuals who wish to be innovators in careers in education, such as academicians and researchers; teacher leaders and curriculum developers in K–12 schools; and consultants and educational program developers in non-traditional educational settings, like businesses, foundations, nonprofit institutes, and community-based programs.

Requirements

The admissions criteria for this program are the same as for all doctoral programs at Fordham’s Graduate School of Education. Applicants must...

- have a master’s degree or be part of the dual program pathway.
- have completed academic studies at the undergraduate or graduate level in introduction to research (overview of the basic concepts, tools, and methods of research). Applicants may be admitted with the condition that they take the pre-requisite research course the semester prior to beginning the Ph.D. program. Information regarding this requirement will be provided in the program’s recruitment materials, on the school website, and on the admission application.
- have a minimum undergraduate GPA of 3.0 and minimum graduate GPA of 3.5. Applicants must provide official transcripts of all undergraduate and graduate coursework.
- have a minimum of two years of teaching or equivalent teaching experience with children, youth, or adults.
- provide MAT or GRE scores; international students must also provide proof of English language competence (TOFEL or IELTs scores).
- submit a C.V. or resume.
- provide two personal statements (the first should cover your background in teaching, learning, and research and how it relates to this program; the second should cover your research interests and experiences).
- submit one academic writing sample.
- provide two letters of recommendation.
- pay the $70 application fee.
- complete an interview.

Specializations

The four specializations include the following:

Individual Differences and Instruction (Special Education)

Education that facilitates learning for all learners.

Learning through Multilingualism (Multilingual Education)

Education that features multilingualism as a resource to learning in globalized and networked learning environments.

Transliteracy and Learning (Transliteracy Education)

Education that promotes learning through oracy and literacy using a range of platforms, tools, and media.

Updated: 07-27-2020
Transformative Instruction through the Arts and Sciences (STEAM Education)

Education that integrates the essential skills of critical thinking and problem solving, creativity and innovation, communication, collaboration, and entrepreneurship in learning across different knowledge fields.

Literacy Leadership, Advanced Certificate

15 credits
NYSED 32704/32706

This program leads to the Literacy Leadership Certificate and is designed for the experienced teacher or administrator who has a master's degree and teaching certification as a literacy/reading specialist, a classroom teacher, or a school administrator. The program enables graduates to develop, organize, and evaluate literacy programs and acquire proficiencies as a supervisor and/or coordinator of school personnel associated with literacy programs.

The Advanced Certificate in Literacy Leadership serves as a supplement for individuals who already possess New York State certification as a Literacy Specialist Birth-Grade 6 or Grades 5-12.

Admissions

In addition to meeting general admissions requirements for the Graduate School of Education, applicants must have a master's degree and teaching certification as a literacy/reading specialist, a classroom teacher, or a school administrator.

Initial Teaching Programs (M.S.T.)

Office: Room 1102
Phone: 212-636-6450

The programs of the Division of Curriculum and Teaching (C&T) prepare and develop teachers, at the initial and advanced levels, who are committed to personal and school excellence. The programs are designed to develop teachers' knowledge, understanding, and skills to enable them to be successful, reflective practitioners.

The Fordham Graduate School of Education is accredited by the National Council for the Accreditation of Teacher Education (NCATE).

In addition, our programs in early childhood are nationally recognized by the National Association for the Education of Young Children (NAEYC); our programs in special education are nationally recognized by the Council for Exceptional Children (CEC); our literacy programs are recognized by the International Reading Association (IRA); and our teaching English to speakers of other languages program is recognized by the Teachers of English to Speakers of Other Languages International Association (TESOL). In addition, our adolescence education programs are nationally recognized by the National Council of Teachers of English (NCTE), the National Council of Social Studies (NCSS), and the National Science Teachers Association (NSTA).

Adolescence Biology (M.S.T.)

30 credits
NYSED 25525/25534

This clinically-rich master’s degree program in adolescence biology prepares candidates to teach biology as a content-area subject in grades 7 through 12. Graduates of the program qualify and are endorsed for New York state certification in Biology 7–12.

Admissions

In addition to the general requirements for study in the Graduate School of Education and for initial teacher certification programs, candidates for the adolescence biology program must have an earned degree in biology (or a related field, for example, biological sciences), with a minimum of 30 credits in biology coursework. This content must include study in the following areas: anatomy, physiology, ecology, behavior, evolution, genetics, cell biology, microbiology, diversity, growth, and human biology.

Otherwise qualified candidates who lack coursework in a specified area may be admitted conditionally but must make up the content deficit prior to completion of the program. Attendance at an Adolescence M.S.T. information session is recommended.

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

• baccalaureate degree from an accredited college or university with a major or concentration in one of the liberal arts or sciences
• a minimum undergraduate grade point average of approximately 3.0 (B or better)
• MAT or GRE scores (no more than five years old)
• two reference reports: academic and professional
• satisfactory command of oral and written English as evidenced through an admissions essay or interview
• Candidates for whom English is a second language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current test scores for English language proficiency for admission to the Graduate School of Education:
  - IELTS: 7 for General Test Score, no subtest can be lower than 6
  - TOEFL: 777 for paper test, 90 for Internet-based (IBT) test

Matriculation Requirements

Once admitted, teacher candidates must meet these requirements for matriculation:

• proof of immunization against measles, meningitis, mumps, and rubella, to be submitted to Fordham University Office of Student Health Services
• proof of baccalaureate degree in cases where student is admitted to the Graduate School of Education during the undergraduate senior year, to be submitted to the Graduate School of Education, admissions office
• proof of registration for the first semester of coursework, under advisement of the appropriate ITE program coordinator

Adolescence Biology (Transitional B), M.S.T.

Overview
30 credits
NYSED 27367/27362

This clinically rich master’s degree program prepares candidates to teach biology as a content-area subject in grades 7 through 12.

The Transitional B program is an alternative teacher certification program. The New York State Transitional B Certificate permits eligible candidates to be employed as a classroom teacher in a New York State public school while completing a master’s degree. Upon successful completion of this Transitional B program, graduates of the program qualify and are endorsed for New York state certification in Biology 7–12.

Admissions

In addition to the general requirements for study in the Graduate School of Education and for initial teacher certification programs, candidates for the adolescence biology program must have an earned degree in biology (or a related field, for example, biological sciences), with a minimum of 30 credits in biology coursework. This content must include study in the following areas: anatomy, physiology, ecology, behavior, evolution, genetics, cell biology, microbiology, diversity, growth, and human biology.

Otherwise qualified candidates who lack coursework in a specified area may be admitted conditionally but must make up the content deficit prior to completion of the program. Attendance at an Adolescence M.S.T. information session is recommended.

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

- baccalaureate degree from an accredited college or university with a major or concentration in one of the liberal arts or sciences
- a minimum undergraduate grade point average of approximately 3.0 (B or better)
- MAT or GRE scores (no more than five years old)
- two reference reports: academic and professional
- satisfactory command of oral and written English as evidenced through an admissions essay or interview

- Candidates for whom English is a second language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current\(^1\) test scores for English language proficiency for admission to the Graduate School of Education:
  - IELTS\(^1\): 7 for General Test Score, no subtest can be lower than 6
  - TOEFL\(^1\): 577 for paper test, 90 for Internet-based (IBT) test

\(^1\) Scores can be no more than two years old. See program descriptions for additional program-specific requirements.

Matriculation Requirements

Once admitted, teacher candidates must meet these requirements for matriculation:

- proof of immunization against measles, meningitis, mumps, and rubella, to be submitted to Fordham University Office of Student Health Services
- proof of baccalaureate degree in cases where student is admitted to the Graduate School of Education during the undergraduate senior year, to be submitted to the Graduate School of Education, admissions office

Adolescence Chemistry (M.S.T.)

30 credits
NYSED 25526/25533

This clinically-rich master’s degree program in adolescence chemistry prepares candidates to teach chemistry as a content-area subject in grades 7 through 12. Graduates of the program qualify and are endorsed for New York state teaching certification in Chemistry 7–12.

Admissions

In addition to the general requirements for study in the Graduate School of Education and for initial teacher certification programs, candidates for the adolescence chemistry program must have an earned degree in chemistry (or a related field, for example, applied chemical science), with a minimum of 30 credits in chemistry coursework. This content must include study in the following areas: principles of chemistry, including concepts in inorganic, organic, analytical, physical, and biochemistry.

Otherwise qualified candidates who lack coursework in a specified area may be admitted conditionally but must make up the content deficit prior to completion of the program. Attendance at an Adolescence M.S.T. information session is recommended.

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

- baccalaureate degree from an accredited college or university with a major or concentration in one of the liberal arts or sciences
- a minimum undergraduate grade point average of approximately 3.0 (B or better)
- MAT or GRE scores (no more than five years old)
- two reference reports: academic and professional
- satisfactory command of oral and written English as evidenced through an admissions essay or interview
- Candidates for whom English is a second language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current\(^1\) test scores for English language proficiency for admission to the Graduate School of Education:
  - IELTS\(^1\): 7 for General Test Score, no subtest can be lower than 6
  - TOEFL\(^1\): 577 for paper test, 90 for Internet-based (IBT) test
- Scores can be no more than two years old. See program descriptions for additional program-specific requirements.

Matriculation Requirements

Once admitted, teacher candidates must meet these requirements for matriculation:

- proof of immunization against measles, meningitis, mumps, and rubella, to be submitted to Fordham University Office of Student Health Services
- proof of baccalaureate degree in cases where student is admitted to the Graduate School of Education during the undergraduate senior year, to be submitted to the Graduate School of Education, admissions office

- proof of registration for the first semester of coursework, under advisement of the appropriate ITE program coordinator

Adolescence Earth Science (M.S.T.)

30 credits

NYSED 34419/34421

This clinically-rich master’s degree program in adolescence earth science education prepares candidates to teach earth science as a content-area subject in grades 7 through 12. Graduates of the program qualify and are endorsed for New York state certification as teacher of Earth Science 7–12.

Admissions

In addition to the general requirements for study at the Graduate School of Education and for initial teacher education programs, candidates for the adolescence earth science program must have an earned degree in geology (or a related field, for example, geological sciences), with a
minimum of 30 credits in earth science coursework. This content must include study in the following areas: scientific methods, space systems, atmospheric systems, geological systems, and water systems.

Otherwise qualified candidates who lack coursework in a specified area may be admitted conditionally but must make up the content deficit prior to completion of the program. Attendance at an Adolescence M.S.T. information session is recommended.

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

• baccalaureate degree from an accredited college or university with a major or concentration in one of the liberal arts or sciences
• a minimum undergraduate grade point average of approximately 3.0 (B or better)
• MAT or GRE scores (no more than five years old)
• two reference reports: academic and professional

Updated: 07-27-2020
Adolescence Mathematics (M.S.T.)
NYSED 28439/30606

This clinically-rich master's degree program in adolescence mathematics prepares candidates to teach mathematics as a content-area subject in grades 7 through 12. Graduates of the program qualify and are endorsed for New York state certification in Mathematics 7–12.

Admissions
In addition to the general requirement for graduate study and for initial teacher education programs, candidates for the adolescence mathematics program must have an undergraduate major in mathematics or its equivalent with a minimum of 30 credits in specific mathematics content areas.

Otherwise qualified candidates who lack coursework in a specified area may be admitted conditionally, but must make up the content deficit prior to completion of the program. Attendance at an Adolescence M.S.T. information session is recommended.

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

- baccalaureate degree from an accredited college or university with a major or concentration in one of the liberal arts or sciences
- a minimum undergraduate grade point average of approximately 3.0 (B or better)
- MAT or GRE scores (no more than five years old)
- two reference reports: academic and professional
- satisfactory command of oral and written English as evidenced through an admissions essay or interview
- Candidates for whom English is a second language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current test scores for English language proficiency for admission to the Graduate School of Education:
  - IELTS\(^1\): 7 for General Test Score, no subtest can be lower than 6
  - TOEFL\(^1\): 577 for paper test, 90 for Internet-based (IBT) test

\(^1\) Scores can be no more than two years old. See program descriptions for additional program-specific requirements.

Matriculation Requirements
Once admitted, teacher candidates must meet these requirements for matriculation:

- proof of immunization against measles, meningitis, mumps, and rubella, to be submitted to Fordham University Office of Student Health Services
- proof of baccalaureate degree in cases where student is admitted to the Graduate School of Education during the undergraduate senior year, to be submitted to the Graduate School of Education, admissions office
- proof of registration for the first semester of coursework, under advisement of the appropriate ITE program coordinator

The Transitional B program is an alternative teacher certification program. The New York State Transitional B Certificate permits eligible candidates to be employed as a classroom teacher in a New York state public school while completing a master's degree. Upon successful completion of this Transitional B program, graduates of the program qualify and are endorsed for New York state certification in Mathematics 7–12.

Admissions

In addition to the general requirement for graduate study and for initial teacher education programs, candidates for the adolescence mathematics program must have an undergraduate major in mathematics or its equivalent with a minimum of 30 credits in specific mathematics content areas.

Otherwise qualified candidates who lack coursework in a specified area may be admitted conditionally, but must make up the content deficit prior to completion of the program. Attendance at an Adolescence M.S.T. information session is recommended.

Adolescence Physics (M.S.T.)

30 credits

NYSED 25528/25532

This clinically-rich master's degree program in adolescence physics prepares candidates to teach physics as a content-area subject in grades 7 through 12. Graduates of the program qualify and are endorsed for New York state certification in Physics 7–12.

Admissions

In addition to the general requirements for study in the Graduate School of Education and for initial teacher education programs, candidates for the adolescence physics program must have an earned degree in physics or related area (for example, physical science) with a minimum of 30 credits in physics coursework and 16 credits distributed among biology, earth science, and chemistry. Included in the 30 credits must be coursework in the following areas: principles of physics, including concepts in mechanics, electricity, magnetism, thermodynamics, waves, optics, and atomic and nuclear physics; radioactivity; relativity; and quantum mechanics.

Otherwise qualified candidates who lack coursework in a specified area may be admitted conditionally but must make up the content deficit prior to completion of the program. Attendance at an Adolescence M.S.T. information session is recommended.
Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

- baccalaureate degree from an accredited college or university with a major or concentration in one of the liberal arts or sciences
- a minimum undergraduate grade point average of approximately 3.0 (B or better)
- MAT or GRE scores (no more than five years old)
- two reference reports: academic and professional
- satisfactory command of oral and written English as evidenced through an admissions essay or interview
- Candidates for whom English is a second language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current test scores for English language proficiency for admission to the Graduate School of Education:
  - IELTS\(^1\): 7 for General Test Score, no subtest can be lower than 6
  - TOEFL\(^1\): 577 for paper test, 90 for Internet-based (IBT) test

\(^1\) Scores can be no more than two years old. See program descriptions for additional program-specific requirements.

**Matriculation Requirements**

Once admitted, teacher candidates must meet these requirements for matriculation:

- proof of immunization against measles, meningitis, mumps, and rubella, to be submitted to Fordham University Office of Student Health Services
- proof of baccalaureate degree in cases where student is admitted to the Graduate School of Education during the undergraduate senior year, to be submitted to the Graduate School of Education, admissions office
- proof of registration for the first semester of coursework, under advisement of the appropriate ITE program coordinator

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

Adolescence Social Studies (M.S.T.)

30 credits
NYSED 25529/25530

This clinically rich master’s degree program in adolescence social studies prepares candidates to teach social studies as a content-area subject in grades 7 through 12. Graduates of the program qualify and are endorsed for New York state certification as Teacher of Social Studies 7–12.

Admissions

In addition to the general requirements for study at the Graduate School of Education, for initial teacher education programs, and for the adolescence education programs, candidates for the adolescence social studies program must have must have taken a minimum of 30 undergraduate or graduate credits in social studies coursework. These credits must include coursework related to: U.S. history, non-U.S. history, anthropology or cultural studies, political science, government or civics, economics, sociology, geography, psychology, global connections, and the impact of science and technology on society. Of these, at least 21 credits must be in the study of history and/or geography. A grade of C+ or above is required for a course to be counted toward these totals, and an average of B or above is required for all social studies coursework.

Otherwise qualified candidates who lack coursework in a specified area may be admitted conditionally but must make up the content deficit prior to completion of the program. Attendance at an Adolescence M.S.T. information session is recommended.

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

- baccalaureate degree from an accredited college or university with a major or concentration in one of the liberal arts or sciences
- a minimum undergraduate grade point average of approximately 3.0 (B or better)
- MAT or GRE scores (no more than five years old)
- two reference reports: academic and professional
- satisfactory command of oral and written English as evidenced through an admissions essay or interview
- Candidates for whom English is a second language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current test scores for English language proficiency for admission to the Graduate School of Education:
  - IELTS1: 7 for General Test Score, no subtest can be lower than 6
  - TOEFL1: 577 for paper test, 90 for Internet-based (IBT) test

1 Scores can be no more than two years old. See program descriptions for additional program-specific requirements.

Matriculation Requirements

Once admitted, teacher candidates must meet these requirements for matriculation:

- proof of immunization against measles, mumps, and rubella, to be submitted to Fordham University Office of Student Health Services
- proof of baccalaureate degree in cases where student is admitted to the Graduate School of Education during the undergraduate senior year, to be submitted to the Graduate School of Education, admissions office
- proof of registration for the first semester of coursework, under advisement of the appropriate ITE program coordinator

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

Adolescence Special Education (M.S.T.)

30 credits

NYSED 34664/34671

This clinically-rich master’s degree program in adolescence special education prepares teachers for support roles in special education such as consultant teacher, resource room service providers, and integrated co-teachers. The coursework and field experiences develop competencies in understanding principles and policies of special education, and proficiency in assessing and providing evidenced-based intervention and instruction for culturally diverse adolescents with a range of disabilities.

This program leads to New York state certification as a teacher of Students with Disabilities 7-12 Generalist.

Admissions

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

- baccalaureate degree from an accredited college or university with a major or concentration in one of the liberal arts or sciences
- a minimum undergraduate grade point average of approximately 3.0 (B or better)
- MAT or GRE scores (no more than five years old)
- two reference reports: academic and professional

- satisfactory command of oral and written English as evidenced through an admissions essay or interview
- Candidates for whom English is a second language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). **Bilingual Childhood Education (M.S.T.)**

42 credits
NYSED 25432/25442

The master's degree program in bilingual childhood education leads to endorsement for New York state teacher certification as a childhood education teacher and an extension to the certificate for bilingual education.

**Admissions**

Applicants to all childhood programs must meet the general requirements for admission to the Graduate School of Education (p. 928) and the requirements for admission to initial teacher education programs.

In addition, applicants for any of the childhood programs must have the following:

- An undergraduate degree from an accredited university in one of the liberal arts or sciences. For example, English, American, or comparative literature; mathematics; an area of science; modern languages; media studies; women's studies; political science; computer science; information science; communications; history; sociology; anthropology; economics; the arts; or psychology.
- College-level study in the following general education core areas: artistic expression, concepts in history and social sciences, a language other than English, scientific processes, mathematical processes, written analysis and expression, and communication.

In addition, candidates for the bilingual extension must provide evidence of their competence in a language other than English by fulfilling one of the following three options:

1. Taking and obtaining a passing score on the ACTFL Language Test (oral and written) in the target language;
2. Documentation in transcripts of having completed undergraduate studies in the target language; or
3. Agreeing to complete successfully two courses in the target language.

**Requirements**

Required workshops are listed in the order below.

**Childhood Education (M.S.T.)**

36 credits

NYSED 25431/25441

The master's degree program in childhood education combines coursework in child development, effective instructional practices for inclusive elementary classrooms, professional studies, and related field experiences. Graduates of the program are endorsed for New York state teacher certification in childhood education.

**Admissions**

Applicants to all childhood programs must meet the general requirements for admission to the Graduate School of Education (p. 928) and the requirements for admission to initial teacher education programs.

In addition, applicants for any of the childhood programs must have the following:

- An undergraduate degree from an accredited university in one of the liberal arts or sciences. For example, English, American, or comparative literature; mathematics; an area of science; modern languages; media studies; women's studies; political science; computer science; information science; communications; history; sociology; anthropology; economics; the arts; or psychology.
- College-level study in the following general education core areas: artistic expression, concepts in history and social sciences, a language other than English, scientific processes, mathematical processes, written analysis and expression, and communication

In addition, candidates for the bilingual extension must provide evidence of their competence in a language other than English by fulfilling one of the following three options:

1. Taking and obtaining a passing score on the ACTFL Language Test (oral and written) in the target language;
2. Documentation in transcripts of having completed undergraduate studies in the target language; or
3. Agreeing to complete successfully two courses in the target language

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

- baccalaureate degree from an accredited college or university with a major or concentration in one of the liberal arts or sciences
- a minimum undergraduate grade point average of approximately 3.0 (B or better)
- MAT or GRE scores (no more than five years old)
- two reference reports: academic and professional
- satisfactory command of oral and written English as evidenced through an admissions essay or interview
- Candidates for whom English is a second language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current test scores for English language proficiency for admission to the Graduate School of Education:
  - IELTS\(^1\): 7 for General Test Score, no subtest can be lower than 6
  - TOEFL\(^1\): 577 for paper test, 90 for Internet-based (IBT) test

\(^1\) Scores can be no more than two years old. See program descriptions for additional program-specific requirements.

**Matriculation Requirements**

Once admitted, teacher candidates must meet these requirements for matriculation:

- proof of immunization against measles, meningitis, mumps, and rubella, to be submitted to Fordham University Office of Student Health Services
- proof of baccalaureate degree in cases where student is admitted to the Graduate School of Education during the undergraduate senior year, to be submitted to the Graduate School of Education, admissions office
- proof of registration for the first semester of coursework, under advisement of the appropriate ITE program coordinator

Updated: 07-27-2020
Childhood Special Education (M.S.T.)

45 credits
NYSED 25433/25443

The master's degree program in childhood special education is an integrated dual-certificate program, and leads to endorsement for New York state teacher certification as a childhood teacher (grade 1-6) and as a teacher of children with disabilities in childhood education.

The program includes coursework in child development, instructional practices for children in regular and special-education settings, and professional studies. The field experiences are coordinated with courses to help candidates understand and apply theory in effective practice. Student-teaching experience is gained in both regular and special-education settings. This program is nationally recognized by the Council for Exceptional Children.

Admissions

Applicants to all childhood programs must meet the general requirements for admission to the Graduate School of Education (p. 928) and the requirements for admission to initial teacher education programs.

In addition, applicants for any of the childhood programs must have the following:

- An undergraduate degree from an accredited university in one of the liberal arts or sciences. For example, English, American, or comparative literature; mathematics; an area of science; modern languages; media studies; women's studies; political science; computer science; information science; communications; history; sociology; anthropology; economics; the arts; or psychology.
- College-level study in the following general education core areas: artistic expression, concepts in history and social sciences, a language other than English, scientific processes, mathematical processes, written analysis and expression, and communication

In addition, candidates for the bilingual extension must provide evidence of their competence in a language other than English by fulfilling one of the following three options:

1. Taking and obtaining a passing score on the ACTFL Language Test (oral and written) in the target language;
2. Documentation in transcripts of having completed undergraduate studies in the target language; or
3. Agreeing to complete successfully two courses in the target language

Updated: 07-27-2020
The program of study is carefully coordinated and sequenced, progressing from foundations and teaching methods through the development of a professional portfolio or a student work sample. Field experiences linked to courses provide guided development throughout the program and culminate in full time student teaching. Clinical experience is provided in both early childhood and childhood settings.

Admissions

Applicants to all childhood programs must meet the general requirements for admission to the Graduate School of Education (p. 928) and the requirements for admission to initial teacher education programs.

In addition, applicants for any of the childhood programs must have the following:

- An undergraduate degree from an accredited university in one of the liberal arts or sciences. Early Childhood and Childhood Education (M.S.T.)

45 credits

NYSED 25435/25445

The master's degree program in early childhood and childhood education is an integrated dual-certificate program and leads to endorsement for New York state teacher certification as a childhood education teacher (grades 1-6) and an early childhood teacher (birth-grade 2). The program includes specialized knowledge and instructional practices effective in the early years of childhood, and those appropriate and effective for children in grades 1 through 6.

Required Workshops

The workshops listed below are required of all Initial Teaching (M.S.T.) programs as well as certain other programs related to NY state licensure.

Total Credits 45

**Early Childhood Education (M.S.T.)**

**36 credits**

NYSED 25484/25487

The master's degree program in early childhood education (birth - second grade) offers coursework in child development, teaching exceptional children, effective instructional practices for young children, professional studies, and related field experiences for student teaching. Our program provides a beginning teacher with the knowledge and skills needed to be an effective early childhood teacher.

Graduates of the program are endorsed for New York state teacher certification in early childhood education. The program is approved by the National Association for the Education of Young Children (NAEYC), the national professional organization in early childhood education.

**Admissions**

Applicants to all early childhood programs must meet the general requirements for admission to the Graduate School of Education (p. 928) and the requirements for admission to initial teacher education programs. In addition, applicants for any of the early childhood programs must have

- an undergraduate degree in one of the liberal arts or sciences. For example, English, American, or comparative literature; mathematics; an area of science; modern languages; media studies; women's studies; political science; computer science; information science; communications; history, sociology; anthropology; economics; the arts; or psychology;
- college-level study in the following general education core areas: artistic expression, concepts in history and social sciences, a language other than English, scientific and mathematical processes, written analysis, and expression and communication;
- at least one college-level course in English or American literature as a foundation for the use of literature in teaching emergent literacy and reading in childhood education.

These courses may be part of or in addition to a liberal arts major/concentration.

Applicants for any of the initial teacher education (ITE) programs must meet the general requirements for admission to the Graduate School of Education as well as their specific degree or certificate program and the following ITE requirements:

- a baccalaureate degree from an accredited college or university with a major or concentration in one of the liberal arts or sciences
- a minimum undergraduate grade point average of approximately 3.0 (B or better)
- MAT or GRE scores (no more than five years old)
- two reference reports: academic and professional
- satisfactory command of oral and written English as evidenced through an admissions essay or interview
- Candidates for whom English is a second language are required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current test scores for English language proficiency for admission to the Graduate School of Education:

<table>
<thead>
<tr>
<th>IELT 1</th>
<th>7 for General Test Score, no subtest can be lower than 6</th>
</tr>
</thead>
<tbody>
<tr>
<td>TOEFL 1</td>
<td>577 for paper test, 90 for Internet-based (IBT) test</td>
</tr>
</tbody>
</table>

1 Scores can be no more than two years old. See program descriptions for additional program-specific requirements.

**Matriculation Requirements**

Once admitted, teacher candidates must meet these requirements for matriculation:

- proof of immunization against measles, mumps, rubella, to be submitted to Fordham University Office of Student Health Services
- proof of baccalaureate degree in cases where student is admitted to the Graduate School of Education during the undergraduate senior year, to be submitted to the Graduate School of Education, admissions office
- proof of registration for the first semester of coursework, under advisement of the appropriate ITE program coordinator

Updated: 07-27-2020
Five-Year Teacher Education Program (B.A./B.S. and M.S.T.)

The Fordham University Graduate School of Education (GSE) offers a 5-Year Integrated Teacher Education Track for students enrolled in one of the undergraduate colleges of the University. Programs are offered at the Lincoln Center campus. The 5-Year Track provides an opportunity for students to complete a B.A./B.S. and a 30 credit Master of Science in Teaching (M.S.T.) degree in Early Childhood Education, Childhood Education, or Adolescence Education (biology, chemistry, physics, earth science, mathematics, English, or social studies), or TESOL (Teaching English to Students of Other Languages). Dual certification and extensions may also be pursued in early childhood special education, childhood special education, early childhood/childhood education, bilingual Childhood education, and adolescence special education. Extensions are also offered in middle childhood education, TESOL, special education or bilingual education for additional credits.

Students interested in teaching English to students of other languages may pursue a program in TESOL for grades Pre K-12. There are specific language requirements for this program and consultation with the appropriate program adviser is necessary.

The five-year combined degree track consists of early admission to the GSE, integration of 12 GSE credits during senior year, the completion of a B.A./B.S. degree, and a fifth year as a full-time student completing the additional credits in coursework and two semesters of student teaching. Dual certifications are additional credits and might take longer to pursue. After completion of all program requirements, students receive an M.S.T degree and are eligible for GSE endorsement for New York State Initial Teacher Certification. New York State Certification is reciprocal with many states.

Early advisement and coordination is an important feature of this track. Please note that any student who does not complete successfully all degree requirements will not be endorsed for New York State Initial Teacher Certification.

Graduate School of Education graduates are highly qualified teachers who respect individuals in a multicultural society; excel in academic disciplines, acquire a broad knowledge base, learn in meaningful contexts, become reflective practitioners, and engage in life-long learning. Fordham is accredited by the National Council for Accreditation of Teacher Education (NCATE).

To find out more about the track, consult with the GSE advisor. For further information about GSE academic programs, please visit the Graduate School of Education Bulletin (p. 896).

Program Activities

Field Experience

Once the Declaration of Interest is submitted, the coordinator will permit registration into the 1 credit Field Experience Seminar (CTGE 4200). Sophomores meet twice each semester, juniors meet three times each semester, and seniors meet once monthly. Seminars are held on both campuses except in senior year when they are held at Lincoln Center along with GSE courses. Field experience requires 30 hours per semester through senior year. The field hours are arranged according to the student’s schedule. The field experience helps the student to examine interest in the teaching profession, gain experience working with children on different grade levels, allows education faculty to learn about student’s suitability for teaching, and prepares the student for the fifth year student teaching experience.

Student Teaching Orientation

Prior to beginning fall student teaching, an orientation is held for students in all programs who are beginning this experience. Students are provided

with extensive information, meet with their field specialists, and receive their school and grade assignment for the fall semester.

**Student Teaching**

In the 5th year, each student completes a full-time student teaching placement at two different sites in the grade levels of the certification area. Students are placed in schools that have partnerships with the GSE and with cooperating teachers that have more than three years of experience teaching. Each works with a field specialist who serves as a mentor and coach and who observes and evaluates the student in their student teaching placement site. A career adviser works specifically with students throughout the job search process. Field and student teaching placements provide more than 600 hours of comprehensive experience in public schools.

**New York State Teacher Certification Exams and Workshops**

Students are notified about New York State teaching certification requirements: certification exams, specialized workshops, fingerprinting, and application process. Extensive support is provided to students throughout this process.

**Final Project**

At the end of the fifth year, students prepare a capstone project as a culminating activity. This includes a theoretical and reflective essay highlighting teaching practice and knowledge gained. Adolescence culminating activity. This includes a theoretical and reflective essay highlighting teaching practice and knowledge gained. Adolescence education programs require the completion of a student work sample.

**Admissions**

There are two application stages to the Five-Year Integrated Teacher Education Track:

**First Stage**

- Complete a Declaration of Interest Form and submit to the Five-Year Track coordinator at the Graduate School of Education.
- Plan to seek program advisement about core courses to complete the B.A./B.S. Students should plan so as to be able to integrate 12 GSE credits in senior year. Fordham core must include the courses and content required by the NYSED for teacher candidates; some core courses may fulfill more than one NYSED requirement.
- Inform major advisor of decision to apply. Advisor will give permission to register for the one-credit Field Experience Seminar.
- Meet with GSE Five-Year Track coordinator.

**Second Stage**

- Complete a GSE admissions application and submit all required supplemental information in the spring of the junior year for early admission. The application includes a written personal statement, two letters of reference, a resume, and a copy of all transcripts.
- Provide a letter from the undergraduate advisor indicating that 12 GSE credits will be completed during senior year, including field experience and reflective seminar.
- Maintain a minimum grade point average of 3.0 (B or better).
- Meet the general admissions requirements to the Graduate School of Education and for the specific program to which the Fordham undergraduate student is applying. Specific admissions requirements are listed on each program’s page in this Bulletin.

**Requirements**

**New York State Certification Requirements**

Students who meet all program requirements, complete the course of study, and meet established field experience competencies are eligible to receive Fordham University's endorsement for New York state initial certification in their program area provided they also have:

- earned a passing score on the relevant New York State teacher examinations; and
- completed workshops in child abuse identification, Dignity for All Students Act (DASA), schools against violence education, drug and alcohol abuse, and health and physical education.

**Undergraduate Core and Content Requirements**

Teacher preparation for state certification includes requirements for general education and pedagogical core courses, as well as specific content courses related to the grade(s) and subjects the candidate will teach. The requirements differ across certification areas and are complex. They affect the choices that are made to meet the undergraduate core curriculum distribution, as well as selections and scheduling of courses within the major. For example, to meet state certification requirements in the general education core, teacher education candidates need the following liberal arts and science requirements: artistic expression, communication, or written analysis and expression; concepts in history and social sciences; a language other than English; scientific and mathematical processes; and literature. These core/content requirements do not replace Fordham’s requirements.

Students must also meet the admissions prerequisites for their chosen master’s program. For example, students pursuing adolescence education must have the required 30 credits in specific content areas. More information about the requirements for each certification and major can be obtained from the coordinator of the Five-Year Integrated Track at amoliterno@fordham.edu. It is students’ responsibility to meet with their advisers and to ensure they are meeting Fordham undergraduate, GSE, and New York State admissions and completion requirements for their program of choice.

To meet all requirements for the baccalaureate degree and a master’s degree, candidates work closely with their Fordham undergraduate advisers and the GSE adviser.

**Teaching English to Speakers of Other Languages (M.S.T.)**

30 credits

NYSED 25421/25419

This program exposes teacher candidates to contemporary understandings about language, communication, and language.
education, emphasizing the development of English as an additional language in K through 12th grades. Courses explore research-based instructional practices which promote cognitive and emotional growth, academic learning, cultural and linguistic development, and enhanced understanding of the purposes and functions of using English to interact with others in diverse settings.

This program is not available to individuals with an F-1 visa status. Individuals interested in a master's degree in teaching English to speakers of other languages (TESOL) without initial teaching certification should refer to the M.S. program in as a World Language (p. 894) in the section on non-certification programs.

Admissions

In addition to the general requirements for graduate study and for initial teacher education programs, candidates for the TESOL program must have the following:

- 12 college credits in a language other than English
- proof of college-level study in the following general education core areas: history and social sciences, English-language written analysis and expression, and at least one college-level course in English literature (these courses may be part of or taken in addition to a liberal arts major/concentration)

International candidates for whom English is an additional language are also required to take and achieve a passing score in one of two tests: the TOEFL (Test of English as a Foreign Language) or the IELT (International English Language Test). The following scores are the recommended minimum current test scores for English language proficiency for admission to the Graduate School of Education:

- IELTS: 7 for general test score; no subtest can be lower than 6
- TOEFL: 577 for paper test; 90 for internet-based test (IBT)

Scores can be no more than two years old.

Interdisciplinary Research Programs

Programs

- Contemporary Learning and Interdisciplinary Research (Ph.D.) (p. 918)

Contemporary Learning and Interdisciplinary Research (Ph.D.)

45 credits

NYSED 35223

Through interdisciplinary teaching, learning, and research, the Ph.D. program in Contemporary Learning and Interdisciplinary Research (CLAIR) is committed to finding innovative solutions that address the multifaceted challenges of education in a technologically complex, globalized world. Guided by the belief that education should be transformative, this unique program fosters ethical, versatile, and collaborative scholars who embrace multiple paradigms of inquiry to understand and improve contemporary learning environments. The Ph.D. program in CLAIR follows Fordham University’s Jesuit tradition of rigorous academic endeavor, service to complex urban and
metropolitan communities, and dedication to the intellectual, moral, and socioemotional development of the individual. CLAIR epitomizes the Graduate School of Education’s mission to create and nurture an inclusive, dynamic, intellectual, and reflective community that generates knowledge and promotes inquiry and excellence.

CLAIR includes a research core that engages students in authentic research. Through the perspective of multiple paradigms and the use of multiple methodologies, research teams of University faculty and CLAIR students generate new knowledge, test hypotheses, and solve problems related to contemporary learning.

Graduates of the program are prepared for a variety of roles, including instructional leader, teacher educator, program evaluator, educational researcher, academician, diversity trainer/multicultural educator, and industry professional designing educational materials, curriculum, and assessments.

Matriculation Requirements

Doctoral students are not fully matriculated until they have successfully completed the initial phase of the program. During the semester in which provisional doctoral students expect to complete their 12th to 15th credits of doctoral work, they must obtain permanent matriculation status. In CLAIR, the review is conducted after students have completed at least one course in the research core and at least 15 credits. CLAIR faculty evaluate each student’s portfolio to determine whether permanent matriculation will be granted. Candidates for matriculation must

- complete at least one course in the research core and 15 credits;
- hold a 3.5 or higher GPA in CLAIR coursework at the time of review;
- receive satisfactory evaluations from course instructors on a knowledge, skills, and dispositions assessment;
- demonstrate competence in APA style;
- submit an updated personal statement related to research in contemporary learning; and
- submit a course plan, a specialization focus, and a request for a research mentor.

Admissions

Applicants seeking admission to the Ph.D. program in CLAIR must meet the general requirements for admission to doctoral study in the Graduate School of Education and these specific requirements:

- **Master’s Degree:** Applicants must have a master’s degree from an accredited college or university with a major or concentration in an appropriate field. To qualify for doctoral program, applicants must have earned a minimum graduate cumulative GPA of approximately 3.5 (B+).

- **Graduate Record Examination (GRE):** Applicants are required to submit scores, not older than five years, from the Graduate Record Examination (GRE). Information about the Graduate Record Examination is available at the Educational Testing Service Graduate Record Examination website at gre.org.

- **Personal and Professional Goals Appropriate to Program:** Applicants must submit a personal statement as part of their application to the program.

- **Academic/Professional References:** A minimum of two references are required with the application. The purpose of these references is to establish suitability for doctoral study in this program. Therefore, references should be from persons qualified to assess academic and professional potential. References who can speak to the applicant’s research interests and abilities are also encouraged.

- **Interview:** An in-person, phone, or virtual interview will be required.

- **Academic Writing Samples:** Applicants are required to submit one academic writing sample with their application.

Students are admitted to the doctoral program on a provisional basis, and their progress is monitored through the matriculation review process and through periodic review by their mentor, adviser, the CLAIR director, and CLAIR faculty.

Requirements

Program of Study

All students in CLAIR are required to complete 45 credits of coursework prior to achieving candidacy (i.e., beginning dissertation work), which includes a research core, a contemporary learning core, a specialization core, and electives. Specializations are defined with the CLAIR advisor in order to develop content knowledge in a particular field.

Electives must be taken within the CLAIR program or be approved by CLAIR advisers. Students are required to complete an independent research project (Capstone Project) that serves as a comprehensive assessment and the final gateway to doctoral candidacy. Once students achieve candidacy, they are also required to enroll in Dissertation Seminar, which is credit bearing (3 credits/semester enrolled), until they successfully defend the dissertation. The coursework requirements are as follows:

The Division of Educational Leadership, Administration, and Policy (ELAP) offers graduate degree programs in educational leadership at the master's and doctoral levels for future and current educational leaders—supervisors, principals, superintendents, and others in public and nonpublic schools and faith-based settings, as well as nonprofit organizations and governmental agencies concerned with PK-12 education.

Educational leaders provide the vision and direction for schools, districts, and communities that they serve. Such vision and direction need strong commitment to social justice and ethical principles in order to ensure all students are well supported and served. Through vision and direction, educational leaders design, support, and transform their schools and districts to promote high-quality teaching, effective and purposeful use of resources, strategic structures and policies, and engagement in continuous improvement practices. At Fordham, we design leadership preparation and advanced leadership development with these expectations.

About our Programs
We offer a series of leadership preparation programs to guide the development of highly effective, transformational educational leaders, from aspiring to expert, for a variety of public and nonpublic settings. We prepare educational leaders who are committed to social justice, personal responsibility, and equity for all learners, and are able to meet the changing educational needs of children and adults from richly diverse communities.

Administration and Supervision (M.S.E.) for Catholic/Faith-Based Educational Leadership
30 credits
Non-certification track: NYSED 29020/29019 (M.S.Ed. in Administration & Supervision)
SBL Certification track: NYSED 14864/77597 (M.S.Ed. in School Building Leader)

The master's degree is crafted specifically through the lens of Catholic identity, mission, and culture and has both New York State School Building Leader (SBL) certification and non-certification tracks. The program is designed for current and aspiring administrators and supervisors in nonpublic schools and school districts.
School Building Leader Certification

The master’s program is approved and recognized by the New York State Education Department as an approved School Building Leader preparation program. Graduates will be prepared to take the examination for New York State School Building Leader (SBL) certification. This certification is appropriate for such positions as principal, supervisor, department chairperson, assistant principal, coordinator, and unit head and required for school-building-level leadership positions in all New York state public schools and, increasingly, in faith-based and nonpublic schools. Candidates within and outside New York are responsible for meeting state certification requirements as well as understanding reciprocity policies.

Admissions

Applicants must meet the general requirements for Graduate School of Education as well as the following requirements for the master’s in administration and supervision:

- possess a baccalaureate degree from an accredited college or university in an appropriate field;
- have a minimum grade point average of approximately 3.0 (B or better);
- have at least three years of teaching experience;
- provide two references;
- submit a statement of purpose;
- have a satisfactory command of oral and written English;
- submit test scores from the Miller Analogy Test, or the Graduate Record Exam; and
- provide proof of immunization against measles, mumps, meningitis, and rubella.

Matriculation Requirements

Students may take up to 12 credit hours as a non matriculated student. After completion of 12 credit hours of course-work, students desiring to complete the degree must apply for full admission.

Requirements

Program of Study

Administration and Supervision (Ph.D.)

Church and Faith-Based School Leadership

54-57 credits

NYSED 06066

The Division of Educational Leadership, Administration, and Policy offers a Doctor of Education (Ed.D.) degree designed for Pre-K–12 administrators. It offers a Doctor of Philosophy (Ph.D.) degree designed for church and religious school leaders.

The Ph.D. requires 12 credits beyond the requirements for the Ed.D. Applicants may apply for either the Ed.D. or the Ph.D., but they cannot apply to both programs.

The primary focus of the program is the preparation and development of researchers, professors, leaders, and key administrators in church-based and faith-based educational institutions, colleges, school systems, and schools. This doctoral program qualifies GSE students to complement their studies with courses in the Graduate School of Religion and Religious Education.

Admissions

Applicants seeking admission to the Ph.D. program in administration and supervision must meet the general requirements for admission to doctoral study in the Graduate School of Education and these program-specific requirements:

1. Students not seeking NY SBL certification may substitute two additional courses instead of ASGE 6520 Internship I Internship I and ASGE 6521 Internship II.

Compliance Requirements

In addition to the general degree requirements of the Graduate School of Education, candidates must meet the requirements:

- complete the prescribed program of study
- maintain a minimum overall graduate grade point average of 3.0 (B or better)
- pass a master’s comprehensive examination which is generally taken during the last semester of coursework

Updated: 07-27-2020
• have completed at least three years (preferred) of appropriate professional administrative experience
• possess a master’s degree or its equivalent from an accredited college or university with a major or concentration in a related area
• have earned a minimum graduate grade point average of approximately 3.5 (B+ or better)
• show evidence of academic ability, effective communication skills, leadership potential, and seriousness of purpose
• demonstrate satisfactory command of oral and written English
• provide two references
• have earned a satisfactory score on the Graduate Record Exam (GRE) or the Miller Analogies Test (MAT); test scores must be less than five years old
• provide proof of immunization against measles, mumps, meningitis, and rubella

Total Credits: 54-57

**Completion Requirements**

Students are admitted to the Ph.D. program on a provisional basis, and their progress is monitored through the matriculation review process and periodic review by their adviser, program coordinator, chairperson, and division faculty in dissertation seminar. As part of the matriculation review process in the Division of Educational Leadership, Administration, and Policy, during the semester in which students complete 12 to 15 credits, they must demonstrate satisfactory performance on the matriculation-qualifying paper and satisfactory progress in the first 12 to 15 credits of coursework, which lead to permanent matriculation status.

To complete the Ph.D. in administration and supervision, students must meet the general Ph.D. completion requirements and these program-specific requirements:

- complete the prescribed program of study, including 54–57 credits beyond the master's degree, under the direction and approval of an adviser
- maintain a minimum overall graduate grade point average of 3.5 (B+ or better)
- complete a qualifying exam and academic review for permanent matriculation
- complete an end-of-program comprehensive assessment (ASGE 0901 Comprehensive Assessment)
- complete ASGE 8751 Dissertation Seminar: Educational Leadership, Administration, and Policy, PhD, the three-credit dissertation seminar for Ph.D. candidates offered by the Division of Educational Leadership, Administration, and Policy, which facilitates student/faculty interaction in the development of a dissertation proposal for the Ph.D. (No more than 3 credits of dissertation seminar may be applied toward the program total credit requirement.)
- develop and successfully defend in an oral examination an original dissertation that emphasizes the refinement of theological,
humanistic, and social science concepts, methodologies, and findings as they relate to faith-based educational institutions, religious organizations, or other faith-based organizations

Educational Leadership, Administration, and Policy (Ed.D.)

50 credits
NYSED 06067, 14372

The Division of Educational Leadership, Administration, and Policy offers a Doctor of Education (Ed.D.) degree designed for Pre-K–12 administrators. This degree is designed to prepare transformative leaders who are equity-minded problem solvers and designers of innovative solutions, using scholarly inquiry to improve schools, districts, and communities for all children. The program is based on the recognition that leadership must be an intellectual, creative, and moral practice.

The goals of the doctoral program in Educational Leadership, Administration, and Policy (Ed.D.) are to prepare educational leaders who are:

- **committed to social justice**, who model and are champions of the highest educational standards for all children, and of essential moral and ethical values;
- **scholar-practitioners** and effective users of research and improvement science to support their leadership efforts and the success of those that they serve;
- **problem solvers** capable of addressing significant educational challenges and pursuing opportunities to improve schools and student learning;
- **solution designers** who can respond effectively to changes in the people and communities their schools serve by developing innovative solutions;
- **change agents** who engage with and support the transformation of schools, districts, and communities on behalf of student learning; and
- **policy advocates** capable of understanding, responding to, and influencing policy to better serve all children.

The program emphasizes improvement science as a primary approach to inquiry, problem-solving, and innovation for school improvement.

Admissions

Applicants seeking admission to the Doctor of Education degree program must meet the general requirements for admission to graduate study in the Graduate School of Education, and specific requirements for the Division of Educational Leadership, Administration, and Policy.

- Have completed at least three years of appropriate leadership experience in a PK-12 educational setting
- Possess a master’s degree from an accredited college or university, with fundamental and intermediate courses equivalent to those required by the division
- Have earned a minimum graduate grade point average of approximately 3.5 on a 4.0 scale (B+ or better) and a 3.0 or better on the undergraduate level
- Have earned satisfactory scores on the Graduate Record Exam (GRE) or the Miller Analogies Test (MAT); test scores must be less than five years old

- Provide two reference reports, including one from a supervisor
- Show evidence of academic ability, effective communication skills, leadership potential, and seriousness of purpose
- Demonstrate commitment to social justice, inquiry, and solutions-oriented leadership

If the admissions committee determines that a deficiency exists in one or more areas of prior graduate study or in the applicant’s background, the committee will specify prerequisites that must be fulfilled by the student for admission to the doctoral program. Prerequisites must be completed prior to permanent matriculation.

Updated: 07-27-2020
Completion Requirements
To complete the program, students must meet the general degree completion requirements and meet these specific requirements:

- complete the prescribed program of study
- maintain a minimum overall graduate grade point average of 3.5 (B+ or better)
- complete the first Laboratory of Practice (ASGE 0901) as a qualifying assessment and academic review for permanent matriculation (ASGE 0900 Permanent Matriculation)
- complete all four Laboratories of Practice
- complete ASGE 8750 Dissertation in Practice Seminar, the three-credit dissertation seminar offered by the Division of Educational Leadership, Administration, and Policy for Ed.D. candidates, which facilitates student/faculty interaction in the development of a dissertation proposal for the Ed.D. (No more than three credits of dissertation seminar may be applied toward the program total credit requirement.)
- develop and successfully defend on oral examination an original dissertation related to the application of research to the solution of field-specific problems in educational leadership
- complete all requirements for the doctorate within eight years of initial registration for the program

School Building Leader (M.S.E.)
30 credits
NYSED 29020/29019

This program is designed for current and aspiring administrators and supervisors in public and nonpublic schools and school districts. There are several options within the master’s degree program: a certification track for those seeking New York State School Building Leader certification, a faith-based track for those seeking to become leaders in religious schools, and a one-year, accelerated cohort track (known as AMPEL). It is possible to combine tracks (e.g. there is a faith-based certification track).

New York State School Building Leader (SBL) Certification

Our master’s program in administration and supervision is approved and recognized by the New York State Education Department as an approved School Building Leader preparation program. Graduates of this two-year program will be prepared to take the examination for the New York State School Building Leader (SBL) certification. This certification is appropriate for such positions as principal, supervisor, department chairperson, assistant principal, coordinator, and unit head, and it is required for school building-level leadership positions in all New York state public schools and, increasingly, in faith-based and nonpublic schools.

Prospective students must consult with their respective state education department to determine whether they meet qualifications for their state certification. Many states have reciprocity with New York state regarding leadership certification. Individuals seeking NYSED School Building Leader certification must meet all state requirements for the certification and should visit the NYSED website to review these. NYSED requires that candidates for School Building Leader certification take and pass the SBL certification exam (parts 1 and 2), take and pass the Educating All Students exam, and complete the mandated Dignity for All Students Act (DASA) workshop.

Admissions

Applicants must meet the general requirements for admission to graduate study in the Graduate School of Education, as well as the following program-specific admissions requirements:

- possess an initial or professional state certificate in teaching or other appropriate and acceptable educational specialty
- have earned a minimum earned undergraduate and graduate grade point averages of approximately 3.0 (B or better)
- two references (if currently working in a pre-K–12 setting, one reference should be from your current school principal)
- proof of immunization against measles, meningitis, mumps, and rubella
- a satisfactory command of oral and written English
- three years of paid, full-time approved, and successful teaching experience by completion of the degree if seeking state SBL or SDL certification

Additional Accelerated Program (AMPEL) Requirements

Applicants to the one-year accelerated master’s program must submit complete a supplemental application (in addition to the general Graduate School of Education application), submit additional essays and a work sample, and interview with program faculty.

AMPEL applicants seeking SBL certification should already have a minimum of two years of paid, full-time teaching experience in order to meet the three year teaching requirement at the time of application for SBL certifications.

Total Credits 30
There is required fieldwork associated with all courses except ASGE 0701 Master’s Comprehensive Exam/Assessment.

**Completion Requirements**

In addition to the general degree-completion requirements of the Graduate School of Education, candidates for the M.S.E. in administration and supervision must meet these requirements:

- complete the prescribed program of study, which includes 30 credits
- maintain a minimum overall graduate grade point average of 3.0 (B or better)
- if seeking the SBL certification, complete a year-long, six-credit internship, which is generally done in the candidate's own school
- pass a master's comprehensive examination which is generally taken during the last semester of coursework

**School District Leadership, Advanced Certificate**

15 credits

NYSED 29021/29022

This advanced certificate program is for those seeking to qualify for the New York State Education Department’s School District Leader (SDL) certification. The program may also be taken as an extension program for current students and recent graduates from our educational leadership programs.

**School District Leader (SDL) Certification**

SDL certification is required by the New York State Education Department for anyone seeking district-level positions, such as superintendent, assistant deputy superintendent, district supervisor, etc., in a New York state public school district. Students within and outside New York state are responsible for knowing and understanding individual state SDL requirements as well as reciprocity policies.

Students must consult with their state education department as to whether or not these experiences, as well as their respective educational and professional backgrounds, are acceptable for their state certification. Candidates seeking SDL certification are responsible for determining New York State Education Department requirements for qualifying for NYS School District Leadership certification. These include (1) a total of 60 graduate credits that must include a master's degree, (2) a NYSED-approved school district leader preparation program, (3) taking and passing the two-part SDL certification exam, (4) taking and passing the Educating All Students exam, and (5) completing the NYSED mandated Dignity for All Students Act (DASA) workshop.

**Admissions**

Applicants must meet the general requirements for admission to graduate study in the Graduate School of Education, as well as the following program-specific admissions requirements:

- possess an initial or professional state certificate in teaching or other appropriate and acceptable educational specialty
- have earned a minimum undergraduate and graduate grade point average of approximately 3.0 (B or better)
- submit two references (if currently working in a pre-K-12 setting, one reference should be from your current school principal)
- submit proof of immunization against measles, meningitis, mumps, and rubella
- possess a satisfactory command of oral and written English
- have three years of paid, full-time approved, and successful teaching experience by completion of the degree

Applicants are responsible for ascertaining which NYSED certificate is required for the positions they are seeking.

**Requirements**

Candidates seeking SDL certification must take the following five courses, in addition to, or beyond, a master’s degree:

<table>

</tbody>
</table>

**Total Credits**: 15

There is required fieldwork associated with all courses in this program.

**Current students and recent graduates** (within the past 5 years) of the Division of Educational Leadership, Administration, and Policy are eligible to take this program as an extension and need 9 out of the 15 credits of coursework which entails (1) ASGE 6224 The Superintendency, (2) ASGE 6225 Boards of Education, and (3) ASGE 7530 Clinical Practice in Administration and Supervision. Contact the program coordinator, Tiedan Huang, at thuang15@fordham.edu, for additional information.

**Completion Requirements**

To earn the advanced certificate in school district leadership, candidates must meet these requirements:

- complete the prescribed program of study
- maintain a minimum overall graduate grade point average of 3.0 (B or better)
- complete a one-semester, three-credit, district-level internship

In addition, to qualify for endorsement by the University for the New York State School District Leader (SDL) certification, advanced certificate candidates must also pass the New York State SDL exam.

**Policies and Procedures**

All students accepted into a program of study in the Graduate School of Education are assigned a faculty adviser. The adviser provides information and counsel on matters related to programs and Graduate School of Education policies and procedures. Students, however, are responsible for being cognizant of and meeting all requirements, including appropriate deadlines and administrative procedures, for the completion of their degrees.

All academic programs are designed in keeping the standards articulated in the Conceptual Framework of the Graduate School of Education and are aligned with professional and state standards.
• Program Requirements (p. 931)
• Professional/Teacher Certification (p. 932)
• Enrollment (p. 928)
• Academic Policies (p. 926)
• Tuition, Fees, and Financial Aid (p. 932)
• University Policies (p. 934)

Bulletin Information
While every effort has been made to provide accurate and current information, the Graduate School of Education reserves the right to withdraw or modify, without notice, any policies, procedures, fees, programs of study, academic calendar, courses, faculty, or other items listed in this bulletin, or to make any other changes it considers necessary or desirable. Statements made in this bulletin are for informational purposes only. Students are responsible for learning and following all program-related criteria, including deadlines and graduation requirements and procedures. For additional information, write or call the Office of the Dean or the chairperson of the division in which the program of interest is offered.

Academic Policies

Academic Discipline
Students are expected to maintain the highest standards with regard to honesty, effort, and performance. Discipline will be enforced if a student violates the University’s Code of Conduct or the academic policies of the Graduate School of Education. Please refer to the dean for the policies and procedures regarding the academic code of conduct and disciplinary process.

Reserved Rights of the University
The University reserves the right, at its discretion, at any time, to deny matriculated status, to cancel a student’s registration, to refuse to award academic credits, or to deny or rescind a certificate or a degree in accordance with the University Statutes and its academic policies. All forms of dishonesty, including cheating and plagiarism, will result in appropriate disciplinary action, including denial or revocation of a degree or certificate.

Maintenance of Matriculation
In order to maintain matriculated status, students must be continuously registered for all semesters (excluding summer) from the semester they begin their programs until they graduate. To maintain matriculation, students must be registered for one of the following: coursework, dissertation seminar, dissertation mentoring, doctoral residency, or EDGE 0666 (for master’s level) or EDGE 9995 (for doctoral level). Students must register for EDGE 0666 for the semester in which they take comprehensive examinations, if they are not registering for other coursework during that semester.

Students unable to maintain matriculation may apply for a short-term leave of absence. Anyone who fails to register for two consecutive semesters without having obtained a leave of absence will automatically lose matriculated status and must make written application to the director of admissions for readmission. During the readmission review, the student’s records will be evaluated in terms of admission and program requirements then in effect. As a result, additional coursework may be required. This readmission review will be conducted by the faculty and chairperson of the division in which the student was matriculated.

The results of the review will be forwarded to the director of enrollment services.

Dissertation Format Review
After completing the dissertation seminar, and upon the successful oral defense of the dissertation, doctoral students must submit their dissertations for format review to assure that the dissertation document meets all the formatting and stylistic requirements of the Graduate School of Education and is ready for publication. Upon submission, doctoral students will be registered for EDGE 0999.

Registration Processes
Advising and online registration for all students takes place once a semester during the online registration period. Consult academic calendars for exact dates of advising and registration periods each semester. The advising period enables students to meet with their advisers regarding course selection and academic progress. New and non-matriculated students should register during the walk-in registration period (see academic calendar) after meeting with or speaking to an adviser for course selection guidance and approval. Tuition bills are mailed approximately one month before the start of the semester, and payment is due before classes begin.

Walk-in and online registration are also available at the start of each semester for new and non-matriculated students. Continuing students who need to register past deadlines will be assessed a $250 late fee. Students are responsible for registering themselves for courses in Banner, which can be accessed through My.Fordham. Students who register late will need to use the late registration link. Their request will need to be approved by their academic advisor and the associate dean for academic affairs. Registration instructions are sent to all continuing and newly admitted students. Validation by the bursar and registrar is required before the registration is finalized.

Adding or Dropping Courses
From the start of the registration window up until the add/drop deadline listed in the academic calendar, students may make changes to their course registrations via the same system. During add/drop, students may drop a course without penalty.

After the conclusion of the add/drop period, students must submit the course withdrawal/late registration form on My.Fordham to make any changes to their course registrations. Registration changes following the add/drop deadline carry penalties as communicated in the withdrawal policy and in accordance with the academic calendar. Students must send written instructor permission for late registration to their adviser, and the course must not be full, for their late registration form request to be approved.

Tuition charges will be adjusted only up to the sixth week of class; after that, full tuition will be charged for dropped courses (see section on tuition and fees for prorated schedule of refunds).

Grade Point Average
Students in master’s and most advanced programs must maintain a B (3.0) grade point average (GPA) or higher to continue in their programs and to graduate, unless otherwise specified. For students in Ed.D. and Ph.D. programs, a B+ (3.5) GPA or higher is required. Students’ academic records are reviewed throughout their programs. If a student’s GPA falls below the requirement, the school may require additional, alternative, or remedial coursework or other measures to assist the student to
improve academic record. The student is placed on academic probation, which must be removed within one academic year. Failure to improve or to maintain the required GPA may result in termination of a student’s matriculation.

**Attendance**

Students are expected to attend all scheduled course meetings and complete all assigned work. If extraordinary circumstances prevent attendance or the timely completion of assignments, the student should consult the faculty member to make alternate arrangements for meeting the course requirements. These situations may require an extension of time to complete a course. Extensions (“incompletes”) must be cleared by the announced date of the next semester. See academic calendar for last date to remove “incompletes” before they convert to administrative F grades.

**Course Load**

Graduate pre-service teacher education programs require a block of full time attendance, and involve credit loads as indicated in the program descriptions. For all other graduate programs, students are considered full time if they are enrolled in nine credits per semester or the equivalent. Students employed full time may not register for more than six credits per semester unless granted permission from their academic adviser. Summer session students may take up to six credits per session for a maximum of 12 credits during June, July, and August, including for-credit institutes and tutorials.

**Independent Studies/Tutorials**

Students with good cause may request an independent study with a full time instructional staff member with expertise in the course content area. The approval of the faculty member, division chairperson, and the associate dean for academic affairs is required prior to beginning the independent study. Independent study applications must be submitted to the associate dean for academic affairs during the regular registration period. A maximum of six credits of independent study are permitted during a student’s academic program.

**Transfers of Credit**

Students may request a transfer of credit for a course completed at another accredited institution provided the course is at the graduate level and its content is equivalent to course content required/permitted for the degree at Fordham. The course may not have been used to fulfill requirements for another degree and it must have been completed with a grade of B or better (the grade P is normally not transferable unless it is the only passing grade given by the institution). In addition, the course must have been taken within the five years prior to date of anticipated completion of the degree in progress at Fordham. Associated knowledge or performance assessments may be required, depending on the course.

To transfer credit, complete a transfer of credit form and submit it to your adviser and division chairperson with an official transcript of the credits and grade earned in the course along with a photocopy of the course description from the offering institution’s school bulletin. The division chair will forward the documents with a recommendation to the associate dean for academic affairs for approval. Up to six graduate credits may be transferred. It is the student’s responsibility to arrange for his or her transcript to be sent to the division office to accompany the transfer of credit form.

Transfer credits do not contribute to a student’s GPA. Please note that if transfer credit is granted for a course taken prior to admission to Fordham, the time limit for program completion is computed from the semester of the transferred course.

**Exemption from Courses**

Students may request an exemption from a required course if they have taken similar coursework previously or if they have equivalent or substantively related professional experience. To request an exemption, students must submit a completed application for exemption to their division chairperson. An exemption permits a student to take another appropriate course in lieu of a required course. An exemption does not change the minimum number of Fordham-earned credits required for a degree (e.g., 30 for a master’s and 45 for a doctorate). The application must be accompanied by documentary evidence to justify the exemption; for example, an official transcript and photocopy of the course description from the institution’s bulletin, a copy of a professional certification, or a signed statement from a supervisor indicating satisfactory completion of an equivalent experience. Associated knowledge and performance assessments may be required, depending on the course.

**Time Limits**

All requirements for the master’s degree or the professional diploma must be completed within five years of the first course applied to the degree. All requirements for the doctorate (Ph.D. or Ed.D.) must be completed within eight years of the first course applied to the degree. If transfer credit is granted for a course taken prior to admission to Fordham, the time limit will be computed from the semester of the transferred course. Students who do not complete their programs within the time limits may have their matriculation automatically terminated. Extensions of time to complete a degree may be granted by the associate dean for academic affairs upon the recommendation of the division chairperson and adviser, and submission of a satisfactory degree completion action plan. However, students are typically allowed only a single, one-year extension.

**Leave of Absence**

Students unable to actively pursue their studies and maintain matriculation through registration for a period of time should request a leave of absence. Time granted for a leave of absence does not extend the time limit for completing a degree program. Leaves of absence are awarded on a semester-by-semester basis and multiple leaves of absence are not typically permitted.

**Grades**

The following grades are used to indicate student performance and achievement: A, A-, B+, B, B-, C+, C, and F. If a student receives a grade of F for a course, it will remain on the student’s record, even after the course is retaken and a passing grade is earned subsequently. The grade of a repeated course is also recorded on the academic record and does not remove or replace a grade previously earned. The designations S, Satisfactory; U, Unsatisfactory; P, Pass; and F, Fail are used to evaluate student work in dissertation seminar, internships, practica, and other specified courses. Professors may assign a grade of Incomplete (INC) for students whose work is incomplete but satisfactory on the last day of the courses. An In Progress (IP) is reserved for yearlong experiences and courses, and must not be used for one-semester experiences or courses.
Students whose coursework is incomplete but satisfactory on the last day of the course may receive a grade of INC. To remove an INC and receive credit for the course, the course requirements must be completed by the deadline posted in the academic calendar, and faculty members must submit a grade using a change of grade form. Failure to complete the course requirements by the date posted will result in a grade change from INC to F. Change of grade forms are available in division offices. Changes to grades require approval of the division chair and associate dean for academic affairs, and if processed past the last date to change grades noted in the academic calendar, will require vice president approval. All INCs that convert to a grade of F contribute to the student's GPA.

Note: According to University policy and with the goal to preserve the integrity of academic student records, changes in course grades, other than Incompletes, will, in general, not be permitted. Submission of additional work at a later date, desire for an improved academic record, and failure to observe academic regulations such as those related to withdrawals, absences, or incompletes shall not be deemed sufficient reason to alter a student’s academic record.

Transcript of Record

An official transcript is one bearing the seal of the University and the signature of the University registrar.

Official academic transcripts may be issued to educational institutions, employers, scholarship/grant/fellowship organizations, application services, government agencies, etc., or to students (for personal use) provided the student discloses the intended final recipient. Current students may view their unofficial transcript online by using their credentials on my.fordham.edu. Official transcripts cannot be emailed or faxed to recipients.

Students and alumni who request an official transcript for personal use may not forward it to another party; doing so renders the transcript unofficial. Transcripts should always be issued to the intended final recipient.

The University offers secure electronic transcripts as well as mailed (paper) transcripts. Full details are available from the Office of Academic Records.

Students may request an unofficial transcript listing courses and credits and marked “Unofficial.” Students may also view their unofficial transcript via my.fordham.edu. The University accepts no responsibility for the accuracy of an unofficial transcript after it has been issued.

Transcripts may be requested from the Office of Academic Records following their outlined procedures. They should be requested well in advance of the date desired. No transcripts will be issued for students who have unpaid financial obligations to the University. A fee for immediate processing is charged for each transcript, payable at the time of request. The University reserves the right to change the fee at any time without notice.

The Office of Academic Records may use its discretion to limit the number of transcripts requested at any one time.

Fordham University will make every effort to promptly fill all requests for transcripts but will not assume responsibility for delays. All inquiries concerning issuance of transcripts must be made to the Office of Academic Records within three months of the original request.

Fordham University students who attended prior to 1990, or attended Marymount College prior to 2000, will only be able to receive hard copy transcripts.

Auditing Privileges

Individuals who have earned the baccalaureate, master’s degree, or professional diploma may apply to audit a course on a space-available basis for the purpose of personal or professional development. The fee for auditing courses is equal to tuition for one graduate credit. An application for non-matriculated study and an add/drop form are used to request the audit privilege. Audits are approved by the associate dean for academic affairs.

No grades, credit, or transcripts are given for audited courses. Audited courses will not be considered in requests for exemptions, transfers, waivers, or advanced standing should the auditor subsequently be admitted to a degree program in the Graduate School of Education. An audited course may not be changed to a credit course. Institutes that are taken for noncredit are considered as audited and may not be changed to a credit experience after the institute is over.

The University also extends the privilege of auditing courses on a space-available basis without payment of fees to scholars with doctoral degrees from Fordham or other universities. There are some courses, for example upper-level, practica, laboratory, or seminar courses, that are not open to auditors. Application by letter should be made to the associate dean for academic affairs, who will provide a letter to be presented to the instructor of the course to be audited if the application is approved.

Grievance Procedures

It is the policy of Fordham University to protect the rights of each student to be free from unlawful discrimination. Students who believe they have been discriminated against with respect to participation in, access to, or benefits of any program or activity within the Graduate School of Education are advised to file a grievance. For additional information, write or call the associate dean for academic affairs or the chairperson of the division in which the program is offered.

Enrollment

General Requirements for Admissions

Applications to GSE Programs

Criteria for admission vary according to degree program and specialty. Consult the program descriptions in this bulletin and our website for special requirements, including prerequisites. In addition to the program-specific criteria, all applicants seeking admission to graduate degree programs in the Graduate School of Education must meet the following requirements:

Liberal Arts and Sciences Background

Applicants must have a baccalaureate degree from an accredited college or university with a major or appropriate concentration in a liberal arts or sciences discipline or other appropriate and equivalent undergraduate preparation. They must also provide evidence of satisfactory undergraduate scholarship and potential for successful graduate study. To qualify for master’s or Advanced Certificate programs, applicants should have earned a minimum undergraduate cumulative GPA of approximately 3.0, unless otherwise specified. To qualify for doctoral or advanced certificate programs, applicants should have earned a minimum cumulative grade point average (GPA) of approximately 3.5
Transcripts
Applicants are required to submit official transcripts of all coursework taken (with the exception of study abroad coursework). Only transcripts submitted to the Graduate School of Education’s Office of Admissions directly from the institutions that an applicant has attended/is attending are considered official. Official transcripts can be sent by mail or official electronic download. If a degree has been completed, the transcript must include the degree awarded and date conferred. Applicants who have been admitted to the Graduate School of Education but have not yet completed their undergraduate degrees will be required to submit an official copy of their final undergraduate degree which indicates the degree awarded and date of degree conferral.

Recommendations
Applicants are required to submit two letters of recommendation from respondents familiar with the applicant’s academic or professional background for application to all graduate degree and certificate programs. Applicants may provide more than the required number of recommendations, however an application cannot be completed until all recommendations have been received or written authorization to remove the named recommender from an application is sent to the Graduate School of Education’s Office of Admissions. Respondents with familial ties (e.g., parent, sibling, spouse, grandparent, etc.) to the applicant are not permitted.

Personal Statement
Applicants are required to submit a clear and concise personal statement with their admission application. Personal statement requirements vary by program and can be found on the Personal Statement section of the online application.

Resume/C.V.
Applicants are required to submit a resume or curriculum vitae (CV) with their online application

Application Fee
Applicants are required to submit an application fee (see Tuition and Fees section for more information on fee amount) in order for their application to be considered complete for review by the faculty admissions committee.

Standardized Test Requirements
Most applicants are required to submit standardized test scores from the Graduate Record Examination (GRE) General Test or Miller Analogies Test (MAT) with their application and submit an official test score report from testing sites. Test score submission requirements vary by program and are as follows:

- Teacher education programs: ALL programs (MAT, GRE General Test, or equivalent examination)
- Educational leadership programs: ALL doctoral programs (GRE General Test or MAT); master’s and advanced certificate programs (MAT, GRE General Test, or significantly equivalent examination)
- Psychological and educational services programs: Ph.D. in counseling psychology (GRE General Test); Ph.D. in school psychology (GRE General Test)
- Contemporary learning and interdisciplinary research Ph.D. program (GRE General Test)

The required exam(s) should be taken at least two months prior to the application deadline to ensure timely receipt of scores by GSE admissions. GRE School Code: 2259. MAT School Code: 1453. Information about the Graduate Record Examination is available at the Educational Testing Service, Graduate Record Examinations website. Information about the Miller Analogies Test is available from its website.

Additional Review of English Language Proficiency
Depending on the review of an application, official transcripts, personal statement, and test of English language proficiency, accepted students might be required to engage in further evaluation and study in English language prior to or in conjunction with admission and matriculation in the Graduate School of Education. For further information about the tests, go to ielts.org or ets.org/toefl. All students are expected to demonstrate a satisfactory level of written and spoken English proficiency in coursework and written reports throughout their graduate study. Inability to maintain an acceptable level of English is a basis for review of student status and may result in referral to Fordham’s Institute of American Language and Culture (IALC), academic probation, suspension, or termination of matriculation.

Proof of Immunization
New York state law requires all students born on or after January 1, 1957, to have on file proof of immunity from measles, mumps, and rubella. These vaccinations must have been given on or after the first birthday. To comply with this law, accepted students must submit proof of immunization signed by a physician or other health official. Students who fail to provide proof of immunization are not permitted to register for classes. In addition, students must either have the meningococcal vaccine or sign a waiver declining the vaccine. If you have questions regarding immunization, call the Fordham University Health Center at 212-636-7160.

Admission Requirements for the Five-Year Integrated Teacher Education Program
Consult the admissions requirements for the five-year program (p. 917) listed separately in this bulletin.

Admission Procedures
Before applying for admission to any program of the Graduate School of Education, carefully review its description, specific admission criteria, and program of study, which are listed in this bulletin and on our website. Questions about the program, including issues of eligibility, certification, or requirements, may be addressed to the program coordinator or the chairperson of the division within which the program is offered.

Applications are evaluated by faculty committees and will not be reviewed unless they are complete. An application is complete when the application is submitted; the fee is paid; and all required official transcripts, recommendations, official test scores, and other materials have been received by the admissions office. Documents submitted as part of an application become part of the records of the Graduate School of Education and will not be returned or duplicated for any purpose.
Most Graduate School of Education programs admit students throughout the academic year; however, doctoral programs, mental health counseling, the advanced certificate (formerly professional diploma) programs in school psychology, and the English as a world language program have special deadlines.

Applicants will be notified of admissions decisions as soon as possible after completed applications are received and reviewed by faculty admission committees. Following notification of admission, students must:

• Respond to their offer of admission. Accepted offers of admission require an admissions deposit. The admissions deposit can be paid online by credit/debit or electronic check and is non-refundable. Accepted students should refer to their admission letter for their required deposit amount. The admission deposit is credited toward the first tuition bill.
• Meet with their assigned faculty advisers to discuss their programs and course selection.
• Register by the start of the academic term to which they were admitted or request a deferment (for up to one academic year from the term of acceptance) in writing. Requests are reviewed and approved pending faculty decision.
• Application materials of non-enrolled accepted students will be destroyed after three years.
• Submit immunization form to the University Health Services Center before the start of the semester*.
• Submit the financial responsibility agreement*.
*Failure to complete these items by their respective deadlines will result in administrative withdrawal from classes.

Applicants from Countries Other than the United States
Requirements for applications from persons who are from countries other than the United States are shown below. Required application materials for non-U.S. applicants include:

• the completed online application;
• recommendation letters and application fee;
• personal statement and resume;
• appropriate test scores (including the TOEFL or IELTS, if necessary);
• proof of financial support; and
• transcript evaluations from World Evaluation Services (WES) that include a course-by-course evaluation and conversion to a U.S. scale, grade equivalencies to a U.S. scale, and a final grade point average converted to a U.S. scale for applicants who are admitted before their undergraduate studies have been completed.

A certified translation is required for any documents submitted in languages other than English. Admission procedures require an evaluation of prior educational experience to document equivalency to a U.S.-earned baccalaureate or master’s degree. Information about this evaluation may be obtained by contacting World Education Services at wes.org. This is the only company from which we accept evaluations. Persons who are not U.S. citizens are not eligible for Graduate School of Education scholarships but can apply for graduate assistant positions if enrolled full time (at least 12 credits) and meet the GPA requirement for graduate assistantships.

All students must have oral and written English language skills sufficient for successful completion of their program. If it is determined that a student’s English skills are insufficient, the student will be required to improve his or her English skills by taking classes in English as a second language.

Applicants who expect to use the F-1 or J-1 Student Visa must prove that they have financial support to cover tuition and living expenses for each year that they will study at the University. International students must be enrolled full time (12 credits) in order to comply with the student visa regulations.

The Affidavit of Support form is available online, and must be submitted to the Office of International Students (OIS). A Certificate of Eligibility (I-20) cannot be issued until this form is completed and returned with the required documentation. Contact OIS for additional information at 212-636-6270. For more information on the latest visa issues, visit the Department of State website.

Requirements for Enrollment for Non-Degree Graduate Study
Applicants for non-degree (or non-matriculated) courses must provide proof of the following:

• earned baccalaureate or graduate degree from an accredited college or university (A copy of your diploma or transcript is acceptable and can be uploaded to your online application);
• proof of identity, in the form of a government-issued photo ID (driver’s license, passport, etc.); and
• course approval from an academic adviser for your courses

Applicants must meet with a Fordham Graduate School of Education adviser during our in-person registration hours.

Non-matriculated Student Status
Undergraduate seniors already enrolled at Fordham University whose programs do not require their full time attendance may register as non-matriculated students; written consents from the GSE associate dean for academic affairs and their school’s dean is required. A maximum of six credits will be allowed.

If individuals have recently been accepted or are currently matriculated in another Fordham University academic program, they must take an official leave of absence from or withdraw from the program prior to seeking non-matriculated status in the Graduate School of Education.

Applicants who have been denied admission to the Graduate School of Education are not eligible to enroll as non-matriculated students.

Non-Degree Credit Limits and Course Limitations

• The Graduate School of Education provides opportunities for non-matriculated students to take courses for any of our three academic terms: fall, spring, or summer.
• Non-degree students may not exceed more than 12 credits of non-matriculated study in the Graduate School of Education, and depending on the program, may be limited to six credits. Enrollment as a non-matriculated student does not imply acceptance or eligibility to any degree program in the Graduate School of Education.
• Courses taken as a non-matriculated student do not automatically count toward a graduate degree program.
• Non-matriculated students are not eligible to take advanced level courses (level 7000 or higher), courses requiring pre- or corequisites,
Comprehensive assessments. See course registration materials for appropriate call numbers for complete their course requirements or after all coursework is completed. Students are required in all graduate programs. Students should consult their advisers or division chairperson for specific information regarding format and content of comprehensive examinations/assessments. Students must register in advance to take these assessments during the semester they complete their course requirements or after all coursework is completed. See course registration materials for appropriate call numbers for comprehensive assessments.

Non-Degree Tuition and Fees
Non-degree (or non-matriculated) students pay the regular tuition rate plus the following additional fees:
- University General Fee: $90 per term, fall and spring only
- GSE Taskstream-TK20 Assessment Fee: $100 one-time-only fee, assessed at time of first registration
- Technology Access Fee: $138 per term, fall and spring only

Non-Degree Financial Aid and Scholarships
Non-matriculated students are not eligible for Graduate School of Education scholarships or graduate assistantships.

Non-matriculated students are not eligible for federal financial aid.

General Program Requirements
The program of study in effect at the time of admission constitutes the minimum course requirements. Additional courses or other work and activities may be required based on the student's prior academic or professional background, on achievement in the program, or on professional or academic goals. Changes in state certification regulations may also affect a student's program. All coursework is taken under the guidance and approval of an adviser within the student's division. Changes to programs of study may require the approval of the division chairperson and the associate dean for academic affairs.

In addition to program-specific requirements for courses and activities, degree- and/or program-specific criteria must be met before degrees are awarded.

Master's
Time Limit and Credit Requirements
A master's degree must be completed within a five-year period, beginning with either the student's initial registration in the program or the date on which a course accepted for transfer was completed. The number of credits required for a master's degree depends on the particular program and the student's academic background; however, the minimum number of credits is 30, with no fewer than 24 credits taken at Fordham University as part of the program.

Comprehensive Assessments
Comprehensive, end-of-program assessments, such as the development of a professional portfolio, the completion of comprehensive examinations, or the demonstration of professional competencies, are required in all graduate programs. Students should consult their advisers or division chairperson for specific information regarding format and content of comprehensive examinations/assessments. Students must register to take these assessments during the semester they complete their course requirements or after all coursework is completed. See course registration materials for appropriate call numbers for comprehensive assessments.

If students are not registering for other courses during the semester in which they plan to register for this assessment, they must register for Maintenance of Matriculation. Check the academic calendar for deadlines for registration and for the administration dates. Students who are not successful on these assessments may register to retake them the following semester. If the second assessment is also unsatisfactory, the student’s matriculation will be terminated.

Advanced Certificate
Time Limit and Credit Requirements
An advanced certificate must be completed within a five-year period, beginning with either the student's initial registration in the program or the date on which a course accepted for transfer was completed. The number of credits required for an advanced certificate depends on the particular program and the student's academic background; however, the minimum number of credits is 30, with no fewer than 24 credits taken at Fordham University as part of the program.

Comprehensive Assessments
Comprehensive, end-of-program assessments (comps), such as the development of a professional portfolio, the completion of comprehensive essays, or the demonstration of program competencies, are required in all graduate programs. Students should consult their advisers or division chairperson for specific information regarding format and content of comprehensive examinations/assessments. Students must register in advance to take these assessments during the semester they complete their course requirements or after all coursework is completed. See course registration materials for appropriate call numbers for comprehensive assessments.

If students are not registering for other courses during the semester in which they plan to take comps, they must register for Maintenance of Matriculation. Check the academic calendar for deadlines for comps registration and for their administration dates. Students who are not successful on these assessments may register to retake them the following semester. If the second assessment is also unsatisfactory, the student’s matriculation will be terminated.

Doctoral
Time Limit and Credit Requirements
Students in Ph.D. or Ed.D. programs must complete all the degree requirements for the specific program within an eight-year period, beginning with the earlier date of either the student’s initial registration in the program or the date on which a course accepted for transfer of credit was completed. All doctoral students must complete a minimum of 45 credits beyond the master’s degree at the Graduate School of Education.

Permanent Matriculation
Students are admitted to doctoral degree programs on a provisional matriculation basis. During the semester in which provisional doctoral students expect to complete their 12th to 15th credit of doctoral work, they must apply for permanent matriculation status by enrolling in either ASGE 0900, CLGE 0900, CTGE 0900, or PSGE 0900. Students will be evaluated by the faculty of the appropriate division and will be continued in the program only on the recommendation of the faculty of the division and with the approval of the associate dean for academic affairs. Consult your adviser or division chair for additional information on permanent matriculation.
Research Apprenticeship
After being approved for permanent matriculation, all doctoral students must enroll in Research Apprenticeship (also called Capstone for the CLAIR program). During this apprenticeship, students will conduct research under the direction of a full-time faculty member. Students may also participate in seminars at which prominent researchers from various disciplines will make scholarly presentations.

Comprehensive Qualifying Examinations
After completing all required courses other than the dissertation seminar, students in Ph.D. and Ed.D. degree programs must undergo a comprehensive qualifying examination or equivalent assessment to test the integration of their knowledge of the field of study. Students must register for the examinations by the date indicated in the academic calendar. After passing the comprehensive examinations or assessments, the students are admitted to candidacy for the doctorate. Students who are not successful on these examinations may register to retake them a second time. If the result of the second examination is also unsatisfactory, the student’s matriculation will be terminated.

Dissertation Seminar
After completing all required courses and the comprehensive qualifying examinations, doctoral candidates must register for the dissertation seminar offered by their division. While in seminar, they are expected to develop a dissertation proposal that will meet with the approval of seminar faculty.

Dissertation Proposal
One outcome of the dissertation seminar is an approved dissertation proposal, which needs to be noted on each student’s transcript as ASGE 0999, CLGE 0999, CTGE 0999, or PSGE 0999.

Dissertation Mentoring
Doctoral candidates must engage in original research under the direction of their mentors and dissertation committees. When the candidate’s committee determines a dissertation is complete, it is submitted for oral defense (EDGE 0990) and then format review (EDGE 0999). Candidates must pass a final oral defense focusing on their dissertation and field of study. Award of the doctorate requires the satisfactory defense of the dissertation and the final approval of the dissertation document, including format review.

On completing the dissertation and in anticipation of the oral examination, doctoral students must register for EDGE 9999 (under the section that has been designated for their dissertation mentor) for the semester in which they orally defend their dissertations.

If the dissertation or parts thereof are subsequently published, the preliminary matter of the printed copy must contain a statement that the book or part thereof was part of a dissertation, presented for the degree of Doctor of Philosophy or Doctor of Education in the Graduate School of Education, Fordham University.

Professional/Teacher Certification
Students who meet all program requirements, complete the course of study, and meet established field experience competencies are eligible to receive Fordham University’s endorsement for New York state certification in their program area provided they also have earned a passing score on the relevant New York state teacher examinations; and completed workshops in child abuse identification, Dignity for All Students Act (DASA), schools against violence education, drug and alcohol abuse, and health and physical education.

Note: Some programs have additional certification requirements.

Tuition, Fees, and Financial Aid

Tuition and Fees
The University and its Board of Trustees reserve the right to adjust these charges without notice. Fees and charges during the period covered by this bulletin will change. The charges for the academic year 2020-2021 are available from the Office of Student Accounts.

Liability Insurance
Students enrolled in programs requiring fieldwork, practica, student teaching, or an internship will be charged a one-time insurance fee at the beginning of their enrollment in the program that will cover them under Fordham University’s liability insurance policy throughout the semesters in which they complete their fieldwork, practica, student teaching, or internship. Students are also strongly encouraged to obtain their own personal policy through professional organizations.

Policies
Tuition and fees are billed after registration and must be paid on or before the invoice due date. Checks should be made payable to Fordham University. There will be a penalty and handling charge if a check is returned from the bank for insufficient funds or any other reason. Should this occur, the University may require settlement of any subsequent obligations with cash or certified check.

The University reserves the right to cancel registration or bar further registration and not release any transcript or record until all financial obligations are satisfied. Delinquency of outstanding balances, including those from deferred or other payment plans, are subject to collection by the University or a designated agent. Students are liable for any costs incurred in the collection of delinquent accounts.

Cost of Attendance
Information about the estimated cost of attendance per year is available from the Office of Student Accounts.

Refund Policies and Procedures
The University’s refund policies and procedures ensure equitable refunds to students who withdraw from all or a portion of their studies or when payment is in excess of the total charges. Application and tuition deposit fees are not refundable. Registration, late payment, student activities, laboratory, maintenance of matriculation, and other special fees are not refundable after classes begin.

New students who want to withdraw the acceptance of our offer of admission are required to write a letter stating that they want to withdraw from the Graduate School of Education (GSE). Letters should include the date of withdrawal, student ID number, and program name. Letters must be submitted on paper or emailed from Fordham email accounts. Letters should be directed to the admissions office at gse_admiss@fordham.edu.

Updated: 07-27-2020
Continuing GSE students who want to withdraw are required to write a letter stating that they want to withdraw from GSE. Letters should include the date of withdrawal, student ID number, and program name. Letters may be submitted on paper or emailed from Fordham email accounts. Letters should be directed to the academic adviser. Academic advisers will sign off on the withdrawal request and (with division chair approval) forward it to academic records in the enrollment services office on the second floor of the Lowenstein Center. Students are also expected to complete a withdrawal form.

A request for a refund must be submitted to the bursar’s office. Refund checks are mailed to the student’s permanent address unless otherwise specified in the request. No refunds will be processed until the University has actually received funds from third-party payers (such as employers, governmental agencies, and payment plan service providers).

Students who are withdrawing should contact enrollment services at 718-817-3800 for counseling regarding the effect the withdrawal has on balances due to the University and financial aid. The refund calculation is based on the following:

- First-time and continuing students not receiving Title IV (federal) assistance are subject to the Institutional Refund Policy.
- For continuing students receiving Title IV assistance, refunds must be calculated using both the federal policy and institutional policy. The calculation that gives the largest refund to the federal programs must be applied.
- First-time students attending Fordham University receiving Title IV assistance and withdrawing during the first nine weeks of the term are subject to a federal pro rata refund calculation as mandated by the Higher Education Amendments (HEA) of 1992.
- Students who received aid as cash must be placed into repayment status for those aid programs.

Note: For students who received Title IV assistance, refunds must be returned to the programs in the following order: unsubsidized Stafford loan, subsidized Stafford loan, Plus loan, Perkins loan, Pell, SEOF, other Title IV aid, other federal aid, Fordham grants and scholarships, TAP, other aid. Any additional monies will be returned to the student. The following refund policies are based on 100% tuition payment. The refund period begins with the first day of the term.

Note: The dates and refund portions are determined each year; the information below is approximate and subject to change. Check the GSE calendar online at fordham.edu/gse for current Information.

See the University’s refund calculator for more details.

Refund Policy Appeal Process
A student may appeal decisions by writing to the associate dean for academic affairs. The request should include all relevant information describing the special circumstances upon which the appeal is based.

GSE Financial Aid
School-based aid consists of funding provided by Fordham GSE. It is separate from federal or state financial aid and external funding.

All students applying for GSE school-based aid must meet the GPA criteria. Award eligibility is based on students’ final, cumulative, degree-granting GPA. Applicants for GSE scholarships must also complete a FAFSA and meet financial need.

GSE Scholarship Eligibility
To be eligible for GSE school-based scholarships, students must:

- Meet minimum GPA requirements: 3.5 undergraduate GPA and 3.75 graduate GPA.
- Maintain enrollment in two courses for fall and spring semesters and two courses during our summer session.
- Demonstrate financial need by completing a FAFSA. For more information on how to complete a FAFSA, please visit fasfa.gov. Fordham University's Federal School Code is #002722.

GSE Graduate Assistantship Eligibility
To be eligible for a graduate assistantship, students must:

- Meet the minimum GPA requirements: 3.5 undergraduate GPA and 3.75 graduate GPA.
- Be enrolled in a minimum of 9+ credits in any degree program within the Graduate School of Education for the entire academic year.

Note: Students may apply for multiple scholarships but can receive financial support from only one scholarship program at a time, with limited exceptions. Additional information is available on the GSE Financial Aid website.

Federal Financial Aid
Students matriculated in a degree program who are enrolled at least half time in each term of the loan period and have filed a valid FAFSA may apply for the Federal Direct Unsubsidized loan and Federal Direct Graduate PLUS loan. After students file the FAFSA, they must review their Student Aid Report for accuracy or missing data. The annual limit for the unsubsidized loan is $20,500. Students who plan to borrow the unsubsidized loan must complete the electronic loan request form.

The Graduate PLUS loan can be requested online. The Office of Student Financial Services will review and certify loan eligibility based on federal guidelines. Interest begins to accrue on these loans at the time of disbursement. Borrowers are not required to make payment while in school but are encouraged to make quarterly interest payments to limit the total amount of interest paid.

Federal regulations require that before funds may be disbursed, first-time Fordham borrows must complete a Master Promissory Note (MPN) and Entrance Counseling Session with the U.S. Department of Education.

Federal Loan Satisfactory Academic Progress (SAP)
Criteria for federal loans include the following:

- Students must maintain a minimum grade point average of 3.0 for ADV, ADVN, M.S., M.S.E., and M.S.T. degree programs, and 3.5 for Ed.D. and Ph.D. degree programs.
- Students must attempt and complete no fewer than 6 credit hours per term. The Matriculated Student Status Certificate form (see below for more information) must be completed by a student who may be registered for fewer credits to qualify for half, three-quarters, or full-time certification for purposes of veterans’ benefits and federal financial aid eligibility.
- Maintain active term matriculation status (from term admitted to term graduated).
Students must complete the course of study within five years for ADV, ADVN, M.S., M.S.E., M.S.T. degree programs and within eight years for Ed.D. or Ph.D. degree programs.

Students who fail to attain satisfactory progress at the end of each academic year will lose federal financial aid eligibility. If the student resumes satisfactory academic progress, the student will regain federal financial aid eligibility as long as they maintain satisfactory academic progress.

Students enrolled in non-degree programs are not eligible for federal aid and should look into a private education loan for non-degree programs.

The Matriculated Student Status Certification form must be completed by a student who may be registered for fewer credits to qualify for half, three-quarters, or full-time certification for purposes of veterans' benefits and federal financial aid eligibility.

Matriculated Student Status Certification Forms:

- Form only (for students loan status) (PDF)
- SAP Appeal Form (PDF)

**University Policies**

- Academic Integrity (p. 934)
- Affirmative Action Policy (p. 934)
- Campus Safety (p. 934)
- Nondiscrimination Policy and Designated Title IX Coordinator (p. 934)
- Notice Regarding the Clery Act (p. 934)
- Recruitment of Jesuits to the Faculty (p. 935)
- Student Records and FERPA Policy (p. 935)
- Support Services for Students with Disabilities (p. 936)

**Academic Integrity**

Please refer to the University Academic Integrity Policy. If there are questions, please contact the GSE Associate Dean for Academic Affairs.

**Affirmative Action Policy**

The University continues its commitment to affirmative action by providing the means to recruit, employ, and promote women and other underrepresented minorities in the interest of attaining workplace diversity. The Office of Human Resources Management is available to all employees of Fordham University for consultation, training, and development of those methods and initiatives that advance a more diversified workforce, and ensure nondiscrimination, access to equal employment opportunities, and fair treatment of individuals. It is the responsibility of the Assistant Vice President of Human Resources to monitor and report regularly on the University’s efforts to achieve diversity and compliance with all laws pertaining to nondiscrimination in employment.

**Campus Safety**

The Advisory Committee on Campus Security will provide upon request all campus crime statistics as reported to the U.S. Department of Education. The U.S. Department of Education Website is www.ed.gov. Fordham University provides campus crime statistics on its website.

Requests for a hard copy can be directed to the University Associate Vice President for Public Safety by phone at 718-817-2222 or in writing at Associate Vice President

Public Safety

Visit the Public Safety web page.

**Nondiscrimination Policy and Designated Title IX Coordinator**

Fordham University is committed to maintaining a community in which its members live, work, and learn in a safe and respectful environment that is free from all forms of sex- and gender-based discrimination. This commitment applies to all members of the Fordham community regardless of race, color, national origin, religion, creed, age, ability, sex, gender, gender identity, gender expression, sexual orientation, familial status, pregnancy, predisposing genetic characteristics, military status, domestic violence victim status, criminal conviction, or any other protected class recognized under federal, state, or local law.

The University’s Title IX Coordinator oversees the University’s Title IX compliance efforts and is responsible for coordinating the University’s response to all reports of sexual and related misconduct, including sex- or gender-based discrimination involving educational programs, gender equity in athletic programs, employment, and admission. The Title IX Coordinator also collects data from all of the University’s Title IX reports to monitor the process, including outcomes, to identify and address any patterns or systemic issues that may arise. Fordham will take prompt and effective steps to end sexual and related misconduct, eliminate the hostile environment, prevent its recurrence, and remedy its effects.

Inquiries concerning the application of Title IX and its implementing regulation may be referred to the University’s designated Title IX Coordinator, Kareem Peat, by email at titleix@fordham.edu or by dialing (718) 817-3112.

The Office of Human Resources Management oversees the University’s enforcement of anti-discrimination and anti-harassment in employment (Title VII, New York State Human Rights Law, and NYC and Westchester Human Rights Laws) and non-gender based anti-discrimination and anti-discriminatory harassment of students (Title VI). Inquiries concerning these issues may be referred to the Office of Human Resources Management, hr@fordham.edu or by dialing (718) 817-4930.

**Notice Regarding the Clery Act**

Fordham University is committed to the safety and security of members of the Fordham community. As part of this commitment and in fulfillment of our obligations under the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, Fordham publishes an annual security and fire safety report. The report contains information about the incidence of fires and certain categories of crime on Fordham campuses as well as important information about Fordham University safety and security policies, tips for staying safe, and important telephone numbers. Hard copies of the report are available upon request by contacting the
Recruitment of Jesuits to the Faculty

As a Jesuit, Catholic institution, Fordham University aims to create a community that is ever more diverse, committed, and deeply engaged in New York City and beyond. Grounded in the Jesuit tradition, we seek new ways to live out our mission in contexts very different from that in which Fordham was founded. Moreover, the Society of Jesus, the religious community that has helped sustain Fordham since 1846, itself shares in this attempt to respond to our times with creativity, confidence, and integrity.

Fordham University has been indebted to the presence and work of so many Jesuits throughout its history, and yet it has thrived, especially in the past 50 years, on account of a great variety of colleagues of diverse intellectual, philosophical, cultural, and religious commitments. We hope that all members of the Fordham faculty will find in our Jesuit, Catholic tradition opportunities for joyful and meaningful work.

We do not expect to return to a time when a large part of Fordham’s workforce consisted of members of the Society of Jesus. And yet we recognize that excellent Jesuit colleagues, while few, continue to search not only for employment as teachers and scholars but also for a way specifically to contribute to the mission and identity of places like Fordham. Some have, in fact, been our own students, yet many more come from more national or international contexts than ever before. We continue to seek out those interested in being fine colleagues, teachers, scholars, administrators, pastors, and citizens of the University.

At any point, the number of Jesuits finishing terminal degrees or otherwise prepared to enter an academic position at Fordham is not large. Yet those who are so prepared stand to make an important contribution to our shared purpose and to give unique witness to the kind of educational values Fordham has long embraced.

For this reason, the recruitment and hiring of highly qualified Jesuits is considered an institutional priority. In an effort to clarify and make more transparent processes by which that can be done, a protocol has been established as identifying basic “rules of engagement” for those entities at the University that may wish to recruit a Jesuit for a position. This document applies only to Jesuits considered for full-time academic positions, either tenure-line or non-tenure-line.

The protocol document is available from the Office of the Provost and the Dean of Arts and Sciences.

Student Records and FERPA Policy

Notification of Rights under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a written request for access. A student should submit to the Office of Academic Records–Fordham University Enrollment Group at the Rose Hill Campus, the Lincoln Center Campus, or the Law School Registrar, if applicable, a written request that identifies the record(s) he or she wishes to inspect. The Office of Academic Records-Enrollment Group will make arrangements for access and notify the student of the time and place where the records may be inspected.

2. The right to request the amendment of the student's education records that the student believes are inaccurate or misleading. A student may ask the University to amend a record that he or she believes is inaccurate or misleading. The student should write the University Registrar, or the Law School Registrar, clearly identifying the part of the record he or she wants changed, and specifically why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. One of the exceptions which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as on a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

Upon the request of officials of another school in which a student seeks or intends to enroll, the University may disclose educational records without the student’s consent.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Fordham University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, D.C. 20202-5920

Directory Information

The University, at its discretion, may provide the following directory information: student’s name, addresses, telephone numbers, electronic mail addresses, photographs, date and place of birth, major field of study, dates of attendance, class level, enrollment status (e.g. undergraduate or graduate; full-time or part-time), participation in officially recognized activities and sports, weight and height of members of athletic teams, degrees, honors and awards received, the most recent educational agency or institution attended, and other such information. A student who wishes the University to withhold directory information from disclosure must notify the Office of Academic Records or Law School.
Updated: 07-27-2020

Registrar in writing within 10 days after the first day of class each semester.

Veteran Information

Veterans enrolled at Fordham University utilizing education benefits programs—such as Post 9/11 GI Bill, Montgomery GI Bill-Active Duty, Montgomery GI Bill—Selected Reserve and the Reserve Education Assistance Program (REAP)—must present their Certificate of Eligibility (COE) and DD214 to the Office of Academic Records at the time of registration or as soon as possible thereafter. Those utilizing the Vocational Rehabilitation Act Chapter 31 benefit should ensure that their counselor has authorized them for the semester and should inform the Fordham school certifying officials. Please refer to the VA website, www.va.gov, for eligibility criteria as well as type of education or training benefits available under each program. The VA can also be reached at 800-827-1000. Veterans who do not have such a letter (COE) must follow the same procedure for payment of tuition as all other students. Specific tuition questions should be directed to the Financial Aid office of your home school.

For information on Fordham University’s participation in the Post 9/11 GI Bill Yellow Ribbon Program, please refer to: https://www.fordham.edu/info/20731/veterans_admissions.

Support Services for Students with Disabilities

The Office of Disability Services (ODS) works closely with students, faculty, and university administrators to ensure appropriate services for students with documented disabilities in accordance with Section 504 of the Federal Rehabilitation Act of 1973 and Title III of the Americans with Disabilities Act of 1990. Students who register with ODS will complete the same coursework as their peers, and registering does not become a part of a student’s transcript. The University will make every attempt to provide reasonable accommodations to students who have a documented disability.

Please contact ODS by calling our main office at Rose Hill (Monday–Friday 9 a.m.–5 p.m.) at 718-817-0655 to obtain information about documentation guidelines, which vary by disability, and the registration process if you would like to receive academic accommodations at Fordham University. Please note that students are not eligible to receive any academic accommodations until they have formally registered with ODS and completed their intake appointment. Accommodations are not made retroactively, so it is best to contact ODS to begin this process during the summer before entering Fordham. If a student has one of the following types of disabilities, it is essential to contact ODS by July 2 of the summer before entering as a first year in order to ensure that accommodations can be put in place before classes begin in September: physical mobility, visual impairment, hearing impairment, and certain health conditions. Please do not send documentation of a disability to the Admissions office. The Admissions office will not forward any information regarding a student’s 504 Plan or IEP directly to ODS.

Students seeking a substitution for the foreign language core through the Office of Disability Services must complete the process by the end of their first year at Fordham. Applying for the substitution does not guarantee you will be approved for this accommodation as this accommodation is the only one that changes degree requirements and therefore eligibility is jointly determined by ODS and the dean.

Applicants who have been accepted for admission, or current students who are seeking accommodation(s) for a disability should contact the Office of Disability Services at the following locations:

Lincoln Center Campus
Lowenstein Room 408
212-636-6282

Rose Hill Campus
O’Hare Hall, Lower Level
718-817-0655

Westchester students should contact the Rose Hill office, 718-817-0655.

For more information
Visit the Disability Services web page.

School Psychology Programs

Office: Room 1008
Phone: 212-636-6460 or 6461

The Division of Psychological and Educational Services (PES) offers master’s and doctoral programs in school psychology.

Programs in school psychology develop knowledge and expertise for individuals for positions in Pre-K–12 schools, for psychological services to children in health-service settings, for academic and research careers, and for independent psychological practice.

General Requirements

PES applicants must meet the general and specific program requirements described in this bulletin. An interview may also be required to reveal more about the applicant’s personal and professional goals and qualifications.

All students accepted into a PES program are assigned a faculty adviser. Students, however, are responsible for meeting all requirements and deadlines for the completion of their studies in a satisfactory manner.
All Ph.D. students in the division must file for evaluation for permanent matriculation status during the semester after they have completed their first 12 to 15 credits at Fordham.

Admission to any of the PES programs also obligates students to uphold the appropriate ethical standards of the professional organizations, such as the American Psychological Association, and professions for which students are preparing.

Credit for previous graduate work may be granted depending upon its relevance to the student's program at Fordham. The following minimum number of credits must be completed in the Fordham Graduate School of Education: 24 for all master's programs; 24 beyond the master's for all Advanced Certificate (formerly Professional Diploma) programs; 45 beyond the master's for doctoral degree programs. With approval, students may take some of these credits in other schools of Fordham University. Exemptions from any courses will follow existing GSE procedures.

Students who are certified school psychologists when they enter the Fordham school psychology doctoral program may be exempted from some of the practice-related coursework, but they are expected to enhance their skills by completing at least 60 graduate-level credits at Fordham.

All PES students must pass a comprehensive assessment before graduation. All students should consult with their advisers regarding the timing and nature of comprehensive assessments.

Students and graduates of Fordham's school psychology programs are expected to be guided in their professional conduct by ethical principles, such as those described in the code of the American Psychological Association. They must exercise personal responsibility for continuing self-evaluation, and personal and professional development.

The Fordham University school psychology programs are accredited by the American Psychological Association (for the doctoral program) and approved by the National Association of School Psychologists through the National Council for Accreditation of Teacher Education.

For more information about the accreditation status of the school psychology doctoral program by the American Psychological Association, contact:

Office of Program Consultation and Accreditation of the American Psychological Association
750 1st Street NE, Washington DC 20002
Telephone: 202-336-5979
Email: apaaccred@apa.org

The school psychology doctoral program is also registered with the New York State Education Department for purposes of school psychology certification and professional licensing in psychology.

Bilingual School Psychology, Advanced Certificate

Overview
66 credits
NYSED 83196

The Fordham Graduate School of Education offers two Advanced Certificate (formerly Professional Diploma) programs in school psychology. Both programs lead to certification as a school psychologist. One of these programs, the bilingual Advanced Certificate program, leads specifically to a school psychology certificate with a bilingual extension.

Both Advanced Certificate programs prepare students to serve as practicing school psychologists. Beginning with a foundation in undergraduate psychology coursework, the student completes a minimum of 66 graduate credits of academic study, including one year of supervised internship. The student is then awarded the Advanced Certificate. Students who complete the program successfully are eligible to apply for National Certification as a School Psychologist and students who are U.S. citizens are recommended to New York state for NY certification as a school psychologist.

Graduates of the bilingual school psychology program who complete the master's in the psychology of the bilingual student are eligible for New York state certification as bilingual school psychologists (i.e., certification as a school psychologist with a bilingual extension).

Completion Requirements
To complete an Advanced Certificate in school psychology or bilingual school psychology, students must

• complete the prescribed program of study, including a minimum of 66 credits beyond the baccalaureate degree, with a minimum of 30 graduate credits taken at Fordham with the approval of an advisor (credit for previous graduate work is granted depending on its relation to the program);
• maintain a minimum overall graduate grade point average of 3.25 (between B and B+);
• successfully complete an end-of-program comprehensive assessment; and
• successfully complete any required related practica or field experiences.

Consistent with accreditation guidelines of the National Association of School Psychologists (NASP), students earning an Advanced Certificate in School Psychology at Fordham University must take the National Certification in school psychology Exam and request that their scores be submitted to the program director prior to graduation. Although a passing score on the test is not required for graduation, students are encouraged but not required to seek national certification. Because the Fordham school psychology program is fully approved by NASP, students who successfully complete the program and obtain passing scores on
the national certification exam are eligible for National Certification as a School Psychologist.

Acceptance into the program carries with it the responsibility to uphold the published ethical standards of the American Psychological Association. Violation of ethical standards may result in termination from the program. The program is committed to fostering and maintaining a learning environment in which all members of the community feel valued and respected. The program reserves the right to review the progress of students and to terminate students from the program on the basis of inability to meet academic, personal, or professional standards. Students may be terminated from the program if they fail to complete any of these requirements.

Admissions
Admission Requirements

Applicants seeking admission to one of the Advanced Certificate programs in school psychology must meet the general requirements for admission to graduate study in the Graduate School of Education and the following program-specific criteria:

- Possess a baccalaureate or a master’s degree from an accredited college or university with a suitable foundation in the behavioral sciences, including successful completion of courses or their equivalent in the following areas, at either the undergraduate or graduate level: general psychology, child/developmental psychology, educational psychology, abnormal psychology, and psychology of personality. Applicants who lack one or more of these prerequisites may be admitted to the program; however, all but two prerequisites must be completed prior to taking any program coursework. These two prerequisites may be taken concurrently with program coursework. It is preferred that missing prerequisites be taken at Fordham.
- Choose to take and pass a minimum competency examination in psychological and educational measurement. (Students who do not meet the criterion level or choose not to take the exam will be required to enroll in PSGE 6702 Fundamentals of Educational and Psychological Measurement during their first semester at Fordham).
- Have academic and professional goals consistent with the objectives and purposes of the program.
- Show evidence of a high degree of emotional stability, as well as personal and social maturity as indicated by both the student’s record and by an interview with school psychology faculty.
- Have earned a minimum undergraduate grade point average of 3.0 (B or better) or a minimum graduate grade point average of 3.5 (B+ or better).
- Provide two letters of reference.
- Demonstrate satisfactory command of oral and written English.
- Provide proof of immunization against measles, mumps, meningitis, and rubella.

Applicants for the bilingual program must also demonstrate competency in both English and a second language through: a license as a bilingual teacher; or a successful rating on a test of dual language proficiency (for example, New York state Education Department Language Proficiency Examination).

Professional Diploma) program in bilingual school psychology, or Ph.D. in School Psychology (p. 942) to meet New York state's requirements for eligibility as a certified school psychologist.

Completion Requirements

To complete the M.S.E., students must

- complete the prescribed program of study, including the four courses (12 credits) that do not overlap with the advanced certificate or bilingual advanced certificate programs prior to or concurrently with completing the advanced certificate or Ph.D.;
- maintain a minimum overall graduate grade point average of 3.25 (B or better); and
- complete an end-of-program comprehensive assessment.

Admissions

Admission to one of the the School Psychology Program’s M.S.E. programs is limited to students already admitted to the Ph.D. program in school psychology (p. 942), the Advanced Certificate (formerly Professional Diploma) program in school psychology, or the Advanced Certificate (formerly Professional Diploma) program in bilingual school psychology. Admission to and enrollment in one of these programs is sufficient for admission to a master’s program.

Students in the Advanced Certificate program in bilingual school psychology who lack a master’s degree must complete the master’s in the psychology of bilingual students in order to be eligible for the New York state bilingual certification extension.

To apply, students need to complete an interprogram application form, which is available from the division or deans’ offices.

Requirements

Program of Study

Overview

39 credits

This program focuses on the scientific study of the psychological growth and development of individuals of school age. It includes instruction in cognitive, emotional, and personality development; empirically based testing, assessment, consultation, and intervention; data-based decision-making; theories in cognition, instruction, and learning science and related research methods; data-collection activities; data-reporting activities; data analysis and interpretation; data-based decision-making; and supervised fieldwork in school settings.

Students who are admitted to the Ph.D. program in school psychology (p. 942), the Advanced Certificate (formerly Professional Diploma) program in school psychology, or to the Advanced Certificate (formerly Professional Diploma) program in bilingual school psychology, and who do not have a relevant master’s degree, must complete a master’s degree (M.S.E.) while matriculated in their programs in order to be eligible for permanent professional New York state certification as a school psychologist or school psychologist with a bilingual extension.

These M.S.E. programs are designed to provide specialized studies in areas that complement the practice of school psychology. These are “captured” programs that overlap with the school psychology Advanced Certificate and doctoral programs.

Note: These master’s degree programs or specialization areas do not in and of themselves lead to eligibility as a school psychologist or bilingual school psychologist. Students must complete the Advanced Certificate in School Psychology, Advanced Certificate in Bilingual School Psychology, or Ph.D. in School Psychology (p. 942) to meet New York state’s requirements for eligibility as a certified school psychologist.

Psychology of Bilingual Students (M.S.E.)

39 credits

NYSED 93020

This program focuses on the scientific study of the psychological growth and development of bilingual students from kindergarten through early adulthood. It includes instruction in principles of bilingual education; cognitive and perceptual development; social and emotional development; theories of cognitive growth and related research methods; empirically based bilingual testing, assessment, consultation, and intervention methods; data-based decision making, and supervised fieldwork in school settings with bilingual students.

Students who are admitted to the Ph.D. program in school psychology (p. 942), the Advanced Certificate (formerly Professional Diploma) program in school psychology, or to the Advanced Certificate (formerly Professional Diploma) program in bilingual school psychology, and who do not have a relevant master’s degree, must complete a master’s degree (M.S.E.) while matriculated in their programs in order to be eligible for permanent professional New York state certification as a school psychologist or school psychologist with a bilingual extension.

These M.S.E. programs are designed to provide specialized studies in areas that complement the practice of school psychology. These are “captured” programs that overlap with the school psychology Advanced Certificate and doctoral programs.

Note: These master’s degree programs or specialization areas do not in and of themselves lead to eligibility as a school psychologist or bilingual school psychologist. Students must complete the Advanced Certificate in School Psychology, Advanced Certificate in Bilingual School Psychology, or Ph.D. in School Psychology (p. 942) to meet New York state’s requirements for eligibility as a certified school psychologist.

Completion Requirements

To complete the M.S.E., students must:

- complete the prescribed program of study, including the four courses (12 credits) that do not overlap with the advanced certificate or bilingual advanced certificate programs prior to or concurrently with completing the advanced certificate or Ph.D.;
- maintain a minimum overall graduate grade point average of 3.25 (B or better); and
- complete an end-of-program comprehensive assessment.

Admissions

Applicants do not need to be bilingual for admission to the M.S.E. in the psychology of bilingual students.

Admission to one of the School Psychology Program’s M.S.E. programs is limited to students already admitted to the Ph.D. program in school psychology (p. 942), the Advanced Certificate (formerly Professional Diploma) program in school psychology, or the Advanced Certificate (formerly Professional Diploma) program in bilingual school psychology. Admission to and enrollment in one of these programs is sufficient for admission to a master’s program.

Students in the Advanced Certificate program in bilingual school psychology who lack a master’s degree must complete the master’s in the psychology of bilingual students in order to be eligible for the New York state bilingual certification extension.

To apply, students need to complete an interprogram application form, which is available from the division or deans’ offices.

The Doctor of Philosophy in School Psychology program is open to individuals who already have state certification in school psychology and to those without previous training in school psychology. It is the philosophy of the program to work with both types of students, upgrading the skills of practicing school psychologists and developing those skills in beginner students. These two objectives are viewed within the context of the urban focus of the program. The program espouses the scientist-practitioner model, which is viewed as most appropriate for achieving our students’ goals.

The program provides the training and experiences necessary for its graduates to succeed in many leadership positions, in both urban or non-urban settings. These positions include but are not limited to:

1. scientist-practitioner, providing direct services to children and indirect services through socializing agents such as school/clinic personnel and parents;
2. supervisor, responsible for the effectiveness of other school psychologists;
3. administrator, responsible for developing, implementing, and evaluating educational psychological programs;
4. researcher, advancing the state of scientific knowledge; and
5. educator, functioning in institutions of higher education.

The school psychology doctoral program is accredited by the American Psychological Association and approved by the National Association of School Psychologists. For more information, contact the Office of Program Consultation and Accreditation of the American Psychological Association. Also, the school psychology doctoral program is registered with the New York State Education Department for purposes of school psychology certification and professional licensing in psychology. In addition, graduates of the Fordham doctoral and advanced certificate school psychology programs are eligible to become Nationally Certified School Psychologists (NCSP).

### Admissions

Applicants seeking admission to the Ph.D. program in school psychology must meet the general requirements for admission to graduate study in the Graduate School of Education and these program-specific admission criteria:

- possess a bachelor's or a master's degree from an accredited college or university with a suitable foundation in the behavioral sciences, including successful completion of the following courses or their equivalent at either the undergraduate or graduate level: general psychology, child/developmental psychology, educational psychology or the psychology of learning, abnormal psychology, and psychology of personality. (Applicants who lack one or more of these prerequisites may still be admitted to the program; however, all but two of the prerequisites must be completed prior to taking any program coursework. These two prerequisites may be taken concurrently with program coursework. It is preferred that missing prerequisites be taken at Fordham);
- have academic and professional goals consistent with the objectives and purposes of the program;
- show evidence of a high degree of emotional stability and personal and social maturity as indicated by a study of the student's record and an interview with school psychology faculty;
- have earned a minimum undergraduate grade point average of 3.0 (B or better) or a minimum graduate grade point average of 3.5 (B+ or better);
- provide two reference reports
- have earned satisfactory scores on the Graduate Record Exam (GRE) Aptitude Section (test scores must be less than five years old);
- demonstrate satisfactory command of oral and written English; and
- provide proof of immunization against measles, mumps, meningitis, and rubella.

### Cognate Areas of Studies

**Dissertation**
- **PSGE 8999** Dissertation Seminar in Psychological and Educational Services (taken until student defends dissertation, 3 credits each semester) 3 to 9
- **EDGE 0900** Dissertation Oral Defense 0
- **EDGE 0999** Dissertation Format Review 0

**Total Credits** 100.5-106.5

1. After completing PSGE 8001 Research Apprenticeship, students must take PSGE 8002 Research Apprenticeship II until they earn a passing grade.
2. Requires student to conduct project with teacher and child.
3. Requires student to consult with teacher for eight sessions.
4. Requires school visits to interview/shadow school psychologists.
5. Students must complete a total of 650 hours of pre-internship fieldwork.
6. Requires minimum of one day per week for 15 weeks in centers or approved assessment setting.
7. Doctoral Internship includes a minimum of 1,500 hours of supervised fieldwork (full time for one year or part time over two years); must meet CDSPP Internship Guidelines. Doctoral internship courses are offered as both 1.5 and 3 credits, but 3 credits each of PSGE 7490 Doctoral Internship in School Psychology I and PSGE 7492 Doctoral Internship in School Psychology II must be completed.
8. Requires a minimum of one day per week with on-site supervision for 15 weeks in an approved clinical setting.
9. Requires a minimum of 1 day per week with on-site supervision for 15 weeks in an approved school setting.
10. Requires a minimum of 150 hours of supervised fieldwork in an approved setting.

### Cognate Areas of Studies (9 credits)

Study in a cognate area (such as special education, therapeutic intervention, preschool child psychology, instructional interventions, or a bilingual specialty area), designed in consultation with the student’s adviser, is required. The cognate is designed to provide advanced study in an area of student interest and need.

Students who enter the Fordham School Psychology Doctoral Program without prior completion of a relevant master’s degree must earn a master’s degree (MSE) en route to the doctorate. Typically this becomes the student’s cognate or specialty area; one or two additional courses may be required to earn the MSE. There are four available MSE programs within the School Psychology Program:

- Psychology of Bilingual Students (p. 941)
- Therapeutic Interventions (p. 946)
- Preschool Child Psychology (p. 940)
- Educational Evaluation and Intervention (p. 939)
Additional Notes

Doctoral students who completed PSGE 0810 Adv Cert/Professional Practice in School Psychology Comprehensive Assessment as part of the Fordham advanced certificate program do not need to retake this comprehensive exam.

Students who entered the Fordham School Psychology Doctoral Program as certified school psychologists may be exempted from some of the practice-related coursework. Entering students meet with their faculty advisers to review prior relevant coursework and experiences and to identify possible exemptions. The student is responsible for following GSE exemption procedures. If the exemptions are approved, the student is waived from the specific Fordham course requirement and guided to appropriate advanced-level courses to enhance professional skills and meet the requirement for completing at least 60 graduate-level credits at Fordham. Advanced-level students who are exempt from all of the courses in one of the three professional tracks (consultation, counseling, assessment) must take at least one advanced-level class in that area.

Completion Requirements

Students are admitted to the doctoral program on a provisional basis, and their progress is monitored through the matriculation review process and through periodic review by their mentor, adviser, program director, chairperson, and division faculty in dissertation seminar. Students apply for permanent matriculation once they complete 12 to 15 credits and PSGE 7900 Proseminar in Psychological and Educational Services.

Acceptance into the program carries with it the responsibility to uphold the published ethical standards of the American Psychological Association and the National Association of School Psychologists. Violation of ethical standards may result in termination from the program. The program is committed to fostering and maintaining a learning environment in which all members of the community feel valued and respected. The program reserves the right to review the progress of students and to terminate students from the program on the basis of inability to meet academic, personal, or professional standards.

To complete the Ph.D. in school psychology program, students must:

• complete a pre-doctoral internship consistent with internship guidelines of the Council of Directors of School Psychology Programs;
• complete the prescribed program of study, including a minimum of 99 credits beyond the baccalaureate. Additional courses may be required based on academic and experiential background. A minimum of 60 graduate credits in school psychology or a collateral field must be taken at Fordham University;
• maintain a minimum overall graduate grade point average of 3.5 (B+ or better);
• complete a two-semester doctoral proseminar (PSGE 7900 Proseminar in Psychological and Educational Services). Students register once for the proseminar in the fall of their first semester. The course starts in September and runs through the end of the spring semester of that academic year;
• complete a one-year doctoral residency seminar (minimum of two consecutive semesters), including participation in the PSGE 8001 Research Apprenticeship (0 credits), which includes seminars, as well as a research apprenticeship under the supervision of a member of the faculty;
• complete comprehensive assessments covering the psychology core, research core, and professional practice;
• complete the three-credit PSGE 8999 Dissertation Seminar in Psychological and Educational Services, including the preparation and oral defense of an original dissertation proposal under the direction of a mentor and committee of faculty;
• develop and defend in an oral examination an original dissertation in the area of school psychology; and
• complete all the requirements for the degree within eight years of initial registration in the program.

Students may be terminated from the program if they fail to complete any of these requirements.

School Psychology Bilingual Extension, Advanced Certificate

Overview

15 credits
NYSED 40394/40395

This program is a bilingual extension for certified school psychologists.

Admissions

Applicants seeking admission to the Bilingual Extension program for Certified School Psychologists have to fulfill the following prerequisites for the program:

• one of the following:
  • proof of New York state certification as a school psychologist (provisional or permanent);
  • proof of National Certification—School Psychology (NCSP);
  • proof of certification as a school psychologist, having earned certification from a NASP-approved or APA-university-accredited program;
  • proof of language competence (evidence of passing score on the NYS BEA)
• GPA of 3.2 or better in graduate studies leading to certification
• proof of completion of the Child Abuse Prevention/Reporting Workshop and the Violence Prevention Workshop (these workshops can be taken at Fordham concurrently with other coursework)
• competency in both English and a second language through:
  a. a license as a bilingual teacher; or
  b. a successful rating on a test of dual language proficiency (for example, New York state Education Department Language Proficiency Examination)

School Psychology, Advanced Certificate

Overview

66 credits
NYSED 14379

The Fordham Graduate School of Education offers two Advanced Certificate (formerly Professional Diploma) programs in school psychology. Both programs lead to certification as a school psychologist. One of these programs, the bilingual Advanced Certificate program, leads specifically to a school psychology certificate with a bilingual extension.

Both Advanced Certificate programs prepare students to serve as practicing school psychologists. Beginning with a foundation in undergraduate psychology coursework, the student completes a minimum of 66 graduate credits of academic study, including one year of supervised internship. The student is then awarded the Advanced Certificate. Students who complete the program successfully are eligible to apply for National Certification as a School Psychologist and obtain passing scores on the national certification exam for National Certification as a School Psychologist.

Acceptance into the program carries with it the responsibility to uphold the published ethical standards of the American Psychological Association. Violation of ethical standards may result in termination from the program. The program is committed to fostering and maintaining a learning environment in which all members of the community feel valued and respected. The program reserves the right to review the progress of students and to terminate students from the program on the basis of inability to meet academic, personal, or professional standards. Students may be terminated from the program if they fail to complete any of these requirements.

Admissions

Admission Requirements

Applicants seeking admission to one of the Advanced Certificate (formerly Professional Diploma) programs in school psychology must meet the general requirements for admission to graduate study in the Graduate School of Education and the following program-specific criteria:

- Possess a baccalaureate or a master’s degree from an accredited college or university with a suitable foundation in the behavioral sciences, including successful completion of courses or their equivalent in the following areas, at either the undergraduate or graduate level: general psychology, child/developmental psychology, educational psychology, abnormal psychology, and psychology of personality. Applicants who lack one or more of these prerequisites may be admitted to the program; however, all but two prerequisites must be completed prior to taking any program coursework. These two prerequisites may be taken concurrently with program coursework. It is preferred that missing prerequisites be taken at Fordham.
- Choose to take and pass a minimum competency examination in psychological and educational measurement. (Students who do not meet the criterion level or choose not to take the exam will be required to enroll in PSGE 6702 Fundamentals of Educational and Psychological Measurement during their first semester at Fordham).
- Have academic and professional goals consistent with the objectives and purposes of the program.
- Show evidence of a high degree of emotional stability, as well as personal and social maturity as indicated by both the student’s record and by an interview with school psychology faculty.

Completion Requirements

To complete an Advanced Certificate in school psychology or bilingual school psychology, students must

- complete the prescribed program of study, including a minimum of 66 credits beyond the baccalaureate degree, with a minimum of 30 graduate credits taken at Fordham with the approval of an adviser (credit for previous graduate work is granted depending on its relation to the program);
- maintain a minimum overall graduate grade point average of 3.25 (between B and B+);
- successfully complete an end-of-program comprehensive assessment; and
- successfully complete any required related practica or field experiences.

Consistent with accreditation guidelines of the National Association of School Psychologists (NASP), students earning an Advanced Certificate in School Psychology at Fordham University must take the National Certification in school psychology Exam and request that their scores be submitted to the program director prior to graduation. Although a passing score on the test is not required for graduation, students are encouraged but not required to seek national certification. Because the Fordham school psychology program is fully approved by NASP, students who successfully complete the program and obtain passing scores on the national certification exam are eligible for National Certification as a School Psychologist.
• Have earned a minimum undergraduate grade point average of 3.0 (B or better) or a minimum graduate grade point average of 3.5 (B+ or better).
• Provide two letters of reference.
• Demonstrate satisfactory command of oral and written English.
• Provide proof of immunization against measles, mumps, meningitis, and rubella.

Applicants for the bilingual program must also demonstrate competency in both English and a second language through: a license as a bilingual teacher; or a successful rating on a test of dual language proficiency (for example, New York state Education Department Language Proficiency Examination).

Total Credits 66

1 Requires a minimum of 1 day per week with onsite supervision for 15 weeks in an approved assessment setting.
2 Internship includes one full academic year or a minimum of 1500 hours of supervised fieldwork (full time for one year or part time over two years).
3 Requires a minimum of 1 day per week with onsite supervision for 15 weeks in an approved clinical setting.
4 Requires a minimum of 1 day per week with onsite supervision for 15 weeks in an approved school setting.

Therapeutic Interventions (M.S.E.)

39 credits

NYSED 21374

This program focuses on the scientific study of the psychological growth and development of individuals from kindergarten through early adulthood. It includes instruction in cognitive, emotional, and personality development; empirically based testing and assessment; consultation and intervention/therapy methods for children and adolescents; data-based decision-making; research on child and adolescent therapeutic intervention; and supervised fieldwork in school settings.

Students who are admitted to the Ph.D. program in school psychology (p. 942), the Advanced Certificate (formerly Professional Diploma) program in school psychology, or to the Advanced Certificate (formerly Professional Diploma) program in bilingual school psychology, and who do not have a relevant master’s degree, must complete a master’s degree (M.S.E.) while matriculated in their programs in order to be eligible for permanent professional New York state certification as a school psychologist or school psychologist with a bilingual extension.

These M.S.E. programs are designed to provide specialized studies in areas that complement the practice of school psychology. These are “captured” programs that overlap with the school psychology Advanced Certificate and doctoral programs.

Note: These master’s degree programs or specialization areas do not in and of themselves lead to eligibility as a school psychologist or bilingual school psychologist. Students must complete the Advanced Certificate in School Psychology, Advanced Certificate in Bilingual School Psychology, or Ph.D. in School Psychology (p. 942) to meet New York state’s requirements for eligibility as a certified school psychologist.

Completion Requirements

To complete the M.S.E., students must
• complete the prescribed program of study, including the four courses (12 credits) that do not overlap with the advanced certificate or bilingual advanced certificate programs prior to or concurrently with completing the advanced certificate or Ph.D.;
• maintain a minimum overall graduate grade point average of 3.25 (B or better); and
• complete an end-of-program comprehensive assessment.

Admissions

Admission to one of the School Psychology Program's M.S.E. programs is limited to students already admitted to the Ph.D. program in school psychology (p. 942), the Advanced Certificate (formerly Professional Diploma) program in school psychology, or the Advanced Certificate (formerly Professional Diploma) program in bilingual school psychology. Admission to and enrollment in one of these programs is sufficient for admission to a master's program.

Students in the Advanced Certificate program in bilingual school psychology who lack a master's degree must complete the master's in the psychology of bilingual students in order to be eligible for the New York state bilingual certification extension.

To apply, students need to complete an interprogram application form, which is available from the division or deans’ offices.

1 Usually taken in the first semester of the internship or during externship. An intervention project is required.
2 Requires a minimum of 1 day per week with onsite supervision for 15 weeks in an approved clinical setting.
GRADUATE SCHOOL OF RELIGION AND RELIGIOUS EDUCATION

The Graduate School of Religion and Religious Education (GRE) is a global community of teacher-scholar-practitioners that passionately educates for solidarity, service, and justice. Drawing on its Jesuit and Catholic traditions, GRE prepares students of diverse religions and spiritualities to put their faith into action. On-campus and online programs include master’s degrees in pastoral mental health counseling, Christian spirituality, pastoral studies, religious education, and pastoral care; a Ph.D. in religious education; and a Doctor of Ministry degree. Advanced certificate programs include Christian spirituality, faith formation, and spiritual direction.

About the GRE Bulletin

The information in the GRE bulletin serves as a roadmap for the academic, pastoral, spiritual, and professional education of our students. It provides an overview of the school’s historical roots and educational philosophy, and a guide to academic policies and procedures, as well as a prospectus of the degree and certificate programs. It contains instructions, resources, forms, surveys, sample assignments, and schedules that will allow you to navigate through your experience at Fordham University more effectively.

For all general information regarding the full range of University-wide student services, University regulations and code of conduct, student disciplinary procedures, and policies on sexual harassment, refer to the Fordham University Student Handbook.

Since the information in the bulletin undergoes periodic revisions, make sure to check this page to access the most up-to-date information. Your faculty adviser or the assistant dean will be happy to assist you, if you have any questions or concerns.

Fordham’s Religious Tradition

Fordham University was established under Catholic auspices and has benefited from the service of members of the Society of Jesus, a religious order of men who include among their apostolates that of higher education.

Fordham’s Catholic and Jesuit origins and traditions have proven valuable as a source of distinctiveness and strength. Consequently, these traditions, religious ideas, perspectives, and values hold a central place in the curriculum. Theology is an important subject requiring serious intellectual study. All students, regardless of their personal beliefs, are encouraged to join seminars and discussions of religious issues and to participate in religious services and activities.

A loving and respectful openness to people of all faiths is an integral part of Fordham’s stance, as it should be in any university. The very nature of religious belief requires free, un-coerced consent, just as the nature of a university requires a respect for evidence, investigation, reason, and enlightened assent.

The Jesuit Approach to Education

Core Values and Characteristics

Since founding their first school in 1548, the Jesuits have believed that a high-quality education is a path to a meaningful life of leadership and service. They have understood that combining the liberal arts, the natural and social sciences, the performing arts, and other branches of knowledge is a powerful means to develop leaders who influence and transform society.

The Jesuits adapted the best educational models available while developing their own, a methodology that has succeeded in a variety of cultures because it adapts to the context of the learner.

Education in the Jesuit tradition is a call to human excellence. It develops the whole person, from intellect and imagination to emotions and conscience, and approaches academic subjects holistically, exploring the connections among facts, questions, insights, conclusions, problems, and solutions. Students learn each subject’s implications for what it means to be a human being and what we may contribute to the future well-being of the world.

Jesuit education also examines the history of injustices, often subtly embedded within systems and cultures, while also generating hope so that students feel called to address significant world problems with courage, commitment, and good faith.

Academic Programs

GRE offers Doctoral, Master’s, and Certificate programs both on campus and online. Students pursuing an on-campus degree or certificate may take online courses with their academic advisor’s approval. Conversely,
students pursuing an online degree or certificate may take on-campus courses with their academic advisor's approval.

**Master’s Programs**
- Christian Spirituality (M.A.) (p. 971)
- Pastoral Care (M.A.) (p. 974)
- Pastoral Mental Health Counseling (M.A.) (p. 975)
- Pastoral Studies (M.A.) (p. 983)
- Religious Education (M.A.) (p. 984)

**Doctoral Programs**
- Ministry (D.Min.) (p. 961)
- Religious Education (Ph.D.) (p. 966)

**Advanced Certificate Programs**
- Adult Faith Formation (Adv Cert) (p. 949)
- Christian Spirituality (Adv Cert) (p. 949)
- Spiritual Direction (Adv Cert) (p. 949)
- Supervision (Adv Cert) (p. 950)

**Advanced Certificate Programs**
- Adult Faith Formation (Adv Cert) (p. 949)
- Christian Spirituality (Adv Cert) (p. 949)
- Spiritual Direction (Adv Cert) (p. 949)
- Supervision (Adv Cert) (p. 950)

**Christian Spirituality (Adv Cert)**
This program is offered online or on campus.

The advanced certificate in Christian spirituality is for those who wish to deepen their understanding of Christian spirituality. Students may complete the program for faith formation, for personal enrichment, or to aid their ministry work in houses of worship.

The certificate can also serve as an introduction to our Master of Arts (M.A.) in Christian spirituality program or our programs in religious education, pastoral mental health counseling, and pastoral ministry. Successful completion of the certificate program will grant you admission to the Master of Arts (M.A.) in Christian spirituality program.

**Admissions**
Admission to the advanced certificate in Christian spirituality program is open to all who have earned a bachelor’s degree.

**Requirements**

1. A spirituality Elective is any course with the SPGR subject code numbered 6000–7999. A list of these courses can be found on the course listing page.

2. An elective is any class within GRE—or any graduate-level class at Fordham University or in the New York Theological Consortium approved by your academic advisor. A list of GRE courses can be found on our course listing page.

**Spiritual Direction (Adv Cert)**
This program is offered on campus.

The advanced certificate in spiritual direction sequence is designed to identify the participant’s potential for becoming a spiritual director, to assist the participant in discerning a call to this ministry, to formulate a model of spiritual direction and chaplaincy, and to develop the specific skills required to serve as a spiritual director. Graduates of the program serve as high school and college campus ministers, retreat directors, and spiritual directors.

**Adult Faith Formation (Adv Cert)**
This program is offered online or on campus.

The advanced certificate in adult faith formation offers teachers, parish religious educators, and part-time or volunteer parish ministers an opportunity to further prepare themselves for parish service and/or religious education.

The competencies outlined by the United States Bishops (USCCB) in their document Co-Workers in the Vineyard of the Lord are included in the courses offered in the Faith Formation certificate program.

**Admissions**
Anyone with a B.A. or B.S. undergraduate degree may apply.

Admissions

All those looking to apply must have or submit:

- a Master of Arts degree (M.A.) in theology, in ministry, or in a related field with nine graduate credits in fundamental theology and sacred scripture (which may be taken during coursework);
- evidence of at least one year of experience in ministry or under spiritual direction;
- a letter of recommendation from their superior or spiritual director.

Participation in monthly spiritual direction with a credentialed spiritual director for at least one year is normally a prerequisite for admission to this program in the Study of Spiritual Direction and for admission into the Practicum. Students are expected to continue in spiritual direction throughout their course of studies. Resources regarding spiritual direction can be found at Fordham’s Campus Ministry website. You might also wish to consult the resources offered by Spiritual Directors International, e.g., “Questions to Ask a Prospective Spiritual Director.”

Candidates for this program may be asked to participate in an interview with a member of the spirituality area before being admitted to the program.

- SPGR 6742 The Ignatian Way
- SPGR 6792 Contemporary Christian Spirituality

Total Credits 18

Spiritual Direction Practicum

The decision to continue with the practicum is based on the student’s performance in the initial courses and on interviews with the practicum directors during the application process for the practicum sequence. Students not admitted to the practicum may decide to resign from the program or ask to be considered for another certificate program. The practicum is a yearlong experience; students gather one Saturday per month from September to May and also complete field placements and phone/hybrid meetings between campus visits.

At the end of the supervised practicum, the supervisor works with the student to assess any particular needs for developing the necessary knowledge base in theology, psychology, or scripture based on the intern director’s experience working with directees.

Participation in monthly spiritual direction with a credentialed spiritual director for at least one year is normally a prerequisite for admission to this program in the Study of Spiritual Direction and for admission into the Practicum. Students are expected to continue in spiritual direction throughout their course of studies. Resources regarding spiritual direction can be found at Fordham’s Campus Ministry website. You might also wish to consult the resources offered by Spiritual Directors International, e.g., “Questions to Ask a Prospective Spiritual Director.”

Students are required to complete the following prerequisite courses before starting the yearlong practicum sequence that begins every fall semester only:

- SPGR 7870 Spiritual Direction: Theology and Practice
- SPGR 6830 Discernment in the Christian Tradition
- PCGR 6440 Pastoral Counseling Skills

Students should enroll as soon as registration opens, since these courses are in demand across multiple degree programs.

As noted, admission to the practicum sequence will be based on a student’s satisfactory completion of the prerequisite courses and successful interviews with the practicum directors.

The practicum sequence includes the following courses:

- SPGR 7740 Spiritual Direction Practicum I
- SPGR 7741 Spiritual Direction Practicum II

(Admission to Practicum II is conditional upon the judgment of the Practicum I instructor.)

Students should apply for admission to Spiritual Direction Practicum 1 in the spring semester prior to their intended start date. Students who are not admitted to the practicum sequence may either withdraw from the program or seek admission to another certificate program. Admission to Practicum 2 is conditional, based upon the decision of the Practicum 1 instructor. Contact the Assistant Dean for any questions and further assistance regarding the application process.

Supervision (Adv Cert) Overview

Fordham’s advanced certificate in supervision offers experienced spiritual directors formation in the art and practice of supervision, along with a process for discerning a call to supervision ministry. Training features both cognitive and applied learning and includes resource gathering, modeling, discerning, practicing, demonstrating, case preparation, mentoring, reflecting, researching, writing, and supervised fieldwork.

Graduates of this program will be prepared to offer supervision across ministerial settings and collaborate with others in the formation and ongoing care of spiritual directors and other pastoral ministers. Career objectives for the advanced certificate in supervision include enhancing skills for current spiritual direction ministries and increasing opportunity for work as supervisors in spiritual direction formation programs, retreat houses, campus ministry programs, schools, and parish settings. There is a strong demand for such supervisors in the United States and Canada, as well as overseas.

Updated: 07-27-2020
Admissions
1. A bachelor’s degree
2. Completed application
3. Graduation from a substantial spiritual direction formation program
4. Three to five years of supervised spiritual direction practice
5. Commitment to receiving ongoing spiritual direction/supervision
6. Letters of recommendation from current spiritual director and supervisor
7. Interview

SPGR 6910 Introduction to Supervision and SPGR 6920 Supervision Capstone Intensive are taught as in-person summer intensive courses.

SPGR 6914 Practicum in Informal Supervision, SPGR 6916 Practicum in Group Supervision, and SPGR 6920 Supervision Capstone Intensive are taught as 8 week online courses.

Course Listings
Pastoral Counseling (PCGR)

PCGR 6310. Human Growth and Development. (3 Credits)
This course will explore the development from birth and adolescence through the tasks and crises of middle and later life. Stage theories, cognitive, social and emotional development will be the focus of this course. Special consideration will be given to spiritual life issues throughout the development process.

PCGR 6380. Theology of Pastoral Counseling and Spiritual Care. (3 Credits)
This course addresses contemporary psychological and spiritual issues in the field of pastoral care and counseling, including addiction, trauma, and anxiety, and proposes a theological method for reflecting on them.
Attribute: CSGE.

PCGR 6382. Social and Cultural Foundations of Pastoral Counseling. (3 Credits)
This course explores the social and cultural foundations of counseling twofold: The foundations of mental health counseling and the foundations of multicultural counseling. Specific focus is given to counseling individuals, couples, and families from diverse groups and populations.

PCGR 6384. Professional Ethics in Pastoral Counseling. (3 Credits)
An exploration of critical issues in the ethical practice of counseling and psychotherapy, this course addresses the roles and responsibilities of the professional counselor. Using case studies and small group work, students will explore potential ethical conflicts and methods of ethical reasoning, as students develop skills to work through ethical conflicts in the counseling setting.

PCGR 6386. Pastoral Counseling Theory. (3 Credits)
This course explores the major theories of counseling, including psychodynamic, cognitive, and family systems. Special consideration is given to the application of theoretical models to clinical practice, and by extension their application to pastoral and spiritual care.

PCGR 6390. Psychopathology & Diagnosis. (3 Credits)
The course will introduce students to the basics of psychopathology and psychological diagnosis for use in clinical and pastoral work. This course is designed to help students cultivate the ability to think critically and creatively, so that they can work from a diagnostic standpoint that is human, flexible, empathetic, and nonjudgmental, with a focus on the real person one meets in the consulting room or ministry setting. Within this framework, the course will cover interviewing and assessment skills, DSM-5 categories, ethical considerations, character/personality issues, and pastoral assessment. Case studies will be used to practice the art of diagnostic formulation, with an eye toward treatment planning and case formulation.

PCGR 6410. Psychology and Religion/Spirituality. (3 Credits)
This course explores spirituality, faith, and religious experience from a psychodynamic viewpoint. The theories of Freud, Jung, Winnicott, and contemporary relational writers are engaged in order to explore how our psychology affects our religious lives and vice versa. The class addresses issues of fantasy, God images, play, religion and the body, and “healthy” and “unhealthy” uses of religion. Using text, experiential exercises, and critical reflection, we will engage our own religious history and traditions, and consider what it means to be a fully alive human being.
Attribute: CSGE.

PCGR 6420. Marriage/Family Therapy. (3 Credits)
A systemic approach to family treatment. A survey of the major contributors to the field, using videotape demonstrations of family sessions. Genograms will be used to explore family-of-origin issues.

PCGR 6440. Pastoral Counseling Skills. (3 Credits)
This course provides an introduction to the basic skills of effective helping. A focus on presence, empathy, compassion, and self-awareness forms the foundation for learning specific skills directed toward fostering exploration, insight, and action in the helping relationship. The course includes both discussion and small-group live practice, and is suitable for any student who works closely with people in a helping capacity.

PCGR 6510. Advanced Life Span Issues and Career Counseling. (3 Credits)
This course explores the advanced lifespan issues of adulthood through the lens of clinical practice and pastoral/spiritual care. Specific focus will be given to issues of career, vocation, and social justice advocacy.
PCGR 7330. Assessment and Appraisal of Individuals, Couples, and Families. (3 Credits)
This course provides students with an overview of the assessment and appraisal process as it relates to Masters-level counseling students seeking licensure as a professional counselor. Students will be introduced to the foundational history of assessment, overall assessment principles, and the properties of reliability and validity as they relate to the validation of psychological test instruments. Both standardized and nonstandardized assessment instruments will be reviewed with attention paid to how they can be integrated successfully into counseling sessions. Ethical and legal considerations will be addressed, and the use of assessments with diverse populations will be discussed.

PCGR 7410. Research Methods in Pastoral Counseling. (3 Credits)
This course will be a review of research in pastoral counseling. It will introduce basic concepts and methods of quantitative and qualitative research, consider ways of studying change as a result of counseling interventions and programs, and familiarize students with basic skills in evaluating research literature.

PCGR 7420. Death, Dying, and Bereavement. (3 Credits)
This course will focus on personal experiences with death and loss; the theological perspectives of major world religions on death and grief; myths about and components of grief; meaning making; issues facing the terminally ill; appropriate care for the bereaved in differing situations; and our own self-care as pastoral care workers and pastoral mental health counselors.

PCGR 7422. Group Process: Theory and Techniques. (3 Credits)
This course emphasizes a science-practitioner model of group counseling that includes an experiential and didactic introduction to the group process, theory, and techniques. The experiential component of the group process will include modeling facilitation, structured exercises, and debriefing of immediate experiences. The didactic component of the course will include discussions of readings, lectures, videos, and presentations. This course is not available for audit.

PCGR 7450. Trauma: Counseling and Ministry Issues. (3 Credits)
An introduction to trauma theory and care issues to enhance the practices of counseling, pastoral care, and ministry. This course includes neuro-psychological, psychodynamic, and relational approaches to trauma-informed work, integrates theological and spiritual perspectives.

PCGR 7471. Clinical Instruction and Integration Process I. (3 Credits)
This course is designed to accompany the Field Placement for students in the Clinical Pastoral Counseling 60-Credit Program. Students will engage current approaches to counseling and psychotherapy in dialogue with their own clinical work. Classes will focus on the presentation of students' clinical work in connection with relevant topics in the clinical literature, addressing such matters as transference and countertransference, addictions treatment, spiritual issues, and working with trauma. The aim of the course is to integrate previous classroom work and clinical experience, so that students are prepared to begin work as professional counselors and therapists.

PCGR 7472. Clinical Instruction and Integration Process II. (3 Credits)
This continuation course is designed to accompany the field placement for students in the clinical pastoral counseling 60 Credit Program. 

Prerequisite: PCGR 7471.

PCGR 8999. Tutorial. (0 to 6 Credits)

Pastoral Ministry (PMGR)

PMGR 6510. Theology of Ministry. (3 Credits)
This course treats ministry as a culturally complex and theologically significant practice. Starting from contemporary concerns, we ask where ministry comes from, what it can be today, and where it might go. We focus on developing responsible and relevant accounts of ministry that enrich practice today.

PMGR 6612. Ministry with Latinxs. (3 Credits)
This course presents a comprehensive introduction to the principal issues related to U.S. Latinx Christians from an ecumenical perspective. The course is divided into three parts: The Landscape of Latinxs in the U.S., Latinxs and the Churches, and Hispanic Ministries. Among the topics covered are: the history of the principal Latinx groups in the U.S. (Mexicans, Puerto Ricans, Cubans, Dominicans, and Central Americans), the churches’ responses to Latinxs, parish ministry, youth ministry, the sacraments, popular religiosity, and an introduction to U.S. Latinx/Hispanic theology.

PMGR 6613. U.S. Latinx Theology. (3 Credits)
This course presents an introduction to the theological output of U.S. Latinx theologians from an ecumenical perspective. We begin with an overview of U.S. Latinx theology as a contextual theology and then proceed topically, looking at U.S. Latinx Catholic theology, U.S. Latina feminist theology, and U.S. Latinx Protestant theology.

PMGR 6616. Latinx Preaching. (3 Credits)
A practicum in preaching to Latinx congregations with review of the pertinent literature on different preaching styles and Latinx audiences. Facility in Spanish required.

PMGR 6617. Latinx Spirituality. (3 Credits)
This course presents an introduction to the way Latinos and Latinas live out their relationship or faith in God or spirituality. While the focus of the course will be on Latinx Christian spirituality—both Catholic and Protestant—attention will also be paid to non-Christian Latinx spiritualities, especially Santería. We begin with an overview of the variety of spiritualities practiced by Latinos and Latinas and then proceed topically, looking at U.S. Latinx Catholic theology, U.S. Latina feminist theology, and U.S. Latinx Protestant theology.

PMGR 6618. Hispanic Family Ministry & Catechesis. (3 Credits)
Latinxs are deeply religious, and their way of experiencing God and life is often different from that the U.S. mainstream culture. This course will study the lived reality of U.S. Hispanic families. It will challenge participants to critically reflect, analyze, and articulate in what ways family ministry and family catechesis is embodied in families and faith communities today; to explore what helps or hinders religious development within families, and the responsibility of church and society to foster growth in faith; to explore experientially based frameworks for ministering with Latinx communities; and to nuance their role as religious educators. Our conversation partners will include the writings of U.S. Hispanic theologians and religious educators.
PMGR 6650. Ethics in Pastoral Ministry. (3 Credits)
Ethics in Pastoral Ministry is an online course that addresses ethical conduct in ministry for professionals working in a supervisory or leadership capacity with emphasis on legal issues and moral decision-making. The course will focus on the formation of conscience as it relates to the self, ministry, and society. It includes case studies and the application of ethical principles to real-life situations as well as the study of theory. It is theoretical, establishing a theological basis for ethical conduct and moral decision-making, and practical, giving students skills and resources to deal with the various issues they may encounter in ministry.

PMGR 7510. Theology of Ministry. (3 Credits)
This course treats ministry as a culturally complex and theologically significant practice. Starting from contemporary concerns, we ask where ministry comes from, what it can be today, and where it might go. We focus on developing responsible and relevant accounts of ministry that enrich practice today.

PMGR 7616. Latinx Preaching. (3 Credits)
A practicum in preaching to Latinx congregations with a review of the pertinent literature on different preaching styles and Latinx audiences. Facility in Spanish required.

PMGR 7617. Latinx Spirituality. (3 Credits)
This course presents an introduction to the way Latinx live out their relationship to God or their faith in God or spirituality. While the focus of the course will be on Latinx Christian spirituality—both Catholic and Protestant—attention will also be paid to non-Christian Latinx spiritualities, especially Santería. We begin with an overview of the variety of spiritualities practiced by Latinx and then proceed topically looking at popular Catholicism, the Latinx celebration of the sacraments, Marian devotion (especially to Our Lady of Guadalupe), New Ecclesial Movements (especially the Charismatic Renewal and the Neo-Catechumenal Way), Mainline Latinx Protestant spirituality, and Latinx Pentecostalism. This course is for Doctor of Ministry students only and will require doctoral-level participation and additional research/writing elements.

PMGR 7618. Hispanic Family Ministry & Catechesis. (3 Credits)
Latinx are deeply religious, and their way of experiencing God and life is often different from that of mainstream U.S. culture. This course will study the lived reality of U.S. Hispanic families. It will challenge participants to critically reflect, analyze, and articulate in what ways family ministry and family catechesis is embodied in families and faith communities today; to explore what helps or hinders religious development within families, and the responsibility of church and society to foster growth in faith; to explore experientially based frameworks for ministering with Latinx communities; and to nuance their role as religious educators. Our conversation partners will include the writings of U.S. Hispanic theologians and religious educators. This course is available only to doctoral students.

PMGR 7650. Ethics in Pastoral Ministry. (3 Credits)
Ethics in Pastoral Ministry addresses ethical conduct in ministry for professionals working in a supervisory or leadership capacity with emphasis on moral decision-making. The course will focus on the formation of conscience as it relates to the self, ministry, and society. It includes case studies and the application of ethical principles to real-life situations as well as the study of theory. It is theoretical, establishing a theological basis for ethical conduct and moral decision-making, and practical, giving students skills and resources to deal with the various issues they may encounter in ministry.

PMGR 7688. Spec Topics: Pastoral Studies. (3 Credits)
This is a special topics course in pastoral studies. Each time the course runs it will be focused on a unique and current aspect of ministry. Please see the course book for the term in question to find a description of the course as it will run each time it is given.

PMGR 7712. Ministry with Latinxs. (3 Credits)
This course presents a comprehensive introduction to the principal issues related to U.S. Latinx Christianities from an ecumenical perspective. The course is divided into three parts: The Landscape of Latinxs in the U.S., Latinxs and the Churches, and Hispanic Ministries. Among the topics covered are: the history of the principal Latinx groups in the U.S. (Mexicans, Puerto Ricans, Cubans, Dominicans, and Central Americans), the churches’ responses to Latin@s, parish ministry, youth ministry, the sacraments, popular religiosity, and an introduction to U.S. Latinx/Hispanic theology. This course is for Doctor of Ministry students only and will require doctoral level participation and additional research/writing elements.

PMGR 7713. U.S. Latinx Theology. (3 Credits)
This course presents an introduction to the theological output of U.S. Latinx theologians from an ecumenical perspective. We begin with an overview of U.S. Latinx theology as a contextual theology. We then proceed topically, looking at U.S. Latinx Catholic theology, U.S. Latina feminist theology, and U.S. Latinx Protestant theology. This course is for Doctor of Ministry students only, and it will require doctoral-level participation and additional research/writing elements.

PMGR 8030. Capstone:Pastoral Studies (MA). (3 Credits)
The concluding capstone course for all students in the M.A. Pastoral Studies degree.

PMGR 8530. Evangelization: Faith & Culture. (3 Credits)
This course is a theological exploration that treats evangelization as an important stake in Christian tradition that involves Christian practice with practices of contemporary society. We look continually to the real-world contexts of students and to an intensive consideration of what evangelization entails in a culturally, religiously diverse world.

PMGR 8628. Pastoral and Practical Theology. (3 Credits)
This is a class about the foundations and formations of practice-minded theologies, especially as those theologies inform and enrich the practice of pastoral professionals. Fundamental questions about the relationship between religious tradition and contemporary practice are explored.

PMGR 8632. Research Seminar: Pastoral Theology and Practice. (3 Credits)
This seminar prepares D.Min. students to write their doctoral thesis. We explore some fundamental approaches to conducting research into pastorally significant experience today, so as to deepen students’ research competence and facilitate readiness for conducting ministry-relevant research. Students will generate a sound draft of a proposal for their D.Min. thesis.

PMGR 9999. ST Tutorial-Pastoral Ministry. (3 Credits)
This course is reserved for students pursuing a special research topic in Pastoral Ministry with the approval of the area faculty and Dean.

Religion (RLGR)

RLGR 0920. Writing for Grad Research I. (1 Credit)
Course will cover how to write at the graduate level in Theology, Spirituality, Pastoral Ministry, and Counseling and Religious Education. Course topics will include composition, structure, style, coherence and analysis.
RLGR 0921. Writing for Grad Research II. (1 Credit)
Continuation of RLGR 0920. Course will cover how to write at the graduate level in Theology, Spirituality, Pastoral Ministry, and Counseling and Religious Education. Course topics will include composition, structure, style, coherence and analysis.

RLGR 6010. Old Testament. (3 Credits)
An in-depth examination of the first five books of the Bible. Historical origins of these texts in ancient Israel and the continuing significance to their central theological themes of promise, law, creation, election, redemption, and liberation. Introduction to the exegetical methods of modern biblical study.

RLGR 6011. New Testament. (3 Credits)
This course will engage questions about the development of the Christian canon while reading parts of the New Testament in the context of first century Judaism.

RLGR 6018. John’s Gospel in Greek I. (3 Credits)
A close reading of the Greek text with detailed exegesis of selected passages.

RLGR 6019. John’s Gospel in Greek II. (3 Credits)
A close reading of the Greek text with detailed exegesis of selected passages.

RLGR 6024. The Prophets. (3 Credits)
A study of Old Testament prophets and prophetic books from historical, literary, and theological perspective with particular focus on the prophets’ roles and their enduring message.

RLGR 6030. Christology. (3 Credits)
This is an introductory Christology course principally from a Roman Catholic perspective. Biblical, historical, and contemporary Christology will be examined.

RLGR 6031. Theology of the Human Person. (3 Credits)
This doctoral-level course traces the variegated history of Christian understandings of the human person. It examines past and present theologies of body, soul, sin, and grace, as well as contemporary theological literature on social, environmental, and cosmic contexts as constitutive of human experience. This includes a consideration of different forms of “othering” and their intersection.

RLGR 6032. Church and Society. (3 Credits)
This course offers an intensive look at the founding and progress of the Christian Church and of the ecumenical movement’s response. While the course focuses on Catholic ecclesiology, it also covers Orthodox and Protestant perspectives on key themes such as authority, governance, and practice. Throughout the course, there is an emphasis on the critiques and perspectives offered by liberation theology and feminism. It asks the students to imagine how the Christian Church could adapt to its contemporary context in the student's ministerial or professional setting. The 7000-level course is for Ph.D. and D.Min. students only, and it requires work beyond what is required in the 6000-level course.

RLGR 6872. History of the Jesuits. (3 Credits)
This course offers an intensive look at the founding and progress of the society of Jesus. Starting with the founder, St. Ignatius of Loyola the course will progress through key documents and missionary activity up to the 21st century.

RLGR 7031. Theology of the Human Person. (3 Credits)
This doctoral-level course traces the variegated history of human understandings in the 21st century. It examines past and present theologies of body, soul, sin, and grace, as well as contemporary theological literature on social, environmental, and cosmic contexts as constitutive of human experience. This includes a consideration of different forms of “othering” and their intersection. The 7000-level course is for Ph.D. and D.Min. students only, and it requires work beyond what is required in the 6000-level course.

RLGR 6011. New Testament. (3 Credits)
This course will engage questions about the development of the Christian canon while reading parts of the New Testament in the context of first century Judaism.

RLGR 6038. Church and Society. (3 Credits)
A course reviewing the latest methods and approaches in pastoral research.

RLGR 8872. History of the Jesuits. (3 Credits)
This course offers an intensive look at the founding and progress of the society of Jesus. Starting with the founder, St. Ignatius of Loyola the course will progress through key documents and missionary activity up to the 21st century.

RLGR 8999. Independent Study. (3 Credits)
A tutorial in the area of Religion.

Religious Education (REGR)

REGR 6102. Foundations of Religious Education. (3 Credits)
This course is an examination of the various theological, philosophical, and educational models that inform the foundations of religious education. Students will examine how these models have influenced different schools, theorists, practitioners, and materials of religious education. Criteria for evaluating the adequacy of competing models will be offered.

REGR 6120. Education for Peace and Justice. (3 Credits)
This course focuses on developing a greater understanding of the social ministry of the Christian churches. After a historical survey of Christian attitudes toward peace and justice, participants will explore ways of bringing a concern for peace and justice issues into liturgy, preaching, religious education, and pastoral ministry. The course also examines how to relate Christian understandings of peace and justice to everyday work, and to civic, political, and family life.
REGR 6125. Moral Education/Develop. (3 Credits)
This course explores various aspects of moral education. The topic will be explored from various perspectives: theology, psychology, education, sociology, and the arts. It will aid those involved in religious education and pastoral ministry to make effective use of the arts in their work. Provides a framework for exploring foundational issues of morality and moral development, including how our understandings of the human person, community, and attitude toward the natural environment shape our moral outlook. Emphasis is placed on enabling religious educators and pastoral ministers to make moral formation an integral dimension of education in Christian faith.

REGR 6130. Theological Issues: Religious Education and Ministry. (3 Credits)
The course explores major Christian classical themes in contemporary theological development. Foundational concepts of revelation, scripture and tradition, Trinity, creation, Jesus the Christ, and sin and grace are examined. The practical ministerial and educational implications of these developments will be collaboratively pursued.

REGR 6140. Curriculum and Religious Education. (3 Credits)
This course is an exploration of the what, who, where, when, why, and how of curriculum design in religious education. The various philosophies, principles, and processes of curriculum formation are critically examined. The course addresses the central question and activities of curriculum designers: what educative content do we make accessible to which learners under what governing structure? This question highlights the impact the nature of content, teaching processes, the readiness of learners, and the social-political arrangements of diverse educational settings has on a religious education curriculum.

REGR 6143. Imagination: Ministry and Religious Education. (3 Credits)
This course will explore the link between the imagination, patterns of church ministry, and religious educational activity. The role and power of imagination in disclosing new life and reenvisioning our work will be examined. A central focus of the course is the critical exploration of the images, metaphors, and guiding visions underlying educational and ministerial work in churches and in our public life. Our educational and ministerial task is to create a counter-discourse to the dominant discourse of our time. Particular perspectives (religious, prophetic, feminist, artistic) will be employed as resources for enriching the imagination, fostering a counter-discourse, and cultivating imaginative activity with people.

REGR 6150. Foundations for Intercultural Ministry and Religious Education. (3 Credits)
Ministerial contexts are spaces of intercultural encounters that can serve to positively affect the practice of ministry and religious education. This special topics course will explore key pillars for understanding these encounters as revelatory moments that can be constructive for the “kin-dom” of God. Among the literature explored in this course will be theories of intercultural teaching and learning, anti-racist identity development, and cultural studies critiques, all within the context of students’ self-exploration of their own cultural identities. From this exploration, students will envision how their own ministerial praxis can be shaped to form liberating spaces for intercultural ministry and solidarity.

REGR 6170. Spirituality and Arts. (3 Credits)

REGR 6180. Religious and Educational Development of Children and Youth. (3 Credits)
This course inquires into the spiritual, moral, and educational development of children and the implications of this development for religious education. Emphasis is placed on developing a theology of childhood, and the influence of childhood faith development on adult spirituality.

REGR 6181. Family Ministry: Sp Questions. (3 Credits)
Investigation and analyses of specific problems related to family ministry. Topics will include single-parent families, families of ‘special needs’ children, ‘hurting’ families, and ministry for leadership couples and families.

REGR 6202. Youth & Young Adult Ministry. (3 Credits)
Explores the personal and communal development of youth and young adults (11-30) through church teaching and such disciplines as philosophy, psychology, and sociology, education and religious education. A comprehensive framework for nurturing the faith and spirituality of youth and young adults is presented as an organizing framework for the course.

REGR 6204. Special Questions: Youth and Young Adult Ministry. (3 Credits)
This course offers a study of identity formation, sexual development, social consciousness, the influence of popular media culture, attitudes toward authority, and Generation X and millennial spirituality. Participants will explore ways of reenvisioning religious education and pastoral ministry to respond more adequately to contemporary youth culture.

REGR 6220. Ministry & Leadership. (3 Credits)
An investigation of the basic structures of organization and principles of administration and supervision as they apply to parish and other religious education settings. Emphasis is placed on the person and the role of leadership within evolving structures of parish and various learning communities.

REGR 6311. Digital Catechesis. (3 Credits)
The Digital Catechesis course provides a new social landscape for imagining faith formation and religious education today. This new landscape integrates Pope Francis’ clarion call for the New Evangelization and the worthy potentials of the New Media, to come up with a leadership agenda that offer ways to explore and call into question traditional assumptions and understanding of both the catechetical and the technological. The course’s goal is to lead pastoral leaders to viewing digital catechesis as a vital expression of the truly catechetical in contemporary religious context.

REGR 6524. Latinx Spirituality. (3 Credits)
This course presents an introduction to the way Latinx people live out their spirituality, faith, or relationship with God. We begin with an overview of the ways Christian and non-Christian Latinx people practice their spiritualities. We then proceed topically, looking at popular Catholicism, Latino sacramentality, Marian devotion, new ecclesial movements, mainline Latino Protestant spirituality, and Pentecostalism.

REGR 6705. Religion Society & Culture. (3 Credits)
Explores various ways of thinking about how Christians and Christian faith communities can and should relate to the broader social world of which they are a part. Emphasis is placed on developing a heightened awareness of the ways religious educators and pastoral ministers can enable people to work for greater peace and justice in the world.
REGR 6999. Religious Education Final Integration Seminar. (3 Credits)
The Master of Arts program in religious education concludes with this final integration course (offered each spring). The course involves a terminal research project on a topic determined by the faculty.

REGR 7102. Foundations of Rel Educ. (3 Credits)
An examination of the various theological, philosophical, and educational models that inform the foundations of religious education. The attempt will be made to show how these models have influenced different schools, theorists, practitioners and materials of religious education. Criteria for evaluating the adequacy of competing models will be offered. Additional Doctoral readings and assignments per instructor.

REGR 7120. Education Peace/Justice. (3 Credits)
This course is for PHD Students only. Focuses on developing a greater understanding of the social ministry of the Christian churches. After a historical survey of Christian attitudes toward peace and justice, participants will explore ways of bringing a concern for peace and justice issues into liturgy, preaching, religious education and pastoral ministry. The course also examines how to relate Christian understandings of peace and justice to everyday work, and civic, political and family life.

REGR 7130. Theo Issues:Religious Ed & Min. (3 Credits)
This course is for PHD Students only. The course explores major Christian classical themes in contemporary theological development. Foundational concepts of revelation, scripture and tradition, Trinity, creation, Jesus the Christ, and sin and grace are examined. The practical ministerial and educational implications of these developments will be collaboratively pursued.

REGR 7140. Curriculum and Religious Education. (3 Credits)
This course is for Ph.D. students only.

REGR 7150. Foundations for Intercultural Ministry and Religious Education. (3 Credits)
Ministerial contexts are spaces of intercultural encounters that can serve to positively affect the practice of ministry and religious education. This special topics course will explore key pillars for understanding these encounters as revelatory moments that can be constructive for the "kin-dom" of God. Among the literature explored in this course will be theories of intercultural teaching and learning, anti-racist identity development, and cultural studies critiques, all within the context of students' self-exploration of their own cultural identities. From this exploration, students will envision how their own ministerial praxis can be shaped to form liberating spaces for intercultural ministry and solidarity. This course is open only to doctoral students.

REGR 7170. Spirituality and Arts. (3 Credits)
This course is for PHD Students Only.

REGR 7180. Religious and Educational Development of Children and Youth. (3 Credits)
This course inquires into the spiritual, moral, and educational development of children and the implications of this development for religious education. Emphasis is placed on developing a theology of childhood, and the influence of childhood faith development on adult spirituality. Additional doctoral readings and assignments per instructor.

REGR 7202. Youth & Young Adult Ministry. (3 Credits)
Explores the personal and communal development of youth and young adults (11-30) through church teaching and such disciplines as philosophy, psychology, and sociology, education and religious education. A comprehensive framework for nurturing the faith and spirituality of youth and young adults is presented as an organizing framework for the course.

REGR 7204. Spec Ques:Youth&Young Adul Min. (3 Credits)
This course is for PHD Students only. Offers a study of identity formation, sexual development, social consciousness, the influence of popular media culture, attitudes toward authority, and Generation X and Millennial Generation spirituality. Participants will explore ways of re-envisioning religious education and pastoral ministry to respond more adequately to contemporary youth culture.

REGR 7230. Spec Issues in Religious Ed. (3 Credits)
This course is an in-depth study of three key issues in the field of religious education. Its focus is the systematic treatment of: 1. An exploration of teacher-learning as the practice of revelation; 2. The nature, direction and scope of religious development; and, 3. The meaning of professional and its link to the professional identity of the religious educator. The three themes will be examined within the context of the current challenges facing church and culture.

REGR 7311. Digital Catechesis. (3 Credits)
Doctoral Students Only The Digital Catechesis course provides a new social landscape for imagining faith formation and religious education today. This new landscape integrates Pope Francis' clarion call for the New Evangelization and the worthy potentials of the New Media, to come up with a leadership agenda that offer ways to explore and call into question traditional assumptions and understanding of both the catechetical and the technological. The course's goal is to lead pastoral leaders to viewing digital catechesis as a vital expression of the truly catechetical in contemporary religious context.

REGR 7705. Religion Society & Culture. (3 Credits)
Explores various ways of thinking about how Christians and Christian faith communities can and should relate to the broader social world of which they are a part. Emphasis is placed on developing a heightened awareness of the ways religious educators and pastoral ministers can enable people to work for greater peace and justice in the world. See Doctoral requirements on syllabus.

REGR 7910. Special Topics: Religious Education. (3 Credits)
See syllabus online for details of this special elective offering.

REGR 8102. Historical and Philosophical Foundations of Religious Education. (3 Credits)
This course—for doctoral students only—is an examination of the various theological, philosophical, and educational models that inform the foundations of religious education. The attempt will be made to show how these models have influenced different schools, theorists, practitioners, and materials of religious education. Criteria for evaluating the adequacy of competing models will be offered.

REGR 8120. Education for Peace and Justice. (3 Credits)
(Doctoral Students Only) Focuses on developing a greater understanding of the social ministry of the Christian churches. After a historical survey of Christian attitudes toward peace and justice, participants will explore ways of bringing a concern for peace and justice issues into liturgy, preaching, religious education and pastoral ministry. The course also examines how to relate Christian understandings of peace and justice to everyday work, and civic, political and family life.
REGR 8125. Moral Education/Develop. (3 Credits)

“Doctoral Students Only” This course explores various aspects of moral education. The topic will be explored from various perspectives: theology, psychology, education, sociology, and the arts. It will aid those involved in religious education and pastoral ministry to make effective use of the arts in their work. Provides a framework for exploring foundational issues of morality and moral development, including how our understandings of the human person, community, and attitude toward the natural environment shape our moral outlook. Emphasis is placed on enabling religious educators and pastoral ministers to make moral formation an integral dimension of education in Christian faith.

REGR 8130. Theological Issues: Religious Education and Ministry. (3 Credits)

“Doctoral Students Only” The course explores major Christian classical themes in contemporary theological development. Foundational concepts of revelation, scripture and tradition, Trinity, creation, Jesus the Christ, and sin and grace are examined. The practical ministerial and educational implications of these developments will be collaboratively pursued.

REGR 8140. Curriculum and Religious Education. (3 Credits)

(Doctoral Students only) The course is an exploration of the what, where, when, why, and how of curriculum design in religious education. The various philosophies, principles and processes of curriculum formation are critically examined. It addresses the central question and activities of curriculum designers, namely, what educative content do we make accessible to what learners under what governing structure? This highlights the impact on the religious education curriculum of the nature of content, the teaching processes, the readiness of learners, and the social-political arrangements in the diverse educational settings.

REGR 8143. Imagination: Ministry & Rel Ed. (3 Credits)

“Doctoral Students only” This course will explore the link between the imagination, patterns of church ministry and religious educational activity. The role and power of imagination in disclosing new life and re-visioning our work will be examined. A central focus is the critical exploration of the images, metaphors and guiding visions underlying educational and ministerial work in churches and our public life. Our educational and ministerial task is to create a counter-discourse to the dominant discourse of our time. Particular perspectives (the religious, prophetic, feminist, artistic) will be employed as resources for enriching the imagination, fostering a counter discourse and cultivating imaginative activity with people.

REGR 8180. The Religious and Educational Development of Children and Youth. (3 Credits)

This course—for doctoral students only—inquires into the spiritual, moral, and educational development of children, and the implications of this development for religious education. Emphasis is placed on developing a theology of childhood, and the influence of childhood faith development on adult spirituality.

REGR 8188. Seminar: Religious Education. (3 Credits)

Reserved for special seminar topics in religious education.

REGR 8202. Youth & Young Adult Ministry. (3 Credits)

“Doctoral Students only” Explores the personal and communal development of youth and young adults (11-30) through church teaching and such disciplines as philosophy, psychology, and sociology, education and religious education. A comprehensive framework for nurturing the faith and spirituality of youth and young adults is presented as an organizing framework for the course.

REGR 8204. Special Questions: Youth and Young Adult Ministry. (3 Credits)

This course—for doctoral students only—offers a study of identity formation, sexual development, social consciousness, the influence of popular media culture, attitudes toward authority, and Generation X and millennial generation spirituality. Participants will explore ways of re-envisioning religious education and pastoral ministry to respond more adequately to contemporary youth culture.

REGR 8230. Spec Issues in Religious Ed. (3 Credits)

“Doctoral Students Only” This course is an in-depth study of three key issues in the field of religious education. Its focus is the systematic treatment of: 1. An exploration of teacher-learning as the practice of revelation; 2. The nature, direction and scope of religious development; and, 3. The meaning of professional and its link to the professional identity of the religious educator. The three themes will be examined within the context of the current challenges facing church and culture.

REGR 8401. Research Methods. (3 Credits)

Research Methods course is for students in the PhD in Religious Education.

REGR 8580. Young Adult / Adult Ministry and Education. (3 Credits)

This course—for doctoral students only—examines key issues in the religious education of adults. It situates adult religious education within the broader framework of adult education theory, principles of practice, and the application of this theory to contexts of faith communities. Foundational issues explored will include the meaning of adulthood, adult learning, and development, and adult social worlds.

REGR ADVI. Faculty Advising. (0 Credits)

REGR MTNC. Maintenance of Matriculation. (0 Credits)

Spirituality (SPGR)

SPGR 6702. History of Christian Spirituality I. (3 Credits)

This course will explore a number of the significant figures and themes that characterized the development of Christian spirituality from its beginnings until the 15th century. Readings will be drawn from classical spiritual texts from the Eastern Orthodox and Roman Catholic traditions and relevant secondary literature. Authors and texts typically include the Martyrdom of Saints Perpetua and Felicity, Origen, The Life of Anthony, John Cassian, Augustine, Pseudo-Dionysius the Areopagite, Life of Benedict, Gregory the Great, Maximus the Confessor, John Climacus, Symeon the New Theologian, Anselm, Bernard of Clairvaux, Mechthild of Magdeburg, Bonaventure, and Catherine of Siena. The course is organized around certain themes, including community life, prayer, mysticism, reform/conversion, and asceticism.

SPGR 6703. History of Christian Spirituality II. (3 Credits)

This course provides a solid grounding in the historical-critical, hermeneutical, and theological engagements with Christian mysticism/spirituality from the 16th century through the mid-20th century. In addition to focusing upon representative Catholic, Protestant, Reform, and Orthodox traditions, we examine recent expressions of globally contextualized Christian spiritualities. Course readings draw from classical spiritual texts and relevant secondary literature. Authors and texts typically considered include Ignatius Loyola, Martin Luther, Teresa of Ávila, Madame Guyon, Francis de Sales, George Herbert, The Pilgrim’s Tale, Pierre Teilhard de Chardin, Howard Thurman, Gustavo Gutiérrez, C.S. Song, and Desmond Tutu, among others. Additionally, selected themes in Christian spirituality are considered, including feminist, ecological, and social justice spiritualities.
SPGR 6720. Sacramental Spirituality. (3 Credits)
Drawing upon Christian scripture and tradition, this course explores and develops present-day sacramental spiritualities. A variety of embodied practices and material realities will be considered in their sacramental aspects—i.e., insofar as they provide an opportunity to experience the divine in and through corporeality. This course will emphasize all of creation as sacramental; it will include a consideration of Christ and the Church as sacraments, the sacraments of initiation (RCIA), healing sacraments (reconciliation and anointing), marriage as a sacrament, and ‘sacramentals.’ The study and discussion will be ecumenical and interreligious, interdisciplinary and multicultural.

SPGR 6742. The Ignatian Way. (3 Credits)
The ministry of Jesuits—and their partners—in pursuing a Christian vision of the world is rooted in the personal experience of the 16-century saint Ignatius Loyola. In this course we shall study the life and work of that saint against the background of the times in which he lived. We examine especially two important primary sources, his autobiography, dictated to a fellow Jesuit near the end of his life, and his Spiritual Exercises, a remarkable and influential handbook for personal and spiritual renewal. We shall also survey his other writings that have come down to us: excerpts from his Spiritual Journal, the Constitutions of the Society of Jesus, and some of his letters. [DMin students excluded].

SPGR 6746. Franciscan Spirituality: Francis, Clare and Bonaventure. (3 Credits)
Explores the religious experiences of Francis and Clare from their own writings as well as biographical materials and examines the spiritual teachings that Clare and Francis bequeathed to the religious orders they founded. Special emphasis is placed on the balance they achieved between the contemplative and active lifestyles and on the evangelical values that characterize the Franciscan approach to ministry. Some consideration will be given to representative Franciscan figures who have exemplified the interplay of theology, spirituality and ministry, suggesting outlines of the same for today.

SPGR 6752. Christian Contemplation and Action. (3 Credits)
Drawing on the work of Philip Sheldrake, this doctoral-level course explores the writings and lives of five representative themes of contemplative prayer and active ministry. The Way of Discipline, The Contemplative-Mystical Way, The Way of Practical Action, The Way of Beauty, and The Prophetic Way. Representative authors include Thomas Merton, Julian of Norwich, Ignatius Loyola, Teresa of Avila, G.M. Hopkins, Gustavo Gutiérrez, and Dorothy Day, among others. The course considers these sources and traditions as living fonts of and challenges to our contemporary spirituality, and provides a broad overview for more specific studies in Christian spirituality.

SPGR 6792. Contemporary Christian Spirituality. (3 Credits)
This course examines foundations, issues, movements, and persons affecting the practice of Christian spirituality in a postmodern context. Issues discussed will include embodiment, prayer, work, and sexuality. Movements will include feminism, ecology, and compassion/justice.

SPGR 6794. Women Mystics. (3 Credits)
This course will explore the experiences and theologies of women mystics as reported or portrayed throughout Christian history. Students will read selections from hagiographical texts, from the sayings of the Desert Mothers, from historical texts such as the Trial of Joan of Arc, and from the writings of women mystics themselves—such as Hildegard of Bingen, Clare of Assisi, Margaret Mary Alacoque, Thérèse of Lisieux, and Mother Teresa of Calcutta. Lectures will draw upon history, sociology, psychology, theology, and other disciplines to contextualize the consideration of these readings and to invite a careful comparison with present-day experiences. Students will also be invited to ponder the forces that have shaped our current canon of mystics and saints: Whose lives remain invisible to our study, and why?

SPGR 6811. Meditation East/West. (3 Credits)
A Practical theoretical treatment of the tradition of Christian prayer and Eastern Meditation. Included are guided practices, reading and reflection.

SPGR 6830. Discernment in the Christian Tradition. (3 Credits)
This course offers a two-fold introduction to Christian traditions for the discernment of spirits. During the first half of the course, we pursue a historical review of the various articulations of spiritual discernment from New Testament foundations through the 16th century. During the second half of the course, we concentrate on the theory and practice of Christian discernment and decision-making grounded in the writings of St. Ignatius Loyola. We engage in a critical, close reading of Ignatius’ ‘Rules for the Discernment of Spirits’ (weeks 1 and 2) and ‘The Election,’ both texts from ‘The Spiritual Exercises,’ as well as selected letters and other writings by Ignatius. This course also emphasizes each student’s personal appropriation of this material through the discussion of discernment case studies.

SPGR 6834. Methods in Christian Spirituality. (3 Credits)
This course introduces graduate students to the academic discipline of Christian spirituality and to methods for researching and writing at the M.A. level, including an introduction to the Turabian Manual for Writers of Research Papers, Theses, and Dissertations. In consultation with the professor, students are free to pursue a research topic of their choosing; however, their research agenda must include a Christian spirituality component. Students already working on a thesis may, with the professor’s consent, use a chapter thereof as their research paper for this course. Course topics include defining the academic discipline of Christian spirituality; the relationship between spirituality and theology; experience as an object of study; and the approaches to context, historical consciousness, multidisciplinarity, and hermeneutic theory. In this practical seminar, students collaboratively learn to research and write at the graduate level, as well as explore the rich offerings of Christian spirituality as an academic discipline.

SPGR 6910. Introduction to Supervision. (3 Credits)
The first course in Fordham GRE’s Advanced Certificate in Supervision, Introduction to Supervision offers participants intensive immersion in supervision basics, including case preparation, supervision theory, spirituality, and ethics. Students will have repeated practice offering supervision to others and giving feedback to classmates as they do the same.
SPGR 6912. Practicum in Formal Supervision. (3 Credits)
The second course in Fordham GRE's Advanced Certificate in Supervision, the Practicum in Formal Supervision offers students individualized supervision and mentoring as they begin or grow their supervision ministry. In addition, this course provides opportunities for students to adapt a professional code of ethics for use in their context; to create a supervision resource kit; and to read, write about, and discuss supervision processes with their classmates and instructor.
Prerequisite: SPGR 6910.

SPGR 6914. Practicum in Informal Supervision. (3 Credits)
The third course in Fordham GRE's Advanced Certificate in Supervision, the Practicum in Informal Supervision offers students individualized supervision and mentoring as they develop their supervision ministry. In addition, the course provides opportunities for students to explore their own spiritual senses and intuition as they listen to others; to engage psychological concepts related to supervision; and to read, write about, and discuss supervision processes with their classmates and instructors.
Prerequisite: SPGR 6912.

SPGR 6916. Practicum in Group Supervision. (3 Credits)
The fourth course in Fordham GRE's Advanced Certificate in Supervision, the Practicum in Group Supervision offers students individualized supervision and mentoring as they continue their supervision ministry in the field, this term establishing and facilitating their own supervision group. Further, the course supports students in researching a supervision topic of their choice and culminates in a written capstone project.
Prerequisite: SPGR 6914.

SPGR 6920. Supervision Capstone Intensive. (3 Credits)
The final course in Fordham GRE's Advanced Certificate in Supervision, the Supervision Capstone Intensive offers participants an opportunity to present original research and a demonstration project on a supervision-related topic of their choice; to engage in collaboration with their peers and instructors; to offer constructive, compassionate feedback to their peers; and to integrate the skills they have honed in their yearlong practice of supervision.
Prerequisite: SPGR 6916.

SPGR 7702. History of Christian Spirituality I. (3 Credits)
This course will explore a number of the significant figures and themes that characterized the development of Christian spirituality from its beginnings until the 15th century. Readings will be drawn from classical spiritual texts from the Eastern Orthodox and Roman Catholic traditions and relevant secondary literature. Authors and texts typically include the Martyrdom of Saints Perpetua and Felicity, Origen, The Life of Anthony, John Cassian, Augustine, Pseudo-Dionysius the Areopagite, Life of Benedict, Gregory the Great, Maximus the Confessor, John Climacus, Symeon the New Theologian, Anselm, Bernard of Clairvaux, Mechthild of Magdeburg, Bonaventure, and Catherine of Siena. The course is organized around certain themes, including community life, prayer, mysticism, reform/conversion, and asceticism. This course is for Doctor of Ministry students only and will require doctoral-level participation and additional research/writing elements.

SPGR 7703. History of Christian Spirituality II. (3 Credits)
This doctoral-level course provides a solid grounding in the historical-critical, hermeneutical, and theological engagements with Christian mysticism/spirituality from the 16th century through the mid-20th century. In addition to focusing on representative Catholic, Protestant, Reform, and Orthodox traditions, we examine recent expressions of globally contextualized Christian spiritualities. Course readings draw from classical spiritual texts and relevant secondary literature. Authors and texts typically considered include Ignatius Loyola, Martin Luther, Teresa of Ávila, Madame Guyon, Francis de Sales, George Herbert, The Pilgrim’s Tale, Pierre Teilhard de Chardin, Howard Thurman, Gustavo Gutiérrez, C.S. Song, and Desmond Tutu, among others. Additionally, selected themes in Christian spirituality are considered, including feminist, ecological, and social justice spiritualities. The capstone requirement is a 20-page research paper.

SPGR 7720. Sacramental Spirituality. (3 Credits)
Drawing upon Christian scripture and tradition, this doctoral-level course explores and develops present-day sacramental spiritualities. A variety of embodied practices and material realities will be considered in their sacramental aspects—i.e., insofar as they provide an opportunity to experience the divine in and through corporeality. This course will emphasize all of creation as sacramental; it will include a consideration of Christ and the Church as sacraments, the sacraments of initiation (RCIA), healing sacraments (reconciliation and anointing), marriage as a sacrament, and ‘sacramentals.’ The study and discussion will be ecumenical and interreligious, interdisciplinary and multicultural.

SPGR 7740. Spiritual Direction Practicum I. (3 Credits)
The Spiritual Direction Practicum I offers participants the opportunity to learn about the dynamics of prayer as a personal relationship with God, the spiritual direction relationship, elements of Ignatian spirituality, and the role of supervision. A grade of pass and an instructor’s evaluation confirming skill development are required to move to Spiritual Direction Practicum II. Ordinarily, the practicum courses are taken at the conclusion of one’s program; however, with the approval of the Spirituality Faculty Committee, a student still needing to fulfill a limited number of course requirements may also apply for admission to the practicum courses. The following courses are ordinarily completed before taking the practicum courses: Old Testament; New Testament; Christology or Theology of the Human Person; and Sacraments or Sacramental Spirituality or Church and Society. With faculty approval, one or more of these courses may be taken concurrently with the practicum courses. Note: This course is pass/fail only. The following courses must be taken before the Spiritual Direction Practicum begins for all students: Theology of Spiritual Direction; Discernment in the Christian Tradition; and Pastoral Counseling Skills.

SPGR 7741. Spiritual Direction Practicum II. (3 Credits)
This course is a continuation of SPGR 7740. A grade of pass for SPGR 7740 and an instructor’s evaluation confirming skill development at a successful level is required to register for this course. The course registration must take place with request to the assistant dean after Practicum I grades have been posted. Note: This course is pass/fail only.
SPGR 7746. Franciscan Spirituality: Francis, Clare and Bonaventure. (3 Credits)
Doctoral students only- please see syllabus requirements for doctoral students. Explores the religious experiences of Francis and Clare from their own writings as well as biographical materials and examines the spiritual teachings that Clare and Francis bequeathed to the religious orders they founded. Special emphasis is placed on the balance they achieved between the contemplative and active lifestyles and on the evangelical values that characterize the Franciscan approach to ministry. Some consideration will be given to representative Franciscan figures who have exemplified the interplay of theology, spirituality and ministry, suggesting outlines of the same for today.

SPGR 7752. Christian Contemplation and Action. (3 Credits)
Drawing on the work of Philip Sheldrake, this doctoral-level course explores the writings and lives of five representative themes of contemplative prayer and active ministry. The Way of Discipline, The Contemplative-Mystical Way, The Way of Practical Action, The Way of Beauty, and The Prophetic Way. Representative authors include Thomas Merton, Julian of Norwich, Ignatius Loyola, Teresa of Avila, G.M. Hopkins, Gustavo Gutierrez, and Dorothy Day, among others. The course considers these sources and traditions as living fonts of and challenges to our contemporary spirituality, and provides a broad overview for more specific studies in Christian spirituality. The capstone requirement is a 20-page research paper.

SPGR 7760. Christian Spirituality and Leadership. (3 Credits)
This course examines the intersection between classic texts in Christian spirituality and contemporary texts on leadership studies. The oldest corporations in the West are the monasteries and the Catholic Church. Many spiritual treatises are aimed at helping people understand how to lead communities in an effective manner through word and example. Contemporary writers about leadership, such as Jim Collins, stress spiritual qualities such as humility and hope as important for leading companies into greatness. Whereas the spiritual writings have little quantitative evidence associated with them, the leadership studies provide such analysis; however, books on leadership studies tend to lack any depth behind such concepts as humility or even good advice as to how to achieve it, which texts from the history of Christian spirituality provide. By bringing these horizons together, the course will help students understand the practical value of Christian spirituality in business, administration, and politics.

SPGR 7792. Contemporary Christian Spirituality. (3 Credits)
This course will explore contemporary foundations, issues, movements, and persons impacting the practice of Christian spirituality in a postmodern context. Issues discussed will include embodiment, prayer, work, and sexuality. Movements will include feminism, ecology, and compassion/justice. This course is for doctoral students only and will require doctoral-level participation and additional research/writing elements.

SPGR 7794. Women Mystics. (3 Credits)
This doctoral-level course will explore the experiences and theologies of women mystics as reported or portrayed throughout Christian history. Students will read selections from hagiographical texts, from the sayings of the Desert Mothers, from historical texts such as the Trial of Joan of Arc, and from the writings of women mystics themselves—such as Hildegard of Bingen, Clare of Assisi, Marguerite Porete, Catherine of Siena, Julian of Norwich, Teresa of Avila, Margaret Mary Alacoque, Thérèse of Lisieux, and Mother Teresa of Calcutta. Lectures will draw upon history, sociology, psychology, theology, and other disciplines to contextualize the consideration of these readings and to invite a careful comparison with present-day experiences. Students will also be invited to ponder the forces that have shaped our current canon of mystics and saints: Whose lives remain invisible to our study, and why?

SPGR 7811. Meditation East/West. (3 Credits)
A Practical theoretical treatment of the tradition of Christian prayer and Eastern Meditation. Included are guided practices, reading and reflection. DMIN/PHD Students Only.

SPGR 7830. Discernment in the Christian Tradition. (3 Credits)
This doctoral-level course offers a two-fold introduction to Christian traditions for the discernment of spirits. During the first half of the course, we pursue a historical review of the various articulations of spiritual discernment from New Testament foundations through the 16th century. During the second half of the course, we concentrate on the theory and practice of Christian discernment and decision-making grounded in the writings of St. Ignatius Loyola. We engage in a critical, close reading of Ignatius’ ‘Rules for the Discernment of Spirits’ (weeks 1 and 2) and ‘The Election,’ both texts from ‘The Spiritual Exercises,’ as well as selected letters and other writings by Ignatius. This course also emphasizes each student’s personal appropriation of this material through the discussion of discernment case studies. Capstone requirement is a 20-page research paper.

SPGR 7834. Methods in Christian Spirituality. (3 Credits)
This course introduces doctoral students to the academic discipline of Christian spirituality and to methods for researching and writing at the doctoral level, including an introduction to the Turabian Manual for Writers of Research Papers, Theses, and Dissertations. Course topics include defining the academic discipline of Christian spirituality; the relationship between spirituality and theology; experience as an object of study; and the approaches to context, historical consciousness, multidisciplinarity, and hermeneutic theory. In this practical seminar, students collaboratively learn to research and write at the graduate level, as well as explore the rich offerings of Christian spirituality as an academic discipline. In consultation with the professor, students are free to pursue a research topic of their choosing; however, their research agenda must include a Christian spirituality component. Students already working on a DM in thesis/project or Ph.D. dissertation may, with the professor’s consent, use a chapter thereof as their research paper for this course. The capstone requirement is a 20-page research paper.

SPGR 7870. Spiritual Direction: Theology and Practice. (3 Credits)
This course explores the experience of spiritual direction from the standpoint of both the director and the one directed. It situates the contemporary ministry of spiritual direction within the history of the Christian tradition, and draws upon interdisciplinary and interreligious perspectives in order to examine critically a diversity of past and present theologies, processes, and models of spiritual direction.

SPGR 7888. Special Topics: Spirituality. (3 Credits)
Reserved for special courses in Spirituality.
SPGR 7902. Ignatian Spirituality for Ministry. (3 Credits)
Limited to DMin students. Engaging in ministry within an Jesuit/Ignatian spirituality context involves pursuing a Christian vision of the world rooted in the experience and writings of the sixteenth-century Basque saint, Ignatius of Loyola. In this hybrid course, we (1) examine the life of Ignatius against the background of his socio-historical and theological context, (2) engage in a close, critical reading of representative texts, and (3) survey various contemporary approaches to the appropriation of his spiritual tradition, with an emphasis upon ministerial practices. We examine especially two important primary sources, his Autobiography, dictated to a fellow Jesuit near the end of his life, and The Spiritual Exercises, a remarkable and influential handbook for personal and spiritual growth. We also read excerpts from his Spiritual Journal, the Constitutions of the Society of Jesus, and Letters. Capstone requirement: 20-page research paper, which is due later in the spring semester.

SPGR 8500. Comprehensive Exam MA Christian Spirituality. (0 Credits)
Required for completion of the MA in Christian Spirituality concentrations, Generalist and Spiritual Direction.

SPGR 8870. Spir Dir: Theol & Pract. (3 Credits)
(PhD and DMIN students only) This course explores the experience of spiritual direction from the standpoint of both the director and the one directed. It situates the contemporary ministry of spiritual direction within the history of the Christian tradition, and draws upon interdisciplinary and interreligious perspectives in order to examine critically a diversity of past and present theologies, processes, and models of spiritual direction.

SPGR 8998. Special Topics: Spirituality. (3 Credits)
A tutorial in the area of religion.

**Doctoral Programs**

- Ministry (D.Min.) (p. 961)
- Religious Education (Ph.D.) (p. 966)

**Ministry (D.Min.)**

This hybrid program offers both on-campus and online coursework.

The Doctor of Ministry (D.Min.) is a professional doctorate that represents advanced academic study in the practice of ministry. Doctor of Ministry studies are intended for experienced ministers to deepen capacities for skillful service, for the benefit of the minister and those in their care. At the same time, D.Min. studies place students in a larger community of discourse where they are able to learn from and contribute to research in the practice of ministry.

The curriculum facilitates a practical theological itinerary in which various fields contribute to ministerial awareness and action, including spirituality, pastoral care and counseling, religious education, and theological studies.

The Catholic and Jesuit heritage of Fordham resides in the Doctor of Ministry through curricular emphases, a prevailing pedagogy, attention to spiritual growth, and commitment to justice. Coursework puts Catholic tradition in dialogue with diverse traditions in the interest of personal integrity, ministerial know-how, and intellectual rigor.

The Doctor of Ministry currently offers two concentrations: Generalist and Spirituality.

In keeping with current standards of theological education, D.Min. students will gain an “advanced understanding of the nature and purposes of ministry, enhanced competencies in pastoral analysis and ministerial skills, the integration of these dimensions into the theologically reflective practice of ministry, new knowledge about the practice of ministry, continued growth in spiritual maturity, and development and appropriation of a personal and professional ethic with focused study on ethical standards and mature conduct in the profession.” (Association of Theological Schools, Commission on Accreditation, Degree Program Standards)

Learning outcomes include:

- facility in relating research to ministerial practice (competence in translation between scholarship and action);
- demonstrating the capacity to reconstruct practice (competence in attention to and revision of ministerial performance);
- skillful theological reflection concerning practice (competence in making sense of ministry as theological material);
- facility in reflecting on maturity across professional and personal domains in relation to academic studies (competence in demonstrating integration).

**Admissions**

Admission to the D.Min. program requires the possession of a Master of Divinity degree or its educational equivalent. Equivalency is assessed in terms of a master's degree in theology or a ministry-related field and significant related experience that enables the applicant to engage as a ministry peer with other students in our professional doctoral program.

In order to adequately interpret scripture and the theological tradition in a ministry setting, applicants ordinarily possess a minimum of six hours of graduate studies in the following areas: scripture (with courses in both the Old and New Testaments), doctrinal or systematic theology, and ethics or moral theology (including social justice studies). Given the cultural contextuality of contemporary ministry, applicants ordinarily possess six to 12 graduate credits in the area of pastoral studies or ministry (including practical theology or religious education). Students who do not meet the minimum graduate credits in the above-mentioned areas can take these courses with GRE or another accredited graduate theological school. These credits, however, will not count toward the completion of the D.Min.

GRE has developed the following template for determining whether the applicant who does not have an accredited M.Div. degree meets the minimum for equivalency, which is based on the work of lay ministers who do not perform certain liturgical and sacramental roles. Normally, an applicant will need a total of 52 credits in ministry-related graduate courses and significant ministerial experience in settings such as in a parish ministry, hospital chaplaincy, religious school, campus ministry, etc. Applicants seeking equivalency are also encouraged to submit CPE units and substantial noncredit training programs related to the positions they have held.

To be admitted to the program, applicants should normally have had three years of full-time or equivalent experience in ministry after their first theological degree. They should also manifest the capacity for an advanced level of competence in and reflection on religious ministry.

Admission of candidates to the Doctor of Ministry is determined by the Doctor of Ministry committee, which comprises the director and D.Min. faculty members. Admission to the Doctor of Ministry is selective and
offered only to those students who have demonstrated the requisite intellectual ability, academic and ministerial preparation, and motivation.

Those applying for admission are expected to have a B+ or better average in their master’s program. They must supply a copy of their college, seminary, and graduate school transcripts, as well as three letters of recommendation, two from professors with whom they have studied and one from a ministerial supervisor. Applicants must also submit a statement of purpose that answers each of the questions listed, along with a writing sample, typically a research paper from an earlier degree program.

Please see our admissions pages on the web for admission deadlines.

Each student accepted into the program is assigned an adviser who guides the student in academic matters. Students are expected to maintain a B+ grade point average during the entire period of their doctoral studies. Mentors and readers for doctoral theses/projects are decided upon by students in consultation with prospective mentors and readers. The mentor must be chosen from the Doctor of Ministry faculty. Reader(s) may be chosen from within or outside of the Doctor of Ministry faculty.

**Requirements**

The Doctor of Ministry program offers an advanced level of study in practical theology and its integration with religious ministry. The curriculum also focuses on the acquisition of skills and competencies in pastoral practice and research. A thesis/project serves as the capstone for the student’s program.

Various kinds of learning comprise the program of study: lectures, readings, community, discussions, self-directed learning, peer learning, library research, workshops, and experiential learning. Close attention is also given to the various contexts in which students exercise their religious ministries.

The Doctor of Ministry program includes the designing, writing, and presentation of a thesis/project that deals in a significant manner with theory and practice of ministry. This work should reach the level where it contributes to the practice of ministry and is applicable to other ministerial situations. To complete this work, each student identifies a ministerial issue, conducts the necessary research using appropriate methodology, and presents a practical proposal for dealing with the issue. Doctoral theses/projects are evaluated by a committee, presented orally, and are normally available through Proquest Dissertations at the Fordham University libraries.

The Doctor of Ministry program requires that students take a minimum of 36 advanced credits beyond the Master of Divinity or its equivalent as well as complete a doctoral thesis/project. Twenty-one credits are taken in a required core of courses (12 of these required credits are offered only during two successive January terms, which involves on-campus attendance at two-week-long hybrid courses) and the other 15 credits are in either additional required or elective courses. Attendance at the January-session courses in these first two years is required to participate in the degree. Normally, the degree requires not less than two and no more than six years to complete.

Additionally, before completing 18 credit hours of studies and prior to proposing their thesis/project proposal, students must submit two research papers for Research Readiness Review (RRR). Ordinarily, students request a RRR from two different Doctor of Ministry faculty, for two different Doctor of Ministry courses. At least one satisfactory RRR is required before moving to the thesis/project proposal stage.

All D.Min. students are required to register for the doctoral mentoring seminar (ZZGR 8060) each fall and spring semester after coursework is completed and up to and including the semester in which the student graduates.

**Course Requirements (All Concentrations)**

The courses listed below are required for all concentrations.

<table>

</tbody>
</table>

1. A Spirituality elective is any course with the SPGR subject code (p. 560) numbered 7000-8999, a list of which can be found on our course listing page.
2. A free elective is a course from the subject codes REGR (p. 522), PMGR (p. 448), RLGR (p. 521), PCGR (p. 447), or SPGR (p. 560) numbered 7000-8999, a list of which can be found on our course listing page. Note that some PCGR courses at the 6000-level may qualify; check with your faculty adviser. Courses from other areas or schools may be substituted with the approval of your faculty adviser.

**Generalist Concentration**

In addition to the common Doctor of Ministry (D.Min.) course requirements, select any five courses with the SPGR subject code (p. 560) numbered 7000-8999, including (but not restricted to) those
listed below, or any of the courses with the PMGR (p. 448) or REGR (p. 522) subject codes listed below:

Special topics courses are occasionally offered. Students may substitute doctoral-level courses from other GRE areas or Fordham schools with the approval of their faculty adviser.

PMGR 6618 Hisp Family Ministry & Catechesis is also accepted.

Theses and Projects

Purposes
The Doctor of Ministry thesis or project is the keystone of the program. Students create a work that enriches their practice of ministry, meets academic and professional standards of quality, and is related to broader questions bearing on the practice of ministry. It may contribute to ministry in other contexts. The thesis or project should reflect integration of the student's learning in the program, be grounded in contemporary research in theological and allied fields, and aid and express the student's maturing practice and vocation, and be geared toward ministerial impact. It should display the student's capacity for making theological sense of ministry.

Types or Forms
Thesis
This work, closer to the traditional dissertation format, investigates a matter of significance for ministry that is intended as a contribution to academic or professional discourse concerning ministry as well as serving the student's practice of ministry.

Project
Projects may be either “in ministry” or “for ministry.” In-ministry projects are creative works that serve the practice of ministry in which the student is currently situated. The project will take place within the current ministry and be concluded by the end of the degree program. For-ministry projects are creative works that serve the practice of ministry to be carried out after the conclusion of the degree program.

The Doctor of Ministry thesis or project is the distinguishing characteristic of the doctoral degree, and its quality is a hallmark of the quality of a doctoral program. Copies of all theses and projects are normally available through Proquest Dissertations at the Fordham University libraries.

Proposal
Mentors and Reader
In consultation with potential mentors, students will make arrangements for a mentor to guide them in their thesis/project as well as at least one reader. The reader should be chosen after, and in consultation with, the mentor.

If the reader is from outside Fordham University, and after a mentor has approved the request of a student to have an outside reader, the mentor will circulate to the Doctor of Ministry faculty the CV of the proposed outside reader and a brief rationale written by the student for the request for the outside reader. In this way the doctoral faculty will be informed of outside readers working with GRE as well as have the opportunity to offer feedback about the qualifications of those outside readers within a week's time, sent directly to the mentors.

Once the student’s doctoral committee has been established and the proposal is accepted, the student works out a schedule for submission of materials in collaboration with the mentor and reader(s). (Professors are typically not available for mentoring or consultation during the summer, holidays, or leaves.)

Topic
The thesis/project topic must receive formal approval before being undertaken. Formal approval must be given to the proposal by the student's committee. When the thesis or project is completed and approved by the committee, an oral defense is conducted with the committee.

Students typically submit proposals after completing 24 credits of coursework. The proposal may not be accepted until all grades of Incomplete are satisfied and all financial obligations have been met.

Proposal Format
A good D.Min. proposal should provide a framework that clearly and succinctly describes who students are in ministry and what preparation they have undergone for this thesis/project; what ministry question they are addressing and why; how they plan to do so and why; and what they intend to happen through the thesis/project and why. It should also include a plan for the work (what will be generated according to what sort of timeline) and a bibliography of the essential works that will inform the thesis/project.

The proposal should generally be structured as follows:

- Authorship: Who am I, and what do I do in ministry?
- Focus: What is the focus of my thesis/project, and how is it related to my ministry?
- Service: Whom does this thesis/project serve? How are the voices of those whom this work is “about” and “for” to be accounted?
- Change: What do I want to happen as a result of this work, how, and why? How is the work intrinsically related to that action/impact/ intervention?
- Sources: What are the essential sources that will inform the work?
- Research Process: What is the step-by-step process by which the research will unfold? Where will the research take place and with whom?
- Thesis/Project Outline: What is the content and format of the work (chapters, appendices, etc.)?
- Calendar: On what timeline will I create the thesis/project?
Circulation of the Proposal
After a student has developed a proposal and had it approved by the mentor and reader(s) but before it is sent to the dean’s office for approval, the mentor will circulate a one-page, student-generated abstract as well as a full draft of the proposal to the Doctor of Ministry faculty. In this way the doctoral faculty will be informed of theses and projects moving forward in the school as well as have the opportunity to make suggestions within a week’s time. Observations, if any, by the faculty will be sent directly to the mentors.

Thesis/Project Format Review
Before a candidate proceeds to thesis/project oral defense, the thesis/project must be reviewed for format. Format review assures that the document meets all formatting and stylistic requirements of the GRE and is ready for publication (employing the most recent edition of The Chicago Manual of Style or Turabian). During the Format Review, every page of the manuscript, including the introductory material and reference section, is reviewed thoroughly.

Follow the steps outlined below for completion of the Thesis/Project Format Review process:

- Register for Format Review as you do for a course, and pay the fee.
- The dean’s staff will submit the dissertation to SafeAssign (or a similar program) to detect plagiarism. If any matters of concern are uncovered, the report from the program will be sent to your mentor, who will follow up with you until matters of concern are corrected.
- Once the thesis/project is returned from the format review editor, the dean’s office will forward it to the student, who is responsible for implementing all of the indicated corrections. The format review typically takes three to four weeks.
- Following approval by your mentor and reader, submit one electronic Word document and one Adobe PDF file of the thesis/project to the assistant dean.

Because of the number of theses/projects submitted each semester and the significant amount of time required to review each one, deadlines for submission and approval of theses/projects by mentors and readers will be strictly adhered to. These deadlines are posted in the academic calendar each semester.

Theses/projects are reviewed in the order in which they are received. The earlier a thesis/project is submitted for review, the more likely a student will be approved for graduation in a given semester. If a thesis/project does not meet the standards of the GRE in the semester in which the oral defense was conducted, the candidate will incur additional charges to register for the next semester and will also need to register for the following graduation date.

Defense
Each student must publicly defend the completed thesis/project orally before an examination committee consisting of the mentor and reader(s). The program director (or mentor) is responsible for ensuring that the examination committee is professionally appropriate. The Office of the Dean will schedule the examination date, time, and place only after the mentor has approved a thesis/project that has been revised after the format review. Public notification of the examination—including the time, place, and examiners—must be made at least two weeks in advance. Please review the GRE calendar for the final date on which defenses may be scheduled each semester.

Note that a post-format review draft of the completed thesis/project should be submitted to both mentor and reader(s) at least two to four weeks prior to the oral defense date.

Style Requirements
To ensure consistency of GRE theses and projects, students must prepare them to conform to the guidelines outlined here.

1. Style Manual
Turabian: A Manual for Writers of Research Papers, Theses, and Dissertations. (most recent edition)

2. Format
TITLE PAGE: See sample in the Resources section.
ABSTRACT: The abstract cannot exceed 350 words and should be listed on the table of contents without a page number.
VITA: See sample in the Resources section. NOTE: The vita cannot exceed one page and should be listed on the table of contents without a page number.

PAPER: The paper must be a minimum of 20 lb. weight.
MARGINS: The top, right, and bottom margins should be one inch; the left margin should be 1 ½ inch to allow for binding. Any printing in the margins will count as a mistake. If the margin is exceeded by more than five characters, the thesis will be rejected.
PAGINATION: Number the first page of any chapter in the center of the page a double space below the last line of text, approximately five-eighths to three-fourths inch above the bottom. All other numbers are placed two lines (a double space) above the first line of printing and just inside the right margin; that is, approximately five-eighths to three-fourths inch from the top and one inch from the right side.
FONT: The font size should be 12 points. If proportional spacing is used, the average number of characters per inch (CPI) should not exceed 15. No pencil marks are allowed. If special symbols are required, the symbols within a word processing package should be used. If the needed symbols are hand-lettered, black ink must be used. No press-on (transfer) letters are allowed.
PRINT: A laser printer should be used.
CORRECTIONS: Excess white-outs or corrections (erasures, etc.) are not allowed. Students should reprint the entire page.

3. Arrangement
1. Title Page
2. Dedication or Acknowledgements (if used)
3. Table of Contents
4. Preface (if used)
5. Introduction
6. Chapters
7. Conclusion
8. Bibliography
9. Appendices
10. Abstract (no pagination)

11. Vita (no pagination)

After successful completion of the oral defense and final corrections are approved by mentors and the dean
1. email a PDF copy of your thesis or project to the assistant dean;
2. email an extra copy of the title page to the assistant dean.

Submit your thesis or project online in ProQuest following the instructions in the Clearance and Commencement section (p. 991) of the bulletin. Please copyright your work in ProQuest before completing the submission process.

Program Policies
The policies in this section are intended to supplement the general GRE policies and procedures that can be found in the Student Resources section of the GRE Bulletin.

Leave of Absence
Students who encounter circumstances that prevent their continuous enrollment may request a leave of absence through the program director and dean. A leave of absence is normally granted only for extraordinary personal reasons outside the student's control that prevent involvement in graduate studies (e.g., serious medical problems). In other situations, such as employment opportunities, students are expected to register for dissertation mentoring. The request for a leave should specify the reason for the leave and the time period involved, and include related documentation. The D.Min. committee will forward the request and its recommendation to the dean, who will grant, deny, or modify the recommendation. The dean will inform the individual, the program adviser, and enrollment services. The student will be administratively registered for Leave of Absence. There is no charge for this registration.

For the complete GRE Leave of Absence policy, refer to the Policies and Procedures section of the GRE Bulletin.

Failure to Register
Matriculated students who are neither registered nor on approved leave of absence for two continuous semesters are automatically dropped from the GRE rolls. If they desire to continue their education at Fordham, they must apply for readmission through the assistant dean for admission in consultation with the D.Min. committee and receive the approval of the dean. Such readmission is not automatic.

January Core Session Registration
Doctor of Ministry students are required to attend the two-week January session in each of their first two years in the program. Four core courses are only offered in this session, two in Year 1 and two in Year 2. Missing any courses offered in the January session will extend the time to degree completion by at least a year. Students who need to miss courses in the January session must follow the waiver process (form available from the assistant dean).

Registration at Other Universities
Students who wish to register for courses at other universities must be matriculated in the doctoral program. Only one course at another university may be taken each semester after consultation with the student’s adviser and the approval of the dean. Registration for such courses follows the procedures and fee schedules of the host university. Students are liable for tuition and payments to the other school. Upon completion of the course, students will request a transfer of the credits to their Fordham permanent record. A grade of B+ or better is required for transfer courses.

Satisfactory Academic Performance and Progress
The dean reserves the right of review and dismissal regarding students’ performance and progress in the program. Students who do not meet the standards for satisfactory academic performance and progress will be placed on academic probation. Students must maintain a cumulative GPA of 3.5 or higher to remain in the program. Students who do not maintain a 3.5 GPA or continuous enrollment will no longer receive financial aid and may be dismissed from the program. If the deficiency is not corrected, the dean, in consultation with the program director and the D.Min. committee, will make a decision about dismissal.

Satisfactory academic progress is defined as completing at least one of the dissertation/thesis requirements each year after the semester in which course work is completed. Requirements include the dissertation proposal, and the dissertation defense. Notwithstanding their academic performance or the time remaining for completion of degree requirements, students who do not make satisfactory progress toward the degree may be dropped from the rolls. Unsatisfactory progress may include an excessive number of withdrawals, incompletes, leaves of absence, or other delays in meeting the requirements for the degree.

Students who do not complete one requirement each year are on academic probation. Such students have the next semester to complete the requirement and to file a mandatory timetable for completing all remaining requirements. The timetable must include at least one deadline per semester (e.g. “Complete Chapter 1 to 3 of the dissertation in the fall semester”) if the requirement is unmet by the end of the semester, or if the timetable deadlines are missed, the dean, in consultation with the D.Min. committee, will make a decision about dismissal. Note that an individual student's requirements for academic progress may be affected by the time remaining until the student reaches the time limit for degree completion.

In addition, doctoral students who have not secured approval of their dissertation proposal five semesters before the expiration of their time limit are subject to academic probation. Such students have one semester to secure approval of the dissertation proposal and a timetable for completion of the dissertation. If they do not secure approval of the proposal and the timetable, the dean, in consultation with the D.Min. committee, will make a decision about dismissal. Note that an individual student's requirements for academic progress may be affected by the time remaining until the student reaches the time limit for degree completion.

Academic Advisement Procedure and Sequence
Upon acceptance, each student is assigned an academic adviser. The adviser is to be consulted at each registration period (October for spring semester, March for summer and fall semesters).

Each student is required to take a minimum of six credits per semester.

Advanced standing will be determined at or shortly after admission to the D.Min. program. Students applying for advanced standing will be expected to provide all relevant documentation, including syllabi
and transcripts. International students must provide certification (and translation) of the authenticity of materials presented. Transfer and/or advanced standing credits will be added to a student’s academic record after the student completes 12 credits if the student is in good academic standing and has no incomplete grades.

Advanced standing can be applied to meet core or elective requirements.

All courses accepted for advanced standing credit must meet the following criteria:

1. The student must have received a grade of B+ or better.
2. The courses were completed within five years of admission to the D.Min. program.

A maximum of six credits advanced standing can be awarded.

The adviser is assigned by the dean's office and is not the same thing as a mentor. A mentor is chosen by a student, with faculty consultation, to guide research.

Religious Education (Ph.D.)

This program is offered only on campus.

The Ph.D. in religious education prepares professionals for leadership in religious education. Specifically, it provides students with an understanding of the distinctive nature of the field of religious education as an interdisciplinary area of research and scholarship at the intersection of the academic disciplines of theology/religious studies and education.

In their coursework students explore the religious and educational development of children, youth, and adults; historical and contemporary approaches to religious education; and the personal, social, and communal dimensions of education in faith. The program focuses on Christian traditions of religious education, while also exploring how a concern for interreligious education is constitutive of the theory and practice of religious education.

Graduates of the program contribute to substantive research and scholarship, and the development of practical approaches to religious education. The program is known for its comprehensive religious education curriculum, and the accessibility of faculty members and their dedication to mentoring students.

The curriculum is 48 credits and includes required courses and seminars, a qualifying paper, a dissertation proposal, and the writing and oral defense of a doctoral dissertation. Students will ordinarily devote the equivalent of two full years on campus to course work. Reading knowledge of languages other than English may be required if the scope and nature of the dissertation warrants such knowledge.

Admissions

Although the Ph.D. admissions committee invites those with a background from a variety of fields of study and work experience, applicants who are most successful in earning a place to study in our Ph.D. in religious education program have:

- earned an M.A. in religious education, practical theology, pastoral ministry, religious studies, or equivalent;
- earned a 3.5 GPA (graduate program);
- experience working in the field of religious education as a teacher, catechetical leader, youth minister, pastor, pastoral associate, diocesan leader, curriculum developer, etc.;
- a potential for making a strong contribution to the field of religious education as teaching scholars;
- a clear career path moving forward after graduation;
- strong writing and research capabilities.

Total Credits: 48

1 Religious education electives are any course with the subject code REGR (p. 522) numbered 7000-9999, a list of which can be found on our course listing page (p. 951).

2 Other area electives are courses with the subject codes PMGR (p. 448), SPGR (p. 560), PCGR (p. 447), or RLGR (p. 521) numbered 7000-9999, a list of which can be found on our course listing page (p. 951).
Dissertation Proposal

The proposal is a formal document. It should be typed, double-spaced, and professional looking.

The proposal should make clear exactly what it is the student proposes to do. In other words, it should answer the following questions: What is the issue to be studied? Why is it important to do so? How will it be studied? What contribution will such a study make to our knowledge and understanding of the field of religious education?

The proposal must demonstrate the use of a sound methodology, give evidence of a thorough study of a special field, and show how the researcher will make an original contribution to the field of religious education.

The proposal could be structured as follows:

(1) Introduction: description of the problem, issue, or research question to be dealt with, why the student considers it important, what the student has to say that has not been stated by others, and how the student proposes to contribute to the solution or answer.

(2) Background: why the student chose the problem, issue, or research questions, or the pastoral, historical, or social context of the problem, issue, or research questions, or both.

(3) Thesis Statement: may take the form of hypotheses to be tested, questions to be answered, or objectives to be achieved

(4) Purpose and Significance: topics to be explored in addressing the problem, issue or research questions, and how the research will contribute to scholarship, especially scholarship in religious education.

(5) Methodology: how the student proposes to collect and analyze data, what the relevant sources of information are, and how they will be obtained.

(6) Design/Organization of the Study: tentative chapter titles and summaries of the contents of each chapter.

(7) Bibliography: a preliminary listing in correct bibliographic form of books and articles relevant to the thesis.

A great deal of thinking, planning, and writing are advisable in the preparation of the dissertation proposal. A well-written proposal may, with some modification, serve as the first chapter of the dissertation.

Dissertation Proposal Hearing

A student’s dissertation proposal must receive formal approval before the student undertakes the writing of her or her dissertation. Formal approval comes after an oral hearing of the proposal before the student’s doctoral dissertation committee.

Scheduling Proposal Hearings

A student’s dissertation committee must be approved by the religious education area and dean before the student’s dissertation proposal hearing can be scheduled.

- Students’ proposal hearings can be scheduled no earlier than their final semester of coursework.

- Proposal hearings are scheduled by mentors in consultation with the director.
Public announcements of proposal hearings are made at least one week in advance of a hearing.

The mentor, in consultation with the director and the assistant dean, checks to ensure that all coursework requirements have been fulfilled before a proposal hearing is scheduled. Additionally, the proposal hearing may not be conducted until all grades of “Incomplete” are satisfied and all financial obligations have been met.

Fordham Institutional Review Board (IRB) Review

All Ph.D. dissertation research involving human subjects (including interviews, focus groups, and surveys) is subject to review and approval by the Fordham Institutional Review Board (IRB). The IRB strives to ensure that (1) subjects are not placed at undue risk; and (2) that subjects provide un-coerced, informed consent to participate in a research study. IRB review also helps to protect the validity of the researchers’ findings. For current IRB policies, procedures, and submission deadlines, see http://www.fordham.edu/academics/office_of_research/institutional_review/

Students whose research involves human subjects submit their proposals for IRB review after their dissertation proposal hearings and the acceptance of their proposals by their committee.

Schedule for Submission of Materials

Once the dissertation committee has been established and the dissertation proposal is accepted, the student is to work out a schedule for submission of materials in collaboration with the mentor and readers. This is to ensure that the mentor’s and readers’ availability is clearly agreed upon and that it takes into account faculty research leaves and summer schedules. Ordinarily, professors are not expected to be available during the summer months.

Roles and Responsibilities

While developing the proposal and conducting research, the doctoral student is responsible for meeting and working with their mentor and committee members on a regular basis.

Dissertation mentors and committee members are responsible for evaluating the readiness of draft versions of dissertations for format review and oral defense. Although this rigorous review will address issues of completeness, content quality and basic style, mentors are not responsible for copy editing dissertation manuscripts. Spell-checking, copy editing, formatting, and the like are the responsibility of the dissertation’s author.

Readers’ primary responsibility is to assure the integrity of the dissertation. Readers’ areas of expertise and experience enable them to critically follow the development of the candidate’s project, from the formation of the research question and exploration of related literature and data to the design of the study, analyses of the data, and the development of conclusions. They provide guidance during the development of the research questions, literature review, design of the study, and selection of methods of analysis. Generally, readers also critically review the chapters of the dissertation as they are prepared and point out areas requiring additional attention.

Style Requirements

To ensure consistency of GRE dissertations, students must prepare their dissertations to conform to the guidelines outlined here.

1. Style Manual
   The Chicago Manual of Style (most recent edition)

2. Format
   TITLE PAGE: See sample in the Resources section.
   ABSTRACT: The abstract cannot exceed 350 words and should be listed on the table of contents without a page number.
   VITA: See sample in the Resources section. NOTE: The vita cannot exceed one page and should be listed on the table of contents without a page number.
   PAPER: The paper must be a minimum of 20 lb. weight.
   MARGINS: The top, right, and bottom margins should be one inch; the left margin should be 1 ½ inch to allow for binding. Any printing in the margins will count as a mistake. If the margin is exceeded by more than five characters, the dissertation will be rejected.
   PAGINATION: Number the first page of any chapter in the center of the page a double space below the last line of text, approximately 5/8 to ¾ inch above the bottom. All other numbers are placed two lines (a double space) above the first line of printing and just inside the right margin; that is, approximately 5/8 to 3/4 inch from the top and one inch from the right side.
   FONT: The point size of the font should 12. If proportional spacing is used, the average number of characters per inch (CPI) should not exceed 15. No pencil marks are allowed. If special symbols are required, the symbols within a word processing package should be used. If the needed symbols hand-lettered, black ink must be used. No press-on (transfer) letters are allowed.
   PRINT: A laser printer should be used.
   CORRECTIONS: Excess white-outs or corrections (erasures, etc.) are not allowed. Students should reprint the entire page.

3. Arrangement
   1. Title Page
   2. Dedication or Acknowledgements (if used)
   3. Table of Contents
   4. Preface (if used)
   5. Introduction
   6. Chapters
   7. Conclusion
   8. Bibliography
   9. Appendices
   10. Abstract (no pagination)
   11. Vita (no pagination)

Guidelines for Graduation and Dissertation Defenses

1. A doctoral candidate planning to graduate in any given semester must register for graduation online by the date indicated in the academic calendar. If the candidate fails to register for graduation or fails to complete pending requirements, the degree will be awarded...
8. The director will make sure that the mentor has a Ph.D. Summary Sheet and a GRE Degree Certification Form. The mentor will complete these forms and submit them to the director. The director will keep copies of the forms for their files and submit copies to the assistant dean.

9. The director and mentor will work with the assistant dean to make sure that the completion of all degree requirements for the candidate is recorded in DegreeWorks.

10. Once the format review is complete, a check has been made to ensure that the student’s financial account is up to date, and a check has been made to ensure that the student’s DegreeWorks profile is complete, the Office of the Dean will be notified and the Office of the Dean will schedule the defense.

11. An announcement of the defense (including the time, place, and examiners) must be posted two weeks in advance of the defense.

12. Before the dissertation defense, the director will provide the mentor with the dissertation ballots and the materials the candidate will need to complete before presenting their dissertation to the dean.

The defense will be chaired by the assistant dean or another designate of the dean. The chair of the oral defense, who is not on the committee, represents the University at this formal session. The chairperson is charged with protecting the candidate’s rights to a fair and appropriate academic assessment and to protect the University’s right to conduct a formal assessment of this major doctoral work. The chairperson facilitates the meeting and may participate in the questioning and discussion. However, neither the chairperson nor any other individuals outside the committee votes on the outcome of the defense.

13. The oral defense will focus chiefly on the dissertation research and its impact in the field in which the research was conducted. Immediately following the defense, the committee will evaluate the candidate’s research and performance. The outcome of this evaluation will be one of four ratings: (1) Passed, (2) Passed contingent upon minor modifications of dissertation document, (3) Passed but with major revisions (e.g., content), (4) Not acceptable at this time. If changes are required, the candidate will be given a specific time frame in which to make the modifications and submit the revisions to the committee. Failure to meet that deadline may result in the requirement of registration for another semester.

After successful completion of the oral defense and final corrections are approved by mentors and the dean:

1. Email a PDF copy of your dissertation to the assistant dean.
2. Email an extra copy of the title page to the assistant dean.
3. Submit your thesis or project online in ProQuest following the instructions in the Clearance and Commencement section (p. 991) of the bulletin. Please copyright your work in ProQuest before completing the submission process.

Qualifying Papers

The purpose of the qualifying paper (QP) is to demonstrate the candidate’s knowledge, aptitude, and readiness for doctoral research.

- The qualifying paper should demonstrate the necessary skills for conducting sustained research and writing at the professional level. In particular, a QP should (i) make plain the motivation for the choice of topic; (ii) show a thorough knowledge of the relevant literature and lines of argumentation; (iii) show an ability to understand, analyze, and evaluate positions and arguments and to formulate and defend
program must register every fall and spring semester until graduation.

The Ph.D. program in religious education has a continuous enrollment policy. This means that graduate students matriculated in the Ph.D. program are under a financial aid commitment to full-time attendance until graduation. Therefore, students who do not meet the minimal standards for academic performance or the time remaining until graduation may be disenrolled from the Ph.D. program.

### Special Registration

Regularly scheduled GRE courses will constitute the bulk of coursework for doctoral students. Other options for registration include courses offered at other Fordham graduate schools, courses at other schools within the New York Doctoral Consortium, and audits.

### Satisfactory Academic Performance and Progress

#### Academic Performance

Students who do not meet the minimal standards for academic performance are on academic probation. Minimal satisfactory academic performance is defined as having a grade point average (GPA) of at least 3.50 (B+ average). Any student receiving any University financial aid must maintain a 3.5 cumulative GPA as a minimal requirement for continuation of the aid. Administrative “Fs” are computed as “Fs” (0.00) for the purpose of determining the grade point average.

Students who are below the required grade point average may not submit qualifying papers without the dean’s permission.

#### Academic Progress

Satisfactory academic progress is defined as completing at least one of the requirements each semester after the semester in which coursework is completed. Requirements include the qualifying paper, dissertation proposal, chapters of the dissertation, and the dissertation defense.

Unsatisfactory progress may include an excessive number of withdrawals, incompletes, leaves of absence, or other delays in meeting the requirements for the degree.

Students who do not complete one requirement each semester are on academic probation. These students have the next semester to complete the requirement and to file a mandatory timetable for completing all remaining requirements. The timetable must include at least one deadline per semester (e.g., “complete Chapter 1 to 3 of the dissertation in Fall semester”). If the requirement is unmet by the end of the semester, or if the timetable deadlines are missed, the dean, in consultation with the religious education area, will make a decision about whether or not to disenroll the student from the Ph.D. program.

Doctoral students who have not secured approval of their dissertation proposal five semesters before the expiration of their time limit are on academic probation. Such students have one semester to secure approval of the dissertation proposal and a timetable for completion of the dissertation. If they do not secure approval of the proposal and the timetable, the dean, in consultation with the religious education area, will make a decision about disenrollment from the Ph.D. program.

Please note that an individual student’s requirements for academic progress may be affected by the time remaining until the student reaches the time limit for degree completion.

Notwithstanding their academic performance or the time remaining for completion of degree requirements, students who do not make satisfactory progress toward the degree may be disenrolled from the program.

### Program Policies

#### Continuous Enrollment

The Ph.D. program in religious education has a continuous enrollment policy. This means that graduate students matriculated in the Ph.D. program must register every fall and spring semester until graduation.

Qualifying papers cannot be accepted until all grades of Incomplete are removed and changed to a final grade.

### Length

Qualifying papers must be 4,500 to 5,000 words.

### Formatting

Qualifying papers are to be typed and double-spaced according to the latest edition of The Chicago Manual of Style. Papers should be proofread before submission.

### Schedule

A qualifying paper must be submitted and approved no later than the fifth semester of a student’s program of study (excluding summer semesters).

### Evaluation and Approval

To start the QP process, students should submit to the director of the Ph.D. program a petition to appoint a mentor and reader. A mentor must be a core member of the GRE religious education faculty. All GRE core faculty members may serve as a reader.

When the final paper is judged to be acceptable by both readers, it is approved.

- Those who fail to meet the qualifying paper requirement will be dismissed from the program.
- If the qualifying paper is approved, the student is required to submit a copy of the qualifying paper with a signed title page to the religious education area coordinator. A copy of the signed title page will be placed in the student’s file.
- In all cases, the qualifying paper should be approved before the student’s dissertation proposal hearing.

Qualifying papers cannot be accepted until all grades of Incomplete are removed and changed to a final grade.

### Program Policies

#### Continuous Enrollment

The Ph.D. program in religious education has a continuous enrollment policy. This means that graduate students matriculated in the Ph.D. program must register every fall and spring semester until graduation.
The dean reserves the right to review doctoral students’ work and to decide to disenroll those who are not making satisfactory academic progress.

Students who are below the required grade point average may not submit qualifying papers without the dean’s permission.

**Academic Advisement Procedure and Sequence**

Upon acceptance each student is assigned an academic adviser. The adviser is to be consulted at each registration period. Each student is required to take a minimum of six credits per semester.

Requests for independent study courses and substitutions to required courses must be approved by a majority of the religious education faculty and the dean. See Independent Study Courses and Substitutions to Required Courses below for additional information.

Students are required to fulfill coursework requirements prior to taking the Dissertation Mentoring Seminar.

All students who have completed course work are required to enroll in the Dissertation Mentoring Seminar each semester until they defend their dissertation. Credits earned from taking the Dissertation Mentoring Seminar do not count toward the 48 credits needed to complete course work for the Ph.D. degree.

Once the student has chosen a dissertation mentor, academic advisement is rendered by the mentor.

**Independent Study Courses**

Petitions from matriculated Ph.D. students for independent study can be presented in writing to the religious education area when and if they meet the following criteria: (1) a required course is not being offered in the given semester, or (2) the Independent Study will be taken in the last semester of the program of study.

Petitions must be reviewed and approved by a majority of the religious education faculty before they are sent to the dean for final approval.

**Substitutions for Required Courses**

Petitions from matriculated Ph.D. students for substitutions to required core courses must be presented in writing to the religious education area for review and approval in a timely manner before being sent to the dean for final approval. These requests should be submitted in the semester before the end of coursework, or before the semester in which the substituted course would be taken.

**Commencement**

Only doctoral students who have passed format review and successfully defended their dissertations may walk in the commencement procession, be seated on the dais, and have their names announced during the University commencement ceremony.

For more information refer to the Policies and Procedures (p. 985) section of the GRE Bulletin.

**Christian Spirituality (M.A.)**

This program is offered online or on campus.

The Master of Arts degree (M.A.) in Christian spirituality provides preparation for work in general Christian ministry, in spiritual direction, or in preparation for an academic career in teaching. The program can also assist those who wish to complement their personal spiritual journey with an academic foundation in scripture, theology, and spirituality. Graduates of the program will have a competent understanding of methods of studying Christian spirituality along with its biblical, scriptural, and theological foundations.

Each student must pick one of three concentrations: spiritual direction, generalist, or research. Research and generalist concentrators may complete their degree entirely online, on campus, or as a hybrid program. Spiritual direction concentrators must complete their degree on campus or as a hybrid program. Intensive summer courses are also available. Scholarships and grants are available for qualified applicants.

Programs in Christian spirituality are also available at the certificate and Doctor of Ministry levels.

**Concentrations**

**Spiritual Direction Concentration**

Coursework in the spiritual direction concentration prepares you for work in retreat, campus ministry, and spiritual direction settings. It allows students to use electives to prepare for ministry as a spiritual director. Students also have access to Fordham’s excellent retreat and campus ministry programming. In addition, it may be completed on campus or as a hybrid program. Some direction courses will require a residence on campus as well as a yearlong field work or practicum in the New York City area (one Saturday per month, plus online meetings).

In addition to the general requirements for the Master of Arts degree (M.A.) in Christian spirituality, students must also complete:

**Resources**

**Sample Documents**

Sample of Vita

Sample Dissertation Title Page

Sample ‘Prepared Under My Direction’ form

**Forms**

Proposed Dissertation Committee Form
The practicum sequence includes the following courses: Spiritual Direction: Theology and Practice, Discernment in the Christian Tradition, Pastoral Counseling Skills, Spiritual Direction Practicum I, and Spiritual Direction Practicum II. Registration requires approval from the spiritual direction committee and your SPGR 7740 instructor, and successful completion of SPGR 7740 Spiritual Direction Practicum I.

In addition, concentrators must complete a comprehensive examination or M.A. thesis.

The decision to continue with the practicum is based on the student’s performance in the initial courses and on interviews with the practicum directors during the application process for the practicum sequence. Students not admitted to the practicum may decide to resign from the program or seek admission to another certificate program. Admission to Practicum II is conditional on interviews with the practicum directors during the application process for the practicum sequence. The practicum is a yearlong experience; students gather one Saturday per month from September to May and also complete field placements and phone/hybrid meetings between campus visits.

At the end of the supervised practicum, the supervisor works with the student to assess any particular needs for developing the necessary knowledge base in theology, psychology, or scripture based on the intern director’s experience working with directees.

Participation in monthly spiritual direction with a credentialed spiritual director for at least one year is normally a prerequisite for admission to the spiritual direction concentration and for admission into the practicum. Students are expected to continue in spiritual direction throughout their course of studies. Resources regarding spiritual direction can be found at Fordham’s campus ministry website. You might also wish to consult the resources offered by Spiritual Directors International, e.g., “Questions to Ask a Prospective Spiritual Director.”

Students are required to complete the following prerequisite courses before starting the yearlong practicum sequence that begins every fall semester only:

- SPGR 7870 Spiritual Direction: Theology and Practice
- SPGR 6830 Discernment in the Christian Tradition
- PCGR 6440 Pastoral Counseling Skills

Students should enroll as soon as registration opens, since these courses are in demand across multiple degree programs.

As noted, admission to the practicum sequence will be based on a student’s satisfactory completion of the prerequisite courses and successful interviews with the practicum directors.

The practicum sequence includes the following courses:

- SPGR 7740 Spiritual Direction Practicum I
- SPGR 7741 Spiritual Direction Practicum II

(Admission to Practicum II is conditional upon the judgment of the Practicum I instructor.)

Students should apply for admission to Spiritual Direction Practicum I in the spring semester prior to their intended start date. Students who are not admitted to the practicum sequence may either withdraw from the program or seek admission to another certificate program. Admission to Practicum II is conditional, based upon the decision of the Practicum I instructor. Contact the assistant dean for any questions and further assistance regarding the application process.

In addition, concentrators must complete a comprehensive examination or M.A. thesis.

### Generalist Concentration

This concentration allows for a broad program of study in Christian spirituality for those who do not wish to focus on research or spiritual direction. This concentration may be completed entirely online, entirely on campus, or through a mix of both.

In addition to the general requirements for the Master of Arts degree (M.A.) in Christian spirituality, students must also complete:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>

<tbody>
<tr>
<td>SPGR 7740</td>
<td>Spiritual Direction Practicum I</td>
<td>6</td>
</tr>
<tr>
<td>PCGR 6440</td>
<td>Pastoral Counseling Skills</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Credits 12

1. Spirituality electives are any course with the subject code SPGR (p. 560).
2. A general elective is any non-restricted course at GRE (p. 951).

In addition, with the permission of the designated faculty and/or department, students may enroll in courses offered at other Fordham University graduate schools, and the member schools of the New York Theological Consortium.

In addition, concentrators must complete a comprehensive examination or M.A. thesis.

### Research Concentration

The research concentration prepares students for doctoral programs and careers in higher education teaching Christian spirituality. Students have access to renowned faculty and all the resources of Fordham’s other schools, centers, and institutes. In addition, this concentration may be completed entirely online, entirely on campus, or through a mix of both.

In addition to the general requirements for the Master of Arts degree (M.A.) in Christian spirituality, students must also complete all the requirements for the generalist concentration, with the following additions:

#### Completion of an M.A. Thesis

Requires students to complete a master’s thesis. The research paper is typically 60 pages.

#### Demonstrated Ability in a Second Language

Requires students to demonstrate competency in a second language in preparation for the research of the thesis. The master’s thesis must employ a language that is relevant to the subject being researched and a language that is a second language for the student. Language competency is demonstrated by the successful completion of a language examination.
Requirements

The Master of Arts degree (M.A.) in Christian spirituality requires 36 credits for completion, including the selection of a concentration. Online and on-campus program options are specific to the selected concentration and are described in the concentrations tab (p. 971).

Thesis Capstone or Comprehensive Examination Requirement (All Concentrations)

Students in the Master of Arts degree (M.A.) in Christian spirituality program may choose to pursue either a thesis capstone or comprehensive examination option to complete their degree.

About the Thesis Capstone

Students contemplating post-M.A. studies in Christian spirituality or theology are encouraged to consider the M.A.-C.S. Thesis Capstone option. This capstone component involves completing a major research paper in the academic discipline of Christian spirituality under the guidance of a Christian spirituality faculty mentor. The research paper is typically 60 pages (including bibliography) and must conform to the most recent Turabian stylebook.

M.A.-C.S. students must apply for acceptance into the thesis capstone option. The student application includes a completed M.A. (C.S.) Thesis Capstone Submission Form, a completed Research Readiness Review (RRR) form along with the original 20-page research paper under review, and proof of competency in a research language other than English, typically one of the following: French, German, Spanish, Italian, Latin, Greek, or Hebrew. Students may petition for faculty permission to substitute an alternate research language. Translation knowledge of a research language may be indicated by exam (see the assistant academic dean for possible dates and locations) or coursework (two semesters of university-level courses within the past six years with a grade of B+ or higher). Proof of competency in a research language requires a letter from the assistant academic dean indicating that you have shown competence in an approved foreign language by examination or review.

Students graduating in May must submit their M.A.-C.S. thesis option application on or before November 1. Students are advised to first consult with a Christian spirituality faculty member well in advance of the application deadline.

The M.A.-C.S. Student Review for Research Readiness [RRR] form and the M.A.-C.S. Thesis Capstone Submission Form are available in the “Academic Forms” section of the GRE-Students Organization in Blackboard.

Comprehensive Examination Capstone

The M.A.-C.S. comprehensive examination typically takes place over two days in April or May of each year. There are written and oral components to the examination. The materials below provide an overview of the kind of materials usually covered on this exam; they are not a definitive list of what your examination will encompass.

The capstone requirement for M.A.-C.S. students pursuing a terminal degree in Christian spirituality is a comprehensive exam, which is based on M.A.-C.S. course requirements and students’ course selections. The comp exam is divided into three parts: (I) the history of Christian spirituality (broad themes); (II) either spiritual direction or spiritual discernment; and (III) oral exam on parts I and II (including questions from Friday morning that were not answered and are related to student’s course selections). In preparation for the exam, students receive a M.A.-C.S. general bibliography including suggested readings in the following areas of competency:

A. Historical Approaches to the Study of Christian Spirituality, which are divided into four general periods (ancient, medieval, modern, and contemporary). This bibliography includes primary and secondary resources.

B. Spiritual Direction

C. Ignatian Spirituality and Discernment

D. Topics in Christian Spirituality

Bibliography A: As explained in the bibliography, M.A.-C.S. comps exam students select any three primary authors/texts from each historical period (ancient, medieval, modern, and contemporary)—for a total of 12 authors/texts—that each student is prepared to be examined upon. Please note that all secondary texts listed in this bibliography offer background and contextual reading for the authors/texts each student selects. Students are not asked to indicate what secondary texts they have read. The secondary texts offer an overview of materials students have read in various M.A.-C.S. courses.

Bibliographies B and C: M.A.-C.S. students admitted into the practicum in spiritual direction are held responsible for material listed in Bibliography B. These students will be given a spiritual direction case study in Comps II of the M.A.-C.S. exam (Friday afternoon). All other students are held responsible for material listed in Bibliography C: Ignatian Spirituality and Discernment. These students will be given a spiritual discernment case study in Comps II of the M.A.-C.S. comps exam (Friday afternoon).

Bibliography D: All citations herein are from M.A.-C.S. required and elective courses. When answering Comps Exams I & III questions, students are encouraged to draw from any of the materials listed in Bibliography D. Again, this bibliography is offered as a review of course

Updated: 07-27-2020
materials. Students do not indicate which texts they are responsible for knowing.

**M.A.-C.S. General Comprehensive Exam Organization**
The M.A.-C.S. Comprehensive Exam typically will be held in April or May at locations to be announced on the Fordham University's Rose Hill campus. Distance students unable to travel to campus for the comp exam must make alternate arrangements with the assistant dean's office for completing all three components of the M.A.-C.S. comp exam. The comp exam is usually organized as follows:

- **Friday**
  - Exam Part I: 9 a.m. – 12 p.m. – Written
  - [Lunch Break 12 – 1 p.m.]
  - Exam Part II: 1 – 4 p.m. – Written
- **Saturday**
  - Exam Part III – Oral (a sign-up sheet will be provided)

**M.A.-C.S. Comprehensive Exam Overview**
- Exam Part I (Friday, 9 a.m. – 12 p.m.) is a written exam covering the 12 authors/texts each student selects from “Bibliography A” (primary texts). From a pool of six previously distributed general themes, the faculty presents each student with three general themes. The student writes an essay response to one of these general themes.
- Exam Part II (Friday, 1 – 4 p.m.) is a written exam based on a verbatim or case study. Students accepted into the M.A.-C.S. spiritual direction concentration and who have participated in the practicum courses in spiritual direction, respond to a spiritual direction verbatim. All other students respond to a spiritual discernment case study.
- Exam Part III (Saturday, 10 a.m. – 2 p.m.), is an oral exam focused upon the 12 authors/texts each student previously selected, student’s written responses to Exam Parts I & II, and unanswered questions from Exam Part I that relate to student’s coursework. A sign-up sheet will be provided so that students can choose a 30-minute slot during this time.

**Preparing for the Capstone Exam I**
In preparing for this part of the Capstone Exams, students should prepare essay responses for the six general themes previously distributed. The content of each essay should (a) address the general theme selected and (b) focus upon at least four or more of the 12 authors/texts selected by each student. On the day of the exam, the faculty presents each student with three essay options. The student then writes an essay response to one.

**Preparing for the Capstone Exam II**
Review the sample case study or verbatim appearing in the “MA_Christian_Spirituality: COMP EXAM MA CHRISTIAN SPIRITUALITY” Organization in Blackboard. On the day of the exam, students respond to a similar case study or verbatim.

**Preparing for the Capstone Exam III**
This part of the exam is entirely oral. Students are asked questions about their responses to Exams I & II. At the time of this oral exam, faculty may also question students about any of the other Exam Part I questions that the student chose not to answer but are related to that student’s coursework—for example, either Christology or Theology of the Human Person and either Church or Sacraments.

**Further Information**
A student may take the M.A.-C.S. Comprehensive Exam no more than three times. The M.A.-C.S. Comprehensive Exam will only be offered in the spring. Students who wish to retake the Comprehensive Exam will be required to pay a Maintenance of Matriculation fee during the intervening fall semester to remain in good standing.

**M.A.-C.S. Comprehensive Exam Deadlines**
- Students must register for the Comprehensive Exam (SPGR 8500 — Comprehensive Exam MA Christian Spirituality) during the registration period prior to the beginning of the spring semester and no later than the Add/Drop deadline for spring courses.
- January 20: All M.A.-C.S. students intending to take the Capstone Exams must submit to the M.A.-C.S. faculty (fmcaloon@fordham.edu, coltanderson@fordham.edu, and smcalister@fordham.edu) a completed M.A.-C.S. Exam Entry Form in which they indicate the following: (1) their intention to take the M.A.-C.S. Capstone Exam in that spring semester; (2) their qualification either for the spiritual direction verbatim or spiritual direction case study; and (3) their list of the 12 authors/texts from Bibliography A for which they will be held responsible in Exams I & II. The M.A.-C.S. Exam Entry Form is available in the Academic Forms section of the GRE-Students Organization in Blackboard.

Students who register and submit the required paperwork for the Comprehensive Exam capstone will receive further information and guidance.

**Pastoral Care (M.A.)**
This online degree program requires a one-week, intensive course in pastoral counseling skills offered on campus.

The Master of Arts degree (M.A.) in pastoral care is designed to prepare students engaged in ministerial work to be competent and effective pastoral caregivers in their present and future ministries. The program nurtures in-depth study; meaningful reflection, and the interdependence of theory and practice.

Although students in the program may progress through the curriculum completing courses online, they are required to complete the course Pastoral Counseling Skills on campus. This course is offered as a one-week (Monday to Friday) class during the early summer session, usually mid-June, or at times as a 15-week fall or spring course. All other courses can be completed entirely online.

At the core of the Master of Arts degree (M.A.) in pastoral care are philosophical, theological, historical, psychological, sociological, and cultural foundations. Various modalities of theological reflection are utilized: pastoral and practical theology, psychology, developmental theory, spirituality, and cultural and multicultural perspectives.

The students enrolled in this program are clergy and lay people involved in ministry of many kinds: parish ministry, chaplaincy in hospitals or other settings, youth ministry, work with the elderly or with at-risk populations. Those interested in chaplaincy may use this degree to seek certification from the National Association of Catholic Chaplains (NACC) or the Association of Professional Chaplains (APC).
Requirements

The Master of Arts degree (M.A.) in Pastoral Care requires 36 credits for completion. This online degree program requires a one-week, intensive course in pastoral counseling skills (PCGR 6440) offered on campus.

Final Paper

All Master of Arts degree (M.A.) in pastoral care students are required to complete a final paper as part of the degree requirement. The final paper allows students the opportunity to integrate, reflect, expand, and apply their coursework. It should be noted that there is no registration fee for this component of the program. Additionally, no credits are awarded for the paper. However, students are required to register for maintenance and matriculation if not currently registered for classes.

All students in the 36-credit program have two options for the final paper. Students are to choose the option in consultation with a final project mentor of their choosing. A mentor can be chosen at any point during the program.

Option 1: Complete a 30- to 40-page pastoral care project with a for-ministry focus.

Students choosing this option are asked to draw upon their current or future pastoral care ministry and, informed by psychological and spiritual scholarship, write a final project that addresses an identifiable issue/concern. The paper is to include three parts:

1. A written discussion of the purpose of the project, including a description of the pastoral care need that will be addressed by your project and your goals for the project
2. A detailed description of the pastoral care project
3. A reflection on the psychological and spiritual dynamics of your project

Option 2: Complete a 30- to 40-page major paper.

Students choosing this option will have the opportunity to explore a pastoral care issue and the implications of this issue in depth. The major paper may take the following form:

1. Identify a significant pastoral care issue
2. Provide an account of why this is an important issue today
3. Discuss the issue drawing from psychological and spiritual resources
4. Explore some of the pastoral, clinical, and ethical dimensions or implications of the issue

Mentorship

Ordinarily, mentors of the final project are any of the full-time faculty in the Graduate School of Religion and Religious Education in pastoral care and counseling that the student chooses. With permission, students may work with contingent faculty. It is the role of the mentor, who need not be one’s faculty adviser, to help the student develop a proposal for the paper, to approve that proposal, to offer suggestions, to give feedback on the writing as needed, and to approve the final copy. It is not the role of the mentor to correct for grammar, spelling, and the manual of style.

Manual of Style

The final paper needs to be written according to the Publication Manual of the American Psychological Association (APA style).

Pastoral Mental Health Counseling (M.A.)

This program is offered on campus.

The Master of Arts degree (M.A.) in pastoral mental health counseling is a 60-credit program that provides the professional education requirements needed for licensure as a mental health counselor in New York state. In addition to academic coursework emphasizing counseling theory, psychosocial assessment, diagnosis, ethics, and clinical intervention, students also take courses that prepare them to work with the spiritual concerns of their clients. A professionally supervised internship is an integral part of the professional education requirement.

The Master of Arts degree (M.A.) in pastoral mental health counseling program is accredited by the Masters in Psychology and Counseling Accreditation Council (MPCAC) for the period of May 2017 through May 2027.

For more information regarding the MPCAC, visit mpcaaccreditation.org.

Updated: 07-27-2020
Program Mission Statement
The overarching mission of the program is to prepare students to become social-justice-minded, licensed, professional counselors with a specialization in integrating spiritual and religious content into the professional counseling relationship when ethically appropriate.

Learning Objectives
The faculty of the pastoral mental health counseling program have identified learning objectives to ensure that the goals associated with the program’s mission are achieved.

Upon graduation, the 60-credit Master of Arts degree (M.A.) in pastoral mental health counseling students will be able to

- demonstrate an understanding of and ability to practice a pastoral approach to the care of persons grounded in the Ignatian principle of cura personalis;
- articulate an ethic of care grounded in an understanding of professional ethical principles, including issues of self-care, appropriate boundaries, cultural difference, and social justice;
- demonstrate the ability to integrate counseling theory and research, varied theological perspectives, and the practice of self-awareness in order to effectively and ethically provide mental health services to clients from diverse spiritual and cultural backgrounds; and
- demonstrate the ability to build a therapeutic relationship in a clinical context, assess clinical and spiritual themes in a clinical case, and write a corresponding treatment plan to include long-term and short-term clinical goals.

The pastoral mental health counseling program assesses various data on a continuous basis to understand how well the program is meeting the learning objectives each year. This includes internship evaluation data, integrative case paper scores, graduation rates, National Counselor Examination (NCE) and National Mental Health Counselor Exam (NMHCE) scores, employment rates post-graduation, and employer satisfaction with alumni working as professional counselors. Outcome data from the evaluation process can be found on the program website and is updated each year.

Admissions
Minimum Qualifications
Aptitude
Applicants who maintain a 3.0 or higher GPA during their undergraduate education or a 3.5 or higher GPA during their graduate school education

Career Goals
Applicants who have knowledge, understanding, and interest of the field of Pastoral Counseling

Interpersonal Skills
Applicants who demonstrate strong interpersonal skills including self-awareness, the ability to self-reflect, and a sense of openness and curiosity

Requirements
Course Requirements
There are 60 credits required for graduation. Courses marked with an asterisk (*) must be completed prior to the internship year. Students who have a master’s degree in theology may request to substitute another course for the theology requirement (see Appendix I in the Resources section (p. 982) for this waiver form).

Courses are offered in the following semester rotation each year:

</tbody>
</table>

1. 9 credits of field placement, to be completed over either 2 semesters (300 hours each) or 3 semesters (200 hours each).
Case Integration Paper

In addition to the coursework, students must complete a final Case Integration Paper as a capstone experience. The purpose of the paper is to demonstrate the student’s integrative practical and theoretical learning over the course of the program. The paper will be approximately 25-30 pages and will focus on the student’s work with a single case during the internship. Students are to remove any identifying information from the case paper so that anonymity of the client can be assured. While the paper uses a real case, the intention of the paper is to demonstrate the student’s academic and clinical skills.

The final approved paper is due to the student’s academic adviser based on the following graduation dates:

- Graduation Date: January | Final Paper Due Date: November 1
- Graduation Date: May | Final Paper Due Date: March 15
- Graduation Date: September | Final Paper Due Date: July 15

The paper is to be organized in the following format:

1. Identifying Information: First initial only, age, sex, culture/ethnicity, religion, when treatment began, how often seen
2. Clinical Impressions: Description of the client including a Mental Status Exam
3. Relevant Data from the Initial Interview (including the presenting problem/client’s main reasons for seeking counseling)
4. Developmental, Social, Family, Mental Health, and Medical History
5. Diagnosis and Psychodynamic Formulation
6. Transference/Countertransference Dynamics
7. Ethical, Cultural, or Social Justice Issues
8. Theory: Way of Understanding the Case
9. The Pastoral Perspective: theological issues, spiritual or religious themes, and theological reflection that includes an understanding of the Ignatian principle of cura personalis
10. Treatment Plan: goals of therapy, types of clinical interventions, and necessary referrals for treatment, including group counseling, medication, and psychological testing or assessment
11. Critique of Counseling Services
12. Two to four page verbatim

The Case Integration Paper will be graded by the academic adviser with a standardized rubric (see Appendix II in the Resources section (p. 982)). The cutoff for a passing score is a minimum of one point in each of the 11 areas and a minimum of 24 points total. Students who do not receive a passing score will be provided feedback and asked to rewrite the paper. If, after the second rewrite, a student does not receive a passing score, an Individual Remediation Plan will be put into place for the student.

Academic Advisement

Once admitted to the program, each student will be assigned an adviser, who will be one of the full-time faculty members. In order to be certain students will meet their academic and professional goals, advisement is essential. Evaluation of student performance is a necessary component of advisement. This includes evaluation of academic, clinical, and professional skills.

While the adviser will be tasked with communicating evaluation feedback to the student, all of the faculty and clinical supervisors will be weighing in on the student’s progress toward the degree.

At minimum, students must meet with their adviser once per semester prior to registering for classes. It is through the academic advisement process that a student and faculty member will together

- formulate a map to complete course work in a designated time frame;
- review a student’s DegreeWorks account;
- ascertain if a student is meeting the mandatory academic 3.0 GPA requirement;
- receive formal feedback on student progress;
- explore clinical interests;
- discuss the final case integration paper;
- form a professional mentoring relationship in the field of pastoral counseling.

During advisement, students complete the academic advisement sheet (see Appendix III in the Resources section (p. 982)) that remains in the student’s file. The student and the adviser update this sheet each semester, as well as review the student’s DegreeWorks account.

To be a licensed professional counselor (LPC) or a licensed mental health counselor (LMHC) requires that one have both academic and professional skills. It is the goal of the program faculty to help students work toward meeting a master’s level of competency of both academic and clinical/professional skills.

Satisfactory Academic Progress

Satisfactory academic progress requires that students

- complete 12 credits per year;
- complete one requirement per term when not enrolled in coursework (e.g. draft of final paper; final submission of paper);
- maintain a 3.0 GPA;
- receive a grade of no less than a B in any class.

If a student does not maintain satisfactory academic progress, a letter will be mailed to the student from the program faculty. This letter will remain in the student’s file. A student may be placed on academic probation or dismissed from the program in accordance with the GRE policy. If placed on academic probation, an Individual Remediation Plan (IRP) will be put into place (see IRP policy in the Program Policies section (p. 980)).

Satisfactory Clinical/Professional Progress

Satisfactory clinical/professional progress requires students to
• demonstrate professional responsibility;
• demonstrate personal maturity and emotional integration and integrity;
• demonstrate ethical knowledge and behavior as indicated in the American Counseling Association Code of Ethics;
• develop master's-level clinical assessment skills;
• demonstrate theoretical knowledge
• demonstrate openness to supervision.

Professional progress is evaluated through a number of ways including input from faculty instructors, academic advisers, and clinical site supervisors. Prior to beginning an internship, basic clinical and professional skills must be demonstrated through the Yearly Student Evaluation Form in May (see Appendix IV in the Resources section (p. 982)), Basic Clinical Skills course, and the Fitness Review Form. The Basic Skills course is a hands-on skills class designed as a beginning foundation to counseling. Students will learn the fundamentals of the counseling relationship and will practice counseling skills in triad groups with other students. At the end of the course, the instructor will complete the Fitness Review Form (See Appendix V in the Resources section (p. 982)). Students will review the evaluation form with the instructor at the end of the class. The form will remain in the student's file and will serve as one of the means for evaluating readiness for clinical internship placement.

During the internship experience, evaluation is assessed through the Professional Counselor Performance Evaluation (PCPE). This form is a validated and widely used measure used in assessing student skills and readiness.

If there is concern for a student's ability to be successful during clinical internship, a remediation plan will be put into place (see IRP policy in the Program Policies section (p. 980)).

The Internship Experience
The internship is an exciting opportunity for students to gain necessary practice in professional counseling prior to graduating from a graduate training program, and it is a fundamental requirement of such training. Students will complete an internship at a designated mental health services agency, and receive supervision from the site supervisor determined by the agency, the Fordham faculty clinical instructor, and the Fordham clinical director during this process. The Fordham clinical director will maintain regular contact with the agency site supervisor throughout a student's placement. The Fordham clinical director may make site visits to students' agency placement sites near the beginning of placement, and at other times as appropriate.

Please take note that the internship
• may only start in the fall semester. No exceptions will be granted to this policy;
• is two semesters long and must be completed in two consecutive terms;
• must total 600 hours, of which 240 hours must be direct client contact hours;
• cannot be your place of employment.

Expectations of Students
The STUDENT will be expected to
1. be involved clinically about 15 to 20 hours each week (seeing approximately six to eight clients);
2. audio or video tape counseling sessions if applicable to site;
3. be punctual, responsible, and professional at all times;
4. know and follow at all times the American Counseling Association Code of Ethics;
5. meet with agency supervisor for an hour each week for at least 15 weeks each semester. Each of these supervision sessions is to be scheduled in advance on an agreed-upon time and date;
6. write case notes in a timely manner;
7. commit to the agency for the fall and spring semesters (September 1 to May 15);
8. evaluate the agency and supervision at the end of the spring semester;
9. inform the Fordham clinical director whenever there is a change of site supervisors at the agency;
10. see clients only on the premises of the agency (as designated by the agency) and only during regularly established client hours;
11. handle the resolution of any difficulties or conflicts which arise at the agency in a professional manner.

The Fordham clinical director is available to assist in helping students meet their expectations. In the case of conflicts or difficulties, the Fordham clinical director should be notified as soon as possible.

Expectations of Agency Supervisors
The AGENCY SUPERVISOR will be expected to provide a complete orientation of the staff, facility, rules, regulations, and procedures of the agency as well as

1. see that the student builds a client load of up to six to eight clients. It is hoped that some clients will provide a long-term counseling experience. If either of these situations does not appear likely, please notify the student and the Fordham clinical director as soon as possible;
2. allow, arrange, and review regular audio or video taping of the student's counseling training/service delivery (if applicable to site);
3. provide an hour of individual clinical supervision weekly at a set time and on a set day. Fifteen hours of individual supervision are expected each semester at the agency setting;
4. complete three evaluations of the student counselor over the year. The evaluation is to provide feedback both in regards to strengths and growing edges. Please note any major difficulties the student may be having (with clients, agency personnel, other interns, etc.) and bring to the student's immediate attention and, if necessary, to the attention of the Fordham clinical director;
5. discuss the evaluation with the student during supervision prior to sending the evaluation to the clinical director;
6. return the evaluation by October 15, December 1, and May 1;
7. attend the fall supervisor/faculty luncheon; this will provide an opportunity to meet with the student’s small-group supervisor;
8. negotiate school vacation periods with the student so that a responsible counselor-client relationship is maintained. (Two weeks at Christmas and an additional week at Spring Break OR Holy Week).

Steps to Completing the Internship
In order to complete the internship, the following steps must be followed:

Step 1: Satisfactory academic progress
Satisfactory academic progress is a prerequisite to the internship and must be maintained throughout the internship. Students must be in good academic standing in the graduate school as indicated by meeting the 3.0 GPA requirement, have no less than a B in any program requirement, and if an IRP is in place, satisfactorily meet the requirements of the plan.

Step 2: Satisfactory clinical and professional progress
Satisfactory clinical and professional progress is a prerequisite to the internship and must be maintained throughout the internship. Prior to internship, students must demonstrate clinical readiness with the Basic Skill Form. During the internship, students must demonstrate progress through the Professional Counseling Progress Evaluation (PCPE) form.

Step 3: Application for Internship (see Appendix VII in the Resources section (p. 982))
Students must inform the clinical director of their intent to complete an internship. This is done via an application. The application for the internship is due to the Clinical Director by November 1 the year before the internship begins.

Step 4: Meeting with the Clinical Director
Once the application has been reviewed, the clinical director will schedule a meeting with the student. This meeting will take place in November. In the December faculty meeting, the program faculty will discuss each application for internship. If a student is not approved by the faculty for a clinical internship, a student remediation plan will be put into place (see IRP policy in the Program Policies section (p. 980)).

Step 5: Internship Search
After the clinical director has approved a student for an internship, the student may begin to look for a placement site. Students are responsible for arranging their own internship placement, in consultation with the clinical director. The clinical director maintains a list of possible internship sites, including student evaluations of internship sites. Students are free to research additional sites on their own. All placement sites and site supervisors must meet the requirements outlined above under the requirements and expectations of student and supervisor. When looking for an internship, a student may find it useful to use the description of the 60-credit pastoral mental health counseling program for potential supervisors (see Appendix VI in the Resources section (p. 982)).

Timeline for Securing an Internship
Beginning the year PRIOR to Internship:

September-November
Meet with your academic adviser to review coursework and to sign application for internship. Include your resume.

Mid October
Attend the yearly Pastoral Mental Health Counseling Student Orientation Meeting

November 1
Application and resume due to clinical director

November-December
Arrange a meeting with clinical director for Pre-Internship Interview

January
Arrange interviews with internship sites

February-April
Interview with at least two sites. Students notify of sites not accepted.

May 15
Completed and sign the Agency Opening Form, Educational Agreement Form, and Supervisor Dossier due to clinical director

July 1
Student arranges with site supervisor initial start date, days, and hours to be on-site. The first date of internship cannot be prior to the start of the fall semester.

Required Forms for Internship
Once an internship has been secured, it is up to the student to be certain the following forms are completed, and on file, with the clinical director before May 15 the year prior to internship:

• Agency Opening Form (Appendix VIII in the Resources section (p. 982))
  This form provides information about the agency including name, location, telephone number, contact person, client focus of the agency, supervisor of the intern, days/times student will be on site, and if the site allows taping of clinical work for educational purposes.

  • Educational Agreement (Appendix IX in the Resources section (p. 982))
  This form outlines the duties and responsibilities of the Fordham intern and the agency where the internship takes place.

  • Supervisor Dossier (Appendix X in the Resources section (p. 982))
  This form provides evidence of the supervisor’s credentials and evidence of ability to serve in the capacity of a clinical supervisor of interns.

  • Contract (if required by internship site)

After the internship is under way, the following forms must be completed:

• The Monthly Hours Worksheet (Appendix XII in the Resources section (p. 982))
  Must be filled out, signed by the supervisor, and submitted to the clinical director at the end of each month. It is recommended that students maintain a copy of all hours as well.

• Self-Evaluations October 15, Dec 1, and May 1. (Appendix XIII in the Resources section (p. 982))
  Once the internship is completed, students must complete an evaluation of the site. This form is due by MAY 1.

Malpractice Insurance
Students who are enrolled in the internship classes (Clinical I and II; Field placement) are covered by Fordham’s malpractice insurance. However, students may wish to maintain their own policy. Student policies are
available through the American Counseling Association for students and graduates.

Clinical and Professional Evaluation
