• Mathematics Major (p. 1246)
• Mathematics Minor (p. 1247)
• Mathematics/Economics Major (p. 1151)
• Mathematics/Economics Major (p. 1247)
• Media Management (M.S.) (p. 684)
• Medieval Studies (Adv Cert) (p. 783)
• Medieval Studies (M.A.) (p. 783)
• Medieval Studies Major (p. 1248)
• Medieval Studies Minor (p. 1250)
• Mental Health Counseling (M.S.E.) (p. 864)
• Middle Childhood Biology 7-9, Advanced Certificate (p. 859)
• Middle Childhood Chemistry 7-9, Advanced Certificate (p. 859)
• Middle Childhood English 7-9, Advanced Certificate (p. 859)
• Middle Childhood Mathematics 7-9, Advanced Certificate (p. 860)
• Middle Childhood Physics 7-9, Advanced Certificate (p. 860)
• Middle Childhood Social Studies 7-9, Advanced Certificate (p. 860)
• Middle East Studies Major (p. 1250)
• Middle East Studies Minor (p. 1251)
• Ministry (D.Min.) (p. 961)
• Music Major (p. 1265)
• Music Minor (p. 1266)
N
• Natural Science Major (p. 1267)
• New Media and Digital Design Major (p. 1268)
• New Media and Digital Design Minor (p. 1270)

O
• Organizational Leadership Major (p. 1277)
• Organizational Leadership Minor (p. 1277)
• Orthodox Christian Studies Minor (p. 1272)

P
• Pastoral Care (M.A.) (p. 974)
• Pastoral Mental Health Counseling (M.A.) (p. 975)
• Pastoral Studies (M.A.) (p. 983)
• Peace and Justice Studies Minor (p. 1281)
• Ph.D. in Business (p. 663)
• Ph.D. in Social Work (p. 1023)
• Philosophical Resources (M.A.) (p. 790)
• Philosophy (M.A.) (p. 791)
• Philosophy (Ph.D.) (p. 793)
• Philosophy Major (p. 1282)
• Philosophy Minor (p. 1284)
• Physics Major (p. 1285)
• Physics Minor (p. 1286)
• Playwriting (M.F.A.) (p. 840)
• Political Science Major (p. 1287)
• Political Science Minor (p. 1289)
• Post-Baccalaureate Pre-Medical/Pre-Health Program (p. 1278)
• Pre-Law (p. 1314)
• Pre-MBA Program (p. 688)
• Pre-Medical and Pre-Health (p. 1315)
• Preschool Child Psychology (M.S.E.) (p. 940)
• Professional Accounting (M.S.) (p. 684)
• Professional M.B.A. (p. 675)
• Professional Taxation (M.S.) (p. 686)
• Psychology Major (p. 1290)
• Psychology Minor (p. 1291)
• Psychology of Bilingual Students (M.S.E.) (p. 941)
• Psychometrics and Quantitative Psychology (Ph.D.) (p. 810)
• Public Accountancy Concentration (p. 675)
• Public Media (M.A.) (p. 724)
• Public Opinion and Survey Research (Adv Cert) (p. 797)

Q
• Quantitative Finance (M.S.) (p. 686)

R
• Real Estate (M.S.) (p. 1043)
• Real Estate Development (Adv Cert) (p. 1044)
• Real Estate Finance (Adv Cert) (p. 1045)
• Real Estate Major (p. 1279)
• Real Estate Minor (p. 1280)
• Religious Education (M.A.) (p. 984)
• Religious Education (Ph.D.) (p. 966)
• Religious Studies Major (p. 1292)
• Religious Studies Minor (p. 1292)
• Russian Minor (p. 1262)

S
• School Building Leader (M.S.E.) (p. 924)
• School Counseling (M.S.E.) (p. 865)
• School District Leadership, Advanced Certificate (p. 925)
• School Psychology (Ph.D.) (p. 942)
• School Psychology Bilingual Extension, Advanced Certificate (p. 944)
• School Psychology, Advanced Certificate (p. 945)
• Social Work Major (p. 1307)
• Sociology Major (p. 1309)
• Sociology Minor (p. 1310)
• Spanish Language and Literature Major (p. 1262)
• Spanish Minor (p. 1263)
• Spanish Studies Major (p. 1263)
• Special Education/Teaching English to Speakers of Other Languages, Advanced Certificate (p. 861)
• Spiritual Direction (Adv Cert) (p. 949)
• Sports Journalism Minor (p. 1114)
• Strategic Marketing Communications (M.S. Online) (p. 687)
• Supervision (Adv Cert) (p. 950)
• Sustainable Business Minor (p. 1325)

T
• Teaching English to Speakers of Other Languages (M.S.T.) (p. 917)
• Teaching English to Speakers of Other Languages, Advanced Certificate (p. 861)
• Theatre Major (p. 1327)
• Theatre Minor (p. 1328)
• Theology (Ph.D.) (p. 848)
• Theology Religious Studies Major (p. 1332)
• Theology Religious Studies Minor (p. 1334)
• Theology Religious Studies Second Major (p. 1334)
• Therapeutic Interventions (M.S.E.) (p. 946)

U
• Urban Studies (M.A.) (p. 851)
• Urban Studies Major (p. 1335)
• Urban Studies Minor (p. 1336)

V
• Visual Arts Major (p. 1329)
• Visual Arts Minor (p. 1331)

W
• Women, Gender, and Sexuality Studies Major (p. 1337)
• Women, Gender, and Sexuality Studies Minor (p. 1337)
# ATTRIBUTE CODE INDEX

This page is a list of all course attributes, listed by college, and their use.

COURSE DESCRIPTIONS

A

- Accounting (Graduate) (ACGB) (p. 25)
- Accounting (Undergraduate) (ACBU) (p. 27)
- Accounting Law (ACGL) (p. 29)
- Administration and Supervision (GSE) (ASGE) (p. 29)
- Administrative Law (ADGL) (p. 32)
- African and African American Studies (AFAM) (p. 32)
- American Catholic Studies (AMCS) (p. 39)
- American Studies (AMST) (p. 42)
- Anthropology (ANTH) (p. 42)
- Antitrust (ATGL) (p. 50)
- Applied Statistics and Decision Making (SDGB) (p. 51)
- Arabic (ARAB) (p. 52)
- Art History (ARHI) (p. 53)

B

- Banking (BKGL) (p. 59)
- Bankruptcy (BRGL) (p. 61)
- Biological Sciences (BISC) (p. 61)
- Business Administration (BABU) (p. 65)
- Business Analytics (BYGB) (p. 65)
- Business Economics (BEGB) (p. 66)
- Business Law (Gabelli Graduate) (BLGB) (p. 66)
- Business Law (Gabelli Undergraduate) (BLBU) (p. 68)
- Business PhD (BPHD) (p. 69)

C

- Center for Ethics Education (CEED) (p. 72)
- Chemistry (CHEM) (p. 74)
- Civil Law (CVGL) (p. 77)
- Civil Rights (CIGL) (p. 79)
- Classical Languages and Civilization (CLAS) (p. 80)
- Clinic (Law) (CLGL) (p. 84)
- College at 60 (CASP) (p. 98)
- Commercial Law (COGL) (p. 99)
- Communication and Culture (COMC) (p. 101)
- Communication and Media Management (Gabelli Graduate) (CMGB) (p. 109)
- Communication and Media Management (Gabelli Undergraduate) (CMBU) (p. 112)
- Communication and Media Studies (COMM) (p. 114)
- Communications Law (CMGL) (p. 115)
- Comparative Literature (COLI) (p. 115)
- Compliance (Law) (CPGL) (p. 126)
- Computer and Information Sciences (CISC) (p. 131)
- Consulting Project GBA (CPGB) (p. 146)
- Consulting Projects (CPBU) (p. 146)
- Contemporary Learning And Interdisciplinary Research (CLAIR) (CLGE) (p. 146)
- Contracts Law (CNGL) (p. 148)

- Core Business (CBBU) (p. 149)
- Core Business - Doctor Prof St (CBDP) (p. 149)
- Corporations Law (BUGL) (p. 151)
- Criminal Law (CRGL) (p. 154)
- Curriculum and Teaching (CTGE) (p. 157)

D

ACGB 6111. Fundamentals of Accounting I. (3 Credits)
MBA CORE COURSE This core course in accounting is required of all Gabelli graduate students in every concentration. Provides insights into how accounting information can be used by investors and creditors to measure the results of business operations. Students requiring more in-depth accounting knowledge can select electives in financial and/or managerial accounting as their advisers suggest.

Attribute: ASDM.
Mutually Exclusive: MMGB 6111.

ACGB 7045. International Tax and Accounting. (3 Credits)
Introduces the complexities of international taxation by focusing on the U.S. tax system’s impact on U.S. companies investing or operating abroad and on foreign companies investing or operating in the U.S. Topics include tax treaties, foreign tax credits, and controlled foreign operations. It also addresses global initiatives with respect to taxation and accounting. TXGB 7010 is recommended as a prior course.

Prerequisite: TXGB 7001.

ACGB 7076. Tax Accounting. (3 Credits)
This course focuses on the financial reporting provisions related to income taxes. Students will learn how to (1) calculate and identify income tax amounts reported on the income statement, balance sheet, and statement of cash flows; and (2) prepare the income tax footnote to the financial statements and related disclosures. The course will also cover some audit issues related to income tax balances, and students will learn to identify such risks in tax and internal controls to mitigate such risks.

ACGB 7105. Financial Accounting. (3 Credits)
Develops the ability to analyze and interpret financial statements and studies the effects of alternative accounting standards and practices on income statements, balance sheets, and statements of cash flows.

Attribute: ABEP.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7120. Ext Finl Info & Rptg. (3 Credits)
Focuses on the theory and techniques utilized in corporate financial reporting. Examines the standards and pronouncements of the Financial Accounting Standards Board (FASB) and the Securities and Exchange Commission (SEC) with regard to their impact on financial statements. Emphasizes the analysis and understanding of financial reports rather than the mechanics of their construction. Designed primarily, but not exclusively, for students in the public accounting programs.

Prerequisites: (ACGB 7105 or GBA Waiver Financial Acct with a score of 070) and (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

ACGB 7125. Financial Statement Analysis. (3 Credits)
Gives students in the general MBA program a better understanding of financial statements and the information they communicate on the operating, investing and financing activities of corporations. Focuses on the impact of financial accounting principles, disclosure standards and alternative accounting practices on financial reports. Examines and evaluates traditional and non-traditional methods of financial statement analysis.

Attribute: ASDM.

Prerequisites: (ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070) and (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

ACGB 7128. Advanced Financial Statement Analysis. (3 Credits)
Augments the concepts taught in ACGB 7125. Also introduces state-of-the-art tools based on modern financial theory for analyzing financial reports. Topics may include: off-balance-sheet financing; damage assessment and litigation regarding misrepresentation; new reporting standards; and international accounting standards and consolidation issues.

Attribute: ASDM.

Prerequisite: ACGB 7125.

ACGB 7130. Adv Ext Info & Rptg. (3 Credits)
Critically examines accounting principles and standards for corporate financial reporting with particular emphasis on mergers and other consolidations, asset sales and divestitures. Additional topics include fund accounting, foreign currency, partnerships and segment and interim reporting.

Prerequisites: (ACGB 7120 or GBA Waiver Ext FinInfoReprt with a score of 070).

ACGB 7136. International Accounting. (3 Credits)
Provides students with an understanding of accounting problems and issues encountered by multinational corporations (MNCs) operating in an international environment. Most businesses today, large and small, have customers or clients throughout the world. The course covers the general problems facing MNCs, which will prepare students to interpret financial statements of MNCs.

Attribute: ABIB.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.
ACGB 7140. Valuation of Intangibles. (3 Credits)
Familiarizes students with the process of developing Generally Accepted Accounting Principles (GAAP). The course covers the Financial Accounting Standards Board (FASB) and its interaction with the Securities and Exchange Commission (SEC). A major portion of the course is devoted to an analysis of current financial reporting issues being addressed by the FASB and the impact that alternative solutions could have on reported financial results. The course also includes a discussion of various international accounting standard-setting bodies and their roles in financial reporting, domestically and abroad.
**Prerequisites:** ACGB 7120 or ACGB 7125 or GBA Waiver Ext FinInfoReprt with a score of 070.

ACGB 7155. Managerial Accounting Analysis. (3 Credits)
MBA FLEX CORE COURSE For students in the general MBA program, focuses on product and service cost determination and using cost analysis in management decision making, control and performance evaluation. Oriented toward the manager as a user and interpreter of accounting information. Teaching includes case analysis and problem-solving.
**Attribute:** ABEP
**Prerequisites:** ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7160. Internal Reporting & Control. (3 Credits)
The objective of this course is to provide students with an understanding of IT internal controls, including the IT audit function as it relates to Sarbanes Oxley. Emphasizes the identification of information technology control weaknesses as well as their impact on risk management.
**Prerequisites:** ACGB 7171 or GBA Waiver Audit Acct Sys1 with a score of 070.

ACGB 7171. Auditing of Accounting Systems I. (3 Credits)
Familiarizes students with the audit procedures required under Generally Accepted Auditing Standards (GAAS). Among the topics covered are audit planning, evaluating internal control, auditing transaction cycles and audit reports. Directed toward students in the public accounting programs who plan to take the Uniform Certified Public Accountant examination.
**Prerequisites:** ACGB 7105 (may be taken concurrently) or GBA Waiver Financial Acct with a score of 070.

ACGB 7176. Advanced Audit Concepts and Practices. (3 Credits)
This class focuses on audit-testing techniques and the current auditing environment. Audit-testing techniques include statistical sampling and analytical procedures. The class will also cover recent trends in audit litigation, IRS uses of statistical methods, and forensic techniques. Conducted as a seminar, students will work individually and in groups on case studies and a term paper. Oral and written presentations are required.
**Prerequisites:** GBA Waiver Audit Acct Sys1 with a score of 070 or ACGB 7171.

ACGB 7184. Individual and Business Entity Taxation. (3 Credits)
Explores the sources and ideas underlying tax laws and their development in relation to fiscal and social policy. Emphasizes the application of basic concepts in tax planning for individuals and businesses. Topics include gross income, exclusions, deductions, credits, property transactions, basis and the alternative minimum tax.
**Attribute:** ABEP
**Prerequisites:** ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7185. Derivatives and Analytics for Accounting. (3 Credits)
This course is designed to provide a broad introduction to both the valuation of derivative securities and the accounting for derivative securities used for both speculative and hedging purposes. Specific accounting standards related to derivatives will be used to provide guidance on the accounting for these securities. Microsoft Excel is used extensively to both value and account for the derivative securities.
**Attribute:** ISEL.
**Prerequisite:** ACGB 6111.

ACGB 7186. Derivatives and Their Accounting. (3 Credits)
This course is designed to provide a broad introduction to both the valuation of derivative securities and the accounting for derivative securities used for both speculative and hedging purposes.

ACGB 7187. Valuation of Intangibles. (3 Credits)
This class focuses on the identification, economic characteristics, valuation, and accounting of intangible assets and intellectual property (IP). Valuation techniques include the analysis of transactions for comparable assets, discounted projected cash flows from use in operations or from royalty streams, and replication cost. Case studies are used to illustrate how intangible assets and IP are valued in practice and how merger and acquisition transactions can succeed or fail depending on whether intangible assets and IP are properly valued. The accounting analysis focuses on both the determination of cost and the periodic assessment for impairment.

ACGB 719B. Forensic Accounting. (3 Credits)
Forensic Accounting.
**Prerequisites:** ACGB 7105 or GBA Waiver Financial Acct with a score of 070.

ACGB 719C. Financial Accounting/Financial Statement Analysis. (3 Credits)
Study of financial accounting and financial statement analysis.

ACGB 719D. Accounting Information Systems. (3 Credits)
The purpose of this course is to introduce students to the subject of computer-based accounting information systems. The four critical objectives are a sound understanding in business processes, transaction cycles, internal controls and the systems components of each.
**Prerequisites:** ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 719E. Data-Based Operation Controls. (3 Credits)
The primary focus of the class will be on the use of data-driven analytics to help managers make key operating and strategic decisions. A secondary focus will be on the use of data-driven analytics for the purpose of internal control.
**Prerequisite:** ACGB 7155.

ACGB 719F. Accounting Controls. (3 Credits)
The primary focus of the class will be on the use of data-driven analytics to help managers make key operating and strategic decisions. A secondary focus will be on the use of data-driven analytics for the purpose of internal control.
**Attribute:** ASDM.
**Prerequisite:** ACGB 7155.

ACGB 719G. Audit Data Analytics. (3 Credits)
Introduces audit and accounting students to data analytics foundations, methods and tools. It reviews industry applications and trends. Students will do hands-on projects analyzing audit and other accounting data.
**Attributes:** ASDM, BUAN, ISEL.
ACGB 719H. IT Audit and Information Assurance. (3 Credits)
This course will present an overview of the various elements of IT Audit and Information Assurance. Basic IT audit and information assurance concepts will be discussed and analyzed. General IT and application controls will be covered along with how the controls underlie SOX Section 404 Legislation. The course will also examine business processes, technologies and controls relating to financial reporting. Key components of information systems, including operating system security, database controls, network safeguards, systems development and application maintenance will also be covered. Technology processes supported under COBIT 5 will be discussed along with risk assessment techniques. The challenges around information assurance, data governance and privacy will be explored in detail.
Attributes: ASDM, BUAN, ISEL.

ACGB 719J. Industry Analysis and Strategic Planning. (3 Credits)
Discusses techniques for analyzing the long-term attractiveness of different industries and develops a framework to understand the nature of competition and the relative competitive position of firms within industries. Emphasizes global factors that affect industry attractiveness and competitive positioning. In particular, highlights the impact of differences in and the competitive advantages of nations and trade, as well as the development of global standards for the long-term profit potential of industries. While this course emphasizes the industry level, it also includes competitive factors of firms within industries to introduce a framework for strategic planning at the firm level.
Attribute: ASDM.

ACGB 719L. Sustainability Research and Reporting. (3 Credits)
This course enables students to develop a deep understanding of industry standards and expanding regulations and guidance on sustainability by examining current company disclosures and evaluating to what level such disclosures reflect the company’s associated industry standard. Students will form their own views on how companies’ disclosures compare to the standards with respect to their relevance, fair representation, and usefulness in helping investors assess performance on material sustainability topics.

ACGB 719M. Financial Modeling for Accounting. (3 Credits)
Develops (using Excel) the type of financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Covers modeling of financial statements and models in many other important practical areas, such as time value of money, project evaluation, bonds, investment management and derivatives. Emphasizes using most powerful and useful tools in Excel, such as logical functions, PivotTables, Data Table, Scenario Manager, and Goal Seek to solve problems that closely resemble real-life situations.

ACGB 719N. Business Risks In A Global Digital Economy. (3 Credits)
Our global, digital world has created a complex landscape with unprecedented challenges and risks for business. This course analyzes the ever-changing challenges companies face in this new environment. Lectures will discuss government policies, strategies, and tactics driving enforcement activity and outline the most effective approaches for preventing, detecting, and responding to these risks. Students will gain an understanding of these challenges in both the private and public sectors in varying industries.

ACGB 719P. Professional Practice Research Seminar. (3 Credits)
Accounting research is applied research that focuses on the study of technologies and technical practices used by accounting practitioners in social and organizational settings. This course identifies specific issues of importance to public practitioners. Students will be provided with guidance and tools to research practical solutions and explore ways to communicate their findings with stakeholders. Students will collaborate with prominent members of the accounting profession, such as partners and/or directors from one of the major international accounting firms. The firms recognize that academic research is a requirement for accounting academic career progression, and an important contributor to the development of knowledge and scholarship for the profession and society. Under the supervision of a faculty member, students will have an opportunity to enhance their research skills, improve their communication skills, and expand their professional network through their interaction with prominent members of the profession.

ACGB 7811. Accounting Internship. (1 to 3 Credits)
This course is intended for students with an Accounting internship for this trimester that wish to receive academic credit for it. The course will begin with an orientation session and will be followed by additional meetings with students. The course instructor will provide additional details to enrolled students.

ACGB 819A. Valuation and Modeling for Accounting. (1.5 Credits)
This course expands on valuation techniques discussed in Modern Financial Analysis and Valuation Techniques. Students will have the opportunity to learn the modeling techniques used by today’s Wall Street practitioners associated with Discounted Cash Flow Analysis, Merger Analysis, Purchase Price Allocations and Synergy DCFs.
Attribute: ASDM.
Prerequisite: ACGB 819B (may be taken concurrently).

ACGB 819B. Modern Financial Analysis. (1.5 Credits)
Learn how the financial services industry applies valuation techniques in a deal context! In this mini-course, you will demystify the theory behind the analytics and ultimately appreciate the “art” and “science” of valuation analytics. What is a company worth? What is someone willing to pay? The answers depend on: who the seller is; who the potential buyer(s) is; the context of the transaction and the current market conditions.

ACGB 8999. Independent Study. (3 Credits)

Accounting (Undergraduate) (ACBU)

ACBU 2222. Principles of Financial Accounting. (3 Credits)
This course covers the basic of financial accounting. Students will learn the accounting cycle and accounting terminology, and they will master the major recognition, measurement and disclosure principles that serve as the foundation for financial accounting. In addition, students are introduced to the basics of analyzing financial statements for decision making.
Attributes: ACMI, BUMI.
Prerequisites: ECON 1200 or ECON 1250.

ACBU 2223. Principles of Managerial Accounting. (3 Credits)
This course covers how to measure and use cost data for internal decision making under uncertainty. Among the topics covered are job costing, process costing, standard costing, activity-based costing, budgeting, balanced scorecard, direct versus indirect cost measures, cost volume profit analysis, and management control systems.
Attributes: ACMI, BUMI.
Prerequisite: ACBU 2222.
ACBU 3421. ST: Accounting Information Systems. (3 Credits)
This course introduces students to computer-based accounting information systems (AIS). Students master the understanding of business processes, transaction cycles and internal controls, as well as their respective current day systems components.
Attributes: ACMI, BUMI, PRQU.
Prerequisite: (INSY 2300 (may be taken concurrently) or INSY 2299) and ACBU 2222.

ACBU 3434. Intermediate Financial Accounting I. (3 Credits)
This course is the first of a two-semester course of intensive study in accounting theory and its applications. Major topics include the conceptual frameworks, special cases of revenue recognition and the accounting standards that pertains to current and noncurrent assets.
Attributes: ACMI, BUMI.
Prerequisite: ACBU 2222.

ACBU 3435. Intermediate Financial Accounting II. (3 Credits)
This course is the continuation of ACBU 3434. The course contains rigorous, in-depth coverage of current and noncurrent liabilities, as well as owners’ equity. In addition, the course revisits the cash flow statement for additional pertinent topics.
Attributes: ACMI, BUMI.
Prerequisite: ACBU 3434.

ACBU 3436. Global Financial Statement Analysis. (3 Credits)
This course provides students with the tools necessary to understand, analyze, and use the information provided in corporate financial statements in a global environment. Students learn to analyze complex accounting issues under both domestic and international generally accepted accounting principles.
Attribute: GLBB.
Prerequisite: ACBU 2222.

ACBU 3441. Advanced Concepts in Financial Accounting. (3 Credits)
This course focuses on the preparation of consolidated financial statements stemming from mergers and acquisitions, as well as other types of inter-corporate investments. Also covered are accounting issues pertaining to foreign exchange translations and transactions, as well accounting for derivatives. Issues pertaining to governmental accounting and to partnerships are also addressed.
Attributes: ACMI, BUMI.
Prerequisite: ACBU 3435.

ACBU 3442. Individual and Business Taxation. (3 Credits)
This course covers the basic principles of taxation of individuals and businesses.
Attributes: ACMI, BUMI.
Prerequisite: ACBU 2222.

ACBU 3443. Assurance and Auditing. (3 Credits)
This course covers the basic concepts and procedures of auditing. Topics include generally accepted auditing standards, internal control, computer-based auditing, the audit report, professional ethics and legal responsibilities.
Attributes: ACMI, BUMI, PRQU.
Prerequisite: ACBU 3435.

ACBU 3444. Advanced Assurance and Auditing. (3 Credits)
(Formerly ACBU 3440.) This course introduces students to the real-life demands of the workplace of public accounting. One part of the course is devoted to requisite 'soft skills' that students will need as they enter the workforce. Other parts of the course focus on hands-on auditing skills and audit strategy. This course also contains relevant content to the regulatory context of the audit function, including, for example, laws such as Sarbanes-Oxley.
Attributes: ACMI, BUMI.
Prerequisite: ACBU 3443.

ACBU 3445. Corporate and Partnership Taxation. (3 Credits)
This course provides an in-depth coverage of special issues relating to taxation of partnerships, estates and trusts, corporations and tax-exempt entities.
Attributes: ACMI, BUMI, ENT.
Prerequisite: ACBU 3442.

ACBU 3449. ST: Process Mgt & Six Sigma. (3 Credits)
This course focuses on process management and how to improve organizational processes by using a body of knowledge known as Six Sigma. A process is the unity of multiple activities that transform required inputs into desired outputs. Poorly-designed processes produce defective goods and services that lead to customer dissatisfaction and a higher level of internal and external failure cost. Therefore, continually improving process performance is critical to organizations’ survival and success. Class lectures, discussions, and case studies in the course cover the methods and tools used for a Six Sigma project, such as project selection, process mapping and analysis, data collection, statistical data analysis, root-cause analysis, and creative thinking for both continual and breakthrough improvements.

ACBU 3560. ST: Study Tour Italy. (3 Credits)
This course is designed to provide students with an opportunity to combine academic study of international business and on-site corporate visits to international firms and exchange markets. International visitations provide students with the ability to observe the implementation of accounting theories into practice. Students are further enriched by lectures and assignments that are designed to hone their accounting analytical skills as well as their ability to appreciate financial reporting in a global commerce.
Attributes: GLBB, SOIN.
Prerequisites: ACBU 2222 and ACBU 2223.

ACBU 3561. ST: Global Immersion Zurich. (3 Credits)
Modern day businesses is conducted in a global environment. This class addresses how the U.S. and Europe, especially Switzerland, differ in terms of how they tax transactions. The course also addresses steps taken to stop hiding of assets in overseas accounts. It also addresses working overseas along with tax and business issues with equalization the workers so they are held financially harmless by overseas assignments. Class meetings prior to departure will be comprised of lectures focused on the class model to help provide context and prepare students for their experience in Zurich.
Prerequisite: ACBU 2222.
ACBU 3562. ST: Global Immersion Greece. (3 Credits)
Modern day business is conducted in a global environment. This class addresses how the U.S. and other countries, especially Greece, differ in terms of how they tax transactions. The course also addresses steps taken to stop hiding of assets in overseas accounts. It also addresses working overseas along with tax and business issues with equalization the workers so they are held financially harmless by overseas assignments. Class meetings prior to departure will be comprised of lectures focused on the class model to help provide context and prepare students for their experience in Greece.

ACBU 4435. ST: AIS Consulting Project. (3 Credits)
Students define and implement controls to accurately capture and process data and to protect information assets against internal and external risks. Working in teams and under the guidance of a faculty mentor, students develop solutions rooted in rigorous analysis to client problems. At the end of the term, students will present their project findings to the client and receive client feedback. Students acquire consulting and project management skills, and network with industry professionals in accounting and information system areas.
Attribute: PRQU.
Prerequisites: ACBU 2222 and ACBU 2223 and INSY 2299 or INSY 2300.

ACBU 4436. Accounting for Derivative Securities. (3 Credits)
This course is designed to provide a broad introduction to both valuation of derivative securities and accounting for derivative securities used for both speculative and hedging purposes.
Attribute: AAFF.

ACBU 4444. Sustainability Reporting and Disclosures. (3 Credits)
In this course, students explore the changing landscape of corporate reporting. A new, standardized language is needed to articulate the material, non-financial risks and opportunities facing companies today. Both financial and non-financial risks affect a corporation's ability to create long-term value, thus reporting should include information about the way companies compete, use their resources, and impact society. This course helps students hone analytic tools and communication skills, thus enabling students to become successful members of the accounting profession. Additionally, the course will heighten students' awareness of their personal responsibility and the importance of considering the needs of future generations.
Attributes: ACMI, BUMI, PRQU, SOIN.
Prerequisites: ACBU 2222 and ACBU 2223.

ACBU 4500. ST: Cntp Iss Fin Forensics. (3 Credits)
This course focuses on the methods of fraud investigation, detection and prevention. Topics include financial fraud, bankruptcy, and computer forensics, as well as the corresponding professional responsibilities of the CPA.
Prerequisite: ACBU 3435.

ACBU 4646. Ethics in Financial Reporting and Accounting. (3 Credits)
This course provides students with a framework for understanding the critical need for ethics in professionalism in financial accounting. In addition to readings, case studies, and research, the course incorporates interactive learning techniques such as role playing.
Attributes: ACMI, BLEB, BUMI, GLBB, SOIN.
Prerequisites: ACBU 2222 and BLBU 3443.

ACBU 4706. ST: Honors Thesis II - Acctg. (3 Credits)
Students work with a faculty advisor to develop an orginal paper that utilizes the analytical, business and problem solving skills students developed throughout the CBA curriculum.

ACBU 4999. Independent Study. (1 to 3 Credits)

Accounting Law (ACGL)

ACGL 0329. Accounting for Lawyers. (2 to 3 Credits)
Studies business accounting with particular emphasis on the preparation and analysis of financial statements and such problems as revenues and costs, tangible and intangible assets, depreciation and amortization, inventory valuation, and surplus and reserves. In addition, discussion is directed to various phases of legal problems and the legal and financial decisions with respect to them. The course is not open to students who have taken accounting in college.
Attributes: BFF, CORC, CRCP, LAWB.

ACGL 1329. Accounting Experiential Skills. (1 Credit)
Accounting Experiential Skills is a one-credit additional component to the Accounting for Lawyers class (CRN 30075). Students must register in both classes concurrently. In the experiential section, students will have the opportunity to draft and analyze financial statements, and other document relating to accounting and financial statement analysis. The goal of the class is to improve familiarity with accounting and financial concepts and attain a high level of financial literacy, which is an important skill in many areas of law practice.
Attributes: CORC, CRCP, LLM.
Prerequisite: (ACGL 0329 (may be taken concurrently)).

Administration and Supervision (GSE) (ASGE)

ASGE 0701. Master's Comprehensive Exam/Assessment. (0 Credits)
Master's comprehensive exam or assessment for programs in the Division of Educational Leadership, Administration, and Policy.

ASGE 0705. HRE Master's Comprehensive Exam. (0 Credits)
Master's comprehensive exam or assessment for programs in the Division of Educational Leadership, Administration, and Policy.

ASGE 0900. Maintenance of Matriculation. (0 Credits)
Maintenance of Matriculation.

ASGE 0901. Comprehensive Assessment. (0 Credits)
Doctoral comprehensive exam or assessment for programs in the Division of Educational Leadership, Administration, and Policy.

ASGE 0999. ELAP Proposal Acceptance. (0 Credits)
During the semester the dissertation proposal is completed.

ASGE 5112. Fundamentals of Educational Administration and Management. (1 to 3 Credits)
A basic course dealing with the role of the school-based administrator in the administration of schools. The course takes up issues related to account management issues, school effectiveness, human resources, communications, and human relations.

ASGE 5119. Fundamentals of Educational Supervision. (3 Credits)
Considers the human, technical, educational, and moral aspects of supervision; possible arrangements and alternatives for supervision; effective practices in supervision; and needed involvement of supervision in school restructuring. Students will consider curricula, pedagogy, professional development and evaluation as part of this course.

ASGE 5902. Management of Continuing and Adult Education Programs. (3 Credits)
This course is designed to provide an understanding of current behavior concepts, theories, and processes of management and supervision as applied to adult-education organizations and agencies.
ASGE 6130. Instructional Leadership. (3 Credits)
Development of leadership in optimal staff performance and emphasis on factors that facilitate learning. Students will develop understand their role as instructional leaders using formal and informal observation protocols and practice assessing lessons using a variety of rubrics.

ASGE 6132. Organizational Behavior. (3 Credits)
Focuses on social/psychological forces influencing the behavior of the individual. Topics include communication, perception, motivation, attitudes, values, adult development, leadership, power, and influence.

ASGE 6145. Leading in a Diverse Society. (1 to 3 Credits)
Provides understanding and knowledge of the various cultural and ethnic groups in America and how they have impacted society and vice versa; explores concepts, issues, and dilemmas related to a multicultural, diverse society from both a historical and contemporary perspective; develops strategies to understand dynamics of the school community; and proposes solutions to meet challenges of a diverse society.

ASGE 6224. The Superintendency. (3 Credits)
Consideration of the chief roles of the superintendent of schools, such as school board relationships; personnel; finance and budgeting; program planning; community relationships; local, state, and federal relationships; and evaluation.

ASGE 6225. Boards of Education. (3 Credits)
The study of the role, responsibilities, power, and legal aspects of dealing with boards of education. Course is designed for board members, and practicing and prospective school administrators.

ASGE 6227. Cases and Simulations in Administration and Supervision. (3 Credits)
This course uses a variety of cases and simulations to provide “situational data” for analysis of issues, problem solving, and leadership development.

ASGE 6322. School Finance. (3 Credits)
Theory and practice of property taxation, tax and educational equity issues, understanding state school aid, and alternatives to existing funding patterns. It also considers the management of financial resources at the district and site level.

ASGE 6325. School Law. (3 Credits)
The legal status of the pupil, the teacher, and the superintendent; liabilities of school boards; inter-relationships of the school and the state. The interrelationships of the school board and municipality, as well as labor laws.

ASGE 6331. Shaping Educational Policy. (3 Credits)
A study of educational management as affected by public policies. Focus on political environments, decision-making processes, and legislation influencing education, as well as strategies and techniques for managing their impact on educational institutions.

ASGE 6338. Ethics of School Administration. (3 Credits)
Using case studies and theoretical analyses, this course examines the ethical issues that school administrators commonly face.

ASGE 6361. Strategic Planning/Change. (3 Credits)
The basic elements and dynamics of planned change are examined. Emphasis is on strategies for achieving change in urban schools, including examples of successful innovation. The course focuses on how school leaders use data and budgets to drive their instruction plans in a K–12 environment.

ASGE 6362. Understanding and Managing Change. (3 to 4 Credits)
Students learn to scan the internal and external environments to identify challenges and constraints, to understand stakeholders’ investments in maintaining or challenging the status quo, to understand and manage change in the context of various change models, and to align business strategies with organizational systems and structures.

ASGE 6371. Hist & Descrip Research. (3 Credits)
Techniques in the use of archival materials, primary sources, and secondary publications will be taught in the framework of educational policy research.

ASGE 6461. Critical Issues in Educational Leadership. (0 to 3 Credits)
This course synthesizes research on enduring and emerging issues in administration and supervision, including retrenchment, special education, finance, and desegregation.

ASGE 6520. Internship I. (3 Credits)
Systematic observation and planned participation in the administrative and supervisory activities of an urban or suburban school. Application must be submitted to the division chairperson by the end of the second month of the semester preceding internship.

ASGE 6521. Internship II. (3 Credits)
Systematic observation and planned participation in the administrative and supervisory activities of an urban or suburban school. Application must be submitted to the division chairperson by the end of the second month of the semester preceding internship.

ASGE 6532. Seminar for Nonpublic School Administrators. (1 to 3 Credits)
This is an individualized, project-centered course in which participants will bring together multiple understandings and competencies developed in earlier courses and focus them in a synthetic way on a major problem or issue.

ASGE 6541. Perspectives on Leadership. (3 Credits)
This course is designed to expose participants to various theories of leadership, to have them examine their own experience in working with a leader, to have them probe their own sources of motivation in seeking to exercise leadership, and to have them develop specific leadership skills and approaches in becoming accountable school leaders.

ASGE 6620. Advanced Statistics in Administration and Supervision. (3 Credits)
Covers statistical inference and prediction in research in educational leadership, administration, and policy, including parametric and nonparametric methods, and concepts of measurement and probability.

ASGE 6720. Program Evaluation and Research in Administration and Supervision I. (3 Credits)
Focuses on the nature of research as it applies to studies in educational leadership, administration, and policy. Includes the development of research topics and the selection of appropriate ways to investigate these topics. Students will learn how to use data to drive instruction.

ASGE 7320. Data Analysis & Accountability. (3 Credits)
School administrators are challenged to manage and analyze data to inform instruction and improve student performance. This course teaches the use of data for setting goals, monitoring progress and using data warehousing—thus holding educators accountable for results. Students will analyze and share data in ‘data cycle’ format to inform educators and the public regarding what they receive from the district and/or read in the print and electronic media.
ASGE 7322. Economics and Finance of Education. (3 Credits)
In this course, students study the efficiency, equity, and adequacy of the funding of education—including sources, budgets, uses, and effects—at the federal, state, and local levels. Key concerns are the equity of spending, the efficiency of resource utilization, the productivity of schools in relating fiscal resources to learning opportunities and student achievement, and the privatization of education (e.g., charter schools, vouchers, and school choice).

ASGE 7333. Data Inquiry and Analysis. (3 Credits)
This course is designed to develop students’ skills in investigating various sources of quantitative and qualitative data (including large-scale data sets) to explore the complexity of problems of practices, investigate variations in performance within and among groups, and apply data analysis for school accountability, improvement, and reform.

ASGE 7428. Seminar in Leadership. (3 Credits)
Students in this advanced seminar investigate topics and issues in leadership. This course involves the exploration of theoretical frameworks as a means of interpreting problems from the field and suggesting leadership responses to these problems.

ASGE 7429. Social Theories and Educational Institutions. (3 Credits)
This is an in-depth analysis of social theories and their implications for the restructuring of educational and other social institutions. The course focuses on structural-functional theory and other theories and their contemporary critics.

ASGE 7430. Leadership in Educational Policy and Reform. (3 Credits)
In this course, students will deepen their understanding of educational policy and their skills in analyzing and responding to policy challenges as educational leaders and scholars. To gain an understanding of how education policies evolve, students will examine and analyze the political, economic, social, and philosophical processes that contribute to its development, implementation, analysis, and evaluation.

ASGE 7431. Administration and Supervision Seminar. (3 Credits)
An advanced seminar in administration and supervision; exploration and study of comprehensive professional concerns.

ASGE 7432. Seminar in Organizational Theory. (3 Credits)
Focuses on application of organizational theory to school administration. Theories of Weber, Argyris, McGregor, Etzioni, and others will be examined.

ASGE 7435. Strategic Thinking, Planning, and Implementation. (3 Credits)
Every organization needs to grow, and today’s organizations need to do so in a competitive and ever-changing environment. The heart of the change process is in the strategy the organization selects to move forward. In this course, students learn to understand their industry, the competition, and their organization’s core competencies and values. They learn strategic models, including those of Michael Porter, Treacy and Wiersma, Hamel and Prahalad, Kim and Mauborgne, and Richard D’Aveni. Using Nadler and Tushman’s model for Congruence, they learn to align their organizations with the chosen strategy.

ASGE 7436. Transforming Schools, Districts, and Communities. (3 Credits)
Through this course, students explore theory, research, and professional practice in engaging and transforming schools, districts, and communities, particularly to support school improvement and student learning. The course will also explore resource acquisition, management, and use in support of student learning and related political and systems issues.

ASGE 7439. Advanced Seminar for Nonpublic School Administration. (1 or 3 Credits)
This course provides advanced study of administration in nonpublic schools. Issues of finance, curriculum, personnel, physical plant, instruction, and community relations are covered.

ASGE 7440. Seminar in Organizational Behavior. (1 to 3 Credits)
This course focuses on individuals and groups in the organization and on both the micro and macro perspectives of their behavior. The perspective, historical background, methodology, and theoretical framework for the field of organizational behavior will be presented. The emphasis will be on developing leaders with a vision that reflects an understanding of the social and psychological forces influencing the behavior of the individual in organizations and the dynamics, processes, and structures of organizational behavior.

ASGE 7442. Leading Organizational Change. (3 Credits)
This course focuses on the nature of discontinuous change and on managing the paradoxes of change including chaos and order. Several current theories of change will be presented and applied to students’ organizational settings. The emphasis will be on developing leadership skills for crafting a vision, mission, and strategic plan for change, as well as for aligning the organization behind the vision.

ASGE 7444. Leading a Learning Organization. (3 Credits)
This course examines the principles of leadership in a learning organization by exploring theory, research, and practice as related to schools and districts. The course provides opportunities for students to integrate theory and research with practice through simulated experiences, group discussions, reading, observations, interviews, action research, and case studies.

ASGE 7445. Leading Instructional Improvement. (3 Credits)
This course focuses on the practice of instructional improvement in schools and school systems, where “improvement” is defined as increasing the equity and quality of instructional practice and student learning over time. The course equips students with skills in observing, analyzing, and understanding teaching and learning that can be coupled with decisions about how to manage and support learning in the PK–12 sector.

ASGE 7446. Seminar in Organizational Culture, Learning, and Change. (1 to 3 Credits)
This course focuses on the nature of organizational culture: how it comes into being, how to shape a culture, and how to change a culture. Students explore the role of leadership and use of a systems perspective in creating, shaping, and changing organizational culture.

ASGE 7448. Seminar in Ethics and Social Justice. (3 Credits)
Through this course, students develop an ability to discuss and clarify ethical and social justice perspectives to gain an understanding of these same issues within organizations. The course helps students develop policies and strategies to address social justice and ethical issues within their schools, districts, and communities.

ASGE 7449. Introduction to Inquiry and Improvement Science. (3 Credits)
This course provides an overview to scholarly inquiry and practice, and develops foundational knowledge about research design and methods, reviewing research studies and reading peer reviewed research, research ethics and basic concepts in designed-based research and improvement science.
ASGE 7450. Seminar in the Spirituality of Leadership. (3 Credits)
This course focuses on the nature of spirituality and on leading the building of community within organizations. The course will explore spirituality as it basically relates to education. Throughout the course, spirituality will be differentiated from formal religion. The spiritual dimension of educational practice will be presented as it pertains to building community with educators, families, organizations, and cultures.

ASGE 7460. Community of Inquiry 1: Framing Problems of Practice. (1 Credit)
In this initial course, students begin to identify their problem of practice, learn attributes of universal problems, investigate how to differentiate the problem for various groups, and how to collaborate with others to define and investigate their problem.

ASGE 7461. Community of Inquiry 2: Innovative Solutions. (1 Credit)
In this second-year course, students explore tools and practices for creative problem-solving and conflict resolution, particularly in addressing complex challenges or capitalizing on opportunities for improvement, with a focus on generating solutions for their proposed problem of practice.

ASGE 7470. Design-Based Methods and Improvement Science in Education. (3 Credits)
This course moves students from exploring problems of practice to identifying, designing, and planning for the implementation of promising solutions to address these problems. Specifically, students will investigate and apply design-based and improvement-science methods to address a significant educational problem. Students will develop a design-based research prototype, seek implementation support, develop readiness for change and buy-in, and start their innovation.

ASGE 7471. Implementation Research and Program Evaluation. (3 Credits)
This course provides preparation and guidance on implementation research and program evaluation. Students learn how to monitor implementation and conduct program evaluation, particularly for their dissertation of practice. The course addresses theoretical, organizational change and practical issues, and prepares students to conduct an implementation study and program evaluation and communicate the results.

ASGE 7530. Clinical Practice in Administration and Supervision. (3 Credits)
This course provides students with applied field experiences designed to work out solutions to particular problems of practice.

ASGE 7531. Advanced Qualitative Research. (3 Credits)
This course offers students the opportunity to engage in field research activities that focus on initial research design, data collection, and analysis.

ASGE 7721. Applied Quantitative Research Methods. (3 Credits)
This course provides an overview of quantitative research methods and related statistical techniques. Students can explore how to use these skills to investigate problems of practice.

ASGE 7731. Applied Qualitative Research Methods II. (3 Credits)
This course provides an overview of qualitative research perspectives and methods and their use in investigating applied problems of practice, particularly in observing and interviewing students and staff in school and district settings.

ASGE 8001. Research Apprenticeship. (0 Credits)

ASGE 8505. Directed Research in Educational Leadership, Administration, and Policy. (1 to 3 Credits)
Designed for students who are developing research problems or projects for their doctoral studies.

ASGE 8750. Dissertation in Practice Seminar. (3 Credits)
This seminar is for advanced Doctor of Education candidates in the Division of Educational Leadership, Administration, and Policy who have completed all of their coursework. The purpose of the seminar is to assist students in developing an approved dissertation proposal.

ASGE 8751. Dissertation Seminar: Educational Leadership, Administration, and Policy, PhD. (3 Credits)
Seminar for advanced Doctor of Philosophy candidates in the Division of Educational Leadership, Administration, and Policy who have completed all of their coursework. The purpose of the seminar is to assist students in developing an approved dissertation proposal.

ASGE 9990. Independent Study. (1 to 4 Credits)
Designed to enable students to study selected topics in depth and to conduct research. For matriculated students only. An outline of the proposed work must be approved by the adviser. Registration requires approval of the professor directing the study, the division chair, and the director of graduate studies.

Administrative Law (ADGL)

ADGL 0206. Law & Administrators. (0 Credits)
ADGL 0302. Administrative Law. (3 or 4 Credits)
Administrative Law builds on 1L Legislation and Regulation, digging deeper into the federal laws, rules, and norms governing administrative agencies, and examining the executive orders, federal statutes (especially the Administrative Procedure Act), federal court decisions, and rules promulgated by the agencies themselves. We will consider how agencies promulgate public law within the context of these authorities, as well as the legal mechanisms by which each of the three branches of government attempt to control the work that agencies do. The prerequisite is 1L Legislation and Regulation.
Attributes: GLBL, HC, HIST, INST, IPE, ISAF, ISIN, ISLA, ISME, MEST, PJRC, PJST.

African and African American Studies (AFAM)

AFAM 1600. Understanding Historical Change: Africa. (3 Credits)
This course introduces students to major themes in Africa’s complex history, including early human origins; religion; trade networks; slavery and the slave trade; colonialism; and liberation struggles. We will explore Africa as an idea and field of study, by attending to the major debates that have shaped historical writing about Africa. Significant class time will be devoted to developing student writing and public speaking skills through individual and group presentations, revision writing, and peer review.
Attributes: GLBL, HC, HIST, INST, IPE, ISAF, ISIN, ISLA, ISME, MEST, PJRC, PJST.
AFAM 1650. Black Popular Culture. (4 Credits)
Examines creative expressions of everyday life as well as commodified arenas of mass produced popular culture as sites through which African Americans have been represented and through which they represent themselves. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, PLUR, SSCI, URST.

AFAM 1999. Tutorial. (1 Credit)
Indepenent Study.

AFAM 2005. American Pluralism. (4 Credits)
Contemporary and historical studies in the racial and ethnic diversity of American (U.S.) society with a special emphasis on the issues of race relations migration, and immigration and their relation to either (1) the distribution of economic and political power or (2) their cultural manifestations in literature, the arts, and/or religion. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASHS, HIAH, HIST, HIUL, LALS, LASS, PLUR, URST.

AFAM 2647. Third World and the City. (4 Credits)
This course explores international migration and settlement of third world peoples in urban communities of the United States since 1965. Topics include the impact of globalization on international migration, the formation of ethnic enclaves and informal economies, social networks, employment patterns, undocumented status, and recent immigrant law. Gender and class as well as race form analytical categories within these topics. Students will examine case studies based on the experiences of selected groups, including Chinese, Haitians, Koreans, Southwest Asians, and Dominicans. Recent interdisciplinary research and theoretical perspectives are offered in conjunction with first hand accounts such as immigrant fiction, autobiography and films. Key documentary films are used as supplementary texts and are an integral part of the resources of the class. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LALS, LASS.

AFAM 2999. Tutorial. (2 Credits)

AFAM 3001. African American History I. (4 Credits)
Begins with an introduction to the African background and slave trade. An examination of U.S. slave communities, resistance and rebellion, abolitionism, and institutional development through the Civil War. Readings in original texts from 18th and 19th centuries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, HIAH, HIST, PLUR.

AFAM 3002. African American History II. (4 Credits)
A survey of African American history from the Reconstruction period to the present: the era of accommodation and the origins of the 20th-century protest; Washington-DuBois debate; migration and urbanization; the Harlem Renaissance; the civil rights movement; black power and contemporary issues. Fulfills urban studies requirement in history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, APPI, ASHS, HIAH, HIST, PLUR.

AFAM 3003. African American Family. (4 Credits)
An intensive examination of the history, economic determinants and lifestyles of the black family in the United States. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS.

AFAM 3030. African American Women. (4 Credits)
A survey of African American women's history using documentary texts, fiction, and social science literature. Examines the multiple jeopardies of race, sex, and economic condition. Explores specific conditions of female slavery, resistance, work, and political activism. Women studies include Sojourner Truth, Anna Julia Cooper, Ida Wells Barnett, Fannie Lou Hamer, Amy Jaques Garvey and Bell Hooks. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, COLI, HIAH, HIST, HIUL, PLUR, WGSS.

AFAM 3033. Women in Hip-Hop. (4 Credits)
This course will explore how women are portrayed in hip hop music and culture, addressing women both as consumers and producers. The course will utilize Black feminist theory, consumption theory, and youth culture theory to interpret and critique the ways in which women are represented in hip hop music, art, fashion and dance, and its surrounding culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PLUR.

AFAM 3034. Black Traditions in American Social Dance. (4 Credits)
This course is an introduction to dance as part of a larger cultural expression. The course introduces some of the chronology, the choreographic approaches and changes in dance techniques which have shaped the way AA moved the Black Dance traditions from the history, to the stage and to the streets. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PLUR.

AFAM 3036. Global Black Youth Cultures. (4 Credits)
Course will explore how adolescent and young adult members of the African Diaspora form youth subcultures and engage with popular culture transnationally. The courses focus is comparative with attention to American, Caribbean, Afro-Latino, and African youth. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, INST, IPE, ISIN, URST.
AFAM 3037. Being and Becoming Black in the Atlantic World. (4 Credits)
A study of dispersed African communities in the New World in the 19th and 20th centuries. Examines diasporic identity formation, enslavement and resistance, religious movements, anticolonial politics and Pan-African thought. Emphasis is on cross-cultural connections and interactions. Areas studied include Haiti, Brazil, Surinam, the British-held Caribbean, Cuba and the United States. Scholars studied include, James, Du Bois, Gilroy and Hall. Fulfills global studies requirement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASHS, ASSC, GLBL, HIGH, HIST, HIUL, INST, IPE, ISAF, ISIN, ISLA, LALS, LASS.

AFAM 3070. African Politics. (4 Credits)
A study of the politics of Africa, including colonial independence struggles, post-independence state formation, development paradigms, and grassroots movements. Case studies will be examined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFSS, AFST, HHPA, HUST, MEST.

AFAM 3071. African Intellectual History. (4 Credits)
Traces the competing and complementary theoretical, ideological, political and philosophical contributions of African Americans such as Walker, Garnet, Douglas, Stewart Harper, Crummel, DuBois, Garvey, Padmore, Dunbar, Nelson, Fanan, Davis, Malcolm X and Bell Hooks. Explores black nationalism, emigrationism, Pan Africanism and socialism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVF, AFSS, AFST, AMST, APPI, ASHS, ASRP, COLI, GLBL, INST, ISAF, MEST, PJRC, PJST.

AFAM 3072. Civil Wars in Africa. (4 Credits)
Examines the main causes and forms of civil wars on the African continent. A central theme of inquiry will be the relationship between the process of state formation and reproduction of political identities. Looks at the reform of these political identities through the definition of citizenship in Post Independence. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFSS, AFST, GLBL, HHPA, HUST, INST, IPE, ISAF, MEST, PJST, PJWT.

AFAM 3075. Democracy in Africa. (4 Credits)
Examines African experiences in governance focusing primarily on democracy. An examination of the challenges of building and sustaining democratic governments in various African nations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFSS, AFST, GLBL, HHPA, HUST, IPE, ISAF, MEST.

AFAM 3102. The Black Family. (4 Credits)
An examination of the history of the black family from slavery to the present facing on the social, political, and economic challenges facing this institution. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASHS, URST, WGSS.

AFAM 3110. The Black Athlete. (4 Credits)
An examination of the impact of the black liberation movement, the women's movement, and other currents of political and cultural change in amateur and professional sports in America. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, PLUR, SJOR.

AFAM 3112. The Sixties. (4 Credits)
An examination of the political, cultural and economic changes that took place in the United States during the 1960s. Special attention will be given to the civil rights movement and the Vietnam War in shaping public discourse and in presenting Americans with important political and moral choices. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, ASHS, HIAH, HIUL, PJRC, PJST, PLUR, URST, WGSS.

AFAM 3115. Martin Luther King Jr. and Malcolm X. (4 Credits)
An examination of the lives, philosophies, and historical influences of Martin Luther King Jr. and Malcolm X. The purpose of this course is to examine the life and thought of Martin L. King Jr. and Malcolm X. Our main goals are to trace the development in their thinking, and to examine the similarities and differences between them. Finally, we will seek to evaluate their contribution to the African-American freedom struggle, American society and the world. Our method of study will emphasize the very close reading of the primary and secondary material; the use of audio and videocassettes; lecture presentations and class discussions. But it is important to note that we are not simply interested in the academic study of these two men's political and religious commitment; we are also concerned with how they inform our own political and spiritual lives. Hopefully, we will learn from Martin and Malcolm and be motivated by their passion for justice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVF, AMST, APPI, ASHS, ASRP, ASSC, PJRC, PJST, PLUR, REST, RSTE, THEO, URST.

AFAM 3120. Black Religion and Black Politics. (4 Credits)
A study of the African American church and its influence on the lives of black and white Americans. A study of the interaction between African-American religion and politics from Frederick Douglass to Barak Obama. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASHS, ASSC, PJRC, PJST, PLUR, REST, THEO.

AFAM 3130. Racial and Ethnic Conflict. (4 Credits)
This course examines the major sources of tension between ethnic and racial groups in the American city, as well as the political and cultural traditions of various ethnic groups. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMCS, AMST, LALS, LASS, PLUR, URST.
AFAM 3132. Black Prison Experience. (4 Credits)
This course examines the historical and contemporary experience of African Americans in the prison system with a special emphasis on the role of religion as a transforming agent. Students will survey the writings of current and former prisoners and ask what role, if any, spirituality played in their experience of incarceration. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, PJRC, PJST, PLUR, REST, URST, WGSS.

AFAM 3133. Performance African Diaspora. (4 Credits)
This course explores how young people of the African diaspora in the United States use expressive culture as a space to creatively respond to social injustice and political marginalization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

AFAM 3134. From Rock-N-Roll to Hip-Hop. (4 Credits)
A study of urban youth culture through an examination of musical forms and their evolution from the post WWII era to the present. Begins with Rock and Roll and ends with Rap and Hip Hop. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, ASAM, ASHS, CCUS, COMC, COMM, HIAH, HIST, HIUL, PLUR, URST, WGSS.

AFAM 3135. Contemporary Black Thinkers. (4 Credits)
An examination of the writings of contemporary African-American intellectuals, analyzing their views on race, class, gender, sexuality, politics, and religion. We will discuss the relationship between black intellectuals and the black community, and we will examine how their personal experiences are reflected in their writings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PLUR.

AFAM 3136. Civil Rights/Black Power. (4 Credits)
The course examines the history of the dramatic African-American social and political movements that took shape in the aftermath of World War II. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASSC, PLUR, URST.

AFAM 3138. Nonviolent Protest. (4 Credits)
This course examines the genesis of non-violent direct action protest in modern history. Starting with the writings of David Henry Thoreau and Leo Tolstoy, the class will focus on Gandhi in South Africa and India. Influenced by these non-violent philosophies and individuals, the course examines the modern Civil Rights Movements in the United States, especially the practice of non-violent direct action of Bayard Rustin, Martin Luther King, members of the Student Non-Violent Coordinating Committee (SNCC) and the Congress of Racial Equality (CORE). Finally the course examines the life and times of Nelson Mandela and Steve Biko of South Africa, looking for the roots of their non-violent philosophies and practices. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS.

AFAM 3139. Buffalo Soldiers: Race and War. (4 Credits)
Buffalo Soldiers examines the intersection of race and military service in the United States, from the American Revolution to the Cold War. The focus of the course is on the role African Americans played in the major military conflicts of this country’s history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ASSC, PLUR.

AFAM 3140. Contemporary Africa. (4 Credits)
An examination of the cultural characteristics of African societies and an analysis of African’s significance in world politics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFSS, AFST, HIGH, HIST, HIUL, INST, ISAF.

AFAM 3141. Women in Africa. (4 Credits)
This course examines the formal and informal participation of African women in politics, their interaction with the state and their role in society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFSS, AFST, ASSC, GLBL, INST, IPE, ISAF, PJGS, PJRC, PJST, WGSS.

AFAM 3142. Women, Power, and Leadership in Africa. (4 Credits)
The experiences of women in power and leadership roles have been largely ignored in the study of Africa. This course examines the experiences of women in power and leadership roles in different sectors of African societies. The course covers pre-colonial, colonial, and post-colonial periods to locate the impact of gender relations and other social and political markers on the roles of women in selected African societies. The goal of this course is to identify, understand, and analyze the structural, societal, and personal factors and circumstances that necessitated women’s rise to power and leadership roles. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, GLBL.

AFAM 3146. Contemporary African Immigration to the United States. (3 Credits)
It explores the experiences of contemporary African immigrants in the United States. It is designed to introduce students to contemporary immigration, theories, and methodologies on the study of African immigration and the history of recent African immigrants by examining their earlier migratory process both within the continent and across international border. This course should be of interest to students, who are interested in learning about international migrations, refugee and forced migration issues, globalization, and formation of transnational identities.
Attributes: ACUP, ADVD, AFSS, AFST, AMST, APPI, ASHS, GLBL, INST, ISAF, ISIN.

AFAM 3148. History of South Africa. (4 Credits)
This course examines the history of South Africa from the Pre-European encounter to the Post-Apartheid era. Special emphasis will be given to nineteenth and twentieth century racial policies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAH, AFSS, AFST, AHC, GLBL, HIGH, HIST, INST, IPE, ISAF, PJRC, PJST.
AFAM 3149. South Africa Study Tour. (1 Credit)
A three week study tour of South Africa, exploring the pre-Encourage Cape, the Mineral Revolution area, and the Apartheid High Veld.

AFAM 3150. Caribbean Peoples and Culture. (4 Credits)
An examination of the historical, cultural and contemporary characteristics of various ethnic groups in the Caribbean. Special attention will be devoted to Afro-West Indians. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMCS, AMST, APPI, ASHS, ASSC, GLBL, HIST, HIUL, INST, IPE, ISAF, ISIN, ISLA, LALS, LASS, URSST.

AFAM 3152. Expressive Bodies: Race, Sexuality, and the Arts. (4 Credits)
Using research on race and sexuality the course examines how the socio-cultural lived experience and world view creates distinct expressive capacities especially in movement and dance. Writers studied include Appiah, Charles Johnson, Dunham, as well as Foucault, Butler, and the French feminists. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PLUR.

AFAM 3154. Black, White, and Catholic: Race, Religion, and Civil Rights. (4 Credits)
This course examines the modern Catholic Civil Rights Movement from the late 1890s through the 1970s as Black and White Catholics found their voice and their agency to bring about racial justice within and without the church. This engagement across racial lines gave rise to Catholic Interracialism, which served as a paradigm for future struggles in the quest for racial harmony. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, PLUR.

AFAM 3155. Children of Immigrants in America. (4 Credits)
This EP Seminar applies anthropological, sociological and literary texts to explore the experiences of the second generation immigrants in the United States. Diverse immigrant communities from the Caribbean, Africa, the Middle East, Asia and Latin America are covered. The course will draw primarily on contemporary ethnographic examples, but will include historical examples for the comparative perspective. Major debates in migration studies are discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LALS, LASS.

AFAM 3162. Value in Black and White Drama. (4 Credits)
A study and evaluation of dramas with like themes as treated by playwrights from differing ethnic backgrounds. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, ASHS, ASLT, PLUR.

AFAM 3188. Exploring Africa: Encounter, Expedition, and Representation. (4 Credits)
Tarzan, "Deep Dark Africa", lion safaris, diamonds: these words conjure in the western mind the image of a continent not fully comprehended. This course focuses on the exploration, representation, and understanding as well as mis-understanding and mis-representation of the continent from the Fifteenth to Twentieth Centuries, focusing on Nineteenth-century Exploration, Exploitation and Representation of Sub-Saharan Africa. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFSS, AFST, ASSC, GLBL.

AFAM 3190. Mapping Southern Africa. (4 Credits)
This course maps the development of Southern Africa from the late 15th century to the late 20th. While a cartographer's knowledge of the region is the starting point, this course will examine the political, socio-economic, and cultural geography of southern Africa, including Namibia, Zimbabwe, Zambia, Malawi, Botswana, South Africa, Angola, and Mozambique. Emphasis is placed on the colonial and post-colonial evolution of this region in the context of cultural identity, independence movements, and Cold War politics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFST, AHC.

AFAM 3192. The United States, Africa, and the Cold War. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, INST, ISAF, ISIN, PJST, PJWT.

AFAM 3210. On the Move: Migration, Labor, and Trans-Nationalism in the African Diaspora. (4 Credits)
Migration has played an essential role in the history of the African Diaspora. The Trans-Atlantic Slave trade, the most famous movement of African descended peoples was involuntary, but many movements after this period were planned and deliberate. The end of slavery in the late 19th century saw mass movements of African descended people throughout the world. In the late 1850s, there was significant movement to the American port cities of New York and Boston. In the 20th century, we see the movement of 8 million blacks form the rural south to Industrial cities in the North. Pan African groups urged blacks to go “Back to Africa.” This class examines the theme of migration to the African Diaspora. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, GLBL, INST, ISAF.
AFAM 3510. In 'America's Backyard': U.S.-Caribbean Social, Political, and Economic Relations 1850-1950. (4 Credits)
The long history of exchange between the Caribbean and the US has been fraught with complex and at times contradictory policies and events. The US has frequently pursued imperialist interest within the region and played a significant role in its economic and political development. The term “America's Backyard” has often been utilized to discuss the US’s sphere of influence. However, this history has not been one of the unilateral American dominance. Caribbean nations used US resources in order to steer their own agendas. This course will examine how these intertwined regions have negotiated with each other by analyzing themes such as race, gender, nationalism, and military intervention. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, GLBL, LALS.

AFAM 3600. Africana Women's Studies. (3 Credits)
This course examines the history of black feminist/womanist thought as a political practice, an aesthetic sensibility and a scholarly methodology. Combining black feminist theory with literary and cultural works by black women artists, the class will discuss conflicts with black feminists practice as well as the future of black feminism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, LALS.

AFAM 3607. Race and Society in Film. (4 Credits)
Examines the representation of African Americans and blackness in visual media, focusing on mainstream, documentary and independent films, and television. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASHS, LALS, LASS, PJRC, PJST, PLUR, URST.

AFAM 3630. Harlem Renaissance. (4 Credits)
A study of the literature of the period known as the Harlem Renaissance. Writers include James Weldon Johnson, Jean Toomer, Nella Larsen, Jessie Fauset, Zora Neale Hurston and Langston Hughes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST.

AFAM 3631. African American History. (4 Credits)
AFAM 3632. Harlem Renaissance. (4 Credits)
AFAM 3633. The Bronx: Immigration, Race, and Culture. (4 Credits)
A study of the history of immigration and migration shaped Bronx neighborhoods from the Great Depression to the present. Subjects covered will include community building, racial conflict and the ways that the mixing of cultures in Bronx communities inspired cultural creativity and political activism. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHIC, AMST, APPI, ASHS, LALS, LASS, PJRC, PJST, PLUR, URST.

AFAM 3634. Film and the African American. (4 Credits)
Examines the representation of African Americans and blackness in visual media, focusing on mainstream, documentary and independent films, and television. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, ASSC.

AFAM 3635. Black Feminism: Theory and Expression. (4 Credits)
This course examines the history of black feminist/womanist thought as a political practice, an aesthetic sensibility and a scholarly methodology. Combining black feminist theory with literary and cultural works by black women artists, the class will discuss conflicts with black feminists practice as well as the future of black feminism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, GLBL.

AFAM 3636. Minorities in the Media. (4 Credits)
Introduces the study of U.S. minority group representation, participation and employment in media. Minority is defined according to ethnic, religious, national, gender or other social groupings, while media include print, broadcasting, film, music and other cultural manifestations. Students apply analyses from readings in media theory and prepare reports-videos, tapes, graph presentations, etc. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, COLI, LALS, LASS, URST.

AFAM 3667. Caribbean Literature. (4 Credits)
A broad survey of the literatures of the Caribbean region, including translations from Spanish and French. Primarily 20th-century works will be read against the background of colonial discourse theory. Writers include Maran, Cesaire, Fanon, Carpenter, Chauvet, Mohr, V.S. Naipaul, Walcott, Brathwaite, Kincaid, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASLT, COLI, ENGL, ENRJ, GLBL, INST, ISAF, ISLA, LAHA, LALS, LASS, WGSS.

AFAM 3669. Racing the City. (4 Credits)
This class will consider the racialization of city spaces as well as the content and dynamics of historical and contemporary constructions of blackness. Primarily grounded in ethnography, the class also uses journalism and media portrayals and discourse rooted in popular culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

AFAM 3688. African Literature I. (4 Credits)
The first course in an introduction to precolonial and indigenous oral and literary forms of African peoples. The epics of the West African empire, the Islam-influenced writings of the Western and Northern lands and the development of the Swahili tradition in the East will be the main foci. All materials will be read in English translations. This course does not need to be taken prior to African Literature II. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAH, AFST, COLI, ENGL, GLBL.

AFAM 3689. African Literature II. (4 Credits)
The second course is an examination of the colonial and postcolonial literary production of European-influenced African writers writing in European languages: English, French and Portuguese. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAH, AFST, COLI, ENGL, GLBL.
AFAM 3692. Social Construction of Women. (4 Credits)
This advanced social science course examines the social construction of female identities across cultural contexts. The course will employ an anthropological approach to the study of how ideas regarding what it means to 'be female' circulate and gain credence through narratives crafted by popular culture, policy and legislative definitions, science fiction, and modes of cultural consumption, for example, and are mediated by race, social status, age, national identity and cultural context. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, COLI, INST, ISAF, ISIN, WGSS.

AFAM 3693. Contemporary African Literatures. (4 Credits)
Contemporary works from around the continent including a selection of anglophone literatures of south, west and east Africa and translations into English from Portuguese, French, Arabic and Kiswahili. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAH, AFST, ALC, COLI, ENGL, GLBL, INST, ISAF, MEST, WGSS.

AFAM 3695. Major Debates in African Studies. (4 Credits)
Key debates that have shaped the study of Africa in the post colonial period. Includes state formation, under development, pan-Africanism and globalization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFSS, AFST, GLBL, INST, ISAF, MEST.

AFAM 3720. African American Philosophy. (4 Credits)
Using texts by Frederick Douglass, Sojourner Truth, W.E.B. DuBois, Alain Locke, Martin Luther King, Jr., Malcolm X, James H. Cone, Angela Davis, Cornel West, Patricia Hill Collins, Howard McGary, William E Lawson, Leonard Harris, Lucius Outlaw and others, this course will focus on pillars, prophets and prospects for African American philosophy, a 'philosophy born of struggle' created by profound critical and transformative voices from times of chattel slavery to the present that plays an influential role in American philosophy and American society today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASRP, COLI, PJJSJ, PJST, PLUR, WGSS.

AFAM 3729. The Black American Novel. (4 Credits)
The evolution of the black novel American from William Wells Brown to Ismael Reed. The novel will be placed in its proper literary, social and political context. The novel will be explored through various themes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS.

AFAM 3939. History of Global Popular Music: From Africa to the Americas and Back. (4 Credits)
Who brought the banjo to the United States? How did jazz get to Paris? Why is reggae so popular in Ghana? In this course, students will learn the history of African and African Diasporic popular music as it has crossed the Atlantic with enslaved Africans, African American soldiers, Caribbean migrants, and students from West Africa. Through primary sources, songs, films, and academic texts, students will examine issues of globalization, consumerism, migration, pan Africanism, race, and gender in the history of Africa and the Black Atlantic. The final project will involve original research in local and online archives, and will be accompanied by a post on the course blog. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, ASHS, HIGH, INST, ISAF, ISIN.

AFAM 3999. Tutorial. (3 Credits)

AFAM 4000. Affirmative Action and the American Dream. (4 Credits)
An examination of the political and legal history of Affirmative Action and an exploration of the moral and economic consequences of the policy as practiced in universities, businesses and government agencies. Fulfills senior values requirement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADV, AMST, APP, ASHS, EP4, HIAH, HIST, HIUL, LALS, LASS, PJRC, PJST, URST, VAL, WGSS.

AFAM 4147. Food and Globalization. (4 Credits)
This course will examine scholarship on food and globalization from a range of disciplinary perspectives, including anthropological, sociological, historical, and literary. It will also examine the interdisciplinary fields of food studies and globalization studies to discuss the development of global exchange networks and their impact on consumer cultures and notions of identity in the united states and beyond. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESEL, ICC, INST, ISIN.

AFAM 4148. Race, Religion, and Politics: Catholic and Civil Rights. (4 Credits)
This Interdisciplinary Capstone Course examines Catholic Civil Rights through the prisms of race, religion and politics from the New World Encounter of the Fifteenth and Sixteenth Centuries through the Civil Rights struggles of the Nineteenth and Twentieth Century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ICC.

AFAM 4192. Race and Religion in the Transatlantic World. (4 Credits)
This course examines the construction and deconstruction of race policies in the Trans-Atlantic World form the Sixteenth Centuries. Focusing on the socioeconomic, political, theological, and philosophical precepts and practices, students will grapple with the moral and ethical dilemmas presented by race-based policies and beliefs. Using the United States and South Africa as case studies, this course is divided into four historic periods: Colonization and Enslavement (1492-1860’s), Separation and Segregation (1890-1940’s), and Apartheid, desegregation, and integration (1940-1990’s). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAH, AFST, EP4, INST, ISAF, ISIN, MEST, VAL.
AFAM 4600. African Americans and the Law. (4 Credits)
American law has shaped the course of African American history. This class will examine themes such as segregation, civil rights, lynching and capital punishment, racial profiling and race-related sentencing, and state control of black families and reproduction. In order to understand the impact of the law, students will read and analyze cases, Constitutional Amendments and state statutes, as well as primary and secondary historical sources. This course will provide students with an understanding of how U.S. laws and state control were used to oppress African Americans, and how African Americans and other civil rights advocates used the law as a tool to gain citizenship recognition, equal treatment under the law, and equal access to society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, PLUR.

AFAM 4650. Social Welfare and Society. (4 Credits)
An examination of American values and attitudes about poverty, entitlement and dependency and the role of the state, individuals and society in social welfare. Presents an exploration of how experiences such as homelessness, welfare and unemployment are conceptualized in American society and how this thinking affects our values over time. Fulfills senior values requirement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, EP4, HIAH, HIST, LALS, LASS, URST, VAL, WGSS.

AFAM 4800. Internship. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

AFAM 4802. Community Research Methods: Oral History. (4 Credits)
This Service-learning course will impart proficiency in the research methods used by anthropologists and oral historians studying marginalized urban communities. Through volunteer work in Bronx community organizations, students will learn how to design a research agenda, how to maintain a field notebook, how to conduct an oral history interview, and how to effectively transcribe oral interviews. A primary course, objective will be to enable students to help community members uncover and record the rich cultural, political, economic and religious histories of Bronx residents. Each student will volunteer in a community-based organization in order to 1) help serve the needs of the community; and 2) master the skills of participant observation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PLUR.

AFAM 4890. Research Seminar. (4 Credits)
Intensive course on research techniques appropriate to African and African American studies. Required of all African and African American studies majors. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS.

AFAM 4896. Feeling the Funk. (4 Credits)
A comparison of the African-derived musical traditions of Cuba, Jamaica, and the United States from the 1930s, focusing on social origins of musical traditions such as con, reggae, rhythm and blues, and soul music, as well as the reasons for their global popularity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, URST.

AFAM 4999. Tutorial. (0 to 4 Credits)
Independent research and readings with supervision from a faculty member.
Attribute: GLBL.

AFAM 8999. Caribbean People and Cultures. (0 to 4 Credits)

American Catholic Studies (AMCS)

AMCS 3101. The Discernment Seminar. (1 Credit)
The seminar serves as a point of entry to the American Catholic Studies certificate program and an opportunity to reflect deeply and critically on the pressing global challenges. Taken in the spring of the sophomore year, the seminar invites students to explore how to deploy their talents in the service of a more just and humane society. In this process, students learn how to communicate effectively and memorably about the multifaceted global issues of our time.
Attributes: AMST, ASRP.

AMCS 3130. Faith in U.S. Politics. (4 Credits)
This course will examine the effects of religion on the contemporary American political landscape. How does religion shape the American political system? In what ways and to what extent should religious considerations be allowed to influence public policy? How does religion affect citizens’ voting decisions? Does faith really have an impact on the political behavior of elected officials? Special attention will be paid to the role of religion in the 2008 presidential election and to the influence of the American Catholic Church and Catholic voters. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASRP.

AMCS 3150. Catholics and Popular Culture. (4 Credits)
An exploration of the intersection of popular devotion and popular culture in the experience of American Catholics, examining the ways in which Catholics are portrayed and participate in popular media and consumer society and how this expresses and/or transforms what it means to be both American and Catholic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASRP.
AMCS 3200. American and Catholic. (4 Credits)
This course examines the contributions of various Catholic figures and movements from the end of the 19th Century to the start of the 21st. How did the various Catholic generations of the past 110 years understand themselves as Americans and Catholics? How did subsequent generations change that understanding? This course will give particular emphasis to how younger generations initiated or prompted change, with an eye to discovering how youth culture today might be shaping the future of American Catholic identity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASRP.

AMCS 3250. Contemporary Catholic Fiction. (4 Credits)
This course will examine several major Catholic writers of the 20th century (Graham Greene, Flannery O'Connor, Mary Gordon, J.F. Powers, and others). This course will examine Catholic themes and issues in their writings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

AMCS 3251. Labor, Leisure, and God. (4 Credits)
An examination of a variety of philosophical, theological, and aesthetic concepts studying work and play. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, ASRP.

AMCS 3256. Comparative Economic Systems. (4 Credits)
Survey of the salient features of alternative economic systems; the mixed economies of the western world and Japan, the reforms in the former Soviet, Eastern European, and Chinese economies; problems of measuring economic performance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, INST, IPE, ISIN, SOIN.

AMCS 3320. The Writing Irish. (4 Credits)
This course will explore the influence of Catholicism on the development of Irish and Irish-American literature from the early 20th century to the present. Featuring Irish- and American-born writers of Irish ancestry, the course will focus on the work of writers such as James Joyce, Patrick Kavanagh, Seamus Heaney, Eavan Boland, Mebh McCuckian, F. Scott Fitzgerald, William Kennedy, Elizabeth Cullinan, Frank O'Hara, Alice McDermott, and Michael Donaghy. Through selected historical and critical readings, we will attempt to create a descriptive narrative of what happens when Irish writers wrestle with Catholic identity in the context of 20th-century political and economic struggle, both in Ireland and in America, and a growing culture of unbelief. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT, IRST.

AMCS 3253. American Catholic Fictions. (4 Credits)
This course explores the narratives created by American Catholic artists and the variety of forms their stories take. Emphasis will be on the 20th Century and contemporary American Catholic novelists and short story writers, such as William Kennedy, John O'Hara, Flannery O'Connor, Ron Hansen, Mary Gordon, David Plante, and Andre Dubus. In addition, students will engage the work of American Catholic filmmakers (such as Coppola and Scorsese), visual artists (including Mapplethorpe and Warhol), and the music & lyrics of Catholic composers/songwriters (such as Bruce Springsteen). We will consider the content of these visual, musical, and literary narratives in light of their grounding in the specific American and Catholic Culture they portray, and we will explore the particular capability of each genre to convey the artist's vision of the possibilities and limitations of the world he or she inhabits and (re)creates. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT, IRST.

AMCS 3340. Catholicism and Democracy. (4 Credits)
This course will examine the relationship between Catholicism and democracy, placing particular stress on their relevance to contemporary American public life. In this context, Catholicism will be understood not only as a religious institution, but as the source of a tradition of communitarian social and political thought, while democracy will be understood not only as a form of government, but also as an ethos shaping American society. Authors and texts will include Alexis de Tocqueville, Orestes Brownson, Dorothy Day, John Courtney Murray, and relevant documents from Vatican II and the American hierarchy. The historic tension between Catholicism and democracy will be the subject of our conversation as will the possibilities for greater harmony between them. In particular, we will explore the possibility that Catholicism's communitarian orientation might serve as a corrective to American individualism and consumerism, while democratic institutions and practices might have something to offer Catholicism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASRP, WGSS.

AMCS 3350. American Catholic Poetry. (4 Credits)
A course focused on poets whose work is grounded in the faith and culture of the Catholic Church in America. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASRP, WGSS.

AMCS 3355. American Catholic Novel. (4 Credits)
The appearance and importance of faith in the work of American Catholic novelists, including J.F. Powers, Alice McDermott, Mary Gordon, Walter Miller, Ron Hansen and John Kennedy Toole. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASLT, ASRP.
AMCS 3359. American Catholic Women Writers. (4 Credits)
An examination of American Catholic women’s imaginative writing, looking at Denise Levertov, Flannery O’Connor, Valerie Sayers, Mary McCarthy, and Mary Gordon. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASLT, ASRP, WGSS.

AMCS 3360. Ethnic and Catholic Literature. (4 Credits)
This course engages the question of what it means to be both ‘ethnic’ and ‘Catholic’ in America and explores the ways in which these primary aspects of identity influence the work of writers affiliated with three of the most visible European Catholic ethnic groups that immigrated to the United States in the early 20th century: the Irish, the Italians, and the Polish. Students will read memoir, fiction, and poetry by representative writers from each group, including work of J.T. Farrell, Elizabeth Cullinan, Don DeBello, Helen Barolini, Czeslaw Milosz and Adam Zagajewski. Through selected historical and critical readings, we will attempt to create a descriptive narrative of what happens when writers wrestle with ethnic and Catholic identity in the context of the 20th century political and economic struggle in America, a predominantly White-Anglo-Saxon-Protestant society, and a growing culture of unbelief. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

AMCS 3450. The Catholic Metropolis. (4 Credits)
A history of Catholicism in the New York metropolitan area focusing on sites of historic significance that inscribed a permanent Catholic presence and shaped an evolving urban culture. Students will explore and research architectural sites, locations of popular devotions, and streetscapes that reveal identities to parishes as urban villages. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

AMCS 3451. Niebuhr in America. (4 Credits)
Focusing on the influential work of liberal Protestant theologian Reinhold Niebuhr, the course will trace the development of major strands of modern American social and political thought and actions including the Social Gospel, Catholic Worker and Settlement House movements as reactions to nativism, consumerism, industrialism, individualism, and greed. Niebuhr helped shape both contemporary liberalism and Neo-Conservatism and was the architect of a ‘Christian realism’ which influenced American Catholic and Jewish thought. Niebuhr is widely known as the author of the ‘Serenity Prayer’ (‘God give us the serenity to accept what cannot be changed...’) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASRP.

AMCS 3535. Building the Ideal City: Ethics and Economics Foundations of Realizable Utopias. (4 Credits)
This course introduces students to the investigation of the role that economic concepts such as profit, work, utility, and exchange play in defining the ideal city as a realizable political project. Students will explore ethical and economic concepts and their interrelation in the debate on the best form of State and government that developed from antiquity to modern American utopian communities. This course includes texts from various sources - philosophical, theological, juridical, and literary. Through these readings, students will learn how theoretical and practical ideas on the best form of society developed in time and still influence modern political thought. The course also focuses on the impact of the socioeconomic doctrines of the Catholic Church in shaping the idea of a possible, realizable, ideal city. Among the texts and authors included are Plato, St. Augustine, Thomas Aquinas, Dante, Boccaccio, Thomas More, Leon Battista Alberti, Tommaso Campanella, Francis Bacon. Taught in English with coursework in Italian for credit in Italian. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, APPI, ASHS, ASRP, INST, ISIN, ITAL, ITMO, MVPH, MVST.

AMCS 3777. Jesuit Conspiracy in America. (4 Credits)
From colonial times, rumors of Jesuit conspiracies abound in American religious and political rhetoric. Jesuits, it was thought, were plotting to win America for the Pope. This course explores the history of the Jesuits in America and the related topics of anti-Catholicism, separation of church and state, Vatican II, Catholic education, divisions within the U.S. Catholic community past and present, and how Jesuits real and imagined inhabit these stories. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASRP.

AMCS 3975. Catholic Across Cultures. (4 Credits)
A seminar exploring, comparing, and contrasting the Catholic fiction of disparate cultures including Britain, Ireland, France, Brazil and Japan. Authors read will include Waugh, Greene, Percy, Bernanos, Endo and more. American authors will also be considered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASRP.

AMCS 3978. Catholic Studies Seminar I. (4 Credits)
This course is the first half of a year-long interdisciplinary seminar, introducing students to the Catholic Studies concentration, using literary, theological and historical texts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, ASRP, IRST.
AMCS 4950. Christianity and Gender/Sexual Diversity: Interdisciplinary Perspectives. (4 Credits)
Employing perspectives from history, theological ethics, and LGBT studies, this course will investigate what it means to take queer perspectives on Christianity sexuality, and discipleship. Readings will include biblical, historical, and contemporary materials that seek to illuminate the ways in which Christians and Christian communities have responded to sexual and gender diversity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, ICC, THHC.

AMCS 4999. Independent Study. (1 to 4 Credits)

American Studies (AMST)

AMST 2000. Major Developments in American Culture. (4 Credits)
An interdisciplinary history of American cultural traditions. Students will be introduced to major developments in American culture, arts, literature, folk culture, thought, and media. Course sets transformations in culture in the context of American political, social, religious, and economic history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, APPI, ASHS, PLUR.

AMST 2800. American Legal Reasoning. (4 Credits)
An introduction to American legal reasoning through selected readings. For enrollment, please contact pre-law advisor Erin Burke at erburke@fordham.edu or the American Studies director at amerstudies@fordham.edu. Preference will be given to American Studies majors and pre-law students. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: APPI, ASHS, ASSC.

AMST 3100. Intro to American Culture. (4 Credits)
An introduction to American culture with particular emphasis on the interdisciplinary aims and methods of American Studies. Junior level seminar usually taken in the first semester of junior year. Provides an overview of methods and texts used by different disciplines. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ASHS.

AMST 3610. Special Topics: Women and American Comedy. (4 Credits)
This course explores the history of women and comedic performance in the U.S., from the vaudeville stage of the late nineteenth century to stand-up and the television situation comedy of the 20th and 21st century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ASHS.

AMST 3800. Internship. (1 to 3 Credits)

AMST 4010. Approaches to American Studies. (4 Credits)
An introduction to the interdisciplinary perspectives and methods of American Studies. Class will explore the theme of characterizing and defining ‘America,’ with attention to how a distinctive interdisciplinary approach to this theme has shaped the field of American Studies. Students will also develop skills to analyze a wide range of primary materials from an interdisciplinary perspective. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASHS, ICC.

AMST 4500. The Senior Seminar. (4 Credits)
A team-taught seminar, drawing on faculty in different areas of American Studies, the seminar provides a focused exploration of some aspect of American history and culture and forms the basis of the senior essay. During their senior year, all majors enroll in this course and, in consultation with the director of the program, research and write their senior thesis. American Studies senior majors only. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASHS.

AMST 4999. Independent Study. (1 to 4 Credits)
Independent research and readings with supervision from a faculty member.

Anthropology (ANTH)

ANTH 1050. Anthropology Focus. (3 Credits)
How different is family life around the world? In this course, students will become acquainted with families in several cultures, and they will compare these to their own to discover what they share in common and what they don’t. Emphasis will be placed on definitions of family, types of family, the developmental cycle, domestic space, roles and activities within the family, families in their community, adaptation to external forces, and family and memory. Students will explore how anthropologists look at family life cross-culturally and how they explain the range of diversity observed.
Attributes: FRSS, INST, IPE, ISIN, SSCI.

ANTH 1100. Introduction to Cultural Anthropology. (3 Credits)
We live in a shrinking international arena that demands greater sensitivity to the diversity of cultural patterns surrounding us. In this course, students investigate human beliefs and behavior, particularly in regard to forms of communication, marriage and the family, adaptations to the environment and to political, economic and religious institutions in a variety of past and present cultures.
Attributes: FRSS, GLBL, INST, ISIN, SSCI.
ANTH 1200. Introduction to Physical Anthropology. (3 Credits)
This introduction to physical (or biological) anthropology satisfies a core life science requirement and serves as a general survey of the biological focus of anthropology. The course summarizes the different areas of physical anthropology and covers the history of evolutionary theories, human genetics and adaptation, primate biology, behavioral ecology and conservation, and an extensive overview of the human fossil record. In particular, we emphasize the variations found in non-human primates and the biological and cultural changes that took place in our ancestors over the past 6.8 million years. Lab sessions will provide a practical introduction to human osteology, primate morphology, primate conservation, and comparisons of human fossil morphology.
Attribute: LSCI.

ANTH 1300. Introduction to Archaeology. (3 Credits)
How do we study society when no living members of that culture remain? Students will examine the ways by which archaeologists have inferred former patterns of behavior from surviving evidence through a survey of traditional methods as well as new scientific techniques. Students will study artifacts from the University’s collection and ‘excavate’ their own archaeological site on paper to better understand the process of investigation.
Attributes: CLAS, FRSS, GLBL, IPE, MEST, SSCI.

ANTH 1413. Language and Culture. (4 Credits)
An introduction to linguistic science emphasizing the structure, functions, and origins of languages as the symbolic system of communication peculiar to humans. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, LING.

ANTH 1500. Introduction to Fashion and Culture. (4 Credits)
This introductory lecture course is required for students pursuing the fashion studies minor. In this class, students will be introduced to cultural and media studies concepts that will equip them with the theoretical and methodological tools necessary to explore fashion as a historically situated and context-dependent form of communication and meaning making. The course considers the implications of fashion within systems of power, every day acts of self-presentation, and larger politics of representation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: FASH.

ANTH 1600. Introduction to Human Variation. (3 Credits)
This introductory physical anthropology course explores in detail issues of human biological variation, that is, why humans differ from each other. It satisfies a life science core requirement and examines evolutionary theories, human genetic variations, and human adaptations to environmental stresses. The main focus of investigation of human genotypic and phenotypic variations as observed in contemporary human populations to obtain an understanding of the biological basis for anatomical and physiological variation (incorrectly referred to as ‘race’ in a social context), including different evolutionary mechanisms that have shaped these variations, and how changing environments may have influenced these directions as well as the emergence of, and adjustment to, various chronic diseases. Lab sessions provide a practical introduction to cellular genetics, population genetics, osteology, anthropometry, statistics, and human evolution.
Attribute: LSCI.

ANTH 2202. Anthropology of Performance. (4 Credits)
This course guides students to think about cultural performances such as dance, music, theatre, and verbal arts through a cultural anthropology lens: understanding a performance within its particular context, learning about a society through its cultural productions, and reflecting on what difference reveals about our own familiar cultures. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

ANTH 2447. Passages: Life Cycles. (4 Credits)
Although the life cycle is biologically based, societies differ in the way they conceptualize the stages of life. This course explores differing concepts of personhood and how a person is linked to moral beliefs and ideologies of power. We examine the way rites of passage (e.g., birth, initiation ceremonies, marriage, parenthood, and death) shape personhood in different cultures. We consider how the perspectives of psychology and anthropology complement, challenge, and enrich our understanding of the life cycle. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN.

ANTH 2500. Taboo: Anthropology of the Forbidden. (4 Credits)
Taboo helps identify sources of social danger, establishing prohibitions designed to protect society from that which it considers dangerous or repulsive. Yet, the prohibitions always exert an undeniable attraction, leading to a fascination with transgression. Through exploration of the anthropological notion of taboo-and related cross-cultural concepts of impurity, contagion, and transgression-this course will explore the extent to which prohibition and danger structure social life. Topics considered will include incest, cannibalism, eroticism, filth, murder, madness, and sin. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, INST, IPE, ISIN, REST.

ANTH 2520. Introduction to Forensic Anthropology. (4 Credits)
The course surveys methods in crime scene investigation and forensic archaeology. Often, the commision of a violent act leaves an unidentifiable corpse, which requires the expertise of a forensic anthropologist to identify the guilty party. Students will learn how forensic anthropologists create biological profiles from deceased individuals (using metric, non-metric, odontological, and genetic information). Notable persons and current research in the field will be introduced through the examination of case studies. The applications and abuse of forensic evidence in the courtroom and popular culture are also explored. Students will come to understand the direct relationship between archaeology, physical anthropology, and forensics in the quest not only to solve 'Who Dunnit?', but 'Who Was It?' Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.
ANTH 2700. You Are What You Eat: The Anthropology of Food. (4 Credits)
As the center of all significant human rituals and ceremonies, food is studied by a range of natural and social scientists. For the anthropologist, food is connected to the human body, health social relations, identity, and even ideology; we are literally what we eat. This course examines the role food plays in shaping cultural practices throughout the world. Students will explore changing concepts of food through time, beginning with early humans, modes of food production, and consumption. Through primary literature, lectures, local ethnic markets, and sharing meals throughout the semester, this class will immerse you in the theoretical and empirical significance of the cross-cultural significance of food. Bon appetit! Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, ASSC, ENST, ESEL, ESHC, INST, ISEU.

ANTH 2770. Anthropology of Childhood. (4 Credits)
This course will explore the experience of childhood cross-culturally, including, for example, toddlers in New Guinea, North American tweens, and child soldiers in Sierra Leone. We will address issues such as discipline, emotion, authority, and socialization within the broader context of race, religion and gender. Special attention will be given to the effects of war, poverty, and social inequality on children and the recent development of a set of universal human rights for children. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, GLBL, INST, IPE, ISIN.

ANTH 2771. Film and the Anthropology of Gender and Sexuality. (4 Credits)
Film, still photography and video each enable anthropologists to capture and analyze aspects of this relationship, and of culture in general. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 2614. Urbanism and Change in the Middle East. (4 Credits)
This course discusses urban traditions and theories in the Middle East. The course material will cover multiple Middle Eastern cities, old and new. Through ethnography we analyze the impact of colonial policies on the politics of space and place. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, ISIN, ISME, MEST.

ANTH 2619. Magic, Science, and Religion. (4 Credits)
Magic, science and religion will be analyzed, compared and contrasted. Problems in the comparative study of these topics, especially of religion, the ‘supernatural,’ and world view, are discussed in the context of various cultures. (Every other year). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, IPE, ISIN, WGSS.

ANTH 2620. The Anthropology of Cities. (4 Credits)
This course explores the everyday life of cities in a range of international contexts. We will investigate the formation of urban neighborhoods, urban ties based on ethnicity and religious beliefs, multilingualism and changing notions of the city due to globalization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, IPE, ISIN, URST.

ANTH 2623. Gender and Islam. (4 Credits)
This course will examine gender roles, ideologies, and debates in majority-Muslim societies around the world, as well as the global politicization of gender and Islam. Specific topics to be covered include gender in Islamic texts and law and their interpretation over the centuries; the gender question in political movements, ranging from nationalism to Islamism; sex segregation practices and the issue of honor; and Western images of Muslim women. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN, ISME, MEST.

ANTH 2626. Anthropology of Economics. (4 Credits)
The purpose of this course is to acquaint students with the major theoretical and methodological perspectives in the anthropological study of human economies, past and present. The course will explore the principles and history of economic analysis in anthropology, including the cultural factors that shape and guide economic behavior in diverse societies from the stone age to modern times. Readings will cover topics in ethnography, human ecology, social theory, political economy, and economic development. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

ANTH 2629. Gender and Sexuality. (4 Credits)
Human sexuality in Cross-Cultural Perspective. Human sexuality presents a challenge to anthropology which, as a general practice, continues to divide the biological from cultural. Sexuality depends on biology, but its actual practices arise in specific cultural contexts, which vary widely. In this course, we examine older anthropological theories of sexuality as well as a new emerging interactionist paradigm that recognizes the power of both biology and culture. Specific topics include ethnographic method in the study of sexuality, evolutionary theory, cultural constructivism, heteronormativity, and gay, lesbian, bisexual, and transgender issues, in a range of societies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, IPE, ISIN, WGSS.

ANTH 2685. Anthropology of Gender and Sexuality. (4 Credits)
Are sex roles biologically determined or culturally defined? A cross-cultural perspective provides a unique opportunity to explore answers to this question through an examination of the roles of men and women in marriage and the family and in economic, political and religious institutions, as well as how such roles are interrelated with conceptions of masculinity, femininity, honor and shame. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, GLBL, INST, IPE, ISIN, WGSS.

ANTH 2886. Anthropology of Gender and Sexuality. (4 Credits)
This course will examine gender roles, ideologies, and debates in majority-Muslim societies around the world, as well as the global politicization of gender and Islam. Specific topics to be covered include gender in Islamic texts and law and their interpretation over the centuries; the gender question in political movements, ranging from nationalism to Islamism; sex segregation practices and the issue of honor; and Western images of Muslim women. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN, ISME, MEST.

ANTH 2890. Visual Anthropology. (4 Credits)
Culture affects what and how we see, and what we see affects our culture. Film, still photography and video each enable anthropologists to capture and analyze aspects of this relationship, and of culture in general. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
ANTH 2892. Power and Film: The Politics of Representation. (4 Credits)
From Nanook of the North to Harlan County USA to Anthony Bourdain's travels to 'Parts Unknown,' filmmakers have tried to capture lives and communities that often veer far from their own experiences. But in our current age of global voices, who has the right of representation? How does a visual anthropologist, a documentary filmmaker or a television news correspondent convey cultural differences without condescension, appropriation or exploitation? Through close examination of documentaries and news pieces, this class will examine how the camera lens pretends to show its subjects 'as is,' but is actually filled with all the complications and challenges of representation. We will look at television footage from natural disasters to war zones to the crime blotter, where tight deadlines, physical danger, and linguistic distance can bend the image, and affect our understanding of conflict and victims. Who gets to tell these stories, how they are told, and how is this changing in a globalized world form part of the politics of representation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 2999. Tutorial. (2 Credits)

ANTH 3002. Art and Anthropology. (4 Credits)
In this class, we will explore the century-long dialogue between anthropology and the creative arts. From Picasso and Matisse appropriating African arts, and Zorah Hurstom drawing on her anthropological research for her novels, to Michael Taussig’s use of fiction as an ethnographical tool, the study of culture and the creation of art have long been closely intertwined. We will read essays, ethnographies, poems, novels, and life histories, tracing the possibilities of anthropology as a creative discipline and a way of understanding creativity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 3110. Ancient Cultures of the Bible. (4 Credits)
What was it really like in Biblical times? Through an archaeological investigation of the Holy Land, particularly the Canaanite, Israelite and classical cultures of Old and New Testament times, this course provides students with a better understanding of the ancient social and religious background of our modern Judeo-Christian tradition. Extensively slide illustrated. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 3111. New World Archaeology. (4 Credits)
What were the Americas like before the arrival of Europeans? This course investigates the prehistory of the western hemisphere with emphasis on the arrival and expansion of hunter-gatherer societies throughout the New World. Explore ancient Native American cultural adaptations from the Ice Age to today’s global warming within the diverse and dynamic habitats of early times. Students will gain a broader appreciation of American Indian culture and diversity, as well as its extraordinarily long record of survival and achievement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 3115. Introduction to Medical Anthropology. (4 Credits)
The interdisciplinary field of medical anthropology focuses on the study of health and healing within cultural, biosocial and cross-cultural contexts. Students will develop an understanding of how to apply core concepts and methods from anthropology to understanding and addressing problems located at the intersection of culture, well-being, disease and death.

ANTH 3154. Sports: An Anthropological Perspective. (4 Credits)
Why is sports so pervasive throughout the world? Sports entertains and generates billions in revenue, but it has a more profound role in human society. This course will examine sports as an integral part of human culture that can both reproduce and challenge cultural structures. We will discuss how issues such as race, class, gender, sexuality and nationalism are embodied and performed on the field and in the stands, using the context of multiple sports. While we will take a critical look at sports, this course will also approach the topic with an eye to the common human experience of joy in the game. As Galeano said, "when good soccer happens, I give thanks for the miracle and I don't give a damn which team or country performs it." Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 3002. Art and Anthropology. (4 Credits)
In this class, we will explore the century-long dialogue between anthropology and the creative arts. From Picasso and Matisse appropriating African arts, and Zorah Hurstom drawing on her anthropological research for her novels, to Michael Taussig’s use of fiction as an ethnographical tool, the study of culture and the creation of art have long been closely intertwined. We will read essays, ethnographies, poems, novels, and life histories, tracing the possibilities of anthropology as a creative discipline and a way of understanding creativity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 3110. Ancient Cultures of the Bible. (4 Credits)
What was it really like in Biblical times? Through an archaeological investigation of the Holy Land, particularly the Canaanite, Israelite and classical cultures of Old and New Testament times, this course provides students with a better understanding of the ancient social and religious background of our modern Judeo-Christian tradition. Extensively slide illustrated. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 3111. New World Archaeology. (4 Credits)
What were the Americas like before the arrival of Europeans? This course investigates the prehistory of the western hemisphere with emphasis on the arrival and expansion of hunter-gatherer societies throughout the New World. Explore ancient Native American cultural adaptations from the Ice Age to today’s global warming within the diverse and dynamic habitats of early times. Students will gain a broader appreciation of American Indian culture and diversity, as well as its extraordinarily long record of survival and achievement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 3115. Introduction to Medical Anthropology. (4 Credits)
The interdisciplinary field of medical anthropology focuses on the study of health and healing within cultural, biosocial and cross-cultural contexts. Students will develop an understanding of how to apply core concepts and methods from anthropology to understanding and addressing problems located at the intersection of culture, well-being, disease and death.

ANTH 3154. Sports: An Anthropological Perspective. (4 Credits)
Why is sports so pervasive throughout the world? Sports entertain and generates billions in revenue, but it has a more profound role in human society. This course will examine sports as an integral part of human culture that can both reproduce and challenge cultural structures. We will discuss how issues such as race, class, gender, sexuality and nationalism are embodied and performed on the field and in the stands, using the context of multiple sports. While we will take a critical look at sports, this course will also approach the topic with an eye to the common human experience of joy in the game. As Galeano said, "when good soccer happens, I give thanks for the miracle and I don't give a damn which team or country performs it." Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 3110. Ancient Cultures of the Bible. (4 Credits)
What was it really like in Biblical times? Through an archaeological investigation of the Holy Land, particularly the Canaanite, Israelite and classical cultures of Old and New Testament times, this course provides students with a better understanding of the ancient social and religious background of our modern Judeo-Christian tradition. ANTH 3333. Seeing Race: American Visual Culture in Historical Perspective. (4 Credits)
The idea of race, as well as its derivatives of racial difference and racism, is inextricably linked to the human ability to assign meaning to what we see. This course examines the role of photography and other 19th- and 20th-century visual traditions in propelling racial ideologies that continue to permeate American life today. We will draw on readings on critical race, gender, border, and visual theories to interpret a variety of primary sources such as historical photographs, films, posters, cartoons, and performances. Students will be encouraged to use library reference material on regional and global developments such as colonization, slavery, military incursions, displacement, and migration. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ASSC.

ANTH 3339. Irish and Mexican Migration: New York Focus. (4 Credits)
The course will take a comparative look at the historical and contemporary Irish and Mexican migrations to New York City. Special emphasis will be given to ethnographic exploration and analysis of the different communities' migration processes, including how each has impacted on the city, and also transformed the origin populations back home in Ireland and Mexico. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AMST, ASHS, ASSC, LALS, LASS, SOCI.

ANTH 3340. Anthropological Perspectives on Race and Ethnicity. (4 Credits)
A cross-cultural, interdisciplinary consideration of the concepts of race and ethnicity, this course examines racial and ethnic categories and explores how they form, how society gives them meaning and the circumstances under which they change. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, INST, IPE, ISIN, LALS, LASS, PLUR, URST.

ANTH 3343. Ghettoes and Gated Communities. (4 Credits)
How do humans order their urban landscapes? Do different cultures segregate certain peoples in the urban landscape? Do cultures exclude certain groups from certain neighborhoods? Students will become acquainted with ghettos and gated communities in different cultures around the world and compare them with their own to discover what they share and don't share. Students will learn how anthropologists study global urban communities. Topics to be covered in this course are urbanization, creation of ghettos and gated communities, influences on the urban landscape from gender, political, economic, social, and global forces. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, ASSC, GLBL, INST, ISIN, PJRC, PJST, URST.

ANTH 3347. Anthropology of HIV/AIDS. (4 Credits)
This course explores the cultural, historical, political, economic, and public health aspects of HIV/AIDS. We will study the emergence, development, and contemporary meaning of HIV/AIDS in the US and internationally, impacts across multiple sectors of society, experience of affected populations, responses of health, political and social sectors; and varying approaches to prevention and treatment. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 3351. Comparative Cultures. (4 Credits)
This course will survey the diversity of cultures in the world and the processes that have produced similarities and differences among and within various geographic areas. Some of the central topics of discussion include human adaptation and adaptability, social change, modernization and ideas of development in small scale as well as in complex societies today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AMST, ASHS, ASSC, GLBL, INST, IPE, ISIN, ISWH, LALS, LASS, MEST, PJST.

ANTH 3354. Race, Identity, and Globalization. (4 Credits)
The course will explore the power of racial discourses in the production of global difference over the last five decades. Particular emphasis will be placed on the work of James Baldwin to understand the insights of the North American civil rights movement, and its global influence since the 1960’s. The civil rights movement coalesced at an important moment of global historical questioning, and along with the African and Caribbean nationl liberation movements, anti-Vietnam war protests, feminist and gay struggles and the student uprisings in Europe and Latin America, marked a particular manner in which to re-think global concepts such as democracy, citizenship, transnational identity, and political consciousness. The objective of the course is to make use of Baldwin's racial, national, and global reflections to understand the global effects of the progressive movements initiated five decades ago. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AMST, APPI, ASHS, ASRP, INST, ISIN, LALS, LASS, URST.

ANTH 3355. Culture and Anticolonialism. (4 Credits)
In this course students will read and discuss major texts in the anticolonial traditions of Africa, Latin America and the Caribbean. The course will also address how the search for a 'native' esthetics marked the cultural production of these regions in the Twentieth Century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ASSC, INST, ISAF, ISIN, ISLA, PJRC, PJST.
ANTH 3356. Uprisings: Protest and Resistance Across the Globe. (4 Credits)
This course will examine anthropologies of protest and resistance, with a special focus on urban and transnational social movements. It will offer anthropological tools for understanding resistance and power, as well as ethnographic methods for studying them. It will include case studies (for example, anti-colonial and anti-apartheid movements, the Arab Spring, and indigenous rights activism) and opportunities for students to research protest and resistance in digital media and in New York City. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPi, ASHS, ASSC.

ANTH 3357. Globalization and Migration. (4 Credits)
From the world wide web to international finance, migration to world music, the signs of globalization are all around us. This course will examine how this globalized world came to be and how we can use anthropological tools to understand how it works today. In particular, we will explore the relationship between the local and global and consider how globalization affects individual lives and experiences—including our own—creating both opportunities and barriers. Paying special attention to the inequalities of globalization, we examine how and why new borders and walls are being built in our global age. Taking advantage of our location in New York, we will explore the way that the city has been shaped by globalization and migration, from the more obvious cultures of food, fashion, and media to the hidden economies and transnational networks that make the city. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

ANTH 3380. Hazards, Disasters, and Human Experience. (4 Credits)
Sandy, Katrina, 9/11. Natural and anthropogenic disasters are not new (consider Pompeii or even Noah’s flood), but because of global climate change, the intensity and frequency of storms is increasing along with tragic human suffering and property destruction. Anthropological perspectives are increasingly relevant to disaster prevention and relief efforts, especially since anthropologists participate in inquiry and cleanup in the aftermath of these disasters. By exploring the complexities of recent and past natural and human caused disasters, this course explores the ways in which cultures perceive and respond to disaster. We will identify pragmatic actions which can mitigate or prevent human suffering and improve relief efforts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASSC, ENST, ESEL, ES HC, HH PA, HUST, INST, ISIN.

ANTH 3385. Post-Apocalyptic Societies. (4 Credits)
Humans have a long fascination with cataclysmic events. This course will use post-apocalyptic fiction as ethnography to examine the processes and forms of culture change in the wake of catastrophic events such as nuclear war, viral epidemics, and alien invasions. Using popular culture, we will study how humans adapt to the loss of the familiar structures that shape their lives, and will seek to develop a broad understanding of human cultural formation through these cases of its complete annihilation. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

ANTH 3393. Graffiti: The Challenges and Conundrums of Street Art. (4 Credits)
The course will focus on the history and development of graffiti since its ancient inceptions in cities like Pompeii to its post-modern expressions. Particular emphasis will be placed on the role of graffiti in resisting and critiquing official state power, and how, over the centuries it has been a focus of state censorship and repression. Scholars and colleagues will also be invited to talk about graffiti from different perspectives. Meanwhile students are expected to carry out a research term paper about the history, development, and unique issues of graffiti in a particular urban center. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASHS, ASSC.

ANTH 3470. People and Cultures of Latin America. (4 Credits)
This course surveys the diversity of Latin America as a continent and as a complex mixture of peoples and cultures with an increasing presence in the United States. It will place particular emphasis on the discussion of ethnicity, race, gender, religion, artistic production, and economic and political inequality. The aim of the course is to understand the cultural and social particularities of contemporary Latin America and to place them in a global context. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASHS, ASSC.

ANTH 3476. Latin American Social Movements. (4 Credits)
This course examines past and present social movements across Latin America to develop a deeper understanding of citizenship, the state, and power in the Americas. Stretching across time and geographic space, we will first explore pivotal historical grassroots movements (including the Mexican Zapatistas, the Madres de la Plaza, and Nicaraguan Sandinistas) and also current, emergent movements (including #niunamas, the Migrant caravan, and the Maya Environmental movement). In each of these case studies, we will situate the demands, strategies, and challenges of the movement in its regional historical context and analyze the underlying social problems and history of oppression from which they arise. Students will interact with a variety of media, including classic anthropological theory on social movements and the state, popular media and film, and texts written by the protagonists of the movements themselves. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, HHPA, HUST, INST, ISLA, LAIN, LALS, LASS.

ANTH 3510. Museums: Representing / Engaging Culture(s). (4 Credits)
This course will explore the purposes museums serve and the meanings museums create in New York City and throughout the world. We will consider practices of representation and strategies for community engagement, and cover both the historical development of museums and contemporary museum-related controversies. The course will include visits to New York City museums during and outside of regular class time. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPi, ASAM, ASHS, ASSC, LALS, LASS, URST.
ANTH 3520. Forensic Investigation of the Human Skeleton. (4 Credits)
To understand how the human skeleton is utilized to identify the deceased and sometimes solve crimes, knowledge of skeletal biology and anatomy is paramount. This course has two primary objectives: first to provide basic but solid knowledge of the human skeleton, and second to explain the application of that knowledge to forensic anthropology. Students can expect to obtain a critical understanding of human skeletal anatomy and forensic osteology, as well as the ability to think critically about the recent media glamorization of forensic practice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

ANTH 3570. Applied Human Rights. (1 Credit)
Most people working on international affairs, and other disciplines internationally oriented, might confront cases of human rights violations. Some international workers try to prevent those directly, or to deal with these impacts, and others need to document, at least partially, those violations as the relate to their core mission (e.g. implement health programs for teenagers in a conflict area, or address displacement of indigenous peoples by corporations). How can we understand the relations between different international programs and human rights works? What are the similarities, differences and intersections? What abilities and methods are required for all international workers confronting human rights violations? What are some of the most recent successes in international law and domestic regulations? In this seminar, we will present diverse examples in several countries that intersect with human rights violations. We will describe the professional roles of different team members (lawyers, psychologists, social workers, doctors, community actors, etc.) and the tools and protocols needed in order to successfully register their experiences (in context of warfare, environmental damage, and even in natural disasters). We will listen to the testimonies of survivors and human rights workers, and will present specific cases emphasizing the security needs and the risks involved in those.
Attributes: ASSC, BESN, BIOE.

ANTH 3650. Africa in the World. (4 Credits)
Is the world map upside down? What is “Africa” and who is African? Is the Global South a place or an ideological project? This seminar introduces students to key debates and intellectual interventions in African studies concerning the politics of knowledge production, geopolitical formation, and Africa's regional and global connections. By critically examining how social categories—such as culture, religion, race, economy, and ideology—have been mapped onto different parts of the world, the course traces how legacies of colonialism and imperialism in Africa continue to inform contemporary perspectives on economic development, capitalism, and globalization. The course will foreground perspectives of people who mobilized to transform them, from anti-colonial fighters and postcolonial scholars to the Third World solidarity movement and contemporary artists. Lastly, the course explores the complexity of “Global South” through Africa’s south-south engagements. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAM, ASSC, HUST, INST.

ANTH 3620. Border Cultures in the City: Summer in New York. (1 Credit)
The course will explore a migrant New York City normally not visible to most of the native inhabitants of the city. In this manner, the course will allow students to meet and understand the different struggles and lived-in-reality of migrants, particularly Mexican ones, as they strive to make a dignified living for themselves and their families. The course will look to asses and discuss the physical, cultural and emotional border culture that migration has created between Mexico and the United States but also between many of the Central and South American nations. To this degree it will also explore the newly invigorated Latino culture in the United States, one that figures more and more prominently in the future of the United States and the continent. Finally, through daily lectures and site visits to migrant organizations and communities students will explore the myriad of manners in which politics of identity and culture have taken shape and have shaped our city.
Attributes: ADVD, AMST, ASHS, ASSC.

ANTH 3710. Bilingualism: Local Practices and Global Perspectives. (4 Credits)
Human beings have produced at least 7,000 languages in the history of the world, many communities support the use of more than one of these within their boundaries and many individuals acquire multiple languages over the course of a lifetime, sometimes switching among tongues within the same conversation even in today’s global English. The course examines the many approaches that sociolinguists and linguistic anthropologists have developed for studying how and why humans do this. What are the causes and consequences of retaining more than one language in our domestic lives, cultural institutions, and nation-states? What are the costs and benefits? Why, in short, do humans continue to value and invest in bilingualism, both locally and globally? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN.

ANTH 3700. Mothering and Motherhood. (4 Credits)
This course provides an in-depth look at what is often assumed to be the most basic and fundamental building blocks of all human relations: mothering. But what does it mean to be a mother? Who is allowed to mother? Whose motherhood is lost or denied? What qualifications does it take mother? And how does what appears to be the private practice of motherhood, intersect with larger political processes, gender ideals and hierarchies, science and technology, and public expressions of intimacy? We will explore the concepts of mothering and motherhood to understand its dynamics beyond birth, bake sales, and kissed boo-boos. This course provides an opportunity to question and rethink mothering and motherhood in a variety of social and cultural contexts both within and outside the U.S. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, INST, ISIN, WGSS.
ANTH 3721. The Currency of Historical Memory. (4 Credits)
The objective of the course will be to discuss and learn about the myriad ways in which history and memory play essential roles in the production of identities and nation-states today. Historical representations are essential for countries, communities, and individuals to survive in today’s global ecumene. For this reason, history and memories have become essential commodities that are produced, consumed, and exchanged on a daily basis and at lightning speeds. These historical productions and consumptions have been normalized to such a degree that we barely are able to understand that this is where we speak from, as well as what defines even what we see as reality. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

ANTH 3725. Culture and Culture Change. (4 Credits)
Selected issues in the relationship of human behavior and culture. Issues dealt with in this course include the concept of culture, culture and the individual, culture contact, and culture change. (Every other year) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASHS, GLBL, HHPA, HUST, INST, IPE, ISIN, ISWH, MEST.
Prerequisite: ANTH 1100.

ANTH 3726. Language, Gender, and Sexuality. (4 Credits)
This course examines how everyday language use is constituted by cultural ideas about gender, sexuality, power, and identity. Students will analyze various theoretical frameworks through ethnographic case studies from Mexico, Madagascar, Senegal, Hungary, Nepal, and the United States. We will focus on issues such as prestige, politeness, inequality and hierarchy, language shift, multilingualism, code-switching, and literacy. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, ISIN, LING, WGSS.

ANTH 3771. Pyramids, Gods, and Mummies. (4 Credits)
The course looks to explore the myriad of manners in which these politics of identity and culture have taken shape over the last centuries (and even millennia). Through lectures, readings and site visits to archaeological and historical sites around Puebla and Mexico City the course will assess how these migrating notions of culture have served to enable contesting identities across and through the border production between the United States and Mexico. It is particularly useful to view this dynamic from down below to better complete the authoritative picture officially espoused by the governing bodies of both countries. To this degree the value of the course will be to explore, first through lectures, secondly through site visits, and thirdly through small research papers and a final small research project how sometimes similar, and at other times differing, notions of what it means lobe American has permeated the landscape of the continent, and continues to fuel our cultural and political identities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS.

ANTH 3800. Internship. (3 Credits)

ANTH 3888. Arab Women and Social Movements. (4 Credits)
This course explores the participation of Arab women in social movements before and after the 2011 “Arab Spring”. The course will be examining why and how women contribute to political and social changes, the challenges they encounter, and the changes in their understanding of their roles as citizens in the postcolonial nation-state. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISME, PJGS, PJST, WGSS.

ANTH 4004. Art Worlds: Anthropology and Sociology Perspectives. (4 Credits)
Incorporating methods and insights from sociology and anthropology, and drawing on the resource of the immediate context of New York City’s cultural communities and institutions, this course will analyze many of the arts and artistic communities of New York City. The study of culture generally, and art worlds more specifically, allows us to understand art and culture not only as aesthetic experiences, but also as institutional, economic, social and political phenomena. Our summer mid-day time slot will allow us to avail ourselves of numerous field trips and cultural excursions to support our discussions, readings, and lectures. This course currently fulfills an Interdisciplinary Capstone Core requirements for Fordham College students and is expected to be listed as an EP3 course by Summer 2014. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ICC.

ANTH 4114. Anthropology of Health Healing and Social Justice. (4 Credits)
Health and illness will be studied as an interrelationship of biology, ecology, and culture in antiquity and contemporary societies. Among concepts of health and healing explored in Euro-American and non-Western cultures are: What is ‘normal’? What causes disease? Who can heal? What treatments are provided? What impact does modernization have on these cultural patterns? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, BESN, BIOE, GLBL, ICC, INST, IPE, ISIN.

ANTH 4341. Race, Sex, and Science. (4 Credits)
This course introduces students to interdisciplinary debates about the relationship between race, sex, and gender, on the one hand, and science, technology, and medicine, on the other. We will examine two interrelated questions: How do scientific claims influence cultural understandings of race, gender, and sexuality; and how do cultural beliefs about race, sex, and gender influence scientific research and knowledge production? The course will explore the role that understandings of race, sex, and gender have played in the development of Western science; the relationship among race, sex, gender, and scientific research in genomics and health disparities research (among other fields); and finally, the ways in which race, gender, and social inequalities become embodied and affect human biology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ICC, PLUR, SOCI, URST, WGSS.
ANTH 4344. Reproductive Technologies: Global Perspective. (4 Credits)
The interdisciplinary course will focus on issues in technology and reproduction, emphasizing the view that reproduction is not simply a biological process, but one that is laden with symbolic, political, and ideological meanings. Drawing on the fields of anthropology, sociology, history, public health, law, and science, technology and society. We will examine the contested meanings of reproduction, in particular how reproductive technologies are changing lives around the globe. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: BSN, GLBL, ICC, INST, ISIN, WGLS.

ANTH 4373. Environment and Human Survival. (4 Credits)
This course is an inquiry into the biological and cultural processes by which human populations have adapted to the world’s diverse ecosystems. Particular attention is devoted to issues of group survival in difficult habitats and the environmental impact of preindustrial and recently Westernized cultures. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AMST, APPI, ASHS, ASRP, ENMI, ENST, ENVS, EPLE, ESEL, ESHC, GLBL, HHPA, HUST, ICC, INST, IPE, ISIN.

ANTH 4490. Anthropology of Political Violence. (4 Credits)
Political violence happens everyday, whether we endure it personally or hear about it through the media. But seldom do we ask ourselves what it is. This course investigates the nature of political violence and articulate its many forms from the anthropological perspectives of gender, class, ethnicity, economics, and of course, politics. Specific areas of study include Northern Ireland, Germany, Sudan, Palestine, Mexico, Argentina, China, Australia, and the U.S. The course will discuss the motivations for action (or inaction) by governments, elites, and insurgents, and students will get to know some of the organizations working against political violence. Field trips will include visits to the United Nations, The United Holocaust Museum, and Ground Zero. Podcasts, news broadcasts, movies and audio documentation of events will provide further access to examples of global political violence. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, APPI, ASHS, HHPA, HUST, ICC, INST, IPE, ISIN, PJST, PJWT.

ANTH 4722. Primate Ecology and Conservation. (4 Credits)
This course is an introduction to primates. Through lectures, readings, discussions, and observation projects, students will investigate the emergence of the order and explore the diversity of primates around the world. The course will address issues of ecological adaptation, social organization, and conservation, especially of the species most threatened by extinction, and it will illustrate how habituation projects make it possible to conduct effective field studies. The evolutionary basis of the special characteristics of primates will be discussed, as well as the question of what nonhuman primate behavior can tell us about ourselves. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ENST, ENVS, ESEL, ESHC, ESSL, ESNS, ICC.

ANTH 4802. Archaeology of New York. (4 Credits)
The history of New York City and its environs takes on a completely different feel when the people and times are illustrated using material culture, the artifacts representing the daily activities of previous lives. Borrowing from the university’s extensive collection of objects dating from prehistory to the 20th century, the course will examine former times through the lens of the items recovered from archaeological excavations, landfills, subsurface trash accumulations, and construction worksites in order to provide a more personal and intimate view of the past. Historical in the broadest sense, the curriculum will not include a detailed chronology of the city but instead explore the worlds of household, industrial production, urban infrastructure, and other social dimensions that the real objects make accessible. Aspects of conservation and curation of these rare documents of the past will be covered as well. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 4998. Senior Thesis. (4 Credits)
Independent research under mentor guidance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ANTH 4999. Tutorial in Anthropology. (1 to 4 Credits)
Supervised individual study project.

Attribute: GLBL.

Antitrust (ATGL)

ATGL 0204. Global Antitrust Seminar. (2 Credits)
It is hard to think of an area of law as international as antitrust. Over 120 countries have antitrust laws. In a globalized economy, the effects of most mergers and business strategies are rarely felt in a single country, and often transcend jurisdictional boundaries. For those interested in pursuing a career in antitrust, or simply interested in learning more about this fascinating area of law, focusing only on U.S. antitrust law will offer you an important but incomplete view of the area. The goal of this seminar is to provide students with an overview of how key topics in global antitrust are handled today. We will compare different laws and identify to what extent they converge or diverge, and how multiple antitrust laws influence each other and the economies that are subject to them. To achieve this goal, we will review and compare the outcome of major cases in key antitrust jurisdictions, such as Brazil, China, the European Union, Japan, Mexico, and the United States. We will also study recommendations by multilateral organizations such as the International Competition Network (ICN) and the Organisation for Economic Co-operation and Development (OECD). Grading: Grades will be based on class participation (25%) and a seminar paper of at least 20 pages double-spaced (75%). Papers are due on the day of our last class. During this class, students are required to make a brief presentation on the subject of their papers and their conclusions. This presentation will count toward class participation.

Attributes: ICE, LAWI, LLM.
ATGL 0230. International Cartel Enforcement: Globalization of Antitrust. (2 Credits)
This course focuses on how different legal systems detect and punish cartel behavior. It will examine public enforcement efforts by competition authorities in the United States and the European Union, as well as private remedies available in both jurisdictions. With respect to public enforcement, the course will consider a number of issues, including investigative tools, amnesty programs, sentencing guidelines, and cooperation and convergence initiatives by competition authorities in both jurisdictions. The course will also examine from a comparative perspective the different systems of private remedies available to injured parties in the U.S. and the EU, taking into account the new EU Directive on rules governing private antitrust damage actions. Among the topics to be considered in this part of the course will be class actions and other mechanisms for collective redress, extraterritoriality, standing issues, and proof of damages. NOTES/MISC: Paper Required.
Attributes: CORC, ICE, LAWI, LIC.

ATGL 0309. Antitrust Law. (3 or 4 Credits)
Examines the federal antitrust laws, covering agreements in restraint of trade, unilateral conduct by monopolists, and mergers. Both sections will be online in the Fall 2020 semester. <p>Professor Patterson's section will be made up of prerecorded lectures covering the basic doctrine, simulations of practice-oriented scenarios co-taught by FLS alumni practicing in the area, and coverage of antitrust issues in the online economy. <p>Professor Steuer's section will consist of prerecorded lectures to explain in advance the concepts to be studied each week, followed by live remote sessions to discuss the cases and materials in each week's readings, with emphasis on current developments and tips for litigation, counseling, and compliance training.
Attributes: BFE, CORC, IPIF, LAWB, LAWI, LLM, PIE.

ATGL 1017. Antitrust and High Technology. (2 Credits)
ATGL 1018. Antitrust in the Digital Economy. (2 Credits)

Applied Statistics and Decision Making (SDGB)
SDGB 7811. Applied Statistics Internship. (1 to 3 Credits)
This is an experiential elective within the Applied Statistics program, requiring faculty guidance for academic credit from professional training.

SDGB 7840. Applied Regression Analysis. (3 Credits)
Focuses on preliminary data analysis, model formulation and estimation, and reliability and sensitivity analysis to understand causal links between various elements of a relationship as the foundation for effective system design and control. Multivariate regression models and techniques of experimental design provide the basis for exploring these links. Discusses applications to all areas of business.
Attribute: BUAN.
Prerequisites: DGGB 6820 or DGGB 6830.

SDGB 7841. Statistical Theory I. (3 Credits)
This course provides an Introduction to mathematical Statistics and a foundation for acquiring the skills to apply advanced statistical models to many important areas of decision-making in business. The course focuses on developing an understanding of random variables, their distribution functions, and sampling theory.
Attributes: BUAN, ISER.
Prerequisite: DGGB 6820.

SDGB 7842. Statistical Theory II. (3 Credits)
This course provides an Introduction to mathematical Statistics and a foundation for acquiring the skills to apply advanced statistical models to many important areas of decision-making in business. The course focuses on developing an understanding of: Hypothesis testing, Nonparametric Statistics, Bayesian Statistics, Multivariate Methods and Linear Models and their applications.
Prerequisites: DGGB 781A or SDGB 7841.

SDGB 7843. Judgment and Decision Making. (3 Credits)
Decision-making is a central human activity, but how good are we at it? Scientific evidence suggests that our decisions are often biased and flawed, resulting in disappointing or even disastrous outcomes. This course draws upon contemporary research in economics and psychology to answer two questions: (1) how should we rationally approach decision-making, and (2) why is it that our actual decision-making is so often irrational?.
Attribute: BUAN.

SDGB 7844. Stat Methods and Comp I. (3 Credits)
This course is designed to introduce statisticians to statistical programming and data analysis. Topics will include: hypothesis testing, regression models, experimental design and simulation. The statistical topics are integrated into the programming content.
Attributes: BUAN, ISER.

SDGB 7845. Sampling Theory. (3 Credits)
This course provides a foundation in sample design and data collection for decision making. We study theoretical principles and applications, starting with definition of the population characteristic of concern, the frame, sampling methods, sample size, and sampling plan. We study also sampling and non-sampling errors and biases, problems of non-response, the half-open interval, and other methods to assure validity and usefulness of our data.

SDGB 7846. Advanced Financial Econometric. (3 Credits)
This course takes up Bayesian estimation of small-scale financial sector and macro-econometric models. Counter-factual simulations will also be used, as well as Monte-carlo methods for evaluating confidence intervals. In addition to Bayesian estimation, the course will make use of extensive data sets to investigate topics such as contagion effects across countries in financial markets, and neural networks for predictive accuracy. *Subject to NY Approval*

SDGB 7847. Machine Learning for Stats. (3 Credits)
The course will give students an opportunity to implement statistical techniques in 'R' to better understand how they work. Emphasis will be on implementation and intuition rather than on background theory and analytical methods. The course will offer a lab-style approach to numerical analysis and optimization methods used to fit statistical models. Topics will include gradient descent/ascent for regression and classification, newton's method, expectation maximization for mixture models, numerical maximum a-posteriori estimation via EM. Students will have the chance to implement techniques and become proficient in 'R' by writing functions and classes that perform standard analyses.
Attribute: BUAN.
SDGB 7848. Observational Studies. (3 Credits)
In real-world settings, analysts must draw inferences about causes and effects from observational data, such as those generated from a nonrandomized study. For example, how do we truly determine whether charter schools produce better student outcomes, or whether a marketing campaign for a product has increased consumer awareness? This course will cover select classes of statistical methods to help analysts design and analyze observational studies, for real-world decision-making. Topics will include propensity scores, predictive, modeling, and stimulation-based inference; the R statistical software will serve as the primary computational tool for this course, so a basic knowledge is required.
Attributes: BUAN.

SDGB 7849. Experimental Design. (3 Credits)
This course examines the design, implementation, and analysis of empirical research methods. Topics include experimental and quasi-experimental designs; validity within designs; sampling; and data analysis.

SDGB 7850. Statistical Risk Analysis. (3 Credits)
This course examines various aspects of risk as revealed or concealed in business, society, and personal situations by utilizing tools in probability theory, statistical analysis, decision theory, and cognitive and behavioral sciences. Students will learn basic risk metrics and models, along with methods for risk analysis and management. Through case studies mirroring Western and Chinese societies and ranging from health & safety, social inequality, finance, to sports and entertainment, students will gain deeper understanding of risk and become better decision makers. Interdisciplinary in nature, this course invites students to think unconventionally of problems that are at the frontier of the globalized and information-saturated world.

SDGB 7851. Measurement and Data Visualization. (3 Credits)
Businesses use metrics not only to track, evaluate, and incentivize their employees and customers but also to monitor and improve their organizations. To inform their decisions, they may, for example, look at company records, run an experiment, speak to employees and customers, or make site visits. All of these activities generate data, requiring decisions to be made on how to collect, summarize, analyze, and present these disparate pieces of information. In this course, we consider how to approach these issues, from developing appropriate metrics and heuristics, to thinking about data quality, to creating accessible visualizations.
Attributes: BUAN, ISEL.

SDGB 8999. Applied Stats & Decision. (3 Credits)

Arabic (ARAB)

ARAB 1001. Introduction to Arabic. (5 Credits)
This course focuses on four skills—reading, speaking, writing, and listening—that provide students with an introduction to Arabic language and culture.
Attribute: MEST.

ARAB 1501. Intermediate Arabic I. (3 Credits)
Continued study of the fundamentals of the Arabic linguistic system with systematically organized reading, writing and conversation exercises. Introduction to literary texts.
Attributes: IPE, MEST.
Prerequisites: ARAB 1001 or ARAB 1002.

ARAB 1502. Intermediate Arabic II. (3 Credits)
Continued study of the fundamentals of the Arabic linguistic system with systematically organized reading, writing and conversation exercises. Introduction to literary texts.
Attributes: IPE, MEST.
Prerequisite: ARAB 1501.

ARAB 2001. Arabic Language and Literature. (3 Credits)
This course is designed for students who have a solid knowledge of Arabic language basics, essential vocabulary, and verb forms and tenses. Through coursework, students will focus on developing and expanding their vocabulary, learning new grammatical structures and usages, developing good listening and writing skills, and applying literal and inferential comprehension skills (after reading magazines, newspapers, and short stories, and watching videos and films). Students will practice oral skills through structural exercises during class time, and they will complete written assignments to reinforce their understanding of the concepts studied in class.
Attributes: IPE, MEST.
Prerequisite: ARAB 1502.

ARAB 2400. Approaches to Arabic Culture. (4 Credits)
This course is based on the knowledge and skills gained in Arabic Language and Literature II. The main focus is on developing fluency and sophistication in reading, writing, and in oral communication. This course is designed to train students how to evaluate and revise their writing in Arabic, while continuing to review and refine pertinent grammatical structures. It aims to increase the students’ familiarity with Arabic culture by working with selected Arabic literary texts and Arabic periodicals. The course will be conducted mainly in Arabic. Pre-req ARAB 2001 or Instructor’s Permission. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE, MEST, PJRC, PJST.
Prerequisite: ARAB 2001.

ARAB 2450. The Short Story of Arabic Literature. (4 Credits)
Students will learn the history of the Arabic short story, and sample a variety of stories from diverse periods and authors. By reading these stories, students will develop their comprehension skills in Arabic, and will also broaden their knowledge of Arab-world literature. Class discussions will be in Arabic, and will focus on conversational skills in the language. Taught in Arabic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: IPE, MEST.
Prerequisite: ARAB 2001.

ARAB 2601. Arabic Conversation and Composition. (3 Credits)
Intensive practice of the spoken and written language with emphasis on proper use of idioms and building of vocabulary based on topics of interest and relevance. A basic course for prospective majors and minors.
Attributes: IPE, MEST.
Prerequisite: ARAB 2001.
ARAB 2602. Arabic Immersion in Morocco. (4 Credits)
Through this program, you will take an upper-level Arabic language/literature/culture course based at AMIDEAST's Study Center in Rabat, Morocco. Classes will meet for one month during Fordham's Summer Session I and will be primarily taught in Arabic. This course counts towards your requirements in the Arabic minor at Fordham University. In addition to your class work, you will participate in a number of cultural visits during your stay, including a weekend excursion to Fez. Rabat is one of Morocco’s “imperial cities,” and its modern capital. It is home to the leading educational institutions in the country and offers students opportunities to move from the shops and cafes of the “European” city to the winding alleys and exciting markets of the old “medina” in a few minutes’ walk. Students in the program live with Arabic-speaking Moroccan families and attend classes with Fordham faculty at AMIDEAST’s facilities in the bustling Agdal area of the city.
Attribute: IPE.

ARAB 2650. Business Arabic I. (4 Credits)
This course examines the norms of Arab business culture and helps prepare students for work with Arabs in the Arab world. In particular, the course focuses on improving business and speaking skills as well as appropriate forms of presentation through personalized training, role-playing, and business pitches. Beyond incorporating the essentials of business vocabulary, we will explore every aspect of public speaking and efficient communication—from grammatical accuracy and clarity to using body language and physical space. Students will prepare resumes and cover letters, conduct interviews, negotiate, and build up experience and self-confidence in handling real-life situations. Invited guests from the Arab business and entrepreneurial community in New York City will share their experiences with students and provide opportunities to practice new skills and learn more about bilingual business opportunities. This course is taught in Arabic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Prerequisite: ARAB 2001.

ARAB 3000. Topics in Arabic Cultures. (4 Credits)
A broad survey of Arabic cultures through the study of some of its major literary figures and texts. The course will examine representative texts from artistic movements in Egypt, Syria, Lebanon, and Libya, such as romanticism, realism, and postmodernism. By the end of the course students will be able to define the main characteristics of these movements. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: ALC, COLI, INST, IPE, ISME, MEST.

ARAB 3010. Human Rights in Arabic Literature. (4 Credits)
This class explores issues of race, gender, class and social justice in Arabic Literature. It focuses on the terminology and concepts related to human rights and the law, with all readings and class discussions held in Arabic. Students will also learn about sharia law and its implications for social justice. This class is especially relevant for students studying political science, Middle East studies and international studies or who wish to minor in Arabic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: ALC, INST, IPE, ISME. Prerequisite: ARAB 2400.

ARAB 3040. Topics in Arabic Literature. (4 Credits)
This course is dedicated to Arabic literature (al-Adab al-'Arabī) and the Arabic renaissance, or ‘al-Nahda‘ literary production (poetry, Maqamat, epic literature, diaries, Romantic literature, Islamic scholarship, and women’s literary salons and societies in the Arab world). We will focus on the most important writers, thinkers, artists, and scientists of those times (i.e., Ibn al-Muqaffa, ibn Hazm, ibn Battutah, al-Hariri, Jabra Ibrahim Jabra, Mikha’il Na‘ima, Nazik Al-Malaika, Nizar Qabbani, Mahmoud Darwish, and Nawal el-Saadawi) and engage in close readings of seminal works, with the intent of uncovering and investigating the major problems engendered by the birth of Arab countries. We will also discuss the fundamental cultural, political, and social roles that courtiers, writers, and scientists play in the Arab world. Please note: This course is taught in Arabic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: ALC, COLI, INST. Prerequisite: ARAB 2001.

ARAB 4999. Tutorial. (1 to 4 Credits)
ARAB 9101. Introduction to Arabic I. (0 Credits)
ARAB 9152. Intermediate Arabic II. (0 Credits)

Art History (ARHI)

ARHI 1100. Art History Introduction. (3 Credits)
An introduction to the study of art through key monuments of paintings, sculpture, and architecture of primarily western art. Form and style as visual representation will be analyzed. Outstanding works will also be explored in terms of their context or function, and the changing role of the artist in society will be explored. Attributes: FACC, FRTE.

ARHI 1101. Introduction to Art History: Europe. (3 Credits)
An introduction to the study of the art of Europe through key paintings, sculpture architecture, and other arts. Form, style, context, function, and the changing role of the artist in society are explored. Attributes: FACC, FRFA, INST, ISEU.

ARHI 1102. Introduction to Art History: Asia. (3 Credits)
An introduction to the study of the art of Asia. This course covers architecture, sculpture, and paintings in India, China, and Japan from the ancient to the contemporary period. Attributes: AHGL, FACC, FRFA, GLBL, INST, ISAS.

ARHI 1103. Introduction to Art History: Americas. (3 Credits)
A survey of the art and architectural traditions of the Americans from 3000 BCE to the present. This course explores artistic productions in both North and South America and considers how architecture and visual works have been used to express ideas about American identity and the place of the Americas in the world. Attributes: ACUP, AHGL, AMST, ASAM, FACC, FRFA, GLBL, INST, ISIN, ISLA, LAHA, LALS.

ARHI 2100. History of Architecture. (4 Credits)
A consideration of the language of design and structure of key architectural monuments from ancient times until the present. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attribute: AHMO.
ARHI 2221. Japanese Visual Culture: Prehistory to Present. (4 Credits)
An examination of Japanese visual culture from prehistory to contemporary society. Issues and material explored: the development and spread of Buddhism, temple art and architecture, narrative art and prints, the interaction of art and popular culture, manga, anime, and contacts with western society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHGL.

ARHI 2223. Art and Violence in Modern Asia. (4 Credits)
This course considers intersections between art and violence in modern Asia. It will focus on propaganda art from Japan, China, South Korea, and North Korea, and examine how violence is advocated through visual language in relation to differing political ideologies, such as imperialism, fascism, communism, and nationalism.

Attributes: AHGL, GLBL.

ARHI 2230. Islamic Art. (4 Credits)
This course presents an overview of some of the most important episodes of Islamic art and architecture from their origins to the 18th century. We will focus on the monumental mosques, mausolea, and palaces of the great dynasties, as well as the most prized of more delicate artistic traditions such as calligraphy, manuscript painting, textiles and ceramics. Emphasis will be given equally to visual/interpretive analysis and critical thinking, and will entail readings from an introductory textbook as well as more in-depth scholarly writings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHAM, AHGL, GLBL, MEST, MVAM, MVST, REST.

ARHI 2250. Ancient American Art. (4 Credits)
Introduction to the art of Mexico, Central America and Peru from its beginnings to the time of its contact with Europe. Examination of architecture, sculpture, ceramics, and paintings in the context of such cultures as Olmec, Teotihuacan, Maya, Aztec, Chavin, Mochica, Tiahuanaco and Inca. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AHAM, AHGL, AMST, ASAM, GLBL, LAHA, LALS, MVAM, MVST.

ARHI 2257. Modern Latin American Art. (4 Credits)
In modern period, Latin American nations, the by-product of European colonization, developed artistic traditions that grew out of their own distinct realities. This course looks at two great shaping forces of modern Latin American Art: nationalism, which called on visual art to both create a national identity and to reflect it; and modernism, an aesthetic movement that insisted on artistic autonomy. In more recent years, the political integrity of Latin American nations has been challenged by oppressive governments and imperialism, leading artists to seek new ways of expressing ideas and identity within and beyond the national sphere. We will also be seizing the many opportunities that New York offers to see Latin American art first hand at sites that include El Museo del Barrio, Sothey's, and the Cecilia de Torres Gallery. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AHGL, AHMO, AMST, ASAM, GLBL, INST, ISLA, LAHA, LALS.

ARHI 2305. Greek Art. (4 Credits)
This course provides a survey of the major monuments of Greek Art from the Bronze Age through the Hellenistic Period (c. 2500-100 B.C.), focusing on their function in Greek myth and ritual mythological depictions in vase paintings, funerary sculpture, the cult statue, narrative reliefs, temple architecture and urban sacred landscapes. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHAM, CLAS, OCAH, OCST.

ARHI 2311. Athens and Ancient Greece: Athens and Pericles in the Fifth Century BC 'Golden Age’. (4 Credits)
Long remembered as a political and artistic highpoint in the western traditions of art, architecture, history, philosophy, politics and theatre, this course takes a holistic look at the challenges and opportunities of writing about 5th century BC Athens. Students will analyze a range of writing about Athens, and its most famous statesman, Pericles. Genres from modern scholarship on technical evidence (such as stone inscriptions and archaeological field reports) to 19th century poetry seeking to evoke a lost “golden age” of art and democracy will all inform students’ own writings. This wide range of modern texts and ancient evidence will allow us to consider all parts of Athenian society. A final project will require students to alter their writing for a more general audience, by devising, writing, and shooting a short animated film. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHAM, CLAS.

ARHI 2315. Roman Art. (4 Credits)
This class is a survey of the art and architecture of Rome from the Republican and Hellenistic periods through the era of Constantine (5th century BCE- 4th century CE). Though chronological in structure, this course will also address overarching issues and themes in art history and archaeology, such as the power of images in the ancient world (as opposed to/similar to today), Roman ways of looking at art and space, the role of monuments, makers and patrons in Roman society, and connections with the other cultures who inspired and made use of Roman artists and styles. Overall however, the class is intended to introduce students to the ways in which Western Civilization is indebted to Roman culture. NOTE: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHAM, CLAS, OCAH, OCST.

ARHI 2320. The Fall of Ancient Rome: A Material Culture Investigation. (4 Credits)
An interdisciplinary investigation of the period ca. 300–800 AD. The traditional model of Gibbon’s ‘Decline and Fall of the Roman Empire’ will be considered in the light of modern conceptions of ‘Late Antiquity’ by scholars such as Peter Brown, who see this as a period of sometimes dramatic cultural and political transformation, defined by the growth of the vibrant new kingdoms of Western Europe, and the development of Christianity and Islam. Using the methodologies of Ancient History, Archaeology, Art History and Classics, the course will consider these two approaches through the lens of material culture. How and why did cities, sculpture, religious art, pottery, textiles, military equipment and luxury goods change during this period, and what do they all reveal about how and why Rome fell—if it did at all?.

Attributes: AHAM, CLAS, MVAM, MVST, REST.
ARHI 2341. Medieval Desire and Devotion. (4 Credits)
The medieval world was a complex social network built on relationships that crisscrossed heaven and earth. This course explores how people of divergent backgrounds—kings and clerics, men and women, rich and poor—used works of art and architecture to draw closer to those whose presence they desired most: God, the saints, and one another. It will range widely over the period: from the catacombs of late antique Italy to the cathedrals of high medieval France and England; from the courts of early medieval Germany to the cities of late medieval Spain and Flanders. Case studies will include churches, shrines, reliquaries, altar furnishings, and devotional imagery in multiple media—sculpture, panel painting, book illumination—for contexts both public and private. Frequent comparisons between 'sacred' objects associated with piety and 'secular' objects connected with pleasure will provide a broader view of the manifold desires that shaped medieval society. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHAM, ITAL, MVAM, MVST, OCAH, OCST.

ARHI 2360. Illuminated Manuscripts. (4 Credits)
Before the invention of the printing press in the fifteenth century, every book was a precious, hand-produced object. Often these manuscripts were richly decorated with painting, called illumination. This course examines the development of manuscript illumination over the length of the Middle Ages (c. 300-1500). Issues examined include: illuminated manuscripts and the establishment of the church, illumination and royal power, manuscripts and popular devotion, and the role of the artist as illuminator. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHAM, MVAM, MVST, OCAH, OCST.

ARHI 2365. Medieval Art and the Museum. (4 Credits)
Medieval works of art were not made to be seen in museums. The luxurious sculptures, paintings, and manuscripts of the Middle Ages (ca. 400-1400) mostly were created for the eyes of kings, queens, or priests, and the makers and original users of these objects never could have imagined the diverse museumgoers of today in the U.S. But in the early 20th century, American collectors avidly pursued medieval artworks, amassing the collections that later would be donated to museums like the Cloisters, the Metropolitan Museum of Art, and the Morgan Library & Museum. In this course, students learn about the development of medieval art (from the end of the Roman Empire through the Gothic era); study the history of museums in Europe and the U.S., with a focus on medieval Germany to the cities of late medieval Spain and Flanders. Case studies will include churches, shrines, reliquaries, altar furnishings, and devotional imagery in multiple media—sculpture, panel painting, book illumination—for contexts both public and private. Frequent comparisons between 'sacred' objects associated with piety and 'secular' objects associated with pleasure will provide a broader view of the manifold desires that shaped medieval society. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHAM, MVAM, MVST.

ARHI 2410. Northern Renaissance Art. (4 Credits)
Northern Renaissance art draws inspiration from the cultural and social developments of the early modern era (circa 1400-1600). Painters strove to depict the bustling energy of expanding cities, sculptors fabricated dynamic ensembles aimed at making tangible the subtleties of church doctrine, and illuminators and printmakers created precious and personal works that enhanced the domestic sphere. In this course we will explore such phenomena, considering how masters—including Jan van Eyck, Albrecht Dürer, and Hieronymus Bosch—experimented and innovated in an age of artistic revolution. This course includes site visits. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHRB.

ARHI 2418. Women in Renaissance Art. (4 Credits)
This course explores the role of gender in Renaissance art, considering women as viewers, subjects, patrons, and creators of Renaissance visual culture. Major artists considered include Leonardo da Vinci, Giovanni Bellini, Michelangelo, and Titian. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHRB.

ARHI 2430. Renaissance Portraits. (4 Credits)
Is a picture really worth a thousand words? What can the record of a person's physical appearance tell us about his or her character, and the values of his or her society? During the Italian Renaissance, portraits were test-cases of artistic skill, tools in marriage negotiations, and vehicles for the expression of friendship and political power. This class will consider the role of portraiture in defining, communicating, and preserving individual identity. Examining the concepts of "portrait" and "self-fashioning" in both the literary and visual spheres, we will read authors including Castiglione and Machiavelli, and study artists including Leonardo da Vinci and Raphael. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHRB.

ARHI 2450. 17th Century Art. (4 Credits)
This course surveys artistic developments in Europe in the Seventeenth Century and their relationship to the shifting political and intellectual landscape. The art of the Baroque is characterized by an interest in emotional appeal, visual immediacy, and the articulation of power. Major artists include Caravaggio, Bernini, Velázquez, Rubens, Poussin, Rembrandt, and Vermeer. The themes we will explore include the relationship of art production and reception to the political and religious environment, the development of national styles, the intersection of art, nature and science, and the emergence of academies as systems for artistic training and political control. In addition to introducing students to the visual arts of the Seventeenth Century, this course will emphasize the critical analysis of works of art and of art-historical scholarship.
Attribute: AHRB.
ARHI 2510. 18th Century Art. (4 Credits)
The development, dominance and decline of the international rococo style in painting and sculpture will be examined with special attention devoted to Watteau, Boucher, Fragonard, Chardin, Tiepolo, Canaletto, Guardi and Gainsborough. A study of the enlightenment sensibility and the rise of Neo-Classicism will follow Hogarth, Reynolds and David, among others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHMO, ITAL, REST.

ARHI 2520. American Art. (4 Credits)
This course will examine the development of American painting, sculpture and architecture from colonial times to the early 20th century, with an emphasis on painting. Major artists will be discussed in depth (Copley, West, Allston, Cole, Church, Bierstadt, Mount, Bingham, Homer, Eakins, Cassatt, O’Keeffe and others). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AHMO, AMST, ASAM.

ARHI 2526. Art and the Black Atlantic. (4 Credits)
This course considers the circulation of art and material culture between Africa, the Americas, and Europe from the early modern era to our current moment of globalization. Of central focus is the ways art makes space for understanding situations of diaspora, enslavement, empire, and redress that have shaped the Black Atlantic world. Students will engage a variety of works across media as well as literature on the conceptual and historical formation of the "Black Atlantic" to reflect on the ways members of the African diaspora have negotiated questions of belonging, retention, loss, and identity through artistic practice across time and space. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAM, AHGL, AHMO, GLBL.

ARHI 2530. 19th Century Art. (4 Credits)
A survey from ca. 1790 through impressionism with emphasis on the medium of painting and on artistic developments in France. Focuses on the changing role of the artist in society and on emerging art institutions of the modern state. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHMO.

ARHI 2534. The Victorian City: Art and Architecture in the 19th Century London. (4 Credits)
The class will consider the political, literary, social and spiritual forces that have driven artistic production in the Victoria era (from 1837 to 1901), while considering how human concerns are addressed and refined in the art that we study. The classes will balance lectures with discussions and assignments, presentations by students and site visits to various museums and galleries, historic houses, landmark buildings, and monuments in addition to a range of walking tours.

ARHI 2535. History of Photography. (4 Credits)
The history of photography from 1839 to the present. The work of leading European and American photographers will be studied in the light of the technical, social and aesthetic issues of their time.
Attributes: AHMO, PLUR.

ARHI 2550. 20th Century Art. (4 Credits)
A study of major trends in modern western art from the late 19th century to the late 20th century with an emphasis upon developments before 1930. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AHMO, AMST, ASAM, ASHS, INST, ISIN.

ARHI 2551. Russian Art of the Avant-Garde. (4 Credits)
One of the most exciting movements in 20th-century art, Russian art of the Avant-garde, radically reassessed the role of the artist and how his/her work in society and has had reverberations in Western art that continue today. This course begins with the Russian futurists and traces the manner in which new formal vocabularies and new attitudes towards materials were harnessed after the 1917 Revolution by artists like Popova, Goncharova, Rosanova, Tatlin, Rodchenko, Malevich, etc., to develop functional objects for the new society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHMO, OCAH, OCST.

ARHI 2552. Modern Asian Art. (4 Credits)
This upper-level art history course will examine pivotal artwork produced since the late 19th century in Asia, particularly in India, China, and Japan. The classes will consider art produced in the time of colonialism, war, modernization, and globalization and examine works by such artists as Gutai, Xu Bing, and Amrita Sher-Gil. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHGL, AHMO, GLBL, INST, ISAS.

ARHI 2553. Art, Gender, and Sexuality in Asia. (4 Credits)
This upper-level art history course probes into artistic and cultural representations of bodies in Asia in relation to such themes as sex, gender, sexuality, race, nationhood, war, and post-humanity. Through thematic examinations of diverse bodily representations, students will learn a broad range of interpretive tools and frameworks to appreciate artistic objects. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHGL, AHMO, GLBL, WGSS.

ARHI 2571. Topics in Modern Art. (4 Credits)
This course will address selected topics in 20th-century art, broadly defined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ARHI 2610. Women of Modernisms. (4 Credits)
What role did women play in the development of modernisms in the arts? This course studies 20th- and 21st-century artists, collectors, gallery owners, and writers, including Gertrude Vanderbilt Whitney, Gertrude Stein, Louise Bourgeois, Joan Mitchell, Maggie Nelson, Laura Raicovich, and Pussy Riot. Through the study of artworks, biographical accounts, and literature, students will trace circles of sociability among women, paying particular attention to these figures’ import for the development of various strands of modernism and their interdisciplinary points of intersection. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: ARHI 1101.
ARHI 2620. Introduction to Fashion History. (4 Credits)
This course surveys developments in fashion from antiquity to the modern era, with particular attention paid to the impact of technology and the social contexts of fashion makers and consumers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: FASH.

ARHI 3100. Museum Methods. (4 Credits)
Exploration of materials and techniques of the visual arts and a study of the different types of modern institutions for their exhibition. The course relies on field trips to museums, galleries and other institutions, mainly in New York City. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHMO, AMST, ASAM, URST.

ARHI 3200. Museum Studies in Ancient Art. (4 Credits)
This class examines the display of Ancient Art using the collection at Fordham as a foundation. The class considers the aesthetic issues of exhibiting ancient objects and addresses the ethical concerns of collecting "un-provenanced" antiquities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHAM, CLAS.

ARHI 3300. Art Crime and the Law. (4 Credits)
Art law is a rapidly expanding area of legal inquiry. Issues in the news today range from WWII era looting to high profile thefts from museums to the international market in antiquities to the destruction of cultural property in the Middle East. This course exposes students the legal aspects of these phenomena. Readings range from scholarship to journalism to legal briefs. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHMO.

ARHI 3316. Art and Architecture of Rome. (4 Credits)
(Course to be offered as part of Fordham’s study abroad program in Rome, the Rome Athenaeum.) Rome once ruled the entire Mediterranean world, and its cultural legacy looms large in Western Civilization. At the heart of this legacy is the city that gave its name to the ancient empire. For almost two thousand years, Rome has been more than a literal place - it is an icon of culture, expressing many different characters depending on the era. In the ancient world the city epitomized the earthly splendor of Roman civilization. In the Medieval period its political importance waned, and the city was reduced to a symbolic, spiritual center - the city’s decaying pagan edifices signifying the triumph of Christianity. In the Renaissance, Humanists and the Papacy sought to re-claim the city’s Classical past and re-work it into a new vision of the city as both spiritual and temporal ‘caput mundi’ (head of the world). This course will examine the art, architecture and culture of these three epochs of the city’s history: Ancient, Medieval and Renaissance/Baroque, through the lens of its monuments. Indoor class time will be minimal and our primary mode of exploration will be site visits. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHAM, AHRB, CLAS, OCAH, OCST.

ARHI 3350. Age of Cathedrals. (4 Credits)
Gothic cathedrals were the skyscrapers of the Middle Ages. These impossibly tall and profusely decorated buildings were center points for urban life in northern Europe between ca. 1150 and 1400. This course explores the architectural innovations behind the Gothic style as well as the extensive adornment of Gothic structures (especially sculpture and stained glass) and objects that were used in them (such as illuminated manuscripts and metalwork) in relation to their sacred, social, political, and economic meanings. Site visits will be included when possible. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHAM, MVAM, MVST, REST.

ARHI 3455. Michelangelo. (4 Credits)
This course surveys the life, times, and works of Michelangelo Buonarroti (1475-1564). We will trace his development from his origins in fifteenth-century Florence to his role as the leading artist of sixteenth-century Rome and his ultimate fate as the “divine” artist memorialized by Giorgio Vasari. Our primary goal is to examine his major projects in painting, sculpture, and architecture, and analyze the social, artistic, political, and religious context that informed their production and reception. Throughout the course, we will be attentive to the “myth of Michelangelo” promoted by his principal biographers, Giorgio Vasari and Ascanio Condivi, and by the artist himself. We will test their histories of Michelangelo’s career against evidence drawn from other sources, including contemporary documents and modern scholarship. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHRB, ITAL.
Prerequisites: ARHI 1101 or ARHI 1102 or ARHI 1103.

ARHI 3480. Art and Architecture in London. (4 Credits)
London is one of the most exciting cultural capitals of the world. Its museums, churches and monuments will supply the rich resources for our art historical studies. While the emphasis will be upon the modern era from the late 18th century onward, earlier museum treasures and major architectural monuments will provide deep historical background for our study of the modern period. Class lectures will be supplemented by visits to The British Museum, The Courtauld Institute of Art, The National Gallery, Tate Britain and Tate Modern, The Victoria and Albert Museum, along with galleries and auction houses. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHMO, FACC.

ARHI 3555. Contemporary Art. (4 Credits)
A survey of recent art, concentrating on work since World War II. The modern European and American roots of contemporary art will be examined as well. Directions such as Abstract Expressionism, Pop Art, Minimalism, Post-Minimalism, Earth Art and Conceptual Art will be emphasized. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AHMO, AMST, ASAM.
Prerequisites: ARHI 1101 or ARHI 1102 or ARHI 1103.
ARTI 3565. Issues: Contemporary Art. (4 Credits)
An in-depth examination of current issues in contemporary art. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHMO.

ARTI 4100. Contemporary Art in Exhibition. (4 Credits)
Using the art galleries, museums, and artists’ studios in New York City as field sites, this course provides an introduction to the theoretical and practical aspects of contemporary art and exhibition design. In recent decades, enormous shifts have occurred in exhibition practices as art itself changed from objects on display, to protected images on the walls of the museum, to temporary installations outdoors, and eventually moved into virtual reality. We will study an array of contemporary exhibition, museum installations, art fairs, international biennials, and websites. During this seminar, we will examine how issues such as patronage, the art market, globalization, identity politics, and environmental and social justice issues have brought museums and other exhibition spaces into question. We will be meeting with a range of artists and art professionals. During the term students will create a virtual exhibition. The process of building this online exhibition will equip students with several skills, including writing for a public audience, the creation of effective and informative wall labels and educational programming, visual and digital literacy, and a basic understanding of copyright law and fair use guidelines.
Attributes: AHMO.
Prerequisites: ARHI 1101 or ARHI 1102 or ARHI 1103.

ARTI 4230. Art and Ethics: Articulating Function in the Visual Arts. (4 Credits)
This course will examine the inter-disciplinary dialogue between art and ethics. What exactly do the terms ‘art’ and ‘ethics’ denote... and connote? Can one nudge the terms together into some kind of binary concept, like ‘ethical art’ or ‘artful morality’ (!)? Or do these terms relate at some other, deeper level, with a common ontological foundation? In the course of the semester, we will consider the relationship between art and ethics, as they have surfaced in philosophy, in theology, in history, in the history of art, and in art criticism from antiquity to the present era. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, EP4, VAL.

ARTI 4250. Aztec Art. (4 Credits)
This course will examine the art created by the Aztecs, one of the last of the two great pre-Columbian cultures. Holding sway over much of Mexico at the beginning of the 16th century, the Aztec empire was brought to collapse by the arrival of the Spanish conquistadors. We will focus on the primary source, both Aztec and Spanish, as keys to understanding the art. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHAM, AHGL, AHRB, AMST, ANTH, ASAM, GLBL, ICC, LAHA, LALS, REST.
Prerequisites: ARHI 1101 or ARHI 1102 or ARHI 1103.

ARTI 4435. Art of the Tudor Courts. (4 Credits)
This course coincides with the Metropolitan Museum of Art’s major exhibition of art at the Tudor courts. Focusing on the rich visual culture of the English court from 1485 to 1603, it investigates the power of art to support the dynastic claims of the Tudor dynasty. We will explore the intersection of art and politics during the reigns of Henry VIII and Elizabeth I. Classes will meet both on campus and at the museum. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHRB, HIEH, HIST, HIUL, ICC.
Prerequisites: ARHI 1101 or ARHI 1102 or ARHI 1103.

ARTI 4530. Gender and Modern Art. (4 Credits)
This seminar will examine the role of women as artists and subjects in the history of modern art. We will discuss the social and educational impediments that both inhibited and shaped women’s careers. We will also investigate the cultural construction of gender difference in works of art by men and women artists, and read theoretical texts on the issues involved. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHMO, AMST, ASAM, WGSS.

ARTI 4540. Seminar: Modern Art. (4 Credits)
A study of the major movements of Modern Art. This course will also involve various field trips to exhibitions and museums in New York City. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AHMO, AMST, ASAM.

ARTI 4555. Art and Ecology. (4 Credits)
This course investigates the work of artists, writers, and filmmakers who have dedicated themselves to creating solutions to specific environmental problems or whose works have broadened public concern for ecologically degraded environments. Students will participate in a wide variety of discourses about the personal, public, and ethical dimensions of current environmental issues. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHMO, ENST, ESEL, ESSD, ICC.
Mutually Exclusive: ARHI 5555.

ARTI 4560. Modernism in Art and Literature. (4 Credits)
An interdisciplinary study of the connection between modern art and literature. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHMO, COLI, ICC.
ARHI 4562. Art and Fascism. (4 Credits)
This course will study the artistic and cultural production of global fascism, focusing on Italy, Germany, and Japan between the 1920s and the early 1940s. Central issues to our course are the definition of fascism; the relationship between modernity/modernism and fascism; the relationship between aesthetics/style and political ideology, race, and gender. Students will become familiar with a wide range of artistic/cultural works from painting to theater, crafts, literature, and film, and read scholarship that employs diverse disciplinary approaches (history, philosophy, film studies, art history, design, literature, education, and psychology). Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHGL, GLBL, ICC, ISAS, ISEU, ISIN.

ARHI 4600. Senior Seminar. (4 Credits)
As the capstone seminar for art history majors, this seminar has several goals: to give art history majors an introduction to the principal thinkers who shaped the field of art history; to explore some of the key methodological approaches to art history today; to hone students’ skills in critical reading and viewing; and to provide students the opportunity to conduct independent research on an art historical topic of their own choosing. Offered fall semesters only; required for majors. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ARHI 4999. Tutorial. (1 to 4 Credits)
Independent research and readings with supervision from a faculty member.

ARHI 5100. Contemporary Art in Exhibition. (4 Credits)
Using the art galleries, museums, and artists’ studios in New York City as field sites, this course provides an introduction to the theoretical and practical aspects of contemporary art and exhibition design. In recent decades, enormous shifts have occurred in exhibition practices as art itself changed from objects on display, to protected images on the walls of the museum, to temporary installations outdoors, and eventually moved into virtual reality. We will study an array of contemporary exhibition, museum installations, art fairs, international biennials, and websites. During this seminar, we will examine how issues such as patronage, the art market, globalization, identity politics, and environmental and social justice issues have brought museums and other exhibition spaces into question. We will be meeting with a range of artists and art professionals. During the term students will create a virtual exhibition. The process of building this online exhibition will equip students with several skills, including writing for a public audience, the creation of effective and informative wall labels and educational programming, visual and digital literacy, and a basic understanding of copyright law and fair use guidelines.

ARHI 5555. Art and Ecology. (3 Credits)
This course investigates the work of artists, writers, and filmmakers who have dedicated themselves to creating solutions to environmental problems or whose works have broadened public awareness of ecologically degraded environments. Students will participate in a wide variety of discourses about the personal, public, and ethical dimensions of current environmental issues.
Mutually Exclusive: ARHI 4555.

ARHI 8999. Tutorial. (1 to 6 Credits)

Banking (BKGL)

BKGL 0206. Financial Analysis and Valuation. (2 Credits)
This course helps students understand how firms communicate through financial statements. The course is designed for students who want to obtain an introduction to the business and legal implications of financial analysis and accounting. The successful student will obtain a grasp of financial analysis and the significance of such issues to corporations. We will use the tax law, anti-trust, and SEC reporting as windows to apply accounting factors to the legal impact of financial analysis to corporate reporting and transactions.<p>Students will not need any prior accounting course work or experience.
Attributes: LAWB, LLM.

BKGL 0213. Banking Litigation. (3 Credits)
Banking litigation is an enormous field. In 2013, The Wall Street Journal described global banks as facing a legal tab greater than $100 billion resulting from litigations ‘tied to the mortgage meltdown, the financial crisis and the rate-rigging scandal.’ This course deals with these topics and others, as well as legal trends and disputed issues in banking litigation.<p>The goal of the course is to prepare students for a career involving banking litigation, whether at a law firm or in-house at a global bank. Some other topics covered include service of process on international banks; jurisdiction as applicable to international banks; New York’s separate entity doctrine and the current split among courts regarding its ongoing validity; legal issues relating to electronic fund transfers; foreign and domestic banking secrecy acts, including litigation regarding the banking regulatory privilege and the confidentiality of SARs; litigation regarding sanctioned entities; litigation implicating foreign sovereigns; and litigation involving Know-Your-Customer requirements. This course will also consider recent trends of Anti-Terrorism Act litigation focusing on international banks, and the problem of litigation arbitrage (where banks are forced to confront conflicting discovery and confidentiality requirements).<p>The course will include guest speakers from leading international banks and private practice, providing opportunities for students to meet and discuss these issues with practicing attorneys. This is a skills course open to both JD and LLM students. Professors Geoffrey Sant and Lanier Saperstein.
Attributes: LAWB, LIDR.

BKGL 0224. Regulation of Financial Institutions. (3 Credits)
The Regulation of Financial Institutions focuses on the regulation of financial institutions and financial markets. It will address the regulation and supervision of banks, securities firms, insurance companies and other asset managers.
Attributes: BFE, CRCP, JD, LAWB, LLM.
BKGL 0291. Counseling Big 4 Clients on Implementing FATCA, CRS & Other Int'l Reporting Standards in Compliance. (2 or 3 Credits)
This course is designed as an experiential course for LL.M. students. The course will provide an overview of the global financial account reporting rules (such as FATCA and Common Reporting Standards) and due diligence procedures that financial institutions have implemented to comply with these rules. The course will address how compliance requirements are addressed from different angles (operations, legal counsel, tax and compliance functions). <p> Students will be trained to be able to describe and explain complex rules to different areas of an organization as well as on how to communicate regulatory requirements to their clients as external advisors. The course will have a focus on understanding the role and responsibilities of the in-house advisor in comparison to the role of an external advisor. <br> Students will role-play both positions (in-house counsel and external advisor) by participating in a group activity that would cover the end-to-end proposal process: <br> • Initial presentation/ educational session on the regulatory requirements as an external advisor, <br> • In-house discussion of the presentation <br> • Presentation of an advisory services proposal as an external advisor, <br> • In-house process to decide on the proposals presented by various firms<br> • Organization of the regulatory project <p> Students will be provided individual feedback on their class performance for Classes 2 to 7, and group feedback on the class performance for Classes 8 to 11. Students will also engage in self-evaluation of their own performance on the class activities using the Self-Evaluation Form. At the end of this course, students will develop communication and presentation skills both oral and written, problem solving skills, organization and collaboration in advisory work related to implementing regulations. 
Attributes: CORC, CRCP, EXP, LAW, LAWB.

BKGL 0311. Financial Institution: Banking. (3 Credits)
The relationship between banks and other financial services institutions will be examined in this course, along with bank and bank holding company powers, restrictions and abilities to enter new fields. The course will review the laws affecting commercial banks and thrift institutions, the functions of the various federal and state regulatory agencies, the development of innovative forms of financial services, the effects of electronic technology upon banking law and interstate banking. You cannot take this course if you have taken Financial Institutions I.
Attributes: BFE, CRCP, LAWB.

BKGL 0312. International Banking. (2 or 3 Credits)
This course examines the legal and regulatory framework governing foreign banks in the United States and U.S. banks abroad. The course has seven main parts. First, basics of banking, and why countries regulate banks. Second, international capital standards and other standards that banks must meet to operate outside their home countries. Third, the U.S. regulatory framework for U.S. banks operating abroad. Fourth, the U.S. regulatory framework for foreign banks operating in the United States. Fifth, international lending, including the problems banks face when foreign governments default on their debts. Sixth, international deposit-taking and letters of credit. Seventh, the conflicting demands posed by U.S. anti-money laundering laws and foreign bank secrecy laws.
Attributes: BFE, CRCP, ICE, LAWB, LAWI.

BKGL 0330. Financial Institutions Banking. (3 Credits)
This course focuses on federal regulation of banking, particularly regulation aimed at keeping banks financially sound. It examines the evolution of U.S. banking, banks' financial structure and special vulnerabilities, the process for forming or acquiring banks, the businesses in which banks can and cannot engage, safety and soundness safeguards (e.g., net worth requirements), affiliations between banks and other firms, deposit insurance, bank failure, systemic risk, and regulators' authority to examine banks and take enforcement action against unsound practices.
Attributes: BFE, CORC, CRCP, LAWB.

BKGL 0332. Financial Institution: Non-Banking. (2 to 3 Credits)
This course examines nonbank financial institutions and the regulatory framework in which they operate. The course gives particular attention to insurance companies and SEC-registered investment companies (e.g., mutual funds). It also examines hedge funds, private equity funds, and investment advisers.
Attributes: BFE, CORC, CRCP, LAWB.

BKGL 0402. Fundamentals of Private Equity Fund Formation. (2 Credits)
The course will bring the student through the legal preparation, negotiation and closing of a private equity fund. <p> The course will include teaching the fundamental regulatory and compliance aspects of forming a private equity fund, including Investment Company Act of 1940 exemptions, Securities Act of 1933 private placement exemptions and Investment Advisors Act of 1940 compliance. During the course of the class we will prepare draft terms for a new private equity fund, draft disclosure materials for the fund, including select sections of a private placement memorandum, including risk factors, investment track record, and securities law implications and conflicts of interest disclosure. Students will also help draft select provisions of the definitive fund documentation including provisions of a limited partnership agreement on the basis of the proposed terms in the private placement memorandum. Students will also participate in the negotiation of the final legal and business terms of the new fund. In addition, the underlying reasons for institutional investors seeking certain terms in private fund investments will be explored, and the drive for investors to align their investment interests with the interests of the fund sponsor and general partner. <p> The course will conclude with an overview of the fundamental economic and legal terms of the private fund sponsor entities, including the general partner and investment manager.
Attribute: LL.M.
Prerequisite: (SCGL 0417).

BKGL 0602. Professionalism - Understanding Financial Statements. (1 Credit)
This course, taught in collaboration with faculty from Fordham's Gabelli School of Business, will examine the fundamentals of the three primary financial statements that public companies provide. After an introductory overview, the course will delve deeply into financial statements to show the relationship between these statements (for example, how net income impacts equity on the balance sheet), what can be learned about companies from their financial statements (such as price/earnings ratios and other types of ratio analysis), and the significance of notes to financial statements. Take-home exam.
Attributes: CRCP, LAWB, LL.M.
**Bankruptcy (BRGL)**

**BRGL 0312. Bankruptcy. (3 Credits)**

The course includes the study of the 1978 Bankruptcy Reform Act and subsequent amendments, the controlling Bankruptcy Rules and leading cases which have construed this statute as well as its predecessor. The course is dealt with from the standpoint of the mechanics of a bankruptcy, a Chapter 11 and a Chapter 13 case, the rights of debtors, the rights of creditors, the duties and the discharge of such duties by a Trustee, the rights and remedies of a Trustee, the procedural and substantive chronology of a Chapter 11 case, and the jurisdiction of the bankruptcy court.

Attributes: BFE, LAWB, PIE.

**BRGL 0323. Advanced Business Bankruptcy. (2 Credits)**

A chapter 11 bankruptcy case of a large business can create contentious dynamics among the debtor, its creditors, and a host of other parties-in-interest. This class explores those relationships at various stages of the restructuring with a focus on the economic incentives driving the actions of the stakeholders. In the first part of the semester, we explore the early stages of a chapter 11 case. Large business debtors often need additional financing to cover ongoing operational expenses and administrative costs associated with the bankruptcy case. Adding post-bankruptcy loans to an already distressed capital structure can create friction among the existing creditors and new lenders. Other critical decisions in the early stages of the bankruptcy include whether the debtor will assume, assign or reject executory contracts such as business leases, and whether business assets should be sold through a Court-approved sale process.

In the latter part of the semester, we learn about the process of negotiating a plan of reorganization. The goal of every corporate debtor should be to create consensus among stakeholders as to the distributions to be made under the plan. Given that large companies tend to have complicated capital structures with creditors holding varying rights, creating consensus can prove challenging. In the absence of consensus, the debtor (or a different plan proponent) must create strategic alliances to move forward with a nonconsensual “cramdown” plan. Twice during the semester, each student will be assigned a party to represent in a simulated chapter 11 restructuring scenario. For each simulation, students will negotiate with each other and provide a written submission outlining the strategies used and results obtained.

Some working knowledge of the Bankruptcy Code is assumed. Therefore, the prior completion of a bankruptcy course is mandatory.

Attributes: LLM.

Prerequisites: (BRGL 0312 or BRGL 0336).

**BRGL 0336. Corporate Reorganization in Bankruptcy. (3 or 4 Credits)**

This is a course about corporation reorganizations under Chapter 11 of the Bankruptcy Code. Unlike the typical Bankruptcy course, the emphasis will not be on mastering all of the intricacies of the Code, though to be sure students will be required to learn and understand key Code provisions and apply them to fact patterns. Rather, the course will approach corporate reorganization in a manner that considers not only legal rules, but also the important issues of financing that arise when a firm is in distress. In this way, the course should be useful to any student who intends to advise corporate clients on financial transactions and deal structuring, as well as to students who intend to work primarily as bankruptcy practitioners.

Prerequisites: Corporations. Previous studies in Bankruptcy are not required.

Attributes: BFE, LAWB, LAWI.

Prerequisite: BUGL 0201.

**Biological Sciences (BISC)**

**BISC 0911. Master Thesis Preparation. (0.5 Credits)**

For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

**BISC 0912. Requirement Preparation. (0 Credits)**

For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).
BISC 0930. PhD Comprehensive Examination-Biology. (0 Credits)
BISC 0936. Master's Comprehensive Examination-Biology. (0 Credits)
BISC 0950. Proposal Development. (1 Credit)
BISC 0960. Proposal Acceptance. (3 Credits)
BISC 0970. Dissertation Mentoring- Biological Sciences. (0 Credits)
The Biological Sciences PhD. student is required to register for Dissertation Mentoring, which has a 3 credit fee, the semester after the student's proposal is accepted.

BISC 1000. Life on the Planet Earth. (3 Credits)
A course designed for non-majors. A survey of animal and plant biology evolutionary history, ecology and conservation biology. Lectures complemented by experiments, demonstrations and slide presentations.
Attributes: BESN, BIOE, ENST, ELSLS, ESNS, LSCI.

BISC 1001. Human Biology. (3 Credits)
A course designed for non-majors. The biology of humans, emphasizing cells and molecules, reproduction and development, structure and function of the body, inheritance and evolution. Lectures are complemented by scheduled laboratory work.
Attributes: BESN, BIOE, LSCI.

BISC 1002. Ecology: A Human Approach. (3 Credits)
A course designed for non-majors. Ecological concepts and how they relate to critical contemporary issues: air and water pollution, radiation, energy, world hunger. Includes experiments, demonstrations and field trips.
Attributes: BESN, BIOE, ENST, ESLS, ESNS, INST, ISIN, LSCI, PJEN, PJST, SOIN, URST.

BISC 1005. Aids: A Conspiracy of Cells. (3 Credits)
A course designed for non-majors. Emphasizes the biological roots of acquired immunodeficiency syndrome (AIDS). The disease is discussed in the context of genetics, cell biology, and evolution. Consideration is given to fundamental aspects of infection, immunology and virology. Laboratory exercises center on agents of opportunistic infection and the body's response to them.
Attribute: CO09.

BISC 1008. The Finch, the Seed, and the Storm: Adventures in Contemporary Evolution. (3 Credits)
Students will learn about the theory of evolution, with a focus on evolutionary ecology, selection, adaptation, and contemporary evolution, and will use this theory as a way of understanding the process of science and biological principles. Students will learn to think, write and speak scientifically and about science.
Attribute: MANR.

BISC 1010. Foundations of Biology. (3 Credits)
In this introductory course for non-science majors, a general survey of the characteristics of life is presented, including such topics as cellular biology, metabolism, organ systems, genetics, development, evolution, behavior, and ecology. All forms of life will be studied, with emphasis on the human body and human evolutionary history.
Attributes: BESN, BIOE, LSCI.

BISC 1401. Introduction to Biology I. (4 Credits)
A combined introductory lecture and laboratory course for the summer session concentrating on the chemistry of biological molecules; cell organization, metabolism and reproduction; and the principles of genetics, molecular biology and evolution. Also includes a survey of viruses, eubacteria, archaebacteria, protists, fungi, and plants. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ELSLS, ESNS.

BISC 1402. Introduction to Biology II. (4 Credits)
A combined introductory lecture and laboratory course for the summer session continuing the presentation begun in Introduction Biology I. Includes higher plant and animal structure and function; a survey of the major animal phyla including aspects their structure, function, behavior, and life cycle. Also includes concepts of ecology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ELSLS, ESNS.

BISC 1403. Introductory Biology I. (3 Credits)
An introduction to the chemistry of life; the structure, function and metabolism of the cell; heredity and molecular aspects of genetics; principles of evolution; biology of bacteria; protists and fungi; and plant evolution.
Attributes: BESN, ENST, ENVS, ELSLS, ESNS, NEUR.
Corequisite: BISC 1413.
Mutually Exclusive: NSCI 1403.

BISC 1404. Introductory Biology II. (3 Credits)
An introduction to the biology of flowering plants and a systematic study of the major animal phyla involving aspects of their biology which suit them to their environment. Emphasizes the life support systems of mammals and humans, and addresses interactions among organisms; as well as between them and their environment.
Attributes: ENST, ENVS, ELSLS, ESNS, NEUR.
Corequisite: BISC 1414.
Mutually Exclusive: NSCI 1404.

BISC 1413. Introductory Biology Lab I. (2 Credits)
A laboratory course designed to illustrate topics discussed in BISC 1403.
Lab fee.
Corequisite: BISC 1403.
Mutually Exclusive: NSCI 1413.

BISC 1414. Introductory Biology Lab II. (2 Credits)
A laboratory course designed to illustrate topics discussed in BISC 1404.
Lab fee.
Prerequisite: BISC 1413.
Corequisite: BISC 1404.
Mutually Exclusive: NSCI 1414.

BISC 2539. General Genetics. (3 Credits)
A study of the gene in all its aspects; its structure, it's informational nature; how this information is inherited unchanged; how this information is expressed in terms of an organism's structure and function; how this information can be altered; and how expression of this information is regulated so that environmentally appropriate responses are made. The unifying position of genetics in the study of biology is emphasized.
Attributes: ENSE, ENVS, NECM, NEUR.
Prerequisites: CHEM 1322 and (BISC 1402 or BISC 1404).
Corequisite: BISC 2549.
Mutually Exclusive: NSCI 3133.
BISC 2549. General Genetics Lab. (2 Credits)
A laboratory course designed for a hands-on experience in the usage of various scientific methodologies and experiments in the field of basic genetics. Lab fee.
Corequisite: BISC 2539.
Mutually Exclusive: NECM, NEUR.

BISC 2561. Ecology. (3 Credits)
An introduction to the theories and applications of ecology including evolution, resources, population dynamics, life histories, competition, community structure, ecosystem processes, island biogeography, human impacts on ecosystems and conservation. An introduction to the theories and applications of ecology including evolution, resources, population dynamics, life histories, competition, community structure, ecosystem processes, island biogeography, human impacts on ecosystems and conservation.
Attributes: NS, NS, NECM, NS, NS, NS, EH, EN, NS.
Prerequisites: CHEM 1322 and (BISC 1402 or BISC 1404).
Corequisite: BISC 2571.

BISC 2571. Ecology Lab. (2 Credits)
Laboratory and field studies designed to provide hands-on experience with habitats and organisms, ecological experiments, and data analysis. (4 hour field trips).
Corequisite: BISC 2561.

BISC 3010. Scientific Communication. (4 Credits)
Students develop skills in written and oral communication needed to produce scientific articles, monographs and presentations that are accomplished in both form and content. The course covers both the use of LaTeX to produce work that meets the highest standards of design and typography, and the techniques of writing, organization, and scholarly citation needed to ensure that this work accurately embodies, effectively communicates, and professionally documents the author's scientific thought. Students will learn the ins and outs of generating and using copyright material, and how to present data in forms of pictures, tables, graphs, or schematics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

BISC 3132. Human Physiology. (3 Credits)
The basics of human body functions from cellular to organ system levels. A review of the general principles of whole body regulation is included. Internal responses to various physical stresses will also be discussed.
Attributes: NECM, NEUR.
Prerequisites: CHEM 1322 and (BISC 1402 or BISC 1404).
Corequisite: BISC 3142.

BISC 3142. Human Physiology Lab. (2 Credits)
Laboratory exercises demonstrating principles of the human cardiovascular, nervous, respiratory and urinary systems. Brief review of human anatomy and histology. An introduction to some of the diagnostic instrumentation and procedures used in medicine.
Corequisite: BISC 3132.

BISC 3221. Human Anatomy. (3 Credits)
A lecture course which examines cell, tissue, and gross anatomy of the major organ systems of the human body as they relate to life processes in health and disease.
Attributes: NECM, NEUR.
Prerequisites: CHEM 1322 and (BISC 3242 or BISC 3142).
Corequisite: BISC 3231.

BISC 3231. Human Anatomy Lab. (2 Credits)
A laboratory course employing slides, models and gross dissection to study the structure of the major organ systems of the human body.
Prerequisites: CHEM 1322 and (BISC 3142 or BISC 3242).
Corequisite: BISC 3221.

BISC 3244. Evolutionary Biology. (3 Credits)
The course covers both Micro-and Macro-Evolution ranging in focus from population, genetics and molecular evolution to the fossil record and major patterns of organismal diversity. Other topics include natural and sexual selection, the ecological context of adaptation, genomic and developmental mechanisms of evolutionary innovation, speciation, phylogeny reconstruction, and human evolution.
Attributes: NS, NS, NS, NS, NS, NS, NS, NS.
Prerequisites: CHEM 1322 and BISC 2549.

BISC 3405. Plant Biology. (3 Credits)
A survey of the major groups of plants and related organisms. Topics include physiology, morphology, ecology, taxonomy and systematics and human uses of plants.
Attributes: NS, NS, NS.
Prerequisites: CHEM 1321 and CHEM 1322 and BISC 2549.
Corequisite: BISC 3415.

BISC 3415. Plant Biology Lab. (2 Credits)
A laboratory and field course that uses hands-on experience and student-directed research to explore current issues in plant biology. Laboratory activities will emphasize plant physiology, morphology, and taxonomy and systematics. Field trips will highlight human uses of plants, and plant diversity and ecology in urban settings.
Attributes: NS, NS, NS, NS.
Prerequisites: CHEM 1322 and BISC 2549.
Corequisite: BISC 3405.

BISC 3521. Biochemistry. (3 Credits)
A lecture course on the principles of biochemistry and molecular biology. Topics include the chemistry and function of carbohydrates, lipids, proteins, and nucleic acids; enzymology; metabolism; bioenergetics; and gene structure and expression.
Attributes: NECM, NEUR.
Prerequisites: CHEM 2522 and BISC 2549.
Corequisite: BISC 3643.

BISC 3643. Microbiology. (3 Credits)
Detailed study of microbial metabolism and physiology; microbial roles in maintaining earth's ecosystems and human health; global environmental change and effects on emerging infectious diseases, epidemiology, and public health.
Attributes: NS, NS, NS, NS.
Prerequisites: BISC 3653.
Corequisite: BISC 3653.

BISC 3653. Microbiology Lab. (2 Credits)
Laboratory exercises are designed to develop skills in: sterile culture techniques for isolating bacteria and fungi from natural substrates; microscopy and staining techniques for visualization, identification and quantification of microbes.
Corequisite: BISC 3643.

BISC 3752. Molecular Biology. (3 Credits)
Principles and regulation of gene expression; nucleic acid structure/function, replication, transcription, RNA processing, translation; experimental and recombinant DNA methodologies and approaches.
Attributes: NECM, NEUR.
Prerequisites: CHEM 1322 and (BISC 1402 or BISC 1404).
Mutually Exclusive: NSCI 4176.
BISC 3754. Cell Biology. (3 Credits)
 Presents fundamental principles of cell structure and function important to an understanding of cellular interactions in the development, maintenance, and reproduction of multicellular organisms. Aberrations of cell structure and function that contribute to human disease are discussed extensively.
Attributes: NECM, NEUR.
Prerequisites: CHEM 1322 and BISC 2549.
Mutually Exclusive: NSCI 4630.

BISC 3893. Introduction to Virology. (3 Credits)
An introduction to the significance of viruses as agents of disease, and as tools to understand basic life processes. The course will cover the structural and biochemical properties of viruses, viral replication strategies virus-cell interactions, viral pathogenesis and host immune reactions. Emphasis will be on animal viruses but the properties and replication strategies of prokaryotic and plant viruses will also be explored.
Prerequisites: CHEM 1322 and BISC 2549.

BISC 4532. Neuroscience. (3 Credits)
Study of the anatomy, biochemistry and physiology of neurons and neural pathways that comprise the peripheral and central nervous systems and their relationship to behavior.
Attribute: NEUR.
Prerequisites: CHEM 1322 and BISC 2549.
Mutually Exclusive: NSCI 4630.

BISC 4642. Animal Behavior. (4 Credits)
Introduction to animal behavior; evolution, genetics, physiology and ecology of behavior; sexual/mating/reproductive behavior; habitat selection, feeding behavior, anti-predator defenses, social behavior, human behavior. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENSE, ENVS, NECM, NEUR.
Prerequisites: CHEM 1322 and (BISC 1402 or BISC 1404).

BISC 4693. Developmental Biology. (3 Credits)
An introduction to animal development with emphasis on molecular aspects of gametogenesis, fertilization, and organogenesis. Current models of normal and abnormal cellular differentiation will also be considered.
Attributes: NECM, NEUR.
Prerequisites: CHEM 1322 and (BISC 1402 or BISC 1404).

BISC 4792. Senior Thesis Research. (4 Credits)
Individually tailored laboratory or field research during senior year. Grade and credits are given only upon completion of thesis. Preliminary work in junior year is required. Details may be obtained in the department office. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: CHEM 1322 and (BISC 1402 or BISC 1404).

BISC 4999. Research Tutorial. (0 to 4 Credits)
Provides one-semester, hands-on participation in a faculty member's research program.
Prerequisites: CHEM 1322 and (BISC 1402 or BISC 1404).

BISC 5501. Research for M.S. in Biological Sciences. (1 to 6 Credits)
Faculty-mentored independent Ph.D. thesis research. Six credits required for M.S.

BISC 5510. Conservation Biology. (3 Credits)
Theory and practice of conservation biology. Topics will include maintenance of species diversity, design of reserves, captive management, genetic considerations, and factors affecting extinction rates.
Attributes: ABGS, CEED, CENS.

BISC 5511. Conservation Law and Policy. (3 Credits)
This course provides an introduction to the practice of both law and policy analysis, with a focus on issues associated with the conservation of biodiversity. Part I focuses on the law, and students will learn the basics of legal research, legal reasoning, and legal analysis. Part II focuses on policy analysis, and students will learn the basics of the policy process and basis policy analysis. This course will examine a wide range of laws, policies, regulations, treaties, and institutions designed to address local, national, and global conservation problems. Topics to be covered include protection of biodiversity, regulatory approaches to conservation, and international conservation law.
Attributes: CEED, CENS, HECS, URSG.

BISC 5512. Freshwater Algae Identification. (0 Credits)
This course will embark on a study of the largest, most diverse, and arguably the most important group of plants on earth: the algae. Algae form the base of aquatic food webs, and are both the cause of water quality issues and tool in ecological assessments used to protect inland waters.

BISC 6525. Biostatistics. (3 Credits)

BISC 6535. Ecological Methods. (2 Credits)
Methods and principles of ecological research, combining field and laboratory approaches, statistical and graphical data analysis, as well as modeling. Exercises emphasize techniques used to estimate the abundance and dispersion of organisms, describe habitat variables, estimate biomass, and production, characterize stoichiometric properties, and quantify energy fluxes. Assignments include research reports, data analysis and peer-review of research papers. All assignments emphasize benefits and limitations of specific techniques as well as interpretation of results in a theoretical context.

BISC 6734. Cell Biology of Eukaryotes. (4 Credits)
The focus will be on major principles of cell organization as related to cell function in multicellular organisms with emphasis on animal cells. Physiological and biomedical aspects of cell structure and function will be discussed. Experimental approaches employing diverse microscopic, biomedical, and biophysical techniques will also be examined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: BISC 7502.

BISC 6999. Research for M.S. in Biological Sciences. (1 to 6 Credits)
Faculty-mentored independent Ph.D. thesis research. Six credits required for M.S.

BISC 7501. Population and Community Biology. (4 Credits)
The course focuses on the evolution and ecology of populations, including both intra- and interspecific interactions. Particular emphasis is placed on evolution, species, speciation, gene flow, adaptation, behavior ecology, life histories, population growth, community structure, species diversity, niche theory, and competition, predation, parasitism, and mutualisms within and among species. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
BISC 7502. Eukaryotic Molecular Biology. (4 Credits)
The course will explore principles of gene structure and expression in eukaryotes. It starts with the review of structure of biopolymers (DNA, RNA, proteins) and techniques employed in Molecular Biology. Further topics will include genome organization (nucleosomes, chromatic, and chromosomes), genome maintenance (replication, mutability, and repair), genome expression (transcription and translation), and genome regulation (regulatory proteins and RNAs). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: BISC 7501.

BISC 7503. Community and Ecosystem Ecology. (4 Credits)
Focus on biotic and abiotic interactions in ecosystems. Emphasis is placed on food webs, habitat selection, succession, spatial variation in species diversity, species diversity and ecosystem functions, patterns and processes associated with ecosystem function and energy flow.
Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: BISC 7501.

BISC 7529. Principles of Geographical Information Science. (4 Credits)
This course covers basic concepts and theories of Geographical Information Science (GISc), and provides actual hands-on experience with a Geographical Information Systems (GIS) software package for computer mapping and data analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: DATA.

BISC 7530. Principles of Geographical Information Science II. (4 Credits)
This course will explore in depth topics of GIS for the Natural Sciences and will give students the opportunity to design and conduct an independent GIS project. Through a series of discussions, demonstrations, hands-on exercises, and the development of a GIS project, students will learn more advanced spatial techniques and their applications to the Natural Sciences. The course is intended to provide the student with a solid grounding in GISc research design and methodology by designing and conducting an independent GIS project.
Class session will be conducted as seminars, with discussion regarding the use of GISc in current research, and weekly group feedback on project design and implementation issues. Projects are to be substantive and original research efforts conforming to generally acceptable professional geographical practices and techniques. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: DATA.

BISC 7801. Methods in Cell and Molecular Biology. (1 Credit)
Study of methodologies employed in the field of cell molecular biology.

BISC 7804. Techniques in Molecular Biology. (4 Credits)
The study and practice of methodologies employed in the analysis of proteins, RNA and DNA. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: BISC 7801.

BISC 7999. Research for Ph.D. in Biological Sciences. (1 to 6 Credits)
Faculty-mentored independent Ph.D. dissertation research. Thirty credits required for Ph.D.

BISC 8051. Project and Internship. (3 Credits)
With supervision and approval of a participating ecology faculty member, a student will develop an independent project or work in some form of on-the-job internship in conjunction with a collaborating conservation agency, such as, The American Museum of Natural History, Wildlife Conservation Society, New York Botanical Garden, NYS Department of Environmental Conservation, Natural Resource Council, Bronx River Alliance, Riverkeeper, US Environmental Protection Agency, or NYC Department of Environmental Protection.

BISC 8530. Seminar: Ecology/Evolution I. (1 Credit)
Discussion of current topics in ecology and evolution.

BISC 8710. Seminar in Genetics. (3 Credits)
Lectures and discussion of current genetics research and research design.

BISC 8750. Seminar in Cell Biology. (3 Credits)
Lectures and discussion of current cell biology research and research design.

BISC 8801. Biological Colloquium I. (0 Credits)

BISC 8999. Independent Study. (1 to 5 Credits)
Faculty-mentored independent research tutorial.

BISC 9999. Dissertation Direction. (1 Credit)
Direction of PhD dissertation research after 30 credits of BISC 7999 have been completed.

BISC MTNC. Maintenance-Biology. (0 Credits)

Business Administration (BABU)

BABU 4461. Honors Seminar I. (1.5 or 3 Credits)
A survey of research techniques in business introducing students to methodologies of inquiry employed in the various business disciplines in presentation for Honors Seminar II. Students will choose a discipline of primary interest and write a paper reviewing the use of one or more research techniques as evidence by the recent professional literature of that discipline. Open only to students invited and accepted into the Honors Program.

BABU 4463. Honors Seminar III. (1.5 Credits)
Students work with a faculty advisor to develop an original paper that utilizes the analytical, business and problem solving skills students developed throughout the Gabelli curriculum.

BABU 4706. Honors Thesis II. (3 Credits)
Selection of honors thesis topic. Monitoring of progress on the thesis over the term. A module in advanced communication is included.

Business Analytics (BYGB)

BYGB 7811. Finance Analytics Internship. (3 Credits)
Financial planning and analysis to consolidate disparate data sources.

BYGB 7967. Data Mining for Business. (3 Credits)
Discusses data mining techniques and their use in strategic business decision making. A hands-on course that provides an understanding of the key methods of data visualization, exploration, association, classification, prediction, time series forecasting, clustering, induction techniques, neural networks, and other methods. Students work in teams on solving a business problem of their choice, using data mining tools and applying them to real data.
Prerequisite: BYGB 6910.
BYGB 7973. Database Management. (3 Credits)
Covers the basics of database management, a critical element of all IT organizations. Databases are the foundation for operational/transaction systems and for management decision-making. Topics include types of databases and the database environment, database analysis and data modeling, database design with relational models, implementation issues such as SQL, data administration, the Internet database environment and distributed databases.
Prerequisite: BYGB 6910.

BYGB 7975. Bus Analytics for Managers. (3 Credits)
BYGB 7977. Text Analytics. (3 Credits)
BYGB 7978. Web Analytics. (3 Credits)
Web analytics—also referred to as Web metrics, e-Metrics, or e-analytics—is the science of Internet audience measurement and analysis. It deals with the identification, gathering & formatting of Web usage data, the computation and presentation of metrics, and the exploitation of the results, in order to measure web site success. Meaningful insight is gained from traffic and visitor analytics data. It not only covers the unique measurement challenges associated with segmentation, but also comes with strategic recommendations for focusing the entire analytics process - from where to begin to what your larger, overall web analytics goals should be (Google Analytics, IBM ShowCase Web Analysis).

BYGB 7988. Bus Perf Mgmt Risk Analytics. (3 Credits)
BYGB 7990. Big Data Analytics. (3 Credits)
BYGB 8999. Tutorial. (3 Credits)
Tutorial in Business Analytics.

Business Economics (BEGB)

BEGB 6220. Econ Analysis & Bus Decisions. (3 Credits)
MBA CORE COURSE Presents economic theories to examine business pricing, production, marketing, and profits within different market structures and environments. Topics include: consumer choice and demand; the behavior of firms; market power and structure; the efficiency of competitive markets; externalities and social costs; information and behavior under uncertainty. The course also discusses social costs and benefits of business actions and related ethical and regulatory issues. (Formerly Managerial Economics)
Attribute: BUAN.

BEGB 7240. Money Credit Interest Rates. (3 Credits)
Studies the role of money, credit and interest rates in the efficient and ethical functioning of domestic and global financial markets. This building-block course assumes a background in macroeconomics and finance, and it establishes a foundation for further study in all areas of finance. Topics include: flow of funds and interdependence within the financial system; the Federal Reserve System and its role in money creation; interest rates; the links between interest rates and the growth of money; and the effects of inflation and term structure. Prerequisites: BEGB 6220 and FNGB 6411. Also offered as FNGB 7441.
Attribute: ABEP.
Prerequisites: (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

BEGB 7243. Contemp Issues Global Fin. (3 Credits)
Explores current issues relevant to the global financial system, including international commercial and investment banking and international investments. Emphasizes the underlying conditions and fundamental trends in various sectors of international finance. Also offered as FNGB 7458.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

BEGB 7244. Global Finance. (3 Credits)
The first half of the course focuses on the theories and practices of world trade, including comparative advantage, the changing trade competitiveness of nations, and protectionism. The second half focus shifts to developing countries: including foreign investment and technology, and investment and trade opportunities, policies and regulations. For SATURDAY / HYBRID sections of this course, there will normally be 4 class meetings, and the balance on-line / contact the professor for further detail. Prerequisite: BEGB 6220.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

BEGB 7251. Intl Trade & Development. (1.5 or 3 Credits)
The first half of the course focuses on the theories and practices of world trade. Topics include comparative advantage, the changing trade competitiveness of nations and protectionism. During the second half, the focus shifts to developing countries: the process of economic development, including the contribution of foreign investment and technology as well as investment and trade opportunities, policies and regulations.
Attributes: ABGS, ABIB.
Prerequisites: BEGB 6220 or GBA Waiver Managerial Eco with a score of 070.

BEGB 7300. TMBA: Global Managerial Eco. (3 Credits)
TMBA: Global Managerial Eco.

Business Law (Gabelli Graduate) (BLGB)

BLGB 6310. Business Law I. (3 Credits)
MBA FLEX CORE COURSE Introduces the fundamental concepts and legal principles that are applicable to the American legal system, its development and inherent ethical considerations. Discusses the basis and structure of business contracts; the creation and characteristics of agencies, partnerships, limited liability companies and corporations; and the rights and liabilities of agents, partners, directors and shareholders. Students analyze cases and discuss and solve problems.
BLGB 6321. Markets, Business, and Society. (3 Credits)
MBA CORE COURSE Markets, Business, and Society is about the responsibilities of businesspeople. It is based on the assumption that business, like law and medicine, is a profession whose practitioners carry out an important role in society. When individuals enter the profession, they take on a distinctive set of responsibilities that go with the role.

The purpose of the course is to provide a realistic understanding of these responsibilities and a set of practical tools to help students carry them out. This is the only course at the MBA program focusing on the question: what is the right thing to do in business? Other courses explore the causes and consequences of wrongdoing and the institutions that regulate conduct in business. This course will also consider these empirical topics but only as background. Instead, the focus of Markets, Business, and Society is normative reasoning about gray area problems in business, which involve conflicts of values, clashing responsibilities, ambiguous standards, factual uncertainties, aggressive stakeholders, and intense time pressures, among others. The course will help students develop their decision-making principles and devise implementation plans that meet relevant economic, legal, and ethical responsibilities and fulfill the organization's values and commitments. Deciding on a course of action will require careful analysis, thoughtful deliberation, and, in some instances, difficult trade-offs. By working through the choices and dilemmas presented in the course, students will hone their skills in decision making and action planning while also building their own decision-making frameworks.

BLGB 7320. Business Law II. (3 Credits)
Examines the legal aspects of business and focuses on personal property, sales, product liability, secured transactions, insurance, negotiable instruments, banking and bankruptcy. Students analyze applicable provisions of the Uniform Commercial Code and cases and problems on the above topics.

Attribute: ABEP.
Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 7325. Law of Trad & New Media. (3 Credits)
Analyzes the legal parameters and constraints on freedom of expression that govern traditional and new communications technologies. Probes the various constitutional, statutory and regulatory protections accorded the Internet and more traditional media, such as print, broadcast and cable, as well as governmental attempts to regulate certain aspects of these technologies. Topics include modern First Amendment interpretation, defamation, privacy, commercial speech, indecency/obscenity, contracts, intellectual property and e-commerce. Also offered as CMGB 7556.

Attribute: ABEB.

BLGB 739C. International Business Ethics. (3 Credits)
In this course we analyze global business activities from a moral perspective. Also, we will examine debates about what it means for a multinational firm to compete successfully in the world marketplace with moral integrity, and what obligations it has to respect transnational laws, codes of conduct and ethical guidelines.

Attributes: ABGS, ABIB.
Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 739F. Contemporary Iss Int'l Bus Law. (3 Credits)
A study of the contemporary issues of international business law.
Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 739M. Blockchain, Virtual Currencies, and Tokens: An Examination of Business and Legal Issues. (3 Credits)
The course is designed to provide students with an understanding of the current developments in the dynamic blockchain industry. We will explore new protocols, crypto currencies, and the development of new classes of digital assets including securities tokens, real estate and art tokenization. The students will learn how to analyze the business projects and associated legal issues relating to the blockchain industry. In order to understand where this fast paced industry is today as well as it's prospects for the future, the course will explore the development of blockchain as a vehicle for innovation, the legal issues surrounding blockchain projects, exchanges, and the business cases for both public and private blockchains through the examination of concrete cases . The course will debate topics including : the tension between innovation and regulation; the feasibility of decentralization; building networks based on trust.Guests speakers from top blockchain venture studios, governmental regulatory agencies and legal experts will join the classes to broaden the discussion of new projects and explore the opportunities and challenges facing the industry.

Attributes: ABBC, ABFO, LAWB.

BLGB 739N. Risk & Respons in Organizations. (3 Credits)
Ethics and compliance has emerged as a key discipline in preventative law, gathering increasing attention and corporate resources. With this growth, and as corporations face unprecedented lack of trust and scrutiny of their conduct, the role of the compliance officer has expanded. Compliance officers are increasingly grappling with questions of ethics that extend beyond legal risk, organizational culture, and voluntary CSR and human rights standards. It is often held that compliance officers are most likely to be successful when they are closest to the operations and decisions of core business lines. However, compliance teams are often forced to rely on second hand assessments of risk, reward and reason, and lack visibility of the myriad facts, circumstances and dilemmas faced by corporate managers and employees on the ground. This course will introduce key dimensions of organizational risk and responsibility – (sometimes called non-technical or non-financial risk). It will cover a range of established and emerging compliance issues, including corruption, political risk, human rights, CSR, leadership, culture and behavior. The course will include academic and business readings as well as interactive case studies, where students will apply practical solutions to real risk and corporate integrity challenges faced by multinational organizations in a variety of sectors, and explore the consequences for the compliance function.

BLGB 7400. TMBA: International Business Law and Ethics. (3 Credits)
TMBA:Intrnt'l Bus Law & Ethics.

BLGB 839A. Contemporary Ethical Issues in Business. (1.5 Credits)
This course explains various ethical schools of thought and their application to business.

Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 8999. Independent Study. (3 Credits)
Business Law (Gabelli Undergraduate) (BLBU)

BLBU 2234. Legal Framework of Business. (3 Credits)
This course covers the fundamental concepts and legal principles applicable to the American business community and the international environment. Topics include: sources of the modern legal system; legal ethics and governmental regulation; creation and discharge of contractual rights and liabilities; characteristics of agencies, partnerships, limited liability companies and corporations, including the rights and liabilities of agents, partners and corporate management.
Attributes: BUMI, LPBC.

BLBU 2999. Independent Study. (1 to 3 Credits)

BLBU 3436. Commercial Transactions. (3 Credits)
This course completes the legal background of the student and considers the commercial issues in the law of sales, bailments, suretyship, negotiable instruments, insurance, creditor’s rights and bankruptcy.
Attribute: BLEA. 
Prerequisite: BLBU 2234.

BLBU 3438. ST: Survey of Law and the Legal System. (3 Credits)
A course designed for students considering a career in law. A study of the American legal philosophy and the social objectives of our legal system. Topics covered are: 1) the judicial process, including the court system; 2) alternative methods of dispute resolution, such as arbitration and mediation; concepts of real estate, landlord-tenant and estates; 4) applicable government regulations.
Attribute: BLEA. 
Prerequisite: BLBU 2234.

BLBU 3440. International Business Law. (3 Credits)
This course provides an overview of various international business issues. Students study the transnational contract, with concentration on international sales, distributorship and licensing agreements as well as coverage of relevant U.S. trade laws. International trade organizations, conferences and treaties are also discussed, as is the resolution of international disputes and copyright protection.
Prerequisite: BLBU 2234.

BLBU 3443. Ethics in Business. (3 Credits)
This course aims to help students recognize the moral dimension of business decision-making and to provide these students with tools to navigate the potential ethical issues that they are likely to face in the business world.
Attribute: CBVC.

BLBU 3444. ST: Business and Ethics Issues in Sports Entrepreneurship. (3 Credits)
This course will provide an overview of the strategic process of building a sports-centric business. In particular, the course will provide an overview of marketing principles, consumer behavior, sponsorship, licensing, promotions, endorsements and industry ethics. Students will gain an understanding of the operational structure and processes of sports organizations. They will be able to apply theories and strategies to formulate new business plans. They will also be able to critically analyze existing organization to recognize strategic.
Prerequisite: BLBU 3443.

BLBU 3445. ST: Contemporary Legal Issues Business Organizations. (3 Credits)
This course examines the legal structure and function of contemporary business entities, focusing on partnerships, LPs, LLCs, and corporations. It explores such areas as entity choice, shareholder rights, director and officer duties and liabilities, and executive compensation.
Attribute: ENT. 
Prerequisite: BLBU 2234.

BLBU 3450. Communications Law and Business. (3 Credits)
This course acquaints students with important legal issues, which govern the traditional media and Internet fields and how the law affects the way these industries operate. Attention will be given to the role of the media in society, First Amendment interpretation, defamation and privacy, a comparison of the standards regarding print media, broadcasting media, Internet and e-commerce. The class will devote considerable time to e-commerce issues such as on-line contracts, intellectual property and attempts, both domestic and international, to regulate the Internet.

BLBU 4430. The Law of Innovation. (3 Credits)
The course examines the legal issues that technology entrepreneurs will face as they launch their for-profit, not-for-profit, or both for-profit and not-for-profit businesses. Topics will include business formation; corporate social responsibility; copyright, trademark, patent, trade secret, and privacy contract law (traditional, on the internet, nondisclosure/noncompete agreements, and tech licensing); good practices for using open source software; and internet deflation. We will present both for-profit and not-for-profit practical examples from each topic. The course requires reading the assigned text, which will include judicial opinions and scholarly articles. You will be encouraged to thoroughly read and discuss these sources. Industry experts will provide insights throughout the course as guest speakers.
Attributes: ENT, SOIN.
Prerequisite: BLBU 2234.

BLBU 4431. ST: White-Collar Crime. (3 Credits)
This course will focus on the contemporary legal and ethical issues involving the topical and scandalous field of white-collar crime that is increasingly in the business world spotlight with such cases as those of Bernie Madoff, Enron and insider-trading networks. The focus will be on the substantive law regarding such crimes as conspiracy, mail fraud, pyramid schemes, bribery, extortion, insider trading, RICO, perjury, Sarbanes-Oxley Act violations; and money laundering statutes.
Attribute: BLEA. 
Prerequisite: BLBU 2234.

BLBU 4432. ST: Ethics of Sustainable Enterprise. (3 Credits)
This course examines prevailing trends and best practices in global environmental sustainability, including differing philosophical conceptions of the meaning of ‘sustainability’ within prominent conceptions of corporate social responsibility in general.

BLBU 4434. ST: Business Organizations Law. (3 Credits)
This course covers the fundamental concepts and legal principles applicable to business organizations. Topics covered include agency, partnerships, corporations, and limited liability companies. Special attention will be paid to: the default rules governing the formation, management and financing of business entities; how contractual agreements can alter default rules; and fiduciary duties.
Attribute: BLEA. 
Prerequisite: BLBU 2234.
BLBU 4435. ST: Environmental Law and Business. (3 Credits)
This course will begin with basic information on how climate change, water shortages and water quality degradation, solid waste overload and other critical issues are affecting business. It will then focus on understanding how the law relates to these issues; and whether there are ethical and business reasons for going beyond the law and dealing with them. Questions of how the legal responsibilities of officers and directors to their shareholders affect their response to impending environmental problems will be addressed, as will the ethical principles of environmental justice and sustainability.
Prerequisite: BLBU 2234.

BLBU 4436. ST: Business and Ethics of Sports. (3 Credits)
This course is an introduction to the basic business and ethics issues that govern professional and amateur sports in the United States and internationally. It will discuss issues of structure and governance, business models, revenue generation, facilities, and international competition. Ethics issues like doping, race and gender discrimination and amateurism will be a centerpiece of the course.
Attribute: BLEA.

BLBU 4437. ST: International Bus Ethics. (3 Credits)
The course is designed to stimulate critical thinking and ethical argumentation on contemporary ethical issues and professional challenges encountered in international commercial activity. Examines international business within a broad socio-cultural, legal, political and economic context. Critically examines the nature, moral and legal status, and purpose of multinational business enterprise. Attention is given to the impact of developments in human rights initiatives and emerging forms of global governance affecting business decision-making, corporate responsibility and ethics. Topics covered include ethical issues arising in regard to global supply chains, intellectual property protection, sustainable development, microfinance, poverty and distributive justice, migration shifts, and public health and education.
Attributes: BLEA, PJEC, PJST.
Prerequisite: BLBU 3443.

BLBU 4438. ST: Law, Business and the Arts. (3 Credits)
Law, Business and the Arts will cover issues such as business structure, marketing, and legal issues involving the visual and performing arts. Topics include: freedom of speech, indecency/obscenity, non-profit entities, marketing and sales, contracts, labor rules, intellectual property, ownership, the “me, too” movement, and new technologies that will affect how the arts are distributed.
Attribute: BLEA.

BLBU 4449. ST: Sports and the Law. (3 Credits)
Hardly a day goes by when sports and law do not make news. Professional and amateur sports have attained great importance in American society. Concomitant with this growth are the increasing number and complexity of legal issues in sports. This class will discuss the major legal issues involving the sports industry. Included are labor-management relations, free agency, professional and amateur league governance, agents, contracts, antitrust, personal injury law, discrimination, broadcasting, Internet. This class will discuss and analyze the applicable rules, both internal and governmental, governing the amateur and professional sports industries and the controversies and policy considerations surrounding those rules. This course may be the only one where students will be encouraged by a professor to read Sports Illustrated.
Attributes: BLEA, SJOR.

BLBU 4450. ST: Employment Law. (3 Credits)
This course studies the emerging theories of employer-tort liability. Areas emphasized are discrimination, including discrimination based on race, age, disability and sex with emphasis on sexual harassment, the employment at will doctrine, negligent hiring, fraud and misrepresentation, defamation and invasion of privacy resulting from intrusive testing procedures. While the course provides a background in established areas of employer liability, it emphasizes recent developments and the public policies driving such developments. The course will also discuss strategies for avoiding exposure to tort liability in the workplace.
Attribute: BLEA.

BLBU 4452. ST: Securities Law. (3 Credits)
This course offers an intensive introduction to the Securities Act of 1933 and the Exchange Act of 1934, i.e., the laws that govern the offering of stocks and bonds by corporations. Topics to be covered include: (1) the definition of a security; (2) the initial public offering (IPO); (3) private placements; (4) the obligations of those that possess material non-public information; (5) material misstatements in filings; and (6) civil remedies.
Attribute: BLEA.

BLBU 4464. ST: Compliance and Risk Management. (3 Credits)
This course will review risk management in the financial services industry through compliance and regulatory perspectives. The course will cover the economic basis and goals of financial services regulations from the Great Depression to the recent financial crisis. Emphasis will be placed on identifying, controlling, mitigating, and managing financial services compliance and reputational risks. Topics will include capital adequacy, risk limits, supervision, Value at Risk and Monte Carlo simulation, Industry and self-regulation, insider trading, elements and style of both US and overseas regulation, corporate governance and reputational risk.

BLBU 4999. Independent Study. (1 to 3 Credits)

Business PhD (BPHD)

BPHD 0001. Year 1 Comprehensive Exam. (0 Credits)
The Year 1 comprehensive exam is a written exam designed to measure a student’s fundamental understanding of business, with an emphasis on economics, management, and quantitative and empirical methods.

BPHD 0002. Year 2 Comprehensive Exam. (0 Credits)
The Year 2 comprehensive exam is a written field exam. Students work with advisers to determine two appropriate reading lists at the end of Year 1 and read for the exam during Year 2. The field exam measures knowledge of the field(s) and determines readiness to move on to the dissertation phase.

BPHD 0003. Year 2 Paper. (0 Credits)
At the conclusion of Year 2, students present a paper to the faculty during a doctoral program workshop. The paper may be an extension of a course paper or a research paper pursued independently. This paper provides an opportunity for students to build presentation and workshop skills, and should ideally serve as an eventual component of the dissertation.

BPHD 0004. Dissertation Proposal Acceptance. (0 Credits)
Students defend their dissertation proposal to their prospective dissertation committee at the conclusion of Year 3.
BPHD 0005. Dissertation Defense. (0 Credits)
The dissertation is a large-scale, closely supervised research project typically consisting of three to four article-length papers, preferably along a similar topic, with extensive research, writing, and revision expected. Students offer regular progress updates to their dissertation committee members, who in turn meet with the doctoral program director to ensure sufficient progress. Upon successful completion and defense of the dissertation, students are awarded a Doctor of Philosophy in Business (Ph.D.).

BPHD 6970. Applied Microeconometrics. (3 Credits)
The primary goal of the course is to improve students’ ability to conduct high-level empirical research, combining economics, econometrics, and data. The course will specifically cover instrumental variables estimation, regression discontinuity, propensity score matching, control function approach, randomized control trials, static panel data models, and dynamic panel data models. The course is intended to be particularly useful for advanced Ph.D. students and master's students planning to write or currently writing a thesis. The course will mainly draw on a series of high-quality journal publications from the field of applied microeconomics that use the aforementioned applied econometric techniques for causal inference.
Prerequisite: ECON 6910.

BPHD 7010. Fundamentals of Acct 1. (3 Credits)
Provides insights into how accounting information can be used by investors and creditors to measure the results of business operations.

BPHD 7011. Economic Analysis and Business Decisions. (3 Credits)
Presents economic theories to examine business pricing, production, marketing, and profits within different market structures and environments. Topics include: consumer choice and demand; the behavior of firms; market power and structure; the efficiency of competitive markets; externalities and social costs; information and behavior under uncertainty. The course also discusses social costs and benefits of business actions and related ethical and regulatory issues.

BPHD 7012. Financial Statement Analysis. (3 Credits)
An understanding of financial statements and the information they communicate on the operating, investing and financing activities of corporations. Focuses on the impact of financial accounting principles, disclosure standards and alternative accounting practices on financial reports. Examines and evaluates traditional and non-traditional methods of financial statement analysis.

BPHD 8001. Philosophy of Science. (3 Credits)
Provides an understanding of the philosophy, history, theory, and institutions of doctoral-level research in business.

BPHD 8002. Research Methods. (3 Credits)
Provides an understanding of the key elements of theory building, research design and methods.

BPHD 8003. Intro to Micro & Macro. (3 Credits)
Introduction to micro and macroeconomics.

BPHD 8004. Financial Econometrics. (3 Credits)

BPHD 8005. Empirical Capital Markets. (3 Credits)
Provides an understanding of the key elements of the study of capital markets.

BPHD 8006. Data Analysis. (3 Credits)
Provides an understanding of the key elements of contemporary data analysis.

BPHD 8007. Econometrics. (3 Credits)
Overview and in-depth analysis of econometrics theory and practice.

BPHD 8008. Fundamentals of Acct 1. (3 Credits)
Provides insights into how accounting information can be used by investors and creditors to measure the results of business operations.

BPHD 8009. Quantitative Issues in Capital Markets. (3 Credits)
In-depth study of the key quantitative issues in capital markets.

BPHD 8010. Raising Capital & Inv in Glob. (3 Credits)
Provides a comprehensive overview of the going-public decision. Examines the strategies and process of corporate restructuring and investing activities, such as mergers and acquisitions, corporate diversification, spin-offs, carve-outs, asset sell-offs, tracking stock, exchange offers, and debt restructuring.

BPHD 8011. Seminar in Corporate Theory. (3 Credits)
In-depth study of a variety of topics in corporate theory.

BPHD 8012. Quantitative Methods. (3 Credits)

BPHD 8013. Managerial Accounting Analysis. (3 Credits)
In-depth study Managerial Accounting Analysis.

BPHD 8014. Financial Statement Analysis. (3 Credits)
An understanding of financial statements and the information they communicate on the operating, investing and financing activities of corporations. Focuses on the impact of financial accounting principles, disclosure standards and alternative accounting practices on financial reports. Examines and evaluates traditional and non-traditional methods of financial statement analysis.

BPHD 8016. Investment Banking. (3 Credits)
In-depth study of Investment Banking.

BPHD 8017. Seminar in Banking & Finance. (3 Credits)
In-depth study of research questions, theory, and methodology in banking and finance.

BPHD 8018. Research in Economics. (3 Credits)
In-depth study of research in economics.

BPHD 8019. International Accounting. (3 Credits)
In-depth study of International Accounting.

BPHD 8020. Empirical Research in Accounting and Capital Markets. (3 Credits)
In-depth study of a variety of topics in accounting and capital markets.

BPHD 8021. International Corporate Tax. (3 Credits)
Introduces the complexities of international taxation by focusing on the U.S. tax system's impact on U.S. companies investing or operating abroad and on foreign companies investing or operating in the U.S. Topics include tax treaties, foreign tax credits and controlled foreign operations.

BPHD 8022. Web Analytics. (3 Credits)
Web analytics – also referred to as Web metrics, e-Metrics, or e-analytics – is the science of Internet audience measurement and analysis. It deals with the identification, gathering & formatting of Web usage data, the computation and presentation of metrics, and the exploitation of the results, in order to measure web site success. Meaningful insight is gained from traffic and visitor analytics data. It not only covers the unique measurement challenges associated with segmentation, but also comes with strategic recommendations for focusing the entire analytics process. From where to begin to what your larger, overall web analytics goals should be (Google Analytics, IBM ShowCase Web Analysis).
BPHD 8023. Fixed Income Analysis. (3 Credits)
Introduces techniques for valuing fixed income securities and their derivatives. Emphasizes pricing and risk measurement for government, corporate, and mortgage-backed instruments. Analyzes embedded options using the binomial model. Develops fixed-income trading and portfolio management techniques, including the use of repo, futures, options, swaps, and credit derivatives. Examines theory and empirical evidence on the term structure of interest rates, including the derivation of spot and implied forward yield curves.

BPHD 8025. Corporate Finance. (3 Credits)
Studies corporate finance and its specific decisions. Topics include evaluating capital expenditure proposals, forecasting financing requirements, and selecting sources of financing. The course also discusses working capital management, dividend policy, and contingency planning, and addresses the additional challenges of multinational firms.

BPHD 8026. Big Data Analytics. (3 Credits)
This course provides students with an understanding of big data analytics, research, and methods.

BPHD 8028. Empirical Research in Accounting: Financial Instruments, and Debt Contracting. (3 Credits)
This course provides advanced knowledge of banking, financial instruments, and debt contracting.

BPHD 8029. Empirical Research in Financial Accounting. (3 Credits)
This course provides advanced knowledge of financial accounting.

BPHD 8030. Macro-Finance. (3 Credits)
This course covers advanced topics at the intersection of macroeconomics, monetary economics, banking, and international finance.

BPHD 8033. Financial Accounting. (3 Credits)
Students in this course develop the ability to analyze and interpret financial statements and study the effects of alternative accounting standards and practices on income statements, balance sheets, and statements of cash flows.

BPHD 8034. Applied Microeconometrics. (3 Credits)
The primary goal of this course is to improve students’ ability to conduct high-level empirical research, combining economics, econometrics, and data. The course will cover instrumental variables estimation, regression discontinuity, propensity score matching, control function approach, randomized control trials, static panel data models, and dynamic panel data models. The course is intended to be particularly useful for advanced Ph.D. students and master’s students planning to write or currently writing a thesis. The course will mainly draw on a series of high-quality journal publications from the field of applied microeconomics that use the aforementioned applied econometric techniques for causal inference.

BPHD 8035. Seminar in Theoretical Corporate Finance. (3 Credits)
This course considers the theoretical underpinnings of corporate finance, with particular attention paid to the history of corporate finance and contemporary theoretical studies. The course seeks to address the core issues related to funding, capital structure, firm value, and how these abstractions inform our empirical view of corporate finance today.

BPHD 8036. Fintech & Machine Learning. (3 Credits)
A comprehensive survey of the tools related to the burgeoning fields of financial technology and machine learning in a business context. The course addresses technology and innovation and their relationship to financial services, as well as the algorithms and statistical models that may be deployed to help build these systems.

BPHD 8037. Financial Modeling. (3 Credits)
This course helps students develop the type of Excel-based financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Students deliver written and oral presentations of their models and practice skills critical for a successful career in finance.

BPHD 8038. Advanced Corporate Finance. (3 Credits)
This course teaches students the art of applying corporate finance theory, providing them with tools and techniques essential to strategic decision-making in critical real-life situations faced by organizations. The course enhances students’ understanding of corporate finance by providing a comprehensive examination of selected advanced topics, such as alternative valuation methods, real options in corporate finance, decision trees, international operations, mergers and acquisitions, risk arbitrage, debt capacity, and leveraged buyouts, private equity, warrants and convertibles, and ethical issues.

BPHD 8039. Fundamentals of Strategy. (3 Credits)
Students in this course focus on defining an organization’s mission, establishing its objectives, developing strategies for achieving those objectives, and assuring implementation and continual updating of long-term plans. This course integrates the knowledge and skills developed in the core courses.

BPHD 8040. Seminar in Strategic Management. (3 Credits)
This course involves intensive study of strategy, with a focus on theory, research, and methodology. Topics covered may include organizational theory, behavior, sustainability, green technology, energy, business and government relations, nonmarket strategy, and social media. Techniques will include statistical analysis, case study review, and other deep-dives.

BPHD 8041. Global Risk Management. (3 Credits)
This course covers market risk and volatility, calculation of VaR (value at Risk), Monte Carlo Simulation, credit risk, and use of credit derivatives, operational risk, counterparty risk, and other topics. It discusses risk regulations, including Basel II, recent developments in Basel III, and recent regulations on the banking industry in the U.S.

BPHD 8042. Equity Analysis. (3 Credits)
This course will feature a series of guest lecturers who are highly regarded experts in their respective areas. The course will cover wealth management, private equity, equity analysis in general, and analysis within specific industry sectors such as retail, media, insurance, etc. We are looking for highly motivated students who will ask lots of questions and who will engage the guest lecturers in meaningful dialogue during the discussion periods.

BPHD 8043. Advanced Global Portfolio Management. (3 Credits)
The course will review (1) basics of modeling of securities’ returns and volatility in the context of portfolio management / “buy-side”; (2) theoretical basis and empirical evidence of risk-return tradeoff and investor preferences; (3) main approaches to portfolio construction and challenges with their practical application; (4) performance evaluation, and other relevant portfolio management topics.

BPHD 8044. Machine Learning. (3 Credits)
This course covers the mathematical and algorithmic underpinnings of core methods in machine learning. Students learn to develop and implement classifiers and learners, using calculus and linear algebra, and they consider learning on fully labeled, partially labeled, and unlabeled data. Students also analyze and implement dimensionality reduction methods. Topics include gradient ascent/descent, support vector machines, neural networks, hidden Markov models, information criteria, factor/component analysis, and expectation-maximization.
BPHD 8090. Dissertation 1. (3 Credits)
Supervised dissertation hours.

BPHD 8091. Dissertation 2. (3 Credits)
Supervised dissertation hours.

BPHD 8092. Dissertation 3. (3 Credits)
Supervised dissertation hours.

BPHD 8093. Dissertation 4. (3 Credits)
Supervised dissertation hours.

BPHD 8094. Dissertation 5. (3 Credits)
Supervised dissertation hours.

BPHD 8095. Dissertation 6. (3 Credits)
Supervised dissertation hours.

BPHD 8096. Dissertation 7. (3 Credits)
Supervised dissertation hours.

BPHD 8097. Dissertation 8. (3 Credits)
Supervised dissertation hours.

BPHD 9001. Topics in Business Research 1. (1.5 Credits)
In-depth study of a variety of theoretical and empirical topics in business disciplines.

BPHD 9002. Topics in Business Research 2. (1.5 Credits)
In-depth study of a variety of theoretical and empirical topics in business disciplines.

BPHD 9003. Topics in Business Research 3. (1.5 Credits)
In-depth study of a variety of theoretical and empirical topics in business disciplines.

BPHD 9004. Topics in Business Research 4. (1.5 Credits)
In-depth study of a variety of theoretical and empirical topics in business disciplines.

BPHD 9005. Topics in Business Research 5. (1.5 Credits)
In-depth study of a variety of theoretical and empirical topics in business disciplines.

BPHD 9006. Topics in Business Research 6. (1.5 Credits)
In-depth study of a variety of theoretical and empirical topics in business disciplines.

BPHD 9007. Empirical Issues in Bus Rsrch. (3 Credits)
Provides an understanding of empirical issues in business research.

BPHD 9008. Quantitative Analysis I. (1.5 Credits)
In-depth study of quantitative analysis.

BPHD 9009. Quantitative Analysis II. (1.5 Credits)
Continuing in-depth study of quantitative analysis.

BPHD 9010. Empirical Issues in Rsrch 2. (3 Credits)
Provides a continuing understanding of empirical issues in business research.

BPHD 9011. Empirical Issues in Business Research 3. (3 Credits)
This course provides a continuing understanding of empirical issues in business research.

BPHD 9012. Topics in Business Research 7. (1.5 Credits)
This course offers an in-depth study of a variety of theoretical and empirical topics in business disciplines.

BPHD 9013. Topics in Business Research 8. (1.5 Credits)
This course involves in-depth study of a variety of theoretical and empirical topics in business disciplines.

BPHD 9014. Blockchain. (1.5 Credits)
Students in this course will explore the role currency plays in the economy; the emerging technologies pioneering new forms of digital money; and the impact these technologies will have on currency, the economy, and the broader category of capital.

BPHD 9015. Digital Currencies. (1.5 Credits)
This course will explore specific examples of new technologies being used to develop new forms of currency and digital money, and redefine the broader category of capital. The course will use real products and services to explore these topics.

BPHD 9016. Empirical Issues in Business Research 4. (3 Credits)
This course provides a continuing understanding of empirical issues in business research.

BPHD 9030. Machine Learning and Text Mining 1. (1.5 Credits)
This course covers technical topics of web and text mining methodologies and research studies in the area of design science and social computing.

BPHD 9031. Machine Learning and Text Mining 2. (1.5 Credits)
This course covers technical topics of web and text mining methodology and research studies in the area of design science and social computing.

BPHD 9040. Acting. (1.5 Credits)
This course covers acting techniques for doctoral business students. It includes empathetic listening, assertive influence, sense of space, expressive power, and other key concepts. The course provides students with knowledge and skills that may later be used for presentations, classroom teaching, and other contexts in which ideas will be delivered.

Center for Ethics Education (CEED)

CEED 0912. Requirement Preparation. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

CEED 0914. Requirement Preparation in Summer. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

CEED 1999. Tutorial. (1 Credit)
CEED 3856. Introduction to Bioethics. (4 Credits)
This course introduces students to contemporary bioethics topics through (a) an overview of different meta-ethical approaches to understanding moral status and personhood, b) discussion and readings on how these approaches can be applied to unraveling the complex threads of contemporary bioethics arguments related to the treatment/care/use of individuals, animals and the environment; and (c) introduction to the legal and social contexts in which bioethics public policies are framed. In addition to engaging a substantial amount of theological and philosophical literature, students will also be exposed to multidisciplinary perspectives (in the form of both texts and guest speakers) from disciplines such as biology, psychology, sociology, feminism, and ecology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: BIOE, PJGS, PJST, REST, THEO.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1400.
CEED 4245. Ethics in Research. (4 Credits)
This course will examine approaches to responsible research practices across the natural and social sciences, with particular attention to research involving human participants. The course will provide an overview of the research process, foundations in research ethics, and provide examples of research across disciplines that exemplify scientifically valid and ethically sound research methods planning, implementation, and dissemination. In particular, the course will draw on long-standing research traditions in the field of sociology, and psychology in order to provide a foundation upon which ethical issues can be discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BIOE, ICC, PSYC, SOCI.

CEED 4999. Tutorial. (4 Credits)

CEED 5050. Ethics and Society: Cross Disciplinary Perspectives. (3 Credits)
This introductory course will present methods of ethical inquiry from different disciplines and will demonstrate how these disciplines interactively and independently apply these methods to issues of contemporary social import. Relevant moral and ethical frameworks will be introduced, along with background on issues of current social importance. The intent of this course is to provide students with an introduction to the knowledge and critical thinking skills that will enable them to identify and understanding the ethical decisions that affect the welfare of individuals and society and the integrity of their professions.
Attributes: HECH, HECS, HUHR, PMMA.

CEED 5100. Healthcare Ethics. (3 Credits)
The aim of this course is explore issues in healthcare from the point of view of ethical theory. Some of the issues to be examined are the role of the medical practitioner within the context of healthcare currently, medical experimentation, informed consent, ethical questions surrounding life and death, and justice in the healthcare system.
Attribute: HECS.

CEED 5200. Philosophy of Medicine: Practitioners, Conscience, and Moral Responsibility. (2 Credits)
The aim of this course is to examine the role of the medical practitioner within the context of current medicine. First, we will consider the history of the medical profession and the role of bioethics in medicine. Next, we will consider the ethical practice of medicine and the role of conscience. Finally, we will take up questions of moral responsibility in medicine, focusing on two challenging practical situations.

CEED 5250. Bioethics Analysis of Clinical Case Studies. (3 Credits)
This course will focus on the fundamental principles of bioethics analysis and on the application of these principles to clinical case scenarios. Through this analysis, recommendations of the best course of treatment and action can be determined and justified in even the most difficult of clinical case scenarios. You will learn how to recognize a true ethical dilemma and how to resolve it. This will be an interactive course that will involve case discussions and debate as a mock ethics committee. Students will gain insight into the process and application of ethical principles and theories in the resolution of these critical ethical dilemmas.
Attributes: BIOE, CEMP, HECS.

CEED 5367. Ethical Din. of Financial Risk. (3 Credits)
This course will provide a critical, historically-informed introduction to ethical theories and their relevance for financial risk management. The course will introduce students to the theoretical foundations and practical implications of ethics-related concepts in so far as they are relevant to financial risk management; for example the notion of fiduciaries and fiduciary relationships.

CEED 5600. Special Topics in Ethics and Society. (3 Credits)
This course will provide students with interdisciplinary perspectives on contemporary issues in ethics and society across the humanities and the social and natural sciences. Class readings and discussions will provide students with the tools to apply ethical principles, theories, and decision-making to issues of social import across diverse contexts and populations.
Attributes: CED, CETH.

CEED 5800. Moral Foundations of Capitalism. (3 Credits)
This course will provide an interdisciplinary examination of alternative-and largely incompatible-twentieth-century defenses of the morality of capitalism, with a concentration on economic, Objectivist, and Christian arguments, considered historically, economically, politically and philosophically. Readings from Adam Smith, Karl Marx, authors for and against slavery, John Maynard Keynes, Theodore Roosevelt, Herbert Hoover, Austrian School economists, Milton Friedman, Dinesh D’Souza, and George Gilder. The course will include a reading of Ayn Rand’s Atlas Shrugged and conclude with an application of studies theories to a few recent public policy issues.

CEED 5900. Ethics and Society Field Practicum. (3 Credits)
The goal of practicum is to provide an opportunity for advanced students in Fordham's Master's in Ethics and Society to spend one day per week during a semester for 'shadowing' professionals who are engaged in services that require ethical decision-making. Students selected for the practicum will first be required to complete relevant ethics and society coursework and/or possess relevant experience. Throughout the semester, students will meet with the director of the master’s program on a bi-weekly basis to discuss their experiences. Enrollment is by special permission only.
Attribute: CETH.
Prerequisite: CEED 5050.

CEED 6000. Health Care Ethics Capstone. (3 Credits)
CEED 6010. Research Ethics and Soc Justic. (3 Credits)
This course will examine approaches to responsible research practices in socio-behavioral research, with particular attention to research involving human participants. The course will provide foundations in research ethics and methods in research ethics decision-making that exemplify scientifically valid and ethically sound research method planning, implementation, and dissemination.
Attribute: URS.

CEED 6015. HIV/Drug Abuse Prevention Research Ethics. (3 Credits)
This course will introduce students to ethical issues and solutions encountered in social science, public health, and medical research on HIV and drug abuse involving vulnerable populations in the United States and developing countries. Lectures are taught by an interdisciplinary faculty. Topics informed consent, confidentiality and disclosure, assessing population sensitive risks and benefits when using qualitative, survey, epidemiological in-person and online methodologies.
Attributes: CENS, PSYC.
CEED 6100. Theories and Applications in Contemporary Ethics. (3 Credits)
This intensive, three-day, graduate-level course is designed to provide cross-disciplinary perspectives on moral theory and applied ethics. Using a team-teaching approach, this course brings together faculty from at least six different disciplines to provide foundational knowledge about moral theory with contemporary applications. In addition to seminars on foundations in moral philosophy, moral theology, and moral psychology, the course features lectures and case discussions on issues of current social importance. Previously, students have focused on the following topics: decisions at the end of life, economic social justice, and responsibility in conducting research with vulnerable populations. Course requirements include a mastery of the reading materials, active participation, and topic-oriented thought papers during the three-day workshop. In addition, successful completion of the course requires a post-workshop paper summarizing the integration of course material into the students' graduate work.
Attribute: PMMA.

CEED 6290. Health Disparities and Social Inequalities. (3 Credits)
This course focuses on the psychosocial correlates and consequences of health disparities involving individuals and groups that have been historically marginalized by society and in some cases by the health sciences and professions. Readings and class discussions will examine the relationship of contextual factors such as poverty, racial/ethnic discrimination, environmental hazards, incarceration, institutionalization and public policy to social and health inequities faced by children and adults with HIV/AIDS, mental illness, intellectual disabilities, and substance abuse disorders. The role of psychology in the emerging health and human rights paradigm in the United States and globally will also be explored.
Attributes: CENS, HECS.

This course will examine the theoretical foundations and practical implications of natural law theory. Because 'natural law theory' is often taken to mean many different things, one of the course's first aims will be to establish a common vocabulary for identifying and distinguishing the various kinds of natural law theory (e.g. 'natural law theory' as a kind of moral theory, as a kind of legal theory, and as kind of theory about human rights). Our ensuing discussion will open onto a series of questions that will guide us through the rest of the course: 'What is the nature of justice?' 'What are the different kinds of justice and what does it mean to have a right?' 'What do rights and justice have to do with one another?' 'What is the nature of law?' 'What is the difference between positive law and natural law?' 'Is law reducible to the will of the strongest, or is it the case-as the natural law traditions holds-that unjust law is no law at all?' 'What is meant by 'the good' and 'the common good'?' 'What is the nature, scope, and justification of authority (both legal authority and other kinds of authority)?' 'What is the nature and purpose of punishment?' 'And how are we to make sense of the natural law tradition in light of our contemporary understandings of autonomy, governmental neutrality, and reasonable pluralism?' The course will not only introduce the classical natural law tradition (based mainly on the thought of Aristotle and Aquinas), but will place this classical tradition in dialogue with contemporary thinkers. The ultimate aim of the course will be to achieve an understanding of the natural law tradition and its relevance for a variety of contemporary legal issues. No prior acquaintance with philosophy or jurisprudence is assumed; the relevant concepts will be developed in class.
Attributes: CEMP, HUHR.

CEED 8999. Independent Study. (1 to 4 Credits)

CEED MTNC. Maintenance - CEED. (0 Credits)
Maintenance of Matriculation Status.

Chemistry (CHEM)

CHEM 0900. Chemistry Seminar. (0 Credits)

CHEM 1102. Drug Discovery: From the Laboratory to the Clinic. (3 Credits)
A rigorous course for non-science majors on the scientific, public policy, and ethical considerations of drug development and commercialization. Topics include an introduction to basic concepts of chemical structure and bonding as applicable to medicinal chemistry, computational structure-based drug design methods, drug testing and approval process, economics of drug commercialization, and public policy issues.
Attributes: MANR, PSCI.

CHEM 1104. The Chemistry of Art. (3 Credits)
An investigation into the chemical basis of color includes why color arises and how it is measured, as well as an introduction to the chemistry of dyes, pigments and glazes. Techniques in conservation and authentication of art will be discussed. Course requirements include several laboratory experiments. The course is intended for students with little or no background in chemistry. (No laboratory fee.)
Attribute: PSCI.

CHEM 1109. Chemistry of the Environment. (3 Credits)
An introduction to the principles of chemistry within the context of environmental and societal issues. These principles are introduced via sequential discussion of theories of matter and its transformation (chemical reactions), chemical sources of energy, and methods of testing and analysis. Specific applications, such as toxicity, pollution, and methods of remediation are discussed in conclusion.
Attributes: ENST, ESNS, ESPS, PSCI, SOIN.

CHEM 1110. Forensic Science. (3 Credits)
An introductory lecture and laboratory course designed for non-science majors who have not taken chemistry. A study of the methods and techniques in forensic science. Topics include fires, explosions, drugs, forensic toxicology, glass and soil, paints, fibers, hair, blood, body fluids, fingerprints, toolmarks, and firearms. Several short lab experiments will be required.
Attribute: PSCI.

CHEM 1311. General Chemistry I Recitation. (0 Credits)
Recitation to accompany General Chemistry I.
Corequisite: CHEM 1321.

CHEM 1312. General Chemistry II Recitation. (0 Credits)
Recitation to accompany General Chemistry II.
Corequisite: CHEM 1322.

CHEM 1321. General Chemistry I. (4 Credits)
(3-hour lecture and 1-hour recitation) A course covering the fundamental laws and theories of chemistry including chemical equations, atomic structure, gas laws and chemical bonding. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ENVS, ESNS, ESPS, NEUR.
Corequisites: CHEM 1311, CHEM 1331.
Mutually Exclusive: NSCI 1321.
CHEM 1322. General Chemistry II. (4 Credits)
(3-hour lecture and 1-hour recitation) A continuation of CHEM 1321, including kinetics, equilibrium, elementary thermodynamics and electrochemistry. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENVS, NEUR.
Prerequisite: CHEM 1321.
Corequisites: CHEM 1312, CHEM 1332.
Mutually Exclusive: NSCI 1322.

CHEM 1331. General Chemistry Lab I. (2 Credits)
(4 hour laboratory) A series of experiments selected to illustrate the topics covered in CHEM 1321 Lab fee.
Corequisites: CHEM 1311, CHEM 1321.
Mutually Exclusive: NSCI 1331.

CHEM 1332. General Chemistry Lab II. (2 Credits)
(4-hour laboratory) A selection of experiments designed to correspond to the material covered in CHEM 1322. An abbreviated qualitative analysis is also included. Lab fee.
Prerequisites: CHEM 1331 and CHEM 1321.
Corequisite: CHEM 1322.
Mutually Exclusive: NSCI 1332.

CHEM 1990. Introduction to Research. (0 Credits)
This course serves as an introduction to scientific research. The goals of the course are to introduce students to the process of scientific research by direct involvement. Students will participate in aspects of data collection, analysis, interpretation, and presentation. Open to all majors. First years and sophomores only. Registration only with permission of faculty mentor.

CHEM 2511. Organic Chemistry I Recitation. (0 Credits)
Corequisite: CHEM 2521.

CHEM 2512. Organic Chemistry II Recitation. (0 Credits)
Corequisite: CHEM 2522.

CHEM 2521. Organic Chemistry I. (4 Credits)
(3-hour lecture, 1-hour recitation) An introduction to bonding, structure and reactivity of organic compounds including aliphatic and aromatic hydrocarbons, alkyl halides and alcohols. Concepts include orbital hybridization, stereochemistry, equilibrium reactions, transition state theory and kinetics. Determination and discussion of reaction mechanisms will be emphasized. Chemical and spectral methods for structure elucidation, including NMR, IR, UV and MS will be discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ENVS.
Prerequisites: CHEM 1322 and CHEM 1332.
Mutually Exclusive: NSCI 3121.

CHEM 2522. Organic Chemistry II. (4 Credits)
(3-hour lecture, 1-hour recitation) A continuation of CHEM 2521. Concentrates on the chemistry of aromatic, carbonyl and amino compounds, with particular emphasis on reactive mechanisms and synthesis. Includes descriptive chemistry of biologically important molecules such as carbohydrates, proteins and lipids. Aspects of synthetically important cycloaddition reactions will also be discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENSE, ENVS, NECM, NEUR.
Prerequisite: CHEM 2521.

CHEM 2531. Organic Chemistry Lab I for Chem Majors. (2 Credits)
A laboratory course introducing the student to the experimental techniques of organic chemistry.
Corequisite: CHEM 2521.

CHEM 2532. Organic Chemistry Lab II for Chem Majors. (2 Credits)
A continuation of CHEM 2531.
Prerequisite: CHEM 2531.
Corequisite: CHEM 2522.

CHEM 2541. Organic Chemistry Lab I. (2 Credits)
(4-hour laboratory, 1-hour lecture) A laboratory course introducing the students to the experimental techniques of organic chemistry. Lab fee.
Corequisite: CHEM 2521.
Mutually Exclusive: NSCI 3821.

CHEM 2542. Organic Chemistry Lab II. (2 Credits)
(4-hour laboratory, 1-hour lecture) A continuation of CHEM 2541. Lab fee.
Prerequisite: CHEM 2541.
Mutually Exclusive: NSCI 3822.

CHEM 3141. Methods of Chemical Research. (3 Credits)
The art and practice of scientific data collection, its compilation and synthesis and its dissemination. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

CHEM 3621. Physical Chemistry I. (4 Credits)
Outlines of physio-chemical principles, including introductions to quantum and statistical mechanics, reaction rates and the solid state. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: CHEM 1322 and PHYS 1702 and MATH 1207.
Corequisite: CHEM 3631.

CHEM 3622. Physical Chemistry II. (4 Credits)
A continuation of CHEM 3621, including classical thermodynamics and electrochemistry. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENSE, ENVS.
Prerequisite: CHEM 3621.

CHEM 3631. Physical Chemistry Lab I. (2 Credits)
A laboratory course that includes experimental determination of reaction rates and spectroscopic observations of quantum phenomena.
Corequisite: CHEM 3621.

CHEM 3632. Physical Chemistry Lab II. (2 Credits)
A laboratory course in experimental thermodynamics and electrochemistry.
Attribute: ENVS.
Prerequisite: an additional hour of formal instruction.

Hours of class preparation per week on the part of the student in lieu of courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

attributes: ENSE, ENVS.

Prerequisites: CHEM 1322 and CHEM 1332.

CHEM 3722. Instrumental Analysis. (4 Credits)
A lecture/laboratory course introducing the principles of chemical instrumentation, including instrument design and instrumental methods of chemical analysis. Topics include data generation, spectroscopic methods of analysis and separation techniques. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ENSE, ENVS.

CHEM 3990. Directed Research. (1 Credit)
Students will work in the laboratory of a faculty mentor on an agreed upon project. Students will learn data collection, analysis, interpretation, and presentation techniques. Open to all majors. Sophomores, juniors, and seniors only. Registration only with permission of faculty mentor.

Attribute: ENVS.

CHEM 4030. Chemistry Seminar. (0 Credits)
A colloquium of contemporary chemical and scientific research. Completion of each of the four semesters during a major's junior and senior year required for graduation.

CHEM 4221. Biochemistry I. (3 Credits)
An introduction to the chemistry of biological polymers (carbohydrates, proteins, polynucleic acid), their monomeric constituents and lipids, emphasizing their biosynthesis and role as biostructural building blocks. Other specialized topics to be covered include enzyme kinetics, mechanism and regulation; energy conversion and dynamics; pre-biotic chemistry and theories of life's origin.

Attributes: NECM, NEUR.

Prerequisite: CHEM 2522.

Mutually Exclusive: NSCI 4153.

CHEM 4222. Biochemistry II. (3 Credits)
Chemistry of the main constituents of living matter, nature, and mechanisms of biochemical processes, enzymes.

Prerequisite: CHEM 4221.

CHEM 4231. Biochemistry Lab I. (1 Credit)
A laboratory course covering techniques used in the quantification, isolation and characterization of proteins, lipids, carbohydrates and nucleic acids. Exercises include spectrophotometry, chromatography, gel electrophoresis, protein assays, enzyme purification and kinetics, thermodynamic measurements, and DNA manipulations.

Corequisite: CHEM 4221.

Mutually Exclusive: NSCI 4853.

CHEM 4241. Biomimetic Chemistry. (3 Credits)
A study of biological polymers and molecular assemblies as molecular devices. The biological structures specifically adapted to catalysis, energy/signal transduction and mechanical behavior will be examined in the context of modern mimetic and supramolecular chemistry. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisite: CHEM 4221 (may be taken concurrently).

CHEM 4340. Environmental Chemistry. (3 Credits)
An introduction to environmental chemistry for science majors covering chemical phenomena in both the geosphere and anthrosphere. Lecture topics include descriptive chemistry of the environment, analytical procedures, and the technology of remediation.

Attributes: ENSE, ENVS.

Prerequisite: CHEM 3721.

CHEM 4422. Inorganic Chemistry. (3 Credits)
A comprehensive course dealing with the chemistry, preparation and properties of common elements.

Prerequisite: CHEM 3621.

CHEM 4432. Inorganic Chemistry Lab. (1 Credit)
A laboratory course to accompany CHEM 4422, including synthesis and characterization of inorganic compounds. Required of those students seeking ACS certification.

CHEM 4525. Organic Synthesis. (3 Credits)
An introduction to fundamental principles of synthetic problem solving. Emphasis will be on synthetically useful reactions and the basic approaches used to design a total synthesis. Topics include functional group transformations, construction of carbocyclic and acyclic systems, and synthesis of biologically interesting and naturally occurring molecules. A portion of the class time will be devoted to solving problems and devising syntheses.

CHEM 4621. Bionanotechnology and Introduction to Nanomedicine. (4 Credits)
The course offers enhancement of the chemistry curriculum in response to extensive recent advances and investments in materials science with particular emphasis on developments in nanotechnology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisite: CHEM 2522.

CHEM 4625. Computational Chemistry. (3 Credits)
An upper level course on computational techniques in chemistry. The course will provide introductions to molecular mechanics in small and large systems and computational approaches to quantum chemistry, including ab initio, semi-empirical, and DFT methods.

Prerequisite: CHEM 3621.

CHEM 4990. Independent Research. (1 to 3 Credits)
Students will work with a faculty mentor on an agreed upon project. Students will cooperate with the faculty mentor on the project definition, data collection, analysis, interpretation, and the presentation of results. A comprehensive paper demonstrating a student's accomplishments during independent research is required. Open to all majors. Juniors and seniors only. Registration only with permission of faculty mentor. The course does not count as a chemistry major elective.

Attribute: ENVS.

Prerequisite: CHEM 3990.

CHEM 4999. Independent Study. (0 to 4 Credits)
Independent research and readings with supervision from a faculty member.
Civil Law (CVGL)

CVGL 0101. Civil Procedure. (4 to 5 Credits)
The study and critical evaluation of principles applicable to the litigation of civil cases. The course considers the structure of an individual law suit and provides an introduction to judicial systems, including both the relationship of state court systems to each other and the role of the Federal courts in our system of federalism. The course places particular emphasis upon the Federal Rules of Civil Procedure and on basic principles of jurisdiction including both personal jurisdiction and federal subject matter jurisdiction. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: JD, LMCO.

CVGL 0262. Conflict Management Systems Design. (2 Credits)
This seminar is an interactive workshop designed to introduce students to the theory, principles and practice of conflict management systems design with the goal of training students to assume this new and creative professional role. Lawyers are increasingly being called upon to act not simply as litigators or deal-makers, but also as process architects to use alternative forms of dispute resolution for institutions, organizations and governments. In addition, attorneys are being asked to design, tailor and manage systems to handle multiple disputes in an effective and efficient manner, such as those arising from mass torts, natural disasters, human rights violations, government programs and technology. Students will be expected to read, write, discuss, critique and participate in simulated exercises. After an overview of conflict management theory and principle, students will, though readings, study actual dispute systems (mass tort, natural disaster, health care, judicial, commercial, international) that reflect conflict management systems design principles. Then through a series of hands-on role plays and exercises, students will have the opportunity to develop systems design skills. Students will work on consulting teams during class time and develop practical consulting skills in their simulated roles as dispute systems designers. The practical and ethical implications of systems design work will be explored, as well as opportunities for synthesis of systems design skills into legal practice. The class meets two Friday afternoons and two Saturdays (all day). Due to the intensive and interactive nature of the seminar, timely attendance at all class sessions is mandatory. Grades will be based on class participation and a 10-page final seminar paper analyzing a current dispute system, designing a new system or proposing a new framework for the systems design field.
Attributes: INLJ, LDE, LIDR, LLM.

CVGL 0291. Electronic Discovery and Information Governance. (2 Credits)
Long gone are the days when discovery meant endless hours wading through boxes of paper documents. In today’s world litigation is all about electronically stored information, which includes email, but also text messages, social media, databases and any other kind of digital content, wherever and however stored, iPhone or Cloud, business or personal. This digital transformation and the explosion in the volume of data has led to major overhauls of the Federal Rules of Civil Procedure as recently as December 2015, as well as new Federal Rules of Evidence and volumes of case law. The course teaches you the law and practice of electronic discovery, a subject matter that is far more broad than its name suggests. Although the course focuses on discovery in the context of litigation, it also covers pre-litigation information governance and records management, the duty to preserve and the evidentiary admissibility of electronic information, among other things. Data privacy and security play key roles. Guest lecturers including judges, in house practitioners, technology experts and more have traditionally been featured throughout the course. <p> No prior knowledge or experience with technology or evidence law required.
Attributes: CORC, LDF, LIDR.

CVGL 0299. Law of Democracy. (2 Credits)
This course surveys the theory and law governing elections, politics, and access rights to democratic political institutions by examining a series of the most important cases in election law, and the political theories underpinning them. Topics covered include voter ID laws, redistricting, campaign finance reform, and laws governing who determines the rules of political parties. The class will focus on key Supreme Court cases in election law and looks at the shift of the ideas governing democracy over history. Grades will be based on a paper or a take home final examination (80%) and class participation (20%), which includes one or more in-class presentations. <p> Laptops are permitted in class. Students who wish to write a 4,000-6,000 word term paper instead of a final examination may do so, but they must commit to the paper and confirm a paper topic by March 15th. Word limits on both sides are strict. <p> The basic textbook is The Law of Democracy: Legal Structure of the Political Process, by Issacharoff, Karlan, and Pildes (IKP). Students should read Richard Hasan's Election Law Blog (http://electionlawblog.org/) for current events.
Attribute: LLM.

CVGL 0321. Conflict of Interest, Corruption, and Bias. (2 Credits)
A variety of circumstances can lead people and organizations to act contrary to their obligations or others’ expectations. The actors can have conflicting financial interests, affiliations, or intellectual commitments. However, there has been little systematic or comparative analysis regarding appropriate legal rules in this area. Instead, there is a hodgepodge of different legal treatments, including outright prohibitions, mandated disclosures, and simple reliance on markets and reputation. This seminar will explore conflicts of interest as a distinctive problem for the law. Take-home exam with a paper option.
Attribute: INLJ.
CVGL 0337. Disability Law: Long Term Illness. (2 Credits)
This course examines disability law and theory, and engages with cutting edge topics in this rapidly developing area of civil rights law. It will provide both a basic familiarity with governing U.S. statutory and case law and an overview of disability community perspectives. The emphasis is on US statutory law, with a particular focus on the Americans with Disabilities Act. We will also cover the Individuals with Disabilities Education Act and the Fair Housing Act’s disability provisions. Guest speakers, first-hand accounts and other materials will supplement the legal readings. The seminar is designed to encourage interactive discussion among the students.
Attributes: JD, LAW, LLM, LMCO.

CVGL 0342. Federal Courts. (3 to 4 Credits)
A study of selected problems arising in connection with the limited subject matter jurisdiction of the federal courts for example, case or controversy requirements such as standing, separation of powers problems, congressional controls over federal courts, federal common law and implied rights of action, the right and procedures to petition for a writ of habeas corpus from federal courts, federal remedies against officials and municipalities, sovereign immunity, and relationships between federal and state courts.
Attributes: JD, LAWJ, LLM, LMCO.
Prerequisites: FCGL 0102 and CVGL 0101.

CVGL 0343. Anti-Discrimination Law. (2 or 3 Credits)
Anti-Discrimination Law provides an introduction to statutory, regulatory, and constitutional law that has been or can be deployed to address discrimination across a variety of contexts (employment, public accommodations, education, housing, criminal administration of justice, voting, etc.) and across a host of identity and protected class bases, including race, ethnicity, sex, disability, and sexual orientation. Course materials will include case law and interdisciplinary readings that pose significant questions about the doctrine, development, direction, and efficacy of anti-discrimination law. Course materials will include interdisciplinary readings that pose significant questions about the development, direction, and efficacy of anti-discrimination law. Classroom discussions of the reading materials will be complemented with multimedia sources. The course grade will be based upon class participation and a Final Examination. Students may submit a Research Paper in lieu of the Final Examination, only after having the paper topic certified with the Professor. The Research Paper can also be considered for Upper Class Writing Requirement certification only by those students meeting the additional submission requirements for WR credit.
Attributes: INLJ, LLM, PIE.

CVGL 0405. Conflict of Laws. (2 or 3 Credits)
A study of the principles and rules applicable when courts adjudicate transactions connected with more than one jurisdiction. Problems of choice of law, jurisdiction, and recognition of judgments are considered in light of traditional and modern analyses and the constitutional limitations.
Attributes: LDF, LIDR, LLM, LMCO.

CVGL 0408. Discovery and Pre-Trial Practice. (1 to 2 Credits)
This is an advanced civil procedure course that focuses on the pretrial process, from the client interview through pretrial motions, with an emphasis on discovery and its role in the pretrial process. As a skills class, students will have oral and written assignments throughout the semester. In addition, in lieu of one class session, the students will observe proceedings in the United States District Court in Newark, N.J.
Attributes: JD, LAW.

CVGL 0414. New York Practice. (3 Credits)
This course will address recent developments in New York civil practice. It will focus on laws and rules in New York practice that have been identified as content topics for the new New York Law Examination portion of the recently adopted Uniform Bar Examination. Topics include: jurisdiction; the Commercial Division; statutes of limitation; pleadings; starting the suit and service; joinder, intervention and class actions; motion practice, including summary judgment; disclosure and e-discovery; settlement; contribution and indemnity; provisional remedies; special proceedings; appeals; and ethics and sanctions. Our course combines a lecture format with a lively give and take discussion examining both practical and policy aspects.
Attributes: LDF, LMCO.

CVGL 0420. Complex Litigation. (3 Credits)
A significant part of modern civil litigation practice involves complex cases with numerous parties and claims. Such cases arise in a wide range of substantive fields, including product liability, antitrust, civil rights, employment discrimination, environmental harm, and securities. As a procedural matter, some of these cases are adjudicated or settled as class actions, while others are handled through various forms of non-class aggregate litigation. This course examines the theory and practice of complex multiparty cases. Readings and discussions will focus on class actions and other advanced procedural topics including multidistrict litigation, mass settlements, and phased trials.
Attributes: JD, LDF.
Prerequisite: CVGL 0101.
CVGL 0780. Congressional Investigations. (2 Credits)
This course will focus on the scope and contours of Congress's oversight authority and how it has evolved over time. It will also examine the interplay between congressional investigations and the separation of powers between the Legislative, Judicial, and Executive branches of government and how such investigations can impact private actors. Topics covered will include, among others, committee jurisdiction and grants of authority, interaction with the Executive Branch and claims of Executive Privilege, judicial review of congressional oversight activities, the impact of congressional oversight on parallel investigations and proceedings, the applicability of constitutional and common law privileges, the congressional contempt power, and current trends in congressional investigations in light of a changing political dynamic in Washington (including the role of the minority party and specially-constituted investigative commissions).<p> The world of congressional investigations is truly interdisciplinary—these high-stakes investigations often involve overlapping, and at times competing, considerations of law, legislation, lobbying, policy, politics, public relations, and media. Rarely does a congressional investigation occur in a vacuum; for an issue to attract a congressional committee's attention, it is often necessarily subject to parallel criminal and civil proceedings. Therefore, students will be challenged to assess the spectrum of risk a subject or witness might face, including criminal exposure, impact on parallel litigation, administrative or regulatory issues, media scrutiny, reputational and economic risk, and negative legislative results. Students will also consider the myriad objectives of a congressional investigation, including evaluating compliance with the law, supporting or opposing legislation, or advancing a particular political agenda. Grades will be determined based on class participation (15%) and a take-home final exam (85%).<br><br>Attributes: INLJ, LLM.<br><br>CVGL 0929. Current Issues in Police Refor. (2 Credits)</p>---

Civil Rights (CIGL)<p>CIGL 0204. Diversity and Inclusion in Law Practice. (1 Credit)<br>Diversity is empowering. Studies show that more diverse and inclusive environments lead to greater creativity and productivity. Yet, the legal profession remains one of the least diverse professions in the United States. Why is embracing diversity such a challenge for the legal profession? Through the readings and class discussions this course will explore the topics of diversity, inclusion, cultural competence, and U.S. workplace practice. We will then examine some of the barriers faced by the legal profession such as "covering" and "unconscious bias". Finally, we will examine the challenges law firms and their clients face with diversity and inclusion and innovative ways law firms and clients are advancing diversity and inclusion.<br><br>Attribute: LLM.</p>---

CIGL 0229. Children and Immigration Law. (2 Credits)<p>This seminar on Children and Immigration Law uses an interdisciplinary approach to explore emerging law, policy, research, and practice related to migrant children and their families. Following a human rights-based approach, classes will survey the key international and federal legal frameworks impacting children and their families in the context of migration. Students will be exposed to the complexity of legal issues that affect migrant children and youth as immigration law intersects with many other systems, including child welfare, juvenile and criminal justice, education, health, and employment, and will apply the law to individual case study scenarios as well as complex policy questions. Comparisons will be drawn to laws and policies in other countries. Guest speakers will be invited to present and participate in classes, emphasizing innovative strategies for promoting children's rights in practice.<br><br>Attribute: INLJ.</p>---

CIGL 0230. Critical Race Theory. (2 or 3 Credits)<p>In the mid-1980s, a new scholarly movement developed in legal academe, Critical Race Theory ("CRT"). Early advocates of CRT including Derrick Bell, Mari Matsuda, Charles Lawrence, Richard Delgado, Kimberle Crenshaw, and Patricia Williams challenged both the substance and style of conventional legal scholarship. Contrary to the traditional notion that racial subordination represents a deviation from the liberal legal ideal, this body of work recasts the role of law as historically central to and complicit in upholding racial hierarchy as well as other hierarchies of gender, class and sexual orientation. The goal of this seminar is to examine the genesis of CRT and, in light of its theoretical commitments, to explore CRT's possibilities and limitations with a close examination of the jurisprudence and application of its approaches with experiential learning classroom exercises and student discussion. The Final Grade calculation will be based on class room participation in the class discussions (quality, frequency, and attendance), a short Op-Ed drafting assignment, and a Take Home Examination Paper. Students may submit a Research Paper in lieu of the Take Home Examination Paper, only after having the paper topic certified with the Professor. The Research Paper can also be considered for Upper Class Writing Requirement certification only by those students meeting the additional submission requirements for WR credit.<br><br>Attributes: JD, LLM, LWR, PIF.<br><br>CIGL 0231. Critical Race Theory Experiential Learning. (1 Credit)<p>Critical Race Theory Experiential Learning is a one credit additional component to the Critical Race Theory two credit seminar. Students must co-register for the two credit 'Critical Race Theory' seminar (CRN 33660). The organizing principle for the experiential add on to the Critical Race Theory (CRT) course is to hone each student's capacity for cultural competency in their work as lawyers. Cultural competency is something that the American Bar Association and a growing number of state bar admission requirements highlight as a crucial professional skill. However, the CRT Experiential Learning component purposely avoids duplicating exercises already available to students in the clinic context and traditional simulation courses. Instead, CRT's in-depth focus on cultural competency is designed to engage the students in learning how to anticipate and address professional issues of bias and cultural misunderstanding.<br><br>Attributes: EXP, LLM, PIF.<br>Prerequisite: CIGL 0230 (may be taken concurrently).<br>Corequisite: CIGL 0230.</p>
CIGL 0521. Race and the Law. (3 Credits)
This course provides an overview of race in the American legal system. Moving from topics such as slavery and the early treatment of Native Americans to the modern era, the course traces the evolution and development of current legal doctrine pertaining to race and racial discrimination. Students will gain an understanding of the foundations of modern antidiscrimination law, as well as an appreciation of the predominant critiques of the U.S. Supreme Court’s jurisprudence in race cases. In addition, students will be encouraged to assess current and proposed approaches to race and racial discrimination by looking at the operation of race in a number of contexts, including the criminal legal system, employment, education, medicine, recent cases of everyday discrimination (BBQ Becky, etc.), and intersectional discrimination. Classes will include discussion of case law as well as academic and popular press articles, supplemented by multimedia sources, and presentations by academics and practicing attorneys engaged in racial justice litigation.
Attributes: INLJ, JD, PIE.

CIGL 0551. Poverty Law. (2 or 3 Credits)
Although varied in its particulars, poverty in the United States is extensive. It is also disproportionately spread among the population, with African Americans, Latinos, and Native Americans experiencing much higher levels of poverty, and a greater persistence of poverty, than other demographic groups. In this seminar, we will examine the extent of poverty in the United States and its root causes, as well as the historical development of social welfare policy. We will focus on the legal responses to poverty, exploring how the law shapes the lives of low-income people and communities. In particular, we will explore a rights-based approach to ameliorating poverty and the relevance of family form to poverty. In addition to weekly reflection papers, students will conduct independent research and write one long paper.
Attributes: INLJ, JD, PIF.

Classical Languages and Civilization (CLAS)

CLAS 0912. Requirement Preparation. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

CLAS 0914. Requirement Preparation in Summer. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

CLAS 0930. PhD Comprehensive Examination-Classics. (0 Credits)

CLAS 0936. Master’s Comprehensive Examination. (0 Credits)

CLAS 0950. Proposal Development. (1 Credit)

CLAS 0960. Proposal Acceptance. (3 Credits)

CLAS 0970. Dissertation Mentoring - Classics. (0 Credits)
The Classics PhD. student is required to register for Dissertation Mentoring, which has a 3 credit fee, the semester after the student’s proposal is accepted.

CLAS 1210. Understanding Historical Change: Ancient Greece. (3 Credits)
A political, social, and intellectual history of ancient Greece from its origin to the death of Alexander the Great.
Attribute: HC.

CLAS 1220. Understanding Historical Change: Ancient Rome. (3 Credits)
Introduction to Roman History focusing on problems and sources.
Attribute: HC.

CLAS 2000. Texts and Contexts. (3 Credits)
An introduction to the literary analysis of texts and the cultural and historical contexts within which they are produced and read. Significant class time will be devoted to critical writing and to speaking about literature. Each section of Texts and Contexts will have a focus developed by the individual instructor and expressed in its subtitle. This course fulfills the Core requirements for the second Eloquencia Perfecta seminar.
Attributes: EP2, TC.
Prerequisite: ENGL 1102.

CLAS 2800. Internship. (2 Credits)

CLAS 3030. Athenian Democracy. (4 Credits)
A historical overview and morphological description of democracy as it was practiced in Athens from 508 BCE until 322 BCE. In addition to survey how Athenian democracy evolved and an overview of its most salient features, we will also investigate how classical Athenian democracy was imagined and criticized by leading thinkers contemporary with it. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, PJCR, PJST.

CLAS 3031. The Spartan Mirage. (4 Credits)
Beginning with a survey of the Ancient Sparta imagined by modern historians who strive to depict Sparta “wie es eigentlich gewesen” (“as it actually was”), we will examine select representations (both Ancient and Modern) of what the French historian, Francois Ollier famously termed “le mirage Spartiate.” From its influence on Plato’s political idealism to how Ancient Romans, French Revolutionaries, German Nationalists and modern mass media have each imagined Sparta we will review and critique these visions as exercises in cultural construction and appropriation in order to better understand the importance of what and how people choose to remember and forget -- and why. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHC.

CLAS 3040. Law and Society in Greece and Rome. (4 Credits)
A survey of the systems of law in ancient Greece and Rome, focusing on the relation of the law to social values and to politics. The course ranges from law in Homer to the changing legal position of early Christianity in Roman society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

CLAS 3050. Pagans and Christians. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, COLI, MVST, REST.

CLAS 3141. Love, Fate, and Death in the Ancient Novel. (4 Credits)
This course will provide an intensive introduction to the Ancient Novel. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
CLAS 4020. The Classical Tradition in Contemporary Fiction and Film. (4 Credits)
This course provides a survey of classical works from ancient Greece and Rome and their reception in contemporary literature and film. The objective is threefold: first, to learn about patterns of narrative intrinsic to the representation of myth and history in classical literature; then to observe how these patterns function both in works of the classical period and also in contemporary fiction and film; and finally, to consider why classical antiquity has proved an enduring source of inspiration for writers and film-makers of today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, ICC.

CLAS 4040. The Birth of Learning: Classical Education Then, Now, and in New York City. (4 Credits)
This course offers a survey of classical education from antiquity through its reception in late antiquity among early Christian writers and into the present day. It is also an integrated service-learning seminar that requires on-site investigation into current approaches to teaching the Classics in several schools in NYC. We will use the traditional entry into the liberal arts-Trivium-to structure our readings and focus our inquiry into the purpose and value of an education in the humanities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, VAL.

CLAS 4045. Sex and Gender in the Ancient World. (4 Credits)
This course explores issues of sex and gender in the ancient Mediterranean world and considers from an ethical perspective how they relate to contemporary life and culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: OCST, WGSS.

CLAS 4050. Ancient Roman Cities. (4 Credits)
This course offers a survey of ancient Roman cities in context. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ICC.

CLAS 4051. Ancient Greece: Classical Study Tour. (4 Credits)
This course provides a selective historical and on-site survey of ancient Greece it is structured in two parts: first, we will meet four times in lengthy, two-hour seminars over the course of the semester to prepare ourselves for the actual study-tour on the Greek mainland in May. In Greece itself we will take advantage of on-site visits to enrich our understanding of important ancient sites from the bronze age until the period of Roman occupation. As an interdisciplinary capstone course, this seminar will focus primarily on exploring the complex relationship between history, art, and archaeology. To that end, we will aim to understand the monuments and material culture we study - e.g. buildings, sculpture, painting, inscriptions, cult sites, etc. - in relation to developments in architecture, politics, literature, religion, philosophy, artistic production, and the study of antiquity. In addition, we hope to gain a sophisticated appreciation for how ancient Greece grew and survived over time and how they have preserved, lost, and regained in the modern era. By focusing on the ancient period in the long life of Greece, we will engage key questions in urban history and archaeology and the study of the Greek world: for example, what are the relationships among social and political structure - e.g. religion, gender, government - and the physical structures of the city? How does the Mediterranean context and Greece's intermittent role as imperial power - Athens, Alexander the Great - shape its development. Who were the ancient Greeks; how did they live; and how can we come to know about them?.
Attribute: ICC.

CLAS 4055. Race and Ethnicity in Antiquity and Today. (4 Credits)
This course offers an in-depth study of race and ethnicity in the ancient world and explores from an ethical perspective how ancient conceptions of race influence modern ones.
Attributes: OCST, PJRC, PJST, PLUR.

CLAS 4545. Bath Cultures and Bathing Rituals From Antiquity to Brooklyn. (4 Credits)
This course draws on the two disciplines of history and anthropology to examine the culture of bathing in the Greco-Roman world and its reception in Byzantium, medieval Islam, and concludes with a look at its ‘Orientalized’ fetishizing in the contemporary US. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, MEST, OCST, REST.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401.

CLAS 4999. Tutorial. (1 to 4 Credits)
Independent research and readings with supervision from a faculty member.
CLAS 6400. Matter and Gender in Classical Antiquity. (3 Credits)
In the face of the rising popularity of ‘new materialisms,’ this class examines the emergence of the notion of ‘matter’ in classical antiquity. We will undertake close readings of key ancient primary texts, including various Presocratics; Plato’s Timaeus; Aristotle’s Physics, Metaphysics, and Generation of Animals; and Lucretius’ De Rerum Natura, tracing the discourses of materiality that arise in concert with tropes of sex and gender. The guiding question here is: What can matter’s genealogical ties to the feminine tell us about the materialization of bodies and genders? At the same time, we will attend to the topographies and texture of ancient thinking about nature and materiality more broadly. Alongside a narrative of ‘emergence’ we will also consider hermeneutic questions: What are the ethico-political stakes of ‘retrieval’ of antiquity and how can we determine our relationship to these distant texts? And how does a consideration of ancient modes of thought help to enrich contemporary discourses of matter and gender? To help orient our study we will draw on contemporary thinkers including Irigaray, Kristeva, Loraux, Sallis, Caverero, as well as critically engaging Bachofen’s 19th century conception of Mutterrecht. Some background knowledge of psychoanalytic theory is advised, as is knowledge of Greek, however all readings will be in translation.

CLAS 6466. Late Latin Poetry. (3 Credits)
A survey of late-antique Latin poetry, in particular Claudian, Ausonius, Rutilius, and the Centones.

CLAS 6535. Introduction to Digital Literary Studies. (3 Credits)
This graduate seminar introduces students to the digital tools, resources, and methods used in producing publishable data-driven scholarship in classical philology and literary criticism. The course provides a forum for students to develop hands-on skills in computer programming for literary studies (using Python), focused primarily on string manipulation, text mining and analysis, and data visualization, and with a strong emphasis on research design, reproducibility and replicability, and changing modes of scholarly communication in the Humanities. The course culminates in a series of Digital Classics ‘case studies,’ through which students will be invited to use the skills acquired in the course to reproduce landmark data-driven studies in Classics by N. A. Greenberg, D. Packard, D. Clayman, and the Tesserae Project, among others. The course is open to students with no prior programming experience. While the case studies will be drawn largely from scholarship in Classics, the training acquired in the class will be useful to any GSAS student at Fordham working with digitized corpora and textual data. Moreover, students will have the opportunity to work on material in Latin, Ancient Greek, English, and/or, with the permission of the instructor, another language of their own choosing.

CLAS 7000. Latin Survey at NYU. (3 Credits)
A survey of Latin literature offered by NYU.

CLAS 7440. The City of Rome: The Archaeology, History, and Topography of an Imperial City. (3 Credits)
Topics in Roman Art and Archaeology: The City of Rome: The Archaeology, History, and Topography of an Imperial City (at CUNY)

CLAS 7556. Island Archaeology. (3 Credits)
This graduate seminar focuses on the practice of classical archaeology on Mediterranean island sites.

CLAS 7580. The Trajanic Moment. (3 Credits)
This course explores the reign of the Roman emperor Trajan from a variety of different perspectives.

CLAS 7800. Greek Orators. (3 Credits)
In this course, students will read one or more examples of oratorical works from Classical Athens in the original Greek. We will also read extensively from other ancient sources in translation and from a broad range of modern scholarship on Athenian oratory to examine the different types and purposes of oratory in Athens, as well as the social, historical, legal, and cultural milieus in which such speeches were transmitted.

CLAS 7805. Approaches to Research in Classics. (3 Credits)
This weekly seminar invites participants to think deeply and critically about the breadth of the field of classics and how both personal and shared ethics intersect with our methods and approaches. A sample of possible weekly topics includes: (1) What is Classics? What’s wrong with “Western Civ”; (2) Our Disciplinary Histories; (3) Race, Ethnicity, and Reception Studies; (4) Gender, Politics, and Classics; (5) Sexualities, Then and Now; (6) Disability Studies, Trauma Awareness, and Accessibility; (7) Intersections Between Religions and Classics; (8) Material Culture and Cultural Heritage; (9) Papyrology and its Ethical Questions; (10) Numismatics and its Ethical Questions; (11) The Evolving Field of Language Teaching and Language Textbooks; (12) Demystifying Peer-Review and Role of Public Scholarship in the 21st Century; (13) Researching in Community Grants, Large Projects, and the Ethics of Professional Collaboration and Interactions. Throughout the course, we will return repeatedly to the question of how to cultivate healthy mentee/mentor relationships and peer-to-peer support systems. Alternate weekly topics may be developed in collaboration with enrolled students. The seminar will have a limited number of guest participants, but will emphasize discussion of pre-circulated readings, over lecture-style presentations. Students will have wide latitude in developing a final project appropriate to their individual career goals. This might be a traditional term paper, or could include such projects as developing future class curriculum, preparing a grant proposal or fellowship application, creating sample job market materials, writing abstracts for submission to various conferences, or preparing a previous term paper for submission to a journal for peer-review.

CLAS 7880. Greek Epigraphy. (3 Credits)
An introduction to the principles and practices of Greek epigraphy. Students will learn the basic tools and techniques of the epigrapher, including reading and transcribing inscriptions as well as, editing epigraphic texts, to gain the skills needed to interpret the epigraphic record and its publications. In addition, students will be introduced to the vast diversity of the epigraphic record and the difficulties faced in interpreting such evidence. They will have the opportunity study particular inscriptions which have created or solved problems of historical or archaeological interpretation, thereby impacting our understanding the ancient Greek world.

CLAS 8802. Ecphrasis. (3 Credits)
At NYU.

CLAS 8803. Education in Greece and Rome. (3 Credits)
At NYU.

CLAS 8804. Greece and the Med in the Archaic and Classical Periods: Materials Methods and Debates. (3 Credits)
At NYU.

CLAS 8806. Homer’s Iliad at CUNY. (3 Credits)
Classic Consortium.

CLAS 8807. Homer's Odyssey. (3 Credits)
This course offers an in-depth study of the Odyssey.
CLAS 8811. Pindar. (3 Credits)
At CUNY.

CLAS 8818. Survey of Greek Literature. (3 Credits)
CUNY course in graduate Classics consortium.

CLAS 8819. Third Sophistic. (3 Credits)
From the Second to the Third Sophistic: history, culture, and religion (at NYU)

CLAS 8824. Greek Prose Composition at CUNY/NYU. (3 Credits)
CUNY/NYU course in graduate Classics consortium.

CLAS 8825. Vergil, Aeneid. (3 Credits)

CLAS 8829. Horace: Odes. (3 Credits)
At CUNY.

CLAS 8830. War Diplomacy Finance 323-30 at NYU. (3 Credits)
NYU course in graduate Classics consortium.

CLAS 8831. Callimachus. (3 Credits)
At CUNY.

CLAS 8833. Modern Approaches to Ancient Historiography. (3 Credits)
At CUNY.

CLAS 8835. Greek Tragedy in the Mediterranean World. (3 Credits)
At NYU.

CLAS 8837. The Athenian Acropolis. (3 Credits)
At NYU.

CLAS 8839. Persian Empire. (3 Credits)
At NYU.

CLAS 8840. Ovid's Metamorphoses: Consortium Course. (3 Credits)
Course in Fordham-CUNY-NYU Classics consortium offered at CUNY or NYU.

CLAS 8841. Latin Prose Composition. (3 Credits)
At NYU.

CLAS 8842. Latin Composition at CUNY. (3 Credits)
Classics Consortium Course.

CLAS 8843. Aristophanes. (3 Credits)

CLAS 8845. Archaic Greek Sculpture and Sanctuaries. (3 Credits)
At NYU.

CLAS 8847. Augustus and the Creation of the Roman Empire. (3 Credits)
At NYU.

CLAS 8848. Rome and the Hellenistic East. (3 Credits)
CLAS 8849. Literary Theory. (3 Credits)
At NYU.

CLAS 8850. Hellenistic Poetry. (3 Credits)
CLAS 8853. Aristotle Ethics and Politics. (3 Credits)
At CUNY.

CLAS 8855. Greek Drama in Performance. (3 Credits)
At NYU.

CLAS 8856. Letters in Plautus. (3 Credits)
This course focuses on the epistolary motif in Plautine comedy, exploring the complex dynamics engendered when text appears on stage.

CLAS 8857. Euripides. (3 Credits)
At NYU.

CLAS 8858. Roman Family. (3 Credits)
A survey of the Roman family from the republican period through the empire with a particular emphasis on law and legal history.

CLAS 8859. Roman Law. (3 Credits)
At NYU.

CLAS 8860. Cicero’s Rhetoric and Rhetorical Theory. (3 Credits)
At CUNY.

CLAS 8861. Vergilian Geopoetics. (3 Credits)
At NYU.

CLAS 8862. Thucydides. (3 Credits)
at CUNY.

CLAS 8864. Polytheism(s) and Society in the Ancient World. (3 Credits)
at NYU.

CLAS 8865. Roman Architecture. (3 Credits)
at CUNY.

CLAS 8866. Plato, Symposium Phaedrus. (3 Credits)
at NYU.

CLAS 8867. Presocratic Philosophy. (3 Credits)
A survey of the presocratic philosopher in Greek.

CLAS 8869. Sophocles’ Poetics. (3 Credits)
An in-depth study of the poetics in Sophocles’ tragedies.

CLAS 8870. Commentaries and the Classical Tradition. (3 Credits)
At CUNY.

CLAS 8871. Cognitive Theory and Classics. (3 Credits)
An overview of cognitive theory and its use in Classics.

CLAS 8872. Greek Hymns. (3 Credits)
An overview of Greek hymns down through the Hellenistic period.

CLAS 8873. Cleopatra Between East and West: Archaeology of the Twilight of the Ptolemies. (3 Credits)
An in-depth study of Cleopatra and the end of the Ptolemies.

CLAS 8874. Future of the Past: Classics Then and Now. (3 Credits)
A survey of classical scholarship from the beginning of the discipline to the present day.

CLAS 8875. The Hetaira or Grief and Mourn. (3 Credits)
This course will focus on the theme of grief and mourning in Greek Literature.

CLAS 8876. Conceptions of History and the Linguistic Turn. (3 Credits)
This course will explore the different conceptions of history in antiquity and the impact of the linguistic turn on the study of history.

CLAS 8877. Virgil’s Eclogues. (3 Credits)
This course will focus on the poetry and poetics of Virgil’s Eclogues.

CLAS 8878. Greek Elegy and Iambi. (3 Credits)
This course will offer an overview of both elegy and iambic poetry in Greek Literature.

CLAS 8879. Aristotle’s Metaphysics. (3 Credits)
An in-depth study of Aristotle’s Metaphysics.

CLAS 8880. Aeschylus. (3 Credits)
An overview of Aeschylean tragedy.

CLAS 8882. The Process of Reading, Writing, and Delivering. (3 Credits)
An in-depth study of information was managed in the Greek and Roman World.

CLAS 8883. Greek and Roman History From/In the Arts. (3 Credits)
A study of the relationship between Greek and Roman History with the Arts. At CUNY.

CLAS 8884. The Architecture of Landscape. (3 Credits)
At NYU.
CLAS 8885. Archaeology of Maritime World. (3 Credits)
Survey of the archaeologies of the Maritime World.

CLAS 8886. Antiquity at Risk: Conflict Archaeology. (3 Credits)
This course explores the risk of studying classical antiquity in dangerous places. It emphasizes conflict archaeology, conservation, international law and cultural heritage.

CLAS 8887. Ancient Science. (3 Credits)
A survey of ancient science in ancient Greece and Rome.

CLAS 8998. Classics Internship. (1 to 3 Credits)
This course offers Classics graduate students (MA/PhD) the chance to work in an area of the discipline of Classics outside the conventional curriculum of the MA/PhD tracks. The number of credits (1-3) will be determined and approved in advanced by the Chair of Classics.

CLAS 8999. Tutorial. (0 to 4 Credits)

CLAS 9999. Dissertation Direction. (1 Credit)

CLGL 0092. Externship: New York City Law Department - Environmental Law. (2 Credits)

CLGL 0099. New York City Law Department - Environmental Law. (1 Credit)

CLGL 0105. Advanced Seminar in Legislative and Policy Advocacy. (1 Credit)
This seminar will employ two formats: Discussions of readings (selected by the professor and the students) and Rounds. We will use the experience gained in students' first semester in the clinic to more deeply explore the legal, strategic, ethical, political, and social justice ramifications of engaging in legislative and policy advocacy as attorneys. Attributes: JD, LLM.

CLGL 0129. Pro Bono Scholar Seminar. (2 Credits)

CLGL 0199. Investor-State Arbitration Practice. (2 or 3 Credits)
This course will provide an overview of investment arbitration, a practice area that comprises principles of international law, dispute resolution, treaty law and public policy. Special distinguishing features of investor-state arbitration disputes will be highlighted and explored, including the importance of nationality, consent to jurisdiction, defenses and damages. Among the arbitration procedures examined will be those arising from bilateral investment treaties (BITs) and multilateral investment treaties (MITs), such as the Energy Charter Treaty (ECT) and the North American Free Trade Agreement (NAFTA), as well as public contracts. The course will also consider issues related to investment disputes under ICSID, UNCITRAL and ICC rules. Attributes: ICE, JD, LAWB, LAWI, LDE, LIDR.

CLGL 0204. Access to Justice Seminar. (2 Credits)
Ideally, courts would offer everyone an opportunity to secure equal justice, but the justice system is burdened by inequality and injustice. While some criminal justice reform campaigns have mobilized support across the political spectrum, less attention has been paid to a set of justice system problems, civil and criminal, that turn people's lives upside down, destroying their prospects for maintaining their homes, family relationships, jobs, financial well-being, and even their basic emotional and physical security. We will consider a mix of reform initiatives. In the civil system, we will explore campaigns in such areas as housing, debt, family law, benefits, and health care. In the criminal system, our focus will include the community courts movement, probation and parole reform, and the emerging efforts to rein in oppressive fines and fees regimes. Experts will speak from their own experiences about their initiatives to improve policies and processes. Readings will provide additional historical, theoretical, and practical perspective. This seminar will examine all of these issues through the lens of policy advocacy: identifying the problems, the individuals and communities most affected, and the policy solutions. We will consider the ideas that drive reform campaigns, while learning about the tools and capacities that can bring about change, including research, litigation, lobbying, communications, and organizing. In a final paper, students will identify a justice system problem, explain why it matters and to whom, describe strengths and weaknesses of potential policy solutions, and analyze the pathways to reform. Bruce Green (room 7-168) is the Stein Chair and Director of the Stein Center for Law and Ethics. David Udell (room 7-165) is the Director of the National Center for Access to Justice (NCAC). Christopher Albin-Lackey (room 7-170) is the Legal and Policy Director of the NCAC. Please speak with any of us if you have questions about the seminar. Attribute: PMMA.

Updated: 07-27-2020
CLGL 0213. Prospectives on the Trial Process. (2 Credits)
This is a seminar course for those law students whose passion is to try lawsuits. This not a course in the ABC’s of Trial Practice or a checklist of do’s and don’ts. This course will be about what works in the courtroom, the why and the how. It will be interactive and taught not just from books but from many years of real trial experience out of the mouths of some of the Nation’s very best jurists and trial lawyers. Final Examination. There will be a take home assignment or exercise in a format to be determined. Classroom Participation. In-class participation is a vital part of this class. To be fully prepared it is critical that you read the assigned materials which I believe you will find both enlightening and enjoyable. I intend this seminar class to be highly interactive and your questions will be as important as your answers to my questions. There are no perfect answers in this material because there is no right way to try a case. I expect each of you to attend all or most of the class sessions because this material really cannot be absorbed just from reading a book.

CLGL 0215. Clinic Seminar: Corporate and Social Responsibility. (2 Credits)
Efforts to promote corporate social responsibility are vital to the promotion of human rights and environmental sustainability. From the use of energy and natural resources for general operations to source material extraction and the processing, shipping, selling and, ultimately, disposing of products, to the terms of employment throughout these networks and effects on neighboring communities and global consumers alike, human rights and the environment are impacted by most every aspect of corporate activity. With these myriad touch points, corporations have a key role to play in the development and evolution of these important areas of law. With their wide reach, businesses have the potential to improve environmental and human rights conditions worldwide: They possess the technological and research capacities to innovate new methods of sourcing, production and disposal to promote greater health and safety for people and the planet alike. Indeed, corporate social responsibility cannot be achieved without the creativity, innovation and cooperation of the business community. The Corporate Social Responsibility (CSR) clinic, directed by Professor Paolo Galizzi is designed to introduce students to the law and practice of corporate social responsibility, and expose them to the challenges and prospects for maximizing social and environmental outcomes alongside profits. Opportunities to promote sustainable development in global industry abound. Focusing on the intersection of industry, society and environmental sustainability, clinic participants will work on real-world projects to identify promising openings for early adopters and first-to-market innovators of sustainable policies, technologies, and business models. The seminar portion of the clinic will introduce students to the theory and practice of corporate social responsibility law. With guest lecturers who are experts in the field, students will learn about the history and modern development of CSR in the countries in which they will be working, as well as practical skills such as project research and design, stakeholder consultation, interview techniques, and proposal drafting and development. For the fieldwork component, participants will research and design a concrete CSR project in cooperation with national and international partners.

Attributes: EXP, ICS, INLJ, JD, LAWB, LAW, LLM, PIS.

CLGL 0219. Clinic Casework: Corporate and Social Responsibility. (3 Credits)

CLGL 0224. Clinical Externship: Housing Litigation. (2 Credits)
CLGL 0229. Externship: Voting Rights Fieldwork. (2 Credits)
Students in this externship will learn about the multi-faceted approach to protecting core rights of political participation. In conjunction with the course instructor, students will work on vote suppression or vote dilution matters. At a minimum, students can expect to draft pre-litigation memoranda providing the results of their investigation and addressing potential claims, defenses, and making a recommendation that considers potential legislative solutions, including political strategic considerations; and public education activities that may help overcome the diagnosed barriers. Students will perform a variety of lawyering skills, including fact investigation; assessment of the need for expert testimony; legal research and writing, case evaluation; and ethical, social justice, and political considerations. To enroll in this course, you must apply through the focused externship application form on LawNet.

Attribute: EXP.
CLGL 0239. Alternative Dispute Resolution: Comparative Perspectives. (3 Credits)

CLGL 0244. Clinical Externship: Housing Litigation Seminar. (1 Credit)
In the Housing Litigation Externship, students will perform fieldwork at either Bronx Legal Services or Housing Conservation Coordinators, Inc., representing low income tenants who are facing eviction. The externship will include direct client contact and court appearances in New York City Housing Courts, providing tenant defense under the supervision of experienced housing attorneys. -p> The seminar portion of the Externship will complement the fieldwork. Students will explore, among other topics, the history of rent regulation in New York City and the historic new legislation providing the right to counsel for low income tenants facing eviction in New York City's Housing Courts. The basic principles of landlord-tenant law will also be covered in the seminar.
Prerequisite: CLGL 0224 (may be taken concurrently).

CLGL 0291. Externship: Voting Rights Seminar. (1 Credit)

CLGL 0292. Clinic Seminar: Consumer Litigation. (1 to 2 Credits)
Interested in litigation or wondering if you might be? Want experience with drafting pleadings, motions, and briefs, and appearing in court? Looking to join the community of public interest and private lawyers who are enforcing the rights of low-income consumers against unscrupulous merchants, lenders, assignees, and credit reporting agencies? In the CONSUMER LITIGATION CLINIC, students represent consumers in federal, state and local courts against lenders, debt collectors, and merchants. Our clients are often victims of identity theft, sued on debt they do not owe, or have judgments rendered against them in procedurally defective collection suits. Our clinic advocates for these consumers by raising available defenses and sometimes in affirmative litigation against debt collectors or merchants who have violated their rights under common law, the federal Truth in Lending Act (TILA), the Fair Debt Collection Practices Act, the Fair Credit Reporting Act, the FTC Holder Rule, and other federal and state consumer protection statutes. Working under the close direct supervision of a full-time attorney professor, students are expected to take primary responsibility for all aspects of their cases – drafting pleadings, motions and briefs, appearing in court for oral argument and hearings, interviewing and counseling clients, negotiating with opposing counsel, and researching the law to evaluate the merits of claims and defenses. You will also join volunteer lawyers from throughout New York City (including many Fordham Law alumni) to provide to unrepresented consumer defendants both limited representation through the Volunteer Lawyer of the Day program, and advice and assistance at CLARO (Consumer Legal Assistance and Referral Office), both located in the NYC Civil Court.
Attributes: BFS, INLJ, JD, LDF, LDS, PIS.
Prerequisite: CLGL 0350 (may be taken concurrently).

CLGL 0293. Clinic Casework: Consumer Litigation. (1 to 3 Credits)

CLGL 0298. Clinic Cswk: Immigrant Rights. (2 or 3 Credits)
Provides students with an opportunity to provide direct legal representation to individuals in a range of immigration matters. In doing so, students are able to respond to a vital need for quality representation for indigent non-citizens who are facing deportation and/or seeking legal status in the United States. Students in the IRC generally work with a student partner over the course of the semester. The team will assume direct responsibility for all aspects of their cases and engage in a full range of lawyering skills. This may include client and witness interviewing, legal research and writing, fact investigation and development, counseling, affidavit drafting, motion practice, advocacy, production of evidence, witness preparation and trial work. You may also have an opportunity to work on litigation and advocacy projects in collaboration with community organizations -p> The classroom instructional component of the course will employ a Rounds-based pedagogy frequently used in clinical legal education. We will meet for Rounds on a regular basis - to be scheduled at a later time. -p> For more details, select desired clinic of interest at <a href="https://www.fordham.edu/info/23685/clinics' target='_blank'>https://www.fordham.edu/info/23685/clinics</a>.

**Attributes:** ICS, INLJ, JD, LAWJ, LDF, LDS, PIS.
**Prerequisite:** CLGL 0350.
**Corequisite:** CLGL 0298.

CLGL 0301. Mediation and Alternative Dispute Resolution Research and Writing. (1 Credit) Students will examine legal, ethical and policy issues associated with mediation and ADR processes in both court-connected and private programs. They will produce writings that will be helpful to stakeholders (judges, parties, lawyers, mediators and arbitrators). In addition to law review and journal articles, students may produce writings that include "best practices" standards, practice manuals for mediators, guidelines for pro se parties etc. Permission of the instructor is required for admission to the course. Preference will be given to students who have completed or are currently enrolled in an ADR course or the Mediation Clinic or who have a strong interest in the field of dispute resolution.

CLGL 0303. Externship: Criminal Justice Fieldwork. (2 Credits) Under the supervision of a mentor field attorney, students observe and assist in the lawyering process. Students must secure their own field placements, approved in advance by the Externship Program. Depending on the field placement, experiences may include research, writing, discovery, and observation. Externs must complete 10 hours of fieldwork a week for 13 weeks during (20 hours a week for 8 weeks during the summer) over their semester. Students must also be enrolled in the seminar appropriate to their placement. The seminar will focus on guided self-reflection on issues including ethics, criminal practice, the development of one's professional identify, and practical skills such as legal research. Students must sign up through the Externship Program and be approved to enroll.

**Attributes:** EXP, JD, LDS.
**Corequisite:** CLGL 1305.

CLGL 0305. Externship: Intellectual Property Fieldwork. (1 or 2 Credits) Under the supervision of a mentor field attorney, students observe and assist in the lawyering process. Students must secure their own field placements, approved in advance by the Externship Program. Depending on the field placement, experiences may include research, writing, discovery, and observation. Externs must complete 10 hours of fieldwork a week for 13 weeks during (20 hours a week for 8 weeks during the summer) over their semester. Students must also be enrolled in the seminar appropriate to their placement. The seminar will focus on guided self-reflection on issues including ethics, copyright and trademark law, the development of one's professional identify, and practical skills such as legal research and drafting. Students must sign up through the Externship Program and be approved to enroll.

**Attributes:** EXP, IPIS, JD.

CLGL 0307. Externship: Judicial Fieldwork. (2 Credits) Judicial externs have the opportunity to work for a judge and the judge's staff. Students must secure their own field placements and will gain valuable experience in learning how the judicial process works. During this externship, students will complete various assignments for each judge. Set assignments may include drafting opinions, legal research, watching trials, sitting in on settlement discussions, and observing the selection of a jury. The seminar will focus on guided self-reflection on issues including ethics, judicial practice, the development of one's professional identify, and practical skills such as legal research. Students must sign up through the Externship Program and be approved to enroll.

**Attributes:** EXP, JD, LDS.
**Corequisite:** CLGL 1307.

CLGL 0311. Externship Stein Scholars Out-Of-Town Fieldwork. (2 Credits) Stein Scholars with civil fieldwork placements located outside of the NYC metropolitan area may apply to register for this course. See the Externship Program web page at http://law.fordham.edu/externship.htm for the Course Registration Application. Class meetings: There are no class meetings for this course but students are required to also be registered for the Stein Scholars Civil Externship Seminar (Course ID CLGL1311).

**Attribute:** EXP.

CLGL 0312. Externship: Out-Of-Town Fieldwork. (2 Credits) Students with qualifying fieldwork placements located outside of the NYC metropolitan area may apply to register for this course. Applications are due no later than April 7, 2009. See the Externship Program web page at http://law.fordham.edu/externship.htm for the Course Registration Application. Class meetings: There are no class meetings for this course but students are required to also be registered for an Out of Town Externship Seminar (Course ID CLGL1312).

**Attribute:** EXP.

CLGL 0313. Externship: Intellectual Property Fieldwork. (1 or 2 Credits) Under the supervision of a mentor field attorney, students observe and assist in the lawyering process. Students must secure their own field placements, approved in advance by the Externship Program. Depending on the field placement, experiences may include research, writing, drafting, and observation. Externs must complete 10 hours of fieldwork a week for 13 weeks during (20 hours a week for 8 weeks during the summer) over their semester. CLGL 0321. Mergers and Acquisitions Agreement (LL.M. Only). (2 Credits)
This is an agreement-centered mergers & acquisitions course. It covers mergers & acquisitions law through a study of the provisions of acquisition agreements and customary ancillary documents. This course is intended to build skills for those intending to practice, or simply to understand, mergers & acquisitions transactions. The course will emphasize private company M&A, although public M&A will be discussed. The course is aimed at LLM students and accordingly will cover cross-border transactions. Both group projects and individual assignments are used. The course culminates in a mock acquisition exercise, including in-class negotiations. There will be no final exam. Readings will cover practical drafting issues and M&A issues, will include fewer cases than most courses and will include business school cases as well. There are no prerequisites, as all necessary financial analysis, accounting, fiduciary duty and contracts principles will be covered in the course.
Attributes: LAWB, LAWI, LLM.

CLGL 0322. Arbitration: Domestic and International Perspectives. (2 Credits)
This course presents a review of domestic and international commercial arbitration from both a theoretical and practical perspective. As well as examining the statutory underpinnings of arbitration and related case law, the course focuses on the practical aspects of serving as counsel in business arbitrations, based on Professor Moxley’s over 35 years as an arbitrator in hundreds of cases with the American Arbitration Association and a trainer of counsel and arbitrators for the New York State Bar Association. The course will include as guest lecturers partners from major law firms specializing in international arbitration. <p>Students should emerge from the course confident in their ability to advise clients as to whether to choose litigation or arbitration and able to pick up an arbitration file and know best how to represent their client in the case. The course should also be helpful to students competing in arbitration moot court competitions. <p>Students may choose between a (1) take-home open book exam and (2) a 25-page paper, which can be used to satisfy the writing requirement.
Attributes: ICE, JD, LDE, LIDR, LLM, LWR.

CLGL 0335. Clinic Sem: Mediation. (2 or 3 Credits)
In the fieldwork portion of the course, students mediate cases in Small Claims Court under faculty supervision. The types of disputes which students typically mediate include those between landlords and tenants and employers and employees, as well as claims of defective goods and services. In the seminar, students explore the legal, policy and professional responsibility issues of mediation practice. Primary emphasis is placed on the non-adversarial role of the lawyer-mediator. Students also consider the role of the attorney-advocate in mediation. For more details, select desired clinic of interest at a href="http://www.fordham.edu/info/23920/clinics_directory' target="_blank">http://www.fordham.edu/info/23920/clinics_directory</a>
Attributes: EXP, JD, LDF, LDS, LIDR.

CLGL 0336. Mediation Clinic Casework: Bronx, Manhattan, or Queens. (1 Credit)
Fieldwork consists of mediating cases in Small Claims Court under faculty supervision. Students mediate a variety of disputes including landlord-tenant, employer-employee, and defective goods and services. In addition to the mediation casework, the course requirements include attendance at the weekly seminars, submission of weekly case journals, an oral and written theory presentation and a take home exam or research paper. The seminar will explore the legal, policy and professional responsibility issues of mediation practice by lawyers. Primary emphasis is on the non-adversarial role of the lawyer-mediator. Students also consider the role of the attorney-advocate in mediation. For more details, select desired clinic of interest at a href="http://www.fordham.edu/info/23920/clinics_directory' target="_blank">http://www.fordham.edu/info/23920/clinics_directory</a>
Attributes: EXP, JD, LAI, LDF, LDS, LIDR, LLM.

CLGL 0339. Alternative Dispute Resolution. (2 or 3 Credits)
Traditionally, law students are invited to consider adjudication as the most significant and acceptable, if not the sole means of resolving disputes. Yet, we know that the resulting picture distorts the social reality and the role of the lawyer in contemporary America. Other processes are available, and are increasingly turned to for resolving disputes. Moreover, even in ordinary litigation, most cases are never finally adjudicated but are settled after negotiation between the parties or with the helping nudge from the judge. This course will give the student both a survey and a chance to work through simulations of the variety of dispute resolving processes that are currently employed by lawyers and others in America today. Notes/Miscellaneous: Take-home exam.
Attributes: JD, LDE, LIDR, LLM.

CLGL 0344. Introduction to the Deal. (3 Credits)
This practice-oriented course introduces students to business and legal issues common to commercial transactions, whether a multi-million dollar M&A deal, a license agreement, or a public offering. Among the topics covered are (i) how to draft a term sheet, (ii) how to translate a term sheet into contract provisions, (iii) how to use due diligence to identify business and legal issues, (iv) how to understand and draft provisions with financial language, (v) how to negotiate a business deal, (vi) how to understand and draft opinion letters and (vii) closings. The course is conducted partly through lectures and partly through in-class exercises and in-class role plays that are designed to help students develop some of the skills required to represent clients in commercial transactions effectively. This course can be used to satisfy the skills requirement.
Attributes: BFS, JD.

CLGL 0350. Fundamental Lawyering Skills. (3 Credits)
In the Fundamental Lawyering Skills course, students learn fact analysis, interviewing, counseling, negotiation, case theory and planning. Teaching methodologies include lecture, demonstrations, student role plays and critiques. Students are required to submit written materials in connection with the role plays. This course and Trial Advocacy provide students with a basic understanding of lawyering skills. Fundamental Lawyering Skills is a pre-requisite or co-requisite for all of the live client clinics. Notes/Miscellaneous: Pre-requisite: Civil Procedure.
Attributes: EXP, JD, LAI, LDS.
Prerequisite: CVGL 0101.
CLGL 0358. Clinic Sem: Fed Litigation. (2 or 3 Credits)
Three-credit fieldwork in federal criminal defense of those accused of felonies, as well as in federal civil actions involving civil rights and intellectual property. Two-credit seminar covering topics related to fieldwork is a co-requisite. For more details, select desired clinic of interest at https://www.fordham.edu/info/23685/clinics_directory' target='_blank'>http://www.fordham.edu/info/23685/clinics_directory</a>
Attributes: INLJ, JD, LDF, LDS, LIDR, LLM, PIS.
Prerequisite: CLGL 0350 (may be taken concurrently).
Corequisite: CLGL 0359.

CLGL 0359. Clinic Cswk: Fed Litigation. (3 Credits)
Three-credit fieldwork in federal criminal defense, federal civil defense and intellectual property. Students deal with high stakes matters and are involved in strategy, discovery, brief drafting, deposition taking, oral argument and other court appearances as well as a myriad of other critical lawyering tasks. Two-credit seminar covering topics related to fieldwork is a co-requisite. Fundamental Lawyering Skills is a co-requisite. For more details, select desired clinic of interest at <a href='https://www.fordham.edu/info/23685/clinics_directory' target='_blank'>https://www.fordham.edu/info/23685/clinics_directory</a>
Attributes: INLJ, JD, LDF, LDS, LLM, PIS.
Prerequisites: CLGL 0350 (may be taken concurrently) and TXGL 0348 (may be taken concurrently).
Corequisite: CLGL 0358.

CLGL 0365. Clinic Sem: Family Advocacy. (2 Credits)
Students in the Family Advocacy Clinic represent clients whose children have disabilities. Students advocate for these families in a variety of proceedings including: special education, foster care and adoption benefits and proceedings to obtain services for children with special needs. Cases primarily take students into administrative forums where they are permitted to conduct hearings and argue appeals. Some of those cases also end up in N.Y. State and federal trial and appellate courts. The Clinic is designed to prepare students to become independent, self-motivated practitioners prepared for the demands of practice in all kinds of legal settings. Students also develop particular competence in pro bono and public interest practice. First, students learn the basics of client representation by working directly with their clients, handling all aspects of a client’s case from interviewing, through counseling, discovery and negotiation, to final settlement or litigation. Second, students learn a collaborative, interdisciplinary practice, as they join students in Fordham’s graduate social work program to develop legal and non-legal remedies to solve client problems. The interdisciplinary aspect of the clinic is unique and provides students with the opportunity to expand their litigation and transactional skills through learning how to access and evaluate experts from a variety of disciplines. Third, students learn how to take on policy and legislative issues when client problems can best be resolved by such approaches. Notes/Miscellaneous: Pre-requisite: Fundamental Lawyering Skills. Must co-register also for the Family Advocacy Clinic Seminar. For more details, select desired clinic of interest at <a href='https://www.fordham.edu/info/23685/clinics_directory' target='_blank'>https://www.fordham.edu/info/23685/clinics_directory</a>
Attributes: EXP, INLJ, JD, LDF, LDS, LLM, PIS.
Prerequisite: CLGL 0350 (may be taken concurrently).
Corequisite: CLGL 0365.

CLGL 0370. Arbitration Practice. (2 to 3 Credits)
‘I have expanded the number of credits for this course in order to provide students with more skills development with respect to the drafting of arbitration agreements, distinguishing arbitration from other ADR processes, and conducting arbitration hearings, including the pre-hearing stage. Grades will be based on class participation and a final paper and/or take home examination. The Paper may satisfy the school’s writing requirement. I expect to be assisted in the course by Adjunct Professor Joel Davidson and several outside speakers, including the present and former general counsel of the American Arbitration Association.”.
Attributes: JD, LAWB, LAWI, LDE, LLM.
CLGL 0372. Clinic Sem: Criminal Defense. (2 Credits)
IN THE CRIMINAL DEFENSE CLINIC (CDC), students are out front representing clients in Manhattan Criminal Court. From the outset, CDC students take complete responsibility for the representation of their clients. Under the supervision of faculty members with extensive experience in criminal practice, students interview and counsel clients and investigate their cases - including visiting alleged crime scenes, interviewing witnesses and drafting subpoenas. Students gain experience drafting motions and other legal documents, as well as arguing those motions in court. They develop case theory and strategy and negotiate with Assistant District Attorneys. The CDC also pursues reform-orientated litigation and projects such as civil and administrative proceedings that grow out of the many civil consequences that arise out of the criminal charges our clients face. Another component of our work encompasses the representation of clients convicted of serious offenses seeking parole, affirmative civil rights litigation and habeas litigation on behalf of clients indefinitely imprisoned by the U.S. military at Guantanamo Bay, Cuba. Further, CDC students benefit from interdisciplinary collaboration with a graduate fellow in Forensic Psychology supervised by Dr. Barry Rosenfeld and Social Work graduate students supervised by Kathy Ho, LMSW, LCSW. This partnership permits students to understand and address the social and psychological issues that are so often part of their clients’ cases. For more details, select desired clinic of interest at <a href="http://www.fordham.edu/info/23920/clinics_directory" target="_blank">http://www.fordham.edu/info/23920/clinics_directory</a>

Attributes: INLJ, JD, LDF, LDS, LIDR, LLM, PIS.
Prerequisite: CLGL 0350 (may be taken concurrently).
Corequisite: CLGL 0372.

CLGL 0373. Clinical Casework: Criminal Defense. (1 to 3 Credits)
IN THE CRIMINAL DEFENSE CLINIC (CDC), students are out front representing clients in Manhattan Criminal Court. From the outset, CDC students take complete responsibility for the representation of their clients. Under the supervision of faculty members with extensive experience in criminal practice, students interview and counsel clients and investigate their cases - including visiting alleged crime scenes, interviewing witnesses and drafting subpoenas. This partnership permits students to understand and address the social and psychological issues that are so often part of their clients’ cases. Notes/Miscellaneous: Coregister for Criminal Defense Clinic Sem. Prerequisite: Fundamental Lawyering Skills. Recommended: Criminal Procedure, Professional Responsibility, Trial Advocacy and/or Evidence. For more details, select desired clinic of interest at <a href="http://www.fordham.edu/info/23920/clinics_directory" target="_blank">http://www.fordham.edu/info/23920/clinics_directory</a>

Attributes: INLJ, JD, LDF, LDS, LIDR, LLM, PIS.
Prerequisite: CLGL 0350 (may be taken concurrently).
Corequisite: CLGL 0372.

CLGL 0378. Advanced Client Counseling. (3 Credits)
This three-credit offering offers in-depth exploration of client counseling. Building upon Fundamental Lawyering Skills, students probe the complexities of the decision-making process in client representations. Demonstrations and in-class role plays afford students the opportunity to assess challenges that confront the lawyer as counselor. Drawing upon cutting-edge legal scholarship, this course will elucidate the advantages and limitations of the conventional traditionalist/paternalist and client-centered/client-autonomous counseling modes and will champion the emerging school of “engaged client-centeredness,” a model which represents a reasoned compromise between extremes on the continuum. Through adherence to the experiential learning approach, the class will realistically replicate the practice setting. All course simulations find their roots in actual representations that have been minimally modified to safeguard continuing attorney-client privilege and/or work product doctrine obligations. Upon completion of this seminar, students will possess a more robust understanding of, and appreciation for, an all-too-often underdeveloped skill of transactional and litigation/courtroom practice. Prerequisite: Fundamental Lawyering Skills. This course may be used to satisfy the skills requirement.

Attributes: JD, LAW.
Prerequisites: CLGL 0350 or SKGL 0299.

CLGL 0381. Clinic Seminar: Securities Litigation and Arbitration. (2 Credits)
This clinic allows students to represent clients in securities arbitrations at the Financial Industry Regulatory Authority (FINRA). FINRA was created in July 2007 through the consolidation of National Association of Securities Dealers (NASD) and the member regulation, enforcement and arbitration functions of the New York Stock Exchange (NYSE). Students are given the opportunity to advocate for clients at arbitrations, negotiate with opposing counsel, participate in mediations, prepare witnesses to testify, including expert witnesses, interview prospective clients, analyze stockholder and investment documents, counsel clients, draft legal documents and develop their advocacy skills while deepening their substantive knowledge of securities laws and becoming acquainted with the functioning of the securities industry. For more details, select desired clinic of interest at <a href="http://www.fordham.edu/info/23920/clinics_directory" target="_blank">http://www.fordham.edu/info/23920/clinics_directory</a>

Attributes: BFS, EXP, JD, LAWB, LAWI, LDF, LDS, LLM, PIS.
Prerequisite: CLGL 0350 (may be taken concurrently).
Corequisite: CLGL 0382.
CLGL 0390. Externship: NYC Council Fieldwork. (2 Credits)
Through an externship with the New York City Council, you'll have the opportunity to work directly with the lawyers who serve the City's legislative body. You'll gain valuable experience in government and improve your legal skills, particularly in the areas of research and drafting. Working at the Council, you'll not only conduct legal research, draft legal memoranda and legislation, but also attend Council meetings and hearings, and prepare sections of Committee briefing papers. Most importantly, you'll participate in the legislative and policy decision-making process with Council staff. In the New York City Council Externship Seminar, you'll learn about the City's legislative process, including the roles played by the City Council and the Mayor's Office. You will study the relevant portions of the City Charter and Administrative Code and analyze state and federal preemption doctrines and case law relating to the powers of the Council. Moreover, you will have the opportunity to draft a piece of legislation and raise questions relating to fieldwork conducted on behalf of the Council. Contact the Externship Program to apply.

Attribute: LPI.
Corequisite: CLGL 1390.

CLGL 0391. Clinic Sem: Comm Econ Dev. (2 Credits)
FORDHAM'S COMMUNITY ECONOMIC DEVELOPMENT CLINIC REPRESENTS GROUPS FIGHTING FOR SOCIAL JUSTICE IN LOW-INCOME COMMUNITIES AND LOW-WAGE WORKFORCES. As general counsel, the Clinic helps to sustain effective organizations and build institutions -- childcare centers, health clinics, workers centers, co-ops-- that empower participants while providing desperately needed services and opportunities. It supports local efforts to shape development, limit gentrification and win community benefits agreements. It helps small grassroots groups to incorporate, write bylaws and obtain tax exemption. You will learn basic skills of transactional business lawyering in a nonprofit social justice setting. You take charge of work for nonprofit start-ups and join teams with faculty and outside counsel on more complex projects. You meet with clients and present to their members. You interview, counsel, negotiate, advocate, mediate, facilitate, and organize. You write legal documents, policy papers and community legal educational materials. You learn to collaborate with each other and with clients, community activists, and other lawyers. For more details, select desired clinic of interest at <a href='http://www.fordham.edu/info/23920/clinics_directory' target='_blank'>http://www.fordham.edu/info/23920/clinics_directory</a>
Attributes: INLJ, JD, LLM, PIS.
Prerequisite: CLGL 0350 (may be taken concurrently).
Corequisite: CLGL 0392.

CLGL 0392. Clinic Cswk: Comm Econ Dev. (2 to 3 Credits)
FORDHAM'S COMMUNITY ECONOMIC DEVELOPMENT CLINIC REPRESENTS GROUPS FIGHTING FOR SOCIAL JUSTICE IN LOW-INCOME COMMUNITIES AND LOW-WAGE WORKFORCES. Corequisite: CLGL 0381.

Fordham University
Updated: 07-27-2020
CLGL 0402. Clinical Externship: Government, Civil Litigation Seminar. (2 Credits)
The Government Civil Litigation Externship is conducted in conjunction with the Civil Division of the United States Attorney's Office for the Eastern District of New York. Students will have the opportunity to experience firsthand civil litigation and learn about the pros and cons of public service. The sheer diversity of the Office's work will provide exposure to many of the legally and socially significant issues of our time. Students also will be exposed to the various aspects of litigation, including depositions, settlement negotiations, witness interviews, arbitrations, trials, and appeals. Every semester, some students have the opportunity to argue a motion in court. <p> The seminar is designed to expose students to the day-to-day practical aspects of civil litigation. Students will discuss, among other topics, issues arising in their cases and the strategic and tactical, legal, and ethical considerations that confront government attorneys in their daily practices. In addition, students will develop their lawyering skills through simulations and will draft a complaint, an answer, deposition outlines, and an opening statement. The seminar is separate from, but complementary to, the EDNY fieldwork. <p> Students selected for the program will be required to pass a security background check.
Prerequisite: CLGL 0422 (may be taken concurrently).

CLGL 0419. Trial and Arbitration Advocacy. (3 Credits)
Sections of this course are taught by trial lawyers. The course deals with techniques and strategies in civil and criminal litigation. Students face typical problems from all phases of trial practice with an emphasis on methods of developing facts, including direct examination, cross examination, exhibit introduction, impeachment, opening statements and closing arguments. Video lectures and demonstrations of the above skills are shared with all students enrolled in Trial & Arbitration Advocacy. Students meet once a week with their individual instructor practicing skills and receiving critique, using professional actors as witnesses and performance coaches. The class culminates in a full trial in a real courthouse before a real jury. Evidence is a PRE-requisite for all Trial & Arbitration Advocacy sections. If a student wants to take Evidence as a CO-requisite in the same semester as Trial & Arb. Advocacy, the student must get express permission from Moore Advocacy Center Director Adam Shlahet. <p> Professor Batt's Description<br> In my course each student will perform the assigned exercise each week. Each student's performance is critiqued each week by me and the actors who are assigned to my class. Student questions are addressed after all students have done the exercise. <p> The students must prepare the actor who will be their witness for their examination, unless otherwise instructed. This preparation must be completed before the day of class, which is Wednesday. Both the student and the actor stay in role during this preparation (the student does not tell the actor what to say, but prepares the witness by hearing her version of the events and asking follow up questions). <p> My expectation is that during the course of the semester each student will incorporate into their performances the observations and suggestions from me and the actors as they gain more confidence in their courtroom role as advocates. The Rules of Evidence will be used to support objections made. Each will improve their skills of organization, strategy, communication, public speaking and thinking on their feet. My hope is that, by the end of the semester, each student will feel comfortable and prepared to be an effective advocate for the client, whether in the courtroom or the boardroom.
Attributes: EXP, JD, LAW, LDF.
Prerequisite: EDGL 0202.

CLGL 0422. Clinical Externship: Government, Civil Litigation Fieldwork. (2 Credits)

CLGL 0423. Advanced Trial Advocacy Competition Teams. (2 or 3 Credits)
*exact meetings during the posted times to be announced.
Attributes: JD, LAW.

CLGL 0425. Adv Trial and Arb Advocacy. (2 or 3 Credits)
Students learn advanced techniques (in comparison with the introduction in Trial & Arbitration Advocacy) in direct and cross-examination, argument to the Court and jury, submission of effective trial memoranda, and other skills of the litigator. The emphasis is on student performances in class by the student-advocate's handling of relatively complex evidentiary and tactical problems during trial. This course satisfies the professional skills requirement. Prerequisite: Trial & Arbitration Advocacy.
Attributes: EXP, JD, LAW, LDF.
Prerequisite: EDGL 0202 (may be taken concurrently).

CLGL 0426. Advanced Appelate Advocacy. (2 or 3 Credits)
The Advanced Appellate Advocacy class is designed to refine students’ overall mastery of the art of appellate advocacy. This course supports and supplements the activities of the Moot Court Board in covering all aspects of appellate work, with a particular focus on developing oral advocacy. The substance of the course will be presented through three types of class days. First, at the beginning of every semester, a research librarian from the Fordham Law Library will present a tutorial targeted to address the unique issues arising in different legal areas. This will include identifying and accessing authorities such as recent treatises, as well as helping students to locate and review decisions from courts with specialized experience. This will give the students a foundation for both the written and oral arguments that they will be making. At this first class, the students must also sign up to judge selected rounds of oral arguments, or to present oral arguments later in the semester if they are competitors. The second type of class will encompass the practice of oral arguments using the Mulligan or Wormser problems. The professor will discuss how researching and writing briefs is the foundation for the later oral presentation. Competitors will give their oral arguments with their fellow classmates acting as judges. This will be followed by the professor and the students giving their comments and suggestions on the material. The end of the class will be reserved for the students to work together either as a whole or in groups on particular oral argument skills, such as introductions, conclusions, answering questions directly, roadmapng, or developing policy arguments. The third type of class will require the competition teams to present their oral arguments as practice for the actual competitions. The judges will be those students who signed up at the first class. This will be followed by comments from the professor and the students. Finally, the class will, either as a whole or in breaking up into groups, workshop the competitors’ arguments. <p> Registration is with the permission of the professor and is limited to the Editorial Board, competitors, and competition editors.
Attributes: JD, LAW.
CLGL 0430. Clinic Cswk: Intl Human Rights. (2 or 3 Credits)
The Walter Leitner International Human Rights Clinic aims to train a new generation of human rights lawyers and to inspire results-oriented, practical human rights work throughout the world. The clinic works in partnership with grassroots justice organizations on international human rights projects, including mobile legal aid clinics, legal and policy analysis, public interest lawsuits, submissions before human rights bodies, fact-finding and report writing, and human rights trainings. Students enrolled in the clinic participate in casework and a companion weekly seminar course that provides training in human rights advocacy skills and encourages critical reflection regarding the theory and practice of human rights. For more details, select desired clinic of interest at <a href='http://www.fordham.edu/info/23920/clinics_directory' target='_blank'>http://www.fordham.edu/info/23920/clinics_directory</a>
Attributes: ICS, INLJ, JD, LLM, PIS.
Corequisite: CLGL 0431.

CLGL 0431. International Human Rights Clinic Seminar. (2 Credits)
THROUGH REAL-WORLD HUMAN RIGHTS LAWYERING EXPERIENCES, the Walter Leitner International Human Rights Clinic trains Fordham Law School students to be strategic, reflective, and creative social justice advocates. The Clinic works in partnership with grassroots justice organizations on human rights projects focused on the sexual health and rights of marginalized populations and access to justice. The Clinic employs a range of advocacy methods including legal and policy analysis, human rights trainings, public interest lawsuits, submissions before human rights bodies, and direct legal assistance. For more details, select desired clinic of interest at <a href='http://www.fordham.edu/info/23920/clinics_directory' target='_blank'>http://www.fordham.edu/info/23920/clinics_directory</a>
Attributes: CORC, EXP, ICS, INLJ, JD, LLM, PIS.
Corequisite: CLGL 0430.

CLGL 0449. Mediation and Negotiation Practicum. (2 Credits)
This seminar is designed to provide an overview of negotiation and mediation theory and a forum in which to hone negotiation and mediation skills. The focus of the course will be on learning, practicing, and sharpening negotiation and mediation skills through simulated exercises. Registration is with the permission of the Professors and is limited to members of the Dispute Resolution Society. This seminar supports and supplements the activities of the Dispute Resolution Society in preparing the Vis International Arbitration Moot team in brief writing and oral argument preparation. The fall seminar will start with an overview of international commercial law and arbitration theory and practice, and discuss the representation of clients in this respective process. The seminar focuses on learning, practicing, and sharpening arbitration knowledge and skills through the Vis competition problem. Eight hours of class time in the fall semester will be conducted on an interactive online learning platform, with free access to the platform provided by the professor.
Attributes: JD, LAW, LDE.

CLGL 0459. Advanced Mediation and Negotiation Practicum. (1 or 2 Credits)

CLGL 0510. Clinic Seminar: Policy and Legislation. (1 or 2 Credits)
Students represent and work with community-based organizations as policy advocates. We assess and recommend changes in law, regulations and public policy based on the needs of our clients and our analysis of the law. Our projects are subject to change, but we currently are working with organizations that work on issues concerning environmental justice and child & family rights. Through our seminar and our fieldwork, students will have the opportunity to develop a range of lawyering skills, which may include: interviewing and counseling clients; conducting legal research and analysis; drafting proposed legislation, state and local regulations, legislative memos, and community-oriented educational materials; developing a case theory (i.e., a plan of action) based on the identified community needs; and advocating before and meeting with state and local elected officials, members of appropriate executive departments, community leaders, bar leaders, and others who may have an impact on our clients¿ desired goals. Notes/Miscellaneous: Must coregister for Urban Policy Clinic Fieldwork. Pre- or co-requisite: Civil Procedure; Fundamental Lawyering Skills. For more details, select desired clinic of interest at <a href='http://www.fordham.edu/info/23920/clinics_directory' target='_blank'>http://www.fordham.edu/info/23920/clinics_directory</a>
Attributes: INLJ, JD, LLM, PIS.
Prerequisites: CLGL 0350 (may be taken concurrently) and CVGL 0101 (may be taken concurrently).
Corequisite: CLGL 0520.

CLGL 0512. Clinic Cswk: Legislative and Policy Advocacy. (2 Credits)

CLGL 0520. Clinic Casework: Policy and Legislative. (2 or 3 Credits)

Corequisite: CLGL 0510.
CLGL 0559. Arbitration Practicum. (2 Credits)
The Arbitration Practicum is only open to DRS students and it prepares them for competing in the International VIS arbitration competition in Hong Kong and Vienna. In addition to covering the basics of international arbitration, the course covers the CISG, the United Nations Convention on Contracts for the International Sale of Goods. This will include domestic arbitration but the course is only open to DRS students as it was created specifically to help the competitors.

Attribute: ICS.

CLGL 060. ADVANCED ARBITRATION PRACTICUM. (1 or 2 Credits)
CLGL 0629. Intellectual Property and Information Law (Samuelson-Glushko) Seminar. (2 Credits)
The seminar focuses on lawyering as it relates to the practice of Intellectual Property and Information Law. Topics include challenges in representing individual and corporate clients, trademark applications, patent applications, litigation strategies, and negotiating IP agreements. There is a simulation component to the seminar that goes through common issues IPIL attorneys may face and has four writing assignments. The seminar also devotes time to allow students to share information about their matters and get the perspective of their fellow students on how a problem the student is facing may be solved. For more details, select desired clinic of interest at <a href=https://www.fordham.edu/info/23685/clinics' target='_blank'>https://www.fordham.edu/info/23685/clinics</a>

Attributes: IPIE, JD, LAWT, LDF, LDS, LLM.

Prerequisites: CLGL 0350 and IPGL 0135 or IPGL 0130 or IPGL 0304 or IPGL 0131.

Corequisite: CLGL 0639.

CLGL 0639. Clinical Casework: Samuel Glusko Intellectual Property and Information Law. (2 to 3 Credits)
The Clinic has a wide range of clients seeking assistance, including entrepreneurs, small business owners, authors, artists, musicians, actors, playwrights, designers, inventors, and non-profit organizations. The Clinic assists these clients in a variety of matters that fall into one of five categories: Litigation, Deals, Risk Counseling, and Patent applications and Trademark registrations. • Litigation. Clinic students may represent people in court, usually on the defendant side, but it is possible that we will represent plaintiffs. Students may also represent non-parties in a litigation, most commonly as amicus curiae. The majority of the Clinic's cases are in federal court but the Clinic may also appear in state court to protect a client's privacy. • Deals. Clinic students assist clients in negotiating and drafting agreements that have an IP component such as trademark licenses, copyright assignments, ghostwriting contracts, software developer agreements, and non-disclosure agreements. • Patent applications and Trademark registrations. Students assist clients in all aspects of obtaining federal trademark and patent protection, including counseling on the availability of a mark or patentability of an invention, filing an application, and responding to inquiries or refusals made by the USPTO. • Risk Counseling. In addition to counseling clients as part of the above matters, Clinic matters include advising clients on how to avoid or mitigate risk. Most commonly, this takes the form of counseling clients on the steps to take to protect IP rights through trade secrets laws, what privacy rights clients may have, whether clients are infringing someone else's IP rights, and how fair use may be used to avoid infringing another person's rights. For more details, select desired clinic of interest at <a href=https://www.fordham.edu/info/23685/clinics' target='_blank'>https://www.fordham.edu/info/23685/clinics</a>

Attributes: IPIS, JD, LAWT, LDF, LDS, LLM.

Prerequisites: CLGL 0350 (may be taken concurrently) and IPGL 0135 (may be taken concurrently) or IPGL 0130 (may be taken concurrently) or IPGL 0304 (may be taken concurrently) or IPGL 0131 (may be taken concurrently).

Corequisite: CLGL 0629.

CLGL 0694. Leadership for Lawyers. (1 Credit)
This is a one credit course and will meet approximately eight or nine times during the semester. Lawyers often assume leadership roles, sometimes relatively early in their careers. We will explore the responsibilities and challenges lawyers face in leadership roles across various practice settings including public interest organizations, law firms, government offices and businesses. The course will help students think about, analyze and develop key aspects of effective leadership. Topics will include styles and characteristics of leadership; methods of effective leadership; forms of influence; management of conflicts; elements of effective communication; articulation of vision and leadership of teams. Students will assess their own leadership abilities and style and will engage in exercises, readings, discussions, and reflections to develop their own strengths and build their skills. Students will also interact with lawyers who currently serve in leadership roles. There are no pre-requisites for this seminar nor do you have to have had a leadership role in the past.

Attribute: LLM.

CLGL 0699. Domestic Arbitration Practicum. (2 Credits)
This seminar is designed to provide an overview of arbitration theory, practice and ethics, and a forum in which to hone arbitration skills. The focus of the course will be on learning, practicing, and sharpening arbitration skills through simulated exercises in preparation for arbitration competitions. Registration is limited to members of the Dispute Resolution Society.
CLGL 0712. Clinic Seminar: Democracy and The Constitution. (2 Credits)
The Clinic on Democracy and the Constitution studies and promotes nonpartisan reforms to strengthen democratic institutions in the United States. In the clinic’s fieldwork, students collaboratively (1) engage in legal research, analysis, and writing, (2) conduct fact finding through interviews with experts, such as current and former government officials and scholars, and (3) undertake initiatives to promote the clinic’s work to the public, journalists, and government officials. The seminar focuses on developing the lawyering skills that are essential the clinic’s work, such as collaboration, interviewing, and advocacy. It also provides a platform for discussing the clinic’s projects and furthering understanding of the substantive issues implicated in the clinic’s work.
Corequisite: CLGL 0722.

CLGL 0722. Clinic Casework: Democracy and The Constitution Casework. (3 Credits)
The Clinic on Democracy and the Constitution studies and promotes nonpartisan reforms to strengthen democratic institutions in the United States. In the clinic’s fieldwork, students collaboratively (1) engage in legal research, analysis, and writing, (2) conduct fact finding through interviews with experts, such as current and former government officials and scholars, and (3) undertake initiatives to promote the clinic’s work to the public, journalists, and government officials. The seminar focuses on developing the lawyering skills that are essential to the clinic’s work, such as collaboration, interviewing, and advocacy. It also provides a platform for discussing the clinic’s projects and furthering understanding of the substantive issues implicated in the clinic’s work.

CLGL 0730. Poverty, Tax, and Justice Clinic Casework. (3 Credits)
Students in this experiential offering will have the opportunity to engage with legislators and their staff, legal and policy experts, and others, to craft legislative solutions to provisions found in the NYS Tax Code that disproportionately affect low-income New Yorkers. The classroom instructional component of the clinic will be scheduled at a later date and will employ a Rounds-based pedagogy frequently used in clinical legal education.
Attribute: EXP
Prerequisites: (CVGL 0101 and CLGL 0350).

CLGL 0752. Clinic Casework: Entrepreneurial Law. (2 to 3 Credits)
New for Fall 2017, students will help in the Entrepreneurial Law Clinic’s formation—representing clients, participating in community outreach, and providing services to entrepreneurs via pop up clinics. The clinic assists early stage traditional start-ups and social enterprises with a range of legal issues, including entity formation, structuring internal compensation structure for founders, negotiating investment or loan agreements, as well as drafting shareholder, operating, vendor and/or service agreements.<br>Faculty<br>The course will be taught by Professor Bernice Grant, who is the Senior Director of the Entrepreneurial Law Program and the LSLS, Inc. Supervising Attorney of this clinic.
Attributes: BFS, EXP, LAW, LAWB, LLM.
Prerequisites: CLGL 0350 (may be taken concurrently) and BUGL 0201 (may be taken concurrently).

CLGL 0750. Clinic Seminar: Entrepreneurial Law. (2 Credits)

Prerequisites: CLGL 0350 (may be taken concurrently) and BUGL 0201 (may be taken concurrently).
CLGL 0870. Queens District Attorney Prosecution Clinic Seminar. (2 Credits)

Prosecutors never take a backseat during a case, so we don’t ask our students in the Prosecution Clinic to take one, either. You will be front and center: working with police officers, interviewing victims and witnesses, determining charges, drafting accusatory instruments, and representing the People of the State of New York at arraignment in Queens County. In this recently established clinic, students work in the Queens County District Attorney’s Office, under the aegis of Judge Richard Brown, the District Attorney, and handle their own prosecutorial caseload from inception through trial and sentence. Students are supervised by two of the DA’s most skilled professionals: Fordham Law alum Kevin Duddy ’85, Director of Trial Advocacy, and his Deputy Director, Jennifer Naiburg. During the semester, you will experience the unique role of the prosecutor as both advocate and impartial public servant sworn to pursue justice. In both the courtroom and the classroom, you will take a problem-solving approach to each case, learning firsthand the impact of the criminal justice system on all its stakeholders: the victims, the accused, the witnesses, the police, and the public. Along with your supervising attorneys, you will develop case theory, conduct motion practice and pre-trial hearings, visit crime scenes, negotiate plea agreements, prepare evidence, and bring their cases to trial. For more details, select desired clinic of interest at <a href='http://www.fordham.edu/info/23920/clinics_directory' target='_blank'>http://www.fordham.edu/info/23920/clinics_directory</a>. Attributes: INLJ, JD, LDF, LDS, LIDR, PIS.
Prerequisites: CLGL 0350 (may be taken concurrently).

CLGL 0873. Queens District Attorney Prosecution Clinic Fieldwork. (3 Credits)

Prosecutors never take a backseat during a case, so we don’t ask our students in the Prosecution Clinic to take one, either. You will be front and center: working with police officers, interviewing victims and witnesses, determining charges, drafting accusatory instruments, and representing the People of the State of New York at arraignment in Queens County. Prerequisites: CLGL 0350 (may be taken concurrently).

CLGL 0921. Clinic Sem: Tax. (2 or 3 Credits)

Although students are under the supervision of attorney-professors, you are expected to take primary responsibility for all aspects of their cases. This may include interviewing and counseling clients; gathering and analyzing facts and evidence; conducting legal research; drafting memoranda; preparing pleadings, motions and other court papers, and meeting with the IRS to negotiate a settlement. If settlement efforts fail, the student may have the opportunity to take the case to trial. Students do not need to have extensive experience with tax law to enroll and succeed in this Clinic. Through the seminar and supervision, you will be given the tools necessary to advocate on behalf of your clients. This Clinic provides legal representation only. We do not prepare tax returns, provide bookkeeping or other accounting services. For more details, select desired clinic of interest at <a href='http://www.fordham.edu/info/23920/clinics_directory' target='_blank'>http://www.fordham.edu/info/23920/clinics_directory</a>. Attributes: BFS, JD, LAWB, LAWI, LDF, LDS, LLM, PIS.
Prerequisites: CLGL 0350 (may be taken concurrently) and TXGL 0348 (may be taken concurrently).

CLGL 0923. Clinic Cswk: Federal Tax. (2 to 3 Credits)

Although students are under the supervision of attorney-professors, you are expected to take primary responsibility for all aspects of their cases. This may include interviewing and counseling clients; gathering and analyzing facts and evidence; conducting legal research; drafting memoranda; preparing pleadings, motions and other court papers, and meeting with the IRS to negotiate a settlement. Through the seminar and supervision, you will be given the tools necessary to advocate on behalf of your clients. This Clinic provides legal representation only. We do not prepare tax returns, provide bookkeeping or other accounting services. For more details, select desired clinic of interest at <a href='http://www.fordham.edu/info/23920/clinics_directory' target='_blank'>http://www.fordham.edu/info/23920/clinics_directory</a>. Attributes: BFS, JD, LAWB, LDF, LDS, LLM, PIS.
Prerequisites: CLGL 0350 (may be taken concurrently) and TXGL 0348 (may be taken concurrently).
CLGL 0936. KOREA SUMMER EXTERNSHIP FIELDWORK. (1 to 3 Credits)
CLGL 0937. Ireland Summer Externship Fld. (2 or 3 Credits)
CLGL 0938. Ghana Summer Externship. (2 to 3 Credits)
CLGL 0939. Clinical Fiedwork: Corporate Social Responsibility. (3 Credits)
CLGL 1129. Pro Bono Scholar Clinic Casework. (10 Credits)
CLGL 1130. Pro Bono Scholar Casework. (10 Credits)
CLGL 1303. Externship: Civil, Government, and Non-Profit Seminar. (1 Credit)
Under the supervision of a mentor field attorney, students observe and assist in the lawyering process. Students must secure their own field placements, approved in advance by the Externship Program. Depending on the field placement, experiences may include research, writing, client contact, court appearances, and observation. Externs must complete 10 hours of fieldwork a week for 13 weeks during (20 hours a week for 8 weeks during the summer) over their semester. Students must also be enrolled in the seminar appropriate to their placement. The seminar will focus on guided self-reflection on issues including ethics, public interest and government lawyering, the development of one's professional identify, and practical skills such as legal research. Students must sign up through the Externship Program and be approved to enroll.
Attributes: EXP, JD.
Corequisite: CLGL 0303.

CLGL 1305. Externship: Criminal Justice Seminar. (1 Credit)
Under the supervision of a mentor field attorney, students observe and assist in the lawyering process. Students must secure their own field placements, approved in advance by the Externship Program. Depending on the field placement, experiences may include research, writing, discovery, and observation. Externs must complete 10 hours of fieldwork a week for 13 weeks during (20 hours a week for 8 weeks during the summer) over their semester. Students must also be enrolled in the seminar appropriate to their placement. The seminar will focus on guided self-reflection on issues including ethics, criminal practice, the development of one's professional identify, and practical skills such as legal research. Students must sign up through the Externship Program and be approved to enroll.
Attributes: EXP, JD, LDS.
Corequisite: CLGL 0305.

CLGL 1307. Externship: Judicial Seminar. (1 Credit)
Judicial externs have the opportunity to work for a judge and the judge's staff. Students must secure their own field placements and will gain valuable experience in learning how the judicial process works. During this externship, students will complete various assignments for each judge. Set assignments may include drafting opinions, legal research, watching trials, sitting in on settlement discussions, and observing the selection of a jury. The seminar will focus on guided self-reflection on issues including ethics, judicial practice, the development of one's professional identify, and practical skills such as legal research. Students must sign up through the Externship Program and be approved to enroll.
Attributes: EXP, JD, LDS.
Corequisite: CLGL 0307.

CLGL 1311. Externship: Stein Scholar Seminar. (1 Credit)
In this seminar, Stein Scholars who are participating in criminal justice externship fieldwork placements will explore issues such as: ethical issues in practice; biases in the legal profession; alternatives to litigation in resolving disputes; tools for effective research and writing; and balancing the demands of personal and professional life. Students also must be registered for Clinical Externship: Stein Scholars Criminal Justice Externship Fieldwork (Course ID CLGL0311). Class meetings: Four class meetings, dates TBA.
Attribute: EXP.

CLGL 1312. Externship Stein Scholars Out-Of-Town Seminar. (1 Credit)
Students with qualifying fieldwork placements located outside of the NYC metropolitan area may apply to register for this course. Applications are due no later than April 7, 2009. See the Externship Program web page at http://law.fordham.edu/externship.htm for the Course Registration Application. Class meetings: There are no class meetings for this course but students are required to also be registered for an Out of Town Externship Seminar (Course ID CLGL1312).
Attribute: EXP.

CLGL 1313. Externship: Intellectual Property Seminar. (1 Credit)
CLGL 1321. Clinical Externship: Intellectual Property Seminar. (1 Credit)
Under the supervision of a mentor field attorney, students observe and assist in the lawyering process. Students must secure their own field placements, approved in advance by the Externship Program. Depending on the field placement, experiences may include research, writing, drafting, and observation. Externs must complete 10 hours of fieldwork a week for 13 weeks during (20 hours a week for 8 weeks during the summer) over their semester. Students must also be enrolled in the seminar appropriate to their placement. The seminar will focus on guided self-reflection on issues including ethics, copyright and trademark law, the development of one's professional identify, and practical skills such as legal research and drafting. Students must sign up through the Externship Program and be approved to enroll.
Attribute: IPIS.

CLGL 1390. Externship: NYC Council Seminar. (1 Credit)
Through an externship with the New York City Council, you'll have the opportunity to work directly with the lawyers who serve the City's legislative body. You'll gain valuable experience in government and improve your legal skills, particularly in the areas of research and drafting. Working at the Council, you'll not only conduct legal research, draft legal memoranda and legislation, but also attend Council meetings and hearings, and prepare sections of Committee briefing papers. Most importantly, you'll participate in the legislative and policy decision-making process with Council staff. In the New York City Council Externship Seminar, you'll learn about the City's legislative process, including the roles played by the City Council and the Mayor's Office. You will study the relevant portions of the City Charter and Administrative Code and analyze state and federal preemption doctrines and case law relating to the powers of the Council. Moreover, you will have the opportunity to draft a piece of legislation and raise questions relating to fieldwork conducted on behalf of the Council. Contact the Externship Program to apply.
Attribute: LPI.
Corequisite: CLGL 0390.

CLGL 1936. KOREA SUMMER EXTERNSHIP SEMINAR. (1 Credit)
CLGL 1937. IRELAND SUMMER EXTERN: SEMINAR. (1 Credit)
CLGL 9999. Clinic Casework Room Reservation. (0 Credits)
College at 60 (CASP)

CASP 1100. Religion and Culture. (0 Credits)
Looks at various topics in the intersection of religious beliefs and traditions and broader societal issues.
Attribute: CL60.

CASP 1110. Art of Film. (0 Credits)
Study of film genres, film periods and aesthetics of film making.
Attribute: CL60.

CASP 1111. Film Fridays. (0 Credits)
This course will include film presentations and a discussion/lecture about films and how they illuminate the course themes. Course themes will vary from term to term.

CASP 1120. Creative Writing. (0 Credits)
Workshop in various kinds of creative writing- memoir, drama, short prose and poetry.
Attribute: CL60.

CASP 1130. Studies in Philosophy. (0 Credits)
Examination of different theories and philosophers in various cultural and historical settings.
Attribute: CL60.

CASP 1140. Studies in American Literature. (0 Credits)
Analysis of texts by prominent British authors from various periods and genres.
Attribute: CL60.

CASP 1160. Studies in English Literature. (0 Credits)
Analysis of texts by prominent British authors from various periods and genres.
Attribute: CL60.

CASP 1170. Studies in Irish Literature. (0 Credits)
Analysis of texts by prominent authors from various cultural backgrounds and historical periods.
Attribute: CL60.

CASP 1190. Literary Studies. (0 Credits)
This course will focus on different topics, genres, and authors in English, European, and global literature. The topics will vary from semester to semester.

CASP 1200. Issues in Psychology. (0 Credits)
Topics and issues in psych theory and practice will be explored. Current research, film, and personal narrative will be used.
Attribute: CL60.

CASP 1210. Europe’s Past. (0 Credits)
A look at European history by exploring various periods, events, movements, and figures.
Attribute: CL60.

CASP 1220. America’s Past. (0 Credits)
A look at American history by analyzing important figures, movements, and issues.
Attribute: CL60.

CASP 1230. Issues in Mideast History. (0 Credits)
Each semester, a non-credit course in a new topic in Mideast History will be explored.

CASP 1240. Topics in Economics. (0 Credits)
An exploration of issues, problems, and analyses of important economic concepts, crises, and topics.
Attribute: CL60.

CASP 1250. Topics in History. (0 Credits)
Topics in History.
Attribute: CL60.

CASP 1260. Studies in Social Science. (0 Credits)
Studies in Social Science.
Attribute: CL60.

CASP 1270. Issues in Political Science. (0 Credits)
Students in this course will explore various contemporary issues in political science, law, and society. Topics will vary from semester to semester.

CASP 1300. Topics in Art/Architecture. (0 Credits)
Analysis of prominent artists and their works in architecture, painting, and sculpture.
Attribute: CL60.

CASP 1310. Studies in Art History. (0 Credits)
Studies in Art History.
Attribute: CL60.

CASP 1310. Studies in Music History. (0 Credits)
Examination of important works of classical music in various historical periods and cultures, the artists and their influences.
Attribute: CL60.

CASP 1320. Theatre History. (0 Credits)

CASP 1400. Topics in Science. (0 Credits)
An exploration of topics in current scientific inquiry in biology, chemistry, and physics.
Attribute: CL60.

CASP 1500. Cultural Studies. (0 Credits)

CASP 1510. Classical Studies. (0 Credits)
Commercial Law (COGL)

**COGL 0204. State Financial Services Regulation. (2 Credits)**

Financial services touch the lives of every American, whether it be one’s mortgage, bank account, auto insurer or health insurance company. Since the 18th century, banks and insurance companies have been regulated by government agencies and the states have played a leading role in this regulatory oversight and enforcement. The insurance industry is almost entirely regulated at the state level and the states have exercised commanding roles in banking regulation and enforcement in recent years. Issues of data privacy and the advent of fintech, insurtech and cryptocurrency companies have only made the states’ role even more important. <p> The goal of this course is to prepare students for a career in financial services regulation and enforcement, whether in the private sector or government, and whether the student’s interest is in transactional work or litigation. This course will provide a survey of financial services regulation at the state level. Topics will include the dual banking system and the respective roles of federal and state regulators; the financial crisis, Dodd-Frank, state regulation of mortgage lenders and servicers, and recent de-regulation efforts at the federal level; the role of the states in licensing nonbank companies including fintech companies, cryptocurrency exchanges and payment transmitters; the longstanding state-based system of insurance regulation since McCarron-Ferguson; the Affordable Care Act and the states’ differing views and key role in health insurance regulation; the enforcement of anti-money laundering laws and the Bank Secrecy Act at the state level either alone or in conjunction with federal agencies and state prosecutors; data privacy and cybersecurity regulation at the state level; the states’ focus on consumer protection, including the oversight of student loan servicers, credit reporting agencies and payday lenders. Throughout the course, federalism and preemption principles will be discussed, along with policy choices at the state level based on changing policies at the federal level. <p> This course will be taught by Maria Vullo, who until very recently served as Superintendent of Financial Services for the State of New York. As Superintendent, Ms. Vullo led the most prominent state regulatory agency in the country, with broad jurisdiction, responsible for the supervision and enforcement of laws regarding all New York state-chartered banks, branches of foreign banks, all insurance companies and agents licensed to do business in New York, and non-depository institutions licensed in New York including money transmitters, check cashers and cryptocurrency exchanges. In this role, Ms. Vullo interacted with numerous federal regulators, as well as the insurance and bank commissioners of the other 49 states and U.S. territories. Guest speakers in the field will be invited to speak to the students during certain classes. <p> This course is intended to provide students with concrete knowledge about the complex system of financial services regulation in the United States today, including the evolving roles of the federal and state regulatory systems. It is intended to better prepare students for a career in financial services, in either the private or public sectors, and to provide students with an understanding of the importance of state regulation in broad economic sectors relevant to their careers.

**COGL 0206. Topics in Entrepreneurial Law. (2 or 3 Credits)**

The world continues to become more and more shaped by entrepreneurs who start innovative businesses around new technology, rapidly changing how we live and work. How can lawyers be better trained and prepared to meet the needs of these entrepreneurs? What are the potential issues and solutions facing lawyers who practice Entrepreneurial Law? The legal profession also needs to become more entrepreneurial in identifying the visionary leaders of the future, and becoming their trusted advocates and advisers. This course will focus on case studies, with input from a variety of guest speakers, including entrepreneurs, venture capitalists and lawyers.

**Attribute:** LAWB.

**COGL 0213. Commercial Technology and Intellectual Property Transactions. (2 Credits)**

This course covers intellectual property issues arising as companies grow and commercialize products. The course addresses important intellectual property issues in a company’s growth cycle from start-up to mature entity. Licensing is covered in some depth as the foundation for other intellectual property transactions. Additional topics to be covered include the creation and acquisition of intellectual property, various other IP transactions and the role played by intellectual property in bankruptcy. Although most of the course is general and not industry specific, two classes will focus on some of the issues faced specifically by computer and consumer products businesses. Students will gain practical exposure to the transactions and documents themselves through several exercises in which students will act in real world roles to review, markup and/or draft actual agreements. <p> Prerequisites: There are no prerequisites for the course. <p> There will be a one-hour end-of-the-year examination. The student’s grade for the course will be based primarily on the exercises and final exam, but will also take into account overall class participation.

**Attributes:** IPIE, JD, LAWT, LLM.
COGL 0323. Legal Technology, Artificial Intelligence and Entrepreneurship. (2 Credits)

This course will train the next generation of Chief Innovation Officers: attorneys who design, manage and create novel tech-driven solutions to legal problems. You will gain exposure to the variety of cutting-edge legal technology disrupting the industry and work in teams to design a legal tech solution to a high-impact problem for a hypothetical non-profit client interested in environmental whistleblowing. The main prerequisites for the course are that students bring their imagination, creativity and sense of teamwork. Chief Innovation Officer is among the most coveted legal roles, but also one of the hardest to get because it requires a special, diverse skill set. The legal industry tends towards tradition, not innovation. As an aspiring Chief Innovation Officer, you will have to sharpen key design and business skills that go against the grain of traditional legal education and training. <p> The course will have a (minor) traditional classroom component that involves a survey of available legal technology, related professional ethics issues and entrepreneurial legal trends. Next, you will be introduced to the hypothetical non-profit 'client' and the legal/environmental problem it wants you to solve. The focus of the course will be in learning how to design a legal app. Teams of students will compete in presenting their designs in a shark-tank style finale before a panel of judges that includes entrepreneurs, investors and attorneys. Since the course involves group projects, class attendance is required. No coding or special technological skills are required. There will be no exam, but students will have regular individual assignments related to phases of the design process. <p><b> Class Meeting Dates: </b> DATE LOCATION TIME <br> January 2, 2020, Fordham: room 8-01, 6:00-8:30 pm <br> January 4 at 9:30 am-12:30 pm & 2:00-5:00 pm, January 13 at 6:00-8:00 pm in room 8-01 <br> January 11, class meets at 20 Gramercy Park South 1:00-4:30 pm <p> Attributes: JD, LAWBA, LAWI, LLM, LMCO.
COGL 0402. Comparative Entrepreneurial Law. (2 Credits)
What are the legal challenges of establishing a startup? How does the law support or hinder innovation and the development of new businesses? To what extent do jurisdictional variations in such laws affect the growth of entrepreneurship in those jurisdictions? This course will examine these questions by comparing the laws of the United States and Israel — the two countries with the highest and second highest number of NASDAQ listed companies. During the first part of the course, students will attend classes to develop a comparative perspective to entrepreneurial law, by learning about entrepreneurial law in both countries. Students will also be required to submit reaction papers regarding relevant topics. This will prepare them for site visits during spring break to either Silicon Valley or Tel-Aviv. While there, students will visit companies, law firms, and/or venture capital firms to discuss the course’s topics from both a legal and business perspective. After returning to New York, students will present on a topic relevant to the course that is informed by their site visits (in lieu of a final exam). Students must cover the expense of traveling to the site visits on their own. A total of 20 students may enroll in the course, but students must indicate their preferred site visit location, and no more than 10 students can sign up for each location. To enroll in the course, students should fill out a pre-enrollment form, which is available here at: https://forms.gle/ZX4NsqkieRKQn9jQ6. Students will need to be logged into their Fordham gmail account to complete the form.
Attribute: LLM.

COGL 0602. Antitrust and New Technologies. (2 Credits)
This intensive course will explore the application of antitrust and competition law to high-technology industries, focusing on how the law addresses disruptive innovation. The course will examine cutting-edge topics in the application of antitrust to multi-sided platforms, search neutrality, net neutrality, big data, and the sharing economy. Take-home exam.
Attributes: LAW, LAW, LLM.

COGL 0929. Doing Well by Doing Good: Social Entrepreneurship and the Question of Corporate Purpose. (2 Credits)
Can corporations — and, by extension, those advising them — be both ‘good’ and profitable? That is the question at the core of this seminar. It also leads to other inquiries that lawyers often fail to consider (notwithstanding the significant role corporations play in many lawyers’ practice). For example, why do corporations exist? What purposes do they serve? Are they obligated solely to pursue profit for their shareholders or can they (and should they) take into account broader social issues such as the need to address climate change? What are the legal and practical challenges facing those who seek both to do well by earning profits through traditional corporate forms and to ‘do good’ for society? The course will explore these questions from a variety of perspectives. We will, for example, look at the historical, philosophical and legal roots of corporations as well as the growing tension between, on the one hand, increased focus on corporate sustainability and the growing role of shareholder ‘activists’ on the other. We will also look at a number of current efforts to grapple with these issues, including the rise of ‘impact investing’ and alternative corporate forms such as ‘Benefit Corporations’ (or ‘B-Corps’). In exploring these questions, we will be focused on the issues that arise for lawyers looking to advise companies and boards. The course will feature interactive discussions as well as insights from guest speakers who confront these issues on a daily basis. Students will be required to prepare three short write-ups concerning assigned topics that arise from the weekly discussions as well as a final term paper. Evaluations will be as follows: final paper (60%); write-ups (30%); and class participation (10%).
Attribute: LAW.

Communication and Culture (COMC)

COMC 1101. Communications and Culture: History, Theory, and Methods. (4 Credits)
An introduction to the history, theory and methods of Communication Studies, Media Studies, and Cultural Studies. This serves as the required introductory course for the major in Communication and Culture. It provides students with a basic theoretical foundation for understanding the interdisciplinary traditions of our field, an historical examination of key paradigms and theorists, and an overview of the methodological approaches used by scholars of mediated communication. We will explore the ways in which theory and methodology are inextricably intertwined and how their relationship shapes both inquiry and analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASHS, DISA, DTEM, DTMM.
Prerequisites: COMM 1000 or COMM 1010.

COMC 2111. Theories of Human Communication. (4 Credits)
This course introduces students to the study of human communication through a variety of theories that focus on language, meaning, symbols, performance, gender, race, culture, and political economy, among others. Students develop an awareness of the varied perspectives from which communication has been studied; ethical issues and complexities of human and mediated communication in the 21st century; and how communication concepts and theories help us better understand our lives, relationships, culture, and society. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, CCMS, LING.
COMC 2112. Strategic Communication: Theory and Practice. (4 Credits) 
Introduction to strategic communication for students interested in advertising, public relations, health communications, social advocacy and political campaigns. Presents today's best practices used to research, design, implement and evaluate campaigns. Topics include: impact of the evolution of technology and the digital environment on delivery of campaigns, basic elements of a strategic media plan, ethics and regulation of strategic communications, and role of strategic communications in the process of marketing products, people, ideas, and social causes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: CCMS, NMAC, NMDD.

COMC 2113. Interpersonal Communication. (4 Credits) 
An introduction to the basic tools of behavioral research as applied to the study of interpersonal communication. Topics such as human relationships, communication competence, conflict negotiation, intercultural communication, communication and gender, and mediated interpersonal communication are covered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: CCMS, JOUR.

COMC 2117. Language and Strategic Communication. (4 Credits) 
An examination of how we use words and symbols as tools for thought and guides for action, as well as how the structures of language and symbolic communication relate to the structures of consciousness and culture. The course will require students to analyze of the role of language in understanding our world, constructing reality, and evaluating messages and information. Pragmatic strategies for avoiding miscalculation and misunderstanding, resolving conflict, and improving clarity of communication through awareness of language habits in interpersonal, organizational, and mediated contexts are emphasized. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: CCMS, LING.

COMC 2121. Introduction to Communication and Media Studies. (3 Credits) 
An introduction to the major approaches, theories and perspectives in the study of Communication and the Media. 
Attributes: CCMS, SSCI.

COMC 2159. Communication Technologies and Society. (4 Credits) 
This course surveys the history of mass media, from Gutenberg's invention of the printing press until today. We will focus on the technological aspects of media. However, a key focus of this course will also be on how the development of new tech gained later widespread adoption, how these technologies directly and indirectly affected the contemporaneous socio-cultural environment, as well as their continued effect on society today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: CCMS, DTEM.

COMC 2166. Media Advocacy and Social Marketing. (4 Credits) 
Media advocacy is the strategic use of communication channels for the purpose of social justice and influencing public policy. Social Marketing seeks to develop and integrate marketing concepts with other approaches to influence behaviors that benefit individuals and communities for the greater social good. Guided by ethical principles, social marketing seeks to integrate research, best practice, theory, audience and partnership insight, to inform the delivery of competition sensitive and segmented social change programs that are effective, efficient, equitable and sustainable. This course offers a strategic framework for developing a social media advocacy program, using social and digital media to help shape public debate, mobilize public action and to speak directly to those with influence to help bring about social change. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attribute: CCMS.

COMC 2175. Persuasion and Public Opinion. (4 Credits) 
(Formerly COMM 2701): An examination of the theories and research on persuasion and attitude change, the strategies and techniques used by persuaders and the reception skills needed to be a critical consumer of persuasive messages. Topics such as the psychology of attitude formation and change, interpersonal influence, rhetoric, language and symbol use, culture and persuasion, persuasive campaigns and movements, political communication, advertising and propaganda, the sociology of mass persuasion and the ethics of persuasion are covered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: CCMS, JOUR, SSCI.

COMC 2221. Fashion as Communication: Syntax of Style. (4 Credits) 
(Formerly COMM 2601): This course is designed to teach key communication and cultural studies concepts through the lens of fashion. With the understanding that fashion is both a discourse and an industry, we use a broad range of examples to illustrate key cultural studies and communication studies concepts such as gender, production, media effects and the politics of representation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: ACUP, ADVD, AMST, ASAM, CCUS, FASH, WGSS.

COMC 2223. Comic Books and American Culture. (4 Credits) 
This course charts the historical development of the comic book in America, from the Great Depression of the 1930s to the present day. It will examine the comic book's defining characteristics as a unique visual/narrative medium, and evaluate comic books' value as a vivid historical record of the preoccupations and anxieties of American society. This course will chart the medium's shifting cultural status, from earning widespread public condemnation in the 1950s to its literary rehabilitation as the 'graphic novel' in the 1980s. It will also consider how the commercial demands and economic structures of America's comic-book industry have shaped comics' artistic development and critical reception. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attribute: CCUS.
COMC 2234. Media and the Arts. (4 Credits)
An examination of the arts from cave painting to contemporary, electronic forms. Shifts in the form and style, the purpose and the role of the traditional fine arts will be studied in the technological and cultural contexts in which they occurred. Emphasis will be placed on the co-development of new arts and information technologies in the 20th century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, CMST, URST.

COMC 2236. The Rock Revolution in Music and Media. (4 Credits)
From transistor radios to digital downloads, from AM to FM through the rise of MTV, and from Elvis to the Beatles to Woodstock, this course examines the media’s role in the evolution of rock ‘n’ rock and its impact on our society. We explore the often symbiotic relationship among the music, technology and personalities of an era that still reverberates today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASHS, CCUS.

COMC 2258. Myth and Symbol of American Character. (4 Credits)
A study of the heart of American culture through an examination of the recurring myths and symbols found in journalism, public speeches, social commentary and the popular media. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASHS, CCUS.

COMC 2271. Mediated Communication and Social Theory. (4 Credits)
This course uses primary sources to deepen students’ understanding of the interrelationship between media, culture, and society. One of the main objectives is therefore to build students’ reading and analysis skills by exposing them to difficult theoretical material in an environment designed to help them learn to read this kind of text. Students thereby gain a more nuanced understanding of the intellectual layout of the field by engaging directly with the theorists who have shaped its major debates. Finally, the course makes use of detailed textual analysis to apply these critical thinking skills to media texts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, CCUS, URST.

COMC 2277. Media and Sexuality. (4 Credits)
By all accounts, we have witnessed an explosion of LGBTQ representation in the media over the last decade. This course critically examines the terms of this new visibility, and inquires into the exclusions that accompany the recognition of certain queer and trans subjects. Through the study of media, film and popular culture, we will explore how representations of sex and sexuality are also central to the construction of ideas about race, class, gender, and nation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, WGSS.

COMC 2278. Media, Culture, and Globalization. (4 Credits)
What is the role of the media in shaping our understanding of a globalized, interconnected world and our position within it? This course explores these questions by studying the role of the media in both producing and resisting forms of power, violence and inequality associated with contemporary globalization. In particular, we will examine how the media structures and mediates our relationship to others, and communicates powerful meanings about citizenship, national identity, security, and criminality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, CMST, GLBL, INST, ISIN, LALS, LASS.

COMC 2279. Introduction to Media Industries. (3 Credits)
(Formerly COMM 1011): An overview of the mass media communication industries; examining such issues as the institutional, social and technological histories of the media; the influence of economic factors in shaping content and issues governing regulatory policy.
Attributes: AMST, ASAM, CMST, JOUR, SSCI.

COMC 2277. Mass Communication and Society. (4 Credits)
(Formerly COMM 2610): The class will examine mass communication and society through study of the structure of media, the interaction of individuals with media, the negotiation of culture within mediated contexts, the effects of media, and the interaction of media with institutions and other aspects of society. This course will help students to 1) begin mastering an approach to researching media, 2) build a foundation of knowledge about the ways in which our beliefs, values, and attitudes are shaped by media, and 3) negotiate the complex issues surrounding the collective experience of mass mediated culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, CMST, PLUR, SSCI.

COMC 3114. Effective Speaking. (4 Credits)
(Formerly COMM 2501): A study of principles of effective communication with emphasis on the role of public speaking skills in professional life, the importance of critical thinking to communication and its significance in a democratic political system. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCMS, JOUR.

COMC 3115. Performance for Broadcast Media. (4 Credits)
This course will improve students’ performance skills in broadcast media (as well as give industry insight), whether they are on the path to sports broadcasting, hard news, comedy, the boardroom, or the latest viral web-show or podcast. A different on-air challenge will be presented each week where students will work on—then self-critique—their vocal delivery, body mechanics, and writing style. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCMS, JOUR.
COMC 3157. Media and Civic Action. (4 Credits)
This course focuses on the role of communication technologies, media institutions and participatory audiences in mobilizing social change and civic action. It works from a foundational assumption that media is a central component of democracy and civic life, but one with potential for both liberation and constraint. Grounded in theories of media power, communication networks and political discourse, case studies in the course will explore a variety of questions about the past, present and future of media and social mobilization. The course will provide theoretical, methodological and practical insights into the theory and practice of media and civic action. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: CCMS.

COMC 3171. Orality and Literacy. (4 Credits)
An examination of oral and literate modes of communication and their relationship to culture, consciousness and social organization. Topics include the nature of non literate cultures, oral tradition and mnemonics, the historical development of writing systems and their social and psychological impacts, theories and debates on oral and literate cultures, and mindsets. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ASSC, CCMS, JOUR.

COMC 3172. Principles of Advertising. (4 Credits)
(Formerly COMM 3502): A study of advertising strategies and promotional appeals. Professional guidance in the creation of advertising: the planning, designing and writing of campaigns for all media and for multimedia campaigns with special emphasis on copywriting. Juniors and Seniors only. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ASSC, CCMS, JOUR, NMAC, NMDD.

COMC 3173. Marketing and the Media. (4 Credits)
This course is designed to provide a historical perspective on the critical and evolving role that media has played in the marketing function. Students will become familiar with the powerful role different forms of media have played in the marketing of brands over time and how those roles have been disrupted and transformed by the rise of digital and mobile technologies and platforms. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: CCMS.

COMC 3174. Public Relations. (4 Credits)
(Formerly COMM 3501): Provides knowledge of the basic concepts of public relations and instruction in the use of various media in reaching specific publics. Through lectures, writing assignments, and in-class workshops, students will learn the basic concepts of public relations and the methodology of using various media to reach specific audiences. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: CCMS, FASH, JOUR, PJCR.

Prerequisites: COMM 1000 or COMM 1010.

COMC 3175. Advertising as Communication. (4 Credits)
One of the most valuable resources in our economy is our attention. Advertising is a form of communication designed to capture that attention. What do advertisers know about how to achieve that goal, and what techniques do they use in today's global, digital media environment? This course provides a broad overview of the theory, research and practices associated with advertising as a mode of communication. Themes to be covered include: the history of advertising in the US, the organization and evolution of the ad industry, types of advertising, ethical and regulatory issues, the role of market research and the impact of new media forms on the advertising industry. Students will learn the steps to developing and justifying a creative brief and a media plan, as well as to think critically about advertising texts. This course covers both theory and practice, training students to engage with this form of communication from the perspective of advertising planners, consumers and critics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: CCMS.

COMC 3178. Humor as Communication. (4 Credits)
Each day, most people participate in humorous exchanges. We seek out movies, television programs, YouTube videos, memes, books, and, of course, people that make us laugh. Cross-culturally societies appreciate a good sense of humor. Few would argue that humor is not highly valued. This course will focus on theoretical, empirical, and ethical approaches to humor, with a view to understanding it as a communications tool in a variety of contexts, including relationships, organizations, families, medicine, law, education, intercultural relations, entertainment, and politics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: CCMS.

COMC 3179. Crisis and Reputation Management in PR. (4 Credits)
Through case studies and class assignments, this course will investigate best practices for responding to disruptive and unexpected events which might damage a business brand or threaten an organization's mission. Students will identify and strengthen the skills necessary to deliver key messages into public discussions via traditional and social media channels for the purpose of establishing or maintaining a brand or organization as an authority and industry leader. Students will also learn public relations tactics to deal with crisis scenarios and ongoing reputation building. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ASSC, CCMS, CMST.

Prerequisites: COMM 1000 or COMM 1010.

COMC 3186. Sports Communication. (4 Credits)
(Formerly COMM 3350): A survey of sports communication from analytical and practical perspectives. Written assignments address topics covered, including sports reporting and writing, advertising, and public relations. Pre-Req: COMM 1000 or COMM 1010 or Instructor permission. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, CCMS, JOUR.

Prerequisites: COMM 1000 or COMM 1010.

Mutually Exclusive: COMC 3187.
COMC 3187. Sports Communication in the Field. (4 Credits)
A survey of sports communication from analytical and practical perspectives. As part of the class, students will make visits to sports organizations in the New York area, and so those enrolling should allow travel time before and after the course meeting. There will be three to five field trips during the semester, which students must attend. Assignments will address topics covered, including sports reporting and writing, advertising, and public relations, and may relate to the specific organizations visited. Students may not take this course and COMC 3186, Sports Communication. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, CCMS, JOUR, SJOR.
Mutually Exclusive: COMC 3186.

COMC 3231. Aesthetics and the Media. (4 Credits)
A study of the development of aesthetic and formal issues in the media: representation, narration, and convention. Critical methodological. Reading. Film and television viewings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CCUS.

COMC 3232. Class, Taste, and Mass Culture. (4 Credits)
An examination of cultural hierarchy and conflicting notions regarding the 'ideal' form and content of the symbolic environment. Drawing from various critiques of the mass media, this course explores the ways in which debates about cultural and aesthetic standards reflect socio-economic and political concerns. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASAM, CCUS, COLI, PLUR, URST.

COMC 3233. Promotional Culture. (4 Credits)
Promotional industries like advertising, marketing, and public relations have grown into a nearly ubiquitous presence in our lives. They do much more than sell products, however. These professions influence the ways politicians are elected, activists strive for social change, and individuals perform their identities both in person and online. Through a critical look at the histories, institutions, practices, and ideologies of promotion, this class explores life living in a promotional culture. We will use a historicized understanding of promotion to address contemporary issues such as disinformation, online bots, trolling, citizen journalism, self-branding, and emergent technologies of publicity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CCUS.

COMC 3235. Popular Music as Communication. (4 Credits)
Current issues in popular music studies-mediation, globalization, authenticity, identity, community, etc.- covering a wide range of popular musics in North America. Regular reading and listening assignments. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, CCUS, COLI, URST.

COMC 3237. Gender Images and Media. (4 Credits)
(Formerly COMM 3111): This course introduces students to ways in which ideas about gender develop over time and within different cultural contexts and the practical implications of those ideas. We bring critical thinking and discussion to readings from scholarly research and popular media to explore narratives around gender, including those at the intersection of race, sexual preference and ethnicity, to deepen awareness of and appreciation for multiple perspectives. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, ASSC, CCUS, CMST, COLI, JOUR, WGSS.

COMC 3247. Race, Class, and Gender in Media. (4 Credits)
This class analyzes representations of social class, racial and ethnic identity, and gender and sexuality in media. We begin our work with two assumptions. First, that media both shape and are shaped by social conceptions. Second, that these categories—race, class, and gender—are embodied, that is, they describe different physical bodies that inhabit real, lived environments. From there, students learn to identify central themes and problems in representing differences of race/ethnicity, social class, and sexuality in fiction and nonfiction media. The class will use a mixture of hands-on activities with contemporary media (such as blogging, journaling, and online discussion) plus more traditional readings about theories of representation and embodiment. The course is intended as a learning environment where students are able to do more than simply identify stereotypes. Rather, they intervene in these representations, actively critiquing stereotypes and moving past them towards a reflexive attitude about the relationship between society as it is lived for people of different racial, sexual, and class groups—and the image of those groups as depicted in media. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AFAM, AMST, APPI, ASAM, ASSC, CCUS, CMST, COLI, DISA, HCWL, HUST, LALS, LASS, PJMJ, PJST, PLUR, WGSS.

COMC 3260. Media, Regulation, and the Public Interest. (4 Credits)
This course explores the history and grounding of U.S. telecommunications regulation in the precedence of utilities, emphasizing private control while developing a national infrastructure, as opposed to the European model of media as social agency. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, Celp, JOUR, JPLH.

COMC 3268. Media and National Identity. (4 Credits)
(Formerly COMM 3681): An examination of case studies showing how national identity is inferred and organized by mass media. Questions include: How is nationalism produced by media discourse? How are outsiders portrayed? Who draws the boundaries between inside and outside, and how? Texts will include television, radio, print journalism, music and films. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASAM, ASHS, ASRP, ASSC, CCUS, COLI, GLBL, INST, ISIN, JOUR, LALS, LASS, PJMJ, PJST.
COMC 3272. History and Culture of Advertising. (4 Credits)
An examination of advertising practices. A review of the social and technological history of American advertising beginning with the print media. Social and interpersonal meanings imbedded within the publicity images of both print and television are examined as well as the continuing penetration of advertising and marketing strategies in media culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASAM, CCUS, JOUR, WGSS.

COMC 3310. Ethics and Popular Culture. (4 Credits)
For many people, popular culture – specifically television and film – is their first exposure to complex ethical issues and resulting decision-making processes. Yet, despite the fact that pop culture plays a large part in shaping our moral standpoint, it is often overlooked as a source of academic ethical discourse. This course will examine the relationship between ethics and popular culture throughout the past century: from sideshows and Vaudeville to reality shows and social media. It will look at ethical issues in the entertainment industry and media, how we learn about ethics from pop culture, and how to be an ethical consumer of a variety of media. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, CMST, JOUR.

COMC 3330. Peace, Justice, and the Media. (4 Credits)
(Formerly COMM 3110): This course analyzes the ways in which the media represent the issues of peace and justice. Considering the relevance of peace and justice for democratic practices, the variety of media depictions of such issues will be analyzed. Topics such as environmental and economic justice, poverty and the poor, race and gender, war and peace, and media ethics and values will be covered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASAM, CEP, CMST, HOWL, HUST, JOUR, PJIN, PJMJ, PJST.

COMC 3350. Media Law. (4 Credits)
This course is designed to introduce the communication and media studies major to the basic issues in the field of media law. Examined here are the Constitutional principles underlying the major Supreme Court cases that have established the parameters governing the use of communication technologies in the country. Special focus will be given to the various legal changes posed by new media. Juniors and Seniors only. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, ASHS, ASSC, CMST, JOUR.
Prerequisites: COMM 1000 or COMM 1010.

COMC 3373. Mass Opinion: Measure/Mean. (4 Credits)
A humanistic survey of disciplined viewpoints about the significance of public opinion in political affairs, human cognition, leadership, religious faith, and aesthetic judgments. The complementary and at times conflicting approaches of philosophical history and the sociology of knowledge are principally employed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CMST, JOUR.

COMC 3374. Media Effects. (4 Credits)
What are the effects of mass media on society? This question lies at the heart of mass communications. While many people feel that it is “obvious” that the media have a powerful effect on society, social scientists remain divided on the issue. Reviewing both classic and contemporary literature, we will trace the various models that have been offered as possible explanations for the mechanism of media influence. Juniors and seniors only. Pre-requisite either COMM 1010 or COMM 1011. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, ASSC, CMST, JOUR.

COMC 3375. Children and Media. (4 Credits)
(Formerly COMM 3309): This course explores the controversy surrounding children's media. Topics such as the role of media in socialization and learning, the effects of media content and communication technologies on children's behavior, thought and emotions are examined. The functions that media perform for children, and the efforts to design media specifically for children are considered. Various forms such as television, popular music, film, video games, fairy tales and children's literature are explored. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, ASHS, ASSC, CMST.
Prerequisites: COMM 1000 or COMM 1010.

COMC 3378. Media, Millennials, and Civic Discourse. (4 Credits)
This political communication course will discuss how media and politics are evolving in the digital era and politicians are trying to reach out to Millennial voters. The course will investigate: (1) the Millennial media consumer/voter (2) the space of public (old and new) media, and (3) the character of our political discourse. The course will also focus on the 2016 presidential campaign for lessons in how politics is playing out in journalism and social media today. This course also counts toward Journalism, as it concerns the social construction of the news media. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, CMST, JOUR, JPLH.

COMC 3380. International Communication. (4 Credits)
(Formerly COMM 3106): Comparative study of media systems of different countries. The role of the media in the formation of the concept of nationality. Theories of communication development and the debate around the international flow of information. How the media informs us about other countries and how, through the media, we form our conception of the world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, CMST, GLBL, HOWL, HUST, INST, IPE, ISIN, JOUR, LALS, LASS, NMDD, NMMI.
COMC 4114. Speaking for Change. (4 Credits)
This advanced public speaking course trains students in a variety of long-form presentation scenarios in an effort to develop sophisticated techniques of storytelling and persuasion in a contemporary communication landscape. The course will emphasize rehearsal and performance techniques, storytelling structures, visual aids, speaking without notes, and exploration of societal issues and values of great personal importance. Students’ practice will culminate in a 20-minute public speaking engagement for the Fordham community. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCMS, PJMJ, PJST.
Prerequisites: COMC 3114 or COMM 2501.

COMC 4115. Communication and the Food System. (4 Credits)
This course focuses on the relationships between contemporary food systems, communication and media systems, culture, and social change. It explores the unique contributions that perspectives from communication and media theory can bring to the study of agriculture, food, and society. It also considers how these perspectives can inform actionable practices that aim to bolster long-term nutritional health, economic equity, and global environmental sustainability. The course covers a diverse set of topics, including food and its relationship to human civilization, identity, journalism, marketing, entertainment, animals, the environment, labor, nutrition, technology, policy, ethics, etc. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCMS, CCUS, ENST, ESEL, ESHC.

COMC 4170. Dissent and Disinformation. (4 Credits)
An exploration of the moral and ethical conflict between conscience and convention, principle and group loyalty, received wisdom and freshly perceived evidence, from disparate disciplines which converge on the continuity of ancient religious and political dissent with modern forms of dissent and the social control measures they provoke in modern mass-mediated society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASAM, CCMS, CELP, JOUR, JPLH, SRVL.

COMC 4177. Communication for Social Change. (4 Credits)
This course provides students with a disciplined understanding of the communications industry through the exploration of communications techniques being used today to promote social change. The course blends guest lectures from leaders in their field with practical training in proven communications tactics to prepare students for advanced study or careers in communication. By the end of the course students will come to understand that you can ‘do well while doing good’. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CCMS.

COMC 4211. Media and Modernity. (4 Credits)
Drawing from Marx’s claim that in modernity “all that is solid melts into air”, we will use perspectives from economics, history, sociology, communication and cultural studies to examine the dialectic of creation and destruction at the center of modern life. Modernity is characterized by numerous paradoxes, including the tensions between tradition and change, progress and discontinuity, universalism and atomization, the religious and the secular, and private and public life. How are these paradoxes manifested in our culture? What have we gained as a result of the processes of modernity, and what have we lost? How might we make sense of modernity? How might we engage modern life? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, CCUS, ICC.

COMC 4222. Media and the Environment. (4 Credits)
This course looks at the variety of ways in which media depict the natural world through stories, narratives, and images of nature and the environment in both fiction and non-fiction formats, as well as persuasive forms of communication. In assessing how our relationship with nature is mediated through culture and media, we will look at a broad spectrum of genres from films, documentary, TV, magazines, advertising, environmental journalism and conservation campaigns. We will compare such media images and narratives to key environmental texts on major topics in ecology, fining points of convergence and difference and assessing the consequences. We will examine the ways in which popular formulations of the natural world influence public opinion, human behavior and environmental policy. Using case studies we will examine informational, educational, and persuasive campaigns designed around topics such as transportation, chemical production, food and agricultural practices, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, CCUS, CMST, ENST, ESEL, ESHC, ICC, JOUR, PJEN, PJMJ, PJST.

COMC 4241. Communication, Popular Culture, and Philosophy. (4 Credits)
(Formerly COMM 4711): This course will draw from the fields of Communication and Philosophy, exploring the ways in which the two disciplines complement and inform one another, each offering a route to a deeper understanding of issues of concern to both fields. Our terrain of inquiry will be contemporary popular culture, in the forms of mass, digital and social media. Calling upon a diverse range of scholarship from both intellectual traditions, we will examine the ways in which popular forms of mediated communication can help to engage a mass audience in timeless philosophical issues, as well as inviting us to ponder new kinds of philosophical questions, unique to our time. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, ICC, URST.
COMC 4246. Media, Disability, Futurity. (4 Credits)
This interdisciplinary capstone course explores the theme of futurity through the lenses of media studies, disability studies, and narrative studies. Futurity is not just the stuff of science fiction, but is rather an integrated part of the rhetoric we use when imagining the kind of world we want to build. Media and other digital technologies are often a part of this narrative imagining, and with those tools we often imagine which bodies we might repair, represent, or rebuild. Using a variety of interpretive and analytical methods, students will ask what futures are available to which bodies and why; how bodies are figured as legibly human, and how dominant narratives enable or foreclose the full expression of a range of embodiments. The object of analysis is simultaneously representative, linguistic, narrative or historical: this course argues that any critical examination of embodiment necessarily touches upon not only key cultural studies categories such as race, class, gender and sexuality, but also upon the question of technology’s relationship to the body and its narrative figuring of health and flourishing. Students will finish the course with a nuanced understanding of how contemporary texts both visual and linguistic determine a shared cultural imagining of a better world, and how we might work to craft that image in a more inclusive and socially just way. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, COLI, DISA, ENGL, ICC.

COMC 4248. Multiculturalism. (4 Credits)
African Americans and their Media: Innovators, Agitations, Audiences and Entrepreneurs. This course will examine mass media, outlets owned and targeting African Americans from historic, economic, social and media studies perspectives. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, CCUS, CMST, JOUR, PLUR.

COMC 4266. Communicating Revolution. (4 Credits)
In the past four centuries, there have been attempts at social and political revolution, all of which have been made possible by media. The interdisciplinary course will concentrate primarily on the past revolutions including the American, French, Russia and Cuban Revolutions, asking how did the idea arise that it might be possible to create a new society, with greater justice and equality for all, by overthrowing the old, and what was the role of the media in defining that idea? How has each revolution partially succeeded and partially failed, and what part has the media played in either promoting or opposing it? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, CCUS, JOUR.

COMC 4267. Media and Social Awareness. (4 Credits)
This course examines the relationship between media and social awareness and how different media interact with our social awareness. The course explores the ways we receive and evaluate images, narratives, representations of events, and depictions of peoples and groups. Students investigate the production of media representations across a broad spectrum of outlets, formats, genres, and programming in print, broadcast, and new media. The course also focuses on the roles and functions of media in society and culture, as well as the public’s need for information and knowledge in a 21st century environment of globalization, convergence, and technological and economic change. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, CCUS.

COMC 4279. Media and Popular Culture. (4 Credits)
An exploration of various forms of contemporary popular culture and their meanings in modern life. Theoretical approaches are discussed and various media texts such as film, television, advertising images, popular icons, music and style are analyzed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASAM, CCUS, URST.

COMC 4338. American Political Communication. (4 Credits)
(Formerly COMM 4706): This survey course addresses political communications in the American context. Students will examine the activities of key political actors (elected officials, institutions, organizations, public and the media) and will engage with key works in the field to assess how political actors use mediated public practices to bolster narratives, create consensus, and allocate power and resources. Major topics for consideration include: the public sphere and public opinion; propaganda and public relations; presidential rhetoric; electoral politics and campaigning; journalism, the news, political humor, and public life; research on media and new media effects; meditation of identity politics (age, religion, race, gender, and sexual orientation); and political advocacy, civic engagement, and social movements. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, CMST, JOUR.

COMC 4339. Communication and Media in the Age of Trump. (4 Credits)
The unconventional events of the 2016 presidential campaign and the unprecedented practices, pronouncements and nascent policies of President Trump are expected to have profound effects on the presidency, political campaigning and news media practice for years to come. This course will examine questions and issues related to the Trump presidency. The course will cover such topics as the President’s use of Twitter, his rhetoric, his attacks on the mainstream media, the rise of ‘fake news,’ coverage of Trump, and issues related to celebrity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, ASSC, CMST, JOUR.
COMC 4340. Freedom of Expression. (4 Credits)
The opposing historical trends of authoritarian centralism and libertarian pluralism are traced through a variety of political orders, philosophies, and communication systems. The interplay of technological forms of communication predominant social values is examined and specific cases are subject to evaluative judgments. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASAM, ASHS, ASRP, CEMP, CMST, DTEM, ICC, JOUR, JPLH, LPGP, NMDD, NMMI, PJMJ, PJST.

COMC 4348. Religion, Theology, and New Media. (4 Credits)
(Formerly COMM 4411): An interdisciplinary capstone course, this course examines the historical and theoretical significance of the intersection between communication, technologies and religious communities. Drawing on the disciplinary methods and assumptions of both communication and media studies and theology, the course will ask students to critically and theoretically explore the significance of religion as a cultural phenomenon as well as to take seriously the theological significance of media practices as articulated by religious subjects. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASRS, CEMP, CMST, COMM, DTEM, ICC, JOUR, THEO.

COMC 4360. Communication Ethics and the Public Sphere. (4 Credits)
(Formerly COMM 4004): This course deals with the policy decisions and ethical issues facing society in the telecommunications age. Of special concern are the ethical issues raised by the melding together of heretofore discrete media into vertically integrated, profit oriented, corporations. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, CEMP, CMST, EP4, HCWL, HUST, JETH, JOUR, PJMJ, PJST, URST, VAL.

COMC 4370. Ethical Controversies in 21st Century Media. (4 Credits)
Mass media have long played a significant role not only in the ways society informs and communicates with itself, but also in the manner in which it reproduces its social mores and reality. With the rise of digital and social media, these dynamics are both disrupted and deepened, even as they continue to evolve. Students who plan to pursue careers in the media (professional and academic) will be faced with an unusually challenging array of difficult choices that carry with them potent ethical repercussions. This course explores contemporary ethical debates in media on the levels of theory, institutions, audiences and practices. It strives to equip future media professionals with sensitivity to moral values under challenge as well as the necessary skills in critical thinking and decision-making for navigating their roles and responsibilities in relation to these challenges. For all students, the class also hopes to hone ethical insights as media consumers as well as participating citizens in media-saturated societies.
Attributes: CEMP, CMST, EP4, JETH, JOUR, NMDD, NMDE, VAL.

COMC 4999. Tutorial. (1 to 4 Credits)
Independent research and readings with supervision from a faculty member.

Communication and Media Management (Gabelli Graduate) (CMGB)

CMGB 6550. Advanced Business Communication. (3 Credits)
Communicating effectively is essential to successful management, yet many managers lack an understanding of their own communication skills. This course instructs students on what effective management communication means for teams and leadership styles, including communicating change, managing stakeholders, empowering others, and presenting compelling ideas. Students learn how to provide constructive feedback and how to examine their own communication style, applying theories and concepts via practical means in course activities and assignments.
Attribute: MOE.
Mutually Exclusive: CMGB 7550.

CMGB 7500. Media Systems and Markets. (3 Credits)
Introduces students to all of the key elements that constitute contemporary media systems and to the key stakeholders in—and evolving dynamics of—contemporary media markets. Includes comparative analyses of international media systems and the economic, technological and regulatory parameters under which they operate. Also provides historical, economic and technological perspectives on the evolution of media systems and markets. PREVIOUSLY TITLED: MEDIA & COMMUNICATION INDUSTRIES.
Attribute: ABEB.

CMGB 7525. Cross Cultural Negotiation and Communication. (3 Credits)
Explores how cultural differences and international settings affect business communication and negotiation—key skills for managers who seek to get solutions accepted and implemented. The dimension of culture is used to increase the student-managers' self-awareness and reflection and to build flexibility in their conceptual understandings and skills. Emphasizes specific strategies, styles, and techniques that help the negotiator/communicator.
Attributes: ABGS, ABBB, BLEG.

CMGB 7530. Innovation in Media Business Models. (3 Credits)
This course examines the factors that have contributed to the emergence, institutionalization, and decline of traditional media business models, as well as to exploring, assessing, and critiquing the wide range of new and innovative business models that are emerging in the contemporary media environment. Students will draw upon these analyses to develop new business models or innovative variants of existing business models for discussion and critique.
Attribute: ABEP.

CMGB 7531. Comm Corp Image Responsibility. (3 Credits)
Demonstrates the value of pragmatic public relations activities through basic principles, case studies and guest speakers. Examines how inept communications and resulting public perceptions can create or deepen corporate crises. Stresses criteria for selecting outside counsel, establishing relationships with the media and communicating with employees and stockholders. Also offered as MKGB 7782.
Attributes: ABGS, MEMG.
CMGB 7534. Leadership with PR. (3 Credits)
Examines the use of public relations strategies to replace or augment more traditional communications efforts. Agency publicists and company representatives discuss this trend. Case studies illustrate how techniques such as video press releases, expert spokespeople and inventive news pegs are used as part of an overall communications plan.
Attribute: MEMG.

CMGB 7537. Crisis Communication and Leadership Strategies. (3 Credits)
Every organization faces crises. Yet, how crisis is handled is critical to helping its brand move forward. Students learn theoretical conceptualizations, public relations and crisis management skills to handle real world crises. Students assess how public-relations fits into the strategic management and decision-making of an organization during a crisis situation. Possible remedies for crisis are examined by applying best strategies for specific situations, using both traditional and new media, while also focusing on strategies and approaches for crisis prevention.
Attributes: ABEB, MEMG, MOE.

CMGB 7540. Intensive Sector Analysis: Music Business. (3 Credits)
This course has a rotating focus each semester that it is offered; but in each instance will involve an intensive focus on a single industry sector. Specific sectors that will be the subject of semester-long intensive analysis include the Television Industry, the Music Industry, and the Motion Picture Industry. Students will apply the analytical skills and conceptual understandings developed in other courses in the curriculum to achieving a detailed understanding of the challenges and opportunities facing an individual media sector. Students will also gain a detailed understanding of the history, evolution, economics, and key stakeholder dynamics of these individual industry sectors.
Attribute: MEMG.

CMGB 7541. Applied Project. (3 Credits)
This course will operate as a real-world company working on an engagement for an actual client. Team members will be assigned management responsibility as well as individual deliverables. This applied project is an opportunity for students to get real-world business experience in designing, developing, and delivering an analytical assignment.

CMGB 7550. Leadership Communication. (3 Credits)
MBA FLEX CORE COURSE A leader’s success hinges on the ability to communicate effectively with diverse stakeholders in divergent settings. This applied course introduces students to academic theories that describe, explain, and predict effective and ineffective leadership communication behaviors. Throughout the semester students solicit candid and constructive feedback about their leadership communication strengths and improvement opportunities. Then, they apply practical strategies, validated by academic research, to improve their communication effectiveness as leaders. Previously titled Management Communication.
Mutually Exclusive: CMGB 6550, MMGB 6650.

CMGB 7554. Consumer Adopt of New Med. (3 Credits)
Examines new communications technologies using guest speakers, videotapes and case studies. Surveys cable, video, satellite transmission, digital television, Internet media and other new and emerging forms of information transmission, with particular emphasis on their interaction and impact on society and business. PREVIOUSLY TITLED: NEW MEDIA AND MASS COMMUNICATIONS.
Attribute: ABEB.

CMGB 7556. Law of Trad & New Media. (3 Credits)
Analyzes the legal parameters and constraints on freedom of expression that govern traditional and new communications technologies, focusing on the Internet. Probes the various constitutional, statutory and regulatory protections accorded the Internet and more traditional media, such as print, broadcast and cable, as well as governmental attempts to regulate certain aspects of them. Topics include modern First Amendment interpretation, defamation, privacy, commercial speech, indecency/obscenity, contracts, intellectual property and e-commerce. Also offered as BLGB 7325.
Attributes: ABEB, MEMG.

CMGB 7561. New Media Product Dev Prac I. (3 Credits)
Intended to help students understand the practical application and integration of compelling content and the various formats of modern media in business application. The course includes most forms of video, audio, and social media. Students will develop a media strategy, delivery plan, and create actual media to solve communications challenges for real companies.
Attribute: MEMG.

CMGB 759B. Sports Media & Promotional Comm. (3 Credits)
Sports Media and Promotional Communication examines the mass media industry in relation to the sports field. The sports industry is unique in its economic structure and its consumers – the sports fans. The course focuses on the ‘off-the-field’ industries of television, digital communication, advertising, sponsorship, marketing, and public relations that greatly impact all sports. The course looks at various sports as well as various forms of media and various promotional communication strategies. Students will get an understanding of the industry today, as well as learn about the history of the sports media and the pivotal people who helped shape the field.

CMGB 759L. Comm for Entrepreneurs. (3 Credits)
This advanced course, granted an “Entrepreneurship and Venture Initiation” (ENT) designation, will help you launch your venture. Specifically, this class with help you: (1) Pitch your ideas with clarity and confidence. (2) Sell your ideas to critical stakeholders. (3) Brand yourself and establish your credibility in less than 60 seconds. (4) Spin your ideas so they “stick” in a crowded marketplace. (5) Gain valuable feedback about your ideas, brand, and expertise.
Attribute: ABEP.

CMGB 759O. International Comm & Neg. (3 Credits)
Addresses three broad topics: 1. Culture and Behavior: How culture, and cultural differences, affect human behavior in general and communication in particular. 2. Culture and business communication needed adaptations in correspondence, presentations, and meeting behavior to accommodate cultural differences 3. Culture and Negotiation. How culture becomes a factor in business negotiations, how it changes ‘the game’.

CMGB 759R. Social Media. (3 Credits)
Study and application of social media communication and strategy, including social media platforms and user devices, message distribution, and personal and professional online, social environments. The course examines relationships between the technical affordances of technology and the social norms, and how to understand emerging technologies (and social media that doesn’t exist yet!). Students will also gain practical social media skills: understanding the landscape, learning “best practices,” and using different social media technologies throughout the class to create and propagate content.
Attributes: ABEP, MEMG.
CMGB 759Z. Gaining Global Bus Pers:Galway. (3 Credits)
This course provides students the opportunity to travel to Galway, Ireland and participate in a week-long study program that will focus on global business from an Irish perspective. The objectives of the course include: Understand the business environment in Ireland; Understand the role of multinational versus start-up organizations within Ireland; Identify benefits to investing in Ireland; Practice key communication skills for global business. The course will include academic sessions and industry site visits. Participants of the course will include Executive MBA students, MBA students, eligible MS students, and executive education participants. Please click here for more information. Please contact Francis Petit, Associate Dean at petit@fordham.edu for additional information on registration, logistics and cost. Professor Dr. Meghann L. Drury, Ph.D., M.A., H.Dip.B.S. Assistant Professor, Communication and Media Management.
Attribute: ABIB.

CMGB 75AA. Media Exec Playbook. (3 Credits)
This course will take an in-depth look at the Strategies, Plans, and Programs developed and implemented by Media Industry Executives to help their businesses survive and thrive in an increasingly changing and competitive media industry environment. The course will include case studies, topic-specific projects, and reviews of current industry trends, issues, and opportunities. Media industry executives and subject matter experts will be asked to guest lecture certain classes to provide a practical perspective about how to address and solve industry challenges. The class will look at the business’ audience and marketplace dynamics, content offerings, media distribution and delivery platforms, branding, marketing, business models, and Operations. We will also review how a business’ Mission, Vision, Strategic Plan, Goals, Strategies, Priority Initiatives, Operating Plans, Financials, etc., create a successful business. The course includes lectures, discussion and guest speakers along with current articles and other readings, video materials, and digital sources. Whenever possible, the course draws on Fordham’s unique setting in New York City, the media capital of the world.

CMGB 75AB. The Power of Open Knowledge. (3 Credits)
This is a hybrid course and include active participation in MOOC (Massive Open Online Learning Course). The goal of this course is to prepare business students to the foundations of open knowledge creation, use, dissemination, and evaluation, to collaborate with professionals from other cultures and disciplines, and to work effectively in rapidly changing knowledge environments. It has been designed to help students develop a high level of self-determination in their own learning, which is a critical skill for future professional success.

CMGB 75AC. Organizational Comm & Theater. (3 Credits)
In this course students critically analyze theatrical works about business and leadership issues using through the lens of organizational communication theories. Throughout the semester students analyze a range of theatrical works and performances through readings, guest lectures, and attendance at theatrical events outside of class. Upon completion of the course students will have developed a unique perspective on how theatrical works bring organizational communication concepts and theories to life.

CMGB 75AD. The Storytelling Project. (3 Credits)
In this course students apply narrative theories from multiple disciplines - communication, psychology, literature, neuroscience, and theater - to critically analyze the anatomy of effective and persuasive stories. Investigating historical folklore and contemporary narrative paradigms from the 21st century, students analyze why some stories and forms are more persuasive, inspiring, and mythic than others. Through practice and developmental coaching, students enhance their own repertoire of persuasive storytelling abilities and discover their own authentic and rhetorical voices.

CMGB 75AE. Graduate Study Tour Poland. (3 Credits)
Media and technology industries in Poland and Central Europe Study Tour Course for Graduate Business students Krakow, Poland.

CMGB 75AF. Business and Entertainment. (3 Credits)
This course will give students the opportunity to analyze different entertainment artifacts (television programs, movies, theatrical productions, and written publications) using a curated body of academic organizational communication theories.

CMGB 75AG. Intensive Sector Analysis: TV. (3 Credits)
Television has been one of the cornerstones of media for over 75 years and has become a medium through which we understand and study our culture. From the Moon Landing to "Who Shot JR", to the White Ford Bronco chase, to the 2016 presidential election, television has helped to shape our industrial paradigms, social trends, and culture, and has served as a mirror to society. This class will study the sociocultural issues and effects associated with television by looking at it from various angles - including social, economic, political, and entertainment perspectives - and by reviewing the past, present, and future of television.

CMGB 75AH. Professional Communication. (3 Credits)
This course will prepare you for communicating in the workplace with multiple levels in an organization. We will examine group communication, decision making in organizations, professional presentations, and strategic communication, including issues and solutions for each. This course is appropriate for multiple levels in an organization, and you do not need a background in communication. It will help you better communicate at work whether you are a seasoned communicator or a novice wanting to improve.

CMGB 75AJ. Financial Media. (3 Credits)
Financial Media examines the complex interactions between business, politics, and the press. The course is designed to help students achieve a better understanding of how business content is delivered and retrieved in the current media environment. The course focuses on the dynamics of reporting about companies and business industry leaders who are using the media to deliver critical messages to several stakeholder groups, including investors and consumers. The course provides numerous examples of business or political leader interactions with the media and debates their communication strategy as well as their outcomes.

CMGB 75AK. Persuasive Corporate Communications. (3 Credits)
Business professionals have long known that the ability to influence is a critical business skill. Developing long-term relationships with clients and developing an effective corporate culture is highly valued. Students will critically examine contemporary scholarship from the academic and applied field detailing effective and ineffective practices for persuading stakeholders at various levels. Students will examine how different communication channels can impact the degree to which an audience is persuaded. The course will focus on internal and external organizational communication.
Attribute: MOE.
CMGB 75AL. Investor Relations. (3 Credits)
A corporate Investor Relations program formulates and communicates the financial performance and strategic direction of diversified corporations to the global investment community. Investor Relations professionals are well versed in accounting, compliance, finance, governance, marketing and communications. They collaborate with senior management and the Board of Directors to convey and interpret corporate matters to the public. This course will teach students the skills and competencies required to become a corporate Investor Relations professional. The course utilizes a course textbook, case studies, investor relations guest speakers and participation in investor relations events.

CMGB 75AM. Sponsorship. (3 Credits)
Total global sponsorship spending is now an estimated $60 billion annually with most major companies employing sponsorship as a way to achieve a variety of brand goals. This course focuses on the unique advantages of sponsorship as a form of marketing communication. Students will understand how and why sponsors choose certain properties, how properties prospect, recruit, and retain sponsors, the unique opportunities for brand exposure and brand recall, the brand image opportunities created through a brand association, and the importance of product category exclusivity. Special attention will be placed on sponsorship activation and the development of a flexible, customizable sponsorship to fulfill specific brand goals. The course will also focus on evaluation and measurement in determining the effectiveness of the sponsorship.

CMGB 75AN. Digital Media Sales Technologies and Strategies. (3 Credits)
This course will provide a thorough understanding of the technologies underpinning digital media sales and advertising technology (Adtech) and the strategies by which publishers maximize monetization. Students will learn about the full life cycle of digital advertising and all the different technologies an ad impression funnels. The course will cover the different types of ad capabilities and monetization strategies that are available on all existing types of digital content, such as websites, apps, social platforms, and OTT. Students will be challenged to synthesize all aspects of ad tech and provide a critical analysis toward potential monetization strategies and the upcoming industry predictions.

CMGB 7811. Media Management Internship. (1 to 3 Credits)
CMGB 8999. Independent Study. (3 Credits)

Communication and Media Management (Gabelli Undergraduate) (CMBU)

CMBU 2666. Business Communications: GSB Integrated Core Only. (1.5 Credits)
This course offers a chance to improve basic competency in written and verbal business communication skills. The ability to communicate well is crucial to career success. Corporate cultures, international communications, conversational strategies, timed writing, interviewing, problem solving, business style are discussed.

Prerequisite: MKBU 3225.

CMBU 3810. Applied Business Communications. (3 Credits)
The emerging professionals’ Institute for Applied Business Communication will promote the related skills that matter most in the professional workplace. Communications strategies reviewed will follow a pedagogy designed to empower participants through the use of simulated business experience.

Attribute: SOIN.

CMBU 4411. ST: Comm for Entrepreneurs. (3 Credits)
Successful entrepreneurs are effective communicators. This advanced course will help students launch their ventures by demonstrating effective communication skills. Specifically, this class will help students:
(1) pitch their ideas with greater clarity and confidence;
(2) sell their ideas to critical stakeholders; 
(3) brand themselves and establish their credibility;
(4) spin their ideas so they stick on a crowded marketplace; and
(5) gain valuable feedback about their ideas, brand and perceived expertise.

Attribute: ENT.

CMBU 4412. ST: Understanding Audiences/Users. (3 Credits)
Understanding Audiences and Users examines how media audiences/users of digital media are measured, what we know about audience behavior and effects, and related ethical and policy questions. The course covers the challenges and techniques of measuring audience and user behaviors, including how this has changed and is still changing. Measurement systems studied include those used for “mass” media such as television, as well as digital and mobile media. It also explores what we know about how people use, and are affected by, various media. The class also tackles the regulatory and ethical questions that surround audience and user measurement, including questions of privacy, trust, and consent.

Attributes: CCMS, CMST, COMC.
CMBU 4413. Digital Media & Promo Comm. (3 Credits)
Digital Media and Promotional Communication focuses on how companies, organizations, and individuals are using digital media to communicate and connect with all of their various stakeholder groups, including consumers. As the media environment changes with new technological capabilities to distribute and retrieve messages, companies promotional communication strategies must adapt as well. This course seeks to understand this media environment and apply it to the decision-making involved in a promotional communication context in terms of both message content development and message placement. Students will analyze digital media campaigns that companies have conducted in terms of their promotional communication brand goals. They will also develop their own digital media promotional communication campaigns. This course is examined through theoretical and practical means applied to current events and people affecting the world today.
Attributes: NMAC, NMDD.

CMBU 4414. Global Perspectives. (3 Credits)
Global Perspectives for International Careers is a general introduction to international business practices and expectations. Students are introduced to international communications, law, and treaty agreements. Students will learn from case studies the cultural, historical, and financial dynamics within an international business environment. This course includes site visits within the financial and banking industry and also relevant social and cultural events.

CMBU 4420. ST: Entrep Comm & Neg. (3 Credits)
This course is designed to develop practical communication and negotiation skills for entrepreneurs. Key areas of instruction include: deal-making; personal selling and reputation building through business plan presentation; and use of communication and negotiation to develop effective social networks. Complementing theory with practice, the class will consist of hands-on stimulations and exercises as well as readings and materials from textbooks, practitioner journals, and case studies.
Attribute: ENT.

CMBU 4440. ST: Theatre in Business. (3 Credits)
This course is a highly practical application of theatre skills that support and develop innovative and entrepreneurial business thinking and practice. Experiential and accelerated learning techniques that include storytelling, improvisation, advanced presentation skills, play texts and performance that are used to develop: decision making, problem solving, risk taking and advanced leadership communication.

CMBU 4443. ST: Personal Leadership. (3 Credits)

CMBU 4445. ST: Global Media Business. (3 Credits)
This course examines the profound changes in the current media landscape. Through the business lens students will learn, discuss and evaluate forces affecting media business. In particular this class will cover how media are created, distributed and exhibited in the new digital world, to give students an insider’s perspective how global media business operate.

CMBU 4453. Social Media. (3 Credits)
Social Media examines social media innovations and the disruptive force they have on traditional, established business, as well as how companies across various industries are handling these “new rules”. A key goal of the course is to understand social media through case studies, projects and using social media. In this course students will learn how social media works; why social media matters to business; and how to successfully use social media in a professional capacity.
Attributes: ENT, JOUR, JSME, NMAC, NMDD.

CMBU 4454. Digital Media Sales Technologies and Strategies. (3 Credits)
This course will provide students with a thorough understanding of the technologies underpinning digital media sales and advertising technology (ad tech) and the strategies by which publishers maximize monetization. Students will learn about the full life cycle of digital advertising and all the different technologies an ad impression funnels. The course will cover the different types of ad capabilities and monetization strategies that are available on all existing types of digital content, such as websites, apps, social platforms, and OTT. Students will be challenged to synthesize all aspects of ad tech and provide a critical analysis of potential monetization strategies and industry predictions.

CMBU 4455. Communicating Corporate Image Responsibility. (3 Credits)
This course demonstrates the value of pragmatic public relations activities through basic principles, case studies, and guest speakers. Students examine how inept communications and resulting public perceptions can create or deepen corporate crises. The course stresses criteria for selecting outside counsel, establishing relationships with the media, and communicating with employees and stockholders.

CMBU 4456. ST: Global Corporate Communication. (3 Credits)
The ability to influence is a critical skill for business professionals in any industry, including consulting. This course focuses on corporate communication, including both internal and external communication and includes sessions with faculty and industry professionals. We will first define corporate communication and persuasion to better understand how organizations develop long-term relationships with clients, as well as internal and external stakeholders. We will discuss how to assess corporate communication, as well as various modes of effective corporate communication. Students will demonstrate their ability to assess stakeholders and audit an organization's communications. They will also gain experience in developing communication plans.

CMBU 4458. ST: Introduction to Public Relations. (3 Credits)
Strategic and tactical approaches to public relations as a business and as a business/management tool. Emphasis on planning and executing public relations programs and activities including relations with the news media and other external communications as well as internal/organizational communication. (This course is cross registered with MKBU 4458-Intro to Public Relations)
Prerequisite: MKBU 3225.
Corequisite: ACBU 2223.

CMBU 4470. ST: Business of Media and Entertainment. (3 Credits)
An introduction to the substantive business operations and media economics issues in the publishing, broadcasting, recorded music, new media and film industries. A required project links the course to the student's specific business discipline.

CMBU 4471. ST: Business of New Media. (3 Credits)
An introduction to New Media industries covering matters of economics, technology and regulation; convergence in media and entertainment industries as well as social and cultural consequences. A required research paper or project links the course to the student's specific business discipline.
Attributes: DTEM, ENT, NMAC, NMAT, NMDD, NMMI.
COMM 4472. Persuasive Communication. (3 Credits)
This course provides students with insights into the process of influencing attitudes and behavior, with opportunities to hone their own persuasion skills. The latest research findings are applied to practical business situations. The ability to persuade is prized in corporate America. In the role of a manager, influence has replaced authority as the preferred means to lead. This course also prepares students for the many career paths in which persuasion is the key skill required, such as in media and corporate sales.

COMM 4474. ST: Exploration of Business Through Media. (3 Credits)
This course uses documentary films as texts to stimulate discussions of contemporary issues in Business Communications and Media Management. The effects of media depictions of businesses and corporations, and how corporations respond to the challenges presented by these media depictions and the role of 'social responsibility' in contemporary corporate culture as depicted by media will be discussed. 
Attribute: ENT.

COMM 4477. ST: Cross Cultural Negotiation. (3 Credits)
This course exposes students to the legal, ethical, and practical challenges of negotiating globally. It develops negotiation skill sets and enhances appreciation of the impacts of cultural difference and international institutional settings on business negotiations. Case-based simulations offer the opportunity to refine in practice the concepts learned in readings and films. Students will emerge from the course better prepared to work in multi-cultural teams and business settings.

COMM 4488. ST: Business of Sports Media. (3 Credits)
This course will offer students the opportunity to develop a broader understanding of the multiple playing fields within the sports industry via in-depth study of leading media coverage primarily through the SportsBusiness Journal and the SportsBusiness Daily. 
Attributes: JOUR, SJOR.

COMM 4995. Internship Group. (0 Credits)

COMM 4998. Summer Internship. (0 to 6 Credits)

COMM 4999. Independent Study. (1 to 6 Credits)

Communication and Media Studies (COMM)

COMM 0010. Observer Ed Board. (0 Credits)

COMM 1000. Fundamentals of Communication and Media Studies. (3 Credits)
This course provides students with an introduction to the fundamental approaches, theories and perspectives essential for an understanding of mediated communication, the industries that make it possible. Throughout the term we will explore many ways in which our symbolic environment both reflects and shapes life in the 21st century, from interpersonal to international relations, and everything in between.
Attributes: FRSS, SSCI.
Mutually Exclusive: COMM 1010, COMM 1010.

COMM 1010. Introduction to Communication and Media Studies. (3 Credits)
An introduction to the major approaches, theories and perspectives in the study of Communication and the Media.
Attributes: FRSS, SSCI.
Mutually Exclusive: COMM 1000.

COMM 1098. Internship. (1 Credit)
COMM 1999. Tutorial. (1 Credit)
Independent research and readings with supervision from a faculty member.

COMM 2098. Internship. (2 Credits)
Supervised placement for students interested in work experience.

COMM 2999. Tutorial. (2 Credits)
Independent research and readings with supervision from a faculty member.

COMM 3098. Internship. (3 Credits)
Supervised placement for students interested in work experience.

COMM 3999. Tutorial. (3 Credits)
Independent research and readings with supervision from a faculty member.

COMM 4000. Communication and Media Studies Honors Seminar. (4 Credits)
An invitation-only course for the top students in the majors of the Department of Communication and Media Studies. The course topic will rotate every year, as will the instructor. Offered at both campuses. Counts as an elective towards any CMS major. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCMS, CCUS, CMST, COMC, DTEM, FITV, JOUR.

COMM 4098. Internship. (4 Credits)
Supervised placement for students interested in work experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COMM 4701. Internship Seminar. (4 Credits)
Juniors and Seniors only. Intern duty and seminar meetings during which students analyze their work experience in terms of the mass media as a whole. Written projects and selected readings geared to each student's internship will be assigned. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CMST, COMC, DTEM, FITV, JOUR.

COMM 4801. Internship Experience I. (2 Credits)
Weekly intern duty and regular meetings with a faculty adviser during which students extend classroom experience into the real world. Written projects and readings relating to the internship are assigned. Seniors only.

COMM 4901. Internship Experience II. (2 Credits)
Weekly intern duty and regular meetings with a faculty adviser during which students extend classroom experience into the real world. Written Projects and readings relating to the internship are assigned. Seniors only.

COMM 4999. Tutorial. (1 to 4 Credits)
Independent research and readings with supervision from a faculty member.

COMM MTNC. Maintenance-PCOM. (0 Credits)
Communications Law (CMGL)

CMGL 0204. Communication Skills Boot Camp. (1 Credit)
Building your career requires building relationships. Building relationships requires solid, effective communication skills. In this course, you will hone your ability to listen well to the needs of others, craft clear messages, tell stories that support your argument, present information with impact, lead meetings effectively, and brainstorm creative solutions. You will increase your awareness of your innate Personal Communication Style, and will learn and practice the five attributes of innovative thinkers. This course involves interactive exercises, including video recordings of role play scenarios. There is no paper or final exam. As in life, 100% of the grade is based on participation.
Attributes: EXP, LAW, LLM.

CMGL 0299. Internet-Based Crimes. (2 Credits)
This course will examine unique aspects of computer or “cyber” crime. It will survey federal statutes pertaining to computer and internet-related crimes and their application – both domestically and internationally – such as identity theft, hacking and economic espionage, online threats and harassment, child pornography and enticement, and human trafficking. The course will also cover practical aspects of computer crime investigation and current computer forensic examination capabilities. Finally, the course will explore sentencing issues, and first amendment and fourth amendment issues that arise in this context.
Attributes: CORC, CRCP, IPIE, LAWI, LAWT.

CMGL 0320. First Amendment and the Evolution of Media. (2 Credits)
The media are more complex, varied and pervasive – for better and worse – than they have ever been. This seminar focuses on the First Amendment protection for speech and the press, and its role in the evolution of media. Class readings include both seminal 20th century First Amendment decisions and important recent cases. By writing short papers and participating in class discussion, students learn how to analyze First Amendment questions that arise in the rapidly changing media landscape. For example, can the government impose a prior restraint on speech? Should any form of media have different or stronger First Amendment rights than any other? To what extent does the First Amendment protect speech that is deemed dangerous or threatening? What about false speech? Do the owners of media platforms have the exclusive right to control their content, or do users of the platforms have a right to make their speech heard? How do courts address the tension between First Amendment rights and privacy rights? Questions like these have influenced each form of media, from print, broadcast radio and television, to cable TV, the Internet and social media. They will be asked with equal or greater urgency as new media continue to develop.
Attributes: INLJ, IPIE, JD, LAWT, LLM.

CMGL 0341. Information Privacy Law. (2 to 4 Credits)
This interdisciplinary course is about us, our data, and the myriad ways in which websites, the government, and even our friends pose threats to our privacy. We will touch on the development of tort, contract, statutory, and constitutional law, and we will address several questions throughout the class, including: How, if at all, can we protect information known to some others? How has technology changed our relationships with each other and with the government? Can traditional privacy rules and laws accommodate today’s needs? We will begin by discussing theories of privacy to which we will refer throughout the entire course. Then, we will discuss issues of privacy and disclosure by the media and by other private citizens. We will then turn to privacy and law enforcement and discuss issues related to police surveillance, abuse of power, safety, and the Fourth Amendment. Then we take up questions of consumer privacy, data aggregation, notice and choice, predictive algorithms and artificial intelligence, and the ‘black box’ of data analytics. Assessment will be based on class participation, in class activities, and a take home exam.
Attributes: CORC, CRCP, IPIF, JD, LAWT, LLM.

CMGL 0368. Mass Media Law. (2 to 4 Credits)
A study of the scope of First Amendment protection of a free press and the current regulatory framework of the mass media. Specific topics include defamation, privacy, prior restraints, reporters' privileges, access to governmental information, the free press/ fair trial conflict, access to the media, regulation of broadcast and cable television, and commercial speech and advertising.
Attributes: IPIE, JD, LAWT, LLM.

CMGL 0399. Information Law Survey. (3 to 4 Credits)
Digital communication technologies make it easier than ever to distribute information. The survey course in Information Law addresses the way in which law, legal institutions, and private actors control the flow of information. The course will take up these themes in the areas of intellectual property, free speech, open government, search, informational privacy, cloud storage, cybersecurity, and communications.
Attributes: CORC, CRCP, IPIF, JD, LAWT, LLM.

CMGL 0929. Comparative Personal Data and Privacy Law. (1 Credit)
Course will have a Take-home Exam.
Attributes: CORC, LLM.

Comparative Literature (COLI)

COLI 1220. Poetry and Poetics. (3 Credits)
The goal of this course is to extend the student's reading experience by demonstrating the interconnection between literature and culture in its widest sense. Students will also learn the techniques of poetry and close reading.

COLI 1230. History and the Novel. (3 Credits)
Not a history of the novel, this course invites students to view the novel and history not as separate fields of study but as mutually informing ways of representing the world. To this end, it will examine representative novels and historical analyses that deliberately cross boundaries presumed to define literature and history.

COLI 1413. Fiction and Human Rights. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
COLI 1800. Internship. (1 Credit)

COLI 2000. Texts and Contexts. (3 Credits)
An introduction to the literary analysis of texts and the cultural and historical contexts within which they are produced and read. Significant class time will be devoted to critical writing and to speaking about literature. Each section of Texts and Contexts will have a focus developed by the individual instructor and expressed in its subtitle. This course fulfills the Core requirements for the second Eloquentia Perfecta seminar.
Attributes: ENGL, EP2, TC.
Prerequisites: ENGL 1102 or ENGL 1100 or HPRH 1001.

COLI 2800. Major Enrichment Internship. (4 Credits)
Supervised course in which a student’s major-relevant internship is combined with regular meetings with a professor, with the aim of producing a research paper about some aspect of the institution with which the student is interning. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 2999. Tutorial. (2 Credits)

COLI 3000. Literary Theories. (4 Credits)
This course introduces students to debates in literary and critical theory. The goal of the course is to reflect on reading strategies, textual practices, and language itself. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ENGL.

COLI 3003. Intercultural Theory. (4 Credits)
In this course, we will explore the ‘contact zone’ as a theoretical concept and a site of encounters, conflicts, and negotiations. In her book ‘Imperial Eyes: Travel Writing and Transculturation’ (1992), Mary Louise Pratt describes the contact zone as ‘the space in which peoples geographically and historically separated come into contact with each other and establish ongoing relations, usually involving conditions of coercion, radical inequality, and intractable conflict.’ Like Pratt, the contact zones we study will not only stress ideas of coexistence and interaction but also insist on ‘asymmetrical relations of power.’ Over the course of the semester, we will focus in particular on the following themes: home/displacement, temporality, personhood/community, translingualism/transculturation/translation, and recycling/adaptation/appropriation/imitation. In this course, we will also envision the classroom as a multilingual, multicultural, and multidisciplinary contact zone that fosters creative responses through a series of activities and collaborative projects. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MLL.

COLI 3010. Politics and Poetry in the Middle Ages: The Rise of Vernacular Culture in the Mediterranean. (4 Credits)
This course analyzes the development of vernacular culture and literature in the Mediterranean during the Middle Ages. Students will explore the political, historical, and linguistic context within which vernacular languages and cultures emerged between the 11th and 13th centuries. Following Dante’s On Vernacular language—the first linguistic and poetic “map” of the Middle Ages—students will retrace the interrelations linking the Italian vernacular culture to the other traditions within the “romance” domain in the Mediterranean. With the imperial court of Frederick II in Sicily, the Pope in Rome, and the most powerful centers of trade and finance in Florence and other Italian city-states, the Italian peninsula provides a special standing point for the analysis of the relationship between poetry and power in different political contexts: the court of the emperor Frederick II and the powerful communal republics in center and northern Italy will be the focus of the course. Among the texts, authors, and movements included are: Provencal and Italian trobadours; the “Sicilian School” and the encyclopedic culture at the court of the emperor Frederick II (poetry, law, philosophy, medicine, astronomy, translations); religious literature and the Tuscan School of poetry (S. Francis, Jacopone da Todi, Guittone d’Arezzo); and the “New Sweet Style” (Guido Guinizzelli, Guido Cavalcanti, Dante Alighieri). Fulfils the Advanced Literature requirement of the core and satisfies the requirement of Minor and Major in Italian. Cross-listed with MVST and MLL. Taught in English with coursework in Italian for credit in Italian. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ITAL, MLL, MVLI, MVST.

COLI 3031. Medieval Monsters. (4 Credits)
St. Augustine once wrote that the word ‘monster’ derived from the Latin word ‘monstro,’ to show, implying that monstrous beings were meant to reflect divine creativity. Over time, this word for unusual beings has taken on a more sinister flavor, even within the Middle Ages. This course will explore the medieval taste for the exotic, from ferocious giants and dog-headed men to the peace-loving sciapod. In this course we will examine the discourse of monstrosity as a complex critical lens through which premodern writers asked important questions of race, religion, civic virtue, and human morality. In our study, we will read selections from Pliny, Augustine, and others before moving through a range of medieval texts, including the Beowulf manuscript, medieval romances, and Mandeville’s account. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENGL, ENHD, ENRJ, MVLI, MVST.
COLI 3102. Notre Dame de Paris: The Cathedral in Art, Literature, Culture, & History. (4 Credits)
This course examines the cultural importance of Paris’s great gothic cathedral, Notre Dame de Paris. We will examine the cathedral through history, with a focus on its creation and significance for the Middle Ages and on its future after the devastating fire of 2019. We will read some of the medieval French literature that illuminates its stained glass windows and sculpture. Reference will also be made to some of the other great cathedrals of 12th- and 13th-century France, especially Notre Dame de Chartres. Our study of Notre Dame de Paris will include its use through history, from the Revolution and Napoleon to its presence in contemporary film and literature. In French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRME.
Prerequisite: FREN 2600.

COLI 3112. Italian Neorealist Cinema. (4 Credits)
This course will examine the different narrative styles and themes characterizing Italian cinema in the 1940s and 1950s and its relation to the social and political situation of post-war Italy. We will also review the critical debate on the definition and chronology of Neo-realism and the differences between neo-realist cinematic and literary experiences. Screenings will include classics by Visconti, Rossellini, DeSica and DeSantis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ITAL.

COLI 3119. Contemporary Middle East Film and Literature. (4 Credits)
Examines contemporary Middle-Eastern and North African film and literature, considering postcolonial films and literature as efforts to forge complex new identities in the context of a newly re-mapped region. Particular focus on representations of gender and Islam. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, MEST.

COLI 3122. The Eternal Feminine in Literature and Film. (4 Credits)
In this course, we will study the myth of the Eternal Feminine, understood as a source of mystery, fear and fascination bringing many myths of women together. Deeply rooted in our collective imaginary, this complex representation will be analyzed throughout a selection of literary works written from the end of the 18th century (when Goethe uses the expression for the first time) and films that will allow us to discuss the adaptation of the classical texts on screen; the creation and spreading myth through literature, opera, and cinema; and the impact of the feminist critic of the myth in contemporary representations of women. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

COLI 3123. Surviving the Barbarians in Early Medieval Britain. (4 Credits)
This course explores the literature of ancient and early medieval Britain from the age of the Roman Empire to the time of ‘Beowulf’. It considers the contact and conflict between long-resident populations like the Britons and Picts and invaders like the Romans and the Saxons—groups who would be subjected to their own invasions later. How did certain groups come to view others as ‘barbarians,’ and what is it like to grapple with that label? This course will introduce students to the changing material culture of Britain and to several postcolonial perspectives on the medieval evidence. Readings will be translated from Latin, Old and Middle Welsh, Old English, and Old Norse. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENGL, ENHD, ENRJ, MVLI, MVST.

COLI 3135. Irish and British High Medieval Literature: Connections and Comparisons. (4 Credits)
This course covers the literature of the period 1000 to 1330 in England, Wales, Ireland, and Northern France in the context of spiritual reform, artistic innovation, political consolidation, and cultural exchange. Readings will include selections from all the major genres of high medieval literature: Arthurian romance and other courtly fictions, history and saga, the outrageous lives and afterlives of the saints, and lyric poetry in English as well as translated from Latin, Welsh, Irish, and French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENGL, ENHD, MVLI, MVST.

COLI 3137. World Cinema Masterpieces. (4 Credits)
World Cinema Masterpieces provides a close analysis of style, narrative, structure and visual texture in selected masterworks of major European, Asian, and American directors. Directors under consideration include: Renoir, Carne, Lang, Welles, Ophuls, Hitchcock, Bresson, Kurosawa, Ray, Bergman, Rossellini, Fellini, Truffaut, Tarkovsky, Kieslowski, Fassbinder and Altman Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASAM, ENGL, INST, ISEU, ISIN.

COLI 3143. World Cinema Masterpieces 1960-1980. (4 Credits)
World Cinema Masterpieces, 1960-1980 explores major works of the French New Wave, expressionism, surrealism, epic, and New German cinema—all produced during a twenty year period of extraordinary diversity and experiment. Among the European, North American and Asian directors we will consider are: Truffaut, Rohmer, Trakovsky, Bunuel, Antonioni, Teshigahara, Bergman, Kurbrick, Fassbinder and Malik. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASAM, INST, ISEU, ISIN.
Prerequisites: ENGL 1004 or ENGL 2000 or CLAS 2000 or COLI 2000 or HPLC 1201 or HPRH 1001 or HPRH 1051 or HPRH 2001 or HPRH 2051 or MLAL 2000.
COLI 3145. Medieval Love in Comparison: Christian, Jewish, and Muslim Perspectives. (4 Credits)
The concept of romantic love preoccupies contemporary society and art, as it has done for hundreds of years. Ideas of romantic love have their roots in the literature and ideas of medieval Muslims, Jews, and Christians, who were themselves responding to even earlier ideas about love and sex. In this class, we will ask: What were the discourses of love among Christians, Jews, and Muslims in the Middle Ages, and how do they impinge on our understanding of love in the present? Readings will include selections from classical poetry, the Bible, and medieval poetry in English or translated from Latin, Occitan, Arabic, Hebrew, and French. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENGL, GLBL, JWST, MVLI, MVST.

COLI 3146. Science and Magic in Medieval Literature. (4 Credits)
This course considers the entanglements of language, literature, and knowledge about the natural world during the Middle Ages. We will look at medieval practices of what we would come to call natural and biological science, consider medieval understandings of nature’s ‘occult’ power, and explore medieval literature about spells, wonders, witches, and demons. By the course’s end, students will better understand the connections between language, culture, and scientific facts, and they will have learned about the long history of magic in the Middle Ages. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENGL, ENHD, MVLI, MVST.

COLI 3200. Machiavelli’s Utopia. (4 Credits)
In this course we will analyze The Prince as well as Machiavelli’s creative work (e.g., his theatrical piece The Mandrake Root and his short story Belfagor). By adopting an interdisciplinary approach for the examination of both the historical and the artistic context in which Machiavelli lived, we will address the question of how and why The Prince was misinterpreted by Italian and European intellectuals and humanists of Machiavelli’s time, leading to a misperception of many of the text’s core ideas in an historical moment in which Europe was steadily transforming itself into a domain of absolutism (we will read Reginald Pole, Innocent Gentillet, Erasmus, Montaigne, among others). We will retrieve the original cultural context in which Machiavelli wrote: a climate of strong limitation of political creativity and liberty, which lead Machiavelli to compose The Prince (1513 ca.) inspired by an utopian desire for a new leader who could reconcile all the contradictions of Italy. Course taught in English. Coursework in Italian for credit in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ITAL, ITRE.

COLI 3202. Ariosto to Galileo: The Invention of Modernity in Renaissance Italy. (4 Credits)
Ariosto and Galileo represent two chronological ends of a revolutionary intellectual period in the Italian Renaissance culture. Between the years 1516 (date of the first edition of Ariosto’s Orlando Furioso) and 1610 (date of edition of Galileo’s Sidereus Nuncius), Italian civilization contributed significantly to the reshaping of a new idea of reality. The course is dedicated to the study of this particular period in which masterpieces such as the Furioso, Torquato Tasso’s pastoral poem Aminta, and his epic poem Jerusalem Delivered, as well as Galileo’s works (Sidereus Nuncius, Copernican Letters, Dialogue Concerning the Two Chief World Systems) become the founding texts of a new realism that questioned and distrusted appearances and, by doing so, prepared the intellectual background where Galileo could develop his new scientific method and discover intellectual models useful for his innovative comprehension of the natural world (with strong implications about the separation of theology and science). Recent scholarship insists on the deep influence that literary humanism had on Galileo’s mind who, no surprise, was a reader, a writer of literature and also a literary critic (for example he wrote about Ariosto and also an incomplete commentary on Tasso’s Jerusalem). The course is therefore dedicated to the study of the relationship of literature to the History of Science with close reading of the above mentioned works and also following an interdisciplinary approach devoted to the exploration of the artistic civilization around Ariosto, Tasso, and Galileo. Taught in English with coursework in Italian for credit in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

COLI 3210. The Adolescent as Hero. (4 Credits)
Study of literary works and films dealing with adolescence and coming of age. Authors may include Balzac, Gide, Goethe, Mann, Musil, Proust and Rimbaud. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3211. Evil in Literature. (4 Credits)
Evil as perceived in literature from the late 18th century to the end of the twentieth. Authors may include Balzac, Baudelaire, Bronte, Genet, Laclos and Wilde. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3215. The War Novel. (4 Credits)
The course focuses on how the 20th century war novel translates the experience of war into fiction (World War I and II, and the Vietnam War). Readings may include Hemingway, Remarque, Celine, Claude Simon, Tim O’Brien. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3216. Lost Illusions. (4 Credits)
The shift in Western Civilization from the idea of inevitable progress to the more modern mode of uncertainty will be studied through selected literary texts and films. Authors may include Boll, Celine, Duras, Flaubert, Fontane, Hemingway, and Musil. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
COLI 3359. Asian Diasporic Literatures. (4 Credits)
This course will introduce students to some key works of Asian diasporic literature, as well as to some crucial debates in Asian American studies. Some matters we may consider include the origins of the Asian American movement; the transnationalism debates; the intersections of race, gender, and sexuality; and the emergence of an Asian American avant garde. Authors may include Maxine Hong Kingston, Chang-rae Lee, Li-Young Lee, Ha Jin, Young-Jean Lee, Jon Hau, Tan Lin, and others. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LAHA, LALS.

COLI 3364. Novels of Ideas: 19th Century. (4 Credits)
An intensive study of four major novels from the second half of the nineteenth century: Melville's Moby Dick, Tolstoy's Anna Karenina, Dostoevsky's The Brothers Karamazov, and Hardy's Jude the Obscure. In exploring the ideological texture of these works, the course will consider the influence of such seminal figures as Schopenhauer, Marx, Darwin, Nietzsche, Zola, and Frazer. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENGL, OCST.
Mutually Exclusive: ENGL 3364.

COLI 3365. Novels of Ideas: High Modernism. (4 Credits)
Drawing on works of philosophy, psychology, aesthetics and literary theory, the course will develop close, contextualized readings of five Modernist masterpieces, all published with a twenty year span: Proust's Swann's Way (1913), Lawrence's Women in Love (1920), Svevo's Confessions of Zeno (1923), Mann's The Magic Mountain (1924), and Faulkner's Light In August (1932). The class will require approximately 2,700 pages of reading—about 200 pages per week. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, ISEU.

COLI 3382. Modern Jewish Writing. (4 Credits)
From the nineteenth century to the recent past, this course uses literary study to explore the Jewish encounter with modernity in Europe and Russia. Through readings in fiction and poetry, the course explores literary responses to emigration to the U/S/ and elsewhere, the impact of the Shoah, the establishment of the State of Israel, and the current Israeli-Palestinian conflict. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENGL, INST, ISEU, JWST.

COLI 3404. Language and Literature in the Age of Revolution. (4 Credits)
This course will introduce students to the history of the Spanish civil war (1936-39) as a broad introduction to 20th century history and culture, beginning with a brief intro to the history of the civil war. Students explore how the war has been represented in media (film, poetry, novel, photography, poster art, journalism, letter and memoir). A brief theoretical intro highlights the concept of history as a text subject to interpretation, while also questioning the relationship between governments and the histories they chose as representative. By studying varied representations of the war, students learn about the many different wars fought- over ideology, class, land, religion, military supremacy, and national history. A research project at the Abraham Lincoln Brigade Archives requires students to analyze the relationship between history and representation in texts from the war. Students analyze reactions of artists and writers to the Spanish civil war through a multinational, multidisciplinary approach to understand the relationship between art and politics in 20th century culture. Authors and artists include Luis Bunuel, Ernest Hemingway, Robert Capa, Pablo Picasso, George Orwell, Langston Hughes, Cesar Vallejo, Pablo Neruda, and Ken Loach. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LAHA, LALS.

COLI 3423. Modern European Drama. (4 Credits)
A survey of the rise of modernist drama in the work of such playwrights as Buchner, Ibsen, Strindberg, Chekhov, Shaw, Pirandello, Brecht, Synge, Lorca, Genet, Ionesco, and Beckett. The course will frame close readings of about fourteen plays, tracing the 19th century and early 20th century intellectual influences and exploring a variety of contemporary theoretical perspectives. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, ASLT, LAHA, LALS, SPAN.
Prerequisite: SPAN 2500.

COLI 3424. Modern European Drama. (4 Credits)
In this course we will study British Fiction, Non-fiction and poetry from the late eighteenth to the mid-nineteenth centuries. As a counterpoint to this examination of traditional romantic literature, we will pursue traits of romanticism beyond the usual region and places, and search out their permutations in a variety of media, cultures, and historical conditions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Updated: 07-27-2020
COLI 3426. Romantic Encounters. (4 Credits)
This course considers a wide array of fiction and non-fiction from the Romantic period that concerns themes of cultural and national difference, exploration, and tourism. Drawing from British, French, and German traditions, we will look at how authors discussed the pleasures, dangers, and scandals of travel. Through poems, novels, guidebooks, periodical essays, exploration narratives, and travel journals, the course asks why journeying – whether actual or imaginary – is so central to the Romantic identity and how it mediates the relationship between self and other. Students will emerge with an understanding of the connection between the idea of foreign and the role of the writer in the Romantic period and will be introduced to theories of gender, representation, and discourse analysis. Authors will likely include Charles Baudelaire, Novalis, Percy Shelley, Mary Wollstonecraft, Mary Shelley, Ann Radcliffe, Mungo Park, and James Cook. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3431. From Realism to Modernism. (4 Credits)
A study of the 19th and early 20th century novel with particular attention to the development of the genre in the context of issues of representation and narration. Works by Balzac, E. Bronte, Dostoyevsky, Eliot, Flaubert, James, Joyce, Proust. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3434. The Avant-Gardes: Europe and Latin America. (4 Credits)
An in-depth introduction to the various collective literary and artistic movements that prevailed in 1920s and 1930s Europe, Spanish-America, and Brazil. We will read poems, manifestoes, chronicles, essays and short stories by the likes of Breton, Picabia, Marinetti, Carrington, Borges, Girondo, Huidobro, Mario and Oswald de Andrade. Course material will also draw from the visual arts, especially painting, photography, and film (Dali, Magritte, Bunuel, Rivera, Xu Solar, Amaral). This course will delve into the cultural and political implications of the avant-gardes in a transatlantic context, with particular emphasis on a comparative exploration of notions of center and periphery, imitations and parody, art and politics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: GLBL, LAHA, LALS.

COLI 3438. American Modernism. (4 Credits)
This course introduces forms of literary experimentation associated with the modernist movement, including authors such as F. Scott Fitzgerald, Ernest Hemingway, William Faulkner, Gertrude Stein, Nella Larsen, Jean Toomer, and others. We'll examine such contexts as the Harlem Renaissance, American writers in Paris, southern agrarianism, and others, as a way of grasping modernism's fascination with difficulty. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ALC, AMST, ASLT, ENGL.

COLI 3450. The City in Literature and Art. (4 Credits)
The structures, spaces, people, and life patterns of cities in the imagination of writers and visual artists from the end of the nineteenth century to the present. We will focus on Berlin, Paris, and New York, using the work of Walter Benjamin as a stimulus to thinking about our own relationship to the urban environment. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AMST, ASAM, ASLT, ENGL, INST, ISEU, ISIN, URST.

COLI 3451. The City in Literature. (4 Credits)
A study of urban life through the close reading of fiction, poetry and drama, focusing mainly on New York, but also London, Paris, and Cairo. Discussion of films and photographs will also play a part in the course. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: URST.

COLI 3455. Literature, Ecstasy, and Popular Culture. (4 Credits)
In this course, we will examine the extent to which the experience and representation of ecstasy may be seen to create, reflect, counteract or otherwise impinge upon traditions and trajectories of historical and contemporary popular cultures. Framed by Wordsworth's Lyric Ballads, our comparative study will include texts in various media from Plato to Almodovar. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3461. From Realism to Modernism. (4 Credits)
A study of the 19th and early 20th century novel with particular attention to the development of the genre in the context of issues of representation and narration. Works by Balzac, E. Bronte, Dostoyevsky, Eliot, Flaubert, James, Joyce, Proust. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3462. Sympathy and Sensibilité. (4 Credits)
A study of these concepts in French and British texts (novels, plays, essays, medical treatises, etc.) in the 18th century. Authors will include: Crebillon fils, Diderot, Mackenzie, Marivaux, Smith, Sterne, Swift, among others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3463. Diderot. (4 Credits)
From generative and scientific speculations on the body and life and the encyclopedic organization of all knowledge, to visual and theatrical tableaux and the deployment of dissonant narrative strategies, Diderot's literary, aesthetic, and scientific work make him one of the most important and interesting writers of the eighteenth century and force us to rethink the understanding of the body, the novel, the play, and the work of art in the eighteenth century and beyond. Diderot has also informed some of the most innovative texts in contemporary theory, philosophy, and art. In this seminar we will examine multiple works from Diderot's interdisciplinary corpus to gain intimate knowledge of his poetics and of his unique articulation of key Enlightenment issues in the discourses of science, aesthetics, music, and fiction. Works can be read in English or French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3464. Medicine and Literature in Ancient Regime. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
COLI 3466. Discovering French Cinema. (4 Credits)
What is French Cinema? Why is cinema regarded first and foremost as an art form in France? In this course, you will learn how to appreciate the language of cinema, understand how mise en scène, sound, and editing work together in crafting in front of our eyes a world that will absorb us for a couple of hours. You will also journey through over a century of film production, from Méliès’s early ‘trick films’ to the animation boom of the 2000s, from 1930s poetic realism to the social realism of the 1990s, from Cocteau’s and Franju’s fantastic cinema to Besson’s blockbuster films. We will see how these films can help us understand better why cinema has remained so important to French cultural identity and how French cinema has defined the way audiences abroad see France and French society. Readings introducing you to key film theoretical concepts will accompany the films discussed throughout the semester. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, FITV, INST, ISEU.

COLI 3471. Luigi Pirandello in Context: The Subject and Its Masks. (4 Credits)
A study of the narrative, theatre and theoretical essays of Luigi Pirandello (1867-1936; Nobel Prize 1934) in the context of the literary, cultural, and social developments in early 20th-century Italy and Europe. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ENGL.

COLI 3476. Conflict and Violence in Francophone African Cinemas. (4 Credits)
The development of film industries across Africa has been inextricably tied with colonial history. We will focus here on the cinematic production of former French colonies, from Algeria, Morocco and Tunisia in North Africa to sub-Saharan countries, including Senegal, Burkina Faso, and Tchad. Often trained in Western film schools, African and North African filmmakers started making films in the 1950s and 1960s, a time also marked by repeated struggles for independence from colonial domination. There is no single way to look at such a diverse and extraordinarily rich corpus. We will look more specifically at how different filmmakers have addressed, performed and questioned the notions of conflict and violence, both physical and psychological, literal and symbolic, at different time periods and in different regional contexts. Ousmane Sembène, Abderraahmane Sissako, Mahamat Saleh Haroun, Nabil Ayouch, Sarah Maldoror will be among the filmmakers included in our discussions. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, GLBL, INST, ISAF, ISME.

COLI 3480. Francophone Caribbean Literature. (4 Credits)
This course examines a variety of literary, historical, cultural and linguistic aspects of the francophone Caribbean between 1791 (the beginning of the Haitian Revolution) and today. Topics include articulations of political sovereignty in colonial and post-colonial contexts, francophone Caribbean literary movements, alternative narratives provided by Afro-diasporic voices, and Caribbean feminisms. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, COLI, FRAN, FRMO, GLBL, IPE.
Prerequisite: FREN 2600.

COLI 3500. Advanced Literary Theory. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ENGL.

Prerequisites: COLI 3000 or ENGL 3045.

COLI 3519. Writing and Rewriting Seduction. (4 Credits)
This class examines the theme of seduction and its relation to writing in European literature pre-1789. Writers include among others: Heloise and Abelard, Boccaccio, Marguerite de Navarre, Marvell, Castiglione, Lafayette, Casanova, Bastide, Crebillon fils, Lacos, and Sade in addition to critical works by Baudrillard, Paglia, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3522. Strange Memories, Strange Desires. (4 Credits)
The course will use the image of the strange to make less familiar our concept of the Americas as a whole an coherent. Readings will span across the continents, valuing what we could describe as unsettling, weird, and bizarre. This concept of the ‘strange’ will be considered alongside themes of historical memory and desire in various novels. Short stories by: Hawthorne, Poe, and James. Authors may include: Faulkner, Bowles, Rulfo, Sandra Cisneros, Junot Diaz, Puig, Borges, Pynchon, and Garcia Marquez. The course will be divided into thematic sections as follows: Strange Lands; Strange Love; Strange Worlds; and The Memory of Sex. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AMST, ASLT, ENGL, LAHA, LALS.

COLI 3530. Trauma Memory Narrative. (4 Credits)
‘Trauma, Memory, and Interrupted Narrative’ considers what it means to live and write in the aftermath of trauma. Topics will include personal (rape, abuse, incest, violence, Aids) as well as historical traumas (the Holocaust, genocide, war). Authors might include Freud, Caruth, Laub, Felman, Phelan, Tausig, Sontag, Erikson. Literature by Morrison, Duras, Kincaid, Didion, etc. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Comparative Literature (COLI)

COLI 3531. Unhappy Families. (4 Credits)
Unhappy Families: Trauma, Secrecy, and Testimony. Secrets can hold families together or tear them apart. In recent years, American culture has become increasingly fixated on representations of secrecy in families, specifically those concealing psychological trauma. Contemporary literature, film, theatre, and the visual arts have become fearless in their exploration of the internecine warfare within the familial construct. Though alcoholism, adultery, and revolt against patriarchy have marked much of 20th century cultural output, these newer portrayals shatter the paradigm and reveal previously taboo fragments. Thus, things that were once off limits are now fair game, such as dysfunctional communication and alienation, inappropriate sexualization, longing and nihilism, suicide and murder. Reading texts on the literature of and about psychological trauma, various narrative strategies will be analyzed with an eye to identifying connections between theory, fiction, and memoir. The three major objectives will be to familiarize students with theories of trauma, apply these theories to the analysis of selected works both fictive and real, and finally, to consider the ways in which family trauma is repressed or concealed, remembered, revealed, dramatized, framed, and staged. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASLT.

COLI 3535. Building the Ideal City: Ethics and Economics Foundations of Realizable Utopias. (4 Credits)
This course introduces students to the investigation of the role that economic concepts such as profit, work, utility, and exchange play in defining the ideal city as a realizable political project. Students will explore ethical and economic concepts and their interrelation in the debate on the best form of State and government that developed from antiquity to modern American utopian communities. This course includes texts from various sources - philosophical, theological, juridical, and literary. Through these readings, students will learn how theoretical and practical ideas on the best form of society developed in time and still influence modern political thought. The course also focuses on the impact of the socioeconomic doctrines of the Catholic Church in shaping the idea of a possible, realizable, ideal city. Among the texts and authors included are Plato, St. Augustine, Thomas Aquinas, Dante, Boccaccio, Thomas More, Leon Battista Alberti, Tommaso Campanella, Francis Bacon. Taught in English with coursework in Italian for credit in Italian. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, APPP, ASHS, ASRP, INST, ISIN, ITAL, ITMO, MVPH, MVST.

COLI 3553. 21st Century Romantics. (4 Credits)
In this course, contemporary (i.e., 20/21st century) romantic lyric, prose, and film will be examined in historical context, and compared with traditional (i.e., 18/19th century) romantic texts. We will explore the evolution of the term ‘romantic’ within popular culture. The making of lyrical icons, or the popular romanticization of the author/artist figure, will be a chief theme throughout the course. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ARAB, COLI, INST, ISME, MEST, PJRC, PJST.

COLI 3575. Painting the Empire: Understanding the Spanish Empire Through Art and Literature. (4 Credits)
The Golden Age of Spanish art and literature (known as “el Siglo de Oro”) coincided with the configuration of Spain as a global empire after the rise of the Habsburg dynasty to the Spanish throne (from around 1550 to around 1650). This course proposes a study of the main social, political and cultural conflicts that formed that empire from a multidisciplinary perspective that combines the works of the empire’s most famous painters (El Greco, Diego Velázquez, José de Ribera, among others) with the works of its most representative writers (Lope de Vega, Miguel de Cervantes, María de Zayas, among others); topics such as the symbolic construction and shaping of space, gender, national identity or social and religious relationships will be approached through a combination of visual and textual representations. The course will also take great advantage of the important collections of Spanish Renaissance and Baroque painting held at several New York institutions such as the Metropolitan Museum of Art of the Hispanic Society of America, including visits to those institutions and field work. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, LALS.
Prerequisite: SPAN 2500.

COLI 3585. Transnational Asian Cinema. (4 Credits)
With its over-the-top action movies, riveting crime thrillers, sweeping historical romances, and unabashed melodramas, Asian cinema is one of the most exciting sites of cultural production in the world today. This capstone course will draw on theories and methods from film studies, literary studies, and sociology in an effort to develop an interdisciplinary model for analyzing Asian cinemas in a global context. The remainder of the course will focus on Asian cinema as a way of testing ‘the transnational cinema’ hypothesis: the proposition that, thanks to the machinations of global capitalism, even seemingly ‘national cinemas’ must now be understood in ‘post-national’ terms. The course will culminate in a series of screenings at the annual New York Asian Film Festival at the Film Society of Lincoln Center. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3624. Music and Nation in the Arab World. (4 Credits)
Though music is a domain of individual expression, it may also reflect or respond to social, cultural, and historic influences of a time and place. This course explores the ways in which music acts as an expression of national identity in the Arab world. It considers this relationship in a region where the idea of nation has multiple meanings, and where conflicting factors such as regional diversity and the notion of pan-Arabism exists. Specifically, the course focuses on how particular types of music, including the Aleppian, Waslah, Al-Qasida al-ghinaiy, and Al-Muwashah, have affected the development and embodiment of national identity in the 20th century. Course materials are presented in English, however students of Arabic language are encouraged to enroll. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ARAB, COLI, INST, ISME, MEST, PJRC, PJST.
COLI 3652. Contemporary French Philosophy. (4 Credits)
This course introduces the work of French thinkers from the 20th and 21st centuries. Themes under consideration might be subjectivity, violence, justice, embodiment, and epistemology. Figures covered may include Badiou, Deleuze, Derrida, Foucault, Irigaray, Kofman, Le Doeuff, Lyotard, Merleau-Ponty, and Ranciere. Reference may also be made to recent developments of French theory in the Anglo-American context, including in feminist theory and social and political philosophy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASRP, COLI, INST, ISEU, PHCO.

COLI 3664. Post Colonial Literatures. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENGL, GLBL, LAHA, LALS, WGSS.

COLI 3668. Caribbean Identities. (4 Credits)
This course explores the literature of the Caribbean in terms of socio-historical Creole identities, diaspora and colonial legacies in the Spanish, French, and English speaking Caribbean. We will read in contemporar and late twentieth century texts the manners in which this history shapes the understanding of Caribbean identities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LAHA, LALS.

COLI 3689. African Literature II. (4 Credits)
The second course is an examination of the colonial and postcolonial literary production of European-influenced African writers writing in European languages: English, French and Portuguese. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAH, AFST, COLI, ENGL, GLBL.

COLI 3690. Women Writing Africa. (4 Credits)
This course will consider the representation of Africa in the writing of women authors coming from different literary, cultural, and national traditions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 3691. 20th Century African-American and African Women. (4 Credits)
‘20th-Century African-American and African Women Writers’ considers the political, social, racial, and other related contexts in which these women write. Authors include Larsen, Hurston, Morrison, El Saadawi, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASLT.

COLI 3692. Anglophone African Literature. (4 Credits)
This course (sub-titled ‘America in Africa’) offers students an opportunity to learn about Africa and how America and Americans are represented by authors of the African continent writing in English. Using a range of texts in which America and/or American characters are represented, the course will encourage students to ask and answer questions such as: how is America (and Americans) represented abroad? And why? Simultaneously, students will also be learning about other places, peoples, cultures, and beliefs. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASLT.

COLI 3802. Literature and Imperialism. (4 Credits)
This course explores key debates in the study of literature and in the history of imperialism. Attention will be paid to the importance of literary form and historical representation as well as the relation between the two. A major concern of the course will be to examine the problems posed for any study of culture by legacies of imperialism. Readings will likely include Joseph Conrad, Mahasweta Devi, Naruddin Farah, Rudyard Kipling, Salman Rushdie, Tayeb Salih, Olive Schreiner, and Pramoedya Ananta Toer. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, GLBL, INST, ISIN, PJST, PJWT.

COLI 3840. Latin American Culture Through Film. (4 Credits)
Major topics of Latin American cultural criticism through an examination of Latin American and Latino film production, with a special emphasis on the documentary as an alternative to mainstream cinema and television. Latin American media theories and cultural criticism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, FITV, GLBL, INST, ISLA, LAHA, LALS.

COLI 3910. US Latino Film Making. (4 Credits)
Examination of the major topics and genres of Latino film making in the U.S. Film makers studied may include Rodriguez, Valdez, Ichaso, Troyano, Muniz, and Sayles. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ENGL, LAHA, LALS, PLUR.

COLI 3912. Literature of the Americas. (4 Credits)
Literature of the Americas—Spanning North, Central, and South America, this class will read novels across time and space. Whether this literature can produce a coherent vision of ‘America’ in the 21st century will be considered alongside questions of race, class, gender, and sexuality. We will also examine the complexities of the aesthetic: Not only what makes a novel ‘American’ but also what makes an American novel valuable. Authors include Pynchon, Cisneros, Garcia Marquez, Burroughs, and Fuentes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASLT, LAHA, LALS.
COLI 4011. Narrating Childhood. (4 Credits)
In this seminar, we will study the explorations of childhood experience that are to be found in literary, theoretical and cinematic texts. We will examine the construction in language of the child's point of view and voice and we will consider literary and psychoanalytic views of the significance of childhood experience to adult life. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENGL, PJRC, PJST, WGSS.

COLI 4014. Jean Rhys: Rewriting English. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ENGL.

COLI 4016. Rewriting the Mediterranean (20th and 21st Centuries). (4 Credits)
Historically the Mediterranean has been a region where different ethnicities, cultures and religions have emerged, dissolved or coexisted. The enduring encounter of East and West, North and South on its shores and in its waters, however, has been far from peaceful. In this seminar, we will discuss contemporary writers and intellectuals from the Mediterranean, who build on the rich artistic heritage and vital cultural traditions of the region to confront the legacy of centuries-old political and religious divisions. We will analyze the modern construction of the ideas of “Mediterranean culture” and “Mediterranean identity” in the current post-national context by examining fiction and essays by Vincenzo Consolo, Assia Djebar, Juan Goytisolo, Amin Maalouf, Orhan Pamuk and Abraham B. Yehoshua, among others. By telling stories set in the Southern and Eastern Mediterranean – from Italy and Spain to Turkey, Israel and the Middle East – these writers reimagine early civilizations and recast their histories in the present to critique modernity’s narratives of socio-economic and political control, cultural domination and religious exclusion, and offer novel forms of cultural production and critical practice fostering cross-cultural interaction and intercultural understanding. We will conduct our analyses within the conceptual frameworks provided by historians Fernand Braudel, Iain Chambers, David Abulafia and Ian Morris, anthropologist Talal Asad, sociologists Franco Cassano and Edgar Morin, economist Serge Latouche, literary scholar Predrag Matvejevic, and cultural critic Edward Said. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ITAL, ITMO, MEST, OCST, PJRC, PJST.

COLI 4018. Cuba: Revolution, Literature and Film. (4 Credits)
This interdisciplinary capstone course will study the representation of the Cuban revolutionary process in literature, history, and film. It will explore some of the major topics on the Cuban revolutionary process from the vantage point of historical, literary and cinematic accounts: the relationship of intellectuals to the state, the revision of the past as antecedent to the Cuban revolution and its policies, the place of race, gender and sexuality in revolutionary culture, the Mariel exodus and the revolution's relationship to Cuban diasporic communities, the critique of revolutionary rhetoric during the post-Soviet "special period" and issues related to consumption, gender, sexuality, race, urban development and subjectivity during the current period of economic and cultural transition from socialism. It will use an interdisciplinary historical, literary and cinematic approach to examine the Cuban revolutionary process. Conducted in English with texts in Spanish and English translation. Coursework in Spanish for credit toward the Spanish major and minor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, COMC, COMM, FITV, GLBL, ICC, INST, ISLA, LAHA, LALS.

COLI 4020. Literature, Film and Development. (4 Credits)
Development and underdevelopment are terms we now associate with the relative industrialization/financialization of any given part of the world and the comparative disposition of their economic structures. They are used to differentiate the have-nots (North/South, First and Third Worlds; metropole and postcolony). We will study Development and its discourse as it has emerged since the 18th century within humanist frameworks of philosophy/science (the animal-human divide); literature (stories/narrative as colonial inscription); and technology (as techne and prostheses manifest in photography, film and video). We will explore the ways it inflects our perceptions and ways we read our own and other worlds. In particular, we will focus on how Development/development has constructed and shaped the many significations of ‘the human’ from the early modern to contemporary times. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ASAM, ENGL, ENRJ, ICC, INST, ISIN.

COLI 4021. The Classical Tradition in Contemporary Fiction and Film. (4 Credits)
This course provides a survey of classical works from ancient Greece and Rome and their reception in contemporary literature and film. The objective is threefold: first, to learn about patterns of narrative intrinsic to the representation of myth and history in classical literature; then to observe how these patterns function both in works of the classical period and also in contemporary fiction and film; and finally, to consider why classical antiquity has proved an enduring source of inspiration for writers and film-makers of today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, ICC.
COLI 4125. Kieślowski in Theory and History. (4 Credits)
This semester will focus on a close analysis of the Decalogue, the 10-film cinematic masterpiece of the Eastern European director, Krzysztof Kieślowski. The films will be paired with some key texts in critical and film theory and discussed in multiple contexts; the rest of Kieślowski's oeuvre; the works of other Eastern European filmmakers; and the historical context of Poland in the 1980s. Capstone seminar for Comparative Literature majors. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENGL.

COLI 4150. Race and Contemporary Film. (4 Credits)
This course examines contemporary cinema in an effort to understand the racial present. Drawing on theories and methods from sociology, anthropology, history, and literary theory, we will develop a provisional model of interdisciplinary cultural analysis that will help us better understand how representations of race function in our own historical moment. At the same time, we will investigate exactly what constitutes "our own historical moment." How and why does it differ from one racial group to the next? And how do these competing racial temporalities affect present-day racial politics? With such questions in mind, we will conduct a series of case studies in racial representation. Each case will be organized around a recent film, and each film will be examined from a variety of disciplinary perspectives, with particular emphasis on how various academic disciplines both illuminate and obscure various aspects of the racial representation at hand. NOTE: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, ENRJ, ICC, PLUR.

COLI 4204. Joseph Conrad and the Future of English. (4 Credits)
A study of works by Joseph Conrad and their relevance for the changing landscape of English literature within the comparative linguistic, literary, and cultural context of the twentieth and twenty-first centuries. Besides select works of Conrad (including Almayer’s Folly, “Heart of Darkness,” Lord Jim, Nostromo, The Secret Agent, and Under Western Eyes), other works to be studied may include: Ngugi wa Thiong’o, A Grain of Wheat, V.S. Naipaul, A Bend in the River, Tayeb Salih, Season of Migration to the North, Nuruddin Farah, Maps, Jessica Hagedorn, Dream Jungle, Framoedya Ananta Toer, This Earth of Mankind. CAPSTONE SEMINARE FOR COMPARATIVE LITERATURE MAJORS. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 4206. Comparative Studies in Revolution. (4 Credits)
This interdisciplinary capstone seminar engages students in a series of literary and historical studies of revolutionary (and counter-revolutionary) movements (e.g. the Haitian revolution of 1791, the Indian Rebellion of 1857, and the events of 1965 in Indonesia). Examining historical documents, works of fiction, literary theory and historiography, the seminar will investigate how the disciplines of history, literary criticism, and cultural studies more generally, seek to explain revolutionary historical change. Particular attention will be paid to the authority of textual evidence placed within interdisciplinary, cross-cultural, and multimedia contexts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, ASHS, ASLT, ENGL, ENRJ, GLBL, ICC, INST, ISIN, PJSJ, PJST.

COLI 4207. Comparative Studies in Empire. (4 Credits)
This interdisciplinary capstone seminar will study the interrelation between different imperial formations (e.g. Roman, Ottoman, Mongol, British, Chinese, and American) and the various linguistic, literary, and cultural traditions that give them imaginative and historical shape. Attention will be paid to the importance of literary form and historical representation. Juxtaposing historical and fictional texts from different cultural and historical moments, the seminar will explore how these texts foreground problems of historical documentation and textual authority. The seminar will also study how these foundational problems, shared by the disciplines of history and literary criticism, are embodied in other media, notably music and film. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASHS, ENGL, ICC, IRST.

COLI 4320. Reading the Indian Ocean World. (4 Credits)
A new area of study has emerged in the last decade known as Indian Ocean Studies. It uses interdisciplinary to study the cultural flows and encounters over time of the peoples and traffic of the Indian Ocean. This course will focus on the literature, writing, and expressive practices (including film, music and performance) that this confluence of peoples has created. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENGL, GLBL, ICC, INST, ISAF, ISAS, ISIN, WSS.

COLI 4412. Representing Art in Literature. (4 Credits)
Art and its literary representation in 17th and 18th century France and England. In this seminar, we will examine the literary representation of art (portraits, landscapes, etc.) in novels. What is the status of these representations? In what ways does this status change from the 17th to the end of the 18th centuries? In order to analyze the import of visual representation in literary texts, we will also read a number of works of early art criticism both in England and France as well as contemporary criticism and theory. As such, we will try to determine the interrelation between history of the visual and literary culture in the early modern period. Texts can be read in the original language if desired. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 4420. Ethics and Intelligence. (4 Credits)
This seminar will engage students in an intensive examination of the history, literature, and ethics of secret intelligence. Tracing the historical emergence of contemporary intelligence agencies from the early modern period up to the present, and with special attention to literary works from contrasting cultural traditions, the seminar will focus on three areas of expertise that have historically shaped he articulation and administration of both clandestine and public intelligence and information: the work of translators, the work of missionaries, and the work of government agencies.
Attributes: ENGL, EP4, VAL.
Prerequisites: ENGL 1102 and ENGL 2000 or ENGL 1004 or CLAS 2000 or COLI 2000 or HPLC 1201 or HPRH 1001 or HPRH 1051 or HPRH 2001 or HPRH 2051 or MLAL 2000.
COLI 4570. Films of Moral Struggle. (4 Credits)
(Formerly COLI 4001): The course studies the portrayal of human values and moral choices both in the narrative content and the cinematic technique of outstanding films. Class discussion tends to explore ethical aspects of each film's issues, while numerous critical analyses of the films are offered to develop the student's appreciation of the film's artistic achievements. A lab fee is required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASRP, BEHR, BEVL, CELP, COLI, EP4, FITV, PJMJ, PJST, REST, VAL.

COLI 4603. Asians in the Americas. (4 Credits)
This capstone course examines the histories, cultures, and politics of Asians in the Americas. Drawing on theories and methods from history, sociology, psychology, literary studies, and other scholarly disciplines, we will examine some major touchstones in the interdisciplinary field of Asian American Studies. Topics may include the global context of Asian migration to the west, Asians as coolie laborers in the US and the Caribbean, anti-Asian legislation, Japanese American internment during World War II, the geopolitical context of model minority discourse, gender and sexuality in Asian America, media representations of Asians and Asian Americans, and methodological debates in the field of Asian American Studies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ICC, PLUR.

COLI 4800. Internship. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 4998. Senior Thesis Tutorial in Comparative Literature. (4 Credits)
Practical application of comparative techniques and research methods. Supervised independent work culminating in an original research paper in the area of comparative literature. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

COLI 4999. Tutorial in Comparative Literature. (0 to 4 Credits)
Independent research and readings with supervision from a faculty member.

Compliance (Law) (CPGL)

CPGL 0099. Crisis Management. (3 Credits)
CPGL 0101. Human Rights Compliance. (1 Credit)
The relation of the corporation to human rights has changed dramatically over the past decade. For many years, company responses to the human rights impacts of their business operations consisted largely of voluntary corporate and social responsibility programs. Today, multiple regulations and guidelines, both domestic and international, create increasing obligations for corporate actors in the field of human rights. Not surprisingly, ethics and compliance professionals are now called on by their employers to assess human rights-related risks, develop programs to address those risks, and to publicly report on the company's performance on human rights. The Human Rights Compliance Course will provide students with a comprehensive understanding of the current framework for human rights compliance for companies. The Course will examine expanding regulatory efforts within different jurisdictions that establish human rights obligations on companies. The Course will also explore developing international guidelines that seek to establish global human rights standards for all businesses, including the UN Guiding Principles on Business and Human Rights. Students will learn critical skills in the areas of human rights due diligence, disclosure and reporting. Finally, students will examine how shareholders, lenders, consumers, and the public evaluate corporate efforts to address human rights.

CPGL 0102. Internal Investigations. (1 Credit)
Dig into many corporate scandals and you will find bungled internal investigations that fail to address a festering compliance program. But done well, internal investigations can protect against risks, and strengthen a culture of compliance. This course will explore the structure of an internal investigation from the decision to commence one through completion. The goal of the course is to teach students to understand how to prepare for and conduct an effective internal investigation. Taking a practical and interactive approach, the class will cover, among other things, investigation plans, sources of information, interviewing techniques, privacy issues, and potential regulatory consequences of an investigation.

CPGL 0103. Employment Law. (1 Credit)
This online 1-credit course will provide students with a high-level overview of the most significant employment laws and principles that should guide employers through the employer-employee relationship—from the initial decision to fill a position to the ultimate decision to terminate the employer-employee relationship. Topics covered may include the appropriate classification of individuals who perform services in exchange for compensation, the tracking of employee time under the Fair Labor Standards Act, avoiding workplace discrimination, common employer pitfalls during the recruiting process, the navigation of interactive process that must inform reasonable accommodations, workplace harassment, the Family and Medical Leave Act, workplace privacy, and terminations.
CPGL 0156. Banking Regulation and Enforcement. (2 to 3 Credits)
Taught by a former New York Superintendent of Financial Services, this course provides an overview of banking and insurance regulation and enforcement in the United States. The goal of the course is to provide students with practical knowledge of financial services regulation, and prepare students for careers in both the private and public sectors, either in litigation or transactional work. <p> Banking and insurance regulation is a particularly hot topic today, with the advent of fintech and insurtech firms, and the expanded use of technological innovation for compliance purposes. Concerns about cybersecurity attacks, data privacy, and protections against money laundering have raised the stakes for the banking system and government leaders. Moreover, concerns about data privacy and the wide scope of the insurance industry have only made the topics covered by this course even more important for lawyers beginning their careers. <p> This course will rely on current writings and regulatory actions rather than a textbook. It will provide an overview of banking and insurance regulation, through both instruction on historical legal and regulatory frameworks, and the review and discussion of practical examples of recent regulatory actions and writings of current interest in the field. Guest speakers will be invited to speak to the class on current topics during certain classes. <p> Topics will include the respective roles of the federal and state governments in financial services regulation and enforcement; the statutory frameworks for the oversight of banks and insurance companies; the global enforcement of sanctions and anti-money laundering laws; the use of artificial intelligence and machine learning to assist compliance efforts at financial institutions; evolving data privacy laws and expanded cybersecurity regulation and enforcement; the application of existing laws as well as new proposals for the licensing of fintech and insurtech companies; the adaptation of insurance and banking laws to accommodate the gig economy; current challenges in health insurance regulation; the reduction in private pensions and the respective roles of government and private industry in retirement security; the student loan crisis and differing regulatory approaches; and the balancing of fiscal prudence and consumer protection in an age of technological advancement. Throughout the course, federalism and preemption principles will be discussed, along with policy choices at the federal and state levels, and evolving regulatory and legislative efforts to address business and technological changes. <p> This course is taught by Maria Vullo, who recently served as Superintendent of Financial Services for the State of New York, previously served as Executive Deputy Attorney General for Economic Justice in the Office of the New York Attorney General, and was a partner in a major law firm for many years. As Superintendent, Ms. Vullo managed an agency of 1,400 employees, responsible for the supervision and enforcement of laws regarding all New York chartered banks, branches of foreign banks, insurance companies and agents licensed to do business in New York, and money transmitters and cryptocurrency exchanges. In this role, Ms. Vullo worked with numerous federal agencies, and the insurance and bank commissioners of the other 49 states. She current serves as a consultant and sits on several boards. <p> Attributes: CORC, CRCP.

CPGL 0203. Health Law Compliance. (2 Credits)
The healthcare industry is governed by numerous statutes that are actively enforced by Federal and State regulatory bodies. This Healthcare Regulations Compliance course focuses on the Federal and State statutory and implementing regulatory provisions enacted to detect and deter healthcare fraud, waste, and abuse. Over the course of the semester, students will cover, among other compliance laws and regulations, the following fraud and abuse laws: (i) the Federal and State False Claims Act; (ii) the Physician Self-Referral (“Stark”) Law; (iii) the Anti-Kickback Statute; (iv) the Civil Monetary Penalty Law; and (iv) the Criminal Health Fraud Statute. Students will also learn the required elements of an effective compliance of ethics program and how to perform a risk assessment, including risk identification, scoring, and prioritization. In addition to the foregoing, the course will cover corporate governance, human subject research compliance, record management, as well as patient privacy and data security under the Health Insurance Portability and Accountability Act of 1996 (“HIPAA”) and the data breach notification provisions under Health Information Technology for Economic and Clinical Health Act (“HITECH”) provisions of the American Recovery and Reinvestment Act (“ARRA”) of 2009. <p> Attributes: CORC, CRCP, LAWB, LLM.

CPGL 0202. In-House Comp Counsel Practice. (2 Credits)
This course provides a general overview of the real-world practice realities for the in-house compliance legal counsel. It will include examples and illustrations drawn from the experiences of a practicing in-house compliance counsel and will translate the practical requirements of a Fortune 50 technology company for an understanding of the many challenges and compromises that accompany this practice. Students will learn how to balance value-based decision-making with budget concerns and the challenging pace of a high tech company. <p> Attribute: JD.
CPGL 0206. Compliance, Technology, and Financial Services. (2 to 3 Credits)
Emerging technologies provide opportunities for new and efficient ways to conduct business, but they can also raise a variety of potentially complex legal and compliance challenges. This class will provide an overview of the legal and regulatory context for current technology issues facing both large and small companies, including privacy, information security, electronic recordkeeping, and employee supervision. Course content will focus primarily on the financial services sector; however, the core compliance concepts included in the class will be broadly applicable across industries. Through analysis of regulations, interpretive guidance, case law and settlements, students will explore questions such as how do businesses use social networking systems like Facebook and Twitter, while dealing with obligations to store and supervise their electronic communications? What challenges are posed by domestic and international privacy and information security requirements when companies want to take advantage of cloud computing services, or deploy business systems across multiple jurisdictions or continents? How can a “bring your own device” policy permit an employee’s personal device, such as an iPhone, to be used to conduct business and store proprietary information without undue risk? Course Materials and Meetings Course Materials: Course materials will be posted on TWEN. No materials are required to be purchased.<p> Attendance and Participation: Attendance is mandatory. Please notify us in advance if you cannot attend class due to religious observance, illness, family emergency or other legitimate reasons. Class Participation: Classes will generally be conducted as a mix of presentation and discussion. You will be expected to have read preparatory materials, and to participate actively in class. Laptops: Laptops are permitted, but we encourage you to limit note taking and memorization in favor of class participation, with a focus on appreciating the principles emerging from our analysis and discussions. Although legal materials will be used in this course, our emphasis is understanding how Compliance functions work, and the skills needed by Compliance staff to help translate legal and business requirements into cogent, documented and sustainable business processes and associated policies, procedures and supporting technologies. Recording: You are not permitted to record class sessions using a smartpen, dictation software or any other method.<p> Email: We may periodically send you emails via TWEN. You may reach us by email or phone during business hours via our contact information above. Course Evaluation<br> Your grade will be based on a take-home examination, which you can take anytime during the exam period. Class participation will be taken into consideration as part of your final grade.
Attributes: CORC, CRCP, IPIE, JD, LAWT, LL.M.

CPGL 0262. Global Corporate Compliance. (3 or 4 Credits)
This course will explain the major features of an ‘effective’ corporate compliance program. Students will have an opportunity to learn the fundamentals of rolling out a program for a global corporation and updating and refocusing a current program. Students will examine various areas of law, regulation and policy, as well as various industries to adapt the compliance protocols for the global corporation. This course will be skills oriented.
Attributes: CORC, CRCP, ICE, JD, LAW, LAWB, LAWI.

CPGL 0291. Corporate Compliance in Developing Brazil, Russia, India, China, and Underdeveloped Countries. (2 Credits)
The class will cover the compliance programs of companies doing business in the Developing (BRIC countries of Brazil, Russia, India and China) as well as Underdeveloped Countries. It will be a workshop class with assignments that will focus on a portfolio of documents necessary to update or refocus a compliance program in these countries and will include case studies on the BRIC countries.

CPGL 0302. E-Law in the Global Setting: Data Safeguards and Electronic Evidence Challenges. (2 Credits)
In this seminar environment, students will utilize new analytical frameworks to think through cybersecurity and other data protection issues where laws, regulations and industry practices are outstripped by the speed of technological innovation. This is a practice-ready class in which the practical is never far from the theoretical, and so we will focus on how to provide the best counsel where the law is in a constant state of change. As the class is designed for practice, there are no exams. Instead, students will prepare four short written assignments that will be similar to those they would face as first-year lawyers in a law firm, corporate legal department or government agency. A premium is also placed on class participation, given the seminar structure of the course. Students learn as much from each other as they do from the professor as they discuss differing notions of ‘personal information’ in cybersecurity and privacy and how data protection laws and regulations impact the daily interfaces essential to e-commerce and the management of data in healthcare, finance, education and other regulated areas. All e-commerce is global once the organization’s website goes live, so the impact laws of other jurisdictions, such the EU General Data Protection Regulation on US business, will also be explored.
Attributes: CORC, CRCP, IPIE, JD, LAWI, LAWT, LDE, LIDR, LL.M.

CPGL 0313. Anti-Money Laundering. (1 to 4 Credits)
Fall 2019 semester: This course provides a comprehensive overview of the regulations and laws that govern the requirements for financial institutions in the United States in order to address the risk of money laundering and terrorist financing through banks and other financial institutions. Students will gain an understanding of controls implemented by financial institutions to combat the flow of illicit funds. By the conclusion of this course students should have an appreciation of the culture of compliance within financial institutions and understand the rules, regulations, and laws in place to combat money laundering and terrorist financing. &lt;p&gt; Spring 2020 semester: This course provides a comprehensive overview of the regulations, and laws that govern the requirements for Financial Institutions both in the United States and globally in order to address the risk of money laundering and terrorist financing through banks and other financial institutions. Students will gain an understanding of controls implemented by financial institutions to combat the flow of illicit funds. By the conclusion of this course students should have an appreciation of the culture of compliance within financial institutions and understand the rules, regulations, and laws in place to combat money laundering and terrorist financing.
Attributes: CORC, CRCP, INLJ, LAWB, LAWI.

CPGL 0321. bldg Effect Ethic &amp; Compliance. (2 Credits)

CPGL 0349. Business Organizations and the Foreign Corrupt Practices Act. (1 or 2 Credits)
Anti-bribery and corruption laws – particularly the US Foreign Corrupt Practices Act (FCPA) – have for many years been the subject of vigorous enforcement activity, making the FCPA and other anti-corruption laws a top legal concern for business organizations across all industry sectors doing business in the global marketplace. Thus, developing a pair of ‘FCPA goggles’ is a fundamental skill-set for lawyers and compliance professionals. In this course, students will elevate their knowledge of the FCPA, including its anti-bribery, books and records, and internal controls provisions, and how the Department of Justice and Securities and Exchange Commission enforce the FCPA. In addition, students will gain practical skills by learning how to build strong Anti-Bribery and Corruption compliance programs that prevent, detect, and deter potentially illegal conduct.
Attributes: CORC, CRCP, LAWB.

Updated: 07-27-2020
CPGL 0399. Compliance Seminar. (2 Credits)
In this course, students will learn how to apply the learnings from behavioral ethics and other fields to the design and implementation of ethics and compliance programs that not only meet government standards of effectiveness, but also serve a company's broader long-term objectives. The course will also explore the practical challenges compliance officers face in building compliance programs and the nuanced decision-making and practical skills required to successfully address those challenges.
Attributes: CORC, CRCP

CPGL 0402. Insurance Compliance. (2 Credits)
Insurance involves a contract in which an insurer agrees to compensate or indemnify another party for fortuitous event causing loss or damage in exchange for consideration. The underwriting process for this contract is heavily regulated in the United States in order to protect consumers. One aspect of consumer protection is ensuring the insurer's solvency so that it may pay claims. It is important that students gain an understanding of compliance in the US insurance industry, given the industry's importance. Insurance in the United States is considered the world's largest insurance market by premium volume. Of the estimated $4.640 trillion of gross premiums written worldwide, $1.274 trillion were estimated to be written in the United States. The insurance industry in the United States is regulated almost exclusively by individual state governments. The state-based insurance regulation system allows each state to operate independently to regulate their own insurance markets, typically through a state department of insurance or division of insurance. Through the years, federal regulation has now and then encroached upon the state regulatory system, challenging the current model to evolve, look for efficiencies, and to grow. Today, disruptors and innovators have entered the insurance market, with an influx of capital, challenging current insurance processes, norms, including the emergence of the insurance digital experience for consumers. Some experts believe that the digital impact will ultimately revolutionize the current insurance model and the regulatory environment that governs it.
Attributes: CRCP, LLM.

CPGL 0409. Cosmetics Regulation. (2 Credits)
Do you know what you are slathering on yourself when you shower? Does your government? This course will cover the governmental, industrial, and societal regulation of cosmetics and other personal care products. Topics will include the history of cosmetic regulation, the definition of cosmetics versus drugs, cosmetic misbranding and adulteration requirements under the 1938 Federal Food Drug and Cosmetic Act (FDAC) and additional Federal statutes, local regulations for select states, and how the FDAC is enforced. The course will consider issues that cosmetic companies regularly face, such as creating a brand identity; the importance of developing a safe and efficacious product; creating a robust quality program as a brand protection measure; the role of the FTC and their coordination with the FDA; complying with domestic and international guidelines across distribution channels as they relate to product formulation, label, and marketing; and social media and digital marketing strategies in the e-commerce era. The class will scrutinize current pending legislation for new U.S. regulations, and discuss industry trends, such as transparency in cosmetic ingredients and private company task forces to combat counterfeit cosmetics. At the end of the course, you will have a firm grasp on the U.S. cosmetic regulatory scheme and basic cosmetic company considerations.
Attributes: LAWF, LLM.

CPGL 0422. Compliance Colloquium. (1 Credit)
Online MSL students will complete a three-day colloquium at Fordham Law School's Manhattan campus. Students will engage with senior compliance officers and discuss current and emerging issues in the field of corporate compliance. Networking events will give students ample opportunity to meet each other and compliance professionals from the New York City area and beyond. This course will take place each August. Students join this course during the last summer term in which they will be enrolled.

CPGL 0521. Risk and Responsibility in Organization. (2 Credits)
Ethics and compliance has emerged as a key discipline in preventative law, gathering increasing attention and corporate resources. With this growth, and as corporations face unprecedented lack of trust and scrutiny of their conduct, questions about how businesses manage their overall approach to integrity have become more pressing. Companies are increasingly grappling with questions of ethics and integrity that challenge the primacy of shareholder value approaches and expand the remit of governance, risk and compliance approaches into stakeholder trust, organizational culture, and voluntary CSR and human rights standards. This course will introduce key dimensions of organizational risk and responsibility – (sometimes called non-technical or non-financial risk). The focus is practical, not theoretical – what does evidence about how companies organize and manage themselves tell us about how risk and responsibility concepts are applied? It will cover a range of established and emerging integrity, ethics and compliance issues, including corruption, political risk, human rights, CSR, leadership, culture and behavior. The course will include academic and business readings as well as interactive case studies exploring the actions of real companies in pharmaceuticals, mining and telecoms. Students will apply practical solutions to real risk and corporate integrity challenges faced by multinational organizations in a variety of sectors, and explore the consequences for the compliance function and the core business.
Attributes: CORC, CRCP.
CPGL 0592. International Financial Crime. (2 or 3 Credits)
The line dividing legitimate international financial activities and illicit conduct is becoming increasingly blurred. This has meant that substantive legal and regulatory standards and enforcement and redress techniques have had to develop and adapt for use against those involved in using private organizations and financial institutions for criminal activities. This course examines a selection of currently relevant criminal activities. We will focus on insider trading, market manipulation, money laundering, government corruption and bribery, and related topics. The primary focus will be US laws and regulation, but with consideration for international dimension of criminal activity and enforcement. The class will emphasize the role of private lawyers in advising clients about the prevention of criminal charges and in-house compliance policies and procedures, rather than the strategic choices to be made in the course of criminal trials.

Course Objectives
The goal of the course is to help students to understand several key financial criminal areas, attendant regulatory environment and consider steps that financial industry can take through a well-considered compliance program to minimize the risk of such crime occurring. During the course we will explore the practices and hurdles to achieve a more fair and effective international financial system. Through the example of criminal areas considered students will acquire a familiarity with construction and operation of a financial industry compliance program.

Attendance Requirement
Attendance at all class sessions is required. Enrolled students who do not attend the first class session will be dropped. Students seeking to enroll in this course must attend the first class session.

Course Requirement
Students are expected to research and write a 15-20 page paper (double spaced) covering at least one of the topics covered in our syllabus. References should be in Blue Book format.

Basis of Course Grade
- 25% for class participation (classroom discussion and collaborating with classmates/colleagues); and
- 75% for the term paper.

Attributes: CORC, CRCP, LAWI.

CPGL 0615. Regulation of Broker Dealers: A Practitioner Perspective for Compliance Officers. (2 or 3 Credits)
The primary objective of the course is to provide the student with a comprehensive understanding of the regulatory framework that a U.S. broker-dealer operates in and how to practically apply this knowledge in managing a compliance function in a securities firm. The course will review the relevant securities rules and regulations with a focus on those of the SEC and Finra, but it will also include other regulatory requirements that are relevant to securities firms such as the Bank Secrecy Act and the USA Patriot Act. An overview of certain applicable non-securities’ rules and regulations, such as anti-money laundering regulations, will demonstrate the application of these regulatory requirements in the control structure of a broker-dealer and link these requirements to those of the securities regulator.

After completing the course, the student will have a solid knowledge base of the various regulatory requirements and their relationships with each other. This regulatory understanding will be supplemented with examples of constructive and relevant market practices which can be used to design and manage a successful compliance program in a broker-dealer firm. In addition, the course content will include an overview of the financial responsibility rules, margin requirements and regulatory reporting aspects of a broker-dealer that a compliance professional needs to be familiar with to effectively execute a compliance program. These financial and operational topics would be of interest to financial professionals. As such, this course would be particularly relevant to senior accounting students who have an interest in regulatory accounting matters in the securities industry and could be cross-listed with an accounting stream. In summary, the course will prepare the student to undertake greater responsibility as a compliance professional in a securities broker-dealer.

Attributes: CORC, CRCP, LAWB, LLM.

CPGL 0620. Compliance Risk Assessment. (2 to 3 Credits)
The course is designed to provide an overview of the basic elements of the Compliance Risk Assessment and how the Assessment functions within an overall Compliance Program. In addition, it presents an overview of the key compliance risk and themes across the financial services and pharmaceuticals industries, as well as certain key topical areas. The course also encourages critical about developing and conducting a Compliance Risk Assessment with a particular understanding of its strengths and its weaknesses.

Attributes: CORC, CRCP, INLJ, LLM.
CPGL 0780. Corruption. (2 Credits)
Corruption is broadly defined as the misuse of trusted authority for personal gain and includes such crimes as bribery, extortion, embezzlement and fraud. In recent years, corruption has played a central role in geopolitical movements and in United States politics and government. And yet, both the phenomena of corruption and the laws prohibiting it are not widely understood. The course will explore the laws governing corruption, the anatomy of the crime of corruption and corruption as social and political phenomena. We will examine current corruption cases, investigations and coverage in the media, including in relation to the Trump Administration, the Mueller Investigation, the prosecution of Sheldon Silver, former Speaker of the New York Assembly, and other prominent domestic matters; and in China, Afghanistan, the Ukraine and other areas of the world.<p> The course will also cover practices to prevent, investigate and remedy corruption in the private sector and government. Course Materials: Course readings will include original materials from corporate, government and non-governmental organizations sources media reports; and case law, treatise and legal articles on key applicable areas of the law. We will also draw on the primary course text: Confronting Corruption: Past Concerns, Present Challenges, and Future Strategies, Fritz Heimann and Mark Pieth. Method of Evaluation: Grading will be based on written assignments on class topics and readings; and a final examination Class participation is an integral part of the course and students enrolling in the course should be prepared to engage in active discussion of the course materials and in-class presentations.

Attribute: LLM.

CPGL 0901. Introduction to Corporate Compliance. (4 Credits)
This course will explain the major features of an ‘effective’ corporate compliance program. Students will have an opportunity to learn the fundamentals of rolling out a program for a global corporation and updating and refocusing a current program. Students will examine various areas of law, regulation and policy, as well as various industries to adapt the compliance protocols for the global corporation. This course will be skills oriented.

CPGL 0909. Policymaking Through Government Settlements and Enforcement. (2 Credits)
This seminar, taught by Martin J.E. Arms, a retired Partner and present Of Counsel at Wachtell, Lipton, Rosen & Katz, examines the recent proliferation of large-scale settlements between private corporations and government prosecutors and regulators. Such settlements include the $200+ billion multistate tobacco settlement, the UBS off-shore tax shelter case, BP Deepwater Horizon, the VW diesel controversy, and the $25 billion National Mortgage Settlement and certain other large settlements arising out of the fiscal crisis. The seminar will look at (i) the manner in which such settlements have arisen and been structured; (ii) the laws (such as New York State’s Martin Act, the federal FIRREA statute, class action laws, and state tort laws) that help force such settlements; (iii) various challenges to reaching such settlements; (iv) aspects of such settlements that require changes to the settling corporation(s)’ business practices, as opposed to mere financial payment, and whether requiring such changes through the threat of prosecutorial action is appropriate; (v) the rise of the Independent Monitor construct; and (vi) legal, political and business consequences arising from such settlements.

Attribute: CORC, CRCP, LLM.

Computer and Information Sciences (CISC)

CISC 0900. Computer Science Seminar. (0 Credits)

CISC 0912. Requirement Preparation. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

CISC 0914. Requirement Preparation in Summer. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

CISC 0930. Ph.D. Qualifying Exam: Computer Science. (0 Credits)
The dean’s office will register computer science doctoral students for the Ph.D. Qualifying Exam CISC 0930 for the semester in which they complete all three parts of the qualifying exam. Each student must complete a qualifying exam and research project course before they will be permitted to proceed to develop a dissertation proposal.

CISC 0950. Dissertation Proposal Preparation. (4 Credits)
Student will prepare dissertation proposal and identify dissertation adviser.

Prerequisite: CISC 0930.

CISC 0960. Proposal Defense Computer Science. (0 Credits)
Student will defend dissertation proposal.

Prerequisite: CISC 0950.

CISC 1100. Structures of Computer Science. (3 Credits)
An introductory course in the discrete structures used in computer and information technology. Emphasis will be placed on the ability to solve problem and develop logical thinking. Topics such as sets, functions, elementary combinatorics, discrete probability, logic, Boolean algebra, recursion and graphs will be covered through the use of algorithmic and concrete construction. The learned materials are reinforced by computer laboratory assignments. This course also fulfills the Mathematical Reasoning requirement of the Core Curriculum.

Attributes: INSC, MCR.

CISC 1400. Discrete Structures. (4 Credits)
This course covers basic materials in discrete structure and algorithms which are used in computing science, information technology, and telecommunications. Topics include sets, permutation/combinations, functions/relations/graphs, sum/limit/partition, logic and induction, recursion/reoccurrence relation, system if equations and matrices, graphs/digraphs/networks, searching and sorting algorithms, database structure and data analysis. Practical examples of applications will be shown and programming will be used to reinforce understanding of the concepts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: INSC, MCR.
CISC 1600. Computer Science I. (3 Credits)
Introductory course designed for the beginning students. It will define the computing concepts using a high-level programming language. Emphasis will be placed on program design, coding, debugging and documentation of programs. This course together with Structures of Computer Science (CS 1100) serve as the introductory courses for both the computer science and the computer systems management applications major.
Attributes: CYSC, INSC, LING, MGR, NEUR.
Corequisite: CISC 1610.

CISC 1610. Computer Science I Lab. (1 Credit)
A series of programming and laboratory assignments to reinforce the materials learned in CISC 1600.
Attributes: CYSC, INSC.
Corequisite: CISC 1600.

CISC 1800. Introduction to Computer Programming. (3 Credits)
This course introduces students to the foundational knowledge in computing and programming via a scripting languages such as Python. This course covers the following topics: principles of computing, control structures, functions, recursion, file systems, web applications, and object-oriented programming. The students will learn how to apply computing concepts, structures and algorithms to solve real world problems.
Attributes: LING, NEUR.
Corequisite: CISC 1810.

CISC 1810. Introduction to Computer Programming Lab. (1 Credit)
Introduction to computer programming LAB : to reinforce the materials learned in CISC 1800.
Corequisite: CISC 1800.

CISC 1999. Tutorial. (1 Credit)
CISC 2000. Computer Science II. (3 Credits)
A second-level programming course with concentration on object-oriented programming techniques. Topics include: classes, subclasses and inheritance, polymorphism; class hierarchies; collection classes and iteration protocols.
Prerequisite: CISC 1600.
Corequisite: CISC 2010.

CISC 2010. Computer Science II Lab. (1 Credit)
A series of programming and laboratory assignments to reinforce the materials learned in CISC 2000.

CISC 2101. Programming for Math and Science. (4 Credits)
Basic Python programming and scripting and basic algorithms of linear algebra. Students will develop their own Python implementations of these algorithms, which form the basis of many computational methods in the sciences. The course is accessible to students in the physical and social sciences, computer science and math. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: NESY.
Prerequisite: CISC 1600.

CISC 2100. Discrete Structures II. (3 Credits)
Students will study fundamental mathematical structure and logic principles that are essential to computer science. Students will develop a sound foundation upon which to build a deeper understanding of the elements of computing. Predicate logic, proof techniques, and essential topics in calculus and discrete probability will be covered. Problems and examples will be drawn from various subjects of computer science and programming activities will be introduced to reinforce the learning and application of mathematical subjects.
Prerequisites: CISC 1100 or CISC 1400 or MATH 2001.
Corequisite: CISC 2110.

CISC 2110. Discrete Structures II Lab. (1 Credit)
Discrete Structure II LAB : to reinforce the materials learned in CISC 2100.
Corequisite: CISC 2100.

CISC 2200. Data Structures. (4 Credits)
A survey and analysis of the major types of structure in programs that handle data: arrays, stacks, queues, linked lists, trees and graphs; recursive, iterative, search and sort techniques. Methods of organizing and manipulating files will be referenced. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: CISC 2000.

CISC 2201. Systems Analysis. (4 Credits)
Analysis and design of computerized information systems. Topics include planning and design of information systems, configuration analysis, cost analysis, proposal development. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: CISC 1600.

CISC 2261. Computer Graphics Applications. (4 Credits)
Computer graphics is widely used in many fields, including data visualization, engineering design, computer imaging and video gaming and other multimedia entertainment. This course is an introduction to computer-based graphical techniques. Basic programming and mathematical concepts related to computer graphics are covered as needed, assuming little or no background in these areas. The emphasis in this course will be on the hands-on implementation of software applications which employ graphics. Applications for laptop/desktop computers and for mobile devices will be covered. Topics covered will include bitmap filtering, color manipulation, shading, animation and three-dimensional projections. Application areas covered will include biomedical engineering, visual identification, engineering design and global positioning systems. Having taken this course, a student can expect to have a basic understanding of computer graphics and its widespread applications; they will be able to design simple computer graphics applications to suit their own objectives, and they will be able to implement and test these applications. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
CISC 2350. Information and Web Programming. (4 Credits)
Using a process of incremental development, students will learn the latest technologies used in developing dynamic, database-driven websites. Principles of good web design will be covered, as well as techniques and languages for layout and scripting. The course is open to students of all backgrounds. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INSC, NMDD, NMIM.

CISC 2500. Information and Data Management. (4 Credits)
This course will introduce the fundamentals of information storage, access and retrieval using a variety of structures, formats, and systems in computing, internet and information technologies. Projects and case studies will be drawn from the sciences, social sciences, arts and humanities and professional studies in medicine and health, business and commerce, justice and law, and education. Students will have hands-on experience in the acquisition and management of information from a diverse on-line and remote database. (e.g. Gene Bank, digital archives). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CYSC, INSC, NEUR, NMDD, URTST.

CISC 2530. Digital Video and Multimedia. (4 Credits)
This course introduces students to the technology of digital video and multimedia with special emphasis on the web and games. Topics covered include: digital representation of sound, images, video and graphics, compression, multimedia scripting, mixing graphics and video. Practical laboratory exercises include working with Javascript and integrated multimedia systems (e.g. Macromedia Director). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAT, NMDD, NMIM.

CISC 2540. Introduction to Video Game Design. (4 Credits)
This course provides a gentle and fun introduction to the design and production of computer-based video games, for students with no prior programming experience. Students will learn principles of game design, and apply them to create an actual computer game. Students will also research aspects of games and/or the game industry, write term papers about their topics, and give presentations on them. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COMM, DTEM, NMAC, NMAT, NMDD.

CISC 2850. Computer and Data Analysis. (4 Credits)
Over the past decade, methods for analyzing data and extracting useful information from data in several application domains have increasingly relied on ‘intelligent’ computer systems. In this course we will review these methods and systems and apply them to real-world problems, using state-of-the-art data analysis/data mining tools including basic algorithms and statistics. It is intended for social sciences, business and other science majors who have a strong desire and/or urgent need to analyze data using computers in their disciplines and at work after graduation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INSC, NEUR, NMAC, NMDD, NMIM.

CISC 3010. Scientific Communication. (4 Credits)
Students develop skills in written and oral communication needed to produce scientific articles, monographs and presentations that are accomplished in both form and content. The course covers both the use of LaTeX to produce work that meets the highest standards of design and typography, and the techniques of writing, organization, and scholarly citation needed to ensure that this work accurately embodies, effectively communicates, and professionally documents the author’s scientific thought. Students will learn the ins and outs of generating and using copyright material, and how to present data in forms of pictures, tables, graphs, or schematics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

CISC 3020. Computer Graphics. (4 Credits)
A rigorous introduction to computer-based graphical techniques. Core programming and mathematical concepts related to computer graphics are covered as needed. The emphasis in this course will be on the hands-on implementation and synthesis of software applications which employ graphics. Applications for laptop/desktop computers developed within Visual Studio/VB.net IDE environments will be synthesized and analyzed. Topics covered will include bitmap filtering, color manipulation, shading, animation and three-dimensional projections, opcodes color composition and decomposition, resolution, interpolation and coordinate transformations. After completing this course, students will be proficient in developing and implementing graphics modules, have an understanding of software and hardware interfaces relating to continuous accessing of visual screen objects, able to understand GUI interfaces, and have a working knowledge of the major mechanisms which comprise 2-d and 3-d computer graphics development which include animation, projection and color migrations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAC, NMAT, NMDD, NMIM.

CISC 3060. Introduction to Robotics. (4 Credits)
This class is an introduction to robotics and AI for students with a background in programming. Students will work in small groups to build and program robots from kits. They will learn the basics of embedded programming, using sensor information to control motor activity for a variety of tasks such as wall following, obstacle avoidance, and simple navigation of a maze. Students will learn algorithms and data structures for representing and reasoning about space and motion, for working in robot teams, and for planning to achieve a goal. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: Nesy, NEUR.
Prerequisites: CISC 1600 or CISC 1800.

CISC 3130. Unix Systems Programming. (4 Credits)
An introduction to systems programming under the UNIX operating system, using the C and C++ programming languages. UNIX concepts include processes and scheduling, I/O and queues, and standard system utilities and functions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: CISC 1600.
CISC 3250. Systems Neuroscience. (4 Credits)
This course studies integrative neuroscience from a holistic view at the systems and network level. It covers the cells of the nervous system and how they process information as well as the interconnection of neurons and how they aggregate information. It also covers networks of interactive networks or modules and how they produce cognitive functions and behavioral tasks such as vision, memory, perception and emotion. Computing and informatics techniques are used and various examples are illustrated using modeling, simulation, visualization and imaging modalities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: NEUR.
Prerequisites: (CISC 2500 or CISC 1800) and (BISC 1404 or NSCI 1404 or NSCI 1424 or HPLC 1604).

CISC 3300. Internet and Web Programming. (4 Credits)
This course covers web programming in the Internet and interactive environment. Students will gain understanding of operating system usage on a server and an interactive web system design. Languages used include PERL, HTML, CGI and JAVA script. (Formerly titled Programming for the Web). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: CISC 1600.

CISC 3400. Java Programming. (4 Credits)
This course covers Java programming and internet computing with various applications. Topics include: Java programming, object-oriented programming, graphical user interfaces (GUI’s), applets and applications, multimedia, files and streams, and server communications. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: CISC 2200.

CISC 3500. Database Systems. (4 Credits)
This course begins with the introduction of the characteristics of the data base approach and the advantages of using data base systems. Course topics include the basic concepts and architecture of data base systems, the Relational Data Model concepts, integrity constraints, schemas, views, SQL data modeling using the Entity-Relationship (ER) model as well as using the Enhanced ER model, UML diagram, practical data base design methodology, normalization process, physical design and system implementation and tuning. Data base security issues will also be discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: INSC.
Prerequisite: CISC 1600.

CISC 3580. Cybersecurity and Applications. (4 Credits)
This course provides an introduction to cybersecurity concepts, technologies, and related applications. It covers cybersecurity basics, public and private key cryptosystems, access control, firewalls, security protocols, malware detection, cyber attacks, and related topics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CYSC.
Prerequisite: CISC 1600.

CISC 3593. Computer Organization. (4 Credits)
A further look at the design of a computer system, including instruction decoding and execution, memory organization, caching, I/O channels and interrupt systems. RISC and CISC paradigms. Microcoding, pipelining, multiple instruction issue and multiprocessing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: CISC 1600 and (CISC 1400 or MATH 2001 or CISC 1100).

CISC 3595. Operating Systems. (4 Credits)
The objective is to develop an understanding of the role of operating systems in the management of the hardware used to process application programs. Problems of resolving deadlock, exclusion, and synchronization, and inter-process communication, queuing, and network control are covered. Topics include: memory management, device management, interrupt systems and systems programming. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: CISC 2200 and CISC 3593.

CISC 3598. Software Engineering. (4 Credits)
Emphasis is placed on software design process, software implementation, software testing and maintenance. System and software planning, requirement analysis and software concept will be discussed. Topics covered include detailed design tools, data structure-oriented design, program design, program implementation and testing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: CISC 2200.

CISC 3600. Secure Cyber Networks. (4 Credits)
This course covers the essentials of designing and building a secure local area network, incorporating all elements of the seven layers of ISO-OSI Model. Students will learn the capabilities, limitations, and vulnerabilities of a cyber network. Students will gain hands-on experience by implementing a secure network environment that is robust in preventing various adversary actions including, among others, extreme backing and virus propagation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CYSC.
Prerequisite: CISC 1600.

CISC 3650. Forensic Computing. (4 Credits)
Computing and digital technology has transformed society and the way we live. Today, our world is filled with an array of complex multi processing and interconnected machines that we have all become accustomed to. This course studies technologies and practices for investigating the use, misuse and the adversarial potential of computing systems and digital devices. It will provide insight into the digital forensics and legal world, emphasized with practical lab projects. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CYSC.
Prerequisite: CISC 1600.
CISC 3800. Internship Computer Science. (3 Credits)

CISC 3850. Information Retrieval Systems. (4 Credits)
The basic concepts and principles of information retrieval, covering the definition, nature and needs of information systems. Course topics include the design of IR systems, algorithms for document and request translation, natural to descriptor language transformation, semantic information data base organization and feedback problems in information retrieval systems. Application in MIS and expert systems will be discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INSC, NMDD, NMRI.
Prerequisite: CISC 1600.

CISC 3999. Tutorial. (3 Credits)
Independent research and readings with supervision from a faculty member.

CISC 4001. Computers and Robots in Film. (4 Credits)
This course will examine how historical, socio-economic and psychological factors impact the portrayal of robots and computers in film. The course will focus on a small number of key questions, such as: why are computers and robots so often portrayed as trying to take over the world and what is the role of humans in our increasingly computerized society. The class will require the viewing of 10-15 films and extensive class discussion of these films. This course satisfies the ICC requirement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, CCUS, COMC, COMM, DTEM, ICC, NMDD, NMRI.

CISC 4006. Brains and Behavior in Beasts and Bots. (4 Credits)
This course is an interdisciplinary, comparative study of human, animal and robot behavior, in which both Psychological and Computer Science disciplines provide mutually enriching and contrasting ways to understand behavior. This course will focus on several key questions and issues in natural animal and human behaviors taken in relation to the 'designed' behaviors of single and multiple robot systems as well as to human-robot behaviors. It offers students a hands-on introduction to design and build robot behaviors using robotics kits – an Engineering or Computer Science perspective, and then experimentally evaluate behaviors and compare with similar human and animal behaviors, a Psychological perspective. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, NESY.

CISC 4020. Bioinformatics. (4 Credits)
This course involves the study of the sequence, structure and function of genes and proteins in all living organisms. The machine learning, data mining, information fusion and computational techniques for analyzing large biological data sets will be presented. Topics include: genomics, proteomics, phylogenetics, microarray and gene expression, disorder and disease, virtual screening and drug discovery, databases, data mining, and ethical, societal, and legal issues. This course will have a laboratory component and exercises. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INSC, NESY, NEUR.

CISC 4080. Computer Algorithms. (4 Credits)
The study of a broad variety of important and useful algorithms for solving problems suitable for computer implementation. Topics include mathematical algorithms, sorting and searching, string processing, geometric algorithms, graph algorithms, combinatorial optimization techniques, and other advanced topics: average and worst-case analysis, time and space complexity, correctness, optimality, and implementation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: CISC 2200 and (CISC 2100 or MATH 2001).

CISC 4090. Theory of Computation. (4 Credits)
An introduction to the classical and contemporary theory of computation: finite state automata and regular expressions, context-free languages and pushdown automata, computability by Turing machines and recursive functions; undecidability problems and the Chomsky hierarchy; introduction to computational complexity theory and the study of NP-complete problems. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: CISC 2200 and (CISC 2100 or MATH 2001).

CISC 4400. Mobile Device Programming. (4 Credits)
This course provides a hands-on introduction to mobile device (smartphone, tablet) programming, with a focus on Android based devices. Based on conceptual understanding of the Android operating system and its API frameworks, students practice with Android application development through projects with features including user interface design, multimedia, web application, sensor access, and networking. Design criteria such as energy awareness, security, and privacy will be emphasized in all projects. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: CISC 2000 or CISC 3400.

CISC 4510. Computer Security Systems. (4 Credits)
Topics include vulnerabilities of operating systems and data bases, types of attacks, hardware aids, administrative responsibilities, classical and public-key encryption, and disaster recovery and planning. Pre-req: CISC 2200 required or by permission. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CYSC.
Prerequisite: CISC 4500.

CISC 4515. Advanced Database Systems. (4 Credits)
Emphasis is placed on effective data base design. Topics include concurrency control, recovery techniques, security, and integrity considerations. Concepts and design principles, distributed data base systems, and data base machines will also be presented. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: CISC 3500 or CISC 2200.
CISC 4597. Artificial Intelligence. (4 Credits)
Definition and rational of heuristic approach; cognitive processes; objectives and scope of artificial intelligence; general information processing and problem solving, including learning, representation, adaptation and use of knowledge; analysis and simulation of inductive and deductive process; natural language processing; robotics: man-machine interaction. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: NESY, NEUR.
Prerequisite: CISC 2000.

CISC 4615. Data Communications and Networks. (4 Credits)
The course presents the basic concepts of data communications: data transmission, data encoding, data link control, multiplexing, error detection techniques. It covers communication networking techniques: switching, protocols line control procedures, local networks. Communication carrier facilities and systems planning considerations will also be discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CYSC, INSC.
Prerequisite: CISC 1600.

CISC 4621. Machine Learning. (4 Credits)
This course covers methods, models and algorithms used in the exploratory data analysis and knowledge discovery of large-scale data sets and multi-model databases in complex living or artificial systems. Topics include induction logic reasoning, statistical inference, support vector machines, graph algorithms, neural networks, and evolutionary computation. Practical projects will be drawn from information engineering, computing and information retrieval. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NESY, NEUR.
Prerequisite: CISC 2000.

CISC 4625. Wireless Networks. (4 Credits)
This course covers the architecture, protocols, and applications of wireless communications and networks. Topics include: wireless networking, routing, standards including 802.11, Bluetooth and others; embedded operating systems, programming tools, power consumption, mobility, resource management, operating systems and security. Examples and experiments will be drawn from ad-hoc and sensor networks, wireless LAN, satellite networks, networking and human-machine interactions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: CISC 4615.

CISC 4631. Data Mining. (4 Credits)
This course introduces data mining methods for extracting knowledge from data. It balances theory and practice—the principles of data mining methods will be discussed, but students will also acquire hands-on experience using state-of-the-art software to solve real-world problems. Covered topics include: data preprocessing, classification and prediction (decision trees, neural networks, etc.), association analysis, and clustering. Additional specialized topics of interest may also be covered (e.g., web and text mining). Applications are drawn from a variety of areas, such as: marketing, business, economic forecasting, and bioinformatics. Non-majors are encouraged to take this course since the methods are applicable to a wide range of disciplines. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INSC, NEUR.

CISC 4641. Wireless Sensor Data Mining. (4 Credits)
This course surveys the emerging field of wireless sensor networks and in, the use of cell phones and other mobile devices as platforms for collecting sensor data. This class will also focus on how sensor data can be mined in order to produce useful knowledge. Topics will include geo-spatial data mining, automatic customization of devices, biometrics, and ubiquitous computing. Various sensor modalities will be studied, including accelerometer data, GPS data, audio data, image data and the data generated from a variety of scientific equipment. This research-oriented course will have students read 2-3 papers a week and write short summaries of each paper. Each student, working individually or in small groups, will be expected to work on a related course project. Android cell phones will be made available to students for collecting sensor data and for the course projects. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

CISC 4650. Cyberspace: Issues and Ethics. (4 Credits)
The impact of computer information and communication technology on the way people act, think, live, behave and communicate will be studied. Students will be given hands-on experience of the Internet. Information and communication facilities such as the World Wide Web, gopher, chat groups and Bulletin boards are investigated. The course is designed to promote the student’s awareness of and sensitivity to the ethical and social dimensions of living in the contemporary world, which is undergoing an information revolution. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, COMM, EP4, NMDD, NMDE, VAL.

CISC 4660. Minds, Machines, and Society. (4 Credits)
While assuming no mathematical or computer background, this course examines modern computing and its impact on society. Perceptions of technology are challenged while discovering how technology affects our daily interactions. The notion of computer intelligence is studied in depth and the effect of such technology on making both moral and practical decisions in the future is examined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, CCUS, COMC, EP4, NMDD, NMDE, VAL.
CISC 4700. Network and Client Server. (4 Credits)
This course deals with network computing the client/server environment. Topics include: operation systems, network protocols, network architecture, network security and network computing using languages such as PERL, Visual Basic and Java. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: CISC 2200.

CISC 4750. Scientific Computation Using Matlab. (4 Credits)
An introduction to computer science concepts, programming skills, and algorithmic problem-solving in MATLAB. Assumes basic programming background. Design and analysis of numerical algorithms including numerical integration, numerical differentiation, curve fitting and differential equations. Introduction to Monte Carlo methods. Application of MATLAB in computational science and computational engineering. Solution of linear systems and eigenvalue problems. Complex numbers algebra. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: CISC 1600 or MATH 1207.

CISC 4800. Project and Internship. (4 Credits)
Students will work in teams on large projects selected from practical problems in the public or private sector. Students also gain on-job experience by working as interns in the field of computer science and information technology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

CISC 4900. Seminar and Directed Study. (4 Credits)
Students attend seminars given by outside professionals, read technical articles, and present their study under the guidance of the instructor. Student will gain state-of-the-art knowledge and information in computer and information science. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

CISC 4999. Tutorial. (1 to 4 Credits)
Juniors or seniors may undertake independent study if their topics are approved by the professor and the program facilitator.

CISC 5009. Network Essentials. (3 Credits)
This graduate course covers the essentials of designing, building and maintaining a local area network, incorporating all elements of the seven layers of the ISOOSI Model. Students will learn various aspects of networking fundamentals including TCP/IP, network topology, network design, hardware configuration, software configuration, installation, and maintenance. Students will gain hands-on experience by performing the tasks necessary to engineer a working network from the ground up.
Attributes: CSYC, CSNS, DATA.

CISC 5020. Computer Graphics. (3 Credits)
This course provides a rigorous introduction to computer-based graphical techniques. Core programming and mathematical concepts related to computer graphics are covered as needed. The emphasis will be on the hands-on implementation and synthesis of software applications that employ graphics. After completing this course, students will be proficient in developing and implementing graphics modules; have an understanding of software and hardware interfaces relating to continuous accessing of visual screen objects; be able to understand GUI interfaces; and have a working knowledge of the major mechanisms related to 2D and 3D computer graphics development, including animation, projection, and color migrations.

CISC 5030. Internet and Web Programming. (3 Credits)
This course covers web programming in the internet and interactive environment. Students will gain understanding of operating system usage on a server and interactive web design. Languages used will include PERL, HTML, CGI, and JavaScript.
Attributes: CSNS, CSSO.

CISC 5100. Foundations of Comp Sci. (3 Credits)
This course is designed to give a solid foundation for the study of computer science at the graduate level. It covers a wide variety of subjects including recursion and induction, analysis of algorithms, graph theory, pattern searching and processing, logic, complexity and optimization.

CISC 5109. Big Data Analytics. (3 Credits)
This course focuses on solving big data analytics problem in real world such as finance, healthcare, and social media, by applying state-of-the-art big data analytics techniques and tools. It also aims to fostering and enhancing students’ data analytics and software development capabilities in handling big data. After taking this class, students should be able to employ big data management and analytics tools to conduct problem solving and investigation in big data fields. The following topics will be covered in this class: Principle of big data analytics, Apache Spark, Spark machine learning, high-frequency trading, EHR and TGGG data mining, social network data analytics, and big data visualization techniques, etc. This course assumes students grasp at least one programming language (e.g. Python/R)
Attributes: CSAI, CSDA.

CISC 5120. Optimization Methods. (3 Credits)
This course deals with numerical methods for convex optimization problems that arise in information sciences. The study begins with properties of convex sets and analyzes a number of unconstrained and constrained extremal problems. There will be a review of linear systems and introduction to practical implementation aspects for large-scale, nonlinear problems. The course will also consider optimality criteria, duality theory, and applications in machine learning and modeling.

CISC 5200. Computer Language Theory. (3 Credits)
An introduction to computer language theory; finite state automata and regular expressions, pushdown automata and context-free languages, Turing machines, undecidability problems and Chomsky hierarchy; and an introduction to computer complexity and the study of NP-complete problems.

CISC 5220. Data Structures. (3 Credits)
This course provides a survey and analysis of the major types of structures in programs that handle data; arrays, stacks, queues, linked lists, trees and graphs. Recursive, iterative, search and sorting techniques are also studied. This 'bridge' course is intended for graduate students lacking an undergraduate CS degree and will not be counted toward the requirements for the MSCS degree.

CISC 5250. Computer Organization. (3 Credits)
Study of the design of a computer system, including instruction decoding and execution, memory organization, caching, I/O channels and interrupt systems. RISC and CISC paradigms. Microcoding, pipelining, multiple instruction issue and multiprocessing.

CISC 5300. Computer Programming C++. (3 Credits)
C and C++ programming: The course will focus on object-oriented programming using C++. Topics include objects, methods, Abstraction, Encapsulation, Inheritance and Polymorphism. Particular emphasis will be given to real-life programming problems.
Attribute: ASDM.
CISC 5325. Database. (3 Credits)
With the proliferation of abundant data, knowledge of database systems has become a key requirement of employers across many industries and sectors. Topics covered in this course include the basic concepts and architecture of database systems, the Relational Data Model concepts, integrity constraints, schemas, views, SQL, and the several sets of skills needed to automate database queries. This class includes hands-on experience in the classroom, exercising key skills in SQL such as aggregation, organizing, filtering, and table joining. It includes the use of popular systems such as Pandas/Python/Jupyter Notebook and others to interface to popular databases. Automation of query operations is addressed, including automating data preparation; cleaning; SQL statements for data insertion; updating, aggregating, filtering, merging, organizing, and funneling results seamlessly into forms ready for visualization and analysis; and SQL parameter tuning based on data. Some skills in Excel for database-related work are also covered.

CISC 5350. Financial Programming. (3 Credits)
This is an introductory programming course using C++ that features the object-oriented language, in addition to data structures. The basics of programming, including data types, pointers, arrays, control structures, and functions are covered. The course then continues to more advanced topics such as dynamic memory managements, data structures, the Standard Template Library, and object-oriented programming: classes (encapsulation), inheritance, and virtual functions (polymorphism). Programming examples and exercises will be drawn from the field of finance. Additional topics include: an introduction to design patterns, as well as relational database programming with SQL.

Attributes: ASDM, CSSO.

CISC 5352. Financial Programming and Applications. (3 Credits)
This course aims at developing students’ capabilities in financial programming. It assumes prior knowledge of C++ programming. The topics in this class include foundations of financial programming, financial models and its implementations (e.g., ARCH, ARMA), algorithmic trading, machine learning methods in algorithmic trading, high frequency financial data analytics, post-trade profitability analysis, financial big data analytics (TAO), and Monte Carlo Simulations. After taking this class, students should be able to implement complex financial models, develop trading algorithms, and develop financial trading and business analytics software.

Attribute: DATA.

CISC 5380. Programming with Python. (3 Credits)
This course is an introduction to the Python programming language for students without prior programming experience. Students will learn how to use Python both interactively and through a script. The topics covered include variables, strings, numbers, control statements (conditional statements and loops), lists and sequences, functions, dictionaries, recursive functions, classes, and iterators and generators. Python is a programming language with a relatively simple syntax and a powerful set of libraries. After completion of this course, students will be competent in using Python libraries to process numerical and textual data. Working with Python packages for statistical and numerical data analysis, as well as the natural language processing problems, is explored. Matplotlib, a Python 2D plotting library which produces publication-quality figures in a variety of hard-copy formats, is used throughout the course.

Attribute: CSSO.

CISC 5400. Discrete Structures. (3 Credits)
An introduction to Discrete Mathematics; propositional and predicate logic, first and second principle of mathematical induction, sets, counting, inclusion/exclusion principle, binomial theorem, relations and functions, introduction to matrix algebra, introductory graph theory.

CISC 5410. Mobile Device Programming. (3 Credits)
This course provides a hands-on introduction to mobile device (smartphone, tablet) programming. Students will learn about mobile operating systems and API frameworks and will develop mobile programs with an emphasis on user interface design, multimedia, web application, sensors, and networking. Design criteria such as energy awareness, security, and privacy will be emphasized.

Attributes: CSNS, CSSO.

CISC 5420. Applied Statistics and Probability. (3 Credits)
This course provides an introduction to applied statistics and probability theory. It is intended for students who may have some basic background in probability, at the level of CISC 5400 Discrete Structures, but not a full semester course in statistics. This course will cover discrete random variables, probability distributions, sampling schemes, the central limit theorem, confidence intervals, hypothesis testing, correlation analysis, and Analysis of Variance (ANOVA). Students will also gain experience using a statistical package.

CISC 5450. Mathematics for Data Science. (3 Credits)
This course is an introduction to the mathematical concepts that are essential to data science. Course content covers three fundamental areas of mathematics: probability, statistics, and linear algebra. Topics include probability spaces, conditional probability, independence, discrete and continuous random variables, multivariate random variables, expectation, descriptive statistics, Bayesian statistics, hypothesis testing and inference, set theory, binomial theory, vector spaces, inner product and norms, matrix operations, Eigenvalues, graph connectivity, and combinatorial space.

Attributes: DATA, DATI.

CISC 5500. Data Analytics Tools and Scripting. (3 Credits)
This course teaches the basic tools used in data science, particularly the scripting skill in a few widely used languages: Bash, SQL, and R. Starting with their syntax features, we will proceed from how to use these tools’ automating data-wrangling tasks to making use of data analysis and visualization libraries. For Bash, the focus is common system administration tasks, including job controlling. For SQL, we introduce the fundamental concepts of relational databases, as well as common tasks of data querying, data manipulation, and data definition. For R, we emphasize its data-centered features and how to utilize a large variety of packages. The class includes many hands-on practices in projects of various scales. With this training, students will be well prepared for more advanced and specialized topics in data science.

Attributes: CSDA, CSSO, DATA, DATI, PMTM.

CISC 5520. Programming Languages. (3 Credits)
This course introduces the basic concepts behind programming languages, illustrating those concepts with concrete examples, and exploring the reason why languages were designed in certain ways. Languages using static and dynamic typing and functional and object-oriented languages are compared. Students completing this course will be able to learn new programming languages quickly and choose the most appropriate language for a given task. Students will be exposed to several diverse programming languages.

Attribute: CSSO.
CISC 5550. Cloud Computing. (3 Credits)
This course provides the needed knowledge to understand the
technologies and services that enable cloud computing, discusses
different types of cloud computing models and investigates security
and legal issues associated with cloud computing. Topics include Cloud
infrastructure components and interfaces, essential characteristics of
Cloud platforms, common deployment modes, techniques for deploying
and scaling cloud resources and security implication of cloud resources.
Attributes: CSNS, CSSO, CYSM, DATA.

CISC 5595. Operating Systems. (3 Credits)
This course studies how operating systems manage computer hardware,
thereby supporting application programs. Topics covered include
multiprogramming, synchronization, inter-process communication,
memory management, file systems and I/O device management. The
concepts and theories presented in this class are reinforced by actual
system programming projects.

CISC 5640. Nosql Database Systems. (3 Credits)
This course will introduce the students to the core concepts of NoSQL,
a new class of non-relational database management systems. NoSQL
databases are used to perform CRUD operations over massively
distributed big data systems. This course will explore the limits of
RDBMS and the technical scenarios where NoSQL databases triumph
over RDBMS. We will study the core concepts of four different NoSQL
databases: key-value, column family, document, and graph. For each of
these databases, we will take a closer look at their technical aspects
including their business needs for different big data systems. This course
has several hands-on labs accompanied by relevant projects designed
for learning DynamoDB for key-value, MongoDB for document, Cassandra
for column family, and Neo4j for graph NoSQL databases. Finally, we will
discuss the techniques for choosing one of the four NoSQL databases to
meet the requirements of a specific use case.
Attribute: DATA.

CISC 5650. Cybersecurity Essentials. (3 Credits)
This course provides a holistic perspective on the structure of the
cyber space ecosystem, the interoperability of the physical and social
networks, and methods and techniques in building a functional cyber
space which is secure and sustainable. Topics include global networking
and communication, data mining and information fusion, secure cyber
network and intrusion detection, forensic computing and investigation,
incident response and risk management, security and privacy, security
and privacy, and policy and assurance. The course also features expert
lectures and case-based projects on cyber security in several areas
including health care, finance, media, government, defense, and critical
infrastructures.
Attributes: CSCY, DATA.

CISC 5660. Data Science for Cybersecurity. (3 Credits)
Cybersecurity attacks have typically involved enormous amounts of data,
and the need for more sophisticated methods and tools for analyzing
that data has only increased with the advent of more sophisticated and
varied attacks. This course will introduce data science (machine learning
and data mining) methods for manipulating, visualizing, and analyzing
large amounts of data, with specific applications to cybersecurity.
The methods will cover classification (decision trees, naïve Bayes,
networks, etc.), clustering (K-means), and anomaly detection,
and applications will be drawn from the following cybersecurity areas:
malware and spam detection; phishing attacks; intrusion detection; web
security; authorization attacks; and behavioral biometrics. Students will
become familiar with data science toolkits and will apply the methods
they learn to real world data sets. No prior machine learning or data
mining experience is required, although students should have familiarity
with computer programming.
Attribute: CSCY.

CISC 5700. Cognitive Computing. (3 Credits)
This course covers method, practices and appreciations of cognitive
computing. Topics include: structured vs. unstructured information
management, data correlation vs. information diversity, concepts vs.
keyword search, description vs. predictive analysis, NLP and semantic
integration, deep Q&A, and computing data rest vs. in motion.
Attributes: CSAI, CSDA, DATA, PMTM.

CISC 5710. Introduction to Behavioral and Physical Biometrics. (3
Credits)
The need to ensure the security of computer systems and information
is of paramount importance in our increasingly digital world. However,
traditional passwords and keys often do not provide an adequate level
of security, and consequently, biometric authentication and identification
methods are becoming increasingly popular. This course will survey
a wide variety of physiological and behavioral biometric methods
and technologies. The physiological biometrics that will be covered
include fingerprints, face, iris, retina, and ear shape, while the behavioral
biometrics covered are based on gait, keystroke dynamics, voice,
signature analysis, and general usage/activity patterns. The relative
strengths and weaknesses of the various forms of biometrics will be
evaluated. Other topics that will be covered include implementation
issues, the use of machine learning for building biometric models, metrics
for biometric evaluation, spoofing, privacy and ethical issues, the relation
to forensic science, and the use of biometrics in the judicial system.
Students will also gain hands-on experience through laboratory and
homework exercises and a course project.
Attribute: CYSM.

CISC 5725. Network Administration. (3 Credits)
Provides and introduction to system administration tools and principles.
Students will learn how to set up a Local Area Network through hubs,
switches, and routers (wired or wireless), and will learn how to configure
a network server to provide common services such as HTTP DNS, and
secure remote access. There will be a strong emphasis on laboratory
work and students will work in groups to complete a series of network
administration projects.
Attributes: CSCY, CSNS.
CISC 5728. Security of e-Systems and Networks. (3 Credits)
This course deals with the fundamental concepts and tools of security of e-based systems and networks and its range of applications. Among the topics to be covered in this course include: security of e-commerce, e-business, e-service, e-government, authentication of users, system integrity, confidentiality and digital signature, e-security tools such as public key infrastructure (PKI) systems, bio-metric-based security systems, trust management systems in communications networks, intrusion detection systems, protecting against malware and computer network security risk management.
Attributes: CSCY, CSNS, CYSM.

CISC 5750. Information Security and Ethics. (3 Credits)
The goal of this course is to give students a comprehensive introduction to information security and its applications in relations to ethics. It covers topics in cryptography, access control, network and operating system securities, software security, database security, cyberlaw and ethics. The students are assumed to have basic knowledge in programming and discrete structures.
Attributes: CSCY, DATA.

CISC 5770. Intelligence in Cybersecurity. (3 Credits)
This course will focus on the role of intelligence in cybersecurity. Students will become familiar with the application of cyber-threat intelligence in an enterprise environment, and how organizations employ this discipline to formulate cybersecurity strategies and strengthen defenses. The course will examine the intelligence cycle and its role in enterprise cybersecurity, with an emphasis on the analysis phase. The class will consider sources of threat intelligence, including open and paid feeds, open source intelligence (OSINT), and vendor services, and will develop an understanding of the uses of each. Through a series of practical exercises, students will learn about structured analysis methods, and will be introduced to analytic tools that include the Cyber Kill Chain, Diamond Model of Intrusion Analysis, and MITRE ATT&CK framework. Students will learn to use these tools to analyze cyber intrusions and threat-actor tactics, techniques, and procedures (TTPs), and to apply them across the tactical, operational, and strategic levels of intelligence. Upon completion of the course, students will have a solid foundation in the skills necessary to analyze, contextualize, and prioritize a variety of cyber threats.
Attribute: CYSM.

CISC 5790. Data Mining. (3 Credits)
This course covers methods, algorithms, and applications of data mining. Topics include: representation, measurement, and visualization of data; analysis of large data set using information fusion and statistical combinatorial, and computational techniques; data mining algorithms and models (e.g. decision trees, neural networks, associative rules, support vector machines, machine learning, and genetic algorithms); descriptive vs. predictive modeling; and management of large diversified database systems. Applications are drawn from a variety of areas including information retrieval, market analysis and CRM, e-commerce, financial computing, economic forecasting, social choices, security and safety analysis, bioinformatics, and virtual screening for drug discovery and development.
Attributes: ASDM, CSDA, DATA, DATI, IPED, PMTM.

CISC 5800. Machine Learning. (3 Credits)
This course covers the mathematical and algorithmic underpinnings of core methods in machine learning. Students learn to develop and implement classifiers and learners, using calculus and linear algebra, and they consider learning on fully labeled, partially labeled, and unlabeled data. Students also analyze and implement dimensionality reduction methods. Topics include gradient ascent/descent, support vector machines, neural networks, hidden Markov models, information criteria, factor/component analysis, and expectation-maximization.
Attributes: CSAI, CSDA, DATA, DATI.
Prerequisites: CISC 5450 and CISC 5380 and (CISC 5790 or CISC 6930).

CISC 5825. Computer Algorithms. (3 Credits)
The study of a broad variety of important and useful algorithms for solving problems suitable for computer implementation. Topics include mathematical algorithms, sorting and searching, string processing, geometric algorithms, graph algorithms, combinatorial optimization techniques, and other advanced topics; average and worst-case analysis, time and space complexity, correctness, optimality, and implementation.

CISC 5835. Algorithms for Data Science. (3 Credits)
This course is an introduction to algorithms, especially those that are essential to data science. This course covers algorithms for sorting and searching, as well as greedy algorithms, dynamic programming, and graph algorithms. In addition, this course will focus on time and space analysis of algorithms (including big-O time and space analysis), recurrences, loop invariants, lower bounds, hashing, and NP-completeness. Some advanced data structures—such as trees, stacks, and queues—will be reviewed.
Attributes: CSDA, CSSO, DATA, DATI.

CISC 5850. The Social Network. (3 Credits)
This course is an introduction to social networks which entails the structure, the function, and various applications. Topics include the Internet, information networks and the World-Wide Web, information retrieval and search engine optimization, social media analysis, crowd sourcing, social activity and voting, graph theory and social networks, network dynamics, text mining, natural language processing, and concept search. Emphasis will be on the social network itself.
Attributes: CSDA, CSSO, CYSM.
Prerequisites: CISC 1600 or CISC 1400.

CISC 5900. Information Fusion. (3 Credits)
A study of the structure and function of information fusion. Efficient and effective combination of data or information from a variety of diverse sources, sensors, features, and decisions. Applications and case studies of information fusion and decision making to a plethora of disciplines including science and engineering, cybersecurity and digital networks, medicine and health, social choices and human cognition, business and finance, and management and innovation.
Attributes: CSAI, CSDA, DATA, DATI, PMTM.

CISC 5920. Compiler Construction. (3 Credits)
An introduction to syntax-directed translation of high-level languages into executable code. This course covers both theoretical and practical aspects. Topics include lexical analysis, syntax analysis, intermediate code generation, and optimization; time permitting, object code generation and memory use will be covered. Students who take this course should have completed courses in discrete mathematics and data structures (it is recommended to have also completed a course in computer language theory/theory of computation).
CISC 5950. Big Data Programming. (3 Credits)
Big data analytics has been an emerging field in data mining, health care, bioinformatics, and business analytics. This course provides students both theoretical background and hands-on computing techniques in big data analytics and its applications. The students will learn how to collect, query, and analyze data, and will study related visualization and storage techniques from a computing standpoint. Students will also be exposed to theoretical models in big data analytics. This course covers topics in big data essentials, big data management, algorithms in big data mining and knowledge discovery, and big data applications in health information, social media, finance, mobile computing and other fields. The students are expected to complete several large big data projects and present their results.

Attributes: CSDA, CSSO, DATA, DATI.
Prerequisites: CISC 5380 and (CISC 5790 or CISC 6930).

CISC 6000. Deep Learning. (3 Credits)
This course is an introduction to deep learning, a branch of machine learning typified by deep neural networks. Deep learning is behind many recent advances in AI, ranging from text mining and image recognition to machine translation, planning, and even game playing and autonomous driving. In this course, we will cover a range of topics including basic neural networks, Convolutional network, RNN, LSTM, GAN, Autoencoder and Restricted Boltzmann Machine (RBM). Various learning techniques such as Adam, Dropout, BatchNorm, Xavier initialization, CD-K sampling, etc., will also be explored throughout the course. This is a programming intensive course. Students are required to be proficient in Python programming and have knowledge of basic Machine Learning algorithms and techniques.

Attribute: DATA.
Prerequisite: CISC 5800.

CISC 6070. Red Teaming. (3 Credits)
The intent of this course is to provide students, who are familiar with the foundational knowledge of cybersecurity and penetration testing, with the skills and technology necessary to conduct sophisticated attacks against well-resourced defenders. Students will learn and practice techniques to gain initial access, establish persistence, move laterally, and gain high-level privileges in order to complete objectives. Throughout the course, discussions of modern defensive techniques and capabilities will be discussed as well as known countermeasures. Students who successfully complete the course will be able to participate in red team operations across verticals and be prepared to perform research into discovering and improving techniques. Most importantly, students will be able to understand and improve in-place cybersecurity defenses utilizing an attacker-oriented mindset.

Attributes: CSCY, CYSM.

CISC 6080. Capstone Project in Data Science. (3 Credits)
The goal of this class is to sharpen students’ skills in data science technologies and knowledge. Students are required to finish a large capstone project and are expected to present and write one or more research papers in this class.

CISC 6081. Data Science Practicum. (3 Credits)
This course is for students who desire experience in applying the knowledge and skills acquired in their coursework and laboratory sessions. Students are responsible for arranging a practicum/internship with a business or organization that is related to data science.

CISC 6085. Master's Thesis in Data Science I. (3 Credits)
Exceptional students may choose to write a master's thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student's proficiency in the subject material. A thesis supervisor will be assigned by the department and an oral defense is required.

CISC 6086. Master's Thesis in Data Science II. (3 Credits)
Exceptional students may choose to write a master's thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student's proficiency in the subject material. A thesis supervisor will be assigned by the department and an oral defense is required.

CISC 6090. Capstone Project in Cybersecurity. (3 Credits)
The goal of this class is to sharpen students’ skills in Cybersecurity by designing and implementing a capstone project. After this class, students should gain a deep understanding in state-of-art cybersecurity, technologies and knowledge. Students are required to finish a large capstone project and are expected to present and write one or more research papers in class.

CISC 6091. Cybersecurity Practicum. (3 Credits)
This course is for students who desire experience in applying the knowledge and skills acquired in their course work and laboratory sessions. Students are responsible for arranging a practicum/internship with a business or organization that is related to cybersecurity.

Attribute: CYSM.

CISC 6095. Master's Thesis in MScy I. (3 Credits)
Exceptional students may choose to write a master's thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student's proficiency in the subject material. A thesis supervisor will be assigned by the department and an oral defense is required.

CISC 6096. Master's Thesis in Cybersecurity II. (3 Credits)
Exceptional students may choose to write a master's thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student's proficiency in the subject material. A thesis supervisor will be assigned by the dept. and an oral defense is required.

CISC 6100. Software Engineering. (3 Credits)
Emphasis is placed on software design process, software implementation, software testing and maintenance. System and software planning, requirement analysis, and software concept will be discuss. Topics covered include detailed design tools, data structure-oriented design, program design, program implantation, and testing.

Attribute: CSSO.

CISC 6170. Special Topics in Data Science. (3 Credits)
This course concentrates on special state-of-the-art topics in the field of data science. The course content will change from semester to semester.

CISC 6200. Computer Elements & Arch. (3 Credits)
Study of the structure, behavior and design of computers; review of the organization of a computer to the gate, register and processor levels, processor design including parallelism, control design and microprogramming, memory organization, computer system organization including multiple CPU systems. The hardware/software interface and its implications for operating system design will be addressed.
CISC 6210. Natural Language Processing. (3 Credits)
Natural language processing (NLP) is one of the most important technologies of the information age, and a crucial part of artificial intelligence. It is the branch of machine learning and data science that deals with text and speech. This course is designed to introduce how to use computational and statistical methods to give insight into observed human language phenomena and make computers perform various tasks with human languages. The learning outcomes for students are to learn about major NLP issues and solutions, to become agile with NLP programming, and to be able to design, implement, and understand their own NLP applications. Topics include (but are not limited to): Syntactic Parsing, Semantic Analysis, Summarization and Information Extraction, Machine Translation and Neural Networks Models for NLP (RNN, CNN, etc.)

Attribute: DATA.
Prerequisite: CISC 5800.

CISC 6300. Computational Finance. (3 Credits)
This course covers the state-of-the-art quantitative models and their implementations in financial engineering with an emphasis on the computational methods of handling large-scale financial data or big data. The major topics include fixed-income pricing, derivatives and equity instruments, financial time series analysis, numerical PDE methods, Monte Carlo simulations, algorithmic trading models, and related topics. This course assumes students have proficiency in C++ and basic knowledge in quantitative finance models, or equivalent experience/training. Students are required to complete several large projects and present their results in class.

Attribute: CSSO.

CISC 6345. Advanced Database Systems. (3 Credits)

CISC 6350. Advanced Financial Programming. (3 Credits)
This course aims to enhance students' software development capabilities and machine learning skills in financial computing. After taking this class, the students should be able to implement complicated financial models or trading algorithms. This course assumes audiences have proficiency in C++ and have basic knowledge in quantitative finance models. The following topics will be covered in this class. Introduction to Financial Software Design; Boost C++; Black-Scholes-Merton variants; Finite difference methods and trees in Option pricing; Monte Carlo Simulations; Machine Learning Models for Trick data; Implementing High-Frequency Trading Systems, and Post-Trade Profitability Analysis.

Attribute: DATA.
Prerequisite: CISC 5350.

CISC 6352. Advanced Computational Finance. (3 Credits)
This course covers the state-of-the-art quantitative models and algorithms and their implementations in financial engineering with an emphasis on the computational methods of handling large-scale financial data or big data. The major topics include derivatives and equity instruments, financial times series analysis, numerical PDE methods, Monte Carlo simulations, algorithmic trading and high frequency trading (HFT) models, risk management of HFT, and related topics. This course assumes students have proficiency in C++ or equivalent programming knowledge. The knowledge in quantitative finance models is recommended but not required. Students are required to complete several large projects and present their results in class.

Attributes: CSSO, DATA.

CISC 6375. Object Software Design. (3 Credits)
This course is designed as an advanced course in Software Engineering. It includes the following: Short introduction to Object Oriented (OO) technology; Comparisons of C++ and Smalltalk for OO development; the definition of system requirements using OO techniques; the evaluation and selection of OO methods, techniques, and management tools; the collection analysis and testing and use of project metrics; the establishment of requirements for testing and quality assurance. The course will use examples of OO technology in the development of Information Systems and of Real-Time Systems.

Attribute: CSSO.

CISC 6376. Software Design Patterns. (3 Credits)
This programming-intensive course provides an in-depth view of software design patterns, which are reusable solutions to common software problems. The course will begin by providing the rationale and benefits of software design patterns. Example problems will then be studied to investigate the development of good design patterns. Specific design patterns, such as the Observer, State, Adapter, Strategy, and Abstract Factory patterns, will be discussed and utilized in significant programming assignments. Students will become familiar with common design patterns, learn to use design patterns appropriately, and improve their object-oriented design and programming skills. Students will also learn to work collaboratively on significant programming projects. Prior knowledge of Object-Oriented Programming is required; CISC 6375 Object Software Design is recommended.

CISC 6400. Robotics and Animation. (3 Credits)
This course presents students with a thorough background in the method and practice of designing and programming advanced robotic and graphical systems, and will include topics such as motion planning, navigation and mapping, visual perception, depth perception (sonar, stereovision, laser ranging), sensor fusion, behavior-based systems, action planning, and multi-agent systems.

Attributes: CSNS, DATA.

CISC 6500. Bioinformatics. (3 Credits)
This course studies the relation of (interaction between) molecular biology and information science and the impact and applications of combinatorics, computing, and informatics on the biomedical sciences and clinical processes. Topics include: DNA sequence and alignment, database searching and data analysis, phylogenetic analysis and evolution, genomic and proteomics, structure and function, gene regulatory networks and metabolic pathways, microarray technology, and gene expression algorithms.

Attributes: CSNS, DATA.

CISC 6525. Artificial Intelligence. (3 Credits)
Introduction to the study of the ideas and techniques that enable computers to function intelligently; heuristic approach, cognitive processes, general information processing and problem solving, learning and reasoning; representation, adaptation and use of knowledge; analysis and simulation of inductive and deductive processes, natural language, robotics and man-machine interaction.

Attributes: CSAI, DATA.
CISC 6550. Systems Neuroscience. (3 Credits)
This is an introductory course in the study of the structure and function of the brain at the cellular, systems, and cognitive levels. It covers the cells of the nervous systems and how they process information such as electrical and chemical signals. It studies the aggregate, or networks, of neurons, how a brain develops and establishes its complex circuitry, and how they produce higher brain functions such as vision, movement, memory, and learning, perception, emotion, and consciousness. Both invertebrate and vertebrate nervous systems will be included.
Attributes: CSAI, CSDA, DATA.

CISC 6597. Capstone Project in Computer Science. (3 Credits)
The goal of this class is to provide the practical opportunity for students to combine skills they have learned during their computer science program and use them to design and implement a capstone project. Students are required to address all design, implementation, testing, and evaluation aspects of a large capstone project. They are expected to present and write one or more research papers in class detailing this work. Through this class, students should gain a deep understanding of state-of-art computer science technologies and knowledge, how they can be deployed in a practical application, and how they can be professionally documented and communicated.

CISC 6600. Secure Cyber Networks. (3 Credits)
This graduate course covers the essentials of designing and building a secure local area network, incorporating all elements of the seven layers of the ISO-OSI Model. Students will learn the capabilities, limitations, and vulnerabilities of a cyber network. Students will gain hands-on experience by implementing a secure network environment that is robust in preventing various adversary actions including, among others, extreme hacking and virus propagation.
Attributes: CSCY, CSNS, CYSM.

CISC 6630. Wireless Security. (3 Credits)
CISC 6650. Forensic Computing. (3 Credits)
Computing and digital technology has greatly transformed society and the way we live. Today, our world is filled with an array of complex multiprocessing and interconnected machines that we've all become accustomed to. This course studies technologies and practices for investigating the use, misuse and the adversarial potential of computing systems and digital devices. It will provide unparalleled insight into the digital forensics and legal world, emphasized with practical laboratory projects.
Attributes: CSCY, CYSM, DATA.

CISC 6660. Applied Cryptography. (3 Credits)
This course provides an introduction to cryptographic primitives and techniques that comprise the heart of secure protocols that are used in computer and network security. The course has the target of introducing students to the practical applications of cryptography with an overview of its theoretical basis. Students are expected to have some programming familiarity and basic mathematical skills. Covered topics include steganography, block and stream ciphers, secret key encryption (DES, AES, RC-n), primes, random numbers, factoring, and discrete logarithm; Public key encryption (RSA, Diffie-Hellman, Elliptic curve cryptography), Key management, hash functions, digital signatures, certificates and authentication protocols.
Attribute: CYSM.

CISC 6680. Intrusion Detection and Network Forensics. (3 Credits)
This course provides students both theoretical knowledge and hands-on techniques in identifying intrusion detection and network traffic analysis. The students will learn how to identify different attacks through different traceback techniques and grasp network analysis methods and tools to conduct information retrieval from a network forensic standpoint. This course covers topics in network forensics, intrusion detection and response, malware forensics, case studies, and related topics in cyber law and ethics. This class assumes the students have basic knowledge in network, and Linux/Unix operating systems. The students are expected to complete several programming oriented team projects and present their results.
Attributes: CSCY, CSNS, DATA.

CISC 6690. Cybersecurity in Business. (3 Credits)
Special emphasis on understanding the value cybersecurity and computer science professionals play in a business organization through the review of the major components and roles in a typical business and the demands and expectation of each. Business components studied include: marketing and sales; production and/or delivery; supporting functions (e.g IT, HR, etc.) and governance and control. Subject areas covered are the understanding of information assets, vulnerabilities and threat vectors related to those assets and the decision-making process supporting investments and maintenance of cybersecurity best practices. Students will better understand their role in a business organization and have a ready framework for cybersecurity decision making as a result of the class. In addition, students can expect to develop an appreciation for the characteristics of a business that best aligns with their personal goals and objectives.
Attribute: CYSM.
CISC 6700. Medical Informatics. (3 Credits)
Databases, information systems, and computer-based approaches have greatly transformed the research of medicine and the practice of physicians in the proper diagnosis and management of patients with a variety of common diseases and disorders. This course will cover the development and evaluation of methods for managing medical data and the integration of diverse and multifaceted hardware and software systems to provide enhanced value in medicine and healthcare. Informatics is not only embraced for imaging and diagnosis but also for clinical practice, decision making, quality and safety, and clinical research.
Attribute: CSDA.
Mutually Exclusive: HINF 6101.

CISC 6725. Computer Networks. (3 Credits)
This course provides an introduction to computer networks, network components, and message transport technologies; transmission links and protocols, SDLC, X.25, BSC, and start/drop; and network architectures, topological design and analysis, local area network design, voice and integrated networks, and network reliability.
Attribute: CSNS.

CISC 6735. Wireless Networks. (3 Credits)
This course covers the fundamental techniques in the design, operation, and evaluation of wireless networks. Among the topics covered: first, second, third, fourth generation wireless systems, fifth generation-LTE systems cellular wireless networks, medium access techniques, physical layer, protocols (AMPS, IS-95, IS-136, GSM, SPRS, EDGE, WCDMA, cdma2000, etc.) satellite systems, fixed wireless systems, personal area networks (PANs) including Bluetooth and HRF systems, wireless local area networks, (WLAHs) technologies, architectures, protocols, and standards, mobility management, wireless sensor networks, and cognitive radio networks and advanced topics. This course is intended for graduate students who have some background on computer networks.
Attribute: CSNS.

CISC 6745. Data Visualization. (3 Credits)
Data may be essential and helpful in inform decision-making and impact public or corporate policy, never the less when visualized with proper context, data has the power to make a change in the world. This course explores the underlying theory and practical concepts in creating visual representation, visualization tool-kits, information visualization, flow visualization, and volume rendering techniques. This course will include a significant project component that till typically require programming.
Attribute: DATA.

CISC 6750. IOT Forensics and Security. (3 Credits)
With the exponential growth of Internet of Things (IoT) technology, the forensic examination and security of these objects has garnered increased attention. Moreover, digital forensic examiners have been presented with a unique set of challenges in order to understand how such devices secure, store and process data. This course is structured utilizing modules which will provide students with extensive hands experience in an interactive lab environment that will delve into the issues in IoT forensics and security. Through experimental testing participants will investigate and review the security of home IoT devices. The testing will include: traffic capture, device scanning and the analysis of wireless signals. In addition, a review and analysis of privacy exposure will be conducted, outlining the security vectors and malware used to attack and control IoT devices. Subsequent modules will be comprised of explanation, theory and numerous hands on exercises, culminating in discussion regarding the IoT technology stack and how it impacts digital forensics. Through use of existing digital forensic tools and methodology, we will introduce students to the application of digital forensics in the IoT framework by examining ordinary home devices. Examinations will provide students with hands on experience into a hunt for artifacts, identifying formats of stored data, encoding methods, while documenting their efforts throughout the process. Respective analysis of collection techniques, device workflow and the object data repositories will provide participants with an understanding of the full forensic value of these devices.
Attribute: CYSM.

CISC 6795. Java Programming. (3 Credits)
This course covers Java programming and internet computing with various applications. Topics include: Java programming, object-oriented programming, graphical user interfaces (GUI's) and Applications, multimedia, files and streams, and server communications.
Attributes: CSNS, CSS0.

CISC 6800. Malware Analytics and Software Security. (3 Credits)
This course is the introduction to the fields of the malware analytics and software security at the early graduate level. It covers one of the most important aspects of the cybersecurity - the software perspective of the issue. It approaches the issue from mainly two ends, namely analyzing malicious software, which is intended to compromise the security requirements, and the software development strategies and tactics to prevent vulnerability in the face of attacks. This course will have enough technical details in exemplary scenarios for the students to dissect real world problems, but the main purpose is to establish enough theoretical and background knowledge so that they know where to start an endeavor and how to make an effective investigation or design for new software security problems.
Attributes: CSCY, CYSM.

CISC 6850. Leadership and Management in Cybersecurity. (3 Credits)
In the highly interconnected and instrumented society, big data with great volume, variety and velocity can be an asset but also a liability for individuals and organizations. This course covers a variety of technological, systematic, and policy issues in the management if cyber risk for individual citizens, governmental organizations, and business enterprises. Students will meet with global leaders in cyber security on projects and case studies related to best practices and real life experiences.
Attribute: CYSM.
CISC 6860. Cybersecurity: Technology, Policy, and Law. (3 Credits)
CISC 6875. Parallel Computations. (3 Credits)
Introduction to parallel and multiprocessor/multicore computation, parallel architectures and programming, clusters and grids, parallel algorithms on different models of interconnection networks, network topologies, network reliability and fault tolerance.
Attribute: CSSO.
CISC 6880. Blockchain Technology. (3 Credits)
A blockchain consists of participants who generate transactions, miners who aggregate the transactions and forge blocks for the chain, and the blockchain itself. The blockchain is updated based on some algorithm predetermined by group consensus, and it acts as a decentralized, immutable database. This course will cover fundamentals and advanced topics in blockchain technology. We will discuss each component in a blockchain system, how the components interact, and the general structure and functions of a blockchain. The course will also discuss security mechanisms of blockchain, blockchain system design, blockchain applications and implementations, cryptocurrencies, smart contracts, and the challenges of blockchain.
Attribute: CYSM.
CISC 6920. Incident Response and Risk Management. (3 Credits)
The goal of this course is to provide students knowledge and hands-on forensic techniques in incident detection, analysis, response, and risk management. The course covers topics in incident handling procedures, forensic evidence collection techniques, forensic report writing, investigations in trademark and copyright infringement, corporate espionage, and related topics in cyber law and ethics. The students are assumed to have basic knowledge in Forensic computing. Students are expected to finish team projects, write research paper and present their results.
Attributes: CSCY, CYSM.
CISC 6950. Algorithms and Data Analysis. (3 Credits)
This course will cover data mining and machine learning algorithms for analyzing large data sets as well as the practical issues that arise when applying these algorithms to real-world problems. It will balance theory and practice—the principles of data mining methods will be discussed but students will also acquire hands-on experience using state-of-the-art data mining software to solve scientific and business problems. Students will learn about data mining algorithms for: classification and prediction (decision trees, neural networks, nearest-neighbor, genetic algorithms, Naive Bayes), clustering (K-means), association rule mining (Apriori) and algorithms for handling complex data types (text-mining, image-mining, etc.). In addition, the process for mining/analyzing data will be covered. Each student will, with the aid of the instructor, select and complete an application-oriented or research-oriented course project.
Attributes: ASDM, CSDA, PMTM.
CISC 6991. Internship. (1 to 3 Credits)
This internship course offers students the opportunity to exercise the computer science skills they have learned in a professional environment. Students will be asked to write one or more reports on their internship as the semester proceeds, culminating in a final project report.
CISC 7050. Penetration Testing. (3 Credits)
The course introduces principles and methods in penetration testing and related techniques. This course focuses on understanding and implementing state-of-the-art penetration testing technologies. This course covers topics in penetration testing methods and framework, scanning techniques, penetration test techniques for different network threats and related topics. Students are expected to finish several large team projects, write research paper, and present their results.
Attributes: CSCY, CYSM.
CISC 7999. Dissertation Research in Computer Science. (4 Credits)
Faculty mentored independent dissertation research. 16 Credits required for Ph.D.
Prerequisite: CISC 0960.
CISC 8050. Projects and Internships. (3 Credits)
A course designed to concentrate on special and state-of-the-art topics in computer science; topics are changed from time to time to reflect the rapid change of computer and information technology.
CISC 8070. Projects & Internships in Cyber. (3 or 4 Credits)
CISC 8100. Special Topics in Comp.Science. (3 Credits)
A course designed to concentrate on special and state-of-the-art topics in computer science; topics are changed from time to time to reflect the rapid change of computer and information technology.
CISC 8150. Special Topics in Cybersecurity. (3 Credits)
A course designed to concentrate on special and state of the art topics in cybersecurity; topics are changed from time to time to reflect the rapid change of cybersecurity technology and knowledge.
Attribute: CYSM.
CISC 8598. M.S. Computer Science Thesis I. (3 Credits)
Exceptional students may choose to write a master's thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student's proficiency in the subject material. A thesis supervisor will be assigned by the department and an oral defense is required. The student should take this course as the first of two thesis courses.
CISC 8599. M.S. Computer Science Thesis II. (3 Credits)
Exceptional students may choose to write a master's thesis. The thesis topic must be approved by the Department Graduate Committee. The work should adequately demonstrate the student's proficiency in the subject material. A thesis supervisor will be assigned by department and an oral defense is required. The student should take this course as the second of the two thesis courses.
CISC 8998. Experiential Learning. (1 to 6 Credits)
This course recognizes credits for professional knowledge in the area of cyber security acquired by the student prior to entering the graduate program.
CISC 8999. Tutorial. (1 to 4 Credits)
Each student either takes an internship at one of the medical schools, hospitals and health organizations or works on a project related to method and practice at the intersection of Biomedicine and Informatics. Students also attend a weekly seminar on a variety of topics in biomedical informatics featuring speakers from academia, industry, and government with diverse perspectives in business, technology, and management.
CISC MTNC. Maintenance-Comp.Science. (0 Credits)
Consulting Project GBA (CPGB)

CPGB 7000. MBA Capstone Consulting Project. (3 Credits)
FT MBA CORE COURSE The Business Consulting Project is an experiential course whereby students apply the functional knowledge and skills learned throughout the MBA program to real business issues faced by client firms. Working in teams and under the guidance of a faculty mentor, students develop business solutions rooted in rigorous analysis to client problems. Throughout the course, students develop consulting and project management skills, deepen their understanding of a specific industry, and network with industry professionals in their field of interest. At the end of the term, students present their findings to the client and receive client feedback on their deliverables.

CPGB 7100. Gabelli Capstone Experience. (1 Credit)
PMBA CORE COURSE The Gabelli Capstone Experience is a two-session, all-day, immersive experience that allows students to use interdisciplinary knowledge and skills in a way that "ties" the Professional MBA (PMBA) Program together in a meaningful way and tackle a business dilemma. Only those PMBA students who have completed at least 39 credits can enroll in this class.

Prerequisites: (BEGB 6220 or GBA Waiver Managerial Eco with a score of 070) and (DGGB 6820 or GBA Waiver Statistics with a score of 070) and (ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070) and (BLGB 6321 (may be taken concurrently) and (ISGB 6910 or MKGB 6710 or MGGB 6613 or FNGB 6411 or MGGB 6427 or MGGB 7660 or CMGB 7550 or ACGB 7155 or BLGB 6310).

CPGB 7101. ST: Launch Your Startup. (3 Credits)
The Fordham Foundry provides students throughout the entire Fordham community opportunities for experiential learning around start up businesses, entrepreneurship and critical thinking. This 15 week course will put students through a rigorous curriculum which will allow students to create and grow their potential business ideas while collaborating with their peers. At the end of the semester, students will present their business to a panel of Fordham faculty and members of the New York startup and venture capital ecosystem. The course will consist of a weekly lecture, roundtable discussions and one on one mentorship sessions. At the conclusion of the course, students will have build their "StartUP Portfolio" which will enable them to continue to develop their business after the practicum.

CPGB 8999. ST: Consulting Project. (0 to 3 Credits)
The project is organized around a societal sustainability challenge represented by the needs of an outside partner, such as a corporate or non profit organization that serves as sponsor of the practicum. The students meet with organization executives, alumni mentors, Fordham faculty and staff who guide them through the process of designing innovative solutions that meet the needs of the challenge.

Consulting Projects (CPBU)

CPBU 4000. ST: Consulting Project. (3 Credits)

CPBU 4001. Fair Trade and Microfinance 1. (3 Credits)
This course examines the structure of Fair Trade as an alternative form of commerce which specifically expresses solidarity with the poor. The course is concerned with running all aspects of a small Fair Trade business. The class acts as employees on a team which seeks to make profit sustainably, yet effectively. Readings support a greater understanding of the realities of poverty.

Attributes: ENT, PJEC, PJST.

CPBU 4002. Fair Trade and Microfinance 2. (3 Credits)
The second semester of this course looks at ways to invest the profit we have created from selling our Fair Trade goods, and all the varieties of microcredit. We investigate new partners and new products. As a further motivation for managing the business (the university is basically out niche market), we continue to absorb new information about the causes of economic injustice.

CPBU 4003. Spirituality and Fair Trade. (3 Credits)
This course is designed to ignite a spiritual awareness of economic injustice which ultimately motivates action, large or small. We begin by exploring the mechanisms of poverty, and looking at alternative forms of commerce. We look at why Fair Trade is able to answer some of the human rights issues associated with poverty. Readings highlight spiritual leaders from the past, and the models for action that their life stories provide. How should business students evaluate their lives and their careers? What might "solidarity with the poor" mean, in variety.

Attributes: ENT, PJEC, PJST.

CPBU 4004. Entrepreneurship and Fair Trade. (3 Credits)
This course focuses on the entrepreneurial response to economic injustice, as expressed in the Fair Trade movement. The class will be divided into teams, to consult with emerging Fair Trade businesses in the New York area, ongoing throughout the semester. Against this backdrop we learn from problems solving methods of entrepreneurs who have involved themselves with using business structures as a means of fighting poverty.

Attributes: ENT, PJEC, PJST.

CPBU 4005. ST:Fair Trade Entrepreneurship. (3 Credits)
Fair trade is a global response to social injustice and poverty. Whether it is capital for "startups" or markets for fair trade coffee, the fair trade movement promotes socially and environmental responsibility business practices here and abroad. This course reviews the fair trade movement's successes and failures to find alternatives to business as usual that reduce poverty and build a sustainable global economy. Students focus on country specific examples of fair trade and microfinance social innovation that reduce poverty by creating viable livelihoods. Marketing, insurance, finance and management can all be applied to build a socially justice and sustainable global economy. "We urgently need a humanism capable of bringing together the different fields of knowledge, including economics, in the service of a more integral and integrating vision" Pope Francis argues in his recent Encyclical Letter, this course explores this vision.

Attributes: ENT, PJEC, PJST.

CPBU 4999. ST: Consulting Project. (0 to 3 Credits)
The project is organized around a societal sustainability challenge represented by the needs of an outside partner, such as a corporate or non profit organization that serves as sponsor of the practicum. The students meet with organization executives, alumni mentors, Fordham faculty and staff who guide them through the process of designing innovative solutions that meet the needs of the challenge.

Contemporary Learning And Interdisciplinary Research (CLAIR) (CLGE)

CLGE 0900. Permanent Matriculation Status. (0 Credits)
Permanent Matriculation Status.

CLGE 0999. CLAIR Proposal Acceptance. (0 Credits)
Proposal for dissertation approved.
CLGE 6100. Special Topics in Contemporary Learning and Interdisciplinary Research. (0 to 3 Credits)
Special topics for CLAIR program.

CLGE 6101. Special Topics in Contemporary Learning and Interdisciplinary Research. (0 to 3 Credits)
Used with unique course title each time offered.

CLGE 6102. Special Topics in Contemporary Learning and Interdisciplinary Research. (1 Credit)
This module will focus on analyzing data gathered in mixed method research.

CLGE 6103. Special Topics in Contemporary Learning and Interdisciplinary Research. (1 Credit)
This module will focus on writing up and presenting mixed methods studies.

CLGE 6104. Special Topics in Contemporary Learning and Interdisciplinary Research. (0 to 3 Credits)
This course shall be used with unique course titles and descriptions each time it is offered.

CLGE 6105. Interview Analysis. (1 Credit)
This module will focus on analyzing interview data.

CLGE 6106. Academic Writing. (1 Credit)
This module will focus on writing for academic purposes.

CLGE 6107. CLAIR Proseminar. (3 Credits)
This one-semester offering is designed to provide students, particularly those with less of an undergraduate and master's-level background in research, with an overview of key skill areas that they will need to master throughout their graduate career. These skill areas include developing research questions; research methodologies; data analysis; written and oral expression; and referencing style. The course will culminate in the development of a research project for the group to design as a cohort. The course will be graded as Pass/Fail, whereby a Pass will be awarded for active engagement in the class discussions and activities throughout the semester, and for successful completion of the final project.

CLGE 6140. Foundations of Interdisciplinary Research I. (3 Credits)
Representative seminal and field/action research studies drawing on the professional literature in psychology, anthropology, linguistics, and education to develop an understanding of diverse research traditions. Attribute: TE.

CLGE 6142. Foundations of Interdisciplinary Research II. (3 Credits)
During this two-semester seminar, doctoral students will be immersed in representative seminal and field/action research studies drawing on the professional literature in psychology, anthropology, linguistics, and education to develop an understanding of diverse research traditions. Participants will explore research designs and processes in published studies for posing questions, and collecting, analyzing, and interpreting data from quantitative and qualitative perspectives. Drawing on the knowledge bases informing an interdisciplinary understanding of learning, we will design our individual and collaborative studies using hypothesis testing and hypothesis-generating stances, mindful of the ethical dimensions of these endeavors.

CLGE 6240. Global Perspectives on Language, Culture, and Equity. (1 to 3 Credits)
Provides theoretical and research exploration of global conceptualizations for communicating and learning in more than one language.

CLGE 6280. Multicultural Competencies and Tools of Awareness, Transformation, and Advocacy. (3 Credits)
Grounded in interdisciplinary theory, research, and practice implications for effective learning, this course is designed to develop: (a) foundational multicultural competencies, particularly in the self-awareness components of empathic resources and hidden biases, and (b) culturally relevant tools for promoting educational achievement for all students, including those vulnerable to discrimination. Students will be challenged to reflect on their own cultural biases, expand their conception of appropriate professional roles, and develop awareness, knowledge and skills necessary to facilitate effective learning opportunities with diverse students. This course incorporates didactic, experiential, cognitive, affective, individual, and small group models of learning.

CLGE 6380. Standardized and Alternate Assessments for Students at Risk or With Disabilities. (3 Credits)
Focus on practices and policies related to the use of standardized and alternative assessment approaches for understanding and supporting student learning, instructional planning, and policy making. Attribute: TE.

CLGE 6400. Learning Through Language. (3 Credits)
An interdisciplinary course focusing on the relationship for teachers and supervisors between language as a tool for learning and language as evidence of learning. Particular emphasis will be placed on the relationship between these concerns and the need for improving the reading and writing proficiencies of students in all levels of education.

CLGE 6440. Understanding Contempoary Literacies. (3 Credits)
Introduces various frameworks of literacy in the contemporary world.

CLGE 6545. Structural, Philosophical and Psychological Examinations of Argument. (0 to 3 Credits)
Explores the form and function of arguments in writing and discourse.

CLGE 6550. Motivation to Learn. (1 to 3 Credits)
This course will focus on taking an in-depth look at achievement motivation from a psychological perspective.

CLGE 6555. Becoming Leaders of Contemporary Learning. (0 to 3 Credits)
Examine contemporary learning through the forces that are generally attributed to reshaping education in the 21st century.

CLGE 7150. Program Assessment and Evaluation II. (1 to 3 Credits)
This courses focuses on how to assess the effectiveness of educational service delivery systems, both in schools an other human service settings.

CLGE 7175. Internship in Contemporary Learning and Interdisciplinary Research. (0 to 3 Credits)
Students shall engage in professional experiences in the schools and/or education related agencies as interns.

CLGE 7190. Advanced Seminar in Interdisciplinary Research I. (0 to 3 Credits)
Team taught, two semester will scaffold the skills and learning of research apprentices though the process of conducting interdisciplinary, ethnographic, field, and empirical research studies.
CLGE 7192. Advanced Seminar in Interdisciplinary Research II. (0 to 3 Credits)
Team-taught, two semester seminar will scaffold the skills and learning of research apprentices through the process of conducting interdisciplinary, ethnographic, field, and empirical research studies.

CLGE 7194. Adv Sem Interdis Res III. (0 to 1 Credits)
Three semester seminar will scaffold the skills & learning of research apprentices through the process of conducting interdisciplinary, ethnographic, field, & empirical research studies.

CLGE 7220. Closing the Opportunity/Achievement Gap. (3 Credits)
Provides educators, leaders, and policy makers with the skills, knowledge, and dispositions to work with diverse youth populations.

CLGE 7240. Multilingual Literacy: Exploring Literacy in Multiple Languages and Cultures. (3 Credits)
Provides theoretical and research foundations to the intersection of language and culture across literacy practices in multiple educational, social, and geographical contexts.

CLGE 7340. Contemporary Interventions for Struggling Readers and Writers. (3 Credits)
It is estimated that more than 10 million children in the United States have some degree of oral-language-based reading disability. Roughly 80 percent of children referred for special services require support services in reading, writing, and oral language. Best contemporary practices rely on interdisciplinary teams to assess difficulties and plan interventions. This interdisciplinary course draws from the fields of literacy, learning disabilities, psychology, and neuroscience in examining theories and research in reading and writing processes and best practices for universal design.

CLGE 7490. Teaching Composition in the 21st Century: Theory and Practice. (1 to 3 Credits)
This course will explore cognitive and sociocultural perspectives of writing and ask students to consider and practice methods for teaching and researching issues of composition in the 21st century.

CLGE 7520. Cognition, Technology, and Innovation. (0 to 3 Credits)
Overall objective of course is to gain and apply knowledge of human information processing, motivation, and creativity to the design of effective instruction.

CLGE 7570. Positive Trajectories: Resilience and Adaptation. (1 to 3 Credits)
CLAIR. Provides an overview of the extant research on the individual, community, and cultural qualities that facilitate optimal development among ‘at risk’ learners.

CLGE 8001. Capstone Research Proj. (0 to 1 Credits)
To establish candidacy, CLAIR doctoral students are required to work on a capstone project and schedule a hearing with the capstone committee.

CLGE 8002. Capstone Research Proj. (0 to 1 Credits)
To establish candidacy, CLAIR doctoral students are required to work on a capstone project and schedule a hearing with the capstone project committee. The function of the project is to demonstrate the breadth and depth of scholarship, and the unique talents and experiences of each student. As such, this project should be tailored to the student’s interests and ideally tied to the dissertation. During this experience, the student will select and work closely with a mentor, who will help in the development of the capstone project. This mentor can be the student’s academic advisor or another faculty member with whom the student has research interests in common. Successful defense of the capstone project will establish doctoral candidacy.

CLGE 8003. Capstone Research Project. (0 Credits)
Capstone research project.

CLGE 8110. Dissertation Seminar: Contemporary Learning and Interdisciplinary Research. (3 Credits)
Seminar for advanced doctoral candidates who have completed all coursework for their degree. The purpose of the seminar is to have students develop an approved proposal for their doctoral dissertation.

CLGE 8111. Dissertation Seminar: Contemporary Learning and Interdisciplinary Research. (3 Credits)
Seminar for advanced doctoral students. PRE-REQUISITE: CLGE 8001.

CLGE 9990. Clge Special Topics. (0 to 3 Credits)

Contracts Law (CNGL)

CNGL 0104. Contracts. (4 to 5 Credits)
Studies the fundamental principles governing the formation and operation of contracts, the rights and liabilities of third parties, discharge of contracts by virtue of impossibility of performance, the Statute of Frauds, the parol evidence rule, and other defenses. The provisions of the Uniform Commercial Code relating to contracts are also considered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: JD.

CNGL 0204. Business Contracts. (4 Credits)
This seminar will survey how contracts can be designed to solve or avoid problems in a variety of business contexts. For example, we may read about joint ventures in technological innovation, merger agreements, licensing agreements, shareholder agreements, bonds, franchise agreements, and high-level management employment contracts, among other topics. The reading assignments will be primarily scholarly articles, as well as some actual contracts. Practicing attorneys may speak about their experience negotiating or litigating particular kinds of contracts. Each student will present the material for one selected week, as well as her brief reaction to it, and submit a research paper at the end of the course.

Attributes: BFE, LAWB, LAWF, LAWI, LLM, LWR.

CNGL 0206. Negotiation and Drafting: The Uniform Commercial Code and Business Contracts. (3 Credits)
This course is designed to improve the skill of the students in negotiation and drafting of business contracts and agreements. At the same time, they will learn the business practice and the applicable laws, in particular the Uniform Commercial Code. There will be a simulation in class for each kind of contract and agreement to be discussed. In discussing a particular business contract or agreement, the class is divided into two groups. One group represents one party to a transaction and the other group represents the other party. The two groups negotiate the terms of the transaction and drafting of the contract or the agreement. For instance, in negotiating a financing agreement, one group represents the lender and the other group represents the borrower. The terms proposed and counter-proposed must comply with the laws and regulations. Various scenarios will be presented, and the agreement will dictate the outcome of a dispute between the parties. Students will improve their negotiation and drafting skills through the simulations, and learn to anticipate and provide for possible problems.

Attributes: BFS, JD.
CNGL 0216. Introduction to United States Contract Law. (2 to 4 Credits)
This course will cover most of the basic material presented in the
regular first-year course in contract law, taking special account of the
development of contract law in common law jurisdictions in comparison
with other legal traditions. The class will use a standard US casebook,
because another goal of the class will be to familiarize students with the
way in which contracts doctrine has evolved in the US legal system, the
policy consideration underlying these doctrines, and methods of legal
reasoning employed by American lawyers in framing their arguments.
Particular attention will be paid to the interaction between statutory and
case law rules in contemporary practice. There will be an in-class, open-
book examination.
Attributes: CORC, LAWB, LAWI, LAWT, LLM, LMCO.

Core Business (CBBU)

CBBU 1000. ST: Business Intensive. (6 Credits)
This 5-week, 6-credit intensive course delivers the essential, technical,
and conceptual basics of the business. Mornings are dedicated to
learning the building blocks of business, the accounting discipline, while
afternoons focus on business from the entrepreneur’s viewpoint. Units
include spreadsheet building and analysis; capital raising; budgeting;
consumer insights and behavior; and strategic planning. Students will
also be introduced to job search skills and will visit financial, marketing,
new venture, and other institutions in New York City. The academic and
non-curricular experience will help differentiate students in a tight job
market and make them attractive to employers.

CBBU 1001. The Ground Floor: Starting and Succeeding at GSB. (3
Credits)
This course introduces first-year students to business, to student-
focused resources at Fordham, and to personal skills that contribute
to success at GSB and beyond. Teamwork and critical thinking are
emphasized to encourage students to develop an integrated perspective
of business functions. Open by permission of the class dean.

CBBU 1002. ST: Consulting Challenge IP. (1 Credit)
The integrated project provides an opportunity for students to apply the
material taught in the CBA Core Courses to actual companies.

CBBU 1003. ST: Career Exploration IP. (1 Credit)
The Integrated Project provides an opportunity for students to apply the
material taught in the CBA Core courses to actual companies.

CBBU 1004. ST: Analytics IP. (1 Credit)
The integrated project provides an opportunity for students to apply the
material taught in the CBA Core courses to actual companies.

CBBU 1006. ST: Leadership IP. (1 Credit)
The Integrated Project provides an opportunity for students to apply the
material taught in the CBA Core courses to actual companies.

CBBU 4999. Tutorial. (1 to 3 Credits)
Tutorial/independent study between student and faculty member in a
topic connected to the Gabelli School’s business core curriculum.

Core Business - Doctor Prof St
(CBDP)

CBDP 0001. Additional Dissertation Preparation. (0 Credits)
This course is for students who need additional time to work on their
dissertation work. Students work with their dissertation committee.

CBDP 0002. Additional Dissertation Proposal Preparation. (0 Credits)
This course is for students who need additional time to work on their
dissertation proposal work. Students work with their dissertation
committee.

CBDP 8001. Global Economy & Development. (1.5 to 3 Credits)
This course introduces new structures and trends of economies and
markets globally. Topics include contemporary issues in global economy
and global markets, macro-economic environment of major economies,
comparative analysis of economic development in different countries and
regions.

CBDP 8002. Philosophy of Business Research. (3 Credits)
This course helps students to understand the philosophical and practical
issues involved in conducting research. It exposes students to various
classic readings that provide the theoretical foundations for business
research. Finally, it also acquaints students with various norms and
procedures, both formal and informal, of the doctoral program.

CBDP 8003. Empirical Sem on Bus Res 1. (3 Credits)
The course focuses on the empirical issues of academic research
in different business disciplines that are at the forefront of ongoing
research. It also attempts to develop skills that will enable student
to choose the appropriate empirical methodology and techniques
to examine the specific question being addressed. Seminars will be
organized in two ways. Both selected faculties and industry experts
are invited to present their empirical research with student discussions
following the presentations.

CBDP 8004. Research Methods and Design. (1.5 to 3 Credits)
This course introduces doctoral students to the key elements of
research design and methods used in business disciplines such as
finance, accounting, information systems, marketing, and management.
It introduces the principles, approaches, methods, and analytical
techniques utilized in qualitative business research. Topics include
models of qualitative research design and methodology such as narrative
analysis, case study, and grounded theory and phenomenology. The
course will also examine practical executions of research surveys which
enable students to structure and scale research surveys with a variety of
implications and methods of analysis, measurement and evaluation.

CBDP 8005. Topics in Business Research. (3 Credits)
The main objective of the course is to provide the students with mini
courses in different areas of business fields, offered by professors within
Fordham and from outside Fordham. The key intention associated with
these mini courses is to provide a maximum exposure of different talent,
diversity of knowledge base, and network of professionals in academia
beyond Fordham before determining dissertation topics. The focus is on
theoretical aspects of the research, in particular on how to synthesize
research, develop research designs, and build theories.

CBDP 8006. Empirical Seminar on Business Research 2. (1.5 to 3 Credits)
This course helps students develop dissertation proposals and prepare
for the defense of proposals. It also features a series of lectures from both
industry practitioners and academics on subjects related to
students’ dissertation topics.

CBDP 8007. Business Field Studies. (1.5 to 3 Credits)
Business Field Studies helps students understand the organizational,
operational, and cultural forms of the modern business workplace. This
course focuses on company visits, lectures from practitioners, and
discussions among students on the modern business landscape.
Attribute: ABDP.

CBDP 8999. Independent Study. (1.5 to 3 Credits)
Independent study.
CBDP 9001. Business Research Seminar. (1.5 Credits)
This course features a series of lecturers from various industries to discuss research projects that their companies are working on.
Attribute: ABDP.

CBDP 9003. Adv Topics in Bus Research. (1.5 to 3 Credits)
The main objective of the course is to provide the students with mini (2 hours to 10 hours) courses in different areas of business fields, offered by professors within Fordham and from outside Fordham. The key intention associated with these mini courses is to provide a maximum exposure of different talent, diversity of knowledge base, and network of professionals in academia beyond Fordham before determining dissertation topics.
The focus is on both theoretical and empirical aspects of the research, in particular on how to synthesize research, develop empirical tests and research designs, and test hypotheses.

CBDP 9004. Asset Pricing Seminars. (3 Credits)
The objective of this course is to provide students with the capability to research in the field of asset pricing. The course may focus on the following areas: (1) Consumption, portfolio choice, and asset pricing; (2) Time series properties of asset returns: predictability, volatility, correlations with other variables, etc.; (3) Cross-sectional properties of asset returns implied by equilibrium asset pricing model including CAPM, consumption-based asset pricing, factor models, etc.; (4) Term structure of interest rates. The course may also consider fundamental aspects of international asset pricing models.
Attribute: ABDP.

CBDP 9005. Strategic Mgt Seminars. (1.5 to 3 Credits)
This course introduces the principal theoretical perspectives and empirical findings in the field of strategy formulation, execution process, and innovation. Students study the problems and issues facing general managers who must formulate and implement strategies for organizations in uncertain and ambiguous environments. Students explore strategy and operations from several theoretical perspectives including resource-based view, knowledge-based view, agency theory, institutional theory, contingency theory, and real options.
Attribute: ABDP.

CBDP 9006. Frontier in Bus Practices. (1.5 Credits)
This course requires students to conduct field study in selected companies or industries, collect information, conduct survey and interviews and practice research analysis. Students need to complete a term research paper from this independent study and present the research paper.

CBDP 9007. Organizational Design, Change and Competitiveness. (1.5 to 3 Credits)
The first half of the course addresses how managers can design organizations to enhance the effectiveness and efficiency of the organization. We will explore a variety important organization issues such as differentiation and integration, organizational lifecycle, and transformation and resistance. The second half of the course addresses how managers can define and create competitive advantage at both the business and corporate level. We will discuss different industry conditions, organizational resources, positioning, growth through mergers and acquisitions, and different types of alliances and partnerships, and corporate governance. Business cases, discussions, and assignments will be used in addition to lectures to help your learning. Upon successful completion of this course, students will be able to explain the mechanics of modern organizations, to utilize the principles of organizational theory to design and change their organizations, and to choose the best business strategy for success.
Attribute: ABDP.

CBDP 9008. Fin Innov & Fin Intermediation. (3 Credits)
This course starts with the big picture of the financial markets and the special role of financial intermediaries. We will cover various types of financial intermediaries: commercial banks, insurance companies, investment banks, credit rating agencies, mutual funds and hedge funds. On each type of intermediary, we will first introduce the basic theory around it and then discuss the current issues related. Specifically, we will discuss loan securitization as an innovation in corporate lending. We will see how financial crisis can be transmitted from securitized bonds to corporate bonds through insurance companies' holdings as a result of accounting rules and capital requirement applied on them. We will look into the revolution in security trading and the debate surrounding algorithm and high frequency trading. We will discuss the role of credit rating agencies and hedge funds in the financial crisis.
Attribute: ABDP.

CBDP 9009. Frontier in Business Practices 2. (1.5 Credits)
This course requires students to conduct practical study in their research field, collect information, conduct surveys and interviews, and practice research analysis. Students need to present their research from this independent study.

CBDP 9010. Dissertation Proposal Preparation Seminar. (3 Credits)
This course requires students to prepare and develop their research topics and proposals.
Attribute: ABDP.

CBDP 9011. Advanced Research Methods of Business Research. (3 to 6 Credits)
This course further examines the advanced elements of research design and methods used in business disciplines such as finance, accounting, information systems, marketing, and management. Topics include models of qualitative research design and methodology such as narrative analysis, case study, and grounded theory and phenomenology. The course will also examine practical executions of research surveys which enable students to structure and scale research surveys with a variety of implications and methods of analysis, measurement and evaluation.

CBDP 9012. Dissertation Proposal Development. (6 Credits)
During the dissertation phase of their program, students work to develop and defend research topics, proposals, and their full dissertation with their Dissertation Committee. The dissertation is a large-scale, closely supervised research project, with extensive research, writing, and revision expected. Students offer regular progress updates to their dissertation committee members, who in turn meet with the doctoral program director to ensure sufficient progress.

CBDP 9013. Dissertation I. (3 Credits)
During the dissertation phase of their program, students work to develop and defend research topics, proposals, and their full dissertation with their Dissertation Committee. The dissertation is a large-scale, closely supervised research project, with extensive research, writing, and revision expected. Students offer regular progress updates to their dissertation committee members, who in turn meet with the doctoral program director to ensure sufficient progress.

CBDP 9014. Dissertation II. (6 Credits)
During the dissertation phase of their program, students work to develop and defend research topics, proposals, and their full dissertation with their Dissertation Committee. The dissertation is a large-scale, closely supervised research project, with extensive research, writing, and revision expected. Students offer regular progress updates to their dissertation committee members, who in turn meet with the doctoral program director to ensure sufficient progress.

Updated: 07-27-2020
CBDP 9015. Dissertation III. (6 Credits)
During the dissertation phase of their program, students work to develop and defend research topics, proposals, and their full dissertation with their Dissertation Committee. The dissertation is a large-scale, closely supervised research project, with extensive research, writing, and revision expected. Students offer regular progress updates to their dissertation committee members, who in turn meet with the doctoral program director to ensure sufficient progress.

CBDP 9016. Seminars on Organizational Behavior and Leadership. (1.5 to 3 Credits)
The primary goal of this course will be to increase your understanding of how people behave in the context of an organizational structure. Having a greater knowledge of human behavior will help you to better interpret and predict the attitudes and behaviors of yourself, your coworkers, subordinates, supervisors, and clients. Most importantly, this course will help you to better understand your own past and future behaviors as a member and leader within an organization. Topics that are covered include leadership, personality and attitudes, emotions, and dynamics. The course format will be research oriented, including understanding theory and methodology exemplified in top academic journals in the management field. After taking this course you will have a better understanding of how to craft a research question related to organizational behavior and test it using scientific methods.

Attribute: ABDP.

CBDP 9017. Big Data and Artificial Intelligence. (1.5 Credits)
This course provides an introduction to trending techniques, applications, and opportunities in the field of big data, machine learning, and artificial intelligence. We will cover an overview of techniques, including data mining, text mining, social network analysis, deep learning, recommendation systems, and data visualization. We will also demonstrate applications cases in the areas of financial markets, online marketing, fashion, political science, healthcare, and law enforcement.

Attribute: ABDP.

CBDP 9018. Dissertation IV. (7 Credits)
During the dissertation phase of their program, students work to develop and defend research topics, proposals, and their full dissertation with their Dissertation Committee. The dissertation is a large-scale, closely supervised research project, with extensive research, writing, and revision expected. Students offer regular progress updates to their dissertation committee members, who in turn meet with the doctoral program director to ensure sufficient progress.

CBDP 9019. Dissertation Defense. (0 Credits)
Students prepare, defend, and deliver the final presentation of their dissertation. Final dissertation approval is also expected.

Corporations Law (BUGL)

BUGL 0099. Corporate Crisis Management and Internal Investigations. (2 or 3 Credits)
This course will examine how a global corporation should deal with crisis management including crisis insurance, crisis funds, crisis plans and crisis drills. Then students will learn how to handle corporate internal investigations as either and in house and outside counsel including attorney client privilege, international attorney client privilege, interviewing company officers and employees, and reporting to the board of directors.

Attributes: CORC, CRCP, LAWB.

BUGL 0129. Commercial Litigation. (2 Credits)
This course is designed for students interested in practicing commercial litigation as well as related transactional work. A large portion of the nation’s complex commercial matters are litigated in New York state and federal courts. The law established in these jurisdictions is typically viewed favorably by judges and jurists in other jurisdictions and considered by corporate lawyers negotiating and drafting agreements. Many commercial contracts select New York law as the law that would govern any dispute among the parties and specify New York State and federal courts as the forum of choice. This course will focus on the substantive law governing commercial disputes, procedural law applicable to commercial disputes, and practical tips and solutions on litigating a commercial dispute. The course will focus on New York law in this area but will compare other jurisdictions such as Delaware where relevant.

The course will be divided into three parts. First, the course will focus on cutting-edge developments related to the key causes of action that are typically asserted in commercial disputes—i.e., breach of contract, fraud/fraudulent inducement, breach of fiduciary duty, unjust enrichment and UCC claims. The second part of the course will address key procedural issues, such as forum selection, statute-of-limitations related to breach-of-contract and business tort claims, jurisdictional matters, choice of law issues, and case management. The third part will focus on the practice of commercial litigation by focusing on concepts such as a motion practice, litigation financing, mediation, identifying and working with fact and expert witnesses, and discovery devices and discovery. In a nutshell, students will learn about the main aspects of commercial dispute resolution.

The course will be taught by two lawyers who have focused most of their professional career on commercial litigation. The teachers are editors of a leading guide to commercial litigation published by Bloomberg Law. Students will also hear from esteemed judges and lawyers who focus on commercial litigation.

Students will be graded based on two written work products in the form of motions, oral advocacy on the written submissions, and class participation.

Attributes: LAWB, LIDR, LLM.

BUGL 0201. Corporations. (4 Credits)
This course provides students with a basic understanding of the law that governs business organizations, particularly publicly held corporations. Aspects of the laws of agency and partnership are first considered to highlight the relationship to corporate law. In turning to corporations, the course considers the rights and duties of boards of directors, officers, and shareholders. Specific topics include the nature of debt and equity securities, the role of fiduciary duties, the regulation of conflicts of interest and insider trading, and the fundamentals of control transactions (like mergers and acquisitions). The course introduces students to state common law and statutory systems, as well as aspects of the federal securities laws, that regulate business organizations. Issues relating to the role of business organizations in society and the role of attorneys in representing these organizations are also considered.
Corporations Law (BUGL)

BUGL 0202. Advanced Business Law. (1 to 2 Credits)
The Advanced Business Law Seminar is a workshop series in which students read and comment on current research in the area of corporate and securities law. Each week a different scholar or member of the judiciary will present research on a topic of interest. Students will have read the research paper (or judicial opinion) in advance and write a brief (2-3 page) reaction paper prior to the presentation. Students are expected to attend the presentation and participate in the discussion. The class will meet for the first seven weeks of the semester, after which the seminar will end. Students wishing to receive an additional independent study credit may then use the remaining weeks of the semester to prepare their own research paper. Alternatively, students not wishing to write an independent study paper may take the seminar for a single credit. There is no final exam. The seminar grade will be based wholly on the reaction papers and workshop participation.

Attribute: LAWB.

BUGL 0205. Partnership and Limited Liability Company Law. (2 or 3 Credits)
This course surveys the law of unincorporated business entities, i.e., partnerships, including the limited partnership (LP) and limited liability partnership (LLP) as well as the limited liability company (LLC). The main focus is on partnerships and LLCs, both from an analytical perspective and from a planning perspective. We will analyze legal problems involved in the formation and operation of closely held businesses. In partnership, the focus is on practical issues arising in commercial and law partnerships, notably those relating to the management of partnerships, agency powers of partners, fiduciary duties among partners, specific duties when partners leave or are expelled, the allocation of profits and losses, the handling of property rights, and continuation versus dissolution of partnerships. Limited partnerships are commonly used in real estate development, oil and gas exploration and extraction, and in the launching of high technology enterprises. The coverage of limited partnership law centers upon the creation of an LP; the status and rights of limited partners and the extent of control limited partners can exercise over general partners. In the field of limited liability companies, now customarily used instead of closely held corporations, we will review their legal nature, mode of creation, alternative forms of manager-managed and member-managed LLCs, management structure and the transfer of interests.

Attributes: BFE, JD, LAWB, LAWI, LMCO.

BUGL 0215. Corporate Social Responsibility Law and Policy. (2 or 3 Credits)
This course is designed to introduce students to the law and practice of corporate social responsibility (CSR). Human rights, labor rights, the environment and anti-corruption efforts are now impacted by almost every aspect of corporate activity. With these myriad touch points, corporations have a key role to play in the development and evolution of these important areas of law. We will begin with the history and modern development of CSR, before moving on to examine the international legal obligations for corporations across the fields of human and labor rights, environmental protection, and anti-corruption. The course will also focus on examples of litigation in domestic courts involving corporations and their alleged abuses of human rights or environmental degradation. Selected domestic legislation will also be discussed on issues such as supply chain regulation and consumer protection.

Attributes: ICE, JD, LLM.

BUGL 0291. Comparative Corporate Law. (2 or 3 Credits)
Corporate law practice today often involves doing business with corporations governed by the laws of countries other than the United States, which requires a basic understanding of how corporations operate across jurisdictions. This course will explore core topics in comparative corporate law and comparative corporate governance, focusing on the U.S. and the major Western European jurisdictions, as well as East Asia and emerging markets to a lesser extent. Although the corporate form seems to be a universal building block of business development, corporate law and governance systems exhibit considerable diversity, as do the economic systems within which corporate law operates. The course will integrate the two goals of providing an overview of differences in legal regulation, and of introducing participants to current academic thinking on how the respective economic and political framework has shaped the development of corporate law and corporate governance institutions. Topics to be covered include comparative governance structures board structures conflicts of interest between man-agers, shareholders, and other stakeholders investor protection and enforcement of corporate law control transactions the role of gatekeepers creditor protection and corporate bankruptcy and the role of the state and corporate governance in emerging economies. For each topic, we will read a basic overview from a textbook as well as leading articles providing different perspectives to allow us to have interesting discussions in class. This seminar may be particularly interesting to students considering a career focusing on corporations internationally. Students have the option of writing a paper to fulfill the writing requirement in this class.

Attributes: BFE, ICE, JD, LAWB, LAWI, LWR.

Prerequisites: (BUGL 0201 (may be taken concurrently)) or (BUGL 0201).

BUGL 0292. Law Firm as a Business. (2 Credits)
So you want to be a lawyer? Do you know how law firms are managed? Do you understand the economic dynamics of a law firm? Do you know which law school grads get hired? And which associates make partner? In today's highly competitive marketplace, it is imperative to understand law firms as businesses. After all, AmLaw 100 firms have gross annual revenues of $250m+ with some elite firms having revenues in excess of a billion dollars. Even small law firms are million-dollar businesses. A lack of business savvy about your own industry could be dangerous to your career. In the course, students will learn how to think critically about business trends that affect the legal profession, law firms and your own career.

Attributes: JD, LLM.

BUGL 0293. Law Firm Marketing. (2 to 3 Credits)
How can you have a successful career? What makes partners want to work with you? What makes clients want to hire you? In today's highly competitive market, “technical” legal competence alone is insufficient and no longer a guarantee of success in winning new business or keeping clients. Marketing and business development are important skills for lawyers pursuing the partnership track and those intending to hang out their shingle. How can you do it in a tasteful and strategic way? Learn what it takes to make you stand out from the crowd, to land a great job, and to build your book of business.

Attributes: JD, LLM.

Updated: 07-27-2020
BUGL 0299. Venture Capital Law. (2 Credits)
The course will provide a practical approach to private equity investing (both venture capital and buyouts), which has become a powerful force in the global marketplace. The course is designed to focus on (a) the legal, business, economic, and financial issues that are addressed in the documentation supporting venture capital and buyout transactions and (b) the dynamics of organizing a venture capital or buyout fund; and organizing, structuring, negotiating, financing, managing, and exiting venture capital-backed companies. There will be regular opportunities for mock negotiations during class and class participation will be very important. Notes/Miscellaneous: Prerequisite: Corporations; Recommended: Securities Law. There will be a take-home examination.
Attributes: LAWB, LLM.
Prerequisite: BUGL 0201.

BUGL 0325. Corporate Finance. (2 to 4 Credits)
This course provides students with an understanding of the basic financial concepts and tools that are important for lawyers who practice business law, either in transactional practices or in those focused on litigation. This course includes studies of the basic techniques used in valuing projects and businesses, the distinctive characteristics of corporate securities (including bonds, preferred stock, common stock, and convertible securities), the factors influencing decisions to pay dividends and repurchase stock, and the principles guiding the determinants of capital structure. This course also includes an examination of the impact of theories of finance, including portfolio theory, asset pricing models, and efficient market theory, on legal rules.
Attributes: BFF, CORC, LAWB.

BUGL 0371. Negotiations. (2 Credits)
Negotiation is a critical component of any practicing lawyer’s daily work. Lawyers negotiate with their clients to develop transactional and litigation strategies, with their adversaries to conclude deals or lawsuits, with courts and governments to secure parameters of proceedings, and with their colleagues to manage their workloads. This course will explore the strategies and tools available to lawyers when negotiating in different forums. Students will learn how to prepare for negotiations, practice various tactics, explore individual and collective bargaining, and use Alternative Dispute Resolution resources. Students will participate in simulated exercises to develop their skills.
Attributes: JD, LAW, LDE, LLM.

BUGL 0402. Social Enterprise Law. (2 Credits)
Social enterprises represent a new kind of venture, dedicated to pursuing profits for owners and benefits for society. This seminar will explore the nascent and growing social enterprise phenomenon, and explore the legal questions that arise when the boundary between traditionally nonprofit and for-profit activity blurs. Individual classes will explore topics as diverse as corporate social responsibility, corporate philanthropy, hybrid forms of organization, impact investment and social finance, socially-responsible investing and crowdfunding, social enterprise exit planning, and the use of for-profit entities to conduct philanthropic activity. Students will write both short reaction papers and a longer research paper, contribute to leading the class discussion, and make individual presentations. Corporations is a pre- or co-requisite.
Attributes: INLJ, LAWB, LLM.

BUGL 0405. Corporate Governance. (2 Credits)
This course will focus on the evolving role of the board of directors in public companies, including the current law, rules and listing standards (such as the Dodd-Frank Act, Sarbanes-Oxley Act, SEC regulations, NYSE rules, and state law), how boards and committees actually are structured and how boards operate in key areas, including the selection of new board members, oversight of financial and other disclosures, hiring, firing, and oversight of management and approval business strategies, with particular focus on the role of the board in the M&A context. Exam is take-home.
Attributes: CORC, CRCP, LAWB.
Prerequisite: BUGL 0201.

BUGL 0407. Mergers and Acquisitions. (3 Credits)
This course provides students with an understanding of the issues (and problems) that confront lawyers and their clients in business acquisition (and divestiture) transactions. This course includes studies of the nature and structure of merger and other acquisition (and divestiture) transactions as well as of the statutes, regulations, and case law that govern these transactions. More specifically, this course includes an examination of the rationales offered to explain the occurrence of these transactions, the techniques used to accomplish these transactions, and the legal rules relevant to these transactions. As a general matter, the course approaches business acquisition (and divestiture) transactions from a practical (rather than a theoretical) perspective and focuses on the legal (rather than financial) aspects of these transactions. This course has a take-home final exam.
Attributes: BFE, JD, LAW, LAWB, LAWI, LLM.
Prerequisite: BUGL 0201.

BUGL 0590. Corporate Transactions: Finance and Litigation. (2 or 3 Credits)
This course analyzes the nature of the legal relationships established and maintained in the structuring and execution of various capital formation and other corporate finance transactions, as well as court decisions dealing with various legal challenges thereto. In addition to the study and analysis of pertinent state and federal statutory provisions and judicial opinions, the actual documentation involved in such transactions, including debentures, indentures, preferred stock provisions, convertible securities, and acquisition agreements is considered. The cases to be studied provide a “judge’s eye view” of corporate finance documents which is of great value, whether one is negotiating or drafting the same or advocating for a particular interpretation thereof in a litigation context. The Examination will be open book and will consist solely of essay questions relating to the material actually covered in class.
Attributes: LAWB, LLM.
BUGL 0780. Global Capital Markets and Governance. (2 to 3 Credits)
This course provides an overview of regulatory requirements, trends in global finance, and corporate governance. Specific focus is on capital market developments in Anglo-Saxon systems of governance, e.g., the U.S., Asian systems, e.g. Keiretsus and Chaebols, State/Crony Capitalism systems of governance, e.g., China and Russia, Universal Banking systems, e.g. Continental Europe and Family Dominated systems such as those found in parts of Europe, South East Asia, the Middle East and South America. Trends in capital raising, including Private IPOs/Unicorns, Fintech, Block Chain technology, Private Equity, Venture Capital, Crowdfunding and Merger and Acquisition/Corporate Activism/Shareholder Stewardships, the new Corporate Governance ESG Ecosystem, including: Impact Investing, Socially Responsible Investing, and the UN's PRI. The structural evolution to the global financial architecture, including the creation of the Asian Infrastructure Investment Bank; China's One Belt; One Road initiative and the renminbi as a reserve currency, and the emergence of sovereign wealth and development funds, including the Saudi Aramco IPO and its implication for the potential decarbonization of the world economy. The course is taught in a practical way and references US Federal securities law and SRO rules in providing a regulatory overview throughout the course. Paper required.
Attributes: CORC, CRCP, ICE, LAWB, LAWI.

BUGL 0902. Corporations. (4 Credits)
This course provides students with a basic understanding of the law that governs business organizations, particularly publicly held corporations. Aspects of the laws of agency and partnership are first considered to highlight the relationship to corporate law. In turning to corporations, the course considers the rights and duties of boards of directors, officers, and shareholders. Specific topics include the nature of debt and equity securities, the role of fiduciary duties, the regulation of conflicts of interest and insider trading, and the fundamentals of control transactions (like mergers and acquisitions). The course introduces students to state common law and statutory systems, as well as aspects of the federal securities laws, that regulate business organizations. Issues relating to the role of business organizations in society and the role of attorneys in representing these organizations are also considered.

BUGL 0909. Corporations. (4 Credits)

BUGL 0929. How Mergers and Acquisitions Get Done. (3 Credits)
‘How M&A Gets Done’ is intended to provide students with a background in many of the basics of M&A transactions. The class will begin by focusing on why companies do M&A and how they are judged by their shareholders, debt holders and other stakeholders. Financial concepts, such as the basic components of a balance sheet and income statement, earnings per share, book value per share, and return on equity will be taught from their most basic building blocks. No financial background is needed to do well in the class, and financial jargon will be forbidden. We will then take two classes to review an M&A auction process from beginning to end, and in so doing will review the teaser, the non-disclosure agreement, the offering memorandum, bid instruction letters and bid letters, the on-site due diligence process, board of director updates, and the exclusivity agreement. In so doing, we will generally use actual deal documents, often black-lined versions, to help us discuss drafting techniques and deal tips for representing buyers and sellers. The purchase agreement will then be studied in depth, in two full classes. Other topics covered will include classes dedicated to hands-on exercises in each of negotiations, document mark-ups, and valuation, plus classes on banker fairness opinions and basic tax structuring. In this class you will learn a wide spectrum of Mergers & Acquisitions basics. Many evenings we will be joined by guest lecturers from the M&A community, including corporate heads of M&A and law firm M&A partners. Moreover, each class will have a small portion dedicated to how better to succeed in both business and in life, which I am hopeful will benefit you whether or not you ultimately chose M&A as a profession.
Attributes: LAWB, LAWI.

Criminal Law (CRGL)
CRGL 0103. Criminal Law. (3 to 4 Credits)
 Begins with an examination of theories of punishment and constitutional principles of criminal justice. The course then examines the substantive law of crimes, including the sources of law, inchoate crimes, accessorial conduct, elements of major crimes, defenses to criminal responsibility, and issues of prosecutorial discretion.
Attributes: JD, LMCO.
CRGL 0203. International Criminal Law. (3 Credits)
The Course will give an introduction into international criminal law (ICL) focusing on the law and practice of the permanent International Criminal Court (ICC). It will refer to current investigations and trials of the ICC. In the first session students will be made familiar with relevant readings, i.e., literature and case law. After some remarks about ICL as a term and a concept and the setting out of the historical development (A.) of ICL (here, we will be talking about the Nuremberg Trials but also about the Rome Conference that led to the establishment of the ICC, where the US delegation played an important role) the ICC and other tribunals will be examined (B). The substantive ICL will be analysed by looking at its general principles (C., e.g.: intent, defenses, attempt etc.) and the crimes and sentencing (D.). The law and practice of international criminal procedure (E.) and the cooperation/enforcement regimes follow (F, keep in mind that the ICC has no police force). A special consideration deserve the role and rights of victims (G.). Last but not least, the implementation of the ICC Statute at the domestic level will be explored (H.).
Attribute: LLM.
CRGL 0204. Federal Sentencing Practice and Procedure. (2 Credits)
This seminar, taught by a United States District Judge for the Southern District of New York, will explore the federal sentencing system, with a particular emphasis on practice and procedure. We will examine the history of federal sentencing law, from an era of nearly unfettered judicial discretion through the creation of the United States Sentencing Guidelines, and how the Guidelines evolved from a mandatory sentencing system into the advisory system in use today. We will study the ways in which sentencing authority is allocated among the legislative, executive, and judicial branches, and the conflicts that arise as a result. We will explore the history and evolution of mandatory minimum penalties. We will also examine the impact of the Guidelines and mandatory minimums on prosecutors’ charging decisions and on plea bargaining. And we will discuss how judges decide what sentences to impose. The format of the class will primarily be class discussion, with guest appearances from judges, prosecutors, defense attorneys, and others to enable students to gain practical insights into the federal sentencing process.
Attributes: INLJ, LLM.

CRGL 0206. Advanced Criminal Law and Criminal Procedure. (3 Credits)
This seminar examines a variety of cutting edge, at times controversial, topics in criminal law and criminal procedure that typically cannot be covered in detail, if at all, in a first year criminal law course. The topics range from decisions that judges must make during sentencing to the lengths and limits of prosecutorial discretion and defense practices, as well as academic arguments on truth, guilt, criminalization, and criminal liability. Students will learn how discoveries in more specialized areas, such as racial justice, domestic violence, confessions, and drugs use, all reveal underlying doctrinal and practical problems in the criminal justice system. The seminar’s primary format consists of a speakers series comprising some of the leading experts in the country—judges, prosecutors, defense attorneys, academics, researchers—who will come and discuss cases, ideas, or their written work so that the class can interact with them directly by way of questions or commentary. Each week’s reading material will be provided on the seminar’s TWEN site. There is no casebook or material to purchase.
Attributes: JD, PIE.

CRGL 0210. White Collar Criminal Investigations and Parallel Civil Proceedings. (2 Credits)
Handling the minefields of white collar criminal investigations and related civil proceedings is the focus of this seminar, which is taught by a federal judge and a defense counsel who are former prosecutors. <p>
Today, every high profile criminal matter – whether Harvey Weinstein, Rajaratnam or Madoff – involves parallel civil litigation, such as an SEC enforcement action, a state attorney general lawsuit, a private class action or a tort claim. For many defendants caught up in a criminal investigation, the consequences of companion civil litigation or regulatory proceedings may be as serious as the criminal investigation; companies may be barred from lines of business, or put out of business entirely, and individuals may face loss of a law, accounting or securities license. <p>
Although criminal and civil law are traditionally separate disciplines, increasingly, the line between those disciplines has blurred. Criminal penalties may be monetary and involve restitution to victims, who are often private parties. Strict liability criminal statutes require no mens rea. These are more than definitional or theoretical issues, and this seminar explores the practical problems that arise at the crossroads of criminal and civil law. <p>
No lawyer can competently represent a client confronting cases at these crossroads without analyzing the ramifications of an action taken in one context for the other. What are the consequences, for a related civil case, of asserting Fifth Amendment rights in the context of a criminal prosecution? What are the consequences, for related civil litigation, of entering a guilty plea in a criminal proceeding? Can a party provide the government with an internal investigation report, but withhold that report from adversaries in civil discovery? <p>
This class addresses these issues, taking into account perspectives of the court, government prosecutors and regulators, and private civil and criminal counsel.
Attributes: INLJ, LLM.

CRGL 0230. Capital Punishment. (2 Credits)
This course is about the death penalty. We will consider the impact of racism, poverty and ineffective representation on the law and practice of capital punishment. Primarily the course is about the law: the rules and procedures that govern who is, and is not, subject to the death penalty and what principles the law applies to distinguish death-eligible cases from those where the sanction of death would be unlawful. We will also consider moral and philosophical questions about the death penalty, and explore some emerging issues implicated by recent death penalty jurisprudence. And we will discuss the importance and representational role of the death penalty as a symbol for the American criminal justice system.
Attributes: INLJ, JD, LLM, PIE.

CRGL 0232. Criminal Law Theory. (2 to 3 Credits)
This seminar examines the common assumption that criminal wrongs and moral wrongs are closely related and that criminal law should track morality in some meaningful way. The seminar asks whether morality should have a place in our understanding of criminal law, and what shape moral ideas assume and should assume when they are fashioned as the core of a state institution. These questions will be examined through a philosophical study of various criminal law doctrines, such as justification of punishment, the harm principle, malum prohibitum, self defense, and provocation. Short weekly response papers are required. Laptops are not allowed.
Attributes: INLJ, JD, LLM, PIF.
CRGL 0290. Sentencing Law and Policy. (2 to 3 Credits)
This seminar examines sentencing law in the United States. We will consider both the structure and development of sentencing law as well as its policy implications. Among the legal topics we will discuss are the rise and fall of determinate sentencing; the evolution (and possible collapse) of structured sentencing systems such as guidelines, mandatory minimums, and truth-in-sentencing laws; and the use of alternative sanctions like boot camps. The policy concerns we will address include the role of race and class in the criminal justice system; the causes and effects of prison population growth over the past thirty years; the relationship between criminal sentencing and crime; and reintegrating released inmates into broader society.
Attributes: INLJ, JD, LIDR, LLM, PIE.

CRGL 0302. Criminal Procedure: Advanced Topics. (2 Credits)
This seminar will explore contemporary criminal procedure issues that are not ordinarily examined in depth in the basic criminal procedure courses on investigation and adjudication. In Fall 2019, the focus will be on the criminal process from victims' perspective. Readings and discussions will explore, from the perspective of crime victims and victims' counsel: criminal investigations, prosecutorial charging decisions, communications with victims, victim-witness preparation and examination, pretrial and trial procedures, plea bargaining and sentencing, as well as parallel civil proceedings. The course will examine how the contemporary criminal process balances victims' interests and rights against other public interests and the rights of the accused, and it will explore proposals and opportunities for reform. Students will prepare research and analytic papers and present their work.
Attribute: PIE.

CRGL 0321. Prosecuting Private and Public Corruption. (2 Credits)

CRGL 0323. Criminal Procedure: Investigative. (3 or 4 Credits)
Criminal procedure has been a remarkably provocative topic in the past several years, with issues such as government surveillance and stop and frisk practices garnering frequent headlines. In this course, students will acquire an in-depth understanding of these and other investigative aspects of criminal procedure law. We will begin with a focus on the role of the police in the community, and then move on to a comprehensive analysis of the many issues surrounding searches and seizures, including arrests. We will also address recent developments regarding the impact of technology on search and seizure doctrine, and explore the question of what areas of privacy remain beyond government reach. We will conclude with a discussion of interrogation practices, including the waiver of Miranda protections. The course will spotlight developments in New York City and the role of its criminal justice actors (judges, police officers, etc.) as a means to a broad understanding of how the rules and practice of criminal procedure affect cities throughout the country. The format of the class will be primarily class discussion, as well as guest speakers who will provide real-world perspective on the topics addressed during the semester.
Attributes: INLJ, JD, LDF, LIDR, LLM, LMCO, PIE.

CRGL 0325. Criminal Procedure: Adjudication. (3 Credits)
PROFESSOR YOUNGJAEE LEE
The subject of this course is the criminal process between bail and jail. The course will focus on several questions: What is the criminal justice system for? What does it mean to deal with criminal wrongdoing through the rule of law? Why do we have juries? What is impartiality? What rights do criminal defendants have in the process and why and how are they limited? What powers does the State have in the process and why and how are they limited? The course will address these questions by studying, among other things, prosecutorial charging discretion, bail and pretrial release, plea bargaining, trial by jury, double jeopardy, sentencing, right to counsel, and the civil-criminal distinction. This class traditionally attracts those interested in practicing criminal law at some point in their careers, but the issues raised and discussed are of general interest to those who want to think about rule of law, due process, individual rights, adversarialism, state power, and racial justice.<p>PROFESSOR ETHAN GREENBERG:
This course examines the process of criminal litigation, beginning with the arrest or with the filing of charges and continuing through trial and sentencing. Topics will include right to counsel and effective assistance of counsel; pre-trial detention and the right to bail; charging discretion; grand jury; joinder of charges and defendants; discovery; double jeopardy; plea bargaining; and jury trial and sentencing.
Attributes: INLJ, JD, LDF, LIDR, LLM, LMCO, PIE.

CRGL 0343. Transnational Criminal Law. (2 Credits)
In this course, we will study transnational crimes (such as organized crime, trafficking, corruption, money laundering, and terrorism); the principles of jurisdiction that may be used to prescribe, adjudicate and enforce these crimes; enforcement mechanisms of these crimes (including transnational prosecutions); and the logistical and procedural challenges involved in the prosecution of these crimes.

CRGL 0360. International Criminal Law. (2 or 3 Credits)

CRGL 0380. Organized Crime. (2 Credits)
This course will focus on selected legal and practical issues that arise from investigation, prosecution and defense of organized crime groups. Topics will include defining organized crime, choosing an investigative target, the concept of entrapment, electronic surveillance, the use of informants and undercover agents, RICO, OCCA, money laundering, forfeiture, the federal witness protection program, anonymous juries and the right to counsel of choice. Federal law will be compared to New York State law with a view towards examining their differences and how those differences have an impact on choosing whether to investigate and prosecute federally or in the New York State system. The course will include panel discussions with agents, prosecutors and defense counsel.
Attribute: INLJ.
CRGL 0402. Criminal Law Speaker Series. (1 Credit)
This seminar examines a variety of cutting edge, at times controversial, topics in criminal law and criminal procedure that typically cannot be covered in detail, if at all, in a first year criminal law course. The topics range from decisions that judges must make during sentencing to the lengths and limits of prosecutorial discretion and defense practices, as well as academic arguments on truth, guilt, criminalization, and criminal liability. The seminar's primary format consists of a speakers series comprising leading experts who will come and discuss cases, ideas, or their written work so that the class can interact with them directly by way of questions or commentary. Each week's reading material will be provided on the seminar's TWEN site (described at the end of this syllabus). There is no casebook or material to purchase.\textbullet{} There are two course requirements for this seminar:\textbullet{} Weekly one-page (single-spaced) analytical papers (85% of your grade and graded pass/fail). These papers are based upon your analysis of the reading materials—\textbullet{} not a summary but rather your thoughts about how the content pertains to legal implications. I will grade the papers on a five point (1-5) scale with five being the highest score. These papers are due on TWEN by (at the latest) 9:00 am on the Monday preceding the Tuesday class. \textbullet{} Class participation (15% of your grade). Most of the class is intended to be interactive between the speaker and students.

CRGL 0413. Juvenile Justice Survey. (2 Credits)
This course will offer a broad survey of juvenile justice issues, including a historical overview of juvenile justice in the United States from the early 20th Century. The seminar will review the philosophical and legal underpinnings of various juvenile justice reform movements and select Supreme Court rulings and Congressional forays into the juvenile justice arena during this century. In particular, the course will focus on the federal/state law dichotomy with respect to the prosecution of juveniles, as well as an analysis of Article 3 of the New York State Family Court Act; the competing interests of the clinical, rehabilitative and retributive juvenile justice models; search and seizure; interrogation and confession; pre-trial detention; speedy trial; infancy and mental capacity; double jeopardy; press access and confidentiality; counsel's role in representing juveniles; prosecution of juveniles as adults; and capital punishment.

Attributes: INLJ, JD, LLM, PIE.

CRGL 0510. Psychology and Juvenile Justice Law. (2 to 3 Credits)
This two credit course is designed to provide students with an overview of the interaction between psychology and the juvenile justice system. The course primarily will focus on four major domains: (1) developmental theories and trajectories of antisocial behavior; (2) assessment and identification of risk and protective factors among justice-involved youth, (3) clinical evaluations related to legal questions unique to juvenile courts (i.e., dangerousness, waiver, competence), and (4) empirically supported treatments/program evaluation. Throughout the course, relevant judicial opinions and empirical literature will be used to demonstrate the evolution of the juvenile justice system and application of psychological science to research and practice with justice-involved youth.

Attributes: INLJ, LLM.

CRGL 0829. International White Collar Crime. (3 Credits)

Curriculum and Teaching (CTGE)

CTGE 0101. Prerequisite Completion. (0 Credits)

CTGE 0701. Master's Comprehensive Exam/Assessment. (0 Credits)
Part one of the Master's comprehensive exam or assessment for programs in the Division of Curriculum and Teaching.

CTGE 0702. Master's Comprehensive Exam/Assessment. (0 Credits)
Part two of the Master's comprehensive exam or assessment for programs in the Division of Curriculum and Teaching.

CTGE 0703. Intern Fellowship Portfolio. (0 Credits)
Development and review of professional portfolio for elementary teacher candidates in the Intern Fellowship Program.

CTGE 0704. Childhood Education Portfolio. (0 Credits)
Development and review of professional portfolio for childhood education teacher candidates in MST certification programs. Candidates must demonstrate that they have met childhood education program goals, as well as program goals of specific certification areas.

CTGE 0707. Early Childhood Education Portfolio. (0 Credits)
Development and review of professional portfolio for early childhood education teacher candidates in MST certification programs. Candidates must demonstrate that they have met early childhood education program goals as well as program goals of specific certification areas.

CTGE 0708. Adol Sped Portfolio. (0 Credits)
Development and review of professional portfolio for adolescence special education candidates that must demonstrate that they have met program goals and certification requirements.

CTGE 0709. Adolescence Education Portfolio. (0 Credits)
Development and review of professional portfolio for adolescence education teacher candidates in MST certification programs. Candidates must demonstrate that they have met adolescence education program goals, as well as program goals of specific certification areas.

CTGE 0710. Portfolio for Literacy Education. (0 Credits)
Development and review of professional portfolio for candidates in the Language and Literacy Education programs, Birth–Grade 6; Grades 5–12.

CTGE 0712. Portfolio for TESOL. (0 Credits)
Portfolio for TESOL.

CTGE 0715. Young Readers Portfolio. (0 Credits)

CTGE 0718. Childhood Special Education Portfolio. (0 Credits)
Development and revision of professional portfolio for Childhood Special Education teacher candidates in the MSEd program.

CTGE 0720. Portfolio Extension. (0 Credits)
This course is for candidates who require an additional semesters to complete the professional portfolio. The candidate should continue to work under the guidance of a faculty member in their program. Candidates must demonstrate they have met the goals specific to their academic program and certification area.

CTGE 0900. Maintenance of Matriculation. (0 Credits)
Maintenance of Matriculation.

CTGE 0901. Doctoral Comprehensive Exam/Assessment. (0 Credits)
Part one of the doctoral comprehensive exam or assessment for programs in the Division of Curriculum and Teaching.

CTGE 0902. Doctoral Comprehensive Exam/Assessment. (0 Credits)
Part two of the doctoral comprehensive exam or assessment for programs in the Division of Curriculum and Teaching.

CTGE 0999. C & T Proposal Acceptance. (0 Credits)
During the semester the dissertation proposal is completed.

CTGE 4200. Field Experience Seminar. (1 Credit)
In this seminar, students examine their profession and chosen area of teaching certification. The course provides students with the opportunity to become aware of the many roles of a teacher. Students complete 2 or 3 hours of field experience per week in their grade level of teacher certification.
CTGE 4202. Soph Field Exp Sem 1. (1 Credit)
Students examine their profession and chosen area of teaching certification. The course provides students with the opportunity to become aware of the many roles of a teacher. Students complete a 2-3 hour per week field experience in grade level of teacher certification.
Attribute: TE.

CTGE 4203. Soph Field Exp Sem II. (1 Credit)
Students examine their profession and chosen area of teaching certification. The course provides students with the opportunity to become aware of the many roles of a teacher. Students complete a 2-3 hour per week field experience in grade level of teacher certification.

CTGE 4204. Jr Field Exp Sem 1. (1 Credit)
Students examine their profession and chosen area of teaching certification. The course provides students with the opportunity to become aware of the many roles of a teacher. Students complete a 2-3 hour per week field experience in grade level of teacher certification.
Attribute: TE.

CTGE 4205. Jr Field Exp Sem II. (1 Credit)
Students examine their profession and chosen area of teaching certification. The course provides students with the opportunity to become aware of the many roles of a teacher. Students complete a 2-3 hour per week field experience in grade level of teacher certification.

CTGE 4206. Sr Field Exp Sem 1. (1 Credit)
Students examine their profession and chosen area of teaching certification. The course provides students with the opportunity to become aware of the many roles of a teacher. Students complete a 2-3 hour per week field experience in grade level of teacher certification.
Attribute: TE.

CTGE 4207. Sr Field Exp Sem II. (1 Credit)
Students examine their interests in the teaching profession and chosen area of teacher certification. The course provides students with the opportunity to become aware of the many roles of a teacher. Students complete a 2-3 hour per week field experience in grade level of teacher certification.

CTGE 5065. Integrating Technology Into Elementary Education. (1 Credit)
This course assumes introductory knowledge, skills, and understanding of concepts related to technology including the ability to access, generate, process and transfer information using appropriate technologies as well as familiarity with various software programs. This course will assist students in planning, designing, implementing and assessing learning environments and experiences supported by technology. This course will emphasize computer capabilities for teaching, classroom management, the use of assistive technology and communicating electronically from a K-6 perspective.

CTGE 5066. Teaching Social Studies to Children. (3 Credits)
This course in social studies education provides a conceptual and operational framework for reflective, pre-service teachers, systematically reflecting on research, theory, and practice as these influence teacher decision-making for enhancing student learning in social studies.

CTGE 5155. Special Education Foundations: Past, Present, Future. (3 Credits)
This course will introduce concepts and skills needed for teachers to be able to include students with exceptional needs in regular classes. We will study the nature and needs of students with a full range of abilities and disabilities and the individualized educational program the school must provide for them. The focus of this course will be on adapting environments and instruction to accommodate the needs of diverse student populations. Students will work in small groups to apply critical issues and develop the attitudes and skills needed to work in teams.
Mutually Exclusive: CTGE 6305, PSGE 5301.

CTGE 5157. Assessment Strategies for Young Children with Disabilities. (3 Credits)
This course provides an overview of assessment approaches and practices in early intervention and early childhood special education. Students will obtain skills in administering formal and informal assessments, implementing culturally unbiased instruments and procedures, and interpreting and communicating assessment results for planning intervention and evaluating instruction and programs. The role of the family in the assessment process is emphasized.

CTGE 5159. Assessment of All Children With Disabilities. (3 Credits)
This course prepares students to use formal and informal educational diagnostic methods for assessment, analysis and evaluation of children with disabilities. Issues of non-biased assessment and instructional implications are included.

CTGE 5160. Instructional Modifications for Adolescents in Inclusive Classrooms. (3 Credits)
This course will prepare teachers of adolescents to include students with disabilities and special health care needs in their regular content-area classes. Primary focus is on adapting and individualizing instruction and designing assessments to accommodate these students. In addition, the course will address refining skills for improving reading comprehension of content-area text and for collaborating with others to identify strengths, and preparing students with disabilities and special needs to their highest levels of academic achievement and independence. Prerequisite: CTGE 5154 Including Exceptional Students.

CTGE 5161. Differentiating Instruction for All Students. (3 Credits)
This course focuses on the development of curricula that is provided in a variety of educational settings. This course assumes that a classroom includes students of different physical and cognitive abilities, students of different racial ethnic, religious, and socio-economic origin, and students who demonstrate individual learning styles. The emphasis of this course is on the teaching-learning process via a decision-making model for differentiating instruction. This process considers the materials, presentation style, organization of classroom instruction (small group, individual, etc.), and the use of technology in differentiating curricula. Recognizing instruction as a collaborative process, this course will examine ways to build collaborative skills needed to establish positive professional relationships with parents, psychologists, social workers, administrators, community agencies, and paraprofessionals.
CTGE 5165. Consultation and Co-Teaching in Collaborative Classrooms. (3 Credits)
Develop the knowledge, skills, and professional dispositions related to effective communication and shared problem-solving used daily in supporting students, families, and the community. Practice facilitation roles and responsibilities in key school structures, including IEP meetings, pre-referral intervention assistance teams, RTI teams, paraeducator partnerships, transition planning, and collaborative or co-teaching. Learn how to use positive behavior intervention and supports, functional behavioral analysis, and behavioral consultation. Plan how to develop a collaborative classroom culture where diversity strengthens a learning community.

CTGE 5170. Assessment of All Learners with Disabilities. (3 Credits)
This course prepares students to use formal and informal educational diagnostic methods for assessment, analysis, and evaluation of children with severe disabilities. Issues of non-biased assessment and instructional implications are included. Students will conduct an in-depth assessment project (RTI) in which they will use multiple assessment methods to evaluate an at-risk student or student identified with special needs in reading, writing, or mathematics, and then make recommendations for services and instruction.

CTGE 5175. Teaching English Language Arts and Social Studies in Inclusive Adolescence Classrooms. (3 Credits)
This course has been developed to meet the new state requirements for teachers of students with disabilities in grades 7–12. Through this course, candidates will develop the skills necessary to provide specifically designed instruction to students with mild, moderate, severe, and multiple disabilities, including those using assistive technology. They will know and be able to use research-based teaching methods of core content areas, including instructional technology, and acquire sufficient pedagogy skills to teach secondary English language arts and social studies in a supportive role. In addition, candidates will learn how to provide access to the general education curriculum through modifications, accommodations, remediation, and acceleration.

Prerequisite: CTGE 5155 (may be taken concurrently).

CTGE 5176. Teaching Math and Science in Inclusive Adolescence Classrooms. (3 Credits)
This course has been developed to meet the state requirements for teachers of students with disabilities in grades 7–12. Through this course, candidates will develop the skills necessary to provide specifically designed instruction to students with mild, moderate, severe, and multiple disabilities, including those using assistive technology. They will know and be able to use research-based teaching methods of core content areas, such as instructional technology, and acquire sufficient pedagogy skills to teach secondary math and science in a supportive role. In addition, candidates will learn how to provide access to the general education curriculum through modifications, accommodations, remediation, and acceleration.

Prerequisite: CTGE 5155 (may be taken concurrently).

CTGE 5200. Field Experience Seminar: Issues in Reflective Practice. (0 Credits)
This seminar is taken concurrently with first field placement. Along with a focus on issues in teaching practices, topics such as behavior, social/emotional learning, and EDTPA are discussed. Field experiences progress from observation to guided practice with small and whole groups of students. Teacher candidates are assigned to field experiences across a variety of settings and grade levels appropriate to their area of study. The seminar is intended as a vehicle for critical and collaborative reflection, through which theory can be integrated with practical experiences. The seminar also provides a structure for organizing workshops in the prevention of child abuse, drug and alcohol abuse, and violence, and for developing the skills and knowledge necessary to provide a sense of community in a safe, respectful, and nurturing classroom environment.

CTGE 5201. Student Teaching Seminar: Issues in Reflective Practice. (3 Credits)
The seminar is taken concurrently with second student-teaching placements. Along with a focus on issues in teaching practices, topics such as behavior, social/emotional learning, and EDTPA are discussed. Student-teaching experiences progress from guided practice with small and whole groups of students to full-time student teaching with ongoing responsibilities for curriculum and instruction. Teacher candidates are assigned to student-teaching experiences across a variety of settings and grade levels appropriate to their area of study. The seminar is intended as a vehicle for critical reflection through which theory can be integrated with practical experiences.

CTGE 5203. Field Experience Seminar. (0 Credits)
This seminar/field placement focuses on integrating theory and practice in a setting and grade level appropriate to the candidate’s area of study. Foci include observing, guided practice with small and whole groups of students with the seminar designed as a vehicle for critical and collaborative reflection.

CTGE 5205. Intern Fellows Seminar. (0 Credits)
Zero credit and fee for TFA and specific grant programs.

CTGE 5210. Field Experience. (0 Credits)
Zero credit and fee for TFA and specific grant programs.

CTGE 5211. Practicum for In-Service Teachers. (0 Credits)
Supervised student teaching in a setting selected under advisement. Analysis of innovative designs and application of theory to practice. Critical analysis of student competency through self-evaluation and supervisory feedback. Open only to students who already possess initial or professional certification.

CTGE 5212. Teaching the Arts in Childhood Education. (1 Credit)
Introduction to creative and expressive development in children, and to the theory and practice of appreciating and producing drama, movement, music, and the visual arts, as well as the integration of the arts into interdisciplinary curricula.

CTGE 5216. L/T in Pr/El Grds: Soc St. (4 Credits)

CTGE 5222. Practicum for In-Service Teachers. (3 Credits)
Supervised student teaching in a setting selected under advisement. Analysis of innovative designs and application of theory to practice. Critical analysis of student competency through self-evaluation and supervisory feedback. Open only to students who already possess initial or professional certification.
CTGE 5244. Rdg Writ Lang Arts. (3 Credits)
CTGE 5227. Teaching Mathematics to Children. (3 Credits)
This course in mathematics education provides a conceptual and operational framework for reflective, pre-service teachers, systematically reflecting on research, theory, and practice as these influence teacher decision-making for enhancing student learning in mathematics.

CTGE 5230. Framework for Education for All Young Children. (3 Credits)
A critical analysis of the theoretical and empirical bases for working in early childhood settings developed for young children with and without disabilities. Overview of legislation, program models, and program review.

CTGE 5232. Early Childhood Curriculum and Assessment. (3 Credits)
Conceptual analysis and evaluation of existing early childhood curricula, including emerging trends and issues, educational assessment of the young child, strategies and issues, formulation and implementation of educational goals and objectives, and instructional and behavioral.

CTGE 5233. Early Learning Through Play. (3 Credits)
This course focuses on creating, implementing, and assessing appropriate play experiences in diverse early childhood classrooms. The development of play and its potential for learning across the curriculum will be addressed, with emphasis on the preschool, kindergarten, and early primary grades. Helping families understand the value of play in early learning also will be included.

CTGE 5234. Family, Community, and All Young Children. (3 Credits)
This course critically examines the ecology of early childhood; the young child as a reactive and proactive agent in dynamic interaction with forces in the physical and social environment (family, home, neighborhood, media, legislation, child advocacy, etc.); the reciprocal relationship between early childhood education, family, and community.
Mutually Exclusive: CTGE 6320.

CTGE 5242. Teaching Science and Technology to Children. (3 Credits)
This course will provide opportunities to critically analyze recent concepts, theories, and practices in developing a science curriculum. Current trends, technologies, and technological issues and their impact on society will be explored. Emphasis will be placed upon gaining knowledge bases for the life, physical, and earth sciences. Opportunities will be provided to develop an understanding of instructional technologies as tools for reflective practitioners, and to evaluate their use and effectiveness.

CTGE 5243. Teaching and Assessing Mathematics in Elementary Classrooms. (3 Credits)
This course supports elementary mathematics educators in teaching all children developmentally appropriate topics in algebra, probability, statistics, geometry, and measurement. Attention will be given to designing and implementing a mathematics teacher work sample using manipulatives, technology, problem-solving strategies, and ongoing assessment to improve student learning.

CTGE 5245. Children's Literature in a Multicultural Society. (3 Credits)
Issues of equity and justice are explored through literature. Adult and children's literature are used to examine the concept of cultural pluralism—the values, traditions, and aspirations of various immigrant and ethnic groups. Introduction to various genres and uses of literature in the early childhood and childhood language arts program.

CTGE 5247. Teaching Linguistically and Culturally Diverse Children. (3 Credits)
Theory and practical approaches and strategies to make content relevant and understandable to students in mainstream classrooms, PreK-6th grade, who may lack English language proficiency, experience, and background.

CTGE 5259. Contemporary Social Studies Education. (3 Credits)
This course familiarizes students with the trends and issues facing the specific disciplines in the social studies. The course will examine trends, issues, and implications for the future of American history, global studies, government and politics, economics, anthropology, sociology, and psychology. A strong content base and an appreciation of contemporary issues will enable students to understand the current status of social studies and the implications for the future.

CTGE 5261. Teaching and Assessing Social Studies: Adolescents. (3 Credits)
This course focuses on recent developments and persistent issues of classroom practice in the teaching of secondary social studies, and on developing skills in teaching methods such as reflective inquiry, problem solving, critical thinking, decision-making, and assessment. Disciplines include anthropology, economics, geography, history, jurisprudence, political science, psychology, and sociology.

CTGE 5270. Tchg Biology to Adol. (3 Credits)
This course familiarizes students with a variety of methods and materials for teaching biology in the secondary schools. The development and analysis of the goals and content of a secondary biology course is emphasized using short- and long-range planning, adherence to curricular standards, assessment of student achievement and teacher effectiveness, instructional applications of technology, and other instructional methods and strategies. Course activities provide a basis for the development of competent biology teachers, including familiarity with relevant journals, issues, sources of information and instructional assistance, and opportunities to practice reflection. The goals and objectives of the course are in concert with the National Science Education Standards for professional development of learning biology content, learning to teach biology, lifelong learning, and integrated programs.

CTGE 5271. Teaching and Assessing Biology: Adolescents. (3 Credits)
This course familiarizes students with a variety of methods and materials for teaching biology in the secondary schools. The development and analysis of the goals and content of a secondary biology course emphasized using short- and long-range planning, adherence to curricular standards, assessment of student achievement and teacher effectiveness, instructional applications of technology, and other instructional methods and strategies. Course activities provide a basis for the development of competent biology teachers, including familiarity with relevant journals, issues, sources of information and instructional assistance, and opportunities to practice reflection in action.

CTGE 5272. Teaching and Assessing Science in Adolescent Classrooms (7-12). (3 Credits)
Teaching and assessing science in adolescent classrooms. This course familiarizes students with a variety of methods and materials for teaching science (biology, earth science, physics and chemistry) to adolescents.
CTGE 5275. Integrating Math, Science, and Technology Education. (3 Credits)
This is a culminating course in the secondary math and science education programs. It assumes a strong knowledge base in math and/ or science content knowledge, pedagogical content knowledge and pedagogical knowledge. One goal of this course is to gain a deeper knowledge and understanding of models of integrated teaching and learning such as project-based learning, problem-based learning, thematic and interdisciplinary teaching and learning. The second goal is to explore technology through integrated learning activities and projects. In order to gain this knowledge and experience we will engage in dialogue, investigation, analysis and reflection of specific projects that integrate math, science and technology in secondary school. The course will culminate in teams of students developing an MST integrated project to be utilized in their own teaching practice.

CTGE 5276. Clinical Seminar in Adolescence Science Education. (3 Credits)
This course is designed to develop skills and habits of mind that are requisite to reflective practitioners of science teaching. Course participants will engage in reflective discourse with peers and mentors to engage in a process of continuous learning in professional practice. The focus of the discussions, assignments, and mentoring/instructional activities will be on developing pedagogical content knowledge and skills needed to positively impact the life and learning of all students.

CTGE 5277. Clinical Seminar in Behavioral Environments for Adolescent Exceptional Learners. (3 Credits)
This course is designed to develop skills and habits of mind that are requisite to reflective practitioners who teach adolescent exceptional learners in behavioral environments. The course content will prepare teachers in special education to support students with disabilities in diverse settings through the use of positive behavior intervention and supports, functional behavioral analysis, behavioral consultation, and current strategies in behavior management. The course focuses on the application of empirically validated social interaction/communication and on behavioral interventions that are consistent with evidence-based practices. In addition, teacher candidates will develop an understanding of the processes integral to researching student knowledge while promoting student learning. This course is aligned to student teaching.

CTGE 5279. Contemporary Science Education. (3 Credits)
This course is designed to provide students with a familiarity with the origins and growth of the ideas of science education. It will also examine past, current, and emerging issues affecting science education.

CTGE 5280. Teaching Chemistry to Adolescents. (3 Credits)
This course integrates the knowledge and processes of chemistry with chemistry teaching and learning. Teachers build and develop reflective teaching and learning practices that will enable them to teach, support, and assess students of diverse interests, abilities, and culture. The goals and objectives of the course are in concert with the National Science Education Standards for professional development of learning chemistry content, teaching to teach chemistry, lifelong learning, and integrated programs.

CTGE 5281. Teaching and Assessing Chemistry: Adolescents. (3 Credits)
This course integrates the knowledge and processes of chemistry with chemistry teaching and learning. Teachers build and develop reflective teaching and learning practices that will enable them to assess, teach, and support students of diverse interests, abilities, and cultures.

CTGE 5283. Teaching and Learning Math in the Middle Grades. (3 Credits)
In this course, students focus on understanding the learning challenges and requirements of middle school mathematics. It will focus on topics such as proportional reasoning, rational numbers and operations, and problem solving. Students will explore opportunities for discovery and investigation, strategic thinking, reasoning and justification, and efficient algorithms. They will also examine the use of a variety of tools intended to assist students in their learning.

CTGE 5284. Teaching and Learning Foundational Topics and Math. (3 Credits)
This course focuses on methods that foster student development in their understanding of algebraic and geometric mathematics as well as problem solving and modeling. A model of essential understandings for the developing mathematics teacher is provided in the diagram below. This course will expand a teacher candidate’s knowledge in each area but it will focus on knowing and understanding algebraic and geometric thinking.

CTGE 5286. Teaching and Assessing Mathematics in Adolescent Classrooms. (3 Credits)
This course introduces a variety of instructional and assessment strategies for teaching mathematics to adolescents in grades seven through 12. Discussions center on methods of planning, teaching, and managing mathematics classes. This course is taught during the student-teaching experience.

CTGE 5287. Clinical Seminar in Adolescence Mathematics. (3 Credits)
This course is designed to develop skills and habits of mind that are requisite to reflective practitioners of teaching. Course participants will engage in reflective discourse with peers and mentors to engage in a process of continuous learning in professional practice. The focus of the discussions, assignments, and mentoring/instructional activities will be on developing pedagogical content knowledge and skills needed to positively impact the life and learning of all students.

CTGE 5290. Teaching Physics to Adolescents. (3 Credits)
This course integrates the knowledge and processes of physics with physics teaching and learning. Teachers build and develop reflective teaching and learning practices that will enable them to teach, support, and assess students of diverse interests, abilities, and cultures. The goals and objectives of the course are in concert with the National Science Education Standards for professional development of learning physics content, learning to teach physics, lifelong learning, and integrated programs.

CTGE 5291. Teaching and Assessing Physics: Adolescents. (3 Credits)
This course integrates the knowledge and processes of physics with physics teaching and learning. Teachers build and develop reflective teaching and learning practices that will enable them to assess, teach, and support students of diverse interests, abilities, and cultures.
CTGE 5303. Lrng Environ: Ref Fld Exp. (3 Credits)
This course helps teacher candidates develop an awareness of the complexity of teaching through field experiences. Emphasis is placed on classroom application of and critical and collaborative reflection upon concepts, techniques, and theories learned in courses and other structured learning experiences. The course examines teacher candidates’ perceptions about the classroom and their learning that are necessary for anticipated learning to occur, ways that teachers can learn about their diverse students, approaches to student motivation, the concept of effective classroom instruction for students within the full range of abilities, the planning and writing of unit plans, and classroom management systems. It also provides a structure for developing the skills and knowledge necessary to provide a sense of community in a safe, respectful, and nurturing classroom environment.

CTGE 5304. Learning Environments for Diverse Adolescents: Reflective Field Experience. (1 to 3 Credits)
This course focuses on assuming a professional stance in regard to developing curriculum and interacting with students and colleagues in schools. Teacher candidates develop an understanding of the processes integral to reflecting on and researching student knowledge while promoting student learning. Students in this course will learn how to use research to examine, reflect on, and modify instruction to increase their knowledge and skills in teaching all students. Diversity and social justice are recurring themes for discussion and reflection. In addition, this course focuses on the development of the professional portfolio to meet the requirements for a comprehensive examination for the pedagogical portion of the program.

CTGE 5305. Teaching Linguistically and Culturally Diverse Adolescent Students. (3 or 4 Credits)
This course highlights instructional approaches and strategies for teachers of adolescents to promote oral and written English language development in culturally and linguistically diverse students. Emphasis is on creating an integrated classroom where the experiences, capacities, interests, and linguistic and cultural needs of adolescent English language learners are addressed. The course will examine language acquisition and development, as well as the impact of heritage and culture on the progress of English language learners.

CTGE 5307. Research and Assessment While Teaching Adolescents. (3 Credits)
In this course, teacher candidates develop an understanding of the processes integral to researching student knowledge while promoting student learning. Teacher candidates will review, create, evaluate, and interpret a wide range of standardized and alternative approaches to assessment, acquiring an abundant repertoire of strategies for assessing student learning in the classroom context, and using that information to plan or modify instruction. Students will learn how to use research to examine and reflect on their teaching, and to update knowledge and skills in teaching.

CTGE 5308. Student-Teaching Adolescents: Research and Reflective Practice. (1 to 3 Credits)
This course focuses on assuming a professional stance in regard to developing curriculum and interacting with students and colleagues in schools. Teacher candidates develop an understanding of the processes integral to reflecting on and researching student knowledge while promoting student learning. Students in this course will learn how to use research to examine, reflect on, and modify instruction to increase their knowledge and skills in teaching all students. Diversity and social justice are recurring themes for discussion and reflection. In addition, this course focuses on the development of the portfolio to meet the requirements for a comprehensive examination for the pedagogical portion of the program.

CTGE 5357. Innovative Curriculum and Teaching Practices and Models. (3 Credits)
Examines innovative curriculum models and teaching methods to improve the learning conditions for students; exemplary programs and practices are discussed, including interdisciplinary teaching, and teaming of students and faculty; implications are drawn for maximizing student learning.

CTGE 5401. Human Development and Learning. (3 Credits)
This course builds a professional learning community focused on understanding adolescent learning and teaching for social justice.

CTGE 5402. Teaching and Learning with Diverse Adolescents: Assessment and Planning. (3 Credits)
This course focuses broadly on learning environments, learner development, collaboration, teaching and assessing, social justice, reflection, and continuous professional growth. This course provides initial preparation and practice in issues and strategies for teaching for social justice in classrooms with diverse students. The major areas of focus are classroom environments, adolescent development, assessment, and backward design. Candidates will reflect together on their clinical placements using standards of teaching and learning including the Danielson continuum and the Common Core State Standards. This course is connected to a three–five days/week internship that includes college-supervised student-teaching experience.

CTGE 5411. Perspectives and Issues in Early Childhood Special Education. (3 Credits)
This course provides an overview of the historical and legal perspectives of special education, early intervention, and early childhood special education services. It introduces various service delivery models employing an interdisciplinary approach. Controversial issues and trends in early intervention, early childhood, and early childhood special education are integrated to enable students to read and critically apply research and recommended practices.

CTGE 5420. Educating Culturally and Linguistically Diverse Learners: Preparation K-12. (3 Credits)
In this course Teacher Candidates in Early Childhood, Childhood, and Adolescence Education explore the characteristics, strengths, and needs of students who are culturally diverse and are learning English as an additional language (EAL). It highlights research-based instructional approaches and strategies to promote culturally responsive learning, and oral and written development in EAL across all content areas. The emphasis is on creating an integrated learning environment that enhances culture, language, and content knowledge and builds the academic achievement for all learners.

CTGE 5421. Planning Instruction for Young Children with Disabilities. (3 Credits)
This course shall enable students to structure physical and social environments, and to develop and implement instructional and intervention plans and procedures that are developmentally appropriate and respectful of family, cultural, language, and social diversity.

CTGE 5455. Rdg Skills Child Ld. (3 Credits)
CTGE 5530. Adol Literacy English Lang. (3 Credits)
This course will focus on ‘ways with words’ and how to best promote language usage and literacy through our teaching. Topics explored will include linguistic dimensions/systems of language, relationships between spoken and written words, variations within and across languages, readings and writing processes, and of course, how to best incorporate this knowledge into practice as teachers of English language arts. Students will gain deeper understanding of the English language and systems of grammar.
CTGE 5531. Language and Culture in Adolescent English Language Arts. (2 Credits)
This course will focus on “ways with words” and how to best promote language usage and literacy through our teaching. Topics explored will include linguistic dimensions/systems of language, relationships between spoken and written words, variations within and across languages, reading and writing processes, and how to best incorporate this knowledge into practice as teachers of English language arts. Students will gain a deeper understanding of the English language and systems of grammar.

CTGE 5532. Dev Lit Intermediate Grades. (3 Credits)
Students examine ways of organizing and implementing curriculum and instruction that foster literacy development in a range of students in grade 5-9. Students explore strategies for assessing and improving reading comprehension and writing fluency, develop strategies for motivating intermediate students to read and write, and discover methods for integrating electronic and other non-print texts into the curriculum for developing literacy.

CTGE 5534. Beginning Reading and Writing in Inclusive Classrooms. (3 Credits)
This course focuses on the development of linguistic and cognitive processes in emergent literacy and beginning reading and writing, as well as application in models for the instruction and assessment of reading and writing in young children. The course includes contemporary as well as historic approaches to the relationship between meaning-based literacy activities and word-level reading and spelling. It also includes material on classroom-based interventions for young children at risk of reading failure because of learning differences.

CTGE 5540. Adolescent Literature in a Multicultural Society. (1 to 3 Credits)
An exploration of the role of diverse adolescent literature from multiple genres across the disciplines as a vehicle for introducing students to themselves, their world, and the worlds of other cultures. Works will include those written by women and authors from a variety of cultures. Students will plan curricula that incorporate a variety of instructional strategies, integrating adolescent literature across curriculum areas in order to foster lifelong habits of reading, critical thinking, and judgment in adolescent readers.

CTGE 5545. Rdg Diag: Sec Sch/Adults. (3 Credits)

CTGE 5547. Literacy and Learning Across the Curriculum. (3 Credits)
In this course, students will learn about reading and writing as processes, language and literacy development, the use of literature and meaningful writing activities in content area curriculum, and the acquisition of comprehension, critical thinking and study skills needed for a variety of text types. Assessment of literacy proficiencies will be examined. The focus of this course is on middle and high school application.

CTGE 5548. Literacy Across the Curriculum in Inclusive Classrooms. (3 Credits)
This course has a threefold focus: an in-depth study of strategies for comprehending and creating text; integration of previous coursework in a comprehensive literature-based interdisciplinary theme unit; and an expectation that teachers or teacher candidates will teach, evaluate, and reflect upon this curriculum in their role as teacher-researchers. Topics include background knowledge, questions, and queries; reader response theory; cognitive and metacognitive strategies, interconnections between text structure in reading and text structure in writing; study and research strategies; and multiple print sources, including technology. The course promotes the individualization of curriculum for all children.

CTGE 5549. Assessing and Developing Reading and Writing in Social Studies, Science, and Mathematics. (3 Credits)
In this course, students will learn about reading and writing as processes; language and literacy development; and use of literature and meaningful reading-writing strategies in content-area curriculum; and the acquisition of comprehension, critical thinking, and study skills needed for a variety of text types. Assessment of literacy proficiencies will be examined. The focus of this course is on middle and high school application.

CTGE 5551. Reflective Practice and Field Experience I in an Inclusive Childhood Classroom. (1 to 3 Credits)
This course provides an introduction to schools and schooling practices. The Reflective Seminar is intended as a vehicle for critical reflection through which theory can be integrated with practical experiences. It focuses on several interconnected teaching strands: curriculum design, lesson planning, classroom organization, classroom management, assessment, reflective practice, collaboration and professionalism. Students in this seminar are viewed as reflective practitioners who draw from multiple models in planning for learning and teaching. This planning will build an inclusive community of learners, minimize behavior problems, and provide a welcoming, supportive environment for all children. The course meetings are designed to meet the varying needs of our students in either the traditional or alternative programs. The seminar also provides a structure for organizing workshops in child abuse prevention, drug and alcohol abuse prevention, and violence prevention. Field experiences progress from observation to guided practice with small and whole groups of students.

CTGE 5552. Reflective Practice and Field Experience II in an Inclusive Childhood Classroom. (1 Credit)
This course provides an introduction to schools and schooling practices. The Reflective Seminar is intended as a vehicle for critical reflection through which theory can be integrated with practical experiences. It focuses on several interconnected teaching strands: curriculum design, lesson planning, classroom organization, classroom management, assessment, reflective practice, collaboration and professionalism. Students in this seminar are viewed as reflective practitioners who draw from multiple models in planning for learning and teaching. This planning will build an inclusive community of learners, minimize behavior problems, and provide a welcoming, supportive environment for all children. The course meetings are designed to meet the varying needs of our students in either the traditional or alternative programs.

CTGE 5553. Reflective Practice and Student Teaching I in an Inclusive Childhood Classroom. (1 Credit)
This course provides an introduction to schools and schooling practices. The reflective seminar is intended as a vehicle for critical reflection through which theory can be integrated with practical experiences. It focuses on several interconnected teaching strands: curriculum design, lesson planning, classroom organization, classroom management, assessment, reflective practice, collaboration, and professionalism. Students in this seminar are viewed as reflective practitioners who draw from multiple models of planning for learning and teaching. This planning will build an inclusive community of learners, minimize behavior problems, and provide a welcoming supportive environment for all children. The course meetings are designed to meet the varying needs of our students in either the traditional or alternative programs.
CTGE 5554. Reflective Practice and Student Teaching II in an Inclusive Childhood Classroom. (1 Credit)
This course provides an introduction to schools and schooling practices. The reflective seminar is intended as a vehicle for critical reflection through which theory can be integrated with practical experience. It focuses on several interconnected teaching strands: curriculum design, lesson planning, classroom organization, classroom management, assessment, reflective practice, collaboration, and professionalism. Students in this seminar are viewed as reflective practitioners who draw from multiple models in planning for learning and teaching. This planning will build an inclusive community of learners, minimize behavior problems, and provide a welcoming, supportive environment for all children. The course meetings are designed to meet varying needs of our students in either the traditional or alternative programs.

CTGE 5631. Science Curriculum and Instruction. (1 to 3 Credits)
Principles of curriculum construction applied to development of science sequences for children of various ages and ability levels, to assist teachers to understand and present basic concepts of science, and to utilize the environment in science teaching.

CTGE 5634. Community Based Resources for Science. (3 Credits)
This course explores the resources of urban communities for teaching science at elementary and intermediate school levels. Field trips will include visits to urban centers for the study of astronomy, biology, and applied physics.

CTGE 5791. Social Studies Curriculum. (3 Credits)
This course is designed to provide students with the research data, trends, and processes connected with developing an effective social studies curriculum. This course will have both a theoretical and practical focus, which will prepare students for all the steps needed to develop a curriculum—from framing goals and objectives to implementing the curriculum in middle and high school settings.

CTGE 5792. Topics in History, Geography, and Economics. (2 Credits)
Candidates do a brief study of an economics/geography topic and an in-depth study of interdisciplinary theme across time and/or place.

CTGE 5794. Social Studies Scope and Sequence. (1 Credit)
This course prepares candidates to develop a year-long sequence of instruction in one or more 5-12 interdisciplinary content areas.

CTGE 5795. Clinical Seminar in Adolescence Social Studies. (3 Credits)
This course is designed to develop skills and habits of mind that are requisite to reflective practitioners of teaching. Course participants will engage in reflective discourse with peers and mentors to engage in a process of continuous learning in professional practice. The focus of the discussions, assignments, and mentoring/instructional activities will be on developing pedagogical content knowledge and skills needed to positively impact the life and learning of all students.

CTGE 5834. Clinical Seminar in Adolescence Language Arts Education. (3 Credits)
This course is designed to develop skills and habits of mind that are requisite to reflective practitioners of teaching. Course participants will engage in reflective discourse with peers and mentors to engage in a process of continuous learning in professional practice. The focus of the discussions, assignments, and mentoring/instructional activities will be on developing pedagogical content knowledge and skills needed to positively impact the life and learning of all students.

CTGE 5835. Lang Arts/Tchg of Rdg. (3 Credits)

CTGE 5838. Integrated Instruction in Adolescent English Language Arts. (3 Credits)
This course will develop the knowledge, abilities, attitudes, and pedagogical approaches necessary for teaching English language arts to diverse secondary-level students. Emphasis is on selecting and designing instructional strategies, materials, and assessment tools for meeting the needs of all students in inclusive multicultural classes, and helping them meet the learning standards for English language arts.

CTGE 5839. Integrated Inst. Ela. Adol. (2 Credits)
Develop the knowledge, abilities, attitudes, and pedagogical approaches necessary for teaching English language arts to diverse secondary-level students.

CTGE 5840. Second Language Acquisition. (3 Credits)
L2 Acquisition & Assess. Overview of the nature of second language acquisition processes with emphasis on teaching and learning. Areas addressed include: second-language acquisition, sociolinguistic and psycholinguistic factors in learning a second language, second language proficiency, characteristics of L2 learners, ESL programs, instructional approaches and instructional resources for teachers. Second Language Acquisition (SEC LANG ACQ) title changed September 13, 2011, and again DECEMBER 3, 2012 to SECOND LANGUAGE ACQUISIT.

CTGE 5841. Principles of Bilingual Education. (3 Credits)
Topics include an examination of local, national, and international types of bilingual curricular models and practices; sociolinguistic and psycholinguistic aspects of bilingualism; and approaches to concept development in bilingual students. Graduate students will examine the history of bilingual education in the US, the evolution of different ideologies about language, and their impact on language policies in schools will be conducted.

CTGE 5842. Second Language Acquisition and Assessment. (3 Credits)
Overview of the nature of second language acquisition processes with emphasis on teaching, learning, and assessment. Areas addressed include second language acquisition, sociolinguistic and psycholinguistic factors in learning a second language, second language proficiency and development, and assessment of language competence and performance. In addition, the course will survey characteristics of emergent bilingual students, ESL programs, and instructional approaches and resources.

CTGE 5845. Learning Content Through Language in Multilingual Classrooms. (3 Credits)
This course provides an overview of English language instruction and development across the content areas when working with students who acquire English as an additional language. Particular attention will be given to investigating language demands of academic text; exploring instructional methods and instructional strategies to teach the language of academic text; and designing instruction guided by language standards as well as content standards of social studies, science, and mathematics in culturally and linguistically diverse classrooms.
CTGE 5846. Teaching English Oracy and Literacy to Speakers of Other Languages. (3 Credits)
This course provides an overview of the main theories and research related to the development of oracy and literacy when teaching students for whom English is an additional language. The learning processes of oracy and literacy as well as research-based instructional practices for Pre-K to 12th grades will be examined. Attention will be given to the interconnection of these processes, similarities and differences between oral and written discourses, and the influence of the home language on developing oracy and literacy in English as an additional language. In addition, a survey of children and adolescent multicultural literature and its role in developing oracy and literacy will be conducted.

CTGE 5847. Practicum in Teaching English to Speakers of Other Languages. (3 Credits)
Supervised teaching practice of a minimum of 180 hours in English as a Second Language classrooms. Bi-weekly seminars.

CTGE 5848. TESOL Student Teaching I. (0 Credits)
This course will be an initial semester of supervised student teaching in English as a Second Language in an accredited elementary, junior high or high school, including large-class and small-group teaching as well as observations. The seminar will also focus on effective teaching practices.

CTGE 5849. Designing Culturally and Technologically Relevant Instruction. (3 Credits)
This course provides an overview of designing instruction which integrates cultural, academic, and linguistic funds of knowledge that reside in families of culturally and linguistically diverse students and the neighborhoods and communities where schools are located. In addition, an examination of how instruction is enhanced through technological resources that connect learning in individual classrooms to the outside world will be conducted. Emphasis will be given to exploring socio-historical, cultural, and political influences on learning and teaching, as well as, enhancing education by bridging the gap between schools, families, neighborhoods, and communities.

CTGE 5850. Observing and Documenting Children's Learning: Reflective and Effective Early Childhood Practices. (3 Credits)
This course will introduce major child-development and learning theories, and different assessment tools for observing and documenting child development and learning. Implications for programming and instruction for young children will be discussed.

CTGE 5851. Bilingual Instruction Across Subject Areas. (3 Credits)
This course is designed to provide an understanding of different pedagogical methods to develop bilingualism across subject areas. Additional attention is given to content curriculum and standards, negotiating academic content in more than one language and instructional strategies to scaffold academic language and text bilingually. The exploration of making cross-disciplinary and cross-linguistic connections in teaching and learning is required.

CTGE 5852. Multilingual Oracy and Literacy. (3 Credits)
This course explores the developmental processes of oracy and literacy in more than one language. Particular attention will be given to differentiating between oral language and oracy, reading and literacy, and monolingual and bilingual oracy and literacy development. The course integrates the study of metalinguistic strategies to support oracy and literacy development across languages and academic text. Graduate students conduct a survey of authentic and translated bilingual literature as well as the use of technology in bilingual classrooms.

CTGE 5853. Practicum in Bilingual/Second-Language Classrooms. (3 Credits)
Application and evaluation of teaching approaches, methods, and techniques in bilingual/second-language classrooms. This course also includes supervised student teaching of a minimum of 180 hours and clinical analysis by students and support personnel.

CTGE 5855. English as a Second Language for Adults. (3 Credits)
This course focuses on the specific needs educators encounter as they prepare to teach adults who acquire English as an additional language. Principles of adult learning theory will be integrated with principles of ESL to provide students an opportunity to explore and reflect on theory meeting practice in this specific curriculum area.

CTGE 5858. TESOL Student Teaching II. (3 Credits)
Teacher candidates are required to complete a second semester of supervised student teaching in English as an additional or new language (EAL/ENL) in an accredited elementary, junior high, or high school under the guidance of a certified ESL teacher. This clinical experience will include making reflective observations, designing lessons and mini units, and teaching individual-, small-group, and whole-group lessons. Students are required to provide an in-depth analysis of the performance of EAL/ENL students. In addition, attendance and meaningful participation in a seminar of effective teaching practices is required.

CTGE 5910. Computers and Technology for Educators. (1 to 3 Credits)
This course is designed to help educators explore how to use present and emerging technologies in their classrooms and for their professional and personal development. There are four major emphases in the course: personal computer skills development, computers as aids in record management and research, advanced computer applications, and other technologies available for teaching and learning. No prerequisites or prior experience with computers is necessary.

CTGE 5920. Adult Development and Adult Learning Theory. (3 Credits)
Provides an understanding of theories and research in adult learning and development. Explores the dynamic relationship between the domains of adult learning and development, as well as implications for the practice of adult education.

CTGE 6000. Developing Emerging Literacy. (3 Credits)
This course addresses emerging literacy in children from birth to age eight, with emphasis on the preschool and kindergarten years. It focuses on theoretical underpinnings and development of language, concepts about print, book knowledge, and early drawing and writing. Effective instructional and assessment strategies appropriate for diverse early childhood classrooms are emphasized. Children's play as a vehicle for literacy development, as well as family literacy, is also included.

CTGE 6001. Innovative Educators. (3 Credits)
In this course, students explore theory and research regarding the parameters for innovating curriculum and instruction in learning environments. Doctoral candidates will explore a variety of conceptualizations of innovation, the role of interdisciplinary collaboration in innovating instruction and curriculum, and ways innovation can serve to address educational inequities. Different cases that illustrate innovative learning environments across different countries and fields will serve to guide in-depth discussions. By synthesizing contemporary research, doctoral candidates will explore emerging innovations in education and construct their own understanding of being innovative educators.
CTGE 6002. Beginning Literacy Development in Inclusive Classrooms. (3 Credits)
Theory- and research-based beginning reading and writing strategies for classroom teachers, K–3. The focus is on understanding the underlying processes that support strategies for young children in transition from spoken to written language, the development of phonemic awareness and invented spelling, the relationship between writing and reading, phonics, and the use of multiple cue systems in early decoding and strategies for the construction of meaning. The course will also include theory and research of special programs for young children with learning differences.

CTGE 6004. Instructional Practices for Writing Across the K?6 Curriculum. (3 Credits)
This course will provide teachers of literacy the opportunity to explore writing as a process and to develop instructional practices that may lead to growth in all students' writing abilities across the childhood curriculum. In addition, students will have the opportunity to evaluate existing writing programs and to propose revisions to the programs to make them more effective.

CTGE 6006. Instructional Practices for Writing Across the 5?12 Curriculum. (3 Credits)
This course will provide teachers of adolescents the opportunity to explore writing as a process and to develop instructional practices that may lead to growth in all students' writing abilities across the curriculum in grades 5 through 12. In addition, students will have the opportunity to evaluate existing writing programs and to propose revisions to the programs to make them more effective.

CTGE 6008. Critical Literacy, Inquiry, and Literature for Children. (3 Credits)
Explores how literacy can be used in the classroom as a vehicle for the critical examination of various issues and topics. Examines the use of the disciplines—literatures, sciences, and social sciences—to provide the contents for the inquiry and the communication systems—language, art, music, mathematics, and movement—to provide the processes through which the content is encountered.

CTGE 6010. Critical Literacy, Inquiry, and Literature for Adolescents. (3 Credits)
This course explores how inquiry and literature can be used in the classroom as a vehicle for the critical examination of various issues and topics with adolescents.

CTGE 6012. Assessment and Development of Literacy Processes: Birth? Grade 6: Practicum I. (3 Credits)
Literacy educators adopt reflective teacher-researcher stances as they informally document and assess individual students' reading and writing achievements while implementing instructional activities to promote literacy development in authentic settings for children from birth to grade 6. They design or select appropriate procedures for documenting, promoting, and evaluating learners' strategies and proficiencies. Includes 25 hours of supervised practicum experience on site. CTGE 6012 is open only to matriculated students who have completed a minimum of nine credits in the program. Completion of CTGE 6012 requires satisfying Gateway assignments, explained in the program handbook.

CTGE 6014. Assessment and Development of Literacy Processes: Grades 5?12, Practicum I. (3 Credits)
Literacy educators adopt reflective teacher-researcher stances as they informally document and assess individual students' reading and writing achievements while implementing instructional activities to promote literacy development in authentic settings for students in grades 5-12. They design or select appropriate procedures for documenting, promoting, and evaluating learners' strategies and proficiencies. Includes 25 hours of supervised practicum experience on-site. CTGE 6014 is open only to matriculated students who have completed a minimum of nine credits in the program. Completion of CTGE 6014 requires satisfying Gateway assignments, explained in the program handbook.

CTGE 6016. Research and Practice for Struggling Adolescent Readers and Writers: Grades 1?6, Practicum II. (3 Credits)
Systematic documentation and analysis of literacy behaviors and literacy development of struggling readers and writers. Students adopt a reflective teacher-researcher stance as they implement and evaluate instructional activities intended to promote literacy growth. Includes 25 hours of supervised practicum experience on site. This course typically follows completion of CTGE 6012.

CTGE 6018. Research and Practice for Struggling Adolescent Readers and Writers: Grades 5?12, Practicum II. (3 Credits)
Systematic documentation and analysis of literacy behaviors and literacy development of struggling readers and writers. Students adopt a reflective teacher-researcher stance as they implement and evaluate instructional activities intended to promote literacy growth. Includes 25 hours of supervised practicum experience on site. This course typically follows the completion of CTGE 6014. Completion of CTGE 6018 requires satisfying Gateway assignments, explained in the program handbook.

CTGE 6191. Critique of Research. (3 Credits)
Examination of the principles for the design of educational research. Students will be trained to subject educational research to intensive analysis, defining all possible sources of variation.

CTGE 6192. Research in the Teaching Process. (3 Credits)
Students develop an understanding of processes involved in conducting classroom research through designing and implementing collaborative or individual classroom research projects. Issues include understanding the nature of classroom interactions and the learning process, the effects of specific techniques on learning, and the influence of the classroom environment on learning. Findings are reported through workshops and papers.

CTGE 6195. Theory and Practice in Curriculum and Teaching. (3 Credits)
A critical review of conflicting curriculum theories advanced and implemented in contemporary education. Steps in developing and implementing curriculum theory will be analyzed, and the role of theory in curriculum development will be emphasized from varying perspectives.

CTGE 6200. Special Topics in Educational Technology. (0 to 1 Credits)
This course explores the use of various technologies in teaching and learning. Discussion of and practice with technologies is in service of developing content learning.

CTGE 6201. Teaching through Digital Literacies. (3 Credits)
This course explores various aspects of digital literacies, including the use of multimedia technologies in teaching and learning. Discussion of and practice with technologies is in service of defining digital skills that students must develop to succeed in school and beyond.
CTGE 6203. Cyber Communities for STEM. (1 Credit)
This course is designed to support the development of the habits of mind required to engage in Science/Math/Technology/Engineering (STEM) education from the perspective of both instructor and learner. Course participants will co-construct cyber-based discourse communities designed to contribute to the resources available for STEM educators.

CTGE 6253. STEAM Education in Theory and Practice. (3 Credits)
This course is designed to provide students with a comprehensive introduction to STEAM (Science, Technology, Engineering, the Arts, and Math) education. Doctoral students will learn about the evolution of STEAM education as well as the theories and methodologies that led to its emergence. Discussions of readings will highlight how STEAM interconnects different fields of knowledge and is relevant to the instruction of all learners across a continuum of abilities and talents. Throughout the course, students will critically analyze the current research, trends, and practices of STEAM in contemporary K-12 classrooms.

CTGE 6255. Teaching and Assessing Science, Technology, Engineering, Art & Mathematics (STEAM) in K12. (3 Credits)
This course is designed to conduct a deep cognitive and experiential examination of the Science/Technology/Engineering/Arts/Mathematics Education (STEAM) pedagogy in K-12 education. Consequently, this course seeks to use a conceptual-change approach for developing habits of mind and epistemological orientations requisite to curriculum designers and leaders of STEAM education programs and initiatives.

CTGE 6257. Computational Thinking A: Principles of Computing. (3 Credits)
This course covers various computing aspects of computational thinking. It includes history and future as well as applications of computing. Topics in the following areas will be covered: basic concepts, abstraction, algorithmic problem-solving, recursion, modeling, and simulation, visualization, and limitation. Each topic will be supplemented with a real-world example, case study, and practical work related to education in K-16 classrooms.

CTGE 6258. Computational Thinking B: Essentials of Informatics. (3 Credits)
This course covers various data analytics and informatics aspects of computational thinking. It focuses on the nature of informatics, the need for it, and its applications, particularly in education. It will emphasize the computational approach as a necessary complement to the statistical approach. Topics in the following areas will be covered: data representation, data description with regression, correlation and causality, classification, associate rule, clustering, machine learning, data fusion, cognition, and visualization. Each topic is supplemented with a real-world example, case study, and practical work related to educational settings.

CTGE 6260. Media Tchn Math Science. (3 Credits)
Students will be introduced to multimedia technologies and their use in science and mathematics education. The goals for the course include an understanding of multimedia technologies as tools for teachers (not replacements, not baby sitters). The most effective tools build cognitive theory into their design. Tools that incorporate cognitive theory are said to represent cognitive technologies. A second goal is to empower the student to evaluate educational software along multiple dimensions. An additional goal involves familiarization with modern graphic-user interfaces with a direct-manipulation style of interaction.

CTGE 6261. Media Literacy Technology. (3 Credits)
The course will cover the uses of the computer and other technology in language arts and social studies at the elementary and secondary levels. Among the topics covered will be text processing, computerized tutorials, and computerized simulations. Students will review a range of technology-based instructional activities, as well as create technology-based materials.

CTGE 6262. Application of Computers to Special Education. (3 Credits)
Designed for teachers concerned with the educational needs of students with disabilities. Introduces computer software that is available for use by the teacher of students with the full range of disabilities and other health impairments. Experience using the Internet to access information, lesson plans, and resources helpful to the special education teacher.

CTGE 6265. Emerging Issues in Technology. (3 Credits)
This course is designed to help educators better understand how emerging issues in educational technologies influence their professional environment and pedagogical options. The course will focus on the educational transformations sometimes facilitated by electronic technology use and adoption. Going beyond learning particular techniques for integrating technology into the curriculum, this course takes a wider institutional view of the transformative potential of new technologies in education.

CTGE 6270. Data, Inquiry & Tech. (1 to 3 Credits)
This course for educators is designed to promote deep understanding of 1) the design of school based inquiry teams, and 2) the links between inquiry, student learning outcomes and technology.

CTGE 6290. Cross-Cultural and Educational Perspectives of Learning Communities. (3 Credits)
This course provides graduate students with an opportunity to observe, examine, document, and prepare a reflective document under cross-cultural and educational perspectives and characteristics of communities of learning (i.e. schools, educational systems, educational districts outside U.S.). Students will examine components of its culture, language, and identity and its impact on their educational system. Students will gain a deeper understanding of themselves and others as they explore how cultural values, norms, and practices influence how people think about educational systems in different parts of the world. Since the course is offered abroad, students will experience firsthand the complexities of immersion in another language and culture while developing their own intercultural competence. Topics include: (1) cultural norms and values; cultural lifestyles and their relationships to society value system educational goals and implementation; (2) intercultural competence; (3) cross-cultural communication in and beyond the classroom, including the role of race/ethnicity, social class, and gender; (4) cultural perspectives on school-community relations; and (5) cross-cultural perspectives on parenting and language socialization.

CTGE 6300. Curriculum Evaluation. (3 Credits)
Examination of evaluation strategies, techniques, and models applicable to the school curriculum. Study of the application of objectives to evaluation, development of evaluation designs, systematic approaches to assessment, problems of implementation, and accountability.

CTGE 6305. Dev Delays / Early Interv. (3 Credits)
Provides an overview of the characteristics of disabling conditions in young children. It introduces the psychological, environmental and biological conditions, and the interactions among them that place children at risk for developmental delays and disabilities.
Mutually Exclusive: CTGE 5155, PSGE 5301.
CTGE 6310. Educating Students with Disabilities in Elementary Schools. (3 Credits)
This course provides an introduction to understanding children with disabilities and special health care needs. It examines the physical, social, emotional, and learning characteristics of children identified as disabled and their impact on the family. It meets New York State Education Department regulatory requirements for teachers of students with disabilities to understand the needs of students with autism.

CTGE 6320. Col/Consult w/Fam & Prof. (3 Credits)
Primary focus of this course is to understand roles that families, professionals, and communities play in the lives and education of children from various backgrounds. 
Mutually Exclusive: CTGE 5234.

CTGE 6326. Perspectives on Standardized Language and Literacy Assessment: Policy and Practice. (3 Credits)
Focuses on issues, principles, and current practices in literacy assessment, examination of available measures and evaluation procedures of norm-referenced, language and literacy assessment, relationship of standardized assessment to instruction, and examination of strengths and weaknesses of such instruments.

CTGE 6330. Communication, Tech Arts. (3 Credits)
Candidates shall develop skills necessary to provide specifically designed instruction to students with mild, moderate, severe, and multiple disabilities using assistive and instructional technology.

CTGE 6340. Interventions Read / Write. (3 Credits)
Draws on the fields of literacy, learning disabilities, psychology, and neuroscience to examine ways to assess the reading and writing skills of students who struggle and to determine evidence based interventions that support their learning. MG, Chair, C&T, October 16, 2014.

CTGE 6350. Positive Behavior Support. (3 Credits)
This course focuses on obtaining the knowledge and skills necessary to develop, implement, and evaluate the impact of positive behavior support on student behavior.

CTGE 6400. Language for School Learning: Implications for Reading and Writing Programs. (3 Credits)
An interdisciplinary course focusing on the relationship for teachers and supervisors between language as a tool for learning and language as evidence of learning. Particular emphasis will be placed on the relationship between these concerns and the need for improving the reading and writing abilities of students in all levels of education.

CTGE 6401. Teaching the Structure of the English Language. (3 Credits)
An introduction to theories of English language phonology, syntax, and semantics and their implications for developing English language understanding, speaking, reading, and writing skills by speakers of other languages. Particular emphasis will be placed on the development of related teaching and learning approaches.

CTGE 6405. Teaching and Assessing Composition Adolescents. (1 to 3 Credits)
This course focuses on the teaching of writing in middle and high school English classes. Topics covered will include theories of writing and writing instruction, assessment of writing, and instructional practices in the teaching of composition.

CTGE 6410. Teaching and Assessing Reading and Literature Adolescents. (3 Credits)
In this course, students examine ways of assessing, organizing and implementing standards-based curriculum and instruction that foster reading development and literacy understanding for adolescents within the full range of abilities. The course provides opportunities to explore formal and informal strategies for assessing and improving reading comprehension and fluency, to develop strategies for motivating adolescents to read a wide range of literatures, and to plan differentiated instruction for reading and the study of literature to promote learning for all students.

CTGE 6415. Special Topics in English Education. (0 to 1 Credits)
This one-credit course focuses on a special topic related to the teaching and learning of English Language Arts.

CTGE 6500. Interdisciplinary Perspectives on Literacy; Linguistic and Cognitive Development. (3 Credits)
The course focuses on literacy as the interrelationship between and among linguistic dimensions (systems of language, spoken-written language, development connections, language variation) and cognitive dimensions (development, teaching, learning, understanding, and interpretations). Addresses competing theories of literacy, language, and learning, and the potential implications for decision-making by literacy leaders.

CTGE 6501. Sociocultural and Developmental Dimensions of Literacy. (3 Credits)
Focuses on the sociocultural of literacy - group uses of literacy, literacy as a tool for knowledge and power - and the developmental dimensions - patterns of learning literacy, role of learner, adult and environment - and their interrelationships.

CTGE 6502. English as a World Language. (3 Credits)
This course explores English instruction and use around the world. Course readings will survey varieties of global Englishes. The purpose of speaking and writing English, by native and non-native speakers, and how these purposes influence teaching and learning are examined. Discussions are held on the international spectrum of English teaching approaches and local conditions that may influence their implementation. Graduate students analyze the impact of English instruction and its use around the world guided by socio-historical, socio-cultural, and socio-political lenses.

CTGE 6504. Teaching and Assessment of Composition for Adolescents. (3 Credits)
This course focuses on the teaching of writing in middle and high school English classes. Topics covered will include theories of writing and writing instruction, assessment of writing, and instructional practices in the teaching of composition.

CTGE 6532. Developing Literacy in Intermediate Grades. (3 Credits)
In this course, students examine ways of organizing and implementing curriculum and instruction that foster literacy development in a range of students in the intermediate grades (grades 5-9). Students explore strategies for assessing and improving reading comprehension and writing fluency, develop strategies for motivating intermediate grade students to read and write, and discover methods for integrating electronic and other non-print texts into the curriculum as a means for developing literacy.
CTGE 6551. Reflective Seminar in Literacy Education. (3 Credits)
As a culminating experience in the Language and Literacy program, students engage in weekly seminar sessions reflecting on evolving personal, professional philosophies and proficiencies. Students will explore approaches to evaluating, organizing and enhancing literacy programs. Teacher research and practice as a literacy leader will result in the creation and presentation of a professional portfolio to a professional panel for evaluation and approval. The portfolio should contain evidence that the student has met each of the program objectives.

CTGE 6593. Administration and Supervision of Literacy and Language Programs. (3 Credits)
The course deals with organization, administration, and problems of organizing a reading program. Attention is also focused on in-service teacher education.

CTGE 6608. Literacy Institute. (0 to 3 Credits)
Important and emerging topics in literacy education; theories, current research and best practice applications for developing literacy proficiencies K-12.

CTGE 6662. Teaching Geometric Concepts. (3 Credits)

CTGE 6781. Instructing Bilingual Special Education Students. (3 Credits)
The course presents a general overview of multiple perspectives in teaching the bilingual/limited English proficient students with special needs: instructional models, individualized instruction, the role of English in teaching, literacy development in both languages, and content-area teaching.

CTGE 6782. Bil Spec Ed: Issues&Trend. (3 Credits)

CTGE 6797. Grant Writing Module. (1 Credit)
This one-credit course will introduce students to essential components of grant writing. Students will get writing tips, learn about many different sources of funding, and prepare a pilot grant project proposal. Successful grant writers and representatives of Fordham’s Office of Sponsored Programs will help students acquire skills for successful grant writing.

CTGE 6799. Manuscript Preparation and Presentation at Conference. (1 Credit)
This unit is designed to develop students’ knowledge and skill to prepare manuscripts for publication, as well as to prepare and present articles at a conference. The topics covered in this study include the value of orally presenting research; background to writing; reasons to write; and types of articles to write. Scholarly publications are vital in scientific communities for sharing new knowledge and discussing new innovations. Scholarly publications in the forms of peer-reviewed journal papers and conference papers of original research are generally considered highly significant, if not the most significant scholarly achievement. Therefore, this course for all doctoral students provides an implementable method and guidance for scientific publication. The intent is to help students increase the likelihood of their success in publishing manuscripts as a doctoral student and as a new faculty member. The course will apply an interactive step-by-step approach through real practice, enabling students to become familiar with research-related journals in their fields and then to develop a manuscript from concept to final version, providing peer reviews of papers, and submitting a paper to a journal or at a national or international conference. When the schedule permits, experienced editors, reviewers, authors, and publishers will be invited to the lectures to join the discussions with students.

CTGE 6810. Sociopolitical Dimensions of Education. (3 Credits)
This course introduces students to various pedagogical theories and leads to an understanding of how these theories relate to schooling in the 21st century. Several questions will guide the course: What are the relationships among power, knowledge, and social identities in the making of “teachers” and “students”? How is power—particularly in the form of class, race, gender, and other social stratifications—enacted, contested, and perpetuated in school contexts? Who is privileged? Who is disadvantaged?

CTGE 6991. Internship in Curriculum and Teaching. (3 Credits)
Offered as a Guided Tutorial Course. Professional experiences in the schools or educational agencies other than schools, as interns to curriculum coordinators, supervisors, or consultants. Registration with approval of chairperson, faculty supervisor, and agency director.

CTGE 6992. Internship in Curriculum and Teaching. (3 Credits)
A continuation of CTGE 6991: Offered as a Guided Tutorial Course. Professional experiences in the schools or educational agencies other than schools, as interns to curriculum coordinators, supervisors, or consultants. Registration with approval of chairperson, faculty supervisor, and agency director.

CTGE 7000. Special Topics Lang Lit Lrng. (3 Credits)

CTGE 7190. Statistics and Quantification Design. (3 Credits)
Statistical methods applied to curriculum research studies. Strategies for evaluating educational intervention, balancing internal and external validity, obtaining appropriate population samples and implementing multivariate designs.

CTGE 7194. Advanced Qualitative Research. (3 Credits)
In this course, students will examine the nature and characteristics of various qualitative inquiry traditions utilized in educational research. Emphasis will be placed on developing competence in qualitative research design, data collection, analysis, and report writing.

CTGE 7201. Contemporary Thinking about Instruction. (3 Credits)
In this course, students will examine different theories of learning to question those theories’ influence on instructional practice. Candidates will examine historical epistemological frameworks that influence instruction, including theories of motivation and engagement used in designing powerful learning experiences, as well as cognitivism, humanism, behaviorism, social cognitivism, and constructivism. In addition, candidates will examine contemporary theories that question social, cultural, and contextual conditions influencing instruction and impacting educational equity, such as sociocultural, critical pedagogy, race theory, and situational theories. Candidates will examine their theories of practice to consider how they approach problems in their professional practice.

CTGE 7204. Informing and Transforming Instruction through Assessment. (3 Credits)
This course will focus on practices and policies related to the use of a variety of assessment approaches for informing instruction to understand and support student learning. Traditional and innovative assessment systems used with students with and without disabilities for progress monitoring, accountability, data-based decision-making at individual, school, and state levels will be explored. The course will further explore the roles of teachers, administrators, and policymakers in developing equitable and meaningful assessment approaches to improve learning environments for all students.
CTGE 7206. Course Development and Teaching Module. (1 Credit)
This one-credit course is designed for students to acquire the knowledge and skill necessary to develop and teach courses at the undergraduate and graduate levels. The course will prepare students to create an inclusive teaching and learning environment in which their students can be open to new ideas, various perspectives, and ways of thinking distinct from their own. Students will also learn the process from planning courses to evaluating their students’ learning. By team-teaching a course with a faculty member in the ICI program, students will put their acquired knowledge and skills into practice.

CTGE 7236. Problems and Issues in Early Childhood Education. (3 Credits)
Examination of the concerns that affect practice and the child’s ability to learn. Selection of topics current to working with all young children in early childhood settings.

CTGE 7330. Res Sem: Secondary Educ. (3 Credits)

CTGE 7340. Contemporary Academic Interventions for All Learners. (3 Credits)
It is estimated that more than 10 million children in the United States have some degree of reading disability. Roughly 80 percent of children referred for special services require support services in reading, writing, and oral language. Best contemporary practices rely on interdisciplinary teams to assess difficulties and plan interventions. This interdisciplinary course draws from the fields of literacy, learning disabilities, psychology, and neuroscience in examining theories and research in reading and writing processes and best practices for universal design. This course will explore recent advances in (1) the cognitive neuroscience of learning and individual differences, and (2) the universal design of educational technologies and multimedia of these fields, through appropriate readings and through media construction exercises designed to prepare and support participants to meet the challenge of individual differences through academic interventions.

CTGE 7350. Creating Learning Environments through Positive Behavior Supports. (3 Credits)
This course focuses on obtaining the knowledge and skills necessary to develop, implement, and evaluate the impact of Positive Behavior Support on student behavior. The course specifically covers general classroom management, Functional Behavior Assessment (FBA), and Positive Behavior Support (PBS) within the Response to Intervention (RtI). These are foundations of an appropriate behavioral intervention in supporting ALL students in classrooms and schools at large. The students will participate in lecture, discussions, article review, in-class activities, and conducting and presenting a case study.

CTGE 7352. Research Design Module. (1 Credit)
In this course, doctoral candidates will design a pilot study with the guidance of their mentor, and a proposal to conduct a pilot study. Individual attention will be given to identifying a researchable problem, constructing a meaningful research question, and designing a data collection and analysis plan. This course is the first of two parts of the research apprenticeship requirement of the ICI program. It must be completed during the first semester of the apprenticeship.

CTGE 7356. Research Implementation and Dissemination Module. (2 Credits)
This 2-credit module satisfies the second part of the research apprenticeship requirement. It must be taken over two consecutive semesters after successful completion of Research Design Module. Doctoral candidates will implement the pilot study, write a manuscript to disseminate results and findings, and submit it for publication in a scholarly journal.

CTGE 7460. Advanced Seminar in Special Education Curriculum. (3 Credits)
Focus on providing an appropriate curriculum for children, adolescents, and young adults with disabilities. Examination of curriculum evaluation strategies, techniques, and models applicable to both inclusive and special education classrooms. Students address issues of implementation and accountability. Students will apply this information in analyzing their own recent experiences in the classroom.

CTGE 7470. Seminar in Language Disorders in Special Education. (3 Credits)
Critical evaluation of major concerns in selected areas related to language development and remediation in the education of children, adolescents, and young adults with disabilities.

CTGE 7491. Reading and Writing as Psycholinguistic Processes. (3 Credits)
This course examines theories and research on reading and writing processes as these influence and result from cognitive activities. Implications for classroom use of reading and writing as activities for increasing learning.

CTGE 7492. Translingual Pedagogy. (3 Credits)
This course explores translanguaging as a construct of multilingual competence. It refers to the multiple ways speakers of more than one language move across languages and communicate in hybrid languages within the context of migration, transnational economic and cultural relations, digital communication, and globalism. In this course, candidates will review research that explores sound pedagogical applications of this construct.

CTGE 7493. Learning and Knowing through Multilingualism. (3 Credits)
This course provides theoretical and research knowledge about the nature of learning and knowing in the 21st century. It explores how curricula are facilitated through language. Students will consider the dynamic relationship between knowledge construction and multilingualism. In addition, they will critically consider historical and contemporary approaches that promote learning academic content, from both linguistic separatist and integrative lenses.

CTGE 7494. Translingual and Transliteracy Practice in Maker Spaces. (3 Credits)
This graduate course seeks to develop new understandings about teaching language and literacy to diverse learners in a collaborative and interdisciplinary environment. Candidates will explore integrated instructional practices that support multilingual and transliteracy learning as well as deepen their understanding of professional mutual development. Key issues about the instruction of language and literacy will be identified and analyzed critically. Instructional projects that combine multilingualism and transliteracy to address these issues will be designed in small interdisciplinary groups and implemented in a makerspace classroom.

CTGE 7497. Translingual and Transliteracy Practice in Makerspace. (3 Credits)
This graduate course seeks to develop new understandings about teaching language and literacy to diverse learners in a collaborative and interdisciplinary environment. Candidates will explore integrated instructional practices that support multilingual and transliteracy learning as well as deepen their understanding of professional mutual development. Key issues about the instruction of language and literacy will be identified and analyzed critically. Instructional projects that combine multilingualism and transliteracy to address these issues will be designed in small interdisciplinary groups and implemented in a makerspace classroom.
CTGE 7568. Advanced Practicum in Special Education. (3 Credits)
Practicum experiences for advanced students, designed to prepare for supervisory roles and for curriculum development specialists; emphasis on the analysis of clinical teaching in a variety of classroom settings.

CTGE 7570. Advanced Study on Problems and Issues in Special Education. (3 Credits)
Focus on current problems and issues in special education related to the development and education of children, adolescents, and young adults with physical, cognitive, and/or emotional disabilities. Emphasis will be focused on communication and language disorders, and literacy development of children with disabilities. Exploration of trends in providing educational services to students with disabilities; application of this information in analyzing our recent experiences in schools.

CTGE 7571. Research Issues and Policy Trends in Special Education. (3 Credits)
Focus on the design and conduct of research in special education. Critique recent research tools and techniques in the field and relate these to current needs for more informative research results in special education. Read examples of research that employ different types of research methodologies. Students will be encouraged to apply these concepts in their own classrooms and schools as a basis for their own field-based research.

CTGE 7574. Critical Transliterate. (3 Credits)
Central to this course is the exploration of the social, cultural, political, historical, and economic influences on diverse contexts where literacy is concerned. Literacy instruction is explored in K-12 schools and college, as well as in community organizations. Candidates will design explorations that critically examine how issues of power and diversity impact the democratization of the literacy classroom. Critical analysis of the multiple modes of literacy will be discussed as an instructional tool and as a vehicle to voice learners’ knowledge in diverse learning environments.

CTGE 7596. Cognitive, Linguistic, and Sociocultural Dimensions of Literacy. (3 Credits)
History and impact of the cognitive revolution on language and literacy curricula, theories, and research. Overview of historical theories and research on text processing as problem solving (e.g., reader response theory, metacognitive theory, schema theory, information processing theory). Recent neurobiological studies are considered as methods of observing literacy problem solving. Implications for curriculum and teaching. Includes possible links to the development of student research agendas.

CTGE 7599. Creativity in Teaching Environments. (3 Credits)
This course reviews theory, research, and practice concerning instructional design and experience, with the goal of developing learners’ creative problem-solving skills along with discipline content. Discussions will describe principles and practices applied to pre-K-16, and demonstrations of instructional resources will be provided. Candidates will explore ways to apply critical and creative thinking to facilitating learning for all in contested educational environments.

CTGE 7820. Global Perspectives in Multilingual Competency. (3 Credits)
This course provides theoretical and research exploration of global conceptualizations for communicating and learning in more than one language.

CTGE 7843. Scnd Lang Proficiency/Lng. (3 Credits)
Survey of research on how students from diverse backgrounds acquire a second language; psycho-linguistic and sociolinguistic variables involved in curriculum; appraisal of techniques and instruments employed in such research; development of research models. Permission of chairperson or instructor required.

CTGE 7844. Lang/Ed Asmt Mlt Lang St. (3 Credits)
Focuses on theoretical problems in bilingual and second-language studies; examination of available measures and evaluation approaches, for example, language dominance and proficiency instruments; criterion-referenced tests; and construction and application of new techniques and measures for such programs.

CTGE 7845. Curriculum Models: Bilingual/ESL Programs. (3 Credits)
The course provides theoretical and practical knowledge related to planning, development, and implementation of curriculum models and methods in bilingual and English as a second language program. The course focuses on (1) curriculum models and design typologies, (2) analysis of policy issues, (3) language and cultural issues, and (4) second language methods.

CTGE 8001. Research Apprenticeship. (0 Credits)
In the Research Apprenticeship the student is required to work closely with a research apprenticeship faculty advisor to develop and carry out a research project. The student must register each of the 3 semesters and must attend the Research Colloquia each semester. Prerequisite: Permanent Matriculation status plus 21 doctoral credits.

CTGE 8101. Advanced Research in Curriculum and Teaching. (3 Credits)
Designed for advanced doctoral students who are developing dissertation topic areas or who are conducting research projects. The course is usually taken on an independent study basis because of unique student needs.

CTGE 8110. Dissertation Seminar in Curriculum & Teaching. (3 Credits)
Seminar for advanced doctoral candidates who have completed all coursework for their degree. The purpose of the seminar is to have students develop an approved proposal for their doctoral dissertation.

CTGE 8111. Dissertation Seminar in Curriculum & Teaching. (3 Credits)
A continuation of CTGE 8110: Seminar for advanced doctoral candidates who have completed all coursework for their degree. The purpose of the seminar is to have students develop an approved proposal for their doctoral dissertation.

CTGE 8502. Directed Research in Curriculum and Teaching. (3 Credits)
Designed for students who have completed their coursework and are developing research problems or projects for completion of doctoral studies. It may not be used to replace any degree course requirements.

CTGE 9000. Special Topics in Curriculum and Teaching. (3 Credits)
Special topics in curriculum and teaching. (Permission of course instructor required.)

CTGE 9001. Spec Topics C & T. (0 Credits)
Spec Topics C & T.

CTGE 9002. Spec Topics C & T. (0 to 3 Credits)
Spec Topics C & T.

CTGE 9990. Independent Study. (0 to 3 Credits)
Designed to enable students to study selected topics in depth and to conduct research. For matriculated students only. An outline of the proposed work must be approved by the adviser. Registration requires the approval of professor directing study, the division chairperson and the director of graduate studies.
Dance (DANC)

DANC 1311. Ballet I: Non-Majors. (2 Credits)
This course introduces to beginners the fundamental movement vocabulary, style and aesthetics of classical ballet. Proper body alignment is stressed at the barre, followed in the center by combinations that develop control, accuracy and strength. No prior coursework required.

DANC 1312. Ballet II: Non-Majors. (2 Credits)
This course offers to advanced beginners an expanded movement vocabulary focusing increasingly on accuracy, clarity and the development of style. It emphasizes a cleaner execution of movements with combinations that are increasingly complex.

DANC 1313. Ballet III: Non-Majors. (2 Credits)
DANC 1314. Ballet IV: Non-Majors. (2 Credits)

DANC 1321. Horton Tech I: Non-Major. (2 Credits)
This course offers to advanced beginners the fundamental movement vocabulary, style and aesthetics of the modern dance technique created by the late Lester Horton, Alvin Ailey's mentor. This linear technique develops strength, balance and rhythmic skills.

DANC 1322. Horton Tech II: Non-Majors. (2 Credits)
A continuation of DANC 1321.

DANC 1323. Horton Tech III: Non-Majors. (2 Credits)
DANC 1324. Horton Tech IV: Non-Majors. (2 Credits)

DANC 1331. Modern Dance I: Non-Majors. (2 Credits)
This course offers to advanced beginners a modern technique created by Martha Graham which stresses the 'contraction and release' movement of the torso. Floor exercises develop strength and flexibility and combinations in the center and across the floor stress strength and expressiveness.

DANC 1332. Modern Dance II: Non-Majors. (2 Credits)
This course offers to advanced beginners and intermediate students an expansion of Modern I which further develops the expressiveness and eloquence of the torso and the power of the contraction and release through more advanced floor exercises, center combinations and longer traveling combinations which develop flexibility.

DANC 1333. Modern Dance III: Non-Majors. (2 Credits)
DANC 1334. Modern Dance IV: Non-Majors. (2 Credits)

DANC 1341. Jazz I: Non-Majors. (2 Credits)
This course offers to beginners the fundamental movement vocabulary, style and aesthetics of jazz dance. Exercises that build flexibility, control and rhythmic awareness lead to combinations that represent a variety of styles. No prior coursework required.

DANC 1342. Jazz II: Non-Majors. (2 Credits)
This course offers to advanced beginners a more complex movement vocabulary with a range of jazz dance styles. Exercises that develop increased flexibility and stylistic refinements also build technique tools.

DANC 1343. Jazz III: Non-Majors. (2 Credits)
This course is a continuation of DANC 1342.

DANC 1344. Jazz IV - Non Majors. (2 Credits)
This course is a continuation of DANC 1343.

DANC 1351. Dunham (Afr-Car) I: Non Majors. (2 Credits)
This course offers to beginners the fundamental movement vocabulary, style and aesthetics of the Afro-Caribbean technique created by Katherine Dunham. It builds both strength and flexibility, emphasizing the ability of the top torso to undulate fully and rapidly in combinations. No prior coursework required.

DANC 1352. Dunham (Afr-Car) II: Non-Majors. (2 Credits)
This course offers the advanced beginner a more complex movement vocabulary of the Afro-Caribbean technique created by Katherine Dunham. At this level the technique builds increased control, strength and flexibility.

DANC 1353. Dunham (Afr-Car) III: Non-Majors. (2 Credits)
DANC 1354. Dunham (Afr-Car) IV: Non-Majors. (2 Credits)

DANC 1361. Body Conditioning I: Non-Majors. (2 Credits)
This course is based on the Pilates exercise method of mind-body 'contrology.' The emphasis is on alignment, placement, posture, and injury prevention. The class is conducted with music, using rhythmical repetitions and flowing movements. Concentration on body awareness, anatomy, correct body usage, and breath control result in a strong, toned, and fully functioning body.

DANC 1362. Body Conditioning II: Non-Majors. (2 Credits)
This course is a continuation of DANC 1361.

DANC 1371. Barre a Terre I: Non-Majors. (2 Credits)
This supplemental course leads advanced beginning students to explore the different muscles that enable the body to work properly while standing. Work on placement and alignment is done while lying on the floor, using both turned-out and parallel positions. Instruction is given on the proper use of energy as a means to lengthen muscles and free the body from improper tension. The last half-hour of class is a standing barre workout that requires students to apply their experiences from the floorwork.

DANC 1372. Barre a Terre II: Non-Majors. (2 Credits)
This course is a continuation of DANC 1371.

DANC 1381. Tap I: Non-Majors. (2 Credits)
An introduction to tap that incorporates the main components of the form.

DANC 1382. Tap II: Non-Majors. (2 Credits)
This course is a continuation of DANC 1381.

DANC 1391. Yoga I: Non-Majors. (2 Credits)
This course for beginners provides an understanding of basic breathing exercises and synchronized breath with movement. It increases the body's overall flexibility and strength through a series of seated kneeling, lying, and standing exercises that relate yoga basics with fundamentals of dance to develop a sense of balance, control, symmetry, and line. It develops the student's ability to unlock spinal energy blocks and open the central nervous system through arching, curling, lateral, twisting, and circular movements of the spine. It prepares the musculature and ligamental attachments for increased flexibility and strength, particularly in the hips, shoulders, and chest. Most important, it provides an opportunity for each student to examine and maximize their own unique potential as a creative dancer and in life.

DANC 1392. Yoga II: Non-Majors. (2 Credits)
This course is a continuation of DANC 1391.
DANC 1400. Gyrokinesis I: Non-Majors. (2 Credits)
This introductory somatic course covers the foundations of Gyrokinesis. This exercise system is based on fluid movements that offer similar physical benefits of yoga, dance, and swimming, though it is not based on these or other specific exercise models. Gyrokinesis exercises are designed to work the entire body through spinal movement and joint articulation. Based on the body’s natural ability to move forward and backward and side to side, the movements are designed to be rhythmic and fluid. Rather than specific postures or stances being held for long periods of time, Gyrokinesis exercises are smoothly integrated, seeming more like dance than traditional yoga. Natural breathing patterns are also incorporated into Gyrokinesis exercises.

DANC 1401. Gyrokinesis II: Non-Majors. (2 Credits)
This course is a continuation of DANC 1400.

DANC 1501. Ballet I. (3 Credits)
The courses begin with daily exercises done at the barre to develop greater speed, strength, flexibility and coordination of the legs, torso, arms and head. Much of the barrework is done on demipointe for increased strength and balance. Stretches are given to develop increased flexibility in the hips and legs for higher extensions and better turn out. The basic ballet directions are taught in the center. Simple jump combinations are taught and reversed and include simple beats. Pirouettes in the basic positions are mastered. Big jumps traveling across the floor focus on covering space.

DANC 1502. Ballet II. (3 Credits)
The courses begin with daily exercises done at the barre to develop greater speed, strength, flexibility and coordination of the legs, torso, arms and head. Much of the barrework is done on demipointe for increased strength and balance. Stretches are given to develop increased flexibility in the hips and legs for higher extensions and better turn out. The basic ballet directions are taught in the center. Simple jump combinations are taught and reversed and include simple beats. Pirouettes in the basic positions are mastered. Big jumps traveling across the floor focus on covering space.

Prerequisite: DANC 1501.

DANC 1520. Men’s Ballet I. (0 Credits)
These course sequences build strength, stamina and technical skills needed today by male dancers. Barrework focuses on alignment, balance, strength and flexibility. Center combinations build to multiple grand pirouettes, increased elevation and jumps with batterie. Combinations across the floor emphasize grand allegro and the ability to cover space. Men’s Ballet is offered twice weekly in conjunction with Ballet II, III or IV, depending on each student’s level.

DANC 1521. Men’s Ballet II. (0 Credits)
These course sequences build strength, stamina and technical skills needed today by male dancers. Barrework focuses on alignment, balance, strength and flexibility. Center combinations build to multiple grand pirouettes, increased elevation and jumps with batterie. Combinations across the floor emphasize grand allegro and the ability to cover space. Men’s Ballet is offered twice weekly in conjunction with Ballet II, III or IV, depending on each student’s level.

DANC 1601. Horton I. (3 Credits)
This beginning level course sequence lays the groundwork for all that follows in the advanced levels. The basic warm up is taught: flat backs, primitive squat, descent and ascent, lateral stretches, release swings, leg swings and deep lunges. The shapes that will be used throughout the training in Horton technique are emphasized: the T positions, stag position, cross lunge and coccyx balance. The Horton technique was designed with studies to stretch and strengthen different areas of the body. Many of the beginning level studies which are taught focus on the achilles tendon, the abdominal muscles and movements that lengthen the spine and the hamstring muscles. Simple combinations of movements which include turns and jumps are taught to introduce musicality and dynamics to the beginning dancer’s vocabulary. Performance qualities are emphasized at the very beginning of the dancer’s training.

DANC 1602. Horton II. (3 Credits)
This beginning level course sequence lays the groundwork for all that follows in the advanced levels. The basic warm up is taught: flat backs, primitive squat, descent and ascent, lateral stretches, release swings, leg swings and deep lunges. The shapes that will be used throughout the training in Horton technique are emphasized: the T positions, stag position, cross lunge and coccyx balance. The Horton technique was designed with studies to stretch and strengthen different areas of the body. Many of the beginning level studies which are taught focus on the achilles tendon, the abdominal muscles and movements that lengthen the spine and the hamstring muscles. Simple combinations of movements which include turns and jumps are taught to introduce musicality and dynamics to the beginning dancer’s vocabulary. Performance qualities are emphasized at the very beginning of the dancer’s training.

DANC 1620. Body Conditioning I. (2 Credits)
This class is based on the Pilates exercise method of mind/body contrology. The emphasis is on alignment, placement, posture and injury prevention. The class is conducted with music, utilizing rhythmical repetitions and flowing movements. Concentration on body awareness, anatomy, correct body usage and breath control result in a strong, toned and fully functioning body.

DANC 1621. Body Conditioning II. (2 Credits)
This class is based on the Pilates exercise method of mind/body contrology. The emphasis is on alignment, placement, posture and injury prevention. The class is conducted with music, utilizing rhythmical repetition and flowing movements. Concentration on body awareness, anatomy, correct body usage and breath control result in a strong, toned and fully functioning body.

DANC 1630. Barre a Terre I. (2 Credits)
A supplemental class for advanced beginning students, this class leads them to explore the different muscles that enable the body to work properly while standing. Work on placement and alignment is done while lying on the floor; using both turned out and parallel positions. Instruction is given on the proper use of energy as a means to lengthen muscles and freeing the body from improper tension. The last half-hour class is a standing barre that requires students to apply their experiences from the floorwork.
DANC 1631. Barre a Terre II. (2 Credits)
A supplemental class for immediate and advanced students, this level develops in the student a balance of strength, flexibility and endurance. Injury prevention and the maintenance of a healthy body are focused on intently. Specific Pilates-based exercises are taught that accelerate the training process. Work in turned-out positions and the elongation of muscles through proper use of breath and energy are some of the basic components of this class. The last half-hour of class is a standing barre that requires the students to apply their experiences from the floorwork. Depending on the class size, additional work may involve specific coaching based on each dancer’s needs and challenges.

DANC 1640. Yoga I. (2 Credits)
This class for beginners provides an understanding of basic breathing exercises and synchronized breath with movement. It increases the body’s overall flexibility and strength through a series of seated kneeling, lying and standing exercises that relate the Yoga basics with fundamentals of dance to develop a sense of balance, control, symmetry and line. It develops the student’s ability to unlock spinal energy blocks and open the central nervous system through arching, curling, lateral, twisting and circular movements of the spine. It prepares the musculature and ligamental attachments for increased flexibility and strength particularly in the hips, shoulders and chest. Most importantly, it provides and opportunity for each student to examine and maximize his or her own unique potential as a creative dancer and in life.

DANC 1641. Yoga II. (2 Credits)
This class takes the basic movements taught in Yoga I and develops them into a more fluid series that further increases the strength and flexibility already achieved in the body. It develops a sense of creativity and freedom in the body that further relates this particular system of Yoga to dance in all of its aspects. It endorses each student’s responsibility to and for him/himself as artist, performer and person.

DANC 1650. Gyrokinesis I. (2 Credits)
This introductory somatic course covers the foundations of Gyrokinesis. This exercise system is based on fluid movements that offer similar physical benefits of yoga, dance and swimming, though it is not based on these or other specific exercise models. Gyrokinesis exercises are designed to work the entire body through spinal movement and joint articulation. Based on the body’s natural ability to move forward and backward and side to side, the movements are designed to be rhythmic and fluid. Rather than specific postures of stances being held for long periods of time, Gyrokinesis exercises are smoothly integrated, seeming more like dance than traditional yoga. Natural breathing patterns are also incorporated into Gyrokinesis exercises.

DANC 1651. Gyrokinesis II. (2 Credits)
DANC 1701. Modern I. (2 Credits)
This introductory course sequence in Modern technique teaches the basic vocabulary rooted in the contraction and release for beginners. This technique divides the class into three equal segments: floorwork, standing work in the center, and combinations that travel across the floor. The floorwork develops a strong expressive torso as the source of movement with simple breathing exercises that build to contraction and release exercises in various positions. The spiral position of the back leads into turns around the back in 4th position, adding the legs with the back leg extension series. Standing exercise in the center emphasize the use of the leg and the coordination of the legs, arms and torso with the contraction and release and oppositional spiral of the torso in relation to the legs. Short combinations in the center and across the floor focus on covering space and shifting weight.

DANC 1702. Modern II. (3 Credits)
This introductory course sequence in Modern technique teaches the basic vocabulary rooted in the contraction and release for beginners. This technique divides the class into three equal segments: floorwork, standing work in the center, and combinations that travel across the floor. The floorwork develops a strong expressive torso as the source of movement with simple breathing exercises that build to contraction and release exercises in various positions. The spiral position of the back leads into turns around the back in 4th position, adding the legs with the back leg extension series. Standing exercise in the center emphasize the use of the leg and the coordination of the legs, arms and torso with the contraction and release and oppositional spiral of the torso in relation to the legs. Short combinations in the center and across the floor focus on covering space and shifting weight.

DANC 1720. Anatomy and Kinesiology I. (3 Credits)
The purpose of this course is to familiarize students with the musculoskeletal structures most directly involved in the performance of dance so that they can identify the bones, joints and muscles that lie under the skin anywhere in the body. In addition, students will learn how the skeletal muscles work to produce joint movement, how those muscles can be conditioned and what patterns of muscle action are most effective for producing the basic movements of ballet and contemporary dance techniques.

DANC 1721. Anatomy and Kinesiology II. (3 Credits)
The purpose of this course is to familiarize students with the musculoskeletal structures most directly involved in the performance of dance so that they can identify the bones, joints and muscles that lie under the skin anywhere in the body. In addition, students will learn how the skeletal muscles work to produce joint movement, how those muscles can be conditioned and what patterns of muscle action are most effective for producing the basic movements of ballet and contemporary dance techniques.

DANC 1910. Improvisation. (1 Credit)
This introductory course is structured to free expression, investigate form and heighten concentration. Structured dance improvisational problems are given to lead the student to simultaneously invent and perform movement without pre-planning. Each class includes a brief warm-up followed by many different and changing forms-group movement, solos, trios and contact improvisation which begins with duets. Emphasis is placed on the development in each student of a heightened sensitivity and a conscientiousness about the creative impulse. Personal movement style and habits and the role of improvisation in both performance and the creative process are thoroughly explored.

DANC 1911. Improvisation II. (1 Credit)
This course is structured to free expression, investigate form and heighten concentration. Structured dance improvisational problems are given to lead the student to simultaneously invent and perform movement without pre-planning. Each class includes a brief warm-up followed by many different and changing forms—group movement, solos, trios, and contact improvisation which begins with duets. Emphasis is placed on the development in each student of a heightened sensitivity and a conscientiousness about the creative impulse. Personal movement style and habits and the role of improvisation in both performance and the creative process are thoroughly explored.

Prerequisite: DANC 1910.
DANC 1920. Dance Composition I. (2 Credits)
This course capitalizes on the skills garnered in improvisation class by carefully leading students into the process of composing short studies based on a variety of abstract themes. Very specific limitations provide the framework of the initial studies and students are encouraged to acknowledge personal impulse and style while exploring within this base. Later, emphasis is placed on the growth of context out of these abstract explorations and studies become more ambitious. Supportive group feedback is central to the development of every student’s work. Students present both a group and solo work as final projects at the end of the semester.

DANC 1921. Dance Composition II. (2 Credits)
This course guides students into exploring more complex and personal motivations for moving. Students are expected to be independent, responsible and self-motivated in this context. There is freedom to arrange independent projects. Emphasis is placed on giving and receiving constructive well-informed criticism. Self-analysis and ability to articulate well are important skills fostered in this class. All of the work is expected to be in line with specific personal goals that the student and instructor establish together early in the term. Group projects are encouraged in the second half of the term.

DANC 1999. Tutorial. (1 Credit)
DANC 2001. World Dance History. (3 Credits)
People dance and use dance to fulfill many needs, goals and responsibilities. This course surveys world dance forms in terms of the many ways dance functions as an expression of culture and traces dance from its role in folk and religious traditions to its emergence as a theater art. Students study the impulse for dance in several cultures, looking to the practices which gave rise to particular dance forms. The formal properties and evolution of various dance forms are explored. The course also considers certain ‘art’ dances made by American choreographers inspired by non-Western dance forms.
Attributes: AMST, ASAM.

DANC 2010. Black Tradition in American Dance. (3 Credits)
This course explores the forms, contexts and contexts of black traditions that played a crucial role in shaping American theatrical dance; identifies dances from the African American vernacular that were transferred from the social space to the concert stage; and focuses on such pioneers as Helmsley Winfield, Katherine Dunham, Pearl Primus, Edna Guy and Alvin Ailey along with Isadora Duncan, Martha Graham, Doris Humphrey, Lester Horton and George Balanchine.
Attributes: ADVD, AMST, ASAM.

DANC 2021. Dance Composition III. (2 Credits)
This course focuses on the evolution of a genre or choreographer in historical context.

DANC 2022. Dance Composition IV. (2 Credits)
This course is the culmination of the creative work required of all BFA students. Students create longer and more complete works. They are asked to use larger groups of dancers, more sophisticated concepts and more counterpoint fugue.

DANC 2420. Jazz I. (2 Credits)
This class for advanced beginners begins with a standing warm-up that develops the body’s proper alignment, flexibility and control. Exercises follow that isolate the different parts of the body and develop increasingly complex coordination of the arms, head and legs. Longer combinations that emphasize expressiveness in lyrical and dynamic Broadway styles are given in the center and across the floor.

DANC 2425. Jazz II. (2 Credits)
This intermediate advanced-level course begins with a fast-paced standing warm-up that emphasizes proper placement, increased flexibility and control. Isolation exercises and short combinations focusing on extensions and turns are done in the center. Long sections of jazz choreography in contrasting styles are given in the center and across the floor. Students are coached on performance skills (focus, dynamic contrast, musicality, etc.).

DANC 2430. West African Dance. (2 Credits)
This course sequence brings together body, mind and spirit in an energetic union of music, dance and oral tradition of the people of West Africa. Students are taught regional songs and dances of welcome and praise, among others, such as: Lamban (Dance of Celebration), Mandjani (Challenge Dance) and Wolo Sodon Jon Don (Dance of Becoming Free). Each dance is accompanied by live drumming to provide students with an understanding of the relationship between the dance and musician and the common language they must speak in order to execute African dance.
Attributes: AFAH, AFAM, AFST.

DANC 2440. Hip Hop. (2 Credits)
Students will be immersed in the culture of hip-hop as you learn to pop, lock, break with classic moves and new choreography from the nation’s best hip-hop dance crews, past and present. Vivacious and energetic, classes are technically advanced while providing a great mix of cardio and stretching.

DANC 2450. Tap I. (2 Credits)
An approach to tap dance that incorporates four instructional components: first, students learn a series of exercises at the barre to strengthen the arches and heels of the feet; second, students complete a series of rhythm sequences that use syncopation, double and triple timing, hand claps, finger snaps, and long breaks; third, students begin to learn simple choreography based on exercises learned at the barre. Accompanied by music, students are encouraged to use all parts of their bodies and to develop more complex technical skills while tapping. Last, through a series of progressions, students learn to use the entire space of the room. Exercises are combined into short combinations traveling forward, backward, and side to side across the floor.

DANC 2510. Ballet III. (3 Credits)
This low-intermediate level course develops strength and flexibility with the execution of more complicated combinations at the barre and in the center. Students must be able to change and use different dynamics of movement and attack in the legs and feet. Barrework involves quick changes of direction, quick weight changes from one leg to the other and more sustained adagios. Balances in different positions are important additions to the end of each combination. Center work includes adagios with rises on demipointe, promenades and slow controlled pirouettes. Petit allegro incorporates beats and directional changes using epaulement. Grand allegro requires students to be able to execute grand jete en tournant, saut de chat, saut de basque and other expansive jumps that challenge their strength and stamina and allow them to enjoy moving through space.
DANC 2511. Ballet IV. (3 Credits)
This low-intermediate level course develops strength and flexibility with the execution of more complicated combinations at the barre and in the center. Students must be able to change and use different dynamics of movement and attack in the legs and feet. Barrework involves quick changes of direction, quick weight changes from one leg to the other and more sustained adagios. Balances in different positions are important additions to the end of each combination. Center work includes adagios with rises on demipointe, promenades and slow controlled pirouettes. Petit allegro incorporates beats and directional changes using épaulement. Grand allegro requires students to be able to execute grand jete en tournant, saut de chat, saut de basque and other expansive jumps that challenge their strength and stamina and allow them to enjoy moving through space.

DANC 2520. Men's Ballet III. (0 Credits)
These course sequences build strength, stamina and technical skills needed today by male dancers. Barrework focuses on alignment, balance, strength and flexibility. Center combinations build to multiple grand pirouettes, increased elevation and jumps with batterie. Combinations across the floor emphasize grand allegro and the ability to cover space. Men's Ballet is offered twice weekly in conjunction with Ballet II, III or IV, depending on each student's level.

DANC 2521. Men's Ballet IV. (0 Credits)
These course sequences build strength, stamina and technical skills needed today by male dancers. Barrework focuses on alignment, balance, strength and flexibility. Center combinations build to multiple grand pirouettes, increased elevation and jumps with batterie. Combinations across the floor emphasize grand allegro and the ability to cover space. Men's Ballet is offered twice weekly in conjunction with Ballet II, III or IV, depending on each student's level.

DANC 2530. Pointe I. (0 Credits)
This elementary course sequence begins with exercises at the barre build strength, articulation and flexibility in the feet and legs while developing the ability to control the balance on pointe. Center work follows with short adagio work for control and balance. Small jumps in the center prepare for traveling combinations across the floor.

DANC 2531. Pointe II. (0 Credits)
This elementary course sequence begins with exercises at the barre build strength, articulation and flexibility in the feet and legs while developing the ability to control the balance on pointe. Center work follows with short adagio work for control and balance. Small jumps in the center prepare for traveling combinations across the floor.

DANC 2535. Pointe III. (0 Credits)
These two sequences for intermediate and advanced students offer more complex exercises at the barre build increased strength, articulation and flexibility in the feet, legs and torso. Longer adagio work at the barre and in the center develop extensions, control, balance and turns. Small jumps with beats and pointe work in the center are followed by longer traveling combinations that develop expressiveness and musicality while building greater technical skills. Variations on pointe are given in the spring term.

DANC 2536. Pointe IV. (0 Credits)
These two sequences for intermediate and advanced students offer more complex exercises at the barre build increased strength, articulation and flexibility in the feet, legs and torso. Longer adagio work at the barre and in the center develop extensions, control, balance and turns. Small jumps with beats and pointe work in the center are followed by longer traveling combinations that develop expressiveness and musicality while building greater technical skills. Variations on pointe are given in the spring term.

DANC 2610. Horton III. (2 Credits)
This advanced beginning-level course sequence uses the basic Horton warm-up with more variations. Many of the positions and shapes developed earlier are used in turns, jumps and in combinations of movement. More demanding studies are added which require more stretch and strength in the quadriceps and abdominal muscles. Hinges at the barre and falls are included in this level. The movements across the floor are longer and require more concentration and focus from the dancers. The introduction of canons and rhythmic patterns are stressed as well as the development of dynamics and projection. This advanced beginning-level course sequence uses the basic Horton warm-up wit .

DANC 2611. Horton IV. (2 Credits)
This advanced beginning-level course sequence uses the basic Horton warm-up with more variations. Many of the positions and shapes developed earlier are used in turns, jumps and in combinations of movement. More demanding studies are added which require more stretch and strength in the quadriceps and abdominal muscles. Hinges at the barre and falls are included in this level. The movements across the floor are longer and require more concentration and focus from the dancers. The introduction of canons and rhythmic patterns are stressed as well as the development of dynamics and projection.

DANC 2650. Dunham Technique. (2 Credits)
Complex movements of this Afro-Caribbean technique, created by Katherine Dunham that concentrates on building strength, flexibility, and the ability of the torso to undulate fully and rapidly.

DANC 2710. Modern III. (2 Credits)
In this advanced beginning-level course sequence, the floorwork becomes more complex with lengthier exercises that emphasize the drama of the contraction and release and spiral of the back. The use of the legs and arms from the back is emphasized as an extension of the torso, neck and head. In 4th position, a coiling of the body’s weight into the center in preparation for standing is developed. Standing work in the center develops the ability to shift the weight and work off center. More complicated traveling combinations incorporate the contraction and release, spiral, jumps and moving fully with weight, power and dynamic changes.

DANC 2711. Modern IV. (2 Credits)
In this advanced beginning-level course sequence, the floorwork becomes more complex with lengthier exercises that emphasize the drama of the contraction and release and spiral of the back. The use of the legs and arms from the back is emphasized as an extension of the torso, neck and head. In 4th position, a coiling of the body’s weight into the center in preparation for standing is developed. Standing work in the center develops the ability to shift the weight and work off center. More complicated traveling combinations incorporate the contraction and release, spiral, jumps and moving fully with weight, power and dynamic changes.

DANC 2810. Contemporary. (2 Credits)
This intermediate level class explores modern and ballet concepts and athletic training, as they relate to current contemporary dance. Focus is on alignment, form, execution and artistry, as well as various contemporary styles. Emphasis is on personal artistic expression, musicality, strength, physical coordination and flexibility.
DANC 2811. Voice Class for the Dancer/Mover. (2 Credits)
This course will cover the fundamentals and techniques of healthy and functional singing for the dance/mover. During the semester you will learn the function of the breath, body, and vocal apparatus as it pertains to singing. As the course progresses we will focus on how to tailor those techniques on stage while moving. Students will also learn a solo and ensemble piece to perform.

DANC 2812. Voice Class for the Dancer/Mover II. (2 Credits)
This course expands on the concepts learned in Voice Class for the Dancer/Mover I (DANC 2811).
Prerequisite: DANC 2811.

DANC 2999. Tutorial. (2 Credits)

DANC 3410. Repertory Workshops I. (2 Credits)
Repertory workshops are given throughout the year by a diverse group of Ailey School faculty members and guest artists to offer performance opportunities to intermediate and advanced students in their junior year. The choreographers create original works and mount existing classical, contemporary and jazz works on intermediate and advanced dancers. Students rehearse for 4-8 weeks and perform the works in formal studio concerts.

DANC 3411. Repertory Workshops II. (2 Credits)
Repertory workshops are given throughout the year by a diverse group of Ailey School faculty members and guest artists to offer performance opportunities to intermediate and advanced students in their junior year. The choreographers create original works and mount existing classical, contemporary and jazz works on intermediate and advanced dancers. Students rehearse for 4-8 weeks and perform the works in formal studio concerts.

DANC 3499. Independent Study Choreography. (2 Credits)
This course is designed for those students who have strong choreographic skills and experience as well as the requisite maturity to work independently. They are expected to design, rehearse and arrange the performance of a substantial original work under the close mentorship of a selected Ailey School Composition faculty member. Advisement meetings are to be held regularly throughout the term between each student and instructor.

DANC 3501. Ballet V. (3 Credits)
This advanced-intermediate level course is for students who are ready to experience the full range of exercises that require larger, more expansive movements that test their strength and stability. Higher extensions, multiple pirouettes, petit allegro with batterie, grand allegro and quick transfer of weight and the power of the legs and body are emphasized. Pointe work is introduced for women at the end of class twice weekly with an additional beginning Pointe class once weekly.

DANC 3502. Ballet VI. (3 Credits)
This advanced-intermediate level course is for students who are ready to experience the full range of exercises that require larger, more expansive movements that test their strength and stability. Higher extensions, multiple pirouettes, petit allegro with batterie, grand allegro and quick transfer of weight and the power of the legs and body are emphasized. Pointe work is introduced for women at the end of class twice weekly with an additional beginning Pointe class once weekly.

DANC 3520. Men's Ballet V. (1 Credit)
These course sequences build strength, stamina and technical skills needed today by male dancers. Barrework focuses on alignment, balance, strength and flexibility. Center combinations build to multiple grand pirouette combinations, increased elevation and jumps with batterie. Combinations across the floor emphasize grand allegro and the ability to cover space. Men's Ballet is offered twice weekly in conjunction with Ballet II, III or IV, depending on each student's level.

DANC 3521. Men's Ballet VI. (0 Credits)
These course sequences build strength, stamina and technical skills needed today by male dancers. Barrework focuses on alignment, balance, strength and flexibility. Center combinations build to multiple grand pirouette combinations, increased elevation and jumps with batterie. Combinations across the floor emphasize grand allegro and the ability to cover space. Men's Ballet is offered twice weekly in conjunction with Ballet II, III or IV, depending on each student's level.

DANC 3530. Pointe V. (1 Credit)
These two sequences for intermediate and advanced students offer more complex exercises at the barre build increased strength, articulation and flexibility in the feet, legs and torso. Longer adagio work at the barre and in the center develop extensions, control, balance and turns. Small jumps with beats and pointe work in the center are followed by longer traveling combinations that develop expressiveness and musicality while building greater technical skills. Variations on pointe are given in the spring term.

DANC 3531. Pointe VI. (1 Credit)
These two sequences for intermediate and advanced students offer more complex exercises at the barre build increased strength, articulation and flexibility in the feet, legs and torso. Longer adagio work at the barre and in the center develop extensions, control, balance and turns. Small jumps with beats and pointe work in the center are followed by longer traveling combinations that develop expressiveness and musicality while building greater technical skills. Variations on pointe are given in the spring term.

DANC 3540. Ballet Partnering I. (1 Credit)
This course sequence is designed to give the students a thorough understanding of the concepts and skills involved in dancing with another person using classical ballet as the technique base. Students study and practice fundamental elements of the art of partnering, on pointe and off, including centering, breathing, manipulations on and off center, lifting and supported movements through simple movement phrases. These classes begin with a series of individual exercises to increase strength and control of key muscle groups needed in partnering.

DANC 3541. Ballet Partnering II. (1 Credit)
This course sequence is designed to give the students a thorough understanding of the concepts and skills involved in dancing with another person using classical ballet as the technique base. Students study and practice fundamental elements of the art of partnering, on pointe and off, including centering, breathing, manipulations on and off center, lifting and supported movements through simple movement phrases. These classes begin with a series of individual exercises to increase strength and control of key muscle groups needed in partnering.

DANC 3550. Ballet Partnering III. (1 Credit)
This course sequence explores more advanced concepts of ballet partnering. Building strength in the male students' arms and backs and strengthening the female dancers centers and back are important aspects of this class.

DANC 3551. Ballet Partnering IV. (1 Credit)
The continuation of the partnering skills needed for building strength and developing the students' sensibilities to each other are stressed in this course.
DANC 3561. Ballet Partnering VI. (1 Credit)
This course continues to explore the intermediate level of partnering. Turns, lifts, balance and the relationship between couples is emphasized.

DANC 3601. Horton V. (2 Credits)
The warm-up in this intermediate level course sequence includes exercises to stretch and strengthen the legs, hips and spine. The center floorwork includes longer studies like the Figure 4 and Percussive Stroke Studies which require the dancers to execute long sequences of movements, counts and dynamics. The combinations of movements across the floor are more complicated musically and technically and challenge the dancers to learn movement quickly. The combinations include material just introduced as well as vocabulary learned in the other levels. The performance aspects of dance are emphasized.

DANC 3602. Horton VI. (2 Credits)
The warm-up in this intermediate level course sequence includes exercises to stretch and strengthen the legs, hips and spine. The center floorwork includes longer studies like the Figure 4 and Percussive Stroke Studies which require the dancers to execute long sequences of movements, counts and dynamics. The combinations of movements across the floor are more complicated musically and technically and challenge the dancers to learn movement quickly. The combinations include material just introduced as well as vocabulary learned in the other levels. The performance aspects of dance are emphasized.

DANC 3701. Modern V. (2 Credits)
This intermediate-level course sequence continues to build strength with an awareness of the torso as the center and initiator of all movement. Spiral, contraction and release exercises become longer and more complex, using the legs more often. Opposition and weight shifts are emphasized, building a stronger movement vocabulary, increased dynamic range and more control. The weight of the body is further explored in primary falling combinations from sitting positions and the knees. Standing work in the center develops more stamina, balance, control, flexibility and expanded sense of extensions, ple series and shifts of weight. The centering of the body is heightened with falls to the floor from standing positions off center and pitch turns. Elevation in jumps is emphasized. Longer traveling combinations often use difficult rhythms, and contractions spiral with more complicated movement phrases that call for dramatic expressiveness, use of weight and musicality.

DANC 3702. Modern VI. (2 Credits)
This intermediate-level course sequence continues to build strength with an awareness of the torso as the center and initiator of all movement. Spiral, contraction and release exercises become longer and more complex, using the legs more often. Opposition and weight shifts are emphasized, building a stronger movement vocabulary, increased dynamic range and more control. The weight of the body is further explored in primary falling combinations from sitting positions and the knees. Standing work in the center develops more stamina, balance, control, flexibility and expanded sense of extensions, ple series and shifts of weight. The centering of the body is heightened with falls to the floor from standing positions off center and pitch turns. Elevation in jumps is emphasized. Longer traveling combinations often use difficult rhythms, and contractions spiral with more complicated movement phrases that call for dramatic expressiveness, use of weight and musicality.

DANC 3740. Modern Partnering I. (1 Credit)
This course sequence is designed to challenge and expand the dancers’ perception of partnering possibilities. Along with dynamic and intricate movement phrases, the dancers practice rolling, falling, being upside down, following a physical point of contact, and supporting and giving weight to each other. These classes are based on the communication between two or more moving bodies that are in physical contact, and their combined relationship to the physical laws that govern their motion-gravity, momentum, inertia, function, etc.

DANC 3741. Modern Partnering II. (1 Credit)
This course sequence is designed to challenge and expand the dancers’ perception of partnering possibilities. Along with dynamic and intricate movement phrases, the dancers practice rolling, falling, being upside down, following a physical point of contact, and supporting and giving weight to each other. These classes are based on the communication between two or more moving bodies that are in physical contact, and their combined relationship to the physical laws that govern their motion-gravity, momentum, inertia, function, etc.

DANC 3742. Modern Partnering III. (1 Credit)
This course sequence is designed to challenge and expand the dancers’ perception of partnering possibilities. Along with dynamic and intricate movement phrases, the dancers practice rolling, falling, being upside down, following a physical point of contact, and supporting and giving weight to each other. These classes are based on the communication between two or more moving bodies that are in physical contact, and their combined relationship to the physical laws that govern their motion-gravity, momentum, inertia, function, etc.

DANC 3743. Modern Partnering IV. (1 Credit)
This course sequence is designed to challenge and expand the dancers’ perception of partnering possibilities. Along with dynamic and intricate movement phrases, the dancers practice rolling, falling, being upside down, following a physical point of contact, and supporting and giving weight to each other. These classes are based on the communication between two or more moving bodies that are in physical contact, and their combined relationship to the physical laws that govern their motion-gravity, momentum, inertia, function, etc.

DANC 3751. Modern Partnering IV. (1 Credit)
This class continues to challenge the dancers abilities to complete complicated movement phrases while establishing relationships with other dancers and the audience.

DANC 3752. Modern Partnering V. (1 Credit)
The degree of difficulty and physicality increases in this intermediate level partnering class. The movement phrases are more intricate and the use of weight and counter weight are stressed.

DANC 3753. Modern Partnering VI. (1 Credit)
The degree of difficulty and physicality increases in this intermediate level partnering class. The movement phrases are more intricate and the use of weight and counter weight are stressed.

DANC 3760. Modern Partnering VII. (1 Credit)
This course sequence is designed to challenge and expand the dancers’ perception of partnering possibilities. Along with dynamic and intricate movement phrases, the dancers practice rolling, falling, being upside down, following a physical point of contact, and supporting and giving weight to each other. These classes are based on the communication between two or more moving bodies that are in physical contact, and their combined relationship to the physical laws that govern their motion-gravity, momentum, inertia, function, etc.
DANC 3999. Tutorial. (3 Credits)
DANC 4000. Art and Ethics. (4 Credits)
This senior seminar explores questions relating to art and values. Some of the issues that may be addressed include: Does art have a moralizing function? Can art be for art's sake? What is the relationship between the arts and religion? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, VAL.

DANC 4001. Senior Seminar. (3 Credits)
This course is designed to assist seniors in preparing for success in the professional dance world. The course will require each student to keep a journal, research dance companies and choreographers, attend performances, participate in discussions of lectures by guest artists, write a final paper as well as a final oral project.

DANC 4010. Taylor Technique. (2 Credits)
This class prepares the advanced dancer for the specific demands of Taylor-style dynamics, physicality and shape orientation. Goals include creating a strong center from which movement can emanate fluidly and exploring the use of weight through space.

DANC 4011. Taylor Technique II. (2 Credits)
This class prepares the advanced dancer for the specific demands of Taylor-style dynamics, physicality and shape orientation. Goals include creating a strong center from which movement can emanate fluidly and exploring the use of weight through space.
Prerequisite: DANC 4010.

DANC 4030. Limon Technique. (2 Credits)
DANC 4040. Dance Methodology. (2 Credits)
In keeping with the Alvin Ailey mission, 'dance is for everybody,' as well as humanist traditions within Fordham University, the Dance Methodology course will emphasize working with diverse populations and movement styles. Components of the Dance Methodology course include Lecture, Studio Practicum, and Critical Analysis.

DANC 4510. Ballet VII. (3 Credits)
This advanced-level course sequence develops a refinement of the work of the feet, legs, arms and head at the barre. Exercises that build higher extensions and increased turn out are given with varying rhythms. Adagios are done at a slow tempo for control and strength; in contrast, very fast exercises develop speed and precision. More stretching develops greater suppleness and ease of movement. Complicated small jumps with beats, multiple turns, changes of direction and coordination of the feet, arms and head are emphasized in the center work. Longer adagios demand high extensions, big pirouettes, balance and musicality. Long grand allegro combinations with big jumps and turns build strength, stamina and power for the men. Women do pointe work in the center and traveling in big combinations across the floor and take an additional Pointe class once weekly. At this level, artistry and musicality are emphasized.

DANC 4511. Ballet VIII. (3 Credits)
This advanced-level course sequence develops a refinement of the work of the feet, legs, arms and head at the barre. Exercises that build higher extensions and increased turn out are given with varying rhythms. Adagios are done at a slow tempo for control and strength; in contrast, very fast exercises develop speed and precision. More stretching develops greater suppleness and ease of movement. Complicated small jumps with beats, multiple turns, changes of direction and coordination of the feet, arms and head are emphasized in the center work. Longer adagios demand high extensions, big pirouettes, balance and musicality. Long grand allegro combinations with big jumps and turns build strength, stamina and power for the men. Women do pointe work in the center and traveling in big combinations across the floor and take an additional Pointe class once weekly. At this level, artistry and musicality are emphasized.

DANC 4520. Men's Ballet VII. (1 Credit)
These course sequences build strength, stamina and technical skills needed today by male dancers. Barrework focuses on alignment, balance, strength and flexibility. Center combinations build to multiple grand pirouettes, increased elevation and jumps with batterie. Combinations across the floor emphasize grand allegro and the ability to cover space. Men's Ballet is offered twice weekly in conjunction with Ballet II, III or IV, depending on each student's level.

DANC 4521. Men's Ballet VIII. (0 Credits)
These course sequences build strength, stamina and technical skills needed today by male dancers. Barrework focuses on alignment, balance, strength and flexibility. Center combinations build to multiple grand pirouettes, increased elevation and jumps with batterie. Combinations across the floor emphasize grand allegro and the ability to cover space. Men's Ballet is offered twice weekly in conjunction with Ballet II, III or IV, depending on each student's level.

DANC 4530. Pointe VII. (1 Credit)
This advanced level pointe class offers more complex and professional level work with the barre for strength, articulation and flexibility. Center work includes jumps, leaps, and pointe work that develop expressions and musicality.

DANC 4531. Pointe VIII. (1 Credit)
This advanced level pointe class offers more complex and professional level work with the barre for strength, articulation and flexibility. Center work includes jumps, leaps, and pointe work that develop expressions and musicality. This advanced level pointe class offers more complex and professional level work at the barre for strength, articulation, and flexibility.

DANC 4610. Horton VII. (2 Credits)
For this advanced level course sequence the warm-up now includes a long study, Dimensional Tonus, which incorporates many aspect of the warm-up into a complicated and demanding dance phrase. The center and floor work use hinges and falls with more frequency and the combinations of movements are long, sophisticated movement phrases that require strength, speak and flexibility. Individualized coaching on performance and technique is given at this advanced/professional level.

DANC 4611. Horton VIII. (2 Credits)
For this advanced level course sequence the warm-up now includes a long study, Dimensional Tonus, which incorporates many aspect of the warm-up into a complicated and demanding dance phrase. The center and floor work use hinges and falls with more frequency and the combinations of movements are long, sophisticated movement phrases that require strength, speak and flexibility. Individualized coaching on performance and technique is given at this advanced/professional level.
DANC 4710. Modern VII. (2 Credits)
Technical skills are honed in this advanced professional-level course sequence. Breathing, a gathering and releasing of tension, is heightened, increasing versatility in the work. Phrases of movement are emphasized throughout the floorwork. More complicated, longer combinations in the center build control and balance while working on and off center. Leg extensions are higher and the full integration of the legs, arms and head with the torso as the center and the catalyst of all movement is achieved. The body now moves as a whole, not as individual parts. There is no longer a separation of the floor, standing and traveling work, but all are combined in lengthy combinations as an expressive, dramatic and technically advanced vocabulary. Performance skills are coached, particularly the dramatic expression of the individual.

DANC 4711. Modern VIII. (2 Credits)
Technical skills are honed in this advanced professional-level course sequence. Breathing, a gathering and releasing of tension, is heightened, increasing versatility in the work. Phrases of movement are emphasized throughout the floorwork. More complicated, longer combinations in the center build control and balance while working on and off center. Leg extensions are higher and the full integration of the legs, arms and head with the torso as the center and the catalyst of all movement is achieved. The body now moves as a whole, not as individual parts. There is no longer a separation of the floor, standing and traveling work, but all are combined in lengthy combinations as an expressive, dramatic and technically advanced vocabulary. Performance skills are coached, particularly the dramatic expression of the individual.

DANC 4810. Senior Project in Performance. (3 Credits)
The Senior Project in Performance offers invaluable practical experience for students as performers, speaker/lecturers and, in some cases, choreographers. The first term is spent working with renowned artists-in-residence from the professional dance field. They represent a range of aesthetics from masters like Alvin Ailey, Jose Limon, or Paul Taylor to emerging artists like Ronald K. Brown, Lila York and Donald Byrd. These workshops can offer supplementary technique training (Limon) or creative work (Creach and Koester) that complement the rehearsal of dance repertoire. Under the guidance and supervision of The Ailey School faculty, students perform at locations in the metropolitan area during the winter. In the spring, the project culminates with intensive rehearsals and coaching that prepare the students to be showcased in their B.F.A. spring Concert in a New York City theater.

DANC 4820. Senior Project in Choreography. (3 Credits)
This course sequence is taken under the mentorship of an Ailey School faculty member by those students selected as gifted and motivated choreographers. Three solo, duet and/or group works, one of which must be a group work, are completed for a formal studio showing at the end of the fall term. Three or more works, only one of which can be a solo work, must be completed for a shared formal concert at the end of the spring term.

DANC 4821. Senior Project in Choreography. (3 Credits)
This course sequence is taken under the mentorship of an Ailey School faculty member by those students selected as gifted and motivated choreographers. Three solo, duet and/or group works, one of which must be a group work, are completed for a formal studio showing at the end of the fall term. Three or more works, only one of which can be a solo work, must be completed for a shared formal concert at the end of the spring term.

DANC 4910. Rehearsal Seminar. (3 Credits)
Students selected to be full members of the Ailey II Company or another approved dance company are required to take company class or another dance technique class 5 days per week and rehearse a minimum of 20 hours per week. They must submit a comprehensive journal supplemented with programs, videotaped performances, etc. to the Director, and Co-Director of the BFA program at the end of the semester.

DANC 4911. Rehearsal Seminar. (3 Credits)
Dancers selected to be members of The Ailey Company or another approved dance company are required to take company class or another dance class 5 days per week and rehearse a minimum of 10 hours per week.

DANC 4920. Lecture: Demonstration Lab. (3 Credits)
Students must participate in all company lecture-demonstrations. This course can include performance, speaking with audience members and teaching master classes. Students must submit a comprehensive journal supplemented with programs, videotaped performances, etc. to the Director, and Co-Director of the BFA program at the end of the semester.

DANC 4921. Lecture: Demonstration Lab. (3 Credits)
Dancers continue to participate in all lecture-demonstrations throughout the United States. The frequency of appearances increases, as does the number of master classes and speaking presentations.

DANC 4930. Performance Seminar. (3 Credits)
Students selected to be full members of the Ailey II Company or another approved dance company are required to perform with that company for a minimum of 12 performances. Rehearsal periods vary, but must exceed 4 weeks. Students must submit a thesis supplemented by programs, videotapes of 2 or more performances, etc. to the Director, and Co-Director of BFA program at the end of the semester.

DANC 4931. Performance Seminar. (3 Credits)
This course continues the work of DANC 4911. There is an increase in the frequency of performances. Minimum of 20 performances.

DANC 4940. Teaching Lab. (3 Credits)
Students are required to teach master classes to students and to engage in question and answer sessions after performances. They are also required to teach a company class while on tour, submitting syllabi and teaching plans to the Director, and Co-Director of the BFA program at the end of the semester.
DANC 4941. Teaching Assistant. (3 Credits)
This course continues the work of DANC 4940. There is an increase in the master classes and question and answer sessions after performances. The student is required to teach a company class while on tour, provide a syllabus and teaching plan to the Director and Co-Director.

DANC 4950. New Directions Choreography Lab. (3 Credits)
This lab is a creative residency program hosted by Robert Battle and The Ailey School. The program was initiated by Mr. Battle in response what he identified as the biggest deterrents to creativity in the choreographic process: lack of time, space, and artistic and financial resources. The primary mission of the lab is to cultivate an environment in which choreographers are free to take creative risks and explore new ideas. Students work with two emerging choreographers per semester.

DANC 4960. Contemporary Floorwork. (2 Credits)
This course will cover the fundamental techniques of full-bodied movement on and off of the floor.

Design Management (DGGB)

DGGB 0001. Math Meth for Bus (Peking U). (4.5 Credits)
DGGB 0002. Statistics (Peking Univ). (4.5 Credits)
DGGB 6800. Pre-MBA Basic Statistics. (0 Credits)
Pre-MBA Basic Statistics.
DGGB 6810. Math Methods for Bus. (3 Credits)
(MBA program prerequisite) Studies the fundamental methods of mathematics applied in business statistics and operations research. The course concentrates on linear algebra and differential and integral calculus.
DGGB 6820. Statistics. (3 Credits)
MBA CORE COURSE Introduces the basic statistical concepts essential for business research and decision-making. These include descriptive statistics, probability distributions, statistical inference and simple and multiple regression.
Attributes: BUAN, ISEL.
Mutually Exclusive: MMGB 6820.
DGGB 6830. Statistics and Decisions. (3 Credits)
Introduces the statistical concepts essential for business decision making. Topics include: Random Variables, normal distribution, sampling distributions; confidence intervals; one and two sample hypothesis tests; simple linear regression; multiple regression; categorical data analysis; ethics in statistics. These concepts will be implemented using state of the art statistical software.
DGGB 7811. System Design Internship. (1 to 3 Credits)
DGGB 781A. Statistical Theory I. (3 Credits)
This course provides an Introduction to mathematical Statistics and a foundation for acquiring the skills to apply advanced statistical models to many important areas of decision-making in business. The course focuses on developing an understanding of random variables, their distribution functions, and sampling theory.
Prerequisites: DGGB 6820 or GBA Waiver Statistics with a score of 070.
DGGB 781C. Sampling Theory. (3 Credits)
This course is about the use of samples in research and statistical studies. Many courses teach how to analyze data. But, before you analyze it, you have to get it. Where do you get the data? Sampling is widely used for gathering information about various populations, be they people, animals, products, services or natural phenomenon, for industry, government, education, or service. The need to understand what is going on in the world today and predict what might happen in the future requires information and data on what exists today. Social and economic policies, health care planning, and corporate strategies all depend on statistical information. Scientific experiments, such as in medicine, must be constructed so as to provide valid information on which to base decisions about future availability of drugs, products, and services. This course provides a foundation in sample design and data collection for decision making. We study theoretical principles and applications, starting with definition of the population characteristic of concern, the frame, sampling methods, sample size, and sampling plan. We study also sampling and non-sampling errors and biases, problems of non-response, the half-open interval, and other methods to assure validity and usefulness of our data. Assignments will involve constructive criticism of studies in the press and company reports today. An end-term assignment will require writing a sample design for a study of your own.
Prerequisite: DGGB 6820.
DGGB 7844. Stat Methods and Comp I. (3 Credits)
This course is designed to introduce statisticians to statistical programming and data analysis. Topics will include: hypothesis testing, regression models, experimental design and simulation. The statistical topics are integrated into the programming content.
Attributes: BUAN, ISEL.
DGGB 7850. Forecasting Models. (3 Credits)
Introduces and discusses forecasting systems capable of interconnecting separate areas of business. Efficient forecasting systems, based on modern analytical and simulation techniques, can provide necessary insights into the behavior of strategic variables over time.
Attribute: ASDM.
Prerequisites: DGGB 6820 or GBA Waiver Statistics with a score of 070.
DGGB 8999. Independent Study. (3 Credits)

Digital and Social Media Marketing (DSMM)

DSMM 1010. Social Media Marketing Introduction. (0 Credits)
This course is designed to provide an introduction to the operational mechanics and key marketing and communication strategies associated with Facebook, Twitter, LinkedIn, Google+ and Pinterest. Students will no longer be confused by all the hype associated with social media or overwhelmed by the prospect of tweeting, pinning, connecting and updating their status. The course will also help business owners, professionals and non-profit managers understand how to hire, guide and monitor social media professionals. In addition, participants will learn how to leverage social media to enhance their online reputation and expand their career opportunities.
DSMM 1020. Social Media Marketing Advance. (0 Credits)
As businesses, brands, professionals and not-for-profit organizations increase their participation in social media marketing, it has become even more critical that social media strategies be effectively integrated into the overall marketing mix. In this course we will examine how to develop and implement a successful content marketing strategy to engage customers and generate leads and sales through social media channels. Through a combination of readings, case study discussions and exercises, we will examine the various paid promotional opportunities and inbound marketing techniques including blogging that provide the foundation for social media marketing. This course assumes that the participants have a basic familiarity with the key social media sites including Facebook, Twitter, LinkedIn, and YouTube. We will also review the common tools and metrics associated with monitoring and measuring social media engagement.

DSMM 1030. LinkedIn-Get LinkedIn to Bus. (0 Credits)
LinkedIn has gained the reputation among popular social media platforms as the grown-up social network; a place to spotlight your accomplishments, expand your professional network, identify strategic partners, be found by prospective customers, attract clients and even locate a new job. Whether you are new to LinkedIn or you have an existing LinkedIn profile but haven’t fully understood how to use it, this class will provide you with the fundamental strategies to create and improve your profile, leverage the platform’s key customer relationship management features, navigate the messaging and publishing opportunities, research contacts and competitors, attract new clients and generate sales leads. In addition, you will gain an in-depth understanding of how to increase the visibility of your business or organization using the site’s advanced promotional tools. Following the merger with Microsoft, LinkedIn is positioning itself to become a business development hub for entrepreneurs as well as established professionals. Sophisticated LinkedIn users will be in the best position to take advantage of the site’s valuable new functions.

DSMM 1040. Social Media to Build Your Real Estate Business. (0 Credits)
This class offers real estate agents a comprehensive guide to the practical techniques, strategies, and digital tools that help generate visibility, leads, and sales for their real estate businesses. Advanced social media users as well as novices will gain an understanding of how to build and maintain an effective presence on Facebook, Instagram and LinkedIn.

DSMM 1110. Search Engine Marketing. (0 Credits)
Ever since the World Wide Web was launched close to 20 years ago, business owners, online marketers, content managers, professional service providers, website developers, web masters and entrepreneurs have needed to focus attention and resources on improving their position in search engine response results and on driving traffic to their websites. Google and the other search engines are continually refining the algorithms they use to assign rankings. This course will provide an overview of the key techniques used to optimize the content on a website and landing page including keyword research and analysis, meta tagging, link building and blogging. Students will learn how to integrate paid search Adwords advertising, on-site optimization and social media marketing to form the core of a successful online marketing effort. In addition, students will develop an understanding of how to use Google Analytics data to improve their online conversion rates.

DSMM 1210. Mobile Marketing Strategy. (0 Credits)
More than 50% of the U.S. population owns a smartphone and over 40% of the time spent engaging with digital media occurs on a handheld device. Mobile is becoming an increasingly important marketing channel. Brands and agencies are focusing on ways to satisfy the increasing consumer demand for content and applications that can be accessed while on the go. This course will offer an in-depth analysis of all facets of mobile marketing including SMS (text) campaigns, QR codes, mobile applications, mobile advertising, location-based services such as Foursquare and mobile optimized websites. Students will gain an understanding of how to develop and implement a mobile strategy for the near term and the future as capabilities and budgets increase in scale.

DSMM 1310. Email Marketing. (0 Credits)
This course will provide methods to integrate email tactics and strategies into goal-oriented campaigns that support other marketing efforts to enhance brand awareness, motivate response and encourage direct sales. Students will learn how to leverage third party lists or build their own in-house file of recipients, understand the legal issues related to CAN-SPAM Compliance, design and execute a winning email message, and gain insight into the measurement of each deployment—which, when understood, will encourage the success of future email campaigns.

DSMM 1410. Cyber Law: Risks and Trends. (0 Credits)
Cyber risk management is not unique to a specific industry, but affects anyone who is online. This course provides the information you need to protect your business from a computer security breach, which could result in financial loss; loss of intellectual property; and loss of your brand’s positive reputation. The first half of this course provides an overview of the cyber threats and trends you will face and possible solutions. The second half of this course offers a review of the relevant aspects of Cyber Law. Cyber Law covers a broad spectrum of data security issues affecting intellectual property, privacy, freedom of speech, jurisdiction, and digital transactions. Students will explore some of the more common ‘hot topic’ legal issues that arise when using social media and managing digital assets. Topics will include Digital Rights Management; COPPA; Cease and Desist orders; Copyright and Fair Use; US Patent Law and Amazon’s One-Click; Privacy Notice and Terms of Service and other current issues that arise in internet marketing.

DSMM 1510. Paid Advertising on Social Media: Everything You Need and Want to Know. (0 Credits)
Social media marketing has become an integral part of the promotional strategy for most companies, professionals and well-known brands. Consumers are spending more than 2 hours a day engaging with social media. However, today social media marketing has become more challenging and requires more resources as the rules of the game have changed dramatically over the past 5 years. Facebook has limited the organic reach of a business’ posts to less than 1% of its fan base. This is due to the need to generate revenue through advertising. The other platforms will soon follow Facebook’s lead. Therefore, it is critical that companies learn how to create and implement social advertising campaigns to generate awareness, conversion and revenue from their social media activities. Students will learn how, what, when and where to use the Ad Management platforms on Facebook, Twitter, LinkedIn and Instagram to successfully target, measure, monitor and improve their ongoing advertising activities on these social media platforms. The class will also explore the multiple types of advertising options available across devices.

Updated: 07-27-2020
DSMM 1610. Digital Marketing Analytics. (0 Credits)
'Marketing Metrics' and 'Data Science' have become important buzzworthy phrases for businesses today. Many marketing professionals capture as much data as they can, but feel like they are reading tea leaves when trying to interpret the numbers. As a result they may end up spending a large chunk of their marketing budget on analytics tools, but not know how to use the information to optimize their marketing efforts. Understanding the message behind the numbers is the key to making informed marketing decisions. This course is designed to help students develop marketing strategies and make resource allocation decisions that are driven by quantitative analysis. Students will obtain the skills to use Google Analytics and email metrics to: • Measure the success of online and offline paid advertising campaigns. • Identify the best social channels and messaging for customer acquisition. • Determine the performance of premium content for lead generation such as watching a video, requesting a demo or downloading an E-book or whitepaper. • Discover which content on each page produces the most engagement and ultimately the best leads. • Calculate conversion rates and ROI for each integrated digital marketing campaign. In addition, students will learn best practices for setting up and capturing website analytics including referral traffic, differentiating among basic and advanced data sets, establishing tracking mechanisms and generating customized reports. Through class discussions, in-class exercises and case studies, students will also learn how to use Google Analytics techniques such as Events and UTM tags to track performance and conversion data as well as how to implement A/B and multivariate tests.

Digital Technologies and Emerging Media (DTEM)

DTEM 1401. Introduction to Digital Technologies and Emerging Media. (4 Credits)
(Formerly COMM 2500): A comprehensive overview of the possibilities of communication in a digital world. Through a series of readings, lectures and assignments, students will study the history and forms of new media, address issues of media control, convergence and convertibility, and begin to explore the cognitive and cultural implications of living in a digital age. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: CMST, COMC, NMDD, NMNI.

DTEM 1402. Digital Cultures. (4 Credits)
This course will examine the interplay between digital environments and the culture(s) they both stem from and shape. It will give special attention to the ways digital and networked spaces relate to lived experiences on- and offline, organize social relationships, shape values and norms, engage individuals in participatory modes of cultural production, and impact culture on an individual, group, and trans-national scale. Students will investigate the culture(s) (social norms, language, practices of inclusion and exclusion, etc.) of individual digital platforms and learn about cultural norms that span the digital world more broadly. We will also critically engage with whether and how those qualities might also impact the offline experience of various communities or groups, such as those based on race, gender, class, abilities, or affiliation with various subcultures or values. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: ACUP, ADVD, AMST, APPI, ASAM, CCUS, COMC. Prerequisites: DTEM 1401 or COMM 2500.

DTEM 2411. Digital Research Methods. (4 Credits)
(Formerly COMM 4710): Digital technologies affect every area of social life, from personal identity, to interaction with others, to broad social and political arenas. Digital technologies have also deeply impacted scholarship and research in the humanities and the social sciences. How can we investigate the impacts of digital technologies accurately? How do academics and industry professionals use social media, “big data,” and the like to answer puzzling questions? This course provides an overview of and hands-on approach to contemporary digital research methods, including ethnography, interviews, focus groups, metrics and analytics, and polling and surveys. Students will become familiar with basic research methods used in both academic and professional contexts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attribute: DTMM.

DTEM 2412. Digital Ethnography. (4 Credits)
Ethnography, or the systematic description of human culture, has expanded beyond its anthropological origins and is widely used by researchers and industry professionals alike to understand online interaction. This class explores how ethnographic methods, such as participatory observation, field notes, and interviews, can be used to examine and analyze popular internet culture, self-expression, relationships, social practices, and emerging technological forms. Students will learn the basics of digital ethnography, and be able to competently leverage cultural analysis to understand digital artifacts. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: DTMM, LING.

DTEM 2413. Participatory Methods. (4 Credits)
This course spans both the use of participatory methods to research digital technology, as well as the use of digital technology to facilitate participatory research. Participatory, collaborative, and community-based research models aim to engage traditional research subjects as active participants in the production of knowledge. Drawing from these models, students will critically explore how emerging civic and social media produces knowledge and how to utilize such media for social research. Collaborative workshops and projects are designed to engage students in negotiating the power dynamics of various research relationships. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attribute: DTMM.

DTEM 2414. Media Ecology. (4 Credits)
Analysis of the impact of innovations on communication, culture, and consciousness. As the study of media as environments, media ecology is concerned with the nature and effects of our codes and modes of communication, and the technologies and techniques we employ. Through an understanding of the role that media play in historical patterns of change, we can assess the influence of the contemporary media environment on individuals and society, and better plan and prepare for the future. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: ACUP, AMST, ASAM, CMST, COMC, DTMM.
DTEM 2417. Data Visualization. (4 Credits)
Obtaining, interpreting, visualizing, and displaying data are essential skills for communication professionals in the 21st Century. This hands-on introductory course in data visualization will help students learn to use data to tell visual stories. Topics discussed will range from where to find data and how to evaluate sources to how to organize data to create visually appealing graphics that tell stories that can be grasped in an instant. Students will critique published visualizations to identify common pitfalls, as they create a data-based story to add to their portfolio. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: DTMM, JOUR, NMAT, NMDD, NMMI.

DTEM 2421. Digital Production for New Media. (4 Credits)
(Formerly COMM 2523): Analysis and practice of visual design concepts as they apply to a wide range of digital software programs. The course generally covers photo editing, audio editing, video editing, desktop publishing, and basic website design. Classes are structured around individual production assignments with a focus on project management, composition, and layout. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: JOUR, NMAC, NMAT, NMDD, NMMI.

DTEM 2425. Digital Video Production I for DTEM. (4 Credits)
(Formerly COMM 2222) This introductory workshop class will teach the fundamentals of digital video production and cinematic storytelling. Students will learn concepts, techniques, and technologies pertaining to digital video and sound through hands-on production and post-production assignments. We will explore the aesthetics and the communicative potential of the medium through screenings, critiques, and exercises. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: FIPR, FITV, JOUR, NMDD, NMMI.
Mutually Exclusive: FITV 2425.

DTEM 2427. Digital Audio Production. (4 Credits)
(Formerly COMM 2303): A comprehensive introduction to the principles and techniques of audio production. Instructions in the use of portable audio equipment as well as in production and post-production skills. A hands-on approach augmented with readings and listening to audio material. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JOUR.

DTEM 2431. Topics in Digital Production. (4 Credits)
An examination of radio and television from cultural, aesthetic, and historical perspectives. Topics covered include the development of broadcast programming, the sources of radio/television forms in other media and the impact of electronic media on the arts today. The course considers how broadcasting has affected contemporary culture and emerged as the most prominent maker of popular images. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

DTEM 2443. Fashion and Digital Media. (4 Credits)
This course examines what happens when one of the oldest forms of communication, fashion, meets up with the newest, digital media. Digital media has reconfigured the fashion industry; bloggers sit alongside famous magazine editors at Fashion Shows, the retail industry collapses as online shopping takes off, platforms such as Instagram reconfigure social status and power. While digital media creates new jobs, communities, celebrities, status and power in the fashion world, it also maintains and creates new social inequalities. We will examine the relationship between fashion and digital media from three vantage points: globally, locally, and personally. Our global focus considers the ways digital media creates new networks of production/labor/people; the local unit considers new jobs and identities (such as "influencers") in the fashion industry, with special focus on New York City; and our focus on the personal Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: FASH.

DTEM 2450. Digital Property: Rights, Policies, and Practice. (4 Credits)
This course will provide a general overview of copyright law specific to its impact on media and entertainment institutions, online platforms, and distribution channels. The course will examine copyright subject matter, ownership, duration, rights, licensing, infringement, and fair uses with a focus, in particular, on issue-identification and other analytical skills for professionals in practice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CELP, CMST, COMC, NMAC, NMDD, NMMI.

DTEM 2452. Game Culture: Theory & Practice. (4 Credits)
Games are everywhere and over 155 million Americans play them regularly on tabletops and electronic devices across the county. Their prevalence has prompted the medium as a space for expression, art, and meaning-making. Moving beyond the notion of simple entertainment games are creating provocative experiences to promote change or understanding. This course emphasizes exploration and critical thinking as we discover how games are designed to address issues such as social justice, gender representation, behavioral change, and education. Through analyzing game artifacts and engaging in creative exercises, students will be able to think critically about games and how they are designed. Students will apply this literacy into their own game projects. This course is open to anyone who is interested in games and their possibilities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, NMAT, NMDD.
DTEM 2453. Introduction to Game Narrative. (4 Credits)
The rise of interactive experiences has coincided with the exponential growth of the video game industry over the past two decades. There has been an increasing crossover between games and other forms of entertainment media, as well as games connected to areas such as mental health, social justice, and education. An understanding of game mechanics has become fundamental to operating in the digital media landscape. At the same time, we have very recently entered a storytelling moment, and the creation of novel storytelling strategies for games has become a key component of the development process. The practice of game narratives is a new aspect of writing for digital media, one that helps to bridge storytelling formats from television and film with interactive experiences on our computers or phones. This course introduces students to the design of narrative games, including narrative and game-design strategies. There will be a balance of story and game development as students create their own worlds filled with characters, history, and opportunity. This course is open to anyone who has an interest in games as storytelling mediums! Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAT, NMDD.

DTEM 2459. Social History of Communication and Technology. (4 Credits)
(Formerly COMM 2010): Explores theoretical and critical perspectives on technology, with special emphasis on the impact of technology on communication, culture and consciousness; the symbolic component of technology; the ecology of media; the process of technological innovation and the diffusion of innovations; the role of media and culture in the creation of a technical society. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCMS, COMC, LING, SSCI.

DTEM 2471. Writing for Online Media. (4 Credits)
From Web sites to Web logs, wikis to social media, the Internet continues to evolve and offer opportunities for communicators in various fields. Students will create their own blog; learn about cyber-journalism; apply their writing skills toward business, politics, art, or personal expression; and explore how marketing, public relations, Web design, and other factors impact writing style in New Media. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: JOUR, NMDD, NMMI.

DTEM 3423. Projects in Digital Video. (4 Credits)
Students will explore the possibilities of digital video and evolve both conceptually and technically through critiques, tutorials, readings, discussion and practice. Students will be challenged to discover and shape concepts of interest, experiment, explore narratives, plan and execute, while developing strategies for effective communication through moving image and sound. Resulting work can be delivered as video for the screen, installation or performance. Students are challenged to find appropriate outlets for their works (such as festival, public space, broadcast, screening, gallery, etc.) This course is at the intermediate level. Students should enter with working knowledge of Final Cut Pro X or another similar video editing software garnered through a previous course in digital video or permission of instructor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAT, NMDD, NMMI.
Prerequisites: COMM 2082 or COMM 2222 or COMM 2522 or COMM 2523 or DTEM 2425 or FITV 2425 or JOUR 1701 or VART 1265.

DTEM 3425. Digital Video Production II. (4 Credits)
Students will devote the semester to developing a narrative or documentary project of their choosing from concept to post-production. This workshop will allow students to evolve technically and conceptually through screenings, critiques, tutorials, readings, and practice. This is an intermediate class, and students must have taken some sort of introductory film/video production class prior to enrolling, and have some basic familiarity with DV cameras and editing software. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: FIPR, FITV, NMDD, NMMI.
Prerequisites: DTEM 2425 or FITV 2425 or FITV 3512 or VART 1265 or VART 3261 or VART 3262 or COMM 3525.

DTEM 3444. Nerds, Geeks, and Bros.. (4 Credits)
This course looks at the rise of the ‘nerd’ as a way to investigate shifts in masculinity, race, and power with the rise of the digital economy. Part of the course investigates how men, starting in the 1960s to the "Brotopia" of Silicon Valley today, dominate digital technologies and the STEM field. We will examine the historical and cultural shifts that changed computer work from a feminine job to a masculine one. From examinations of popular culture, such as movies, students will trace how the nerd figure became a new hero. The nerd hero is overwhelmingly male and white and represents shifts in gender and racial politics. Students will read from history, social science, communications, as well as study popular media such as movies, television, and advertisements. Through an investigation into the nerd, geek, and bro figures, students will see how women and minorities innovations have been left out of history, as well as left out of the industry. By the end of the course, students will advance potential solutions to the inequalities in the technology industry.
DTEM 3447. Race, Gender, and Digital Media. (4 Credits)
Technologies—especially digital media—are often described as creating a more diverse global community. But the reality is that forms of difference, notably race and gender, are very much a part of our digitally mediated lives. This course will focus on how technologies have, at times, reproduced, ignored, helped, and hindered representations of and opportunities for power offered to people of different races and genders. In this course, students will be expected to identify, observe, understand, and analyze issues of race, gender, ability, and class present in ‘new’ media. Topics will include historical accounts, contemporary industry practices that often exclude people of color (particularly women of color), identify, and representation online. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, ASSC, CCUS, COMC, COMM, JOUR, LALS, LASS, PLUR, WGSS.

DTEM 3452. Game Design Projects. (4 Credits)
This course is an applied production-oriented class that focuses on providing students the expertise needed to work on a design team to develop their own game projects. At the conclusion of the course, students will complete a playable game prototype for release online or showcased elsewhere. Games will address issues such as social justice, gender representation, behavioral change, or education, and will be developed using RPG Maker MV. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: DTEM 2452.

DTEM 3463. Civic Media. (4 Credits)
Participating in local life can be difficult. Information is hard to obtain and validate, local meetings are difficult to attend, networks are challenging to build. Increasingly, governments, advocacy groups, community organizers, and individual citizens are looking to digital tools to increase and improve the conditions in which we live and enhance our opportunities to engage. We will look at academic research surrounding citizenship and engagement in a digital era and cover research into many genres of civic media, from citizen journalism to hackathons, tech for development, activist art hacker culture, and games for good. This class will not only explore the various goals campaigns are using digital tools to meet, but will also focus on what type of citizen these tools are enabling and encouraging people to become. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CMST, COMC, JOUR, NMDD, NMNI.

DTEM 3475. Digital Media and Advocacy. (4 Credits)
This course will teach students the history of using digital media for advocacy, its contemporary implications for political participation and social movements. It is grounded in theories of technology for development, social movement theory, and participatory citizenship. It also involves a practical element, and teaches students and puts those to use in practically applied lessons concerning how to use digital media to impact political participation (in terms of protesting, donating, civic engagement, voting, and more. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JOUR.

DTEM 3476. Social Media. (4 Credits)
(Formerly COMM 3307): This class critically examines popular computer-mediated communication technologies such as Facebook, Twitter, and YouTube. Students will critically analyze, use, and encounter broad range of social technologies. Students will also learn basic social media skills, “best practices,” and create and propagate content. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASSC, JOUR, JSME, NMAC, NMAT, NMDD, NMNI.
Mutually Exclusive: JOUR 3776.

DTEM 4418. Critical Making. (4 Credits)
Critical making is about engaging in hands-on hardware design as a form of reflection and analysis. In a world where computing is becoming more embodied, ubiquitous, and sensing, critical making as a practice focuses on the material layer of digital technologies, turning from software to hardware and the physicality of computation and communications infrastructure. In this class, we will construct and deconstruct physical hardware objects using a range of approaches, such as electronics fabrication and hardware hacking. No prior coding or engineering experience is required. Students will engage in a large proof-of-concept project. Whether it’s in marketing, teaching, designing, or coding, the likelihood is that you will need to understand this emerging world of intelligent objects, interconnected spaces, and making as a culture. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAT, NMDD, NMDE, NMNI.

DTEM 4440. Privacy and Surveillance. (4 Credits)
New technologies, from closed-circuit television cameras to large databases, have shifted the information landscape in ways that call into question cultural assumptions and social norms about sharing, visibility, and the very essence of privacy. Can we have privacy in the digital age? Is mass surveillance justified? Whose interests are being served, and who is at risk? This course is designed to promote student awareness of and sensitivity to the ethics, values, and latest developments in global privacy and surveillance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASAM, ASHS, CELP, NMAC, NMAT, NMDD, NMNI.

DTEM 4442. Hacker Culture. (4 Credits)
This course will investigate the histories of hacking, and the practices, values, and politics of hacking over time, and how they impact contemporary life. This will involve the study of its roots in pranksterism, governmentality, activism, and DIY/maker communities, and how these roots impact a variety of contemporary digital spaces. This course will take special consideration of the institutionalized political implications of hacking, including free speech and censorship, privacy and surveillance, intellectual property, net neutrality, as well as the more anarchistic forms of activism such as leaking (embodied by WikiLeaks) and hacktivism (embodied by Anonymous). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
DTEM 4451. The Technology Industries. (4 Credits)
From 2-person startups to multinational corporations, technology companies exert an enormous influence on contemporary society, industry, and politics. This course critically examines various aspects of the technology industries, such as engineering culture, entrepreneurship, the history and culture of Silicon Valley, and the influence of technology companies on policymaking and localism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

DTEM 4477. Networks and Society. (4 Credits)
From social media to WIFI to the global internet, “networks” have emerged as a dominant metaphor for how culture, communication, and technology are organized in the Information Age. This course introduces students to the social and material shifts entailed in the rise of communication networks at local and global scales. Readings and lectures will consider the ways network infrastructures reconfigure contemporary understandings of the self, the public, the economy, and civic engagement. Papers, class discussions, and assigned projects are designed to encourage students to connect their lived experiences with relevant research, theory, and current events. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

DTEM 4480. Digital Media and Public Responsibility. (4 Credits)
(Formerly COMM 4005): An examination of the choices and responsibilities which shape personal identity and common humanity for those who regularly employ the tools of digital media and computer technology. Regular use of digital media enables individuals to separate from their physical selves and from the community spaces in which they have traditionally lived. This course focuses on the resulting ethical tensions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

DTEM 4488. Political Communication in the Digital Era. (4 Credits)
This course will focus upon the construction of campaign communication through the lens of two fundamental messaging phases: (1) the development of campaign messages through initial research, polling and strategy; and (2) the dissemination, circulation, and sometimes adjustments of those messages through use of paid and earned media. In doing so, we will focus on both digital and traditional/mass media channels, and on messaging within a variety of contexts, including crisis communication, going negative, get out the vote (GOTV), and more. In doing so we will seek answers to a variety of questions: What exactly is effective political communication, particularly in the context of campaigns? How do campaigns create messages that not only persuade citizens of a candidate’s worth, but move citizens to vote or not? How do these messages find their way into various channels of communication? How can the use of many disparate channels – of different technologies, tactics and skills – best reflect a coherent campaign strategy? And how do all of these efforts comport with our traditional notions of democracy, and/or point to new ideals? To get at these questions, research concerning the efficacy of messages, the process of their construction, and democratic values implied by their content will be the focus of this course. These empirical measurements of the state of campaign messaging and its theoretical implications will be supplemented by periodic advice from practitioners of political communication about the practical application of such research from professionals in the field. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: JOUR.

DTEM 4999. Tutorial. (1 to 4 Credits)
Independent research and readings with supervision from a faculty member.

Disability Studies (DISA)

DISA 2500. Introduction to Disabilities Studies. (4 Credits)
This course will introduce students to the multidisciplinary field of disability studies through an exploration of the diverse ways that disability signifies across the social sciences and humanities. It will interrogate the meanings of disability in a variety of contexts within the U.S. and beyond with a particular focus on the ways that disability intersects with other categories of lived experience (race, gender, sexuality, socio-economic class). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AMST, ASHS, ENGL, PLUR.

DISA 4900. Independent Study. (4 Credits)
Domestic Relations Law (DRGL)

DRGL 0939. Family Law. (3 Credits)
The family plays a central role in American society, affecting both individual lives and the nation as a whole. Family law is the system of direct and indirect regulation that structures family life by determining both entry and exit from familial relationships, the rights and responsibilities that flow from family status, and the larger context for family life. Family law is one of the most important areas of law, as measured by its effect on people’s lives, the volume of litigation, and the financial and affective issues at stake. This course defines the reach of family law very broadly. We will cover the breadth and butter of traditional family law (including marriage, divorce, and the child welfare system), but we will also reach more broadly to look at the relationship between families and poverty and the multiple ways the state structures family life. This course will cut across traditional law school disciplines, such as civil, criminal, and constitutional law. We will consider important and complex questions, including the following: What is a “family”? How does this definition vary according to the context? How does, and how should, family law address nontraditional families? How do race, gender, and class affect family law?
Attributes: INLJ, L.MCO, PIE.

DRGL 0929. Child Welfare. (2 Credits)
This course is designed for students who are interested in understanding how the state intervenes in cases of suspected child abuse and neglect. Through an interdisciplinary lens of law and social work, this course offers a comprehensive overview of the child welfare system in America. When parents are deemed unable to provide adequate care for their children due to abuse and/or neglect, a state can intervene by providing oversight and services, including removal of the child from the home to ensure that children are cared for and safe. Through class discussion, and assigned readings and projects, this course will examine the history of the child welfare system and its evolution, the constitutional underpinnings of the role of the state with regard to family, key issues concerning both parental and children rights, and current directions. This semester-long course will impart both theoretical and practical knowledge.
Attributes: INLJ, LLM.

Economics (ECON)

ECON 1200. Basic Microeconomics. (3 Credits)
The purpose of this course is to give students the principles that are required to understand current microeconomic issues. Economic logic and evidence is used to analyze consumer and business decisions, and the institutional factors shaping those decisions (e.g., the role of the government). We go through economic theories, and then discuss how these theories apply to the real world.

ECON 1150. CB Honors Macroeconomics. (4 Credits)
This course introduces students to the analytical tools macroeconomists use to address questions about inflation, unemployment, economic growth, business cycles, the trade balance, and fiscal and monetary policy. The tools include basic models of the interaction among goods markets, labor markets, and financial markets and how these interactions determine overall economic performance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ECON 1100. Basic Macroeconomics. (3 Credits)
Macroeconomics studies the decisions and interaction of consumers and businesses, resulting in an understanding of the process by which prices and quantities are determined in a market setting. Forms of industrial organization such as competition, monopoly and oligopoly are explored. Also studied are the markets for labor and other factors of production.
Attributes: ACMI, BUMI, ENST, FRSS, IPE, SSCI.

ECON 1250. CB Honors Microeconomics. (3 Credits)
The purpose of this course is to give students the principles that are required to understand current microeconomic issues. Economic logic and evidence is used to analyze consumer and business decisions, and the institutional factors shaping those decisions (e.g., the role of the government). We go through economic theories, and then discuss how these theories apply to the real world.

ECON 1800. Internship. (1 Credit)
In this student-initiated program, the student may earn one additional credit by connecting a service experience to a course with the approval of the professor and the service-learning director.

ECON 2140. Statistics I. (4 Credits)
This course introduces students to descriptive statistics, probability theory, discrete and continuous probability distributions, sampling methods, sampling distributions, estimation and hypothesis testing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BUMI, IPE, URST.
ECON 2142. Statistical Decision Making. (4 Credits)
This computer-assisted course develops the student’s ability to collect data, postulate a hypothesis or a model, select the appropriate statistical technique, analyze the data using statistical software, draw correct statistical inference and clearly summarize the findings. Specific topics include chi-square tests, analysis of variance, simple and multiple regression and correlation models, time series analysis, and quality control. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: ECON 2140.

ECON 2800. Internship. (2 Credits)
Supervised placement for students interested in work experience.

ECON 2999. Tutorial. (2 Credits)
Independent research and readings with supervision from a faculty member.

ECON 3100. History of Economic Thought. (4 Credits)
An examination of the development of economic thought since the age of mercantilism. Economists covered include Adam Smith, Thomas Malthus, David Ricardo, Karl Marx, John Stuart Mill, Alfred Marshall, Thorstein Veblen, John Maynard Keynes and John Kenneth Galbraith. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INSE, ISIN.
Prerequisites: ECON 1100 or ECON 1150 and ECON 1200 or ECON 1250.

ECON 3116. Macroeconomic Analysis. (4 Credits)
An examination of the causes of fluctuations in the level of economic activity. Impact of changes in consumption, investment, and government spending on employment, the price level, and economic growth are analyzed in detail. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, HUST, INSE, IPE, ISIN, LALS, LASS.

ECON 3112. Open Economy Macroeconomics. (4 Credits)
The course will useconomics, urban studies, and social service policy to examine economic, political and social issues that impact the local Bronx community. Topics covered will include budgetary policy, education policy, community development and investment and university/neighborhood relations, among others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAM, ICC, PJEC, PJST, SSCI, URST.

ECON 3125. Economy of Latin America. (4 Credits)
The Latin American experience from an economic perspective. The political and social dimensions of this experience. Among the most controversial subjects to be considered are: Latin America’s economic relations with the developed nations (trade, investment, foreign aid); the problems of internal stabilization in Latin American economies; the ‘distributive’ issues (land tenure, income distribution, employment). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, GLBL, HUST, INSE, IPE, ISLA, LALS, LASS, PJEC, PJST.

ECON 3154. Math for Economists. (4 Credits)
Introduction to differential calculus and linear algebra, as used in economics. Topics include optimization of single variable and multivariable functions, optimization subject to constraints, determinants, matrix inversion, and use of exponential and logarithmic functions in economics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: ECON 1200 or ECON 1250.

ECON 3160. Game Theory. (4 Credits)
Game theory considers static and dynamic situations of strategic interaction among entities such as individuals, firms, governments, and teams. In this course, we develop game-theoretic solutions to these strategic situations and use these solutions to predict behavior. In doing so, we apply game theory to markets, bargaining, laws, contracts, voting, and social norms, among other things.
Attribute: ASSC.
Prerequisites: ECON 1100 or ECON 1150 or ECON 1200.

ECON 3210. Economics of Development. (4 Credits)
Surveys of the rapid economic changes occurring in Eastern Europe, the former Soviet Union, as well as various emerging economies in Asia, Latin America and Africa. This course is designed to introduce students to the problems which confront today’s less developed countries. Students will examine the differences between contemporary and early development, theories of development, the impact of population growth on development, globalization and the role of the state among other issues. Poverty Reduction will be given prominence throughout the course. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
ECON 3240. World Poverty. (4 Credits)
An investigation into the causes and consequences of poverty, both in the United States and in developing countries. The available statistics and the economic explanations of poverty are surveyed. Contemporary debates over policies to reduce poverty are discussed, including issues of welfare, food and housing subsidies, foreign aid, famine relief and agricultural development. The link between income distribution and economic growth is also discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, GLBL, HPSE, HUST, INST, IPE, ISIN, LALS, LASS, PJEC, PJST, URST, WGS.
Prerequisites: ECON 1100 or ECON 1150.

ECON 3242. Global Economic Issues. (4 Credits)
Students debate the economic and environmental consequences of globalization, including trade agreements, labor standards and immigration, capital flows, climate change and the HIV/AIDS/Malaria pandemics. The perspective of non-western countries is emphasized, including their participation in international agreements such as the Kyoto and Montreal Protocols and within institutions such as the WTO, the World Bank, the United Nations and the IMF. We study a little game theory as applied to international negotiations and some key principles of environmental economics, but there is no prior coursework formally required for this course. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, IPE, LALS, LASS.

ECON 3244. International Economic Policy. (4 Credits)
This course explores the theoretical foundations of international trade flows and international monetary economics. The theoretical background is then used as a basis for discussion of international economic policy issues. The course emphasizes patterns of international trade and production; gains from trade; tariffs and other impediments to trade; welfare implications of international trade and trade policies; balance of payments; foreign exchange markets; coordination of monetary and fiscal policy in a global economy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, HPSE, HUST, INST, IPE, ISIN, LALS, LASS, PJEC, PJST, URST.
Prerequisites: ECON 1100 or ECON 1150 and ECON 1200 or ECON 1250.

ECON 3245. International Political Economy. (4 Credits)
This course uses economic methodology to study the fundamental relationships between wealth and political power in the context of various international economic policies. Contemporary issues covered can include globalization, protectionism, trade waves, foreign assistance and macroeconomic coordination. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.

ECON 3248. Migration and Development: A Social Justice Perspective. (4 Credits)
Migrations continue to reshape the global economy, especially large cities. The human rights of conflict and climate refugees is a major challenge for UN countries. Global inequality is now determined mainly by where you are born. This course reviews theory and evidence on the impact of immigration on sending and receiving countries. Why do some regions welcome immigrants (e.g., NYC and California) while others spend large sums to stop migration. Who gains and who loses from immigration? Is there a fair and humanitarian approach that to immigration that promotes development in sending and receiving countries while minimizing the social and political cost of human mobility. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, HPSE, HUST, IPE, LALS, LASS.
Prerequisites: ECON 1100 or ECON 1200.

ECON 3256. Comparative Economic Systems. (4 Credits)
Survey of the salient features of alternative economic systems; the mixed economies of the western world and Japan, the reforms in the former Soviet, Eastern European, and Chinese economies; problems of measuring economic performance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, INST, IPE, ISIN, SOIN.

ECON 3340. Economics of International Business. (4 Credits)
This course describes the close connection between economic development and growth of the global economy via international business enterprise. Topics include an analysis of modern international business practices as one of the principal instruments of economic development; the emergence of the global, multinational enterprise out of post-WWII institutions and policies incorporated in GATT and IMF; international business strategies applied to diverse cultures and traditions; the tensions between national identity and the requirements of the global economy; profit vs. social welfare; technology transfer (with special emphasis on communications tech); MSBE entre to global markets; access to funding via international and indigenous financial markets; and the role of foreign direct investment. The course will also feature guest speakers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, IPE, ISIN.
Prerequisites: (ECON 1100 or ECON 1150) and (ECON 1200 or ECON 1250).

ECON 3345. Maritime Economics. (4 Credits)
In the presentation of theories of international trade, ceteris paribus conditions most often include transportation costs. That is, for purposes of exposition of the particular theory, the cost of transportation from one country to another are set at zero, while other costs such as capital and labor are closely analyzed. At the same time, it is universally acknowledged that a key factor in the growth of international trade has been the ongoing reduction of costs related to transportation. This course will focus on the maritime industry as fertile ground for the application of microeconomic—and, to some degree, macroeconomic—models. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: (ECON 1100 or ECON 1150) and (ECON 1200 or ECON 1250).
ECON 3346. International Trade. (4 Credits)
A foundation course in international economics. Covers both international trade theory and policy. Issues examined include protectionism, trade and growth, custom unions, and multinational corporations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: ASSC, HPSE, HUST, INST, IPE, ISIE, ISIN, LALS, LASS, URST.
Prerequisites: ECON 1100 or ECON 1150 or ECON 1200 or ECON 1250.

ECON 3347. International Finance. (4 Credits)
A foundation course in international economics. Covers foreign exchange markets and the balance of payments. Also examines macroeconomic policies affecting employment and inflation in an open economy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, IPE, ISIN, LALS, LASS.
Prerequisites: ECON 1100 or ECON 1150 or ECON 1200 or ECON 1250.

ECON 3430. ST: Sustainable Business. (4 Credits)
This foundation course for the GSB-FCHR Sustainable Business minor covers the ethical, economic, and scientific principles needed to manage and promote enterprises that are both profitable but also socially and environmentally responsible. Using case studies, guest speakers and their own research students acquire the comprehensive perspective necessary to manage and promote social entrepreneurship within large and small companies and to work with NGOs, fair trade groups, private-public sector partnerships and micro-enterprises, etc. Sustainable means profitable, environmentally sound and enabling for small scale entrepreneurs. Case studies range from Google’s East Coast Wind Power grid to carbon offset programs in the Amazon to mobile phone remittance based microfinance programs in Africa. This first course will draw on the knowledge of Fordham students and faculty as well guest speakers from the New York area to build a new sustainable business and development program at Fordham. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ENT, ESEC, ESEL, IPE, PJEN, PJST, URST.

ECON 3435. Industrial Organization. (4 Credits)
An examination of the behavior of firms in monopolistic and oligopolistic market structures; the history, content, and effectiveness of anti-trust legislation; and the role of regulation in American industry. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS.

ECON 3432. Law and Economics. (4 Credits)
This course applies microeconomic analysis to traditional areas of legal study, such as contract, property, tort and criminal law. The approach applies the ‘rational choice’ framework used in economics to analyze the purpose, effect and genesis of laws. Attention is paid to the effect of legal structures on economic efficiency. Economic analysis of law is one of the fastest growing and most influential areas of both economic and legal scholarship. This course is of value to both the general economist and students planning to attend law school. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, BLEB, LPBC, LPGP.
Prerequisites: ECON 1200 or ECON 1250.

ECON 3455. Economics and Regulation. (4 Credits)
This course provides students with the tools to understand the institutional aspect of regulatory and antitrust policies. It examines the economic issues at stake, what particular market failures provide a rationale for government intervention, the appropriate form of government actions and the effects of government intervention. Topics such as government merger policies, cable television regulation, transportation regulation, crude oil and natural gas regulation, environmental regulation, and regulation of workplace health and safety will be covered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: LPGP.
Prerequisite: ECON 1200.

ECON 3563. Labor Economics. (4 Credits)
This course examines labor institutions and their historical development in addition to the economics and peculiarities of labor markets. The role that institutional pressures (e.g., trade unions, government legislation, labor-management relations), industry organization, and market forces play in determining the terms and conditions of employment are discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LALS, LASS, LPBC, LPGP.

ECON 3570. Labor Market and Diversity. (4 Credits)
The goal of this course is to enable students to think independently about labor market and diversity issues. This course will (a) provide an introduction to the economic analysis of behaviors and institutions in the labor market; and (b) give students the tools to deal with diversity questions within the labor market such as educational attainment, employment discrimination, and income inequality across gender and racial groups. Economic logic and evidence will be used to analyze employer and employee decisions and the institutional factors shaping those decisions. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ASSC, DISA, PJEC, PJST, PLUR, URST, WGSS.
Prerequisites: ECON 1100 or ECON 1150 and ECON 1200 or ECON 1250.

ECON 3580. Economics of Diversity. (4 Credits)
Many of the social interaction of an individual in American society are shaped by the ethnic, racial, and gender groups to which the individual belongs. In this course we will investigate several of the economic effects of social interactions in a diverse society including: residential segregation, peer effects on neighborhood crime rates, inter-racial marriage patterns, diverse, social norms and cultural beliefs, the spread of diseases, income inequality, and affirmative action. While the specific topics covered are broad, many share properties that can be understood through the concepts of basic network theory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASHS, LALS, LASS, LPGP, LPHP, PLUR, URST, WGSS.
ECON 3636. Money and Banking. (4 Credits)
The role of commercial banks and financial institutions in the creation and allocation of money and credit; the central bank as regulator of the money supply; monetary theory and policy; the international monetary system. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisites: ECON 1100 or ECON 1150.

ECON 3637. Monetary Policy. (4 Credits)
An analysis of the monetary sector of the economy and the impact of monetary policies designed to solve the problems of inflation, unemployment, and economic growth. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisite: ECON 3636.

ECON 3666. Economics at the Movies. (4 Credits)
Films spirit us away. Whether we journey somewhere in time, or far, far away, we do it in the name of entertainment. One does not, simply, walk away from a well-made film, unchanged. Regardless of subject, genre or direction, film draws from the human experience. This course will utilize film to illustrate the concepts that students have and will encounter in their study of Economics. Through the lens of Economic Analysis, students will experience film and enrich the film-going experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisites: ECON 1100 or ECON 1150 and ECON 1200 or ECON 1250.

ECON 3639. Financial Markets. (4 Credits)
An introduction to the flow of funds analysis and interest rate determination in the money and capital markets; the risk and term structure of interest rates. An introduction to financial futures, options, and swaps. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisites: ECON 1200 or ECON 1250.

ECON 3740. Issues in Financial Markets. (4 Credits)
This course provides an in-depth examination and discussion of selected topics in financial markets. Topics of current interest will be drawn from both academic and non-academic sources Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisites: ECON 1200 or ECON 1250.

ECON 3743. Stocks, Bonds, Options, and Futures. (4 Credits)
This course examines the working of the primary and secondary markets, investment banking, brokers and dealers, the New York and the American Stock Exchanges, the NASDAQ, the options and futures markets. Fundamental and technical analysis is also covered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, APPI, ASHS.
Prerequisites: (ECON 1100 or ECON 1150) and (ECON 1200 or ECON 1250).

ECON 3778. Corporate Finance. (4 Credits)
The decision-making processes of a firm across time and in the presence of uncertainty. Financial assets and markets. Valuation of financial assets. Working capital and long-term financial management. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ECON 3800. Internship. (3 Credits)
Supervised placement for students interested in work experience.

ECON 3840. Environmental-Economic Policy. (4 Credits)
This course will introduce students to the basic supply-and-demand framework used to evaluate market outcomes in basic microeconomics courses. Within the context of this framework, the course will explore several policy-relevant environmental issues, including; agricultural production, climate change, electricity generation, and ecosystem services. Exploration of the contemporary environmental issues will be led by student groups, which will engage in oxford-style debates regarding potential resolution of each issue. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ASSC, ENST, ESEC, ESEL, PJEN, PJST.
Prerequisites: ECON 1200 or ECON 1250.

ECON 3850. Environmental Economics. (4 Credits)
Good economic analysis underlies many successful environmental policies, from reducing air and water pollution to the Montreal Accord limiting ozone depleting gases. However, the environmental challenges of global warming, biodiversity and sustainable development are increasing global as well as politically and economically complex. This course reviews the key economic ideas underlying past successes and explores potential solutions for sustaining economic growth with environmental preservation in rich and poor countries alike. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, APPI, ASHS, ASSC, ENST, ENVS, EPLE, ESEC, ESEL, INST, ISIN, PJEN, PJST, SOIN, URST.
Prerequisites: ECON 1200 or ECON 1250.

ECON 3870. Public Finance. (4 Credits)
The role of public expenditure in a market economy. Equity and efficiency in a tax system. Description and analysis of the major taxes. Intergovernmental fiscal relations. Programs for redistributing income. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: LPGP, URST.
Prerequisites: ECON 1100 or ECON 1150 or ECON 1200 or ECON 1250.

ECON 3872. Principles of Cost-Benefit Analysis (Cba). (4 Credits)
An introduction to the theory and practice behind environment policy decisions in developed and developing countries. Featured are applications in health, education, transport, preserving the environment and HIV/AIDS. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisites: ECON 3118 or ECON 3870.
ECON 3884. Contemporary Economic Problems. (4 Credits)
A survey of outstanding micro and macroeconomic problems facing the United States. Topics covered include changes in the global economy, unemployment and inflation, poverty, environmental protection, health care reform, the productivity issue, the deficit. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LPBC, LPGP, SOIN, WGSS.

ECON 3885. Introductory Econometrics. (4 Credits)
This course introduces students to econometrics. It reviews the classical regression model before studying in detail deviations from the classical assumptions, which are often encountered in practice. The course covers several estimation techniques (such as maximum likelihood), as well as topics in time series analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: ECON 1100 or ECON 1150 and ECON 1200 or ECON 1250.

This course introduces students to a set of tools for modeling and understanding (possibly big) data. It blends elements from statistics/ econometrics and computer science. It is therefore interdisciplinary in nature and designed for quantitatively inclined students. The course focuses on supervised learning with applications of interest, notably in economics and finance. In the first part of the course, we will define the field, discuss the meaning of model accuracy and the bias-variance trade-off, and briefly review linear regression using R. In the second part, we will extend our study of classifiers, i.e., tools to classify observations into categories, or evaluate the probability that an observation belongs to a category. For example, determining whether (and with what probability) the economy is currently in a recession is a classification problem. Methods may include the logistic regression, the naive Bayes classifier, and the K-nearest-neighbor approach. In the third part of the course, we will study resampling methods: cross-validation and the bootstrap. In the fourth and final part, we will cover more advanced topics that may include model selection and regularization, tree-based methods, or support vector machine. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ECON.
Prerequisites: ECON 2140 and ECON 2142.

ECON 3971. Urban Economics. (4 Credits)
Urban Economics is the study of location choices by firms and households. The technological changes and economic factors driving the process of urbanization, and the shift from a 'downtown'-centered city to the suburbanized metropolises prevalent in the U.S. today is the central focus of the course. Throughout the course, New York City's history and current situation is used as an example of the economic forces operating on cities. Students will participate in a group project to analyze a major urban problem such as housing affordability, poverty, crime or education. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, LALS, LASS, URST.

ECON 3999. Service Learning-3000 Level. (1 Credit)
In this student-initiated program, the student may earn one additional credit by connecting a service experience to a course with the approval of the professor and the service-learning director.

ECON 4005. Fair Trade Entrepreneurship. (4 Credits)
Fair trade is a global response to social injustice and poverty. Whether it is capital for "startups" or markets for fair trade coffee, the fair trade movement promotes social and environmental responsibility business practices here and abroad. This course reviews the fair trade movement's successes and failures to find alternatives to business as usual that reduce poverty and build a sustainable global economy. Students focus on country specific examples of fair trade and microfinance social innovation that reduce poverty by creating viable livelihoods. Marketing, insurance, finance and management can all be applied to build a socially just and sustainable global economy. "We urgently need a humanism capable of bringing together the different fields of knowledge, including economics, in the service of a more integral and integrating vision" Pope Francis argues in his recent Encyclical Letter, this course explores this vision. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LALS, LASS, PJEC, PJST.

ECON 4020. Disability: Economic and Other Approaches. (4 Credits)
This course is a critical survey of the research and analysis of disability definitions, measures and economic issues with a focus on the interaction between disability and the public policy arena in the United States. It uses economic models, but also covers in-depth approaches and methodologies in other disciplines. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: DISA, ICC, PLUR.
Prerequisites: ECON 1100 or ECON 1200.

ECON 4110. Ethics and Economics. (4 Credits)
This course examines how ethical considerations enter into economic decisions. Readings include writings by moral philosophers and the founders of economic thought as well as recent research on ethical issues. Topics for discussion may include childcare, trade liberalization, welfare reform, healthcare, poverty, pollution and economic sanctions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMCS, AMST, APPI, ASHS, ASRP, EP4, LPBC, SOIN, URST, VAL.

ECON 4200. Seminar: Managerial Economics in a Global Economy. (4 Credits)
The application of economic theory (microeconomics and macroeconomics) and decision science tools (mathematics and econometrics) by firms and non-profit organizations to find optimal solutions to managerial decision problems in the face of constraints. The topics covered are new managerial theories of organizations in the globalized world of today; the theory and estimation of demand, production and costs, and their relationship to output and prices under various market structures. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: (ECON 1100 and ECON 1200) or (ECON 1150 and ECON 1250).

ECON 4800. Internship. (4 Credits)
Supervised placement for students interested in work experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Updated: 07-27-2020
ECON 4870. Economic Foundations of Catholic Social Teaching. (4 Credits)
This course explores the economic thought that has served as the basis of the Church’s teaching on issues like capitalism, socialism, poverty, wages, unions, the environment, and economic responsibility from Leo XIII’s encyclical Rerum Novarum to the present and current economic research that may guide future Church teaching. This will be done through lectures, readings from primarily 19th and 20th-century economic works, and discussion of how these works’ ideas are evident in papal encyclicals and other Church documents. The course will include case studies of how Catholic social teaching has influenced national social and economic policies in Europe and the U.S. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMCS, AMST, APPH, ASHS, ASRP, BEHR, BIOE, ICC, REST, THEO.
Prerequisites: ECON 1100 or ECON 1200 or ECON 1150 or ECON 1250.

ECON 4900. Internship Seminar. (4 Credits)
Students are placed in a work setting of their choice for 8 to 10 hours per week to enrich their understanding of the economic process. Readings and a written report related to the student’s internship are assigned. There is a pass/fail grade for the course. The course is restricted to seniors majoring in economics Urban and Public Sector Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.

ECON 4998. Honors Seminar in Economics. (1 Credit)
Supervised individual study project.

ECON 4999. Tutorial. (0 to 4 Credits)
Supervised individual study projects.

ECON 5005. Fair Trade Entrepreneurship. (3 Credits)
Fair trade is a global response to social injustice and poverty. Whether it is capital for “startups” or markets for fair trade coffee, the fair trade movement promotes socially and environmentally responsible business practices here and abroad. This course reviews the fair trade movement’s successes and failures to find alternatives to business as usual that reduce poverty and build a sustainable global economy. Students focus on country specific examples of fair trade and microfinance social innovation that reduce poverty by creating viable livelihoods. Marketing, insurance, finance and management can all be applied to build a socially justice and sustainable global economy. “We urgently need a humanism capable of bringing together the different fields of knowledge, including economics, in the service of a more integral and integrating vision” Pope Francis argues in his recent Encyclical Letter, this course explores this vision.
Attributes: CEED, CENS, LALS, LASS.

ECON 5006. Programming Economics and Finance. (3 Credits)
This course introduces the student to various computer programs and their applications in economics and finance. The course begins with a general review of programming skills using MATLAB. It then presents other statistical and econometric packages such as SAS and STATA. The course concludes with a review of the LATEX program.

ECON 5011. Economic Analysis. (3 Credits)
This course provides a survey of macroeconomic and microeconomic theory intended to prepare those international political economy and development (IPED) students who did not major in economics as undergraduates for IPED’s core courses in economics.
Attribute: IPED.

ECON 5015. Economic Development Policy. (3 Credits)
Using economic methodology, this course examines the interaction between political and economic institutions in the determination of economic policy in developing countries. Topics may include population control, urban bias, agrarian reform, trade policies, foreign aid, and macroeconomic adjustment policies.
Attributes: CEED, CENS, HUCB, IPED, URSG.
Prerequisite: ECON 5011.

ECON 5020. African Economic Development. (3 Credits)
The key objective of this course is to develop an understanding of the economic development problems of Africa, the trade patterns and financial relationships of Africa to the rest of the world. With examples, application, and country case studies, the course covers major development challenges and the possible solutions, the growing influence of African economics in industrialized and developing countries as well as future prospects.

ECON 5032. Economic Theory and Application of Transfer Pricing. (3 Credits)
The reorganization of corporations into large multinational units with diverse operations has given renewed interest in the issue of transfer pricing of goods and services as they move between corporate units. Transfer pricing gives rise to a host of taxation and economic issues. In this course, we focus on economic models for transfer pricing using agency theory and game theory and discuss Hirshleifer’s theories of corporate organization. We then discuss a variety of tax issues that arise under different pricing schemes and work through case studies to provide a well-rounded perspective of how theory relates to practice. Undergraduate seniors who wish to enroll in ECON 5032 must have successfully completed ECON 3118, and obtain the written permission of the professor, graduate department program director and senior class dean to register for this course.

ECON 5040. Strategic Financial Management. (3 Credits)
An introduction to the basic questions facing an investor evaluating firm policy. The course covers debt/equity choice, dividend policy, and principle/ agent problems within the firm. The value of the firm under different financial and managerial structures. Current research is surveyed to determine how investors interpret various financial arrangements such as dividend policy, taxes, and stock offerings. Specific attention will be paid to information and incentives of each party in a financial contract in the context of structuring the firm, running the firm efficiently, and if all else fails, bankruptcy.

ECON 5105. Topics in Economic History. (3 Credits)
The course aims to examine how to apply the core ideas and methods of economics to a wide range of historical issues, while at the same time broadening and deepening the exchange of ideas between economists and historians.
Attribute: HIST.

ECON 5260. Epidemics and Development Policy. (3 Credits)
A study of epidemics in developing countries, their transmission, control and governmental policy.
Attributes: CEED, CENS, HUCB, INST, IPED, ISIN.
ECON 5280. Urban Economics. (3 Credits)
The field of urban economics addresses a wide variety of urban questions and topics. At the most general level, the field introduces space into economic models and studies the location of economic activity. Urban economics typically addresses four sets of questions: development of urban areas, patterns of development within metropolitan areas, the spatial dimensions of urban problems, and the spatial aspects of local government.
Attributes: CED, CENS.

ECON 5415. Gender & Economic Development. (3 Credits)
Analyze the social nature of gender and economic development in a cross-cultural perspective. Topics include household labor, occupational segregation and earnings, inequality in market work, poverty, family structure, public policy and gender equity. The course draws on material from economics and other social sciences to analyze the social nature of gender and economic development in a cross-cultural perspective. Topics include women's household labor; occupational segregation and earnings; inequality in market work; the intersections of gender, class, race, and ethnicity; women and poverty; family structure; public policy and gender equity.
Attributes: CED, CENS.

ECON 5442. Emerging Markets: South Africa. (3 Credits)
Intended for students from South Africa participating in Fordham's ADV EMRA program, this course is offered every August at the University of Pretoria. Students will collect and analyze economic and financial data on South Africa and compare it with similar data on the emerging markets as well as with more established markets. In addition, students will have the opportunity to interact with South African business, labor and government representatives as well as with US business and government representatives. At the end of the course students will attempt to determine the prospects for foreign equity investment for a particular country.

ECON 5440. Emerging Markets. (3 Credits)
Intended primarily for IPED students interested in analyzing the dynamics of emerging financial markets in Africa, Asia, and Latin America. The course compliments POGA 6991- Political Risk Analysis. Students must prepare a country study regarding one country's basic macroeconomic performance, foreign exchange market, and stock market. Use of a computer and the Internet are incorporated into the course to gather data and analyze it statistically. Intended primarily for IPED students, this course explores the dynamics of emerging financial markets in Africa, Asia, Eastern Europe, and Latin America. Complimenting and expanding upon the skills learned in POGA 6991 Political Risk Analysis, students learn how to prepare a country study regarding their country's leading macroeconomic indicators, the stability of its foreign exchange market, and the likely returns and risks associated with its stock market. Real time data is obtained from the university's Bloomberg Terminal and the internet. Additional data is available from standard written and CD-ROM statistical sources. Students are taught how to analyze this data using standard statistical software to forecast trends as well as to estimate returns, volatility and cross correlations. An optimal portfolio of equity investments in emerging markets is estimated. Interest in analyzing the dynamics of emerging financial markets in Africa, Asia, Eastern Europe, and Latin America.

ECON 5441. Emerging Mkts: South Africa. (3 Credits)
Students will analyze economic and financial data in order to judge the prospect for foreign equity investment in South Africa. Students will also meet with union business, government and political leaders. This course can substitute for ECON 5540 Emerging Markets in the EMRA certificate requirements.

ECON 5542. Emerging Mkts: South Africa. (3 Credits)
Intended for students from South Africa participating in Fordham's ADV EMRA Program, this course is offered every August at the University of Pretoria. Students will collect and analyze economic and financial data on South Africa and compare it with similar data on other emerging markets as well as with more established markets. In addition, students will have the opportunity to interact with South African business, labor and government representatives as well as with US business and government representatives. At the end of the courses students will attempt to determine the prospects for foreign equity investments for the particular country.

ECON 5544. Microfinance in Emerging Economies. (3 Credits)
This class will present the basic concepts related to microfinance, its origins and evolution. The class will analyze the main Emerging Economies microfinance models. It will review how Microfinance institutions (MFIs) are organized and how they differ from the banking sector providing loans to micro-entrepreneurs. The class will present a detailed analysis of successful MFIs, its results in terms of micro-business development and its impact on development and social inclusion. It will present the products and instruments used and how MFIs make them attractive and accessible for their clients and at the same time, profitable creating a self sustainable business model.
Attribute: ASSC.

ECON 5551. Domestic and International Banking. (3 Credits)
A survey of domestic, and international banking activities and regulations, foreign exchange futures and options, foreign exchange rates, Eurocurrency markets, interest rate swaps, American banking regulations, hedging foreign exchange and interest rate risk, and financial innovation.
Attribute: IPED.
ECON 5570. Global Financial Markets. (3 Credits)
The course describes the markets and regulatory structures in which firms operate and the types of financial instruments used in developed and developing countries. Examines sources of risk investors face as well as how the financial system itself plays a role in development. An examination of financial markets in developed and developing countries. This course describes the markets and regulatory structures in which financial instruments used. Attention is paid to sources of risk investors face domestically and internationally and the pricing of that risk. The course also looks at how firms operate under the financial constraints of a developing economy as well as how the financial system itself may play a role in affecting the rate of development. Satisfies IPED students the GBA certificate prerequisite of FN6411 Financial Environment. Designed to complement topics covered in ECGA 5551 Domestic and International Banking. Attributes: INST, IPED, ISIN.

ECON 5590. Health Economics. (3 Credits)
The aim is to evaluate health expenditures and health policies in both the US and in Developing Countries using a common framework that integrates equity and efficiency. The course covers cost minimization, cost-effectiveness analysis, cost-utility analysis and cost-benefit analysis. All theories are matched with an application related to an actual policy expenditure decision. Applications related to the US include valuing physician service, alcohol treatment, inpatient care, diagnostic related groups (DRGs), psychiatric hospitals, Medicare payments, and bills charged to patients. Applications of special interest to developing countries include vaccinations, Disability Adjusted Life Years (DALYS) and the global burden of disease, user fees and various interventions for HIV/AIDS.

ECON 5600. Health and Development. (3 Credits)
This course introduces students to the field of health and development. The objective is to cover a range of theoretical and empirical topics relevant to understanding health and healthcare policies in developing countries. Microeconomic techniques are used to understand the demand and supply of health, the measurement of health over the human life cycle (in-utero, early childhood, adolescence, working-age population, aging population), and the role of public policy in improving the demand and supply of health over the human life cycle. In this interdisciplinary course, students will be exposed to studies from many related fields, in particular development studies, public health, and disability studies. For select topics, students will learn how to measure and analyze data that contributes to health policy debates (related to subsidies, incentives, insurance, and others) in developing countries. The course is aimed toward students interested in understanding health and healthcare policies in developing countries.

ECON 5700. Mathematical Methods in Economics I. (3 Credits)
The primary objective of this course is to provide incoming Ph.D. students with solid mathematical foundations necessary for the first-year sequence of theory and econometric courses. This course is designed on the presumption that students will have already been exposed to some of this material in previous studies.

ECON 5710. Mathematical Analysis in Economics. (3 Credits)
An introduction to linear algebra and differential calculus, as used in economics. Topics include matrix algebra, determinants, solutions of systems of linear equations, differentiation, single variable optimization, and an introduction to multivariate and constrained optimization. Attribute: IPED.

ECON 5740. GIS Mapping: Stata and R Prog. (3 Credits)
This course studies the mapping of long data sets into geographical information systems (GIS) by programming SATA and R.

ECON 5750. Game Theory. (3 Credits)
In this course we examine economic and social networks and their corresponding economic effects. We cover the measurement and common regularities of social network properties and popular models of network formation. We apply these tools to topics of interest which may include: Labor Markets, The Spread of Infectious Diseases, The Spread of Financial Information, The Spread of New Technologies/ Fads/ Fashions, Marketing, Social Norms, Game Theory and Other Strategic Interactions, Immigration and Social Capital, Industrial Organization.

ECON 5760. Computational Macroeconomics/Finance. (3 Credits)
The aim of this course is to explore methods used to compute numerical solutions to dynamic stochastic general equilibrium (DSGE) models with applications to both macroeconomics and finance. The course begins with a rigorous exploration of numerical methods including function approximation, numerical differentiation and integration, non-linear equations, numerical optimization, and the simulation of multivariate Markov processes. Utilizing these tools, we will pursue solution methods such as perturbation methods, discrete state space methods, and parameterized expectations.

ECON 5771. Project Assessment. (3 Credits)
Uses the logical framework analysis frequently mandated by USAID to design a results based system to monitor and evaluate small community development projects.

ECON 5808. Microfinance and Migration. (3 Credits)
Migration, access to credit (microfinance) and remittances can create employment and education opportunities for poor families, particularly women. Interdisciplinary case studies from Mexico, the DR, the Bronx, Amsterdam, Nigeria, China, Bangladesh and India show how race, class and gender affect employment outcomes.

ECON 6010. Microeconomic Theory I. (3 Credits)
Methodology, theory of consumer behavior and demand. Theory of production and factor prices under varying market structures. Welfare economics. Attribute: IPED.

ECON 6020. Macroeconomic Theory I. (3 Credits)
Classical, Keynesian, and contemporary analysis of income, employment, and price determination. Rational expectations in macro models. Dynamics of inflation and inflationary expectations. Attributes: ASDM, IPED.

ECON 6030. Global Managerial Economics. (3 Credits)
The application of economic theory and decision science tools by global firms to find optimal solutions to managerial decisions problems. The topics covered are new managerial theories of organizations in the globalized world of today; the theory and estimation of demand, production and costs, and their relationship to output and prices under various market structures.

ECON 6240. Financial Economics. (3 Credits)
A study of the fundamental methods and pricing techniques in Financial Economics. The course studies valuation of fixed income securities, stocks, and derivative contracts. Course description updated (Item 6) Fall 06. An analysis of asset pricing and financial market structure. Attribute: IPED.

ECON 6310. Monetary Policy. (3 Credits)
The impact, transmission, and incidence of monetary policy, central bank control of the money supply, rational expectations, and the effectiveness of monetary policy.
ECON 6320. Monetary Theory. (3 Credits)
This course is designed as an advanced macroeconomics course for students interested in pursuing monetary or macroeconomics topics beyond core topics in a graduate course. The course develops a baseline, simplified, general equilibrium model with money and then considers a fully specified New Keynesian general equilibrium model. The course covers a number of traditional issues in monetary theory: price and wage rigidity as well as unemployment. It also covers recent issues: financial frictions and search frictions in the labor market.

ECON 6340. Financial Theory. (3 Credits)
The theory of financial decision making, risk, and risk aversion, advanced asset pricing models, empirical regularities of financial markets.
Prerequisites: ECON 6710 or ECON 6700.

ECON 6440. Development Economics. (3 Credits)
The objective of this course is to provide students with an understanding of the causes and consequences of economic deprivation. In this course, the household is the major unit of analysis. The course covers topics in poverty, health, education, program evaluation (randomized control trials and selected non-experimental evaluation methods), microfinance, and the interplay between development and psychology. We will draw lessons from policy experiments in developing countries to understand what 'works' and what does not.
Attribute: IPED.

ECON 6460. Agriculture and Development. (3 Credits)
Topics in agricultural economics including food security and environmental issues.
Attributes: ABGS, CEED, CENS, IPED.

ECON 6470. Growth and Development. (3 Credits)
A survey of growth models and statistical evidence to determine what causes growth rate to vary among countries and over time. Topics include the source of economic growth, growth with balance of payments adjustments, capital inflows and growth, and north-south growth models. Prerequisites ECGA 5410 and ECGA 5710. Growth models and statistical evidence are surveyed to determine what causes growth rates to vary among countries and over time. Topics include the sources of economic growth, growth with balance of payments adjustment, capital inflow and growth, and North-South growth models. Prerequisites: Economic Development Policy and Applied Econometrics or the equivalent.
Prerequisites: ECON 5710 or ECON 5700.

ECON 6480. Environmental and Resource Economics. (3 Credits)
This course considers environmental/protection and natural resource management as elements of international policy development and planning.
Attribute: IPED.

ECON 6490. Foreign Aid and Development. (3 Credits)
This course examines both the economic and the political role of foreign aid in development. Economic topics may include economic growth, agricultural development, food aid, the environment, health, education, and emergencies. Political topics may include alliance building, conflict resolution, and governance.
Attributes: CEED, CENS, HULI, INST, IPED, ISIN.

ECON 6510. International Trade. (3 Credits)
Attribute: IPED.

ECON 6530. International Economics of Growth and Development. (3 Credits)
International Economics of Growth and Development studies those aspects of development that are related to international economics. Subjects covered can include the connection between economic growth and international trade, the terms of trade and economic development, export instability and economic development, import substitution versus export promotion, international labor migration, and international capital flows.

ECON 6560. International Finance. (3 Credits)
Attributes: INST, IPED, ISIN.

ECON 6700. Mathematical Methods in Economics II. (3 Credits)
This course covers advanced mathematical techniques used in economics, including exponential and logarithmic functions, integration, multivariate and equality-constrained optimization, dynamic equations and systems of dynamic equations, as well as more advanced optimization techniques.

ECON 6770. Microfinance in Emerging Economies. (3 Credits)
This class will present the basic concepts related to microfinance, its origins and evolutions. The class will analyze the main Emerging Economics microfinance models. It will review how Microfinance Institutions (MFIs) are organized and how they differ from the banking sector providing loans to micro-entrepreneurs. The class will present a detailed analysis of successful MFIs , its results in terms of micro-business development and its impact on development and social inclusions. It will present the products and instruments used and how MFIs make them attractive and accessible for their clients and at the same time, profitable creating a self sustainable business model.

ECON 6910. Applied Econometrics. (3 Credits)
Basic techniques of econometric theory, including applications in consumer theory, theory of the firm, and in macroeconomics, as well as a review of statistical methods. Some computer work is assigned.
Attributes: DATA, IPED.

ECON 6950. Financial Econometrics. (3 Credits)
Hypothesis testing, and modeling, with respect to financial data.
Attributes: ASDM, DATA.

ECON 6970. Applied Microeconometrics. (3 Credits)
The primary goal of the course is to improve students' ability to conduct high-level empirical research, combining economics, econometrics, and data. The course will specifically cover instrumental variables estimation, regression discontinuity, propensity score matching, control function approach, randomized control trials, static panel data models, and dynamic panel data models. The course is intended to be particularly useful for advanced Ph.D. students and master’s students planning to write or currently writing a thesis. The course will mainly draw on a series of high-quality journal publications from the field of applied microeconomics that use the aforementioned applied econometric techniques for causal inference.
Prerequisite: ECON 6910.

ECON 7010. Microeconomic Theory II. (3 Credits)
Advanced topics in demand and production theory, human capital, theories of interest, technological change, general equilibrium, and welfare economics.
ECON 7020. Macroeconomic Theory II. (3 Credits)
Macroeconomics II is focused on the dynamic behavior of households, firms, and the aggregate economy. The course consists of three parts. The first part focuses on the theory of consumption behavior and savings at the individual and aggregate level. The second part of the course investigates overlapping-generations models (OLG) focusing on both endowment and production economics. Finally, the course reviews real business cycle theory and concludes by exploring some relatively recent developments in the formulation and computation of heterogeneous agent models.

ECON 7910. Econometrics I. (3 Credits)
An examination of the standard linear model and generalized least squares. Hypothesis formulation, model specification, estimation and testing techniques, using matrix algebra.

ECON 7920. Econometrics II. (3 Credits)
An advanced treatment of select topics in econometrics, including sophisticated simultaneous equation estimation, asymptotic distribution theory, time series analysis, forecasting and Bayesian inference.

ECON 7995. Teaching Introductory Economics. (0 Credits)
This course is intended for graduate-student Teaching Fellows. It provides training in all aspects of teaching introductory courses in Macro and Microeconomics. The faculty instructor will visit each Teaching Fellow’s classroom to observe and offer advise on the TF’s lecture style and technique. Participants in this course will meet periodically to discuss all aspects of teaching, including the preparation of a syllabus, the use of instructor software, writing and grading exams, and developing assessments.

ECON 8100. Economics Internship. (0.5 Credits)
The Economics Internship course provides Economics graduate students the opportunity to accumulate relevant professional experience and practical training that they may need.

ECON 8570. Seminar in International Economics. (3 Credits)
The seminar requires the preparation of a research paper on an aspect of international trade or international finance, such as the gains from trade, trade policies, economic integration, foreign direct investments, international migration, growth trade, trade and development; exchange rate dynamics, international financial flows, and the international monetary system. Requirements: International Trade (ECON 6510) and International Finance (ECON 6560).

ECON 8600. Research and Writing in Economics. (3 Credits)
The course will aim to develop key skills for economics research. These skills will be imparted through lectures, discussions, presentations, homework assignments, and as part of a research paper the students will be required to prepare and present. The course will also provide a forum for students to present and discuss ideas, literature reviews and methodologies.

ECON 8999. Independent Study. (0 to 4 Credits)
ECON 9999. Dissertation Direction. (1 Credit)
ECON MTNC. Maintenance-Economics. (0 Credits)

Economics (Law) (ECGL)

ECGL 0336. Law and Economics. (2 to 3 Credits)
This course explores the insights economics offers about both how the legal system ought to be structured and the implications of its actual design. The course gives particular attention to the key areas of property law, contracts, torts, and criminal law, though it will also look at issues such as civil and criminal procedure. The course will present the traditional law and economics models developed over the past 30 years, but it will also consider the criticisms of and limitations to such models, and it will look at the implications of recent developments such as behavioral law and economics and the rise of empirical law and economics. No prior knowledge of economics is assumed.

Attributes: JD, LLM, PIF.

ECGL 0602. Cost-Benefit Analysis in Agencies. (1 to 2 Credits)
Both the President and Congress require that in many circumstances, agencies assess the costs and benefits likely to result from important regulatory action before taking such action. Cost-benefit analysis is both an art and a science, simultaneously profoundly technocratic and deeply value-laden. This intensive course will examine cost-benefit analysis as conducted in practice by federal agencies. After an introductory overview, the course will utilize case studies from several agencies to explore economic, legal, and political factors that help to shape how agencies deploy this central institution of the administrative state. 3-hour take-home exam.

Attributes: INLJ, LAWJ, LLM.

English (ENGL)

ENGL 0912. Requirement Preparation. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

ENGL 0914. Requirement Preparation in Summer. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

ENGL 0930. PhD Comprehensive Examination-English. (0 Credits)
ENGL 0935. Master’s Capstone Preparation. (0.5 Credits)
In any semester in which Master’s Students or Master’s w/ Writing Concentration Students are not registered for any credited coursework and in which they have not completed or are completing their Capstone, this .5 credit administrative course is required.

ENGL 0936. Master’s Comprehensive Examination-English. (0 Credits)
ENGL 0950. Proposal Development. (1 Credit)
ENGL 0960. Proposal Acceptance. (3 Credits)
ENGL 0970. Dissertation Mentoring - English. (0 Credits)
The English PhD. student is required to register for Dissertation Mentoring, which has a 3 credit fee, the semester after the student’s proposal is accepted.
**ENGL 1004. Texts and Contexts: Upward Mobility and the Common Good. (3 Credits)**

This course will explore Anglo-American literary representations of socio-economic self-transformation by focusing on its inherent tension between mobility and community. Has the fabled path from rags to riches threatened or sustained neighborhoods and nations? What happens to virtue, charity, and social cohesion when the desire for wealth acquisition becomes normative? We will address these and other questions through discussions of a wide range of literary texts, from Benjamin Franklin’s Autobiography to Patricia Highsmith’s The Talented Mr. Ripley. But we will also consider how the pervasive contemporary rhetoric of the “American Dream” in newspapers, magazines, film, and new media negotiates the ideal of upward mobility in relation to such collective ideals, such as mentoring, cooperation, and self-sacrifice.

**Attributes:** ACUP, AMST, ASLT, EP2, MANR, TC.

**ENGL 1101. Composition I. (3 Credits)**

Instruction in sentence and paragraph construction, reading comprehension skills and analysis, the basic principles of grammar with an emphasis on diagnosing and solving persistent problems, and principles of argumentation and evidence. Weekly assignments and regular grammar exercises to build confidence and competence in college writing.

**ENGL 1102. Composition II. (3 Credits)**

Intensive training in the principles of effective expository writing, with an emphasis on sound logic, correct grammar, and persuasive rhetoric. Introduces research techniques, including use of the library, conventions and principles of documentation, analysis of sources, and ethics of scholarly research. Weekly papers will be written and discussed.

**ENGL 1501. Imagining New York City in Literature. (3 Credits)**

New York City has been the home of some of the most significant U.S. writers and artists. The literature of the city explores and tests the very notion of an American identity, and what it means to be an American. This introductory EP1 course examines literary representations of New York City, exploring topics that include the environment, economic inequality, capitalism, and the changing roles of women, blacks, and workers.

**Attribute:** AMST.

**ENGL 1800. Internship. (1 or 2 Credits)**

**ENGL 1999. Tutorial. (1 to 4 Credits)**

Independent research and readings with supervision from a faculty member.

**ENGL 2000. Texts and Contexts. (3 Credits)**

An introduction to the literary analysis of texts and the cultural and historical contexts within which they are produced and read. Significant class time will be devoted to critical writing and to speaking about literature. Each section of Texts and Contexts will have a focus developed by the individual instructor and expressed in its subtitle. This course fulfills the Core requirements for the second Eloquentia Perfecta seminar.

**Attributes:** EP2, TC.

**Prerequisite:** ENGL 1102.

**ENGL 2999. Independent Study. (2 Credits)**

**ENGL 3000. Literary Theories. (4 Credits)**

In this course, we will review theories and methods of literary studies, using literary theory and criticism as primary readings in conjunction with primary works of literature from a range of literary traditions. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**Attribute:** COLI.

**ENGL 3001. Queer Theories. (4 Credits)**

An introduction to the academic discipline of queer theory, focusing on foundational thinkers (e.g., Butler, Foucault, Sedgwick, and others) as well as their philosophical and psychoanalytic precursors and interlocutors. The course will also address selected issues currently under discussion in the discipline. These may include the role of activism, the relationship between queer theory and feminism theory, attention to race, and intersections with postcolonial theory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**Attributes:** ACUP, ADVD, ALC, AMST, ASHS, ASLT, COLI, DISA, PLUR.

**ENGL 3002. Queer Iconoclasts: Sexuality, Religion, Race. (4 Credits)**

The aim of this course is to interrogate and challenge an assumption that religious communities and queer communities stand in direct opposition to one another. We will investigate citations and reappropriations of religious iconography in queer art and literature from the 20th and 21st centuries in order both to understand the controversies that surrounded these artistic and literary projects and to reimagine literary and artistic experimentation as the site of religious and sexual exploration. Particular attention will be paid to the intersection of sexuality, religion, and race. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**Attributes:** ALC, AMCS, ENRJ, PLUR, REST, THEO, WGSS.

**ENGL 3008. The 19th Century Novel of Manners. (4 Credits)**

Courtship, marriage, extramarital affairs, and conflict between social groups are staple ingredients of the “novel of manners”—the term that, for some, designates a distinct sub-genre and, for others, serves as a synonym for the realist novel. As we examine the generic traits and thematic concerns of the novel of manners in the long nineteenth century, we will focus most particularly on “manners,” the elusive concept that lends the sub/genre its name. Possible writers include: Frances Burney, Maria Edgeworth, Jane Austen, Anthony Trollope, Edith Wharton, and E. M. Forster. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**ENGL 3009. Critical Edge: Writing About the Arts. (4 Credits)**

This class is for people with a passion for and strong opinions about movies, books, music, and the theater. We will explore low and high culture, writing features, news stories, interviews, reviews, and opinion pieces. Students will attend performances, gather facts and materials, conduct interviews, and write about everything from live performances to independent film to visual art and contemporary writing. Students will develop interview and research techniques, and we will discuss subjects germane to the creation and viewing of art, including impartiality, originality, intuition, and the difference between being a fan and a critic. Sharing writing in a workshop format, we will focus on structure, coherence, style, and voice. Guest speakers will include professional writers, visual artists, performing artists, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**ENGL 3009. Critical Edge: Writing About the Arts. (4 Credits)**

This class is for people with a passion for and strong opinions about movies, books, music, and the theater. We will explore low and high culture, writing features, news stories, interviews, reviews, and opinion pieces. Students will attend performances, gather facts and materials, conduct interviews, and write about everything from live performances to independent film to visual art and contemporary writing. Students will develop interview and research techniques, and we will discuss subjects germane to the creation and viewing of art, including impartiality, originality, intuition, and the difference between being a fan and a critic. Sharing writing in a workshop format, we will focus on structure, coherence, style, and voice. Guest speakers will include professional writers, visual artists, performing artists, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
ENGL 3012. Novel, She Wrote. (4 Credits)

"If there’s a book that you want to read, but it hasn’t been written yet, then, "Toni Morrison declares, “you must write it.” The impulse for black female authors to write novels and the diverse manifestations of that impulse will be of primary concern in this course. What compelled black female authors in the second half of the twentieth century to write their first novels? How are themes of sexuality, motherhood, beauty, respectability, and intra- and interracial conflict represented in their texts? In what ways do their novels complement, build upon, and refer back to each other and other works? These are few of the questions we will tackle as we read through the literature. Some of the selected texts will include Paule Marshall’s Brown Girl, Brownstones (1959); Alice Walker’s The Third Life of Grange Copeland (1970); Toni Morrison’s The Bluest Eye (1970); Gloria Naylor’s The Women of Brewster Place (1982); and Ayana Mathis’s The Twelve Tribes of Hattie. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AFAM, ALC, ENRJ, PLUR, WGSS.

ENGL 3013. Fiction Writing. (4 Credits)
The workshop in the craft of writing fiction, with relevant readings in the game Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: CVW.

ENGL 3014. Creative Nonfiction Writing. (4 Credits)

A workshop in the craft of creative non-fiction, with relevant readings in the genre. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: CVW.

ENGL 3015. Poetry Writing. (4 Credits)

A workshop in the craft of writing poetry, with relevant readings in the genre. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: CVW.

ENGL 3016. Screenwriting Workshop. (4 Credits)

A workshop in the craft of screenwriting, with relevant readings in the genre. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: CVW.

ENGL 3017. Digital Creative Writing. (4 Credits)

Directed as a workshop, this course will focus on students’ writing from the perspective of a producer. We will pay special attention to a variety of media — digital, social, print — and the ways they translate to an individual’s writing practice. Guest lectures, off-site/online events, and weekly reading will be determined by the instructor and student interests. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: CVW, NMAT, NMDD.

ENGL 3019. Writer’s Workshop. (4 Credits)

A creative writing workshop that features peer review of student work and outside literary readings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: CVW.

ENGL 3021. The Graphic Novel. (4 Credits)

How can words and images combine to create narratives that exceed the sum of their parts? In this course, we will cover classic and recent examples of comic books and graphic novels to examine various approaches to visual storytelling and sequential art. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, AMST.

ENGL 3024. Poetry and Citizenship. (4 Credits)

Poetry has long had a complicated relationship to citizenship: Plato excluded poets from his ideal city while Frederick Douglass turned to poetry in making arguments for equal rights. What does it mean to be and act as a citizen? Readings will include work by Walt Whitman, T.S. Eliot, Allen Ginsberg, Langston Hughes, Gwendolyn Brooks, Charles Olson, Adrienne Rich and Myung Mi Kim. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ALC.

ENGL 3031. Medieval Monsters. (4 Credits)

St. Augustine once wrote that the word ‘monster’ derived from the Latin word ‘monstro’, to show, implying that monstrous beings were meant to reflect divine creativity. Over time, this word for unusual beings has taken on a more sinister flavor, even within the Middle Ages. This course will explore the medieval taste for the exotic, from ferocious giants and dog-headed men to the peace-loving sciapod. In this course we will examine the discourse of monstrosity as a complex critical lens through which premodern writers asked important questions of race, religion, civic virtue, and human morality. In our study, we will read selections from Pliny, Augustine, and others before moving through a range of medieval texts, including the Beowulf manuscript, medieval romance, and Mandeville’s account. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, COLI, ENHD, ENRJ, MVLI, MVST.

ENGL 3032. Publishing: Theory and Practice. (4 Credits)

The aim of the course is to develop a clear understanding of the publishing industry. Genres addressed will include young adult, literary fiction, science fiction, romance, mystery, and graphic novels. Speakers will include authors, publishers, agents, and magazine and book editors. Final projects may range from a formal analysis of a novel or group of novels to an investigation of a segment of the publishing industry or 30 pages of a novel (of any type). Weekly reading of novels ranging throughout the genres is required; there will also be quizzes, a midterm, and a final. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ENGL 3035. Age of Innocence. (4 Credits)

We tend to imagine certain ages—of humanity or of humans—as ages of innocence. In this course, we will explore how different literary genres (such as fairy tales, dystopian fiction, Romantic poetry, the pastoral, the Bildungsroman) depict innocence as a stage we grow out of or long to return to. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
ENGL 3036. Latin American Short Story. (4 Credits)
Writings by Gabriel Garcia Marquez, Julio Cortazar, Carlos Fuentes and Mario Vargas Llosa (to name just a few) are some of the treasures of world literature. This course will focus on the short story and novella forms in order to explore as fully as possible the full range of Latin American and Latino literature. Literary geographies will include Mexico, the Caribbean, Central and South America, with special sections on Cuba, Argentina, Chile and Brazil. All readings will be in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, AMST, COLI, INST, ISLA, LAHA, LALS.

ENGL 3037. US Latinx Literature. (4 Credits)
This course is an opportunity to read and think about Latinx literature in the United States in all its diversity and cultural range. We will read literary texts with special attention to how they handle the messy experiences of cultural difference, economic exploitation, and political conflict. For what are literature and culture made up of but the challenges of life itself? This class will take as axiomatic that any understanding of U.S. life and history will be incomplete without inclusion of the diverse Latinx experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, AMST, COLI, LALS, PLUR.

ENGL 3045. Theory for English Majors. (4 Credits)
This course introduces the English major to debates in literary and critical theory. The goal of the course is to reflect on reading strategies, textual practices, and language itself. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: COLI.

ENGL 3059. Creating Dangerously: Writing Across Conflict Zones. (4 Credits)
This course encourages students to think and write about injustice and oppression around the world. How do you make a life in conditions of devastating conflict? How do you write under a state that seeks to undermine and repress your work? We will read, discuss, and respond to works of contemporary authors facing such challenges in a variety of global conflict zones. Examples could include writers responding to the refugee crisis in Syria and beyond its borders; ongoing conflicts in Central Africa; internal struggles in Mexico, Central America, and the US-Mexican border region; the war between Ukraine and Russia; tensions in Israel and Palestine; and the emergence of repressive regimes in Ukraine, Hungary, and the Philippines, among other places. The course will be co-taught by the Fordham English Department’s current Writer at Risk in Residence, Felix Kaputu, who will bring to the discussion his own experiences in the Democratic Republic of the Congo, along with another English department faculty member. With the assistance of PEN America’s Artist at Risk program, we plan to invite writers we are reading to visit our class via video conference. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, GLBL, HCWL, HUST, INST, PJST.

ENGL 3062. Prose Poetry/Flash Fiction. (4 Credits)
A workshop of prose poetry and flash fiction. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CVW.

ENGL 3067. Contemporary Women Poets. (4 Credits)
In this course, students will read poetry written by women poets in the 20th and 21st centuries with a focus on the imaginative representation of women’s lived experience. We will read the work of poets who address the themes of feminine embodiment and sexuality, women’s roles as mothers and daughters, women’s work (both professional and domestic), and the role poetry plays in enabling women to discover a language to contain their experience. Among the (possible) poets we will read are Sylvia Plath, Ann Sexton, Elizabeth Bishop, Lucille Clifton, Anna Swir, Adrienne Rich, Marie Ponsot, Eavan Boland, Louise Erdrich, Kate Daniels, Mary Karr and A.E. Stallings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENRJ, IRST.

ENGL 3068. Writing London: Outsiders. (4 Credits)
From the London of Charles Dickens, teeming with “Countrymen, butchers, drovers, hawkers, boys, thieves, idlers and vagabonds of every low grade,” to Monica Ali’s Bangladeshis living desperate lives behind the “net curtains” of Brick Lane, London has always inspired fiction about outsiders finding their feet in this vast metropolis. This course invites you to discover writers who have used London as a setting or as a controlling metaphor to create stories about immigrants and other outsiders; and to use field trips as an inspiration to write your own stories. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CVW, ENRJ.

ENGL 3071. Family Matters: Memoir. (4 Credits)
We all have stories about family, but how do you shape this charged material into good narrative? Mary Karr, the celebrated author of three memoirs, writes that “The emotional stakes a memoirist bets with could not be higher.” In this course, students will have the chance to try their hands at some of the most potent history anyone can tackle -- their own. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CVW.

ENGL 3100. Medieval Literature. (4 Credits)
A survey of medieval literature. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, MVLI, MVST.
ENGL 3101. Apocalyptic Representation Before 1800. (4 Credits)
Today we often think of the end of the world in scientific contexts: climate change, nuclear and other types of environmental catastrophes, alien or machine annihilation. But for most of human history, the end times were thought of in exclusively theological terms. When and how and why did these sometimes competitive, sometime overlapping frameworks for imagining our end develop? This course will look for answers in early modern and 18th-century apocalyptic representations. Among the authors we will consider are, Francis Bacon, John Milton, Margaret Cavendish, Jonathan Swift, Isaac Newton, and Mary Shelley. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3102. Medieval Drama. (4 Credits)
Medieval Drama offers a study into one of the most vibrant forms of the pre-modern period, offering us a vantage point from which to view medieval ideas about war, sex, religion, life and death. As expected, some sources were closely controlled and curated, such as the Christian liturgy itself and the short dramatic tropes, like the Quem quaeritis, which would expand on the scriptural narrative. Yet other, less formal and popularly organized pieces such as the amazing cycle plays of the late medieval period show a remarkable involvement of everyday people, as the trade guilds work to translate the story of creation to the Apocalypse into a relatable experience. Studying this span of history allows us to consider drama’s origins and changing cultural meanings. Using selected highlights, this course will include the medieval morality plays, such as “Mankind” and “Every-man,” along with biblical plays represented in selections from the York, Towneley, and Chester cycles. Having looked at these snapshots of early and late medieval drama, we will complete the course with a glimpse of the Early Modern, where plays such as “The Tragedal History of Dr. Faustus” will show us how the plays produced in the age of Shakespeare both reflected and rejected the medievalisms which formed their very origins.
Attributes: ALC, ENHD, MVLI, MVST.

ENGL 3103. Early English Drama. (4 Credits)
English drama from its origin in the Middle Ages to the beginning of Renaissance drama in the early Tudor period. Mystery plays, Morality (including Everyman) and interludes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, MVLI, MVST, RSCS.

ENGL 3104. Medieval English Blackness. (4 Credits)
This course poses a question: How can we talk about blackness in the English late Middle Ages (c. 1350 to 1500)? Through a range of readings in medieval texts, contemporary Black literature, and critical scholarship, we will entertain this question in at least three ways: 1) as an interrogation of possibility—how are we able to talk about blackness during this period, before the emergence of the modern concept of race? 2) as a prompt to describe—what did blackness mean during this period, and how does this square with what it means now? and 3) as a political intervention—how does critical race studies transform the way we read medieval literature, and how can medieval literature shed new light on modern convictions about race? Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, ENRJ, MVST.

ENGL 3107. Chaucer. (4 Credits)
Reading and analysis of The Canterbury Tales and other major poems. This course will examine Chaucer’s major work, The Canterbury Tales, as well as his earlier love poems. We will be spending most of the semester on the Canterbury Tales so that we can explore the range of Chaucer’s writings—his romances, bawdy stories, moral tales, and saints’ lives. There will be two main goals: to pay close attention to Chaucer’s poetry (and, therefore, to become familiar with Middle English) and to discuss the larger concerns to which Chaucer returned again and again—the position of women, social disruption, religious belief, the politics of the court, and the challenge of writing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, MVLI, MVST.

ENGL 3109. Arthurian Literature. (4 Credits)
Readings will include excerpts from Geoffrey of Monmouth, Wace and Layamon on the origins of the idea of Arthur. Later we will read Chretien De Troyes*Lancelot(The Knight of the Cart)*, part of the *Alliterative Morte Arthure*, and the conclusion to Thomas Malory’s *Le Morte Arthur*. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, MVLI, MVST.

ENGL 3111. Introduction to Old English. (4 Credits)
An introduction to the language of Old English and some of the early literary works composed in that language. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, ENHD, MVLI, MVST, WGSS.

ENGL 3114. The (Medieval) Walking Dead. (4 Credits)
Ranging from stories of undead armies in ‘Branwen, Daughter of Lyr’ to eternally-damned ‘zombie’ knights in Perlesvaus, and from genres varying from chronicle to romance, this course explores the cultural significance of medieval ‘zombies’— revenants, spirits, and other beings that we would classify as ‘undead,’ in order to understand how such monsters might relate to medieval concerns about living, death, dying, and the afterlife. How do the living relate to the dead in the Middle Ages? What happens to bodies and souls after death? How do concerns about mortality and living affect the person in the afterlife?.
Attributes: ALC, ENHD, MVLI, MVST.

ENGL 3115. Medieval Women Writers. (4 Credits)
We will begin with the autobiographical account of Perpetua, Roman martyr, and then we will look at the plays of Hroswitha, a Saxon nun, the biography of Christina of Markyate, an Englishwoman who rejected marriage for life as a solitary, the romantic lyrics of the female troubadours, short excerpts from the English mystics Julian of Norwich and Margery Kempe, Christine de Pizan’s Treasure of the City of Ladies, and finally the daily letters of the women of the Paston family (xvth century). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, ENHD, MVLI, MVST, WGSS.
ENGL 3121. The Pearl Poet and His Book. (4 Credits)
In this course, we will study intensively some of the greatest poems written in Middle English, all by the anonymous 14th century poet known as the Pearl or Gawain Poet, all contained in a single manuscript, Cotton Neo A.x. We will learn about the art of medieval bookmarking and illustration through hands-on work with the manuscript's digital facsimile, weigh in on intense scholarly debates surrounding the book's four poems (Pearl, Sir Gawain and the Green Knight, Patience, and Cleanness, the crown jewels of the Alliterative Revival), and read other works possibly attributed to this author (St. Erkenwald) to ask critical questions about the formation, and expansion, of literary canons. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, MVLI, MVST.

ENGL 3123. Surviving the Barbarians in Early Medieval Britain. (4 Credits)
This course explores the literature of ancient and early medieval Britain from the age of the Roman Empire to the time of 'Beowulf'. It considers the contact and conflict between long-resident populations like the Britons and Picts and invaders like the Romans and the Saxons—groups who would be subjected to their own invasions later. How did certain groups come to view others as ‘barbarians’, and what is like to grapple with that label? This course will introduce students to the changing, material culture of Britain and to several postcolonial perspectives on the medieval evidence. Readings will be translated from Latin, Old and Middle Welsh, Old English, and Old Norse. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, ENHD, ENRJ, MVLI, MVST.

ENGL 3125. Beowulf in Old English. (4 Credits)
This course will involve close reading of Beowulf and related texts in the original, as well as discussion of critical approaches to the poem from romanticism to the present. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, MVLI, MVST.

ENGL 3127. Dreams in Middle Ages. (4 Credits)
'Dreams in the Middle Ages': Much medieval literature presents itself as dream-vision, and this course examines the imaginative possibilities the vision-form presents, and which medieval authors exploit for profit and delight. In making sense of medieval dream worlds. We shall look at both medieval and modern theories of dreams and dreaming. We shall begin by reading, in translation, the Romance of Rose, one of the most influential dream visions of the Middle Ages, and as we read it, and works by Chaucer, Langland, the Pearl-poet, and Julian of Norwich, texts that investigate secular and spiritual love and loss, allegory, psychology, and the human struggle for existence, we shall come to appreciate the diversity, literary and philosophical complexity, and beauty of the medieval dream vision. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, MVLI, MVST.

ENGL 3131. Medieval Tolerance and Intolerance. (4 Credits)
Studies medieval literary texts for their representations of various peoples, ethnicities, beliefs, relationships, models of justice etc. Taught in the original (for some medieval English texts) and in translation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, MVLI, MVST.

ENGL 3134. Love in the Middle Ages. (4 Credits)
This course will treat the rules for love written by the 12th century author Andreas Capellanus, together with the work of his Roman predecessor Ovid. Then we will examine the way love was experienced in Marie de France's short stories (lais), will read the real life letters of Abelard and his beloved Heloise, and will discuss same-sex friendship/love. The course will conclude with Arthurian narratives by Chrétien de Troyes, Sir Thomas Malory and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, ENHD, MVLI, MVST, WGSS.

ENGL 3135. Irish and British High Medieval Literature: Connections and Comparisons. (4 Credits)
This course covers the literature of the period 1000 to 1330 in England, Wales, Ireland, and Northern France in the context of spiritual reform, artistic innovation, political consolidation, and cultural exchange. Readings will include selections from all the major genres of high medieval literature: Arthurian romance and other courtly fictions, history and saga, the outrageous lives and afterlives of the saints, and lyric poetry in English and translated from Latin, Welsh, Irish, and French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, MVLI, MVST.

ENGL 3136. Medieval Mystics. (4 Credits)
During a Middle Ages where Catholic Christianity informed virtually all aspects of public and private life, the claim to genuine mystical experience—that is, the claim to direct, unmediated experience of God—could not have carried higher stakes. Starting with foundational texts, we will read the synaesthetic ecstasies of maverick hermit Richard Rolle, the regimented monastic instruction of Walter Hilton, and the complex language games of The Cloud of Unknowing; we will unravel one of the great, gem-like masterpieces of the Alliterative Revival, the anonymous Pearl, probe the intersections of gender, text, and faith in the writings of Julian of Norwich (the first female writer in English) and Margery Kempe (the first autobiographer in English), and examine mysticism's secular dimension in Malory's telling of the Quest for the Holy Grail. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, MVLI, MVST, REST.

ENGL 3137. World Cinema Masterpieces. (4 Credits)
World Cinema Masterpieces provides a close analysis of style, narrative structure and visual texture in selected masterworks of major European, Asian and American directors. Directors under consideration include: Renoir, Carne, Lang, Welles, Ophuls, Hitchcock, Bresson, Kurosawa, Ray, Bergman, Rossellini, Fellini, Truffaut, Tarkovsky, Kieslowski, Fassbinder and Altman. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASAM, INST, ISEU, ISIIN.
ENGL 3138. Late Modernism. (4 Credits)
Sandwiched between high modernism of the 1910's and 20's and the postmodern turn, texts produced between the 1930's and 60's often fall out of accounts of twentieth century literature. In this class, we will interrogate critical assumptions surrounding ideas about "late modernism," and how re-invention and disenchantment can complicate and en-rich our understanding of literary modernism. Our readings will include late works by writers who contributed to the first wave of modernist writing, as well as those by individuals whose careers began in its aftermath. Possible authors include: Jean Rhys, H.D., Samuel Beckett, Carson McCullers, Djuna Barnes, Paul Celan, W.H. Auden, Gertrude Stein, James Joyce David Jones, T.S. Eliot, Gabriel Garcia Marquez and George Oppen. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI.

ENGL 3140. Myth of the Hero: Medieval Memory. (4 Credits)
Scholar Umberto Eco once compared the Greek gods to the superheroes of our present day. Yet our own cultural understanding of what a hero is varies, ranging from Zeus to Catwoman and everything in between. This course will explore the development of the concept of the hero, beginning in the pre-modern era with Beowulf. We focus on the works of the eleventh through sixteenth centuries as time periods wherein the concept of the hero changed most dramatically, and the resulting ideas continue to drive what many twenty-first-century societies still consider "heroic" today. In the spirit of the Eloquencia Perfecta seminar, of which this course is a part, our studies will involve many speaking and writing opportunities. To help you create this content and generate ideas, we will study the cultural contexts of the hero, as well as those shared characteristics that seem to set the hero apart: otherwordly backgrounds, bodies & minds. This will be an interactive class, arrive prepared to discuss/debate issues of interest. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENGL 3140.

ENGL 3143. World Cinema Masterpieces, 1960-1980. (4 Credits)
World Cinema Masterpieces, 1960-1980 explores major works of the French New Wave, expressionism, surrealism, epic, and New German cinema—all produced during a 20-year period of extraordinary diversity and experiment. Among the European, North American, and Asian directors we will consider are: Truffaut, Rohmer, Tarkovsky, Bunuel, Antonioni, Teshigahara, Bergman, Kubrick, Fassbinder, and Malik. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASAM, COLI.

ENGL 3144. Other Worlds. (4 Credits)
This course will explore different kinds of "Other Worlds" in medieval literature, from visions of heaven and to voyages into supernatural worlds. We will analyze how these texts use spatial distance and difference to explore social relations and identities and even to subvert established ideas. The syllabus will include selections from the Lays of Marie de France and the Middle English Sir Orfeo and Sir Gawain and the Green Knight. We will finish the semester by looking at how the medieval is re-imagined as an "other world" in modern fantasy literature. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENGL 3144.

ENGL 3145. Medieval Love in Comparison: Christian, Jewish, and Muslim Perspectives. (4 Credits)
The concept of romantic love preoccupies contemporary society and art, as it has done for hundreds of years. Ideas of romantic love have their roots in the literature and ideas of medieval Muslims, Jews, and Christians, who were themselves responding to even earlier ideas about love and sex. In this class, we will ask: What were the discourses of love among Christians, Jews, and Muslims in the Middle Ages, and how do they impinge on our understanding of love in the present? Readings will include selections from classical poetry, the Bible, and medieval poetry in English or translated from Latin, Occitan, Arabic, Hebrew, and French. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, MVLI, MVST.

ENGL 3146. Science and Magic in Medieval Literature. (4 Credits)
This course considers the entanglements of language, literature, and knowledge about the natural world during the Middle Ages. We will look at medieval practices of what we would come to call natural and biological science, consider medieval understandings of nature's 'occult' power, and explore medieval literature about spells, wonders, witches, and demons. By the course's end, students will better understand the connections between language, culture, and scientific facts, and they will have learned about the long history of magic in the Middle Ages. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, MVLI, MVST.

ENGL 3147. Supernatural Stories. (4 Credits)
This course will explore the appearance of the supernatural in works of literature and art, including short fiction, novels, poems, plays, films, and TV shows. Besides terror and horror, what other emotions and reactions have authors tried to evoke? Why are we attracted to stories about the supernatural? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3203. Streets/Gardens/Magical Worlds: Space and Place. (4 Credits)
How do we shape places, and how are we shaped by them? In this course, we will consider places ranging from city streets to gardens and magical spaces. We also will focus primarily on imaginative writings from the early modern or Renaissance period, but we will consider select texts from other periods. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.
ENGL 3206. Shakespeare. (4 Credits)
In this course, students will study Shakespeare’s poetry and plays in relation to the Renaissance and 21st-century concerns and ideologies. Emphasis will be on Shakespeare and his works as they are read and constructed in regard to power, class, gender, and literary aesthetics.
Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, ENHD.

ENGL 3207. Milton. (4 Credits)
A survey of the major poetry and prose of John Milton with strong emphasis on Paradise Lost. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, REST, RSCS.

ENGL 3221. Shakespeare’s History Plays. (4 Credits)
Shakespeare’s first great hit was a series of history plays about the kings who ruled, and the wars they waged, a century and more before his birth. The eight plays produced (Harry Potter-style) over the course of eight years, gave London audiences then-and will give us now-a chance to watch Shakespeare becoming Shakespeare: to see him learn how to pack plays with a pleasure, impact, and amazement, a scene by scene and line by line, with a density and intensity no playwright before or since has ever managed to match. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, IRST.

ENGL 3222. Shakespeare and Popular Culture. (4 Credits)
This course focuses on theories of popular culture in tandem with items of popular culture related in some way to Shakespeare’s work. We will be reading cultural theory every week. Please keep this double focus in mind: we want to figure out why and how Shakespeare’s work is employed, not merely in what manifold ways he appears. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3226. Stage Vengeance. (4 Credits)
For reasons intriguing to think about, playwrights and playgoers have been obsessed with acts of vengeance from Ancient Greece through New York yesterday. We’ll mull the reasons as we track the acts through three epochs: Ancient Greece, Elizabethan London, and present-day New York. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3230. Early Renaissance Poetry. (4 Credits)
Renaissance poetry is marked by an extraordinary generic versatility, topical daring, and rhetorical dexterity; it raises many fascinating questions regarding language, aesthetics, nationalism, gender relations, sexual and romantic desire, status and rank, and religious and political turmoil. This course will trace such questions by focusing on genres such as the sonnet, the epyllion, the eclogue, and others. Although we will engage the historical and cultural context of Renaissance England where appropriate, this is not a history course; our primary energies will be devoted to close, careful readings of the language, form, and style of the poems themselves. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3234. A Midsummer Night’s Dream. (4 Credits)
This course gives students the opportunity to spend an entire semester focusing intensively on one of Shakespeare’s most enduring, and endearing plays: A Midsummer Night’s Dream. We will begin with a slow reading of the play itself, then move both backward (to sources in Ovid and Chaucer) and forward (to important critical studies as well as various musical, theatrical cinematic, and novelistic adaptations, including Shakespeare’s own revisiting of the material, late in his career, in The Two Noble Kinsmen). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3239. The Rise of the Novel. (4 Credits)
Following a century of civil wars, something very curious happens in England: Novels appear. People write them, publish them, read them and, most of all debate furiously about what novels are. In this course we will look at the rise of the novel in England, asking: Where did novels come from? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3306. Jonathan Swift and the Art of Satire. (4 Credits)
This course is an introduction to the art and nature of satire using the works of Jonathan Swift as the prime material for study. In addition to Swift’s A Tale of a Tub, Gulliver’s Travels, and A Modest Proposal, we will consider select works from the long satiric tradition as well as works by his contemporaries, including Alexander Pope, Mary Wortley Montagu, John Gay, and Jane Collier. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, IRST.

ENGL 3311. Opening Heads: Writing About Minds and Brains Before 1800. (4 Credits)
This course reads literary representations of minds and brains within the context of early-modern neurology and some major concepts in current cognitive theory. The literary authors considered may include Milton, Marvell, Swift, Finch, Addison, Pope, Sterne, Austen, and the Scriblerians. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.
ENGL 3315. Laugh. Crv. Hum. Quake. (4 Credits)
Over the course of two centuries, British playwrights and players hit upon a huge new panopoly of ways to trigger in their audiences the responses tagged above; many of their methods are still at work in the entertainments we seek and savor now. By close readings of the plays and their contexts (cultural, theatrical, social, political) we’ll track the development of those techniques, seeking to make sense of how they worked and why they matter. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ENHD.

ENGL 3318. Early Women Novelists. (4 Credits)
A study of the rise of female authors in the early modern period. We will address problems of gender and rigorously analyze the basic literary and historical dimensions of each text. Authors will include Behn, Burney, Wollstonecraft, Radcliffe, Austen, Emily and Charlotte Bronte. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, WGSS.

ENGL 3319. Plays and Players: 1600-1700. (4 Credits)
Beginning in the 1660’s, the stage mirrored the world in ways unprecedented: new performers (actresses trod the boards for the first time ever); new protagonists (middle-class as well as aristocratic); new shapes of comedy and lighting; new styles of acting; and new audiences keen to absorb, assess, and gossip about whatever transpired on stage, in the stalls, and behind the scenes. We’ll investigate all this innovation, through play texts, performances (live and recorded), and all the modes of writing (diaries, letters, autobiographies, reviews) by which spectators sought to preserve the evanescent but often spellbinding experience of going to a play. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3329. Plays and Players, 1700-1800. (4 Credits)
During the 1700s, the London world of entertainment changed in directions that now look, from our vantage, both long familiar and rather strange. The century ushered in the first feel-good comedies, calculated to make their audience cry and laugh by turn; the first exaltation of Shakespeare as more divinity than mere playwright; the first docudramas; the first attempts to record performances for posterity; the first theatrical superstars; and all the elaborate apparatus that sustained the stars’ centrality in the public eye: gossip columns, celebrity magazines, souveniers, and tell-all memoirs. We’ll track all the change and strangeness by reading some of the century’s greatest theatrical hits alongside all the many modes of documentation in which they came swathed alongside their first audiences. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3333. Captives, Cannibals, and Rebels. (4 Credits)
Captives, cannibals, and rebels are everywhere in early English writing about the Americas and the British Empire. In this course, we will think about why these figures fascinated authors and readers so much and what they can tell us about anxieties regarding colonization. We will read travel and captivity narratives, novels, plays, and poetry from the 17th and 18th centuries; authors may include Mary Rowlandson, Aphra Behn, Daniel Defoe, Olaudah Equiano, Samuel Taylor Coleridge, William Earle, and William Apess. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT, COLI, ENHD, ENRJ, HCWL, HUST.

ENGL 3334. Early Modern Poetry and Drama 1579-1625. (4 Credits)
A survey of major writers during the reigns of Elizabeth and James I. Poetry and drama by Shakespeare, Donne, Spenser, Sidney, Johnson and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ENHD.

ENGL 3336. Early American Novel. (4 Credits)
The American novel was a late arrival. No novels were published in America during the colonial period, and the first native entries in the genre appeared in the late eighteenth century, shortly after the formation of the United States and generations after the first English novels were published. This course will sketch the tradition of the American novel from its beginnings through the Civil War. To that end, we read a selection of representative early American novels—representative, that is, of the way that we view the history of the American novel today. We will consider the way that the American novel comes into being: what literary categories it draws upon, and how. We will also trace the ways that American novels came to be valued (some more than others), in their own time and ours. And we will consider different ways of reading early American novels, employing approaches old and new. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, WGSS.

ENGL 3341. Love and Sex in Early Modern Literature. (4 Credits)
This course will explore ideas about love, eroticism, and human sexuality from 1500 to 1700. Writers to be studied include Petrarch, Ariosto, Shakespeare, Sidney, Wroth, and Wilmot.
Attributes: ALC, ENHD, WGSS.
ENGL 3342. Women, Crime, & Punishment in Literature. (4 Credits)
This course examines portrayals of female criminality in literature. What formal techniques and narrative strategies do writers use to depict female criminality? What are the moral, legal, and social contexts that determine what constitutes a crime and the need for punishment? In addition to considering literary representations, we will explore constructions of gender and sexuality and the ways in which social values and expectations shape agency and dis-empowerment. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3356. Approaches to Asian American Studies. (4 Credits)
This survey examines major touchstones in the interdisciplinary field of Asian American studies. Seeking to move beyond the black-white binary, we will analyze Asian racialization in the context of western imperialism, settler colonialism, global capitalism, immigration, and US popular culture. Taking advantage of our location in New York City, the course will include field trips to institutions such as the Asian American Arts Centre, the Museum of the Chinese in America, and the Asian American Writers’ Workshop. Fulfills the pluralism requirement of the common core. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3359. Asian Diasporic Literatures. (4 Credits)
This course will introduce students to some key works of Asian diasporic literature, as well as to some crucial debates in Asian American studies. Some matters we may consider include the origins of the Asian American movement; the transnationalism debates; the intersections of race, gender, and sexuality; and the emergence of an Asian American avant garde. Authors may include Maxine Hong Kingston, Chang-rae Lee, Li-Young Lee, Ha Jin, Young-Jean Lee, Jon Hau, Tan Lin, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, AMST, COLI, PLUR.

ENGL 3361. The Female Bildungsroman. (4 Credits)
At its inception, the term ‘bildungsroman’ referred to novels concerned with the maturation, education, and coming of age of white, male protagonists. This class explores how the bildungsroman transforms when it focuses on protagonists of different gender identities, sexualities, and races in a variety of literary forms that might include novels by the likes of Charlotte Bronte or Maxine Hong Kingston, autobiographies by Simone De Beauvoir or Audre Lorde, poetry by Emily Dickinson, or even super hero comics like Marvel's Uncanny X-Men. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, WGSS.

ENGL 3363. Crime and Punishment. (4 Credits)
What makes crime a crime, and what constitutes just punishment? This course will explore ideas about criminality and correction as reflected in literary texts. We will also read crime narratives as taking up other concerns--such as social conformity, religious redemption and political unrest. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3364. Novels of Ideas: 19th Century. (4 Credits)
An intensive study of four major novels from the second half of the 19th century: Melville’s Moby Dick, Tolstoy's Anna Karenina, Dostoyevski’s The Brothers Karamazov, and Hardy’s Jude the Obscure. In exploring the ideological texture of these works, the course will consider the influences of such seminal thinkers as Schopenhauer, Marx, Darwin, Nietzsche, Zola and Frazer. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI.
Mutually Exclusive: COLI 3364.

ENGL 3365. Novels of Ideas: High Modernism. (4 Credits)
Drawing on works of philosophy, psychology, aesthetics, and literary theory, the course will develop close, contextualized readings of five modernist masterpieces, all published within a 20-year span: Proust’s ‘Swann’s Way’ (1913), Lawrence’s ‘Women in Love’ (1920), Svevo’s ‘Confessions of Zeno’ (1923), Mann’s ‘The Magic Mountain’ (1924), and Faulkner’s ‘Light in August’ (1932). Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, ISEU.

ENGL 3366. Novels of Ideas: High Modernism. (4 Credits)
Drawing on works of philosophy, psychology, aesthetics, and literary theory, the course will develop close, contextualized readings of five modernist masterpieces, all published within a 20-year span: Proust’s ‘Swann’s Way’ (1913), Lawrence’s ‘Women in Love’ (1920), Svevo’s ‘Confessions of Zeno’ (1923), Mann’s ‘The Magic Mountain’ (1924), and Faulkner’s ‘Light in August’ (1932). Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, ISEU.

ENGL 3367. Early Victorian Novels. (4 Credits)
A study of the novels of the early Victorian period. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3410. Jane Austen in Context. (4 Credits)
An intensive study of Jane Austen's novels and times. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, WGSS.

ENGL 3400. Age of Romanticism. (4 Credits)
This course covers the broad sweep of British Romanticism, from the 1780s through the 1830s. In any given semester, specific themes may organize the readings, but they are designed to encompass a wide range of poetry, prose, and drama. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, ENHD.

ENGL 3402. Victorian Literature. (4 Credits)
English literature from 1832 to the latter part of the 19th century. Poets and prose writers. The reflection of contemporary ideas in the literature of the period. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI.

ENGL 3411. Jane Austen in Context. (4 Credits)
An intensive study of Jane Austen's novels and times. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, WGSS.

ENGL 3417. Early Victorian Novels. (4 Credits)
A study of the novels of the early Victorian period. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.
ENGL 3420. Poems of Shakespeare and Others. (4 Credits)
Although Shakespeare is best known as a playwright, he also composed many extraordinary poems, especially love sonnets. We will read them together with poetry by about five of his contemporaries. According to an old joke, sex, religion, and politics are the three subjects one should not discuss at dinner parties--and these are precisely the subjects that recur most intriguingly and intensively in the poetry we'll be exploring together. A sampling of the issues we'll discuss: how does the poetry of the period reflect--or conceal--the political tensions that culminated in the English Revolution? why do so many poets of this era write sonnets? how do these texts treat desire and gender? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3424. Romantics and Their World. (4 Credits)
British Romantic literary culture flourished in a period of dramatic global change that included the American and French revolutions; war and peace with France; campaigns for abolishing slavery and reforming parliament; and urbanization, industrialization, and an early environmentalism. We will read a wide range of writers who participate in these dynamic events in poems, plays, essays and novels. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT, ENST, ESEL, ESHC.

ENGL 3425. Nathaniel Hawthorne. (4 Credits)
This course will explore the writing, life, and social world of Nathaniel Hawthorne. Paying particular attention to questions of literary form, history, national, trans-national, racial, and gender politics, we will read The Scarlet Letter, The House of the Seven Gables, The Blithedale Romance, The Marble Faun, and a selection of his tales. We will also consider Hawthorne's shifting role in the history of American literary criticism.
Attributes: ALC, AMST.

ENGL 3430. Regency Romanticism. (4 Credits)
This course takes the Regency (1811-20) as an historical frame to focus our attention on the latter part of the Romantic period. Officially, this era begins with George III’s declared lapse into madness and ends with his son’s ascent to the throne upon the king’s death. But the Regency has come to be defined more generally as an era characterized by two extremes: the decadence exemplified by the Prince Regent’s court and the popular protest movements that would lead to the first Reform Act. We will read a wide swath of the period’s poetry and prose within this context. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASLT.

ENGL 3434. 19th Century British Women's Tales. (4 Credits)
This course will explore the development of the national tale, a feminist genre of the first two decades of the 19thC whose symbolic cross-regional marriages celebrate the British union. We will examine how women writers used the national tale's defining tropes for their own political, national, and feminist purposes throughout the century. Writers we will read include Sydney Owenson, Maria Edgeworth, Jane Austen, Charlotte Bronte, Elizabeth Gaskell, and George Eliot. Reading will include some literary criticism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, WGSS.

ENGL 3436. American Dream in Literature. (4 Credits)
In this course we will explore the changing conceptions of success and business in American literature in genres including sermon, autobiography, short story novel, drama and through literary periods including Puritanism, Transcendentalism, Realism, and Naturalism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT.

ENGL 3437. Victorian Novel. (4 Credits)
This course introduces students to major authors of the Victorian novel, including such figures as Charles Dickens, Thomas Hardy, George Eliot, Henry James, Emily Bronte and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3438. American Modernism. (4 Credits)
This course introduces forms of literary experimentation associated with the modernist movement, including authors such as F. Scott Fitzgerald, Ernest Hemingway, William Faulkner, Gertrude Stein, Nella Larsen, Jean Toomer, and others. We will examine such contexts as the Harlem Renaissance, American writers in Paris, southern agrarianism, and others, as a way of grasping modernism's fascination with difficulty. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT, COLI.

ENGL 3439. Oddity and Creativity. (4 Credits)
This course focuses on rule-breaking and rule-making literary genres. Readings may include (but are not limited to) medieval allegories and abecedarians, early modern sonnets, 18th-century novels, 19th-century autobiographical poems, 20th-century science fiction, and 21st-century erasure poems and flash fiction. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3441. American Modernism. (4 Credits)
A study of the responses by American poets and novelists to the radical social, cultural, and technological changes of the first half of the twentieth century. Authors include William Carlos Williams, Wallace Stevens, Elizabeth Bishop, Hart Crane, Willa Cather, William Faulkner, and Jean Toomer. Some attention will also go to film, music, and literary criticism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3442. Romanticism and Private Life. (4 Credits)
In an expanding celebrity age, Romantic writers developed a new appreciation for solitude, family, and friendship. Our texts explore the pleasures, benefits, and risks of private life in a growing media culture. Writers include Lord Byron, Mary Robinson, Felicia Hemans, Samuel Taylor Coleridge, John Keats, John Clare. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.
ENGL 3467. Disobedience in Literature. (4 Credits)

‘Of man’s first disobedience’ – so begins John Milton’s epic poem, PARADISE LOST. Milton was not alone in his having interest sparked: the concept of disobedience, in its various permutations (literary, social, political, psychological, religious) has energized a wide variety of literary works. One might say that without some form of disobedience there could be no storytelling. Some of the questions that will shape our explorations in this course include: when is disobedience heroic, and when is it destructive or regrettable? What is the difference between disobeying your family and disobeying the law? Can an obedient character be interesting? How are the different modes of authority (religious, juridical, familial) played off against one another in order to license behavior? Using disobedience as our master rubric, we will follow important continuities and innovative changes in literary history across the past three centuries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ALC, AMST, ASLT.

ENGL 3504. Virginia Woolf. (4 Credits)

Virginia Woolf (1882-1941) was one of the great writers of the 20th century. In this course, we will read three of her novels and ‘A Room of One’s Own’, her influential feminist essay. Never formally educated, she was also one of the great readers and critics of her time. Brilliant, funny, and hugely curious about her world, she wrote about virtually everything that might interest a person in her time: war, sex, friendship, reading, food, money, art, inspiration, jealousy, fashion, walking, and marriage to name some. As we read her work, we will look at how she transformed the tradition she read into revolutionary art. Then, after spring break, we will read four novels by writers who claim Woolf as an influence, major or minor, direct or indirect. Each of these writers, from England, Colombia, the United States, and Egypt, finds a different Virginia Woolf. With your final project, you will have the opportunity to write about the Woolf you discover through reading her words and discussing them in class. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, WGSS.

ENGL 3512. British and American Poetry: Romantic to Modern. (4 Credits)

The course traces the development of poetry over two hundred years on both sides of the Atlantic, beginning with the Romantic movement in Britain and concluding with American verse of the late 20th century. However, the course is not just an historical survey. We will also explore poetic genres and poetic technique in the close reading of major works by such figures as Wordsworth, Keats, Browning, Dickinson, Whitman, Rossetti, Hopkins, Yeats, Frost, Eliot, Stevens, and Heaney.

Attributes: ACUP, ALC, AMST, ASLT.

ENGL 3518. The City in Literature. (4 Credits)

This course will explore the symbiotic relationship between cities and literature. How have cities been depicted in poetry, fiction, and other genres? How have urban landscapes and life shaped literary expression, as well as new literary collectives and movements? New York City will serve as one of our examples and sites of exploration, but other cities may also be examined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ALC.

ENGL 3519. The Novel. (4 Credits)

What are novels? This course will explore the novel’s development and its ever-changing, innovative form. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ALC.

ENGL 3520. How Fiction Works. (4 Credits)

This course will examine the formal elements of modern fiction by considering the author’s craft in relation to the reader’s experience. Exploring both classic novels and short stories by contemporary writers, it will consider how point of view, free indirect style, character, plot, details, language, and other aspects of fiction are used by writers to create stories we care about.

Attribute: ALC.

ENGL 3529. Theater and the Avant-Garde. (4 Credits)

‘Avant-garde’ was originally a French military term for the first line of battle, but in the late nineteenth century, it came to signify the radical new art movements cropping up with abundance throughout Europe and, later, the United States. Rejecting social and aesthetic norms, these movements called for artistic (and often political) revolution, and many seized on theater as the perfect place to make a scandal of their ideas. After the Second World War, the center of gravity for the avant-garde shifted from Europe to New York, where a new generation built on earlier innovations and sought to reflect new realities. But throughout the long twentieth century, avant-garde artists put forth wildly different views of theater and its role in society, and some rejected live performance all together. In this course, we will consider the twentieth-century avant-garde’s complicated relationship to theater and its potential configurations of politics, text and spectacle, and analyze theatrical experiments in the context of other art forms. We will read manifestos, plays and performance and anti-performance texts of all stripes, and attend several live art events. Assignments will include one practical theatrical project. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ENGL 3535. Modern Poetry. (4 Credits)

This course offers students an intensive survey of major thematic currents and formal experiments in British, Irish, and American verse from the late 19th century through World War II. Beginning with Gerard Manley Hopkins and Thomas Hardy, the course will devote central attention to the poetic development of W.B. Yeats, T.S. Eliot, and Wallace Stevens, while also exploring works by such major figures as Ezra Pound, H.D., Robert Frost, Wilfred Owen, William Carlos Williams, Marianne Moore, W.H. Auden, and Langston Hughes. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ALC, AMST, ASLT, COLI.
ENGL 3537. Satire, Sex, Style: The Age of Thomas Nashe. (4 Credits)
Considered for a long time to be a ‘minor’ Elizabethan writer with ‘nothing to say’, Thomas Nashe managed to produce a varied and astonishing, if ultimately costly and futile, body of work during the last decade of the sixteenth century, spanning erotica, picaresque fiction, and fierce invective, satire, and polemic. This course will offer a close look at Nashe’s unique rhetorical style in relation to the vivid literary culture of his times, focusing on how Nashe’s work pushes to the extreme various impulses in Elizabethan literature that tend to get overlooked in conventional accounts of the period. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD.

ENGL 3542. Modern Irish Literature. (4 Credits)
This course examines major modern Irish authors such as Yeats, Joyce, Synge, O’Casey and Beckett in terms of contemporary development in Irish culture. The Irish revival and the move to modernism and post modernism will be shown through the poets, playwrights and prose writers of the era. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, IRST, ISUE.

ENGL 3603. American Renaissance. (4 Credits)
Examination of US literature 1830-1860, with emphasis on individualism and social relations, national expansion, popular print culture, slavery, and the emergence of women's writing in relation to changing ideas of public and private. Authors may include: Emerson, Thoreau, Melville, Hawthorne, Whitman, Poe, Fuller, Stowe, Child, Douglass, Longfellow, Fern, Jacobs, Wells Brown. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT.

ENGL 3604. American Literature to 1870. (4 Credits)
We will look at the lively and surprisingly varied body of texts from the 17th century to 1870 as art, as social record and as representations of a mode of aspiration and experience that may well be uniquely American. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT, ENHD.

ENGL 3606. On the Road. (4 Credits)
This course introduces students to the trope of roads and road trips in modern literature. It starts from Kerouac’s seminal 1957 novel on the topic and examines its implicit assumption that the road trip is a masculine, mid-century, American phenomenon. By zeroing in on a wide range of texts—we will deliberately take a very broad approach—the course aims to challenge this assumption. Together, we will read road narratives by female (Didion) and postcolonial (Selvon) authors, as well as historicize the phenomenon by looking at the literature of pilgrimage (Chaucer) and the Grand Tour (Byron/Sterne) in the European tradition. The main focus of the course is road trips in literature, but attention is also paid to film (e.g., Godard’s “Pierrot le Fou” and Scott’s “Thelma & Louise”). Key concepts that are touched on throughout the semester include escapism, spatial politics and the frontier, social mobility, the Bildungsroman, and the imperial gaze. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3609. Feminism and American Poetry. (4 Credits)
This course addresses contemporary American women’s poetry and its relationship to recent feminist thought, specifically during and since ‘second-wave’ feminism (roughly 1968 to the present). What role has poetry played in the arena of feminist politics? How do different poets construct varying identities through poetic language, exploring differences of race, ethnicity, physical disability, and sexual orientation? How might we apply recent feminist theories of language and identity to contemporary women poets? In response to such questions, we will read feminist theory in relation to poetry, and poetry in dialogue with feminist theory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASLT, COLI, ENRJ, PLUR, WGSS.

ENGL 3611. Modern American Autobiography. (4 Credits)
After an acknowledgment of earlier memoirists such as Twain, Fitzgerald, Orwell and Baldwin, this course focuses on contemporary practitioners such as Joan Didion, Annie Dillard, Gerald Early, Kathryn Harrison, Mary Karr, Kate Simon, Alice Walker, Geoffrey Wolff, Tobias Wolff. Considerations include shifting notions of public and private, the construction of persona, and the impact of TV and radio on print, especially in regard to ‘voice’, self-disclosure, and pathology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT.

ENGL 3613. Modern American Novels. (4 Credits)
Modern American Novels will deal with the works of some of the major writers who rose to prominence in the period between 1920 and 1970. Novelists to be considered may include Hemingway, Faulkner, Fitzgerald, Nathanael West, Henry Miller, Steinbeck, Hurston, Bellow, Nabokov, Ishmael Reed, Kerouac, Joan Didion, Philip Roth, and Thomas Pynchon. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT.

ENGL 3617. American Short Story. (4 Credits)
Covers the development of the short story in America as it evolved through classicism, romanticism, realism, naturalism, and existentialism; with emphasis on recurring cultural issues: images of women, the Puritan heritage, the American Dream, American materialism, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASLT.

ENGL 3619. Crip, Queer and Critical Race Studies. (4 Credits)
This course will help students develop familiarity with work in the fields of crip, queer, and critical race studies. How does our thinking about identity, selfhood, and relationship change when we acknowledge that our selves are embodied—and that embodiment takes on a variety of forms? In addition to reading works of theory, we will also explore strategies for effectively engaging with critical discourses when analyzing literary works. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, DISA, ENRJ.
ENGL 3620. Ordinariness. (4 Credits)
The "ordinary": what is usual, customary, habitual, indistinct. In life, the ordinary blends into the background, unseen or unnoticed until something brings it to crisis. In fiction, however, where there is no background other than what description conjures, the ordinary is a carefully manufactured aspect or narration. The purpose of this course is to pay attention to some of the ways that realism, as a particular narrative subgenre, conjures ordinariness. We’ll consider the ways that realist fictions construct ordinary details (commodities, objects, settings, weather), ordinary actions (laboring, walking, falling in love), ordinary time (work days, boring dinners, long afternoons), and ordinary feelings (frustration, ennui, affection, resentment). Novelist will include Henry James, Theodore Dreiser, Frank Norris, and Stephen Crane; we’ll also read some theoretical work by Roland Barthes, Frederic Jameson, Lauren Berlant, and Kathleen Stewart. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT.
ENGL 3647. Seeing Stories: Reading Race and Graphic Narratives. (4 Credits)
This course reveals how American writers of color (Asian American, Native American, African American, Latinx, etc.) have transformed the genre of the graphic narrative to speak to issues of racial difference and social inequality. How do these authors both entertain us and push us to engage in rigorous, critical interpretations of their wildly fanciful texts? Some potential course selections include: Thi Bui's 'The Best We Could Do,' Kyle Baker's 'Nat Turner,' Mira Jacob's 'Good Talk,' Lila Quintero Weaver's 'Darkroom,' and Jonathan Nelson's 'The Wool of Joneys.' Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, ASLT, ENRJ.

ENGL 3648. Novels by Women. (4 Credits)
This course will begin in early 19th-century England and end in late 20th-century America. It will feature four novels by women (probably but not definitely Jane Austen, George Eliot, Zora Neale Hurston, and Toni Morrison), as well as a range of secondary materials. Our goal is to develop rigorous, historically sensitive, close readings of each novel. Among other things, we will pay special attention to problems of race, gender, and class. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENRJ, WGSS.

ENGL 3650. Stayin' Alive: Performing Blackness and Whiteness in 1970s US Film and Literature. (4 Credits)
Using texts—Hollywood and independent—as the primary texts, this course will introduce students to many of the debates surrounding the political and social climate of the U.S. in the 1970s marked by the increasing influence of identity politics, the Ethnic Revival, and black power. Using texts ranging from Sounder (1972) to Saturday Night Fever (1977), this interdisciplinary class will use film, media, and performance studies to consider the ways in which intersecting modes of identity develop and change across U.S. historical eras, particularly through the dissemination of media images. Ancillary reading will draw from autobiographies, journalism, history, and popular criticism. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AFAM, ALC, AMST, ASAM, ASLT, ENRJ, PLUR.

ENGL 3651. The Hunger Games and Survival Literature. (4 Credits)
How do people survive in extreme situations and societies? What can literature teach us about living with hardships and tragedies, extraordinary and ordinary? This course will examine Suzanne Collins' Hunger Games trilogy and also consider a broader tradition of survival literature, including but not limited to travel and adventure narratives; memoirs of war, genocide, and slavery; dystopian and sci-fi writing; and writing by and about the marginalized, including minorities, refugees, and others. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3652. New Wave Immigrant Literature. (4 Credits)
If the immigrant of the late 1800s and early 1900s valued assimilation, the post-1965 newcomer to America has forged a new cultural identity. This course will look at the attempts to situate oneself in America while maintaining a tie to one’s family’s country of origin in works by authors such as Amy Tan, Bharati Mukherjee, Gish Jen, Jamaica Kincaid, Edwidge Danticat, Cristina Garcia and others. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, ASLT, COLI, ENRJ, LAHA, LALS, PLUR, URST.

ENGL 3653. Major American Authors. (4 Credits)
This course provides an introduction to major American authors. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT.

ENGL 3658. Migrations/Movements/Masks. (4 Credits)
Working at the intersection of literary studies and performance studies, this course will use literature, film, drama, and music as primary texts of study to examine cultural production as a site of identity formation, cultural belonging, and embodied archive. This course asks a few questions: How do migrations—the crossing of borders, the restructuring of boundaries—impact identity? How does historical context render identity a fluid and malleable construct? How do the masks we don actually reveal aspects of American identity or identities as they simultaneously obscure? Texts will include works by James Baldwin, Zora Neale Hurston, F. Scott Fitzgerald, and Lynn Nottage, and films by Spike Lee and Barry Jenkins. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AFAM, ALC, AMST, ASAM, ASLT, ENRJ, LAHA, LALS.

ENGL 3659. Selfie Lit. (4 Credits)
Although we associate selfies with present-day technologies, writers have long been interested in trying to capture their outer and inner selves. In this course, we will examine confessions, autobiographies, memoirs, and other, related genres as we explore traditions of self-representation. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3660. Dystopian Environments. (4 Credits)
Why have dystopian environments become so prevalent in recent works of literature, film, art, and music? What is the history of the idea and representation of dystopia? This course will survey dystopian works, classic and new, and students will think about how they depict society, place, and human/non-human worlds. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.
ENGL 3661. Journeying and Storytelling. (4 Credits)
Why do journeys, quests, and other forms of travel form the basis of so many works of literature? What is the relationship between journeying and storytelling? This course will examine works ranging from Homer's 'Odyssey' to contemporary accounts of voyages, treks, and migrations, to think about connections between the exploration of space and the creation of narrative. How are stories about geographical discovery also stories about the discovery of the self? Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ALC.

ENGL 3664. Queer Latinx Literature. (4 Credits)
This course will introduce students to a range of queer Latinx literary projects, beginning with some helpful and significant theoretical frameworks and moving thematically through questions of queer space, queer crisis, and queer devotion. How do queer Latinx writers negotiate their relationship to the queer spaces of the border, the city, and the club? How does the AIDS crisis generate reflection on Latinx revolution, loss, and disability? How does queer Latinx devotion question our attachments to history, religion, and family? Through close readings of literary experiments in narrative fiction, autobiography, theory, film, and poetry, this course will ask students to think about how varieties of queer theory can be both a resource and a limitation in thinking about the complicated forms of representation in these texts. It will help students explore alternative ways to think and talk about Latinx sexuality, especially as it is inflected by questions about race, ethnicity, and nationality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, COLI, ENRJ, LAHA, LALS, PLUR, WGSS.

ENGL 3673. Postmodern Literature and Culture. (4 Credits)
Postmodernism marks the time and space after WW II; the globe has become the global market, producing wide ranging cultural and political effects. These effects are explored in various experimental novels by American writers including Philip K Dick, Pynchon, De Lillo, William S. Burroughs, and David Foster Wallace. The course will concentrate on a selection of novels that attempt to make sense of a world dominated by commodities and images in a time of endless war. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ALC, AMST, ASLT, COLI.

ENGL 3677. Latino/a US Literatures. (4 Credits)
An introduction to Latino-American literature. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, AMST, ASLT, LAHA, LALS.

ENGL 3683. Literature Beyond Borders. (4 Credits)
Borders hold a mythic place in the American imagination and serve as the setting for foundational genres of risk and excitement, including the Western and related tales of escape and rule-breaking. At the same time, borders are real places where rules about citizenship, identity, and belonging get enforced. How have authors and artists explored the contradictory space of the border, which can signal both freedom and constraint? How have they challenged established ideas about where borders should be and who belongs on either side of them? Case studies will include the U.S.-Mexico border in works like Gloria Anzaldúas Borderlands/La Frontera, Sam Peckinpah's The Wild Bunch, and Steven Soderbergh's Traffic; the Canadian border in The Handmaid's Tale; and borders within the U.S. in works like Tommy Orange's There There. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, ASLT, ENRJ, HCWL, HUST, PJST, PLUR.

ENGL 3691. Black Atlantic Literature: Imagining Freedom. (4 Credits)
The foci of this course is contemporary black literature across the African Diaspora. We will read literature written in the 21st century, and we will investigate the manner in which authors in various locales around the world creatively explore the meaning of black identity and freedom. Authors include: M. NourbeSe Philip, Zadie Smith, Chimamanda Adichie, Mat Johnson, and Helen Oyeyemi. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AFAM, ALC, AMST, ASLT, ENRJ.

ENGL 3695. Black Protest, Black Resistance, Black Freedom, Black Rage. (4 Credits)
This course will consider the canon of African-American literature through an expansive definition of protest. We will examine how the meaning of protest has evolved from the 18th century to the present. As we interrogate the relationship between blackness and protest, we will also discuss how that history has consistently shaped American identity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AFAM, ALC, AMST, ASLT, COLI, ENRJ.

ENGL 3701. American Writers in Paris. (4 Credits)
As a capital of modern Western culture, Paris has long been attractive to experimental artists from other countries, a home in exile to find supportive audiences, publishers, and collaborators. For American writers in the 20th century, this activity took place in roughly two movements: after WWI, the 'Lost Generation' of Hemingway, Fitzgerald, Stein, and others, and after WWII a circle of African American authors including Wright, Baldwin, and Himes. Through a selection of their works, as well as the art and music of the period, this course will explore the creative aims and cultural contexts of these two innovative groups. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, ASLT, COLI, INST, ISEU, ISIN.
ENGL 3702. American Naturalism. (4 Credits)
American Naturalism surveys some of the most uncompromising literature that U.S. writers have ever produced. Naturalism, an offshoot from the post 1865 turn toward realism in U.S. literature and art, has a generally harsher outlook characterized by deterministic surroundings and influenced by new developments in science, especially Darwinian evolution. Many naturalist writers were denounced in their own time as sordid and immoral, charges that we will explore and assess. Though mainly associated with the 1890-1910 period during which it flourished, American naturalism is not restricted to work produced between those dates. Naturalism continued to thrive after that era: this course ends with Wright's Native Son, a book that was published in 1940. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASLT.

ENGL 3802. Literature and Imperialism. (4 Credits)
This course explores key debates in the study of literature and in the history of imperialism. Attention will be paid to the importance of literary form and historical representation as well as the relation between the two. A major concern of the course will be to examine the problems posed for any study of culture by legacies of imperialism. Readings will likely include Joseph Conrad, Mahasweta Devi, Naruddin Farah, Rudyard Kipling, Salman Rushdie, Tayeb Salih, Olive Schreiner, and Pramoedya Ananta Toer. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENRJ, GLBL, INST, ISIN, PJST, PJWT.

ENGL 3803. Empire and Sexuality. (4 Credits)
For many years now, scholars have traced the intersections between gender and sexual identity formations and the modern exercise of state power. This course engages with these conversations through an attention to gender and sexuality as sites of power, subjection, and subject formation within racial, colonial, and imperial projects. Literary texts considered in the course situate sexuality as central to colonial and neocolonial rule as well as the forms of resistance that emerge from within it. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENRJ, GLBL.

ENGL 3834. History of the English Language. (4 Credits)
The subject of this course will be the history of English from the Old English period to the present day, and the range of varieties that are found throughout the world. We will study the visual forms English has taken from early runic engravings through medieval manuscripts to recent texts; the radical changes that have taken place in the structure of English over the centuries; the position of English as an ‘international’ language; variation in English grammar and pronunciation; how individual speakers vary their use of the language; and how far it is possible to speak of ‘good’ and ‘bad’ English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, MVLA, MVST.

ENGL 3836. Fiction Into Film. (4 Credits)
Cinematic adaptation of novels and short stories. Problems of narrative, genre, film language, imitation, etc., will be studied in the works of film makers such as Bresson, Merchant/Ivory, Antonioni, Wyler, Renoir, Lean, Bunuel, etc. Lab fee. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: COLI.

ENGL 3837. From Page to Screen. (4 Credits)
This course will explore film and TV adaptations of works of literature, including novels, poems, and plays. How does the process of adaptation work? What liberties are taken as texts are translated from page to screen? How does adaptation play with our notions of originality, imitation, and creativity? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ENGL 3840. The Classic Mystery. (4 Credits)
Literary and social evolution of the mystery genre from its 19th century origin in Poe, Collins and Doyle, to the 20th century development of ‘locked room’ and ‘hard-boiled’ forms, and more recently, the rise of the woman detective. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ENGL 3841. Contemporary Fiction. (4 Credits)
What makes contemporary fiction ‘contemporary’? How does it differ from pre-World War II fiction or so-called ‘modernist’ writing? This course explores the fundamental transformation of the way contemporaries see the world, dealing with writers as diverse as Kundera, Nabokov, Philip Roth, Pynchon, Ishmael Reed, Joan Didion, Marquez, Mishma, Robbe-Grillet, Patrick Suskind, Calvino and Vonnegut. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT, LAHA, LALS.

ENGL 3842. The Short Story. (4 Credits)
A fun and rigorous romp through great short stories, such as those by Poe, Hemingway, Atwood, and O’Connor. We will read and discuss a range of fabulous short fiction to find out how such narratives work and how they challenge our expectations about ourselves and the world around us. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3851. Horror and Madness in Fiction and Film. (4 Credits)
How and why do we respond to horror, madness and rage in film and literature? What are our reactions and responsibilities? Starting with the Alien series, the course moves to works by Stanley Kubrick, Steven Spielberg, Toni Morrison, Virginia Woolf, Sigmund Freud and Emmanuel Levinas, among others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI.
ENGL 3955. The Jazz Age: Literature and Culture. (4 Credits)
The 1920s era known as the Jazz Age is the subject of this course, which examines changes in the literature and culture of the period between World War I and the end of Prohibition in 1933. The class examines popular culture, politics, and economic change in these years through the lens of writers like Hemingway, Fitzgerald, Lewis, and Treadwell, as well as the writers of the Harlem Renaissance and the first wave of women's liberation. Sample topics include the Great Migration, World War I, urban transformations, consumerism, homosexuality, and the influence of jazz and blues in music. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, AMST.

ENGL 3916. Animals in Literature. (4 Credits)
An investigation of 19th-century writings on the 'animal mind' as a context for understanding such literary endeavors as Melville's 'Moby Dick' and Jack London's 'Call of the Wild'. Topics to be addressed include animal rights, animal/human relations, domestication, and animal language. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASLT, ENST, ESEJ, ESEL, ESHC.

ENGL 3917. Unreal City: Modernist London, 1900-1950. (4 Credits)
This course explores the rise and development of literary modernism in Britain, using London both as a location for study and as a living site for class excursions. Readings include works by James, Conrad, Woolf, Eliot, Lawrence, Freud, and Orwell. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

ENGL 3918. The Phenomenon of Oprah's Book Club. (4 Credits)
Before announcing the first selection for Oprah's Book Club 2.0, Oprah chose the popular English writer and social critic Charles Dickens as the last selected author of the original Oprah's Book Club (OBC). Oprah chose his work because several of her viewers are Dickens lovers, and she wanted to learn why this English author is beloved by so many; why his work has left such a lasting impression on the American public; and, most importantly, how literature can be used as a catalyst for social change. Focusing on works that depict England as a site of tourism, imperialism, and/or the transatlantic slave trade, this course will explore the phenomenon of OBC, thinking through its formation and rise as well as its strategies and approaches to selected texts. We will read the work of Charles Dickens alongside Maya Angelou's The Heart of a Woman (an autobiography that charts Angelou's move with her son from California to New York and later to London and Cairo with her new love) and Colson Whitehead's The Underground Railroad (a novel in which Whitehead comments briefly on Britain's role in the transatlantic slave trade and reimagines the Underground Railroad as a literal one, complete with engineers, conductors, and a secret network of tracks and tunnels). At times, we will read like Oprah, embracing innovative, multimedia approaches to reading and traveling to key sites mentioned in our selected texts. At other times, we will deviate from Oprah's approach and focus more on genre, form, theory, and literary and historical criticism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ENRJ.

ENGL 3922. Internship Seminar: Careers in English. (4 Credits)
Fordham's English majors in New York City enjoy numerous opportunities for Internships in fields like publishing, magazines, and TV and online media. Internships provide students with the chance to explore different avenues of potential professional development through hands-on experience. Previous English majors have pursued internships ranging from daily newspapers and television networks, to theater and arts organizations and public service and non-profits. The internship seminar allows students to gain a full elective's worth of credit for their internship work. The internship seminar meets once a week to discuss readings relating to on-site work in the field. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ENGL 3930. Introduction to Gay and Lesbian Literature. (4 Credits)
This course will read texts by a diverse range of Anglophone authors, emphasizing the cultural history of same-sex identity and desire, heteronormativity and oppression, and queer civil protest. It will also consider the problems of defining a queer literary canon, introduce the principles of queer theory, and interrogate the discursive boundaries between the political and personal. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, ASLT, COLI, WGSS.

ENGL 3943. Sociolinguistics. (4 Credits)
The course will introduce students to sociolinguistics, the study of languages as they are used by ordinary human beings to communicate with one another and to develop and maintain social relationships. Topics will include language variation and change, codes, speech communities, ethnography and gender. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ENGL 3964. Homelessness. (4 Credits)
This service learning course explores the literary representation--and lived experience--of homelessness. For the academic portion of the course, we will read a variety of books, including some (but not necessarily all) of the following: King Lear, The Interesting Narrative of the Life of Olaudah Equiano, The Wrongs of Woman, The Adventures of Huckleberry Finn, The Grapes of Wrath, When the Emperor Was Divine, and Voyage of the Sable Venus, as well as various essays and memoirs by and about homeless people. The service portion of the course will include meetings and discussions with homeless and formerly homeless people and at least 30 hours of volunteer work with a relevant service organization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ASLT, COLI, ENRJ, PJEC, PJST, PLUR.

ENGL 3965. Writer's Workshop 2. (4 Credits)
An intermediate workshop class for creative writing. For more information, go to the Fordham Intermediate/Advanced Creative Writing Workshops webpage. Pre-req: ENGL 3013 or ENGL 3014 or ENGL 3015 or ENGL 3016 or ENGL 3017 or ENGL 3018 or ENGL 3019 or by writing sample submission. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CVW.
Prerequisites: ENGL 3013 or ENGL 3014 or ENGL 3015 or ENGL 3016 or ENGL 3017 or ENGL 3018 or ENGL 3019.
ENGL 3996. Fiction Writing 2. (4 Credits)
An intermediate workshop class for fiction writing. For more information, go to the Fordham Intermediate/Advanced Creative Writing Workshops webpage. Pre-req: ENGL 3013. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CVW.

ENGL 3967. Creative Nonfiction Writing 2. (4 Credits)
An intermediate workshop class for creative nonfiction writing. For more information, go to the Fordham Intermediate/Advanced Creative Writing Workshops webpage. Pre-req: ENGL 3014 or by writing sample submission. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CVW.

ENGL 3968. Poetry Writing 2. (4 Credits)
An intermediate workshop class for poetry writing. For more information, go to the Fordham Intermediate/Advanced Creative Writing Workshops webpage. Pre-req: ENGL 3015 or by writing sample submission. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the student in lieu of an additional hour of formal instruction.
Attribute: CVW.

ENGL 3999. Tutorial. (3 Credits)
Independent research and readings with supervision from a faculty member.

ENGL 4005. The Medieval Traveler. (4 Credits)
This course follows the routes of pilgrims, crusaders, merchants, nobles and peasants as they charted a course for lands of promise and hope—often for prosperity. In Medieval Traveler, we will read selections from the diaries, chronicles, and historical literature written by and about travelers in the Middle Ages. We will begin and end with travelers who sought miracles, marvels, and new trading routes on the cusp of the known world. We will focus in particular on the practicalities of medieval travel, and well as the reasons for traveling: the sacred, the profane, and everything in between. This will be an interactive class, be prepared to discuss and debate issues of interest. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, ENRJ, GLBL, HIST, ICC, MVLI, MVST, OCST, REST.

ENGL 4006. Writing for Publication. (4 Credits)
See your name up in lights! Try your hand at getting published! Most publications rely on genres such as profiles, Q&As, essays, personal essays, and service pieces supplied by both staffers and freelancers, working in print or multimedia. In this course, you will learn how to assess publications and find those that might publish you; write persuasive ‘pitch’ letters (also known as queries) in which you propose article ideas; write and revise articles in a variety of genres; and learn how to use social media to promote your published work. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ENGL 4010. American Crime Stories. (4 Credits)
Crime narrative has long been a staple of American literature and culture, traversing both high, so-called literary, fiction and lowbrow popular efforts which were sometimes named for how much they cost (dime novels) or for the cheap, course paper they were printed on (pulp fiction). We’ll be reading a selection of crime stories ranging from the antebellum era to contemporary times, but the main focus will fall on the 1930s, 1940s and 1950s, the period when the distinctively American hard-boiled movie idiom. Authors include Dashiell Hammett, James Cain, Raymond Chandler and Patricia Highsmith. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT.

ENGL 4015. London Modernisms: 1915-1925; Parallels and Prospects. (4 Credits)
British literary modernism is associated with London and the post-war period of 1915-1925, and particularly with the ‘annus mirabilis’ of 1922, when many new literary works appeared in what was perceived as a new, ‘modern’ literary style. This course will focus on the nature of literary modernism in London the early 20th century and connect it to modernism in the early 21st century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ICC.

ENGL 4018. The Poet's Choice. (4 Credits)
'The Poet's Choice' offers a broad and occasionally irreverent survey of English poetry from canonical greats such as Shakespeare and Whitman to well-known contemporaries such as Seamus Heaney, Robert Hayden, Adrienne Rich and emerging young talents, such as Monica Youn, Terrance Hayes, and Brenda Shaughnessy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, ISEU.

ENGL 4031. Seminar: The Tempest. (4 Credits)
Since the publication of Shakespeare's The Tempest, writers from around the world have drawn inspiration from it. In particular, the play has become a touchstone for postcolonial writers from Latin America, Africa, and the Caribbean. This course will trace the complex and creative conversations that have taken place for 400 years between these writers and Shakespeare. It will also engage in a close reading of the play itself and situate it in the contexts of Shakespeare's day. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, ENRJ, ENSM.

ENGL 4032. Seminar: Joyce's Ulysses. (4 Credits)
This seminar undertakes an intensive, chapter by chapter reading of Joyce's serio-comic epic, Ulysses, in the context of literary modernism and in relation to several theoretical frameworks: psychoanalytic, reader-response, gender studies, deconstructive, and post-colonial. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ENSM.
ENGL 4033. Sound in U.S. Culture, History, and Literature. (4 Credits)

While people have long been interested in studying the sensory experiences of everyday life, music popular and otherwise, and the technologies that produce and reproduce sound, only recently has “sound studies” become a self-defined interdisciplinary field that has drawn in scholars from art history, film studies, history, literary studies, music history, and other fields. Over the course of the semester we will explore different ways in which such scholars have approached the study of sound, assess the value of various keywords they have used to interpret sound in the United States, and assemble an archive of primary sources—texts, sites, events, figures, and objects—that help us ask new questions about U.S. culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AMST, ASLT.

ENGL 4096. Hobbits/Heroes/Hubris. (4 Credits)

Culminating with Tolkien’s The Hobbit, this course will examine the male hero, with all his cultural, philosophical, and individual limitations. We will take a close look at the epic journeys of Gilgamesh, Jeremiah, Ahab, Beowulf, and the Hobbit. Pride and Prejudice will provide a domestic counterpoint and alternative view of male heroism. The course emphasizes writing and oral presentation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: EP4, VAL.

ENGL 4106. Seminar: The Great Depression: Literature and Culture. (4 Credits)

This course studies one of the deepest economic, social, and cultural crises in American history, from the 1929 stock market crash through 1941. We will be reading major American writers of fiction, poetry, and drama (to include, among others, Fitzgerald, Faulkner, Stevens, Odets, Hurston, Langston Hughes, and Richard Wright). But we will also attend to popular culture—newspapers, magazines, film, and radio. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, ASLT, ENSM.

ENGL 4107. Seminar: Ecology on the Edge: Climate Change and Literature. (4 Credits)

This seminar offers a reconsideration of literary studies from the perspective of climate change. Ranging from ancient to contemporary texts from across the anthropocene (in transhistorical, transcultural, and transecological perspective), the seminar will investigate the relevance of climate change for assessments of literary history conceived in the broadest of comparative senses. The seminar will explore the interrelation between literature and ecology simultaneously from two vantage points: on the one hand, by reading select contemporary works of literature and criticism that seek to confront the imminent consequences of climate change for our own times; and, on the other hand, by reading ancient and early modern texts to reconsider how literature has long imagined and has long been shaped by ecological crisis.

Attributes: ALC, COLI, ENSM, ENST, ESEI, ESHC.

ENGL 4108. Seminar: Exhibiting Latinidad: Curation/Display/Intervention. (4 Credits)

Museums have played critical roles in defining Latinidad for mass publics in the U.S. and abroad. In particular, curators and their exhibits can assume great power over our understandings of authenticity, cultural authority, and the historical “truth” about Latinx cultures. By retracing exhibition histories from classic shows like “Cuba-USA” and the “Decade Show” to the Getty’s “Pacific Standard Time LA/LA” initiative, we will confront the different material, textual, and visual dilemmas provoked by museums. We will also ponder alternative exhibition practices for Latinidad’s representation and remembrance in the future. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, ASAM, ASLT, ENRJ, ENSM, LALS.

ENGL 4113. Seminar: Writing Whiteness. (4 Credits)

‘As long as you think you are white, there’s no hope for you’ (James Baldwin). What could Baldwin have meant by such a provocative statement? This course will address the question by tracing the process by which some Americans have come to think of themselves as ‘white,’ a category defined both against their own ethnic and national origins and against racial ‘others.’ Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AMST, ASLT, ENRJ, ENSM.

ENGL 4116. Seminar: The Beat Generation and U.S. Culture. (4 Credits)

This course explores the literature of the post-1945 period in the U.S., focusing in particular on the Beat Generation. How do the period’s writers contest our common conceptions of the 1950s and ’60s as an idyllic period in U.S. history? How do their works refract tensions surrounding race, class, ethnicity, and sexuality that would erupt in the social movements of the 1960s and persist in modified forms today? In what ways do their works create alternative narratives of U.S. national identity, especially through road narratives that retrace and reinscribe traditional concepts such as Manifest Destiny? How do they engage with contemporaneous changes surrounding censorship, the Cold War, environmentalism, drug culture, feminism, gay liberation, and the black arts movement? Authors covered in the course may include Jack Kerouac, Allen Ginsberg, Lorraine Hansberry, Diane DiPrima, William Burroughs, Gary Snyder, Ken Kesey, Adrienne Rich, and Frank O’Hara, among others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ALC, AMST, ASLT, ENSM.

ENGL 4117. Seminar: Modern Geographies. (4 Credits)

This course will explore the ways shifting conceptions of space impacted modernist writing. Developments in technologies of communication and transportation enabled both people and ideas to move across space in new ways, challenging national identities and the relationship between the self and others. Much of the innovation we associate with literary modernism emerged in response to this increasingly globalized landscape. Our analysis of modernism and its spaces will include discussions of urbanism, public space, colonialism and post-colonialism, and expatriate and travel writing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, ENSM.

Updated: 07-27-2020
ENGL 4118. Seminar: Dickinson, Whitman, and Company. (4 Credits)
This course examines the poetry of Walt Whitman, Emily Dickinson, and their contemporaries. As we study the writings of Dickinson and Whitman across a variety of areas—love poems, poems about loss, poems about nature and art, historical and comic poems and religious poems—we will also link them to less familiar non-canonical poems from a variety of traditions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ENSM.

ENGL 4119. Seminar: God and Money in Early America. (4 Credits)
In Matthew, Jesus said “Ye cannot serve God and mammon,” that is, religion and wealth, at the same time. So how did American colonist reconcile their desires for salvation and prosperity? Did piety and profits always “jump together”? Reading both British and American literary text and recent scholarship in early American studies, this seminar will explore the language of spiritual and material wealth in colonial New England, the South, the West Indies, and the Mid-Atlantic. We will examine writing concerned with theology, morality, ethics, social class, economics, and economic self-making over the course of nearly two centuries — both on their own terms and in terms of how religion and economics shaped one another. Authors will include William Bradford, Anne Bradstreet, Mary Rowlandson, Jonathan Edwards, Benjamin Franklin, Phillis Wheatley, and Olaudah Equiano. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASLT, ENHD, ENSM.

ENGL 4120. Seminar: Milton. (4 Credits)
“Knowledge of good and evil, as two twins cleaving together, leaped forth into the world,” John Milton claims in Areopagitica, an essay advocating against censorship. How do we tell one from the other? This course follows Milton’s attempt to do the sorting through his major poetry and his political, social, and theological advocacy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, ENSM, REST.

ENGL 4121. New York City in Fiction. (4 Credits)
This course will explore both short stories and novels written in and about New York City during the 20th century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASLT, URST.

ENGL 4122. Seminar: Paris Modernism. (4 Credits)
When the autobiographical hero of James Joyce’s novel, “A Portrait of the Artist as a Young Man,” plots his escape from Dublin, it is to Paris that he plans to go. Paris is the city where he believes he will be able to live, write, think, and be free from the expectations governing his life at home. He was certainly not alone in imagining that Paris could provide a creative refuge. In the early part of the twentieth century, and particularly after World War I, writers, artists, and creative people of all kinds flocked to Paris, and together they forged the movement we now call “modernism.”

What was it about Paris that drew them, and what did they find there? In this course, we will study a range of works by expatriates including Joyce, Gertrude Stein, Ernest Hemingway, James Baldwin, George Orwell, and Walter Benjamin. We will consider them alongside contemporary developments in French literature, looking at works by authors including Colette, André Breton, Frantz Fanon, Jean Cocteau, Anaïs Nin, Marguerite Duras, and Simone de Beauvoir. While our primary focus will be on literature, we will also encounter performers like Josephine Baker and Edith Piaf, filmmakers like Marcel Carné and Agnès Varda, and visual artists like Picasso and Lee Miller. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENSM.

ENGL 4123. Seminar: Im/Possible Worlds: Race, Social Difference, and Pop Genres. (4 Credits)
This course will focus on popular genres and forms—including graphic narrative, young adult novels, and speculative fiction—that have often been dismissed as lowbrow or uncultured. We will reconsider them in light of their aesthetic complexity and political texture, including their treatment of racial and social differences and their use of such popular constructs as aliens, magical objects, vampires, and associated motifs and figures. Course selections may include: Gene Luen Yang’s American Born Chinese, Nidhi Chanani’s Pashmina, Nnedi Okorafor’s Binti, Cherie Dimaline’s The Marrow Thieves, and Silvia Moreno-Garcia’s Certain Dark Things. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENRJ, ENSM.

ENGL 4126. Ten Short Films About Morality. (4 Credits)
This seminar will focus on a close analysis of acclaimed Polish director Krzysztof Kieslowski’s cinematic masterpiece, The Decalogue (1988-89). The ten one-hour films of the series each examine the ambiguities of the Ten Commandments in the modern setting of late twentieth-century Poland. The films will be paired with substantial essays examining the “ten words” of the commandments from various religious, philosophical, and theoretical perspectives, as well as some key texts in critical and film theory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, ENGL, EP4, VAL.

ENGL 4127. Seminar: Novels By Women: Jane Austen to Toni Morrison. (4 Credits)
An intensive study of novels by Jane Austen, George Elliot, Virginia Woolf, Zora Neale Hurston, and Toni Morrison. Our reading will be supplemented by literary criticism and historical contextual material. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, ENSM, WGSS.
ENGL 4128. Seminar: Love and Sex in Early Modern Literature. (4 Credits)
Some things don’t change—but love and sex do. This class looks at the cultural history of sex and love in the early 1600s through the lens of early modern plays and poetry. We’re looking past Romeo and Juliet, to plays celebrating Bacchanalian excess, and poems lauding Italian dildos. The play texts aren’t easy reads, and we’ll examine historical sources as well. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, ENSM, WGSS.

ENGL 4135. Bible in English Poetry. (4 Credits)
This course studies some of the books of the Bible which have been most influential on English literature, together with English poetry and critical texts, from the Middle Ages to the present, which have been influenced by these biblical books. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMCS, ENHD, EP4, VAL.

ENGL 4137. Hysteria, Sexuality, and the Unconscious. (4 Credits)
This interdisciplinary seminar is sponsored by the Department of English and the Department of History. The seminar explores issues raised by hysteria, sexuality and the unconscious in turn of the twentieth-century western culture-topics that cross disciplinary boundaries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, BIOE, COLI, ENGL, HIST, ICC, INST, ISEU, ISIN, WGSS.

ENGL 4141. Death in the Middle Ages. (4 Credits)
This course will examine death culture, including rituals of death, the instructions for a good death, visual depictions of death, and the great theme of the afterlife. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, EP4, MVLI, MVST, VAL.

ENGL 4142. Contemplating the Cloisters. (4 Credits)
In this course, we study important texts, artworks, and musics of the late monastery through class meetings held both at Lincoln Center and the Cloisters Museum in Upper Manhattan, itself a patchwork of five European monastic houses and home to some of the world’s greatest medieval artworks, including the Unicorn Tapestries, the Merode Altarpiece, and the Belles Heures of Jean de Barry. As the heart of communal religious life in the Middle Ages, the cloister was an open space where the triple monastic duties of prayer, study, and work could be practiced and was a preeminent site of reading, reflection, and dialogue between some of the great thinkers of the day. Through our own reading, reflection, and lively dialogue, we will think critically across disciplines about medieval monastic lifeworlds, their practice, and their aesthetic productions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, ICC, MVAM, MVLI, MVST.

ENGL 4143. Shakespeare: Text and Performance. (4 Credits)
This course will study Shakespeare’s plays first as texts and then as performance, focusing on the literary/historical aspect of a play, and then the same play as a theatrical script for realization in a performance setting. Through close readings from these widely disparate points of view, we will try to grasp how the theater acts to engage audiences and create meanings, and how time and culture are expressed in both text and performance. We’ll investigate questions about adaptation, authorship, the status of “classic” texts and their variant forms, the transition from manuscript, book and stage to film and digitally inflected forms of media. Assignments will include readings, memorization, essays, and presentations. The final project can be an essay, the student’s short video of a Shakespeare excerpt, or a brief performance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, ICC.

ENGL 4144. Hamlet: Text and Performance. (4 Credits)
We will study Shakespeare’s _Hamlet_ as a historical/literary text and as a theatrical script. Through close readings from disparate points of view, we will encounter how the theatre acts to create meanings, and how time and culture are expressed in text and performance. Areas of study will include set design, costumes, film adaptations, literary rewritings, pop culture renditions, and references in music and advertising. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, ICC, THEA.

ENGL 4145. Dramaturgy. (4 Credits)
The word dramaturgy, ‘the art or technique of dramatic composition or theatrical representation,’ describes a series of practices that include aspects of playwriting, directing, and theatrical scholarship. This interdisciplinary seminar takes a capacious view of the practice of dramaturgy, approaching it as both a creative and a scholarly practice. As dramaturges, we will be literary and performance scholars, researching theater history, dramatic theory, and the broader cultural and historical contexts of our theatrical projects; we will also work as practitioners, collaborating with our peers to translate diverse texts into theatrical events. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, THEA.

ENGL 4146. The Body in Contemporary Women’s Literature and Art. (4 Credits)
How do we understand relationships among identity, gender, race, and the human body? How do recent women writers and artists explore this question? This course will examine visual art and writing since the 1980s that depicts—and seeks to understand—human embodiment, challenging the idea of a physical norm in order to expand how bodies (especially women’s) are represented and known. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ICC.
ENGL 4147. Food and Globalization. (4 Credits)
This course will examine scholarship on food and globalization from a range of disciplinary perspectives, including anthropological, sociological, historical, and literary. It will also examine the interdisciplinary fields of food studies and globalization studies to discuss the development of global exchange networks and their impact on consumer cultures and notions of identity in the united states and beyond. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESEL, ICC, INST, ISIN.

ENGL 4148. Medieval Drama in Performance. (4 Credits)
Divine mysteries and scurrilous scatology. Everyman’s workaday struggles and a king’s political quandaries, lavish one-night courtly entertainments and massive Biblical plays performed by an entire community; the drama of the English late Middle Ages (roughly 1350-1500) was resourceful, local, non-professional, and endlessly inventive. In this course, we study medieval English drama along three axes: as literary texts full of humor, pathos, and meaning; as evidence for historical performance practice and theater history; and as scripts brimming with possibility for performance. Combining intensive reading of medieval play texts with key works by important theater practitioners, we examine medieval drama on its own terms and ask what it means to read and perform these works in the 21st century. To help answer this question, students collaboratively design, direct, and stage a medieval dramatic work of their choosing as a final project. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, ICC, MVLI, MVST.

ENGL 4149. Modern Drama as Moral Crucible. (4 Credits)
The creators of modern drama made theater an arena for moral struggle and personal commitment. Plays by Buchner, Ibsen, Chekov and Shaw; relevant reading in history and philosophy. Senior values seminar. Literary Studies elective. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, EP4, INST, IRST, ISEU, ISLI, VAL, WGSS.

ENGL 4150. Race and Contemporary Film. (4 Credits)
This course examines contemporary cinema in an effort to understand the racial present. Drawing on theories and methods from sociology, anthropology, history, and literary theory, we will develop a provisional model of interdisciplinary cultural analysis that will help us better understand representations of race function in our own historical moment. At the same time, we will investigate exactly what constitutes “our own historical moment.” What is the historical present? How and why does it differ from one racial group to the next? And how do these competing racial temporalities affect present-day racial politics? With such questions in mind, we will conduct a series of case studies in racial representation. Each case will be organized around a recent film, and each film will be examined from a variety of disciplinary perspectives, with particular emphasis on how various academic disciplines both illuminate and obscure various aspects of the racial representation at hand. NOTE: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, ENRJ, ICC, PLUR.

ENGL 4151. Performing Medieval Drama. (4 Credits)
In the English late Middle Ages (roughly 1350-1500), theater was a thoroughly local affair. Performances spanned from one-night-only entertainments, acted by lavishly costumed noblemen for their peers, to massive cycles of city-specific religious plays, performed annually over a period of days by an entire community. Scurrilous scatology stood alongside the most divine of mysteries; the humble, menial struggles of Everyman had their place on stage just as much as the social and political quandaries of a king. In this course, we will study medieval English drama both as a body of literature and as a repository for medieval performance rhetorics we can experiment with in the present day. A series of assignments over the course of the semester will help us understand late medieval plays and their unique theatricality. The semester culminates with a collaboratively staged and publicly performed medieval drama of the student’s choosing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, MVLI, MVST.

ENGL 4152. The Tempest: Text and Performance. (4 Credits)
This course will study Shakespeare's play The Tempest as a historical/literary text and simultaneously as a theatrical script that we will act in the classroom, focusing on a single scene at a time. Through close readings from disparate points of view, we will investigate how the theatre acts to engage audiences and create meanings, and how time and culture are expressed in both text and performance. Students will read several adaptations of the play, as well as viewing film versions and adaptations such as Prospero’s Books. We'll investigate questions about adaptation, authorship, the status of a “classic” text and its variant forms, and the transition from manuscript to stage to film. Assignments will include readings, essays, and presentations. Quizzes will include regular exercises in blank verse, especially iambic pentameter. The final project can be a scholarly essay, the student’s short video of an excerpt from The Tempest, or a brief performance. No acting background is necessary. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, ICC, THEA.

ENGL 4172. Diverse Biologies/Shared Humanity. (4 Credits)
This course draws on readings and approaches from biology and literary studies to gain understanding of the diversity of human experience. Students will study the biological (genetic, metabolic, developmental, and neuronal) factors contributing to differences in human behavior, cognition, ability/disability, and appearance. Through the study of first-person narratives, poems, and other texts (including film), students will gain insight into the lived experiences of people they might not otherwise come to know, even as they deepen their appreciation of the interdependence of self and other. Through reflection on readings in literature and science, students will come to recognize more fully what these disciplinary approaches offer to understanding our place in the world and our responsibilities to one another. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, BESN, BIOE, COLI, DISA, ICC, PLUR.
ENGL 4184. Postwar American Literature and Culture. (4 Credits)
This interdisciplinary seminar analyzes cultural trends and counter-cultural movements of the post-WWII war era as represented in American literature and history. Topics include the Cold War and containment culture, the racial politics of suburbanization, the Beats and the counterculture, student radicalism, the civil rights struggle and Black Power, the anti-war movement, environmentalism, the sexual revolution, cultural conservatism, and questions of history, identity, and responsibility. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AMST, ASLT, COLI, ICC, LAHA, LALS.

ENGL 4185. Caribbean Islands and Oceans. (4 Credits)
Islands and oceans: these geographic features have defined both the history of the Caribbean and imaginative writing about it. Drawing on work by cultural geographers, historians, anthropologists, literary scholars, and others, this course will examine novels, poetry, travel narratives, essays and films about the Caribbean from 1492 to the present. As we read, we will think about how authors have used their metaphors of island and ocean not only to portray the Caribbean as a paradise but also to critique the devastation of its peoples and ecologies by the forces of empire and colonialism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AMST, ENHD, ENRJ, ICC, INST, ISLA, LAHA, LALS.

ENGL 4206. Comparative Studies in Revolution. (4 Credits)
This interdisciplinary capstone seminar engages students in a series of literary and historical studies of revolutionary (and counter-revolutionary) movements (e.g. the Haitian revolution of 1791, the Indian Rebellion of 1857, and the events of 1965 in Indonesia). Examining historical documents, works of fiction, literary theory and historiography, the seminar will investigate how the disciplines of history, literary criticism, and cultural studies more generally, seek to explain revolutionary historical change. Particular attention will be paid to the authority of textual evidence placed within interdisciplinary, cross-cultural, and multi-media contexts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, APPI, ASAM, ASHS, ASLT, COLI, ENRJ, GLBL, ICC, INST, ISIN, PJSJ, PJST.

ENGL 4207. Comparative Studies in Empire. (4 Credits)
This interdisciplinary capstone seminar will study the interrelation between different imperial formations (e.g. Roman, Ottoman, Mongol, British, Chinese, and American) and the various linguistic, literary, and cultural traditions that give them imaginative and historical shape. Attention will be paid to the importance of literary form and historical representation. Juxtaposing historical and fictional texts from different cultural and historical moments, the seminar will explore how these texts foreground problems of historical documentation and textual authority. The seminar will also study how these foundational problems, shared by the disciplines of history and literary criticism, are embodied in other media, notably music and film. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AMST, APPI, ASLT, ENRJ, ICC, IRST.

ENGL 4209. Literature of Peace and War. (4 Credits)
The decision to wage war is one of the most consequential moral choices we make. The struggle to achieve and maintain peace is one of the most challenging and abstract human goals. For all the ways that war and peace are tied up with politics, we can come to a better understanding of human experience of peace and war through art. This senior values seminar explores literary and cinematic representations of peace and war from Classical times to the present day. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AMST, ENST, EP4, ESEJ, ESEL, ESHC, VAL.

ENGL 4216. Animal Welfare in Literature and Culture. (4 Credits)
This course is an investigation of writings on the 'animal mind' and animal welfare. Topics to be addressed include animal rights, animal-human relations, domestication, and animal language. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AMST, ENST, EP4, ESEJ, ESEL, ESHC, VAL.

ENGL 4227. Black Literature and Film. (4 Credits)
From Malcolm X and Alex Haley's The Autobiography of Malcolm X (1965) to Sapphire's Push (1996), African American literature has inspired several film adaptations throughout the 20th and 21st centuries (like Spike Lee's Malcolm X [1992] and Lee Daniels' Precious [2009]). Indeed, the number of cinematic adaptations of African American literature suggests that there is not only a particular fascination with transforming literary works into films but also an abiding interest in seeing how a text will translate onto the big screen. In this course, students will analyze selected texts (such as Lorraine Hansberry's A Raisin in the Sun [1959], Alice Walker's The Color Purple [1982], and Terry McMillan's Waiting to Exhale [1992]) alongside their cinematic counterparts (such as Daniel Petrie's A Raisin in the Sun [1961], Steven Spielberg's The Color Purple [1985], and Forest Whitaker's Waiting to Exhale [1995]) to discuss how literary and filmic texts measure up on their own worth, as well as to examine how these texts mutually inform one another, particularly in the ways that they become remembered in the American cultural imagination. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AFAM, AMST, ENRJ, ICC, PJRC, PJST, PLUR.

ENGL 4236. Seminar: Latin American Short Story. (4 Credits)
This interdisciplinary capstone seminar will study the short story and novella forms in order to explore as fully as possible the full range of Latin American literature. This course will focus on the short story and novella forms in order to explore as fully as possible the full range of Latin American and Latino literature. Literary geographies will include Mexico, the Caribbean, Central & South America, with special sections on Cuba, Argentina, Chile and Brazil. All readings will be in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ALC, AMST, ASLT, COLI, ENSM, LALS.
ENGL 4246. Media, Disability, Futurity. (4 Credits)
This interdisciplinary capstone course explores the theme of futurity through the lenses of media studies, disability studies, and narrative studies. Futurity is not just the stuff of science fiction, but is rather an integrated part of the rhetoric we use when imagining the kind of world we want to build. Media and other digital technologies are often a part of this narrative imagining, and with those tools we often imagine which bodies we might repair, represent, or rebuild. Using a variety of interpretive and analytical methods, students will ask what futures are available to which bodies and why; how bodies are figured as legibly human, and how dominant narratives enable or foreclose the full expression of a range of embodiments. The object of analysis is simultaneously representative, linguistic, narrative or historical: this course argues that any critical examination of embodiment necessarily touches upon not only key cultural studies categories such as race, class, gender and sexuality, but also upon the question of technology’s relationship to the body and its narrative figuring of health and flourishing. Students will finish the course with a nuanced understanding of how contemporary texts both visual and linguistic determine a shared cultural imagining of a better world, and how we might work to craft that image in a more inclusive and socially just way. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, COMC, DISA, ENRJ, ICC.

ENGL 4318. Seminar: Early Women Novelists. (4 Credits)
A study of the rise of female authors in eighteenth-century England. We will address problems of gender, race and class, as well as the basic literary and historical dimensions of each text we read. Authors will likely include Aphra Behn, Eliza Haywood, Frances Burney, Mary Wollstonecraft, Ann Radcliffe, Jane Austen, and Charlotte or Emily Brontë. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENHD, ENSM, WGSS.

ENGL 4370. Disgust in Literature and Psychology. (4 Credits)
This course will analyze disgust in literature (and related disciplines) and in psychology as primary emotion that exists in every culture. We will study fiction, poetry, and film—and also psychological research, as we explore what it means to be disgusted, and why we are motivated to read and view things that provoke disgust. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ASLT, ICC.

ENGL 4401. Seminar: The Brontës in Context. (4 Credits)
Students will study novels by the three Brontë sisters—Charlotte, Emily, and Anne—in the context of social and cultural developments in 19th-century England. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENSM.

ENGL 4403. Extraordinary Bodies. (4 Credits)
From freak shows to the Americans with Disabilities Act, people with non-normative bodies have received special, and not always welcome, attention from their peers. This course will study the experience of people with anomalous bodies from a variety of personal and social perspectives. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASLT, COLI, DISA, EP4, VAL, WGSS.

ENGL 4408. Seminar: Romantic Revolutions. (4 Credits)
The Romantic era was punctuated by revolutions and uprisings in America, France, Haiti, and elsewhere. We will ask how an atmosphere of rebellion and a counter-spirit of repression informed the period’s literary culture, with an intensive study of writers including William Blake, Mary Wollstonecraft, Olaudah Equiano, William Wordsworth, S. T. Coleridge, Lord Byron, P. B. Shelley, and Mary Shelley. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, ENSM.

ENGL 4420. Ethics and Intelligence. (4 Credits)
This seminar will engage students in an intensive examination of the history, literature, and ethics of secret intelligence. Tracing the historical emergence of contemporary intelligence agencies from the early modern period up to the present, and with special attention to literary works from contrasting cultural traditions, the seminar will focus on three areas of expertise that have historically shaped articulation and administration of both clandestine and public intelligence and information: the work of translators, the work of missionaries, and the work of government agencies.
Attributes: EP4, VAL.

ENGL 4421. Disability, Literature, Culture: Neurological, Mental, and Cognitive Difference In Culture & Context. (4 Credits)
Disability studies, the central focus of this course, is an inherently interdisciplinary field. Drawing particularly on two of its constituent disciplines, literature and sociology, this course will explore the questions and problems raised by neurological, mental and cognitive disabilities, as they relate to identity, community, and belonging. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, COLI, DISA, ENRJ, ICC.

ENGL 4425. Seminar: Nathaniel Hawthorne. (4 Credits)
This course will explore the writing, life, and social world of Nathaniel Hawthorne. Paying particular attention to questions of literary form, history, national, trans-national, racial, and gender politics, we will read The Scarlet Letter, The House of the Seven Gables, The Blithedale Romance, The Marble Faun, and a selection of his tales. We will also consider Hawthorne’s shifting role in the history of American literary criticism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, ASLT, ENSM.
ENGL 4490. British Literature, History, and Culture of the Great War. (4 Credits)
Focusing upon poetry, fiction, drama and memoir written between 1910 and 1925, this interdisciplinary course explores the historical, cultural and aesthetic impact of World War I. Literary works are paired with historical readings, early silent film, popular music and medical discourses. Using London and Great Britain as texts, the course features field trips to several important archives, including the The Imperial War Museum in London and Craiglockhart War Hospital near Edinburgh. Major modernist writers treated in the course include Thomas Hardy, G.B. Shaw, W.B Yeats, Rudyard Kipling, Wilfred Owen, T.S. Eliot, D.H. Lawrence, Virginia Woolf, Robert Graves, Ford Madox Ford and Rebecca West. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ENRJ, CVW.

ENGL 4603. Asian American Critique. (4 Credits)
This capstone course explores canonical and cutting-edge research in the interdisciplinary field of Asian American Studies. Examining the field's interventions in disciplines such as history, sociology, media studies, and literary studies, we will discover how Asian Americanists have enunciated a distinct set of themes, methods, analyses, historical narratives, and ethico-political projects. Topics may include Asian American critiques of racial capitalism; neoliberalism; biopolitics; environmental devastation; human-animal relations; contemporary aesthetic categories; the Asian Century; and the intersections of race, class, gender, sexuality, and ability. This course fulfills the ICC and pluralism requirements of the common core. Previous exposure to ENGL 3356, "Approaches to Asian American Studies," or ENGL 3359, "Asian Diasporic Literature," is encouraged but not required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, COLI, ENRJ, ICC, INST, ISAS, PLUR.

ENGL 4604. Seminar. Jazz Age, Literature, and Culture. (4 Credits)
The glamour and glitz of the 1920s era known as 'The Jazz Age' are the subject of this course, which examines changes in the literature and culture of the period between World War I and the end of Prohibition in 1933. The class examines popular culture, politics, and economic change in these years, through the lens of writers like Hemingway, Fitzgerald, and Faulkner, as well as the writers of the Harlem Renaissance and the first wave of women's liberation. Sample topics include the Great Migration, World War I, the New Negro, the rise of the Ku Klux Klan, urban transformations, consumerism, homosexuality, and the influence of jazz and blues music. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ENSM.

ENGL 4606. Seminar. James Baldwin. (4 Credits)
An overview of Baldwin's three-and-a-half decade literary career (1953-1987), considering novels, essays, short stories, and television appearances. Themes will include race, politics, activism, sexuality, national identity, violence, love, and truth. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAM, ENRJ, ENSM.

ENGL 4701. Writer's Workshop 3. (4 Credits)
An advanced workshop class for creative writing. Admission by writing sample submission only. For more information, go to the Fordham Intermediate/Advanced Creative Writing Workshops webpage. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CVW.

ENGL 4702. Fiction Writing 3. (4 Credits)
An advanced workshop class for fiction writing. Admission by writing sample submission only. For more information, go to the Fordham Intermediate/Advanced Creative Writing Workshops webpage. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CVW.

ENGL 4703. Creative Nonfiction Writing 3. (4 Credits)
An advanced workshop class for creative nonfiction writing. Admission by writing sample submission only. For more information, go to the Fordham Intermediate/Advanced Creative Writing Workshops webpage. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CVW.

ENGL 4704. Poetry Writing 3. (4 Credits)
An advanced workshop class for poetry writing. Admission by writing sample submission only. For more information, go to the Fordham Intermediate/Advanced Creative Writing Workshops webpage. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CVW.

ENGL 4705. Creative Writing Capstone. (4 Credits)
This Capstone course is the exit requirement for English Majors concentrating in Creative Writing. Students will work on comprehensive creative and scholarly portfolios and a collaborative creative writing public exhibition project. The principal aim of the Capstone is to introduce our graduating students to the realities of the writer's life, which necessarily involves not just individual work but also affiliation, cooperation, and community. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CVW.

ENGL 4998. English Honors Thesis Tutorial. (4 Credits)
Seniors with a 3.6 GPA or higher in English who wish to complete an ambitious project under the individual direction of a faculty member should register for this course. Discuss this option with the Associate Chair in the term prior to the semester in which the thesis will be completed, and then choose a member of the faculty as an advisor for the thesis. The professor advising the project will set up parameters and deadlines at his/her discretion. At the end of the semester, there will be an honors defense with the advisor and one departmental reader.

ENGL 4999. Tutorial. (4 Credits)
Supervised individual study projects.
ENGL 5001. Pro.Sem: Res.methods Engl. (3 Credits)
An introduction to English studies at the graduate level, emphasizing bibliography, scholarly writing, and critical intervention. Although the emphasis of the course will vary according to the aims of the instructor, areas covered may also include book history, textual editing, historical research, and other issues of professional concern to graduate students. All incoming doctoral students must take this course during the fall semester of their first year.
Attribute: ENGT.

ENGL 5002. Critical Theory. (3 Credits)
A representative but not inclusive sampling of key theoretical studies from roughly the past seventy-five years. After reading a series of now classic essays to lay a foundation, the course will consider closely the writings of a small number of influential thinkers, possibly including Walter Benjamin, Jacques Derrida, Judith Butler, and Slavoj Žižek, among others.
Attribute: ENGT.

ENGL 5018. Modern American Drama. (3 Credits)
A survey of major American plays from the early 20th century to the present, examined alongside contemporary scholarly debates in theater and performance studies. Topics of study will include theater and media, theories of spectatorship, ideologies of acting, performance as work and the performance of work, liveness and authenticity, and representations of difference. Playwrights studied will include (but not be limited to) Zora Neale Hurston, Gertrude Stein, Thornton Wilder, Tennessee Williams, Arthur Miller, Adrienne Kennedy, David Mamet, Suzan-Lori Parks, Young Jean Lee, Richard Maxwell, Annie Baker, and Jackie Sibblies Drury.
Attribute: ENGT.

ENGL 5019. Staging Blackness: Black Drama and the African American Literary Tradition. (3 Credits)
A literary, historical, and performance-oriented exploration of African American literature.
Attributes: ENG3, ENGD.

ENGL 5020. Fear on the Homefront: The Literature of Peace and War. (3 Credits)
The decision to wage war is one of the most consequential moral choices we make. The struggle to achieve and maintain peace is one of the most challenging and abstract human goals. For all the ways that war and peace are tied up with politics, we can come to a better understanding of our human experience of peace and war through art. This seminar explores literary and cinematic representations of peace and war from Classical times to the present day. We look at war stories and the special case of civil war, as well as the more recent phenomenon of fear on the homefront. We end with a unit on pacifism and peace work. In every unit, we will read nonfiction sources highlighting ethical and moral ideas about war (by Abraham Lincoln, Simone Weil, Jean Bethke Elshtain, Michael Walzer and others). Authors include Homer, Shakespeare, Virginia Woolf, Vera Brittain, and many others.
Attribute: PJST.

ENGL 5021. Modernism, Cinema, and Literature: Edison to Cuaron. (3 Credits)
Without cinema, perhaps there would have been no artistic movement known as "Modernism." This course investigates this premise through the study of a range of films, theoretical texts, and literary works that shed light on a mutual influence: that of cinema on the development of modernist literature, and that of literature on the development of the art of film, from the late 19th century through the modernist period and into the present. We will study the works of filmmakers Georges Méliès, Charlie Chaplin, Sergei Eisenstein, Luis Buñuel, John Ford, Orson Welles, Wu Yonggang, Maya Deren, Satyajit Ray, Wong Kar-wai, Ágnès Varda, and others. Readings will include key works of film history and theory on concepts such as montage, Surrealism, melodrama, and film noir. At each stage, we will consider modernist cinematic aesthetics in relation to literary works such as Henry James’s The Turn of the Screw and T.S. Eliot’s The Waste Land.
Attributes: ENAE, ENAL, ENG3, ENGD.

ENGL 5022. Shakespeare's History Plays. (3 Credits)
Shakespeare's first great hit was a series of history plays about the kings who ruled, and the wars they waged, a century and more before his birth. The eight plays produced (Harry Potter-style) over the course of eight years, gave London audiences then-and-will give us now-a chance to watch Shakespeare becoming Shakespeare: to see him learn how to pack plays with a pleasure, impact, and amazement, a scene by scene and line by line, with a density and intensity no playwright before or since has ever managed to match.
Attributes: ENBE, ENG2.

ENGL 5023. The Phenomenon of Oprah's Book Club. (3 Credits)
Since its inception in September 1996, Oprah’s Book Club (OBC) has transformed the literary landscape—from ushering in a new wave of enthusiastic readers and spiking the sale of books around the globe to reshaping the advertising and marketing of literature and offering readers strategies for engaging it. This course will explore the phenomenon of OBC, thinking through its formation and rise as well as its strategies and approaches to literature. We will tackle these matters as we examine closely themes of racial beauty, sexual assault, racism, imprisonment, disability, and politics in OBC-selected texts, such as Toni Morrison's The Bluest Eye, Ernest Gaines’s A Lesson Before Dying, and Michelle Obama's Becoming.
Attributes: ENG3, ENGD.

ENGL 5024. Global Postmodernisms. (3 Credits)
A survey of literary development in postmodernity and global literary studies.
Attributes: ENAL, ENBL, ENG3, ENGD.

ENGL 5030. Feminism and American Poetry. (3 Credits)
This course will address mid- through late-twentieth century poetry by women in relation to second-wave feminism, feminist theories, and queer theories. The writing and publishing of women's poetry played an important role in second-wave feminism, often serving as the artistic arm of the movement, assuming identity politics as its governing principle. We will first examine women poets of the feminist and black arts movements who developed a series of radical new poetics to "embody" gender and racial identities. We will then discuss the ways that poets and theorists since that time have challenged the tenets of identity politics and, accordingly, pushed poetics into new terrains in search of diverse groundings for politics and aesthetics alike. Figures discussed may include Adrienne Rich, Sonia Sanchez, Audre Lorde, Gloria Anzaldúa, Sandra María Esteves, Theresa Hak Kyung Cha, Kathleen Fraser, Harryette Mullen, and others.
Attributes: ENAL, ENG3.
ENGL 5104. Natural History and Ecology. (3 Credits)
This course will examine the genre of natural history, which flourished in the seventeenth and eighteenth centuries, especially as Europeans engaged in ambitious projects of empire-building that brought them into contact with thousands of new plants and animals. Prior to the development of anthropology as a distinct discipline, natural histories also included within their purview the description of non-European peoples. We will think about how natural histories portrayed environments and the relationship between human and non-human actors. We will also read recent works from the fields of ecocriticism and ecology to think about the meaning and value of studying natural history today.
Attributes: ENGL, MVSG.

ENGL 5106. Early American Novel. (3 Credits)
This course will explore novels about America and Americans in the Atlantic world published during the long eighteenth century, including works by Behn, Defoe, Winfield, Rowson, Imlay, Foster, Tyler, Brown, Tenney, and Sansay. By considering a range of contexts, including the British tradition of picaresque and sentimental fiction, the theory of the novel (Lukacs, Watt, McKeon), and theories of Atlantic culture (Roach, Gilroy, Dayan), it will explore the history of the early American novel in terms of race, slavery, commerce, migration, mobility, and the many contingencies of colonialism, in the Americas.
Attributes: ENGL, ENG3, ENG4.

ENGL 5109. African American Literature. (3 Credits)
A survey of African American literature from the Jazz-age to the present.
Attributes: ENAE, ENAL, ENG3, ENG9.

ENGL 5110. Queer Renaissance. (3 Credits)
This seminar will explore the intersections between early modern studies and queer theory, focusing on three key issues: the charged relations between queer theory and other critical frameworks such as psychoanalysis, feminism, and poststructuralism; the ongoing role of historicism in shaping major debates and conversations in the field; and the place of aesthetics, genre, and form in early modern and contemporary treatments of eroticism. Writers to be discussed will likely include Spenser, Shakespeare, Sidney, Marlowe, Nashe, Crashaw, and Philips, alongside Foucault, Sedgwick, Butler, Lacan, Bataille, Edelman, and others.

ENGL 5111. Race, Religion, and Monstrosity in Medieval Literature. (3 Credits)
The medieval taste for the exotic has introduced many audiences to a range of monstrous beings, from ferocious giants and dog-headed men to the peace-loving sciapod. Medieval studies of monstrosity have often been linked solely to theorize the different human ‘races’ found there. Yet the medieval language of monstrosity was not always limited to travel narrative, nor to the pejorative, for it was used to describe heroes, saints, even the Christian deity in far more familiar contexts than many would imagine. In this course we will examine the discourse of monstrosity as a complex critical lens through which premodern writers asked important questions of race, religion, civic virtue, and human morality. We will read from Pliny, Augustine, the Beowulf Manuscript, medieval romance, and Mandeville’s account.
Attributes: ENG1, ENME, MVSG.

ENGL 5112. Medieval Time Travel. (3 Credits)
This graduate course asks how theories of time can help us approach medieval literature in unexpected and exciting new ways.
Attributes: ENG1, MVSG.

ENGL 5115. Graduate Internship Seminar. (3 Credits)
Seminar designed for graduate students engaged in a professionally relevant internship during the semester that the seminar is offered.

ENGL 5116. African American Fiction. (3 Credits)
A study of twentieth and twenty-first century African American novels.
Attributes: ENAL, ENG3.

ENGL 5120. Im/possible Worlds: Race, Social Difference, Speculative Fiction, and American Writers of Color. (3 Credits)
This course will focus on speculative fiction (penned by North American writers of color)—potentially including popular genres such as graphic narrative and young adult novels—that have often been dismissed as lowbrow or uncultured. We will reconsider them in light of their aesthetic complexity, political texture, racial and social differences, and popular constructs such as aliens, magical objects, vampires, and associated motifs and figures. Course selections may include Gene Luen Yang’s ‘American Born Chinese,’ Nidhi Chanani’s ‘Pashmina,’ Nnedi Okorafor’s ‘Binti,’ Cherie Dimaline’s ‘The Marrow Thieves,’ and Silvia Moreno-Garcia’s ‘Certain Dark Things.’
Attributes: ENG3, ENG9.

ENGL 5141. African American Autobiography. (3 Credits)
This course explores how Black writers use their lived experiences to shape political discourses and to interrogate the intersections of race, gender, class, sexuality, and disability. Considering slave narratives, memoirs, personal essays, and lyrics alongside conventional autobiographies, this class examines how and why Black writers have chosen to write their own stories as well as what is at stake in their autobiographical writings. Some writers may include William and Ellen Craft, W. E. B. Du Bois, James Weldon Johnson, James Baldwin, Maya Angelou, Claudia Rankine, Janet Mock, and Ta-Nehisi Coates.
Attributes: ENAE, ENAL, ENG3, ENG9.

ENGL 5151. Master Class: Writing. (3 to 4 Credits)

ENGL 5157. Master Class: Writers as Shapers: The Short Story. (3 Credits)
A short story can be constructed in an unlimited number of ways and each week we will explore the formal possibilities that are available to us. We will study the choices we have as writers—of narrative point of view, character development, beginnings, dialogue, description, structure, pacing, plot and resolution. We will isolate and inspect strategies that published authors have used. Students will produce and workshop their own fiction from exercises. In the conversation between student writing and the studied literature we will hopefully arrive at a greater sense of writers as shapers, sculptors of the raw material of the story.
Attribute: CVWG.

ENGL 5180. Anthologizing Poetry in the Middle Ages. (3 Credits)
This course surveys important medieval poetry collections in several different languages in order to explore the shifting relationships between poetic expression, verse collection, and book production during the Middle Ages. How and why did medieval people collect poetry, and how should manuscript context guide our interpretation of individual works? Some tuition in Middle English will provided; translations will be available for literature in Old English, Latin, French, Welsh, and Occitan.
ENGL 5193. Master Class: Stuff of Fiction. (3 Credits)

"The proper stuff of fiction' does not exist," Virginia Woolf declared in an essay called "Modern Fiction": “everything is the proper stuff of fiction, every feeling, every thought; every quality of brain and spirit is drawn upon; no perception comes amiss." In this workshop we will explore the process of transforming imaginative musings and life experience into fiction, looking particularly at how memory and place can serve as points of departure. We'll examine how the details of everyday life can be transformed imaginatively into fiction through the use of character, setting, and dialogue. Along the way, we will stop to examine various aspects of craft such as theme, style, plot, and pacing in students' own writings as well as in selected readings.

Attribute: CVWG.

ENGL 5208. The English Language 1154-1776. (3 Credits)

This course will deal with the linguistics and sociolinguistics of Middle English and Early Modern English. The beginning date, 1154, is the year of the last entry in the Anglo-Saxon Chronicle and the year Henry II, the first Angevin king, ascended to the throne. It is as good a date as any to mark the demise of Old English and the beginning of the Middle English period. 1776, the year of the American Declaration of Independence, marks another turning point, when Early Modern English began to become the English(es) of the present day. This course, which will examine the ways in which the language developed from the twelfth through the eighteenth centuries. Topics will include dialects and standardizations, lexicon, grammar, and syntax, phonological change (The Great Vowel Shift), stress and prosody, paleography and codicology of Middle English manuscripts, and early printing, all with an aim to better understand and appreciating the literature of these periods.

Attributes: ENGL, ENME, MVSG.

ENGL 5210. Intro Old Norse Lang & Lit. (3 Credits)

The course will begin with an introduction to Old Norse language, using E.V. Gordon's Introduction to Old Norse, and as students become comfortable with the language, we will read a selection of representative works from a variety of genres: historical prose, saga prose, and hagiography, as well as eddic poetry (wisdom, myth, legend) and the encomiastic poetry of the skalds. Readings will be partly in Old Norse, partly in translation. We will attempt to situate the texts in their medieval cultural context (analogues in English, French, German, and Latin literature), and we will spend some time on Old Norse paleography and codicology so that students can better appreciate their material context. There is no prior required coursework for the course and no prior knowledge is assumed, but students should be aware that the course will involve language study.

Attributes: ENGL, ENME, MVSG.

ENGL 5211. Introduction to Old English Language and Literature. (3 Credits)

This course is an introduction to Old English (Anglo-Saxon) language and literature. Old English was the language of England from the 7th to the 12th centuries, the language in which Beowulf was composed. We will read a representative selection of Anglo-Saxon prose and poetry in the original language, including The Anglo-Saxon Chronicle, works by King Alfred and Bede, The Battle of Maldon, The Wanderer, The Seafarer, The Wife's Lament, and The Dream of the Rood. Students will be introduced to Anglo-Saxon paleography so that they can read the texts from medieval manuscripts as well as from printed editions.

Attributes: ENGL, ENME, MVSG.

ENGL 5212. Asian Diasporic Literature. (3 Credits)

This course will introduce students to major works of contemporary Asian American literature. Possible authors include John Okada, Carlos Bulosan, Maxine Hong Kingston, Theresa Hak Kyung Cha, Chang-rae Lee, Li-Young Lee, Gish Jen, Jessica Hagedorn, Lois Ann Yamanaka, Jhumpa Lahiri, Marilyn Chin, and many others.

Attributes: ENGL, ENME.

ENGL 5215. Dissent, Devotion, and Drama in Medieval England: East Anglia. (3 Credits)

England's flat eastern edge, a day's trip from the Low Countries, was a center for the period's most troubling heresy, Lollardy; for its most remarkable female visionaries, Margery Kempe and Julian of Norwich; and for a school of theater quite different from York's northern three-day civic pageants. In this study of regional culture we will look at the development of lay rather than monastic forms of spirituality; at the related rise of mercantilism in this wealthy cloth-producing region; at the possible evolution of an anti-hierarchical position of resistance; at the interest in particular saints like St. Anne and Mary Magdalene; and at the role of women in theology and theater. Besides portions of Margery Kempe's Book and Julian's Showings, we will read some of the following plays: Castle of Perseverance, Mankind, Croxton Play of the Sacrament, Digby Mary Magdalene, and the Mary play, and we will discuss the records of Lollard belief found in trial records.

Attribute: ENGL1.

ENGL 5216. Three Medieval Embodiments. (3 Credits)

In this course, we will explore three models of human embodiment (theological, medical, and musical) available to the high and late English Middle Ages; we will examine how writers, doctors, artists, and musicians gave expression to those models; we will locate and interrogate the places they overlap, interweave, and fall apart; and we will challenge ourselves to imagine how they constituted alternative modes of embodied experience in the world. To reach these goals, we will cast a wide net and study diverse primary sources drawn from philosophy, medicine, theology, drama, poetry, music, and visual art alongside secondary sources in historical phenomenology, cultural studies, and performance theory. Major authors/texts include: Bernardus Silvestris (Cosmographia), Chaucer, Second Shephard's Play, Aristotle (De anima), The Troota, Boethius (Consolatiophilosophiae and De institutione musica). All readings in English or Middle English.

Attributes: ENGL1, ENME.

ENGL 5225. Jane Austen in Context. (3 Credits)

In this course we will read all of Jane Austen's major novels. There are three central goals. The first one is simply to enjoy Austen's writing (as unsophisticated as that may sound). The second is to consider the historical contexts (political, social and economic) that helped shape her prose. And the third is to survey and analyze some of the recent trends in Austen scholarship, which will, ideally, aid you in developing your own critical skills.

Attributes: ENBE, ENBL, ENG2.
ENGL 5226. Langland’s Piers Plowman and the Poetry of Social Justice in the Late Medieval England. (3 Credits)

William Langland’s dream-vision poem, Piers Plowman, composed, like Chaucer’s works, in late fourteenth-century London, treats many of the things Chaucer skirts or omits. Langland’s accounts of social unrest, some forms of religious argument and conflict, policy and practices regarding poverty, and his critique of social structures and experimentation with alternatives gives us a different Middle Ages from Chaucer’s more court-centered writing. This course will put reading Piers Plowman, arguably the greatest single medieval English poem, at its center, while paying due attention to its context in other texts and in the poem’s surrounding world.

Attributes: ENG1.

ENGL 5230. Richard Rolle and His Influence. (3 Credits)

A study of the early fourteenth century writer Richard Rolle and his influences.

Attributes: MVSG.

ENGL 5252. Exhibiting Latinidad: Curation/Display/Intervention. (3 Credits)

Museums have played critical roles in defining Latinidad for mass publics in the U.S. and abroad. In particular, curators and their exhibits can assume great power over our understandings of authenticity, cultural authority, and the historical “truth” about Latinx cultures. By retracing exhibition histories from classic shows like Cuba-USA and the Decade Show to the Getty’s Pacific Standard Time LA/LA initiative, we will confront the different material, textual, and visual dilemmas provoked by museums. We will also ponder alternative exhibition practices for Latinidad’s representation and remembrance in the future.

Attributes: ENG3, ENGD.

ENGL 5261. Malory: Cultures of the C15. (3 Credits)

Malory’s vast Morte Darthur and the wide multilingual reading that went into it is both object of study and the gateway into the troubled fifteenth century in this course.

Attributes: ENG1, ENME, MVSG.

ENGL 5264. Chaucer. (3 Credits)

This course is an introduction to Chaucer’s poetry as well as to trends in medieval literary criticism. Our goal is not coverage by any means, but to touch on some of the concerns that have animated Chaucer studies: Chaucer’s representation of the social world, religion, gender, and the self. Any analysis of Chaucer’s writing implicitly or explicitly raises a question about the most responsible approach to texts that are now over 600 years old. Indeed, this question has remained constant since the beginning of Chaucer studies. We will, therefore, be very interested in what it has meant and what it means now to read Chaucer historically. We will begin with a discussion of what constitutes historical criticism, both for Chaucer studies and for literary criticism more broadly, then we will turn to the subtleties of the texts themselves, which stand, of course, at the center of our investigation. No prior knowledge of Middle English or medieval history is assumed, but I recommend that those of you who are unfamiliar with this time period take a look at Maurice Keen’s English Society in the Later Middle Ages or May Mckisack’s The Fourteenth Century before the class begins.

Attributes: ENG1, ENME, MVSG.

ENGL 5300. Occitania: Language and Power. (3 Credits)

This course introduces students to the cultural world of a medieval “south”: Occitania. Texts in Old Occitan include documentary writing, historical narrative, and the poetry of the troubadours. Topics include urban/rural communities, gender and power, the Albigensian crusade and its aftermath and the beginning of vernacular book production.

Attributes: ENG1, ENME.

ENGL 5311. Modern Irish Literature. (3 Credits)

This course aims to strike a balance between two goals. On the one hand, we will attempt to deepen our understanding and catch up with recent critical developments relating to the most canonical figures in the Irish literary tradition, such as Wilde, Joyce, Beckett, and Yeats. On the other hand, we will seek to expand our understanding of the Irish canon and its range by looking beyond the texts that have been most studied in English departments to include works by women (Elizabeth Bowen, Maud Gonne, Edna O’Brien, Eavan Boland), those who compose in the Irish language (Eibhlin Dhubh Ni Chonaill, Máirtín Ó Cadhain), writers from the North (Seamus Heaney, Medbh McGuckian), and contemporary writers (Eimear McBride, Ursula Rani Sarma).

Attributes: ENBE, ENG3.

ENGL 5315. Periodization: Early Modern and Other Literatures. (3 Credits)

We will engage with the debates about periodization currently central to literary studies and many other disciplines. Though our principal focus will be early modern England, students will have the opportunity to do some readings and perhaps write their seminar papers on the literatures of other periods.

Attributes: ENBE, ENG2.

ENGL 5331. Early Modern Skepticisms. (3 Credits)

Graduate course on the discourses of skepticism during the early modern period.

ENGL 5345. Theatrical Enterprise in Early Modern England. (3 Credits)

This course will offer a survey of English theatrical enterprise form the 1590’s to the 1640’s. The playing companies will serve as an organizing principle for study of dramatists including Shakespeare, Jonson and Marlowe.

Attributes: ENBE, ENG3.

ENGL 5541. Climate Change and Literature. (3 Credits)

What does it mean to be a scholar of literature in a time of climate crisis? This is the question that we will take up in this course. Just as rising temperatures and sea levels around the world are forcing human beings to rethink their everyday behaviors, so have the theoretical insights of scholars working on climate change forced the rest of us to reevaluate key concepts. What meaning do standard literary periods have when we should be thinking on geological scales of time? Now that human beings have proven themselves capable of transforming the planet on a global scale, can we continue to rely on narrow models of human agency? If works of literature and art have made us desire green expanses of lawn, machines powered by fossil fuels, and other environmentally destructive commodities, can we still read and view these works with pleasure? While this course will be centered on texts coming out of Europe and the Americas during the long 18th century (authors will include Milton, Bartram, Austen, Mary Shelley, Thoreau, and others), it also will range broadly among writings by scholars from multiple disciplines and backgrounds seeking to understand the place of the humanities in our currently unsettled state (Chakrabarty, Kolbert, Heise, Ghosh, Kimmerer, Tsing, and others). In fact, a primary goal of the course is to use the 18th century as a test case for reconceiving traditional modes of study and connecting them to issues of present-day concern. As such, while the course will include familiar assignments, including a research-based paper, it also will include experimental ones that allow us to explore different ways of doing literary studies today.

Attributes: ENAE, ENBE, ENG2, ENGT.
ENGL 5542. Early Black Atlantic Archives. (3 Credits)
Building on Paul Gilroy's concept of the black Atlantic, this course will examine the literature and art of the early black Atlantic world. Specifically, it will look at the aesthetic, cultural, and intellectual productions of members of the African diaspora from the long 18th century. These productions included poetry, autobiographies, slave narratives, essays, letters, portraits, and novels, which we will analyze to see how they shaped 18th-century conceptions of slavery, colonialism, resistance, freedom, justice, human rights, and selfhood. At the same time, we will think— at a meta-critical level— about the scholarship and archival work that led to the recovery of this body of literature and art. As many scholars have pointed out, dynamics of erasure and silencing have had a profound influence on what types of black expression have been preserved, and one of the main challenges of doing work on the early black Atlantic world involves countering these dynamics. As such, in addition to reading about archives, we will practice engaging creatively with them for new insights into black thought and life. Early black Atlantic readings will include works by Phillips Wheatley, Olaudah Equiano, David Walker, Mary Prince, Harriet Jacobs, and Martin Delany. Critical readings will include works by Saidiya Hartman, Michel-Rolph Trouillot, Nicole Aljoe, Pablo Gómez, Brit Russert, and David Kazanjian.
Attributes: ENAE, ENBE, ENG2, ENGD, ENGT.

ENGL 5616. Romanticism and Private Life. (3 Credits)
This course considers the literary respons of a range of Romantic-era writers to two significant pressures on privacy in early nineteenth-century Britain. First, renewed agitation for parliamentary reform in the post-war era prompted intensified governmental repression of political dissent, including what John Barrell has described as the 'politicization of private space.' Second, the early nineteenth century witnessed the definitive emergence of 'modern celebrity culture,' as Tom Mole and others have recently defined it. Our writers include Mary Wollstonecraft, William Godwin, John Thelwall, Mary Robinson, William Wordsworth, Dorothy Wordsworth, Samuel Taylor Coleridge, Lord Byron, Felicia Hemans, John Keats and John Clare.
Attributes: ENBL, ENG2.

ENGL 5622. Eighteenth Century Travel. (3 Credits)
This course is concerned with European travel and the use of travel tropes in seventeenth and eighteenth-century literature and other discourses, and in particular the ways the experience of travel from a period sometimes referred to as an 'Age of Discovery' informs the travel metaphors—the 'discoveries'—of the period sometimes referred to as the 'Age of Reason.' A central question of the course will be, How is the cultural relativism born of the recounting of the experience of travel reflected in the language and the literary works of the Eighteenth Century?
Attributes: ENBE, ENG2.

ENGL 5634. Modernists/Victorians. (3 Credits)
This course examines landmarks of Victorian literature and transatlantic English modernism, exploring breaks and continuities between Victorian and Modernist writers. Covering major texts from the 1840s to the 1940s, the course will also consider theoretical arguments about the status of the 'classic' in literary history, and specifically as these define the fields of Victorian studies, modernism, modernity, and the classifications of 'English' and 'American' literature.
Attributes: COLI, ENAL, ENBL, ENG3.

ENGL 5700. Playwriting Workshop. (3 Credits)
ENGL 5707. High Modernism: 1922. (3 Credits)
An exploration of five major works published in modernism's anus mirabilis and the literary climate that fostered these seminal texts. The defining novel and poem of the twentieth century—Joyce's Ulysses and Eliot's The Waste Land, respectively—both appeared in 1922, along with Woolf's first important novel, Jacob's Room, Lawrence's story collection, England, My England, and Yeats's anthology volume Later Poems, including such works as 'A Prayer for My Daughter' and 'The Second Coming.'
Attributes: ENBL, ENG3.

ENGL 5717. Transatlantic Women Modernists. (3 Credits)
This class looks at gender and modernism on both sides of the Atlantic. We will read a generous selection of women modernists, canonical and noncanonical, representing high modernism and 'bad modernism' (to use Mao and Walkowitz's term), fiction, film, and poetry from the first half of the 20th century. Our transatlantic focus offers a special opportunity to examine multicultural and cosmopolitan modernisms: many women writers in this period were travelers and immigrants. We will also analyze the complex and often fraught relationships among feminist criticism, feminist theory, and theories of modernism both in the early 20th century and today. Authors include: Gertrude Stein, Zora Neale Hurston, Elizabeth Bishop, Katherine Mansfield, Jean Rhys, and Virginia Woolf.
Attributes: ENBL, ENG3.

ENGL 5718. Modern Language Politics. (3 Credits)
Early twentieth century literature and theory was preoccupied with the relationship between language and politics, from the acknowledgment of minority and non-standard linguistic forms, to questions over the relationship between violence and language (whether or not, to paraphrase Adorno, one can write poetry after Auschwitz), to the idea of literary form itself enacting a kind of political resistance. In this course, we will analyze some of the competing philosophies about language circulating during this period and interrogate how modernist writers responded and contributed to these discussions.
Attributes: ENBL, ENG2, ENG3.

ENGL 5747. Late Modernism. (3 Credits)
Focusing on works produced between the 1930s-60s, this seminar will explore how writing in various genres during the latter part of the modernist period responded to ideas and formal techniques that emerged in the first decades of the twentieth century. Interrogating works that often do not neatly fit into received notions of high modernism will enable us to interrogate critical questions of reinvention, disillusionment, lateness and periodicity.
Attributes: ENAL, ENBL, ENG3.

ENGL 5749. Twentieth-Century Studies: Decolonization and World Literature. (3 Credits)
Introductory graduate course in the study of selected twentieth-century figures from comparative cultural, literary, and theoretical perspectives. The course will examine the changing contours of literary theory, literary studies, and the status of literature itself in the twentieth century, in light of contending imperatives of decolonization and globalization. The course will focus on three pairings of writers: Joseph Conrad and W. E. B. Du Bois; Jean Rhys and C. L. R. James; Pramoedya Ananta Toer and Amitav Ghosh. Select works from these writers will be studied in conjunction with critical selections from Fanon, Glissant, Pheng Cheah, and others.
Attributes: ENBL, ENG3, ENGT.
ENGL 5758. 20th Century American Autobiography. (3 Credits)
This course will focus on self-representations in print (essays, memoirs, autobiography), multimedia (graphic memoir, documentary, photography) and everyday life (Facebook, selfies, etc.)
Attributes: ENAL, ENG3.

ENGL 5777. Master Class: Literary Magazine Workshop. (3 Credits)
The aim of this class is to give students the experience and skills necessary to create a literary magazine in alignment with the most recent and rapid changes in literary consumption. Students will curate, edit and write for CURA, the print and online literary magazine of the Creative Writing program. Instruction will also focus on marketing, publicity and event production protocols and practices crucial for successful literary publishing. Working collaboratively, students will endeavor to expand the boundaries of the literary magazine by examining the best powers of print and online venues in order to achieve the maximum impact of both.
Attributes: CVWG.

ENGL 5778. Flawless/Freedom/Formations: Writing on Race, Gender and Popular Culture. (3 Credits)
This is a class about creative non-fiction writing as cultural reportage. In this class we will read a survey of cultural reportage—primarily reviews, profiles, editorials, opinion pieces—for textual, cultural, and aesthetic analysis to think about the ways that race—and intersectionally, gender and sexuality—operates thematically and politically in that writing. Our study of this writing will impact the main focus of this class: It is a writing workshop, in which each student will present her or his work for critique. Writing assignments will be expected of each student and possibly lead to the production of a class-produced blog or magazine at the end of the semester.
Attributes: CVWG, ENG3, ENGD.

ENGL 5782. Slavery in American Fiction. (3 Credits)
The course focuses upon depictions of slavery in American fiction during the years before the Civil War. We will read a selection of novels by blacks and whites, men and women, all concerned with the intensifying debates over 'the peculiar institution.' We will focus on the turbulent and troubled decade of the 1850s; our exploration this time of increasing sectional tension through fiction will spotlight the birth of the African American novel and its dialogic engagement with the burgeoning literature of race in the United States. Authors include Melville, Stowe, Douglass, William Wells Brown, and Martin Delany, among others.
Attributes: ENAE, ENAL, ENG3.

ENGL 5831. American Bestseller 1870-1940. (3 Credits)
This course will explore the diverse impact of Darwin's big idea on American literature and culture of the late nineteenth and early twentieth centuries. Darwin's theory of evolution by natural selection had a seismic impact on the natural science of his day, a practice then closely intertwined with religion. The vibrations spread through the social sciences — resulting in what we now call social Darwinism — and literature registered the tremors. Through the readings of Theodore Dreiser, Frank Norris, Jack London, Edith Wharton, Charlotte Perkins Gilman, and their contemporaries, we will consider the myriad effects of Darwinism on the American worldview.
Attributes: ENAE, ENG3.

ENGL 5838. African American Print Culture. (3 Credits)
How does the study of African American literature change when seen from the perspective of print culture? And how does the study of print culture change when focused on African American archives? In the eighteenth and nineteenth centuries, African Americans participated in a rapidly emergent print culture as authors, editors, printers, readers, teachers, and librarians, among other roles. At the same time, African Americans frequently furnished the subject matter for this print culture, in ways they did not always control. This seminar will explore African Americans' diverse contributions to early American print culture, both on the page and off. It will draw on a range of primary materials related to African Americans, and seminar participants will combine these investigations with readings of recent work bridging critical race studies and material culture. Together we will ask how the methodologies of print culture might help us reconsider familiar notions of authorship and identity, and how African American materials might transfigure conceptual standbys of print culture studies such as circulation and publics.
Attributes: ENAE, ENG3, ENGD.

ENGL 5839. Literary Darwinism. (3 Credits)
This course will explore the diverse impact of Darwin's big idea on American literature and culture of the late nineteenth and early twentieth centuries. Darwin's theory of evolution by natural selection had a seismic impact on the natural science of his day, a practice then closely intertwined with religion. The vibrations spread through the social sciences — resulting in what we now call social Darwinism — and literature registered the tremors. Through the readings of Theodore Dreiser, Frank Norris, Jack London, Edith Wharton, Charlotte Perkins Gilman, and their contemporaries, we will consider the myriad effects of Darwinism on the American worldview.
Attributes: ENAE, ENG3.

ENGL 5841. Early American Media. (3 Credits)
An introduction to early American literature by way of the transatlantic dynamics of printing, reading, and circulating media before the rise of industrial publishing in the late nineteenth century.
Attributes: ENAE, ENG2.

ENGL 5844. American Bestseller 1870-1940. (3 Credits)
Since novels both register and shape public attitudes towards the world, a study of best selling novels suggests insight into how changes in literary tastes relate to broader social changes (e.g., political events, technological developments, changing demographics, and education policies). What affected changes in public taste after the Civil War, and how may we see those changes represented in books people most avidly read? Bestsellers presumably share important characteristics that can explain their broad appeal to reading public- and the goal of this course is to try to understand those characteristics and that appeal. Authors may include Edward Bellamy, Pearl Buck, Thomas Dixon, Edna Ferber, Ellen Glasgow, Zane Grey, Edith Wharton, Owen Wister, and Richard Wright.
Attributes: ENAE, ENAL, ENG3.
ENGL 5845. Early American Novel. (3 Credits)
This course will sketch the tradition of the American novel from its beginnings through the Civil War. Authors will range from traditional canonical standards such as Hawthorne and Melville to more recent additions to the tradition like Lydia Maria Child and William Wells Brown.
Attributes: ENAE, ENG2.

ENGL 5849. Pre-1900 American Literature. (3 Credits)
An introduction to recent Americanist literary scholarship, comparing and contrasting methodologies that have been brought to bear on three or four important works of U.S. literature published before 1900.
Attributes: ENAE, ENG2, ENG3.

ENGL 5861. Gender in American Literature. (3 Credits)
An interdisciplinary study of the social and cultural forces that shape gender difference and sexuality in American literature from 1830 to 1930.

ENGL 5863. Three American Authors: Alcott, Chesnutt, and Twain. (3 Credits)
In this course we will read works by three important American authors: Louisa May Alcott (1832–1888), who produced works of children's fiction, sentimental Gothic stories, and realist novels; Mark Twain (1835–1910), who wrote humor, realism, and social satire; and Charles Chesnutt (1858–1932), whose characteristic genres included dialect stories, social realism, and the essay. We will also familiarize ourselves with the current critical conversation about each of these writers.
Attributes: ENAE, ENAL, ENG3, ENGD.

ENGL 5905. Modern Poetry. (3 Credits)
This course will explore how writers in the first half of the 20th century responded to modernity through experiments with poetic form. Taking seriously the notion that form is political, modernist poets reimagined the ways language could mean through formal experimentation and interaction with other disciplines and media. By combining close reading (a technique we derive from the modernists) with cultural analysis, we will interrogate the impact of historical events and aesthetic movements on modernist writing, as well as the ways poetic forms actively contributed to the constitution of the modern world.
Attributes: ENAL, ENBL, ENG3, ENGD.

ENGL 5919. 20th Century American Novel: A Violent Survey. (3 Credits)
Combining the sweep of a literature survey class and the thematic core of a seminar, this course will move through the twentieth century novel in the United States examining different modes of violence. We will include war novels in the United States examining different modes of violence. We will include war novels along with novels of manners. Beginning with James and Wharton and their dissection of social violence, we will move through the realists (London; Dreiser), the Depression and labor struggles (Steinbeck), WW2 (Mailer; Vidal) and the postwar period (Salinger; Bowles) as it leads into the postmodern novel. Possible authors also include: Ellison, Vonnegut, Pynchon.
Attributes: ENAL, ENG3.

ENGL 5920. James Hardy Conrad. (3 Credits)

ENGL 5930. Neuro-Literature in Historical Perspective. (3 Credits)
Our current literary interest in neurology has a history. This course will look at the relatively recent history of the move from philosophical approaches associated with Cognitive Theory to biological brain research (fMRI scans of brains reading Jane Austen). And it will look at a longer history in which early modern brain research influenced literary representations of the self. In each of these historical moments, 17th and 18th-century writers have played curious and important roles, and so authors including Milton, Marvell, Swift, Finch, Addison, Pope, Sterne, Austen, and the Scriblerians, will be considered.
Attributes: ENBE, ENG2.

ENGL 5940. Novel, She Wrote. (3 Credits)
Novel, She Wrote: Black Female Writers and Their First Novels - 'If there's a book that you want to read, but it hasn't been written yet, then,' Toni Morrison declares, 'you must write it.' The impulse for black female authors to write novels and the diverse manifestations of that impulse will be of primary concern in this course. What compelled black female authors in the second half of the twentieth century and early twenty-first century to write their first novels? How are themes of sexuality, motherhood, beauty, respectability, and intra- and interracial conflict represented in their texts? In what ways do their novels complement, build upon, and refer back to each other and other works? These are a few of the questions we will tackle as we read through the literature. Texts will include Gwendolyn Brooks's Maud Martha (1953); Paule Marshall's Brown Girl, Brownstones (1959); Alice Walker's The Third Life of Grange Copeland (1970); Toni Morrison's The Bluest Eye (1970); Gloria Naylor's The Women of Brewster Place (1982); Edwidge; Dantica't Breath, Eyes, Memory (1994); A.J. Verdelle's The Good Negress (1995); Danzy Senna's Caucasia (1998); and Ayana Mathis's The Twelve Tribes of Hattie (2012).
Attributes: ENAL, ENG3.

ENGL 5960. Memoir and Personal Essay. (3 Credits)
This class will function as a writing workshop where we will spend at least half of class time critiquing your works in progress. Since the techniques of memoir are indistinguishable from the techniques of fiction, we will concentrate on dialogue, exposition, scene, character, managing narrative time (past, present, future) and, most of all, the development of a persona. The course will include trends in autobiographical theory as well as analysis of major texts by writers such as Didion, Hampl, Orwell and Sedaris.

ENGL 5965. Master Class: Writing for the Big Screen. (3 Credits)
This course offers an introduction to the fundamentals of screenwriting: scenes, acts, narrative structure, character development, genres, and dialogue, through intensive study of major, award-winning Hollywood films, classics in their genre. Students will read and analyze five outstanding screenplays, and watch films made from them. The final requirement for this course is a completed first act (20-30) of a feature film, as well as weekly assignments.

ENGL 5985. Introduction to Early Modern Studies. (3 Credits)
An introduction to the major debates, conversations, and approaches in early modern studies, with a focus on what it means to define and contribute to a field, how canons are formed, and what constitutes evidence for a literary-critical argument. Students will be exposed to, and gain practice in, a variety of methodological strategies and techniques: close reading and rhetorical analysis, archival research, theoretical and interdisciplinary work, and textual editing, among others.
Attributes: ENBE, ENG2.

ENGL 5989. Major Early Modern Texts and the Dynamics of Space and Place. (3 Credits)
Major Early Modern Texts and the Dynamic of Space and Place. Who 'owns' the forest in As You Like It or the island in The Tempest-- and how and why does ownership take different forms in such terrains? In what ways do space and place within a poem differ if it is read in print, or circulated in manuscript or sung? How do stanzas and similar poetic practices inflect concepts of space and place? How is that process accomplished by culturally specific paradigms and practices—the gendering of certain spaces, the development of nationalism, the reading of NeoPlatonic texts, and so on.
Attributes: ENBE, ENG2.
ENGL 5992. Art of Literary Nonfiction. (3 Credits)
You will be introduced to the techniques of non-fiction writing by closely reading a wide variety of authors and by putting the lessons gained therein to practice in your own non-fiction pieces. The course will focus upon the basic techniques of non-fiction writing— which, in a phrase, amounts to telling a story about the verifiable world. This course will introduce you to a number of different non-fiction genres, including the profile, the personal essay, the informative or ‘reported’ piece, the social commentary, and the review. There will be lectures on the genre, short exercises, and in-class writing, but the main emphasis will be on workshop student writing. We will broaden the notion of ‘research’ to include interviews and non-traditional fact-gathering methods as well as the standard approaches. We will discuss and practice the notion of shaping and restructuring linear ‘reality’ in order to sustain reader interest while maintaining allegiance to fact. There will be three medium-length writing assignments of approximately 5-7 thousand words each plus short assignments.

ENGL 5999. Colloquium: Pedagogy Theory/Practice 1. (0 Credits)
ENGL 5999 is the first part of the Teaching Practicum, which is to be taken in the spring of English PhD Student's 2nd Year. This part of the course is taken in the Spring (before teaching), and includes individual interviews, assignment of written work and practice teaching. Each student will have a mentor, complete a portfolio of materials, and create multiple assignments. This part of the course is graded as pass or fail. Once students pass the first part of the course in the Spring semester, they will be approved to take the second part of the course in the Fall semester—when English PhD students begin to teach. This part the 'Colloquium' introduces students to different pedagogical approaches and methods.

ENGL 6004. Colloquium: Pedagogy Theo/Pra. (3 Credits)
ENGL 6104. Crip, Queer, and Critical Race Theory. (3 Credits)
This seminar will examine cutting-edge work in critical race, crip and queer theories and their intersections in order to prepare you to both intervene in these discourses and effectively engage with them in your analysis of literary texts. We will consider critical embodiment in works drawn from a range of historical periods and genres. Likely writers to be considered include José Esteban Muñoz, Eli Clare, Indra Sinha, Mel Chen, Ellen and William Craft, Robert McRuer, Roderick Ferguson, Jasbir Puar, and Alison Kafer. Fulfills: American 2 and Theory requirements.
Attributes: ENAL, ENG3, ENGD, ENGT.

ENGL 6006. Medieval Communities and Modern Thought. (3 Credits)
This interdisciplinary course will consider the roles played by modern images and ideas of the medieval past in the formulation of modern ideas of community, nation, subjectivity, and habitus. Course readings will include modern theoretical texts, modern popular texts, and medieval source material (mostly in translation).
Attributes: ENGL, ENME.

ENGL 6201. Race and Affect Theory. (3 Credits)
This seminar will stage a dialogue between the field of race and ethnic studies on the one hand and that of affect theory on the other.
Attributes: ENAE, ENAL, ENBL, ENG3, ENGD, ENGT.

ENGL 6212. Medieval to Early Modern Drama. (3 Credits)
When we think of early drama, we usually think of the cycle plays, the great civic, multi-part, day-long productions from English towns: York primarily, but traditionally also Chester, Towneley, and N-Town in East Anglia. But scholarship in the last ten years has forced us to rethink that model in ways that investigate the context of these plays. The text we have from Chester is not really medieval but 16th-century, performed after substantial religious change had occurred, and marked by different local religious positions, hence a site of civic conflict. The Towneley plays, it seems, were not a performed cycle at all, but probably a collection of plays from different places, assembled for private reading, perhaps as an attempt to preserve some elements of an old dramatic religious tradition when that religion had fallen out of favor. These are two examples of the way the course will examine the cultural context of late medieval/early modern English drama. A third example: the most profound way in which this drama differs from later commercial drama is in the shift away from community theatre which occurred in London with the construction of the Theatre in 1572. We will explore the economic issues around the emergence of commercial theatre. Before the Theatre was built, who paid for plays? where were they staged? was there a performing community? In addition to excerpts from the cycle plays we will read some moral plays like Manynd and Everyman, some Tudor drama by John Heywood and Henry Medwall, and will finish up with Christopher Marlowe's Dr Faustus.
Attributes: ENBE, ENG1, ENG2, ENME.

ENGL 6215. Medieval British Historical Writing. (3 Credits)
History-writing was fundamental to medieval and early-modern literary sensibilities, but in its relation to truth, genre, and identity, medieval history differs dramatically from contemporary understandings of the discipline of history. This course will introduce students to the major historiographical thinkers and practitioners of the Middle Ages in Britain and include selections from Gildas, Nennius, Bede, the Anglo-Saxon Chronicle, Geoffrey of Monmouth, Matthew Paris, and several French-language romances. Our interdisciplinary discussions will focus on the literary practices of medieval history.
Attributes: ENG1, ENME.
ENGL 6216. Late Medieval Autobiography: T. Hoccleve, O. Bokenham, M. Kempe. (3 Credits)
Margery Kempe’s Book is often called the first female autobiography in English, but the writing of her fifteenth-century contemporaries Thomas Hoccleve, and London scribe and bureaucrat, and Osbern Bokenham, and East Anglian friar, also offers a personal voice. We will explore the social and theological context of each author as we read their work in Middle English.
Attributes: ENBE, ENG1, ENG2.

ENGL 6224. French of England: Texts and Literacies in a Multilingual Culture. (3 Credits)
French of England helps prepare graduates in medieval disciplines deploy the newly important multilingual paradigms for the study of medieval English and related cultures. It looks at the rich and still under-researched francophone corpus (c. 1000 literary texts and large bodies of documentary records) composed and/or circulating in medieval England and related regions from the twelfth to the fifteenth centuries. French was a major regional and transitional language in England, used in literature, governance, administration, culture, trade, and the professions. Taking francophone literary and documentary culture into account changes are paradigms for English medieval literary history and prompts new thought about the relations between literature, literacy, and language. Aiming to move as rapidly as possible from the pains of language-learning to the pleasure of reading text, the course combines a weekly linguistic practicum with a literary seminar and runs from 4pm to 7pm on Tuesdays. Previous experience of Old French is not required; basic reading or speaking of modern French is useful; experience with other languages is also sometimes enough of a help. This course will also explore early French uses of late old English. If in doubt about whether your language experiences will be helpful, please email woganbrowne@fordham.edu.
Attributes: ENGL, ENME, MVSG.

ENGL 6231. Late Medieval Women. (3 Credits)
The course will study women as producers and consumers of literature, that is as writers and readers. Instead of examining women as subjects of literary representation, we will use non-literary disciplines—social history, bibliography, iconography—to recover elements of women’s lives in order to understand their involvement with reading. Like much current medieval scholarship, the class will employ cultural perspectives in which literature, history, and visual materials illuminate each other.
Attributes: ENGL, ENME, MVSG.

ENGL 6235. Medieval Travel Narrative. (3 Credits)
In a project which brought together the greatest minds and resources of the western world, the crusading movements inspired subsequent generations of English and western European poets and chroniclers to create some of the most beautiful and, at times, most brutal romances and histories ever written. This course will focus on a range of traditions, including the romance, Richard, and Coeur de Lion in light of contemporary chronicler Roger of Howden’s Chronica. Even Josephus’ Jewish War is barely recognizable in the fourteenth-century Siege of Jerusalem. Pilgrim and merchant narratives, from Egeria to Margery Kempe, and Mandeville to Marco Polo, will provide a contrast to romance and chronicle modes. We will be especially concerned with the ways in which chivalric quest came to influence the romance and chronicle genres. This course is designed to contextualize travel within the medieval world as we read and discuss those travel narratives with a specific set of concerns: salvation, conquest, and conversation.
Attributes: ENGL, ENME, MVSG.

ENGL 6236. Romanticism and Peace. (3 Credits)
‘Peace is not an absence of war,’ wrote Spinoza, ‘it is a virtue, a state of mind, a disposition for benevolence, confidence, justice.’ Proceeding from Spinoza’s notion that peace is an active principle rather than a void between times of military conflict, and drawing upon the interdisciplinary field of Peace Studies, in this course we will study literary and philosophical engagements with peace in a period often thought synonymous with continual war. To view the Romantic era solely through the lens of war runs the risk of overlooking the reaching after peace that also marks the period (reflected in the vast array of treaties produced at this time, from the Peace of Paris (1783) to the London Straits Convention (1841). Attempts to theorize, to imagine, and to bring about peace were crucial forces in Romantic-era culture. Many familiar works, such as Wordsworth’s Prelude, Joanna Baillie’s plays, Jane Austen’s novels, Samuel Taylor Coleridge’s poetic reflections on domestic tranquility, Thomas DeQuincey’s escape into opium, Olaudah Equiano’s modeling of the skills of a virtuous negotiator, and Keat’s famous odes are illuminated afresh when read in the context of a culture preoccupied not only with conflict but with conflict resolution.
Attributes: ENBL, ENG2.

ENGL 6237. The French of England II. (3 Credits)
Studies the rich, under-researched corpus (c. 1000 texts) in the Frenches of medieval England; includes projects of translation/editing (for acquiring techniques of presenting and interpreting medieval texts). FOE I not necessarily required.
Attributes: ENGL, ENME.

ENGL 6250. Postcolonial Middle Ages. (3 Credits)
The course, The Postcolonial Middle Ages, addresses the multiplicity of ways in which postcolonial theory can be used to illuminate premodern texts. Texts to be read in Middle English include the Croxton Play of the Sacrament, Geoffrey Chaucer’s Man of Law’s Tale and Prioress’s Tale, among others, along with medieval texts in translation, such as The Letter of Prester John, and the Beauvais Play of Daniel. These works offer complex views of alterity, conquest, place, space, and performance which are foundational in discussing how the Middle Ages can be viewed as postcolonial.
Attributes: ENBE, ENG1, ENG2, ENME.

ENGL 6506. The Joseph Johnson Circle. (3 Credits)
This survey course takes shape around the British bookseller and publisher Joseph Johnson, whose five-decade career stretched from the Seven Years’ War to the dawn of the Regency. Johnson published over four thousand titles during this time, in fields ranging from reform politics to children’s literature, from zoology to Baptist dissent, and from lyric poetry to visionary manifestos. His authors included Mary Wollstonecraft, William Wordsworth, Samuel Taylor Coleridge, Sydney Owenson, William Cowper, Maria Edgeworth, Erasmus Darwin, Joseph Priestley, William Hazlitt, Charlotte Smith, and hundreds more. Attending to what has been referred to as the “Johnson Circle,” we will trace broad orbits in British writing across the late-eighteenth and early nineteenth centuries, with topics including aesthetics, religious debate, the American and French Revolutions, women’s rights, war, slavery, popular societies, science, and education. In this regard, this course will function as a broad survey of British writing from 1760 to 1820. Along the way, in studying the radiating influence of the imprint “J. Johnson, London,” we will also pay attention to the field of Book History and how it has energized and expanded eighteenth-century and Romantic-era studies.
Attributes: ENBE, ENBL, ENG2.
ENGL 6552. Film/Theory/Literature: Horror and Madness. (3 Credits)
Confronting the expansive theoretical, literary, and cinematic representations of fear, horror, terror, abjection and madness, we will delve into works of David Cronenberg, George Romero, Stanley Kubrick, Steven Spielberg, Cynthia Freeland, Julia Kristeva, Toni Morrison (among others). Warning: Several films are not for the squeamish. Please be aware that we will need a few hours each week (outside of official class time) for watching the films.
Attributes: ENAL, ENG3.

ENGL 6641. Reading and Teaching the Nineteenth-Century Novel. (3 Credits)
In this course we will consider the nineteenth-century novel from the interfused perspectives of readers and teachers. Our remit will be the British novel across a relatively broad span of decades: Maria Edgeworth’s Castle Rackrent (1800), Walter Scott’s Rob Roy (1817), Mary Shelley’s Frankenstein (1818); Jane Austen’s Emma (1815), Emily Bronte’s Wuthering Heights (1847), and George Eliot’s Middlemarch (1871/2). After reading and discussing each novel we will then turn to consider the various ways that it might be taught in the college classroom. And for each novel, both our readings and our conversations about pedagogical approaches will be informed by critical articles on the works themselves and on broader issues in nineteenth-century studies. This seminar is open to all graduate students, but because the structure of the course will require an unusual amount of active student participation, please keep in mind that silent spectatorship will not be possible.

ENGL 6751. The New Formalism and Early Modern Literature. (3 Credits)
In the past decade formalism, the F-word of the profession for over twenty years, has attracted many critics in its revisionist version often termed ‘the new formalism.’ What are the potentialities—and problems—of this approach? How should we resolve debates about the working of the new formalism, such as whether it is necessarily historical? How does it interact and/or conflict with other methodologies, such as gender studies and materialism? We will approach these questions by reading a wide range of early modern texts in the principal genres, the list being planned to avoid major overlap with other early modern courses at Fordham in the past year or two. Thus the course aims to serve the needs of a range of students: those interested in a broad overview of early modern texts, and of those wanted to engage with formalist approaches and/or connect those approaches with other types of criticism. Like all my graduate courses, it will also include attention to professionalizing, such as discussions of giving papers effectively and of teaching.
Attributes: ENBE, ENG2.

ENGL 6767. Marriage and Nation in 19 Century British Literature. (3 Credits)
This course will explore literary and cultural conceptualizations of British marriage in the nineteenth century—the period traditionally seen as an age of nationalism and one in which Parliament passed or attempted to pass an unprecedented number of reforms of the marriage law. We will examine how marriage plots written after the Union with Ireland Act (1800) envision the mutually constitutive relationship between British identity and British marriage, as well as how they address crises of national self-definition and uphold—or question—the sense of national uniqueness and superiority that the institution of marriage was meant to reinforce.

ENGL 6769. Finnegans Wake. (3 Credits)
As the ballad of Tim Finnegan says, there’ll be ‘lots of fun at Finnegan’s Wake.’ We will read Joyce’s text and engage its historical reception and theoretical treatments. You’ll ‘wipe your glosses with what you know.’

ENGL 6779. Brecht: Aesthetics and Politics. (3 Credits)
Bertolt Brecht was arguably the most important theater theorist of the twentieth century, and his theory of the function of art under capitalism transformed thinking about the relationship between culture and politics and continues to resonate today. This course will examine Brecht’s theater and theory in several contexts: first, in the context of modernist theater theory and practice, and third, via the legacy of his theories in late twentieth- and twenty-first-century art and philosophy. Philosophical readings will include Marx, Adorno, and Horkheimer, Benjamin, Lukacs, Arendt, Barthes, Jameson, and Ranciere; theatrical readings will include, in addition to a substantial number of Brecht’s own plays, considerations of German Expressionism; non-European, especially Chinese, theater, modernist cabaret, and postwar avant-garde and postdramatic theater. Discussions will address, among other things, the relationship between theater and politics, the role of mass culture, methodological issues in materialist criticism, theories of spectatorship, and the fate of political art after modernism.

ENGL 6800. God and Mammon in British America. (3 Credits)
Did the English explore, conquer, and settle North America in the name of true religion or the earthly pursuit of gain? How was the one aim shaped by the other, and how have these mutual concerns shaped colonial American writing? Taking Max Weber’s Protestant Ethic and the Spirit of Capitalism as a conceptual point of departure, this course will explore the cultural history of spiritual and material wealth in colonial New England, the South, the Mid-Atlantic, and the West Indies. We will examine both the central texts of dissenting Protestantism from the perspective of the colonial economics and social class and the central texts of colonial economics and economic self making from the perspective of theology, morality, and the transformation of religious culture in British America over the course of nearly two centuries.
Attributes: ENAE, ENG2.

ENGL 6888. Reading the Indian Ocean World. (3 Credits)
A new configuration of study has emerged in the last decade or so known as Indian Ocean Studies. It employs a robust interdisciplinary to study the cultural flows and encounters over time of the peoples and traffic of the Indian Ocean and the formations of its vast littoral. This includes exchanges in trade, commerce, and war between the East African littoral and Arabia, the Persian Gulf, India, and the South East Asian archipelago including China. The migration of populations, the slave trades and slavery, establishment of overseas or expatriate settlements, the emergence of lingua franca, (such as Kiswahili), maritime life, and the spread of technology and creation of empires and colonies are studied in their interrelation. This course will focus on the archives, the literature, writing (including histories) and expressive practices (including film, music and performance) that this confluence of peoples has created in over more than two (actually seven) millennia. Starting with the earliest extant documents from Antiquity, to the contemporary scholarly and creative work of writers such as Pramoedya Ananta Toer, Barlan Pyamootoo, Monique Agénon, Kuo Pao Kun, Isabel Hofmyer, Amitav Ghosh, Abdulrazak Gurnah, Nuruddin Farah and Yvette Christianse, we will spend the semester “reading” the Indian Ocean world.
ENGL 6905. Concepts of Culture. (3 Credits)
What do we talk about when we talk about 'culture'? This class will explore this keyword in and around literary studies along two parallel tracks. First, we will explore the historical development of different concepts of culture over the last two centuries or so. Second, we will explore a range of theoretical perspectives from the past three decades that fit loosely under the rubric of Cultural Studies. Both tracks will necessitate broadly interdisciplinary approaches to the topic. We will explore, for instance, a relatively literary manifestation of the concept in Matthew Arnold's Culture and Anarchy, but also how the concept of culture figures in the early history of the human sciences, including anthropology, sociology, and psychology. Similarly, since work in the contemporary field of Cultural Studies only rarely limits its objects of study to the literary; we will sample theoretical developments in the study of popular music, film and television, etc.
Attributes: ENAL, ENG3, ENGT.

ENGL 6914. Home, Exile and Diaspora in Asian American Literature. (3 Credits)
This course will introduce students to major works of contemporary Asian American Literature. Possible authors include John Okada, Carlos Bulosan, Maxine Hong Kingston, Theresa Hak Kyung Cha, Chang-rae Lee, Li-Young Lee, Gish Jen, Jessica Hagedorn, Lois Ann Yamanaka, Jhumpa Lahiri, Marilyn Chin, and many others.
Attributes: ENAL, ENG3.

ENGL 6921. Modern Language Politics. (3 Credits)
Early twentieth century literature and theory was preoccupied with the relationship between language and politics, from the acknowledgement of minority and non-standard linguistic forms, to questions over the relationship between violence and language (whether or not, to paraphrase Adorno, one can write poetry after Auschwitz), to the idea of literary form itself enacting a kind of political resistance. In this course, we will analyze some of the competing philosophies about language circulating during this period and interrogate how modernist writers responded and contributed to these discussions. Likely authors include James Dawes, Theodor Adorno, Ludwig Wittgenstein, Ernest Hemingway, Paul Celan, Gertrude Stein, Americo Paredes, Zitkala-Sa, and Jean Toomer.
Attributes: ENAL, ENG3.

ENGL 7001. Early Modern Lyric Poetry. (3 Credits)
The past few years have witnessed a resurgence of critical interest in early modern/Renaissance lyric. Many methodological issues it raises are germane to the lyric poetry of other periods as well. The questions we will explore include, among others: What are the potentialities and problems of the new formalism? How if at all should close reading be recuperated? How does the new interest in the material text lead us to interpret the visual appearance of lyric poetry, other results of printing and publishing practices, and the poem as artifact or object? In what ways does lyric gender, and in what ways is it gendered? How does space/place theory, more often deployed in relation to drama and prose fiction, illuminate the workings of the lyric? Whereas the primary focus of this seminar is the period between about 1500 and 1660, it is also designed for those with other interest and areas of expertise. If any participants in the group are poets themselves, they will have opportunities to engage with issues of craft and to submit poems in lieu of one of the shorter assignments. And those primarily interested in lyric poetry written in other periods can focus on those texts in at least two classes and if they wish write their seminar papers partly or entirely on it.

ENGL 7007. Displacing the Renaissance: Travel, Race, and Colonialism. (3 Credits)
Investigates how literature of the English Renaissance takes part in developing discourses of race and colonialism in the period. Authors to be studied include Ascham, Nashe, Spenser, Marlow, Shakespeare, and Massinger, among others.
Attributes: ENAL, ENBE, ENG2, ENG3, ENGD, ENGT.

ENGL 7021. Romanticism and Ecocriticism. (3 Credits)
In the work of Raymond Williams, Jonathan Bate, and others, the field of British Romanticism made important contributions to an early ecocriticism. This course will consider how this work participated in the growth of an interdisciplinary body of environmentalist studies that includes Lawrence Buell, Cheryll Glotfelty, Timothy Morton, Monique Alweaert, and Anne-Lise Francois. Our historical questions will focus on how the period's writers developed an acute attention to their natural environments in the midst of a "second scientific revolution," the enclosure acts, urbanization and industrialization, the rise of a global tourism industry, and imperial expansion. Authors, artists, and tourists alike employed the popular aesthetic traditions of the sublime, the beautiful, and picturesque in viewing their surroundings. We will concentrate on authors such as Edmund Burke, Olausdah Equiano, William Wordsworth, Dorothy Wordsworth, Samuel Taylor Coleridge, Lord Byron, Percy Bysshe Shelley, Mary Shelley, and John Clare. We will also spend some time on visual media, including book illustrations, and on the experiments of Constable and Turner on clouds and sunsets (respectively) in the light of new scientific understandings of the atmosphere.
Attributes: ENAL, ENGT.

ENGL 7744. Paracolonial Studies: After Postcolonial Theory. (3 Credits)
This course will examine recent developments in (and beyond) postcolonial theory. While the primary focus will be on 20th and 21st-century theory and literature, the course will consider texts and cultural documents from earlier periods to explore how postcolonial studies belong to a wider reshaping of literary histories. The course will be organized around the study of a select few contemporary writers (Toni Morrison, Amitav Ghosh, and Pramoedya Ananta Toer are likely choices). Works by these writers will be read alongside postcolonial theorists (e.g., Homi Bhabha, Ania Loomba, Walter Mignolo, Gayatri Spivak, Gauri Viswanathan) and in conjunction with earlier works both canonical (e.g., Collins, De Quincey, Defoe, Dryden, and Shakespeare) and less canonical (e.g., Abdullah bin Abdul Kadri's Hikayat Abdullah, and documents from the Dutch and English East India Company records).
Attributes: ENAL, ENGT.

ENGL 7829. Fict Pub Sph: Am Lit 1776-1900. (3 Credits)
Using concepts of the public sphere drawn from critical theory, feminism, and political philosophy, this course will examine the development in late eighteenth- and nineteenth-century American literature and culture of the gendered distinctions between public and private, domesticity and the market, reason and sentimentality. Several historical problems will structure our theoretical, critical, and literary readings, including: the development of the doctrine of separate spheres, or domestic ideology; the effect of counter-publics, or alternative models of the public sphere, based in social movements such as temperance, feminism, and abolitionism; the political meanings of emotions, especially the key sentimental concept of sympathy; and shifting notions of how the practices of reading and writing literature were supposed to prepare citizens - especially boys and men - for participation in politics and civil society.
Attributes: ENAE, ENG2, ENG3.
ENGL 8935. Diss. Writing Seminar. (0 Credits)
Designed as a resource for all doctoral students who have passed the comprehensive exam. Students working on the dissertation proposal are encouraged to take this class. During each meeting students will present and respond to work in progress. Across the semester, the seminar will treat challenges of bibliographic research and strategies of effective writing specific to large projects. Attention will also be given to the preparation of material for academic publication.

ENGL 8936. Issues in Scholarship and Academy. (0 Credits)
This 0-credit seminar, open to all doctoral students, will provide a forum in which to discuss the issues that shape the pursuit of a career professing literature as well as the pursuit of a career outside of the academy. Each semester’s combination of guest-presentations and brief, selected readings will vary according to participants’ desires, but typical topics might include the following: General Education and the English Department; Journal Editing and the Intellectual Life; Humanities Education and Globalism; and The Ph.D. in English and the World Outside. Selected readings might include excerpts from Louis Menand, ‘The Marketplace of Ideas’ (2010); Stanley Fish, ‘Save the World on Your Own Time’ (2008); Frank Donoghue, ‘The Last Professors: The Corporate University and the Fate of the Humanities’; and Katherine N. Hayles’ ‘Electronic Literature: New Horizons for the Literary’.

ENGL 8996. Master’s Capstone. (3 Credits)
Master’s Students who have completed 2 courses of their 10 required courses towards their degree requirements will convert an existing 12-20 page class paper into a 20-25 page essay, revised for (theoretical) submission to a specific academic journal. In transforming a course paper into a prospective article, MA students will be required to review journals in the field, choose one, develop a critical methodology appropriate to that scholarly publication, and adapt their work to its specific editorial norms. Students will work under the supervision of the Director of Placement and Professional Development in English.

ENGL 8997. Master’s With Writing Concentration Capstone. (0 Credits)
The MA with Writing Concentration (MA w/WC) degree students who have completed 6 of their 10 courses toward their degree requirements will complete a substantial writing project of approximately 30 pages of poetry or 40 pages of fiction or nonfiction under the direction of a creative writing faculty member as their exit requirement.

ENGL 8998. English Graduate Internship. (1 to 3 Credits)
Will be processed through graduate internship.

ENGL 8999. Independent Study. (0 to 4 Credits)

ENGL 9999. Dissertation Direction. (1 Credit)
Doctoral students who have had their dissertation proposals accepted must register for this each semester up to and including the one in which they defend. The one exception is for students defending in the summer semester before their summer graduation deadline, the registration may be for ENGL 0910 Maintenance.

ENGL MTNC. Maintenance-English. (0 Credits)

Entertainment Law (ETGL)

ETGL 0336. Entertainment Law. (2 Credits)
This course examines the legal issues and business practices relating to the entertainment industry, with areas of focus including the following business segments: talent representation (talent agencies, personal managers, attorneys); recorded music; music publishing; motion pictures; and television and other video programming services (terrestrial, cable, satellite, and IP-based distribution). The class studies relevant case law and statutes to identify and discuss the significant legal principles. In addition, the class reviews and analyzes certain representative agreements to present a practical perspective of entertainment law.
Attributes: IPIE, LAWT.

ETGL 0381. Law and Professional Sports. (2 Credits)
Law and Professional Sports provides students with a broad overview about how professional sports leagues are regulated both internally and externally. Substantive topics covered in this course include antitrust law, contract law, labor law and intellectual property. In addition, this course will discuss the following topics: the law and economics of professional sports leagues; the role of the league commissioner; different league structures; salary caps and luxury taxes; rules for agent certification; state law publicty rights; state law due process rights; and ownership of sports statistics. There will be a scheduled final for this course.
Attribute: LLM.

Environmental Law (EVGL)

EVGL 0230. Renewable Energy, Business Considerations, and Litigations. (3 Credits)
This course will address key issues impacting both new utility-scale project development in the renewable energy sector as well as the growth of the domestic renewable energy industry. Some of the topics we will explore include the current domestic transmission infrastructure, the implications of the existing electric grid for future interconnection access, curtailment risks, and how these factors are shaping the future of certain renewable energy sectors; whether a property right to unobstructed wind flowing across one’s property exists and in which countries or states such right may be recognized; how certain animal species, weather conditions, and military interests may impact project siting; and how municipal tax assessments and federal tax credits respectively may result in forum shopping among the counties and states regarding where a solar project should be sited. We will also compare European case law to U.S. case law for purposes of examining how the interplay of science and public policy factors into the formation of laws, legal decisions, business decisions, and the evolution of domestic policy guidelines. During each class, we examine whether innovations exist or creative solutions can be devised that can serve as either a temporary bridge or more permanent solution to the issues raised. <p> Grades will be based on in-class participation and a final paper each student will author.
Attribute: LLM.
EVGL 0290. Climate Change Law and Policy. (2 Credits)
The overwhelming consensus among climate change scientists is that (i) unchecked climate change will cause sea level rise and major disruptions in agriculture and other essential global systems, (ii) it is primarily the result of human activities, (iii) we must substantially reduce global emissions of greenhouse gases as quickly as possible, and (iv) regardless of reductions, we face considerable climate change adaptation challenges due to the greenhouse gases already in the atmosphere. In this course, we will review the underlying science of climate change and the policy issues it raises. We will explore legal issues associated with ways to address climate change and its effects, ranging from increased use of renewable energy and energy conservation, various forms of carbon-use fees and emissions trading to highly controversial ‘geo-engineering’ approaches, along with their implications for both existing law and the need for additional legislation. The course will examine the evolution and current state of U.S. common law, legislation and regulations at the federal, regional, state and local level, including the federal Clean Power Plan (and the ongoing effort to replace it), the Regional Greenhouse Gas Initiative, New York State’s plan to reduce greenhouse gas emissions and increase resiliency, and New York City’s plan entitled, ‘One New York, The Plan for a Strong and Just City.’ Climate change is a global problem and requires a global solution. Accordingly, we will devote considerable attention to international efforts to address climate change, from the first World Climate Change Conference in 1979 to the 2015 Paris Agreement and beyond. In particular, we will focus on issues of equity and the balance which must be struck between the needs of developed and developing nations in this new and challenging world of limits. This course has a scheduled open book final exam.
Attributes: ABGS, JD, LAWI, LAWJ, LLM.

EVGL 0302. Environ Deal Making and Strategy. (2 Credits)
The private transactional marketplace, in which environmental outcomes - economic and behavioral - are negotiated and implemented, has matured rapidly in the past 30 years. This course will explore the increasingly sophisticated strategies and techniques used to create results in a variety of corporate transactions. Similarly, the disclosure marketplace, in which environmental information is transmitted to stakeholders, has grown well beyond the bounds of SEC reporting. The course will explore the contours and consequences of this disclosure revolution and its effect on global capital markets. Finally, dynamic new companies designed to address foundational environmental questions such as energy efficiency, greenhouse gas emissions, and waste disposal, have begun to disrupt and transform long-established industries to create more sustainable outcomes across the U.S. and the world. Through the insights of guest speakers - the founders of some of these companies - the course will explore the limits and possibilities of creating a new environmental future.
Attribute: LLM.

EVGL 0321. Urban Lab. (2 Credits)
This is an interdisciplinary graduate course with field study component on dynamics of urban neighborhood change. The course is co-taught by faculty across the university, primarily intended for graduate students in Law and Urban Studies, but open to all graduate students. The course will examine two New York City neighborhoods as case studies, exploring culture, community, politics, economics, law, and other forces that drive social, demographic, and physical change over time. Students are expected to create an interdisciplinary case study of change in a New York City neighborhood over time, along with the root causes and drivers of such change. The course will meet for two hours per week as a seminar component and additional field work to be scheduled during the semester.

EVGL 0337. Environmental Law. (2 to 3 Credits)
This course surveys the federal statutes, regulations, common law principles, and policies that address a wide range of environmental problems. The course begins by providing an introduction to environmental issues, basic theoretical concepts, common law cases, and the administrative law background necessary to understand this field of law. The course then proceeds to examine the goals of pollution control statutes and the criteria guiding decisions about the stringency of regulations. We will study relevant portions of the major federal environmental statutes as they relate to understanding the different regulatory criteria employed, e.g., effects-based standards, technology-based standards, and cost-benefit considerations. The statutes that we will study include the Clean Air Act, the Clean Water Act, the National Environmental Policy Act, the Resource Conservation and Recovery Act, the Endangered Species Act, and the Comprehensive Environmental Response, Compensation, and Liability Act (or Superfund). The course will also compare the different ways of achieving environmental goals, including traditional regulation, economic incentives, information-based approaches, pollution prevention, and ecological restoration. Students will be assessed through a combination of classroom participation and an in-class, open-book final examination.
Attributes: CORC, INLJ, PIE.
ENVL 1321. Urban Lab Fieldwork. (1 Credit)
This is an interdisciplinary graduate course with field study component on dynamics of urban neighborhood change. The course is co-taught by faculty across the university, primarily intended for graduate students in Law and Urban Studies, but open to all graduate students. The course will examine two New York City neighborhoods as case studies, exploring culture, community, politics, economics, law, and other forces that drive social, demographic, and physical change over time. Students are expected to create an interdisciplinary case study of change in a New York City neighborhood over time, along with the root causes and drivers of such change. The course will meet for two hours per week as a seminar component and additional field work to be scheduled during the semester.

ENVL 0751. Energy Law. (2 to 3 Credits)
Cutting-edge technologies, coupled with policy, legal, and business considerations, are currently transforming the energy world as we know it. Dynamic changes are impacting conventional and renewable energy operations alike, in ways that will make a meaningful difference in tomorrow's energy future. This course will examine real-world approaches to issues that companies face with respect to energy projects and their related devices, ranging from the rationale behind certain strategic business decisions, to securing debt or equity financing for novel technologies, to determining appropriate litigation strategy based on existing laws, case precedent, and state-of-the-art scientific know-how. We will explore statutes, federal laws, case law, policy, and other factors influencing both traditional and renewable energy projects and resources, with a heavy focus on renewable energy technologies, from wind and solar projects, to more unconventional projects, such as those involving piezoelectric flooring and roads. Examples of issues we will explore include (i) how curtailment risk, interconnection access, and electric grid integration are shaping the future of the wind, solar, and battery storage sectors, (ii) how certain European countries that rely on geothermal or wind energy in their standard energy mix use law to encourage their residents to adopt these measures, (iii) how certain animal species, weather conditions, and military interests may impact project siting, (iv) how weather-related risks impact energy projects and how to hedge such risks through certain financial products, (v) how the confluence of scientific data and public perception influences whether a project will be built, and (vi) how consumer choice, social media, and direct interactions with certain innovations can be a driver of change, catalyzing the more rapid deployment of futuristic technologies and the evolution of smart cities. To foster an understanding of how developments in Europe and elsewhere are impacting the current domestic landscape, we will compare European case law to U.S. case law, examining how the interplay of science and public policy factors into legal decisions, as well as the formulation of business decisions, laws, and policy guidelines. During each class, we examine whether creative solutions can be devised that can serve as either a temporary bridge or more permanent solution to the issues raised. <p>This class will feature a number of in-class interactive simulations, during which students will role-play to gain experience presenting, confronting, and addressing issues. All simulations are based on products and companies that are currently in the marketplace, or that could come to market in the near future. In the past, such simulations have included pitching an investment bank to debt finance a company that installs LED lighting in commercial real estate buildings, competing in a “beauty contest” among start-ups and relatively new-to-market renewable energy companies for equity financing from funds, and arguing before a panel of judges the merits of whether a community wind project should be built.
Attribute: LL.M.

ENVL 1322. Energy Lab Fieldwork. (1 Credit)
This is an interdisciplinary graduate course with field study component on dynamics of urban neighborhood change. The course is co-taught by faculty across the university, primarily intended for graduate students in Law and Urban Studies, but open to all graduate students. The course will examine two New York City neighborhoods as case studies, exploring culture, community, politics, economics, law, and other forces that drive social, demographic, and physical change over time. ENV 4999. Tutorial. (1 to 4 Credits)
ENV 4999. Tutorial. (1 to 4 Credits)
Individuals in this option must complete two semesters (4 credits each). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ENV 4401. Environmental Science Internship. (4 Credits)
Individually tailored research internship in an environmental institution. Placement will be in an environmental organization, government agency or business, under the supervision of a consenting faculty member, and with permission of the Environmental Science Program Faculty Committee. Grade and credits are given only upon the completion and successful defense of a final report integrating the practical internship experience with previous course work in environmental science is required. A weekly seminar that synthesizes previous environmental science coursework with practical experiences is also required. All students choosing this option must complete two semesters (4 credits each). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ENV 4501. Environmental Science Research. (4 Credits)
Individually tailored laboratory or field research conducted throughout the senior year. The project will be on a specific environmental topic under the supervision of a consenting faculty member and with permission of the Environmental Science Program Faculty Committee. Grade and credits are given only upon the completion and successful defense of a final research paper that integrates the project findings with previous published studies in environmental science. A weekly seminar that synthesizes previous environmental science coursework with research experiences is also required. All students choosing this option must complete two semesters (4 credits each). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Environmental Science (ENVS)

ENVS 3000. Environmental Science. (3 Credits)
(Formerly ENVS 1000.) This course covers the biological, chemical, and geological components of world ecosystems. The causes of both air and water pollution will also be covered. The interactions between the atmosphere, lithosphere, hydrosphere and biosphere will be described. The relationship between global change and the effects of human activities will be addressed as well.
Attributes: ENST, ESNS, ESPS, INST, ISIN.
Prerequisites: BISC 1404 or NSCI 1404 and CHEM 1322 or NSCI 1322.

ENVS 4401. Environmental Science Internship. (4 Credits)
Individually tailored research internship in an environmental institution. Placement will be in an environmental organization, government agency or business, under the supervision of a consenting faculty member, and with permission of the Environmental Science Program Faculty Committee. Grade and credits are given only upon the completion and successful defense of a final report integrating the practical internship experience with previous course work in environmental science is required. ENVS 4999. Tutorial. (1 to 4 Credits)

Environmental Studies (ENST)

ENST 1000. Introduction to Environmental Studies. (3 Credits)
This course is designed primarily to meet the requirements of environmental studies and environmental science majors. It provides an interdisciplinary overview of environmental problems from the perspective of their societal causes and effects, introducing students to environmental policy methods in the natural sciences, social sciences, humanities, and applied arts and sciences. Requirements include a 40 page essay blog, three class presentations, and a hands-on learning practicum outside of class (minimum 1 hr per week). Fulfills Environmental Studies and Policy Major Requirements.
Attributes: ENMI, INST, ISIN, SOIN.

ENST, ESNS, ESPS, INST, ISIN.

Attributes:
ENST 3000. Environmental Research Methods. (4 Credits)
Study of interdisciplinary and statistical research methods in environmental studies. Students complete a research project. Students have the option of coordinating their research project with an internship, GIS training, funding and publication submissions, and/or preparation for the senior research thesis course (ENST 4000) required for the environmental studies major. This course fulfills the environmental major requirement in Research and Statistical Methods and the environmental studies minor requirement in Electives. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ENST 3070. Green Architecture. (4 Credits)
A studio course in sustainable design practices for public spaces, landscapes, furnishings, or buildings. A major design project is prefaced with environmental research, technical strategies and standards, and in-depth case studies. Portfolio layouts. Field trips, workshops, lab fee, and office hours visits are required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Ethics (Law) (EHGL)

EHGL 0178. Professionalism in U.S. Legal Culture. (1 Credit)
This course, designed for international law students, will provide insights into the some of the prevalent aspects and norms of professionalism in the context of the U.S. legal profession—an understanding of how to nurture and develop a robust and sustainable professional persona, how to engage in cross-border intelligence and negotiation, diversity in the legal profession, law firm culture, and the role of lawyers as counselors and as leaders. The course will feature conversations with several prominent guest speakers and will end with an open discussion of the issues addressed in the seminar.

EHGL 0203. Professional Responsibility. (3 Credits)
Professional Responsibility explores the rules and law governing lawyers, the way lawyers find meaning in their work, and the role of lawyers in society. This course covers the major doctrinal topics in the field, including the unauthorized practice of law, the lawyer-client relationship, finding and billing clients, confidentiality, conflicts of interest, and duties to the legal system, the profession, and non-clients. The course also introduces students to professionalism, the debate regarding the proper role of the lawyer, and the question of why lawyers have special privileges and responsibilities. The course uses old MPRE questions and other multiple choice questions to focus the readings and the class discussions.

Ethics (Law) (EHGL)

EHGL 0208. Prof Resp: Corp Counsel. (3 Credits)
Professional responsibility for corporate counsel is a course designed for students who will likely represent public companies, either as outside counsel or as inside counsel. The ethics issues facing such lawyers are very daunting and are growing ever more complex. The risks to such lawyers include not just violating the ethics rules governing lawyers, but also exposure to sanctions by a myriad of regulators, as well as exposure to money damage law suits. In many circumstances there are no easy answers, as different jurisdictions approach a number of situations differently. As such, law students about to join the profession need to be aware of these problems and how best to address them.

EHGL 0209. Professional Responsibility: Criminal Advocacy. (3 Credits)
This seminar focuses on the ethical responsibilities of prosecutors and criminal defense lawyers. Topics include the allocation of decision-making authority, the duty of confidentiality and its limits, conflicts of interests, and ethical responsibilities in the investigation and trial of criminal cases. While focusing on the codified standards of professional conduct and other aspects of the law of lawyering, the seminar will also explore the relationship between the Constitution and professional conduct rules as well as how problems left unresolved by those rules ought to be addressed. A paper will be required. Enrollment is limited. Notes/Miscellaneous: This course satisfies the Professional Responsibility Requirement but may NOT be used to satisfy the Writing Requirement.

Attributes: CEED, CETH, INLJ, LIDR, LWPR.

Esperanza Valley's Green Transformation (EVGT)

EVGT 201. Introduction to Sustainable Design. (4 Credits)
This course introduces students to the principles of sustainable design, focusing on the integration of environmental, economic, and social sustainability into the design process. Students will be introduced to sustainable design tools and techniques, case studies of successful sustainable design, and the role of the designer in creating sustainable buildings and landscapes. The course will also cover the importance of sustainable design in the context of climate change and the need for sustainable design to be a driving force in the architecture and urban design professions.

Attributes: JD, LLM.

EVGT 202. Sustainable Urban Design. (4 Credits)
This course focuses on the design of sustainable urban environments, including the integration of sustainable design into urban planning and development. Students will be introduced to sustainable urban design principles, case studies of successful sustainable urban design, and the role of the designer in creating sustainable urban environments. The course will also cover the importance of sustainable urban design in the context of climate change and the need for sustainable urban design to be a driving force in the architecture and urban design professions.

Attributes: JD, LLM.
EHGL 0213. Prof Resp: Civil Litigation. (3 Credits)
This is a seminar on professional responsibility with a particular emphasis on ethical problems of interest to civil litigators. The text is Morgan, Rotunda & Dzienkowski, Professional Responsibility: Problems and Materials, Twelfth Edition (Foundation Press). We will use the ABA Model Rules of Professional Conduct, and supplemented by reference to the New York Rules of Professional Conduct. Our class discussions will examine the fundamentals of the attorney-client relationship; basic duties to the client of competence, confidentiality, and loyalty; and conflicts of interest. We will also discuss the legal profession and what it means to be a professional. Specific litigation issues will include the ethical dimensions of settlement negotiations, discovery and evidence gathering and especially e-discovery (e.g., inadvertent disclosure of confidential information), ethical standards in commencing litigation, litigation tactics, and client and witness perjury, interviewing and coaching. We will review the evolving ethical issues arising out of attorney’s use of social media. We expect to have guest speakers from time-to-time. This is a collaborative seminar, not a lecture course, and active course participation is expected. This is a three credit course.
Attributes: CEED, CETH, LIDR, LWPR.

EHGL 0226. Introduction to the United States Legal Profession. (2 or 3 Credits)
This course is about the professional responsibility of U.S. lawyers and is specifically tailored for international LL.M. students. As such, the course is meant to provide a holistic introduction to some of the key professional responsibility aspects that a foreign law-trained lawyer should expect to consider when working in the U.S. or dealing with U.S. lawyers from abroad. Using a textbook, the ABA Model Rules of Professional Conduct, and the NY Rules of Professional Conduct, supplemented by pertinent cases and other materials, this course will examine the fundamental notions that govern the conduct of lawyers in relation to their clients, third parties and the courts. There will be an in-class, open-book exam.
Attributes: LLM, LWPR.

EHGL 0260. Becoming a Lawyer: Discovering and Defining Your Professional Persona. (1 Credit)
This seminar will explore various topics related to law practice and developing a robust and sustainable legal professional persona. The seminar will focus on three broad features of defining and developing a professional persona: (1) Building blocks—(un)conscious (in)competence, habit formation, intelligence for lawyers, and leadership (2) self-management (mindset and dispositions), time management and organization, and wellbeing and sustainability and (3) relationships—working with others, talent management, effective communication, and your public professional persona. The course will conclude with student presentations reflecting on what they learned in developing their professional persona over the course of seminar. Grades will be based on regular written assignments and student presentations. This course is open to LLM students only.

EHGL 0299. Professional Responsibility: Lawyers and Justice. (3 Credits)
In the context of lawyers who work primarily to promote social justice and the public good, this course explores the legal ethics rules, the role of the lawyer in society, and the intersection between legal ethics and political philosophy. The course will examine the standard assumption that actors in the legal system are capable of neutrality, including the belief that lawyers should be “neutral partisans” and that judges should be “neutral arbiters.” Many, however, reject these perspectives. They argue that neutrality in the face of systemic white supremacy, racism, sexism, heterosexism, and transphobia only sustains inequality and oppression. These critiques, in turn, have generated conceptions of the lawyer’s role and the rule of law that rely on a commitment to equal human dignity, and not neutrality. These approaches include feminist, antiracist, rebellious, lgbtq+, religious, and law reform perspectives. The course will include both synchronous and asynchronous components. During the first eight class sessions, the asynchronous units will cover the law and ethics of lawyering and will account for approximately half of class hours. In those eight classes, the synchronous half will briefly review the law and ethics of lawyering and will primarily focus on lawyers’ and legal workers’ strategies for promoting social change. These eight synchronous sessions may include guest speakers. Students will lead the final five classes. Student leadership will include synchronous presentations, as well as blog posts and videos. Each student must also submit a ten-page final paper which may be on the same topic as the student’s class presentation. Throughout the course, students will also have to provide brief response papers. Satisfies the Professional Responsibility requirement. Attendance at the first class is mandatory.
Attributes: CEED, CETH, INLJ, LWPR.

EHGL 0319. Prosecutors: Law, Politics, and Ethics. (2 Credits)
This course involves the study of the Model Rules of Professional Responsibility and the New York Rules of Professional Conduct with an emphasis on alternative dispute resolution (ADR). During the past 35 plus years, an ADR ethical infrastructure has both developed and undergone rapid and irregular growth. Critical and complex ethical and professional responsibility issues relating to various aspects of ADR processes are challenging the legal profession and policymakers because such issues do not fit neatly into pre-existing structures. Such issues include counseling and decision making, duty of candor, confidentiality, conflicts of interests, unauthorized practice of law, fees, advertising and others. This course will also discuss the ethical issues impacting ADR providers and non-legal neutrals.
Attributes: LIDR, LWPR.

EHGL 0349. Prof Res: Alter Disp Res Ethic. (3 Credits)
This course examines issues of law, practice and theory relating to the work of lawyers in public interest settings. The principal work of the seminar is fieldwork: Students in the seminar work in small groups with other seminar students on projects in conjunction with public interest organizations, with supervision from the seminar faculty and from attorneys at those organizations. Projects have included the development of: know-your-rights guides and trainings for members of the public reports and proposals for legislative or institutional reform pro bono manuals for attorneys and litigation strategy for briefs or campaigns. Seminar requirements include development of and collaboration on a project with classmates, ongoing presentations regarding the project, a final product for the organization, and an analytic paper based on the project. The seminar requires a substantial time commitment and a willingness to work in conjunction with other students and lawyers.
Attributes: EXP, JD, PIE.
FASH 1800. Internship. (1 Credit)

This internship is an elective course offered to students currently enrolled in the fashion studies minor. Students participate in an unpaid, three-credit fashion internship for 15 to 20 hours per week for the duration of the semester. Coursework includes regular meetings with the fashion studies adviser, weekly journal entries, a resume review, and a final paper.

FASH 3800. Fashion Studies Internship. (3 Credits)

This internship is an elective course offered to students currently enrolled in the fashion studies minor. Students participate in an unpaid, three-credit fashion internship for 15 to 20 hours per week for the duration of the semester. Coursework includes regular meetings with the fashion studies adviser, weekly journal entries, a resume review, and a final paper.

FASH 3999. Fashion Studies Tutorial. (3 Credits)

Students minoring in fashion studies who wish to pursue independent study may apply to participate in this course. Students will work with the fashion studies adviser to design a course including objectives, course requirements, and a bibliography.

FASH 4800. Internship. (4 Credits)

FASH 4999. Tutorial. (4 Credits)

Fed Con Law (FCGL)

FCGL 0102. Constitutional Law. (4 Credits)

A study of the United States Constitution, judicial review and limitations, and separation of powers (both in relation to federal governmental powers and between federal and state governments), as well as the federal government’s powers to tax, declare war, and regulate commerce. This course also explores constitutional rights, including the Due Process and Equal Protection clauses, as well as segregation, disenfranchisement and discrimination based on race, sex, disability and sexual orientation.

Spring 2020, Professor Powell

FCGL 0129. Legislation and Regulation. (4 Credits)

Attributes: LDF, LIDR, LMCO.

This foundational course introduces students not only to the cases and doctrines concerning the U.S. Constitution, but also to the historical arc of how constitutional law has evolved and competing theories of constitutional interpretation. The course covers the scope of judicial review in our constitutional democracy, separation of powers, and basic fundamental rights. In addition to probing such critical questions as who are “We the People,” the course serves as an entry point to the study of constitutional law and helps orient students for upper level offerings.

Attributes: LLM.

FCGL 0131. Law of War. (2 Credits)

This seminar will examine the international law governing the reasons for going to war and its conduct. Students are expected to participate in weekly discussions and complete a take-home examination or paper.

Attributes: LLM, LWR.
FCGL 0202. Environ Deal Making and Strategy. (2 to 3 Credits)
The seminar examines the intersection of law and urban policy that makes New York City so fascinating and distinctive. Questions of authority, structure, and individual rights play a central but unheralded role in nearly every aspect of the life and governance of New York City. The course begins with an introduction to the division of power between the state and local governments. We then move to the distribution of power within local government by examining intra-local conflicts, such as those between the Mayor and the City Council. We then turn to a study of significant City institutions. Finally, the course turns to current events. I have selected several issues for us to explore but I may change the syllabus based on current events. We will select additional issues together during the first weeks of class based on your interests.<p>In my view, it is important for you to hear from and engage with scholars and practitioners in the field. Thus, many of our classes will include guest speakers. The course will be highly interactive and student participation will be an important component.<br/>

Attribute: PIE.

FCGL 0203. Advanced Constitutional Law. (4 Credits)

FCGL 0204. Supreme Court Seminar. (2 Credits)
This seminar will focus on significant cases pending before the United States Supreme Court during the 2018-2019 term. We will simulate the work of the Court by requiring students to write one or two briefs or bench memos to prepare the class for the cases we discuss.<br/>

Attribute: LLM.

FCGL 0260. Constitutional Rights and Human Rights in Comparative Perspectives. (2 to 3 Credits)
This seminar will compare the international law of human rights with the constitutional law of rights in the United States and other national systems. The seminar will examine the history, theory, and sources of rights in these systems, the institutions for implementing them, and the remedies for violations. The course is largely organized around comparing the treatment of particular rights in various systems: for example, equality (with a focus on race, gender, sexuality, and marriage equality), speech rights and privacy (on and off line), and economic and social rights. Students will develop papers on policy projects concerning cutting edge human rights matters, working in teams, under the supervision of the professor.<br/>

Attributes: ICE, INLJ, PIE.

FCGL 0262. Energy Law. (2 to 3 Credits)
This seminar will examine the relationship among religious institutions, secular society, and the state. Readings and discussion will focus on the free exercise and establishment clauses of the U.S. Constitution but will also include comparative and international counterparts to these constitutional provisions as well as relevant readings in political theory. The course will consider such questions as the role of religious institutions in secular society, their relationship to the state, the degree to which religious minorities may demand exemption from the laws and norms of secular society, the accountability of such institutions under civil and criminal law, among others. Each student will be expected to participate in class discussion and submit a term paper. No final examination will be given. This course may be used to satisfy the writing requirement.<br/>

Attribute: INLJ.

FCGL 0299. Constitutional Law. (2 to 3 Credits)
Professor Brettschneider. &lt;br&gt;Does the free speech guarantee of the First Amendment extend to obscenity? Does the Equal Protection clause ensure a right to gay marriage? An inquiry into these kinds of questions requires examination of the relationship between the language of the Constitution and its meaning. In this class we combine close analysis of the Constitution itself with examinations of scholarly debates over its interpretation and discussion of how these debates have played out in specific Supreme Court cases. We cover the debates over originalism, fundamental constitutional values, and the Constitution's reinforcement of democracy. We also delve deeply into Supreme Court case law in areas such as privacy, equal protection, free speech, free exercise, and establishment. Readings from Madison, Scalia, Breyer, Ely, Posner, Lawerence, Mackinnon, and Dworkin. Throughout the course our aim is to link issues of constitutional theory and Supreme Court doctrine. The grade will be based on class participation and a final paper. This class satisfies the writing requirement. &lt;p&gt;Professor Feerick: &lt;br&gt;This seminar is designed to create a greater awareness and understanding of the Constitution, examining where the language of the Constitution comes from and what values were intended to be expressed insofar as can be ascertained. It focuses on the Constitution's language, history, and creation. Primary sources, rather than cases, will be the material and emphasis of the class: English constitutional developments, colonial charters, early state constitutions, the Records of the Constitutional Convention of 1787 and the Ratifying Debates, the Federalist Papers, and the debates in early congresses. The step by step development of the Constitution (including the Bill of Rights) forms a major part of the classes. Several modern issues will also be treated, for example: Security and Freedom, Succession, Continuity in Government, and Electoral Reform. There will also be several guest speakers during the Seminar.&lt;p&gt;Class participation comprises 15% of the Final Grade. A paper on the subject of the Constitution will constitute 85% of the Final Grade. I am willing to work with a student who wants this class to qualify for their writing requirement.<br/>

Attributes: INLJ, JD, LLM, PIF.

FCGL 0302. Constitution, Presidency, Law, and National Security. (2 Credits)
Focusing on events in the 21st Century, this course examines the evolution of national security norms from the founding period to the present. We will focus on the post 9.11 presidencies, the history and present realities of the presidential authorities, the separation of powers doctrine, and those institutions within the executive branch that function as the mainstays of national security – the Department of Homeland Security, and the Departments of Defense, Justice and Treasury, among others. Readings will include historical as well as current documents and texts. Discussions and guest speakers will focus on current events as relevant.
FCGL 0317. First Amendment. (4 Credits)
This course covers many of the core issues of free speech, free press, freedom of religion, and the establishment clause. We will discuss Supreme Court cases, and surrounding commentary, on: political advocacy of unlawful action; fighting words; hate speech; libel; revelation of private facts; obscenity; pornography; commercial speech; prior restraints; content-based vs. content-neutral restrictions; the public forum doctrine; government speech, including government as educator; reporter's privilege; government as employer; the right not to speak and freedom of association, access to the mass media, broadcasting and content regulation; religious arguments in the lawmaking process; religious symbols in governmental space; prayer in public school; public funding of religious schools; and exemptions and accommodations for the practice of religion. Pre-requisites: Constitutional Law Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INLJ, IPIF, LMCO, PIE.
Prerequisite: FCGL 0102.

FCGL 0320. State and Local Government. (2 or 3 Credits)
This course addresses major legal issues facing state and local governments in a time of rapid change, including (1) the distribution of power between federal, state and local governments; (2) how states allocate authority among legislatures, the judiciary, and the state executive branch; (3) the forms, structure, powers, financing, and liability of local governments, and (4) the relationship of state and local governments both to public employees and the public. The course will cover legal developments across the country, but will also highlight key aspects of New York State and New York City law. A key course goal is to highlight the immediate relevance of state and local governance, given that law school courses often focus on federal regulation and federal decision making. We will supplement the textbook with case studies after becoming familiar with the basic structure of state and local relationships. Students in this course will be evaluated on a combination of short essays and an end-of-semester exam.
Attribute: PIE.

FCGL 0409. Birthright Citizenship and the United States Constitution. (2 Credits)
This seminar will examine the historical evolution of the two great principles of birthright citizenship—jus sanguinis or the law of blood, which flows from the Roman law tradition, and jus soli or the law of soil, which is rooted in English common law. We will then turn to how Americans, from the ratification of the Constitution to the present, have viewed the two great principles. Students may write short reactions papers or one long paper on a topic of their choosing.
Attribute: INLJ.

FCGL 0415. Firearms Law. (2 or 3 Credits)
This course will cover federal and state statutes, regulations and case law surrounding the acquisition, possession, sale and use of firearms. The course also will examine background federal and state constitutional issues and firearms policy questions. This is a paper course that may be used to satisfy the the writing requirement.
Attributes: LLM, LWR, PIE.
FCGL 0929. Constitution and the Presidency. (4 Credits)
Is the president’s power to launch a nuclear attack unlimited? Does the Fourteenth Amendment’s Equal Protection Clause constrain a president in matters of immigration and foreign policy? Can the President be criminally indicted while in office? In this course, we will explore in depth the powers granted to the president under Article II and expanded over time, the Bill of Rights, and the mechanisms created by the Constitution to give other branches of government the potential power to stop a president. We use as our guide founding documents (especially the Federalist Papers), case law, historical examples, and recent controversies. <p> The class is divided into three parts. Part I examines the formal and informal powers of the president (the Take Care Clause, the commander-in-chief power, and the power to hire and fire employees of the executive branch). Part II looks at the question of the extent to which the Bill of Rights contains a president (sedition and the First Amendment, ‘enhanced interrogation’ and the Eighth Amendment, and Trump’s travel ban and the Fourteenth Amendment Equal Protection Clause). Part III looks at the removal of a president, focusing on impeachment and criminal indictment. We discuss possible possible grounds for removal, including emoluments violations and obstruction of justice. <p> Although the course includes the study of the current presidency, it will aim to think about the presidency more generally as an office and the degree to which it is constrained by the Constitution. The grade will be based on two papers and a class presentation.
Attributes: LLM.

Field Study (Gabelli Graduate) (FSGB)

FSGB 7682. Transnational Application. (3 Credits)
The Transnational Application Project provides an opportunity to integrate and apply the tools, techniques, and perspectives gained in the Executive MBA program in a real world transnational organization setting. The setting for the course may be a consulting project with a specific transnational organization, study of an organization to move it to the transnational form, and/or study of and visit to a business region where transnational companies have been spawned.

FSGB 7810. Field Study Program. (3 to 9 Credits)

Film and Television (FITV)

FITV 1501. Understanding Film. (4 Credits)
(Formerly COMM 2471): Examination of the aesthetics of film, its formal language and structure. Screening and analysis of representative films. Study of film theory and criticism. Strongly recommended that students complete this course before other film courses. Lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, COLI.

FITV 1601. Understanding Television. (4 Credits)
(Formerly COMM 3332): Critical Analysis of television as a storytelling medium. Study of current approaches to television narrative and style. Screenings and discussion of TV series and news programming. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, COLI, JOUR.

FITV 2425. Digital Video Production I for FITV. (4 Credits)
(Formerly COMM 2222) This introductory workshop class will teach the fundamentals of digital video production and cinematic storytelling. Students will learn concepts, techniques, and technologies pertaining to digital video and sound through hands-on production and post-production assignments. We will explore the aesthetics and the communicative potential of the medium through screenings, critiques, and exercises. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, DTEM.
Mutually Exclusive: DTEM 2425.

FITV 2511. Screenwriting I. (4 Credits)
(Formerly COMM 3405): Analyzing and writing screenplays for theatrical motion pictures. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM.
Prerequisites: FITV 1501 or COMM 2471.

FITV 2531. Serials, Series, and Franchise Films. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, CVW, ENGL, FIPR.

FITV 2532. Fashion Costuming in Film. (4 Credits)
Clothing design and its ancillary functions play a central role in film meaning, audience response, and the economics of film industries. With this primary assertion at its center, the course explores the myriad ways fashion operates in film. Students will engage issues of film aesthetics, marketing, fan culture, and stardom within historical and contemporary contexts. In addition to formal analysis and theorization of films, analytic approaches include how the effects of film are felt in larger patterns of consumer behaviors and how film reinforces the branding of fashion houses, designers, and designs. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, FASH, WGSS.

FITV 2546. The Horror Film. (4 Credits)
A critical examination of cinematic horror. Using theoretical, industrial, and historical frameworks, examines the genre’s evolution from its roots in gothic literature and Grand Guignol to the globalized cinematic landscape of the present day, with a particular focus on its complex relationship to cultural anxieties and social formations around race, gender, sexuality, class, dis/ability, nationality, and religion. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Updated: 07-27-2020
FITV 2547. Film and Gender. (4 Credits)
This course explores the interrelated nature of gender and film in aesthetics, production, marketing, and reception. To do so, the course focuses on film theory and criticism about representations of femininity and masculinity, which include attendant issues of sexuality, embodiment, race, class and nationality. This approach will be augmented by considerations of historical and cultural contexts, developments within film industries, key figures in film production, and audiences. Films will include mainstream commercial films and filmmakers as well as feminist, avant-garde, and counter-cinemas.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, COLI, WGSS.

FITV 2601. History of Television. (4 Credits)
(Formerly COMM 3320) This course surveys the aesthetic, technological, and industrial developments of American television. Starting with the foundations of television in radio and in the global developments of television technologies, the course moves through the development of the network era up to the transitional stages between network and post-network eras. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASAM, ASHS.
Prerequisites: FITV 1601 or COMM 3332 or COMM 2330.

FITV 2611. Television Production I. (4 Credits)
Practical studio management and creative employment of technical facilities for videotaping and studio production of a variety television programming formats. Software and hardware are covered. Lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, FIPR.

FITV 2612. Writing Producing Web Series. (4 Credits)
A unique narrative form exploding in popularity, the web series provides young artists a chance to produce their own stories and see their work go viral. In this production workshop class, students will study what goes into creating a successful web series—including techniques for building emotionally engaging stories, three-dimensional characters and a series arc—and then write, shoot, edit and produce the first episode of their own original series. An essential experience for writers, directors, actors or anyone in the creative arts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, FIPR, NMAT, NMDD.
Prerequisites: FITV 2511 or COMM 3405 or DTEM 2425 or COMM 2222.

FITV 2659. The Broadcast Industry. (4 Credits)
The examination of the American broadcasting industry from a variety of perspectives, such as regulation, advertising, programming, technology, institutional structure and audience research. Lessons from broadcast history are used to shed light on contemporary concerns. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM.

FITV 2670. Television and Social Change. (4 Credits)
This course explores television's complex relationship to social change. While television's commercialism and focus on entertainment may seem antithetical to activist politics, activists used the medium to gain visibility for their causes, demand equitable representation and employment practices, and create programming that spoke back to mainstream TV's reductive and controlling representations. The course engages with scholarly and activist literature on theories of television, representation, and social change as well as case studies of public and commercial television in various national and historical contexts. It also considers the possibilities and limitations for activism via television brought about by transformations in media technology and culture, particularly those related to online distribution, digital media, and globalization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, CELP.

FITV 2674. Teen Television. (4 Credits)
In this course, we consider global television that represents teens and programs that hailed teen audiences. The concept of the teenager is a relatively recent development in U.S. culture, emerging in the 1920s. From that moment, media has played an important role in the creation, maintenance, and revision of discourses of the teenager. Thus, one goal will be to assess the ways that teenagers have been represented and targeted at different points in time and in different genres of television. Secondly, we will consider whether teen television has developed as its own genre in the last 30 years and how that corresponds to theories about global youth cultures and media. Lastly, we will discuss the ways in which these television representations correspond to teens' lived experiences and become the vessel for adults' hopes, anxieties, and nostalgia. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM.

FITV 3425. Digital Video Production II. (4 Credits)
Students will devote the semester to developing a narrative or documentary project of their choosing from concept to post-production. This workshop will allow students to evolve technically and conceptually through screenings, critiques, tutorials, readings, and practice. This is an intermediate class, and students must have taken some sort of introductory film/video production class prior to enrolling, and have some basic familiarity with DV cameras and editing software. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, DTEM, JOUR.
Prerequisites: DTEM 2425 or FITV 2425 or FITV 3512 or VART 1265 or VART 3261 or VART 3262 or COMM 3525.

FITV 3501. Film Theory and Criticism. (4 Credits)
(Formerly COMM 3470) This course is a survey of classical and contemporary film theory. Readings focus on psychological, semiotic, psychoanalytic, feminist, post-colonial and transmedia approaches to the study of film. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Pre-req: FITV 1501 or COMM 2471 OR BY PERMISSION OF THE INSTRUCTOR.
Attributes: ACUP, AMST, ASAM, COLI.
Prerequisites: FITV 1501 or COMM 2471.
FITV 3505. Topics in Film Studies. (4 Credits)
Students will learn about dramatic structure, scene construction, characterization, dialogue, and cinematic storytelling techniques through the analysis of classic and contemporary feature-film screenplays. The focus will be on traditional dramatic narrative, but alternative approaches will also be considered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, COLI.

FITV 3511. Screenwriting II. (4 Credits)
Analyzing feature screenplays and working towards production of a feature length screenplay. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, FIPR.
Prerequisites: FITV 2511 or COMM 3405.

FITV 3512. Film/Television: Narrative Basics. (4 Credits)
This class will focus on teaching students the basics of cinematic storytelling: how to conceptualize, direct, shoot and edit a dramatic narrative. Students will receive training on camera and sound equipment and editing software, and will then direct a series of exercises, scenes, and short narratives, while also working on creating their classmates’ projects. Student work will be critiqued in group sessions as well as one-on-one meetings with the professor. In addition, scenes from classic and contemporary film will be analyzed and discussed in class. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, FIPR.

FITV 3532. Landmarks, Locations, and Adaption. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM.

FITV 3534. Fashion in British Film and Television. (4 Credits)
This course considers the historical and contemporary coconstitution of British fashion, cinema, and television. As a city that generates and is defined by formative industries, cultural institutions, and socio-political movements associated with fashion and media, London plays a crucial role in our explorations. We will analyze historically specific and culturally significant moments when fashion coincided with television and/or film to express the anxieties, pleasures, and investments of British culture(s) on a regional, national, and international scale. To do this, we will study film and television texts that utilize fashion; consider issues of identity politics that include class, sexuality, race, and gender; and explore the industrial and cultural contexts that gave rise to fashion-driven films and television programs. Significant course themes include: war, the monarchy, countercultural movements, empire and imperialism, and the city. Film and television texts are both historical and contemporary and include a wide range of genres and styles. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, CCUS, COMC, FASH.

FITV 3535. Film Adaptation. (4 Credits)
This course seeks to examine the complex relationship between a cinematic adaptation and the source material from which it is derived. Select essays, novels, plays, comic books and short stories will be studied with regard to the works they inspire, and how narrative changes when works are presented in a new medium. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, COMM.

FITV 3537. Plays and Screenplays. (4 Credits)
The purpose of the five week project is to write a one-act play and a short screen play, and to explore the relation between the two forms. Elements of craft will be introduced to provide a vocabulary and a scaffolding. Contemporary plays and screenplays will be used as models. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM.

FITV 3541. Screenwriting I. (4 Credits)
Students will receive training in the craft of screenwriting, including dramatic structure, scene construction, characterization, dialogue, and cinematic storytelling techniques through the analysis of classic and contemporary feature-film screenplays. The focus will be on traditional dramatic narrative, but alternative approaches will also be considered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, FIPR.

FITV 3544. The Film Director. (4 Credits)
An examination of the tools and techniques of film directing. How do the great directors make full use of the medium’s creative potential? How are stories told and meaning communicated to viewers? What does it mean when we speak of a director’s style or voice? This course will combine close study of classic and contemporary films, lectures and discussions, in-class demonstrations, and individual and group research projects. Topics covered will include the transition from script to screen, camerawork (framing, blocking, movement), lighting, working with actors, editing, sound and music, and more. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM.
Prerequisites: COMM 2471 or FITV 1501.

FITV 3545. Film and Television of Hitchcock. (4 Credits)
(Formerly COMM 3451): A critical examination of Hitchcock's cinema. Students explore Hitchcock's major films, including Rear Window, Vertigo and Psycho from a variety of perspectives, including psychoanalytic, narrative and feminist theory. Emphasis on Hitchcock’s role in the British and American studio system and his mastery of cinematic technique and language. Lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, COLI.

FITV 3551. Film History 1950-Present. (4 Credits)
A survey of film history from 1950 to the present, looking at industrial practices, stylistic developments and the impact of new technologies of the film image. The contribution of the major national cinemas will also be explored. Lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMCS, AMST, ASAM, COLI, INST, ISIN.
FITV 3553. Hollywood Genres. (4 Credits)
(Formerly COMM 3401): Cultural, psychological, socioeconomic analyses of theme, plot, characterization, and iconography of popular formula films. Lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, COLI.

FITV 3554. African American Cinema. (4 Credits)
The success of movies such as Black Panther and the popular recognition of filmmakers like Ava DuVernay and Jordan Peele suggests that we have entered a new era of African American media representation. This class will explore African American cinema from the silent era to the contemporary moment. We will discuss African American participation in the mainstream film industry in addition to the most robust tradition of black independent cinema. Particular attention will be paid to the intersections of black aesthetics and cultural politics on screen; representations of blackness in relation to gender, sexuality, and class; and issues of spectatorship and identification as well as stardom and performance. Looking at the past and present terrain of African American cinema, we will interrogate the fundamental concept of Black film and imagine what its future holds. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, JOUR.

FITV 3555. The City in Film and Television. (4 Credits)
(Formerly COMM 3438): In what way is the ‘mythical city’ of the movies a reflection of the real city in which we live? Indeed, how are issues such as ethnicity and class depicted throughout the mass media? The course will offer an investigation of key films from various genres and eras, including silent films, science fiction films, musicals and documentaries, in order to investigate how environment shapes character in a narrative film. Course offering for Communication & Media Studies, History and American Civilization students Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM.

FITV 3558. Italian Film. (4 Credits)
This course traces the development of Italian film from the silent era through the telefona bianco (white telephone) films of Mussolini era and the post-World War II Neo-realist films of Rossellini, De Sica and Fellini. It also examines the films of Antonioni, Olmi, Pasolini, Wertmuller and the Taviani brothers. Lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, INST, ISEU.

FITV 3565. The Documentary Idea. (4 Credits)
(Formerly COMM 3408): The history of documentary and the analysis of contemporary works. An examination of the variety of documentary language formats and visual styles and their meaning and impact. Lab fee. Credit will not be given for both this course and FITV 3566. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, JOUR.
Mutually Exclusive: FITV 3566.

FITV 3566. Documentary Film. (4 Credits)
An introduction to the art of documentary film with a focus on the genre by such important figures as Flaherty, Vertov, Grierson, Lorentz, Leacock and Wiseman. The impact of technology, cultural and social forces, and the vision of individual Film makers in shaping the documentary form. Lectures by guest Film makers. Lab fee. Note: Credit will not be given for both this course and FITV 3565. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, JOUR.

FITV 3571. Science Fiction in Film and Television. (4 Credits)
Sociological, cultural, and psychoanalytic analysis and criticism of the science fiction genre in cinema, television, radio, print and other media. Lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, DTEM.

FITV 3578. American Film Comedy. (4 Credits)
The course takes both a theoretical and historical approach to Hollywood film comedy from the silent classics of Sennett, Chaplin, and Keaton to the best of contemporary work in the genre. Lab Fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, COLI.

FITV 3579. Movies and American Experience. (4 Credits)
(Formerly COMM 3108): A study of the American character as portrayed in American feature films from the early 20th century to the present. Lab fee Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, COLI, INST, ISAS.

FITV 3585. Transnational Asian Cinema. (4 Credits)
(Formerly COMM 3414): This course explores classic and contemporary films from a variety of Asian countries. We will survey a broad range of directors, styles, and genres, considering films as individual works of art but also examining them within their historical, national, and cultural contexts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, COLI, PLUR.

FITV 3587. United Kingdom and Irish Film. (4 Credits)
This course examines classic English film from the early Hitchcock period through the post-war literary adaptations of David Lean and Laurence Olivier, the Ealing comedies and the social realist films of Tony Richardson and Jack Clayton. Contemporary British film is represented in the work of Mike Leigh and Terence Davies. Irish film is explored through the work of directors such as Neil Jordan, Jim Sheridan, Pat O’Connor, and others. Lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, INST, ISEU.
FITV 3588. Global Cinema. (4 Credits)
(Formerly COMM 3410): A comparative study of films produced by various nationalities and cultures. Analysis of differing cultural, political and economic factors affecting filmmakers as they deal with basic human concerns such as individual self worth, relationships, freedom and conformity and values and moral choice. Lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, CCUS, COMC, GLBL, INST, ISIN.

FITV 3601. Television Theory and Criticism. (4 Credits)
This course is a survey of classical and contemporary television theory. It explores multiple theories of television production, consumption, and exhibition as well as the development of television studies as a field. The course considers television as a historical technology situated in social and economic structures and as a multiplicity of technologies in an age of media convergence. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM.
Prerequisites: FITV 1601 or COMM 3332.

FITV 3604. Critical Production Studies in Film and Television. (4 Credits)
This course examines the complex labors and protocols involved in film and television production. In doing so, the course aims to critically interrogate and de-mythologize what it means to ‘work in film’ or ‘work in television.’ Rather than a traditional study of media industries according to their economics and regulations, the course employs humanistic and cultural studies approaches to production studies. These approaches illustrate how the work of film and television production is performed, who performs it, and the implications of labor practices within their historical and contemporary contexts. To illustrate the wide range and types of production workers involved in film and television industries, the course includes highly-visible occupations, such as directors, writers, and actors, as well as less-visible workers, such as costume designers, special effects artists, clerical staff, and production assistants.
Attributes: AMST, ASAM, COMC.

FITV 3605. Topics in Television and Radio. (4 Credits)
This course takes advantage of the presence in New York of visiting scholars and practitioners. Courses may have a television or radio combined emphasis, with production and/or academic focus, and each will concentrate on a particular field that is under-represented in regular course offerings. (Course may be repeated.) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, JOUR.

FITV 3624. Writing Television Dramas. (4 Credits)
(Formerly COMM 3305): This course applies traditional principles of dramatic writing to the television genre, including soap operas, pilots, mini-series and docudramas. Students will analyze outstanding examples of the genre and are required to produce professional-level scripts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, FIPR.

FITV 3626. Writing the Original Television Pilot. (4 Credits)
An immersive writing workshop that covers core concepts on the craft and business of writing for television. Students will create their own original TV series (half-hour comedy or one-hour drama) and write both a complete pilot script and a show bible. This course is a good follow-up or prelude to FITV 3624 Writing the TV Drama, in which students write a spec episode of an existing series. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, FIPR.

FITV 3629. American Television History: First 60 Years. (4 Credits)
This course will examine the history of American television, from its early experimental years until the current era. Topics will include the “Golden Age of Television”, the rise of TV broadcast journalism, the influence of television on American politics, the development of the socially conscious sitcom such as the comedies of Norman Lear, Mary Tyler Moore and M*A*S*H. The beginnings and current state of PBS (with emphasis on its children's programming and quality dramas) and the current fragmentation of the audience as a result of the growth of cable television and how the new technologies such as streaming and DVRs have influenced programming, the audience and advertising. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, FIPR, JOUR.

FITV 3637. Queer Studies in Film and Television. (4 Credits)
This course examines “queer” independent and mainstream film and television. We will delve into classic Hollywood cinema, “New Queer Cinema,” European cinema, global and “transnational” cinema, as well as U.S. and Canadian TV series. We will apply queer, feminist, film, and television theories to the media in order to more profoundly understand our objects of study—the films and TV series themselves—while simultaneously using our objects to better understand the theories and histories. As we unpack assumptions about sexed bodies, sexual desires, gender identities, and sexual identities, we will examine the ways in which films and TV series uphold and subvert the status quo in regards to gender and sexual norms. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, JOUR, WGSS.

FITV 3638. British Cinema and Television. (4 Credits)
British Heritage Cinema, arguably the most identifiable and lucrative form of British national cinema, emerged in the 1980s and continues to define “Britishness” through its nostalgic and individualized view of the past. In looking at costume dramas, literary adaptations, and biographical films, this course explores Heritage Cinema through its key themes and aesthetics, the cultural context in which it gained and retains popularity, and its material and ideological consequences. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM.
FITV 3639. Quality Television/Cult TV. (4 Credits)
This class examines two key categories for grouping television shows—"quality television" and "cult TV"—and considers the history behind these terms, the technological changes in the industry that brought them about, and the ways in which the two terms have increasingly intersected. These two approaches to TV shows also map out an industry-based approach (the long-standing marketing strategy of "quality television") and an audience-based approach (the intense fandom that generates a cult TV show), allowing the class to study texts by considering and combining both industrial histories of television and reception theories of television. Bringing the material into the present day, the class also ultimately brings the two terms together, "quality" and "cult," as new technologies and their attendant media strategies and audience practices have increasingly blurred their distinction—and cult audiences become the arbiters, and marketers, of quality TV. FITV 1601 Understanding Television is recommended as a pre-req.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM.

FITV 3647. TV, Identity, and Representation. (4 Credits)
This course explores gender, race, and class as intersectional identities that inform and are informed by the aesthetics, production, marketing, and reception of television. To do so, the course focuses on theory and criticism about representations of femininity and masculinity, race and ethnicity, and economics and involves attendant issues of sexuality, embodiment, desire, and identification. This approach will be augmented by considerations of historical and cultural contexts for television texts, developments within television industries, key figures in television production, and audiences. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, CCUS, COMC, JOUR, LALS, PJMJ, PJST, WGSS.

FITV 3648. Television, Race, and Civil Rights. (4 Credits)
"The Revolution Will Not Be Televised." This was the rallying cry of Black radicals during times of national unrest, especially associated with the Black Power Movement. This course introduces students to the intersection of television, race, and civil rights broadly. How does U.S. TV engage with racial injustice and the fight for civil rights? How does the mass medium articulate pressing issues concerning the historical struggle for equality for African Americans? Students will engage with concepts in television studies as they connect to representations of racial Blackness on the small screen, paying special attention to TV texts, audiences, and industries. Topics discussed include mediations of protest, violence, and criminality in news media as well as social and political commentary in fictional programming. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AFAM, AMST, APPI, ASAM, PLUR.
Prerequisites: COMM 1000 or COMM 1010.

FITV 3658. Italian Americans on Screen. (4 Credits)
What can explain the shocking popularity of Jersey Shore? Where did the controversial images of Italian Americans that the show displays originate? This course proposes an examination of Italian Americans as represented in mainstream and independent American cinema (and later television) from the silent era to the present. Particular attention will be paid to the traditional stereotypes associated with these representations (how they arose and why they continue to exist), two specific genres—the gangster film and the boxing film—and how Italian-American filmmakers respond to and re-vision them. The class will also include field trips to Arthur Avenue and Little Italy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, COLI, PLUR.

FITV 3678. Television Comedy and American Values. (4 Credits)
(Formerly COMM 3310): An examination of the major genres of American television comedy and their relationship to American culture. The influence of social, artistic and commercial factors on comic patterns and techniques are considered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, CCUS, COMC.

FITV 3688. Global Television. (4 Credits)
This course introduces students to theories of global television studies, including the reception of US TV abroad as well as the circulation of television in a post-network and multi-platform global context. Do you watch Korean TV on Drama Fever? Have you ever wondered what it would be like to watch The Fresh Prince of Bel Air in South Africa? Or are you also enchanted by The Great British Bake Off on PBS? We will explore questions and case studies like these in detail to consider how they impact our understanding of the television industry across cultures and language as well as television's potential to unite and/or divide communities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM.

FITV 4570. Films of Moral Struggle. (4 Credits)
(Formerly COMM 4001): The course studies the portrayal of human values and moral choices both in the narrative content and the cinematic technique of outstanding films. Class discussion tends to explore ethical aspects of each film’s issues, while numerous critical analyses of the films are offered to develop the student's appreciation of the film's artistic achievements. Lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASRP, BEHR, BEVL, CELP, COLI, EP4, PJMJ, PJST, REST, VAL.
FITV 4625. Writing Television Sitcoms. (4 Credits)
(Formerly COMM 4708) Sitcoms are shot by multiple cameras which limit the action to one or two sets. This practically eliminates all action lines in a sitcom screenplay, leaving behind mostly dialogue. This class teaches that behind that wall of sitcom dialogue, sophisticated writers have meticulously developed an invisible scaffolding of comedic tension which requires as much or even more effort than coming up with clever one-liners. This course teaches students to integrate "comedic tension" into all levels of work: from episode premise, to sequence, to scene. TV sitcom writing is performed in teams. Therefore students will write episodes together, and learn skills required to be a comedy staff writer: including originality, creativity, humor and supporting classmates with their scripts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, FIPR.

FITV 4660. Ethics of Reality Television. (4 Credits)
Reality TV is a vast genre that has had an immense impact on society. This course will engage with the long history of reality programming in news, magazine shows, documentaries, talk shows, game shows, and what we now commonly understand as popular reality TV series. The course will focus on the ethics of producing, appearing on, and watching different forms of reality television. Students will examine issues concerning surveillance and voyeurism, governmentality and citizenship, crisis and scandal, tabloid and spectacle, exploitation, and issues concerning race, class, gender, sexuality, disability, and religion. The course will explore how television helps define our mediated reality and the values that underpin such representation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, ARSP, CELP, EP4, JOUR, VAL.

FITV 4676. Television and Society. (4 Credits)
A problem-based and issue-oriented analysis of the medium as it affects basic social institutions and values. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, FIPR.

FITV 4999. Tutorial. (1 to 4 Credits)
Independent research and readings with supervision from a faculty member.
Attributes: AMST, ASAM.

Finance (Graduate) (FNGB)

FNGB 6411. Intro Financial Sys & Methods. (3 Credits)
FT MBA CORE/ PMBA FLEX CORE COURSE. Introduces the financial system and basic methods of valuation. Students will learn how to interpret financial data reported in the press and will discuss topical subjects facing the financial industry and the economy. Course topics include: financial markets, instruments, and institutions; time value of money, net present value, and applications; valuation of stocks and bonds; elements of firm and enterprise value; risk and return. (Formerly Financial Environment)
Prerequisites: (ACGB 6111 (may be taken concurrently) or GBA Waiver Fundamentals Acct with a score of 070) and (BEGB 6220 (may be taken concurrently) or GBA Waiver Managerial Eco with a score of 070).
Mutually Exclusive: MMGB 6411.

FNGB 7415. Credit Management. (3 Credits)
This course focuses on the analytic approach (stemming from Basel II capital accords) and will help students make wise credit decisions and manage lending portfolios. Topics include the latest lending techniques based on cash flow, advanced forecasting methods (including simulation and stochastic optimization), pricing, portfolio management, default probability, valuation analysis risk rating and credit derivatives.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7421. Prins of Modern Finance. (3 Credits)
Provides a conceptual framework that allows both corporate finance and portfolio investment decisions to be viewed and understood in a unified context of risk and return. Examines concepts of valuation, risk and return, diversification, asset pricing and efficient markets.
Prerequisites: (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

FNGB 7422. Corporate Finance. (3 Credits)
Studies corporate finance and its specific decisions. Topics include evaluating capital expenditure proposals, forecasting financing requirements and selecting sources of financing. The course also discusses working capital management, dividend policy and contingency planning, and addresses the additional challenges of multinational firms. Students taking FNGB 7422 Corporate Finance will not receive credit for FNGB 7400 Business Finance.
Prerequisite: FNGB 7421.

FNGB 7423. Mergers, Acquisitions, and LBOs. (3 Credits)
Focuses on identifying and evaluating target companies and structuring deals. Also considers the economic and social impact of such changes in corporate ownership. Students analyze recent cases, evaluate strategic rationale, examine deal structuring and assess financial impact.
Prerequisite: FNGB 7421.

FNGB 7431. Options and Futures Markets. (3 Credits)
Examines the institutional aspects of options and futures markets and discusses the strategies of hedgers, arbitrageurs and speculators. Provides an introductory analytical foundation for pricing futures and option contracts.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7433. Fixed Income Analysis. (3 Credits)
Introduces techniques for valuing fixed income securities and their derivatives. Emphasizes pricing and risk-measurement for government, corporate and mortgage-backed instruments. Analyzes embedded options using the binomial model. Develops fixed-income trading and portfolio management techniques, including the use of repo, futures, options, swaps and credit derivatives. Examines theory and empirical evidence on the term structure of interest rates, including the derivation of spot and implied forward yield curves.
Prerequisite: FNGB 7421.
FNGB 7441. Money Credit Interest Rates. (3 Credits)
Studies the role of money, credit and interest rates in the efficient and ethical functioning of domestic and global financial markets. This building-block course assumes a background in macroeconomics and finance, and it establishes a foundation for further study in all areas of finance. Topics include: flow of funds and interdependency within the financial system; the Federal Reserve System and its role in money creation; interest rates; the links between interest rates and the growth of money; and the effects of inflation and term structure. Prerequisites: BEGB 6220 and FNGB 6411. Also offered as BEGB 7240.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7455. Global Finance. (3 Credits)
The first half of the course focuses on the theories and practices of world trade, including comparative advantage, the changing trade competitiveness of nations, and protectionism. The second half focus shifts to developing countries: including foreign investment and technology, and investment and trade opportunities, policies and regulations. For SATURDAY / HYBRID sections of this course, there will normally be 4 class meetings, and the balance on-line / contact the professor for further detail. Prerequisite: BEGB 6220.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7458. Contemp Issues Globl Fin. (3 Credits)
Explores current issues relevant to the global financial system, including international commercial and investment banking and international investments. Emphasizes the underlying conditions and fundamental trends in various sectors of international finance. Also offered as BEGB 7243.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7460. Portfolio Management. (3 Credits)
Examines portfolio objectives and links them to appropriate investment strategies. Considers the asset-allocation decision, equity and fixed-income portfolio management, return enhancement/risk control techniques and performance evaluation. Commercial-level portfolio optimization software is applied to a range of institutional portfolio problems.
Prerequisite: FNGB 7421.

FNGB 7470. Real Estate Finance. (3 Credits)
Discusses the major factors affecting the valuation and financial structuring of real estate, including general tax and depreciation policies. Presents the roles of principal lending institutions, mortgage banks and investment banks in real estate lending, syndications and partnerships. Also surveys real estate-related securities and their markets.
Attribute: ABEP.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7475. Marketing of Financial Service. (3 Credits)
Provides a scientific understanding of tactics and strategies associated with the marketing of financial services. Emphasizes the role of industry deregulation, intensified competition, and the emergence of new technologies and products on the emerging marketing practices used by financial services institutions. Explore consumers' unique decision-making styles in financial matters, the effects of technology deployment, and the fiduciary constraints that guide marketing activities in the markets for commercial banking services, mutual funds, investment banking services, insurance and other forms of financial services.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

FNGB 749A. Financial Modeling. (3 Credits)
This course helps students develop the type of excel – based financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Students deliver written and oral presentations of their models and practice critical skills for a successful career in finance.
Attribute: ASDM.
Prerequisite: FNGB 7421.

FNGB 749C. Venture Capital Financing. (3 Credits)
We will examine the changes in the asset class over time – from the formation of American Research & Development in 1946 to the formation of some of the angel-type funds of the present. We also will examine the geographical differences between venture funds – West Coast and East Coast . We also will look at specialization – the beginnings of IT-focused investing and the move into healthcare and finally into energy. Finally we will examine the phenomenon of global venture capital. How does that vary from the way venture capital is practiced in the US. The class will be taught in modules and we also will rely on practitioners and experts to visit with the class. Where possible, the students will be asked to visit venture capital fund presentations, expert briefings as well as personal briefings.
Attribute: ABEP.
Prerequisite: FNGB 7421.

FNGB 749E. Technical Analysis. (1.5 or 3 Credits)
This course is designed to inform students about how the markets and individual stocks behave (i.e., technical analysis), and how they differ from the economy and individual companies (i.e., fundamental analysis).
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749I. Equity Analysis. (3 Credits)
This course will feature a series of guest lecturers who are highly regarded experts in their respective areas. The course will cover wealth management, private equity, equity analysis in general and analysis within specific industry sectors such as retail, media, insurance, etc. We are looking for highly motivated students who will ask lots of questions and who will engage the guest lecturers in meaningful dialog during the discussion periods.
Prerequisite: FNGB 7421.

FNGB 749J. Sustainability and Finance. (3 Credits)
In this course we explore how the evolving needs of society are changing the way financial theories, tools, and techniques are conceived and applied. GLOBAL SUSTAINABILITY COURSE .
Attributes: ABEP ABGS.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.
FNGB 749M. Hedge Fund. (3 Credits)
This course will provide an overview of hedge funds and the hedge fund industry including structure, regulation, major strategies, operations and risk management, due diligence, performance and the role of hedge funds in asset allocation and the global financial system.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749R. Student Managed Invest Fund. (3 Credits)
The Fordham Graduate School of Business Student Managed Fund consists of 2 consecutive semester-long courses. The courses are designed to simulate the experience a student can obtain as an intern in the asset management industry. We focus in this first course on the examination and evaluation of individual securities investment on a stand-alone and comparable basis. Students will be trained on construction of a disciplined investment process using “Value Investing” strategy as the core foundation based on research work accentuated by Benjamin Graham and David Dodd. Students are expected to develop relationships with the Wall Street “sell-side analyst(s) covering his or her stocks as well as the Investor Relationship (IR) person(s) of the targeted stocks. A team of industry experts, fundamental analysts, portfolio managers, risk managers and other investment professionals will work closely with students to ensure that the students are exposed to various tools and methods that are currently being employed in the industry.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749U. Global Financial Markets. (3 Credits)
This course provides a comprehensive overview to the workings of the global financial markets, the functions and goals of the key financial institutions, and the role played by central banks and regulatory agencies. It will cover international money markets, international equity markets, the foreign exchange market, forward markets for commodities and financial instruments, bond markets and derivative markets.
Prerequisites: BEGB 6220 and FNGB 7421.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749X. CFA Competition and Workshop. (0 Credits)
While this course is for 0-credit, it has a heavy work load and provides valuable practical experience. Students will be arranged into teams. Each team will write a full sell-side coverage report, build out a presentation, and pitch it to Fordham Wall Street Alumni.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AD. Student Mgt Investment Fund II. (3 Credits)
In the second class, in the spring semester, students will learn the practice of asset allocation with focus on advantages and pitfalls of asset allocation theory. Coverage includes practiced methodologies in assessing and measuring risk, including applications of the BARRA risk models, strategies for entry and exit, and portfolio revision. A lot of care will be taken to expose the students to real-life aspects of portfolio management. This includes arranging lectures from portfolio managers, with different philosophies on portfolio selection and risk management.
Prerequisite: FNGB 749R or Corequisite: FNGB 7460.
Prerequisite: FNGB 6411.

FNGB 74AG. Finance in the Healthcare Ind. (3 Credits)
This course will present a historical development of the American healthcare system and will address the current challenges faced by both health insurers and providers, specific to managed care, reimbursement methods, and contracting. Students will learn to apply the standard tools of financial analysis and financial management in the complex and evolving setting in which the global healthcare system is currently situated. Students will also learn how to analyze the key financial indicators specific to hospitals and their direct application towards managed care contracting initiatives, debt restructuring and bond rating status. Finally, the course will address the future of health insurance and managed care.
Attribute: ABHM.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AH. Global Corp Governance. (3 Credits)
Examines how modern publicly traded corporations are governed in the global markets. It discusses the roles of the board of directors, corporate management, institutional investors, and other shareholders, and also discusses the effects of the recent legislation and financial market developments on corporate governance. Provides international comparisons of corporate governance structures and issues arising in contests for corporate control.
Attribute: ABIB.
Prerequisite: FNGB 7421.

FNGB 74AI. Global Equity Portfolio Management. (3 Credits)
Provides a comprehensive overview of equity portfolio management in theory and practice. Examines portfolio objectives and links them to appropriate investment strategies. It covers pricing of equities, the asset-allocation decision, return enhancement/risk control techniques, performance evaluation and recent changes in international fund management. Analyzes international investment strategy and the relative merits of various approaches.
Attribute: ABIB.
Prerequisite: FNGB 7421.

FNGB 74AJ. Global Risk Management. (3 Credits)
Covers market risk and volatility, calculation of VaR (value at Risk), Monte Carlo Simulation, credit risk and use of credit derivatives, operational risk, counterparty risk and other topics. Discusses risk regulations, including Basel II, recent developments in Basel III, and recent regulations on the banking industry in the U.S.
Attribute: ABIB.
Prerequisite: FNGB 7421.

FNGB 74AK. Raising Capital and Investing in Global Financial Markets. (3 Credits)
Provides a comprehensive overview of the going-public decision. Examines the strategies and process of corporate restructuring and investing activities, such as mergers and acquisitions, corporate diversification, spin-offs, carve outs, asset sell-offs, tracking stock, exchange offers, and debt restructuring.
Attribute: ABIB.
Prerequisite: FNGB 7421.
FNGB 74AL. Adv Corporate Finance. (3 Credits)
This course teaches the art of applying corporate finance theory and essential tools and techniques to strategic decision-making in critical real-life situations faced by organizations. The course enhances the students' understanding of corporate finance by providing a comprehensive examination of selected advanced topics, such as alternative valuation methods, real options in corporate finance, decision trees, international operations, mergers and acquisitions, risk arbitrage, debt capacity and leveraged buyouts, private equity, warrants and convertibles, and ethical issues. The learning experience is based on lectures and a series of business cases involving individual and group work, classroom discussions, and written assignments, as well as readings and problem-solving. The case studies are drawn from a variety of industries and countries, including emerging markets, and involve complex real challenges. The course is designed for students who are already familiar with valuation, cost of capital, capital structure theory and option pricing theory and who want to learn more advanced skills and techniques required for making important executive-level decisions. Note: Students should be proficient with computer spreadsheets and financial calculators.
Prerequisite: FNGB 7422.

FNGB 74AM. Emerging Markets. (1.5 or 3 Credits)
This course explores how the major "emerging market" (EM) states have evolved from "traditional" societies with "underdeveloped" economies into modern societies with more developed economies ever since the Berlin Wall came down. Because these EM states reformed and opened up their economies, they benefited from their vast human and commodities resources and rapidly increased their per capital income.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AN. Investment Banking. (3 Credits)
This course is intended to give students a practical introduction to investment banking and its role in helping corporations raise capital from the global capital markets. Topics include: venture capital, public offerings, private placements, going public, stock and bond financing, convertibles and other hybrid instruments, design of innovative securities, swaps and other derivative instruments, mergers and acquisitions and leveraged buyouts.
Attribute: ABEP.
Prerequisite: FNGB 7421.

FNGB 74AO. Alternative Investments. (3 Credits)
The course is an introduction to the rapidly evolving universe of alternative investments. Delivered in modules, the course covers a broad array of alternative strategy classes (Quantitative/Systematic, Fundamental Long/Short, Global Macro, Private Equity) ranging across all major asset classes (Equities, Fixed Income, Currencies, Commodities, Derivatives). The first half of the course constructs a broad framework for the evaluation of alternative strategies, focusing on the quantitative strategy class as a diverse and relatively easier-to-evaluate source of investment ideas for discourse and case study. The second half progresses through the remainder of the alternative strategy classes under the evaluation framework, ties together the role of alternatives within an asset allocation framework, studies subjective decision making in the context of alternatives and concludes with student presentations of their favorite investment thesis from the course. Throughout, there will also be discussion of career development both within and without the alternative investment space.
Prerequisite: FNGB 7421.

FNGB 74AP. Real Estate Capital Markets. (3 Credits)
This Real Estate Capital Markets course will cover both the primary and secondary debt and equity markets linked to real estate assets. While the underlying real estate assets in the primary markets will be covered, a greater portion of the class will be devoted to the secondary debt and equity markets, mainly dealing with mortgages, mortgage backed securities, and Real Estate Investment Trusts (REITs). A distinguishing aspect of this course is the focus on the intersection of the primary and secondary real estate capital markets, investor perspectives, and the impact of macroeconomic factors. Additionally, this course will include a robust mix of quantitative and qualitative factors in order to provide a holistic, less technical perspective on the real estate capital markets, and the real estate industry at large.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AQ. Adv Global Portfolio Mgt. (3 Credits)
The course will review (1) basics of modeling of securities' returns and volatility in the context of portfolio management / "buy-side"; (2) theoretical basis and empirical evidence of risk-return trade off and investor preferences; (3) main approaches to portfolio construction and challenges with their practical application; (4) performance evaluation, and other relevant portfolio management topics.

FNGB 74AR. ST: Corporate Restructuring. (3 Credits)
The course discusses the strategies, valuation, and processes of corporate restructuring decisions such as mergers and acquisitions, corporate diversification, spin-offs, carve-outs, asset sell-offs, tracking stock, exchange offers, and/or debt restructuring. It also discusses various securities issuances, including initial public offerings.
Prerequisite: FNGB 6411.

FNGB 74AS. Financial Modeling. (3 Credits)
Develops (using Excel) the type of financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Covers modeling of financial statements and models in many other important practical areas, such as time value of money, project evaluation, bonds, investment management and derivatives. Emphasizes on using most powerful and useful tools in Excel, such as logical functions, PivotTables, Data Table, Scenario Manager, Goal Seek to solve problems that closely resemble real-life situations.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AT. Fintech Compliance- Asia to Us. (3 Credits)
An overview of the components of an effective global Corporate Compliance Program. Examination of the Part C Risk Assessment and the Seven Steps of a corporate compliance and ethics program. Review of compliance program design and best practices, including the roles of the corporate compliance office and in-house counsel, risk assessments, Foreign Corrupt Practices Act, global codes of conduct, corporate governance, monitoring and re-evaluation.
Attribute: ABFF.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.
FNGB 74AU. Algorithm Trading. (3 Credits)
Electronic algorithms are being used by major institutions, investment banks, and hedge funds to trade stocks, bonds, currencies, and a plethora of financial derivatives. Algorithms are being used for all aspects of trading - from asset allocation and stock selection, to execution and implementation, and for risk management and regulatory and compliance reporting. In this course, students will learn the necessary skill sets, and underlying math, statistics, and programming skills to build, develop, manage, and implement profitable algorithms across all asset classes.
Attribute: ABFF.
Prerequisite: FNGB 7421.

FNGB 74AV. Seminar in Value Investing. (3 Credits)
This survey course is designed to introduce the fundamentals of the Graham and Dodd value approach to investment analysis. The course will be segmented into two parts: the basic structure of the analytical approach to value investing and its relationship to many of the elements of the MBA curriculum will be described through lectures, exercises, readings, in-class discussions and homework assignments; the last sessions of the course will be devoted to student presentations of their investment recommendations. Parts of the course will entail empirical data analysis.
Prerequisite: FNGB 7421.

FNGB 74AW. Applied Capital Markets and Financial Regulations. (3 Credits)
This course will explore how the market structure has fundamentally changed after the 2008 liquidity and credit crisis, and how this crisis has affected liquidity, balance sheets, risk taking, and returns across the entire financial services industry. The new reality is that regulation has changed the landscape of Wall Street and the dynamic of how the sell-side and buy-side will interact in the foreseeable future.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AX. International Fin Mgt. (3 Credits)
The goal of this course is to explain the concepts of corporate finance and their applications in an international setting. We will examine opportunities and problems that are faced specifically by multinational and foreign corporations and will compare corporate finance practices around the world. Topics covered in the course include foreign exchange rate mechanics, international parity theories, forecasting and hedging, international cost of capital, capital budgeting, capital structure, and valuation of foreign investments.
Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 74AY. Global Financial Markets. (3 Credits)
This course is intended as an introduction to Global Financial Markets. We will discuss the instruments traded in the markets, the institutions that support and frame the markets, the trading mechanisms and the regulatory structure. The course is intended to be descriptive and conceptual. The aim is to familiarize you with the breadth and scope of equity, debt, and derivative markets. We shall discuss the recent developments in the US and the development of financial markets globally.
Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 74AZ. Innov in Business & Energy. (3 Credits)
This course aims to frame and critique opportunities for business to create innovations in energy systems. It discusses how contemporary energy systems have evolved and how energy infrastructures vary across regions of the world. It also examines how business decision makers can think about choices of energy and energy systems by encouraging students to think broadly in terms of innovation possibilities.
Attribute: ABGS.

FNGB 74BA. Communicating Finance Theory. (0 Credits)
This lecture series will provide a summary of many financial topics. The class will also train students to communicate knowledge of this material to professionals at financial institutions.

FNGB 74BB. Applied Investment Principles. (3 Credits)
This course provides applications that follow Principles of Finance or Global Investment Principles. EXCEL models will be applied to CAPM modeling of Risk and Return, to Factor Models, and to Portfolio Attribution. Data may be drawn from Boomerang, Yahoo Finance, and other sources.
Prerequisite: FNGB 7421.

FNGB 74BC. Research in Value Invest. (3 Credits)
Prof. Johnson, a leading expert in the field of Value Investing, will lead a small, project based seminar that focuses on best practices in the field. Selective enrollment by approval of the instructor.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74BD. Impact Investing. (3 Credits)
This course will discuss investment strategies that have a societal orientation from both financial and socially responsible perspectives. The key questions are: how can we allocate money in a manner that is beneficial to all stakeholders and viable in a business sense, and, what are the appropriate metrics to evaluate such investments. Impact investments to be analyzed include government and ESG (environmental, social, governance) policies, micro finance, philanthropy, and green energy.
Attribute: ABGS.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74BE. Lectures in Applied Port Mgt. (3 Credits)
This advanced Portfolio Management course quickly reviews Modern Portfolio Theory (MPT) conceptual underpinnings and builds on MPT 1.0. It delves into contemporary liability driven asset allocation, MPT 2.0 and portfolio management industry practices, issues and concerns. Lectures, problem solving, and self-study along with extensive hands-on tools using Microsoft Excel based models will be used to provide a practitioner’s perspective. We will review and demo contemporary asset allocation optimization and forecasting techniques, new asset class pricing and valuation, performance and risk attribution, tail risk measurement and management tools etc. using real time vendor based (third party) solutions. As prerequisites - the student should have class exposure to investment and portfolio analysis, Excel, stats, and basic regressions.
Prerequisite: FNGB 7421.

FNGB 74BF. Financial Innova & Institu. (3 Credits)
This course will introduce major financial institutions, such as commercial and investment banks, insurance companies, mutual funds, hedge funds, and credit rating agencies with a focus on their risk contributions to the modern financial system. We will examine their credit risk in depth, and how to model and analyze credit risk and products. We will also understand new financial sector regulations and systemic risk by focusing on Dodd-Frank, market based stress-testing, Comprehensive Capital Analysis and Reviews (CCAR), and other methods. This course will help prepare students for the job market at financial institutions and regulators.
FNGB 74BG. Auto Trading Systems - Intro. (3 Credits)
This course discusses key issues involved in the design of an Auto (Algorithmic) Trading Systems, and provides hands-on experience. The end product is a prototype Auto Trading System designed by students that successfully trades in the real market (stock, futures, option) using live data feeds from exchanges. Issues covered include: typical structures of trading systems; efficient processing of live information; minimizing trade slippages; handling large number of securities; asynchronous information processing; GUI interfaces; etc. Industry experts are invited to discuss new developments. Key programming techniques will be reviewed at the beginning, very briefly. The course is suitable for students in MSGF, MSQF, and other master level students with programming skills equivalent to one formal course (e.g. R, Matlab, VBA, etc). Students with less programming skill may take the course if approved by instructor.
Attributes: ABFF, BUAN.

FNGB 74BH. Investing in European Union. (3 Credits)
The EU is the largest market for US exports and foreign direct investment. The objective of the course is to familiarize students with the process of regional integration and monetary unification in Europe and the opportunities and challenges this has created for foreign investors. Regulatory differences between the US and EU in competition laws and financial sector will related to the investment climate for foreign companies. The course will highlight that despite the deep economic and financial integration in the EU, significant country- and regional differences exist. This will be assessed through the analysis of several Harvard Business case studies covering different country- and industry experiences.

FNGB 74BJ. Financial Media. (3 Credits)
Financial Media examines the complex interactions between business, politics, and the press. The course is designed to help students achieve a better understanding of how business content is delivered and retrieved in the current media environment. The course focuses on the dynamics of reporting about companies and business industry leaders who are using the media to deliver critical messages to several stakeholder groups, including investors and consumers. The course provides numerous examples of business or political leader interactions with the media and debates their communication strategy as well as their outcomes.

FNGB 74BK. Fintech - An Introduction. (3 Credits)
Fintech is a new and emerging field of technology that is disrupting the way that many companies are conducting business. Fintech has already "forever" changed many sectors including mobile payments, social media, money transfers, loans, fundraising, travel, trading and asset management. It has completely revolutionized the way companies are developing products, conducting research, establishing directed sales and marketing plans, and utilizing start-up technology. Businesses are using Fintech to expand their products and services at a fraction of its previous cost. Entrepreneurs are utilizing Fintech as a central foundation for research, funding, and product development. Customers are already utilizing Fintech as part of their daily lives - mobile apps, social media, banking, online shopping, entertainment and gaming. This course will introduce students to the breadth of Fintech, and touch upon the technical underpinnings.
Attribute: ABEP
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74BL. Stress Tests and Cap Adequacy. (3 Credits)
The financial crisis of 2007-08 taught us all a lesson: that preparedness is everything. How resilient and prepared will we be, and how fast will we be able to recover? This is the key focus of this course: how to plan for moments of distress so that firms such as yours have capital of a sufficient quality to survive potential storms. We will demonstrate how to create a robust capital plan and test it for moments of hypothetical stress. We will investigate exactly how a bank holding company and an insurance company should conduct their capital plans, highlighting the significant differences between the two industries. By the end of the course, you will be able to create a capital plan for your business on your own.

FNGB 74BM. Empirical Value Investing. (3 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed.

FNGB 74BN. Investor Relations. (3 Credits)
corporate Investor Relations program formulates and communicates the financial performance and strategic direction of diversified corporations to the global investment community. Investor Relations professionals are well versed in accounting, compliance, finance, governance, marketing and communications. They collaborate with senior management and the Board of Directors to convey and interpret corporate matters to the public. This course will teach students the skills and competencies required to become a corporate Investor Relations professional. The course utilizes a course textbook, case studies, investor relations guest speakers and participation in investor relations events.

FNGB 74BP. Wharton-Impact Investment Workshop. (3 Credits)
Students will attend workshops on ESG (Environmental, Social, and Corporate Governance) and Impact Investing. They will compete in teams of three to five against other nationwide schools to construct a 100% Impact Portfolio. Since this is a two-semester competition, only students who participated in Fall may register in Spring.

FNGB 74BQ. Contemp Develop in Corp Fin. (3 Credits)
This course will cover a number of important topics of current interest to the corporate finance industry, such as: executive compensation and governance; utilizing and responding to fintech; importance of the growth of intangible assets; importance of large corporate cash holdings invested in risky assets, such as hedge funds and private equity. *Prerequisite: FNGB 7422.*

FNGB 74BR. Behavioral Finance. (3 Credits)
Over the past several decades, the field of finance has developed a successful paradigm based on the notions that investors and managers are generally rational and that the prices of securities are generally efficient. In recent years, however, anecdotal evidence as well as theoretical and empirical research has shown this paradigm to be insufficient to describe various features of actual financial markets. In this course we will use psychology and more realistic settings to guide and develop alternative theories of financial markets. We will examine how the insights of behavioral finance complement the traditional paradigm and shed light on investors’ trading patterns, the behavior of asset prices, corporate finance, and various financial market practices through lectures, case studies, and our own discussions. *Prerequisite: FNGB 7421.*

FNGB 74BS. Student Managed Investment Fund: ESG-Impact. (3 Credits)
In this joint graduate and undergraduate course, students will apply their investment and portfolio skills in the analysis and selection of a real set of securities and opportunities. Selection will focus on ESG investments and/or those that stress societal impact.
FNGB 748T. Fintech Lending & Payments. (3 Credits)
This course will consider modern on-line methods of lending and borrowing that may be outside of the traditional banking environment. The main players in the space will be analyzed, as well as their websites. Students will learn their business models, methods of credit analysis, and measures of return to investors.
Attribute: ABFF.

FNGB 748U. Global Financial Markets and the Macro-Economy. (3 Credits)
The overarching goal of this course is to give students an understanding of the forces affecting real income growth, inflation, and asset prices in the world economy. The specific topics the course will address include: the operation of monetary and fiscal policy; how those policies affect financial markets and the broader economy; the determinants of countries’ long-term rates of growth; the factors behind the recent financial crises in the US and EU; the features of currency crises, business cycles, and financial crises historically; and the relationships linking global interest rates, exchange rates, and inflation rates. The course will combine economic theory and empirical evidence to provide a toolbox of skills that students can use to analyze these and similar issues going forward.

FNGB 748V. Practical Exploration of M&A. (1.5 Credits)
This class will provide an introduction to the essential elements of large-cap merger and acquisition (M&A) transactions from the perspective of real, recent examples taught by a senior investment banker.
Prerequisite: FNGB 6411.

FNGB 748W. Corporate Valuation. (1.5 to 3 Credits)
The objective of the course is to learn firm, debt, and equity valuation methods from both a conceptual and practical framework. It combines both accounting and finance into practical valuation frameworks. Adequate accounting and finance backgrounds are required. Working knowledge of Microsoft Excel is important.
Prerequisite: FNGB 6411.

FNGB 7811. Finance - Internship. (1 to 3 Credits)

FNGB 8009. M&A and Leverage Acquisition. (1.5 Credits)
The course covers corporate debt solutions and provides an overview of credit risk principles. It will focus on corporate acquisitions and LBOs, and analyze different sources of funding, from senior to subordinated. Students will hear from many guest speakers, learn main capital structure issues, and be exposed to the current market environment.
Prerequisite: FNGB 7421.

FNGB 8405. Iss. Fin: Delevgd Fin. (1.5 Credits)
This course discusses the use of debt in Leveraged Buyouts, recapitalization, restructuring and refinancing, including Debtor-in-Possession (DIP) financing. Students develop practical insights by utilizing case studies from several public highly leveraged firms; practical insights are critically reviewed.
Prerequisite: FNGB 7421.

FNGB 8408. Acquisition & Leveled Fin. (1.5 Credits)
The course covers corporate debt solutions and provides an overview of credit risk principles. It will focus on corporate acquisitions and LBOs, and analyze different sources of funding, from senior to subordinated. Students will hear from many guest speakers, learn main capital structure issues, and be exposed to the current market environment.
Prerequisite: FNGB 7422.

FNGB 8414. Modern Financial Analysis. (1.5 Credits)
Learn how the financial services industry applies valuation techniques in a deal context! In this mini-course, you will demystify the theory behind the analytics and ultimately appreciate the “art” and “science” of valuation analytics. What is a company worth? What is someone willing to pay? The answers depend on: who the seller is; who the potential buyer(s) is; the context of the transaction and the current market conditions....
Attribute: ABEP.
Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 8415. Fin’lmkts: Cncpts/Methods/Trd. (1.5 Credits)
This course provides a real-life, hands-on experience of financial market activity and its impact on the broader economy. Throughout the course, students will participate in a trading game (which is explained in more details below) to assess and manage real world factors such as counterparty risk, liquidity, leverage, etc. They will also learn the impact of various policy issues on the markets and thus the economy (ex: impact of limiting foreclosures), some of the mathematics behind the markets, and the broad spillover effects of various investor/issuer decisions. Class sessions will be divided into two parts, lectures and trading. No prior market experience is required, but students are expected to have a passion to learn about financial market activity and stay aware of current market and political conditions. Trading Game: Students participate in 5 sessions of the trading game. Essentially, this game operates in a closed economy with various market participants (sell side, buy side, central bank, etc.) that trade a wide variety of assets, including stocks, bonds, loans, indices, commodities, CDS, currencies, and options, and do so in the context of the current, real world market environment (ex: record Treasury issuance). Each class will have an active trading session, and all market participants are expected to keep and update their trade books to track their P and L.
Prerequisite: FNGB 7421.

FNGB 849C. Fin’lmkts: Cncpts/Methods/Trd. (1.5 Credits)
This course provides a real-life, hands-on experience of financial market activity and its impact on the broader economy. Throughout the course, students will participate in a trading game to asses and manage real world factors such as counter party risk, liquidity, leverage, etc.

FNGB 849G. Mergers and Acquisitions. (1.5 Credits)
Mergers and acquisitions constitute some of the most important growth, diversification, and globalization strategies for firms. Finance, specifically corporate finance, plays an important role in M&A because the completion of a deal requires careful attention to valuation, risk management, and the designing of an appropriate payment package. That design is an important part of a deal for reasons ranging from accounting and tax to synergies and stock price. In this course, students will examine these features through a number of cases and readings. We will also briefly discuss issues of corporate governance, securities law, and corporate law whenever the context requires us to do so.
Prerequisite: FNGB 7421.

FNGB 849H. Advanced Finan Modeling. (1.5 Credits)

FNGB 849I. Blockchain. (1.5 Credits)
The course will explore the role currency plays in the economy, the emerging technologies pioneering new forms of digital money, and the impact these technologies will have on currency, the economy and the broader category of capital.
Attributes: ABBC, ABER, ABFF.
Prerequisite: FNGB 849J (may be taken concurrently).
FNBU 849J. Digital Currencies. (1.5 Credits)
Digital Currencies-New Revolution. The course will leverage what was taught in Digital Currency to explore specific examples of new technologies being used to develop new forms of currency and digital money, and redefine the broader category of capital. The course will use real products/service to explore these topics.
Attributes: ABBC, ABEP, ABFF.

FNBU 849K. Valuation and Modeling for Accounting. (1.5 Credits)
This course expands on valuation techniques discussed in Modern Financial Analysis and Valuation Techniques. Students will have the opportunity to learn the modeling techniques used by todays Wall Street practitioners associated with Discounted Cash Flow Analysis, Merger Analysis, Purchase Price Allocations and Synergy DCFs.
Prerequisite: FNBU 8414 (may be taken concurrently).

FNBU 849L. Empirical Value Investing - A. (1.5 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The ‘A-section’ will examine several topics / methods. It is a pre-req for the ‘B-section’, which will investigate the same issues more fully.
Prerequisite: FNBU 7421.

FNBU 849M. Empirical Value Investing - B. (1.5 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The ‘A-section’ is a pre-req for the ‘B-section’, which will investigate the same issues more fully.
Prerequisite: FNBU 849L (may be taken concurrently).

FNBU 849N. Disruption in Finan Services. (1.5 Credits)
Graduate students will learn directly from industry experts how new technologies, changing demographics and investor preferences are significantly impacting the delivery of wealth management, creation of investment products and capital market mechanisms. From the global adoption of crypto currencies to the trillion dollar tsunami of money flowing into passively managed ETFs, students will be exposed to the current and future implications of these ‘disruptions’ and gain helpful insight and intelligence impacting their careers. We will focus on one "disruption" per week with subject matter experts explaining the economic and cultural implications for both winners and losers. This course will be valuable to all students navigating future employment opportunities in financial services.
Attributes: ABEP, ABFF.

FNBU 8999. Independent Study. (3 Credits)

Finance (Undergraduate) (FNBU)

FNBU 3221. Financial Management. (3 Credits)
Attribute: BUMI.
Prerequisite: ACBU 2222.

FNBU 3222. ST: Financial Management Lab. (1 Credit)
This optional lab is aimed at finance students. It will provide additional training in skills that are likely to be useful when seeking finance internships. It will relate to FNBU 3221 - Financial Management, but will also involve additional concepts. Attendance, homework, and grading are expected.

FNBU 3440. Corporate Financial Policy. (3 Credits)
From the standpoint of finance theory, the value created by a corporation depends on the profitability of investments and the mode of financing these profitable investments. This course enables students to analyze and understand the interaction between the investment and financing decisions. The course is case-oriented and covers advanced capital budgeting issues, debt-equity choice, dividend decision, investment banking, convertibles and warrants and issues of international corporate finance.
Attribute: BLEB.
Prerequisites: HPCB 3221 or FNBU 3221.

FNBU 3441. Investments & Security Anlys. (3 Credits)
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 3442. Portfolio Management. (3 Credits)
Focuses on management of large institutional portfolios, such as pension endowment and mutual funds. Diversification concepts and analytical techniques, including Markowitz and simplified capital asset pricing models are considered. Covers strategies for asset allocation decisions, equity management, fixed income security management and options.
Prerequisite: FNBU 3441.

FNBU 3443. Global Business Econ & Trade. (3 Credits)
This course familiarizes students with international trade and finance concepts, and their application to managerial decision making. Opportunities and risks in the global economy will be analyzed across a range of countries and industries. We prepare students to identify global trends by highlighting how comparative advantages evolve and change. Case analyses and a class project play major roles in achieving the objectives of the course.

FNBU 3444. Global Financial Management. (3 Credits)
This course addresses the problems faced by an international banker or a financial officer of a multinational firm. It emphasizes financial decisions not usually considered by managers of purely domestic firms including exchange rate fluctuations, tax structures across countries, and political risk. The course focuses on: identification, measurement and management of exchange rate exposure and hedging strategies; taxation of international income and transfer pricing policies; international capital budgeting, determination of the cost of capital; global financing; and designing financial structure. Students will also be introduced to essential aspects of financial derivatives - futures / forwards / swaps / options - especially as they apply to currency and interest rate markets.
Prerequisites: FNBU 3441 and FNBU 3443.

FNBU 3445. Investing in the EU. (3 Credits)
The EU is the largest market for US exports and foreign direct investment. The objective of the course is to familiarize students with the process of regional integration and monetary unification in Europe, along with the opportunities and challenges for foreign investors. Regulatory differences between the US and EU that impact the financial sector and competition will be analyzed. Despite deep economic and financial integration in the EU, significant country and regional differences exist. Such country-specific differences together with the implications of Brexit will be analyzed drawing on Harvard Business case studies and current issues.
Prerequisite: FNBU 3221.
FNBU 3446. Futures and Options Market. (3 Credits)
An introduction to futures, options and commodities trading. The course covers all the basic principles of futures, options, and swaps markets and contracts. Key theoretical models and trading methods are examined. **Prerequisites:** (FNBU 3221 or HPCB 3221) and FNBU 3441 (may be taken concurrently).

FNBU 3447. Real Estate Finance. (3 Credits)
An introductory course in the valuation and financial structuring of real estate. Discusses the major factors affecting the real estate market, including general tax and depreciation policies. The roles of principal lending institutions, mortgage banks, and investment banks in real estate lending; syndications and partnerships are presented. The course also surveys the real estate-related securities and their markets. **Prerequisites:** FNBU 3221 or HPCB 3221.

FNBU 3448. ST: Adv Real Estate Finance. (3 Credits)
This course delves deeper into the topics covered in the introductory course including financial modeling, discounted cash flows, and leverage. The course will cover new topics including waterfalls and distressed debt. The focus of the course will be for students to become comfortable solving problems within the context of global real estate and gain practice using Microsoft Excel and Argus Valuation to complete cash flow analyses. Current events, a variety of guest speakers and applied learning opportunities will be integrated into the curriculum. Social justice issues in real estate will be briefly touched upon in connection with relevant topics such as affordable housing and discrimination in mortgage underwriting. **Prerequisite:** FNBU 3447.

FNBU 3449. Leading And Investing in Change. (3 Credits)
This course is designed to provide students with the skills and knowledge to influence and lead social impact—in business and generally—through a specifically crafted case and exercise. By the conclusion of this course, each student should have a robust toolbox of frameworks and concepts inherent to social impact and social change, and a clear understanding of capital deployment as it relates to impact investments. This class utilizes a digital gaming exercise designed for this type of course. The case—$50 Million for Change—requires students to step into the role of a player in the impact funding mix in a fictional city and state. **Prerequisite:** FNBU 3447.

FNBU 3450. ST: Fintech - An Introduction. (3 Credits)
FinTech is a new and emerging field of technology that is disrupting the way that many companies are conducting business. FinTech has already “forever” changed many sectors including mobile payments, social media, money transfers, loans, fundraising, travel, trading and asset management. It has completely revolutionized the way companies are developing products, conducting research, establishing directed sales and marketing plans, and utilizing start-up technology. Businesses are using FinTech to expand their products and services at a fraction of its previous cost. Entrepreneurs are utilizing FinTech as a central foundation for research, funding, and product development. Customers are already utilizing FinTech as part of their daily lives - mobile apps, social media, banking, online shopping, entertainment and gaming. This course will introduce students to the breadth of FinTech, and touch upon the technical underpinnings. **Attribute:** ENT. **Prerequisite:** FNBU 3221.

FNBU 3451. ST: Fintech Lending and Payments. (3 Credits)
The class will introduce fintech topics, such as blockchain and cryptocurrencies, insurtech and regtech, and lending and payments, and also will dive into practical world and case studies. There will be outside speakers. The class is NOT very technical, and will involve student discussions and presentations. Students who want to practice their communication and presentation skills and learn introductory topics in the fintech space should consider taking this course. **Prerequisites:** FNBU 3440 or FNBU 3441.

FNBU 4100. Mergers and Acquisitions. (3 Credits)
Mergers and corporate restructurings occupy an important place in corporate finance and corporate strategy. Valuation models and innovative financing techniques find widespread applications in this field. This course will familiarize students with the major concepts and applications in corporate restructuring. Special attention will be given to analyze the spectacular developments of the last decade. Students will be asked to prepare case-notes from Wall Street Journal and Business Week and these will be discussed more fully in class. **Attribute:** GLBB. **Prerequisites:** FNBU 3440 or FNBU 3441.

FNBU 4430. Computational Finance. (3 Credits)
The increasing availability of financial data has changed the ways firms and investors make decisions. Computational finance introduces methods of analyzing alternative financial data to optimize investment decisions. The course uses basic Python programming. Using real-world examples, we will apply programming techniques to textual analysis of financial data from alternative user interfaces, to tone/sentiment analysis, and to machine learning (topic modeling, neural networks, etc.) Previous programming experience in Python is recommended but not required, though students should at least have some introductory programming experience.

FNBU 4431. Student Managed Investment Fund: ESG-Impact. (3 Credits)
In this joint graduate and undergraduate course, students will apply their investment and portfolio skills in the analysis and selection of a real set of securities and opportunities. Selection will focus on ESG investments and/or those that stress societal impact.

FNBU 4439. ST: Non Concentration Value Investing. (3 Credits)
This course DOES NOT COUNT FOR VALUE INVESTING 2nd CONCENTRATION. NOTE: 2nd Concentration V.I. students will not get credit for this course. This survey course is designed to introduce the fundamentals of the Graham and Dodd value approach to investment analysis. The course will cover the basic structure of the analytical approach to value investing and its relationship to other investing styles. The topic will be described through lectures, exercises, readings, in-class discussions and homework assignments. The last sessions of the course will be devoted to student presentations of their investment recommendations. **Prerequisite:** FNBU 3441.
FNBU 4440. ST: Investment Banking. (3 Credits)
This course is intended to give students a practical introduction to investment banking and its role in helping corporations raise capital from the global capital markets. Topics include: venture capital, public offerings, private placements, going public, stock and bond financing, convertibles and other hybrid instruments, design of innovative securities, swaps and other derivative instruments, mergers and acquisitions and leveraged buyouts.
Attribute: ENT.
Prerequisite: FNBU 3221.

FNBU 4441. ST: Sustainability and Finance. (3 Credits)
As companies adopt sustainability as a value and a business strategy, finance practitioners are evaluating how their work can advance that mission. How is sustainability changing the way companies conceive of and apply financial tools and techniques? This course examines how financial practice can either support or undermine global sustainability. Using examples of leading and creative financial practitioners, it will explore among other topics, how companies are using data to measure sustainability impacts; how managers are creating financial value by pursuing sustainability; how investment and lending community is learning to assess companies according to new sustainability criteria; and how the existing financial paradigm of shareholder wealth maximization (SWM) might further evolve to more explicitly incorporate the goals of global sustainability.
Attribute: SOIN.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4443. ST: Commercial Credit and Banking. (3 Credits)
This course explores credit analysis and the loans approval process, and it prepares students for positions with commercial lenders. Emphasis is placed on accounting and Excel modeling related to default risk. Important topics include ratio, cash flow, and projection analyses, and loan contracts, oversights, and credit deterioration. Deals and case studies will reinforce concepts.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4445. Topics in Finance. (3 Credits)
Offered from time to time to permit faculty and students to explore a finance topic of particular interest. The specific topic and prerequisites are announced when the course is offered.
Attribute: GLBB.
Prerequisite: FNBU 3441.

FNBU 4447. ST: Credit and Special Situation Investing. (3 Credits)
High yield/ distressed debt investing overlays the complications and intricacies of corporate organizational structures and legal frameworks with fundamental business valuation and securities selection. Through the use of real world case studies, the course will examine the actual step-by-step process undertaken by a hedge fund professional when considering an investment in the fixed income securities of a highly leveraged company.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4448. ST: Private Equity. (3 Credits)
The objective of this class is to offer students a strong working knowledge of the private equity industry. We will examine the industry from a number of viewpoints including but not limited to, the structure of the industry, the investors, and the analysis of investments. In addition we will discuss how fund managers add value to the companies they purchase as well as how they exit (sell) the companies through IPO’s or other transactions.
Attribute: ENT.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4449. ST: Small Business Finance. (3 Credits)
Small Business Finance is the gateway to entrepreneurship and then enterprise management. This course will take the student from Start-Up to the cross-over point of revenue, profitability, structure and management. It will allow the enterprise to grow and succeed or stumble and fail.
Attribute: ENT.

FNBU 4450. Global Investments. (3 Credits)
Course required for concentration. Reviews the case for and against international investing. Provides an understa nding of international investment concepts. Topics include: purchasing power and interest rate parity, currency risk and how to hedge it, mean-variance investment concepts in an international context, emerging markets and how professional investors approach international investing.
Attributes: GLBB, INST, ISIN.
Prerequisite: FNBU 3441.

FNBU 4453. ST: Fixed-Income Analysis. (3 Credits)
The U.S. bond market is twice the size of the stock market, and interest rate contracts comprise three-fourths of all derivatives. This course focuses on the risk and return characteristics of individual fixed income securities as well as basic bond portfolio strategies. The term structure of interest rates, implied forward rates, related futures, Z-spreads, and basis-point risk will be studied. We will discuss credit and liquidity risk, embedded options, interest rate swaps, and securitizations. Market data using Bloomberg machines will be used throughout the course.
Attribute: AAAF.
Prerequisite: FNBU 3441.

FNBU 4454. ST: Financial Modeling. (3 Credits)
This course will introduce the student to the process of designing and building financial models using Microsoft Excel. Examples will be drawn from Finance/Accounting. The student will learn the steps needed to understand a financial problem, design a solution, then implement the solution in the spreadsheet. Lab time will be used to explore features of Excel frequently used in financial models. The class will also discuss how Excel is used to structure, manipulate, debug, and present financial models and their results. The course will prepare the student to use Excel and financial modeling effectively in a business environment.
Attribute: AAAF.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4455. ST: Hedge Funds. (3 Credits)
An introductory course designed to provide students with an overview of the alternative investment business and in particular Hedge Fund Investment Management. The course will survey the rationale for investing in Hedge Funds from an academic and a practitioner’s perspective. The course will explore the benefits of including alternative investments and hedge funds in traditional portfolios and asset allocation models from both an individual and institutional investors’ perspective. Students will learn about building blocks of alternative investments such as leverage, short selling and derivatives. They will also learn perform detailed rate of return and risk assessment on a wide range of the most popular hedge fund strategies and styles, including long/short equity, global macro, quantitative trading, credit arbitrage, convertible arbitrage, risk arbitrage and distressed investing.
Prerequisites: (FNBU 3221 or HPCB 3221 or HPBU 3221) and FNBU 3441.
FNBU 4456. Special Topic: Venture Capital. (3 Credits)
This course introduces the cyclical venture-capital process, and examines it from the view point of entrepreneurs, venture capitalists, and investors. Topics include raising venture capital, structuring venture capital partnerships, and key issues in evaluating stage companies, including exit alternatives, intellectual property, and patent issues.
Attribute: ENT.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4457. Introduction to Value Investing. (3 Credits)
Value Investing, developed by Graham and Dodd, is a time tested and proven investment methodology which is based on a detailed analysis of a company’s current and historical balance sheet, income and cash flow statements. Students will learn to identify and analyze undervalued securities which provide a significant margin of safety to their intrinsic value.
Prerequisites: FNBU 3221 or HPCB 3221 and (ACBU 2222 and ACBU 2223).

FNBU 4458. Behavioral Finance. (3 Credits)
Behavioral Finance suggests that investors can and often do make investment decisions based less upon rational, elaborate modeling techniques and often on heuristics (short cuts) and biases. Behavioral Finance therefore seeks to understand the psychological roots of decision making in order to explain financial and investment anomalies, investor behavior, and asset prices.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4459. Advanced Topics in Value Investing. (3 Credits)
Students will study a variety of advanced topics which build on the principles outlined in Introduction to Value Investing and Behavioral Finance. The class will study real-world situations in the current market environment, employ multiple valuation frameworks and improve students' ability to make informed decisions. Among other topics, the class will study business strategy, Mario Gabelli's Private Market Value with a Catalyst, capital allocation principles, distressed investing and merger arbitrage.
Prerequisite: FNBU 4457.

FNBU 4461. ST: Finance and Business in a Post-Crisis World. (3 Credits)
Objective: Expose students to the transformational economic events of the past few years, while analyzing the shifting contours of global finance and trade. Specifically, the course will review the pros and cons of globalization; the key drivers of a more open and integrated global economy; the 'rise of the rest,' or the developing nations, led by China and India, the origins of the global financial crisis, the global policy responses to the crisis, and how the events/policies of today will influence the global economy of tomorrow.
Attributes: GLBB, INST, ISIN.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4462. ST: Stdt Mgd Invt Fund - Fall. (3 Credits)
Over 2 consecutive semesters, students will actively manage a global balanced portfolio consisting of securities representing the major uncorrelated asset classes, namely equities, bonds, and alternative investments consisting of commodities, real estate, and FX. Prerequisite: FNBU 3441 Investment and Securities Analysis.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4463. ST:Stdt Mdg Invt Fund - Spring. (3 Credits)
Over 2 consecutive semesters, students will actively manage a global balanced portfolio consisting of securities representing the major uncorrelated asset classes, namely equities, bonds, and alternative investments consisting of commodities, real estate, and FX. Prerequisite: FNBU 3441 Investment and Securities Analysis.
Attribute: GLBB.
Prerequisite: FNBU 3221.

FNBU 4464. ST: Compliance and Risk Management. (3 Credits)
This course will review risk management in the financial services industry through compliance and regulatory perspectives. The course will cover the economic basis and goals of financial services regulations from the Great Depression to the recent financial crisis. Emphasis will be placed on identifying, controlling, mitigating, and managing financial services compliance and reputational risks. Topics will include capital adequacy, risk limits, supervision, Value at Risk and Monte Carlo simulation, Industry and self-regulation, insider trading, elements and style of both US and overseas regulation, corporate governance and reputational risk.
Attributes: AAAF, BLEB, PRQU.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4466. ST: Alternative Investing. (3 Credits)
The course will cover the evolution and outlook for a range of alternative investments using research, cases and guest speakers as learning tools. Students will learn to allocate among various types of alternative investments and to evaluate and perform analysis on new and emerging categories of alternative investments.
Attribute: SOIN.
Prerequisite: FNBU 3441.

FNBU 4468. Healthcare Finance. (3 Credits)
This course will present a historical development of the American healthcare system and will address the current challenges faced by both health insurers and providers, specific to managed care, reimbursement methods, and contracting. Students will learn to apply the standard tools of financial analysis and financial management in the complex and evolving setting in which the global healthcare system is currently situated. Students will also learn how to analyze the key financial indicators specific to hospitals and their direct application towards managed care contracting initiatives, debt restructure and bond rating status.
Prerequisite: FNBU 3221.

FNBU 4469. Impact Investing. (3 Credits)
This course will discuss investment strategies that have a societal orientation from both financial and socially responsible perspectives. The key questions are: how can we allocate money in a manner that is beneficial to all stakeholders and viable in a business sense, and, what are the appropriate metrics to evaluate such investments. Impact investments to be analyzed include government and ESG (environmental, social, governance) policies, micro finance, philanthropy, and green energy.
Attributes: ENT, SOIN.
Prerequisite: FNBU 3221.

FNBU 4472. ST: Study Tour of Brazil. (3 Credits)
In the Brazil Study Tour, students will learn how to model and evaluate individual Brazilian equity securities in the context of their relevant global sectors and in the context of Brazil’s economic, political, and social framework.
Prerequisites: FNBU 3221 or HPCB 3221.
FNBU 4473. ST: Study Tour of Turkey. (3 Credits)
In the Turkey Study Tour, students will learn how to model and evaluate individual Turkish equity securities in the context of their relevant global sectors and in the context of Turkey's economic, political, and social framework.
Attributes: INST, ISEU, ISIN, ISME.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4474. ST: Study Tour of Vienna and Budapest. (3 Credits)
In the Study Tour, students will learn how to model and evaluate individual European equity securities in the context of their relevant global sectors and in the context of economic, political, and social framework.
Prerequisites: FNBU 3221 or HPCB 3221.

FNBU 4475. ST: Mktg Finc Serv. (3 Credits)
The objective of this course is to provide an understanding of the successful strategies associated with the marketing of financial services. Recent changes have made it critical for business students who anticipate being active in financial services to expand their skill sets and to explore new approaches for successful marketing of these services. This course discusses different types of financial services, consumers' decision regarding financial services and how to develop specific marketing strategies and tactics for those financial services. The topics covered include bounded rationality and consumer decision making, pricing decisions for financial services, new product development for financial services, and promotional strategies for financial services. Having completed this course, students should be able to manage consumer marketing activities for a wide array of financial services organizations. This course would be useful for finance students who want to expand their understanding of financial services.
Prerequisite: FNBU 3221.

FNBU 4476. Financial App & Institutions. (3 Credits)
The capstone course in the GFBE concentration. The course will examine 6 topics using cases, invited speakers, and Excel applications. Two weeks will be devoted to each topic so as to present both conceptual background and applications for each. The content will include currency trading, risk management and regulation of a global enterprise, evaluating and funding foreign projects, impact of the macro economy, direct foreign investment and acquisitions, and analysis of a diversified world portfolio. Upon completion, a student will be comfortable in a wide range of global finance and economic settings.
Prerequisite: FNBU 3221.

FNBU 4478. ST: Raising Capital & Inv in Glob. (3 Credits)
Provides a comprehensive overview of the going-public decision. Examines the strategies and process of corporate restructuring and investing activities, such as mergers and acquisitions, corporate diversification, spin-offs, carve-outs, asset sell-offs, tracking stock, exchange offers, and debt restructuring.

FNBU 4479. ST: Algorithmic Trading. (3 Credits)
Electronic algorithms are being used by major institutions, investment banks, and hedge funds to trade stocks, bonds, currencies, and a plethora of financial derivatives. Algorithms are being used for all aspects of trading - from asset allocation and stock selection, to execution and implementation, and for risk management and regulatory and compliance reporting. In this course, students will learn the necessary skill sets, and underlying math, statistics, and programming skills to build, develop, manage, and implement profitable algorithms across all asset classes.
Prerequisites: FNBU 4454 and INSY 3436.

FNBU 4480. ST: Traded Credit Products. (3 Credits)
Credit Products are fixed income securities, financing contracts, and leverage vehicles which can be placed along a spectrum of risks - first by the sensitivity to credit risk, then by duration, liquidity, timing, and other risks to the expected cash flows. This course will present this spectrum from various perspectives; market maker, issuer, investor, and discuss both the qualitative characteristics and the quantitative measurements relevant to the many asset sub-classes on that spectrum. Those assets could range from Repo/Treasury securities, Credit Bonds from Agencies to HY corporate debt and CMOS, Linear and Non-Linear rate derivatives, other liability classes including syndicated loans/private placements, securitizations/CLO, REMICs, and touch on illiquid instruments.
Attribute: AAAF.
Prerequisite: FNBU 3441.

FNBU 4481. ST: Global Immersion India. (3 Credits)
This finance class will discuss emerging and developing economies and finance in general, and India in particular. While in India, students will have lectures and discussions with industry leaders, professors, and alumni. You will also visit important historical sites and stay in quality accommodations. The class will meet several times before the trip, and students will submit small group reports / projects afterward.
Corequisite: FNBU 3221.

FNBU 4706. Honors Thesis II - Finance. (3 Credits)
Honors project in Finance.

FNBU 4999. Independent Study. (1 to 4 Credits)

Fordham Fellowship Media Lead (FMCE)

FMCE 5000. NEW MEDIA. (5 Credits)
FMCE 5010. MEDIA ETHICS. (5 Credits)
FMCE 5020. MEDIA & DEMOCRACY. (5 Credits)
FMCE 5030. LEADERSHIP ACROSS MEDIA. (5 Credits)

French (FREN)

FREN 1001. Introduction to French I. (0 or 5 Credits)
An introductory course that focuses on the four skills: speaking, reading, writing and listening providing students with a basic knowledge of French linguistic structures, vocabulary and culture, which studied interdependently, comprise the French Language.
Mutually Exclusive: FREN 1002.

FREN 1002. Introduction to French II. (3 Credits)
This course will enhance the reading, writing, speaking and listening skills acquired by students in Introduction to French I or from prior study. It will further promote a deeper understanding of French and Francophone cultures.
Prerequisite: FREN 1001.
Mutually Exclusive: FREN 1001.

FREN 1501. Intermediate French I. (3 Credits)
Attribute: IPE.
Prerequisites: FREN 1001 or FREN 1002.
FREN 1502. Intermediate French II. (3 Credits)
Attribute: IPE.
Prerequisite: FREN 1501.

FREN 1999. Tutorial. (1 Credit)

FREN 2001. French Language and Literature. (3 Credits)
A critical analysis of selected cultural and literary texts; composition, conversation, and review of pertinent grammatical structures.
Attribute: IPE.
Prerequisite: FREN 1502.

FREN 2100. Grammar and Phonetics. (4 Credits)
A comprehensive review of French grammar and phonetics with attention to their use in literary and cultural contexts. Intensive practice of the spoken and written language. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: FREN 2001.

FREN 2300. French Translation & Grammar Review. (4 Credits)
This course is a comprehensive review of French grammar and vocabulary with attention to challenges in translation. It is open to anyone who has completed FREN 2001 or higher and who wishes to perfectionner son français. The class will involve extensive practice in reading French texts from diverse disciplines: literature; history; politics; science; art; cultural studies; etc. Attention will also be paid to how pronunciation and grammar interact. Students will be encouraged to develop a final translation project related to their major or minor outside of French. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: FREN 2001.

FREN 2600. France: Literature, History, and Civilization. (4 Credits)
The history and civilization of France and its literature in prose, poetry, and drama. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: FREN 2001.

FREN 2601. French Conversation and Composition. (4 Credits)
Intensive practice of the spoken and written language with emphasis on proper use of idioms and building of vocabulary based on topics in interest and relevance. A basic course for prospective majors and minors. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: FREN 2001.

FREN 3005. French Business Culture. (4 Credits)
The course examines the codes of French business culture and explores ways for students to prepare themselves for the French marketplace by mastery of these codes. In particular, we will focus on improving your business eloquencia perfecta – oral and speaking skills and appropriate forms of presentation through personalized training, role playing, mock interviews, and business pitches. Beyond incorporating the essentials of business vocabulary, we will explore every aspect of public speaking from grammatical accuracy, phonetics, clarity, and concision, to the effectiveness and communicating your message, your use of body language and physical space. Students will prepare CVs, cover letters, perform interviews, practice networking, and work in groups to develop sample start-up pitches. Students will build up experience and self-confidence with handling real life situations. Invited guests from the French and bi-cultural business and entrepreneurial community in New York City will share their experiences with students and provide opportunities for students to practice their new skills and learn more about bilingual business opportunities. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE.
Prerequisite: FREN 2600.

FREN 3030. What Is Writing? The Inscription of Culture From Page to Screen. (4 Credits)
This course examines the foundation of all literature: writing. What is the role of writing in an age of SMS and beyond. Readings from: Marot; Rousseau; Desnos; Derrida; Cassin; Dehaene. Class in French.

FREN 3101. Word and Image in Medieval France. (4 Credits)
This course examines the medieval French literature that illuminates some of the great cathedrals of twelfth-and thirteenth-century France. To understand medieval cathedrals we must 'read' them through the literature of the age. The texts studied will be in modern French translation and will come from a variety of genres: lyric poetry; romance; epic; devotional literature; biography and autobiographical confession. These texts will be related to the stained glass, architecture, and sculpture of several French gothic cathedrals. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRME, IPE.
Prerequisites: FREN 2600 or FREN 2601.
FREN 3102. Notre Dame de Paris: The Cathedral in Art, Literature, Culture, & History. (4 Credits)
This course examines the cultural importance of Paris’s great gothic cathedral, Notre Dame de Paris. We will examine the cathedral through history, with a focus on its creation and significance for the Middle Ages and on its future after the devastating fire of 2019. We will read some of the medieval French literature that illuminates its stained glass windows and sculpture. Reference will also be made to some of the other great cathedrals of 12th- and 13th-century France, especially Notre Dame de Chartres. Our study of Notre Dame de Paris will include its use through history, from the Revolution and Napoleon to its presence in contemporary film and literature. In French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRMO.
Prerequisite: FREN 2600.

FREN 3103. Medieval Other, Modern Ethics: Christians, Muslims, and Jews in Medieval France. (4 Credits)
Was France in the Middle Ages the birthplace of a persecuting society? How were minority religious and ethnic communities perceived by France’s dominant Catholic community? What were the political and cultural institutions that regulated the interactions of these communities? How did the art and literature of the Middle Ages capture or distort the lived realities of these communities? Medieval Other, Modern Ethics will investigate these and other questions through the lens of contemporary French ethics. Readings from Peter Abelard; Chrétien de Troyes; Marie de France; Saints’ Lives; the Lancelot-Grail Cycle; Rutebeuf; Emmanuel Levinas; Jacques Derrida; Simone de Beauvoir; Hélène Cixous; Amin Maalouf; Marc Bloch; Souleymane Bachir Diagne. Class in French. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRMO, JWST, MVLI, MVST.
Prerequisite: FREN 2600.

FREN 3125. Mapping the Nation. (4 Credits)
How did the term l’Hexagone come to be synonymous with continental France? This course examines the hidden ideology of maps, from the burgeoning of cartographic science during the Renaissance to the question of France’s place within the European Union and subsequent responsibility during the ongoing refugee crisis. In addition to considering maps as texts, starting with Guillaume Postel’s 1578 world map with a meridian bisecting Paris, we will also consider texts as maps, attending to questions of space, mobility, and perspective in authors ranging from Montaigne and Rabelais to Proust and Butor. Of particular interest is the process by which space becomes place, and the use of geography as a tool of political ideology. We will explore Michel de Certeau’s distinction between espace and lieu, and take lessons from Mark Monmonier’s compelling essay “How to Lie with Maps.” Benedict Anderson’s idea of “imagined communities” will be useful in discussing the role of graphic and literary representations of space in crafting a sense of French nationhood. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRMO, FRME.
Prerequisite: FREN 2600.

FREN 3130. Culture and Science in France. (4 Credits)
This course examines the history of the relations between science and culture in France, from the Renaissance to today. We will examine: the historicity of worldviews; religious and secular tensions; the literary expression of scientific ideas; the institutionalization of science by the French state. Readings from the works of Rabelais, Descartes, Pascal, Émilie du Châtelet, Voltaire, Condorcet, Maupassant, Teilhard de Chardin, Duhem, Marie Curie, and Foucault. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISEU.
Prerequisites: FREN 2600 or FREN 2601.

FREN 3140. Changing Climate, Changing Culture. (4 Credits)
With the 2016 Paris Agreement on climate change (French: Accord de Paris), France became forever linked to environmental activism. But this activism has a long cultural history in France and Francophone communities. In this seminar, students explore this culture of activism through a survey of francophone texts that have asked how climate shapes culture and how culture has shaped climate. We will explore the recent turn toward the environment in literary criticism known as ecocriticism (French: écocritique) and its relation to previous theories of catastrophe, like nuclear criticism. The corpus of texts studied will come from far away in time and space: 12th-century lyrics and romances that reflect the Medieval Warm Period; 14th-century texts that respond to the return of the cold and the arrival of the Black Death; and 20th- and 21st-century Pacific island literature on environmental change brought about through tourism, nuclear tests, and global warming. Because climate and the nuclear tests have affected the francophone Pacific islands, in particular, this course will serve to introduce students to a lesser-known area of French and Francophone studies. Readings will include troubadour and trouvère lyric; Bruno Latour (Face à Gaïa); Joséphine de Monbart (Lettres tahitiennes); Paul Gauguin (Noa Noa); Chantal Spitz (L’île des rêves écrasés). Course taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRMO, FRME.
Prerequisite: FREN 2600.

FREN 3175. French Renaissances. (4 Credits)
This course explores the cultural renaissances of Medieval and Early Modern France. We will compare ‘the’ Renaissance of the 16th century to two earlier ‘renaissances’: one at the court of Charlemagne and the other during the 12th century. We will look at the literary and artistic expressions of these re-births, why they started and what lasting impacts they had on French culture throughout history. We will read works by some of the greatest authors of French literature, including: Rabelais; Marguerite de Navarre; Louise Labé; Montaigne; Scève; Marie de France; Chrétien de Troyes; Abelard & Heloise. Course in French.
Attributes: ALC, FRMO, FRME.
Prerequisite: FREN 2600.
This course examines the foundational texts about King Arthur and the Holy Grail that have made their way into American and French films. Why do these thirteenth-century stories about the fourth century continue to fascinate us today in the twenty-first century? Why do they remain so successful as sources for compelling narratives? We will explore the cultural adaptation of these stories to their times and in particular changes made to the role gender plays in them. Topics covered will include: gender, folklore, high and low art; adaptation of text to screen; translation; the political use of the past. Course in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, COLI, FRME, IPE, MVST.
Prerequisite: FREN 2600.

FREN 3250. Du scandale au chef d’oeuvre: Art that Shocks, Offends, and Endures. (4 Credits)
This course examines canonical French works from the early modern period to the present that have incurred censorship and/or widespread criticism for their scandalous nature. The analysis of these works will serve as a departure point from which to discuss the historic–political contexts that give rise to their offensive nature. From the theological underpinnings of the notion of scandal in the works of Rabelais, we will continue to explore how certain enduring works were perceived as threats to social order and to the very notion of what constitutes art. Among the varieties of scandal in our corpus will be art of a sexual/scatological nature (Rabelais’ Gargantua, Jarry’s Ubu Roi), art that offends morality or religious dogma (in the work of Voltaire and Baudelaire), art that undermines political authority (the films La Grande Illusion and La Bataille d’Algers), and the very notion of what art should be (the literary quarrels of the 17th century). We will consider how recent French literary and artistic scandals inform our understanding of contemporary French politics and society, and interrogate how the notion of scandal itself is relative to a given historical moment or cultural milieu. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRME, FRMI.
Prerequisite: FREN 2600.

FREN 3253. Moliere: From Page to Stage. (4 Credits)
This course taught in French explores French Theatre and offers the opportunity to engage in the creative process from page to stage. Students will have the opportunity to participate in different capacities, such as performers, designers, dramaturgs, and stage managers. This course emphasizes the importance of working collaboratively. Students enrolled in the French and Theatre Programs will share their strengths and learn from each other. We will combine reading, theory, and analysis of a single play by Moliere, and put what we learn into practice in rehearsal. The semester will end with a public performance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FASH, IPE, THEA, THPL.
Prerequisite: FREN 2600.

FREN 3265. Writing for Theatre. (4 Credits)
This course encourages students to become playwrights and to improve their fluency in French. This is a creative writing course for theater with an opportunity to produce and perform an original short play. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: IPE.
Prerequisites: FREN 2600 or FREN 3253.

FREN 3275. Documentary and Storytelling in the Francophone World. (4 Credits)
Focusing on francophone works, this course questions common assumptions about documentary’s objectivity. Nudged by filmmakers’ endless efforts to reclaim the fictional and subjective dimension of documentary cinema (Marker, Perrault, Varda, Moullet) and a growing number of graphic novelists’ intentional collision with social and political reality in their works (Devoeuve, Sacco) in print or through interactive media, we will embrace the narrative dimension of a variety of ‘documentary’ works. Theoretical texts will help us situate the primary materials discussed in relation to long-lasting debates about realism, truthfulness and representation in documentary cinema and graphic literature and media. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRMO, IPE.
Prerequisite: FREN 2600.

FREN 3280. French Documentary in Action. (4 Credits)
In this course, students work together to develop English subtitles for a recent French documentary, screened at Fordham at the end of the semester. To this end, students will conduct background research to understand the film’s subject and any sociocultural, political, and historical references informing the film. Screenings and discussions of French documentaries from different periods will help students situate the film within a long and rich national tradition and to reflect on the specific structure and tone used by the filmmakers. Finally, students will become familiar with the contemporary economy of documentary filmmaking in France. Multiple opportunities to engage with the filmmakers/ producers (via skype, email, or potentially in person) will allow students to discuss the progression of their ongoing collaborative research project and to produce a booklet of materials distributed at the screening. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRAN, FRMO.
Prerequisite: FREN 2600.
FREN 3290. Early Authors Modern Theory. (4 Credits)
This course explores French writers from the Middle Ages and the Renaissance through the lens of 20th- and 21st-century French thinkers. We will read both original texts and later commentaries to interrogate how our modern theories have shaped our understanding of early French literature and culture, and consequently of the French canon. This juxtaposition will allow us to ask: How have the ideas of the author and of the text changed over time? Do modern theories help reveal aspects of early writers? Or are we merely reworking them in our own image? The early authors we will study include, from the Middle Ages: Marie de France, Chrétien de Troyes, Christine de Pisan, François Villon; from the Renaissance: Rabelais, Marguerite de Navarre, Montaigne, Rabelais, Ronsard, Du Bellay, Labé. Among the modern theorists: Bon, Barthes, Foucault, Butor, Deguy, and Cerquiglini. Conducted in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
 Attributes: ALC, FRME, FRMI, IPE.

FREN 3300. The Enlightenment. (4 Credits)
The main currents of the French 18th-century Enlightenment: works by Montesquieu, Marivaux, Voltaire, Diderot, Rousseau and La Motte. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
 Attributes: ALC, COLI, FRMI, IPE.

FREN 3301. France and Global Enlightenment. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
 Attributes: FRMI, IPE.
Prerequisite: FREN 2600.

FREN 3333. Tableaux: Art and Theater: 1700s. (4 Credits)
This course examines the changing articulation of the ‘tableau’ and how it informed important aesthetic developments in 18th century theater and painting. Students will read theoretical texts on the theater, such as Diderot’s De la poésie dramatique et Mercier’s De théâtre, theoretical works by Marivaux, Voltaire, Diderot and Beaumarchais, in addition to critical texts on the French salons. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
 Attributes: ALC, COLI, FRMI, IPE.

FREN 3340. Amazones, Salonnieres, and Revolutionnaires: Women Writers in Ancien Régime France. (4 Credits)
This course examines women writers in Ancien Régime France (17th and 18th centuries) and the various movements, events, literary genres, groups, and institutions their writing incited, such as the Amazones (the military women of the Fronde), the Précieuses, the Salonnieres, the Republic of letters, epistolary novelists, and Revolutionnaires, etc. The women studied in this course include: Madame d’Aulnoy, Madame de Scudéry, Madame de Lafayette, Madame Riccoboni, Madame du Deffand, La Comtesse de Genlis, Madame d’Epinay, Madame de Charriere, Olympe de Gouges, Madame de Roland, and Madame de Staël. This course is taught in French. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
 Attributes: ALC, COLI, FRME, FRMI, IPE, WGSS.
Prerequisite: FREN 2600.

FREN 3350. Thinkers and Moralists. (4 Credits)
The class reads work by great French thinkers, among them the essayist Montaigne, the theologian Pascal, the humorist Moliere, the satirist LaBruyere and the salon star La Rocheoucouuld, the social commentator Alexis de Toqueville, the food writer Brillat-Savarin. We will elucidate the nature and influence of French thinking about many aspects of culture throughout the early modern period and its effects to the present day. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
 Attributes: ALC, FRME, FRMI, IPE.
Prerequisite: FREN 2001 (may be taken concurrently).

FREN 3360. French Autobiography. (4 Credits)
How the French recount their lives, form themselves and interact with others. Three male and three female-authored texts: Montaigne, Rousseau, Grde de Beauvoir, Yourcenar, Kaplan. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
 Attributes: ALC, COLI, FRMI, FRMO, IPE.

FREN 3440. The Forbidden Reading of Flaubert's Madame Bovary. (4 Credits)
La Lecture défendue de Madame Bovary. This course will present a close reading of Flaubert’s novel, often perceived as an icon of realism, that will question such a stance and offer a perspective that is both humorous and, in some ways, scandalous to censors and those readers of Flaubert’s corpus who would sense in Emma’s story a departure from his earlier writings. We shall consider film interpretations of the novel as well as other translations of a work famous for its precise words. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
 Attributes: ALC, IPE.
Prerequisite: FREN 2600.

FREN 3450. Writers and Lawbreakers. (4 Credits)
This course focuses on the complex relationship that existed between literature and the law in 19th- and 20th-century France. We use prison literature, adventure novels, memoirs, poetry and plays to discuss societal perceptions of criminals, views of normative behaviors, literal and figurative crimes, and the aesthetic decisions made by artists caught between unacceptable narratives and respect for the literary canon. Readings include Dumas, Hugo, Goncourt, Tristan, Verlaine, Proust, Genet, Paulhan, and Jounhandeau. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
 Attributes: ALC, COLI, INST, IPE, ISEU.
Prerequisite: FREN 2600.
FREN 3453. The Flâneur in Paris. (4 Credits)

Why does the figure of the flâneur appear in literature and art in the first decades of the 19th century? What changes (political, economic, social, urban, technical, aesthetic, and poetic) occur that facilitate this new type of urban wanderer? What’s the difference between the 17th- and 18th-century promeneur and the flâneur? Why is the concept of the flâneur impossible until the 19th century? And why does the flâneur disappear as Walter Benjamin argues toward the end of the 19th century? Why is the flâneur predominantly a male category? And is there a descent of the flâneur in the 20th and 21st centuries? In this course we examine the figure of the urban wanderer and flâneur from the last years of the 18th century to the first decade of the 21st century. We examine this figure in the literary and aesthetic works of Mercier, Retif de la Bretonne, Balzac, Baudelaire, Rimbaud, Zola, Colette, Apollinaire, Debord, Roubaud, Calle as well as in the philosophical works of Benjamin and other critical texts and films. While we will not be able to walk in Paris, we will explore some of these questions by using New York as our ambulatory laboratory. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRMO, INST, IPE, WGSS.
Prerequisite: FREN 2600.

FREN 3460. Postcolonial Representations. (4 Credits)

This course examines the cultural production of the Colonial Age and its influence on postcolonial aesthetics and rhetoric, in additions to 19th, 20th, and 21st century novels, plays, movies, paintings, and photographs. We consider products of consumer culture such as plates, toys, commercials and postcards. We devote particular attention to complex systems of cultural representations from the 1870's -1930's to show how the heirs of Colonialism must continually renegotiates them. The second half of the course focuses on North African postcolonial literature. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRAN, FRMO, IPE, MEST.
Prerequisite: FREN 2600.

FREN 3464. French Films d’auteur. (4 Credits)

In this course, you will study French cinema history by focusing particularly on the ‘Auteur theory’ and the work of world-renowned French filmmakers. Taught in French. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRMO, IPE, WGSS.
Prerequisites: FREN 2600 or FREN 2601.

FREN 3465. Women on the Margins. (4 Credits)

The course explores the roles and identities available to women in nineteenth-century France and the ways in which women expanded the boundaries of those constraints. Through readings of literary and non-literary texts as well as films, paintings, drawings, and fashion plates, we consider such institutions and conditions as female education and conduct, marriage, motherhood, prostitution, sainthood, rebellion, and creativity. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRMO, IPE, MEST, WGSS.

FREN 3466. Discovering French Cinema. (4 Credits)

What is French Cinema? Why is cinema regarded first and foremost as an art form in France? In this course, you will learn how to appreciate the language of cinema, understand how mise en scène, sound, and editing work together in crafting in front our eyes a world that will absorb us for a couple of hours. You will also journey through over a century of film production, from Méliès’s early ‘trick films’ to the animation boom of the 2000s, from 1930s poetic realism to the social realism of the 1990s, from Cocteau’s and Franju’s fantastic cinema to Besson’s blockbuster films. We will see how these films can help us understand better why cinema has remained so important to French cultural identity and how French cinema has defined the way audiences abroad see France and French society. Readings introducing you to key film theoretical concepts will accompany the films discussed throughout the semester. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FITV, FRMO, INST, IPE, ISEU.

FREN 3470. Francophone North Africa. (4 Credits)

If the colonial past has imposed a number of artistic chanllenges on the contemporary North African artists, it has also obliged many of them to be linguistically innovative. In this class, we will explore how North African francophone writers have experimented with French literary genres, as well as with bilingualism, in their struggles to fashion suitable creative spaces within the colonizer’s language. We will use short stories, novels, poetry, memoirs, and films to analyse this relatively new (and often subversive)literary voice, and to see how it interprets and rephrases central contemporary narratives, including those of war, exile, and immigration. Readings many include Bouraoui, Chraibi, Dib, Djebar, Feraoun, Haddad, Mokkeddem and Sebbar. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, MEST.

FREN 3471. Francophone Sub-Saharan Africa. (4 Credits)

This course will examine historical and contemporary migration and identities in sub-Saharan francophone Africa. Drawing on anthropology, film, literature, and theatre, we will explore migration from African perspectives. Topics covered include child trafficking, child labor, gender, religion, development and social change, and political consciousness. Readings/films will include: Le ventre de l’atlantique (Fatou Diome), Allah n’est pas obligé (Ahmadou Kourouma) Jaguar, les Maîtres fous (Jean Rouch), Femmes, greniers et capitaux (Claude Meillassoux). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRAM, FRMO, INST, IPE, ISAF.
Prerequisite: FREN 2600.
FREN 3476. Conflict and Violence in Francophone African Cinemas. (4 Credits)
The development of film industries across Africa has been inextricably tied with colonial history. We will focus here on the cinematic production of former French colonies, from Algeria, Morocco and Tunisia in North Africa to sub-Saharan countries, including Senegal, Burkina Faso, and Tchad. Often trained in Western film schools, African and North African filmmakers started making films in the 1950s and 1960s, a time also marked by repeated struggles for independence from colonial domination. There is no single way to look at such a diverse and extraordinarily rich corpus. We will look more specifically at how different filmmakers have addressed, performed and questioned the notions of conflict and violence, both physical and psychological, literal and symbolic, at different time periods and in different regional contexts. Ousmane Sembène, Abderrahmane Sissako, Mahamat Saleh Haroun, Nabil Ayouch, Sarah Maldoror will be among the filmmakers included in our discussions. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRMO, IPE.
Prerequisite: FREN 2600.

FREN 3478. The Essay Film. (4 Credits)
Recently called 'the most vibrant and significant kind of filmmaking in the world today' by Timothy Corrigan (2011), the essay film has been embraced by filmmakers worldwide. In this course, however, we will consider primarily the works of four key Francophone filmmakers and essayists, Agnès Varda, Jean-Luc Godard, Chantal Akerman, and Chris Marker. Non-exhaustive, this selective corpus allows for greater exploration of a genre that questions the boundaries between fiction and nonfiction, the declarative and the meditative, the visual and the verbal, the personal and the political. Critical interventions by Alexandre Astruc, Raymond Bellour, Phillip Lopate, Jean-Luc Godard, Timothy Corrigan and others, will help us understand and reflect on the formal integrity of a multifaceted genre, and the specific use of cinematic forms and techniques by filmmakers to convey clear political and aesthetic positions. The last month of the semester will be spent on students’ individual and collective creative experimentations with the essay video, with a special focus on pre-production and production planning and ongoing peer review critiques of each other’s works. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRMO, IPE.
Prerequisite: FREN 2600.

FREN 3479. The New Wave Arrives. (4 Credits)
This interdisciplinary course examines the “New Wave” as a broad sociocultural phenomenon that not only refers to the cinematic revolution brought about by François Truffaut, Jean-Luc Godard, Agnès Varda and other filmmakers in the early 1960s but one that encompasses a wide range of transformations that made 1960s Paris the epicenter of pivotal artistic trends, social transformations and political activity. In addition to the French New Wave, topics include the role of youth popular culture, urban architecture and planning, the impact of the Algerian War and decolonization wars, mass consumerism, the convergence of several social and intellectual movements (women, workers, students, immigrants) in ‘May 68’. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, COMM, FITV, FRMO, IPE.
Prerequisite: FREN 2600.

FREN 3480. Francophone Caribbean Literature. (4 Credits)
This course examines a variety of literary, historical, cultural and linguistic aspects of the francophone Caribbean between 1791 (the beginning of the Haitian Revolution) and today. Topics include articulations of political sovereignty in colonial and post-colonial contexts, francophone Caribbean literary movements, alternative narratives provided by Afro-diasporic voices, and Caribbean feminisms. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRAN, FRMO, GLBL, IPE.
Prerequisite: FREN 2600.

FREN 3490. Africa: Society and Culture Through Film. (4 Credits)
Africa has been the object of representations in film since the development of film technology, and Francophone African films and filmmakers have occupied a key place in African filmmaking since the 1960s. This course examines how African modernity and tradition, culture, gender, migration, and conflict are represented in films. The course will examine a wide range of Francophone African films and filmmakers, using the films as insights into understanding African topics and for reflecting on how Africa is represented in films. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRAN, HCWL, HUST, IPE.
Prerequisite: FREN 2600.

FREN 3492. Climate Change and Sustainable Development in the Francophone World. (4 Credits)
This course will examine how climate change is affecting societies, cultures, and economies in the Francophone world, with a focus on Africa. Through case studies, we will explore the challenges of environmental transformations and the solutions proposed, both by the international community and by local populations. We will examine debates surrounding solutions to climate change, as well as related issues including water scarcity, food insecurity, migration, conflict, and urbanization. Course taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRAN, FRMO, HPSE, HUST.
Prerequisite: FREN 2600.
FREN 3494. Africa: Education, Youth, and Society. (4 Credits)
Education is seen as the main motor of development and democracy in postcolonial Africa, yet many young people cannot access the education they seek. What are the reasons and the colonial legacies of education systems? How have youth and educators responded to this situation? Drawing on literature, documentary film, anthropology, and sociology, this class will analyze the relations between education and society in francophone Africa, focusing on how African nations have confronted the immense problems that education and youth face, including schooling, family, socialization, traditional education, and employment. This course is taught in French. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: FRAN.
Prerequisite: FREN 2600.

FREN 3500. French Literary Theory. (4 Credits)
French Theory became intellectual trend in the United-States thanks to the translation of works by philosophers such as Michel Foucault, Giles Deleuze and Jacques Derrida. This course focuses on that particular theoretical movement and the way it increased significantly the academic relationships between France and the United-States. It also gives students the opportunity to discover today's main “French theories”, not only understood as coming from France, but also from Québec, Switzerland, and Belgium. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRMO, IPE.
Prerequisite: FREN 2600 (may be taken concurrently).

FREN 3510. Translation: Theory and Practice. (4 Credits)
This course considers the question of translation theory and practice from a variety of perspectives: literary, philosophical, and historical. Students will become familiar with the problems most commonly encountered in translation, as well as solutions that have worked or failed. We will examine how these practices of translating into and from French have shaped French cultural and literary history, and since rare is the theorist of translation who is not also a practitioner, we will not only critique existing translations, but also create our own translations. Readings will include literary, philosophical, historical, and cultural texts, by authors like: Christine de Pisan, Du Bellay, de Meziriac, Flaubert, Baudelaire, Beckett, Kristeva, Derrida. Taught in French. (Groups II, IV)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: FREN 2600.

FREN 3555. Man: Beast or Machine. (4 Credits)
This course explores what it means to be human, from the early modern period to the present, through a survey of francophone texts dealing with humankind’s relationship to animals and machines. We will look at Renaissance humanist texts that argue for man's superiority to animals, which we will compare to their classical antecedents. We will investigate Enlightenment perspectives on the distinction between men, beasts and machines from Descartes, Diderot, and La Mettrie. Theoretical approaches from animal studies and postmodern anti-humanism will be applied to consider how modern society defends and critiques anthropocentrism through art, and how writing reflects our apprehension that machines are a threat to humanity. Course in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRMI, IPE.
Prerequisite: FREN 2600.

FREN 3564. French Theatre and Performance (Taught in French). (4 Credits)
This course explores French theatre and offers students the opportunity to engage in the creative process from script to rehearsal to a full public performance at the end of the semester. It teaches students how to express themselves more effectively in French, and it helps them develop the ability to communicate thoughts and feelings to others. We will combine acting, history, reading, theory, and analysis of major modern playwrights. Invited guests from the French and bicultural theatre community in New York City will share their experiences and provide opportunities for students to practice their new skills. Taught in French. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.
Prerequisite: FREN 2600.

FREN 3565. French Contemporary Novel. (4 Credits)
This course examines some formal and narrative experiments that have been central to the renewal of the French novel since the 1980’s, in particular the popularity of fragmented stories and micro-fictions. This fragmentation can take various forms beyond textual productions, including the turn for many writers to graphic novels, radio narratives, and other types of cross media explorations. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, FRMO, IPE.
Prerequisite: FREN 2600.

FREN 3566. French Contemporary Theater. (4 Credits)
This course examines French theater focusing on the performative theatrical art of confession and, in particular, ’la déclaration d’amour.’ Special attention will be granted to the relationship between text and performance or to how the word becomes action on stage and how staging affects our perception of the word. Readings include classical and contemporary plays as well as workshops and invited guests. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
FREN 3600. France Today. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, IPE, ISEU.

FREN 3605. Cultural and Literary History of Journalism. (4 Credits)
This course examines not only the history of the practice of journalism in France from the rise of mass media in 1830 to the present day, but also the cultural and literary representations of journalism and journalists. Particular attention will be paid to the figure of the grand reporter and the practice of reportage from 1890-1950. Students will read primary sources from the period in question and will be introduced to various theoretical approaches to the study of media. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, GLBL, IPE, MEST.

FREN 3630. Francophone Voices From North Africa. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRAN, IPE, MEST.

FREN 3631. North African France. (4 Credits)
This course focuses on young twenty-first century writers of North African descent whose recent literary debuts shocked the French media and literary establishment. An analysis of their public personae as well as a close reading of their works help us understand how French society negotiates volatile political issues such as religion, patriarchy, racism, violence, and sexuality. It also brings a thorough understanding of the socio-cultural taboos that emerged after decolonization, notably those connected to the French acceptance of the public sphere. Last but not least, it provides a forum to discover and discuss some of the most powerful new voices of contemporary literature. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRAN, IPE, MEST.
Prerequisite: FREN 2600.

FREN 3635. North African France. (4 Credits)
This course explores the historical and cultural ties between France and the Middle East between 1798 and today. Topics include: Napoleon’s campaign in Egypt; Egyptian intellectual diasporas in Paris (1880-1930); francophone poetry in 1920s Syria; francophone writings of the Lebanese civil war; identity politics in contemporary francophone Lebanese theater and cinema. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, FRAN, FRMO, GLBL, INST, IPE, ISEU, ISIN, ISME, MEST.
Prerequisite: FREN 2600.

FREN 3640. Postcolonial Representation. (4 Credits)
Novels and essays written in French and published in the 1980’s that reflect cultural identities. Authors viewed as interpreters of the postcolonial condition whose works have been redefining traditional conceptions of history and culture, literature and identity. Authors may include Sebbar, Conde, Glissant, Chamoiseau, Conflant. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, GLBL, IPE, MEST.

FREN 3675. American French and Francophone Perspectives. (4 Credits)
Drawing from a wide-ranging selection of literary texts, films, critical essays published or released at different time periods, this interdisciplinary course will examine Francophone constructions of ‘America’. We will thus question the extent to which ‘America’ is a neutral term. Does it refer to a geographical territory or to a site of cultural and political projections, aspirations or criticism? This course will examine how Francophone explorers, artists, intellectuals and politicians have contributed to the production and re-signification of this trope over time. Taught in French. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, FRAN, FRMO, ISEU.
Prerequisite: FREN 2600.

FREN 4998. Senior Thesis Tutorial. (4 Credits)
Independent research, supervised by a faculty in the language, leading to the completion of a senior thesis.
Attribute: IPE.

FREN 4999. Tutorial. (3 to 5 Credits)
Study of a particular aspect of French literature or thought. Independent research and readings. Weekly or biweekly meetings with a faculty adviser. Designed for majors with permission of instructor.
Attribute: IPE.

FREN 5090. French for Reading. (0 Credits)
FREN 8999. French for Research. (1 to 3 Credits)
A comprehensive introduction to French grammar and vocabulary to enable graduate-level research in French.

FREN 9101. Introduction to French I. (0 Credits)
FREN 9102. Introduction to French II. (0 Credits)
FREN 9151. Intermediate French I. (0 Credits)
FREN 9152. Intermediate French II. (0 Credits)
FREN 9201. French Language and Literature. (0 Credits)
FREN 9260. France: Lit., Hist., Civ.. (0 Credits)

German (GERM)

GERM 0010. German for Study Abroad. (2 Credits)
This course prepares students for studying abroad in a German-speaking country with no or little prior knowledge of German. It combines learning the basics of German with learning more about Germany, and its subtleties and specifics when it comes to culture. It is designed for undergraduate and graduate students, professionals and language learners at large, and will introduce the very basics of German grammar, vocabulary, and everyday topics (how to open up a bank account, register for classes, how to navigate the Meldepflicht, or simply order food). It aims to help you get ready for working or studying abroad, and better communicate with German-speaking colleagues, family and friends.
GERM 1001. Introduction to German I. (5 Credits)
An introductory course that focuses on the four skills: speaking, reading, writing and listening providing students with a basic knowledge of German linguistic structures, vocabulary and culture, which studied interdependently, comprise the German Language.

GERM 1501. Intermediate German I. (3 Credits)
Attribute: IPE.
Prerequisites: GERM 1001 or GERM 1002.

GERM 1502. Intermediate German II. (3 Credits)
Attribute: IPE.
Prerequisite: GERM 1501.

GERM 2001. German Language and Literature. (3 Credits)
A critical analysis of selected cultural and literary texts; composition, conversation, and review of pertinent grammatical structures.
Attribute: IPE.
Prerequisite: GERM 1502.

GERM 2100. Advanced German Grammar. (4 Credits)
The course is designed to help students gain more insight into the structure of the German language and to further develop and strengthen their knowledge of German grammar. Survey and practice of German grammar as well as more advanced features of German syntax and style. Course will be conducted in English with readings and exercises in German. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: GERM 2001.

GERM 2601. German Conversation and Composition. (3 Credits)
Intermediate-level conversation with some composition. Optional course for students wishing additional practice in self-expression in German. May be taken simultaneously with GERM 1502 or higher.
Attribute: IPE.

GERM 2650. Business German. (4 Credits)
Development of oral proficiency used in daily communication within the business world, preparing the students both in technical vocabulary and situational usage. Introduction to specialized vocabulary in business and economics. Readings in management, operations, marketing, advertising, banking, etc. Practice in writing business correspondence. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: GERM 2001.

GERM 2800. German Short Stories. (4 Credits)
This course follows the development of the short story as a genre in German literature with particular emphasis on its manifestation as a means of personal and social integration from the middle of the 20th century to the present day. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.
Prerequisite: GERM 2001.

GERM 3010. Frisch Aus Der Presse: Media and Communication. (4 Credits)
Further development of language skills through analysis and discussion of current texts from a variety of sources such as German-language newspaper articles, films, songs, internet, radio and TV programs, literature excerpts. Specific topics will vary based on students' interests. Work on different types of writing like description, argumentation and creative writing. In class activities include discussions, paired and group work, and presentations. In German. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.
Prerequisite: GERM 2001.

GERM 3015. Medienspiegel: Conversations About Current Affairs. (4 Credits)
This course, taught in German, is designed for students who wish to further develop their fluency and accuracy in German. It provides an opportunity to improve language skills through discussion and analysis of current events and texts from various German-language media sources. Specific topics will vary based on students' interests. In-class activities include discussions and presentations. Written assignments will help improve students' writing proficiency. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: GERM 2001.

GERM 3050. The Sound of Music: German Music and Musical Genres. (4 Credits)
This course traces the history of German music from the Middle Ages to Deutsche Popmusik from German Lieder to German Schlager, New German Wave to Hip Hop. In-class activities include listening exercises, discussions, paired and group work, presentations on topics related to the music, events, and cultural foci covered. Drawn from authentic German realia, lyrics, interviews, articles, reading assignments will focus on both the music as well as its socio-political context. While engaging authentic German texts and music, it will be the goal of the course to advance stylistic and grammatical overall competence while fine-tuning listening and speaking skills in German. Taught in German. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.
Prerequisite: GERM 2001.

GERM 3051. Survey of Literature I. (4 Credits)
A general survey of the history of German literature from the beginning of the 18th century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.
Prerequisite: GERM 2001.

GERM 3052. Survey of Literature II. (4 Credits)
A general survey of the history of German literature from the beginning to classicism (ca.500-1832). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.
GERM 3057. Medieval German Literature: Potions, Passions, Players, and Prayers. (4 Credits)
This course will introduce students to the rich literary and cultural heritage of Medieval Germany. The texts will all be read in English translation, but we will go over some passages in their original languages in class to catch some of the flavor of the Medieval German. Topics covered will include pre-Christian charms, the epic of the Nibelungs, love poetry, and urban carnelian plays. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, GERM, MVLI, MVST.
Prerequisite: GERM 2001.

GERM 3275. Grim Tales and Grimms' Tales. (4 Credits)
This course is designed for students who want to explore German literature in the original and simultaneously work on their language skills. This section will specifically focus on refining students' knowledge of German syntax by reading sophisticated novellas and short stories by authors such as Heinrich von Kleist, Theodor Storm, Karl May, Franz Kafka, Arthur Schnitzler, and Thomas Mann, as well as fairy tales and Gebrauchsprosa. In-class activities include literary analysis, oral presentations, and discussion. Written assignments aim at improving the students' writing proficiency with particular attention to syntactical accuracy and diversification. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.
Prerequisite: GERM 2001.

GERM 3302. German Through the Senses. (4 Credits)
In this course, we focus on texts which read the world through the experience of one particular sense: smell, hearing or taste. Grenouille the protagonist of Patrick Suskind's novel Das Perfum (Perfum, 1985), creates a fragrance which is bottled desirability, becoming a mass murderer in the process. Similarly, the musical genius portrayed in Robert Schneider's Schlafes Bruder (1992) cannot find love in real life and chooses death, the brother of sleep, instead. Franz Kafka's 'Hungerkünstler' (A Hunger Artist, 1922) has turned starvation into an art form, whereas Bella Martha (Mostly Martha), the chef in Sandra Nettelbeck's 2001 film, can only handle her life when she is in the kitchen. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE.
Prerequisite: GERM 2001.

GERM 3303. Borders and Crossings. (4 Credits)
Doors, gates, walls, and other borders between inside and outside, home and society, me and you, define our daily lives. And to define means to mark off, to draw boundaries. While animals usually stay within their confined territory, man is the animal that continually resets, violates, and strives to cross these borders. In this course, you will encounter many exciting contributions to German and Austrian literature and film in the 20th-21st centuries. Our focus will be borders and barriers—physical, ideological, intellectual, and metaphysical. Furthermore, we will discuss border/crossings between cultures, countries, identities, reality, and fiction. Throughout this course, you will be exposed to texts and films that will expand and challenge your consciousness regarding the 'other' and the (im)possibilities of interpersonal and intercultural communications. Taught in German. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.
Prerequisite: GERM 2001.

GERM 3307. Germany and Migration. (4 Credits)
Migrants have played a role in many countries' culture. Germans started coming to the U.S. in the 17th century, and about 17% of Americans have German ancestry. Migrants entered Germany starting around the turn of the 20th century, and today about 21% of Germany's population has a migration background. How do migrants assimilate and learn the language of their new country? What influences do migrants have on a country's culture and language? In the first part of the semester, we will examine the migration of Germans to the United States, and in the second part we will focus on migration into Germany. Taught in ENGLISH. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, ALC, AMST, ASSC, COLI, IPE.
Prerequisite: GERM 2001.

The purpose of this course is to study how the intertwining of Germanic and Christian mythic worlds serves to create the long lasting enchantment of the Grimms' Fairy Tales. The world of myth and fairy tale will be explored from the point of view Realization theory, which emphasizes the effect which myths and stories attempts to elicit from the reader, as described by William Grimm. In contrast to the Grimms' approach to fairy tale enchantment as awakening the human heart, we will also read three tales by Tieck, where there is fear that there is danger lurking deep in the forest of enchantment. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.
Prerequisite: GERM 2001.
GERM 3520. German Culture in Context. (4 Credits)
The course will examine some aspects of post-WWII German society and culture as well as further expand your reading, writing, and speaking skills with an emphasis on the German grammatical case system. Readings from a variety of sources such as literature, online sources, newspapers, and magazines, will focus on specific aspects, for example, 'Vergangenheitsbewältigung', the Fall of the Wall, and migration. Taught in GERMAN. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.
Prerequisite: GERM 2001.

GERM 3566. Deutschland 1968: Protest, Hippies, Und Terroristen (Taught in German). (4 Credits)
1968 stands out as a major symbolic and maybe even actual turning point in German politics and societal self-awareness. As we will learn, it is the results of both Germany's Nazi past, perceptions of Western imperialism, and new demands for freedom by various groups throughout both Germany and the rest of the world. This course will look at various political and social protest and opposition movements in Germany since 1968. We will determine what certain groups believed in, analyze their statements and actions, and try to understand how their world acts as an important framework for understanding Germany in the twentieth century. We will investigate historical and societal conditions as well as aesthetic implications which turned political engagement into acts of terror and terrorism by looking at 20th century German literature, film, and painting. TAUGHT IN GERMAN Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.

GERM 4998. Senior Thesis Tutorial. (4 Credits)
Independent research, supervised by a faculty in the language, leading to the completion of a senior thesis.
Attribute: IPE.

GERM 4999. Tutorial. (3 to 4 Credits)
Study of a particular aspect of German literature or thought. Independent research and readings. Weekly or bi-weekly meetings with faculty adviser. Designed for majors with permission of instructor.
Attribute: IPE.

GERM 5001. Graduate Reading in German I. (0 Credits)

GERM 5002. Grad.Readg.in German II. (0 Credits)

GERM 9101. Introduction to German I. (0 Credits)

GERM 9151. Intermediate German I. (0 Credits)

GERM 9201. German Language and Literature. (0 Credits)

GERM 9301. Medienspiegel. (0 Credits)

Global Finance (GFGB)

GFGB 6000. CFA Prep. (0 Credits)
Student prep for the CFA exam; second year students and alumni along with faculty help students study and prepare for the CFA exam.

GFGB 6002. Basics of Finance. (1 to 3 Credits)
This course is an introduction to the financial system and the basic techniques in valuation of financial and physical assets. The course is primarily meant for someone who has not had a formal introduction to financial markets, institutions, and instruments. The course will cover the topics of Financial Statement Analysis, Time Value of Money, Valuation of Stocks and Bonds, Capital Budgeting, Cost of Capital, and the Efficient Market Hypothesis.

GFGB 6003. Managerial Economics. (1 to 3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Examines microeconomic theory and concepts that strive to explain economic decisions of businesses in the marketplace. The dominant issues addressed are the factors of supply and demand and the relationship of production costs, output and market structures to pricing. Designed to provide the economic foundation for management decisions.

GFGB 6005. Financial Modeling. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Develops (using Excel) the type of financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Covers modeling of financial statements and models in many other important practical areas, such as time value of money, project evaluation, bonds, investment management and derivatives. Emphasizes on using most powerful and useful tools in Excel, such as logical functions, PivotTables, Data Table, Scenario Manager, Goal Seek to solve problems that closely resemble real-life situations.
Attribute: BUAN.

GFGB 6006. International Financial Management. (3 Credits)
This course will explain the concepts of corporate finance and their applications in an international setting. We will examine opportunities and problems that are faced specifically by multinational and foreign corporations and will compare corporate finance practices around the world. Topics covered in the course include foreign exchange rate mechanics, international parity theories, forecasting and hedging, international cost of capital, capital budgeting, capital structure, and valuation of foreign investments.

GFGB 6007. Global Investment Principles. (3 Credits)
The objective of this course is to introduce the student to investment principles in the U.S. and in the global capital market. We will understand existing assets and investment vehicles, the functioning of capital market, the theoretical principles that underline asset pricing, and its applications in the valuations of fixed income and equity securities.

GFGB 6008. Financial Econometrics. (3 Credits)
This course covers estimation of parametric and non-parametric techniques commonly used in finance, applying high-frequency financial databases. We will discuss properties of financial data; linear time-series data analysis; and the basic theory of statistical inference with linear models, general linear models, conditional Heteroskedasticity models, nonlinear models, and Bayesian inference and estimation.

GFGB 6010. Global Financial Markets. (3 Credits)
This course is intended as an introduction to Global Financial Markets. We will discuss the instruments traded in the markets, the institutions that support and frame the markets, the trading mechanisms and the regulatory structure. The course is intended to be descriptive and conceptual. The aim is to familiarize you with the breadth and scope of equity, debt, and derivative markets. We shall discuss the recent developments in the US and the development of financial markets globally.

Updated: 07-27-2020
GFGB 6011. Basics of Accounting. (1 to 3 Credits)
This course provides a basic understanding of the preparation and analysis of corporate financial statements; introduces generally accepted accounting principles (GAAP) and the standard-setting process; and discusses current issues in the reporting process, such as the benefits and problems of the Sarbanes-Oxley Act.

GFGB 6012. Basics of Statistics. (1 Credit)
This course introduces the basic statistical concepts essential for business research and decision-making. These include descriptive statistics, probability distributions, statistical inference, and simple and multiple regressions.

GFGB 6013. Communicating Finance Theory. (0 Credits)
This lecture series will provide a summary of many financial topics. The class will also train students to communicate knowledge of this material to professionals at financial institutions.

GFGB 6014. MSGF—Industry Applications. (0 Credits)
This course is required for all new students in the Master of Science in Global Finance (MSGF) program. The program director will lead lectures and bring in many industry professionals to expose MSGF students to a range of financial applications and opportunities. Grading will be Pass/Fail.

GFGB 6015. MSGF Roundtable. (0 Credits)
This course is required for all new students in the Master of Science in Global Finance program. The program director will lead small group seminars of 15 to 20 students. Topics will be focused on student interests and needs. Each student will select two sessions to attend during the term, one in the first half and in the second half. Grading will be Pass/Fail.

GFGB 6016. Introduction to Financial Data and Analytics. (3 Credits)
This course introduces students to the different financial data sources used in practice and in research. Students will learn how to access and download data from Bloomberg, financial data websites, and research databases. Students will also be introduced to data manipulation tools and basic statistical tools in Python and will engage in short projects that use the data and implement the tools developed in class. The focus is to provide a knowledge of financial data, Python data-frame techniques, and data visualization and inferences using Python.

GFGB 7000. Residency. (0 Credits)
Residency is a multi-day experience in New York City, which is required for online students.

GFGB 7001. Global Financial Markets. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Provides a comprehensive overview of global financial markets, the functions and goals of key financial institutions and the role played by central banks and regulatory agencies. Covers international money markets, international equity markets, the foreign exchange market, forward markets for commodities and financial instruments, bond markets and derivative markets.
Prerequisites: GFGB 6001 and GFGB 6003.

GFGB 7002. Contemp Issues Global Finance. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Explores current issues relevant to the global financial system, including international commercial and investment banking and international investments. It emphasizes the underlying conditions and fundamental trends in various sectors of international finance.
Attributes: GFCF, GFCR, GFIM.
Prerequisites: GFGB 6001 and GFGB 6005.

GFGB 7004. Global Equity Portfolio Mgt. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Provides a comprehensive overview of equity portfolio management in theory and practice. Examines portfolio objectives and links them to appropriate investment strategies. It covers pricing of equities, the asset-allocation decision, return enhancement/risk control techniques, performance evaluation and recent changes in international fund management. Analyzes international investment strategy and the relative merits of various approaches.
Attribute: GFIM.

GFGB 7005. Global Corp Governance. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Examines how modern publicly traded corporations are governed in the global markets. It discusses the roles of the board of directors, corporate management, institutional investors, and other shareholders, and also discusses the effects of the recent legislation and financial market developments on corporate governance. Provides international comparisons of corporate governance structures and issues arising in contests for corporate control. Prerequisites: GFGB 6001 PRINCIPLES OF MODERN FINANCE, GFGB 6005-FINANCIAL MODELING.
Attributes: GFCF, GFCR.
Prerequisites: GFGB 6000 and GFGB 6005.

GFGB 7006. Global Risk Management. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Covers market risk and volatility, calculation of VaR (value at Risk), Monte Carlo Simulation, credit risk and use of credit derivatives, operational risk, counterparty risk and other topics. Discusses risk regulations, including Basel II, recent developments in Basel III, and recent regulations on the banking industry in the U.S.
Attributes: GFCF, GFCR, GFIM.
Prerequisites: GFGB 6001 and GFGB 6005.

GFGB 7007. Raising Capital and Investing in Global Financial Markets. (3 Credits)
Raising Capital & Inv in Glob.
Attribute: GFCF.
Prerequisites: GFGB 6001 and GFGB 6004.

GFGB 7009. Money Credit Interest Rates. (3 Credits)
Studies the role of money, credit and interest rates in the efficient and ethical functioning of domestic and global financial markets. This building-block course assumes a background in macroeconomics and finance, and it establishes a foundation for further study in all areas of finance. Topics include: flow of funds and interdependency within the financial system; the Federal Reserve System and its role in money creation; interest rates; the links between interest rates and the growth of money; and the effects of inflation and term structure.
Attribute: GFCF.

GFGB 7010. Investment Banking. (3 Credits)
This course is intended to give students a practical introduction to investment banking and its role in helping corporations raise capital from the global capital markets. Topics include: venture capital, public offerings, private placements, going public, stock and bond financing, convertibles and other hybrid instruments, design of innovative securities, swaps and other derivative instruments, mergers and acquisitions and leveraged buyouts.
Attribute: GFCF.
GFGB 7011. Hedge Fund. (3 Credits)
The course provides in-depth analysis of hedge fund strategies including absolute-return; controlled risk arbitrage; equity market neutral, long short, and statistical arbitrage; derivatives including options and credit derivatives; fixed income, currency and global macro arbitrage; distressed debt and emerging markets. It examines the role of various participants including regulators, banks, brokerage firms, market makers and investors, both private and institutional.
Attribute: GFIM.

GFGB 7013. Fixed Income Securities. (3 Credits)
Introduces fixed-income securities, basic fixed-income concepts, the different sectors of the fixed-income market and basic bond mathematics. Studies quantitative fixed-income analysis and its use in valuing bonds and quantifying risk-return characteristics. Involves extensive training in the mathematical formulation of bond valuation problems and in the use of the existing models and software to solve these problems.
Attribute: GFIM.

GFGB 7014. Futures and Options. (3 Credits)
Examines the institutional aspects of options and futures markets and discusses the strategies of hedgers, arbitrages and speculators. Provides an introductory analytical foundation for pricing futures and option contracts.
Attribute: GFIM.

GFGB 7015. Credit Management. (3 Credits)
This course focuses on the analytic approach (stemming from Basel II capital accords) and will help students make wise credit decisions and manage lending portfolios. Topics include the latest lending techniques based on cash flow, advanced forecasting methods (including simulation and stochastic optimization), pricing, portfolio management, default probability, valuation analysis risk rating and credit derivatives.

GFGB 7016. Real Estate Capital Markets. (3 Credits)
This Real Estate Capital Markets course will cover both the primary and secondary debt and equity markets linked to real estate assets. While the underlying real estate assets in the primary markets will be covered, a greater portion of the class will be devoted to the secondary debt and equity markets, mainly dealing with mortgages, mortgage backed securities, and Real Estate Investment Trusts (REITs). A distinguishing aspect of this course is the focus on the intersection of the primary and secondary real estate capital markets, investor perspectives, and the impact of macroeconomic factors. Additionally, this course will include a robust mix of quantitative and qualitative factors in order to provide a holistic, less technical perspective on the real estate capital markets, and the real estate industry at large.

GFGB 7017. Real Estate Finance. (3 Credits)
Discusses the major factors affecting the valuation and financial structuring of real estate, including general tax and depreciation policies. Presents the roles of principal lending institutions, mortgage banks and investment banks in real estate lending, syndications and partnerships. Also surveys real estate-related securities and their markets.

GFGB 7018. Adv Global Portfolio Mgt. (3 Credits)
The course will review (1) basics of modeling of securities’ returns and volatility in the context of portfolio management / “buy-side”; (2) theoretical basis and empirical evidence of risk-return tradeoff and investor preferences; (3) main approaches to portfolio construction and challenges with their practical application; (4) performance evaluation, and other relevant portfolio management topics.

GFGB 7019. Equity Analysis. (3 Credits)
This course explores techniques and skills required to evaluate the attractiveness of investment opportunities. Experts in the field will be invited to join the class and lead discussions on issues facing analysts, how analysis is used by money managers in making investment decisions, wealth management, and private equity analysis. The course is a combination of guest lectures, case studies and team projects. Students will be expected to analyze an industry as well as engage in a discussion with guest speakers and class participants.

GFGB 7020. Value Investing Student Mgt Fund. (3 Credits)
This course aims to familiarize the student with the principles and techniques of value investing, the investment philosophy pioneered by Graham and Dodd during their years at Columbia Business School. This will be done through a combination of formal lectures, in-class valuation discussions (see below) and three presentations by leading investors.

GFGB 7021. Emerging Markets. (3 Credits)
This course will focus on government policies; their motivation, transmission and limitations. Students will learn how a country’s investment possibilities and potential GDP is driven by its labor force and productivity. In turn, the level of productivity can be affected by a confluence of monetary, fiscal, currency and regulatory policies developing at the “emerging growth” phase when political goals and legal structures are still in transition, financial and government institutions are not yet fully formed and consumer spending behavior and market availability are evolving.
Attribute: GFIM.

GFGB 7022. Venture Capital Financing. (3 Credits)
We will examine the changes in the asset class over time - from the formation of American Research and Development in 1946 to the formation of some of the angel-type funds of the present. We also will examine the geographical differences between venture funds - West Coast and East Coast. We also will look at specialization - the beginnings of IT-focused investing and the move into healthcare and finally into energy. Finally we will examine the phenomenon of global venture capital. How does that vary from the way venture capital is practiced in the US. The class will be taught in modules and we also will rely on practitioners and experts to visit with the class. Where possible, the students will be asked to visit venture capital fund presentations, expert briefings as well as personal briefings.
Attribute: ABEP.

GFGB 7024. Fintech Compliance-Asia to Us. (3 Credits)
An overview of the components of an effective global Corporate Compliance Program. Examination of the Part C Risk Assessment and the Seven Steps of a corporate compliance and ethics program. Review of compliance program design and best practices, including the roles of the corporate compliance office and in-house counsel, risk assessments, Foreign Corrupt Practices Act, global codes of conduct, corporate governance, monitoring and re-evaluation.
Attribute: GFCR.

GFGB 7025. Adv Corporate Finance. (3 Credits)
This course teaches the art of applying corporate finance theory and essential tools and techniques to strategic decision-making in critical real-life situations faced by organizations. The course enhances the students’ understanding of corporate finance by providing a comprehensive examination of selected advanced topics, such as alternative valuation methods, real options in corporate finance, decision trees, international operations, mergers and acquisitions, risk arbitrage, debt capacity and leveraged buyouts, private equity, warrants and convertibles, and ethical issues.
Attribute: GFCF.
GFGB 7026. Alternative Investments. (3 Credits)
The course is an introduction to the rapidly evolving universe of alternative investments. Delivered in modules, the course covers a broad array of alternative strategy classes (Quantitative/Systematic, Fundamental Long/Short, Global Macro, Private Equity) ranging across all major asset classes (Equities, Fixed Income, Currencies, Commodities, Derivatives).
Attribute: GFIM.

GFGB 7027. Algorithm Trading. (3 Credits)
Electronic algorithms are being used by major institutions, investment banks, and hedge funds to trade stocks, bonds, currencies, and a plethora of financial derivatives. Algorithms are being used for all aspects of trading - from asset allocation and stock selection, to execution and implementation, and for risk management and regulatory and compliance reporting. In this course, students will learn the necessary skill sets, and underlying math, statistics, and programming skills to build, develop, manage, and implement profitable algorithms across all asset classes.

GFGB 7028. Technical Analysis. (3 Credits)
This course is designed to inform students about how the markets and individual stocks behave (i.e., technical analysis), and how they differ from the economy and individual companies (i.e., fundamental analysis).

GFGB 7029. Student Managed Investment Fund. (3 Credits)
Students will be trained on construction of a disciplined investment process using “Value Investing” strategy as the core foundation based on research work accentuated by Benjamin Graham and David Dodd. Students are expected to develop relationships with the Wall Street “sell-side analyst(s) covering his or her stocks as well as the Investor Relationship (IR) person(s) of the targeted stocks. A team of industry experts, fundamental analysts, portfolio managers, risk managers and other investment professionals will work closely with students to ensure that the students are exposed to various tools and methods that are currently being employed in the industry.

GFGB 7030. CFA Competition and Workshop. (0 Credits)
While this course is for zero credit, it has a heavy work load and provides valuable practical experience. Students will be arranged into teams. Each team will write a full sell-side coverage report, build out a presentation, and pitch it to Fordham Wall Street alumni.

GFGB 7031. Seminar in Value Investing. (3 Credits)
This survey course is designed to introduce the fundamentals of the Graham and Dodd value approach to investment analysis. The course will be segmented into two parts: the basic structure of the analytical approach to value investing and its relationship to many of the elements of the MBA curriculum will be described through lectures, exercises, readings, in-class discussions and homework assignments; the last sessions of the course will be devoted to student presentations of their investment recommendations.

GFGB 7032. Applied Capital Markets and Financial Regulations. (3 Credits)
This course will explore how the market structure has fundamentally changed after the 2008 liquidity and credit crisis, and how that crisis has affected liquidity, balance sheets, risk taking, and returns across the entire financial services industry. The new reality is that regulation has changed the landscape of Wall Street and the dynamic of how the sell-side and buy-side will interact in the foreseeable future.

GFGB 7033. Corporate Finance. (3 Credits)
Studies corporate finance and its specific decisions. Topics include evaluating capital expenditure proposals, forecasting financing requirements and selecting sources of financing. The course also discusses working capital management, dividend policy and contingency planning, and addresses the additional challenges of multinational firms.

GFGB 7034. Finl Statement Analysis. (3 Credits)
Gives students a better understanding of financial statements and the information they communicate on the operating, investing and financing activities of corporations. Focuses on the impact of financial accounting principles, disclosure standards and alternative accounting practices on financial reports. Examines and evaluates traditional and non-traditional methods of financial statement analysis.

GFGB 7035. Intl Trade & Development. (3 Credits)
The first half of the course focuses on the theories and practices of world trade. Topics include comparative advantage, the changing trade competitiveness of nations and protectionism. During the second half, the focus shifts to developing countries: the process of economic development, including the contribution of foreign investment and technology as well as investment and trade opportunities, policies and regulations.

GFGB 7036. Research in Value Invest. (3 Credits)
Prof. Johnson, a leading expert in the field of Value Investing, will lead a small, project based seminar that focuses on best practices in the field. Selective enrollment by approval of the instructor.

GFGB 7037. Applied Investment Principles. (3 Credits)
This course provides applications that follow Principles of Finance or Global Investment Principles. EXCEL models will be applied to CAPM modeling of Risk and Return, to Factor Models, and to Portfolio Attribution. Data may be drawing from Boomerang, Yahoo Finance, and other sources.

GFGB 7038. Applied Quant Invest Strateg. (1.5 Credits)
This course provides applications that follow Financial Econometrics, using SAS or similar software. The techniques from that course will be reviewed, extended, and applied to stock return and accounting data. The focus will be on anomalies, predictions, and multifactor models.

GFGB 7039. Computational Fin for MSGF. (3 Credits)
The course will introduce students to programming in R and Python, and will provide many basic finance applications.
Attributes: ABFF, GFCR.

GFGB 7040. Lectures in Applied Port Mgt. (3 Credits)
This advanced Portfolio Management course quickly reviews Modern Portfolio Theory (MPT) conceptual underpinnings and builds on MPT 1.0. It delves into contemporary liability driven asset allocation, MPT 2.0 and portfolio management industry practices, issues and concerns. Lectures, problem solving, and self-study along with extensive hands-on tools using Microsoft Excel based models will be used to provide a practitioner’s perspective. We will review and demo contemporary asset allocation optimization and forecasting techniques, new asset class pricing and valuation, performance and risk attribution, tail risk measurement and management tools etc. using real time vendor based (third party) solutions. As prerequisites - the student should have class exposure to investment and portfolio analysis, Excel, stats, and basic regressions.
GFGB 7041. British Economy and Brexit. (3 Credits)
This intensive course is designed to give students an in-depth understanding of Brexit including the implications for the British economy and the companies that operate in it. Students meet three times as a class in preparation for travel to England, scheduled for May 10-20, 2017. This course may count toward a Finance or Management concentration. Please see your program director or dean-adviser for further registration information.

GFGB 7042. Sustainability and Finance. (3 Credits)
In this course we explore how the evolving needs of society are changing the way financial theories, tools, and techniques are conceived and applied.

GFGB 7043. Financial Innova & Institu. (3 Credits)
This course will introduce major financial institutions, such as commercial and investment banks, insurance companies, mutual funds, hedge funds, and credit rating agencies with a focus on their risk contributions to the modern financial system. We will examine their credit risk in depth, and how to model and analyze credit risk and products. We will also understand new financial sector regulations and systemic risk by focusing on Dodd-Frank, market based stress-testing, Comprehensive Capital Analysis and Reviews (CCAR), and other methods. This course will help prepare students for the job market at financial institutions and regulators.

GFGB 7044. Auto Trading Systems - Intro. (3 Credits)
This course discusses key issues involved in the design of an Auto (Algorithmic) Trading Systems, and provides hands-on experience. The end product is a prototype Auto Trading System designed by students that successfully trades in the real market (stock, futures, option) using live data feeds from exchanges. Issues covered include: typical structures of trading systems; efficient processing of live information; minimizing trade slippages; handling large number of securities; asynchronous information processing; GUI interfaces; etc. Industry experts are invited to discuss new developments. Key programming techniques will be reviewed at the beginning, very briefly. The course is suitable for students in MSGF, MSQF, and other master level students with programming skills equivalent to one formal course (e.g. R, Matlab, VBA, etc.). Students with less programming skill may take the course if approved by instructor.

GFGB 7045. Investing in European Union. (3 Credits)
The EU is the largest market for US exports and foreign direct investment. The objective of the course is to familiarize students with the process of regional integration and monetary unification in Europe and the opportunities and challenges which this has created for foreign investors. Regulatory differences between the US and EU in competition laws and financial sector will related to the investment climate for foreign companies. The course will highlight that despite the deep economic and financial integration in the EU, significant country- and regional differences exist. This will be assessed through the analysis of several Harvard Business case studies covering different country- and industry experiences.

GFGB 7046. Fintech -An Introduction. (3 Credits)
FinTech is a new and emerging field of technology that is disrupting the way that many companies are conducting business. FinTech has already “forever” changed many sectors including mobile payments, social media, money transfers, loans, fundraising, travel, trading and asset management. It has completely revolutionized the way companies are developing products, conducting research, establishing directed sales and marketing plans, and utilizing start-up technology. Businesses are using FinTech to expand their products and services at a fraction of its previous cost. Entrepreneurs are utilizing FinTech as a central foundation for research, funding, and product development. Customers are already utilizing FinTech as part of their daily lives - mobile apps, social media, banking, online shopping, entertainment and gaming. This course will introduce students to the breadth of FinTech, and touch upon the technical underpinnings.

GFGB 7047. Stress Tests and Cap Adequacy. (3 Credits)
The financial crisis of 2007-08 taught us all a lesson: that preparedness is everything. How resilient and prepared will we be, and how fast will we be able to recover? This is the key focus of this course: how to plan for moments of distress so that firms such as yours have capital of a sufficient quality to survive potential storms. We will demonstrate how to create a robust capital plan and test it for moments of hypothetical stress. We will investigate exactly how a bank holding company and an insurance company should conduct their capital plan, highlighting the significant differences between the two industries. By the end of the course, you will be able to create a capital plan for your business on your own.

GFGB 7048. Dynamics of Banking& Fin Mkts. (3 Credits)
This course is designed to provide students a well-rounded and hands-on perspective on the practical functioning and decisions in financial markets and banking.

GFGB 7049. Global Financial Markets and the Macro-Economy. (3 Credits)
The overarching goal of this course is to give students an understanding of the forces affecting real income growth, inflation, and asset prices in the world economy. The specific topics the course will address include: the operation of monetary and fiscal policy; how those policies affect financial markets and the broader economy; the determinants of countries’ long-term rates of growth; the factors behind the recent financial crises in the U.S. and EU; the features of currency crises, business cycles, and financial crises historically; and the relationships linking global interest rates, exchange rates, and inflation rates. The course will combine economic theory and empirical evidence to provide a toolbox of skills that students can use to analyze these and similar issues going forward.

GFGB 7050. Machine Learning for Finance. (3 Credits)
Machine learning (ML) methods of data analysis and prediction are transforming the financial landscape. This course provides a broad overview, knowledge, and practical skills of Machine Learning (ML), focusing on applications in Finance. The course will introduce various ML methods including supervised and unsupervised learning, as well as deep and reinforcement learning. Students will understand the general landscape of available ML algorithms and learn to implement the most appropriate solutions of a given problem. The course will use Python programming and open source Python packages, and requires knowledge of statistics. Class sessions will provide the basics of Python.

Attribute: ABFF.
GFGB 7051. Econtech: Econ & Data Mining. (3 Credits)
The overall financial markets and individual company performance are largely driven by the growth rate of the economy, which in turn is affected by monetary, fiscal, and currency policies. Our understanding and forecasting ability are based on analyzing and mining available data. This course will examine data and data mining to better understand a range of policy and output variable, and how they interact under different regimes.

Attribute: ABFF

GFGB 7052. Empirical Value Investing. (3 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed.

GFGB 7053. Investor Relations. (3 Credits)
A corporate Investor Relations program formulates and communicates the financial performance and strategic direction of diversified corporations to the global investment community. Investor Relations professionals are well versed in accounting, compliance, finance, governance, marketing and communications. They collaborate with senior management and the Board of Directors to convey and interpret corporate matters to the public. This course will teach students the skills and competencies required to become a corporate Investor Relations professional. The course utilizes a course textbook, case studies, investor relations guest speakers and participation in investor relations events.

GFGB 7054. Wharton-Impact Investment Workshop. (3 Credits)
Students will attend workshops on ESG (Environmental, Social, and Corporate Governance) and Impact Investing. They will compete in teams of three to five against other national schools to construct a 100% Impact Portfolio. Since this is a two-semester competition, only students who participated in Fall may register in Spring.

GFGB 7055. MSGF Research Seminar. (3 Credits)
Students will learn from industry practitioners how textbook concepts are applied in the finance industry. Guest lecturers will cover areas which include wealth management, equity research, portfolio management, investment banking, risk management and FinTech.

GFGB 7056. Blockchain Tech & App Dev. (3 Credits)
The main objective of this course is to familiarize you with the ecosystem, technologies, and development skills surrounding Blockchain. The course starts with foundational concepts such as distributed state machine, hash tree, P2P network, GPU processing, cryptocurrency, and cryptography. Using both simulated sandbox and locally installed environments, the course then guide you through the development, front-end integration, and deployment of Blockchain-based smart contracts. Other topics covered include rapid prototyping, design patterns, and agile process to maximize the success likelihood for Blockchain projects. Prerequisites: Proficiency in computer programming; basic knowledge in analysis and linear algebra.

GFGB 7057. Contemp Develop in Corp Fin. (3 Credits)
This course will cover a number of important topics of current interest to the corporate finance industry, such as: executive compensation and governance; utilizing and responding to fintech; importance of the growth of intangible assets; importance of large corporate cash holdings invested in risky assets, such as hedge funds and private equity. Prerequisite: GFGB 6006.

GFGB 7058. Behavioral Finance. (3 Credits)
Over the past several decades, the field of finance has developed a successful paradigm based on the notions that investors and managers are generally rational and that the prices of securities are generally efficient. In recent years, however, anecdotal evidence as well as theoretical and empirical research has shown this paradigm to be insufficient to describe various features of actual financial markets. In this course we will use psychology and more realistic settings to guide and develop alternative theories of financial markets. We will examine how the insights of behavioral finance complement the traditional paradigm and shed light on investors’ trading patterns, the behavior of asset prices, corporate finance, and various financial market practices through lectures, case studies, and our own discussions.

GFGB 7059. Student Managed Investment Fund: ESG-Impact. (3 Credits)
In this joint graduate and undergraduate course, students will apply their investment and portfolio skills in the analysis and selection of a real set of securities and opportunities. Selection will focus on ESG investments and/or those that stress societal impact.

GFGB 7060. Practical Exploration of M&A. (1.5 Credits)
This class will provide an introduction to the essential elements of large cap M&A transactions from the perspective of real, recent examples taught by a senior investment banker.

GFGB 7061. Corporate Valuation. (1.5 to 3 Credits)
The objective of the course is to learn firm, debt, and equity valuation methods from both a conceptual and practical framework. It combines both accounting and finance into practical valuation frameworks. Adequate accounting and finance backgrounds are required. Working knowledge of Excel is important.

GFGB 8001. Iss in Fin: Modern Fin'al Ana. (1.5 Credits)
Learn how the financial services industry applies valuation techniques in a deal context! In this mini-course, you will demystify the theory behind the analytics and ultimately appreciate the “art” and “science” of valuation analytics. What is a company worth? What is someone willing to pay? The answers depend on: who the seller is; who the potential buyer(s) is; the context of the transaction and the current market conditions... The seminar is ideal for individuals are currently working in or are considering a career in the following disciplines: • Financial services industry (investment banking, consulting, research, asset management, private equity, brokerage, sales & trading, insurance, etc.) • Finance or strategic development group of a corporation – mid-sized thru multinational • Marketing, brand management or a non-finance field... namely anyone interested in gaining a solid foundation in valuation analytics in a condensed, real-world context.

GFGB 8002. Fin'lnkts: Cncpts/Methods/Trd. (1.5 Credits)
This course provides a real-life, hands-on experience of financial market activity and its impact on the broader economy. Throughout the course, students will participate in a trading game to assess and manage real world factors such as counterparty risk, liquidity, leverage, etc.

GFGB 8004. Iss in Fin: Delevgd Finance. (1.5 Credits)
This course discusses the use of debt in Leverage Buyouts, recapitalization, restructuring and refinancing, including Debtor-in-Possession (DIP) financing. Students develop practical insights by utilizing case studies from several public highly leveraged firms; practical insights are critically reviewed.
GFGB 8005. Business Communication for Finance — A. (1.5 Credits)
Effective communication is the ability to convey your ideas in a logical and convincing manner in order to persuade others to take an action, modify their viewpoint, or at least be open to your perspective. This requires practice for many different situations, whether it is to promote an investment, prioritize your project, or convince your manager why you deserve a promotion. Simply being fluent in a language is not enough to communicate effectively. You must also know how to construct a compelling narrative to address the priorities, sensitivities, and concerns of your audience. As the world becomes more technical and data-driven, it is the ability to effectively communicate, verbally and in writing, which will be the differentiator to progress in your career. Teamwork, leadership, and management are all skills rooted in strong communications skills—again, just being able to speak a language in not enough to be an effective presenter, negotiator or salesperson. The only way to improve is through practice, so the course will be focused on student presentations on a varied set of topics, from current events to investment ideas.

GFGB 8006. Business Communication for Finance - B. (1.5 Credits)
This class will enable qualified students to more fluently converse with professionals on a variety of financial topics, and will improve students' ability to achieve success as they enter the business community.

GFGB 8007. Computational Finance for MSGF - R. (1.5 Credits)
This course will introduce student to the R programming language, with applications to finance.
Mutually Exclusive: GFGB 8008.

GFGB 8008. Computational Finance for MSGF - Python. (1.5 to 3 Credits)
This course will introduce student to the Python programming language, with applications to finance.
Mutually Exclusive: GFGB 8007.

GFGB 8009. Mergers and Acquisitions. (1.5 Credits)
Mergers and acquisitions constitute some of the most important growth, diversification, and globalization strategies for firms. Finance, specifically corporate finance, plays an important role in M&A because the completion of a deal requires careful attention to valuation, risk management, and the designing of an appropriate payment package. That design is an important part of a deal for reasons ranging from accounting and tax to synergies and stock price. In this course, students will examine these features through a number of cases and readings. We will also briefly discuss issues of corporate governance, securities law, and corporate law whenever the context requires us to do so.

GFGB 8010. Advanced Finan Modeling. (1.5 Credits)
GFGB 8011. Blockchain. (1.5 Credits)
GFGB 8012. Digital Currencies. (1.5 Credits)
GFGB 8013. Acct &Corp Fin-Valua&Modeling. (1.5 Credits)
This course expands on valuation techniques discussed in Modern Financial Analysis and Valuation Techniques. Students will have the opportunity to learn the modeling techniques used by todays Wall Street practitioners associated with Discounted Cash Flow Analysis, Merger Analysis, Purchase Price Allocations and Synergy DCFs. COREQUISITE: GFGB 8001.

GFGB 8014. Empirical Value Investing - A. (1.5 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The 'A-section' will examine several topics / methods. It is a pre-req for the 'B-section,' which will investigate the same issues more fully.

GFGB 8015. Empirical Value Investing - B. (1.5 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The 'A-section' is a pre-req for the 'B-section,' which will investigate the same issues more fully.

GFGB 8016. Disruption in Finan Services. (1.5 Credits)
Graduate students will learn directly from industry experts how new technologies, changing demographics and investor preferences are significantly impacting the delivery of wealth management, creation of investment products and capital market mechanisms. From the global adoption of crypto currencies to the trillion dollar tsunami of money flowing into passively managed ETFs, students will be exposed to the current and future implications of these ‘disruptions’ and gain helpful insight and intelligence impacting their careers. We will focus on one “disruption” per week with subject matter experts explaining the economic and cultural implications for both winners and losers. This course will be valuable to all students navigating future employment opportunities in financial services.

GFGB 8017. Fintech Lending & Payments. (3 Credits)
This course will consider modern on-line methods of lending and borrowing that may be outside of the traditional banking environment. The main players in the space will be analyzed, as well as their websites. Students will learn their business models, methods of credit analysis, and measures of return to investors.

GFGB 8018. Fund Strategies and Performance. (3 Credits)
This course examines how money is managed by organizations such as university endowments, pension funds, mutual funds, hedge funds, and private equity funds. It provides an advanced treatment of asset allocation and equity portfolio strategies, and a performance evaluation of U.S. mutual funds and hedge funds. The course provides a deeper understanding of the measurement of risk and its relationship to return, as well as of multi-factor models. Implementation issues, including statistical estimation, back-testing, portfolio construction, and performance evaluation, are covered. Some programming skill (likely Python/SAS) will be important, and partly taught.

GFGB 8951. Internship & Project Report. (1.5 to 6 Credits)
Residential students have the option of including up to 6 credits of internships as part of their program of study. Please note that an internship is not required as part of the program; students may complete any two MBA or MSGF courses in lieu of an internship.

GFGB 8999. Independent Study. (1 to 3 Credits)
Independent study.

Global Immersion (Gabelli) (GLGB)

GLGB 7410. Global Immersion: UK. (3 Credits)
This intensive 3-credit course is designed to provide students with important historical insights into Brexit as well as its impact on Fintech, financial services and entrepreneurial Finance as well as the overall British Economy.

Updated: 07-27-2020
GLGB 7411. Global Immersion Malaysia. (3 Credits)
Global Immersion Malaysia is a course for international finance students that will focus on “Investment Opportunities in Malaysia.” Every student will have to complete a research project working in conjunction with students from University of Tuanku Abdul Rahman (UTAR). There will be four two-hour lectures before the trip (history, macroeconomics, industrial structure, case studies) in April. They will prepare students for the four on-site visits (accounting firm, bank, port, and wholesale/retail business unit) and four lectures by the UTAR professors, covering the Malaysian economic outlook, development of banking and finance in Malaysia, the role of Malaysia in global supply chain, and e-commerce in Malaysia. There will also be a one-day visit to the historic site of Melaka. The 10-day trip will take place after the final exam period of the Spring semester.

GLGB 7510. Global Immersion Poland. (3 Credits)
Media and technology industries in Poland and Central Europe are the focus of this study tour course in Krakow, Poland, for graduate business students.

GLGB 7511. Global Immersion Galway. (3 Credits)
This course provides students the opportunity to travel to Galway, Ireland, and participate in a week-long study program that will focus on global business from an Irish perspective. The objectives of the course include understanding the business environment in Ireland; understanding the role of multinational versus start-up organizations within Ireland; and identifying benefits to investing in Ireland.

GLGB 7512. Global Industry Project: Ireland. (3 Credits)
This course provides graduate students in the Gabelli School of Business at Fordham University with international project experience with a real client. It provides students with a sense of the business environment in Ireland as they learn about global business from an Irish perspective. Students will learn how to manage a project virtually, with a particular focus on a globally distributed team. We will travel to Ireland for one week, and students will finish their projects with their Irish clients virtually during the two months following the trip. They will present their recommendations via a webinar at the end of the semester, gaining global communication and global business experience.

GLGB 7710. Global Immersion: UK. (3 Credits)
This intensive course examines Brexit and its impact on Britain’s influencer status in consumer markets. We will explore the implications of Brexit for Cool Britannia, which fueled pride in the contemporary culture of the United Kingdom and helped propel iconic brands like Burberry and Paddington Bear to the forefront of contemporary culture in Britain and around the world. We will also discuss the current struggle of iconic British retailers and the meaning of that struggle for the future of British retailing. By the end of this course, students will not only have gained historical, political, and social insight into Brexit and its impact, but they will also be better equipped to navigate the impact of socio-political phenomena on marketing strategy more generally.

GLGB 7711. Global Immersion Antwerp. (1.5 Credits)
This elective course aims to introduce students to current marketing and business practices in Europe. With in-class lectures, company visits, and cultural tours, different business related topics will be covered with an emphasis on the regulatory environment of the European Union. Students will learn about similarities and differences between U.S. and European business practices.

GLGB 7910. Global Immersion: Germany. (3 Credits)
This Global Immersion to Germany will allow student to learn about the business environment in Germany and the European Union.
GREK 3211. Greek Prose Composition. (4 Credits)
This course provides an introduction to prose composition in ancient Greek, with particular attention on a variety of writing styles, grammar, and diction. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, CLAS, MVST, OCST.

GREK 4999. Tutorial. (1 to 4 Credits)
Advanced-level courses will be taken either as tutorials in selected Greek texts or on the Rose Hill campus where students may select from among the offerings of the classics department there.

GREK 5001. Introduction to Greek I. (3 Credits)
Introduction to the vocabulary and structure of ancient Greek, with emphasis on reading continuous passages. Attention to Greek history and civilization.

GREK 5002. Elementary Greek II. (3 Credits)
This course will enhance the reading and writing skills acquired by students in Introduction to Greek I or prior study. It will further promote deeper understanding of Greek and its literary and cultural traditions.

GREK 5003. Intermediate Greek. (3 Credits)
A continuation of GREK 5002 with an introduction to the reading of various authors.

GREK 5004. Greek Language and Literature. (3 Credits)
Advanced reading in classical Greek authors.

GREK 5006. Intensive Ancient Greek. (4 Credits)
An accelerated introduction to the ancient Greek language Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

GREK 5012. Plato: Socratic Dialogues. (3 Credits)
A study of the early Socratic: dialogues selected passages from Laches, Lysis, (Charmides), Meno, Gorgios, (Protagoras), Euthyphro. A study of the basic philosophical probes (questions raised by these dialogues).

GREK 5034. Readings in Homer. (3 Credits)

GREK 5205. Readings in Greek. (3 Credits)
The study of Greek literary texts and grammatical practice for students above the elementary level in Greek. Tailored to the needs of the enrolled students.

GREK 5211. Greek Prose Composition. (3 to 4 Credits)
GREK 5300. Advanced Readings in Greek. (3 Credits)
Advanced readings in ancient Greek texts.

GREK 6008. Herodotus. (3 Credits)
A survey of Herodotus' histories. (N.B. this is the graduate version of GREK 3008)

GREK 6221. Greek Symptotic Poetry. (3 Credits)
Survey of poetry performed at the symposium. Analysis of the sympotic setting and the literature that emerges from it.

GREK 6222. Hellenistic Poetry. (3 Credits)
Hellenistic poetry consciously looked back to earlier Greek examples, and by an accident of history became the living Greek poetry encountered by the Romans who therefore in their own liking back to Greek literature saw it through Hellenistic eyes. This course will attempt to do the poetry justice in its own right, and to show how it served to mediate between classical and Roman.

GREK 6224. Apollonius of Rhodes. (3 Credits)
Close reading and analysis of Apolloniuss 'Argonautica.'

GREK 6361. Euripides. (3 Credits)
Close readings of Herakles and Hippolytos in Greek, with emphasis upon dramaturgy, manuscript tradition and metrics. Students are expected to familiarize themselves with two commentaries chosen: G.W. Bond for the Herakles and W.S. Barret for Hippolytos (Oxford Press Paperbacks). The 12 remaining tragedies of Euripedes are read in English. Students are expected to give one to two reports during the term based on scholarly articles.

GREK 6432. Xenophon. (3 Credits)
GREK 6463. Greek Orators. (3 Credits)
GREK 6632. Plato. (3 Credits)
The dialogues read in class are considered from philosophical, literary, and historical points of view.

GREK 6642. Aristotle's Rhetoric. (3 Credits)
Aristotle's Rhetoric is a fascinating work that is as complex and influential as it is controversial. Despite unsolved questions about its actual composition and difficult afterlife, the Rhetoric continues to serve as the starting point for theoretical reflections on rhetoric, oratory, and prose writing. This course aims to provide an overall idea of the Rhetoric and delve into questions about its language, composition, subject matter, and position within Aristotle's corpus. The work will be read in the original Greek and special topics for consideration include the commentary tradition and the impact and afterlife of the Rhetoric, particularly the way in which it has contributed to discussions about ancient emotions.

GREK 6932. Aeschylus. (3 Credits)
This course surveys a selection of Aeschylus plays in Ancient Greek in view of their literary-historical context, the history of scholarship, and recent developments in the field of Classics and Athenian Greek drama in particular.

GREK 6940. Sophocles. (3 Credits)
A survey of Sophoclean tragedy in Greek.

GREK 6961. Menander. (3 Credits)
This course is a survey of Menander's works in Greek.

GREK 6962. Managing Information in the Greek and Roman Worlds. (3 Credits)
The Process of Reading, Writing, Delivering and Disseminating: Managing Information in the Greek and Roman Worlds. This course will be based on Greek and Latin literary sources and on the papyri from Greek and Roman Egypt. It will give students notions of the paleography of the literary Greek and Roman papyri and, in general, of the literary papyrology in order to enable them to use some papyri. This course will inquire about the background of the creation, delivery, dissemination, and publication of the literary texts. Among the questions this course will address are the following: Did ancient readers make notes, and how did they use them in compiling their works? How can we explain the existence of different versions of some texts, for example of Plato, Dio, or Lucian? What are the salient characteristics of extemore delivery, and do they impact the widespread loss of declamations both Latin and Greek? In this course, students will be exposed to texts and authors outside the mainstream.
GRED 6963. Greek & Roman Pastoral Poetry. (3 Credits)
A seminar querying such critical metonyms as epic, bucolic, and pastoral by deconstructing texts that dramatize relatedness, belatedness, reception, and origin through metapoetic tropes stock­ ing epic no more with heroes but with herders engaged with neither war nor animal husbandry, but with love engendering originary craft thematized as country choir and song. We’ll take a brief look at bucolic mem­ es in older epic as cor­ ralled by Sicilian Theo­ critus into idylls, which get rebranded into eclogue books at Rome: Virgil’s Book of Bucolics—ten eclogues—supplanting bucolic Sicily with pastoral Arcadia; then the book of Calpurnius—seven eclogues—‘Sicilian’, antici­ pating books—bucolic, eclogue, pastoral—as tradition; and flower of metapoetic tropes from Dante, Petrarch, Mantuan, Sannazaro, Spenser, Pope, Wortley-Montague, or Frost. Texts may be studied in trans­ lations. Seminars, after introductory remarks, to develop by considering the texts. Intertextual relations further to be pursued in two short essays from bents peculiar to diverse readers: whether construing intertexts—Greek, Latin, Italian—philologically, rhetorically, theore­ tically of trans­ lation, or assaying trans­ lated texts from such standpoints as receptionistics, narratolog­ ism, cultural biastics, propagandism, courtiership, cognitive psychology and blending, metonymics, metaphorology. trahat sua quemque voluptas.

GRED 8999. Independent Study. (3 Credits)

GRED 9320. Readings in Greek. (0 Credits)

Health Administration (HADM)

HADM 0915. Health Administration Presentations. (0 Credits)
This segment will include presentations by industry professionals.

HADM 5000. Health Administration: The Individual and the Profession. (2 Credits)
The intensive consists of four modules. Module 1 introduces students to the structure of the course and its learning goals, and presents the overall global socioeconomic and regulatory context within which healthcare in all of its dimensions of patients, providers, payers, and industry operates. Module 2 introduces the students to a proprietary case study of a physician-owned practice and allows students to understand more deeply the complex elements of the healthcare system in the U.S. Module 3 introduces students to understanding how we and especially healthcare professionals make decisions. Finally, Module 4 allows the students to discover their own potentials as leaders in the field of healthcare. This is the beginning of the cohort program and students will spend an intensive three days consisting of primarily an in-person instructional program complemented by some online mentoring. Students will receive a set of readings several weeks prior to the course and will be expected to come prepared with the readings completed.

HADM 5075. Introduction to Health Administration. (2 Credits)
This course covers current challenges faced by the U.S. Healthcare delivery system and how health policy, both historically and today, has sought to address these challenges. We will consider healthcare concerns associated with population and public health. We will also explore the logistics of the healthcare system, including how it is organized, who makes up the workforce, how healthcare is financed, how it is managed, and the role of information technology in this sector.

HADM 5100. Healthcare Ethics. (3 Credits)
This course provides an overview of foundational ethical principles for healthcare administration and will present a methodology for your employment to resolve contemporary healthcare ethics questions with healthcare settings, specifically working within the context of emerging healthcare trends and legislation. There will be an online work component from 4:00 pm to 5:15 pm on Sundays, which students can complete in the library or off campus.

Attribute: HECS.

HADM 5200. Understanding Data. (2 Credits)
The quantitative skills and statistics part of this course will be approached from the perspective of a “consumer” as opposed to a “producer” of numerical analyses. The fundamental concept of statistics is randomness. This idea will be explored by discussing populations versus samples, parameters versus statistics, data collection methods, measurement, graphing, statistical significance, and statistical models. To evaluate studies, a framework is developed that builds on these basic statistical concepts. This approach is then applied to examples from public health, medicine, and health policy. In the final component of the course, students will work in groups to analyze a study and report on its strengths and weaknesses. Before starting the course, students will be asked to read an academic journal article. Throughout the course, students will periodically break into groups to apply the concepts covered in the modules to the study from the journal article. These exercises will provide students with training on basic statistics and how to read studies.

HADM 5300. Strategy and Operations. (2 Credits)
The purpose of this course is to provide you with the skills in strategic planning and operations management necessary to perform an administrative role. This course will also discuss the increasing role of quality management in hospitals and identify the impact of changes in reimbursement based on the importance of efficiency metrics such as readmission rates.

HADM 5400. Leadership and Change. (2 Credits)
This course examines managerial and change leadership concepts, roles, and functions as applied to the role of the healthcare professional in various organizational settings. This course takes into consideration theories, frameworks, and models of leadership and an understanding of the leadership/relationship management skills necessary to build a superior organization.

HADM 5500. Healthcare Law. (2 Credits)
The purpose of this course is to introduce you to the legal issues you are likely to face in managing a healthcare organization. It is important for you to be familiar with basic legal principles affecting how healthcare institutions are operated, how legal rules and doctrine are formulated, and how to interact effectively with attorneys.

HADM 5600. Behavioral Health and Primary Care. (2 Credits)
This course offers a broad overview of theoretical foundations and empirical research findings related to the experiences of health and illness. We will examine intervention strategies targeting individuals, families, work settings, and communities will be examined and critiqued.

HADM 5700. Population Health, Public Health, and Outcome Measures. (3 Credits)
This course examines how Healthcare Reform brought into focus the need for population and public health in improving healthcare.
HADM 5800. Patient Centered Integrated Care. (2 Credits)
This course provides an understanding of patient-centered healthcare and the role of providers and the environment. The course recognizes the importance of different professions within the health workforce and the role of healthcare professionals working collaboratively on inter-professional teams to enhance patient-centered healthcare.

HADM 5900. Healthcare Finance. (2 Credits)
This course will address the current challenges faced by various healthcare organizations, specific to financial management and will focus on the interconnectivity the role that finance plays across the continuum of healthcare. You will learn the time value of money and how the understanding and pricing of costs is essential to the financial management among healthcare organizations.

HADM 6000. Negotiating and Communicating in Healthcare. (2 Credits)
This course draws from social ecological models of health promotion as a way to situate the work of health administrators within multi-level contexts. It also interrogates how an evolving media landscape - one that includes mainstream print and broadcast outlets, but also social media, ethic media, and other diverse platforms.

HADM 6100. Health Information Technology. (2 Credits)
This course introduces you to the subject of health information technology (HIT) and describes the organizational context surrounding the implementation, use, and management of HIT. It prepares you for the more advanced coursework by examining the concept applications, and strategies of HIT.

HADM 6200. Capstone: Project Formulation. (0 Credits)
This is an ongoing project that you will be engaged in from the beginning of the program and will end with a capstone-type presentation. You will identify problems and solutions in the workplace. If you are not employed in a healthcare-related workplace, you will be provided with an internship either at a healthcare facility or at one of Fordham's research centers in order to apply your learning to a real-life situation.

HADM 6300. Capstone: Project Design and Methods. (0 Credits)
This is an ongoing project that you will engage in from the beginning of the program and will end with a capstone-type presentation. You will identify problems and solutions in the workplace. If you are not employed in a health care-related workplace, you will be provided with an internship either at a health care facility or at one of Fordham's research center in order to apply your learning to a real-life situation.

HADM 6400. Capstone: Solution and Presentation. (3 Credits)
This is an ongoing project that you will engage in from the beginning of the program and will end with a capstone-type presentation. You will identify problems and solutions in the workplace. If you are not employed in a health care-related workplace, you will be provided with an internship either at a health care facility or at one of Fordham's research centers in order to apply your learning to a real-life situation.

Health Law (HEGL)

HEGL 0203. Food Policy, Advocacy, and the Law. (2 Credits)
This class will explore the broad range of legal and policy issues that currently shape our food system through a series of readings, films and discussions. Topics will include the legal and policy underpinnings of the United States’ and global food systems, the economic and social conditions giving rise to the inequities of access to adequate healthy food among certain sectors of the population, and the public health crisis that has ensued as a result. Class discussions will examine a range of current issues and explore ways to mobilize legal and policy tools in order to strategically respond to the issue identified in that week's readings. The goal of this class is for students to gain an understanding of the legal and policy underpinnings of the food system and to learn to creatively and collaboratively develop effective approaches to address the many complex issues that characterize—and threaten—it. Coursework will include assigned reading, legal and non-legal research and writing, and simulation exercises from which students will gain proficiency in the practical skills required to become effective food systems advocates. Student evaluation will be based on class participation, a short midterm writing assignment and a final written submission. There will be no exams in this class.

Attributes: CORC, LLM.

HEGL 0204. Federal Food, Drug, and Cosmetic Law. (2 Credits)
This course is designed to examine legal and policy issues associated with the Food and Drug Administration's regulation of drugs and medical devices, foods and dietary supplements, cosmetics, and tobacco products. The class will review the statutory provisions of the Federal Food, Drug and Cosmetic Act, implementing regulations, and administrative actions that govern the development/formulation, product positioning and approval/clearance, and labeling/marketing of this broad range of products. We will also analyze governing case law and administrative decision-making by examining a variety of actions taken by the FDA in implementing the FFDCA. Students who are interested in life sciences will obtain a comprehensive overview of the historical background and current state of FDA, and will explore FDA’s expanding authority over novel technologies, enforcement and inspection powers, and post marketing surveillance to address safety concerns.

Updated: 07-27-2020
HEGL 0232. Introduction to Health Law. (3 or 4 Credits)
Ensuring the health and welfare of citizens is one of the foundational aims of government, and this goal is facilitated by the enactment and enforcement of individual health law, public health law, and biomedical ethics. This course provides a basic foundation for legal practice in these important fields. <br> Health Law<br> Health law focuses on the relationship between health care providers and their patients and is shaped by concerns about: the obligation to provide care, the liability of healthcare institutions and providers; managed care and regulatory responses; informed consent and confidentiality; as well as issues of access, equity, choice, cost, and quality. <br> Public Health Law <br> Public health law focuses on the central tension between the state’s regulatory powers to protect and promote the collective health, safety and well-being of its citizens; and an individuals’ constitutionally-protected rights to individual liberty, autonomy and property. Thus, this portion of the course examines such topics as compulsory testing and immunization; and the regulation of drugs and biotechnology. <br> Biomedical Ethics <br> A central focus of bioethics is the effect of new technology on the human body. This portion of the course will therefore cover the legal and regulatory ramifications of such topics as: physician aid in dying, the right to refuse life-sustaining treatment, assisted reproductive technologies, genetic screening and technologies, human experimentation and research, organ transplantation and allocation, and reproductive surrogacy. <br> Attributes: HECH, INLJ, PIE.

HEGL 0262. Medical Malpractice Litigation Practicum. (3 Credits)
This advanced practicum will give students the experience of handling a medical malpractice case from start to finish. Partnering with the Emergency Medicine Residency Program at St. Barnabas Hospital, the class will offer a unique interdisciplinary approach to litigation simulation by creating a realistic experience for law and medical students. The class will be structured around a single medical malpractice lawsuit with students acting as both plaintiff and defense counsel. Students will engage in all facets of the litigation process including client counseling, witness interviews, case evaluation, medical investigation, expert report development, pleadings, depositions, and, finally, a full mock trial. Real doctors, residents, and nurses will act as fact and expert witnesses. The defendant will be a current St. Barnabas resident and the plaintiff will be portrayed by a professional actor. Class time will include guest speakers, demonstrations, student performance, critique, and reflection. <br> For exceptions to prerequisite, contact Professor Adam Shlahet directly. <br> Attributes: EXP, JD, LAW, LLM. <br> Prerequisites: EDGL 0202 and (CLGL 0419 or CLGL 0423).

HEGL 0290. Health Care Law. (2 Credits)
The US health care system comprises an estimated one fifth of the nation’s economy. Virtually every major sector of contemporary society – from corporate employers to government entities to private insurers to pharmaceutical and biotechnology innovators to non-profit advocates – is involved in the massive undertaking of providing for the health and welfare of the American people. As such, the health care system affects all citizens as patients, as well as the physicians and hospitals charged with administering services. It is no coincidence, then, that landmark legal decisions, major legislation and key regulatory directives have been at the core of so many health care concerns and controversies. The policy considerations behind the national health care debate also shape the political landscape for virtually all federal, state and local elections. This course introduces students to a comprehensive approach for understanding, analyzing and resolving the myriad of legal issues related to health care practice, administration and compliance. Initial sessions examine the evolution of US health care and the historical forces that converged to bring about this unique system. We will explore the pivotal question of whether health care is a “right” versus a privilege, and how divergent views on this issue affect policy and influence state versus federal legislative solutions. The course next analyzes the major legislation and landmark cases that distinguish American health care, while focusing on the role of key stakeholders such as physicians, hospitals, insurers and pharmaceutical companies in shaping the health care landscape. Among the notable legislative efforts discussed will be HIPAA, COBRA, HITECH, WHCRA and GINA. We then evaluate the enactment of the Affordable Care Act (“ACA”), and assess Supreme Court challenges to the ACA, including NFIB v. Sebelius (2012) and King v. Burwell (2015), as well as efforts to repeal, replace and modify the statute. The Burwell v. Hobby Lobby (2014) decision and the phenomenon of “conscience clauses” will then be investigated. We will also select a topical controversy in health care law and analyze the issue in a debate format. The final substantive session will address imminent changes such as hospital consolidation, the role of physicians in 21st Century America, the advent of the electronic medical record, and the promise of genetic medicine. The last class will be devoted to student presentations of Final Paper topics. <br> Upon successful completion of the coursework, students will have attained skills enabling them to successfully navigate the legal challenges associated with health care cases, to draft policies and legislative recommendations, and to devise effective strategies for addressing these complex issues. The class will be graded based on class participation and discussion (25%), as well as a Final Paper analyzing a contemporary health law issue (75%). The course to satisfies the Writing Requirement credit. <br> Attributes: INLJ, LLM, LWR, PIE.
HEGL 0292. Health Law and Biomedical Ethics. (3 Credits)
Ensuring the health and welfare of citizens is one of the foundational aims of government in the United States, and this goal is facilitated by the enactment and enforcement of health law, public health law, and biomedical ethics. This course provides a foundation for legal practice in these three important fields. <p> Health law focuses on the relationship between health care providers and their patients, and is shaped by concerns about: the obligation to provide care, the liability of healthcare institutions and providers; managed care and regulatory responses; informed consent and confidentiality; and issues of access, equity, choice, cost and quality. <p> Public health law focuses on the central tension between the state's regulatory powers to promote and protect the collective health, safety and well-being of its citizens; and individuals' rights to liberty, autonomy and property. This portion of the course will examine such topics as quarantine, compulsory testing, and immunization. <p> A central focus of bioethics is the effect of new biotechnologies on the human body as with reproductive technology, drug regulation, genetic research, or organ transplants. This portion of the course will therefore cover the legal and regulatory ramifications of such subjects as: defining death, “test tube babies,” genetic technologies (including CRISPR gene editing), gestational surrogacy, human experimentation and research, the right to die, organ transplantation and allocation, and physician-assisted death. <p> This course will also evaluate the race, gender, class, sexuality, and disability status implications of the laws and policies that have been or could be brought to bear on health law, public health, or bioethics problems and solutions. <p> Classroom discussions of the academic materials will be complemented with multi-media sources, and presentations by practicing attorneys in the fields of bioethics, public health, and health law. The course grade will be based upon class room participation and research paper. Research paper topics must first be approved by the professor. For students wishing to satisfy the upper-class writing requirement with this course, prior professor approval is required.
Attributes: INLJ, JD, LLM, PIE.

HEGL 0299. Law and Neuroscience Seminar. (2 to 3 Credits)
This seminar examines a variety of cutting-edge, at times controversial, linkages between law and neuroscience, ranging from social and environmental influences on the brain and behavior to the interpretations of neuroimaging to the prediction of criminality and predispositions towards mental illnesses and addictions. Students will learn how discoveries in neuroscience intersect with societal responses, legal decision-making, the punishment of criminals, and the development of innovative rehabilitation strategies. The seminar’s primary format consists of a speakers series comprising some of the leading experts in the country – neuroscientists, psychologists, medical researchers, and lawyers – who will come and discuss their work and research so that the class can interact with them directly by way of questions or commentary. These discussions are aimed at helping students understand the neuroscientific basis for behavioral patterns that often have legal implications.
Attribute: PIE.

HEGL 0363. Law and Medicine. (2 Credits)
This course combines the presentation of legal and scientific theory with practical examples and discussions. The legal theory of medical malpractice, is reviewed including such topics as physician’s standard of care, informed consent, current issues in physician malpractice, strategic approaches of plaintiffs as well as defendants to malpractice actions, discovery techniques, effective use of medical experts, and key elements of a medical malpractice trial. The course also will deal with the preparation and presentation of medical proof in civil and criminal cases. Study is also given to legal, medical, social and moral issues involved in the areas of right to treatment, human experimentation, organ transplants, allocation of scarce resources, euthanasia, and right to life.
Attributes: INLJ, LLM.

HEGL 0368. Psychology and Civil Law. (2 or 3 Credits)
The role of psychologists and other mental health professionals in civil litigation is both diverse and important. This course covers a number of the areas in which psychologists consult on matters related to civil practice law forensic matters outside of the criminal arena. This course brings psychology graduate students and law students together in a broad overview of issues related to mental health law and civil practice. The semester will be divided relatively evenly between reviewing the case law and legal standards and the clinical issues that bear upon these legal issues. Through this course, law students will gain expertise understanding, utilizing, and responding to mental health testimony in civil litigation and psychology students will develop skills evaluating mental health issues that arise in these contexts. Specific legal issues discussed include the concept of torts and malpractice, causation, standards of proof, and expert testimony. We will focus on several of the areas of civil law in which psychologists play a significant role, including personal injury, sexual harassment, and disability law, as well as a number of issues that arise in elderly or medically ill individuals such as informed consent and decision-making incompetence, involuntary treatment and the right to refuse medications, physician-assisted suicide, testamentary capacity, and psychological autopsies. Issues such as psychological testing, report preparation and expert testimony are discussed in the context of these issues and the legal standards that apply.
Attributes: INLJ, PIE.

HEGL 0369. Psychology and Criminal Law. (2 or 3 Credits)
This course is designed to provide an overview to the interaction between psychology and the criminal law. The focus will be primarily on the three major aspects in which psychologists are involved in the criminal justice system: competence to stand trial evaluations, mental state at the time of the offense (mens rea and the insanity defense), and the assessment of risk/prediction of future dangerousness. One of the guiding principles in forensic psychology, which will be reflected in this course, is the need to understand legal standards in order to tailor psychological knowledge and practice to the courts. As such, the content of the course will be evenly divided between understanding the legal issues involved and the practical application of psychological principals and knowledge. Likewise, readings and class time will be divided reviewing legal standards and case law and the psychological research, theories and techniques related to these issues. In addition, specific topics such as forensic psychological assessment, report writing, and expert testimony will be discussed.
Attributes: CEED, CETH, HECH, INLJ, JD, LLM, PIE.
Healthcare Workshop (HLTH)

HLTH 0100. Team building and Effective Communication in the New Healthcare Marketplace. (0 Credits)
HLTH 0200. Healthcare Information Systems and Data Security. (0 Credits)
HLTH 0300. Healthcare Policy and Regulatory Issues. (0 Credits)
HLTH 0400. Data Analytics for Healthcare. (0 Credits)
HLTH 0500. Navigating the Healthcare System: Who are the New Caregivers. (0 Credits)
HLTH 0600. Healthcare Marketing, Social Media, and Ethical Advertising. (0 Credits)

Hebrew (HEBW)

HEBW 1001. Introduction to Hebrew I. (5 Credits)
An introductory course that focuses on the four skills: reading, speaking, writing, listening, providing students vocabulary and culture, which, studied interdependently, comprise the Hebrew language.
Attributes: JWST, MEST.

HEBW 1501. Intermediate Hebrew I. (3 Credits)
Continued study of the fundamentals of the Hebrew linguistic system with systematically organized reading, writing and conversation exercises. Introduction to literary texts.
Attribute: IPE.
Prerequisite: HEBW 1001.

HEBW 1502. Intermediate Hebrew II. (3 Credits)
Continued study of the fundamentals of the Hebrew linguistic system with systematically organized reading, writing and conversation exercises. Introduction to the literary texts.
Attributes: IPE, JWST.
Prerequisite: HEBW 1501.

HEBW 2001. Hebrew Language and Literature I. (3 Credits)
These courses are design for students who have a solid knowledge of Hebrew language basics, essential vocabulary, and verb forms and tenses. Text material and course work will focus on developing and expanding the student's vocabulary, learning new grammatical structures and usages, developing good listening and writing skills, applying literal and inferential comprehension skills (reading from magazines, newspapers, and short stories. Videos and films are also included), practicing oral skills during class time through structural exercises, and completing written assignments to reinforce the student's understanding of the concepts studied in class.
Attributes: IPE, JWST.
Prerequisite: HEBW 1501.

History (HIST)

HIST 0912. Requirement Preparation. (0 Credits)
For Ph.D. and Master's students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master's thesis, or dissertation submission.

HIST 0914. Requirement Preparation in Summer. (0 Credits)
For Ph.D. and Master's students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

HIST 0930. PhD Comprehensive Examination-History. (0 Credits)
HIST 0936. Master's Comprehensive Examination - History. (0 Credits)
HIST 0950. Proposal Development. (1 Credit)
HIST 0960. Proposal Acceptance. (3 Credits)
HIST 0970. Dissertation Mentoring - History. (0 Credits)
The History PhD. student is required to register for Dissertation Mentoring, which has a 3 credit fee, the semester after the student's proposal is accepted.
HIST 1000. Understanding Historical Change: Modern Europe. (3 Credits)
Introduction to the nature and methods of historical study and the examination of specific topics essential for understanding the evolution of modern institutions, ideologies, and political situations.
Attributes: HC, INST, IPE, IRST, ISEU.

HIST 1075. Understanding Historical Change: Renaissance to Revolution in Europe. (3 Credits)
Understanding Historical Change in early modern Europe involves a modular and comparative approach to events and issues significant to the history of Europe from approximately 1500 to 1800. The course will examine a range of events stretching from Columbus's voyages to the rise of Napoleon, and issues including but not limited to religious change, state formation, intellectual development and revolution. Previous title: UHC Early Modern Europe.
Attributes: HC, IRST.

HIST 1100. Understanding Historical Change: American History. (3 Credits)
Introduction to the nature and methods of historical study and examination of specific topics focusing on significant periods in the development of the U.S. and considering them in the light of certain elements shaping that history. Among these elements are the constitutional and political system; and the society's ideals, structure, economic policy, and world outlook.
Attributes: AMST, APPI, ASHS, FRHE, FRHI, HC.

HIST 1103. Understanding Historical Change: Fighting for Equal Rights in American History. (3 Credits)
This course explores American history through the lens of citizenship. We ask how, when, and if Americans have attained equal rights. In the process, we ask hard questions about the meaning of equality in America. Citizenship includes political, civil, and social rights: how well has America done in providing those rights? We study the conflicts that have occurred over both expanding and limiting citizenship since the nation's founding. As a course fulfilling Fordham's core pluralism requirement, we examine particularly how race, gender, and ethnicity have shaped these struggles.
Attributes: ADVD, AMST, APPI, ASHS, FRHE, FRHI, HC, MANR, PLUR.

HIST 1200. Understanding Historical Change: Ancient History. (3 Credits)
A topical consideration of key issues in the political, social, and cultural history of the classical Greek and Roman world.
Attributes: CLAS, FRSM, HC.

HIST 1210. Understanding Historical Change: Ancient Greece. (3 Credits)
A political, social, and intellectual history of ancient Greece from its origin to the death of Alexander the Great.
Attributes: CLAS, HC.

HIST 1220. Understanding Historical Change: Ancient Rome. (3 Credits)
Introduction to Roman History focusing on problems and sources.
Attributes: CC, CLAS, HC.
HIST 1240. Understanding Historical Change: The Ancient World. (3 Credits)
Teaches basic skills of historical analysis and familiarizes students with historical change in ancient history from second millennium BC in Asia Minor and the Aegean to the fall of the Western Roman Empire.
Attributes: CLAS, HC.

HIST 1300. Understanding Historical Change: Medieval. (3 Credits)
Introduction to the nature and methods of historical study and the examination of specific topics essential for understanding the emergence and development of Europe from the decline of the Roman Empire to the early Renaissance. A topical study of political, social, economic, religious, and cultural issues, ideas, and institutions.
Attributes: FRHI, HC, MVST, OCHS, OCST.

HIST 1400. Understanding Historical Change: Latin America. (3 Credits)
Introduction to the nature and methods of historical study and the examination of specific topics essential for understanding the history of Latin America from the ancient civilizations until the present.
Attributes: AMCS, AMST, ASHS, GLBL, HC, INST, IPE, ISLA, LAIN, LALS, PJRC, PJST.

HIST 1450. Understanding Historical Change: South Asian History. (3 Credits)
Introduction to the nature and methods of historical study and familiarizes students with major themes in South Asian history, including imperialism, trade and production, nationalism, social hierarchies and conflict, and decolonization. As an EP seminar, the course will help students develop writing and oral presentation skills.
Attributes: FRHI, GLBL, HC, INST, IPE, ISAS.

HIST 1550. Understanding Historical Change: East Asian History. (3 Credits)
Introduction to the basic skills of historic analysis and the examination of change through time in East Asian history, focusing on key political, social and cultural phenomena in China and Japan.
Attributes: FRHE, FRHI, GLBL, HC, INST, IPE, ISAS, REST.

HIST 1551. Understanding Historical Change: Representations of China and The West. (3 Credits)
By focusing on the representations of China in the West and of ‘the West’ in China, this course examines how people identify and understand others, how people establish themselves as authoritative cultural mediators, and what the representations people produce tell us about history.
Attributes: FRHI, GLBL, HC, MANR.

HIST 1600. Understanding Historical Change: Africa. (3 Credits)
Introduction to the political, social, economic and institutional history of Africa.
Attributes: AFAM, GLBL, HC, INST, IPE, ISAF, MEST, PJRC, PJST.

HIST 1650. Understanding Historical Change: The Black Atlantic. (3 Credits)
Introduction to the history of the African diaspora as formed in the Atlantic world as the result of the slave trade and subsequent process of migration and movement. Course covers the 15th century to the 20th century, and focuses on Africa, the Americas, the Caribbean, and Europe. Nature’s method of historical studies is also emphasized.
Attributes: GLBL, HC, INST, ISAF, ISAS, ISEU, ISIN, ISLA, ISME.

HIST 1700. Understanding Historical Change: Mideast. (3 Credits)
Introduction to the nature and methods of historical study and the examination of specific topics essential for understanding the history of the Middle East and North Africa from the rise of Islam in the mid-7th century AD until the end of the 20th. The region is defined to include all of the Arab world from Morocco in the west to Iraq in the east as well as Iran, Turkey, and Israel. The course provides strong background preparation for more advanced courses in Middle East history.
Attributes: GLBL, HC, INST, IPE, ISME, MEST, OCHS, OCST, PJRC, PJST.

HIST 1750. Understanding Historical Change: Islamic History and Culture. (3 Credits)
This course spans the development of Islamic history and culture from the rise of Islam in the seventh century to the modern times. Through adopting an interdisciplinary approach, the course seeks to familiarize the students with the dynamic and complex historical process in which Islam emerged and developed as a religious and cultural tradition in the Near East, North Africa, Spain, Central Asia, and Southeast Asia. By reading various political, philosophical, theological, legal, mystical and literary writings, the students will not only learn about the major events, facts, concepts, and periods for Islamic history but also gain knowledge of the multifaceted religious, geographic, social, and aesthetic contexts and processes of the pluralistic Islamic world. By developing an informed historical perspective, the course aims to furnish the students with advanced theoretical and analytical skills enabling them to historicize and question modern perceptions of Islam.
Attributes: GLBL, HC, INST, IPE, ISME, MEST, MVST, OCHS, OCST.

HIST 1850. Understanding Historical Change: Jews in the Ancient and Medieval World. (3 Credits)
The course will explore the history and culture of Jews from biblical times to the eve of modernity, the transformations from ‘biblical Israelites’ to ‘Jews.’ It will explore the changes in religious and social culture as biblical Israelites became diaspora Jews. The course will present Jewish history in the broader context of the environment in which Jews lived. The readings will consist mostly of historical sources on Jewish culture, politics, economic activities, social and legal status, and the Jews’ relations with non-Jews, Christians, and Muslims.
Attributes: FRHI, GLBL, HC, INST, JSHI, JSPM, JWST, MVST, PJRJ.

HIST 1851. Understanding Historical Change: Jews in the Modern World. (3 Credits)
This course will provide an introduction to the history of the Jewish people as it encountered the modern world from the 18th century through the twentieth. It will explore the social, cultural, religious, and political aspects of this encounter, primarily in Eastern and Western Europe, the United States, and the middle East. The course will touch on such issues and events as emancipation and the breakdown of traditional identities and communal structures; Jewish religious movements from Hasidism to Reform; the invention of modern secular culture in Yiddish and Hebrew; political movements including Socialism, Zionism and Communism; migrations and the creation of American Jewry; anti-Semitism and the Holocaust; and the rise of the State of Israel.
Attributes: ADVD, AMST, ASHS, GLBL, HC, INST, IPE, ISEU, ISIN, ISME, JSHI, JWST.
HIST 1925. Understanding Historical Change: Science and Technology. (3 Credits)
The course covers basic themes, concerns, and methods to understand the critical role of science, technology and medicine in the world history. The course will aim to foster both a set of skills and a body of knowledge about how science technology, and medicine have shaped important social changes, with a concomitant understanding of how social and cultural factors have shaped the nature of scientific, technological and medical knowledge.
Attributes: FRHI, HC.

HIST 1999. Tutorial. (1 Credit)

HIST 2070. Honors Research Skills Review. (1 Credit)
This course is open to members of the History Department’s Mannion Society. It is intended to develop specific disciplinary skills in research, grant-writing, and writing. Students will be expected to undertake significant independent research projects resulting in substantial research papers. Requires permission of Instructor.

HIST 2999. Tutorial. (0 to 3 Credits)
Independent research and reading with supervision from a faculty member.

HIST 3001. African American History I. (4 Credits)
An examination of the black experience in the U.S. from colonial times through Reconstruction. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, PLUR, URST.

HIST 3002. African American History II. (4 Credits)
An examination of the black experience in the U.S. from Reconstruction to the present. Subjects covered will be the origins of segregation, the Civil Rights movement, African American nationalism, and African American contributions to American literature, music, sports, and scholarship. Special attention will be given to the role of economic forces in shaping African American life, and the importance of gender issues in the African American experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AHC, AMST, ASHS, PLUR, URST.

HIST 3012. Medieval France. (4 Credits)
Covers the distinctive characteristics of medieval French society and culture from the ascent of Hugh Capet to the trial of Joan of Arc, including feudalism, kingship, law, chivalry, and courtly love. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST.

HIST 3014. Medieval Feud, Ordeal, and Law. (4 Credits)
This course is designed to explore the great transformation in European legal habits that occurred in the medieval period, from private, family-directed systems of vengeance to royal or state-sponsored systems of vengeance. It will raise many ethical and substantive issues that are very relevant to an understanding of the function of law and justice in the modern world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH.

HIST 3018. Medieval Nobility: Love, War, and Devotion. (4 Credits)
Europe’s warrior aristocracy was responsible for many of the most popular and enduring features of medieval civilization, including the literature of courtly love, great stone castles, and richly endowed monastic foundations. These artifacts point to just a few of the wide variety of roles that these men and women had to play within medieval society. In this course, we will trace the rise of the princely nobility as judicial arbiters, military commanders, advocates not only of religious institutions but of reform and dissent, and as patrons, consumers, and creators of art and literature. Among the issues that we will discuss are the origins and meaning of nobility, the place of women within noble society, the performance of courtliness, and the relationship between the nobility and the other social ‘orders’. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST.

HIST 3070. Honors Research Seminar. (3 Credits)
This course is open to members of the History Department’s Mannion Society. It is intended to develop specific disciplinary skills in research, grant-writing, and writing. Students will be expected to undertake significant independent research projects resulting in substantial research papers. Requires permission of instructor.

HIST 3071. Honors Research Seminar I. (0 Credits)
This course is open to members of the History Department’s Mannion Society. It is intended to develop specific disciplinary skills in research, analysis, and writing. The instructor will guide students to carry out independent research projects that result in quality academic papers. Requires permission of instructor. Students must also complete HIST 3072.

HIST 3072. Honors Research Seminar II. (4 Credits)
As a continuation of History 3071, this course is open to members of the History Department’s Mannion Society. It is intended to develop specific disciplinary skills in research, analysis, and writing. The instructor will guide students to carry out independent research projects that result in quality academic papers. Requires permission of instructor.
Prerequisite: HIST 3071.

HIST 3100. History of the Arts at Lincoln Center: Urban Renewal and the Arts. (4 Credits)
This course considers the history of the arts in NYC with special emphasis on urban renewal and the changing politics and economics surrounding Lincoln Center in midtown Manhattan. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHC.

HIST 3110. History of Gay and Lesbian New York City. (4 Credits)
This course focuses on the relationship between key LGBT historical and cultural events in New York City, including lesbian and gay public and private life, changing laws and prohibition, transformative theories of sexual attraction and affiliation, and medical histories of LGBT bodies. Students will compare New York City lesbian and gay histories with those of other major urban centers of the world. The course will also include a survey of the role of the arts in creating LGBT culture, with a particular focus on Walt Whitman’s New York.
Attributes: AHC, WGSS.
HIST 3139. Buffalo Soldiers: Race and War. (4 Credits)
Buffalo Soldiers examines the intersection of race and military service in the United States, from the American Revolution to the Cold War. The focus of the course is on the role African Americans played in the major military conflicts of this country’s history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVDF, AFAM, AHC, AMST, ASHS, ASSC, PLUR.

HIST 3145. Medieval Barbarians. (4 Credits)
This course will discuss the different groups that contemporaries and modern historians have called ‘barbarians.’ Topics to be considered include the role of barbarians in the fall of the Roman Empire, barbarian identity and the creation of barbarian states, and later barbarian groups such as the Vikings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST.

HIST 3203. Medieval Family Life. (4 Credits)
Our modern notion of “family” did not exist in the Western Middle Ages (circa 500 to 1500). Expressions, like the Latin word “familia,” denoted instead wider networks of people that were characterized, not only by blood relations, but also by bonds of submission, friendship, and solidarity. For medieval contemporaries, today’s common understanding of family—consisting of a “nuclear” domestic unit with two intimate partners and their children—would have been “marriage.” The course, based on readings and discussion, will address both notions of family, medieval and modern, by focusing on issues such as childhood, partnership roles, forms of cohabitation, and parental authority. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST.

HIST 3204. Sex & Celibacy in the Middle Ages. (4 Credits)
The canonical obligation for priests and bishops to abstain from marriage is an invention of the Western Middle Ages (circa 500 to 1500). Sex outside of marriage was condemned as sinful, so that, in theory, churchmen were expected to abstain from intercourse completely and throughout their lives. How did the prohibition fare in medieval practice? In the Mediterranean, for example, concubinage and sex were branded as sin, although with consequences of varying severity. The course will examine the original sources and modern historiography for answers to the question of how medieval culture sought to accommodate the conflicting mandates of sexuality and celibacy. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST, MVTH.

HIST 3205. Medieval Medicine. (4 Credits)
The course explores the history of disease in the west from 500 to 1500, including sudden epidemics like the Black Death, endemic illnesses such as leprosy, and the rise of uterine university medicine. Particular attention is paid to issues highlighting the close nexus between medical and social practices. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST, REST.

HIST 3207. Late Medieval Religion and Society. (4 Credits)
Topics in the history of later medieval religion and society. From the eleventh century, the growth of trade and urbanization in the West deeply affected religious sensibilities. The institutional Church began to monitor Christian behavior ever more closely, and the faithful responded to the rapid diversification of lifestyles with varied forms of spiritual expression. Cistercians ‘sanctified’ colonization, military orders Western expansion, and mendicants the needs of the urban poor. Some of the new movements did not find a place within the orthodox framework, having to endure heresy charges and- eventually- the Inquisition. The course, based on lectures and original source material, will survey the most important manifestations of piety and their struggle for social recognition. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST.

HIST 3208. The Medieval Other. (4 Credits)
Western people in the Middle Ages shared many assumptions reinforcing their sense of social identity and unity. The recognition of common views and aspirations simultaneously implied that ‘others’ who challenged accepted lifestyles and beliefs suffered exclusion. Collective rejection varied in degree, from ridicule and physical separation to judicial prosecution, expulsion and indiscriminate slaughter. The course will examine various types of the medieval ‘other’, including Jews, lepers, heretics, prostitutes, and beggars. It will also focus on their respective treatment by the public, which became more rigid, if not outright hostile, as time went on. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST, OCST.

HIST 3209. The Origins of Christianity from the Apostles to the 4th Century. (4 Credits)
This upper-division course surveys the sources for the development of ancient Christianity, from the ministry of Jesus Christ to the conversion of the emperor Constantine in the early fourth century. Through lectures and a close reading of primary source materials in translation, students will examine the social activities, theological inquiries, and doctrinal conflicts of early Christians in their Roman and Jewish context, with special attention to the plurality of understanding about the significance of Jesus Christ, the development of the church as an institution, and the formulation of orthodoxy and heresy, particularly with regard to the creation of a “canon” of authoritative texts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST.

HIST 3210. King, Court, Crusade: Writing Knightsly Life in the High Middle Ages. (4 Credits)
This course will view the medieval world through a lens provided by the life and writings of one man, John of Joinville (d. 1317). John was a knight, a crusader, and a close friend of King Louis IX of France (canonized as Saint Louis). He wrote a Life of Saint Louis that is rich with information about his own life, as well as the saintly king’s. We will use the Life to open an examination of key themes in the knightly experience in the high middle ages, including: power, faith, the crusades, noble culture, family and social relations. It will also consider the usefulness of biography/autobiography in understanding the past.
Attributes: AHC, HIMH, MVST.
HIST 3211. Medieval Sin, Sinners, and Outcasts. (4 Credits)

During the medieval period, the notions and practice of sin and redemption underwent constant changes. In surveying their development, the course will place particular emphasis on the growing inclination to treat those banned from the community of the faithful simultaneously as outcasts, to be excluded from lay society as well. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, HIMH, MVST.

HIST 3212. The History of Medieval Christianity. (4 Credits)

The History of Medieval Christianity explores the history, organization, and beliefs of Christian communities and institutions from the time of the apostles to the sixteenth century. The history of the Church is treated as the history of the variety of possibilities that human culture has created to define ‘church,’ and the history of the choices Christians have made in the face of those possibilities. Through lectures and discussions of primary source texts in English translation and the work of modern historians of Christianity, this course examines the spread of the Christian movement in its ancient, medieval, and early modern contexts. Our intellectual goal is to achieve a detailed knowledge and firm understanding of this development. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, HIMH, MVST.

HIST 3213. Dragons, Fairies, and the Undead: Stranger Things in Medieval Europe. (4 Credits)

This course explores the shadowy margins of the human imagination in the European Middle Ages (ca. 400 to 1400) through an investigation of the representation and understanding of monsters, supernatural creatures, and the restless dead in medieval Christian writings. Through a close reading of saints’ lives, sermons, books of wonders, and magical treatises, we will discover some of the “stranger things” about the medieval world. Weekly topics of inquiry include dragons, fairies, demons, werewolves, dog-headed people (cynocephali), subterranean races, necromancy, weather magic, ghosts, zombies, and vampires, among others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, HIMH, MVST.

HIST 3214. Plagues and Peoples: Health and Disease in Medieval Europe. (4 Credits)

In recent years the study of health in the premodern world has flourished, and new approaches like viral genome sequencing and osteoarchaeology have led to a reconsideration of the longstanding narrative of the Middle Ages as a time of hardship and disease. This course uses these new approaches, together with primary-source material, to examine how medieval people understood and experienced health and disease, including their approaches to diet, occupations, and plagues, among other issues. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, HIMH, MVST.

HIST 3215. Middle Ages and West. (4 Credits)

At very nearly the same moment, empires at opposite ends of Eurasia imploded. In the centuries that followed, both absorbed nomadic populations, incorporated new religions, expanded into heretofore peripheral areas, revived trade, urban life and classical intellectual traditions. Each exported high civilization (and accompanying technologies) to island archipelagos off their coast. They emerged from this process having restructured themselves politically and socially. This course will explore the parallels even as it seeks to bring forces generating significant contrasts into sharper focus. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, HIMH, MVST.

HIST 3220. Medieval Hollywood. (4 Credits)

This course examines popular depictions of the Middle Ages on screen by using lectures, discussion, and selected films. Topics include the cinematic representations of King Arthur, female mystics, warfare, monks, knighthood, and kings and queens, among others. This course fosters a deeper understanding of the relationship between historical evidence and fiction, as well as how modern sensibilities shape popular representations of the medieval past. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, HIMH, MVST.

HIST 3259. Transgender History. (4 Credits)

This course examines the making of transgender life in the modern world. We will begin in late 19th-century Europe with the emergence of sexology, contextualizing early sexological writings in relation to contemporaneous cultures of sexual and gender nonconformity, to literary and historiographical works in which gender-variant figures appear, and to the gender dynamics of high imperialism. In this way, we will sketch out the historical matrix that gave birth to the modern invert. We will treat transgender people not only as objects of historical narratives but also as creators of historical representations. We will engage with late 20th- and early 21st-century histories of transgender life in various places, including Europe, the United States, and other areas of the world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, HIEH, WGSS.

HIST 3260. Medieval Ireland to 1691. (4 Credits)

A history of Ireland from early Middle Ages through the Tudor-Stuart era. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, AMCS, HIMH, IRST, ISHI, MVST.

HIST 3270. The Crusades. (4 Credits)

The idea of a crusade; the European background; conditions in the Moslem world; the Latin Kingdoms of the East; crusades of the late Middle Ages; effects of Crusades on the Mediterranean world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, HIMH, JSPM, JWST, MVST, OCHS, OCST, REST, RSHR.
HIST 3301. Women in the Middle Ages. (4 Credits)
This course will discuss women in medieval society: the noblewoman who influenced major political developments, the peasant woman who performed agricultural and manorial tasks, the townswoman who served as merchant and producer and the wife and mother who provided the basis of family life. The course will also cover attitudes toward women revealed in legal, religious and secular literature of the period. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST, WGSS.

HIST 3305. Medieval Warfare. (4 Credits)
This course examines the social, economic, and political history of warfare from the fall of the Roman Empire to the fifteenth century. Several themes are emphasized: 1) the impact of technological developments in weaponry, fortifications, and armor on the conduct of war and society; 2) the influence of the Christian Church on warfare; 3) the relationship between social stratification and the conduct of war; and 4) the social consequences and economic costs of warfare. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST, PIST, PJWT.

HIST 3322. The Reformation Era. (4 Credits)
A detailed analysis of the religious upheavals of the 16th century with attention to the social, political and economic aspects of the theological movements. (Alternate years) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, HIMH, RSHR.

HIST 3356. Confessionalization and Conflict in Early Modern Europe, 1453-1688. (4 Credits)
Through lectures and discussions of primary and secondary source material, the course will examine the Ottoman threat, confessional purity, the Peasants’ Revolt, Luther and the German nobility, cuius region eius religio, the French Wars of Religion, English “wars of religion,” the Thirty Years’ War, the way forward: religious tolerance, or King Louis XIV’s absolutism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHC.

HIST 3362. Crime and Punishment in Europe. (4 Credits)
The history of defining, prosecuting, and punishing transgressions, both religious and secular, in Europe, especially from 1500-1800. The course will focus on the development of so-called modern beliefs about crime and law. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, IPE.

HIST 3411. Tudor and Stuart England. (4 Credits)
Religious and political changes under Henry VIII and Elizabeth; the Stuart regime, civil war and Cromwell, the Restoration and revolution of 1688. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.

HIST 3412. The Tudors. (4 Credits)
This course tells the fascinating story of the Tudor dynasty (1485-1603), but it will also explore the history of the Tudor state which in addition to England included Wales, Ireland and parts of France. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, IRST, ISHI.

HIST 3413. Reformation England. (4 Credits)
This course studies political and religious change in England in the 16th century, from Henry VIII to Elizabeth I. It will examine Roman Catholicism before the schism, the Divine issue, Thomas Cromwell and Thomas Cranmer’s influence in the English Church; and the development of Puritanism in England. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.

HIST 3414. Cabbages and Kings. (4 Credits)
This class will explore various styles of kingship and monarchy in Europe from the end of the Middle Ages to the First World War. We will compare and contrast monarchial forms of government with the ideal of the republic, and especially with new standards created by the Enlightenment. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.

HIST 3415. European Women: 1500-1800. (4 Credits)
This course will explore the role of women in northern European society from the 16th to the end of the 18th centuries. It will examine issues of gender, and contemporary attitudes concerning women. Among the subjects that this course will address are women’s work, education, marriage and childbirth. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, WGSS.

HIST 3416. European Women: 1800-Present. (4 Credits)
This course will be an exciting exploration of the changing status, roles, and achievements of women in western Europe from the French Revolution at the dawn of industrialization to the present day. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, INST, IPE, ISEU, WGSS.

HIST 3417. Civil Wars and Revolution in the British Isles. (4 Credits)
This course will explore the concepts of revolution in 17th-century Britain under the Stuart dynasty and Oliver Cromwell. It will examine the failures of King Charles I to tame Parliament and why he was overthrown. This course will also explore how Cromwell overcame Parliament to create a brief military dictatorship in Britain, as well as when new political groups developed and experiments with socialism occurred. We will explore why the monarchy was restored in 1660. This course will also discuss the Glorious Revolution of 1688, when Parliament triumphed over the monarchy forever. This course is important because it stresses how revolutions happen, what the participants hope for, and how often their expectations are disappointed. We will see why the outcomes of any revolution can be wholly surprising. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.
HIST 3420. The English Renaissance. (4 Credits)
Studies in intellectual life in England from the late 15th through 16th centuries. This course will pay special attention to humanism and its development by examining the works of Bishop John Fisher, Sir Thomas More, Juan Luis Vives, and others. Emphasis will be placed upon the education of women; and also Renaissance art, including Holbein. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.

HIST 3425. Henry VIII's England. (4 Credits)
Henry VIII is the most famous king England ever had. His brutality, his six marriages, his tyranny, his ego, even his physiognomy, is the stuff of legend. Often lost in all of this, however, is the fact that King Henry presided over a revolution in church-state relations and important changes in English government and society. His reign also witnessed a redefinition of England's relationship with its near neighbors Ireland, Wales, and Scotland, which was part of a broader repositioning of England in Reformation Europe. At the center of all of these developments was Henry VIII; understanding of England in what, in hindsight, was one of the most pivotal periods in the kingdom's long history is impossible without understanding the king. To do so this course will explore Henry VIII's England by looking at four interrelated themes: politics and society, the Reformation, England's relationship with Europe and with Ireland. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, IRST.

HIST 3430. The World of Queen Elizabeth I. (4 Credits)
This course explores the world of Queen Elizabeth, the last Tudor sovereign, by looking at four overlapping themes which together shaped the Elizabethan period: state and society in the kingdom of England; overseas discovery; European diplomacy; and the kingdom of Ireland. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, IRST, ISHI.

HIST 3435. Britain: 1688-1867. (4 Credits)
Aristocratic hegemony, popular culture and protest, the industrial revolution and its associated class conflict, radical and reform movements, and the transforming effect of new social forces and ideologies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, IRST.

HIST 3457. Britain: 1867-Present. (4 Credits)
Gradual democratization, imperial expansion, the rise of the Labour Party, economic decline, the impact of the two world wars, and the Thatcher Revolution. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, INST, IPE, ISEU.

HIST 3459. Transgender History. (4 Credits)
This course examines the making of transgender life in the modern world. We will begin in late 19th-century Europe with the emergence of sexology, contextualizing early sexological writings in relation to contemporaneous cultures of sexual and gender nonconformity, to literary and historiographical works in which gender-variant figures appear, and to the gender dynamics of high imperialism. In this way, we will sketch out the historical matrix that gave birth to the modern invert. We will treat transgender people not only as objects of historical narratives but also as creators of historical representations. We will engage with late 20th- and early 21st-century histories of transgender life in various places, including Europe, the United States, and other areas of the world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, WGSS.

HIST 3450. Diversity and Globalization at the Irish-Atlantic Crossroads. (4 Credits)
Exploring the fateful diversity and globalization links among Irish emigration, African slavery and Indian removal in Ireland, England and America at the fateful 19th century Irish-Atlantic crossroads. A vivid mix of period and present-day people, texts, photos and films. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.

HIST 3417. The Arab Israeli Conflict: Cultural Perspectives. (4 Credits)
The Arab-Israeli conflict is one of the longest and most controversial conflicts in the world. Through careful analysis of Israeli literature and film, this course provides a nuanced cultural and political history of Arab-Israeli relations. Our texts emphasize the dialectic relationship between art and politics, representation and history, as well as aesthetic and ethics. The course thus explores the effect of art on politics, and the effect of politics on art. Specifically, we examine how art is instrumental in producing 1) ‘imagined communities’ with stable national identities and 2) political resistance that disrupts these hegemonic metanarratives. We also consider the internal dynamics of Israeli society as represented in literature and film, especially tensions between the Jewish-Arab, Ashkenazi-Mizrahi, and religious-secular communities. By analyzing canonical and more contemporary stories, poems, and films (including those by S. Yizhar, Amos Oz, Said Kashua, Mahmoud Darwish, among others) we explore the dialectic between art and politics in Israeli society since 1948.
Attributes: AHC, ALC, COLI, HUST, INST, ISME, JWST, MEST, MLL.

HIST 3480. Judaism and Islam. (4 Credits)
This course examines the making of transgender life in the modern world. We will begin in late 19th-century Europe with the emergence of sexology, contextualizing early sexological writings in relation to contemporaneous cultures of sexual and gender nonconformity, to literary and historiographical works in which gender-variant figures appear, and to the gender dynamics of high imperialism. In this way, we will sketch out the historical matrix that gave birth to the modern invert. We will treat transgender people not only as objects of historical narratives but also as creators of historical representations. We will engage with late 20th- and early 21st-century histories of transgender life in various places, including Europe, the United States, and other areas of the world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, WGSS.

HIST 3460. Diversity and Globalization at the Irish-Atlantic Crossroads. (4 Credits)
Exploring the fateful diversity and globalization links among Irish emigration, African slavery and Indian removal in Ireland, England and America at the fateful 19th century Irish-Atlantic crossroads. A vivid mix of period and present-day people, texts, photos and films. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.

HIST 3474. The Arab Israeli Conflict: Cultural Perspectives. (4 Credits)
The Arab-Israeli conflict is one of the longest and most controversial conflicts in the world. Through careful analysis of Israeli literature and film, this course provides a nuanced cultural and political history of Arab-Israeli relations. Our texts emphasize the dialectic relationship between art and politics, representation and history, as well as aesthetic and ethics. The course thus explores the effect of art on politics, and the effect of politics on art. Specifically, we examine how art is instrumental in producing 1) ‘imagined communities’ with stable national identities and 2) political resistance that disrupts these hegemonic metanarratives. We also consider the internal dynamics of Israeli society as represented in literature and film, especially tensions between the Jewish-Arab, Ashkenazi-Mizrahi, and religious-secular communities. By analyzing canonical and more contemporary stories, poems, and films (including those by S. Yizhar, Amos Oz, Said Kashua, Mahmoud Darwish, among others) we explore the dialectic between art and politics in Israeli society since 1948.

Attributes: AHC, HIEH, WGSS.
HIST 3512. The French Revolution. (4 Credits)
This course examines the French Revolution, including the origins of the revolt, social conditions, ideological and political motivations, the overthrow of the monarchy, the waves of terror, and the rise of Napoleon Bonaparte. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.
Mutually Exclusive: HIST 3513.

HIST 3513. Old Regime and French Revolution. (4 Credits)
A history of France between 1642 and 1815—from Louis XIV through the French Revolution and Napoleon. The themes we will analyze resonate well beyond French history: the rise of the state and the formation of social classes, Enlightenment thought and the diffusion of new ideas, early globalization and the culture of consumption, the first popular democratic revolution—its shining accomplishments and its descent into Terror and eventually dictatorship. We will read texts from the period ranging from novels to memoirs of Versailles courtiers or diaries of obscure people, and from political treatises and constitutions to newspapers and pamphlets. To get a fuller picture, we will also use music, songs, paintings, prints and cartoons, as well as films, along with the work of historians whose interpretations of this tumultuous, fascinating era have shaped our conceptions of modernity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.
Mutually Exclusive: HIST 3512.

HIST 3515. Media History: 1400 to Present. (4 Credits)
This EP seminar will examine the evolution of media and the revolutions brought by new modes of communication, from the printing press in the 15th century to radio, television and the internet most recently. The book and audiovisual media have been major forces in history; we will examine the profound impact they have on culture, ideas, politics, society, and economy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, CCUS, CMST, COLI, COMC, HIAH, HIEH, HIUL, INST, ISIN, JOUR.

HIST 3517. The Belle Epoche. (4 Credits)
The course will explore Europe in the three decades before the first World War. It will explore the development of a global industrial economy, imperialism, modernism, militarism, and racial reform movements in an especially dynamic period. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.

HIST 3538. The Good Earth?. (4 Credits)
An examination of the past experiences and current problems, posed by man’s relations with nature in China and Japan. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, ENST, ESEL, ESHC, GLBL, HIGH, INST, ISAS.

HIST 3541. Modern Italy. (4 Credits)
An introduction to the history of Italy from the late 18th century to the present. Drawing on a variety of sources besides historical analyses (novels, films and music), the course will pay special attention to issues of nation building and national identity and to the specificity of Italian modernity. Topics include the culture and politics of the Risorgimento, the role of the Church, gender relations, the crisis of the liberal state and the emergence of Fascism, anti-Fascism and the making of the Republic, the ‘economic miracle’ the difficult post-1989 political transition. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, IPE, ITAL.

HIST 3543. The Connecting Sea: The Mediterranean Since 1800. (4 Credits)
The Mediterranean is a space of exchanges, confrontations, and connections among the peoples of three continents (Europe, Africa, and Asia). By drawing in multidisciplinary fashion on a variety of different sources, the course will focus on the changing relations among the polities and peoples inhabiting this multicultural region in the modern era. Topics will include Barbary corsairs and ethnic clashes, the circulation of political ideas, the relationships forged during the colonial and postcolonial periods, the legacies of anti-colonialism, beach tourism and climate change, contemporary migration and the formation of new relationships and communities in the age of globalization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, GLBL, HIEH, HIGH, INST, ISEU, ISIN, ISME.

HIST 3545. Race and Nation in Modern Europe. (4 Credits)
An exploration of the constructions of race and nation since the Enlightenment. Topics will include the relationship between nationalism and racism; ‘scientific’ discourses and ideas of race and nation; the institutionalization of racist practices in colonial states; the rise of modern anti-Semitism; fascist racisms; immigration, national identities, and racism in contemporary Europe. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, INST, IRST, ISEU.

HIST 3549. Global Italy. (4 Credits)
Throughout the ages Italians have had intense exchanges with the world outside the peninsula, both in the Mediterranean and beyond. Italy has had many diasporas and continues to have significant numbers of emigrants, even though in the past couple of decades it has become primarily a migrant-receiving nation. This course will examine the relationship between the inhabitants of the peninsula and the world at large and how they have shaped their identities. Focus will be on political exiles, emigration, foreign policies, and colonialism, and the recent wave of African and Asian migration to the peninsula. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, INST, IPE, ISEU, ISIN, ITAL.
HIST 3555. Hitler's Germany. (4 Credits)
Study of the problem of how Nazism arose in German society, the ways in which it triumphed, and its significance for Germany and modern world history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, INST, IPE, ISEU.

HIST 3558. Europe: 1900-1945: Total War. (4 Credits)
The course will focus on the two world wars, the rise of fascism and communism, and the Spanish Civil War, and the impact of these events on Europe and the world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, INST, ISEU.

HIST 3559. Europe Since 1945. (4 Credits)
In this second half of a two-semester sequence, whose parts may be taken separately, we will explore how Europe constructed a new civilization from the ruins of the second World War. Topics include the treatment of war criminals, the ‘glorious thirty years’ of unprecedented economic growth which produced the consumer society, the loss of empires, the cultural revolution of the 1960’s and the Thatcher years. Special attention will be paid to the construction of the Soviet empire in Europe and to the collapse of Communism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, INST, ISEU.

HIST 3564. Environmental History of New York City: A Research Seminar. (4 Credits)
Students will undertake an intensive course of reading and writing related at the formation and ecology of New York City, from Lenape settlement and subsistence patterns to present concerns about climate change. We will visit, as a class, the New York Historical Society eight times during the semester. There students will meet and work with an archivist who will aid them in finding sources for three essays on three different periods in the city’s history. Students will become members of the NYHS and use it throughout the semester. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, ENST, ESEL, ESCH.

HIST 3565. History of New York. (4 Credits)
The development of the City and the region from the Dutch to the deficit. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, ASHS, HIAH, URST.

HIST 3566. War and Imperialism. (4 Credits)
This course will explore the strains placed on the old Concert of Europe and its eventual collapse into two world wars. Themes of nationalism, and imperialism will be stressed as well as domestic and international sources of conflict. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APP, HIEH, INST, IPE, ISIN, PJST, PJWT.

HIST 3570. Genocide. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN, JWST.

HIST 3575. Torture, Terror, and the Body in the Modern World. (4 Credits)
Prohibited in Europe from the 18th century and since the nearly universally condemned throughout the world as ineffective and immoral, the practice of torture nevertheless continues today in authoritarian, democratic, and theocratic states alike. This course will examine the history of torture from its abolition, stubborn endurance, and subsequent return as a pervasive state practice. Though Europe and the United States remain the particular area of study, the course will examine torture worldwide through its intended and actual effect on the human body and on the lives of men and women regardless of nationality or creed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, MEST.

HIST 3580. War, Gender, and Violence in Modern Europe. (4 Credits)
This course will explore themes related to war, gender and violence in modern European history. In particular it will focus on gender and violence during conflicts, its intersections with race and nation identity, and its effects on societies. It will also consider the aftermath and outcomes of wartime violence by looking at post-bellum trials and the politics of reparations. This course will interrogate questions such as: How is violence gendered in warfare and what are its meanings? How do citizens and combatants narrate and remember experiences of warfare and violence? How does wartime violence reverberate in cultural sources such as in films, novels and art? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, INST, ISEU.

HIST 3614. Revolutionary and Soviet Russia. (4 Credits)
This course explores key themes in the history of 20th Century Russia, including the decline of autocracy; the outbreak of World War I and the 1917 Revolutions; transformation of the state, society, and culture under the Soviet regime; state-sponsored terror, World War II and the Cold War; as well as socialist/Marxist theories as interpreted by key Russian/Soviet leaders and intellectuals. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, INST, IPE, OCHS, OCST, PJST.

HIST 3620. 20th Century Europe. (4 Credits)
World War I and peace settlement; postwar problems; communism, fascism, nazism; totalitarian aggression and World War II; international cooperation and reconstruction; the cold war and the collapse of communism. (Alternate years) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, INST, IPE, ISEU.

HIST 3622. Great Trials. (4 Credits)
The course investigates a series of famous trials in order to pinpoint the conflicts and issues that characterized the times and places of these trials. Among the cases studied will be: Oscar Wilde, Alfred Dreyfus, The Moscow Show trials, the Nuremberg War Crimes Tribunal and the Scopes Trial. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, JWST.
HIST 3623. Screening Europe's Past. (4 Credits)
This course investigates a series of historical periods and issues through historical readings and documents and their depiction in films. Focus on Europe from medieval era to the modern period. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHC.

HIST 3624. European Cities. (4 Credits)
Topical study of the evolution of Europe's cities with emphasis on urban culture, society and the built environment. Considers the nature of urban transformation in key urban places such as Paris, London, Berlin, Rome and Moscow. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, COLI, HIEH, INST, ISEU, URST.

HIST 3626. Social History of Architecture. (4 Credits)
Studies the historical relationship between architecture, space and urban culture and the ways in which architectural innovations acts as both a reflection of and a catalyst for social and cultural transformation. Considers architecture and cultural theory as well as the evolution of building technologies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIAH, HIEH, URST.

HIST 3627. History of LGBT Movements. (4 Credits)
Survey of lesbian, gay, bisexual, and transgender histories across the globe. Particular focus on the American movement since Stonewall, including the AIDS crisis. As well, the course considers philosophic traditions, and varying histories of LGBT artistic expression. Students will also study Ancient Greek same-gendered partnerings as a way to understand modern forms of sexuality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AHC, AMST, ASHS, INST, ISIN.

HIST 3634. Modern South Asian History. (4 Credits)
This course will survey the recent history of the nations that are part of the Indian subcontinent, including India, Pakistan, Bangladesh, Sri Lanka, Nepal, and Myanmar (Burma). The nations of South Asia are rapidly assuming a central role in global geopolitics and the economics of globalization. In this course, we will survey a period spanning nearly four centuries beginning in 1600, from the fragmented kingdoms within the Indian subcontinent to the rise of discrete nation states by the mid-twentieth century to the geopolitical and cultural prominence of South Asia on the global stage in the early twenty-first century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, GLBL, HIGH, INST, IPE, ISAS.

HIST 3635. Science in Popular Culture. (4 Credits)
This course will be a historical survey of the intersection between science and popular culture. How do ideas about science and technology appear in our everyday lives? What kinds of perceptions do lay people have about science and scientists? What shapes these perceptions? Where do we get our ideas about technology from? How are our expectations of the future shaped by perceptions (and often misperceptions) of scientific knowledge? These are some of the questions we will address during the semester. The course will be firmly grounded in history, tracing the evolution of popular science through important transformations in the modern era, including the Scientific Revolution, the Enlightenment, the Industrial Revolution, Colonialism, and the traumas of the 20th century. Through the semester, we will study a variety of popular scientific forms, such as science fiction, magazines, comics, graphic novels, sci-fi movies, and TV shows. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, HIEH, INST, ISEU, ISIN.

HIST 3638. Technology From Antiquity to Middle Ages. (4 Credits)
This EP course will survey the history of technology from antiquity to the Middle Ages with a particular focus on the ways in which common people experienced technologies in their daily lives. We will pay particular attention to the history, impact, and nature of technological changes in agriculture, architecture, warfare, transportation, clothing, household objects, and medicine. Our goal is to reconsider antiquity and the Middle Ages through the lens of knowledge, technology, and material culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIGH, HIEH, MVST.

HIST 3653. Gender in Early America. (4 Credits)
Consideration of the roles of women and men from the 17th century into the 1840s, and the attitudes that shaped those roles in American society. The course will explore transatlantic influences and the interchange of European, Native American, and African American values. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, APPI, ASHS, HIAH, WGSS.

HIST 3655. The American Revolution. (4 Credits)
History of the Revolution and formation of the Constitution. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, ASHS, HIAH.

HIST 3657. American Constitution. (4 Credits)
The U.S. Constitution is one of the extraordinary codes of law in history, the culmination of the development of liberty within a self-governing republic, and the model for modern democratic government. Yet the course of its interpretation has been contentious and often divisive, revealing schisms between liberalism and conservatism, between citizenship and partisanship, in the quest for American identity. This course will focus on the principles of American constitutionalism—its evolution from the historical roots, the adoption of the Constitution, and its development in relation to legal, political and social changes in American history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, ASRP, HIAH.
HIST 3670. The Modern Middle East. (4 Credits)
The chief concern of this course will be to develop a sensitivity to and awareness of the issues and problems of the modern Middle East since the late 18th century and the introduction of Western ideas/technology into the Ottoman Empire. The course will be both a survey of Middle Eastern/Islamic history and an attempt to understand and re-evaluate our own perceptions of a non-Western civilization in the 20th century. (Alternate years) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, COLI, GLBL, HHPA, HIGH, HUST, INST, IPE, ISME, MEST, PJRC, PJST.

HIST 3675. History of Modern Israel. (4 Credits)
The history of Israel from the rise of Zionism in 19th. Century Europe to the present. Topics include: the Zionist experiment, the history of the Israeli-Arab conflict, the U.S. and Israel's 'special relationship,' and socio-cultural trends. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AHC, AMST, ASHS, HHPA, HIGH, HUST, INST, IPE, ISME, JWST, MEST.

HIST 3700. Sickness and Health in Early Ma. (4 Credits)
This course provides an introduction to the systems of learned medicine of western Europe from Late Antiquity to the High Middle Ages. Using a wide range of sources, including medical texts, hagiography, liturgy, and modern scientific studies, we will explore the distinctions between medical theory and practice, the relationship of secular and ecclesiastical authorities to the compilation of medical knowledge and the fundamental question of what constitutes medicine and what does not. In addition, we will consider the changing definition of illness and health through an investigation of medieval responses to the cataclysm of the Black Death. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, MVST.

HIST 3745. Colonial America 1492-1765. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, ASHS, HIAH.

HIST 3752. Coming of the Civil War. (4 Credits)
A history of the sectional crisis in America, focusing on the questions: Why did the South secede? Why did the North decide to fight rather than allow it? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, HIAH.

HIST 3753. Civil War Era: 1861-1877. (4 Credits)
A history of the war years and America's racial and sectional readjustment after the war. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, HIAH.

HIST 3758. America at War. (4 Credits)
Exploration of the interaction of American society and war throughout U.S. history, focusing especially on how American society influences how the country fights war and how war influences the development of American society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, HIAH.

HIST 3759. African American Women's Activism, 1815–1915. (4 Credits)
This course will focus on women's relationships to and roles in the diverse communities that developed in the U.S., assessing how the strategies used by women to improve their positions in U.S. society have changed over time. Our exploration will include: access to educational, legal, political, and economic opportunities; women's ability to recognize and use their creative, sexual, physical, and intellectual selves; and the consequences of living within or outside of images created for women. We will pay particular attention to, among other factors, how race, ethnicity, class, citizenship, and home region defined a woman's ability to maneuver in society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AFAM, AHC, AMST, APPI, ASHS, HIAH, WGSS.

HIST 3773. American Capitalism. (4 Credits)
Focusing primarily on modern United States, this course explores the history and everyday workings of ideas and institutions that often seem to us to be timeless: property, markets, profits, and developments. Throughout the course, we emphasize how ideas about race, class, and gender have affected the workings of our economic world. Our examination draws on and analyzes the history of ideas about economic life, from the works of Karl Marx to Milton Friedman. Topics range from the rise of plantation slavery to the growth of our fossil fuel economy to the feminization of labor in the 1970S. The course assumes no knowledge of economics, but only an interest in American social and economic history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, HIAH.

HIST 3774. History of Capitalism in the U.S.. (4 Credits)
Focusing primarily on the modern United States, this course explores the history and everyday workings of ideas and institutions that often seem to us to be timeless: property, markets, profits, and development. Throughout the course, we emphasize the connections between political and economic life in the U.S. and elsewhere in the world. Topics range from the rise of plantation slavery to the growth of our fossil fuel economy to the 2008 financial crisis. Students should emerge from the course with greater insights onto how the U.S. transformed from a peripheral country that drew wealth from slave-based agriculture into the world's political and economic superpower. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST.

HIST 3775. The Early Republic. (4 Credits)
The course studies the birth of American democracy and capitalism from the course studies to the birth of American democracy and capitalism from the revolution to the age of Jackson. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, HIAH.
HIST 3780. The Era of the Civil War. (4 Credits)
Slavery and other contributory factors leading to the war for southern independence; the war; reconstruction of the southern states; 1865-1877. (Alternate years) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, HIAH.

HIST 3789. Modern South Africa Stories. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, PJRC, PJST.

HIST 3795. U.S. Between Wars: 1919-1941. (4 Credits)
America between the wars was a nation in transition, and in contradiction. In a continuing quest for identity, American society faced the tensions between internationalism and isolationism, prosperity and economic collapse, progressivism and conservatism. From the anvil of the Progressive Movement, the Jazz Age, the Depression and the New Deal were forged the foundations of the 'American Century.' Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, PJRC, PJST.

HIST 3806. U.S. Immigration/Ethnicity. (4 Credits)
A survey of immigration and ethnicity in American life. Themes include the motives for migration; America's reception of immigrants; the formation of immigrant communities; the intersection of ethnicity with race, gender, religion, politics, and class; the personal meanings of ethnic identity; and the relationship of ethnicity to American national identity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, APPI, ASHS, HIAH, IRST, LALS, LAUH, PJRC, PJST, PLUR, URST.

HIST 3807. Jazz Age to Hard Times. (4 Credits)
The U.S. in the 1920s and 30s. Topics include Prohibition; the New Morality fundamentalism; the KKK and immigration restriction; African American migration and culture; causes and social effects of the Depression; FDR and the New Deal; popular culture; radical challenges; the coming of World War II. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AHC, AMST, ASHS, HIAH, URST.

HIST 3808. New York City Politics. (4 Credits)
An exploration of New York City since consolidation in 1898. Topics include consolidation, the role of Tammany Hall and municipal corruption, reform and radical politics, important mayoral campaigns and administrations (including Walker, LaGuardia, Lindsay, Koch, Dinkins, Giuliani), the civil rights movement in the city, the role of ethnic groups, the 1970s fiscal crisis, and September 11th. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, HIAH, LALS, LAUH, URST.

HIST 3809. Jews in the Modern World. (4 Credits)
This course will provide an introduction to the history of the Jewish people as it encountered the modern world from the 18th century through the twentieth. It will explore the social, cultural, religious, and political aspects of this encounter, primarily in Eastern and Western Europe, the United States, and the Middle East. The course will touch on such issues and events as emancipation and the breakdown of traditional identities and communal structures: Jewish religious movements from Hasidism to Reform; the invention of modern secular culture in Yiddish and Hebrew; political movements including Socialism, Zionism and Communism; migrations and the creation of American Jewry; anti-Semitism and the Holocaust; and the rise of the State of Israel. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, ASHS, GLBL, HIGH, JWST.

HIST 3810. Jews in America. (4 Credits)
Jews have been present in North America since the 17th century, but it was in the course of the 19th and early 20th centuries that the Jewish community in the United States rose to significance both within the Jewish world and as a visible presence in American life. Never more than 4% of the population, this small minority has had a prominent role in defining American pluralism. This course traces the history of the Jews in the United States from the colonial period to the 21st century. Among the topics it will cover are the waves of immigration that formed the community: American Jewish religious movements; secular approaches to Jewish identity; class conflict and mobility; Jewish participation in politics; American Jewish relations with communities abroad; and America and the Holocaust. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, ASHS, JSHI, JWST, PLUR.

HIST 3815. East European Jewish History. (4 Credits)
Some 80% of Jews in the world trace their roots to eastern Europe, which was home to the largest Jewish population until WWI. From the 16th century, the impact of east European Jews on Jewish culture and society has been tremendous, in shaping the interpretation of Jewish law, the ideology of the Zionist movement at the turn of the 20th, or modern Hebrew, and American literature and popular culture. Yet, the history of this important Jewish community has been vastly misunderstood, largely due to the devastating legacy of the Holocaust and the persistence of imagery of the impoverished 'shtetl' in Yiddish fiction, and later popularized through plays and films such as 'Fiddler on the Roof.' This course takes us beyond legends and stereotypes, and into a complex, more textured world of Jews living among Christians from the beginnings of Jewish settlement in the 13th century to contemporary Poland's small Jewish community, trying to reinvent Jewish life in the aftermath of the Holocaust and the 1968 forced migrations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AHC, AMST, ASHS, INST, ISEU, JSHI, JWST.
HIST 3822. U.S. Cultural History. (4 Credits)
The focus of this course is on ideas, assumptions, and values in American life from colonial times to the present, from ministers' sermons to blues performances, from philosophical essays to Hollywood films. It examines the symbolic forms and social context of conflicting as well as shared beliefs and considers the character of American cultural expression on various levels, in ways in which different groups have influenced American cultural life, and the meaning of recent mass culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AHC, AMST, ASHS, HIAH.

HIST 3824. U.S. Social Movements Since 1900: Struggles for Social Justice. (4 Credits)
This course examines social movements of the 20th century U.S. and how they connect to contemporary struggles for social justice. Topics include populism, the New Deal, civil rights, feminism and women's rights, LGBTQ rights, and poor people's movements. The focus is on how movements create change. Students will get out of the classroom and into the community by working, for example, with organizations serving low-income communities, immigrants, or ones dealing with gender/LGBTQ or race discrimination. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: SL.

HIST 3826. Modern US Women's History. (4 Credits)
The history of American women from the first women's rights convention in 1848 to the present. We will study women's everyday lives (including at home and work), major events like the campaign for suffrage, World War II, and the women's liberation movement, and representations of women in popular culture (magazines, movies, and T.V.). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, APPI, ASHS, HIAH, PLUR, WGSS.

HIST 3830. History of American Women and Gender. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AHC, AMST, APPI, ASHS, HIAH, HIUL.

HIST 3833. Screening America's Past. (4 Credits)
An examination of American history as depicted in 20th century American films. We will assess their relative accuracy, cultural context, and contributions to the (mis)shaping of the nation's collective memory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AHC, AMST, ASAM, ASHS, HIAH.

HIST 3834. Gender, Race, and American Mass Media. (4 Credits)
How have different forms of media been created, consumed, and mobilized by different groups in American society over time? This course will explore the development of mass media in the United States, and the roles gender and race played in this process. Through a study of newspapers, radio, television, film, and websites, we will examine how representations of gender and race changed over time, how the producers of mass media segmented their audience based on these categories or tried to speak to audiences across them, and how different consumers interacted with different forms of mass media. The course will also explore the relationship of the media to the economy, politics, religion, and globalization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, APPI, ASHS, HIAH, WGSS.

HIST 3842. The Vietnam Wars. (4 Credits)
The United States became involved in French-Indo-China in 1950 and left Vietnam in 1975. This course asks basic questions about the Vietnam Wars. Why did the United States make such a vast commitment in an area of so little importance? What did it attempt to do during the quarter century of it involvement there? Why, despite the expenditure of more than $150 billion dollars and the loss of more than 58,000 lives did the world's most powerful nation fail to achieve it objectives? What have been the consequences for Americans, Vietnamese, and others of the long and divisive war? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASHS, HIAH, INST, ISAS, ISIN.

HIST 3844. U.S. Foreign Relations in the 19th Century. (4 Credits)
This course examines U.S. foreign relations in domestic and international contexts from 1776 to 1898. Through the examination of primary and secondary sources, students will learn about the ideological, religious, political, economic, and cultural origins, as well as the debates and outcomes of U.S. expansion, territorial and non-territorial as well as formal and informal. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIAH.

HIST 3845. The History of U.S. Foreign Relations, 1898 to the Present. (4 Credits)
This course examines the foreign relations of the United States from 1898 to the present, tracking the nation's trajectory from minor international power to sole superpower. Through that history, it addresses traditional diplomatic questions of international wealth and power, the link between domestic politics and foreign policy, and programs of military intervention, cultural expansion, and economic development. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, INST, ISIN.
HIST 3846. The History of U.S. Foreign Relations, 1974 to Present. (4 Credits)
This course examines the foreign relations of the United States from the end of the Vietnam War to the present. It charts the course of recent U.S. history through the lens of its foreign relations, including major events like the energy crisis, the Iran Hostage crisis, the Soviet invasion of Afghanistan, the Iran-Contra crisis, the end of the Cold War, and others. It addresses traditional diplomatic questions of international wealth and power, this history of contemporary globalization, the link between domestic politics and foreign policy, and programs of military intervention, cultural interchange and economic development. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, INST, ISIN, PJST, PJWT.

HIST 3852. 20th Century U.S. Radicalism. (4 Credits)
Explores the radical Left and Right of American politics and culture. Lectures, discussions and assignments critically assess topics including the history of populism, socialism, the Klan, communism, Black Power, radical feminism and the religious Right. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, HIAH, PJSJ, PJST.

HIST 3857. America Since 1945. (4 Credits)
Integrating economic, political and social history, this course will explore the development of the American economy, paying particular attention to transformations in the nature of work and labor relations. (Alternate years) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, HIAH.

HIST 3858. The Global Cold War. (4 Credits)
An analysis of the global Cold War. Particular attention to the international forces of decolonization, revolution, and development in Asia, Africa, Latin America, and the Middle East. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, GLBL, HIGH, INST, IPE, ISIN.

HIST 3862. History of New York City. (4 Credits)
The political, social and cultural development of the city from trading post to metropolis. The emphasis is on leading personalities and the relationship between New York’s growth and major American trends over the last century. (Alternate years) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, HIAH, JWST, LALS, LAUH, URST.

HIST 3864. New Frontiers-1960's America. (4 Credits)
Americans remember the 1960s as a decade of great social change, an era of “new frontiers,” as the young presidential contender John F. Kennedy proclaimed during the election of 1960: “The world is changing,” Kennedy asserted, “the old era is ending, the old ways will not do.” In its most excessive phases, the period became linked with overwhelming changes, as music, hippies, drugs, and protest marches filled the scenery of American social and cultural spaces. But to what extent did the 1960s truly expand the nation’s frontiers? This course will investigate how 1960s America adopted and resisted social change, examining the period from cultural, political, economic, and diplomatic perspectives. Course themes will include, among others: social activism, including the civil rights, women’s, antiwar, and student movements; politics, like changes in presidential politics and the American party system; and pivotal moments in the Cold War. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, HIAH.

Mutually Exclusive: HIST 3869.

HIST 3865. Ethics and Capitalism. (4 Credits)
Since its foundations, the modern ideas and institutions we call capitalism have posed a range of ethical and political questions: What is the point of work? How should humans think about and value nature? How do capitalist institutions affect racial, class, and gender inequalities? This course explores these questions through the writings of theorists such as J.S. Mill, Karl Marx, W.E.B. DuBois, Nancy Fraser, and Milton Friedman. We think through philosophical texts alongside the writings of historians and historical actors. Possible topics include slavery, consumerism, the meat industry, and the growth of government. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHC.

HIST 3866. History of Comics and Superheroes. (4 Credits)
This course explores the emergence and evolution of the superhero archetype in modern comics through a deep engagement with social, cultural, and political currents in American and European history in the 20th century. We will track the creation of the first superheroes in the 1930s amid anxieties about the rise of fascism, and then trace their evolution through World War II and postwar prosperity in the U.S. The bulk of the course will explore the relationship between Cold War culture and comics, particularly the ways in which new maverick companies such as Marvel Comics reflected Cold War anxieties about advances in science and technology, nuclear annihilation, communism, consumerism, etc. The course will also look at many other superhero genres (including the recent spate of superhero movies), locating them in larger movements and episodes of the past half-century, such as the Civil Rights movement, the rise of second wave feminism, anti-war movements, the AIDS epidemic, and the War on Terror. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, ASHS, HIAH.
HIST 3867. United States History Through Television. (4 Credits)
This course is designed to explore the intersection of American history and the medium of television. A combined thematic and chronological approach will explore television and its historical consequences from the post-war dominance of three major networks, to the more diverse and fragmented cable era of the late 20th century. Various genres will be examined, including: news, scripted programming, advertising, and political campaigns. Through curated readings and video analysis, the course will explore several themes and questions, such as: how television programming has shaped the course of historical events and social/cultural/political movements; how scripted historically themed programming (series and made-for-TV films) can affect viewers' knowledge and opinions of historical figures and events; and how TV programming can be used in the study of American history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AHC, AMST, ASAM, ASHS, HIAH.

HIST 3868. Culture and Capitalism in the United States. (4 Credits)
Focusing primarily on the United States, this course analyzes the history of capitalism in an anthropological light. We trace its underlying premises and its effects on habits of life and mind. At the same time, we consider the ways in which changing cultural concepts—such as religious beliefs, racial hierarchies, and gender norms—have shaped the workings of economic life over time. Possible topics range from formation of private property in colonial America to the ethos of the 20th-century corporation. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AHC, AMST, APPI, ASHS, HIAH.

HIST 3869. 1960s America: Gender, Race and Youth. (4 Credits)
This course will investigate 1960s social change and its resistance, examining the long 1960s from a social, cultural, political, economic, and intellectual perspective. Course themes will devote particular attention to social movement activity, including the civil rights, women's, antiwar, environmental, and student movements. A pluralist perspective—relying on gender, race, class, and similar categories of historical analysis—will guide readings and discussions of related course topics, including the rise of the New Left and its discontents, changes in presidential politics and the American party system, American economic trends, and pivotal moments in the Cold War. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, HIAH, PLUR.
Mutually Exclusive: HIST 3864.

HIST 3880. History of the Cold War. (4 Credits)
The course will examine the Cold War as a political, economic, ideological, and military contest on a global scale. It will give special attention to the American role and experience in the origins of the conflict and its historical significance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, INST, ISIN.

HIST 3911. U.S. and East Asia. (4 Credits)
From its earliest days, the United States has been involved with East Asia. In this course we will examine key moments in the interaction of these radically different cultures: the opening of Japan; Asian immigration (and exclusion); the United States as a colonial power in the Philippines; the Open Door Policy; the road to Pearl Harbor; the Pacific War: Hiroshima and Nagasaki; the American occupation of Japan; the 'loss' of China; Korea and containment; Vietnam; the opening to the PRC; the growth of Asian America; and the emergence of the Pacific Rim. We conclude by placing current issues (economic tension, strategic concerns, human rights) in their historical content. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AHC, AMST, ASHS, HHPA, HUST, INST, ISAS, ISIN.

HIST 3915. Contemporary China. (4 Credits)
Chinese history since 1895, focusing on the scramble for concessions, the Hundred Days, the Boxer Movement, the 1911 Revolution, the emergence and rise to power of the Communist Party, the Great Leap Forward, the Cultural Revolution, Deng's four modernizations and the rising demand for a fifth democracy. (Alternate years) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, GLBL, HIGH, INST, IPE, ISAS, PJRC, PJST.

HIST 3918. Cultural Revolution: China in Context. (4 Credits)
Given the rise of contemporary China, the Great Proletarian Cultural Revolution (1966-1976) might seem like an anomaly driven by Mao Zedong's cult of personality. This course will challenge this idea by exploring the broader trajectory of radical change in Modern China, the global contexts of popular activism and anti-imperialism, and the ongoing impact of the Cultural Revolution in China and beyond. Topics will include the role of ideology, and the workings of everyday life, the reimagination of the 'peasant'. revolutionary mobilization of gender, ethnicity, science and environment, and the art and literature of memory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIGH, INST, ISAS.

HIST 3919. Christianity in China. (4 Credits)
This course explores the history of Christianity in China from the seventh century to the present. We will explore the earliest evidence of Christianity in China, the Franciscan missions to the Mongols, the arrival of the Jesuits, the Chinese rites controversy, the persecution of Christianity, the rise of Protestant missions, and the explosive growth of Christianity in China today. We will also explore issues of church/state conflict, religious debate and conversion, and the complex interplay between foreign missions and Chinese developments. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIGH, INST, REST.
HIST 3920. Modern Japan. (4 Credits)
Japanese history since 1868. Equal attention will be given to the political, economic and cultural achievements of the Meiji era (1868-1912); to the unresolved strains that led to World War II; and to Japan's spectacular postwar recovery. The course will end with an examination of today's internal strains and external tensions. (Alternate years) \ Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, GLBL, HIGH, INST, IPE, ISAS.

HIST 3922. East Asian Cities. (4 Credits)
To 1800, half of mankind's urban history was East Asian history. Cities played central—if rather different—roles in the social, cultural, and political histories of China and Japan. After their incorporation at gun-point into a system of industrializing nation-states, pre-existing urban hierarchies were restructured, their functions transformed. In this course, we explore both the indigenous experience and its modern transformation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, COLO, GLBL, HIGH, INST, IPE, ISAS, URST.

HIST 3924. East Asian Capitalisms. (4 Credits)
An exploration of the changing roles money and markets have played in Chinese, Japanese and Korean development from pre-modern times to the first decades of the twenty-first century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, INST, ISAS.

HIST 3925. The Holocaust. (4 Credits)
As a quintessential genocide, the Holocaust is intensively studied by scholars. As the emblem for the most radical evil in the human experience, it has also widely captured the imagination of millions. Why is this so? Our course will explore the contemporary interest in the Holocaust by investigating its representation in film and the arts. We will also focus on the most significant historical issues: What is the connection between historical antisemitism and the Holocaust? How do we explain the behavior of the many thousands of perpetrators? The response of the victims? The heroism of rescuers? The failure of Pope Pius XII to do more for the victims? The heroism of rescuers? The failure of Pope Pius XII to do more for the victims? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, HUST, INST, IPE, ISEU, JWST, PJST, PJWT, REST.

HIST 3931. Colonialism and South Asia. (4 Credits)
This course provides an examination of the colonial incursions into South Asia. We will discuss the motivations and actions of colonial powers as well as responses by the local populations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIGH, INST, ISAS, ISIN.

HIST 3939. History of Global Popular Music: From Africa to the Americas and Back. (4 Credits)
Who brought the banjo to the United States? How did jazz get to Paris? Why is reggae so popular in Ghana? In this course, students will learn the history of African and African Diasporic popular music as it has crossed the Atlantic with enslaved Africans, African American soldiers, Caribbean migrants, and students from West Africa. Through primary sources, songs, films, and academic texts, students will examine issues of globalization, consumerism, migration, pan Africanism, race, and gender in the history of Africa and the Black Atlantic. The final project will involve original research in local and online archives, and will be accompanied by a post on the course blog. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, ASHS, HIGH, INST, ISAF, ISIN.

HIST 3942. Race, Sex, and Colonialism. (4 Credits)
In this course we will learn about the similarities and differences that characterize histories of interracial sexual relations in different political, social, economic, and legal contexts. We will focus on histories of interracial sexual relations in areas as diverse as colonial Zimbabwe, Haiti, Indonesia, and the U.S.A. Close attention will be paid to the position of women in these relationships, as well as their mixed race children. Case studies will be accompanied by foundational theoretical readings on race, colonialism, and sexuality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AHC, AMST, ASHS, HIGH.

HIST 3944. Africa in the Age of Decolonization. (4 Credits)
Almost all of the nation-states in sub-Saharan Africa achieved independence from the European colonial powers in the mid-20th century. This course explores the diversity of experiences of decolonization in Africa through this period, with a focus on social, cultural, and economic dimensions of this change. We will look at how African cultures resisted and adapted to European colonial rule, the emergence of nationalist movements, broad social and cultural changes in class and gender, racial and ethnic conflict, mass urbanization, and the frequently destructive repercussions of Cold War high politics on African nation-states. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIGH, INST, ISAF.

HIST 3945. Africa, Race, and the Global Cold War. (4 Credits)
This course explores how Africans and African states negotiated and shaped the geopolitical climate of the Cold War era. Some of the major themes covered will be the role of race and racism in the Cold War; the relationship between the Cold War and Pan-Africanism; the Cold War and African decolonization and liberation; the Cold War and African sovereignty; and the Cold War and African development. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIGH, INST, ISAF, PJRC, PJST, PJWT.
HIST 3946. African Economies and Humanitarianism. (4 Credits)
Africa is one of the leading “emerging markets” in the world; it is also one of the most misunderstood and misrepresented. Through a historically grounded, but multidisciplinary approach, this course provides students with the knowledge and vocabulary to engage in and thrive in contemporary African economic markets and development sectors. We will cover the rise of African trade unions, environmental activism, conceptions of the African consumer, innovation in African technological and mobile sectors, big-state developmental models and projects, the impact of structural adjustment and international financial institutions on African economies and societies, the role of foreign companies and nations in African economies, African states’ attempts to reclaim colonized land, and the tech and start-up market in Africa. Close attention will be paid to the methodological approaches our authors take and to the theoretical insights we can draw from our diverse case studies to help us better discern the common and singular threads running through this expansive field of inquiry. You will also hear from guests who are currently making waves within the contemporary African business, development, and humanitarian climates. This is an intensive course for those interested in doing business, development, or humanitarian work in Africa. This course is also intended for people interested in learning more about the political-economic make-up of contemporary Africa. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AHC, AMST, APPI, ASHS, COLI, HIAH, INST, ISIN, ISLA, LALS, LAUH, PLUR, URST.

HIST 3950. Latino History. (4 Credits)
This course explores the development of the Latina/o population in the U.S. by focusing on the questions of migration, race, ethnicity, labor, family, sexuality, and citizenship. Specific topics include: United States colonial expansion and its effects on the population of Latin America; Mexican-Americans, and the making of the West; colonialism and the Puerto Rican Diaspora; Caribbean revolutions and the Cuban-American community, and globalization and recent Latina/o migrations (Dominicans, Colombians). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AHC, AMST, APPI, ASHS, COLI, HIAH, INST, ISIN, ISLA, LALS, LAUH, PLUR, URST.

HIST 3955. Slavery Freedom/Atlantic World. (4 Credits)
The course will cover multiple regions of the Atlantic World – Latin America and the Caribbean, the U.S., Africa, and Europe – to understand slavery and freedom as intersecting global themes across space and time. Starting with indigenous and African slavery in the Spanish and Portuguese empires, we will understand how political and economic institutions, racial ideas, and even Enlightenment concepts about liberty informed a global history of human bondage. The course will look at a variety of materials, from slave narratives to court cases, databases, film, and literature to understand the experience of slavery and the fight for freedom through the perspectives of slaves as well as slave owners, slave traders, and abolitionists. We will also consider the development of African diasporic cultures in the Americas and the legacy of slavery in current debates about memory, reparations, and human trafficking. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AFAM, AHC, AMST, ASHS, INST, ISAF, ISEU, ISIN, ISLA, LALS, LAUH.

HIST 3961. Rebellion and Revolution in Latin America and the Atlantic World. (4 Credits)
The course will examine principal rebellions and revolutions in Latin America and the Atlantic World from the late colonial period to the twentieth century, including: the Haitian Revolution; Brazilian slave rebellions; the Cuban War of Independence; the Mexican and Cuban Revolutions; Central American revolutions; and Pinochet’s coup against Salvador Allende in Chile. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AHC, AMST, APPI, ASHS, HIGH, INST, ISLA, LALS, LAUH, PJ SJ, PJST.

HIST 3965. Colonial Latin America. (4 Credits)
Latin America under Spanish rule. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AHC, AMST, APPI, ASHS, HIGH, LALS, LAUH.

HIST 3966. Central America since 1930. (4 Credits)
Central American history from the dictators of the 1930s until the revolutionary decades and their aftermaths. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, GLBL, HIGH, HIUL, LALS.

HIST 3968. Mexico. (4 Credits)
The course covers the history of Mexico from pre-Columbian times to the present. It underscores major events (such as the Spanish conquest, independence, and the revolution) and long historical periods like the colonial era, the turbulent 1800s, nation-building in the 1900s, and U.S.-Mexico relations. It further seeks to explain how the colonial legacy, race, the state, and migrations have shaped Mexican culture and identity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AHC, AMST, ASHS, GLBL, HIGH, INST, IPE, ISLA, LALS, LAUH.

HIST 3969. Latin America and the U.S.. (4 Credits)
This course will be a survey of the history of the Latin America policy of the United States and the impact of such policy on the Latin American countries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AHC, AMST, APPI, ASHS, GLBL, HHPA, HIGH, HUST, INST, ISIN, ISLA, LALS, LAUH, PJRC, PJST.

HIST 3972. Revolution in Central America. (4 Credits)
The course covers the history of Central America from the 1930s to the present. It provides the background necessary for students to understand the revolutionary movements in Central America in the 1980s. Among the topics covered will be the situation of political and social exclusion of large sectors of the population, the impact of the rapid expansion of export agriculture, insurgency and counterinsurgency strategies, U.S. strategic interests in the region and the role of liberation theology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, HIGH, INST, IPE, ISLA, LALS, LAUH, PJ SJ, PJST.
HIST 3974. Spaniards and Incas. (4 Credits)
This course traces Andean history from the growth of the Inca Empire in the 15th century through its conquest by the Spanish in the 16th century. The creation of a colonial Andean society forms the balance of the course which concludes with the Great Rebellion of the late 18th century. Specific attention will be given to the impact of Christian missionizing on indigenous populations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, GLBL, HIGH, LALS, LAUH.

HIST 3975. The Caribbean. (4 Credits)
This course will study the history of colonialism, slavery, emancipation and nationalism in the Caribbean, using both primary sources and scholarly studies. The African and European backgrounds to Caribbean history will receive particular attention. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, GLBL, HIGH, INST, ISLA, LALS, LAUH.

HIST 3977. Latin American History Through Film. (4 Credits)
We will screen Latin American and U.S. films to examine what we learn about events or ideas from Latin American history through film. We also will seek to understand how countries interpret their own particular histories in films. Readings will put the films into historical context. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, ASHS, GLBL, HIGH, INST, ISLA, LALS, LAUH.

HIST 3982. The Islamic World and the Crusades, 1099-Ca.1700. (4 Credits)
This course aims to examine the crusading thought and movement from the Muslim perspective between the 12th and 18th centuries. The traditional scholarship has assumed that the Crusades did not leave any long-lasting mark or impact on the broader Islamic world. By uncovering the centrality of the Crusades for the development of Muslim society and culture in the Mediterranean throughout the medieval and early modern eras, the course hopes to challenge this established view. The main topics to be discussed include Muslim-Christian religious, political, and cultural encounters in the Mediterranean in the context of the Crusades; the rise of the Ottoman Empire at the frontier of Christendom in the 14th century; the Crusades launched against the Ottomans between the 14th and 18th centuries; and the role of the crusading thought and movement in the making of the Ottoman and Habsburg Empires in the 16th century, with each empire seeking universal dominion to unite Islam and Christendom. By engaging with materials and documents drawn from both Muslim and Christian sources, the course aims to establish the historical importance of the Crusades to understand both the unity and the diversity of the modern Mediterranean world. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIGH, OCHS, OCST, RSHR.

HIST 3983. Apocalypticism and Messianism in Islamic Thought and History. (4 Credits)
Apocalypticism, the belief that God has revealed the imminent end of the struggle between good and evil, has been a major element in Islamic tradition. Messianism, or belief that a savior will usher in a golden age, is intimately connected. This is a general introduction to the central themes in Islamic apocalypticism and messianism from early Islamic period to present time. It will analyze the history of beliefs related to the imminence of the Last Days in Islam in various contexts and explore the ways in which apocalyptic expectations shaped Muslim and Christian encounters. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HHPA, HIGH, HUST, INST, ISME, MEST.

HIST 3985. Ottoman Empire/ 1300-1800. (4 Credits)
The course proposes to trace the history of the Ottoman Empire from its emergence in the early fourteenth century (ca. 1300) as a small frontier principality, to its growth into a world empire in the sixteenth century, and then down to its final dissolution in 1923. Bringing the political, cultural, and social aspects of the six-century-long imperial history together, the course seeks to understand the ways in which the Ottoman past shaped the modern middle east. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, COLI, HIGH, MEST, OCHS, OCST.

HIST 3986. Religion and Politics in Islamic History. (4 Credits)
An introduction to the Islamic Political Thought from the rise of Islam to present, with a strong emphasis on the historical context. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, COLI, HIGH, MEST, OCHS, OCST, PJRJ, PJST, REST.

HIST 3990. North American Environmental History. (4 Credits)
The course will explore various aspects of North American Environmental History. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, ENMI, ENST, ENVIS, EPLE, ESEL, ESCH, HIAH, UREST.
HIST 3991. The American Indian. (4 Credits)
Not long ago, 15 million people lived in what is now the continental US, organized into roughly 500 broad groups, speaking thousands of languages, and living in hundreds of thousands of villages. They cultivated plants that became among the most important in the world by the 20th century, especially maize: now the most widely cultivated grain on earth. They confounded the medieval conception of the Creation and course of history, forcing Europeans to reexamine everything they thought they knew. And they helped to shape the US, by maintaining powerful military and political confederacies in the interior. They did not merely serve as guides; they did not walk in moccasins through time, leaving not a mark on the landscape; they did not go quietly to their reservations. This course examines American Indians from their own points of view, from those of Whites, and from the ways that Indians changed American culture and environment. It is broadly chronological but mostly topical, covering the period from 13,000 years ago to after World War II through a series of issues and events. The course assumes no previous knowledge of American Indians and is offered as part of Fordham’s Eloquentsia Perfecta initiative. Accordingly, students will learn to write and speak. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AHC, AMST, APPI, ASHS, ENST, ESEL, ESHC, HIAH, PLUR.

HIST 3992. Capitalism. (4 Credits)
Political economy is the social science that treats the sources and methods of production for subsistence and wealth. It is the study of how political systems conceive of and organize economic life and of the ideas people hold as they set out to derive wealth from nature. Its founding authors are still read today, so convincingly did they establish the questions and the borders of the discipline. Yet these authors had a troubled relationship with the environments where commodities originate. They tended to deny that ecology and economy could possibly come into conflict. Instead, they proposed mechanistic models in which the market resolved all contradictions. This seminar considers the various ways that capitalist societies have appointed resources and conceived of nature, progress, and wealth. IT IS A TOPICAL HISTORICAL SURVEY INTENDED TO TEACH THE ORIGINS, QUALITIES, AND HISTORICAL MANIFESTATIONS OF THIS POWERFUL SOCIAL SYSTEM. The course assumes no knowledge of economics and only a basic knowledge of American and European history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPI, ASHS, ENST, ESEC, ESEL, ESHC, HIGH, INST, IPE, ISEU, ISIN.

HIST 3993. Environmental History: New York City. (4 Credits)
Explores the ecological implications of New York City’s commercial expansion and global influence. Subjects will include physical infrastructure, parks, urban redevelopment, and trade. Students will choose part of the city to examine its environmental history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, ENST, ESEL, ESHC.

HIST 3994. Climate and Society. (4 Credits)
This is a course about climate change, understood geologically, anthropologically, and historically. It considers three broad kinds of climate change. First, we will consider the causes of ice ages, including the last glacial maximum. Second, we will look at the sudden cooling in global temperatures that took place between 1350 and 1850 known as the Little Ice Age. And third, we will study how the end of the last event coincided with a period of warming that has not ended. We will cover the causes and discovery of carbon-induced global warming. The course combines science, history, politics, and popular culture. Students will evaluate arguments and weigh evidence in order to become historians of these complicated events. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, ENST, ESEL, ESHC, HIGH, INST, ISIN.

HIST 3998. People and Other Animals in History. (4 Credits)
This upper level seminar explores the history of humans’ relationships with animals, especially in scientific or medical settings. Animals, while pre-eminently natural objects, are always understood in cultural contexts and cultures mark the boundaries between humans and non-human animals very differently. This course examines the number of ways that relationships between humans and non-human animals have been imagined and conducted over the past centuries. Contexts explored include hunting, domestication of livestock, commodity-exchange, specimen collecting, zoos, museums, pet-keeping, scientific laboratories, and children’s fiction. Themes include shifting ideas about animal intelligence and agency, humans’ moral and ethical obligations to animals, and limits on humans’ use of animals. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, ALC, ENST, ESEL, ESHC.

HIST 3999. Tutorial. (3 to 4 Credits)
Independent research and readings with supervision from a faculty member.
Attribute: AHC.

HIST 4000. History, Philosophy, and Law: Problems in Interpretation. (4 Credits)
This seminar explores constitutional interpretation from the different perspectives of history, philosophy, and law. The course will survey a variety of different scholarly approaches and examine a range of landmark Supreme Court decisions. The class will examine the different modalities of constitutional interpretation used by judges: text, history, structure, prudential arguments, and philosophical/ethical arguments. The readings will be drawn from leading historians, philosophers, legal theorists. The course will probe a variety of interpretive problems and issues at the intersection of these three disciplines. Should we treat the Constitution’s text as fixed or should we embrace the idea of a living Constitution? How do historians deal with the issue of Constitutional meaning? How have philosophers grappled with the same issues? How should we interpret the Constitution? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ICC.
HIST 4005. American Photography: History and Art. (4 Credits)
An interdisciplinary study of the history, art, and practice of photography. This course explores the place of photography in American history and culture. Students will study the renowned photographers and important types of photography, such as documentary and landscape. We will also practice photography - making pinhole cameras and learning the technical elements of picture taking. The class will include field trips and meeting with photographers and curators. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASAM, ASHS, HIAH, ICC.

HIST 4007. Medieval Autobiographies. (4 Credits)
Although writing about oneself is often considered classical or modern, and autobiography was not classified as a genre until the eighteenth century, a handful of medieval clerics, monks, mystics, nobles and merchants wrote about their own lives. These autobiographical accounts, and the conventions and societies that shaped them are the topic of the course. By asking both the questions of genre, narrative voice, subjectivity and authorship usually posed by literary analysis, and the historical questions of what such sources about past authors, audiences and the societies that read and copied the lives, the goal is to understand autobiography and the sources themselves from an interdisciplinary perspective. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HIMH, ICC, MVST.

HIST 4008. Race and Gender in the Old West. (4 Credits)
This course uses fiction and history in an interdisciplinary approach to explore the nineteenth-century American West. It incorporates race and gender as categories of analysis to examine how concepts of racial ideology and gender roles affect social, cultural, and economic spheres. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, HIAH, ICC, LALS, LAUH, PJGS, PJRC, PJST, PLUR, WGSS.

HIST 4009. Film, Fiction, and Power in the American Century. (4 Credits)
Visual and written representations of American power have influenced, challenged and even transformed U.S. relations in the world. With their capacity to reach millions, films and fiction do more than tell stories or entertain audiences. They also have the unparalleled means to shape values and beliefs, and to convey attitudes toward the nature and practice of American power. What sort of themes of international power did authors, screen-writers, and directors address in the twentieth century? What do these reflections on power reveal about American society, its politics, and its place in the world? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASAM, ASHS, HIAH, ICC.

HIST 4010. Genocide. (4 Credits)
We will investigate the major instances of modern genocide, including the Armenian, Rwandan and Cambodian cases, the Ukrainian famine, and the Holocaust. There is a comparative dimension to the course. What triggers genocide? How do modern cases compare to earlier ones? Why is rescue usually unforthcoming? How did the concept arise? How effective is punishment of perpetrators? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, INST.

HIST 4031. Rise of the American Suburb. (4 Credits)
An examination of the nineteenth century origins of the suburb as a counterpoint to the city and the role of nature in shaping the design of this new form of country living. The twentieth century transformation of the suburb into the American dream will be evaluated in light of the resultant sprawl and the policy critiques of this pattern of growth.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, ICC, URST.

HIST 4037. Seminar: History and Film. (4 Credits)
This senior seminar will examine the practical and theoretical issues of using film as historical evidence and presenting the past on screen. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASAM, ASHS, HIAH, ICC.

HIST 4048. Israel: History, Society, Politics and Culture. (4 Credits)
The course is composed of two parts; bi-weekly meetings during the semester followed by 10 days of study tour in Israel. This is an interactive seminar on Israel's history, society, politics and culture from a variety of interpretive orientations and disciplinary outlooks. We will study a multi-layered picture of Israeli culture through different voices genres and styles. Students will engage with contemporary cultural production and various representations of Israeli society, while focusing on the elements that make up Israeli identity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, HIGH, ICC, INST, ISME.

HIST 4057. Seminar: History and Film. (4 Credits)
This senior seminar will examine the practical and theoretical issues of using film as historical evidence and presenting the past on screen. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ICC.

Updated: 07-27-2020
HIST 4104. Food and Drink in Modern Society. (4 Credits)
Eating and drinking are basic human needs. But they are much more: they are also activities that in every culture and in every society, past and present, have been central to how individuals define themselves and interact with each other. During this interdisciplinary capstone seminar, we will use a variety of approaches to unravel the social meanings of food and drink, and of eating and drinking through time and space. During our meetings, we will study the history of specific foodstuffs and beverages, and we will examine how food and drinks have been consumed over time, not only in the home but also in public places. We will apply concepts, theories, and techniques developed in history, anthropology, sociology, literary studies, linguistics, philosophy, art history, and the sciences to "read," that is, to contextualize and interpret, texts, documents, and images. Throughout the course, students will have the opportunity to approach issues and texts from a number of different angles and from the perspective of various disciplines. By combining them, we will get a richer understanding of the place that food, beverages, eating, and drinking have occupied in our societies, and how it has changed over time. The final paper will allow students to put these insights into practice. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HIUL, ICC, INST, ISIN, LALS, LAUH.

HIST 4105. The Early Modern World: Art and Science. (4 Credits)
European exploration and interaction in the 16th and 17th centuries expanded the horizons not only of the Europeans but of the entire world. It was also the beginning of a truly global system of exchange involving peoples, products, money, and microbes that in turned transformed European art, philosophy, religion, and science. This interdisciplinary capstone will analyze the dizzying world of early modernity through consideration of the way its scientists, artists and religious thinkers understood their society and treated the materials of their disciplines. We will trace first the economic and human consequences of this newly global system, for Europeans and non-Europeans alike, and we will then explore questions proper to each discipline at the time, the changes they underwent, as the ways that new interactions and discoveries shocked and exploded ancient traditions and authority, and how the approaches of the period compare to contemporary methods in each area. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ICC.

HIST 4120. Imagining Empire. (4 Credits)
This course focuses on how the modern British Empire has been represented in literature, film and historical writing. We will confront our examination to western views or empire, both critical and enthusiastic. Many of our observers get the history of empire wrong, but they nevertheless engage in British attitudes to global domination, racial and cultural assumptions of superiority, law and authority, and the use of force. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, INST, ISEU.

HIST 4137. Hysteria, Sexuality, and the Unconscious. (4 Credits)
This interdisciplinary seminar is sponsored by the Department of English and the Department of History. The seminar explores issues raised by hysteria, sexuality and the unconscious in turn of the twentieth-century western culture-topics that cross disciplinary boundaries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, BIOE, COLI, ENGL, HIST, ICC, INST, ISEU, ISIN, WGSS.

HIST 4152. The Italian Renaissance. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HIEH, ICC.

HIST 4295. Confucianism in Three Keys: The History, Philosophy, and Politics of Confucianism. (4 Credits)
Confucianism has taken many forms over the millennia, but its core ideas of self-cultivation, the proper ordering of society, the role of the individual in the social order, and the relationship between humanity and the cosmos have not only shaped the underlying fabric of Chinese civilization, they have deeply influenced several neighboring East Asian societies as well. Now, after decades in disfavor, Confucianism is once again entering dialogues in modern global culture, but this time with lingering anxiety about what Confucianism actually is. With this in mind, this course will examine Confucianism from three main perspectives, the historical, the philosophical, and the political. It will also make broad use of interdisciplinary (and comparative) approaches from literature, religious studies, anthropology, and art history, so that Confucianism will not speak with a single voice, and our understanding will reflect the complexity of this evolving tradition. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HIEH, ICC.

HIST 4307. Senior Seminar: The Making of the British Isles 1450-1660. (4 Credits)
This course will examine the history of Great Britain and Ireland from England’s loss of its continental possessions in the mid-fifteenth century until the restoration in 1660 of Charles II as king of England, Scotland, and Ireland. Beginning in the late medieval period with an exploration of the English borders under the Tudors, the course will then chart the means by which the four nations of the British archipelago (English, Irish, Scots, and Welsh) were gradually brought into a multinational British state during the early modern period. Central to the course will be the historiographical debate surrounding the so-called ‘new British history’ and the difficulties associated with providing distinct but mutually dependent histories of four nations, rather than focusing on the uniqueness of each national unit.
Attributes: AHC, IRST.
HIST 4308. Antisemitism. (4 Credits)
The history of anti-Jewish hostilities and their various manifestations from antiquity to the present. An examination of the theological, social, political, economic, and mythical elements of the hatred. Close readings of antisemitic texts to acquaint students with the full repertoire of antisemitic tropes: Jews as agents of cosmic evil and murderers of God, children of the Devil and followers of the Antichrist, money manipulators and usurpers of other peoples’ possessions, political connivers and conspirators, sexual predators, social corrupters. A study of the encoding and transmission of these ideas and an exploration of their continued contemporary appeal. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, EP4, GLBL, HIGH, INST, ISEU, ISIN, JWST, MEST, MVST, PJRC, PJST, REST, VAL.

HIST 4435. Art of the Tudor Courts. (4 Credits)
This course coincides with the Metropolitan Museum of Art’s major exhibition of art at the Tudor courts. Focusing on the rich visual culture of the English court from 1485 to 1603, it investigates the power of art to support the dynastic claims of the Tudor dynasty. We will explore the intersection of art and politics during the reigns of Henry VIII and Elizabeth I. Classes will meet both on campus and at the museum. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHRB, HIEH, HIUL, ICC.
Prerequisites: ARHI 1101 or ARHI 1102 or ARHI 1103.

HIST 4510. Conquest, Conversion, Conscience. (4 Credits)
The Spanish conquest of the New World and the forced conversion of its indigenous peoples were justified as rescuing indigenous peoples from the tyranny of their own sinfulness of cannibalism and bestiality. However, those same policies of conquest and conversion were also subject to intense scrutiny on moral and ethical grounds by Spaniards. In this course we will closely examine a series of case studies and the philosophical and ethical debates they gave rise to. To understand the echoes of such debates and moral claims in the contemporary world we will look at recent debates over the doctrine of just war and cultural/religious practices of indigenous people today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, EP4, GLBL, HIGH, INST, ISEU, ISIN, LALS, LAUH, VAL.

HIST 4557. Seminar: The Third Reich. (4 Credits)
Examines the origins of the Nazi Dictatorship, considering the tensions within Germany that led to the collapse of liberal democracy. In addition, the course examines the culture and politics of the Third Reich. Emphasis will be on the interaction of race and imperialism. Other topics explored will include the police state, state-party relations, and welfare policies. Students will be expected to participate in weekly discussions as well as write both a short paper for class discussion and a longer, research paper. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, INST, IPE, ISEU.

HIST 4558. Seminar: Modern European City. (4 Credits)
This seminar examines issues in European urban history and the development of the city during the 19th and 20th centuries. It focuses on the process of urbanization and modernization that shifted Europe from a rural to an urban society, and considers the impact of the city, its economy, its culture, and its daily life. Topics include social reform, the boulevard builders, the world’s fairs, utopian planning and modernism, totalitarian visions, and mass culture, among others. The focus will be on European capital cities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH, INST, URST.

HIST 4571. Seminar: Technology and Society. (4 Credits)
In this course, we will try and understand the critical relationship between technology and society in the modern era, with a focus on 19th and 20th century America. Our goal is to go beyond descriptions of material objects and investigate the role of technology and its cultural markers (such as ‘progress’) in broad social, political, cultural, and economic contexts. We will study a wide range of technological systems (such as the telegraph, the telephone, and the Internet), consumer technologies (household appliances, the birth control pill), and ‘Big Science’ (such as the atomic bomb) with a goal to discerning how technology and society have shaped each other in the modern world.
Attributes: AHC, HIAH.

HIST 4591. Seminar: Race, Sex, and Colonialism. (4 Credits)
In this Senior Values seminar, we will analyze the similarities and differences that characterize histories of interracial sexual relations in different political, social, economic, and legal contexts. We will focus on historical works that deal with interracial sexual relations in areas as diverse as colonial Zimbabwe, Haiti, Indonesia, and the U.S.A. Close attention will be paid to the methodological approaches our authors take and to the theoretical insights we can draw from our diverse case studies to help us better discern the common and singular threads running through this expansive field of inquiry. Case studies will be accompanied by foundational theoretical readings on race, colonialism, and sexuality. Weekly class presentations and revision writing will be a fundamental part of achieving eloquence in speaking and writing during the course of the semester. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AHC, AMST, APPI, ASHS, EP4, GLBL, HIGH, LALS, LAUH, VAL, WGSS.
HIST 4610. Seminar: Jewish Society and Culture in Eastern Europe. (4 Credits)
Our understanding of the life of east European Jews has been dominated by the Hollywood and Broadway blockbuster 'Fiddler on the Roof.' The 'shtetl,' a small insular town where Jews were said to have lived, has been the paradigm of east European Jewish experiences. But the powerful imagery of the 'shtetl' is largely a creation of 19th-century writers. This is a course that will take us beyond the popular stereotypes, and will look at the history the Jews in eastern Europe from the initial settlement of the Jews there until the eve of modernity. We will examine how - beyond popular culture - historians and writers have shaped our understanding of Jewish history in that region, and how the persisting imagery of eastern European Jews was created. Why were certain stories told? What can different historical sources show us about Jewish life in Eastern Europe? We will discuss how Jewish history in eastern Europe was studied by historians, and couple the narratives created by scholars with historical sources: privilege charters, crime records, rabbinic responsa, anti-Jewish literature, and others. We will try to probe the relation between history, historical sources, and historical writings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, JSPM, JWST.

HIST 4631. Seminar: US in the Mid East: 1945-Pres. (4 Credits)
The seminar will examine how the United States replaced Great Britain as the preeminent power in the Middle East in the post-World War II era. We will study the conduct of the cold war in the Middle East, analyze American involvement in the Israeli-Arab conflict, examine the tensions arising from American dependence on foreign oil, and consider the conflict between American culture and the rise of Moslem fundamentalism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AMST, ASHS, HHPA, HUST, INST, ISME, JWST, MEST.

HIST 4635. Seminar: Screening the Past. (4 Credits)
Through the writings of historians, filmmakers, film scholars and our viewing of selected films we will explore the increasingly busy intersection where the paths of historians, film scholars, and filmmakers - not to mention the wider public - meet. It is a selective introduction to the theory and practice, promise and danger, of cinematic history. We will focus on films about history, analyzed as both secondary 'histories' and 'texts' whose content, production, and reception are primary sources for an understanding of our culture and its historical/screen memory. We will explore how the different methodologies and emphases of history and film studies can inform each other and generate historical film criticism in class discussion, short essays, and a major research paper. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: AHC.

HIST 4654. Medieval London. (4 Credits)
This course draws on material and documentary sources to explore the townscape of medieval London-its wards, streets, and buildings- and the social life of its people, including their daily routines, work, and rituals. We will examine such documentary sources as chronicles, charters, and wills, along with material evidence from human skeletons, excavation houses and churches, coins, pottery and clothing. This also contains a digital humanities component; students will be responsible for an online project to create illustrated reports and medieval objects and sites in London. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: HIMH, HIUL, ICC, MVST.

HIST 4657. Seminar: New York City History. (4 Credits)
Advanced readings and research in the history of New York City, 1621-2016. Topics for common reading and discussion might include the politics and culture of the city, the rise of the urban infrastructure and distinct neighborhoods, the city's changing population, etc. Students will produce and present a research paper on a topic of their own choosing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, AMST, ASHS, IRST.

HIST 4705. Seminar: Disease in the Middle Ages. (4 Credits)
This senior seminar course provides a platform for readings, discussion, essay-writing, and oral presentations for juniors and seniors interested in the cultural, medical, normative, and spiritual responses to disease and health issues in the West from 500-1500 AD. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, BEHR, BIOE, HIMH, MVST.

HIST 4710. Seminar: Early Modern British Empire. (4 Credits)
This seminar considers the rise and fall of Britain's “first empire” and the transition to its second, roughly covering the period from 1485 to 1830. Special attention will be paid to the political, economic, and cultural impact of empire on Britain itself as well as effects of and resistance to British dominion in India, Ireland, and America. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, IRST.
HIST 4711. Seminar: Post-WWII Britain. (4 Credits)
This course will offer a close examination of the history of postwar Britain. Through course readings and intensive discussion, we will consider how WWII and its aftermath changed British society; how processes of decolonization remade the British metropole; how a social democratic consensus was built and then dismantled; how people of color forged cultural institutions and social movements in the face of persistent white hostility; how conventions around gender, sexuality, and family life evolved; how the troubles in Northern Ireland unfolded; and how constitutional questions, including those concerning national sovereignty, fractured British political life. In addition to coming to terms with these historical processes, we will also work to understand how these processes interacted with the study of history in postwar Britain. We will explore how contemporary political conundrums affected the sorts of research questions British historians were asking; how history curricula in British public schools evolved; and how everyday people found new ways to relate to and learn about the past. By combining history and historiography in these ways, this course will help students think carefully about how the study of history is bound up with contentious and contingent historical processes. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIEH.

HIST 4715. Oil and Power in the American Century. (4 Credits)
This Senior Seminar will examine the historical evolution of the crucial link between oil, diplomacy, and national security in the twentieth century. Students will discuss the role of oil consumption in modern life, the guiding principles of the foreign oil policies of the United States in Latin America and the Middle East, and the social, political, and economic structures related to the production and consumption of oil. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST.

HIST 4725. Seminar: Global Histories and Stories. (4 Credits)
How do we know about the lives of people who left no records of their own? Can a work of fiction or a person's memory be a source of history? How do history, travel, and narrative connect the lives of an 11th century merchant and a modern-day traveler? These are some of the questions this senior seminar will explore through examples from around the world, from the streets of Cairo to the trans-Atlantic slave trade, biographies, film, novels, oral histories from perpetrators and survivors of state terror, and students’ own family histories, among others. Every week we will explore different world regions and methodologies, and students will simultaneously create original projects over the course of the semester. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHC.

HIST 4726. Seminar: Questions of Global Capitalism. (4 Credits)
Since its foundations, the modern ideas and institutions that we call “capitalism” have posed a range of ethical and political questions: What is the meaning of freedom? What is the point of work? How should humans think about and value non-human nature? Is perpetual social and economic inequality a problem? In this seminar, we explore these questions through the writings of political theorists and the stories of people from various world regions, from Asia to the Americas, since the eighteenth century. Possible topics include slavery, contract labor, consumerism, debt, climate change, the meat industry, and the growth of government.
Attributes: AHC, INST, ISIN.

HIST 4727. Seminar: Economic Life and British Colonialism. (4 Credits)
This course examines the history of capitalism from the particular vantage point of Britain’s colonies, from the 17th to 20th centuries. We focus in particular on economic life in three world regions that represent different forms and moments of British colonialism: the Americas, South Asia, and the Middle East. Our objective is to understand the varieties of both capitalism and colonialism, and how these two “isms” were historically connected. We ask, among other questions: how did capitalism accommodate or challenge the diverse cultural and social practices found in the British colonial world? Possible topics include trade in settler colonial North America, caste and labor in colonial India, land in British-mandate Palestine, and time-consciousness in the veiled protectorate of Egypt. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIGH.

HIST 4748. Seminar: The Worlds of the Enlightenment. (4 Credits)
This senior seminar focuses on the developments that transformed Europe during the Age of Enlightenment in the eighteenth century and ushered in the modern era. We will approach the period from a variety of angles to uncover how transformations in the realm of ideas, culture, politics, society, commerce, and communications shaped new worlds, not only in Europe but also globally. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHC.

HIST 4758. Seminar: Europe: Prosperity to Crisis. (4 Credits)
This seminar concerns the important themes in European history since 1945: the social-democratic consensus and the glorious thirty years of economic growth; the cold war; the loss of empire and the emergence of multiculturalism; the social and cultural revolution of the 1960’s; the communist empire, its collapse and the aftermath. We will also focus on the historical roots of the multiple crisis which faces contemporary Europe, involving the challenge of massive emergency immigration, the development of radical-right parties, the appearance of anti-democratic governments in some post-communist states, economic stagnation, and the instability of the Euro. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISEU.
HIST 4760. Seminar: Immigration to the U.S. (4 Credits)
This course examines important development in American immigration. It focuses on major migratory waves and on the reception immigrants have received. Coverage includes Chinese, Irish, Italian, Jewish and Mexican immigrants, among other possibilities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AHC, AMST, ASHS, LALS, LAUH.

HIST 4767. Seminar: Torture and the Western Experience. (4 Credits)
Torture and physical coercion have been elements of European judicial and disciplinary systems since the time of ancient Greece. This research and writing seminar will trace the history of torture in western societies until the present, the controversies surrounding its use, its significance for western understanding of the self and the body, and its implications for modern European and American culture and life. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPi, ASHS, IPE, PJST, PJWT.

HIST 4768. Seminar: Gender, Sex and Society in the Early U.S. (4 Credits)
This course explores western ideas about men’s and women’s bodies, sexuality, and reproduction spanning the 1600s-1800s. Topics include marital relations, historical views of gender and the body, conceptions of sexually transmitted disease, and debates about men’s and women’s roles as midwives. Content will revolve primarily around the United States and also around the larger British Atlantic World, including Britain itself. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AHC, ASHS, WGSS.

HIST 4771. Seminar: In Search of the Founders’ Constitution. (4 Credits)
Americans venerate the Constitution, but there is surprisingly little agreement over what the Constitution means and how it should be interpreted. These disagreements are as old as the Constitution itself. This course surveys the origins of the Constitution, including its relationship to English common law, natural rights theory, and enlightenment political theory. It will also examine the struggle over the Constitution and the battle between Federalists and Anti-Federalists, as well as the early battles between Jefferson and Hamilton. Finally, we will look at several modern constitutional controversies, such as gun control, federalism, and the role of religion in public life. For instance: What do the Founding Generation’s debates over these issues reveal about today’s debates? Should we seek to interpret the Constitution according to its original meaning or would the Founders have disavowed such an inquiry and embraced a more dynamic living constitutional model? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, APPi, ASHS.

HIST 4772. Seminar: Colonial Latin America. (4 Credits)
This seminar focuses on the colonial period of Latin American history from the late 15th to the early 19th centuries. Topics may include (among others): the arrival of European explorers, conquistadors, and missionaries; their incursions into Indian land and indigenous practices; the exploitation of Indians and Africans; conversion efforts and forms of resistance; racial and gender hierarchies; criollo prerogatives; and the development of regional and national identities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIGH, LALS, LAUH.

HIST 4860. Seminar: 1970’S: Revolutionary Decade. (4 Credits)
While the 1960s have been viewed as a decade of change in the U.S., the 1970s may well have been more revolutionary. Often dismissed as the inward-turning ‘Me Decade,’ the 1970s witnessed dramatic social, economic, and political changes. This seminar examines closely the decade’s swirling currents: Watergate’s effects, Vietnam’s end, the extended Civil Rights Movements (feminism, Chicano, Asian-American, & Native American rights), the white ethnic revival, environmentalism’s surge, the oil crisis and the end of America’s era of affluence, and the rise of conservatism. We will study a wide range of materials from the decade—such as the Pentagon Papers, the environmental novel Ecotopia, films like The Godfather and StarWars, Jimmy Carter’s epic ‘Crisis of Confidence’ speech, and the Eagles’ 1976 hit ‘Hotel California.’ Students will be required to complete a research paper, employing primary sources, on some aspect of the decade. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AHC, AMST, ASHS.

HIST 4900. Seminar: Transnational Lives. (4 Credits)
This course explores creative history writing on the diverse lives and experiences of people during the colonial encounter. We will read a range of non-fiction sources, including biographies, autobiographies, and creative writings that offer a new way of understanding the past. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHC.

HIST 4905. Seminar: History of Food. (4 Credits)
Topics to be discussed: food as a driving force of history; history of specific foods; rituals of eating; food fashions; food as an aspect of national identity. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIST, HIUL, LALS, LAUH.

HIST 4910. Seminar: Genocide. (4 Credits)
We will investigate the major instances of modern genocide, including the Armenian, Rwandan and Cambodian cases, the Ukrainian famine, and the holocaust. There is a comparative dimension to the course. What triggers genocide? How do modern cases compare to earlier ones? Why is rescue usually unforthcoming? How did the concept arise? How effective is punishment of perpetrators?.
HIST 4913. Social Darwinism: Theme and Variations in Global Context. (4 Credits)

Ever since Charles Darwin published his theory of biological evolution through natural selection, people have tried to borrow the scientific cache of his ideas and apply them to the development and administration of human societies. This course will look at the adaption and cultural impact of what later critics would call 'Social Darwinism' in global context, with a particular emphasis on England, the U.S., and Asia. Topics will include pre-Darwinian concepts of social development, popularization of scientific thinking, competing interpretations of evolutionary thought and social welfare, global circulations of ideas in the 19th and 20th c. political implications of 'fitness', and resistance to Social Darwinism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, ASHS, BEHR.

HIST 4933. Seminar: Cold War Science and Technology. (4 Credits)

Science and technology played a crucial role in shaping the Cold War across the globe. In this course, we will begin with the development of the atomic bomb and discuss the nuclear arms race and the popular culture of nuclear anxiety as embodied in film and literature. Other topics include the space race, the development of the internet, the origins of modern environmentalism, the rise of the military-industrial complex, and 'everyday technologies' such as the birth control pill and mass media. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, APPI, ASHS, INST, ISIN.

HIST 4934. Seminar: Soviet Society under Stalin. (4 Credits)

This seminar will explore the enormous transformations in life in the Soviet Union under the rule of Joseph Stalin, one of the most brutal dictators of the 20th century and the architect of a massive social transformation that turned Russia from a predominantly agrarian nation into a powerful industrial state. We will take a broader perspective on this history by looking at the roots of Stalinist rule in the Russian Revolution and follow that story to the dismantling of the Stalinist system in the 1950s. During this period, Soviet society was engulfed in a series of massive traumas, including a brutal civil war, heavy industrialization, collectivization of farmland, widespread upward social mobility, the establishment of a labor camp system, the Great Terror in the late 1930s, the horrific experience of World War II, and postwar reconstruction. We will explore each of these phenomena in detail with a broad interest in underlying social, political, and cultural contexts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: AHC.

HIST 4954. Seminar: Law and Empire Iberian Atlantic. (4 Credits)

This course explores the centrality of legal practices in Spain and its American Empire from 15th to 19th centuries. Topics may include: legal cultures in early modern Spain and the Americas; debates over legality of the conquest; how indigenous people used law to their advantage; and legal questions of ethnicity and honor as related to marriage. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AHC, AMST, ASHS, GLBL, LALS.

HIST 4998. Study Tour: Medieval Spain. (4 Credits)

One of the great medieval pilgrimage routes, the Camino de Santiago crosses northern Spain from the passes of the Pyrenees to Santiago de Compostela. This study-tour will consider the legends of the Camino, some of its many surviving monuments, and the modern revival of the pilgrimage by walking for two weeks with the peregrinos/as from Leon to Santiago de Compostela. This class will meet periodically at Fordham before the walk to discuss reading assignments and prepare. A journal is required at the end of the course. Fees and travel costs not included. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ICC, LALS, LAUH, MVST.

HIST 4999. Tutorial. (1 to 5 Credits)

Supervised individual projects in historical research. (Every semester.) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: AHC.

HIST 5100. Disasters, Planning and Prediction in Global History. (4 Credits)

By considering disasters and the regimes of planning and prediction that have been used to prevent and manage them, this course examines the historical interplay between modes of human agency and the perceived “push back” of the phenomenal world. We will also explore how understandings of disasters and control have shaped historical narratives. Students will engage environmental history, urban history, religious studies, the history of science and technology, and material culture. Topics will cover a wide range of geographic areas from the early modern to contemporary periods. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5102. Archives and Narratives of Global History. (4 Credits)

This course investigates the relationship between global history and particular forms of knowledge production. We will discuss classic and cutting-edge scholarship on the archives and how scholars have grappled with its possibilities and limitations. We will also consider how different ways of narrating history can attend to the silences and revelations of our sources. The interdisciplinary group of authors whose work we will discuss may include Shahid Amin, Natalie Zemon Davis, Brent Edwards, Saitiya Hartman, Lisa Lowe, Carina Ray, Ann Laura Stoler, and Zeb Tortorici. Students will also create their own research projects over the course of the semester.

Attribute: MVSG.

HIST 5105. The Black Radical Tradition in Comparative Perspective: U.S. and the Caribbean. (4 Credits)

This course explores the long history of black radicalism through a comparison of the United States and the Caribbean as centers of revolutionary movements that engaged problems of democracy, racism and citizenship in the global black diaspora.

Attributes: CEED, CENS.
HIST 5200. Renaissance Spain: Festive Republics, Rights, Liberties and Inquisitions. (4 Credits)
Renaissance era Christians in Castile, the great central region of the Iberian Peninsula that forms the core of modern Spain, were guaranteed their rights and liberties as citizens of city-republics through written charters. These city-republics sent delegates to the Cortes, the representative assembly that consulted with the King. Collective life in the cities, whether confraternities celebrating their saints, or open town council meetings of all citizens, created the corpus mysticum of the commonwealth that for Spaniards was the city. This seminar examines urbanism, collective public life, and the growth of the modern state in Renaissance Spain through topics such as: the influence of Islam on Iberian cities, conflict between cities and crown, confraternities and saints’ celebrations, public welfare, the creation of the archive, and religious minorities and the inquisition.

HIST 5201. The Renaissance of the Twelfth Century. (4 Credits)
This seminar will explore the history and historiography of one of medieval Europe’s most intellectually fertile and creative period, the so-called renaissance of the twelfth century. Particular attention will be given to the historical construction of this period and how it was changed, and continues to change, amid the discovery and editing of new texts, more nuanced categories of historical analysis, and new advances in interdisciplinary research. Students will be expected to give presentations on both primary and secondary sources over the course of the semester. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5202. Medieval Interfaith Relations. (4 Credits)
Interfaith relations are today a valuable and potentially urgent category of historical analysis. This seminar explores relations among Christians, Muslims, and Jews across Europe and the Mediterranean from early medieval papal policy to rise of the Ottoman Turks, with a particular focus on religion, intellectual, and cultural instances of interfaith conflict and coexistence. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5203. Medieval Hagiography. (4 Credits)
This research seminar introduces students to the challenges and pitfalls of using saints’ lives and other hagiographical writings (miracula, furta sacra, etc.) as sources for medieval history. It aims to familiarize students with competing historical approaches to these genres and to provide a practical guide to the scholarly resources necessary to exploit them as historical sources. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5204. Medieval Environmental History. (4 Credits)
This seminar is intended to familiarize graduate students with current themes and trends in medieval environmental history. Weekly reading assignments comprise historical monographs and scholarly articles in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5290. Luther and Reformation. (4 Credits)
October 31, 2017 marks the 500th anniversary of one of the great cultural movements that shook the History of the world: the release of Martin Luther’s Ninety-Five Theses. Luther disturbed the political, social, and religious structures of Western Europe. Until his death in 1546, he challenged the papacy, the Catholic Church, the Holy Roman Empire, and Henry VIII. The Reformation he began both inspired and outraged. It represented the triumph of technology through the printing press. After Luther, nothing was exactly the same ever again. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5300. History Theory and Methods: The Historian’s Tools. (4 Credits)
This course will introduce students to a range of intellectual traditions informing historical analysis and writing. Students will study major social thinkers and how historians have grappled with the implications of their ideas. The course aims to develop essential skills as professional readers, analysts researchers and writers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5310. Occitania: Language and Power. (4 Credits)
This team-taught interdisciplinary course introduces students to the cultural world of a medieval ‘south’: Occitania, a region defined by language stretching from the foothills of the Alps to the pathways across the Pyrenees and from the Mediterranean almost to the Loire. Students will study the Old Occitan language and its manifestations in documentary writing, historical narrative, and the poetry of the troubadours from the eleventh until the thirteenth centuries. In order to best understand the context for this literature, course topics will include urban and rural communities, gender and power, the Albigensian crusade and its aftermath, and the beginning of vernacular book production.

HIST 5400. Gender and History. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5405. Modern Ireland 1690-1923. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5410. Race and Gender in Modern America. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5411. Gender and Sexuality in Early America. (4 Credits)
Readings in the history of gender and sexuality discourse in Early America and the British Atlantic world of the 17th and 18th centuries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5420. Sin, Crime and Sex in History. (4 Credits)
Sin and forgiveness were at the heart of the Christian message. In European tradition, sin and crime were closely related. This course examines the history of sin and crime from ancient Christianity to the present, focusing on the rise of sexual delicts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
HIST 5421. Religion and the Renaissance World. (4 Credits)
Early modern societies around the globe defined themselves in relation
to religious beliefs and exercises. This seminar will focus on the nature
of 'religion' itself in the eyes of early moderns, particularly Europeans,
as well as on the faiths and rituals that defined and separated cultures and
peoples. The seminar will concentrate primarily on the three dominant
religions of the European world (Christianity, Islam, and Judaism). At the
same time, we will be constantly aware of one significant and distinctive
feature of early modernity: the frequently hostile and always bewildering
encounter of different, even unknown, religions during the course of
exploration, settlement, and conquest stretching from Rome to Jerusalem
to Tenochtitlan to Beijing and back.

HIST 5472. Inventing Total War. (4 Credits)
The course will explore the development of total war in the 20th century,
with particular emphasis on Germany. The dissolution of legal limits on
violence and compulsion on the battlefield and at home will be examined.

HIST 5506. European Nationalisms and Early Modern (Jewish) History. (4
Credits)
Modern historiography, including Jewish historiography, and history as
an academic discipline are products of modern national movements.
The narratives they produced provided tools for shaping national and
ethnic identities in the modern era, and had long lasting ramifications
not only for the study of history but also for the inclusion or exclusion of
specific groups in modern European societies. This course will explore
how the writing of history has been linked to the larger questions of
national identity, and nationalism, and to questions of political inclusion
and exclusions. We will read the early Jewish historians from Germany,
Poland, and Palestine/Israel and explore how their visions of premodern
Jewish history were shaped by larger questions that were also occupying
other European historians and intellectuals. Four-credit courses that
meet for 150 minutes per week require three additional hours of class
preparation per week on the part of the student in lieu of an additional
hour of formal instruction.

HIST 5516. Nationalisms and Racisms in Modern Europe. (4
Credits)
The seminar will focus on the history and historiography on the
construction of 'race' and nation in modern Europe (from the
Enlightenment onwards) and in particular on the multiple connections
and intersections between nationalism(s) and racism(s). As issues of
cultural identity and questions of immigration and national belonging
have become hotly contested in today’s European societies, the
historiography on these subjects has been steadily growing. We will
discuss different historical approaches, theories, and methodologies that
emerge from the growing body of works addressing these issues and pay
particular attention to socio-cultural histories and to transnational and
comparative perspectives. Four-credit courses that meet for 150 minutes
per week require three additional hours of class preparation per week on
the part of the student in lieu of an additional hour of formal instruction.

HIST 5517. Fascism. (4 Credits)
Study and investigation of fascism as intellectual and political movement
in 20th Century Europe.

HIST 5520. European Mass Culture. (4 Credits)
Examines cultural development in Europe in the 19th and 20th century
with special reference to mass cultural characteristics, role of technology,
and political content.

HIST 5533. Book History: Texts, Media and Communications. (4 Credits)
This course examines themes, topics and methods in the history of the
book. Book history is defined broadly to encompass the history of media
and communication in general, as well as textual analysis. Topics may
range across time periods, from the Middle Ages to the present day, and
across continents. Four-credit courses that meet for 150 minutes per
week require three additional hours of class preparation per week on
the part of the student in lieu of an additional hour of formal instruction.

HIST 5553. Book History: Texts, Media and Communications. (4 Credits)
This course examines themes, topics and methods in the history of the
book. Book history is defined broadly to encompass the history of media
and communication in general, as well as textual analysis. Topics may
range across time periods, from the Middle Ages to the present day, and
across continents. Four-credit courses that meet for 150 minutes per
week require three additional hours of class preparation per week on
the part of the student in lieu of an additional hour of formal instruction.

HIST 5554. U.S. Foreign Relations. (4 Credits)
This graduate reading course covers the history and historiography
of U.S. foreign relations from 1898 to the present. Topics include
Open Dorr imperialism, the First and Second World Wars, the Cold War,
decolonization, the Vietnam War, and the War on Terror. Students will
situate the United States, its domestic cultures, and its foreign policies
to different regions, in a global perspective. In addition, students will
study the economic, social, intellectual, political, and moral bases of U.S.
foreign relations. Note: Four-credit courses that meet for 150 minutes per
week require three additional hours of class preparation per week on
the part of the student in lieu of an additional hour of formal instruction.

HIST 5556. History of Modern Science in Global Context. (4 Credits)
Science is often understood as a hallmark of both modernity and
'Western' culture, but neither its methods nor its contents make sense
without a more expansive approach to both time and space. By examining
both the changing form and production of natural knowledge and the
shifting uses and meanings of 'science' as a category, this course will
problematize conventional understandings of modernity, objectivity, and
progress and raise challenging questions about historical approaches to
period, geography, causation, and exchange.

HIST 5563. Readings in Environmental History. (4 Credits)
A reading course for graduate students on environmental history. This
course will introduce students to the most important scholarship in
environmental history, both recent works and those that shaped the field
in the last century. It is primarily an Atlantic course but will also offer
readings related to East Asia, India, and the Middle East. Four-credit
courses that meet for 150 minutes per week require three additional
hours of class preparation per week on the part of the student in lieu of
an additional hour of formal instruction.

HIST 5566. Technology and Empire. (4 Credits)
This course, 'Science, Technology, and Imperialism,' will explore the
crucial relationship between science and imperialism, with a particular
focus on European imperial expansion from the eighteenth to the
twentieth centuries. Students will use a wide variety of primary and
secondary texts to raise and reframe fundamental questions about the
role of science and technology as 'tools of empire'. For example, the
course will explore how the equation of European science and technology
with 'progress' depended to a large degree on European perceptions
of the colonized. Using multiple viewpoints from Europe, Africa, and
India, the course will provide a fresh and unique view on the history of
Imperialism that will locate science and technology as fundamental to
understanding such contested concepts as conquest, progress, and
modernity. Four-credit courses that meet for 150 minutes per week
require three additional hours of class preparation per week on the part of
the student in lieu of an additional hour of formal instruction.

HIST 5568. Stalinism: Life and Death in Soviet Russia. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three
additional hours of class preparation per week on the part of the student
in lieu of an additional hour of formal instruction.

HIST 5574. U.S. Foreign Relations. (4 Credits)
This graduate reading course covers the history and historiography
of U.S. foreign relations from 1898 to the present. Topics include
Open Dorr imperialism, the First and Second World Wars, the Cold War,
decolonization, the Vietnam War, and the War on Terror. Students will
situate the United States, its domestic cultures, and its foreign policies
to different regions, in a global perspective. In addition, students will
study the economic, social, intellectual, political, and moral bases of U.S.
foreign relations. Note: Four-credit courses that meet for 150 minutes per
week require three additional hours of class preparation per week on
the part of the student in lieu of an additional hour of formal instruction.
HIST 5575. The United States and the World in the Twentieth Century. (4 Credits)
This course examines U.S. foreign relations over the course of the twentieth century, with an emphasis on the myriad ways in which peoples, cultures, economies, national governments, non-state organizations, and international institutions interact. Key themes include American foreign policy, capitalism and economic policy, cultural relations, domestic politics, and perceptions of the world. The course will proceed chronologically and will examine major moments and trends: modern warfare, the Great Depression, the origins and trajectory of the Cold War, the nuclear arms race, decolonization and U.S.-Third World relations, the Vietnam War, and America’s wars in the Middle East. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5644. Writing Early America: Historians Who Have Shaped the Discipline. (4 Credits)
This course will include the most significant works in early American history and culture written during the last fifty years. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5645. Readings in Early America and the Atlantic World. (4 Credits)
This graduate readings course will provide students with an introduction to the historiography of early America from contact through the era of revolutions. Major themes include the contesting and connecting of geographical areas across the continent, the everyday experiences of work across lines of race, class, and gender, and the rise and fall of colonial and Atlantic empires. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5725. History of American Cities. (4 Credits)
Readings in US urban history. Topics that may be covered include the growth and development of American cities, their people and diverse communities, urban politics, the urban crisis of the late twentieth century, ideas about what makes for a good city, and the economic, cultural, political, and social role of cities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5727. History and Fiction in the American West. (4 Credits)
This course uses history and literature to study the moving western frontier in the United States. Readings explore its early origins in the 17th and 18th centuries but focus largely on its most iconic manifestations in the 19th century. The course examine race, gender, violence, and social order, among other topics.

HIST 5730. History of Capitalism. (4 Credits)
A graduate seminar, open to advanced undergraduates, that considers the historical narratives, major thinker, and controversies between seventeenth and twenty-first centuries having to with capitalism as an economic system and a set of social relations. Works by Thomas Robert Malthus, Adam Smith, Karl Marx, Karl Polanyi, Fernand Braudel, among others. Students will produce two essays, one comparing Smith and Marx, and other on a historical topic. Class meetings will emphasize student argument and vigorous conversation and will include a weekly lecture by the instructor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5731. History of Wealth & Poverty: U.S. and Comparative. (4 Credits)
Americans have long debated the meaning of wealth and poverty, questioning whether such conditions are natural (and acceptable), or the product of exploitative practices, corruption, or biased governmental policy (and potentially alterable). Over time they have questioned the relationships among economic inequality, free markets, democracy, thriving families and communities, and the welfare state. We will explore these and other questions focusing on the U.S. since 1865 but with substantial comparisons to Europe, Africa, and Latin America. The class takes an intersectional perspective that brings questions of race and gender, as well as social class, to bear on the topic. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5733. The Country and the City in American History. (4 Credits)
This course explores the history of the country and the city as natural environments and symbolic landscapes through the works of historians, artists, and poets. It covers the period from the Revolution through the twentieth century, with special attention to the nineteenth century. Topics include Appalachia, slavery, and sharecropping; Lewis Mumford and Jane Jacobs; romantic landscape painting and Central Park. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5734. U.S. Culture and Society to 1877. (4 Credits)
This course examines American culture and society through important scholarly works in the field. It is designed to provide an introduction to major historical debates and the methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in American history. Topics to be covered include the role of social institutions and the significance of class, gender, culture and race, particularly in connection to colonial life, the revolutionary period, the early republic, the Civil War, and Reconstruction.

HIST 5910. Law and Empire in the Iberian World. (4 Credits)
Law and Empire in the Iberian World explores the centrality of legal practices in the expansion of the Iberian Empire, a legal culture which produced the world’s largest trove of archival documents. Topics will include the legal cultures in early modern Spain and the Americas; the debate over just war and the legality of conquest; how indigenous peoples were legally incorporated into Spanish crown, and how they used law to their advantage (including establishing legally found towns, litigation with the Spanish court system, use of wills and other legal documents); legal questions of honor and ethnicity as related to marriage and office holdings; the legal relationship between the American Viceroyalties and the crown of Castile; and place of role of law and litigation in creating civil society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5913. Golden Age Spain & Amer. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: LALS.
HIST 5918. After Colonialism: Latin America. (4 Credits)
This course focuses on the 19th and 20th centuries. The course is designed to provide an introduction to major historical debates and methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in Latin American History. Readings include primary sources in translation as well as key studies of the era. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5919. United States and Latin American Borderlands. (4 Credits)
This course explores the concept of the borderlands in United States and Latin America history. It uses various categories of analysis, such as race, gender, and hegemony, to discuss the interaction among groups of people as they meet along political and geographic borders. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5920. United States and Latin American Borderlands. (4 Credits)
This course explores the concept of the borderlands in United States and Latin American history. It uses various categories of analysis, such as race, gender and hegemony, to discuss the interaction among groups of people as they meet along political and geographic borders. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5921. Social Mvts Global Pers. (4 Credits)
This course examines social movements in the twentieth century. It focuses on events in Latin American, Europe, and the United States, among other regions. It allows students to assess the advantages and limitations using a global approach to historical analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5923. Atlantic World: Empires, Diasporas, and Migrations. (4 Credits)
Introduces students to themes and methods of Atlantic World History, 16-20th centuries. Possible themes include: The making of Iberian, English and French Empires; Indigenous, African, and European encounters; Atlantic Legal Cultures; the Slave Trade; Slavery, and Emancipation; the African Diaspora; Religion; Gender and Sexuality; Race relations; Migration. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 5924. Latin American History and Culture. (3 Credits)
This course provides a general survey of Latin American history and culture from the pre-colonial period to the present. It introduces graduate students to major topics, such as conquest and colonization, colonial institutions, racial and gender practices, slavery and Indian labor, the development of regional and national identities, independence movements, nation building and the rise of caudillos, foreign interventions, twentieth-century revolutions and social and political movements, among others.

HIST 5925. Global Migrations. (3 Credits)
This course uses a global approach to examine major migratory movements since the 15th century, particularly since the mid-19th century. It analyzes factors that caused such emigrations and the conditions that led specific groups to certain geographic areas. It also studies the experiences of migratory groups as they arrived and adapted to their new homelands. It includes migrations from several areas of the world, primarily, but not exclusively, involving Europe and the United States.

HIST 5961. The Age of Suleyman 1453-1574. (4 Credits)
The course aims to introduce the students to various aspects of social, political, cultural and intellectual history of the Ottoman Empire in the late 15th and 16th centuries. By focusing on the multifaceted and multidirectional nature of interaction across political, religious, cultural and linguistic boundaries between the Islamic and Christian worlds in late medieval and early modern period, the course will delineate the Ottoman state and empire formation within the theoretical and historiographical framework of the early modern Mediterranean. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6076. Noble Culture and Society. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 6077. The Angevin Empire. (4 Credits)
From the Middle of the twelfth until the first quarter of the thirteenth centuries, one dynasty, the house of Anjou, were the effective rulers of an enormous agglomeration of kingdoms and principalities which stretched from the North Sea to the Mediterranean and encompassed England, large parts of Ireland, Wales, and nearly half of the territory which today constitutes modern France. Follow ing a wave of renewed scholarly interest in the politics and culture of this period, this class will explore this short-lived but powerful empire, its lands, peoples and rulers. Together we will explore the lives of dynamic individuals within the Angevin court; Angevin court culture, the governance of a medieval 'empire'; dynastic politics and diplomacy; the Third Crusade; and England and France after the loss of Normandy.
Attributes: MVSG, MVST.

HIST 6078. The Crusader States: The Latin Kingdom of Jerusalem 1099-1291. (4 Credits)
This course charts the social, political, and cultural history of the feudal principalities that were established by Latin Christians in the Eastern Mediterranean in the wake of the First Crusade. Students will be introduced to the narrative and documentary sources through which the history of the Latin Kingdom has been constructed, as well as the archaeology and art of the Levant during the period of Frankish occupation and settlement. In addition, we will engage with the major historiographical debates concerning the constitutional organization of the Latin kingdom, the relationship between the Frankish crusaders and Muslim and eastern Christian populations over whom they ruled, and the 'colonial' character of the Latin settlements. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
HIST 6133. Med Rel Institutions. (4 Credits)
Today, the Catholic Church appears to as a hierarchical entity united under the supreme leadership of the pope. This is in contrast with the situation in the Middle Ages, when people made careful distinctions between monks, nuns, canons, secular priests, minor and major orders, cardinals, lay brothers and sisters, and a multitude of other clerics. Committed to their respective ranks and vocations, churchmen and churchwomen often found themselves competing with one another. In so doing, they were less likely to submit to papal authority than to enlist it for their own purposes. The seminar will examine these groups, their institutional identities, and typical conflicts of interest. The institutions of the medieval church-male and female monasteries, cathedral chapters, parishes, religious orders, dioceses, the papacy and other bodies—maintained their own two identities and pursued their own ends. The church they formed was not monolithic: medieval religious institutions were often in competition with one another for reasons both secular and religious; and, unlike modern church, religious institutions played a role in government and were the sole providers of many social services. Through consideration of medieval sources and modern sutdies, the course will examine the institutions that formed the medieval church, their histories, identities and members, their conflicts, and their relations to society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 6135. E Med Confl & Peacemaking. (4 Credits)
In the Early Middle Ages of the West (500-1050), judges presiding over courts in the modern sense of the word did not exist. Written laws were not implemented unilaterally from above, and the facts of a case were investigated not as much as a painstaking reconstruction of alleged misconduct, but rather by way of collective oaths and duels. Another form of proof was the hot-iron ordeal, in which defendants placed their hand in a pot of boiling water to have guilt or innocence determined by the healing process. The course will provide a forum for the reading and discussing of recent historiography on the subject and explore the question of what made these forms of conflict peaceful resolutions 'rational' and reasonable in the eyes of early medieval contemporaries. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6136. Disease in the Middle Ages. (4 Credits)
The course will explore disease in the West from about 500 to 1500, including sudden epidemics like the Black Death, endemic illnesses such as leprosy, and the rise of literate university medicine alongside the academic laggards of surgery and midwifery. Particularly attention will be paid to issues that highlight the close nexus between medical and social practices. What accounted for the medieval rise of many enduring institutions in the health sector, for example, faculties of medicine and university-trained health practitioners with the lucrative title of 'doctor'? What rendered medical knowledge 'scientific' at the time and gave it its strong public appeal? What is the relationship between modern 'empirical' medicine and its older 'scholastic' counterpart?.
Attribute: MVSG.

HIST 6153. Medieval Economy and Society. (4 Credits)
This course focuses on the major economic trends of the period from the Germanic invasions through the 'agricultural depression' on the 15th century. We will also consider the social impact of changes in seigneurial and peasant agriculture, the 'commercial revolution', the rise of the textile industry, the Great Famine, the Black Death, and the Hundred Years War. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 6172. Late Medieval and Early Modern Ireland. (4 Credits)
This course will examine the history of Ireland from the height of the so-called Gaelic Revival in the mid-14th century to the violent collapse of Gaelic rule and the completion of the Tudor conquest in the early 17th century. Beginning in the late medieval period with an exploration between English and Gaelic worlds, the class will then chart the portracted incorporation of Ireland into a highly centralized early modern English state under the Tudors. With emphasis placed on the latest scholarly .

HIST 6256. Torture and Western Culture. (4 Credits)
This course examines a very difficult subject that sheds an unsettling light on the history of Europe and the United States. Torture in the twenty-first century world is ubiquitous, and the very public controversy surrounding American practices is only shocking to those who do not pay attention to the world. Our goal in this seminar is to examine the history of torture in its European-American context and to determine just where current practices fit into that history. We will also ponder whether torture is a practice that can (and should) be eradicated, or whether we must adjust to the presence of torture as a permanent feature of the world and American landscape. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CEED, CETH.

HIST 6305. The English Reformation. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6310. Early Modern European Intellectual and Political History. (4 Credits)
This course will consider the development of early modern Europe thought and politics from the 16th through the 18th centuries. Coverage may include the intellectual and political implications of the Renaissance and the Reformation, the rise of the early modern state and its expansion, popular revolts, Scientific Revolution, political theory, absolutism, republicanism, war and empire, the Enlightenment and the French Revolution. The course is designed to provide an introduction to major historical debates and methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in Early Modern European History. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
HIST 6315. Early Modern European Society and Cultural History. (4 Credits)
This course will consider the development of early modern European society and culture from the 16th through the 18th centuries. Coverage may include the social and cultural implications of the Renaissance and the Reformation, the divergence of popular and elite culture, the social dimensions of expanding population and trade, print and literacy, the economics foundations of social change, popular revolts, the impact of empire on society and culture, the Enlightenment and the French Revolution. The course is designed to provide an introduction to major historical debates and methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in Early Modern European History. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6355. Late European Political and Intellectual History. (4 Credits)
This course will explore central themes in the development of European political and intellectual life during the 19th and 20th centuries. At the discretion of the instructor students would be expected to explore topics including but not limited to liberalism, conservatism, romanticism, nationalism, modernism, counter-enlightenment, fascism, socialism, Western Marxism, memory, gender, constructions of sexuality, colonialist and racial ideologies, consumerism, and the late-twentieth century counter-cultures. The goal of the course would be to ensure students a reasonable command of the issues associated with the selected items. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6360. Late European Social and Cultural History. (4 Credits)
This course will explore central themes in the development of European social and cultural life during the 19th and 20th centuries. At the discretion of the instructor students would be expected to explore topics including but not limited to liberalism, conservatism, romanticism, nationalism, modernism, counter-enlightenment, fascism, socialism, Western Marxism, memory, gender, constructions of sexuality, colonialist and racial ideologies, consumerism, and the late-20th century counter-cultures. The goal of the course would be to ensure students a reasonable command of the issues associated with the selected themes. Instructors are expected to ensure a representative distribution of themes across time periods. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6520. Europe Global. (4 Credits)
Perspectives on 19th/20th century Europe in light of imperialism/colonialism, trade & commerce, transnational & global networks of migration, exchange, ideas. Focus on socio-cultural and economic influences between Europe and underworld.

HIST 6530. European City: 1700-2000. (4 Credits)
Upper level study of European urban history, concentrating on theoretical and interpretive approaches to the study of the city and urban life. Methods or research, evidence, and analysis form basis of seminar Discussions and student research. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6531. Bombay–Shanghai–London. (4 Credits)
This course surveys the history and connecting links between Bombay–Shanghai–London in the 19th and 20th centuries. It concentrates on the exchange and movement of people, goods, culture, and information within the context of empire, and considers the coexistence of local and global influences and the uneasy balance with cosmopolitanism. The course places emphasis on economic culture, material culture, and built environment. It is suitable for students in urban history, global history, European history, Chinese history, and Indian history. Weekly readings and research papers are required.

HIST 6662. Sexuality in America. (4 Credits)
Readings in the literature of the history of sexuality in American from the Colonial Era to the end of the 20th century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6710. The Civil War. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6721. US Culture and Society Since 1877. (4 Credits)
An exploration of American culture and society through important scholarly works in the field. The course is designed to provide an introduction to major historical debates and the methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in American history. Topics to be covered may include the role of social institutions and the significance of class, gender, culture, and race, particularly in connection to colonial life, the the revolutionary period, the early republic, the Civil War, and Reconstruction. Instructors are expected to ensure a representative distribution of themes across time periods. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6724. US Thought and Politics to 1877. (4 Credits)
An exploration of American intellectual and political history through important scholarly works in the field. The course is designed to provide an introduction to major historical debates and the methodological approaches for beginning graduate students as well as prepare doctoral students for their comprehensive exams in American history. Topics to be covered may include the formation of American ideology, political movements, and the contributions of major ideological and intellectual figures, particularly in connection to the rise of the U.S. as an economic and military power, the Progressive era, the world wars, the Great Depression, the Cold War, the civil rights movement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
HIST 6725. United States Thought and Politics Since 1877. (4 Credits)
An exploration of American intellectual and political history through important scholarly works in the field. The course is designed to provide an introduction to major historical debates and the methodological approaches for beginning graduate students for their comprehensive exams in American history. Topics to be covered may include the formation of American ideology, political movements, and the contributions of major ideological and intellectual figures, particularly in connection to the rise of the U.S. as an economic and military power, the Progressive era, the world wars, the Great Depression, the Cold War, the civil rights movement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6726. The United States and Human Rights: An International History. (4 Credits)
This course examines the history of human rights during the American Century. Emphasizing analysis rather than advocacy, it examines the legal and moral origins of human rights, its political structures, and the international culture of humanitarianism. Through a series of case studies of human rights organizations and U.S. diplomacy toward individual states, the course will help students understand the trajectory of human rights in the 20th century. Students will undertake independent research on an issue, location, and period of their choosing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6731. US Immigration and Ethnicity. (4 Credits)
This course will examine several important issues that have engaged the attention of historians of immigration and ethnicity. These include perennial concerns as the nature of the processes of settlement and Americanization, and the evolution of American views on citizenship and immigration policy. Also among the issues to be discussed are recent trends in thinking about the invention of racial identities and about ethnic diasporas and 'transnationalism.' Finally, the course will cover several cases of the stresses of ethnic identity in wartime. Readings will include recent scholarly monographs and articles, as well as several examples of ethnic memoir literature. Note that the course is organized thematically, and that readings have therefore been chosen because they reflect on the themes under discussion. As a result, not all ethnic groups are covered adequately. Students will have a chance to deal with the ethnic groups of their choice in their independent work. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 6853. America Between the Wars. (4 Credits)
The course will focus upon political, economic and social events and trends in America during the era between the two World Wars of this century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 7025. PSM: Medieval Religious Cultures. (4 Credits)
Debates in the study of medieval religious culture and approaches to its study will be examined through works on the cult of saints, popular religion, and liturgy and ritual. Issues presented in the current literature will be tested by the close reading of selected primary sources. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 7056. Psm: Med Political Cultures. (4 Credits)
This course, the first part of a two-semester proseminar/seminar sequence will introduce students to recent debates and different approaches to cultures of power and political processes in western Europe in the central middle ages. Among the many topics we might consider are lordship, status and authority, political assembly and consultation, courtliness and persuasion, rulership and sanctity, and the rise of accountability. Students will become familiar with a wide range of source material, from diplomatic and documentary collections to historical narratives and courtly literature. With this solid foundation in the current historiography and available research tools, students will be expected to identify a suitable topic for a sustained research project. Completing this project will be the objective of the seminar course to be offered in the Spring. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 7070. Medieval Intellectual Cultures. (4 Credits)
This course takes a broad approach to medieval intellectual history, focusing not just on the texts and ideas that were central to medieval intellectual life but also on the cultural conditions that enabled scholarship and creativity to flourish. Beginning with the late antique absorption of classical learning, the seminar will over the course of two semesters examine a range of intellectual cultures spanning the western Middle Ages. A particular focus of the class will be the study of the liberal arts and the evolution of teaching practices. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 7110. PSM: Church Law & Med Soc. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
HIST 7150. PSM: Medieval England. (4 Credits)
This is the last half of a year-long course that focuses on the social, economic, and administrative history of England from the eleventh through fifteenth centuries. Special emphasis is placed upon 1) how to identify and exploit a wide variety of primary sources (such as wills, cartularies, court rolls, account rolls, chronicles, among others), 2) how to use major historical collections (such as Rolls Series, VCH, Record Commissioners, Royal Historical Manuscripts Commission, the Ordnance Survey, Selden Society, and others), and 3) gaining an awareness of the regions and landscape of medieval England, as well as the contributions of historical geography. Besides treating thematic issues such as the church and society, law and legal system, the growth of government and administration, maritime trade and industry in town and country, the weekly discussions will also consider economy among the peasantry, townpeople, and the landowning elite. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8000. Research Colloquium. (1 Credit)
Required for MA and PhD students in Modern History and taken in conjunction with a research tutorial, this colloquium attends to the professional and presentation aspects of their research project as well as providing a forum for progress reports and feedback.

HIST 8025. Sem: Medieval Relig Cultures. (4 Credits)
Participants will build on the reading and topics from HSGA7025 (Proseminar, Medieval Religious Cultures) to prepare research papers based on sources and debates in the study of medieval religious cultures. Weekly readings will be selected by the participants from materials for their papers; later in the semester, students will present drafts of their own papers, and prepare critiques of others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8056. Sem: Med Political Cultures. (4 Credits)
In the Spring semester, students will spend the semester working on research papers based on the topics identified in the Fall. At class meetings, students will have the opportunity to present their research and to read and critique each others’ writing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8070. Medieval Intellectual Cultures. (4 Credits)
Student continue to work on the project they defined in the Proseminar to this course. Classes convene intermittently to discuss progress on the ongoing research projects and for presentations on untranslated or little-known primary source (either recently made available or long forgotten) that deserve greater. Students complete the seminar by giving a 20-minute conference paper on their research project and on their research project and writing a thesis-length original research paper that could be published as a scholarly article. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8110. Sem: Church Law & Med Soc. (4 Credits)
This course will consist of a two-semester proseminar/seminar sequence inviting graduate students to formulate and conduct original research projects in the field of medieval church law. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVSG.

HIST 8150. Sem: Medieval England. (4 Credits)
Continuation of HSGA 7150. The first half of the course focuses on database analysis, writing skills, research methods, and public speaking. Students also work on a final research paper that was formulated in HSGA 7150. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HIST 8999. Independent Study. (0 to 4 Credits)
HIST 9999. Dissertation Direction. (1 Credit)

HIST MTNC. Maintenance-History. (0 Credits)

History Law (HSGL)

HSGL 0202. Great Books in American Law. (2 Credits)
Students in this seminar will read the following six books, plus reviews and commentary on each of the books:<br> Oliver Wendell Holmes, The Common Law; Benjamin N. Cardozo, The Nature of the Judicial Process; Adolph Berle and Gardner Means, The Modern Corporation and Private Property; Alexander M. Bickel, The Least Dangerous Branch: The Supreme Court at the Bar of Politics; John Hart Ely, Democracy and Distrust: A Theory of Judicial Review; and Antonin Scalia, A Matter of Interpretation: Federal Courts and the Law. <p> Students will be expected to write twelve 2-3 page response papers on the books and materials circulated for the twelve classes discussing the books and commentary. The first class will be introductory. There will be no final exam.

HSGL 0203. United States Constitutional History: The Warren Court. (2 Credits)
The main work in our workshop is reading forthcoming scholarship (work in progress) or recent books in constitutional history and then meeting with the authors to ask them questions and constructively critique their work for their benefit. Authors benefit tremendously from these workshops in getting feedback, and students learn from how historians engage legal questions and how history can be relevant to contemporary legal arguments. These workshops also add to Fordham's intellectual and scholarly life. We will have a few weeks in the beginning of the semester on foundational work on originalism and its critics, as well as background on the Founding era.
Attributes: INLJ, LLM, PIF.
HSGL 0204. Recnt Books in Con Legl Theory. (2 Credits)
The purpose of this course is to give students an opportunity to read, discuss, and write about important recent books in constitutional and legal theory, and to meet and engage with the authors of those books. We will cover each book in two class sessions. For each book, in week one, students will write 5 page response papers, and the students and I will meet to discuss the book. In week two for each book, the author will come to class and discuss the book with the students and me. The grade is based on the response papers and class participation. There is no final paper or final exam. Although I am assigning all six books described below in full, I will provide guidance regarding parts of each on which students may focus. <p>Here are the books we will read: Weeks 1 and 2 (1/18 and 25): <b>John McGinnis and Michael Rappaport, Originalism and the Good Constitution </b>(McGinnis, from Northwestern University, will come to class). This book argues in favor of originalist methods of interpreting the Constitution, largely from a consequentialist framework, i.e., that we are better off as a nation following originalist methods. The book also advances a distinctive originalist argument focusing on the supermajoritarian nature of our Constitution. (Note that the response paper for this first book is due 1/16, so students will be reading the book over winter break. Response papers are due the Monday morning before the first Wednesday session for each book.) <p>Weeks 3 and 4 (2/1 and 8): <b>James E. Fleming, Fidelity to Our Imperfect Constitution: For Moral Readings and Against Originalisms </b>(The title well describes the book. Fleming (a former Fordham Law School professor, now at Boston University) is one of our leading anti-originalists and pro-Dworkinian constitutional scholars. He claims moral readings of the Constitution are both best and unavoidable. <p>Weeks 5 and 6 (2/15 and 22): <b>Frederick Schauer, The Force of Law </b>(Schauer (University of Virginia) is one of our leading legal theorists and First Amendment scholars. This book challenges a leading legal theory account (H.L.A. Hart’s notion of people following the law just because it’s the law, i.e., internalizing a sense of legal obligation) and argues instead that coercion – the force of law – is central to understanding the core of law and its efficacy. <p>Weeks 7 and 8 (3/1 and 8): <b>Richard H. McAdams, The Expressive Powers of Law: Theories and Limits </b>(This book is a nice counterpoint to Schauer’s book. Conventional accounts of legal compliance focus on deterrence (Schauer’s approach) and legitimacy. McAdams (University of Chicago) adds that law has an expressive mechanism that generates compliance, as well, through a coordinating function and an information function. In part through game theory, McAdams advances both descriptive and normative claims supporting his thesis. <p>Weeks 9 and 10 (3/22 and 29): <b>John D. Inazu, Confident Pluralism: Surviving and Thriving through Deep Difference </b>(Whereas the first four books provide general constitutional and then legal theory approaches, the final two books focus on more specific areas. Inazu (Washington University in St. Louis) advances a deeply pluralistic theory of our constitutional order, analyzing freedom of speech, religion, assembly, and association arguments. <p>Weeks 11 and 12 (4/5 and 12): <b>Heidi Kitrosser, Reclaiming Accountability: Transparency, Executive Power, and the U.S. Constitution </b>(Kitrosser (University of Minnesota) challenges standard defenses of presidential power, especially “supremacy” and “the unitary executive.” She argues that presidential power need not be as centralized as unitary theories maintain, and that secrecy of information and programs within the executive branch are antithetical to proper understandings of accountability. She also discusses First Amendment issues surrounding prosecution of leakers and publishers of classified information. <p>Week 13 (4/26): Wrap-up discussion and I hope some kind of party #. <p>Note: I am trying to keep costs reasonable for students, and have figured out a way to reimburse you if total book costs per student go over $200.

HSLG 0511. Crime and Punishment in American History. (2 Credits)
Why do we punish? The answer to this question has changed dramatically over the course of American history. As the reasons behind punishment shifted, so did its methods change. Sometimes these developments occurred amidst great public debate and scrutiny; at other times, they proceeded almost without notice. This seminar challenges students to think critically about the relationship between laws on crime and punishment on one hand, and American society, politics, and culture on the other. What did it mean to be “criminal” at various points in American history? How have criminal laws both reflected and shaped their times? And what does this history mean for modern crime control and its reform?

Honors Program - FCLC (HPLC)

HPLC 0045. Honors Thesis Completion. (0 Credits)
This is a 0-credit administrative course in which all Fordham College at Lincoln Center Honors students enroll in the spring of their senior year, when completing their Honors Thesis requirement. A passing grade indicates successful completion of the Honors Thesis.

HPLC 1001. Honors Philosophy. (3 Credits)
Borrowing the Thomistic idea of philosophy as a perennial discourse, the honors philosophy course encourages seminar participants to cultivate their own intellectual grounds through the study of classic and contemporary philosophical works. Topics may include the nature of philosophical discourse, of consciousness, of knowledge, of existence, and of human nature.

HPLC 1011. Honors: Speech and Rhetoric I. (1 Credit)
1 credit lab session in effective speaking techniques to be combined with the honors core.

HPLC 1201. Honors: English. (3 Credits)
