Systematic assessment of the internship experience is essential to be certain students are meeting their educational goals. Formal evaluations (see Appendix XIII in the Resources section) (p. 982) are completed and turned in to the clinical director in the following timeline.

FALL SEMESTER: October 15 and December 1
SPRING SEMESTER: May 1

All students, clinical supervisors, and clinical instructors will complete the form at the three noted times above. All completed forms will remain in the student’s file. A meeting with the clinical instructor and the student will take place at the end of the semester to review the forms and discuss clinical and professional strengths and areas of growth. Should there be concerns about a student’s ability to successfully complete the internship, a remediation plan will be set in place (see IRP policy in the Program Policies section (p. 980)).

Program Policies
The policies in this section are intended to supplement the general GRE policies and procedures that can be found in the Student Resources section of GRE Bulletin.

Individual Remediation Plan Policy
The goal of the program faculty is to help students become successful professional counselors.

Section F.9.a of the American Counseling Association Code of Ethics states, “Counselor educators clearly state to students, prior to and throughout the training program, the levels of competency expected, appraisal methods, and timing of evaluations for both didactic and clinical competencies. Counselor educators provide students with ongoing feedback regarding their performance throughout the training program.”

Faculty members have an ethical duty to identify students who may need more support and guidance in order to meet this goal. Once identified, faculty have the ethical duty to remediate, and when remediation is not possible, dismiss students from a counseling program.

Students may need extra support for a number of reasons, including challenges related to

1. maintaining the minimum 3.0 GPA requirements for the program;
2. developing academic research and writing skills;
3. meeting professional standards of behavior in the clinical setting including ethical behavior related to professional boundaries, professional identity, documentation for clinical work, openness to supervision;
4. developing the clinical skills necessary to meet the competency of graduate licensed professional counselor including empathy, reflective listening, integrating theory into practice;
5. managing personal stress, psychological dysfunction, or excessive emotional reactions that interfere with academic and professional functioning.

Remediation is an opportunity for the graduate school to assist a student who is struggling to learn, grow, and improve. An Individual Remediation Plan (IRP) is a formal plan that outlines and documents the individual needs of the student and the plan to successfully meet such demonstrated need. An IRP is initiated by a University faculty member when evidence has been documented of inadequate academic, research, professional, ethical, or clinical skills demonstrated by the student.

Feedback is documented formally by

- Academic Advising Form including GPA (each semester);
- Semester Student Evaluation Review & Letter (each year);
- Fitness Review Level 1 Form (after Basic Skills Class pre-internship);
- Clinical Readiness Form (pre-internship meeting with clinical director);
- student self-evaluation of clinical work (four times during the internship year);
- site supervisor evaluation of clinical work (four times during the internship year);
- clinical instructor evaluation of clinical work (four times during the internship year).

Information to complete the above forms is provided in a number of ways, including but not limited to

- feedback from academic instructors;
- major academic papers, case presentations, verbatim;
- One on one and group supervision experiences by the site supervisor and by university supervisors;
- review of clinical documents by the site;
- site visits by the clinical director;
- the final integrative case paper rubric.

When there is documentation of a student not achieving the necessary academic, research, professional, ethical, or clinical skills, the program faculty will decide at their monthly faculty meetings whether an IRP is needed. If it is indicated by the program faculty, a meeting will be arranged with the University clinical director and the student. The meeting may also include the site supervisor, other core program faculty, or other administrators as necessary. Collaboration with the student will provide the opportunity for a student to discuss the need of the IRP, respond to the need for and IRP and invest the process of remediation. The IRP will serve as a contract between the student and the program. It will outline specific areas of improvement, craft student goals, indicate warranted intervention to meet the student goals, and indicate the period to meet the goals. The IRP will be signed by the student, the faculty adviser, the clinical supervisor, and other academic administrators as indicated. A timeline for remediation will be specified in the individual meeting with the student, and a summary of the meeting
and recommendations will be provided to the student (and placed in the student file).

Interventions that may be indicated to meet student goals include but are not limited to
1. personal therapy;
2. increased meetings with site supervisor;
3. increased monitoring of clinical work by site supervisor including tape review or verbatim reviews;
4. faculty directives related to internship site, client population, and client load;
5. additional meetings with program faculty;
6. repeated or additional course work;
7. academic writing seminar.

If the IRP process does not rectify the specified issues, or when the student is unable or unwilling to follow the IRP, the student may be assisted in implementing a program or career shift or dismissed from the program in accordance with GRE policies. There may be cases where the critical nature of the issue will warrant immediate dismissal from the program.

If a student wishes to appeal the decision of the program faculty for dismissal from the program, they may follow the appeal procedures outlined by the University grievance policy.

Grievance Policy
Fordham University does not discriminate on the basis of race, color, creed, religion, age, sex, gender, national origin, marital or parental status, sexual orientation, citizenship status, veteran status, disability, gender identity or expression, genetic predisposition, carrier status, or any other basis prohibited by law. The Graduate School of Religion and Religious Education employs the following Grievance Procedure covering all matriculated and non-matriculated students. Students who believe they have been discriminated against with respect to participation in access to, or benefits of, any program or activity within the school are requested to use the following Grievance Procedure.

Informal Procedure
Since a formal grievance procedure is a last resort, it is assumed that every effort to resolve the grievance through informal approaches has been conducted by the concerned parties. Nevertheless, the use of informal procedures is not a prerequisite for the submission of the grievance through the formal procedure.

Formal Procedure

Step I: School-Wide
A. An alleged grievance must be brought in writing to the attention of the dean within 25 school calendar days from the time of the incident.
B. The dean will convene the standing committee, which will conduct the review and which must receive a full written statement of the grievance and pertinent substantiating information from both the aggrieved and the person charged at least five days prior to the review date. All review procedures will be restricted to the parties involved. It is expected that this process will take place within 15 school calendar days after the student submits a written statement to the dean.

C. This standing committee is to be composed of two faculty members selected by the faculty for staggered terms of two years and one student selected by the student association for a one-year term. Should one of the standing committee members be the person charged, the dean shall appoint an alternate.
D. The parties will be given an opportunity to attend the meetings and to present information to the committee.
E. The standing committee will render a written statement of the findings together with recommendations for appropriate remedies to the dean within five school calendar days after the review.
F. The dean will meet with the concerned parties within 10 school calendar days to present recommendations for resolution of the grievance to the concerned parties.
G. Should the dean be the person charged, an alleged grievance must be brought in writing to the assistant chairperson within 25 calendar days. The associate dean will convene the standing committee, receive its report, and communicate recommendations for resolution of the grievance to the concerned parties within the same time limits as specified above.

Step II: University-Wide
A. If either the aggrieved or the individual school against whom charges have been brought feel that the matter has not been resolved, either party may appeal in writing to the appropriate area vice president within 10 school calendar days after the meeting between the dean and the concerned parties in Step I. The appeal should include 1) a concise summary of the charge(s) and 2) an explanation of why the school-wide process was considered unsatisfactory.
B. The vice president will review the grievance process to determine whether proper procedures were followed, or if new evidence not available in Step I is being presented. If the vice president is not satisfied with the handling of the grievance investigation, the vice president will return the grievance to the dean for further investigation. The concerned parties will be notified of the vice president’s actions and decisions within 20 school calendar days of the receipt of the appeal.
C. The vice president for academic affairs is the last court of appeal, and the vice president’s decision will be final.

Student File Policy
A copy of the University’s policy and guidelines regarding student records under the Family Educational Rights and Privacy Act of 1974 (FERPA) are available from enrollment services.

The program maintains specific documents related to student progress in student files. Active student files are located in the clinical director’s office. The office remains locked when the clinical director is not present. The non-active student files are scanned by the dean’s office and kept electronically. Only the assistant dean and the administrative assistant have access to the computer files. All computers are password protected and require dual authentication to access the computer. Once scanned, the paper files are kept in a locked closet for a period of 10 years. Only the dean’s office has access to the closet.
The following forms are maintained in student files kept in the assistant dean’s office:

1. **Application for Admission**
   - This form is completed by the student and approved and signed by the academic adviser during academic advising each semester.

2. **Signed Handbook Welcome Letter**
   - This form indicates that the student has read and agrees to the policy and procedures outlined in the Pastoral Mental Health Counseling Handbook.

3. **Academic Advising Progress Form**
   - This form is completed and updated by the student with the academic adviser during academic advising each semester.

4. **Yearly Student Evaluation Form**
   - This form is completed by the faculty every May during the student evaluation process and reviewed with the student.

5. **Fitness Review Basic Skills Form**
   - This form is completed by the faculty of the basic skills course and reviewed with the student prior to the end of the course.

6. **Internship Placement Forms**
   - This series of forms is found in the appendices of the student handbook and are required to be filled out by the internship site and returned to the faculty clinical director prior to starting an internship.

   a. **Agency Opening Form**
   b. **Educational Agreement**
   c. **Supervisor Dossier**
   d. **Contract (if required by site)**

7. **Monthly Hours Log**
   - This form is in the appendices of the student handbook and must be filled out each month during internship by the student, signed by the student and the site supervisor, and handed into the Fordham faculty clinical director.

8. **Clinical Integration I PCSE Forms**
   - These forms are located in the appendices of the student handbook and will be completed by the student, site supervisor, and the Fordham faculty member, and will serve as a guide to a student’s areas of strength and areas of growth as a professional counselor.

   a. **Student mid semester clinical evaluation form**
   b. **Student final clinical evaluation form**
   c. **Site supervisor midterm form**
   d. **Site supervisor final form**
   e. **Clinical instructor midterm form**
   f. **Clinical instructor final form**

9. **Clinical Integration II PCSE Forms**
   - a. **Student final clinical evaluation form**
   b. **Site supervisor final form**
   c. **Clinical Instructor final form**

10. **Integrative Case Paper & Graded Rubric**

11. **Student Review Evaluation Letters (if applicable)**
    - This letter is sent to students and remains in their file if a student demonstrates unsatisfactory academic or professional/clinical skills.

12. **Individual Remediation Plan & Subsequent Letters (if applicable)**

13. **Waiver/Course Substitution Form (if applicable)**
    - This form is completed when a student wishes to waive or substitute a course taken at the GRE or another graduate school. It must be completed by the student and approved and signed by the academic adviser and the program director.

**Resources**

**Licensing**

A major goal of the program is to prepare students to successfully gain licensure and to have an effective career as a professional counselor. Licensure is a process that is governed by individual states. Therefore, each state’s requirements are slightly different. Students are advised to become familiar with the specific requirements for licensure in their state.

Fordham pastoral counseling is a licensure qualifying program for New York, which means that all course requirements for licensure in New York will be met by the program requirements. The full application and post-education requirements for state licensure can be accessed at op.nysed.gov.

The following information describes the education requirements for New York state and the Fordham course equivalent.

- **Human Growth and Development:** PCGR 6310 Human Growth and Development
- **Social & Cultural Foundations:** PCGR 6382 Social and Cultural Foundations of Pastoral Counseling
- **Counseling Theory & Practice:** PCGR 6386 Pastoral Counseling Theory
- **Psychopathology:** PCGR 6390 Psychopathology & Diagnosis
- **Group Dynamics:** PCGR 7422 Group Process: Theory and Techniques
- **Lifestyle & Career Development:** PCGR 6510 Advanced Life Span Issues and Career Counseling
- **Assessment & Appraisal of Individuals, Couples, & Families:** PCGR 7330 Assessment and Appraisal of Individuals, Couples, and Families
- **Research and Program Evaluation:** PCGR 7410 Research Methods in Pastoral Counseling
- **Professional Orientation & Ethics:** PCGR 6384 Professional Ethics in Pastoral Counseling
- **Clinical Instruction:** PCGR 6440 Pastoral Counseling Skills
- **1 year supervised internship with 600 hours:** PCGR 7471 Clinical Instruction and Integration Process I/PCGR 7472 Clinical Instruction and Integration Process II
The NBCC is a professional organization that organizes the licensing tests. There are two national tests: the NMHCE and the NCE. In New York state, the NMHCE is the required test and cannot be registered for or taken until your application for licensure has been accepted by the state. There are various study programs offered to help students prepare for taking and passing the tests. Alumni have indicated that taking such programs have been helpful in successfully passing the NMHCE. Please see the NBCC website for more information (NBCC.org).

### Professional Organizations

Career development need not wait until after graduation. Students are strongly encouraged to join professional organizations that they feel are in-line with their professional goals. Professional organizations can provide community, support, and training to new and seasoned counselors alike. Some organizations that students may be interested in include

- American Counseling Association (ACA)
- New York Mental Health Counselors Association (NYMHCA)
- American Association of Pastoral Counselors (AAPC)
- Association for Spiritual and Religious Values in Counseling (ASERVIC)

Please reach out to your academic adviser if you would like to know more about any of the above organizations.

### Pastoral Studies (M.A.)

This program is offered online or on campus.

The Master of Arts degree (M.A.) in pastoral studies prepares students to serve in parishes, denominational offices, schools, hospitals, and other such organizations where leadership depends on skilled cultivation of religiously informed practice. This degree is also designed to meet the requirements for pastoral ministers set out by the United States Conference of Catholic Bishops and the National Association for Lay Ministry. Courses include scripture, theology, spirituality, pastoral care and counseling, religious education, and ministry. This degree provides a solid foundation for students seeking to follow many different career paths that benefit from bringing religion scholarship to service.

### Requirements

Students admitted to the program are expected to have sufficient academic background to complete the program. Additional coursework may be required for students with insufficient background, raising the total number of credits required to complete the program to 42 or more. Additional coursework may include the following:

- A religious education elective consisting of any course with the REGR subject code (p. 522) numbered 6000-7999, as listed on our course listings page (p. 951).
- A pastoral ministry elective consisting of any course with the PMGR subject code (p. 448) numbered 6000-7999, as listed on our course listings page (p. 951).

Students with sufficient academic background are waived from these additional course requirements.

- PMGR 6612 Ministry with Latinxs
- PMGR 9999 ST Tutorial-Pastoral Ministry (An approved section)

Another course approved the Pastoral Ministry faculty committee

One Systematic Theology course:

- RLGR 6031 Theology of the Human Person
- RLGR 6032 Church and Society
- RLGR 6033 Sacraments: Theology and Rites

One Moral Education course:

- REGR 6120 Education for Peace and Justice
- REGR 6125 Moral Education/Develop

One Spirituality course:

- SPGR 6742 The Ignatian Way
- SPGR 6830 Discernment in the Christian Tradition

One Pastoral Counseling course:

- PCGR 6310 Human Growth and Development
- PCGR 6380 Theology of Pastoral Counseling and Spiritual Care

Updated: 07-27-2020
**Final Project**

The Master of Arts degree (M.A.) in pastoral studies program concludes with a capstone course, PMGR 8030 (offered each spring). The course involves a terminal group research project on a topic determined by the faculty.

**Religious Education (M.A.)**

This degree is offered either online or on campus, depending on the chosen concentration. Please consult the Concentrations tab for details.

The Master of Arts degree (M.A.) in religious education degree provides a deepened understanding of core theological disciplines and opportunities to explore the various practices of pastoral ministry. The degree is designed for those already serving in ministry and those preparing to seek employment in ministerial and educational settings. Those seeking personal enrichment through the study of religious education are also welcome.

**Requirements**

The Master of Arts degree (M.A.) in religious education requires 36 credits and may be pursued in one of the following concentrations:

- **Generalist**
- **Youth and Young Adult Ministry**

Both concentrations can be completed on campus or a combination of on campus and online. In addition, the Youth and Young Adult concentration can also be completed exclusively online. Both concentrations require a final integration research paper, which should be submitted to complete the course REGR 6999 Religious Education Final Integration Seminar.

**Course Requirements (All Concentrations)**

The course requirements listed below are for on-campus or hybrid students. Modified requirements for online students are noted in footnote 1.

</table>

| Total Credits | 9 |

**Final Project**

The Master of Arts degree (M.A.) in religious education program concludes with a final integration course (offered each spring). The course requires an integration research project on a topic determined by the faculty.

Updated: 07-27-2020
Concentrations

Generalist Concentration

The Religious Education M.A. (Generalist) is offered on campus.

Most religious educators and pastoral ministers are pastoral generalists. While they may have particular areas of responsibility, such as overseeing parish programs for the religious education of children and youth, or running a campus ministry service and social ministry program, they interact with people in a wide array of situations and are called upon to be pastoral caregivers, catechetical leaders, spiritual guides, prayer leaders, and to minister to people in a variety of other ways. The Master of Arts degree (M.A.) in religious education, generalist concentration, provides students with an opportunity to take a range of courses in religious education and pastoral ministry. Students develop a foundational understanding of educating in faith and the various ministries of the church.

Additional information about this concentration can be found in the Requirements tab (p. 984).

Youth and Young Adult Ministry Concentration

The Religious Education M.A. (Youth and Young Adult Ministry) is offered online.

Beginning with the guidelines for the formation of lay ecclesial ministers outlined in Co-Workers in the Vineyard of the Lord, the Master of Arts degree (M.A.) in religious education, youth and young adult ministry program, addresses students’ needs for human and personal formation, spiritual formation, intellectual formation, and pastoral formation. People turn to the studies in this area to prepare them to be (or to provide ongoing education in their work as) religion teachers in Catholic school and college campus ministers. The Master of Arts degree (M.A.) in religious education with a concentration in youth and young adult ministry focuses on understanding adolescent and young adult religious, spiritual, moral, and psychological development. Students choose from among courses in community, family, and religious education; curriculum and religious education; adult learning and development; and other areas of religious education and pastoral studies. Students are asked to direct their studies in either religious education or pastoral studies as they prepare for a career path in either religious education/catechesis with youth and young adults in parishes, schools, college and university campuses, and dioceses, or Jesuit volunteer corps members.

Additional information about this concentration can be found in the Requirements tab (p. 984).

Student Resources

- Policies and Procedures (p. 985)
- University-Wide Services (p. 993)

Policies and Procedures

The policies and procedures explained in this section are indispensable to a student’s orderly progress through their master’s, doctoral, or certificate program. Students needing clarification of, or assistance with, any item in this section should contact Assistant Dean Patrick Holt at holt@fordham.edu or 718-817-0866.

- Academic Authority (p. 985)
- Academic Policies (p. 985)
- Admissions (p. 988)
- Enrollment and Registration (p. 989)
- Graduation Clearance and Commencement (p. 991)
- Grievance Policy (p. 992)
- International Students (p. 993)
- Off-Campus Conduct Policy (p. 993)
- Student Records (p. 993)

Academic Authority

The continuance of each student upon the rolls of the University, the receipt of academic credits, and graduation and the conferring of any degree or granting of any certificate are strictly subject to the powers and authority of the University, which are vested in the President and his designee(s). The operative norms and procedures expected to be followed by all students are those described in the University Code of Conduct approved by Fordham University and published in the Student Handbook issued by the Office of the Vice President for Student Affairs.

The decision-making authority of the dean is exercised in three primary ways: (1) admission of qualified candidates; (2) withholding student’s records and transcripts; and (3) dismissing students from the program and school.

Unless otherwise stated, the dean has delegated this authority to the faculty members of the student’s specific program to implement the policies and procedures stated in this bulletin.

*P is valid for use in the following course categories only: Dissertation Mentoring, Dissertation Direction, Clinical Pastoral Education, Field Placement and Research Methods.

Procedure Regarding Incompletes

If there is a serious reason for taking a grade “Incomplete,” students must apply to the professor in writing (or by email) no later than the last class meeting. It is the professor’s decision to grant or reject the request. Probationary students may not receive incompletes. The professor takes

Updated: 07-27-2020
the responsibility with the student for the necessary make-up work and final grading. Incomplete grades not resolved by the deadline on the calendar will automatically become an ‘F’.

After the make-up work and final grading are done, the formal change-of-grade request should be completed and signed by the professor and the dean. This form must be in the dean’s office by the deadline for the removal of “INC,” “ABS,” and “NGR” grades on the school’s academic calendar. As with all cataloged information, students are held responsible to adhere to those dates.

With the publication of this set of procedures, the entire responsibility regarding removal of an ‘incomplete’ rests upon the student and faculty member. This is a serious matter, since failure by a student to take the proper action will result in a failing grade and loss of all credit for the course.

### Academic Performance and Progress

Students who do not meet the minimal standards for academic performance are placed on academic probation. Minimal satisfactory academic performance is defined as having a grade point average (GPA) of at least 3.0 for master’s and certificate students and a 3.5 for doctoral students. Any student receiving any University financial aid must maintain a 3.0 GPA (M.A./Certificate) as minimum requirement for continuation of the aid. Administrative “Fs” are computed as “Fs” (0.00) for the purpose of determining the grade point average.

Satisfactory academic progress is defined as completing at least one of the project/thesis/requirements each year after the semester in which coursework is completed.

If a student receives a grade of ‘F’ for a course, it will remain on the student’s record, even after the course is retaken and a passing grade is earned subsequently. The grade of a repeated course is also recorded on the academic record and does not remove or replace a grade previously earned.

Notwithstanding their academic performance or the time remaining for completion of degree requirements, students who do not make satisfactory progress toward the degree may be dismissed from GRE. Unsatisfactory progress may include an excessive number of withdrawals, incompletes, leaves of absence, or other delays in meeting the requirements for the degree.

### Academic Advisement Procedure and Sequence

Upon acceptance and registration, each student is assigned a faculty adviser. The adviser is to be consulted at each registration period. Your adviser is listed on the student tab in my.fordham.edu. Advisers are assigned by the dean’s office and may change year to year.

Each student is required to take a minimum of six credits per semester to be considered full time and receive any form of grant, discount or other financial assistance.

Once a student receives approval to work with a mentor on a thesis or dissertation, that mentor will take on the duties of the faculty adviser.

Please note that program requirements change. Students are responsible for the requirements published in the year they were admitted to the program. The only official list of requirements for each degree and entry year is maintained in DegreeWorks within my.fordham.edu. Please make sure to review your progress with your adviser each semester within DegreeWorks.

### Standards for Written Assignments

Ordinarily all written assignments for course requirements will be typed and double spaced, with at least 1-inch margins on the top, right, and bottom and a wider 1½-inch margin on the left. Students are responsible to proofread their papers ensuring correct spelling and correct grammatical structure. If the assignment includes research documentation, one of the recommended manuals of style referred to in this bulletin or any program-specific handbooks are to be followed.

Faculty may require the use of the writing center or an outside editor (paid by the student) to resolve regular or substantial problems with student writing.

### Nondiscriminatory Use of Language

All written assignments should adopt nondiscriminatory, gender-inclusive language. See the style guide for your degree for further details.

### Major Paper Deadline for Summer Graduates

Candidates who plan to graduate at the end of a summer session should note that full-time faculty are under contract for the fall and spring semesters only. Their obligations to the University cease at the end of May and resume at the start of the fall semester. Consequently, advisement for the major paper must be substantially completed by the end of April. Failure to meet this deadline necessitates matriculation in the following fall semester in order to fulfill the degree requirement. The finished paper is to be submitted to the faculty mentor by the first day of summer session.

### Submission of Theses, Dissertations and Projects

With the approval of your mentor or committee, final degree theses, dissertations, and projects should be sent electronically to your mentor and the assistant dean as one PDF file with the following naming convention: last name first name thesis title

### Plagiarism

Plagiarism is a serious offense and can be defined as “literary theft” when a student misrepresents the work of another as one’s own. One who intentionally plagiarizes the work of another in a course paper, project, or examination can expect to receive a failing grade for the assignment and potentially for the course. The decision will be made by the professor in consultation with the dean or assistant dean, and will be recorded in the student’s file. Students who commit a second act of plagiarism at GRE may be dismissed from the school. One who unintentionally misrepresents borrowed material as one’s own original work, either resulting from carelessness or ignorance, will have the assignment returned with the opportunity to rewrite it in an acceptable form. The following guidelines apply to all written work:

1. Using the ideas, thoughts, words, and statements of another, including those quoted from online sources, without crediting the source constitutes plagiarism.
2. If exact words of another are used, they must be put in quotation marks or indented, and acknowledged through footnotes, endnotes, or bibliography.

3. If the thoughts or ideas, rather than the exact words, of another are used, they must be acknowledged through footnotes, endnotes, or bibliography.

4. If source material is paraphrased or rephrased, it must be acknowledged through a footnote or endnote. If the paraphrased material includes exact words, phrases, and sentences, they must be put in quotation marks.

5. The underlying criterion for determining plagiarism is claiming as one's own original work the ideas, thoughts, words, and statements of another without crediting the source.

6. Plagiarism can also involve the use of commentary from other students, or other sources, in the context of online discussions and projects.

**Academic Probation**

All GRE students matriculated in a certificate or master’s degree program must maintain a minimum cumulative grade point average of 3.0 to continue in their program of study. For doctoral students, the minimum cumulative grade point average is a 3.5. Academic progress must also be made each fall and spring semester to avoid probation. Academic progress is defined as completing a course or one element of your research project successfully each fall and spring semester. Students who fall below the required cumulative GPA will be placed on probation. Students whose cumulative GPA remains below a 3.0 for a second consecutive semester may be dismissed from the GRE and will not be eligible for financial aid from the school.

**Appeal of Academic Grades**

Students who believe that they have received an incorrect grade for a final paper, course, major paper, project, qualifying paper, thesis, or dissertation may appeal the grade in accordance with the procedures below.

The student will first schedule a meeting to discuss the matter with the professor and try to resolve the issue informally. Should that not be satisfactory, the following procedures are to be followed.

1. Within one month of receiving the grade, the student must request in writing a review of the material and grade by the faculty member who assigned it. In the case of a grade assigned by a committee, the student must make this request to the chairperson of the committee, or if there is none, to the program director. As a result of the student's request, the material in question will be reviewed by the person(s) who assigned the grade, and the result of the review will accord with the academic judgment of the faculty member/chairperson/program director.

2. If the student is not satisfied with the results of the initial review, the student may request a second review. This request must be made in writing to the assistant dean within one week of receiving the results of the initial review. The assistant dean will institute the second review and should report the results to the student within two months of the request. The method for conducting the review will be at the discretion of the assistant dean. If the assistant dean concurs with the student's appeal, the student will consult the dean and any appropriate department faculty in determining the grade to be awarded.

3. If the student is not satisfied with the results of the second review, the student may request a final review. This request must be made in writing to the dean of GRE within one week of the receipt of the result of the second review. The dean will institute the final review and should report the results to the student within one month. The method for conducting the review will be at the dean's discretion. If the dean concurs with the student's appeal, the student will consult appropriate department faculty in determining the grade to be awarded. No further reviews may be requested by the student. At the dean's discretion, the appeal may be submitted to the academic vice president for review.

**Note:** Time requirements in the procedure refer to time when classes are in session during the academic year and may be adjusted accordingly for summer, holiday, or vacation periods.

**Time Limit on Completion of the Degree**

Students should be aware that they are expected to complete the requirements for their degree, including the project, thesis, or dissertation work, in a timely and expeditious fashion. The timing of the degree indicates the currency of the student's knowledge and training. The number of years to degree is monitored by the New York State Department of Education and other institutions concerned with graduate programs and is often one indicator of the quality of a graduate program. Thus, the policies regarding time limit for completion of degrees have a serious and important academic purpose and are rigorously enforced.

All requirements for the master's degree must be completed within five years of the first semester of study in the Graduate School. This time limit applies to both full-time and part-time students.

All requirements, including the successful defense and presentation of the dissertation for the D.Min. and Ph.D., must be completed within six years of the first semester of study in the Graduate School. Students who complete a master's degree and then continue directly into a GRE doctoral program must complete all requirements within eight years of the first semester of study in the Graduate School. These time limits apply to all students regardless of full-time or part-time status.

The dean generally notifies students in their penultimate year that they are approaching the time limit and the nature of the extension policy. The dean's office also generally informs students commencing their final academic year that they have only one year remaining before the expiration of their time limit.

All students are expected to follow these bulletin policies and monitor their academic progress regularly. Students are required to review their status on my.fordham.edu and DegreeWorks each semester to assure that:

1. All courses taken appear properly and were graded properly.

2. All degree requirements have been met.

3. They have submitted any external transcripts or grades in a timely way for inclusion on their Fordham transcript.

Before the conclusion of their final academic year, the student may apply for an extension to the time limit. Students should be aware that an initial or a further extension to the time limit for degree will be
Conditional Admission, Provisional Admission, and Modified Degree Requirements

Students admitted on a "conditional" basis must maintain a specified grade point average (GPA) or otherwise meet specified coursework requirements to resolve any academic deficiencies in their preparation. Such students are considered matriculated upon their registration/enrollment (see Matriculation). Upon satisfactory completion of the conditions outlined in the student's letter of acceptance, or when specified in a letter to the student from the department or program, the student is released from "conditional admission" status and will remain a matriculated student in good standing for so long as the normal requirements of GRE and of the department or program are met (see Degree Requirements). The department chairperson or program director will initially determine when the required conditions have been met, subject to the approval of the graduate school.

Students who do not complete the previously stated conditions will be dropped from the rolls of the University. Waivers to any specified conditions must be approved in writing by the dean. Students may also be offered "provisional" admission, under which they are required to complete certain conditions, including (but not limited to) the submission of letters of recommendation or test scores, before admission will be granted. Students will not be considered matriculated until these conditions are met. The graduate school reserves the right to modify degree requirements to include additional coursework for students whose academic preparation is deemed by the faculty in some way to be deficient. In particular, students for whom English is a second language (ESL) may be required to complete additional English-language coursework.

Deferral of Admission

It is GRE policy not to permit a deferral of admission, though admitted students may seek permission to delay matriculation by no more than one year. If an accepted student wishes to reapply the following academic year, the student must do so by submitting a new online application. However, admission is not admission upon re-application. Any exceptions must be approved in writing by the dean. Application materials (e.g., letters of recommendation, Graduate Record Examination [GRE] scores) typically remain on file for up to 18 months after their initial submission. Any change of program or degree requires a new application.

Readmission

If a student is dismissed for failure to maintain an adequate grade point average or failure to make satisfactory academic progress, the student may not reapply.

A student who is dismissed for any other reason or who has withdrawn voluntarily may reapply. Students who fail to enroll for two consecutive semesters will be dismissed and will need to reapply. Students who wish to reapply should contact GRE's director of admissions.

Non-Matriculated (Non-Degree) Students

Permission to register as a non-matriculated or non-degree student is awarded by GRE and is granted on a course-by-course basis. Individuals who wish to register as non-matriculated or non-degree students must apply on the GRE website and secure the necessary approvals. Falsifying any information on this application, failing to file the application each semester, or failing to secure the necessary approvals...
will invalidate registration. The student remains liable for tuition and fees notwithstanding the validity of the registration. Students who qualify for non-matriculated/non-degree registration will have earned an undergraduate degree with at least a “B” average in their major field of study and may fall into one of the following categories:

- Students not seeking a degree who wish to take courses for personal enrichment
- Students who wish to take courses pending application to a degree program
- Students who wish to take courses in order to transfer these credits to another graduate program in which they are matriculated

Students who are denied admission to the GRE as matriculated students may not enroll in courses on a non-degree/non-matriculated degree basis without the written approval of the dean. GRE and Fordham University have no obligation to admit any individual who has registered as a non-degree/non-matriculated student or to grant a degree to such a student, no matter how many credits have been completed. Non-degree/non-matriculated students may take up to six credits in GRE, with the approval of the department chairperson and the dean. Approval for non-degree/non-matriculated status for more than six GRE credits is not normally granted. If extraordinary circumstances justify non-degree/non-matriculated status for more than six credits, the student must obtain the explicit written recommendation of the department chairperson and the written approval of the dean. No more than six credits taken as a non-degree/non-matriculated student may ultimately count toward any GRE program of study; any exception to this policy requires the written approval of the dean.

Non-degree/non-matriculated students who register for the first time are considered “new non-degree/non-matriculated” students upon registration. Those who have registered for up to two years are considered “continuing non-degree/non-matriculated” students. Students who have not registered for two academic years are again considered “new non-degree/non-matriculated students” upon subsequent registration and must submit a new application for non-degree study.

Enrollment and Registration

Procedure for Registration

1. Log in to my.fordham.edu, click on DegreeWorks, and check your status in your current program online. Note that any exceptions your adviser makes to your degree requirements will need to be communicated to the registrar in order to appear on this worksheet. Your adviser should submit those changes to the assistant dean.

2. Meet with your adviser to discuss course selection. Your adviser is identified on your DegreeWorks page on the student tab of your my.fordham.edu account. Visit the dean’s office for further assistance.

3. Register through Banner online according to the dates listed on the academic calendar.

Special Registration

Regularly scheduled courses as listed in the GRE Course Schedule (found in the GRE Student Group within Blackboard) will constitute the bulk of coursework for students. Other options for registration include courses offered at other Fordham graduate schools and audits. Students may also enquire about courses through the New York Theological Consortium.

Intercampus Registration

Students who wish to register for courses that are offered in another Fordham graduate school must first obtain the permission of their faculty adviser and the assistant dean. After such permission is obtained, students must obtain permission from the course instructor and the other school’s dean.

Continuous Enrollment

All GRE certificate and degree programs have a continuous enrollment policy. This means that graduate students matriculated in the program must register themselves every fall and spring semester until graduation. Students are considered registered when enrolled for coursework, relevant dissertation, or major paper-related activities, or maintenance of matriculation. The only exception to this policy is the case of a leave of absence approved by the dean for serious and documented medical or personal reasons. Students who fail to continuously enroll will be dismissed from their program and must reapply, and must then meet the degree entrance requirements at the time of re-application. In order to qualify for any form of GRE financial aid, students must take at least six credits per semester.

Registration Changes

Students may add and drop courses online in accordance with the dates specified in the GRE academic calendar. Students may add, drop, or change the grade type of courses without incurring the grade of “W” during the registration period. Students are encouraged to check with their faculty adviser before adding or dropping courses.

A student may drop courses up to the date specified in the GRE academic calendar, thereby incurring a grade of “W.” Students must submit a memorandum including their name, contact information, degree program, student ID number (FIDN), and full information on the requested changes to the assistant dean. If a student drops courses after that date, a grade of “WF” is incurred. Students withdrawing from courses are liable for tuition and fees according to the schedule published on the Fordham Admissions and Financial Aid website.

Adding courses or changing from audit to credit is permitted only up to the last day for registration and only with the written approval of the program director.

A student registered for a course for credit may change their status to audit with the approval of the program director up to the last day of the add/drop period. After this date, a student may only do so with the dean’s permission up to one week before the last class/final examination.

Refunds

The refund of tuition, fees, payments, or the cancellation of charges incurred for tuition, fees, or housing are based on schedules that are issued by enrollment services and published on the University website. They are based on University Policy and are not within the purview of the program director or the dean’s office. The amount refunded or canceled is normally based on the date of withdrawal. Note that the refund policy for online courses differs from other courses.

Updated: 07-27-2020
The University’s refund policies and procedures ensure equitable refunds to students who prematurely terminate all or a portion of their studies.

Non-refundable fees: application, late registration, tuition deposits, and Lombardi membership.

Non-refundable fees after classes begin: student activities fees, laboratory or any other special course fees, and maintenance of matriculation.

Tuition refunds are granted only when a student formally withdraws from the University by filing an official withdrawal form with the bursar’s office. Withdrawal forms are available through the office of the dean and must be signed by the dean. The effective date of withdrawal will be the date this form is received by the bursar, or, in the case of withdrawal by mail delivered to the office of the dean, the post office postmark date on the correspondence. Refund checks will be mailed to the student’s home address approximately four weeks after the request has been received by the bursar’s office. No refunds will be processed until the University has actually received funds from third party payers (i.e. employers, governmental agencies, payment plan services).

The above schedule is based on 100% tuition payment. A week is a seven-calendar-day period beginning with the first day of the semester. Students who withdraw owing any payments will be responsible for the balance due up to the time of withdrawal and will be liable for any costs in the collection of delinquent accounts.

A request for refund or cancellation of charges for tuition other than that listed in the schedule will be considered only if the actual date of the withdrawal is different from that which is indicated on University records. Such a change will be made only for extraordinary reasons. If a student wishes to request such a change, the request must be submitted in writing to the dean’s office and fully detailed. Supporting documentation to justify the change must be submitted with the request.

Failure to Register
Matriculated students who are neither registered nor on approved leave of absence for two continuous semesters are automatically dismissed from GRE. If they desire to continue their education at Fordham, they must apply for readmission following the current procedure, and receive the approval of the director of admission. Such readmission is not automatic.

Fees
The University and its Board of Trustees reserve the right to adjust, without notice, these charges to reflect economic conditions. Please see our website at fordham.edu/gre for current costs of attendance including tuition, fees, and other financial information.

Procedure for Change of Adviser
When students wish to change their adviser, they must submit a written request to the assistant dean. The request should include the student’s name, ID number, and detailed, specific reasons for the request. Changes are granted only in exceptional circumstances.

Procedure for Change of Program
When students wish to apply to change their concentration, program, or degree, they must seek admission to the new concentration, program or degree by contacting the director of admission and completing a new application. Before beginning this process, the change should be discussed with your faculty adviser and a faculty member in the program for which you are considering admission.

Leave of Absence
If a student is unable to take any course during a particular semester, a leave of absence may be granted with the approval of the dean at least 30 days before the beginning of the semester in question. No maintenance of matriculation fee will be required if such a leave is requested in writing and approved. It should be noted that it is the responsibility of the student to make such a request before the fact so that the assistant dean can inform the appropriate University offices, e.g. academic records and enrollment services. Otherwise, it is assumed that the regular fee for maintenance of matriculation is to be paid. Requests for leaves of absence are for one academic semester only and are not renewable without a new application.

Students who encounter circumstances that prevent their continuous enrollment may request a leave of absence through the program director and assistant dean. A leave of absence is normally granted only for extraordinary personal reasons outside the student’s control that prevent involvement in graduate studies (e.g. serious medical problems). In other situations, such as employment opportunities, students are expected to register for maintenance of matriculation (master’s students) or doctoral mentoring (doctoral students).

The request for a leave should specify the reason for the leave and the time period involved, and include related documentation. The dean will grant, deny, or modify the recommendation.

Students who are on academic probation may not be granted an unconditional leave of absence.

Time on a leave of absence counts towards the time limit for completion of a degree. Leaves will not be granted to students whose time limits expire during the period of the leave.

Summer sessions are not included in the maintenance of matriculation fee requirement, except in the instance of the completion of some final requirement after all coursework has been completed, with the expectation of graduation that summer.

Waivers
When seeking a substitution or waiver from a required course, students should meet with their faculty adviser to discuss the request. Afterwards, students can complete the waiver process online.

The waiver of a course requirement allows a student to avoid duplicating a course they have taken at the same level elsewhere in the past. The waiver does not provide transfer credits to the student in question. The waiver simply allows the student to take an alternate class to make up for the credits from the waiver process.

The waiver form must be filled out completely and then submitted online to the assistant dean. Please allow eight weeks for a decision, as the process must move through committees that meet monthly. Along with the waiver form, please submit the syllabus of the non-GRE course for the waiver, substitution, or transfer credit. If the request involves a course not previously submitted to GRE, please also have an official transcript sent at the time of the request. This form must be submitted at least one semester before graduation (i.e. by October 1, 2020 for a May 2021 graduation date). Requests will not be reviewed until at least six credits have been successfully completed in your current program at GRE.
Tutorials
A student in good academic standing who has completed at least 12 credits may register for a tutorial to supplement regularly scheduled courses. Students may take a tutorial as (a) a substitute for a course required for degree completion that is not being offered in the student's final semester of coursework; (b) as a directed reading on a thesis topic that is not offered at GRE, and (c) in exceptional cases, as a substitute for a core degree requirement. Students must fill out a tutorial request form and submit it to the assistant dean, together with a written rationale for the course. The form is available from the assistant dean in consultation with the dean and faculty, the assistant dean will either approve or deny the request. If approved, a faculty will be assigned to facilitate the tutorial. A student on academic probation may not take a tutorial.

A tutorial given by a faculty member outside the student's school requires approval by the adviser and the program director.

The tutorial request form is submitted to enrollment services in order to complete the registration process.

New York Theological Consortium Registration
Graduate School of Religion and Religious Education students have the opportunity to take graduate courses in New York-area schools participating in the New York Theological Consortium Cross-Registration.

Requirements
- Be a Graduate School of Religion and Religious Education master's or doctoral student
- Students will be permitted to take courses not available at the home institution in the academic year in which cross-registration is sought and not "core" or "required" courses for the degree at the home institution without the explicit permission of the program coordinator at the home institution
- Students will be allowed to take one course per semester or other academic terms (except for summer language courses if necessary).
- Only GRE graduate students in good standing shall be eligible to register for classes

New York Theological Consortium Cross-Registration Agreement members:
- Fordham University, Graduate School of Arts and Science
- Fordham University, Graduate School of Religion and Religious Education
- Union Theological Seminary in the City of New York
- The General Theological Seminary of the Episcopal Church
- St. Vladimir's Orthodox Theological Seminary
- New York Theological Seminary
- Hebrew Union College – Jewish Institute of Religion
- The Jewish Theological Seminary

To take Theological Consortium courses, you need the approval of your department/program chair and must complete the Theological Consortium Cross Registration Form.

Withdrawal
Voluntary Withdrawal
Students in good standing may voluntarily withdraw from the program by completing the University withdrawal/leave of absence form, available from the assistant dean. Once they have withdrawn, they must apply for readmission.

Withdrawal by the University
Under limited circumstances, the University reserves the right to withdraw a student whose physical, mental, or emotional health becomes a detriment to the student's continued ability to reside in University housing or their successful completion of academic requirements. The University also reserves the right to withdraw a student whenever the student fails to undertake measures recommended for their own personal health and safety

Graduation Clearance and Commencement
Graduation Clearance
Students are responsible for reviewing their DegreeWorks transcript with their adviser each semester to make sure all grades and registrations are accurate, the correct degree and concentration are listed, and any approved transfer credits have been entered by the Office of Enrollment Services.

Students who have completed all degree requirements in accordance with the guidelines outlined in the Bulletin of the Graduate School of Religion and Religious Education are conferred with degrees by the University. Degrees are conferred in February, May, and September on students who have completed their requirements in the fall, spring, or summer semesters, respectively.

In order to be cleared for graduation, a student must apply for graduation on my.fordham.edu according to the calendar deadline in their final semester in the program, (which is normally during the second week of classes). This process can be completed on my.fordham.edu by navigating to the Student tab, clicking the Self Service banner, then clicking the 'Student' link, then clicking 'Student Records', and finally, clicking on 'Apply for Graduation'.

Students who apply for graduation are cleared by their faculty adviser and the assistant dean, who verifies that all required coursework has been successfully completed and that the major paper and overview, or dissertation, has been approved by their mentor and the dean.

After the dean's office gives academic clearance, the Office of Enrollment Services verifies financial clearance.

It is the students' responsibility to check the academic calendar for specific dates for each deadline. If the graduation application is not submitted on time, or if the student does not complete pending requirements, the degree will be awarded in a subsequent semester. If this occurs, the student must register for maintenance of matriculation (M.A. and certificate), or mentoring (doctoral), for the semester directly preceding the conferral of the degree, according to the continuous
enrollment policy. The student must also reapply for graduation in the new term.

Students who receive September degrees must be registered for the summer session or maintenance of matriculation immediately preceding the conferral of their degrees.

**Overview Survey**

Along with your other degree requirements, each graduating student in the Graduate School of Religion and Religious Education is required to complete an overview survey. The survey provides students with an opportunity to tell us about their experience at GRE, and will assist us in our efforts to improve the quality of education we provide.

Access the survey here. It should take between 30 to 40 minutes to complete and must be completed in one sitting. The survey should be completed by June 15 for September graduates, October 15 for February graduates, and February 15 for May graduates. Students who do not complete this survey on time may not be approved to graduate.

**Ph.D. Dissertation and D.Min. Project Submission**

Ph.D. dissertations and D.Min. projects must conform to the guidelines outlined in the requirements section of each respective program.

- Ph.D. requirements (p. 966)
- D.Min. requirements (p. 962)

Students must submit Ph.D. dissertations and D.Min. projects online after successful completion of the oral defense and final corrections have been approved by their mentors and the dean.

- Visit www.etdadmin.com/fordham
- Click on 'Student,' then 'Submit.'
- Follow the instructions to create an account.
- Continue to the online submission process.

You will receive confirmation from Proquest once you have successfully completed the submission process. The dean's office may contact you if there are issues or concerns regarding your online submission.

Dissertations and doctoral projects will be available online through the ProQuest dissertation database. Note that they will not be placed in the Fordham library stacks.

**Commencement**

Commencement ceremonies are held each May. Students who receive their degrees anytime during the preceding academic year are invited to participate. Students who have submitted the graduation application on time will receive information about commencement and about obtaining the proper commencement apparel. Commencement ceremonies include the University commencement, followed by diploma ceremonies for each school. During the GRE ceremony, diplomas are distributed to master's and doctoral candidates, and hoods are bestowed upon the doctoral degree candidates.

**Additional Commencement Requirements for Doctoral Students**

Only doctoral students who have passed format review and successfully defended their dissertations may walk in the commencement procession, be seated on the dais, and have their names announced during the University commencement ceremony.

**Grievance Policy**

Fordham University does not discriminate on the basis of race, color, creed, religion, age, sex, gender, national origin, marital or parental status, sexual orientation, citizenship status, veteran status, disability, gender identity or expression, genetic predisposition, carrier status, or any other basis prohibited by law.

The Graduate School of Religion and Religious Education employs the following Grievance Procedure covering all matriculated and non-matriculated students. Students who believe they have been discriminated against with respect to participation in, access to, or benefits of any program or activity within the school are requested to use the following Grievance Procedure.

**Informal Procedure**

Since a formal grievance procedure is a last resort, it is assumed that every effort to resolve the grievance through informal approaches has been conducted by the concerned parties. Nevertheless, the use of informal procedures is not a prerequisite for the submission of the grievance through the formal procedure.

**Formal Procedure**

**Step I: School-Wide**

1. An alleged grievance must be brought in writing to the attention of the dean within 25 school calendar days from the time of the incident.

2. The dean will convene the standing committee, which will conduct the review and which must receive a full written statement of the grievance and pertinent substantiating information from both the aggrieved and the person charged at least five days prior to the review date. All review procedures will be restricted to the parties involved. It is expected that this process will take place within 15 school calendar days after the student submits a written statement to the dean.

3. This standing committee is to be composed of two faculty members, selected by the faculty for staggered terms of two years, and one student, selected by the student association for a one-year term. Should one of the standing committee members be the person charged, the dean shall appoint an alternate.

4. The parties will be given an opportunity to attend the meetings and to present information to the committee.

5. The standing committee will render a written statement of the findings together with recommendations for appropriate remedies to the dean within five school calendar days after the review.

6. The dean will meet with the concerned parties within 10 school calendar days to present recommendations for resolution of the grievance to the concerned parties.

7. Should the dean be the person charged, an alleged grievance must be brought in writing to the assistant chairperson within 25 calendar days. The associate dean will convene the standing committee, receive its report, and communicate recommendations for resolution.
of the grievance to the concerned parties within the same time limits as specified above.

**Step II: University-Wide**

1. If either the aggrieved or the individual school against whom charges have been brought feel that the matter has not been resolved, either party may appeal in writing to the appropriate area vice president within 10 school calendar days after the meeting between the dean and the concerned parties in Step I. The appeal should include 1) a concise summary of the charge(s) and 2) an explanation of why the school-wide process was considered unsatisfactory.

2. The vice president will review the grievance process to determine whether proper procedures were followed, or if new evidence not available in Step I is being presented. If the vice president is not satisfied with the handling of the grievance investigation, the vice president will return the grievance to the dean for further investigation. The concerned parties will be notified of the vice president’s actions and decisions within 20 school calendar days of the receipt of the appeal.

3. The vice president for academic affairs is the last court of appeal, and his/her decision will be final.

**International Students**

In addition to the rules and regulations of the University, international students are expected to follow the rules and regulations established by the Department of Homeland Security and the U.S. Citizenship and Immigration Services (USCIS).

For further information and guidance, international students should contact the Office of International Services (OIS), which is a resource center for students and scholars from outside the United States. Information regarding immigration regulations and the benefits foreign students are eligible for under immigration law may be obtained from this office. All international students in F or J immigration status are required to register with the OIS.

**Off-Campus Conduct Policy**

Whether on- or off-campus, students are expected to adhere to the code of conduct established by Fordham University. This applies to students in Fordham off-campus housing as well as students dwelling in non-University-sponsored off-campus housing. The University reserves the right to investigate and subsequently apply University discipline in certain off-campus situations that impact the University community. Refer to the Fordham University Student Handbook for the code of conduct.

**Student Records**

A copy of the University’s policy and guidelines regarding student records under the Family Educational Rights and Privacy Act of 1974 (FERPA) is available from Enrollment Services.

**Change of Name or Address**

Correspondence from the University is sent to the address from the student’s file in Enrollment Services. It is the student’s responsibility to notify the University of any change of address. Likewise, it is the student’s responsibility to notify the University of any change in the student’s name. Notification of the University in the event of either a change of name or address must be done in a timely manner by changing the appropriate information in my.fordham.edu through the Banner self-service link on the student tab or contacting enrollment services.

**Transcript of Record**

An official transcript is one bearing the seal of the University and the signature of the University registrar.

Official academic transcripts may be issued to educational institutions, employers, scholarship/grant/fellowship organizations, application services, government agencies, etc., or to students (for personal use) provided the student discloses the intended final recipient. Current students may view their unofficial transcript online by using their credentials on my.fordham.edu. Official transcripts cannot be emailed or faxed to recipients.

Students and alumni who request an official transcript for personal use may not forward it to another party; doing so renders the transcript unofficial. Transcripts should **always** be issued to the intended final recipient.

The University offers secure electronic transcripts as well as mailed (paper) transcripts. Full details are available from the Office of Academic Records.

Students may request an unofficial transcript listing courses and credits and marked “Unofficial.” Students may also view their unofficial transcript via my.fordham.edu. The University accepts no responsibility for the accuracy of an unofficial transcript after it has been issued.

Transcripts may be requested from the Office of Academic Records following their outlined procedures. They should be requested well in advance of the date desired. No transcripts will be issued for students who have unpaid financial obligations to the University. A fee for immediate processing is charged for each transcript, payable at the time of request. The University reserves the right to change the fee at any time without notice.

The Office of Academic Records may use its discretion to limit the number of transcripts requested at any one time.

Fordham University will make every effort to promptly fill all requests for transcripts but will not assume responsibility for delays. All inquiries concerning issuance of transcripts must be made to the Office of Academic Records within three months of the original request.

Fordham University students who attended prior to 1990, or attended Marymount College prior to 2000, will only be able to receive hard copy transcripts.

**University-Wide Services**

The following list includes services available to all Fordham graduate students. For more information, visit the links below or the Information for Current Students or Student Life sections of the main Fordham University website.

GRADUATE SCHOOL OF SOCIAL SERVICE

Fordham University's nationally recognized graduate programs in social work take a bold integrated approach to the future of the social work profession. Designed with your needs in mind, our graduate programs offer flexible scheduling as well as on-campus and online options. You'll develop both professionally and personally from quality academics driven by a forward-thinking, skills-based curriculum.

Accredited by the Council on Social Work Education, our highly ranked Master of Social Work (M.S.W.) program combines a strong foundation in social work traditions with the ability to design your own advanced course of study. Whether your interest is in direct practice, organizational leadership, or social science research, you'll graduate with a skill set that will be relevant to every population and every setting throughout your career.

Our Program Areas:
- B.A. in Social Work (p. 995)
- Master of Social Work (M.S.W.) (p. 1007)
- Ph.D. in Social Work (p. 1023)

For more information, visit the GSS website.

B.A. in Social Work

The Bachelor of Arts in Social Work (B.A.S.W.) major at Fordham University will prepare you to make a meaningful difference in people's lives as a generalist social work practitioner. Mirroring the strength of our nationally ranked M.S.W. program, our B.A.S.W. degree features a variety of learning experiences: dynamic classes, hands-on fieldwork education, and guidance and support from a faculty adviser. Our diverse community of compassionate students and faculty round out the stimulating educational environment of the Graduate School of Social Service.

With our B.A.S.W. degree, you'll graduate with the skills and knowledge you'll need to promote human rights, social justice, and individual and community well-being.

Offered at our campuses in Manhattan and Westchester, the B.A.S.W. degree is equivalent to the Bachelor's in Social Work (B.S.W.) and is accredited by the Council on Social Work Education (CSWE).

Gregory Acevedo, director of the B.A.S.W. program
212-636-7166
gacevedo@fordham.edu

Admissions

Potential applicants should contact the program director, Gregory Acevedo, Ph.D., at (212) 636-6644 or gracevedo@fordham.edu, as early as possible in their planning. All applications and other materials should be sent to:

Fordham University
B.A. Program in Social Work
113 West 60th Street, Room 716
New York, NY 10023

For more information
See the admissions page.

Requirements

Students are expected to complete the 33 credits of the major within a two-year period, either on a full- or part-time basis. The major consists of eight required courses of three credits each, and a 600-hour, yearlong field practicum and integrative seminar of nine credits beginning in September.

Following admission, students complete the social work program in two years. Depending on their full-time or part-time status, students may take courses in addition to social work courses.

Plan of Study

The coursework is spread across four semesters. You can start your B.A.S.W. program starting in the fall or spring semester.

The first year consists of four classroom courses and faculty advising, and the second year consists of four classroom courses, the Field Practicum and Integrative Seminar, and faculty and field advising.

SOWK 2600 Introduction to Social Work and Social Welfare must be taken before beginning the remaining courses in the curriculum.

Regardless of when you enter the program, you must complete the first year’s four classroom courses before entering the Fieldwork Practicum.

Total Credits 33

Fieldwork Options

For the practicum, you’ll work at a social service agency in close cooperation with an experienced supervisor. During your internship, you’ll work with individual clients while being exposed to larger agency and systems practices and issues.

You have the choice of fulfilling your 570 on-site hours in one of three ways:

- Field education (21 hours): You’ll work 21 hours, over three days per week. Placement begins in September and ends in early May.
- Field education (14 hours): You’ll work 14 hours, over two days per week. Placement begins in September and ends in July.
- Work study: Some students may qualify to work either 21 or 14 hours per week at the social service agency where they are currently employed in a social work capacity.

If you have a conflicting work schedule and cannot perform fieldwork during weekday business hours, we will try to find evening and weekend placements for you but cannot guarantee this. However, you are still required to spend at least four consecutive hours per week at the internship during the agency’s regular working hours, typically 9 a.m. to 5 p.m.

Contact Rachelle Kammer, PhD, via email at kammer@fordham.edu or by phone at 212-636-6660.

Course Listings

SWGS courses

Note: Undergraduate equivalents to SWGS courses use the subject code SOWK. Course descriptions are otherwise identical.

SWGS 5000. Ch First - Ch Abuse & Mal. (0 Credits)
SWGS 5002. LMSW Review Course. (0 Credits)
SWGS 5100. Seminar in Field Instruction. (0 Credits)
SWGS 5500. Executive Education Training. (0 Credits)
SWGS 6000. Transfer Elective. (3 Credits)
SWGS 6005. Contemporary Social Welfare Policy. (3 Credits)

Students will learn that human rights and justice drive social welfare policies and their implementation at the international, federal, state, and local levels. The course introduces students to the underlying values, assumptions and philosophical perspectives that have influenced the development of the US social welfare system, its goals, policies and programs. Students will learn about policy formulation, analysis, and the role of social work in policy development and implementation within their practice settings at the micro, mezzo, and macro levels. The course introduces students to the historical, social, cultural, political, economic, organizational, environmental, and global influences that affect social policy.

Fieldwork

Field instruction is a critical part of the Bachelor of Arts in Social Work (BASW) program. All students in the second year of this major must complete a year-long Fieldwork Practicum and a seminar that integrates the knowledge learned in the classroom with your experiences in the field.

The 600-hour field instruction course consists of:
SWGS 6006. Social Policy I: Policy and Profession. (3 Credits)
Students will learn that social welfare policies and their implementation at the federal, state, and local levels drive the realization of human rights and justice. The course introduces students to the underlying values, assumptions and philosophical perspectives as well as the social, economic and political factors that have influenced the development of this country’s social welfare system, including its goals, policies and programs. Students will learn about the role of social work in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and ways they can actively engage in policy practice to effect change within those settings. The course introduces students to the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They will also become knowledgeable about policy formulation, analysis, implementation, and evaluation.

SWGS 6007. Social Policy II: Policy Practice and Human Rights Advocacy. (3 Credits)
This is the second of two required courses covering content on social welfare policies and services. Building on the first course, this course introduces the knowledge, skills and strategies necessary to examine the impact of specific social policies on clients, agencies, service delivery and practice, and to influence these policies as participants in the major arenas where policy is analyzed, formulated, implemented and changed. This course is offered with a broad focus upon diverse fields of practice or, alternatively with a focus on a specific practice area. Prerequisite: SWGS 6006. This Foundation-level course is usually taken while the student is in the Advanced phase of the program.
Attribute: SOIN.

SWGS 6008. SW & the Law. (3 Credits)
The legal foundations for social welfare policies and programs are examined, including the history and development of the rule of the law, civil liberties and civil rights, sources of different systems of law, due process and legal institutions. Special attention is given to professional relations between lawyers and social workers, their differing values and ethical systems and on preparing social workers to practice in and with the courts.

SWGS 6009. Soc Pol Anal for Macro Prac. (3 Credits)
This course further develops the analytical and political skills needed by social work leaders to effectively address the multiple and complex social issues affecting communities, organizations, planning and administration. Students are exposed to advanced policy analysis skills such as fiscal analysis of government budgets and legislative analysis. The course explores the different ways in which social policies are made and implemented at each level of government, and ways in which analysis can be used by administrators, community and organizational practitioners to affect purposeful change. This course builds on basic policy skills and research principles from foundation-year courses by applying them to questions of policy suitability and effectiveness.

SWGS 6017. Empow PR Immigr & Refuge. (3 Credits)
Empowerment Practice with Immigrants and Refugees is an advanced lecture-seminar course that focuses on critical approaches to practice with/in immigrants and refugees. This course builds on HBSE, social policy, research, and micro and macro practice content in the Foundation Curriculum. This course focuses on: 1) introduction of post-colonial perspective and theoretical representations of immigrant and refugee communities, 2) critical examination of the principles of empowerment practice and understanding of trauma and recovery, 3) effects of displacement and transnational migration on immigrant and refugee individuals and their communities; and 4) social service provision strategies pertaining to working with/in immigrant and refugee communities.

SWGS 6028. Child Abuse. (3 Credits)
This course focuses on intervention with abused children and battered women from an ecological perspective. It highlights the need for trauma-specific interventions with individuals and families, as well as systems-wide advocacy with social and cultural institutions that contribute to the continuation of abuse within family relationships.
Attribute: LCSW.

SWGS 6030. Death & Dying. (3 Credits)
This course examines the experience of death as encountered by social workers in clinical practice. The focus is on providing a theoretical base for understanding the psychosocial aspects of loss, death and bereavement across the life cycle. Additional emphases include strategies, techniques and goals of interventions in clinical work with the bereaved.
Attribute: LCSW.

SWGS 6036. Social Work Practice with Service Members, Veterans, and Their Families. (3 Credits)
This course, open to all advanced year social work students, explores the role of social work within the military in meeting the needs of active duty soldiers, veterans and their families. The course begins with an exploration of social work practice within the military from an historical perspective. The changing demographic makeup of the military and the implications for social work practice are also a part of this exploration. Issues related to the development of cultural competence and cultural sensitivity when working with the military are also explored. The course then focuses on developing an evidence-based understanding of the current social service, mental health, and health needs of active duty soldiers, veterans, and their families and the intervention methods being used to respond to these needs. While the needs of soldiers returning from Iraq and Afghanistan are emphasized, the similar and different needs of veterans from previous conflicts are also considered. The challenges being faced by social workers in meeting the needs of military women, single parents, gay and lesbian soldiers and immigrant soldiers and their family members are also explored. Students analyze and critique current methods of intervention at all levels of practice and consider ways that the social work profession could further contribute to meeting the needs of active duty soldiers, veterans, and their families.
SWGS 6040. Integrating Human Rights and Justice in Practice. (3 Credits)
Every person regardless of position in society or geographic location has fundamental human rights such as freedom, safety and security, privacy, an adequate standard of living, health care, and education. This course introduces students to how social workers may conceptualize the global intersections and interconnections of justice, equality and human rights. Students are introduced to an integrated practice framework that promotes human rights and justice and identifies the root causes of global social issues. They will explore theories that address human need, social, economic, and environmental justice, intersectionality, diversity, and oppression and discrimination. In this course, students learn how to recognize the extent to which a culture’s structure and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Students learn to engage in advocacy to advance human rights, social, economic, and environmental justice domestically and internationally.
Attributes: CEED, CETH.

SWGS 6050. Human Rights and Social Justice. (3 Credits)
Every person regardless of position in society or geographic location has fundamental human rights to freedom, safety and security, privacy, an adequate standard of living, health care, and education. This course introduces students to how social workers may conceptualize the global intersections and interconnections of justice, equality and human rights. Students are introduced to an integrated practice framework that promotes human rights and justice that is influenced by theories for practice that address human need, social, economic, and environmental justice, intersectionality, diversity, and oppression and discrimination. In this course, students learn how to recognize the extent to which a culture’s structure and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Students apply an integrated practice framework to perform a basic analysis of the root causes and consequences of intersectional oppression and human rights violations, advocate for human rights and justice at the individual and system levels, and engage in advocacy to advance human rights, social, economic, and environmental justice domestically or internationally.
Attributes: CEED, CETH, HECS.

SWGS 6103. Social Work and AIDS. (3 Credits)
This course focuses on the impact of HIV and AIDS upon individuals, families and communities. A knowledge base from social work, social sciences, psychology, psychiatry, medicine, law and public policy is used to explore policy and practice implications. Advocacy and case management interventions are stressed.

SWGS 6104. Spirituality & Soc Wk PR. (3 Credits)
This course will explore a number of holistic concepts under the definition of spirituality. The many ways spirituality can be used in a variety of social work practice settings will be the main theme. A range of methods of spiritual practice and approaches to healing will be taught.
Attribute: LCSW.

SWGS 6106. Domestic Violence: Social Work and the Law. (3 Credits)
This course—open to both social work and law students—explores the roles of social work and law in the field of domestic violence. The course is based on the premise that increased interdisciplinary understanding will lead to more effective intervention for both victims and perpetrators. Jointly taught by a social work professor and a law professor, the course provides students with both historical and contemporary perspectives on the social and legal response to domestic violence. An understanding of the practice skills required in the performance of social worker and lawyer roles is emphasized. Specifically, students explore roles in detection, crisis intervention, assessment, and intervention. Students must complete the Foundation requirements.

SWGS 6110. Forensic Social Work Practice. (3 Credits)
Forensic Social Work Practice prepares social workers to practice at the intersection of social work, public health, and the legal system in order to tackle contemporary social problems, such as health disparities and mass incarceration. Many forensic populations, such as racial and ethnic minorities, at-risk youth, the elderly, veterans, immigrants, LGBTQ persons, persons with disabilities, or those living in poverty or communities of violence often lack access to quality services and political, civil, social, economic, and cultural justice. Course participants learn and apply a human rights legal framework and social justice and empowerment theories to guide multi-level prevention, assessment, and interventions with historically underserved individuals, families, and communities. After completing the course, participants will increase their knowledge, values, and skills for collaborative empowerment practice with forensic populations in diverse practice settings, such as healthcare, social service, and legal settings, including protective services, the courts, and corrections.

SWGS 6208. Human Behavior: Social Environment I. (3 Credits)
This is the first of a two-semester course sequence. The course presents content from the behavioral sciences and related professional literature regarding those theoretical constructs and insights most relevant for social work practice. It uses an ecosystems perspective to coordinate and synthesize a broad range of knowledge pertinent to practice concerning the transactional and interactional aspects of large and small systems.

SWGS 6209. Human Behavior: Social Environment II. (3 Credits)
The second semester course in the Human Behavior and Social Environment sequence discusses human development over the life course. Similarities and variations in personal and social functioning; in social, cultural and physical environments; in complex organizations and social institutions. All are examined for insights concerning the interplay between people and their environment. This focus includes biological, psychological and sociocultural factors and how the environment affects individual development. Prerequisite: SWGS 6208.

SWGS 6305. Social Work Skills Lab. (3 Credits)
This skill-based course is anchored in the knowledge of generalist social work practice. Students will develop competency in performing essential social work skills via simulations, role-plays and peer activities. These skills will be applied to working with client systems including individuals, families, groups, communities and organizations. Case scenarios developed for this course will reflect the realities of contemporary social work practice. The emphasis will be on student performance in using the engagement and intervention skills with various client systems.
SWGS 6320. Social Work Practice With Organizations and Communities. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with organizations and communities. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with organizations and communities. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with organizations and communities.

SWGS 6321. Generalist Practice I with Individuals, Families, Groups, Organizations, and Communities. (3 Credits)
This is the first of a three-course sequence that uses a unifying generalist intervention framework to help students make sense of the breadth and depth of the social work profession. The course integrates Human Behavior in the Social Environment theories and constructs throughout the lifespan from infancy to old age, death, and dying. The unifying framework provides clear guidelines for students about each phase of practice when working with individuals, families, and groups by following a multi-step planned change model. The model includes the practice phases of: preparation, engagement, assessment, planning/contracting, implementation, evaluation, termination/referral and follow-up. This approach allows a wide range of flexibility for the application of theories and specific skills. Students will gain a foundation upon which they can continue to add and build skills.

SWGS 6322. Generalist Practice II with Individuals, Families, Groups, Organizations, and Communities. (3 Credits)
This is the second of a three-course sequence that uses a unifying generalist intervention framework to help students make sense of the breadth and depth of the social work profession. The course integrates Human Behavior in the Social Environment theories and constructs throughout the lifespan from infancy to old age, death, and dying. The unifying framework provides clear guidelines for students about each phase of practice when working with individuals, families, and groups by following a multi-step planned change model. The model includes the practice phases of: preparation, engagement, assessment, planning/contracting, implementation, evaluation, termination/referral and follow-up. This approach allows a wide range of flexibility for the application of theories and specific skills. Students will gain a foundation upon which they can continue to add and build skills.

SWGS 6323. Social Work Practice With Individuals Across the Lifespan. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with individuals. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with individual clients. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with individuals.

SWGS 6324. Social Work Practice With Families and Groups Across the Lifespan. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with families and groups. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with families and groups. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with families and groups.

SWGS 6403. Family Oriented Treatment. (3 Credits)
This course provides an introductory overview of major themes of family intervention. The approach is eclectic and integrates theory and practice. The styles of Ackerman, Satir, Minuchin, Bowen, and others are emphasized.
Attributes: LCSW, SWIF.

SWGS 6404. Crisis Intervention. (3 Credits)
This course emphasizes the theoretical base that guides crisis intervention and trauma treatment with individuals, families and groups across the life cycle. Case materials illustrate the assessment and resolution of crisis and trauma in a variety of contexts.
Attribute: LCSW.

SWGS 6409. Prac Older People & Fams. (3 Credits)
This course focuses on direct practice with older people and their families. The course examines the social context of aging, the aging process, associated changes and the effects on older people and their families. Emphasis is on the nature of support systems and the social work role in maintaining and enhancing older people’s functioning and well-being. The role of caregivers, when elders are limited in their capacity to function independently, is examined.
Attribute: LCSW.

SWGS 6413. Clinical SW Prac 1. (3 Credits)
The first of a two-course sequence in advanced clinical social work practice, this course expands and deepens the knowledge base of generalist practice, emphasizing advanced assessment with clients across the life cycle, and evaluation of practice. Treatment planning with individuals, families and groups are all explored. Special attention is given to the assessment of trauma. Prerequisite: SWGS 6319, 6321, 6322; concurrent field practice is required.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6415. Sem: Clinical SW Prac. (3 Credits)
This required course assists students in integrating the knowledge gained in the required clinical practice courses and in field instruction. By developing and presenting an internship case, students demonstrate their ability to integrate theory and practice. Prerequisite: SWGS 6413; concurrent SWGS 6414 and field practice are required.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6416. Advanced Integrated Practice With Individual, Families, and Groups. (3 Credits)
This clinical course furthers generalist practice with experience in the use of evidence-based and evidence-informed practice that responds to major mental health concerns. A focus will be developing competence in effective use of self in applying brief treatment modalities that include skills in working with the change process, crisis intervention, interpersonal therapy (IPT) and/or solution oriented approaches. An introduction to working with clients who have experienced trauma will include the fundamentals of cognitive behavioral models to support use of advanced clinical skills. Students will develop client service plans based on the selection of appropriate theories, intervention models, and evidence informing interventions, including psychoeducation. Students will gain experience as reflective and collaborative practitioners utilizing a practice orientation that attends to human rights and social justice for diverse individuals, families, groups and communities.
Attribute: SWIF.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.
SWGS 6417. Prac: Abusers Alc & Othe. (3 Credits)
This course examines the diagnostic and treatment implications for social work practice with alcoholics and those dependent on other drugs. Addictions are viewed from a bio-socio-psychological perspective. The diversified roles of the social worker are emphasized.
Attributes: LCSW, SWIF.

SWGS 6418. School Social Work Pract. (3 Credits)
This course focuses on the knowledge, values and skills appropriate for social work practice within the school setting. Understanding of the school context and its politics is highlighted. Special attention is given to working with students, teachers, parents and administrators as well as on interfacing with the community. Emphasis is placed on the tasks of social assessment for educational planning, the formulation of goals and objectives, record keeping, accessing school resources and external referrals. Theoretical approaches include problem solving, crisis and role theory, play therapy, brief treatment and group treatment.
Attributes: LCSW, SWIF.

SWGS 6420. Clin SW Pract II Adults & Fam. (3 Credits)
This clinical course furthers generalist practice with experience in the use of evidence-based and informed practice that responds to major mental health concerns. A focus will be developing competence in effective use of self in applying brief treatment modalities that include crisis intervention, motivational interviewing and solution focused approaches. Introduction to working with trauma, with fundamentals of cognitive behavioral models for at risk populations will provide experience in use of advanced clinical skills. Students will gain experience and develop competence in developing a client service plan based on clinical assessment and case formulation that is the basis for choice of theory and evidence to inform intervention. Applied logic modeling will prepare students to identify clinical process and skills that contribute to specific outcome. Students will gain experience as reflective and collaborative practitioners utilizing a practice orientation that attends to human rights and social justice for diverse individuals, families, groups and communities.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6421. Clin SW Pract II Chil Yth & Fam. (3 Credits)
Clinical Social Work Practice II with Children, Youth, and Families uses a developmental framework within a dynamic ecosystems perspective that is trauma-informed as a foundation for advanced clinical practice. Attachment theory anchors assessment and intervention with preschoolers and their families; theories and models of play therapy and social competency are examined as ways to promote social and emotional mental health for school-aged children. Intervention with adolescents focuses on individual youth as well as family system intervention, group practice in school and residential contexts, and community-based multi-system models. The role of prevention, early intervention, and trauma-specific interventions are explored in relation to children, youth and their families. This advanced clinical practice course focuses on the use of evidence to inform practice and the implementation of evidence-based treatment models as they support best-practices. This course aims to create reflective practitioners who can make differential assessments, understand the use and purposes of different modalities of intervention, and learn to develop integrated treatment interventions that are theoretically informed and research-based. The multiple modalities examined in this course include culturally responsive work with parent-child dyads, psycho-education for multi-family groups, parent education, individual, group and family interventions as well as community based practices.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6422. Indiv Oriented Treatment. (3 Credits)
This course provides an overview of the principles, premises and practices of a selected sample of current theories and methods of intensive individual treatment. Examining and comparing the clinical dimensions of history-taking, diagnosis, symptomatology, time and relationship, it focuses on critical appraisal of commonalities and differences across theories with a view toward developing an integrated approach to direct social work treatment of individuals.
Attribute: LCSW.

SWGS 6426. Cognit & Behav SW Pract. (3 Credits)
This course focuses on the theory and practice of cognitive-behavioral social work. Several common problems of children, adolescents and adults are examined, including aggression, depression and anxiety disorders. Techniques that effectively treat these problems such as cognitive reframing, behavior modification, assertiveness training, stress management, the use of homework and bibliotherapy and the evaluation of practice will be introduced.
Attributes: LCSW, SWIF.

SWGS 6428. Soc Wk Pract with Adolesc. (3 Credits)
Adolescence is explored within a developmental context in this course. The importance of maturational norms, family dynamics, class and cultural factors and peer group influence are examined. Particular attention is paid to adolescents at psychosocial risk and to the development of assessment and intervention skills with the adolescent client.
Attribute: LCSW.

SWGS 6429. Meths of Group Intervent. (3 Credits)
This course focuses on group practice as an integral part of social work intervention. It includes theories and methods of work with groups for prevention and treatment, and the use of groups in staff and team relationships. Theory and practice are integrated through an eclectic approach. Teaching is augmented by group exercises.
Attribute: LCSW.

SWGS 6430. Advanced Clinical Assessment and Diagnosis I. (3 Credits)
This course builds on and extends the person-in-environment and eco-systems assessment perspectives of Generalist Practice, specifically by adding assessment of ego functions and defenses, unconscious processes, and internal conflicts. The course also presents critical understanding and utilization of the DSM-5.

SWGS 6431. Adv Clin Assess & Diagno II. (3 Credits)
This course continues the work of biopsychosocial assessment from a social-work value base that was presented in Advanced Clinical Assessment and Diagnosis I. After a review of the core human rights and social justice values that serve as foundation for both 6430 and 6431, it focuses on specific areas of biopsychosocial well being and illness, beginning with those first observable in childhood and adolescence. In subsequent modules, the biopsychosocial functioning related to confronting trauma, connecting to reality, relating to others, managing the body experience, being cared for, and responding to the vicissitudes of life. The course presents the skills and knowledge for the differential assessment of people across the life span, emphasizing the importance of recognizing both strengths and vulnerabilities at all ages and in all areas of functioning. As in Advanced Clinical Assessment and Diagnosis I, at the conclusion of the course students should be able to: complete comprehensive assessments of mental well mental illness in various areas of biopsychosocial functioning; create working case formulations based on their assessments; critically utilize the DSM-IV when appropriate; and identify empirically informed interventions relevant to their case formulations and diagnoses.
SWGS 6432. Comparative Methods of Psychotherapy with Individuals. (3 Credits)
This course provides an overview of the principles, theoretical premises, and practices of a select sample of current theories and methods of intensive individual treatment, including attachment theory, psychodynamic theories, cognitive behavioral therapy, dialectical behavioral therapy, and trauma treatment. Examining and comparing the clinical dimensions of assessment and diagnosis, intervention strategy, and client/worker relationship, the course focuses on a critical appraisal of commonalities and differences across theories and examines the literature on evidence-based practice. It focuses on a set of common factors present in interventions with individuals and considers the variables of race, ethnicity, gender, and sexuality as it situates theories in an ethical and value-informed framework. The course emphasizes the applicability of various theories in direct social work treatment.

Attribute: SWIF.

SWGS 6433. Relational Pr-Ch/Adol/Adults. (3 Credits)
This course will emphasize the application of relational theories of attachment theory, ego psychology, object relations theory, self psychology and women’s relational theory to social work practice. Risk and protective factors in child development will also be considered. Case materials of children, adolescents and adults will be discussed.

SWGS 6434. Evidence Based Mh Pract. (3 Credits)
This course is aimed at developing the knowledge and skills necessary for working with individuals with a diagnosis of serious mental illness using recovery-oriented, evidence-based practices. Students will become familiar with evidence-based practices, within a recovery-oriented paradigm, as a general approach to practice as well as specific evidence-based interventions to use for individuals with a diagnosis of serious mental illness. It is assumed that students will have a basic knowledge of serious mental illness, however, a review will be provided. Students will learn to examine research literature to determine the various levels of support for specific interventions and essential principles for translating research into practice. In addition, they will identify the appropriate treatment outcomes that reflect effective, quality mental health practice. Each evidence-based practice presented will also be examined for its utility with diverse groups. Providing assessment and treatment to a diverse group of individuals with a diagnosis of serious mental illness is the focus of this course and will be discussed in detail. This is a clinical elective and SWGS6430 Advanced Clinical Assessment and Diagnosis is required.

Attributes: LCSW, SWIF.
Prerequisite: SWGS 6430.

SWGS 6436. Trauma Trmt/Child & Adol. (3 Credits)
This course will introduce students to the common concepts underlying evidence-based treatment for traumatized children and adolescents, using a case analysis format. Trauma is broadly defined, and includes children and adolescents exposed to traumatic events including, but not limited to natural disasters, war, abuse and neglect, medical trauma and witnessing interpersonal crime (e.g. domestic violence) and other traumatic events. The course will highlight the role of development, culture and empirical evidence in trauma-specific interventions with children, adolescents and their families. It will address the level of functioning of primary caregiving environments and assess the capacity of the community to facilitate restorative processes.

Attributes: LCSW, SWIF.

SWGS 6438. Social Work Practice: LGBT Individuals. (3 Credits)
This lifespan-based course examines issues affecting lesbian, gay, bisexual, and transgender (LGBT) individuals and their identities as well implications for clinical social work practice. Based upon an understanding of the ways in which heterosexism and homophobia are embedded in the social milieu, students will identify strategies for serving these populations. Topics will include the nature of sexual orientation, LGBTQ identity formation, transgender identity, as well as family and relationship configurations. The course will focus on the mental and physical healthcare needs of LGBTQ individuals, the role of religion and spirituality, as well as possible clinical interventions that increase positive mental and physical health outcomes.

Attribute: SWIF.

SWGS 6439. Evid Based Pract Child & Fam. (3 Credits)
Pre-Requisite - SWGS 6901.
Attributes: LCSW, SWIF.
Prerequisite: SWGS 6901.

SWGS 6440. Advanced Clinical Assessment and Diagnosis. (3 Credits)
The course builds on the skills, values, knowledge and processes of the generalist curriculum, serving as a bridge between generalist and advanced assessment theory and practice. Specifically, the course extends the person-in-environment assessment perspective of Generalist Practice with the addition of more intensive assessment of the individual's inner world, including psychodynamic conflicts processes and ego defenses. The course is entitled "Advanced Clinical Assessment and Diagnosis" rather than "Psychopathology" to remind students that clinical assessment need not lead to a diagnosis of mental illness. The course covers practitioner self-awareness; the relationship between mental health and mental illness; risk and resilience; bio-psycho-social-spiritual assessment; a strength-informed cooperative assessment process; a critical use of the DSM-5, and major types of mental illness and their evidence-supported treatments.

SWGS 6442. Social Work Practice and Integrated Behavioral Health Care. (3 Credits)
This course, designed for people in their specialist year, prepares students for the direct practice of integrated behavioral health in primary care and other health care settings. Students will become knowledgeable of the roles of behavioral health providers working in health care settings, theories and models of care delivery, and systemic and cross-cultural issues affecting health and health outcomes. Building upon core competencies from generalist practice, students will develop skills in engagement, assessment, intervention, and evaluation in integrated health care. In addition, students will develop social work competencies necessary for supporting patients across a range of health conditions and health care settings and effective interprofessional practice. The importance of ethics and collaborating with individuals, families, and the health care team will be underscored.

Attribute: SWIF.

SWGS 6443. Suicide Assessment & Treatment. (3 Credits)
Suicide Assessment & Treatment.

SWGS 6444. Interventions in Clinical SW. (3 Credits)
Apply theoretical concepts to practice experience.

Updated: 07-27-2020
SWGS 6445. Social Work Practice in Healthcare. (3 Credits)
This course focuses on clinical social work practice in health care settings using a biopsychosocial–spiritual approach with an emphasis on gaining skills in assessing and intervening with individual patients and family members. Students will learn about best practices in patient-centered care and issues in health care across the life span. They will learn what it’s like to work on an interdisciplinary team and how to work in different health care settings. Students will gain an awareness of the issues in health care and social work practice in relation to age, gender, gender identity, and expression, sexual orientation, disability, socioeconomic class, ethnicity, and social justice related to disenfranchised populations. Students will learn about social determinants of health, health care disparities, health literacy, and health promotion. Health care across the lifespan and with different cultural groups will be examined. Students will understand the impact and meaning of serious and life limiting health conditions in individuals and families, including the psychosocial and spiritual issues. Students will learn about the values and ethics for the profession in health care practice, common ethical dilemmas in health care, and how to assess and address ethical dilemmas. Self-care strategies are discussed.
Attribute: SWIF.

SWGS 6471. Palliative Social Work. (3 Credits)
Palliative Social Work.
Attribute: SWIF.

SWGS 6472. Grief, Loss and Bereavement. (3 Credits)
This course will investigate: the theoretical framework(s) for understanding grief, loss and bereavement; review multiple experiences/definitions of grief; address the impact of both culture and religion on the grief experience; review complicated and uncomplicated grief in adults; and address the basics of childhood and adolescent grief. The course will also introduce various counseling intervention techniques, and present a sample of complementary and cognitive focused interventions.
Attribute: SWIF.

SWGS 6474. Comparative Models of Interventions with Individuals. (3 Credits)
This course provides an overview of the principles, theoretical premises, and practices of a select sample of current theories and methods of intensive interventions with individuals. The course will examine and provide a critical assessment of theories, including psychodynamic and self-psychologically informed interventions, attachment theory and its relationship to clinical practices, and trauma treatments such as EMDR and Somatic Experiencing treatments. Additionally, it will look at the role of cognitive-behavioral and dialectical behavioral treatments.
Attribute: SWOC.

Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6598. International Audit. (0 Credits)
Audit of a GSS course at an international campus.

SWGS 6599. Continuing Education SW. (0 Credits)

SWGS 6605. Community Organization. (3 Credits)
This course provides a history of community organizing, especially in the context of the social work profession and as a way of meeting the needs of vulnerable and at-risk populations and communities. Focus is on the various community organizing models and the array of roles and functions of community organizers. Emphasis is on practice strategies and tactics for assessing, planning, implementing, and evaluating community organizing projects and campaigns.
Attribute: SWOC.

SWGS 6614. Integrating Technology in Social Work Practice. (3 Credits)
PREVIOUS TITLE: TECHNOLOGY IN SOCIAL WORK PRA.

SWGS 6615. Supv & Staff Development. (3 Credits)
This course examines supervision and staff development as management functions in diverse agency settings and within the context of social work values and ethics. The philosophy, functions, principles and methods of supervision as well as staff development and training are covered. Emphasis is given to the knowledge and skills required to motivate and retain an effective and multicultural workforce, and to effectively supervise varying levels of staff (volunteers, nonprofessionals, professionals) during turbulent times.
Attribute: SWOC.

SWGS 6616. Prog & Proposal Dev. (3 Credits)
Students learn, step-by-step, to develop and prepare proposals, design programs, seek foundation funding and respond to grant requests. Attention is given to what makes programs and proposals effective and would enhance the likelihood of funding. Emphasis is on how program proposals relate to both organizational mission and funding interests and offer opportunities to serve underserved, neglected, vulnerable and at-risk populations.

SWGS 6622. Advanced Integrated Practice With Organizations and Communities. (3 Credits)
This course prepares social work practitioners who operate within and through frameworks of human rights, social, economic and environmental justice, and empowerment practices. Learners will be trained to engage in social change at all levels of society in order to become social workers who are committed to equity all forms. By cultivating advanced community and organizational practice skill development, the course focuses on transforming and enhancing capacities in communities and organization through inclusive and collaborative strategies while increasing access to resources innovations and collaborations. A multidimensional model of organizational and leadership practice within a macro practice lens is used to organize and integrate theories, research, and content. Emphasis is on learning to implement changes within macro level contexts that is consistent with social work values, human rights, social justice and equity.
Attribute: SWOC.

SWGS 6624. Int Social Dev-Global Cxt. (3 Credits)
This course aims to expand students understanding of the global context and to equip students to work with diverse communities locally or internationally. International social development increasingly becomes the core component of change, hence the essence of social work as a profession with international coherence and global reach. As small communities everywhere are part of a larger machinery affecting the social and economic tapestry of the world, it is crucial for social work professionals to gain a better understanding of significant global issues, and to be prepared to engage in global social development, as agents of change. The course will focus on enhancing student's skills in the areas of community building; community needs assessment and capacity mapping; community organizing; stakeholder analysis; and advocacy. The course is designed around the following themes: (1) international social development and social work theoretical perspectives and the roles of a social worker in the global context; (2) globalization, global issues and the consequences of these issues for communities and their residents from an international perspective; (3) human rights and the implications of choosing to become an agent of change from a human rights perspective; and (4) international social development current approaches; best practices and future trends. This is an administrative elective.
Attribute: SWOC.
SWGS 6625. Fundraising. (3 Credits)
A significant portion of work in the social welfare arena involves the nonprofit sector, which depends on philanthropic resources and public funding to function and survive. Resource development in the nonprofit sector relates to every dimension of social work practice. On a micro level, funding supports the direct services provided by social workers and other human service professionals. On a macro level, organizational administrators and community leaders collaborate with foundations and other philanthropic entities to support organizational, community, and societal change. This course introduces students to resource development and stewardship via two predominant channels: fundraising and grant making. The course emphasizes supporting the well-being of vulnerable populations. In addition to the development of foundational knowledge and concrete skills, the course conceptualizes philanthropy and fundraising within the framework of human rights, social justice and the NASW Code of Ethics.
Attribute: SWOC.

SWGS 6626. Social Innovation: Theory and Practice for Change Makers. (3 Credits)

SWGS 6627. Leadership and Macro Practice 1. (3 Credits)
Frameworks of human rights, social and economic justice, and empowerment. Our students will become social workers who are committed to social change in all forms, transforming and building capacities in communities and organizations, through inclusive and collaborative strategies, via anti-oppressive practices, increasing access to resources, innovations, and collaborations.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6628. Leadership and Macro Practice 2. (3 Credits)
The two-semester Leadership and Macro Practice course prepares social work practitioners who operate from the frameworks of human rights, social and economic justice, and empowerment. Our students will become social workers who are committed to social change in all forms, transforming and building capacities in communities and organizations, through inclusive and collaborative strategies, via anti-oppressive practices, increasing access to resources, innovations, and collaborations.

SWGS 6702. Advanced Integrated Policy Practice. (3 Credits)
This advanced policy practice course builds on the competencies acquired in the foundation year. The course introduces a rights-based approach to policy practice and advocacy. Using human rights principles, students will learn how to use specific policy analysis frameworks to plan for and develop advocacy strategies that facilitate social change. Students will learn and apply specific advocacy skills, addressing policy issues in community, organization, and legislative settings.
Attribute: SWPP.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6705. Comparative Social Policy and Advocacy. (3 Credits)
This course explores the similarities and differences among helping systems in the United States and other societies. This includes consideration of historical, economic, political, and social forces which influence the nature and functioning of those systems. Other topics covered include social development and the globalization of social problems.
Attribute: SWPP.

SWGS 6715. Health Care Policy and Advocacy. (3 Credits)
This advanced policy practice course builds on the competencies students acquire in their generalist year. The course focuses on health care policies and advocacy and expands upon the rights-based approach to policy practice in health care. Students will actively participate in analyzing existing disparities in health and health care and the causes of these disparities by reviewing the evolution and interactions of federal, state, local government, and private policies. The course will address the current system and its challenges and opportunities, highlighting the importance of affordability, accessibility, quality, and availability. Students will learn to apply rights-based advocacy skills, addressing policy issues in community, organizational, and legislative settings.
Attribute: SWPP.

SWGS 6801. Social Work Practice in Research 1. (3 Credits)
This course introduces students to social work research. It focuses on the scientific method from the process of developing knowledge to critically evaluating research. This course focuses on: problem formulation; research methodology, including study design, sampling, measurement, and data collection; and ethical issues in research.

SWGS 6802. Social Work Practice in Research 2. (3 Credits)
In this second course in the foundation research sequence, students implement the proposed class research projects. The course includes content on data collection and analysis, how to interpret the theoretical and practical meaning of findings for social work practice, and how to report on and present data. Basic computer skills and statistical concepts (SPSS) are presented through ‘hands on’ training in the computer laboratory.
Prerequisite: SWGS 6801.

SWGS 6803. Applied Social Work Research and Evaluation. (3 Credits)
This course introduces students to social work research. It focuses on the scientific method from the process of developing knowledge to critically evaluating research. Students will learn about formulating a research question; research methodology, including study design, sampling, measurement, and data collection methods; ethical issues in research; and understanding how to read and understand research reports and publications.

SWGS 6805. Science and Psychotherapy. (3 Credits)
This course explores the interconnections of science and the practice of psychotherapy. Topics include psychotherapy outcome, process, and neuropsychological research; the debate over manualized therapy and common factors; clinical use of measures; research on the impact of gender identity, race/ethnicity, sexual orientation, and social class on therapy process and outcome; and implications of psychotherapy research for the diverse practice roles of social workers.
Attribute: SWRE.

SWGS 6806. Program Evaluation. (3 Credits)
The use of evaluative research in social welfare planning, program development and theory building is examined. Recent evaluations of social work practice, including interventions on a social policy, neighborhood, family and individual level, are reviewed. Traditional research designs are considered, but emphasis is placed on emerging models of evaluation. Course is appropriate for students preparing for direct service practice. Note: Research students, with approval from the director of the doctoral program, may enroll in the SWGS 7000 course series listed in the Doctoral Course Offerings.
Attribute: SWRE.
SWGS 6807. Qualitative Inquiry in Social Work Practice. (3 Credits)
This course is devoted to qualitative inquiry in social work as a method to promote individual and community well-being and empowerment. Students will become more competent in using a variety of traditional and emerging qualitative approaches. These methods include narrative, phenomenology, grounded theory, ethnography, practice and arts-based action, and participatory action research. The course prepares students to engage in qualitative research aiming to explore the issues experienced by oppressed individuals, groups, and communities. The course also addresses how to translate research findings into practice. Attribute: SWRE.

SWGS 6812. Advanced Research I. (3 Credits)
This is the first of a two-course sequence in which students design and conduct an original research project submitted as a master's thesis. The course focuses on techniques of a literature review, definition of a research problem, hypothesis formulation, design of data collection instruments and writing a research proposal. Prerequisite: SWGS 6805 (unless a waiver has been obtained by examination); concurrent field practice required.

SWGS 6813. Advanced Research II. (3 Credits)
This is the second of a two-semester sequence in which each student completes an original research project as a master's thesis. The course focuses on advanced data analysis using statistical software, including data management, data transformations, presentation of data using tables and graphs and report writing. Prerequisites: SWGS 6805 (unless a waiver has been obtained by examination) and SWGS 6812; concurrent field practice is required.

SWGS 6814. Advanced Integrated Practice Evaluation and Research. (3 Credits)
This course focuses on intervention and program evaluation research. Students will develop skills in designing evaluation strategies to provide evidence for practice. The course will include how to critically analyze, monitor, and evaluate interventions and program processes and outcomes. Application of findings to improve practice effectiveness at the micro, mezzo, and macro levels will be discussed. Attribute: SWRE. Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6901. Fieldwork and Integrative Seminar 1. (3 to 4.5 Credits)
Actual practice with a limited work load under close supervision designed to assist the student in applying theory to practice and to enable the student to master fundamentals of generalist practice. Includes 10 two-hour seminar sessions. Fourteen hours per week from September through July; 21 hours per week from September through May.

SWGS 6902. Fieldwork and Integrative Seminar 2. (3 to 4.5 Credits)
Actual practice with a limited work load under close supervision designed to assist students in applying theory to practice and to enable students to adapt fundamentals of practice to a particular concentration and field. Includes 10 two-hour seminar sessions. Prerequisite: SWGS 6901; Advanced Standing students are exempt from this prerequisite. Fourteen hours per week from September through July; 21 hours per week from September through May.

SWGS 6903. Fieldwork & Is 1 Online. (3 or 6 Credits)
Fieldwork & Is 1 Online.

SWGS 6904. Fieldwork & Is 2 Online. (3 to 9 Credits)
Fieldwork & Is 2 Online.

SWGS 6907. Field Practicum Laborato. (0 to 3 Credits)
This required laboratory course for students who enter as experienced employees in the social services complements the Generalist Social Work Practice with Individuals, Families and Groups I and II. The focus is on the integration of classroom learning with practice. Assignments are closely related to issues covered in these practice classes. Class participation, process recording, presentations, role-playing and focused journal writing are important tools in the course. Upon satisfactorily completing this course, students will receive three credits and will be eligible for SWGS 6908, Combined Field Work in the following academic year.

SWGS 6908. Combined Field Work. (7 or 8 Credits)
Open only to students admitted to the Experienced and Employed Social Service Practitioner plan, this course combines a review of fundamentals of practice with a focus on applying fundamentals in a particular concentration and field of practice. Students are in placement 28 hours per week from September through May, and are required to attend 10 two-hour seminar sessions during the work day or in the evening. Prerequisite: SWGS 6907.

SWGS 6911. Foundation Field Instruction. (0 Credits)

SWGS 6912. Advanced Field Instruction. (0 Credits)

SWGS 6918. Combined Field Instruction. (7 or 8 Credits)

SWGS 7002. Adv Stat in Soc Welf. (3 Credits)
Building on SWGS 7012, this course covers such topics as ANCOVA, MANCOVA, linear regression methods, logistic regression, and an introduction to path analysis. The course links theory, statistics, hypothesis testing and measurement. Students are expected to be proficient in the use of SPSS statistical package.

SWGS 7003. Qual Meth SW Research. (3 Credits)
This course explores the conditions under which qualitative research methods are desirable and feasible, the nature of qualitative information, and the relationship between the researcher and the research subject. Methods of qualitative research, as well as the process of developing inferences from findings are examined.

SWGS 7004. Philosophy of Science. (3 Credits)
This course examines theory and theory development and their roles in social work. Focus is on social work epistemology, salient issues in social work theory, and the critical appraisal of ways of knowing.

SWGS 7005. Theories of Social Work. (3 Credits)
This course explores, critically examines and compares the major theories of social work practice with individuals. It covers the historical contexts in which theories emerged, their underlying assumptions and their empirical support. The course draws on the works of major social work thinkers as it spurs students to consider implications for theory development and research.

SWGS 7006. Program Performance/Practice. (3 Credits)
Evaluation of program performance and practice.

SWGS 7007. Advance Social Work Practice. (3 Credits)
This course focuses on the use of translational research, development, evaluation research, and complex and chaotic systems theories to advance social work practice. The focus will be on social work practice within a human rights and social justice framework in diverse settings with marginalized and diverse populations (i.e., agencies, hospitals, residential settings, and communities).
SWGS 7008. Family and Group Work. (3 Credits)
This course parallels in format and structure SWGS 7005. In it, students examine the major theories of group work and family practice, the evidence base for practices, and innovations in practice, research and theory.

SWGS 7011. Statistics Lab. (0 Credits)
This lab class is taken with SWGS 7012, Statistics I.

SWGS 7012. Statistics I. (3 Credits)
This course introduces the statistical techniques most commonly used in social welfare research. The course will include the following topics: an introduction to descriptive and inferential statistics, level of measurement, frequency distribution, cross-tabulations, measures of central tendency, parametric vs. nonparametric statistics, normal curve, z scores, confidence intervals, introduction to significance testing, t scores, chi square, correlation and one way ANOVA. Computer analysis using statistical software is taught with an emphasis on interpretation of results.

SWGS 7013. Statistics 2 Lab. (0 Credits)
This lab class is taken with SWGS 7002, Statistics II.

SWGS 7102. Organizational Theory. (3 Credits)
This course examines the major theoretical perspectives that describe and explain organizational behavior and organizational processes, including classical, human relations, political economy and organizational culture approaches. Emphasis is placed on the application of organizational theory to human service organizations and the management of them.

SWGS 7200. Soc Pol Theo & Analysis. (3 Credits)

SWGS 7202. Bioethics Principles. (3 Credits)
This course will include an overview of the philosophical foundations of the principles of medical ethics and present a methodology for their employment in the attempted resolution of these questions. Of particular importance will be consideration of the issues of patient and professional autonomy, confidentiality, informed consent, distributive justice and the movement toward managed care, euthanasia and physician assisted suicide. The course will be conducted as a seminar centered on the analysis of case studies.

Attribute: HECS.

SWGS 7300. Internship. (3 Credits)
This course or SWGS 7301 provides social work experience for non-M.S.W. doctoral students in a research, policy-making or educational setting. Can be taken during a regular semester or during the summer semester for 140 hours.

SWGS 7301. Internship. (6 Credits)
This course provides experience for non-M.S.W. doctoral students in a research, policy-making or educational setting. It can be taken for two semesters, during the academic year or summer session, for 280 hours in lieu of SWGS 7300.

SWGS 7302. Internship. (0 to 6 Credits)
This two semester course provides experience for doctoral students in a practice, research, policy-making or educational setting. It can be taken for two semesters during the academic year or summer session, in lieu of SWGS 7300 or 7301.

SWGS 7408. Indepnt Stud Child/Fam. (3 Credits)
This course is designed to assist students in further developing their understanding of problems and issues in services to children and families. The student, with the aid of a mentor, will select one area of special interest for extensive reading, study, and investigation.

SWGS 7409. Child & Family MH Policy. (3 Credits)

SWGS 7420. Res in Mh/Fam/Children. (3 Credits)
This course examines current research in policy, service delivery and practice in mental health and with children and families. Emphasis is placed on the identification of necessary knowledge, research gaps and the application of effective research methods. This course may be substituted for SWGS7403 or SWGS 7614 in the curriculum.

SWGS 7502. Pol Dev Impl Elderly. (3 Credits)
This course focuses on major policies determining entitlements for older persons in the United States, roles of governmental and private sectors, inequities in American society affecting older persons. A second focus is on comparative analysis of gerontological social policy in other countries, including Third World nations. A third component is the synthesis of strategies for effective social policy for older persons.

SWGS 7503. Research Iss Aging. (3 Credits)
This course includes a survey of practice and theoretical knowledge of aging developed through research efforts. Work will focus on the content and the methodology of research studies and their contributions to theory, policy and practice in the field of aging. Emphasis is on identification of knowledge in aging and application of research methods.

SWGS 7508. Theories Prac Older Pers. (3 Credits)
This course will focus on different theories on aging and the range of programs which have developed to meet the differential needs of older people. Practice issues relevant to diverse older populations such as the frail elderly; healthy, active older persons; ethnic and racial minorities; and isolated persons will be discussed. Emphasis will be placed on emerging theories on aging and research efforts designed to expand knowledge of the aging process.

SWGS 7509. Indepnt Stud in Geronto. (3 Credits)
This course is designed to assist students in further deepening their understanding of problems and issues in gerontology. The student, with the aid of a mentor, will select one area of special interest for extensive reading, study and investigation.

SWGS 7605. Social Work Education. (3 Credits)
This course examines the principles, policies, philosophies and processes of learning and teaching in social work. It reviews the historical evolution of social work education and develops implications for classroom and field instruction.

Attribute: SOIN.

SWGS 7606. Tchn for the Profession. (3 Credits)
This course examines in depth the philosophy, principles, processes and pragmatics of teaching and learning in classroom and field setting. Emphasizes 1) educational concepts, premises, models, frameworks and 2) planning effective curriculum and teaching strategies.

SWGS 7610. Women and Poverty. (3 Credits)
This course will focus on low-income women in the USA. Attending to the multidisciplinary dimension of race, class and gender, the course will explore ways in which poverty affects quality of life, opportunities, choices and human potential. Contemporary policy issues will be explored and varied social change strategies critically analyzed for their potential in achieving economic justice for women.

SWGS 7616. Indf1 Study in Mental He. (3 Credits)
This course is designed to assist students in deepening their understanding of problems and issues in mental health. The student, with the aid of a mentor, will select one area of special interest for extensive reading, study and investigation.
SWGS 7620. Theories in Mh/Psych Dev. (3 Credits)

SWGS 7700. Survey Research Methods. (3 Credits)
This course examines methods used in descriptive research, including descriptive research designs, principles of causality, sampling data, data collection and ethical issues.

SWGS 7710. Experimental Research Mtds. (3 Credits)
This course examines experimental and quasi-experimental designs, experimenter and statistical controls, threats to internal and external validity, and strategies for analyzing significance and effectiveness of outcomes.

SWGS 7720. Measurement. (3 Credits)
This course examines quantitative and qualitative approaches to data collection in social work research. Among the topics covered are scale construction, case studies, qualitative approaches to data collection and use of existing records. Data analysis is linked to principles of measurement and measurement theory.

SWGS 7730. Data Management & Analysis. (3 Credits)
This course covers topics related to data management and analysis, including using data files, calculating sample size, preparing data analyses plans, and maintaining the quality of one's data at each phase of the research enterprise.

SWGS 7740. Grantsmanship. (3 Credits)
This seminar will cover the knowledge and skills necessary to prepare grant applications for both government and foundation funding; covering applications for applied research projects as well as those proposing program demonstrations, clinical trials and evaluation.

SWGS 7781. Poverty and Race. (3 Credits)
This course provides an overview of U.S. social policies. It reviews the evolution of American social welfare policies, social welfare theories, and examines the condition, conceptual framework and empirical evidence of policies that target poverty in the United States. Particular emphasis is placed on the impact of policies on marginalized and disenfranchised populations.

SWGS 7782. Policy Implementation. (3 Credits)
Drawing on theories of implementation and innovation, this course provides an in-depth examination of policy implementation in different fields of practice. It focuses on factors that promote and hinder policy implementation, as well as the historical contexts in which major policies have been implemented.

SWGS 7783. Policy Analysis Seminar. (3 Credits)
Using available frameworks for policy analysis, this course encourages students to critically analyze existing policies. It considers the implications of these analyses for the study of policy development, implementation and evaluation.

SWGS 7791. Advanced Seminar I. (1 or 2 Credits)
Concurrent with or following their advanced year research methods and specialization courses, all students take three advanced seminars. A faculty member with expertise in children and families, gerontology, or mental health research leads each seminar. The purpose of the seminars is to expose students to current research issues and methods in these substantive areas. In the process of examining such topics as the state of knowledge in each field, debates and controversies, research design, and emergent policy and practice themes, students are helped to develop and refine their research and scholarly interests in ways that lead to dissertation ideas.

SWGS 7792. Advanced Seminar II. (1 or 2 Credits)
Concurrent with or following their advanced year research methods and specialization courses, all students take three advanced seminars. A faculty member with expertise in children and families, gerontology, or mental health research leads each seminar. The purpose of the seminars is to expose students to current research issues and methods in these substantive areas. In the process of examining such topics as the state of knowledge in each field, debates and controversies, research design, and emergent policy and practice themes, students are helped to develop and refine their research and scholarly interests in ways that lead to dissertation ideas.

SWGS 7793. Advanced Seminar III. (1 or 3 Credits)
Concurrent with or following their advanced year research methods and specialization courses, all students take three advanced seminars. A faculty member with expertise in children and families, gerontology, or mental health research leads each seminar. The purpose of the seminars is to expose students to current research issues and methods in these substantive areas. In the process of examining such topics as the state of knowledge in each field, debates and controversies, research design, and emergent policy and practice themes, students are helped to develop and refine their research and scholarly interests in ways that lead to dissertation ideas.

SWGS 7800. Research Practicum. (0 Credits)
This one semester course is designed to provide advanced year students with practical experience in social work research. Students are expected to work under the supervision of a faculty member on some aspect of an ongoing research endeavor.

SWGS 7801. Teaching Practicum. (0 Credits)
This one semester course is designed to provide advanced year students with practical experience in teaching at a graduate or undergraduate level. Students may fulfill this requirement by teaching a graduate or undergraduate level course or by working as a teaching assistant for a faculty member for seven hours per week.

SWGS 7950. Doctoral Foundation Seminar I. (3 Credits)

SWGS 7960. Foundations Seminar II. (3 Credits)
Part II of a two semester course that will orient first year doctoral students to the social work scholarly community. The course will cover topics such as: Understanding human rights, social, economic and environment justice, Ecosystem and micro/mezzo and macro perspectives.

SWGS 8999. Independent Study. (3 Credits)

Domain and Specialist Courses

The courses below apply toward each of the domain areas in the advanced portion of the curriculum.

Individual and Families

Courses in this group have the SWIF attribute.

Master of Social Work (M.S.W.)

Ranked in the top 10 percent in the nation by *U.S. News & World Report*, Fordham University’s Master of Social Work (M.S.W.) program will prepare you to engage effectively across all areas of social work throughout your career.

The world of social work is complex and changing. That’s why we’ve developed a dynamic, forward-thinking curriculum that starts with a comprehensive foundational phase focusing on skills that are grounded in theory and ethics.

After completing core courses, you’ll move to the advanced phase, where you’ll create your own plan of study in one or more advanced practice areas:

- **Individuals and Families**: Learn how to provide direct services that address clients’ environment and overall well-being.
- **Organizations and Community**: Be prepared to work effectively with entire communities and various types of organizations, including private and public companies and nonprofits.
- **Evaluation**: Become a more versatile social worker as you study and apply new ideas in the field.
- **Policy Practice and Advocacy**: Develop skills related to managing organizations and systems, creating policy, writing grant proposals, and obtaining funding.

Accredited by the Council on Social Work Education, our M.S.W. curriculum is designed to turn you into a highly competent, integrated practitioner who has the tools to succeed in every setting.

By earning a Fordham M.S.W., you’ll join an academic community that’s as passionate about social justice as you are. If you’re ready to change the world, we’re ready to help.

For more information, please go to the [Fordham GSS Website](#).

**Admissions**

Gain the knowledge and skills you need to achieve your professional goals. Apply to the Master of Social Work program at Fordham University. We encourage applications from people who can meet the academic requirements of a graduate-level program and who demonstrate that their personal qualities and values are compatible with the mission of social work: To improve the lives of others.

**Prerequisites**

- Bachelor’s degree from a regionally accredited college or university.
- 18 undergraduate credits in liberal arts content.

The GRE is not required for admission into this program.

For more details about the application process for our on-campus M.S.W. program, please click here.
For more details about the application process for our online M.S.W. program, please click here.

Requirements
Our Master of Social Work (M.S.W.) degree is a 66-credit program. It consists of:

• 48 credits of classwork.
• 18 credits of fieldwork experience

The first 33 credits are part of the Generalist Phase; everyone takes the same courses at this level. The remaining 33 credits are part of the program’s Specialized Phase.

Programs

Program Modalities

• M.S.W. Dual Degree Programs (p. 1009)
• M.S.W. Hybrid (p. 1009)

Full Time Plan of Study
In the full time plan of study, students generally can complete their M.S.W. program in two academic years. It consists of:

• Two years of classroom coursework (24 credits each year).
• Two years of fieldwork (9 credits per year).

Your fieldwork includes a generalist and specialist year practicum. The practicum schedule is 21 hours OR 14 hours per week. All students are expected to complete 600 hours of fieldwork placement per year (1,200 hours total over the two-year period).

Part Time Plan of Study
The part-time plan of study is for students who would like a slower pace to completing their M.S.W. degree. In this plan of study, you can complete your M.S.W. degree in three to four years.

You can begin this plan with two classes per semester in the first year. Fieldwork placement is added in the second year. You also have the option of completing some courses during summer sessions (usually mid-May to early July).

Advanced Standing Plan of Study
Graduates of a Council on Social Work Education (CSWE)-accredited undergraduate social work program within the past five years may apply for admission into the specialized practice year (second year) of the two-year program OR one year of CSWE-accredited M.S.W. coursework may be eligible for the advanced standing program. You can complete your M.S.W. in as little as one year or can go part time and complete your M.S.W. in two years.

Experienced Employed Social Service Practitioner (EESP) Plan of Study
Employed and Experienced Social Worker Plan (EESP) students are not required to fulfill a fieldwork assignment during the generalist phase of the M.S.W. program. You complete a single, 28-hour-per-week practicum (900 hours in total) at your place of employment during the Specialist Phase.

To qualify for this plan, you must already be employed in a social service agency doing related work under the supervision of an employee with an M.S.W. degree. Your employer must provide you with a fieldwork placement that is different from your daily work, with a different supervisor who has an M.S.W. degree and has taken (or will take) the Seminar in Field Instruction (SIFI) offered by all local graduate programs of social work.

Fieldwork
Your Fieldwork Practicum is an integral part of Fordham University’s master of social work (MSW) degree and uniquely prepares you for your career as a social work professional.

The 1,200-hour, 2-year Field Instruction course conveys 18 credits and consists of:
• A weekly Fieldwork Practicum.
• 20 two-hour-long Integrative Seminar classes scheduled over four semesters.

You’ll fulfill your fieldwork at one of a multitude of agencies throughout the tristate area. You will be supervised by an experienced employee at the agency who has an MSW degree and has completed the Seminar in Field Instruction.

**Generallist Phase Students**
During the Foundation Phase (the first 33 credits) of the MSW program, your practicum introduces you to generalist social work practice and the clients that social workers traditionally serve. We consider your geographic location, schedule of available hours, and your work and volunteer experience when we arrange your placement. Most agencies will require an interview.

Students in the Employed and Experienced Social Worker Plan (EESSP) of study are not required to take a Fieldwork Practicum during the Foundation Phase. However, you will participate in Lab Practicum, a three-credit class that prepares you for the transition from employee to student in an agency. The course is closely modeled after the Foundation Phase Integrative Seminar.

**Specialist Phase Students**
Your field instruction during the Advanced Phase (the last 33 credits of the program) reflects your MSW degree concentration, if applicable. Students in the Advanced Phase participate more actively in choosing where they are placed and they interview at the placement site.

Estalla Williamson, Director of Field Education 212-636-6797 or ewilliamson5@fordham.edu

**M.S.W. Dual Degree Programs**
The Graduate School of Social Service offers three dual degree programs:

- The M.S.W./Master of Public Health (M.P.H.) joint degree program with the Icahn School of Medicine at Mount Sinai (ISMMS) enables you to tailor your dual degree, combining one of the Fordham M.S.W. concentrations with one of ISMMS’ eight MPH tracks.
- The M.S.W./Juris Doctor (J.D.) dual degree program with Fordham University School of Law prepares you to advocate for your clients’ needs as a social worker or in the legal field.
- The M.S.W./Certificate in Psychotherapy with the Blanton-Peale Institute and Counseling Center offers advanced clinical experience through a field placement at the Center.

If you have questions, contact Elaine Congress, Associate Dean at 212-636-6667 or congress@fordham.edu.

**M.S.W. Hybrid**
Fordham’s online hybrid master of social work (M.S.W.) option on Long Island, is a collaborative program with Molloy College that combines traditional face-to-face classes at Molloy’s campus with online courses. In the online courses you will meet weekly with your professor and classmates in synchronous sessions as well as pace your own learning with asynchronous course content.

The Hybrid M.S.W. option enables more Long Islanders to conveniently obtain a Fordham University M.S.W. degree. We offer full-time, part-time and Advanced Standing plans of study with both fall and spring start dates. If you have questions, contact Jennifer McKinnon, Director of the Fordham/Molloy Collaborative program at 516-323-3884 or mckinnon@fordham.edu.

**Fieldwork**
Your Fieldwork Practicum is an integral part of Fordham University’s master of social work (MSW) degree and uniquely prepares you for your career as a social work professional.

The 1,200-hour, 2-year Field Instruction course conveys 18 credits and consists of:

- A weekly Fieldwork Practicum.
- Two-hour-long Integrative Seminar classes scheduled over four semesters

You’ll fulfill your fieldwork at one of a multitude of agencies throughout the tristate area. You will be supervised by an experienced employee at the agency who has an MSW degree and has completed the Seminar in Field Instruction.

**Fieldwork Placements**
The field instruction office places over 1,000 MSW students in fieldwork every September. Whether you have limited hours, family responsibilities, long commute, or financial concerns, we work diligently to secure a placement for you that is educationally sound, challenging and responsive to your needs as well as the participating agencies’ needs.

Your placement can be located near your home or job. Reasonable travel time (one hour or less) is an important consideration to us in determining where you do your fieldwork.

We place students in agencies in the five boroughs of New York City, Long Island, Westchester, Rockland, and other upstate counties, Connecticut, and New Jersey.

Students may work in schools, hospitals, tiny storefront operations, or large multiservice community agencies. They may serve infants, grandparents, or all ages in between; the homeless or the emotionally troubled; ethnic and racial minorities; or diverse oppressed sectors of the population, such as offenders or the victims of offenders.

**Your Fieldwork Schedule**
You have a choice of fulfilling your fieldwork requirement by working:

- Twenty-one hours per week, which usually entails three weekdays from 9 a.m. to 5 p.m. Placement begins in September and ends in early May.
- Fourteen hours per week, in blocks of time tailored to your schedule. Placement begins in September and ends in early August.

For Additional Resources for Field Instruction please click here.

M.S.W. On Campus

With three New York campus locations and an accredited online M.S.W. program, the Fordham Graduate School of Social Service (GSS) has a place for you—whether you prefer a fast-paced urban campus, the tree-lined suburbs, or the convenience of online study.

Whichever location you choose, you’ll be part of an exciting diverse community that is making a difference in the lives of individuals, families, and societies across the country and around the world. You can complete all your degree requirements at any campus or online. For more Information, please contact 212-636-6000.

Manhattan Campus

We offer B.A.S.W., M.S.W., and Ph.D. programs at Fordham University Lincoln Center campus in the heart of midtown Manhattan:

113 West 60th Street (corner of Columbus Avenue)
New York, NY 10023

Directions

Westchester Campus

We offer B.A.S.W. and M.S.W. programs at Fordham University Westchester campus. You can complete all your degree requirements on this campus.

Located conveniently off I-287, I-684; and the Hutchinson River Parkway, our three-story, state-of-the-art building sits on 32 landscaped acres in West Harrison, NY.

400 Westchester Avenue
West Harrison, NY 10604

Directions

GSS Fordham/Molloy College Hybrid Program on Long Island

In our traditional Fordham/Molloy Program, students take some coursework on the Molloy College campus in Rockville Centre, NY, complete their field placement on Long Island and also attend some classes at the Manhattan campus.

The Fordham/Molloy Hybrid M.S.W. Option offers both face-to-face and online classes to our Long Island students for full-time, part-time, and Advanced Standing plans of study. The M.S.W. degree is awarded by Fordham University.

The collaborative Fordham/Molloy M.S.W. program is located at:

Molloy College
1000 Hempstead Avenue
Casey Building, C-014
Rockville Centre, NY 11571-5002

516-323-3884

Directions.

Plans of Study

Fieldwork

Your Fieldwork Practicum is an integral part of Fordham University’s master of social work (MSW) degree and uniquely prepares you for your career as a social work professional.

The 1,200-hour, 2-year Field Instruction course conveys 18 credits and consists of:

- A weekly Fieldwork Practicum.
- Two-hour-long Integrative Seminar classes scheduled over four semesters

You’ll fulfill your fieldwork at one of a multitude of agencies throughout the tristate area. You will be supervised by an experienced employee at the agency who has an MSW degree and has completed the Seminar in Field Instruction.

Fieldwork Placements

The field instruction office places over 1,000 MSW students in fieldwork every September. Whether you have limited hours, family responsibilities, long commute, or financial concerns, we work diligently to secure a placement for you that is educationally sound, challenging and responsive to your needs as well as the participating agencies’ needs.

Your placement can be located near your home or job. Reasonable travel time (one hour or less) is an important consideration to us in determining where you do your fieldwork.

We place students in agencies in the five boroughs of New York City, Long Island, Westchester, Rockland, and other upstate counties, Connecticut, and New Jersey.

Students may work in schools, hospitals, tiny storefront operations, or large multiservice community agencies. They may serve infants, grandparents, or all ages in between; the homeless or the emotionally troubled; ethnic and racial minorities; or diverse oppressed sectors of the population, such as offenders or the victims of offenders.

Your Fieldwork Schedule

You have a choice of fulfilling your fieldwork requirement by working:

- Twenty-one hours per week, which usually entails three weekdays from 9 a.m. to 5 p.m. Placement begins in September and ends in early May.
- Fourteen hours per week, in blocks of time tailored to your schedule. Placement begins in September and ends in early August.

For Additional Resources for Field Instruction please click here.

Legacy Curriculum Plans of Study

Plans of Study for students beginning prior to Fall of 2018 (Legacy curriculum)

- M.S.W. Part Time Advanced Standing - Clinical Concentration
- M.S.W. Part Time Advanced Standing - Leadership and Macro Practice Concentration: Human Service Leadership (Focus A)
- M.S.W. Part Time Advanced Standing - Leadership and Macro Practice Concentration: Community Based Practice & Leadership (Focus B)
- M.S.W. Part Time Advanced Standing - Research Concentration

M.S.W. Online

The Online M.S.W. program can be completed in as few as four terms for traditional students and two terms for advanced standing students. Each term comprises two eight-week mini sessions of intensive instruction, providing a more manageable balance of coursework and field education, especially for students who choose to enroll in full-time M.S.W. study. Our Online M.S.W. program combines the best of both worlds where you will meet weekly with your professor and classmates in synchronous sessions as well as pace your own learning with asynchronous course content.

For more information

Contact Patricia Heard, Senior Director of Online Education 914-367-3022 or pheard@fordham.edu.

Fieldwork

Field education is an integral part of your Master of Social Work (M.S.W.) program, whether you are enrolled as a traditional or advanced standing student. Our approach is to put you in the field soon after you start classes so you can spend the maximum amount of time refining your skills while helping both individuals and communities.

Updated: 07-27-2020
When it is time to start your field education, a placement specialist will meet with you to discuss your goals and secure appropriate sites for you near your area. The Field Education Department will approve each placement before you begin, ensuring your sites reflect our program's core values while providing meaningful experience that you can apply across a variety of professional settings after graduating.

During each placement, you will be supervised by a professional social worker employed at your site. In order for you to receive the best training possible, supervisors are required to have an M.S.W. and complete a seminar in field education.

Field education comprises a foundation phase, advanced phase, and a field advising seminar.

- Foundation field education: Traditional students spend the first half of their curriculum applying generalist social work skills while supporting individuals, families, groups, organizations and communities.
- Advanced field education: All students complete specialist field placements that support micro and macro practice skills.
- Field advising seminar: All students take the field advising seminar each year they are enrolled. Led by their faculty adviser, students meet in small groups to discuss their field education experience, problem solve, and create a community of learning related to practice and field education.

**Full Time Plan of Study**

In the full-time plan of study, students generally can complete their MSW program in two academic years. It consists of:

- Two years of classroom coursework (24 credits each year).
- Two years of fieldwork (9 credits per year).
Your fieldwork includes a generalist and specialist year practicum. The practicum schedule is 21 hours OR 14 hours per week. All students are expected to complete 600 hours of fieldwork placement per year (1,200 hours total over the two-year period).

If you have any questions, contact Linda White Ryan, Assistant Dean of Student Services at 212-636-6605 or whiteryan@fordham.edu.

**Part Time Plan of Study**

The part-time plan of study is for students who would like a slower pace to completing their MSW degree. In this plan of study, you can complete your MSW degree in three to four years.

You can begin this plan with two classes per semester in the first year. Fieldwork placement is added in the second year. You also have the option of completing some courses during summer sessions (usually mid-May to early July).

**Ph.D. in Social Work**

Fordham University’s Ph.D. in Social Work program empowers you to be a leader of change in education, research and organizations. From our campus at Lincoln Center, the unparalleled diversity of the New York metropolitan area offers unique opportunities for you to collaborate with faculty in research, training, and educational projects while earning your PhD in Social Work.

Contact Gregory Lawrence Farmer, Director of the Ph.D. program at 212-636-7081 or farmer@fordham.edu.

**Admissions**

**Admission/Application Process**

Are you prepared to be a leader of change in social work education and research? Apply for the PhD in Social Work program at Fordham University. We encourage applications from individuals committed to a tradition of learning, service and social justice.

**Prerequisites**

Applicants must have:

- A master's degree in social work or related field.
- Cumulative undergraduate GPA of 3.0 or better.
- Graduate GPA of 3.5 or better.

**Deadlines**

Students are admitted in the fall semester only. All application materials are due February 1.

**Required Application Materials**

Every application must include the following 9 elements.

1. **Completed application form.**
2. **Statement of Career Activities and Plans.** This brief essay should indicate why you are pursuing a PhD, explain your experience and scholarly interests, and state how the PhD curriculum will help you achieve your career goals.
3. **Undergraduate and graduate transcripts.** Official transcripts from all undergraduate and graduate schools you attended are required.
4. **Two professional (employment) references.**
5. **Two academic references.**

If you do not have two academic references, you may substitute a third professional reference for one academic reference.

1. **Complete Resume or CV.**
2. **Publications, written reports and presentations.** Please submit copies of your written work that demonstrates your capacity for doctoral study.
3. **GRE scores:** Verbal Ability, Quantitative Ability and Analytic Writing scores are required.
   - The school code for the Graduate School of Social Service is 2252.
   - The PhD department code is 5001.
   - Further information on the GRE exam can be found at the [GRE website](https://www.gre.org).
4. **Application fee.** $75, payable by credit card on the [online application](https://admissions.fordham.edu/apply) page. If you must pay by check, please send a check payable to Fordham University to the address below.

We encourage you to submit all materials via our [online application](https://admissions.fordham.edu/apply). If you must send some items by mail, such as published work or a check, please send them to:

Fordham University
Graduate School of Social Service
Office of Admission
113 West 60th Street, Suite 608
New York, NY 10023

**Questions?**

Our Office of Admissions is available to answer your questions and concerns throughout the application process. Please email us at gssadmission@fordham.edu or call 212-636-6600.

**Requirements**

The Ph.D. in Social Work program consists of 48 credits of coursework and a dissertation.

- Full-time students can complete all coursework in two academic years.
- Part-time students complete their courses in three to four academic years.

**Plan of Study**

**Curriculum for students beginning as of Fall 2018 (New curriculum)**

**Ph.D. Full Time Plan of Study**

**Ph.D. Part Time Plan of Study**
Curriculum for students beginning prior to Fall 2018 (Legacy curriculum)

Ph.D. Full time Plan of Study - Social Work Practice Concentration

Ph.D. Part time Plan of Study - Social Policy Concentration

Program Policies and Resources

Program Objectives and Structure

Overview

The program of doctoral study consists of two major components: Coursework and dissertation. These integrated components are designed to teach students the knowledge and skills necessary for future leadership positions in policymaking, service development, education, practice, and research.

The program requires a minimum of two years to earn the 48 credits necessary for the degree. Students may take courses on a part time or full time basis. During the first two to four years of study students complete 48 credits.

A primary objective of the Ph.D. program is to educate social work scholars and researchers. In support of this objective the curriculum consists of two required courses in social statistics, four required research methods courses that cover quantitative and qualitative research methods, and a course on the philosophy of science.

In addition to the required courses, students may choose to enroll in additional research methods and statistics courses either in the Graduate School of Social Service or in other divisions of the University. All students are required to take at least one semester of an advanced research practicum in conjunction with their third or fourth required research methods course. During the practicum they will assist a faculty member in an on-going research activity.

A major responsibility of all social work doctoral programs is to prepare graduates who will assume academic positions in social work education. In recognition of this responsibility, the Ph.D. program offers a course on social work education. In addition, all students are expected to take a one semester teaching practicum in which they will assist a faculty member in the design, development, and delivery of a graduate-level social work course. Students who have the interest and expertise will have the opportunity to teach in the Graduate School of Social Service's M.S.W. and B.A.S.W. programs.

Rounding out the coursework are elective courses and independent study, which give students the opportunity to individualize their education further and develop greater knowledge in particular areas. Students are expected to take some of their electives in other academic divisions of the university to broaden their perspectives on particular topics. To ensure integrity in the coursework academic advisors assist students when they choose electives.

Upon completion of 48 credits and passing the doctoral comprehensive examinations, each student begins to work on developing a dissertation proposal. At this point the student assembles a dissertation committee that will review and approve the dissertation proposal.

After a successful proposal review each student continues to work with the committee, which oversees execution and completion of the dissertation research. The dissertation committee is chaired by a faculty member and includes two other members one of whom is selected from outside the Graduate School of Social Service. Although the dissertation committee is formed officially after students pass all comprehensive examinations, students are encouraged to discuss dissertation ideas with faculty members while they are taking courses. This process should help students to identify possible committee members before they must begin to prepare dissertation proposals.

While in the dissertation phase, students are required to register each academic semester for the maintenance matriculation with mentoring course.

Electives

Students take 6 credit hours of electives offered in GSSS Doctoral Program or other doctoral programs at Fordham University. At times after approval from the doctoral faculty advisor and the director of the Doctoral Program, a Doctoral student may be permitted to take a master level course.

In order to qualify for doctoral level credit, a course must:

- Further the student’s knowledge in the area of study or research reflected in his or her educational program.
- Present material not covered in the student’s previous education or other available doctoral level courses.
- Involve an assignment agreed to by the instructor and the student that exceeds work required of Master’s level students.
- Provide evidence of familiarity with prevailing theory and conceptualization of practice at a greater breadth, depth, and higher level of abstraction.

To meet the above criteria, the student must contract with the course instructor that these expectations will be met and must present to his or her faculty advisor, a written justification for taking the course.

If in the advisor’s judgment the student’s proposal fits into the student’s learning plan, the advisor recommends approval to the Director of the Doctoral Program. The Program Director must authorize any independent study.

Six credits in elective courses are a required minimum. Students might wish (or may be asked) to take more electives to gain added knowledge in their areas of concentration and to have better preparation for the Comprehensive Examination.

Electives may be taken in other graduate departments of Fordham University with the advice and consent of the student’s advisor, the Director of the Doctoral Program, and the chairperson of the other Fordham University graduate department.

Academic Progress Expectations and Timeline

Completion of Coursework

Full-time and part-time students are expected to complete course work in two to four years, respectively. Full-time matriculated students are expected to be enrolled in three or four courses per semester. Part-time matriculated students are expected to be enrolled in at least two courses per semester.

Completion of Comprehensive Examinations Paper

Students must complete this requirement within thirteen months of completing coursework. Students will be given two opportunities to complete this requirement.
Completion of a Dissertation Proposal
Students are expected to successfully defend a dissertation proposal within one year of passing comprehensive examinations.

Completion of Dissertation Research
Students are expected to successfully defend a dissertation within two years of successfully defending a dissertation proposal.

Grading
Grading System

</table>

Grading Policies
Students are required to maintain at minimum a B average in all courses (with no more than one grade lower than B) to remain in the Doctoral Program.

Grades in doctoral classes are based upon the student’s participation in class, examinations, and/or a final paper. The expectation for a final paper is that it will be comparable to a manuscript that could be submitted for publication.

University established deadlines for dropping courses will be adhered to, except in the case of an emergency. A written request to drop a course after the official drop deadline must be presented to the Director of the Doctoral Program, stating the nature of the emergency.

Incompletes in a course are granted only in case of an emergency. Excessive time demands will not be considered justification for an “incomplete” grade. Students should anticipate their workload demands, including coursework, outside employment, and family and personal obligations when signing up for courses at the beginning of the semester. A signed contract with the instructor, specifying the nature of the emergency and the revised completion date is required. The revised completion date must be within one month at the end of the course, except in extreme circumstances. If the incomplete continues after the month, the Director of the Doctoral Program must be notified in writing with the reason for the delay and a proposed date for completing the work. The incomplete will convert to a grade of F if the student fails to complete the course work by the revised date.

A student with an incomplete who does not have any grades of B+ or lower upon retaking the required course they will be dematriculated from the program. If the student achieves a grade of B- or lower upon retaking the required course they will be dematriculated from the program.

Students are expected to maintain at least a B average to remain in good standing in their studies. Students who receive a grade of B- or lower in more than one course will not be considered to be in good academic standing. Students who receive a second grade of B- or lower in any course will be removed from doctoral studies, pending the outcome of any appeal they make to the director of the program, the Doctoral Curriculum and Policy Committee, and/or the dean of the Graduate School of Social Service.

The program director will review the progress of students at the end of the academic year. Faculty advisors will be notified if any students are having difficulty in meeting the standards of the program, and will be asked to communicate this to the students so identified.

Practicums
Students enroll in practicums to enhance teaching and teaching skills.

These courses have the same numbers as the internships. Zero-credit, one-semester practicums in research (SWGS 7800 Research Practicum) and teaching (SWGS 7801 Teaching Practicum) are required for all students in their advanced year of studies. In certain cases (when educationally indicated), extending over two semesters, students may earn up to six credits for practicums in research and/or teaching. Students interested in this option should consult with the program director and their advisor.

Internships
Policy
When educationally indicated, a student may take or be required to take a professional practice internship as a required elective. This internship will be undertaken to enhance and broaden a student’s knowledge of and competency in a M.S.W. area where previous experience is inadequate. The internship may be required for all Ph.D. candidates who do not hold a master’s degree in social work and for all international students without a comparable M.S.W. in order to provide them with a professional social work experience in a social agency setting. Where indicated by the student’s goals and the educational plan developed, internships might include administrative or research experience. Internships may not be undertaken at an agency where the student is currently employed.

The internship shall be zero-credit course for one or more semesters, a one-semester practicum, three credit course or a two-semester, six credit course, carried out through the equivalency of one day a week over a semester (three credits), or over an academic year (six credits), or for a block of fifteen days for each three credits during the summer session.

Goals
1. To enhance student’s capacity for conceptualization through the formulation and testing of policy, program or practice principles in a social work setting.
2. To extend student’s knowledge and competence in the application and analytical examination of theoretical concepts, differential interventions or differential planning.
3. To extend the student’s opportunity for testing and developing innovative ideas.
4. To extend the student’s capacity to engage in social work theory building.
5. To extend the student’s ability to integrate areas of specialization and research

Procedures
Planning for the internship typically should take place during the beginning of the second semester of the first year, when the student and faculty advisor meet to discuss an educational plan. If internship is seen as part of the plan, student and advisor will identify the focus of the internship. The advisor or another faculty member may then serve as preceptor for the internship.

When an internship is required as a condition of program admission planning, it may commence at the onset of study.

Role of Internship Preceptor
The preceptor shall:

1. Meet with the student to clarify the focus of the internship and insure that the student has all necessary information about the nature of internships and the proposal outline.
2. Discuss the student’s idea for the internship, work with the student on the plan in relation to the educational objectives, in collaboration with the student select the type of agency setting conducive to their attainment and determine those methods to be employed in goal achievement.
3. Negotiate with the identified agency about the student’s placement, its objective, planned activities and duration.
4. Serve as liaison with the agency based internship supervisor.
5. Prior to the completion of the internship consult with the supervisor and the student about the nature and quality of the internship experience.
6. Collaborate with the student in designing an outline for the final paper review the final paper and grade the internship.

In consultation with the preceptor and advisor, the student shall write a proposal prepared in accordance with the Outline for Internship Proposals. After review with student first by the preceptor and then by the advisor, the proposal will be submitted to the Director of the Doctoral Program for final approval.

If the Director has questions about the proposal, the student and preceptor may be asked to meet for discussion. When modifications are necessary, there will be a subsequent review prior to approval.

Proposals for the internship should have the signature of the preceptor and the advisor, together with any additional comments they might wish to make.

Students taking the internship are required to register for one or all of the following courses:

- SWGS 7300 Internship (one semester)
- SWGS 7301 Internship (two semesters)
- SWGS 7302 Internship (non-credit)

Statistics Course Waivers
Students may waive Statistics 1 and/or Statistics 2 by passing waiver examinations.

Statistics I and II are required courses in the Doctoral Program. To avoid redundancy in student’s education, qualified students are allowed to waive these courses. The waiver application must be submitted the Director of the Doctoral Program. The instructor(s) for the course(s) for which the waiver(s) is(are) requested will review the application(s) and decide whether the waiver(s) is(are) approved.

Please note that waivers do not apply to students who receive transfer credit, which is given at the time of admission. Waivers are for students who are not eligible for transfer credit, but believe they may have fulfilled the statistics requirement by having taken graduate-level courses. Students who fail Statistics I or Statistics II may not request a waiver in lieu of re-taking either course.

A student must take a data analysis course(s) outside of the Graduate School of Social Service to replace the credit hours for each of the Statistics I and II courses for which a waiver is approved. A data analysis course may be an advanced statistics course (e.g., advanced regression analysis, path analysis, structural equation modeling) or a course on qualitative data analysis (e.g., content analysis, narrative analysis, linguistic analysis).

Research design courses, either in quantitative or qualitative methods, may not be used to meet this requirement. The number of credits of advanced data analysis courses must be equal to the number of credits for which a waiver is received (i.e., 3 credits if only Statistics I is waived and 6 credits if both Statistics I and II are waived). Prior approval of the advanced data analysis course(s) taken in the event of a waiver of Statistics I and/or II must be obtained from the Director of the Doctoral Program.

Waiver Criteria
To waive Statistics I or Statistics II, students must have received a grade of B or better in an equivalent statistics course. This course must have been completed within the past five years. Applications for all waivers must be verified by a check of the transcript by the Director of the Doctoral Program of the decision.

In consultation with the preceptor and advisor, the student shall write a proposal prepared in accordance with the Outline for Internship Proposals. After review with student first by the preceptor and then by the advisor, the proposal will be submitted to the Director of the Doctoral Program for final approval.

If the Director has questions about the proposal, the student and preceptor may be asked to meet for discussion. When modifications are necessary, there will be a subsequent review prior to approval.

Proposals for the internship should have the signature of the preceptor and the advisor, together with any additional comments they might wish to make.

Students taking the internship are required to register for one or all of the following courses:

- SWGS 7300 Internship (one semester)
- SWGS 7301 Internship (two semesters)
- SWGS 7302 Internship (non-credit)

Statistics Course Waivers
Students may waive Statistics 1 and/or Statistics 2 by passing waiver examinations.

Statistics I and II are required courses in the Doctoral Program. To avoid redundancy in student’s education, qualified students are allowed to waive these courses. The waiver application must be submitted the Director of the Doctoral Program. The instructor(s) for the course(s) for which the waiver(s) is(are) requested will review the application(s) and decide whether the waiver(s) is(are) approved.

Please note that waivers do not apply to students who receive transfer credit, which is given at the time of admission. Waivers are for students who are not eligible for transfer credit, but believe they may have fulfilled the statistics requirement by having taken graduate-level courses. Students who fail Statistics I or Statistics II may not request a waiver in lieu of re-taking either course.

A student must take a data analysis course(s) outside of the Graduate School of Social Service to replace the credit hours for each of the Statistics I and II courses for which a waiver is approved. A data analysis course may be an advanced statistics course (e.g., advanced regression analysis, path analysis, structural equation modeling) or a course on qualitative data analysis (e.g., content analysis, narrative analysis, linguistic analysis).

Research design courses, either in quantitative or qualitative methods, may not be used to meet this requirement. The number of credits of advanced data analysis courses must be equal to the number of credits for which a waiver is received (i.e., 3 credits if only Statistics I is waived and 6 credits if both Statistics I and II are waived). Prior approval of the advanced data analysis course(s) taken in the event of a waiver of Statistics I and/or II must be obtained from the Director of the Doctoral Program.

Waiver Criteria
To waive Statistics I or Statistics II, students must have received a grade of B or better in an equivalent statistics course. This course must have been completed within the past five years. Applications for all waivers must be verified by a check of the transcript by the Director of the Doctoral Program. Students are notified of a decision as soon as possible so they can enroll in another course if they qualify for the waiver.

Application Procedure
1. Applications are submitted to the Director of the Doctoral Program for review. A separate application must be completed for Statistics I and for Statistics II.
2. After verifying that the student has received a grade of B in a statistics course that was taken within the past five years, the Director of the Doctoral Program will send the application to the statistics course instructor.
3. The statistics course instructor will notify the student and Director of the Doctoral Program of the decision.

Comprehensive Examinations
Purpose
The student will demonstrate mastery of a substantive area of social work or social welfare and the ability to design an empirical study. Demonstration of that knowledge will require the student to integrate and synthesize empirical and theoretical knowledge; critically analyze the existing research, including substantive gaps and methodologic weaknesses in the research; and discuss the implications of the study the design on practice and policy.

Successful completion of the comprehensive paper and all course work allows students to proceed to the dissertation.
Comprehensive Exam Paper

The student will develop a comprehensive exam paper. The student will work independently on the paper without consultation from any other person. The university’s academic honor code applies to this comprehensive exam paper. The guidelines on plagiarism, including citing sources, paraphrasing, and the use of direct quotations found in the Publication Manual of the American Psychological Association (APA) should be followed. The paper will integrate policy, practice, theory and research evidence concerning a substantive area of social work or social welfare. The paper will:

- a) identify of a substantive area of social work or social welfare
- b) integrate discussion of the theories, policies and social work practices associated with the identified substantive area of social work or social welfare
- c) critically analyze the existing research, including substantive gaps and methodologic weaknesses in the research
- d) identify research question(s) critical for the advancement of knowledge in the identified substantive area of social work or social welfare;
- e) develop a research proposal for an empirical study that addresses the research questions;
- e) contain an appendix containing a systematic literature review focused on the identified research questions.

The comprehensive paper will be a maximum of 25 pages, not including the references and appendix.

Comprehensive Paper Proposal

Students will submit a proposal for the comprehensive exam paper. The paper proposal must be approved before beginning work on the paper. There are three deadlines for submission of comprehensive exam paper proposals: September 1, December 1, and May 1.

Students will receive feedback on the proposal within three weeks after submission. The paper is due four months after receiving approval for the proposal.

The proposal will include the following:

1. Problem statement, description of the substantive area of social work or social welfare that will be the focus of the paper, and its relevance to social work
2. List of references cited in the proposal in APA format

The length should be a maximum of three pages, excluding the reference list.

Comprehensive Paper Structure

The page ranges here are suggestions within the maximum of 25 pages, not including the references and appendix.

1. **Definition and scope** of the topic (including main subtopics (1 to 2 pages)
2. **Synthesis** of existing policy, practice and empirical and theoretical literature (organized according to the subtopics) (14 to 17 pages)
3. **Strengths and limitations** of the literature on this topic:
   a. Methodologic issues
   b. Research questions addressed
4. **Future research** (1 to 2 pages)

   a. Topics to be addressed
   b. Methodologic issues to consider
5. **Research Proposal** (3 to 4 pages)
   a. Research questions and study aims (1 to 2 pages)
   b. Methodology (using correct terminology throughout) (3 to 4 pages)
      i. Study design (including name of design, unit of analysis)
      ii. Sample (including target population, study population, sampling plan, eligibility criteria)
      iii. Measures (including independent variables, dependent variables, potential confounding variables, and other key variables)
   iv. Data collection strategy
   v. Data analysis plan
   vi. Strengths and weaknesses of the methods with respect to the study aims
6. **Practice and policy implications** (1 page)
7. **Appendix**
   a. References
   b. Systematic literature review using the table and guidelines in Appendix B

**Oral Defense**

An oral defense will be conducted within three weeks of the submission of the comprehensive exam paper.

**Comprehensive Exam Paper Committee**

The Comprehensive Exam Paper Committee will consist of two faculty members. The committee will be responsible for approval of the proposal, the final paper, and the oral defense.

**Timeline**

- **Comprehensive exam paper proposal approval:** The comprehensive exam proposal must be approved within one semester after completing course work.
- **Proposal revision:** If the Comprehensive Exam Paper Committee requests revisions, these must be submitted within three weeks. A maximum of one revision is allowed.
- **Comprehensive paper submission:** The comprehensive exam paper must be submitted within four months after approval of the proposal.
- **Comprehensive paper revision** - If revisions of the paper are requested, these must be submitted within three weeks. A maximum of one revision is allowed.
- **Oral comprehensive exam paper defense** - The oral defense will be conducted with three weeks of submitting the paper, or revised paper if applicable.
- **Comprehensive exam paper decision** – Students will receive a decision about the comprehensive exam within two weeks after the oral defense is conducted.

**Note:** The proposal and completed paper should be submitted to the director of the doctoral program by 5 pm of the due date.

**Comprehensive Exam Paper Grading Rubric**

Students must earn an average score of 3 to pass the comprehensive exam. A score of 4.5 or higher is a “high pass.” If students do not earn an average score of at least 3 on both the written paper and oral defense, they may submit a revision within one month.
The quality of the review/proposal is evaluated using the scale below, with 1 indicating the poorest and 5 indicating the highest possible rating. Descriptive anchors are provided to facilitate rating.

Instructions for Systematic Literature Review
Conduct a literature review on the specific topic and subtopics described in the paper. Specify the search terms you used, the bibliographic databases included in searching for the articles, and the eligibility criteria that you used for selecting the articles.

Include ten studies. Choose the studies most relevant to your topic. If there are more than 10 studies, choose those that are most rigorous and recent.

NOTE: In the comprehensive exam paper, the systematic literature review does NOT include conducting a meta-analysis. Existing meta-analyses can be incorporated into the systematic literature review. The following should also be provided:

• Search terms used
• Bibliographic databases searched: Inclusion criteria for studies

Outline for Internship Proposals
Rationale
The rationale should include statements indicating how the proposed internship matches the student’s educational objectives and a full description of what will be studied, i.e., the content of the learning activities explaining how they will further the attainment of the student’s objectives.

Plan
The plan for the proposed internship should include where, how, and with whom the student will be working in the agency. It should also include how the agency supervisor will confer with the student’s preceptor. Discussion of the final paper as agreed upon by the student and preceptor must also be included.

Preliminary Bibliography
A preliminary reading list or bibliography based on initial exploration by the student and suggestions by the preceptor should be attached to the proposal.

Deadlines
• April 15 for Summer or Fall Internships (*Summer internships will be registered as Fall courses)
• December 1 for Spring Internships

Examples of Possible Internships
The following examples are merely suggestive as to the type of internships that may be developed:

• Student Interested in Education or Teaching: The internship could be developed in our Master’s program where the student could teach several sessions in a faculty member’s course, develop and teach an entire course, perhaps in the continuing education program, provide field instruction, train new field instructors, or develop and conduct an in service training program
  • Preparation for these assignments could involve the student in reading extensively about the theories of learning, pedagogy, androgy, methods of instruction, evaluation of teaching programs, and in the substantive subject to be taught. The final paper could be an evaluation of student learning in a class or field situation, or a paper that shows an integration of the advantages or disadvantages of different methods and theories about teaching social work concepts.
  • If a student is interested in the principles of curriculum evaluation and building, the paper could reflect a synthesis and assessment of the best approach for teaching a particular substantive subject.

• Student Interested in Policy or Program Development: The student could be placed in a city or state level office responsible for developing policies or new programs. The internship might be in a state legislator’s office, a city or state office on aging, or a national voluntary agency with a policy division (i.e. NASW, National Home Caring Council, etc.) where the student might be assigned to work on various aspects of developing legislation and preparing the bill for submission to the legislature.
  • In such a setting it might be sufficient for the student to be an observer, recording what transpires and thereby documenting, descriptively, the entire (or a major piece) of the legislative process.
  • The final paper assignment could then be a detailed analysis and evaluation, utilizing relevant theories of policy-making, decision-making, policy research, and/or program evaluation of what was done or not done.
  • Other opportunities for activities in this area might include the preparation of a position paper for a legislator reflecting a thorough policy analysis with anticipated and unanticipated consequences, or developing a social welfare needs assessment in a defined program area.

• Student Interested in Research: The internship could take place be with one of the research projects being conducted at this School’s Research Center, the all University Third Age Center, the university’s Hispanic Research Center or by an individual faculty member.
  • The student could be assigned a role in the research project or conduct observations of the complete research endeavor. The final paper could be a summary of the findings.

• Students Interested in Direct Practice: The student interested in developing advanced knowledge and skills about new modalities of direct treatment could be placed with an agency known to be working with or testing the new modalities. The student could have a role in or just be an observer of such activities.
  • An example is a student interested in gaining insight into programming for the well elderly rather than the frail or ill elderly. The internship could be a community setting for seniors where the students becomes a ‘shadow’ of the agency administrator or other program staff, to learn what programs are operating, the rationale for such programs, and to search the literature for existing content dealing with this target group.
  • The final paper might include a comparison and contrast in different types of programming, references to the literature and theory, as well as an evaluation and review of different practice approaches.

Dissertations
Overview
The final requirement for achieving the doctoral degree in social work is the completion and satisfactory defense of a research study which reflects the student’s mastery of the research process, and which makes
a contribution to knowledge. There are many models that a dissertation may follow. Copies of dissertations of GSS graduates can be accessed via the Fordham library database (Dissertations & Theses @Fordham). Dissertations are usually a highly detailed and technical investigation of some particular problem, concept or method, carried out on either a quantitative and/or qualitative basis.

Whether quantitative or qualitative, the study should reflect:

1. A defined source of data which allows one to generalize or develop a broader understanding beyond the particular cases being studied
2. Use of a clearly defined research procedure
3. Exploration of the interrelationship of key variables in a controlled or systematic manner. In all instances, the dissertation must represent an independent contribution to knowledge in the field of social work or social welfare. While the research may be part of a larger project undertaken by a team of investigators, the document offered for the degree must represent work for which the student has taken major responsibility in design, methods, research implementation, and interpretation.

Dissertation proposals for data analysis of an existing data set (for which study design, selection and operationalization of measures, and data collection have been completed) must meet exceptionally high standards for originality of the study aims, contribution to the field, and sophistication of data analysis.

In addition to constituting a contribution to knowledge, a dissertation is expected to demonstrate a student's mastery of content in their area of specialization.

The student is expected to adhere to standards of scholarship and to demonstrate competence in appropriate problem, question, or hypothesis formulations, development of design, data collection and analysis, drawing of sound conclusions and/or inferences, and preparation of an accurate and clear report. It is most important that students maintain professional standards for scholarship and research as delineated in the NASW Code of Ethics. Plagiarism is a very serious academic offense and materials quoted from other writers should be clearly attributed to the correct author. More information about acceptable social work academic practice in this area can be found in Szuchman and Thomlison, (2012)*.

Dissertation Proposal

As the student proceeds through the course of study, consideration should be given to identifying areas or topics of interest that might be studied in depth in the dissertation research process. The student’s faculty advisor, as well as individual course instructors, is available for discussion regarding this initial consideration of a research topic.

The proposal to be prepared for faculty committee review and approval should be a detailed description of the topic of study, in the context of existing knowledge, the methodology planned, and timetable. The faculty committee may require alteration in the proposal that has been developed in the seminar course. Students should consult Appendix F for an outline for the dissertation proposal. While the particular format of the proposal should be determined by the student and his/her committee, all items in the outline should appear in the proposal.

The student is required to choose a mentor/chair and other committee members with earned doctorates when he/she first begins to work on the proposal. When the mentor and the student believe that the proposal is ready for the Dissertation Proposal Review, the review will be scheduled and the doctoral office notified of the time and participants.

The doctoral candidate shall prepare a proposal following the outline in the next section.

Dissertation Proposal Review

Students and proposal committees should review the University’s IRB procedures during proposal development. The student and dissertation chairperson will have to complete the CITI Protection of Human Subject online training before submission of study’s protocol to the IRB for review. To obtain for the application forms, and access IRB resources the students will need to log-in to Mentor IRB, this online system manages IRB protocols.

The University’s IRB website provides detailed information on how to access the Mentor IRB system.

A copy of the proposal must be distributed to the Dissertation Review Committee at least two weeks prior to the scheduled proposal defense. This Committee consists of the candidate’s Dissertation Committee (mentor, another Fordham faculty member, outside member), an additional Fordham faculty member who has not been involved with the proposal preparation (this person is selected from the School’s faculty by the Doctoral Program director), and the Director of the Doctoral Program (ex officio).

The Dissertation Proposal Review will be scheduled for two hours. The format of the proposal review will be determined by the Committee and the candidate. In general, the candidate will present the planned research. The candidate is encouraged to use visual aids (e.g., overhead projector or PowerPoint) and/or handouts. The formal presentation will be followed by a question and answer period between the members of the Dissertation Review Committee and the candidate. The candidate will then leave the meeting and the Dissertation Review Committee will have 20 minutes to come to a decision.

The decision (Accept, Accept with Minor Revisions, Accept with Major Revisions, or Reject) will represent the majority opinion of the Dissertation Review Committee. The Chair of the Dissertation Review Committee will document the decision and distribute it to the other Committee members within one week of the defense. The Committee members may submit revisions to the Chair within one week after receiving the written decision.

The Chair will then provide the candidate with the written decision of the Committee. The Chair may provide oral feedback to the candidate following the defense.

Other faculty members and students may attend the formal presentation and question-and- answer parts of the proposal defense as nonparticipating observers.

Dissertation Chair and Committee

The Dissertation Committee will continue to work with the student after the proposal is approved and accepted. In some cases, the student may want to have a non-faculty member on the committee because of this person’s expertise in the topic or area of the research. If the person does not have an earned doctorate and is not a member of a university faculty, then such a person can be added as a fourth member of the committee.
The Dissertation Committee's function is to assist the student in carrying out the research design and in the writing of the dissertation. As materials are developed, they should concurrently be submitted to the chair and to the other two members of the committee for review. The student may be required to make modifications in the design of the study as the committee advises. The chair may call meetings of the committee when indicated. The chair with the approval of other committee members also schedules the oral defense.

The mentor should inform the Doctoral Director at the end of each semester about of the progress of each student about the progress of each student in completing his dissertation.

**Dissertation Defense**

When the chairperson, in consultation with other committee members, decides that the dissertation is ready for defense, he or she will arrange a time for the defense to take place. At least three weeks prior to the scheduled date of oral defense, final typewritten copies of the dissertation must be submitted to the Dissertation Committee Chair and other committee members.

The chairperson of the Dissertation Committee serves as the chair of the defense meeting, guiding and focusing the discussion so that the student's scholarship and research abilities can be accurately and fairly evaluated.

When the student's defense has been completed, he or she will be asked to wait while the committee members confer and reach a conclusion as to whether or not the defense has been satisfactory.

The student will then be invited to rejoin the committee, be informed by the chairperson as to the committee's decision, and if indicated, be given a verbal explanation of the reasons for an unsatisfactory rating, areas needing re-doing or modifications, or other problems.

When the defense has been satisfactory, the approval form should be signed by all committee members, and given to the Director of the Doctoral Program.

In cases where the defense has been unsatisfactory, the Director of the Doctoral Program should be notified immediately. When a student's defense is rated unsatisfactory, or when major modifications are required, the chairperson should prepare a written statement outlining the reasons for the rating, areas requiring modifications, or other problems and make this available to the student as soon as possible.

Students may require consultation on methodological or substantive issues that are not available from the faculty at the Graduate School of Social Service. Students are responsible for obtaining any outside consultation necessary to complete the dissertation.

**Final Preparation of Dissertation**

After successful defense, when any necessary corrections have been made the chairperson must give final approval that dissertation standards have been met. Following this final review, the student must prepare the dissertation to be deposited electronically. Instructions for this procedure are available from the director of the doctoral program. Dissertations must conform to the APA style manual. Each final copy should have a title page, an abstract of not more than 350 words and a statement of acceptance signed by all committee members. When the dissertation is deposited, students must complete a Survey of Earned Doctorates Questionnaire and prepare a separate abstract to be deposited with Social Work Abstracts.

**Deadline for Dissertation Completion**

Students have a maximum of eight to ten years (for full-time and part-time students respectively) of active involvement as matriculated students in which to complete all work for the degree, including the writing and successful defense of a dissertation.

If a student is actively engaged in completing the dissertation and needs a brief extension of the deadline, that student may apply in writing to the Director, who will review the request with the Doctoral Curriculum and Policy Committee, where a final decision will be made.

**Outline for Dissertation Proposal**

- Table of Contents
- Abstract
  - 250 word or less description of the proposal's goals and specific aims
- Literature Review
- Study Hypothesis
- Problem Statement/Rationale
  - Should state in a clear precise way what is the problem to be studied, why it is important, and how the proposed project will contribute to social work knowledge. The hypothesis or major questions to be answered by the dissertation should also be included.
- Conceptual Framework/Theoretical Model
  - This very important section should provide a detailed review of the theoretical frame of reference being used in carrying out this study. Included must be a detailed review of the literature and research related to the topic. It should represent a synthesis of the state of the art in the topic area. References should be appropriately footnoted.
- Proposed Methodology
  - This section should include five subsections:
    - Data analysis plan
    - Sampling plan
    - Study design
    - Data collection plan
    - Measures

The student must describe the proposed research methods to be used in the study including why they are believed to be appropriate approach. Also, the sources of data, the sampling procedure, and the limitations on generalizability of the study need to be defined. If a qualitative approach such as a case study is used, appropriate methodology should be specified as outlined in standard qualitative texts. The student should define the proposed sample size as well as the number of subjects who will be available. Any agreements that have been obtained that will assure access to the study sample should be specified.

In terms of the instruments, the variables in the study and how data on them will be collected, must be indicated. If using measures developed by others, the student should indicate how they were previously used, and any studies of validity and reliability, which have been done. If the student is going to construct his or her own measures, reasons why they are preferred should be stated; also, how it is proposed to
The chair of a student's dissertation committee must nominate a student to prepare the year's most outstanding dissertation. The awardee's name appears in the commencement program and includes an honorarium.

A research award is presented annually to a Ph.D. graduate that has prepared the year's most outstanding dissertation. The awardee's name appears in the commencement program and includes an honorarium.

### Research Award

A research award is presented annually to a Ph.D. graduate that has prepared the year's most outstanding dissertation. The awardee's name appears in the commencement program and includes an honorarium.

**Eligibility**

Any student graduating between August of the previous year and May of the current academic year is eligible to receive the award.

**Procedure**

The chair of a student's dissertation committee must nominate a student for the award and must submit to the doctoral program director an electronic copy of the student's dissertation. Nominations for the award must be received by the doctoral program director by April 1.

Two faculty members named by the program director will review the submitted dissertations. They will inform the program director of their decision by April 15. The winner of the award will be announced at the School's commencement exercises.

### Appeals and Grievances

#### Overview

If a student believes they have been aggrieved by a program practice or policy or by an action of a faculty member or staff member, they should:

1. Present their complaint in writing to the Director of the Ph.D. in Social Work Program.
2. At the Director's discretion they will attempt to resolve or bring it before the faculty members of the Doctoral Curriculum and Policy Committee.
3. If the student disagrees with the decision of the Doctoral Curriculum and Policy Committee, she/he may bring the grievance to the Dean of the Graduate School of Social Service. The Dean's decision is final.

#### General Procedures

All grievances must be clear and succinct. They must include:

- A statement specifying the specific action that is being grieved
- The grounds for the grievance
- The requested action or relief that the student is seeking.

All grievances must be made in writing. All decisions will be reported to the student in writing. Copies of the student's grievance and the decisions will be placed in the student's academic file.

### Grade Appeals

Grades may be appealed when a student believes that a faculty member has used unfair or capricious practices to arrive at a grading decision or has miscalculated a grade.
• The student should appeal the grading decision first with the faculty member.
• If she/he disagrees with the results of the meeting with the faculty member, she/he may appeal the decision to the Director of the Ph.D. in Social Work Program. The appeal must be made in writing.
• If she/he disagrees with the Director’s decision, she/he may appeal the decision to the faculty members of the Doctoral Curriculum and Policy Committee.
• If the student disagrees with the decision of the Doctoral Curriculum and Policy Committee, she/he may appeal the decision to the Dean of the Graduate School of Social Service. The Dean's decision is final.

Grade Appeal Procedure

All appeals must be clear and succinct. They must include:
• A statement specifying the specific action that is being grieved
• The grounds for the grievance
• The requested action or relief that the student is seeking.

All appeals must be made in writing. All decisions will be reported to the student in writing. Copies of the student’s appeals and the decisions will be placed in the student's academic file.

Comprehensive Examination Result Appeals

A student must appeal any grading decisions related to the Comprehensive Examinations in writing directly to the Director of the Ph.D. in Social Work Program who will present the appeal to the faculty members of the Doctoral Curriculum and Policy Committee.

If the student disagrees with the decision of the Doctoral Curriculum and Policy Committee, she/he may appeal the decision to the Dean of the Graduate School of Social Service. The Dean's decision is final.

All appeals must be clear and succinct. They must include:
• A statement specifying the specific action that is being grieved
• The grounds for the grievance.
• The requested action or relief that the student is seeking.

All appeals must be made in writing. All decisions will be reported to the student in writing. Copies of the student’s appeals and the decisions will be placed in the student's academic file.

Other Appeals

• Students should present appeals related to any other program matter in writing directly to the Director of the Ph.D. in Social Work Program.
• If they disagree with the Director’s decision, she/he may appeal the decision to the faculty members of the Doctoral Curriculum and Policy Committee.
• If the student disagrees with the decision of the Doctoral Curriculum and Policy Committee, she/he may appeal the decision to the Dean of the Graduate School of Social Service. The Dean's decision is final.

All appeals must be clear and succinct. They must include:
• A statement specifying the specific action that is being grieved
• The grounds for the grievance.
• The requested action or relief that the student is seeking.

Timeframes for Filing Appeals and Grievances

1. All grievances and appeals must be filed in writing within thirty (30) academic calendar days of the aggrieved action. Appeals of grades must be filed within thirty (30) academic calendar days of a grade’s posting.
2. All appeals of the faculty's decisions must be filed within thirty (30) academic calendar days of the date on which the letter outlining the decision was posted.
3. The dean and doctoral program director must respond to a student’s appeal or grievance within thirty (30) academic calendar days of their receipt of the grievance or appeal.
4. The Doctoral Curriculum and Policy Committee must respond to an appeal or grievance at its next scheduled meeting. Appeals and grievances to the Committee must be received by the doctoral program director at least five working days before the Committee's next scheduled meeting to be eligible for consideration at that meeting.

Program Forms

• Comprehensive Exam Rubric
• Student Annual Assessment
• Statistics 1 Waiver Request
• Statistics 2 Waiver Request

Program Areas

• B.A. in Social Work (p. 995)

• Ph.D. in Social Work (p. 1023)

Student Resources

• Policies and Procedures (p. 1032)
• Tuition and Fees

Policies and Procedures

By the end of Summer 2020, this page will be updated to reflect the Graduate School of Social Service’s school-wide policies and procedures.
## GROUP PREREQUISITES

### Texts and Contexts (PRALC and PRENG)
Courses with the PRALC and PRENG group prerequisite require one course from the list below. All English courses 3000-level or above have this requirement.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 2000</td>
<td>Texts and Contexts</td>

SCHOOL OF PROFESSIONAL AND CONTINUING STUDIES (GRADUATE PROGRAMS)

We offer a wide variety of rigorous academic programs geared toward the interests and needs of the adult learner.

The special programs offered by the Fordham School of Professional and Continuing Studies are designed to help individuals move to the next level in their careers, whether through a degree-granting program or certificates. Courses include qualifying exam preparation as well as off-the-moment instruction on new technologies and industry policies. Short-term classes scheduled on nights and weekends make taking the next steps to advancement easy.

Academic Programs

Master's Programs
- Real Estate (M.S.) (p. 1043)

Advanced Certificate Programs
- Construction Management (Adv Cert) (p. 1037)
- Real Estate Development (Adv Cert) (p. 1044)
- Real Estate Finance (Adv Cert) (p. 1045)

Construction Management (Adv Cert)

The Advanced Certificate in Construction Management is a graduate-level certificate focused on the specialized legal, planning, financial, procurement, risk management, and project management skills required in today's construction industry and prepares students for positions of leadership and responsibility within private and public organizations overseeing projects. Enhance your knowledge of construction project management standards, techniques, and add the specialized area of construction project management to your professional skill set.

Fordham Real Estate Institute graduate-level advanced certificates are 15-credit programs that can be taken after completing a bachelor's, master's or other advanced degree. These programs are an excellent option for industry professionals who would like to develop a solid background and skills in a particular sector of the industry in a relatively short period of time. Students can pursue an advanced certificate alone or alongside the M.S.R.E. graduate degree. Students who begin in an advanced certificate program may, with approval, later be admitted to and matriculate in the full M.S.R.E. degree program.

About the Fordham Real Estate Institute

The Fordham Real Estate Institute (REI) offers a comprehensive array of professional certificates, summer intensives, and graduate programs at its Lincoln Center campus in Manhattan and its campus in Westchester, New York. Taught and developed by leading industry practitioners, our programs provide real-world professional skill sets for professionals and owners/investors from all walks of life. Flexibility and convenience are program hallmarks; classes can be taken in-person, online, and at various paces.

To learn more about the Advanced Certificate in Construction Management, visit the PCS section of the Fordham website.

Admissions

Prerequisites

Familiarity with construction methods, materials, and drawings is recommended to complete the course work.

Application Submission

The application committee takes a holistic view of the candidates and will evaluate each student's academic performance and professional expertise in deciding their eligibility for the graduate certificate programs. Successful candidates must exhibit a strong understanding of real estate finance and investment. The committee will also consider the nature and extent of previous work with preference given to those possessing extensive professional experience.

Requirements for Application:
- Bachelor's degree transcript from an accredited university
- Personal statement
- Resume

Optional additional material to submit include: M.B.A. or other graduate degree transcript; GMAT, GRE or other standardized test score; professional real estate or finance certifications.

The GMAT/GRE is not required for graduate certificate applicants and will be waived for those who would like to matriculate into the full M.S.R.E. program and have successfully completed six credits with a minimum grade of B in each course.

Who Should Apply

Ideal candidates include:
- Project managers, superintendents, building trades and other project personnel who want to go to the next level in their career
- Architecture and engineering professionals who want to further their professional skills in managing construction projects.
- Real estate professionals including developers, lenders, property managers, asset managers, facilities managers, and corporate real estate executives who want to better understand the construction process.
- Current or former M.S. in Real Estate and Advanced Certificate in Real Estate Development students who wish to add a specialized designation in Construction Management.

More information about PCS admissions can be found on the Fordham website.

Requirements

The Advanced Certificate in Construction Management is a 15-credit program consisting of six required courses for 12 credits and 3 elective credits. Courses are scheduled for evenings during the fall, spring, and summer terms. You can complete the program at the pace that suits you, whether part-time or full-time.

The courses of the Graduate Certificate in Construction Management are designed to ensure that every graduate has a grasp of the essential...
elements of the specialized legal, planning, financial, procurement, risk management, and project management skills required in today’s construction industry, and prepares them for positions of leadership and responsibility within private and public organizations overseeing projects. The 12-credit core curriculum is designed to ensure that every graduate has a grasp of the most important elements of construction law, accounting, financial management, risk management, cost estimating, scheduling, pre-construction planning, project controls, and project execution. The 3-credit elective course requirement offers students the opportunity to immerse themselves in specialized topics of their choice.

Students are permitted to apply 9 credits earned towards this Advanced Certificate to the Master of Science in Real Estate program.

### Course Listings

#### Real Estate

**REAL 1002. Fundamentals of Real Estate Law. (3 Credits)**

This course introduces the legal concepts, laws, regulations, and risks involved in the acquisition, development, financing, leasing, and sale of real property. It discusses forms of ownership and co-ownership, the real estate transaction process from contract to closing, private property rights, and governmental restrictions on private property. The effect of mortgages, liens, and other encumbrances on the quality of title are also weighed. Students are introduced to estates and interests, deeds, easements, covenants, transferable development rights, eminent domain, zoning ordinances, environmental laws, and the legal aspects of a variety of commonly used real estate contracts including listing agreements, letters of intent, options, purchase and sale agreements, mortgages, insurance, construction contracts, and leases. Negotiation strategies, ethical issues, and fiduciary duties are addressed throughout the course.

**Prerequisites:** ECON 1100 and ECON 1200 and ECON 2140.

**REAL 1004. Principles of Real Estate Economics. (3 Credits)**

This course discusses the economic reasons for the growth and decline of real estate markets, along with the economic basis for location decisions by residential and commercial owners and tenants. The course includes a comprehensive overview of real estate market analysis, from the macroeconomic perspective to sector-specific drivers and considerations. Building upon a discussion of the basic principles of urban economics, the course explores the correlations of real estate valuations to regional and national economies, as well as the impact on specific property types resulting from macroeconomic business and growth cycles, key policy decisions, and changing monetary conditions. The course also examines the economic structure of major metropolitan areas, the influence of local governments on urban economic growth, the impact of urban economic growth on supply and demand for specific property types, and the factors that cause certain regions to thrive while others decline. The course identifies key indicators for tracking economic and real estate performance, as well as useful data sources and techniques for analyzing and forecasting real estate demand and supply for specific property types in specific markets. Class discussions will include current economic and real estate events and their potential impacts on real estate markets.

**Prerequisites:** ECON 1100 and ECON 1200 and ECON 2140.

**REAL 1006. Real Estate Accounting Essentials. (3 Credits)**

This class introduces general financial accounting principles, concepts, and rules, as established by U.S. Generally Accepted Accounting Principles (GAAP) and the International Financial Reporting Standards (IFRS). The fundamentals of financial statement development and analysis, including balance sheets, income statements, cash flow statements, and statements of owners’ equity are covered, in addition to cash versus accrual accounting and accrual accounting rules that are specific to real estate entities, including property owners, developers, and managers. The tax implications of business entity selection are also weighed. Students are introduced to estates and interests, deeds, mortgages, liens, and other encumbrances on the quality of title are involved in the acquisition, development, financing, leasing, and sale of real property. It discusses forms of ownership and co-ownership, the real estate transaction process from contract to closing, private property rights, and governmental restrictions on private property. The effect of mortgages, liens, and other encumbrances on the quality of title are also weighed. Students are introduced to estates and interests, deeds, easements, covenants, transferable development rights, eminent domain, zoning ordinances, environmental laws, and the legal aspects of a variety of commonly used real estate contracts including listing agreements, letters of intent, options, purchase and sale agreements, mortgages, insurance, construction contracts, and leases. Negotiation strategies, ethical issues, and fiduciary duties are addressed throughout the course.

**Prerequisites:** ECON 1100 and ECON 1200 and ECON 2140.

---

Updated: 07-27-2020
REAL 1008. Principles of Real Estate Finance. (3 Credits)
This course offers students a comprehensive orientation to how residential and commercial properties are financed and analyzed. It covers the investment property income statement, income and expense analysis, time value of money concepts, discounted cash flow analysis, capitalization theory, forms of debt and equity finance, mortgage concepts and terminology, mortgage instruments, equity concepts, and investment analysis. The course also introduces students to the broader real estate capital markets, securitization, the sources and uses of real estate funds, components of a capital structure, and the role of government in real estate finance.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2142.

REAL 1010. Principles of Real Estate Valuation and Feasibility. (4 Credits)
This course introduces the theory, principles, and techniques for conducting valuation and feasibility studies of real property. The course emphasizes the importance of market analysis in the valuation and development process. The course covers real property concepts and characteristics, influences on real estate values, types of value, economic principles, market area analysis, and highest and best use. Students learn the three approaches to value—the income capitalization, cost, and sales comparison approaches—to reach an opinion of value. After examining income capitalization methods and formulas, students learn how rates and multipliers are derived. The cost approach is explored, showing how the cost of constructing a reproduction of, or replacement for, an existing structure is estimated. Land and site valuation are also covered. Finally, the sales comparison approach is covered, including researching the market, verifying information, selecting units of comparison, conducting a comparative analysis, and adjusting findings. Students learn basic concepts and terminology of market analysis and marketability studies and how marketability studies provide vital information for the highest and best use decision.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 1020. Real Estate Development Principles and Practices. (4 Credits)
This course presents a step-by-step examination of the real estate development process from idea conception to project completion. Students are introduced to the phases, procedures, and complexities of developing and redeveloping various property types, including multifamily, office, and mixed-use real estate. Students study the principal stages of development, including preliminary planning and market analysis, feasibility studies, site selection and acquisition, deal structure, financing, permitting, entitlements, design, construction, marketing, and asset management. This course also examines trends including mixed-use projects, public and private partnerships, and transit-oriented development.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 2000. Real Estate Financial Modeling. (4 Credits)
This course provides students with a fundamental understanding of the essential Time Value of Money (TVM) concepts and calculations employed in common real estate financial models and investment analyses. Beginning with an introduction to the property income statement, the pro forma and essential Excel software keystrokes, the course progresses to financial modeling best practices and more sophisticated Excel software techniques. Students will learn to develop a practical financial model from a set of project assumptions and merge appropriate TVM principles with Excel functions, tools, formulas, and shortcuts to arrive at investment decisions. Students will prepare basic income and expense models and amortization schedules while progressing forward to direct capitalization and discounted cash flow (DCF) analyses.
Attribute: REE.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 2004. Real Estate Management. (3 Credits)
This course introduces students to the core competencies and specialized skills needed to professionally plan and manage residential multifamily buildings, commercial office buildings, and corporate workspace for real estate owners, businesses, and third-party management companies. Through the study of established management practices with real-world applications, this course introduces students to the world of property management, corporate real estate, and facility management. Students study the Management Plan, the Management Agreement, management organizational structures, ownership obligations, management responsibilities, management fees, operating procedures, repositioning for value creation, staffing, training, supervision, risk management and insurance, leadership, communication, and ethics.
Attribute: REE.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 2006. Global Real Estate Markets. (3 Credits)
This course introduces students to real estate markets and investment activity beyond the U.S. border. It develops a due diligence framework to undertake comparative analyses of international real estate transactions, investments, and development projects across borders and within specific markets. The course focuses on the macro-economy, financial and real estate capital markets, currency concerns, taxation, legal issues, land use policy, political activity, regulations and statutory requirements, and cross-cultural negotiations of various key markets. Current global topics will be used to anchor learning and be the basis for class discussions in this comparative analysis.
Attribute: REE.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.
REAL 2008. Building Design and Construction. (4 Credits)
This course provides an overview of the design and construction process for residential and commercial real estate assets. Students gain an understanding of the construction project life cycle; the roles of the owner, architect, engineer, contractor, and project management representative; and the most commonly used construction methods and materials. Topics of study include project delivery methods, the phases of design, project teams and organizations, types of contracts, cost estimating, construction planning and scheduling, construction budgets, field supervision, community and public agency relations, risk management, insurance, safety, and sustainable building practices.
Attribute: REE.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 2010. Special Topics in Real Estate. (4 Credits)
These courses, which will be offered periodically, are designed to enhance the student's educational experience by supplementing the standard array of courses with topics that are very highly specialized. Areas of study will include real estate finance, investment, and development. In most cases, they will be of interest to those students who desire a more intense exposure to a particular aspect of real estate.
Attribute: REE.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 5002. Real Estate Finance. (3 Credits)
This course covers the principles of commercial real estate finance including valuation methodologies, income and expense analysis, derivation of capitalization rates, concepts of commercial leasing, forms of debt and equity, valuation of land and key principles of construction loan finance.

REAL 5004. Real Estate Accounting and Tax. (3 Credits)
This course covers accounting concepts, rules, regulations, and reporting requirements for income-producing properties; tax tools for financial statements and real estate investments; accounting principles and income tax analysis for decision-making; and accounting and tax implications of real estate ownership structures and real estate transactions.

REAL 5006. Real Estate Legal Concepts and Contracts. (3 Credits)
This course provides an overview of the typical, major legal agreements that are involved with every commercial real estate transaction. The course is broken into four segments: legal overview, purchase/sale agreements, leases, and financing agreements.

REAL 5008. Real Estate Economics and Market Analysis. (3 Credits)
This course discusses economic base analysis, macroeconomic factors influencing metropolitan areas and links connecting economic fundamentals to property market performance. Delineation of market and submarket areas will be stressed, along with the differences arising from specific property types including office, retail, industrial, housing, and hotels. The dynamics of cities will be studied, especially as they relate to property market performance.

REAL 5010. Real Estate Structures and Capital Markets. (3 Credits)
The course covers the structure and operation of public and private, debt and equity real estate capital markets and the means by which this capital is channeled into commercial real estate to finance local transactions. Key topics include capital sources, participants, risk and return, tranches, capital asset pricing model (CAPM), CMBS, REOCs and REITs.

REAL 5012. Real Estate Valuation and Investment Analysis. (3 Credits)
Students in this course evaluate a range of investment opportunities in commercial real estate from the perspective of the investor (equity) and the lender (debt). Students analyze investment assumptions and model cash flows using Excel. Valuation techniques utilized include income capitalization and discounted cash flow analysis. Students examine pricing, returns, investment horizon, hold vs. sell strategies, financial leverage, sizing debt based on lender parameters and the impacts of leverage on returns.
Prerequisites: REAL 6022 and REAL 5002 and REAL 5004 and REAL 5008.

REAL 5014. Negotiation in Real Estate. (1.5 Credits)
This course provides an introduction to negotiation along with a strong foundation in a number of key concepts, including the three major roles of the conflict specialist, theories of communication and conflict, approaches to negotiation and their limitations, private versus court-centered approaches to resolving conflict and psychological biases and barriers in addressing conflict. Students explore new roles for conflict specialists with an eye towards preparing themselves to engage in various negotiation scenarios that arise in the real estate industry.

REAL 5016. Ethical Issues in Real Estate. (1.5 Credits)
Students in this course study how ethics are considered from various points of view: historically, relationally and transactionally. In a series of different situations commonly occurring in the real estate industry, students consider the ethical issues present and then evaluate the adequacy of the real world responses to those issues.

REAL 5050. Construction Contracts, Claims, and Dispute Resolution. (1.5 Credits)
This course examines the essential elements of commonly used contracts, including the rights, duties, and obligations of the owner and contractor. It offers the legal knowledge to review, understand, and evaluate the terms and conditions of construction contracts to minimize the risk of project disruptions, claims, disputes, and litigation. This course also provides an overview of project delivery methods, the bidding process, contract formation, contract forms, contract conditions, general conditions, subcontracts, privity of contracts, riders, defaults and terminations, changed conditions, changes and extra work, payments, lien law, surety bonds, damages for delay, claims, and methods of dispute resolution. Discussions will include the riskier provisions, including the incorporation by reference clause, the contingent payment clause, the no damage for delay clause, cardinal changes, and terminations for cause and convenience.

REAL 5052. Construction Financial Management. (1.5 Credits)
The general objectives of this course are for students to gain a comprehensive understanding of the key factors of effective construction financial and cost control. Students will develop cost control and tracking methods to monitor and control project budgets for successful project outcomes. The course covers accounting systems and financial analysis; owner and subcontractor credit risk underwriting; project funding; project cash flow and financing metrics; critical path analysis as it pertains to cost; general conditions, insurance, and risk management; sales taxes; progress payment disbursement; forecasting and trends; and the use of associated reports. Students will gain practical knowledge of concepts of construction financial and cost control and apply this knowledge toward the development of a response to an unplanned event with the goal of minimizing its impact on the project.
REAL 5054. Construction Cost Estimating and Bidding Strategies. (1.5 Credits)
This course will expose students to the theory, processes, and practices to prepare construction cost estimates and final project bids. Students will begin with an understanding of key terminology and progress into core topics including pre-construction and detailed estimates; planning for the estimate, design, and constructability review; general conditions; predesign; conceptual and preliminary budgets; cost of labor; pricing of material; time/cost analysis design review; unit prices; lump-sum bids; direct and indirect costs; mark-up; overhead; profit; bonds; insurance; and internal and external management considerations. This course will proceed with discussions on the bidding process, the bid package, subcontractor bid comparisons, qualification, bid solicitation, bid leveling and notification, bid analysis, and final bid price. Case studies, problems, and exercises are used extensively.

REAL 5056. Construction Scheduling and Impact Analysis. (1.5 Credits)
This course will expose students to a variety of network-based scheduling principles and tools including advanced Critical Path Method (CPM) construction scheduling techniques and the Precedence Diagramming Method (PDM). The course will cover project resource allocation, resource leveling, schedule development, schedule updating, schedule impacts of date constraints, project time and cost trade-offs, activity duration estimating, work breakdown structures, and an overview of construction contract scheduling specifications. An introduction to other scheduling methodologies and the use of schedules in construction claims will be addressed.

REAL 5058. Pre-Construction Project Planning and Development. (3 Credits)
Pre-construction project planning and development efforts play a key role in the overall success of a project, providing an opportunity for discovery, risk assessment, and strategic planning. This early planning can have a significant impact on project outcomes and offer substantial time and cost savings. This course examines the essential planning and analyses performed prior to the construction phase of a project to determine project scope, schedule, and cost estimate. It offers the knowledge to define project objectives, determine feasibility, manage risks, and analyze schedule and cost impacts to ensure optimal project performance and customer satisfaction.

REAL 5060. Construction Project Monitoring, Controls and Execution. (3 Credits)
Pre-construction project planning and development efforts play a key role in the overall success of a project as they provide the opportunity for discovery, risk assessment, and strategic planning. This early planning can have a significant impact on project outcomes and offer substantial time and cost savings. This course examines the essential planning and analyses performed prior to the construction phase of a project to determine project scope, schedule, and cost estimate. It offers the knowledge to define project objectives, determine feasibility, manage risks, and analyze schedule and cost impacts to ensure optimal project performance and customer satisfaction.

REAL 5102. Real Estate Risk and Portfolio Management. (3 Credits)
This course discusses the theory and principles of investments and portfolio management. Students acquire a working knowledge of the risks associated with individual real estate investments, such as asset-specific underwriting, credit evaluation, and tenant credit risk and then explore advanced topics including portfolio selection, calculation of efficient sets, and portfolio performance evaluation for the holding entity. Prerequisites: REAL 5002 and REAL 5004 and REAL 5006 and REAL 5008 and REAL 5010.

REAL 5104. The Real Estate Development Process. (3 Credits)
This course provides a practical analysis of the phases of the real estate development process including conceptualization, site acquisition, planning and design, construction, financing, leasing and marketing. Leadership, management and control of the development team are featured issues. Attribute: CONM.
Prerequisites: REAL 5002 and REAL 5006.

REAL 5106. Real Estate Asset Management. (3 Credits)
Students learn how to develop an investment strategy and an actionable asset management plan based on that strategy for increasing the value of real estate assets under management on behalf of ownership. Students examine acquisitions, leasing, operations, budgets, capital expenditures, repositioning, refinancing, dispositions and distressed and foreclosure workouts using financial modeling, underwriting, risk analysis, and performance benchmarking concepts and tools. The decision making process will be examined from the property, asset and portfolio management perspectives.
Prerequisites: REAL 5002 and REAL 5004 and REAL 5006 and REAL 5008.

REAL 5108. Real Estate Credit Analysis and Underwriting. (3 Credits)
Students learn how to underwrite and structure commercial real estate (CRE) loans for the acquisition, development and construction of income-producing properties. A combination of market, risk and financial analysis tools will be used to assess commercial investment properties and borrower credit worthiness, and to make prudent, defensible lending decisions.
Prerequisite: REAL 5002.

REAL 6001. Real Estate Financial Modeling. (1.5 Credits)
Students gain a comprehensive understanding of real estate financial modeling principles and practices to prepare models for income and expense presentation and analysis, direct capitalization, and discounted cash flow (DCF) analysis. Students develop the vocabulary and preliminary critical thinking skills needed to develop real estate financial models. The course will emphasize effective presentation of data and productivity.
Attribute: REFI.

REAL 6002. Real Estate Development Feasibility Study. (3 Credits)
This course examines the components of a real estate development feasibility study report. Students refine leadership, team and presentation skills to deliver a comprehensive and persuasive report on a currently available real estate project.

REAL 6003. Private Equity. (1.5 Credits)
In this course, students develop an understanding of the taxonomy of different real estate private equity strategies, including core, core plus, value-add, and opportunistic. Students learn how real estate funds are set up and managed, how to align the general partners’ fees and incentives with the limited partners’ interests, and exit strategies such as initial public offerings (IPOs), recapitalization, and secondary sales. The course examines the role of private equity real estate investments within a portfolio comprising various asset classes, with a focus on performance measurement, diversification gains, and risk measurement.
Attribute: REFI.
Prerequisite: REAL 5002.
REAL 6004. Adaptive Reuse and Sustainability. (1.5 Credits)
Utilizing sustainable principles and building practices, this comprehensive course challenges students to think critically about reusing existing building stock and maintaining historic structures. It encourages adaptive reuse by owners and developers entering the design review process. The goal is to help developers think critically about the opportunities presented by adaptive reuse.
Attributes: CONM, REDV.

REAL 6005. Commercial Mortgage-Backed Securities. (1.5 Credits)
In this course, students learn the history, structure, and key building blocks (commercial real estate loans) of commercial mortgage-backed securities (CMBS), as well as the transaction, ratings, and offering process. The participants, legal documents, and federal regulations that govern CMBS are also examined. Topics covered include the perspectives of originators, structurers, loan sellers, attorneys, ratings agencies, investors, servicers, and special servicers. The course will focus primarily on conduit deals, but will also introduce single-asset and single-borrower transactions and a securitized financing tool used primarily by commercial mortgage REITs: CLOs.
Attribute: REDV.
Prerequisites: REAL 5002 and REAL 5010.

REAL 6006. Development Project Leadership, Management and Communications. (1.5 Credits)
Gain essential leadership, management and reporting skills and strategies to effectively control the design and construction process, ensuring that every decision is made in the owner’s best interest. Become acquainted with different types of reporting, and learn best practices and tools needed to improve performance, standards and timely project delivery.
Attributes: CONM, REDV.

REAL 6007. Real Estate Investment Trusts. (1.5 Credits)
Students gain an understanding of the history, operations, and mechanics of REITs, and how REITs are an important link between the real estate capital markets and the property markets. Topics covered include real estate space and asset markets, measurement and determinants of real estate prices, market trends, valuation methods, and returns and benchmarks.
Attribute: REDV.
Prerequisite: REAL 5010 (may be taken concurrently).

REAL 6008. Affordable Housing. (1.5 Credits)
In this course, students acquire an understanding of the history and current state of affordable housing in the US in general and NYC in particular. Students learn from a combination of formal lectures and interviews with past and current industry participants and leaders. The focus of the course is examine the multiple factors that must be addressed in the planning and execution of affordable housing projects.
Attribute: REDV.

REAL 6010. Development Project Finance. (1.5 Credits)
This course presents the principles of development project finance. Students acquire best practices for submitting a loan request to a lender for interim construction loan project financing, long-term permanent 'take-out' financing, and mini-perm financing. Students will become familiar with the presentation of project pro forma, construction loan types, the requirements of a development team, the lender's credit criteria, the loan proposal, hard and soft cost budgets, valuation, project feasibility and documentation. This course includes discussion of privately and publicly funded infrastructure investment considerations.
Attributes: CONM, REDV.

REAL 6012. Global Real Estate Investment. (1.5 Credits)
This course provides a comparative and critical approach to undertaking international real estate transactions, investments and development projects by providing a framework for analyzing real estate investments across borders within specific markets.

REAL 6014. Land Use Law. (1.5 Credits)
Real estate development is profoundly impacted by land use law and environmental regulations. A successful developer must navigate through land use controls, federal, state and city environmental regulations, landmark and historic preservation restrictions and community concerns, in addition to building and fire codes and other safety regulations.
Attribute: REDV.

REAL 6016. Real Estate Entrepreneurship Business Planning. (1.5 Credits)
This course integrates the concepts, tools and practices of entrepreneurship. Students learn to be superior opportunity assessors and shapers, to understand the integration of people and process in entrepreneurship, to write, articulate and present a new venture execution plan, to understand the alternatives and trade-offs in financing, starting and operating a venture, and to gain a better understanding of their personal entrepreneurial capabilities.

REAL 6018. Real Estate Research and Technology. (1.5 Credits)
This course examines the growing and ever-changing technology ecosystem within the real estate industry (CRE tech or Proptech) and the various methods to perform essential market research using these platforms. Students gain an understanding of key areas of the real estate technology space, prominent business models, major contributors, growth initiatives and emerging markets.
Attribute: REDV.

REAL 6020. Internship. (1.5 Credits)
Internship.
Attribute: REDV.

REAL 6022. Special Topics in Real Estate. (1.5 Credits)
These courses, which will be offered periodically, are designed to enhance the student's educational experience by supplementing the standard array of courses with topics that are very highly specialized. Areas of study will include real estate finance, investment and development. In most cases, they will be of interest to those students who desire a more intense exposure to a particular field of study.
Attributes: CONM, REDV, REDI.

REAL 6050. Construction Technology. (1.5 Credits)
This course provides an overview of the latest methods, materials, and systems used in the construction of the core and shell and interior components of high-rise buildings. Topics include working drawings; specifications; site work; foundations; steel and reinforced concrete framing; glass, masonry, and exterior wall systems; drywall construction systems; light gauge metal framing; brick, stone, and miscellaneous masonry; fireproofing; doors, windows, glass, and glazing; finish ceilings; finish flooring; and acoustic materials.
Attribute: CONM.

REAL 6100. Applied Project. (3 Credits)
The Applied Project capstone course provides for a comprehensive application of core, flex core and elective course principles, concepts, and professional practice to real world real estate investment projects.
Prerequisites: REAL 6022 and REAL 5002 and REAL 5004 and REAL 5006 and REAL 5008 and REAL 5010 and REAL 5012 and REAL 5104 and REAL 6002.
Specific admissions requirements are as follows:
- $70 nonrefundable application fee
- Supplemental essay (students who do not meet the minimum requirements outlined above may apply with an additional essay stating why they would be good candidates for the program)

More information about PCS admissions can be found on the Fordham website.

**Requirements**

The M.S. in Real Estate is a 36-credit program with evening, weekend, and online offerings which can be completed in one year of full-time study or through part-time study.

The core requirements of the Master of Science in Real Estate (MSRE) are designed to ensure that every graduate has a grasp of the most important elements of real estate finance, investment, development, and management while the elective concentration allows each student to pursue a specific subject area.

Student pursuing any of the advanced graduate certificate programs can apply their coursework for the certificate toward the elective or flex core requirements of the M.S. program.

### Flex Core Courses

Choose two from the following: 6

- REAL 5102 Real Estate Risk and Portfolio Management
- REAL 5104 The Real Estate Development Process
- REAL 5106 Real Estate Asset Management
- REAL 5108 Real Estate Credit Analysis and Underwriting

### Elective Courses

Select any 6 additional Real Estate credits

### Capstone Course

Choose one of the following: 3

- REAL 6100 Applied Project
- REAL 6200 Research Project (Thesis)

Total Credits 36

---

1 Graduate-level courses with the REAL subject code (p. 517) may apply toward this requirement. Students pursuing the advanced certificate should take coursework associated with their advanced certificate as their M.S. electives.
Detailed Requirement Information

Core Courses
The 21-credit core curriculum is designed to give students an in-depth mastery of the academic disciplines and applied functional areas necessary to every real estate professional’s success. The core leaves students with essential analysis, critical thinking, and decision-making skills while creating a common student experience that fosters community. Students are required to complete all eight courses in the core.

Flex Core Courses
The 6-credit flex core curriculum provides students the opportunity to focus on areas in real estate that are consistent with their career pursuits. Under guidance of their adviser, students are required to select two core courses from the list of four courses.

Elective Courses
The 6-credit elective course requirement offers students the opportunity to immerse themselves in specialized topics of their choice, or to complete the remaining flex core courses. These can be selected from any course not already completed in the real estate department, a list of which can be found on our Course Listings (p. 1038) page. Theses options include a for-credit internship as well as the special topics course.

Special Topics
These courses, which will be offered periodically, are designed to enhance the student’s educational experience by supplementing the standard array of courses with topics that are very highly specialized. Areas of study will include real estate finance, investment, and development. In most cases, they will be of interest to those students who desire a more intense exposure to a particular field of study. Courses include Real Estate Financial Modeling, Private Equity, Design Issues, Socially Responsible Investing in Real Estate, the Real Estate Roundtable, and Commercial Leasing.

Capstone Course
The 3-credit capstone is the culmination of all the knowledge and skills acquired throughout the program. Students must be able to assimilate all that they have learned in the core, flex core, and elective courses and apply it within the context of a real-world setting. Subject to adviser pre-approval, students will either undertake an applied project or write a thesis (under the direction of a faculty supervisor) that, upon completion, demonstrates professional-level mastery of the subject matter involved.

Real Estate Development (Adv Cert)
The Advanced Certificate in Real Estate Development is a graduate-level certificate focused on the specialized legal, financial, analytical and project management concepts and professional skills required in the multidisciplinary, creative, and entrepreneurial world of real estate development. The program may be taken stand alone or as an added concentration for current or former MSRE students who wish to add a second credential to their resume.

Fordham Real Estate Institute graduate-level advanced certificates are 15-credit programs that can be taken after completing a bachelor’s, master’s or other advanced degree. These programs are an excellent option for industry professionals who would like to develop a solid background and skills in a particular sector of the industry in a relatively short period of time. Students can pursue an advanced certificate alone or alongside the M.S.R.E. graduate degree. Students who begin in an advanced certificate program may, with approval, later be admitted to and matriculate in the full M.S.R.E. degree program.

About the Fordham Real Estate Institute
The Fordham Real Estate Institute (REI) offers a comprehensive array of professional certificates, summer intensives, high school summer intensives, an undergraduate program, and graduate programs at its Lincoln Center campus in Manhattan and its campus in Westchester County, New York. Taught and developed by leading industry practitioners, our programs provide real-world skill sets for professionals and owners/investors from all walks of life. Flexibility and convenience are program hallmarks; classes can be taken in person or online, and at various paces.

To learn more about the Advanced Certificate in Real Estate Development, visit the PCS section of the Fordham website.

Admissions

Prerequisites
Familiarity with construction methods, materials, and drawings is recommended to complete the course work.

Application Submission
The application committee takes a holistic view of the candidates and will evaluate each student’s academic performance and professional expertise in deciding their eligibility for the graduate certificate programs. Successful candidates must exhibit a strong understanding of real estate finance and investment. The committee will also consider the nature and extent of previous work with preference given to those possessing extensive professional experience.

Requirements for Application:
- Bachelor’s degree transcript from an accredited university
- Personal statement
- Resume

Optional additional material to submit include: M.B.A. or other graduate degree transcript; GMAT, GRE or other standardized test score; professional real estate or finance certifications.

The GMAT/GRE is not required for graduate certificate applicants and will be waived for those who would like to matriculate into the full M.S.R.E. program and have successfully completed six credits with a minimum grade of B in each course.

Who Should Apply
Ideal candidates include:
- Professionals with experience in real estate finance or investment who want to incorporate real estate development activities into their existing practice or to manage real estate development projects.
- Real estate finance and valuation services advisors, capital markets specialists, and investment consultants who want to better understand the real estate development process.
- Current or former M.S. in Real Estate students who wish to add a specialized designation in Real Estate Development. Current M.S.R.E. students who wish to receive both the Master of Science and the
Advanced Certificate may apply up to 9 credits of successfully completed coursework with a grade of B or better towards each program.

More information about PCS admissions can be found on the Fordham website.

Requirements

The Advanced Certificate in Real Estate Development is a 15-credit program consisting of three required courses for 9 credits and 6 elective credits. Courses are scheduled for evenings during the fall, spring, and summer terms. You can complete the program at the pace that suits you, whether part-time or full-time.

The courses of the Graduate Certificate in Real Estate Development are designed to ensure that every graduate has a grasp of the essential elements of the real estate development process and the specialized legal, physical, analytical and project management concepts and skills required in the multidisciplinary, creative and entrepreneurial world of real estate development. The 9-credit core curriculum is designed to give students an in-depth mastery of the phases of and the activities performed during the real estate development process including conceptualization, site acquisition, planning, feasibility analysis, design, construction, financing, leasing and asset management. The 6-credit elective course requirement offers students the opportunity to immerse themselves in specialized topics of their choice.

Who Should Apply

Ideal candidates include:

Ideal candidates include:
• Real estate attorneys, developers, brokers, and management professionals who want to further their professional skills in finance and investment.
• Commercial real estate lenders who want to go to the next level in their career
• Design and construction industry professionals who want to better understand the broader ownership perspective of the real estate finance and investment industry.
• Planners and public agency personnel involved in real estate projects.
• Current or former M.S. in Real Estate and Advanced Certificate in Real Estate Development students who wish to add a specialized designation in Real Estate Finance.

More information about PCS admissions can be found on the Fordham website.

Requirements

The Advanced Certificate in Real Estate Finance is a 15-credit program consisting of four required courses for 12 credits and 3 elective credits. Courses are scheduled for evenings during the fall, spring, and summer terms. You can complete the program at the pace that suits you, whether part-time or full-time.

The courses of the Advanced Certificate in Real Estate Finance are designed to ensure that every graduate will have a grasp of the most important elements of real estate financial analysis, financial modeling, market analysis, lease analysis, real estate valuation, debt and finance, credit analysis, underwriting and real estate capital markets, while the elective credits offers students the opportunity to immerse themselves in specialized topics of their choice.

UNDERGRADUATE BULLETIN

2020-2021 Undergraduate Bulletin

This Bulletin describes the academic procedures, degree programs and requirements, and courses of instruction as projected for the undergraduate colleges of Fordham University during the 2020–2021 academic year.

- Fordham College at Rose Hill (p. 1177)
- Fordham College at Lincoln Center (p. 1168)
- Gabelli School of Business (p. 1197)
- School of Professional and Continuing Studies (p. 1186)

Fordham College at Rose Hill (FCRH) and Fordham College at Lincoln Center (FCLC) provide a wide variety of academic programs in the liberal arts and sciences at the Rose Hill and Lincoln Center campuses, respectively. The undergraduate program of the Gabelli School of Business offers business programs at both the Rose Hill and Lincoln Center campuses. FCRH, FCLC, and Gabelli primarily serve recent high school graduates interested in traditional, residential, full-time study. The School of Professional and Continuing Studies (PCS) primarily serves adult learners interested in part-time study at the Rose Hill, Lincoln Center, or Westchester campus.

The University reserves the right to withdraw or modify any course or program listed within, or to make any changes it considers necessary or desirable to improve undergraduate education, or for which it deems the registration insufficient.

Students are responsible for knowing and complying with all the regulations that may affect their status at Fordham University. Students are expected to acquaint themselves with the contents of this Bulletin and to read all notices posted regarding Fordham University regulations. Please refer all questions to the Office of the Dean or the chair of the department in the appropriate college.

Academic Policies and Procedures (undergraduate and university-wide)

Academic Policies and Procedures that pertain to FCLC (p. 1171), FCRH (p. 1180), PCS (p. 1191), and Gabelli (p. 1203) may be found in their respective sections of this bulletin.

Academic Policies and Procedures pertaining to all undergraduates:

- Academic Progress, Probation, Suspension, and Dismissal (p. 1047)
- Admissions Policy (p. 1048)
- Deferred Examinations (p. 1048)
- Grading System (p. 1049)
- Incomplete Coursework (p. 1050)
- Integrity of Full-Time Study (p. 1050)
- Payment of Tuition and Fees (p. 1050)
- Procedure for Appealing a Course Grade (FCRH, FCLC, and Gabelli School) (p. 1050)
- Refund (p. 1051)
- Student Attendance (p. 1052)
- Transcript of Record (p. 1053)
- Undergraduate Policy on Academic Integrity (p. 1054)
- Withdrawal from the University and Leaves of Absence (p. 1060)

Academic Policies and Procedures pertaining to all students university-wide:

- Affirmative Action Policy (p. 1057)
- Campus Safety (p. 1057)
- Equity in Athletics Disclosure Act (p. 1057)
- Nondiscrimination and Title IX Coordinator (p. 1057)
- Recruitment of Jesuits to the Faculty (p. 1057)
- Reserved Rights (p. 1058)
- Student Records (p. 1058)
- Support Services for Students with Disabilities (p. 1059)
- University Code of Conduct (p. 1059)

Academic Progress, Probation, Suspension, and Dismissal

For policy on satisfactory academic progress, probation, suspension, and/or dismissal, please refer to the individual college chapters of this bulletin.

Midterm Grades for First-Year Students

In their first year, all full-time students receive an alphabetical evaluation of their work at midterm. This grade is not factored into the student's academic record nor does it affect their GPA. It indicates where they stand only in their semester’s work and, if they are failing, urges them to make the necessary adjustments to better their performance. Once midterm grades have been compiled, first-year students’ advisers arrange individual meetings with the students to review their progress.

Midterm Grades for Other Students in Danger of Failing

Upper-level and PCS students in danger of failing at midterm receive a numerical code indicating the nature of their deficiency. This grade is not factored into the student's academic record nor does it affect their GPA. It indicates where they stand only in their semester’s work and, if they are failing, urges them to make the necessary adjustments to better their performance.

Midterm Appraisal

Students are responsible for learning their academic standing at midterm. Students who withdraw after the deadline for withdrawing will receive a grade of WF for the course.

Final Examinations

Final examinations will be administered in each course, except in special cases where a final project is pedagogically appropriate. The day, time, and room for the final examination are scheduled by the Office of Academic Records. The current version of the final exam schedule will be posted by Academic Records during the semester. For evening courses in any college/school, final examinations are scheduled for the same day, time, and room as the course itself.

Faculty are not allowed to move their final exams to the last days of class or to the reading period. Take-home exams must be distributed in a
timely fashion during the last week of classes and be due no earlier than the regularly scheduled examination date. Faculty are required to meet with their students during the time scheduled for the final examination, whether the final is actually given during that time or is a take-home exam.

If a student has a conflict of examinations, he or she should notify and arrange with the instructor to take one exam at another time within two weeks of the final exam date. For example, it is recommended that students have a maximum of two exams per day (excluding evening courses). If a student anticipates the need to miss a final exam, this should be worked out in advance with the instructor and in consultation with the appropriate class dean/associate dean.

Deferred Final Examination: If a student experiences an illness, personal emergency, or some special contingency on the day of the final exam or when a final assignment is due, written documentation of the reason for the absence must be provided to the class dean or associate dean within five University working days of the examination date. In the case of illness, an official doctor’s note should be provided; in other situations, a written explanation by the student will be sufficient. This documentation will be used to determine whether approval of the request for a deferred examination will be granted. If the request is approved, the deferred examination must be completed by the date specified on the academic calendar. In most cases, the deferred exam should be completed in a timely enough manner that the professor can grade the exam and submit a change of grade form. Students should make arrangements with the instructor for making up the final with assistance from the home department if needed. If the request is rejected, then a grade of F should be recorded as the grade for the final examination.

Admissions Policy
Application Process

Applications will be reviewed holistically as we look for students who are a good match for Fordham. Our primary focus is that applicants will be academically successful and bring personal qualities of integrity, perseverance, and leadership to our campus communities. We learn about applicants through their transcripts, test scores (if submitted), essay, extracurricular activities, and a primary academic letter of recommendation. For many students, this part of our review provides a strong indication if Fordham is a good fit. For some applicants, we need to know even more about them to inform our decision. Therefore, we will also consider elements such as additional recommendations or other supplementary materials.

Early Action

Students who would like to receive an admission decision early may submit an application by November 1. Students who chose to submit testing and are applying under the Early Action process should complete the SAT or ACT by December of their senior year. The Early Decision process is binding, and admitted students are required to commit to Fordham. Decision letters will be sent by December 20.

Priority Performance

Students applying to the theatre major or the Ailey/Fordham BFA in Dance program must apply by the Priority Performance deadline of November 1. Please note that theatre and dance applicants should select Early Action on the Common Application. Candidates for these programs will be automatically considered as Priority Performance, and decisions will be rendered on a rolling basis after March 1. These programs have additional audition/interview requirements.

Regular Decision

Students applying Regular Decision may submit an application by January 1. If submitting standardized testing, applicants should complete the SAT or ACT by December of the senior year. The Regular Decision process is non-binding, and students do not have to commit to the institution they plan to attend until May 1. Decision letters will be sent by April 1.

Part-Time/Adult Admission

Fordham University offers highly regarded part-time/adult degree programs at three convenient locations in New York City and the metropolitan area—at the Lincoln Center campus in Manhattan, the Rose Hill campus in the Bronx, and the Westchester campus in West Harrison, New York. Our part-time/adult degree programs are flexible, personal, intellectually stimulating, and built on the same standards of excellence that have made the Fordham degree prestigious since the 1840s.

For more information, please refer to the Fordham School of Professional and Continuing Studies (p. 1186) section of this Bulletin and call the Office of Admission at the campus of your choice: Rose Hill, 718-817-4600; Lincoln Center, 212-636-6372; or Westchester, 914-367-3303.

Deferred Examinations

Absences for reasons of religious holidays, serious illness, death in the student’s immediate family, or required participation in a University-sponsored event are, with the appropriate documentation, excused absences, and students will be given an opportunity to make up class examinations or other graded assignments. Faculty members are under no obligation to allow makeup work for unexcused absences.

Final exam: A student may be excused from taking the final examination at the normally scheduled time and be given a grade of ABS only for illness, personal emergency, or some special contingency. Written documentation of the reason for the absence must be provided to the class dean or associate dean within five University working days of the examination date. In the case of illness, an official doctor’s note should be provided; in other situations, a written explanation by the student will be sufficient. This documentation will be used to determine whether approval of the application will be granted. If the request is approved, the deferred examination should be completed in a timely enough manner, so that the professor can grade the exam and submit a change of grade form before the deadline for ABS removal specified in the academic calendar. Students should make arrangements with the instructor for making up the final with assistance from the home department if needed. If the application is rejected, then a grade of F will be recorded for the examination.
Grading System

The University uses a letter grading system with quality point equivalents. The actual number of credits earned in each course; cumulatively reflects the number of credits successfully completed to date, meaning all classes passed at Fordham plus any IB/AP/transfer credits awarded. Credit for courses taken pass/fail, while not counted toward quality hours, are counted in earned hours.

GPA Hours: The number of credits assigned for each course that was attempted for a regular grade. “Regular” grades are standard letter grades with a numerical value assigned (A-F). WF, or withdrawal failure, is the numerical equivalent of an F and is counted toward quality hours.

Quality Points: The numerical value of the earned grade in each course (not shown on My.Fordham, but see above) multiplied by the number of credits assigned for each course that was attempted for a regular grade (quality hours).

Grade Point Average: a weighted average used to indicate to the student and to the faculty the academic progress of each student. Since each course is added to the accumulated average of all courses pursued, it is a cumulative index and is computed by dividing the quality points by the quality hours. This index is used to determine the student’s rank in class and hence is computed to three digits beyond the decimal point. Courses taken pass/fail are not counted towards quality hours, and are not included in the grade point average.

Pass/Fail

Sophomores, juniors, and seniors are allowed to register for one elective course per year on a Pass/Fail basis. Credit will be granted for a passing grade, and no credit awarded for a failing grade. Since there is no numerical equivalent, the grade is not computed in the student’s GPA index.

No courses used to fulfill a core, major, or minor program requirement may be taken on a pass/fail basis. Once chosen, the P/F option cannot be rejected in anticipation of a high letter grade; conversely, the likelihood of a low letter grade is not grounds for a belated request for a P/F. In order to take a course on a P/F basis, the approval of the appropriate class dean or associate dean is required.

Students are permitted to take one course per year on a pass/fail basis in their sophomore, junior, and senior years. (In the Gabelli School of Business Administration, students are only permitted to exercise their pass/fail option for liberal arts electives. Pass/fail courses may not be used for the fulfillment of courses going toward majors, minors, or concentrations.)

 Withdrawal from a Course

With the permission of the appropriate dean, a student may withdraw from a course or courses until the deadline specified in the academic calendar. If permission is obtained, the student will be awarded the grade of W, a grade which carries no academic penalty. A WF, a grade which is the equivalent of an earned F in the cumulative quality point index, may be given when the student ceases to attend a course without formal approval from the dean’s office. If a student withdraws from a course after the deadline specified in the academic calendar, they will receive a WF. If a student is found in violation of the Academic Integrity Policy and receives an F in a course, and subsequently elects to withdraw from the course prior to the withdrawal deadline, the student shall receive the grade of WF. Students who withdraw from a course are responsible for discussing with the appropriate dean how the lost credits will be made up. In addition, they are advised to refer to the information on tuition refunds in the Academic Programs, Policies, and Procedures section of this bulletin for information about financial penalties.
Quality Point Index
The quality point index, or grade point average, is a weighted average used to indicate to the student and to the faculty the academic progress of each student. Since each course is added to the accumulated average of all courses pursued, it is a cumulative index and is computed in the following manner:

1. Multiply the numerical value of the letter grade in each course taken by the number of credits assigned to the course (exclude all classes taken on a pass/fail basis);
2. Add these products and divide by the total number of credits earned in these courses (exclude all classes taken on a pass/fail basis). This is your quality point index or grade point average.

This index is used to determine the student’s rank in class and hence is computed to three digits beyond the decimal point.

Notification of Grades
Grades are posted on My.Fordham at the end of each term. Students are expected to check My.Fordham for their final grades. Grade reports will not be mailed to students.

Incomplete Coursework
When course requirements, other than just the final exam, have not been met, the instructor may report a temporary grade of INC (incomplete). This process should be initiated with the student’s class dean or advising dean as early as possible. FCRH, FCLC, and PCS students must fill out an Undergraduate Petition for Grade of Incomplete (available from their advising dean). The grade of INC will not be allowed unless the petition is on file. Gabelli students should contact their class dean to initiate this procedure.

On completion of the course requirements, the INC will, with the approval of the class dean, be removed and replaced by a permanent grade. If the requirements are not completed by the date specified on the academic calendar, the INC will be changed automatically to an F.

Integrity of Full-Time Study
A university cannot compromise on its objective of the honest and wholehearted pursuit of academic excellence. Students must guard against allowing outside activities, including part-time employment, from interfering unduly with their academic pursuits. Full-time student status means just that. Therefore, students should not compromise their academic careers by losing sight of the primary objective of academic excellence.

Payment of Tuition and Fees
Shortly after registration students are sent a billing statement. Payment in full for all charges must be made to the University on or before the due date on the first bill of the semester. The due date that appears on each subsequent billing statement refers to newly billed charges only. Failure to make payment by the due date may result in late fees, and/or cancellation of registration and campus housing. The University will also deny access to registration, official transcripts, and diplomas.

Fordham University accepts payment by cash, check, money order, wire transfer, or Automated Clearing House (ACH) transactions that directly debit an individual's bank account.

For credit card payments, please see the following credit card procedure:

Payment for tuition, fees, room, and board cannot be made by credit card with the following exceptions:

- School of Professional AND Continuing Studies and Evening Program students in the Gabelli School of Business,
- For Summer Session: All Undergraduates, Graduate School of Arts and Sciences, and Graduate Religion students,
- Institute of American Language and Culture course fees,
- Miscellaneous incidental fees (conferences, workshops, application fees, late fees).

For those students who are eligible to pay by credit card, payment may be made in person or by calling Enrollment Services during regular business hours at 718-817-4900 or by accessing My.Fordham and clicking on “Make a Payment.” Credit cards currently accepted are VISA, MasterCard, American Express, and Discover Credit card payments sent to the P.O. Box address will be returned to the sender. For the most up-to-date payment methods, please click here.

Late Payment and Penalties
The amount due that appears on each bill is payable on or before the due date to be considered on time. The due date that appears on each bill refers to newly billed charges only. All balances must be paid in full, or if necessary, a formal payment arrangement must be completed by the due date. The Office of Student Financial Services is available to counsel students and families on various financing options.

Balances that remain unpaid by the due date will incur a late fee of $15 or 1.5 percent per month, whichever is greater. Unpaid tuition and fees or default on payment arrangements may result in cancellation of registration and loss of University housing. Additionally, holds will be placed on future registrations, University Housing, official transcripts, and diplomas.

Procedure for Appealing a Course Grade (FCRH, FCLC, and Gabelli School)
The policy outlined below applies to all undergraduates except those in the School of Professional and Continuing Studies (PCS), whose policy can be found here.

An undergraduate who claims to have received an incorrect grade in a course may use the following grievance procedure. The student must act in a timely manner following the steps below with the goal of resolving the grade grievance.

The timeline below refers to when classes are in session during the given semester.

Step One
The student should set a meeting time and discuss with the professor whose grade they are grieving during the semester or within one month of the beginning of the new semester. In the event that the instructor will not be available during the following semester, this meeting can be held by teleconference if needed.
Step Two
If the grade grievance is not resolved to the satisfaction of the student, the student may submit a written request for the grade change and the supporting justification to the chairperson of the pertinent department/area within two weeks of ending discussion with the professor. The chairperson will send a copy of this request to the professor.

Step Three
The department/area chairperson will meet with the student within two weeks of receiving the student’s written request for the grade change. The chairperson will also review the request with the professor.

1. If the chairperson finds the request for a grade change without merit, they will convey this decision, in writing with explanation, to the student.
2. If the chairperson supports the request for a grade change, the chairperson will meet with the student and professor together or separately as the professor deems best. If the professor believes the grade change is not merited, he or she will make his or her reasons clear to the chairperson in writing if requested by the chairperson.
3. Should the student decide to appeal to the associate dean, the student should inform the chairperson within two weeks. The chairperson will act on this appeal by submitting a written report and supporting materials within two weeks to the associate dean of the college/school in which the course was taken.

Step Four
The associate dean will review the materials and assemble an appeals committee of their choosing to provide advice on how best to handle the grade grievance. Please note that to ensure procedures are fair and standardized, the associate dean does not meet with either party but may request additional information.

Step Five
The associate dean of the appropriate college/school will review the materials, make a decision to be given to the dean for final approval, and notify all parties of the decision. The dean’s decision is final.

Refund
The University’s refund policies and procedures ensure equitable refunds to students who withdraw from all or a portion of their studies or when payment(s) are in excess of total charges.

A refund request can be submitted to the Office of Student Accounts in writing, verbally, or by e-mail at studentaccts@fordham.edu. Credit balances are processed each business day. Refund processing for a term begins after the add/drop period, for the student’s home school, has passed. Please allow 10 business days from when a credit balance is refundable for the processing to be completed.

Credit balances resulting from anticipated payments, third-party payments (i.e., outside scholarship providers, employers, governmental agencies, New York State Tuition Assistance Program [TAP], etc.) or personal checks will only be refunded once funds are received by the University and applied to the student’s account. Refunds will be processed as follows: credit back to the original credit cards up to the amount of the original charge, PLUS loans refunded to parents, monthly payment plan payments usually refunded to applicant; all other credits refunded to the student. Student refund checks are mailed to the student’s local address, unless otherwise specified on the refund request form.

Application fees and tuition deposits are not refundable. Registration, late payment, student activities, laboratory, maintenance of matriculation, and other special fees are not refundable after classes begin.

Room deposits are refundable according to the following schedule:

If the withdrawal notification is received by the Office of Residential Life:

1 Notification of withdrawal after August 1 for the fall and at the beginning of Christmas break for spring assignments are subject to a late withdrawal fee. This fee is in addition to the forfeit of any housing deposit paid.

A student is considered withdrawn from the University only if an official withdrawal form has been submitted to the Office of Academic Records. The effective date of withdrawal will be the date this form is signed by to the Office of the Dean.

Refund of Institutional Charges
The following refund policies are based on 100 percent payment of all institutional charges for the enrollment period. The refund period begins on the first day of the enrollment period.

1 The add/drop period for each school within the University is approximately seven days into the term. During this period changes in course work are permitted with no tuition penalty. However, if a student withdraws from the University during the add/drop period, the tuition liability will be calculated based on the above table.

Updated: 07-27-2020
Refund Policy Appeal Process
A student may request an appeal in writing to the office of the appropriate dean. The request should include all relevant information describing the special circumstances on which the appeal is based.

Return of Financial Aid Funds Policies and Procedures
Financial aid that has been disbursed to a student’s account for a period of enrollment from which the student has withdrawn is subject to the return of funds policy. Funds from federal Title IV assistance programs are subject to Return of Title IV Funds policy. Title IV funds include Direct Subsidized and Unsubsidized Loan, Perkins Loan, PLUS Loan, Pell Grants, and SEOG. (This policy does not apply to the Federal Work Study program.) Funds from Fordham University are subject to the Institutional Return of Funds policy.

The student is responsible for any unpaid institutional charges. The student is also responsible for any additional balances created as a result of the Title IV Return of Funds Procedure. Also refer to the Refund and Withdrawal Policies.

Procedure for Determining the Return of Institutional Funds for Non-Title IV Aid Recipients
Financial aid that has been disbursed to a student’s account from Fordham University sources will be prorated at the same rate that the student is charged. See the percent in the column “Due Fordham” in the Institutional Refund Policy (Tuition) chart, located in the “Refund of Institutional Charges” section under the Academic Programs, Policies, and Procedures chapter of this bulletin, to determine the rate.

Procedure for Determining the Return of Financial Aid for Federal Title IV Aid Recipients
Changes to federal law may affect this policy.

Procedure for determining the Federal Return of Title IV Funds (This procedure is federally mandated.)

Step 1: Determine the Withdrawal Date
Official Withdrawals
If the student officially withdraws, the withdrawal date is the date Fordham determines the student either began the withdrawal process, or the date the student provided official notification to Fordham, in writing or verbally, of his or her intent to withdraw.

Unofficial Withdrawals
If Fordham determines that a student did not provide official notification of his or her intent to withdraw because of illness, accident, grievous personal loss, or other such circumstances beyond the student’s control, the withdrawal date will be determined in relation to that circumstance.

If a student does not return from an approved leave of absence, the withdrawal date is the date that institution determines the student began the leave of absence. If a student takes a leave of absence that does not meet the requirements of an official leave of absence, the withdrawal date is the date that the student began the leave of absence.

Otherwise, the withdrawal date is the student’s last date of attendance at an academic-related activity that is documented by Fordham.

Step 2: Calculate the Percentage of Enrollment Period Completed
The percentage of enrollment period completed is determined by dividing the total number of calendar days in the enrollment period into the number of calendar days completed in that period as of the withdrawal date. (The total number of calendar days in a payment period includes all days within the period. Scheduled breaks of at least five consecutive days are excluded from the total number of calendar days in the enrollment period and the number of calendar days completed in that period.)

Step 3: Calculate the Amount of Title IV Assistance the Student Can Keep
If the withdrawal date is greater than 60 percent of the enrollment period (semester), the student can keep 100 percent of the Title IV aid received for that semester. If the withdrawal date is less than or equal to 60 percent of the semester, the amount of Title IV funds that the student can keep is calculated by determining the percentage of Title IV funds that has been earned by the student for that semester. Then apply this percentage to the total amount of Title IV funds that was disbursed for the semester as of the withdrawal date.

The amount of Title IV funds that the student cannot keep is calculated by subtracting the amount of Title IV funds the student can keep from the total of Title IV aid received.

Step 4: Determine the Amount to be Returned or Repaid to the Financial Aid Program
Fordham is required to return the lesser of the total amount of Title IV funds the student cannot keep, or an amount equal to the charges if the total amount to be returned exceeds the charges incurred by the student. Charges include tuition, fees, room, and board (if the student contracts with Fordham for room and board) and can include other education-related expenses assessed by Fordham.

The student must return the total amount of Title IV funds the student cannot keep minus the amount Fordham is required to return.

The student (or parent in the case of a PLUS Loan) must return or repay, as appropriate, the amount determined to any Title IV loan program in accordance with the terms of the loan, and any Title IV grant program as an overpayment of the grant. However, a student is not required to return 50 percent of the grant assistance that is the responsibility of the student to repay.

Amounts to be returned by Fordham or the student will be credited to the appropriate programs in the following order: Federal Direct Subsidized/Unsubsidized loans, Federal Perkins loans, Federal PLUS loans received on behalf of the student.

If amounts to be returned remain after repayment of all outstanding loan amounts, the remaining excess must be credited to any amount awarded for the semester for which a return of funds is required in the following order: Federal Pell Grants, Federal SEOG Grants, other grant or loan assistance authorized by Title IV of the Higher Education Act, University funds. Federal work-study is excluded from this policy.

Student Attendance
Students are expected to attend every class of every course for which they are registered. If an instructor wishes to have a different attendance policy, it must be spelled out in the syllabus distributed to each student registered for the course, including whether and how absences will affect the student’s grade for the course.
In addition to faculty members keeping record of attendance, students are responsible for keeping a record of their own absences and may not exceed the maximum number allowed. While students may consult the instructor about their record of attendance, the instructor is the final judge of that record.

Absences for reasons of religious holidays, serious illness, death in the student’s immediate family, or required participation in a University-sponsored event are, with the appropriate documentation, excused absences, and students will be given an opportunity to make up class examinations or other graded assignments. At FCHR, students are asked to complete an Excused Absence Request Form, available at fordham.edu/fchr_excused_absences, which is reviewed by their respective class dean. At FCLC, students are asked to complete an Excused Absence Request Form, available at fordham.edu/fclc_excused_absences, which is reviewed by their class dean and submitted to the instructor for final approval. At Gabelli, students are asked to email their class dean, except students (sophomores) enrolled in a cohort, who should visit fordham.edu/gabelli/absence. At PCS, students are asked to email their advising dean with their request, which should include the reason for the anticipated absence.

The maximum number of total absences will not exceed six class meetings for a course that meets three days per week, four class meetings for a course meeting two days per week, or two class meetings for a course that meets once a week, unless otherwise noted in the syllabus.

If a faculty member chooses to allow unexcused absences, the number of excused and unexcused absences combined may be limited to the maximum number noted above. Faculty members are under no obligation to allow makeup work for unexcused absences. Faculty who choose to establish a more stringent attendance policy must have the approval of their department. All faculty must include their attendance policy in the course syllabus distributed at the first course meeting.

In cases where unusual circumstances cause a student to miss a significant amount of class time for reasons beyond the student’s control, the student should confer with the faculty member and class/advising dean to ascertain if it is feasible to complete the work of the course.

For all students, the following guidelines apply.

**Religious Holidays:** A number of religious faiths are represented in the Fordham student body. Students who will be absent due to a religious holiday should notify their instructor at the beginning of the semester.

**Participation in University-Sanctioned Activities:** Students serve as representatives for the Fordham community in a variety of activities. The authorized administrator/director of the activity will provide a written list of the dates of the activities, including travel time, to each participating student at the beginning of the semester. Students will provide each of their professors with the scheduled list of excused absences at the beginning of each semester. The faculty will acknowledge the scheduled absence(s) by signing an accompanying letter. In some cases—e.g., the scheduling of a championship tournament or a rescheduled competition—the actual timing of the event may not be known at the beginning of the semester. In such cases, the authorized administrator will make every effort to notify instructors as soon as possible.

**Student Health Services** will not provide notes excusing students from class. Students can give permission for their class/advising deans to contact Student Health Services. At FCHR, this is part of the review of Excused Absence Forms. At FCLC, Gabelli, and PCS, students are expected to provide their class/advising dean with appropriate documentation.

In all of the circumstances noted above, it is the student’s responsibility to obtain any class notes or other course material missed due to absences. It is also the student’s responsibility to speak with the instructor to make arrangements to make up missed examinations or graded assignments. The manner in which the work will be made up is left to the discretion of each faculty member.

Faculty members are encouraged to notify the appropriate class or advising dean of the student’s home college/school about prolonged absences.

**Transcript of Record**

An official transcript is one bearing the seal of the University and the signature of the University registrar.

Official academic transcripts may be issued to educational institutions, employers, scholarship/grant/fellowship organizations, application services, government agencies, etc., or to students (for personal use) provided the student discloses the intended final recipient. Current students may view their unofficial transcript online by using their credentials on my.fordham.edu. Official transcripts cannot be emailed or faxed to recipients.

Students and alumni who request an official transcript for personal use may not forward it to another party; doing so renders the transcript unofficial. Transcripts should always be issued to the intended final recipient.

The University offers secure electronic transcripts as well as mailed (paper) transcripts. Full details are available from the Office of Academic Records.

Students may request an unofficial transcript listing courses and credits and marked “Unofficial;” Students may also view their unofficial transcript via my.fordham.edu. The University accepts no responsibility for the accuracy of an unofficial transcript after it has been issued.

Transcripts may be requested from the Office of Academic Records following their outlined procedures. They should be requested well in advance of the date desired. No transcripts will be issued for students who have unpaid financial obligations to the University. A fee for immediate processing is charged for each transcript, payable at the time of request. The University reserves the right to change the fee at any time without notice.

The Office of Academic Records may use its discretion to limit the number of transcripts requested at any one time.

Fordham University will make every effort to promptly fill all requests for transcripts but will not assume responsibility for delays. All inquiries concerning issuance of transcripts must be made to the Office of Academic Records within three months of the original request.

Fordham University students who attended prior to 1990, or attended Marymount College prior to 2000, will only be able to receive hard copy transcripts.
Undergraduate Policy on Academic Integrity

A university, by its nature, strives to foster and recognize originality of thought, which can be recognized only when people produce work that is theirs alone, properly acknowledging information and ideas that are obtained from the work of others. It is therefore important that students must maintain the highest standards with regard to honesty, effort, and performance.

As a Jesuit, Catholic university, Fordham is committed to ensuring that all members of the academic community strive not only for excellence in scholarship but also for integrity of character. In the pursuit of knowledge and personal development, it is imperative that students present their own ideas and insights for evaluation, critique, and eventual reformulation. As part of this process, each student must acknowledge the intellectual contribution of others.

I. The Academic Integrity Statement

The following statement will be read at the academic orientation by all incoming first-year and external transfer students to increase their awareness of the importance Fordham attaches to integrity within the academic community.

As a student of Fordham University, I recognize that I am part of a community dedicated to the disciplined and rigorous pursuit of knowledge and communication of truth. I therefore commit myself to the University Code of Conduct and upholding the highest standards of academic integrity. Any work that I claim to be my own will be my own; I will give appropriate credit where credit is due; I will be fair and honest in all of my interactions with members of the Fordham community.

By being enrolled at Fordham University, students are bound to comply with the University Code of Conduct, which includes, but is not limited to the following Standards of Academic Integrity.

II. Standards of Academic Integrity

Academic integrity is the pursuit of scholarly activity in an honest, truthful and responsible manner. Violations of academic integrity include, but are not limited to plagiarism, cheating on exams, falsification, unapproved collaboration, and destruction of library materials. Below are instances of violations with which all members of the academic community should be familiar.

A. Plagiarism

Plagiarism occurs when individuals attempt to present as their own work what has come from another source. Plagiarism takes place whether such theft is accidental or deliberate. It is no defense to claim that one has “forgotten” to document ideas or material taken from another source.

Examples of plagiarism include, but are not limited to:

1. Using the ideas of another person, whether or not such ideas are paraphrased, from whatever source, including oral, print, broadcast, or computer-mediated communication;
2. Rewriting borrowed material by simply dropping a word here and there, substituting a few words for others, or moving around words or sentences;
3. Presenting borrowed material, whether a phrase, a sentence, or whole paragraphs without placing quotation marks around the borrowed material in the approved style;
4. Presenting as one’s own an assignment, paper, or computer program partially or wholly prepared by another person, whether by another student, a friend, or by a business or online service that sells or distributes such papers and programs;
5. Failing to use proper citation for information obtained from print sources or the Internet, according to citation criteria specified by the instructor or, in cases where instructor guidance is not given, by standard manuals of style (e.g., The Chicago Manual of Style).

B. Cheating

Cheating occurs when individuals use course materials, information or devices (e.g., programmable calculator, cell phone) when such use is unauthorized or prohibited.

Examples of cheating include, but are not limited to:

1. Having or using unauthorized materials, information, or an unauthorized device at an examination, test, or quiz;
2. Copying from another student at an examination, test, or quiz, or copying another student’s assignment, data, or laboratory report;
3. Permitting another student to copy from an assignment, paper, computer program, project, examination, test, or quiz;
4. Obtaining and/or using an unauthorized examination, test, or quiz prior to its administration;
5. Having another person act as proxy to take an examination, test, or quiz or to complete an assignment, paper, computer program, or project.

C. Falsification

Falsification occurs when individuals make false statements that mislead others.

Examples of falsification include, but are not limited to:

1. The submission or presentation of a falsified excuse for an absence from a course requirement, examination, test, or quiz;
2. The presentation of false identification or credentials in order to gain admission to a course, examination, test, quiz, or degree program;
3. The creation of a false or misleading citation;
4. The manipulation or falsification of data for an academic assignment.

D. Unapproved Collaboration

Certain coursework and assignments such as team projects, papers, and laboratory work may involve collaboration. Unless expressly permitted or prescribed by the faculty member, students shall not engage in collaboration on graded assignments. It is the student’s responsibility to ask for clarification from a faculty member as to what extent, if at all, collaboration with others is allowed.

E. Other Violations of Academic Integrity

Additional violations of academic integrity include, but are not limited to:

1. Theft, destruction, or tampering with library materials, audio- and videotapes, and computer hardware or software;
2. Submission of a paper or project to more than one course during the time in which a student is attending Fordham University, without the explicit permission from all the instructors involved;
3. Submission of work previously done in high school or at another institution, whether modified or not, without permission of the instructor.
III. The Academic Integrity Committee

To foster a trusting environment that is essential for learning, it is the responsibility of both students and faculty to maintain and to promote the intellectual community. To ensure that all members of that community are represented in the process, a committee comprised of three faculty members, three students, and one academic administrator will be established for each college/school. This committee will oversee the procedures and appeals associated with courses taught in that college/school.

Responsibilities

The responsibilities of the Academic Integrity Committee (AIC) are as follows:

1. to record and verify receipt of Academic Violation Reports signed by the instructor and student;
2. to further investigate the incident if the student challenges the decision of the instructor, and schedule a case review;
3. to report the violation to the appropriate dean(s);
4. to provide annual reports of the academic integrity violations and final sanctions to the dean of the college/school;
5. to review periodically the functioning of the committee, including Standards of Academic Integrity and Procedures and Appeals to determine if changes are needed. This oversight review shall be communicated to the dean of the college/school;
6. to work with relevant student groups to develop workshops to promote and maintain academic integrity.

Membership

The dean of the college/school will solicit nominations for membership, including substitute faculty and students. The dean will forward a list of recommendations to the Office of the Provost, who will then appoint three faculty, three students, and one administrator from the college/school to serve on the committee, and the provost’s office will identify substitute faculty and administrator members. Agreement to serve on the committee is a serious commitment. Faculty members will serve a term of three years, and student members will serve a term of two years with an initial staggering of terms to ensure continuity. The chair of the committee will serve in that capacity for a one-year period with the possibility of yearly renewal.

Case Reviews

Case reviews are to be conducted by a quorum comprised of the AIC chair, two (additional) members of the faculty/administrator group, and two student members. The chair will verify members’ attendance. A member of the AIC may be excused from a particular case review when a conflict of interest is disclosed to the chair. In the event that an academic integrity violation is filed against a senior just prior to graduation and the student challenges the instructor’s claim, the chair of the AIC is empowered to convene an emergency ad hoc committee during senior week. This ad hoc committee will consist of two faculty and two students. Initially, the AIC membership will be contacted, but if they are not available, any faculty member and any student in the college/school may be asked to participate to ensure that two faculty and two students are present. The ad hoc members will be asked to sign the confidentiality statement.

Confidentiality

Faculty, administrators, and students engaged in academic integrity procedures involving academic integrity violations shall treat as confidential all information disclosed during such procedures, as well as the fact of occurrence of the case review. Persons nominated to the AIC as members will only be permitted to serve only after they sign a nondisclosure agreement that limits the discussion of cases to committee members and the college/school deans on a need-to-know basis only.

IV. Procedures and Timeline for Academic Integrity Violation Reporting

Instructors are required to report any academic integrity violations they detect in their classes. This information is kept on file until students graduate in order to determine if multiple infractions have occurred.

- A. As soon as an academic integrity violation is identified, the instructor shall contact the student to schedule an in-person meeting to discuss the basis for the suspected violation and the sanction(s) to be imposed according to the Academic Integrity Policy Statement (Section VI). For charges at the end of the spring semester, when there may not be an opportunity to meet with the student, this process may be completed by teleconference. However, discussions over electronic mail may be disadvantageous to students in regards to comprehension and educational value. Therefore, in the event that an in-person meeting or teleconference is not immediately feasible, the process can be put on hold until classes resume. If a meeting with the student will be held in the fall instead, this should be determined by the instructor, with consultation from the respective Chair of the AIC, before the June deadline for finalizing NGRs; at that point the Chair can ask that this period be extended if given sufficient details from the faculty member.

- B. Prior to meeting with the student, the instructor shall fill out an Academic Integrity Violation Report and attach the appropriate documentation, including the syllabus.

- C. During the in-person meeting, both the instructor and student will sign the report. When signing the report, the student will be asked to either acknowledge that they have committed a violation of the Academic Integrity Policy and accept the instructor’s sanctions, or indicate that they intend to challenge the instructor’s claim that they have committed an academic integrity violation. The student cannot challenge the instructor’s sanction for the offense (see section below: The Student Challenge and Case Review).

D. Immediately following the meeting, the Academic Integrity Violation Report and documentation will be sent directly to the chair of the AIC. The chair of the AIC will then notify the committee members that an Academic Integrity Report has been filed and apprise the members of the student’s signed statement.

- E. If the student has signed an affirmative statement of violation and acceptance of the instructor’s sanctions in accordance with this Policy Statement, the dean’s office of the student’s home college/school will be notified as such. Under this circumstance, no case review by the AIC will be held and the case report is sent directly to the dean/associate dean of the student’s home college/school.

- F. When a charge is challenged, the instructor will file a grade of “NGR” pending the actions of the AIC and notification from the AIC chair of any relevant sanction (i.e., an F for the course; Section VI) that is imposed by the dean/associate dean of the home college/school.
V. Procedure for a Student to Report on an Academic Violation

If a student witnesses a violation of academic integrity or otherwise has reason to believe that a violation has occurred, he or she may choose among several possible courses of action.

1. Talk with the student urging him or her to report himself or herself to the instructor of the course or to the chair of the AIC.
2. Discuss the observed action with the instructor, not naming those involved, to obtain guidance and determine if an observed act merits action under the Academic Integrity Policy.
3. Submit a written report to the chair of the AIC. If the student wishes to remain anonymous, the AIC will honor that request during the initial conference between the instructor and the student. This challenge declaration must include a descriptive statement that explains his or her reasons for the challenge.

H. Upon receipt of the student’s declaration to challenge, the AIC chair in consultation with the department/area chair or program director will seek a second reviewer in order to conduct a blind review of the Academic Integrity Report and the student’s letter. The reviewer should be a member of the department or interdisciplinary program from which the report originated. The second reviewer will submit his or her evaluation to the chair of the AIC. A second reviewer from outside the university will be utilized only when circumstances warrant.

I. Upon receipt of the second reviewer’s evaluation, the chair shall schedule a case review (Section 3.C) with the AIC members.

J. The AIC will review the case materials and the written statement (Section 4.F) of the student. After reviewing these, the committee will deliberate and vote on whether a violation has occurred. The AIC chair will notify the student, the instructor, and, in cases of the affirmative, the dean of the student’s home college of the committee’s evaluation.

VI. Sanctions for Violations of Academic Integrity

If a student is found in violation of academic integrity standards while an undergraduate at Fordham University, the following sanctions shall be imposed:

A. First Offense
1. The student shall receive an F on the assignment/examination, unless otherwise specified by the instructor. The student may in addition receive an F in the course at the discretion of the instructor.
2. The case shall be documented in the student’s file, where it will remain until the time of the student’s graduation from the college/school, at which time the material will be removed from his or her file. Any records kept for the purpose of analysis and program evaluation by the AIC and not destroyed will have all personal identifying information removed.

B. Second Offense
1. The student shall receive an F for the course and shall be subject to suspension or expulsion from the college/school, at the discretion of the dean. If the student is expelled, the notation—Withdrawn by the University—will appear on their transcript.
2. The case shall be documented in the student’s file, where it will remain until the time of the student’s graduation from the college/school, at which time the material will be removed from their file. Any records kept for the purpose of analysis and program evaluation by the AIC and not destroyed will have all personal identifying information removed.

C. Third Offense
If a student is found guilty of a third violation of academic integrity, the student will receive an F for the course and will be expelled from the University, at the discretion of the dean. If the student is expelled, the notation—Withdrawn by the University—will appear on their transcript.

For any offense, in the event that the student receives an F in the course as the penalty and elects to withdraw from the course prior to the withdrawal deadline, the student shall receive the grade of WF, a grade that is equivalent to an earned F in the cumulative quality point index, if the penalty is accepted or upheld after a challenge.

VII. The Right to Grieve Grades in Relationship to Violations of Academic Integrity

Any other grades given for work in the same course, unless the grade itself is the sanction, can be grieved in accordance with the established college/school policy only after any and all questions of violations of academic integrity have been resolved through the processes stated above.

The complete policy and the Academic Integrity Violation Report is available on the University website at https://www.fordham.edu/info/25380/undergraduate_academic_integrity_policy.

University Policies

- Affirmative Action Policy (p. 1057)
- Campus Safety (p. 1057)
• Equity in Athletics Disclosure Act (p. 1057)
• Nondiscrimination and Title IX Coordinator (p. 1057)
• Recruitment of Jesuits to the Faculty (p. 1057)
• Reserved Rights (p. 1058)
• Student Records (p. 1058)
• Support Services for Students with Disabilities (p. 1059)
• University Code of Conduct (p. 1059)

Affirmative Action Policy

The University continues its commitment to affirmative action by providing the means to recruit, employ, and promote women and other underrepresented minorities in the interest of attaining workplace diversity. The Office of Human Resources Management is available to all employees of Fordham University for consultation, training, and development of those methods and initiatives that advance a more diversified workforce, and ensure nondiscrimination, access to equal employment opportunities, and fair treatment of individuals. It is the responsibility of the Assistant Vice President of Human Resources to monitor and report regularly on the University’s efforts to achieve diversity and compliance with all laws pertaining to nondiscrimination in employment.

Campus Safety

The Advisory Committee on Campus Security will provide upon request all campus crime statistics as reported to the U.S. Department of Education. The U.S. Department of Education Website is www.ed.gov. Fordham University provides campus crime statistics on its website. Requests for a hard copy can be directed to the University Associate Vice President for Public Safety by phone at 718-817-2222 or in writing at

Associate Vice President
Public Safety
Thebaud Annex
Fordham University
441 East Fordham Rd.
Bronx, NY 10458

For more information
Visit the Public Safety web page.

Equity in Athletics Disclosure Act

In accordance with the “Equity in Athletics Disclosure Act,” effective July 1, 1996, information regarding the intercollegiate athletics program is available for review upon request to the:

Senior Associate Athletic Director for Business Affairs
Fordham University, Rose Hill Gymnasium
Bronx, New York 10458
Telephone: 718-817-4300

Nondiscrimination and Title IX Coordinator

Fordham University is committed to maintaining a community in which its members live, work, and learn in a safe and respectful environment that is free from all forms of sex- and gender-based discrimination. This commitment applies to all members of the Fordham community regardless of race, color, national origin, religion, creed, age, ability, sex, gender, gender identity, gender expression, sexual orientation, familial status, pregnancy, predisposing genetic characteristics, military status, domestic violence victim status, criminal conviction, or any other protected class recognized under federal, state, or local law.

The University’s Title IX Coordinator oversees the University’s Title IX compliance efforts and is responsible for coordinating the University’s response to all reports of sexual and related misconduct, including sex- or gender-based discrimination involving educational programs, gender equity in athletic programs, employment, and admission. The Title IX Coordinator also collects data from all of the University’s Title IX reports to monitor the process, including outcomes, to identify and address any patterns or systemic issues that may arise. Fordham will take prompt and effective steps to end sexual and related misconduct, eliminate the hostile environment, prevent its recurrence, and remedy its effects.

Inquiries concerning the application of Title IX and its implementing regulation may be referred to the University’s designated Title IX Coordinator, Kareem Peat, by email at titleix@fordham.edu or by dialing (718) 817-3112.

The Office of Human Resources Management oversees the University’s enforcement of anti-discrimination and anti-harassment in employment (Title VII, New York State Human Rights Law, and NYC and Westchester Human Rights Laws) and non-gender based anti-discrimination and anti-discriminatory harassment of students (Title VI). Inquiries concerning these issues may be referred to the Office of Human Resources Management, hr@fordham.edu or by dialing (718) 817-4930.

Recruitment of Jesuits to the Faculty

As a Jesuit, Catholic institution, Fordham University aims to create a community that is ever more diverse, committed, and deeply engaged in New York City and beyond. Grounded in the Jesuit tradition, we seek new ways to live out our mission in contexts very different from that in which Fordham was founded. Moreover, the Society of Jesus, the religious community that has helped sustain Fordham since 1846, itself shares in this attempt to respond to our times with creativity, confidence, and integrity.

Fordham University has been indebted to the presence and work of so many Jesuits throughout its history, and yet it has thrived, especially in the past 50 years, on account of a great variety of colleagues of diverse intellectual, philosophical, cultural, and religious commitments. We hope that all members of the Fordham faculty will find in our Jesuit, Catholic tradition opportunities for joyful and meaningful work.

We do not expect to return to a time when a large part of Fordham’s workforce consisted of members of the Society of Jesus. And yet we recognize that excellent Jesuit colleagues, while few, continue to search not only for employment as teachers and scholars but also for a way specifically to contribute to the mission and identity of places like Fordham. Some have, in fact, been our own students, yet many more come from more national or international contexts than ever before. We continue to seek out those interested in being fine colleagues, teachers, scholars, administrators, pastors, and citizens of the University.

At any point, the number of Jesuits finishing terminal degrees or otherwise prepared to enter an academic position at Fordham is not large. Yet those who are so prepared stand to make an important
Reserved Rights

The University reserves the right, at its discretion, at any time, to deny matriculated status, to cancel a student’s registration, to refuse to award academic credits, or to deny or rescind a certificate or a degree in accordance with the University Statutes and its academic policies. All forms of dishonesty, including cheating and plagiarism, will result in appropriate disciplinary action, including denial or revocation of a degree or certificate.

Student Records

Notification of Rights under FERPA

The Family Educational Rights and Privacy Act (FERPA) affords students certain rights with respect to their education records. They are:

1. The right to inspect and review the student’s education records within 45 days of the day the University receives a written request for access. A student should submit to the Office of Academic Records—Fordham University Enrollment Group at the Rose Hill Campus, the Lincoln Center Campus, or the Law School Registrar, if applicable, a written request that identifies the record(s) he or she wishes to inspect. The Office of Academic Records-Enrollment Group will make arrangements for access and notify the student of the time and place where the records may be inspected.

2. The right to request the amendment of the student’s education records that the student believes are inaccurate or misleading. A student may ask the University to amend a record that he or she believes is inaccurate or misleading. The student should write the University Registrar, or the Law School Registrar, clearly identifying the part of the record he or she wants changed, and specifically why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise the student of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

3. The right to consent to disclosures of personally identifiable information contained in the student’s education records, except to the extent that FERPA authorizes disclosure without consent. One of the exceptions which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic or research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as on a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.

Upon the request of officials of another school in which a student seeks or intends to enroll, the University may disclose educational records without the student’s consent.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by Fordham University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, D.C. 20202-5920

Directory Information

The University, at its discretion, may provide the following directory information: student’s name, addresses, telephone numbers, electronic mail addresses, photograph, date and place of birth, major field of study, dates of attendance, class level, enrollment status (e.g., undergraduate or graduate; full-time or part-time), participation in officially recognized activities and sports, weight and height of members of athletic teams, degrees, honors and awards received, the most recent educational agency or institution attended, and other such information. A student who wishes the University to withhold directory information from disclosure must notify the Office of Academic Records or Law School Registrar in writing within 10 days after the first day of class each semester.

Dependent Status of Undergraduates

Generally, undergraduate students are considered holding “dependent” status unless written notification and adequate documentation of “independent” status has been submitted to the Office of Academic Records—Enrollment Group.

Veteran Information

Veterans enrolled at Fordham University utilizing education benefits programs—such as Post 9/11 GI Bill, Montgomery GI Bill-Active Duty, Montgomery GI Bill—Selected Reserve and the Reserve Education Assistance Program (REAP)—must present their Certificate of Eligibility (COE) and DD214 to the Office of Academic Records at the time of registration or as soon as possible thereafter. Those utilizing the Vocational Rehabilitation Chapter 31 benefit should ensure that their counselor has authorized them for the semester and should inform the Fordham school certifying officials. Please refer to the VA website, www.gibill.va.gov, for eligibility criteria as well as type of education or training benefits available under each program. The VA can also be reached at 888 442-4551. Veterans who do not have such a letter (COE) must follow the same procedure for payment of tuition as all other students. Specific tuition questions should be directed to the Financial Aid office of your home school.

For information on Fordham University’s participation in the Post 9/11 GI Bill Yellow Ribbon Program, please refer to: https://www.fordham.edu/info/20731/veterans_admissions.
Support Services for Students with Disabilities

The Office of Disability Services (ODS) works closely with students, faculty, and university administrators to ensure appropriate services for students with documented disabilities in accordance with Section 504 of the Federal Rehabilitation Act of 1973 and Title III of the Americans with Disabilities Act of 1990. Students who register with ODS will complete the same coursework as their peers, and registering does not become a part of a student's transcript. The University will make every attempt to provide reasonable accommodations to students who have a documented disability.

Please contact ODS by calling our main office at Rose Hill (Monday–Friday 9 a.m.–5 p.m.) at 718-817-0655 to obtain information about documentation guidelines, which vary by disability, and the registration process if you would like to receive academic accommodations at Fordham University. Please note that students are not eligible to receive any academic accommodations until they have formally registered with ODS and completed their intake appointment. Accommodations are not made retroactively, so it is best to contact ODS to begin this process during the summer before entering Fordham. If a student has one of the following types of disabilities, it is essential to contact ODS by July 2 of the summer before entering as a first year in order to ensure that accommodations can be put in place before classes begin in September: physical mobility, visual impairment, hearing impairment, and certain health conditions. Please do not send documentation of a disability to the Admissions office. The Admissions office will not forward any information regarding a student’s 504 Plan or IEP directly to ODS.

Students seeking a substitution for the foreign language core through the Office of Disability Services must complete the process by the end of their first year at Fordham. Applying for the substitution does not guarantee you will be approved for this accommodation as this accommodation is the only one that changes degree requirements and therefore eligibility is jointly determined by ODS and the dean.

Applicants who have been accepted for admission, or current students who are seeking accommodation(s) for a disability should contact the Office of Disability Services at the following locations:

Lincoln Center Campus
Lowenstein Room 408
212-636-6282

Rose Hill Campus
O’Hare Hall, Lower Level
718-817-0655

Westchester students should contact the Rose Hill office, 718-817-0655.

For more information
Visit the Disability Services web page.

University Code of Conduct

Rationale for University Discipline

The reasonableness of university discipline must be judged in its relation to the educational purposes of the university. If those purposes may be described as the pursuit of truth and the advancement of knowledge, university discipline exists to assure a setting wherein those purposes may be achieved.

The educational purposes of the university can best be protected through the clear communication and enforcement of certain standards of behavior judged essential to the achievement of those purposes. What follows is a statement of these standards of behavior developed through the cooperative efforts of the students, faculty, and administrative officers.

Jurisdiction

Persons: This Code shall apply to every member of the Fordham University community which includes faculty, students, administrative officials, and staff.

When any individual accused of violation of this University Code of Conduct maintains more than one of the above-mentioned statuses in the University, determination of his/her status in a particular situation will be made in the context of the surrounding facts.

Violations

The following actions are considered violations of the University Code of Conduct and are punishable by sanctions imposed in accordance with the published judicial procedures of the University:

1. All forms of dishonesty including cheating, plagiarism, supplying false information to any University official, as well as forgery or use of University documents or instruments of identification with intent to defraud.
2. Theft from or damage to University property and/or theft of, or damage to the property of another while located on property of the University. Knowingly receiving, retaining or disposing of the lost or mislaid property of a member of the University community or of the University itself.
3. Unauthorized entry, use or occupation of University facilities as well as the unauthorized possession, duplication or use of keys to University facilities.
4. Tampering with or misusing fire alarms, fire-fighting equipment or safety equipment.
5. Harassment (verbal or other) or physical abuse, threatening or attempting to inflict physical injury, or creating substantial risk of such injury to another member of the Fordham University community or to any person on University premises.
6. The unauthorized selling, purchasing, producing, or possessing of any lethal weapons, explosives, firework, or incendiary devices.
7. The unauthorized selling, purchasing, producing, possession or use of barbiturates, amphetamines, marijuana, hallucinogens, opiates, or other addictive and illegal drugs or drug paraphernalia.
8. Engaging in, or inciting others to engage in, conduct which interferes with or disrupts any University function, or which prevents or limits the free expression of ideas by others, or which physically obstructs or threatens to obstruct or restrain other members of the University community or visitors.
9. Failing to surrender upon request by clearly identified University personnel (this includes campus security guards) in the performance of their assigned duties, the University identification card which all members of the University community are required to carry.
10. Engaging in lewd, licentious or disorderly conduct.
11. Failing to comply with the direction of clearly identified University personnel (this includes campus security guards) in the performance of their assigned duties.

12. Violation of published University regulations including but not limited to those regarding motor vehicles, residence halls, and the McGinley Center.

For more information
Visit the University Code of Conduct page.

Withdrawal from the University and Leaves of Absence

Full-time day students who find it necessary to withdraw from the University should promptly file the required forms in the office of the dean of their college. Students may not withdraw from the University after the deadline for withdrawal from courses without incurring failures in the courses for which they are enrolled at the time.

Withdrawal procedures should not be started without prior consultation with the assistant dean. Refunds for withdrawals will be calculated on the basis of the date when the required written approval for withdrawals is received in the Office of Academic Records. (See Refund Policies and Procedures.) Once withdrawn, a student must apply for readmission through their College Dean’s Office.

Leave of Absence

Full-time day students in good standing may request a one-semester leave of absence (renewable on written request, and at the dean’s discretion, for one additional semester). To request a leave of absence, a student must write a letter in a timely manner, preferably at least two weeks before the semester begins, to the appropriate assistant dean, discussing the reason (e.g., illness, family crisis) for the request. The dean of the student’s college, acting on a case-by-case basis, will have sole authority to grant leave requests. During a leave of absence and at least one month prior to the subsequent semester, the student must inform the assistant dean in writing of an intention to return. The assistant dean of the student’s college, upon approval by the dean of the college, will inform the Office of Academic Records each time a leave is granted and also on receipt of written notice of intention to return.

Readmission

Students seeking readmission to Fordham University after a withdrawal or leave of absence should contact their College Dean regarding the reapplication or re-entry process

Accounting and Taxation

Accounting is the language of business. All Gabelli School students need to understand the basics of accounting, both for their courses at Fordham and for their business careers. Students receive rigorous exposure to financial accounting in the integrated business core, and those who choose can continue with a program of study that prepares them to succeed on the CPA exam and obtain other highly regarded certifications.

The study of accounting does not end in the classroom. Fordham fields teams regularly for regional and national competitions in accounting and taxation. These competitions are run by major accounting firms, such as Deloitte, KPMG, PwC, and EY. Guest speakers from accounting firms, Fortune 500 corporations, and regulatory and standard-setting agencies, such as the Financial Accounting Standards Board and the Public Company Accounting Oversight Board, frequently appear on campus and provide networking opportunities for students.

Accounting students may join the on-campus student chapters of several prominent professional and academic groups. Active involvement in these groups often paves the way for internships and subsequent job offers. These organizations include:

- ALPFA, the Association of Latino Professionals in Finance and Accounting
- Ascend, the premier nonprofit professional association for Pan-Asians
- Beta Alpha Psi, the honor society for finance and accounting students and professionals

Program Requirements

Gabelli School students may integrate accounting into their academic program in several ways: As a major (through one of four options), as a minor, or as a concentration within the Business Administration major.

One of the four majors is the Public Accountancy program, which is a five-year program that leads students to complete the 150 credits that New
York State requires for individuals who want to take the Certified Public Accountant (CPA) exam and earn licensure. With the other three majors, students may elect to pursue licensure, or not.

The Road To Licensure: Various Paths

By the time a student sits for the CPA exam, if licensure is his or her goal, he or she must have logged the 150 course hours mandated by New York State. Fordham has developed a variety of paths that students can pursue to reach that total.

As noted above, the five-year undergraduate Public Accountancy major is one of them. But there are other paths, too. Dual-degree programs merge a bachelor’s with a master’s degree at the Gabelli School. By the time a student completes both his or her undergraduate and graduate degree in five years, he or she will have reached the 150-hour level and be qualified to sit for the CPA exam.

The table below offers an overview of how the various licensure paths are structured. Students who wish to pursue one of these paths should apply during their senior year; please review the Dual-Degree Programs (p. 1209) information on the Gabelli School website and contact the dual-degree programs advisor for more information.

For further information, please refer to the respective pages for each program. Students are encouraged to meet with their class dean and/or the accounting advisor for additional information regarding the programs.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

Visit the Accounting Area web page.

One upper-level accounting course

One upper-level finance course

Select one of the following options:

- Seven upper-level business electives
- Sustainability Reporting concentration and five upper-level business electives

1. Any course from the subject code ACBU (p. 27) numbered 3000 or higher may fulfill this requirement.
2. Any course from the subject code FNB (p. 256) numbered 3440 or higher may fulfill this requirement.

Updated: 07-27-2020
Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

Concentrations
Concentration in Sustainable Reporting

A new, standardized language is needed to articulate material non-financial risks as well as opportunities facing companies today. Both financial and non-financial risks affect a corporation's ability to create long-term value. Thus, reporting should include the way companies compete, use resources, and impact society.

The concentration in sustainable reporting enables students to further develop analytic tools and effective communication capabilities pertaining to this expanding field of study. Earning this unique concentration can better position you for careers not only in accounting but also in financial service-related fields that focus on non-financial considerations.

This concentration is only available to Gabelli School of Business students at Rose Hill pursuing a major in public accounting (p. 1066) or public accountancy (p. 1065).

Students can complete this concentration as part of their major in public accounting (p. 1066) or public accountancy (p. 1065) without any additional courses.

Electives

Select four electives as outlined below, or complete the Sustainability Reporting concentration: ¹

Two upper-level accounting electives ²

Two upper-level business electives ³

1. See the Concentrations tab (p. 1066) for details.

2. Any two courses from subject code ACBU (p. 27) numbered 3000 or higher may fulfill this requirement.

3. Upper level business electives are any 3000-4999 numbered courses within a Gabelli School area.

In addition to the sustainability reporting track requirements listed above, students must also complete a sustainability reporting section of CBBU 1004 ST: Analytics IP, designated by the section attribute SRIP.

Concentrations
Concentration in Sustainable Reporting

A new, standardized language is needed to articulate material non-financial risks as well as opportunities facing companies today. Both financial and non-financial risks affect a corporation’s ability to create long-term value. Thus, reporting should include the way companies compete, use resources, and impact society.

The concentration in sustainable reporting enables students to further develop analytic tools and effective communication capabilities pertaining to this expanding field of study. Earning this unique concentration can better position you for careers not only in accounting but also in financial service-related fields that focus on non-financial considerations.

This concentration is only available to Gabelli School of Business students at Rose Hill pursuing a major in public accounting (p. 1066) or public accountancy (p. 1065).
Students can complete this concentration as part of their major in public accounting (p. 1066) or public accountancy (p. 1065) without any additional courses.

</tbody>
</table>

1 Any course with the ACBU subject code (p. 27) numbered 3000 or higher may fulfill this requirement.

Fordham College at Rose Hill students may use Basic Microeconomics to satisfy one of their core social science requirements. It is advisable that students interested in pursuing the accounting minor take ECON 1200 Basic Microeconomics as early as possible, as it is a prerequisite for the accounting classes. In addition, as many of the accounting classes are sequential, it is recommended that students begin this minor no later than the fall of sophomore year.

**Availability**

The minor in accounting is available for Fordham College at Rose Hill students.

### Accounting/Information Systems Major

**Requirements**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACBU 3434</td>
<td>Intermediate Financial Accounting I</td>
<td>3</td>

<td>3</td>
</tr>
</tbody>
</table>

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

Concentration in Accounting Requirements

The Accounting concentration is available to Gabelli students at Rose Hill.

Primary concentration

To complete a primary concentration in accounting, students must take the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACBU 3434</td>
<td>Intermediate Financial Accounting I</td>
<td>3</td>
</tr>
<tr>
<td>ACBU 3435</td>
<td>Intermediate Financial Accounting II</td>
<td>3</td>
</tr>
</tbody>
</table>

Two upper-level accounting courses ³

Secondary concentration

Students who want to pursue accounting as a secondary concentration are required to complete three upper-level accounting courses ³.

African and African American Studies

The Department of African and African American Studies is both an academic unit and a community comprised of students and faculty interested in the interdisciplinary study of Africa and its diaspora. Our work is grounded in the cultural and historical experiences of people of African descent. This focus on experience informs our interpretations of the African Diasporic past and present and propels our directives for the future. The department sponsors a wide range of cultural programs, lectures, and community events. Strong emphasis is placed on preparing students for graduate and professional study and careers in public or community work.

Program Activities

In order to develop student research and writing skills and to promote scholarship at the undergraduate level, the department sponsors an annual student-led symposium based on course-related research. Involvement with faculty research projects is available and highly encouraged.

The Bronx African American History Project (BAAHP) is a major research initiative sponsored by the department in cooperation with the Bronx County Historical Society. The BAAHP is dedicated to uncovering the cultural, political, economic, and religious histories of more than 500,000 people of African descent in the Bronx. The BAAHP hires student researchers and transcribers and has presented its research in public schools, academic conferences, and libraries throughout the city.

For more information

Visit the African and African American Studies department web page.

Contribution to the Core

African and African American studies offers AFAM 1600 Understanding Historical Change: Africa, which fulfills the Understanding Historical Change core requirement. The department also offers a wide variety of Eloquentia Perfecta (EP1, EP3), American Pluralism, and Global
Studies courses each year. In addition, a Values Seminar/EP4 and an Interdisciplinary Capstone Course are offered annually.

**Programs**
- African and African American Studies Major (p. 1069)
- African and African American Studies Minor (p. 1069)

## African and African American Studies Major

### Requirements

Students who major in African and African American studies must complete a minimum of nine one-semester courses offered by the department at the Rose Hill and Lincoln Center campuses.

1. Any course with the AFAM subject code or the AFAM attribute code may fulfill this requirement.

**Updated: 07-27-2020**
Availability
The minor in African and African American studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

African Studies
The purpose of this interdisciplinary minor is to provide unique opportunities for Fordham students to develop a level of expertise in African political and social history, literature, sociology, economics, among others; learn African languages; meet with Africa permanent representatives at the U.N.; and interact with and network among the diverse African population present in the city.

This interdisciplinary minor provides a background for careers in government, business, law, foreign service, academia, and other areas. The minor also complements majors in many departments and professional schools throughout the university, such as Economics, Political Science, International Humanitarian Affairs, and Business. It is recommended to students wishing to gain an international perspective before entering the global marketplace.

For more information
Visit the African studies program page.

Availability
The minor in African studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

American Catholic Studies
The Francis and Ann Curran Center for American Catholic Studies (CACS) offers an honors undergraduate certificate program in American Catholic studies. The six-course certificate offers an interdisciplinary approach to the study of American Catholic culture, history, and theology. This interdisciplinary study is achieved through a sequence of required and elective courses offered in the art history, English, history, Latin American and Latino studies, music, philosophy, political science, sociology and anthropology, and theology departments of the Faculty of Arts and Sciences and the Gabelli School of Business.

The CACS certificate program offers undergraduates an opportunity to study the complex reality of American Catholic culture from a rigorously interdisciplinary standpoint, in the process helping students to hone their critical and analytical skills in analyzing often diverse ideological, racial...
and ethnic, socioeconomic, and geographical loyalties all claiming to be genuinely “American” and “Catholic.”

Program Activities
The Discernment Seminar
All concentrators are required to participate in the Discernment Seminar. These monthly seminars, inspired in structure by the Spiritual Exercises of St. Ignatius of Loyola, have two aims: to encourage students to reflect deeply and critically on the challenges that confront the contemporary world and to ask them to consider how they might deploy their intellectual abilities and other talents in the service of a more just and humane society. In this process, students learn how to communicate effectively, efficiently, and memorably their views on the multifaceted global issues of our time. The goal is that concentrators will emerge from these seminars not only more aware of the needs of the world but also more capable of contributing to their resolution. Recent topics have included the shortage and unequal distribution of economic resources, public apathy in an age of renewed nuclear proliferation, and strategies for communicating clearly about highly complex topics. In the second semester of their junior year, concentrators will have the opportunity to begin to prepare applications for such nationally and internationally prestigious fellowships as the Rhodes, Marshall, Gates, and Jack Kent Cooke scholarships. Those concentrators who elect to do so will work closely with the Curran Center’s associate director of Prestigious Fellowships and Fordham’s St. Edmund Campion Institute as they proceed through the application process.

Lectures and Symposia
The center hosts lectures, symposia, and readings each semester. These often feature speakers, scholars, and artists of national and international reputation.

Communitas Discussion Dinners
Three times each semester, the Curran Center convenes a discussion dinner hosted by an invited speaker who brings to the table expertise in a topic of interest to CACS students and faculty.

Receptions, Networking, and Conviviality
To aid its students in their educational and career goals, the center offers receptions to bring students into contact with scholarship donors as well as alumni currently working in the academic, legal, business, and not-for-profit fields.

For more information
Visit the American Catholic Studies Center web page.

Programs

• American Catholic Studies Certificate (p. 1071)

American Catholic Studies Certificate
The certificate in American Catholic studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and the Gabelli School of Business.

Services and Community
Students participate in a program of community service and attend various communal and academic events designed to foster a community of scholars who seek to combine cultivation of their academic talents with a life of thoughtful and creative engagement within the University community and in broader church and civic arenas.

Admissions
Admission to the CACS program is selective, a 3.5 cumulative grade point average on a 4.0 scale and an interview with one of the program directors being required for admission. All students are designated as Scholars in Catholic Studies: An Honors Certificate at Fordham on their official transcripts.

Requirements
The concentration begins with a one-credit seminar for new concentrators in the spring of the sophomore year. An intensive two-semester American Catholic Studies seminar in the junior year follows. Each student crafts an individualized course of study comprising four additional courses in consultation with the directors of the undergraduate program. These courses are selected from offerings in a range of disciplines, including history, theology, philosophy, social science, art, and literature.

Courses below have the AMCS attribute.

American Studies Major Requirements

The benefits of the American Studies major include: 1) the sharp focus brought by the American Studies sequence (AMST 2000, AMST 4010, and AMST 4500), at the end of which the student completes a Senior Thesis and 2) the flexibility offered by our faculty in several different disciplines. The courses listed for the multidisciplinary requirement below are representative of the potential of the major, and change each semester.

Accepted students are expected to successfully complete 10 courses in a well-integrated program to be worked out individually in consultation with the program director.

1 These courses are not additional requirements above the courses described above; rather, they govern the distribution of courses taken to complete concentration and open elective requirements.

2 Any course with the AMST subject code (p. 42) or the AMST attribute code may fulfill this requirement.

Multidisciplinary Diversity

Students will also be required to demonstrate multidisciplinary diversity. Courses taken to fulfill concentration and open elective requirements must include one course in each of the following four areas:

- These are not additional requirements above the 10 described above; they are rules governing the distribution of courses taken to complete concentration and open elective requirements. These courses include the following:

American Literature courses

Courses in this group have the ASLT attribute.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Concentrations

American studies majors can tailor their coursework to their interests by selecting from a wide range of courses that fall into three areas of concentration.

The three possible areas of concentration are:

1. **Cultural Products**: the arts, literature, thought and media. This concentration focuses on American literature, arts, media, and thought, examining their history and place in American culture and society. Students take courses in literature, film, media, music, the visual arts, the performing arts, popular culture, philosophy, and intellectual history.

2. **Diversity and Difference**: This concentration takes up the problem of American social and cultural pluralism. Students will consider the place of categories such as race, ethnicity, class, gender, and religion in American history. Students will most likely take courses in literature, philosophy, African American studies, Latino studies, history, political science, urban studies, women's studies, religion, American Catholic studies, and sociology.

3. **Power, Politics, and Institutions**: This concentration focuses on American society and institutions, such as politics and religion. Students will primarily take courses in political science, history, sociology, Latino studies, American Catholic studies, African American studies, and urban studies.

Four courses are required in a concentration.

Courses for the Cultural Products concentration

Courses in this group have the ACUP attribute.

Availability

The major in American studies is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center. Students in Fordham’s School of Professional and Continuing Studies may major in American studies if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

**Fordham College at Rose Hill students**: The requirements above are in addition to those of the Core Curriculum.

**Fordham College at Lincoln Center students**: The requirements above are in addition to those of the Core Curriculum.

### American Studies Minor

**Requirements**

A minor in American studies consists of six courses.
Updated: 07-27-2020

The department also sponsors a Sociology Club, a Criminology Club, and an Anthropology Club at Rose Hill, and a Society for Sociology and Anthropology at Lincoln Center, all organized and governed by students.

Internships
Both sociology and anthropology majors and nonmajors are encouraged to take advantage of the Internship Seminar offered by the department. This course is designed to provide students with the opportunity to develop skills in social analysis, policy development, program evaluation, and interpersonal relations while being of service to others in a real-life setting outside the classroom. Employment opportunities include agencies and corporations in the New York metropolitan area, ranging from organizations in the public sector, including the New York State Department of Corrections, the Legal Aid Society, and the Puerto Rican Family Institute—to organizations in the private sector—including CBS, Merrill Lynch, and IBM. Each student is required to spend a minimum of eight to ten hours per week in an agency (public or private) or organization chosen to fit the individual student’s interests and expertise. All students who enroll in the program are required to do both the internship placement and to take SOCI 4900 Internship Seminar. Field placements must be obtained through the internship program coordinator located in the Office of Career Planning and Placement.

Anthropology Resources
Departmental resources include Stone Age implements; ethnographic art and artifacts from Southeast Asia, the South Pacific, and Africa; a teaching collection of human skeletal material, an archive and database of colonial and early American bricks from New York City and a large collection of colonial and early American artifacts. In cooperation with the history department, the anthropology program at Rose Hill conducted the longest running archaeological excavation in New York City at the Rose Hill manor from 1985 to 2002, located on the Rose Hill campus. Artifacts from this campaign are undergoing laboratory analysis, for information about sociology programs is listed on the Fordham College at Rose Hill page for the American Studies major (p. 1072).

Availability
The minor in American Studies is available at Fordham College at Rose Hill and at Fordham College at Lincoln Center.

Anthropology

Note: ‘Sociology and Anthropology’ is a single academic department at Fordham, but the academic information for each subject is listed on a separate web page. Information about sociology programs is listed under sociology (p. 1308).

The aim of anthropology is the comprehensive study of the human condition, the origins of our species in evolutionary biology, and the development of culture and society in its many variations among ancient and contemporary peoples. Its subject matter encompasses an immense time depth and a vast spatial range, including the simplest human societies and the most complex civilizations, including modern industrial nations. Anthropology brings together many areas of scientific and humanistic inquiry, unifying and integrating knowledge about people and their perceptions of the world, and it offers a balanced perspective on the momentous cultural changes wrought by globalization that are ongoing today.

A major in anthropology is important for those who seek to understand our multiethnic society and the varieties of culture on our planet. It is a valuable asset for any work entailing contact with the public and especially for careers involving international affairs or travel. The experience with cultural diversity that anthropology provides is excellent preparation for law, business, and other graduate studies, and its biological component makes it attractive to admissions officers of medical schools. The synthesizing nature of anthropology also makes it suitable for students pursuing a double major in which anthropology is combined with other areas of the humanities and the natural and social sciences.

Program Activities

Honors and Awards
The department offers the opportunity for students to become members of Alpha Kappa Delta, the international honor society for sociology students. Each spring, students are inducted into Fordham’s Chapter Iota. At Rose Hill, the department honors its seniors at the end of year awards ceremony, Encaenia, by bestowing the Rev. Joseph P. Fitzpatrick, S.J. Memorial Award and the Rev. J. Franklin Ewing, S.J. Memorial Award for the best submitted essay by a graduating sociology and anthropology major, respectively. At Lincoln Center, the department also recognizes excellence in its graduating seniors with departmental honors in sociology and anthropology at its own diploma ceremony.

Programs

• Anthropology Major (p. 1089)
• Anthropology Minor (p. 1089)
Anthropology Major

Requirements

Students majoring in anthropology at FCRH and FCLC are required to complete nine courses.

<table>

</tr>
</thead>
<tbody>
<tr>
<td>ANTH 3725</td>
<td>Culture and Culture Change</td>
<td></td>
</tr>
</tbody>
</table>

Electives

Select any additional elective courses. ¹

A total of nine courses with the ANTH subject code are required for the major.

Up to two courses in sociology may be used to satisfy electives and, with prior approval, one or two courses in other departments, or special tutorials taken with anthropology faculty, may be credited toward the major as electives if such courses complement departmental offerings and lie within a student's specific area of anthropological interest. Majors are strongly encouraged to enroll in anthropology courses taught by faculty on both campuses, since the disciplinary specializations and course offerings differ at Rose Hill and Lincoln Center.

Availability

The major in anthropology is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in anthropology if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Anthropology Minor

Requirements

Students wishing to minor in anthropology must complete six courses.

Electives

Select any additional elective courses in ANTH. A total of six ANTH courses are required for the minor.

Art History

Note: ‘Art History and Music’ is a single academic department at Fordham, but the academic information for each subject is listed on a separate web page. Information about Music programs is listed under Music (p. 1264).

The art history major offers students the opportunity to study the great cultural accomplishments of human civilization within a broad historical context. Art history intersects with many different fields, including history, literature, philosophy, and theology. It is integral to a strong liberal arts curriculum that is at the heart of the Fordham education. The art history major focuses on the history of European, American, and Global art. Students are prepared for graduate school and for employment in galleries, auction houses, art publishing, and nonprofessional positions in museums. Many students pursue careers in other fields, including law and education.

No course in which the student earns a grade of D or F may be used toward a departmental major or minor.

Program Activities

Internships

We encourage students to take advantage of the many internship opportunities in New York City. Art history majors have held internships at the Metropolitan Museum of Art, the Museum of Modern Art, the Guggenheim Museum, the Neue Gallery, the Studio Museum of Harlem, the New Museum of Contemporary Art, the International Center of Photography, El Museo del Barrio, the Drawing Center, the New York Historical Society, Christie's and Sotheby's, art magazines, art appraisers and many private galleries. With the approval and supervision of the department, majors may receive elective credit for one internship, graded on a pass/fail basis. Internships offer valuable experience and can lead to after-graduation employment but do not count toward requirements for the major or minor.

Awards

The department supplements its academic programs with several prizes to honor art history majors. The Stark Prize is money awarded to a junior art history major toward travel in Europe over the spring or summer break; the Marion Scholarship is awarded to a senior on the basis of documented need and academic record; the Art History prize is awarded to one senior at Rose Hill and one senior at Lincoln Center on the basis of an exceptional academic record. The department also sponsors the Vasari Symposium each spring for which one or more graduating seniors are invited to give a public lecture on the topic of their senior seminar research papers.
For more information
Visit the Art History department web page.

Contribution to the Core
The Art History program offers ARHI 1101 Introduction to Art History: Europe, ARHI 1102 Introduction to Art History: Asia, and ARHI 1103 Introduction to Art History: Americas, all of which fulfill the Core Fine Arts requirement, the final two of which (ARHI 1102 Introduction to Art History: Asia, ARHI 1103 Introduction to Art History: Americas) fulfill the Core Global Studies requirement.

Programs
• Art History and Visual Arts Double Major (p. 1090)
• Art History Major (p. 1090)
• Art History Minor (p. 1091)

Art History and Visual Arts Double Major

Overview
A double major in Art History and Visual Arts is a desirable choice for students who want the solid background in the humanities that art history offers in tandem with a broad foundation in the visual arts. Students should be aware that some of the courses necessary for completing the double major may be offered only on the Lincoln Center or the Rose Hill campus.

Requirements
For the double major, a total of 15 courses is necessary.

</tbody>
</table>

1 Any course with the VART subject code (p. 601) may fulfill this requirement. It is assumed that the student will choose courses in more than one visual arts area of study and will pursue advanced courses in at least one of the areas of study.

2 See the Art History major (p. 1090) for courses fulfilling each requirement.

It is suggested that ARHI 1101 Introduction to Art History: Europe, VART 1135 Visual Thinking, and VART 1150 Drawing I be completed by the end of sophomore year.

Availability
The double major in art history and visual arts is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Art History Major
Requirements
Majors in art history must complete a minimum of nine one-semester courses.

<table>

</tbody>
</table>

Art history majors and minors are also encouraged to take CHEM 1104 The Chemistry of Art, which satisfies the physical science requirement of the Core Curriculum.

Students who have taken the Art History AP exam and have scored 4 or 5 can count this AP credit toward their Fine Arts Core requirement.

Art History Majors who have taken the Art History AP and have scored 4 or 5 must still take nine art history courses to complete the major.

Concentration courses are listed in the Concentrations section (p. 1091).

Availability
The major in art history is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Updated: 07-27-2020
Concentrations
The major requires students to take one course from each of the groups below, plus two additional courses from a single group as a concentration.

Renaissance/Baroque concentration courses
Courses in this group have the AHRB attribute.

Biochemistry

Overview

Modern scientific research in Biology and Chemistry is increasingly interdisciplinary, and undergraduate training in the sciences at Fordham therefore must respond to remain relevant. The Department of Chemistry (FCRH) and the Department of Biological Sciences (FCRH) therefore have created an interdisciplinary minor in Biochemistry with a curriculum that overlaps the topical coverage of modern Biological Sciences and Chemistry.

The requirements for the minor are founded upon a two-semester course in modern biochemistry (Chemistry Department), plus two one-semester courses, namely, genetics and molecular biology (Biological Sciences Department or, alternatively, Natural Sciences). Two additional advanced electives outside of a student’s major program round out the course requirements.

The Biochemistry minor additionally provides students with the opportunity to participate in research activities with faculty across the biology-chemistry disciplines.

Programs

• Biochemistry Minor (p. 1095)

Biochemistry Minor Overview

The biochemistry minor has four required courses taken from biological sciences and chemistry. These are: Genetics (BISC 2539 and BISC 2549) and Molecular Biology (BISC 3752 or NSCI 4176 and NSCI 4876) and Biochemistry I and II (CHEM 4221, CHEM 4231, and CHEM 4222). Two elective courses outside of a student’s major complete the six course total that corresponds to a minor. (Note that the required laboratory co-requisites are not counted).

Research opportunities are subject to respective departmental policies. Interested students should contact faculty members or the program director.

Requirements

The Biochemistry minor requires six (6) courses:

Updated: 07-27-2020
### Bioethics

The interdisciplinary bioethics minor introduces students to critical moral questions and informed ethical decision-making on issues related to individual, public, and global health; professional healthcare decision-making; and health policy. Bioethics minors will gain an interdisciplinary perspective on these topics through required and elective courses, including: an introductory bioethics course, thematic courses in the humanities and sciences, a values course and a research ethics capstone course. The minor in bioethics is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and the School of Professional and Continuing Studies.

### Program Activities

#### Lectures and Symposia

Bioethics students have valuable opportunities to attend and participate in Center for Ethics Education-sponsored activities, including major symposia, lectures, and Ethics Colloquium Series events and conferences.

#### Ethics Competitions and Graduate Activities

The Center for Ethics Education also sponsors ethics competitions (such as the Chynn Undergraduate Prize in Ethics and Morality) Chynn Undergraduate Prize in Ethics and also will have opportunities to interact with students enrolled in the M.A. Ethics and Society program through lectures, presentations, and career development events.

#### Professional Development and Career Advising

Bioethics students have an opportunity to make a professional presentation on a bioethics topic of interest at the Fordham Undergraduate Research Symposium (through the required course PSYC 4245/ SOCI 4245 Ethics in Research). The minor also provides valuable career and graduate school resources and panels on careers in ethics and advising by program directors and affiliated faculty.

For more information

Visit the Bioethics program web page.

### Bioethics Minor

#### Requirements

The minor consists of six courses.

**Course** | **Title** | **Credits**
--- | --- | ---
THEO/CEED 3856 | Introduction to Bioethics | 4
CEED/SOCI/PSYC Ethics in Research 4245 | Philosophy and Economics of Law | 4
or PHIL 4304 | | 3 to 4
One course in Humanities | | 3 to 4
One course in Social and Natural Science | | 3 to 4
One course in Values | | 4
One additional course in Humanities or Social and Natural Science | | 3 to 4

Students who have not completed a Biological Sciences (BISC) or biologically based Life Science (LSCI) course as part of the core curriculum or otherwise will be required to take one of the following natural science or biological science course offerings to fulfill the Bioethics Natural Science requirement:

- NSCI 1030 Human Function and Dysfunction
- BISC 1000 Life on the Planet Earth
- BISC 1001 Human Biology
- BISC 1002 Ecology: A Human Approach
- BISC 1010 Foundations of Biology

#### Humanities courses

Courses in this group have the BEHR attribute.

**Course** | **Title** | **Credits**
--- | --- | ---
COLI 4570 | Films of Moral Struggle | 4
COMC 3370 | Ethical Issues in Media | 4
ECON 4870 | Economic Foundations of Catholic Social Teaching | 4
ENGL 4137 | Hysteria, Sexuality, and the Unconscious | 4
ENGL 4172 | Diverse Biologies/Shared Humanity | 4
FITV 4570 | Films of Moral Struggle | 4
HIST 4137 | Hysteria, Sexuality, and the Unconscious | 4
HIST 4705 | Seminar: Disease in the Middle Ages | 4
HIST 4913 | Social Darwinism: Theme and Variations in Global Context | 4
MLAL 3000 | Gender and Sexuality Studies | 4
NSCI 4172 | Diverse Biologies/Shared Humanity | 4
PHIL 3266 | Philosophy of Science | 4
PHIL 3712 | Global Environment and Justice | 4

---

Updated: 07-27-2020
PHIL 3713 Human Rights and Global Justice 4
PHIL 3715 Kant on Morality and Religion 4
PHIL 3980 Contemporary Issues in Metaethics 4
PHIL 4001 Politics and Biopower 4
PHIL 4044 Modern Ethical Theories 4
PHIL 4310 Human Rights in Context 4
PHIL 4484 Freedom and Responsibility 4
THEO 3827 Bible and Human Sexuality 4
THEO 4010 Death and Dying 4
THEO 4027 The Ethics of Life 4
THEO 4035 Professional Responsibilities and Organizational Ethics 4
THEO 4036 Human Nature After Darwin 4
THEO 4520 Animals, Angels, and Aliens: Beyond the Human in Christian Thought 3
THEO 4870 Economic Foundations of Catholic Social Teaching 4
THEO 4950 Christianity and Gender/Sexual Diversity: Interdisciplinary Perspectives 4
WGSS 3000 Gender and Sexuality Studies 4

Social and Natural Science courses

Courses in this group have the BESN attribute.

Course |
--- |
ANTH 2619 Magic, Science, and Religion |
ANTH 3260 Politics of Reproduction |
ANTH 3570 Applied Human Rights |
ANTH 4114 Anthropology of Health Healing and Social Justice |
ANTH 4344 Reproductive Technologies: Global Perspective |
BISC 1000 Life on the Planet Earth |
BISC 1001 Human Biology |
BISC 1002 Ecology: A Human Approach |
BISC 1010 Foundations of Biology |
BISC 1403 Introductory Biology I |

PSYC 3600 Multicultural Psychology |
PSYC 3610 Global Health and Psychology |
PSYC 4310 Aging and Society |
SOCI 3021 Sociology of Medicine |
SOCI 3114 Sociology of Health and Illness |
SOCI 3120 Controversies in Religion and International Relations |
SOCI 3249 For the Death of Me! Socio-Cultural Perspectives on Death and Dying |
SOCI 3260 Politics of Reproduction |
SOCI 4105 Religion, Gender, and Sexuality |

Values courses

Courses in this group have the BEVL attribute.

Course |
--- |
COLI 4570 Films of Moral Struggle |
FITV 4570 Films of Moral Struggle |
PHIL 3970 Humanity’s Value |
PHIL 4418 Issues of Life and Death |
PHIL 4473 War and Peace: Just War Theory |
PSYC 4900 Psychology and Human Values |
PSYC 4920 Youth, Values, and Society |
PSYC 4930 Codes for Mental Health Services |
THEO 4027 The Ethics of Life |
THEO 4030 Moral Aspects of Medicine |
THEO 4847 Theologies of Liberation |

It is presumed that bioethics minor students will have completed the core course Philosophical Ethics (PHIL 3000) by the end of their junior year.

Should faculty sabbaticals or other developments create a situation that limits the availability of courses, the directors of the program would have the authority to amend the guidelines regarding the distribution of electives.

Biological Sciences

The curriculum in the biological sciences provides a comprehensive understanding of the principles underlying life’s processes, from the molecular level through the biosphere. Many of the courses offered have lecture and laboratory components. This ensures that students become scientists capable of making significant contributions to the field. Majors have the opportunity to participate in cutting-edge research under the mentorship of a faculty member in the department. This affords students the opportunity to develop their organizational, technical, and analytical skills while using the most up-to-date techniques and instrumentation. Students conducting original research are expected to communicate their findings to the scientific community through, for example, their participation in Fordham College’s annual Undergraduate Research Symposium. Students doing menitorious research are guided to publish their work in nationally recognized science journals.

The department offers two undergraduate degrees: the bachelor of science (B.S.) and the bachelor of arts (B.A.) in the biological sciences. Both degree tracks ensure the major’s exposure to the broad scope of the discipline while providing the flexibility to choose upper-level courses that focus on one or more of the sub disciplines in greater depth. The curriculum gives students a strong foundation from which they can pursue studies leading to a career in medicine, dentistry, veterinary medicine, research and development, education, industry, forensics, or laboratory analysis.

Accelerated Master’s Program

Please read the Graduate School of Arts and Sciences Accelerated Master’s Programs section for more information. Interested students must apply by the time they register for the fall semester of their senior year but are encouraged to apply earlier. Students opting for early admission to the M.S. program must consult with their adviser and the
Program Activities

Biology Colloquium

Students are encouraged to attend the weekly Biology Colloquium which features presentations of outstanding research by visiting scientists as well as by the department’s own faculty and graduate students.

Research Opportunities

There are many varied research opportunities available to biology majors. A student interested in a faculty member’s research should meet with that faculty member and discuss a program of independent laboratory or field research under that faculty member’s mentorship. The student may elect to register for two semesters of research (for four credits each semester), including writing and defending a thesis, during the senior year in lieu of two elective biology courses (see BISC 4792 Senior Thesis Research in the course listings). Another alternative is enrollment in a research tutorial for a maximum of four credits in lieu of one biology elective (see BISC 4999 Research Tutorial in the course listings). If neither of the above options is desirable, a student may volunteer on an extracurricular basis to participate in a faculty member’s research. Details may be obtained in the department office. Fordham University has formal affiliations with the New York Botanical Garden, the Wildlife Conservation Society (Bronx Zoo), Albert Einstein College of Medicine, and Montefiore Hospital.

For more information

Visit the Biology department web page.

Contribution to the Core

The Department of Biological Sciences offers courses numbered BISC 1000 Life on the Planet Earth-BISC 1010 Foundations of Biology, which satisfy the core life-science component of the natural science requirement in the Fordham College Core Curriculum. The two course sequence, BISC 1403 Introductory Biology I-BISC 1404 Introductory Biology II or BISC 1401 Introduction to Biology I-BISC 1402 Introduction to Biology II, when taken in sequence will fulfill both natural science requirements (physical science and life-science).

Programs

- Biological Sciences Major (p. 1098)
- Biological Sciences Minor (p. 1099)

Biological Sciences Major

Requirements

The Department of Biological Sciences offers two undergraduate degrees: the Bachelor of Science (B.S.) and the Bachelor of Arts (B.A.). Beyond the chemistry, physics, and math requirements, majors must complete a minimum of nine courses in biology for a B.S. degree and seven for a B.A. degree. Lecture and lab courses must be taken concurrently.

The program of biology courses is structured in the following way:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BISC 1401</td>
<td>Introduction to Biology I (Summer)</td>
<td>5</td>
</tr>
<tr>
<td>BISC 1402</td>
<td>Introduction to Biology II (Summer)</td>
<td>5</td>
</tr>
<tr>
<td>BISC 2539</td>
<td>General Genetics</td>
<td>5</td>
</tr>
<tr>
<td>&amp; BISC 2549</td>
<td>and General Genetics Lab</td>
<td></td>
</tr>
<tr>
<td>BISC 2561</td>
<td>Ecology</td>
<td>5</td>
</tr>
<tr>
<td>&amp; BISC 2571</td>
<td>and Ecology Lab</td>
<td></td>
</tr>
</tbody>
</table>

Distribution Courses

Select a minimum of two of the following:

| BISC 3221 | Human Anatomy | |
| & BISC 3231 | and Human Anatomy Lab | |
| BISC 3132 | Human Physiology | |
| & BISC 3142 | and Human Physiology Lab | |
| BISC 3405 | Plant Biology | |
| & BISC 3415 | and Plant Biology Lab | |
| BISC 3521 | Biochemistry | |
| BISC 3643 | Microbiology | |
| & BISC 3653 | and Microbiology Lab | |
| BISC 3752 | Molecular Biology | |
| BISC 3754 | Cell Biology | |

Chemistry Courses

Select one of the following sequences:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 1321</td>
<td>General Chemistry I</td>
<td>6</td>
</tr>
<tr>
<td>&amp; CHEM 1331</td>
<td>and General Chemistry Lab I</td>
<td></td>
</tr>
<tr>
<td>CHEM 1322</td>
<td>General Chemistry II</td>
<td>6</td>
</tr>
<tr>
<td>&amp; CHEM 1332</td>
<td>and General Chemistry Lab II</td>
<td></td>
</tr>
<tr>
<td>CHEM 2521</td>
<td>Organic Chemistry I</td>
<td>6</td>
</tr>
<tr>
<td>&amp; CHEM 2541</td>
<td>and Organic Chemistry Lab I</td>
<td></td>
</tr>
<tr>
<td>CHEM 2522</td>
<td>Organic Chemistry II</td>
<td>6</td>
</tr>
<tr>
<td>&amp; CHEM 2542</td>
<td>and Organic Chemistry Lab II</td>
<td></td>
</tr>
</tbody>
</table>

Physics Courses

Select one of the following sequences:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHYS 1701</td>
<td>Physics I</td>
<td></td>
</tr>
<tr>
<td>&amp; PHYS 1511</td>
<td>and Physics I Lab</td>
<td></td>
</tr>
</tbody>
</table>
PHYS 1702 & PHYS 1512

Sequence 2:
PHYS 1501 & PHYS 1511
PHYS 1502 & PHYS 1512

Calculus Course
Select one of the following:
MATH 1203 Applied Calculus I
MATH 1204 Applied Calculus II
MATH 1206 Calculus I
MATH 1207 Calculus II

Elective Courses
Select three elective BISC courses for the B.S. degree and one for the B.A. degree

1 Either sequence of introductory courses is a prerequisite for all other biology courses in the major.
2 A score of 4 or 5 in AP Calculus AB or BC will fulfill the Mathematics requirement.
3 Elective courses comprise all non-core courses offered (but include additional distribution courses beyond the two needed to meet Distribution Courses requirement above). Courses counted toward the Distribution Course requirement cannot be double-counted toward the Elective course requirement.

It is recommended that first year students take the following:

Course Title Credits

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1206</td>
<td>Calculus I</td>
<td></td>
</tr>
<tr>
<td>MATH 1207</td>
<td>Calculus II</td>
<td></td>
</tr>
<tr>
<td>MATH 1203</td>
<td>Applied Calculus I</td>
<td></td>
</tr>
<tr>
<td>MATH 1204</td>
<td>Applied Calculus II</td>
<td></td>
</tr>
<tr>
<td>BISC 1403</td>
<td>Introductory Biology I</td>
<td>5</td>
</tr>
<tr>
<td>BISC 1413</td>
<td>Introductory Biology Lab I</td>
<td></td>
</tr>
<tr>
<td>CHEM 1321</td>
<td>General Chemistry I</td>
<td>6</td>
</tr>
<tr>
<td>CHEM 1331</td>
<td>General Chemistry Lab I</td>
<td></td>
</tr>
<tr>
<td>BISC 1404</td>
<td>Introductory Biology II</td>
<td>5</td>
</tr>
<tr>
<td>BISC 1414</td>
<td>Introductory Biology Lab II</td>
<td></td>
</tr>
<tr>
<td>CHEM 1322</td>
<td>General Chemistry II</td>
<td>6</td>
</tr>
<tr>
<td>CHEM 1332</td>
<td>General Chemistry Lab II</td>
<td></td>
</tr>
</tbody>
</table>

Note that BISC 1403, BISC 1404, CHEM 1321, and CHEM 1322 (with their respective labs) are prerequisites for all advanced biology courses.

The following requirement is best fulfilled in sophomore year:

Course Title Credits

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 2521</td>
<td>Organic Chemistry I</td>
<td></td>
</tr>
<tr>
<td>CHEM 2541</td>
<td>Organic Chemistry Lab I</td>
<td></td>
</tr>
<tr>
<td>CHEM 2522</td>
<td>Organic Chemistry II</td>
<td></td>
</tr>
<tr>
<td>CHEM 2542</td>
<td>Organic Chemistry Lab II</td>
<td></td>
</tr>
</tbody>
</table>

The following requirement is best fulfilled in junior year:

Course Title Credits

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BISC 1000</td>
<td>Life on the Planet Earth</td>
<td></td>
</tr>
<tr>
<td>BISC 1001</td>
<td>Human Biology</td>
<td></td>
</tr>
<tr>
<td>BISC 1002</td>
<td>Ecology: A Human Approach</td>
<td></td>
</tr>
<tr>
<td>BISC 1005</td>
<td>Aids: A Conspiracy of Cells</td>
<td></td>
</tr>
<tr>
<td>BISC 1008</td>
<td>The Finch, the Seed, and the Storm: Adventures in Contemporary Evolution</td>
<td></td>
</tr>
<tr>
<td>BISC 1010</td>
<td>Foundations of Biology</td>
<td></td>
</tr>
</tbody>
</table>

Biology majors are expected to take all of their required major courses at Fordham. Exceptions may be made on a case-by-case basis for certain rare and compelling reasons. Under no circumstances can more than two external courses be transferred toward the major.

Availability
The major in biological sciences is available at Fordham College at Rose Hill. Students in Fordham College at Lincoln Center and Fordham’s School of Professional and Continuing Studies may major in biological sciences only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Biological Sciences Minor Requirements
The course requirements for the biological sciences minor depend on the student’s major:

• Chemistry majors must select six courses in biology (subject code BISC) (p. 61) at or above BISC 1400.

• Environmental science, general science, or integrative neuroscience majors must select eight courses in biology (subject code BISC) (p. 61) at or above BISC 1400.
• Psychology majors must select six courses in biology (subject code BISC) (p. 61) at or above BISC 1400 and two courses in chemistry (subject code CHEM) (p. 74) at or above CHEM 1300.

• All other majors must complete four courses in biology (subject code BISC) (p. 61) at or above BISC 1400 and two courses in chemistry (subject code CHEM) (p. 74) at or above CHEM 1300.

C is the minimum grade credited toward the minor. No more than two external classes can be transferred toward the minor.

Availability
The minor in biological sciences is available at Fordham College at Rose Hill. Students in Fordham College at Lincoln Center and Fordham School of Professional and Continuing Studies may minor in biological sciences only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Business Administration
Entrepreneurs pursue innovative ideas through unbridled commitment. Accountants keep businesses honest. Marketing executives craft campaigns that excite consumers. What do these disparate careers have in common? A rock-solid educational foundation: a degree in business administration.

Whether pursuing the major or a minor, studying business administration allows for a breadth of knowledge across multiple disciplines from finance and information systems to psychology and economics.

How courses are counted
Students must note the following policy for how courses are counted. A student may count a maximum of one course in fulfilling more than one purpose—that is, toward any combination of major, minor, or primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

Programs
• Business Administration Major (p. 1100)
• Business Administration Minor (p. 1100)

Business Administration Major
This major is only available to Gabelli School students on the Rose Hill campus.

The Business Administration major allows students to customize their business degrees by picking one primary concentration and combining that with other primary and secondary concentrations as well as business and/or liberal arts minors.

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

Requirements
Students pursuing a major in Business Administration must select one primary concentration and may also complete one or more secondary concentrations or minors. Minors can be from the Gabelli School (p. 1199), Fordham College at Lincoln Center (p. 1169), or Fordham College at Rose Hill (p. 1178).

Available primary concentrations include:
• Accounting (p. 1068)
• Business Economics (p. 1101)
• Consulting (p. 1322)
• Entrepreneurship
• Finance (p. 1166)
• Information Systems (p. 1223)
• Management
• Marketing (p. 1243)
• Social Innovation (p. 1293)

Available secondary concentrations include:
• Accounting (p. 1068)
• Alternative Investments (p. 1166)
• Business Economics (p. 1101)
• Business of Healthcare (p. 1321)
• Communications and Media Management (p. 1115)
• Consulting (p. 1322)
• Digital Media and Technology (p. 1148)
• Entrepreneurship
• Finance (p. 1166)
• Fintech (p. 1166)
• Information Systems (p. 1223)
• Global Business (p. 1212)
• Management
• Marketing (p. 1243)
• Marketing Analytics (p. 1243)
• Personal Development and Leadership (p. 1241)
• Process and Quality Analytics (p. 1271)
• Services Marketing (p. 1243)
• Social Innovation (p. 1293)
• Sports Business (p. 1321)
• Strategic Branding (p. 1243)
• Value Investing (p. 1167)

Business Administration Minor
In conjunction with the Gabelli School of Business, students in Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC) or Fordham School of Professional and Continuing Studies (PCS) may complete a minor in business administration. Students minoring in business administration as part of a Bachelor of Arts or Bachelor of Science degree must complete a minimum of 120 credits to earn their degrees (compared to 124 credits), since many courses for the minor bear three credits.

The business administration minor complements the liberal arts core by providing a clear, concise way of analyzing issues in economics and
Business. It can be helpful to students who plan to look for a job after graduation or to pursue the study of law or business.

The required business courses for the minor are offered regularly on both the Rose Hill and Lincoln Center campuses. Students who plan to minor in business administration may take Basic Macroeconomics and Basic Microeconomics to fulfill both the social science requirement and the business minor. With the permission of the adviser to the business minor, students who complete a course equivalent to ECON 2140 Statistics I in their major may substitute it for the statistics requirement. Economics majors may count Basic Macroeconomics, Basic Microeconomics, and Statistics I toward their major and the business minor.

Requirements

The business administration minor consists of eight courses.

<table>
<thead>
<tr>
<th>Course</th>

</tbody>
</table>

One upper level business elective 2

1 Students may also take any of the following courses to fulfill this requirement:
   - MATH 3007 Statistics
   - PSYC 2000 Statistics
   - SOCI 2606 Social Science Statistics
   - SOCI 2607 Social Science Research and Statistics

2 Upper level business electives are any 3000-4999 numbered courses within a Gabelli School area. The upper level business elective should be a continuation of study within an area already examined through a core course for the minor. Students may elect to take ACBU 2223 Principles of Managerial Accounting as their one upper level business elective.

Business Economics

Understanding economics is essential for everyone in business. Whether your career is in finance, accounting, marketing, information technology, or another discipline, a comprehension of how the world economy works is key. The Gabelli School’s business economics program ensures that every student has a strong handle on the forces that push, pull, and shape the economies of the United States and other nations.

Business economics differs from standard economics in that it emphasizes practical applications in the world of commerce, but the courses are still drawn from Fordham’s economics department. Gabelli School students who want to focus on business economics can choose a primary concentration, a secondary concentration, or a minor.

These concentrations and minor might be especially attractive to students who envision themselves attending graduate school in business, because microeconomic theory (or managerial economics) and macroeconomic analysis are required courses in many graduate programs. Business economics coursework also is valued by potential employers, for students choosing work rather than further study after graduation.

For course descriptions, please refer to the economics department listings in the Fordham College at Rose Hill section of this bulletin.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

Visit the Finance and Business Economics area web page.

Programs

- Concentration in Business Economics (p. 1101)
- Minor in Economics (Economics Department) (p. 1151)

Concentration in Business Economics

Requirements

The concentration in Business Economics is available to Gabelli students at Rose Hill.

Primary concentration

<table>
<thead>
<tr>

<td>Microeconomic Theory</td>
<td>4</td>
</tr>
</tbody>
</table>

Two 3000-level or higher economics courses

For the latter two courses, the economics department offers a wide array of courses in monetary and financial economics, international economics and development, economics of law, industrial economics, and public sector economics.

Secondary concentration

Students who want to pursue business economics as a secondary concentration are required to complete three 3000-level or higher economics courses.
A student electing to pursue one of these routes should consult with his or her class dean and/or the associate chair of the economics department.

**Available courses**

Any course with the subject code ECON (p. 188) numbered 3000 or higher in the economics department may fulfill these course requirements.

**Business Law and Ethics**

Business law and ethics courses highlight important concepts for students entering the business world.

The business law courses are designed to provide a strong foundation in the areas of contract law, agency, partnerships, and limited liability companies and corporations. The area also offers courses in a variety of other legal topics, such as Law of Commercial Transactions (required for accounting majors), Communications Law, International Business Law (an important elective for students pursuing the secondary concentration in international business), Employment Law, and Sports and the Law (required for the secondary concentration in sports business).

The business ethics classes address issues involving values and social norms in the business community. These classes focus on case discussions and role-play simulations to help put theory into practice.

The concepts discussed in all law and ethics classes expose students to salient issues that affect modern commerce. Asking our students to think about contemporary legal and ethical issues gives them a competitive edge. And they also consider a question that is central to business education at Fordham: Should a business exist purely for the purpose of profit, or should it contribute to society in a greater way?

**How courses are counted**

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

**For more information**

View the Business Law and Ethics Area web page.

**Programs**

**Minor**

- Business Law and Ethics Minor (p. 1102)

**Secondary Concentration**

- Concentration in Business Law and Ethics (p. 1102)

**Related Concentration**

- Concentration in Sports Business (p. 1321)

---

**Business Law and Ethics Minor Requirements**

The minor in business law and ethics is available to Gabelli School students. It requires six courses, two of which are already part of the business core curriculum.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BLBU 2234</td>
<td>Legal Framework of Business</td>
<td>3</td>
</tr>
<tr>
<td>BLBU 3443</td>

<tr>
<td></td>
<td>Four upper-level business law courses</td>
<td></td>
</tr>
<tr>
<td></td>
<td><img src="1,2" alt="superscript" /></td>
<td></td>
</tr>
</tbody>
</table>

1. Any course from subject code BLBU (p. 68) 3444 or higher will fulfill this requirement. Also, Law and Economics (ECON 3453) may be applied to this minor, as may Commercial Transactions (BLBU 3436).

2. Gabelli students majoring in Public Accountancy or Public Accounting may count Ethics in Financial Reporting and Accounting (ACBU 4646) towards the minor.

**Concentration in Business Law and Ethics**

Courses in business law and business ethics are key to success in the working world.

This is why every Gabelli School student takes a core-curriculum course in each: Legal Framework of Business and Business Ethics.

In the law class, students learn the fundamental rules that govern doing business in the United States—and find out how to apply them in a shifting business landscape. In the ethics course, students explore the issues that affect the stakeholders in a business relationship, debating what constitutes good or bad conduct.

They also consider a question that is central to business education at Fordham: Should a business exist purely for the purpose of profit, or should it contribute to society in a greater way?

**Requirements**

The following three courses are required to complete this secondary concentration:

**Chemistry**

The Department of Chemistry offers a B.S. in chemistry and has faculty with expertise in organic, physical, analytical, and inorganic chemistry and biochemistry. The department is committed to providing its majors with a strong foundation in modern chemical theory and practice that prepares them for further study in graduate or professional schools or for employment in chemical research and industry. To this end, beyond required coursework, we have all our majors participate in ongoing research projects with faculty mentors in which they learn to work independently, develop organizational and scientific writing skills, engage in responsible and safe work habits, and are trained in the use of state-of-the-art instrumentation. Their work frequently leads to publications in peer-reviewed journals and presentations at regional and national meetings of scientific organizations. The department is accredited by the American Chemical Society (ACS) and actively supports a chapter of Sigma Xi.

The Chemistry Department at FCRH is certified by the American Chemical Chemistry, and an ACS certificate of achievement is awarded to majors contingent upon certain elective choices. These include two additional laboratory courses (CHEM 4231 Biochemistry Lab I and CHEM 4432 Inorganic Chemistry Lab), at least one advanced chemistry elective lecture course, and at least two semesters of research under the supervision of a faculty member that requires a capstone research report. Chemistry majors who are enrolled in one of the pre-professional programs meet the above degree requirements subject to certain course substitutions.

Opportunities for student chemistry research participation with a faculty member are available subject to departmental approval. For first years, CHEM 1990 Introduction to Research is a zero credit P/F course that provides an introduction to modern research practice. Upperclassmen may take CHEM 3990 Directed Research, which is a one credit P/F course, or CHEM 4990 Independent Research, which is a variable credit (1 credit per 5 hrs contact) graded course that requires a capstone paper subject to the ACS guidelines. Students must take at least one semester of CHEM 3990 as a prerequisite to CHEM 4990.

**For more information**

Visit the Chemistry department web page.

**Contribution to the Core**

Chemistry offers courses numbered CHEM 1100-1110, which count as a core physical science course to fulfill part of the natural science core requirement. The two course sequence CHEM 1321 General Chemistry I/CHEM 1331 General Chemistry Lab I-CHEM 1322 General Chemistry II/CHEM 1332 General Chemistry Lab II when taken in sequence will fulfill both natural science course requirements (physical and life science).

**Programs**

Select two additional CHEM courses at the 3000- or 4000-level.

Additional information

It is recommended that all Chemistry majors take CHEM 3141 Methods of Chemical Research to fulfill their EP3 requirement.

MATH 2004 Multivariable Calculus I and MATH 3002 Differential Equations are suggested for students considering graduate studies in physical chemistry.

Interested students should consult with the director of the 3-2 engineering program for information regarding major courses to be completed in their sophomore and junior years.

Students are required to consult with the department before registering for CHEM 4030 Chemistry Seminar. Detailed instructions can be found on the department’s website. Majors meet with their academic advisor within the department to have their course schedules approved each semester.

For all courses, C- is the minimum accepted grade to be able to apply a course towards the major.

Availability

The minor in chemistry is available at Fordham College at Rose Hill. Students in Fordham School of Professional and Continuing Studies may major in chemistry only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.
Students are also encouraged to take advantage of the many opportunities for study abroad available through Fordham both during the summer months and the academic year.

Fellowship monies are available for qualified students majoring in classics during their junior and senior years.

For more information
Visit the Classical Languages and Civilizations department web page.

Contribution to the Core
The department participates actively in the core curriculum.

Classes in Latin or Greek fulfill the foreign language requirement. The B.A. requirement may be fulfilled by completing Greek Language and Literature (GREK 2001) or Latin Language and Literature (LATN 2001) or one advance course.

The prerequisite for GREK 2001 or LATN 2001, the exit-level course, is Intermediate Greek I (GREK 1501) or Intermediate Latin I (LATN 1501).

Students with sufficient previous language training may be placed directly into the intermediate (GREK 1501 or LATN 1501), literature (exit) (GREK 2001 or LATN 2001), or advanced reading level in Greek or Latin (GREK or LATN 3000s).

HIST 1210 Understanding Historical Change: Ancient Greece and HIST 1220 Understanding Historical Change: Ancient Rome are core area history courses. Core area courses are taken by all students during the first year and sophomore year and must be completed by the end of sophomore year.

The department offers three Texts and Contexts courses (CLAS 2000 Texts and Contexts): Myth in Greco-Roman Literature, Gender in Greco-Roman Literature, Tragedy and Comedy. All sections fulfill Eloquentia Perfecta 2 requirements.

CLAS 3030 Athenian Democracy, CLAS 3050 Pagans and Christians, CLAS 3141 Love, Fate, and Death in the Ancient Novel, CLAS 4020 The Classical Tradition in Contemporary Fiction and Film are Eloquentia Perfecta 3 courses.

Courses taken in the ancient world to fulfill core requirements may also be used for a major or minor in classics.

Programs
• Classical Civilization Major (p. 1105)
• Classical Civilization Minor (p. 1105)
• Classical Languages Major (p. 1105)
• Classical Languages Minor (p. 1106)

Classical Civilization Major
Requirements
To complete the classical civilization major, students should complete ten courses with the Classics (CLAS (p. 80)), Greek (GREK (p. 278)), or Latin (LATN (p. 381)) subject codes, or having the CLAS attribute. Of these:

• At least three classes must be departmentally based: courses with the subject codes for Classics (CLAS (p. 80)), Greek (GREK (p. 278)), or Latin (LATN (p. 381)). HIST 1210 and HIST 1220 count as departmental courses for this requirement.
• At least two classes must be at or above the 2000 level, with at least one of those two being an EP3 or EP4 course with the Classics (CLAS (p. 80)), Greek (GREK (p. 278)), or Latin (LATN (p. 381)) subject codes.
• A maximum of six classes in Greek (GREK (p. 278)) or Latin (LATN (p. 381)) may count toward the major. Two Latin/Greek courses at the 1000 level may count only if both 1000-level classes are in the same language (Latin or Greek).

While no courses in Latin or Greek are required for the classical civilization major, the department encourages classical civilization majors to fulfill their College language requirement in Latin or Greek.

Availability
The major in classical civilization is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in classical civilization only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Classical Civilization Minor
Requirements
To complete the classical civilization minor, students should complete six courses bearing CLAS (p. 80), GREK (p. 278), or LATN (p. 381) subject codes or having the CLAS attribute.

• At least two classes must be departmentally based: They must have either the CLAS (p. 80), GREK (p. 278), or LATN (p. 381) subject codes. HIST 1210 and HIST 1220 count as departmental courses for this requirement.
• At least one class must be at or above the 2000 level.
• A maximum of four classes in LATN or GREK may count toward the major. Two Latin/Greek courses at the 1000 level may count only if both 1000-level courses are in the same language (Latin or Greek).

Availability
The minor in classical civilization is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may minor in classical civilization only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Classical Languages Major
Requirements
The major in classical languages consists of 10 courses in Classics, Greek or Latin, including four 3000-level courses in a primary classical language (Greek or Latin).
The remaining coursework can be fulfilled by any course in Classics (subject code CLAS (p. 80)), Greek (subject code GREK (p. 278)), or Latin (subject code LATN (p. 381)), or having the CLAS attribute code. Courses taken en-route to the 3000-level courses in Greek or Latin, including prerequisites, may count toward this requirement.

The department does not require, but strongly recommends, that all majors take courses in both languages. Students who have not had Greek should take the beginning course as soon as possible. The department also recommends that majors have a broad training in ancient history and master the fundamentals of at least one modern language.

Availability

The major in classical languages is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in classics only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Classical Languages Minor

Requirements

A minor in classical languages consists of six courses:

- Two Greek (p. 278) or Latin (p. 381) courses at any level.
- Two more Greek (p. 278) or Latin (p. 381) courses at the 3000-level or higher.
- Any two additional courses in Classics (subject code CLAS (p. 80)), Greek (subject code GREK (p. 278)), or Latin (subject code LATN (p. 381)), or having the CLAS attribute.

Availability

The minor in classical languages is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in classics only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Communication and Media Studies

The Department of Communication and Media Studies at Fordham University (CMS) is dedicated to the interdisciplinary examination of human communication in an increasingly networked society. Just as digitalization and other forms of technological innovation yield a media environment that is constantly changing and evolving, sometimes in revolutionary ways, our diverse program keeps current with the most recent developments in theory and practice while staying true to its mission of emphasizing ethics and social engagement.

The department provides its students in all its programs with an interdisciplinary approach to the study of communication, including an emphasis on the media technologies, industries, and institutions that support the processes of mediated communication and their relationship to culture and society. The program blends theory and practice to prepare students for advanced study or careers in communications, all within the context of a rigorous liberal arts education supplemented by New York City's resources as the media capital of the world. We pride ourselves on offering opportunities for undergraduate students to work directly with faculty members in scholarship and training for future careers in multiple communication and media-focused careers.

In fall 2016, the department began to offer four new programs of study at Fordham College Rose Hill and Fordham College Lincoln Center, replacing a single undergraduate major and minor in communications for those two colleges.

- Communication and Culture (major (p. 1108), minor (p. 1111))
- Digital Technologies and Emerging Media (major (p. 1111), minor (p. 1112))
- Film and Television (major (p. 1112), minor (p. 1113))
- Journalism (major (p. 1113), minor (p. 1114), plus a minor in sports journalism (p. 1114))

The new areas of study allow students the opportunity to explore their interests in much greater depth than was possible within a single major or minor; both elective and required courses will now be better aligned with the specific interests of students and faculty in each area. (Students in PCS may still pursue a major (p. 1274) or minor (p. 1275) in communications.)

The original communications major and minor is no longer offered to incoming students at FCRH and FCLC. Students who began at Fordham after spring 2016 will be permitted to pursue only one of the new majors or minors, and may not major or minor in communications.

Note: Information about the Communication and Media Management (p. 1115) area at Gabelli is listed separately.

Course Prerequisites

- COMM 1000 Fundamentals of Communication and Media Studies must be taken before any of the following courses (students prior to fall 2017 may have taken COMM 1010 instead):
  - COMC 1101 Communications and Culture: History, Theory, and Methods
  - DTEM 1401 Introduction to Digital Technologies and Emerging Media
  - FITV 1501 Understanding Film
  - FITV 1601 Understanding Television
- DTEM 1401 Introduction to Digital Technologies and Emerging Media is recommended to be taken before DTEM 1402 Digital Cultures, especially for DTEM majors.
- JOUR 1701 Introduction to Multimedia Journalism With Lab must be taken before any intermediate or advanced writing/reporting course (i.e., any JOUR course where the second two digits are 71 or 72).
- FITV 1501 Understanding Film must be taken before FITV 2501 History of Film, 1895-1950 or FITV 3501 Film Theory and Criticism
- FITV 1601 Understanding Television must be taken before FITV 2601 History of Television or FITV 3601 Television Theory and Criticism.
Ethics, Law, and Policy Course Requirement

A course in ethics, law, and policy (ELP) is required for students majoring in communication and culture, digital technologies and emerging media, or film and television, as well as for students minoring in communication and culture or film and television. An ELP course is also required for students majoring or minoring in communication (FCRH/FCLC students enrolling prior to fall 2016 or PCS students).

The ELP requirement may be fulfilled by taking any course in COMC, DTEM, FITV, or JOUR with the last digit of 0, which includes the following courses:

Courses in this group have the CELP attribute.

Program Requirements

For all majors: To become a major in communications, communication and culture, digital technologies and emerging media, or film and television, or journalism, a student must demonstrate an earned cumulative GPA of 2.5 or better or receive written permission from the associate chair or chair of the department. In addition, no D-grade work will be credited toward the major or minor.

Internships

A significant feature of all the communication and media studies majors is the opportunity to participate in internships working under the direct supervision of professionals in media organizations, ranging from daily newspapers and television networks to public relations and advertising agencies and corporate communication programs.

Internship Requirements

- For their first internship, ALL CMS students wishing to receive credit for that internship MUST enroll in COMM 4701 Internship Seminar and successfully complete that course. This course is worth four credits and counts toward an elective in all four undergraduate majors.
- For all subsequent internships, students may take a tutorial—COMM 4999 Tutorial—under the internship director on each campus: Typically, these internships are worth one (1) course credit and do not count as an elective.
- All internships for academic credit must be approved by the department prior to registration. In general, students requesting academic credit for internships are expected to have a 3.0 cumulative GPA.
- The department recommends about 15 hours per week of internship duty over a semester (e.g., two days per week, seven hours per day; or three days per week, five hours per day).

Independent Research

Independent studies enable both majors and minors to pursue special projects as part of their requirements. Students may register to study with a professor for an Independent Tutorial for one to four credits, based upon an agreement with the professor.

Extracurricular Activities

Majors who belong to affiliated professional organizations may be eligible to apply for membership in Lambda Pi Eta, the Communication Honors Society. They are also active at WFUV (wfuv.org, 90.7 FM), Fordham University's highly regarded public media station; on a number of campus publications, including The Ram and The Observer; on Fordham Nightly News; and in many other student organizations.

Departmental Awards

Awards presented by the department include the Society of Professional Journalists/Sigma Delta Chi Award, the Herbert Robinson Award in Creative Writing, the Ralph W. Dengler, S.J., Award, the Ann M. Sperber Biography Award, the Kavanagh Award, and the Edward A. Walsh Scholarship for studies in communications.

For more information

Visit the Communication and Media Studies department web page.

Contribution to the Core

Communication and Media Studies offers the following courses that count toward Core Curriculum requirements:

The following courses satisfy the social science core requirement:

**Programs**

- Communication and Culture Major (p. 1108)
- Communication and Culture Minor (p. 1111)
- Digital Technologies and Emerging Media Major (p. 1111)
- Digital Technologies and Emerging Media Minor (p. 1112)
- Film and Television Major (p. 1112)
- Film and Television Minor (p. 1113)
- Journalism Major (p. 1113)
- Journalism Minor (p. 1114)
- Sports Journalism Minor (p. 1114)

The Communications (COMM) Major (p. 1274) and Minor (p. 1275) are available only to students at Fordham's School of Professional and Continuing Studies. Students in Fordham College at Rose Hill and Fordham College at Lincoln Center from the class of 2019 or earlier may also pursue the COMM major or minor.

**Communication and Culture Major**

The communication and culture major combines humanistic and social science approaches to the study of all aspects of human and mediated communication, including: the strategic application and implications of communication theories, tools, and techniques; the institutions and industries engaged in the production and distribution of mediated content; the receivers of this content and their reciprocal relationship with such messages; and the media texts in their social, political, local, and global cultural contexts.

In our increasingly interconnected world, it is clear that, when strategically chosen, the right words and images can be powerful instruments to help us move towards a more ethical and socially just world. The communication and culture major prepares the media professionals of tomorrow to use the power of mediated communication with responsibility by training them to be critical consumers and ethical producers of mediated communication in all areas of their lives: personal, professional, and civic.

**Requirements**

The communication and culture (COMC) major requires eleven (11) courses.

Two courses in Communication Studies: Applications and Interactions
Two courses in Cultural Studies: Critique and Analysis
Two courses in Media Studies: Institutions and Audiences
Two additional courses in one of the three areas (above) as a concentration
One ethics, law, and policy course, ordinarily taken senior year.

Two elective courses.

1. COMM 1010 Introduction to Communication and Media Studies has been discontinued and replaced by COMM 1000 as of Fall 2017.
2. Either COMM 1000 or COMM 1010 is a prerequisite for COMC 1101 Communications and Culture: History, Theory, and Methods.
3. See below list of Ethics, Law, and Policy courses.
4. Two elective courses may be counted in the course total, which may include any course in COMM, COMC, DTEM, FITV, or JOUR, or certain courses from outside the department, to be determined on a semester-by-semester basis, from a list made available to students in time for registration.

Students majoring in communication and culture must pursue one of three concentrations (p. 1109): Communication Studies, Cultural Studies, and Media Studies.

Availability

The major in communication and culture is available at Fordham College at Rose Hill (FCRH) and Fordham College at Lincoln Center (FCLC).

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Concentrations

Concentration in Communication Studies: Applications and Interactions

Courses in this concentration focus on the strategic application of theory related to mediated and human communication, as well as on the development of tools for studying human interaction through language, rhetoric, and socio-cultural practices. Courses may be taken in any sequence.

Courses fulfilling the communication studies concentration are generally numbered COMC x1xx—that is, any COMC course where the second digit is a 1 fulfills this concentration requirement, plus some additional courses.

Courses in this group have the CCMS attribute.

Digital Technologies and Emerging Media Major

The digital technologies and emerging media (DTEM) major takes a critical approach to internet and participatory technologies. It draws from a broad tradition of communication and media studies research; social science disciplines including anthropology, psychology, sociology, and political science; and the humanities and fine arts.

The major is designed to encourage greater understanding, critical thinking, and analysis of emerging technologies such as the web, social media, mobile apps, video games, wearables, and the like, while also offering a number of production and writing classes. Students wishing to pursue engineering or digital production should augment the major with classes in computer science, visual arts, journalism, and new media and digital design.

Note: Information about the Gabelli concentration in Digital Media and Technology (p. 1148) is listed separately.

Requirements

The digital technologies and emerging media (DTEM) major requires nine courses.

2. See list of ELP courses under Ethics, Law, and Policy Course Requirement (p. 1106).

3. Any course with the DTEM subject code or the DTEM attribute code may fulfill this requirement.

---

**Film and Television Major**

The film and television major takes a critical and practical approach to the study of media in their shared and distinctive artistic and industrial elements. It draws from a broad tradition of historical, theoretical, and creative practices to best prepare students with the skills they need in the rapidly evolving media landscape.

Fordham's location in New York City and Jesuit mission makes the University uniquely positioned to offer students cultural and career opportunities in film and television as well as a curriculum that trains them in ethical approaches to media studies and practice.

The major offers a concentration in either film or television, with courses designed uniquely for each concentration and with courses that bridge both tracks. It also offers flexibility for those students wishing to focus on film and/or television writing and production, and those wishing to concentrate on critical, historical, and theoretical concerns.

**Requirements**

The film and television (FITV) major requires eleven (11) courses.

Students must declare a concentration in film or television. The required courses for the major are:

**FITV Sequences**

Select one of the following sequences:

- For students interested in pursuing the film sequence:
  - FITV 1501  Understanding Film
  - FITV 2501  History of Film, 1895-1950
  - FITV 3501 Film Theory and Criticism

- For students interested in pursuing the television sequence:
  - FITV 1601  Understanding Television
  - FITV 2601  History of Television
  - FITV 3601 Television Theory and Criticism

**FITV Electives**

Select any two courses with the FITV subject code

---

1. Any course with the ELP attribute code (p. 1107) may fulfill this requirement.
2. Any course with the FITV subject code may fulfill this requirement.

## Journalism Major

The journalism major prepares reporters to serve the public interest in the digital age armed with strong practical skills, a deep grounding in journalism history and ethics, and sharp critical thinking. By synthesizing theory and practice, our graduates will be ready to serve our rapidly evolving media landscape. Classes are taught by a mix of full-time Fordham professors and media professionals from the New York area. Our faculty, who come from such organizations as the *New York Times*, CBS News, MTV and *Sports Illustrated*, help our students by bringing real-world experience to the classroom, making sure our graduates are ready to compete in the job market.

The major moves students through introductory, intermediate, and advanced multimedia reporting classes to hone their skills and bring them to a professional level in reporting, writing, and creating digital content. Majors in journalism become grounded in the profession through one required course in ethics, and one course in the “social construction of journalism”—Media Law, Journalism History, or Sociology of News. Journalism majors are also required to take a course in social media to learn how to use such sites as Facebook, Twitter, and Instagram for gathering and disseminating news.

### Requirements

The journalism (JOUR) major requires eleven courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

MKBU 4454 | ST: Sports Marketing | 3
PSYC 3360 | Sports Psychology | 4
SOCI 3152 | Sociology of Sports | 4

Communications and Media Management

Foundation coursework in communication and media management is common to all Gabelli School students via the business core. Students who want to investigate this area further may take elective courses or pursue a secondary concentration.

The secondary concentration allows students to strengthen their personal portfolios through advanced study. Depending on the coursework chosen, students will:

- Enhance their communicative skills with specific application to their chosen major, and/or
- Increase their understanding of the communication, information media, and entertainment industries, including television and cable, digital and social media, and new media. Studies will emphasize administrative, financial, and marketing issues in these industries.

No matter what their major or primary concentration, students will find valuable points of connection in their communication and media management coursework. Each course ties communication and media management to real-world issues in accounting, business economics, entrepreneurship, finance, management, human resource management, management of information and communications systems, or marketing.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

Visit the Communications and Media Management Area web page.

Programs

Concentration

- Concentration in Communications and Media Management (p. 1115)

Related Concentration

- Concentration in Digital Media and Technology (p. 1148)

Concentration in Communications and Media Management

Requirements

Communications and Media Management is available to Gabelli students as a secondary concentration only.

Students pursuing this concentration must complete three courses from the subject code CMBU (p. 112) numbered 3000 and higher.

Note: Information about programs in the Communication and Media Studies department (p. 1106) at Fordham’s liberal arts schools (FCRH, FCLC, PCS) is listed separately.

Comparative Literature

Comparative literature (formerly literary studies) is a bi-campus, interdepartmental, interdisciplinary program housing the comparative literature major. The program is co-directed, with the assistance of an executive committee. The program periodically consults a board of advisers made up of prominent scholars from various academic institutions.

The comparative literature major is concerned with the study of literature from a broad range of cross-cultural and interdisciplinary perspectives. Students may concentrate on the study of literature in at least two modern or classical languages, or in a different comparative context, such as literature and a textual discipline in the humanities or social sciences (e.g., anthropology, philosophy, political science, and others), literature and film, or literature and the creative arts, among others. The comparative literature major requires advanced proficiency in at least two
one classical or modern foreign language, and advanced coursework in at least one Western or non-Western literary tradition other than English.

Program Activities
The Program offers a broad range of activities for undergraduates: Bricolage, Fordham’s journal of literary studies, is edited by comparative literature majors and minors, under the guidance of a faculty adviser, and showcases critical essays by students on literature, culture, film, the arts, and theory; the Comparative Literature Club organizes social activities (e.g., theater outings); invited speakers offer lectures, talks, and seminars, either designed for or open to undergraduates; the program regularly sponsors film screenings in conjunction with courses and lectures.

Awards
Theses written by comparative literature majors and minors are eligible for the Katie Fraser Prize for Excellence in comparative literature (for majors) and the Literary Studies Prize for Work in Comparative Literature (for minors).

Internships
Students who wish to pursue an internship and receive college credit for it should contact the Comparative Literature major adviser and Career Service to identify internship opportunities relevant to their field of study and professional interests. To receive college credit, students sign up for a two-credit tutorial with the major adviser, and provide weekly reports on their experience, in addition to meeting with the adviser on a regular basis during the semester. Requirements may vary depending on the type of internship. In some cases, students may be eligible for more credits depending on the relevance of the experience to their course of study, and contingent on the completion of a substantial final project.

Honors in Comparative Literature
Honors in Comparative Literature is awarded on the basis of grade point average in the major (3.5), and the quality of the senior thesis and its presentation at the Senior Project Roundtable.

For more information
Visit the Comparative Literature program web page.

Contribution to the Core
Comparative literature offers COLI 2000 Texts and Contexts, which fulfills the core requirement in literature in English and counts toward the distributive requirement in Eloquentia Perfecta 2. Unless otherwise specified, nonmajors may take the program’s elective (major) offerings toward the core requirement in Advanced Disciplinary Courses in Literature. In addition, comparative literature offers courses that fulfill the distributive requirements in American pluralism, global studies, Eloquentia Perfecta 3 and 4 (Values) seminars as well as courses that fulfill the interdisciplinary capstone requirement.

Programs
- Comparative Literature Major (p. 1116)
- Comparative Literature Minor (p. 1117)

Comparative Literature Major
Requirements
Early in their program of study and in consultation with the comparative literature major adviser, students choose to take courses and write their thesis in one of the following areas of study:

- Literature across the languages
- Literature and diaspora studies
- Literature and the humanities, sciences or social sciences (e.g., anthropology, philosophy, political science or the natural sciences among others)
- Literature and film or media
- Literature and the creative arts
- Comparative theories

1 Any two courses (normally in the same language) offered by the departments of Modern Languages and Literatures (listed here) or Classical Languages and Civilization (listed here) numbered 2500 and above. These courses will allow the students to demonstrate an ability to read and analyze literary texts written in a language other than English.

2 (e.g., African and African American studies, communication and media studies, English, history, modern languages and literatures, philosophy, political science, visual arts) or interdisciplinary programs (e.g., Latin American and Latino studies, Medieval studies, urban studies, women’s studies) appropriate to the student’s program of study or concentration.

3 Proposals must be approved at the end of the student’s junior year.

In addition, in their senior year students participate in the Senior Project Roundtable, which offers them the opportunity to present and discuss their final projects in a public forum with faculty and students from comparative literature and other disciplines.

Updated: 07-27-2020
Majors are encouraged to pursue a study abroad program, usually in their junior year. It is strongly recommended that students who plan to pursue graduate work in comparative literature develop a reading knowledge in a second foreign language.

Comparative literature majors may take courses at Fordham School of Professional and Continuing Studies at Lincoln Center only if these courses are offered under the COLI subject (p. 115), or are officially cross-listed.

**Availability**

The major in comparative literature is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies.

*Fordham College at Rose Hill students:* The requirements above are in addition to those of the Core Curriculum.

*Fordham College at Lincoln Center students:* The requirements above are in addition to those of the Core Curriculum.

*Professional and Continuing Studies students:* The requirements above are in addition to those of the PCS Core Curriculum.

## Comparative Literature Minor

### Requirements

The minor in comparative literature consists of six courses to be distributed as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>COLI 3000</td>
<td>Literary Theories</td>
<td>4</td>
</tr>
<tr>
<td>or ENGL 3045</td>
<td>Theory for English Majors</td>
<td></td>
</tr>
</tbody>
</table>

Select five elective courses (3000 and above) selected in consultation with an adviser

Comparative literature minors are not required to write a senior thesis, but may choose to do so in consultation with their comparative literature adviser.

**Availability**

The minor in comparative literature is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

## Computer and Information Sciences

### Computer Science

The curriculum in computer science is oriented toward computing methods and systems. It emphasizes systems analysis, software design and programming, analytic reasoning, computer architecture, and the theory of computation. Students will learn the process and algorithms to analyze and solve complex problems and also use the computer and the Internet as a problem-solving tool. Students graduating from the program will be prepared for careers in computer science, information technology, system design, telecommunications, and network applications, both in the public and private sectors. Students will also be prepared for further graduate study in computer science or other related area.

Students wishing to major in computer science should take CISC 1600 Computer Science I and CISC 1400 Discrete Structures in the first semester of their first year year (or as soon as possible) and CISC 2000 Computer Science II in the second semester of their first year.

### Information Science

The curriculum in information science emphasizes information acquisition, information analysis, and information systems, as well as information and network technology.

It is concerned with the design of and methodologies for storing, retrieving, processing, and transmitting data and information. Students graduating from the program will be prepared for a variety of careers, including those in information systems, computer applications, web-based system design, and Internet and communication technology as found in government, business, and society. Students will also be prepared for further graduate study in information science, information systems, information networking, and other related areas.

Students wishing to major in information science should take CISC 1100 Structures of Computer Science and CISC 1600 Computer Science I in the first semester of their first year or as soon as possible.

No computer or information science course in which a student receives a grade below C- can be credited toward a major or minor in the department.

### Accelerated Master’s Program

Please read the Graduate School of Arts and Sciences Accelerated Master’s Programs section of this bulletin for more information.

Interested majors should speak with the associate chair of graduate studies in the fall of junior year. Students do not need to include GRE scores unless they are planning to apply for financial aid after finishing the bachelor's degree.

The minimum GPA to be eligible to apply is 3.2 or higher. This policy applies to FCRH, FCLC, and PCS. Students opting for early admission must take two graduate courses in their senior year, which count toward both their B.A. (or B.S.) and M.S. degree. Graduate courses taken while still at the college must be approved by the associate chair for graduate studies of the department. Applications are made online through the Graduate School of Arts and Sciences website.

### Program Activities

#### Courses For Nonmajors

1. Students wishing a general familiarity with computers, or computer and information science and technology, but who do not wish to major in computer or information science, are advised to take any of the following courses, which do not require any CIS prerequisites, as soon as possible:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CISC 1100</td>
<td>Structures of Computer Science</td>

<tr>
<td>CISC 2540</td>
<td>Introduction to Video Game Design</td>
<td>4</td>
</tr>
</tbody>
</table>

Updated: 07-27-2020
Seminar/ EP4 core requirement.

The department also offers Computers and Robots in Film Design.

Students wishing to have some knowledge on the applications of computer and information science and their interface with biomedicine and health can take CISC 4020 Bioinformatics.

4. Students majoring in science, mathematics, and social science, who wish to pursue their further graduate studies in a field or subject closely related to (or utilizing) quantitative, qualitative, and algorithmic reasoning should take CISC 2850 Computer and Data Analysis or CISC 4631 Data Mining in addition to those courses listed in (1) above.

5. Students can take a combination of courses (listed in (1), (2), (3) and (4) above) to fulfill a minor in computer science, information science, or information technology and systems (see the required minor courses in Minor section) or to prepare intellectual skills necessary in their major study.

3-2 Cooperative Program in Engineering

This joint five-year program with Columbia University leads to a B.A. degree from Fordham University and a B.S. degree in engineering from Columbia University. A description of the program is given under the Cooperative Program in Engineering section of this bulletin. The department provides a specialized set of CS major requirements for 3-2 engineering students (p. 1119). Interested students should consult the computer and information science department as early as possible.

For more information

Visit the Computer and Information Sciences department web page.

Contribution to the Core

The Department of Computer and Information Sciences offers CISC 1100 Structures of Computer Science, CISC 1400 Discrete Structures, and CISC 1600 Computer Science I (CS1), each fulfilling the mathematical and computational reasoning core requirement. We encourage science and social science majors, and those interested in receiving a more in depth understanding of algorithmic and quantitative reasoning, to take CISC 1400 Discrete Structures instead of CISC 1100 Structures of Computer Science.

The department also offers CISC 2540 Introduction to Video Game Design, which satisfies the EP3 core requirement, and CISC 4001 Computers and Robots in Film and CISC 4006 Brains and Behavior in Beasts and Bots, which satisfy the ICC core requirement.

The department also offers CISC 4650 Cyberspace: Issues and Ethics and CISC 4660 Minds, Machines, and Society, which fulfill the Values Seminar/EP4 core requirement.

Programs

Majors

- Computer Science Major (p. 1119)
- Information Science Major (p. 1121)
- Mathematics and Computer & Information Sciences Major (p. 1121)

Minors

- Bioinformatics Minor (p. 1118)
- Computer Science Minor (p. 1120)
- Cybersecurity Minor (p. 1120)
- Information Science Minor (p. 1121)

Bioinformatics Minor

A minor in bioinformatics is available on both the Rose Hill and Lincoln Center campuses. Bioinformatics is an emerging interdisciplinary field fusing mainly biological sciences and computer sciences and encompassing the knowledge and tools of other science disciplines. Bioinformatics studies the sequence, structure, and function of genes and proteins in all living organisms, including the human species. When dealing with an influx of raw information, a significant amount of effort is spent on how to effectively and efficiently warehouse and access these data and on new methods and algorithms aimed at mining this warehoused data in order to make novel discoveries in biology, medicine, and pharmaceuticals. Some examples of the topics are genomics, proteomics, phylogenetics, systems biology, DNA microarray gene expression, protein chip, and next generation sequencing (NGS) data analysis, genomic medicine, biomarkers for cancer and disease, drug discovery and design for disease and disorders, database and data mining, network form and function, and ESL (ethical, societal, and legal) issues.

For more information

Visit the Bioinformatics minor program webpage.

Requirements

The following courses are required for the Bioinformatics minor.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

The requirements above are in addition to those of the Core Curriculum.

**Availability**

The minor in bioinformatics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

**Fordham College at Rose Hill students:** The requirements above are in addition to those of the Core Curriculum.

**Fordham College at Lincoln Center students:** The requirements above are in addition to those of the Core Curriculum.

### Computer Science Major

**Requirements**

The computer science major may be taken toward either the Bachelor of Arts (B.A.) or the Bachelor of Science (B.S.) degree. The B.A. degree in computer science requires a total of 14 courses, and the B.S. degree in computer science requires a total of 16 courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

<td></td>
</tr>
</tbody>
</table>

Select three electives

1. For students entering prior to Fall 2015 (class of 2020 or earlier), CISC 4700 Network and Client Server is required instead of CISC 2100 Discrete Structures II.
2. Elective courses are selected from department courses (which may include some graduate courses) or in cognate areas in consultation with a department adviser. One elective CISC course (p. 131) must be numbered 2000 or above, while the remaining elective must be numbered 3000 or above. The following courses may not count toward this requirement: CISC 4001 Computers and Robots in Film, CISC 4650 Cyberspace: Issues and Ethics, and CISC 4660 Minds, Machines, and Society.
3. Required for students entering in Fall 2017 (class of 2022) and later.
4. MATH 12AB Transfer Calculus AB and MATH 12BC Transfer Calculus BC (transfer credit from AP Calculus AB or AP Calculus BC) also fulfill this requirement.

### 3-2 Engineering Program

Computer Science majors pursuing the Cooperative Program in Engineering have a slightly different set of requirements to fulfill to complete their major in computer science. All courses are required.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>

Updated: 07-27-2020
Students wishing to minor in computer science take the following:

**Requirements**

**Computer Science Minor**

Students wishing to minor in computer science take the following:

- **Course**
  - CISC 3595 Operating Systems
  - CISC 4080 Computer Algorithms
  - CISC 4090 Theory of Computation
  - CISC 4615 Data Communications and Networks
  - CISC 4631 Data Mining

**Mathematics Courses**

- MATH 1206 Calculus I
- MATH 1207 Calculus II
- MATH 2001 Discrete Mathematics
- MATH 2004 Multivariable Calculus I
- MATH 2005 Multivariable Calculus II
- MATH 2006 Linear Algebra I
- MATH 3002 Differential Equations

**Physics Courses**

- PHYS 1511 Physics I Lab
- PHYS 1512 Physics II Lab
- PHYS 1510 Discrete Structures

**Chemistry Courses**

- CHEM 1321 General Chemistry I
- CHEM 1311 General Chemistry I Recitation
- CHEM 1331 General Chemistry Lab I

**Electives**

Select three elective courses in consultation with a department adviser.

1. Courses with the subject code CISC (p. 131) fulfill this requirement.

   One elective CISC course may be numbered 2000 or above, while the remaining electives must be numbered 3000 or above, excluding CISC 4001 Computers and Robots in Film, CISC 4650 Cyberspace: Issues and Ethics, and CISC 4660 Minds, Machines, and Society.

**Availability**

The minor in computer science is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

**Cybersecurity Minor**

Cybersecurity is an emerging and fast-growing field in computer and information science, and it plays an essential role in modern society. There is a huge demand for cybersecurity professionals in the market due to the exponential increase of cyber intrusions and attacks on governmental agencies and commercial organizations.

A primary aim of the cybersecurity minor is to engage non-CIS students with this exciting field so as to augment their major field of study with the pragmatics of cybersecurity techniques and knowledge. It could be attractive for traditional computer science, mathematics, physics, business, or even biology majors to have a minor in cybersecurity.

A unique feature of Fordham’s cybersecurity minor is its comprehensive integration of problem-solving skills with a rigorously theoretical background in cybersecurity. It is anticipated that this minor will opportunistically serve the needs of undergraduate students enrolled in different majors interested in obtaining cybersecurity positions in governmental agencies and commercial organizations.

Students majoring in information science (INSC) or information technology and systems (INTS) may not minor in cybersecurity because these majors already include most of the courses as requirements. Students majoring in computer science (COSC) may minor in cybersecurity provided that four of the courses used for the minor are not applied to the major.

**For more information**

Visit the Cyber Security program web page.

**Requirements**

The cybersecurity minor requires the following six courses:

- **Course**
  - CISC 1600 Computer Science I
  - & CISC 1610 Computer Science I Lab

- **Credits**
  - 4

---

1. MATH 12AB Transfer Calculus AB and MATH 12BC Transfer Calculus BC (transfer credit from AP Calculus AB or AP Calculus BC) also fulfill this requirement.

These courses fulfill only Fordham University’s requirements to earn the B.S. in Computer Science for 3-2 students. Additional Columbia requirements need to be fulfilled for acceptance into Columbia’s Computer Science or Computer Engineering Track. Consult the 3-2 program director for additional guidance.

**Availability**

The major in computer science is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

**Fordham College at Rose Hill students:** The requirements above are in addition to those of the Core Curriculum.

**Fordham College at Lincoln Center students:** The requirements above are in addition to those of the Core Curriculum.

**Professional and Continuing Studies students:** The requirements above are in addition to those of the PCS Core Curriculum.
Please contact the computer and information science department chair for additional information on this program.

### Availability

A minor in cybersecurity is available at both the Rose Hill and Lincoln Center campuses.

### Information Science Major Requirements

**Effective Spring 2020, the major in Information Science has been suspended, and is not accepting new major declarations.**

The major in information science may be taken toward either the Bachelor of Arts (B.A.) or the Bachelor of Science (B.S.) degree awards. The B.A. requires 13 courses and the B.S. requires two additional courses.

<table>

</tr>
</tbody>
</table>
| Select two electives

1 Courses with the CISC subject code (p. 131) fulfill this requirement. One course may be numbered 2000 or above while the other elective must be numbered 3000 or above, excluding CISC 4001 Computers and Robots in Film, CISC 4650 Cyberspace: Issues and Ethics, and CISC 4660 Minds, Machines, and Society.

### Availability

The minor in information science is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

### Mathematics and Computer & Information Sciences Major

The major, offered jointly by the Department of Computer and Information Sciences (p. 1117) and the Department of Mathematics (p. 1244), is designed to give students an excellent background in computer science and a solid foundation in those mathematical disciplines necessary for a full understanding of computer and information sciences. The program fosters both careful reasoning and a deep understanding of technology, enhancing graduates’ marketability. The high degree of difficulty makes this joint major attractive to recruiters from the technology industry; it also prepares students who wish to pursue graduate study in computer science and other applied quantitative fields. Please note: There is no
minor in this area; students are instead encouraged to minor in either mathematics or computer and information sciences.

**Internships**
Some majors in this program have completed internships, but such internships are not required and do not count toward the two electives in the major.

**For more information**
Visit the Mathematics and Computer & Information Sciences program page.

**Requirements**
A minimum grade of C- is required for each course counting toward this joint major. An overall average of 2.0 must be separately maintained in mathematics and computer and information sciences courses.

Required courses and sufficient electives to fulfill the major are available on both campuses. Course descriptions are available from each department.

Majors in this program are eligible for honors at graduation in mathematics and computer & information sciences.

The major requires 14 total courses: 10 common required courses, two courses in one concentration, and two electives. **Students must declare a concentration in mathematics or computer and information sciences.** The 10 common required courses are identified below.

### Course Title Credits

**Required Courses**
- CISC 1600 Computer Science I 4
- & CISC 1610 and Computer Science I Lab 4
- CISC 2000 Computer Science II 4
- & CISC 2010 and Computer Science II Lab 4
- CISC 2200 Data Structures 4
- CISC 4080 Computer Algorithms 4
- CISC 4090 Theory of Computation 4
- MATH 1207 Calculus II 4
- MATH 2004 Multivariable Calculus I 4
- MATH 2001 Discrete Mathematics 4
- MATH 2006 Linear Algebra I 4
- MATH 4006 Numerical Analysis 4

**Electives**
Select two electives in mathematics (numbered above 2000) or computer and information sciences (possibly including 5000 level graduate courses) ¹

**Concentration**
Select one of the following:
- Mathematics Concentration
- Computer and Information Sciences Concentration

¹ At least one elective must be from mathematics if the computer and information sciences concentration is chosen and at least one elective must be in computer and information sciences if the mathematics concentration is chosen.

### Concentrations
Each student must also take two courses from one of the following two concentrations. Courses from the concentration not chosen may be used as electives.

#### Mathematics Concentration

### Availability
The major in mathematics and computer & information sciences is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in the School of Professional and Continuing Studies may major in mathematics and computer & information sciences only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

**Fordham College at Rose Hill students:** The requirements above are in addition to those of the Core Curriculum.

**Fordham College at Lincoln Center students:** The requirements above are in addition to those of the Core Curriculum.

**Professional and Continuing Studies students:** The requirements above are in addition to those of the PCS Core Curriculum.

### Core Curriculum
Fordham's Core Curriculum is a central part of its larger mission and identity as a university in the Catholic and Jesuit tradition preparing its students for responsible leadership in a global society. The “core” plays a key role in the undergraduate curriculum as a whole. As students’ majors and electives allow specialization and individualization in their studies, the Core Curriculum assures that every student’s undergraduate education is anchored, as a whole, in the liberal arts. The Core Curriculum provides an ongoing developmental context for students’ studies and a framework for the entire undergraduate education.

**NOTE:** Gabelli (p. 1201), PCS , FCHR Honors (p. 1218), FCLC Honors (p. 1217), and BFA (p. 1146) students should refer to their respective sections of this bulletin to guide their selection of liberal arts core courses.

At the heart of Fordham College’s academic program is the core curriculum. These courses are designed to nurture curiosity, inspire a love of learning and provide you with the foundation needed to engage
in lifelong learning. In every core course, you think, speak, write, and act in fundamentally new ways, with a broadened appreciation for human values and a deepened commitment to the world. At its heart, is the practice of *Eloquen
ta Per Recta*, where students learn right use of reason joined to cultivate expression.

The Core Courses:

- Expose you to new intellectual vistas
- Enhance your understanding of ways of knowing within academic disciplines
- Allow you to make connections among various disciplines
- Develop writing, research, and quantitative and analytical skills

As a Jesuit university, Fordham helps you shape habits of heart and mind that are the hallmarks of liberally educated men and women. Our core curriculum blends reverence for tradition with openness to new challenges, and new ways of knowing and engaging the world.

**Requirements**

**Initial Courses (p. 1144)**

The initial courses of the Core Curriculum begin the process of attaining the above goals and objectives with an emphasis on language mastery (English composition and foreign language preparation).

- ENGL 1102 Composition II
- Foreign Language and Literature

**Disciplinary Ways of Knowing and Concepts (p. 1137)**

The second step of the core curriculum continues the development of writing and oral expression as well as social awareness in the study of ways of knowing characteristic of liberal arts disciplines.

- Mathematical/Computational Reasoning (p. 1137): One required course
- Natural Science (p. 1137): Two courses: Physical Science and Life Science
- PHIL 1000 Philosophy of Human Nature
- THEO 1000 Faith and Critical Reason
- Fine and Performing Arts (p. 1138): One required course
- Texts and Contexts (p. 1139): One required course
- Understanding Historical Change (p. 1139): One required course
- Social Sciences (p. 1139): One required course

**Advanced Disciplinary Study (p. 1123)**

The third phase enables students to deepen and extend their disciplinary study and enrich their major courses, which they will be taking concurrently, through a diverse spectrum of advanced courses, thereby assuring the achievement of intellectual perspective with breadth. The following upper-level courses will build on the knowledge, skills, and methodological foundations of the disciplinary introductions to develop and extend their awareness of questions and approaches outside their majors. Courses at this level will generally be numbered in the 3000 range and may be taken when students have completed the introductory disciplinary courses in the area, beginning in sophomore year.

- PHIL 3000 Philosophical Ethics
- Sacred Texts and Traditions (p. 1123): One required course
- Advanced Disciplinary Courses: Two required courses:
  - an advanced literature course (p. 1124) and an advanced history course (p. 1129); or
  - an advanced history course (p. 1129) and an advanced social science course (p. 1131); or
  - an advanced social science course (p. 1131) and an advanced literature course (p. 1124).

**Capstone Courses (p. 1134)**

The final stage of learning through the core curriculum builds on themes introduced in earlier courses. One course completes the sequence of courses in literature, history, and/or social science, and enables students to recognize interrelations among disciplinary ways of knowing through interdisciplinary study. The second course reflects on the infusion of values in knowledge and human life, thereby forming a broader perspective that will provide a framework for the development of socially responsible wisdom after graduation. Courses at this level will be numbered in the 4000 range, and may be taken when students have completed or are completing the Advanced Disciplinary courses.

- Interdisciplinary Capstone in Literature, History, and/or Social Science (p. 1134): One required course
- Values Seminar (p. 1136): One required course

**Distributive Requirements (p. 1140)**

Finally, students must complete a set of distributive requirements across their four years at Fordham.

- Eloquentia Perfecta (p. 1140) Seminars: Four required courses
- Global Studies (p. 1140): One required course
- American Pluralism (p. 1142): One required course
- Community-Engaged Learning (p. 1144): One encouraged course

**Advanced Disciplinary Study**

**Philosophical Ethics**

**One Required Course**

This course involves philosophical reflection on the major normative ethical theories underlying moral decision making in our everyday lives. The principal focus of the course is a systematic introduction to the main normative ethical theories, i.e., eudaimonism, natural law ethics, deontological ethics, utilitarianism, virtue ethics, and feminism. The differences among these approaches are illuminated by studying various moral issues. In each section of the course, at least half the readings will be selected from Aristotle and Kant. Each section will include writings by at least one contemporary figure.

**Sacred Texts and Traditions**

**One Required Course**

The second theology course, selected from a group of offerings called Sacred Texts and Traditions, builds on the foundation of critical reasoning about traditions in the first theology course through analytical study of one religious textual tradition. The sections of this course will offer...
students a variety of texts from which to choose. All sections will draw on the disciplines of history, literary analysis, and theology, interpreting religious traditions and texts as both historically embedded and always evolving responses to the experience of the transcendent in human life.

The following courses have the STXT (Sacred Texts and Traditions) attribute:

Advanced Disciplinary Courses

Two Required Courses

Following the introductory literature, history, and social science courses, these courses will enable the student to achieve a sharper focus and more detailed knowledge of complex literary, historical, and social methods, materials, interactions, and processes. To fulfill the requirement, two advanced disciplinary courses will be chosen from two different disciplines:

- an advanced literature course and an advanced history course; or
- an advanced history course and an advanced social science course; or
- an advanced social science course and an advanced literature course.

They will be taken before or simultaneously with the capstone requirements.

Capstone Courses

Interdisciplinary Capstone in Literature, History, and/or Social Science

One Required Course

For this capstone in the literary, historical and social scientific sequence, courses will use interdisciplinary study to examine the role of disciplines in knowledge formation. Each course will feature at least two disciplines that conceive and study a common topic or problem. The Interdisciplinary courses will be team taught by professors representing contrasting disciplines that conceive and study a common topic or problem. The Interdisciplinary courses will use interdisciplinary study to examine the role of disciplines in knowledge formation. Each course will feature at least two disciplines in each interdisciplinary course must be different from the first, but may be literary, historical, social scientific, or drawn from any other discipline, such as the sciences, fine arts, philosophy or theology.

The following courses have the ICC (Interdisciplinary Capstone Core) attribute:

**Values Seminar**

**One Required Course**

In these courses, students will learn to identify, take seriously, and think deeply and fairly about complex ethical issues in contemporary and former times. Faculty from all departments in the Arts and Sciences will develop these capstone seminars. These small, writing intensive topical seminars will be offered in the Eloquentia Perfecta format and fulfill the EP4 requirement.

**Disciplinary Ways of Knowing**

**Mathematical/Computational Reasoning**

**One Required Course**

The aim of this requirement is to develop the fundamental skills involved in mathematical and computational approaches to problem solving, reasoning, and an understanding of our world. These skills also form the basis for advanced reasoning in many areas and provide a basis for testing logic, solving problems, and evaluating mathematical and computational arguments and evidence in daily life. After completing this requirement, students will be prepared to explore quantitative and computational issues in the natural sciences, the social sciences and the humanities.

The following courses have the MCR (Mathematical/Computational Reasoning) attribute:

<table>

</tbody>
</table>

**Natural Science**

**Two Courses in Sequence: Physical Science and Life Science**

Through core science courses, students will gain understanding of scientific methodology as a way of knowing and an appreciation of the social responsibility and ethics of science. By understanding how reasoning and experimental evidence lead to scientific conclusions, students will develop scientific literacy—the ability to understand the breakthroughs in science, medicine, and technology as educated, creative, responsible citizens. With knowledge of the basic principles of science, students will be able to evaluate the legal, moral, and ethical issues that will affect their lives after they graduate. In the science courses, students will develop skills in critical thinking and discernment; qualitative and quantitative reasoning; written and oral communication; and formulation, analysis, and solution of complex problems.

Students who are not science majors may take modular or integrated courses on various topics. The physical science section, which is taken first, covers energy (kinetic and potential, electromagnetic, thermodynamics), matter (atomic and molecular structure, chemical bonding), and interactions (strong, weak, electromagnetic, gravitational). The life science sections (usually taken second) cover evolution: genetics and genetic engineering; human biology; including nervous and sensory systems; environment; and behavior and learning (classical, operant, and observational). All sections have labs. Alternatively, for those interested in a specific science -- including non-science majors -- this requirement may be met through a two-semester disciplinary introduction with associated labs.

In summary, students may fulfill this requirement through one of three ways:

1. One course with the PSCI attribute and one course with the LSCI attribute (for non-science majors).
2. A two-course disciplinary introduction sequence. (This option is preferred for science majors who must take such courses anyway.)
3. A two-course sequence (NSCI 1050 & NSCI 1051), for nonscience majors only.

**Physical Science courses for Non-science Majors**

The following courses have the PSCI (Physical Science Core) attribute:

<table>

**Philosophy of Human Nature**

**One Required Course**

A philosophical reflection on the central metaphysical and epistemological questions surrounding human nature, which includes discussion of some or all of the following problems: the body/soul distinction and the mind/body problem; the problem of knowledge (relativism, skepticism, the objectivity of knowledge; faith and reason); free will and determinism; and self and society (subjectivity, personhood, sociality, historicity, and tradition). At least 60 percent of each section of the course is devoted to readings from Plato, Aristotle, Augustine or Aquinas, and Descartes. Each section includes some writings by at least one contemporary figure.

</tr>
</tbody>
</table>

---

**Faith and Critical Reason**

**One Required Course**

An introduction to fundamental theological issues including the dialectic between religion and modernity that has shaped our cultural heritage, and some of the ways that various cultures and individuals have confronted the pressing questions of meaning in human life. When apposite, comparisons with religious traditions other than Christianity are made.

<table>
<thead>

**Fine and Performing Arts**

**One Required Course**

By seeing or hearing visual or musical works and understanding them, students learn to appreciate the non verbal and how such works both are influenced by and exercise influence on their cultural milieu. The courses take advantage of and encourage students to appreciate the extensive cultural offerings of New York City.

_The following courses have the FACC (Fine and Performing Arts) attribute:_

<table>
<thead>
<tr>

The following courses have the HC (Understanding Historical Change) attribute:

- ARHI 1103 Introduction to Art History: Americas 3
- ARHI 3480 Art and Architecture in London 4
- MUSC 1051 Who Cares If You Listen?! Music, Culture, and the Critical Ear 3
- MUSC 1100 Introduction to Music History 3
- THEA 1100 Invitation to Theatre 3
- VART 1101 Urbanism 3
- VART 1135 Visual Thinking 3

VART 1135 Visual Thinking has the attribute effective Spring 2019.

**Texts and Contexts**

**One Required Course**

The introductory core course in English literature, which may include literature in translation, will teach the arts of literary interpretation by developing techniques of close reading, an appreciation of the relations among literary works and the contexts in which they are written and read, and an ability to write critically about the interplay between text and context. The sections of this course will offer students choice among thematic and topical foci, which will be specified in each section title and spelled out in the section’s description. All sections will be offered in the Eloquentia Perfecta format, which emphasizes writing and presentation and fulfill the EP2 requirement.

The following courses have the TC (Texts and Contexts) attribute:

Prerequisite: ENGL 1102 Composition II

**Understanding Historical Change**

**One Required Course**

Through the introduction to the discipline of history, students will begin to achieve knowledge of the structure of societies, how they function, and how they change. Each section of the course will consider how to assess evidence, identify and evaluate differing and often contradictory explanations and arguments, and appraise the relative scale and importance of particular changes in the past. Students will be able to choose from different sections of the course, each with the title Understanding Historical Change and a descriptive subtitle, such as Ancient Greece, American History, etc.

The following courses have the HC (Understanding Historical Change) attribute:

</table>

**Social Sciences**

**One Required Course**

Students will be introduced to the ways of knowing the characteristics of the social sciences through introductory courses in anthropology, communications, economics, political science, psychology, and sociology. The courses will usually focus on a substantive concern of the social sciences and include historical overviews, consideration of the variety of research methods typically used (especially empirical research), reviews of the major theoretical orientations and models, and real-world implications and applications to practical problems.

The following courses have the SSCI (Social Science Core Requirement) attribute:

**Distributive Requirements**

**Eloquentia Perfecta Seminars**

**Four Required Courses**

Eloquentia Perfecta (EP) seminars will dedicate at least one-fifth of class time to student writing and oral expression. Students will be expected to take four EP seminars during the undergraduate years. EP1 and EP3 are apply to designated sections of individual courses, but are not listed in this bulletin. The EP2 and EP4 requirements are automatically fulfilled by completing, respectively, the Texts and Contexts and Values Seminars core requirements.

- **EP1:** Special sections of courses, which are reserved for first year students. Upper class transfer students are exempted from EP1.
- **EP2:** All sections of Texts and Contexts will be designated Eloquentia Perfecta 2.
- **EP3:** Special sections of core, major, and elective courses will be designated Eloquentia Perfecta 3.
- **EP4:** All Values Seminars will be designated Eloquentia Perfecta 4.

Courses in this bulletin that fulfill the EP2 and EP4 requirements are designated as such with the respective attribute on the course description itself. Individual sections with the EP1 or EP3 attribute are not visible in this bulletin or DegreeWorks because courses often have versions where EP1 or EP3 status depends on the instructor and syllabus. EP1 and EP3 sections may be found by searching for them under my.fordham.edu.

**Global Studies**

**One Required Course**

Global Studies courses are intended to ensure that students come to respect, understand, and appreciate the significant variations in customs, institutions, and world views that have shaped peoples and their lives. Courses with a global focus may be drawn from core, major, or elective offerings. They will be applicable both to the Global Studies requirement and to the core and major requirements that a student must complete in the course of his or her college career.

### American Pluralism

#### One Required Course

American Pluralism courses will afford students the opportunity to develop tolerance, sensitivities, and knowledge of the following forms of American diversity: race, ethnicity, class, religion, and gender. American Pluralism courses may be drawn from core, major, or elective offerings. They will be applicable both to the American Pluralism requirement and to other core or major requirements that a student must complete in the course of his or her college career.

The following courses have the PLUR (Pluralism) attribute. Certain sections of ENGL 2000 Texts and Contexts, COLI 2000 Texts and Contexts, and HIST 1100 Understanding Historical Change: American History may also have the PLUR attribute.

Language skills preparation: one to three courses. Students in modern languages starting a new language will take an intensive one-semester course (three class hours, two lab hours, two tutorial hours; five credits) in order to accelerate their progress (1001-Introduction I). This introductory course is followed by 1501/1502-Intermediate I/II and concludes with 2001. Students continuing with a language will be placed in Introduction II (only offered in the fall), in Intermediate I or II, or in 2001. The language preparation courses may not be taken Pass/fail.

Students seeking a substitution for the foreign language core through the Office of Disability Services must complete the process by the end of their first year at Fordham. Similarly, students with proficiency in a foreign language must provide documentation to the Associate Chair of the Modern Language and Literature Department regarding competence by the end of their first year at Fordham. This documentation may include the equivalent of a high school diploma from a foreign-language speaking country where the foreign language is the language of instruction or official certification of having attained a B2-level score from the Common European Framework exam or passing the 16-point proficiency exam at NYU with a score of 15 or higher.

Courses in languages are offered by the Classical Languages and Civilisation (p. 1104) or Modern Languages and Literatures (p. 1251) departments.

Exemptions: Psychology majors must complete the language requirement unless they are prehealth. B.A. students in PCS do not have a language requirement unless required for their major. All other B.S. and B.F.A. students, as well as students majoring in natural science, are exempt from the language requirement.

Dance

The dance program leads to the Bachelor of Fine Arts Degree and is offered jointly by the Ailey School and Fordham University. Dance studio courses are given by the faculty of the Ailey School at their state-of-the-art studios adjacent to the Fordham campus. Academic coursework is based at the Fordham campus where it is taught by the University’s arts and sciences faculty.

Students complete a broad curriculum of a minimum of 146 credits comprised of dance technique, creative, and dance academic classes, and liberal arts courses. The program’s goals are to develop graduates who are highly versatile dance technicians, adept creators of dance movement, well-educated in the liberal arts, and knowledgeable about the history and interpretation of the arts.

The program offers a specialization in dance performance. First-year students take placement examinations in three major techniques—Horton, Graham-based modern, and classical ballet—so that each student can be placed appropriately by the Ailey School’s faculty advisers.

The focus for first years and sophomores is on the development of discrete skills in the three major techniques, classes that are taken daily by each student. These skills are supported by somatic classes (body conditioning, barre à terre, and yoga) that both strengthen the body and render it more supple. Additional classes in West African dance, jazz, and other techniques further broaden students’ technical range and complement their training in the three basic techniques. All dance
Apprentice membership courses include:

- Full memberships in professional dance companies are available to B.F.A. students in their junior or senior year. Apprentice memberships in professional dance companies are available to B.F.A. students in their junior or senior years. These opportunities are only available by invitation or audition and are subject to the approval of the director and codirector of the program. Apprentice membership courses include:

In the junior year, students’ dance technique skills are expected to be strong and their creative expertise well honed. At this point in their training, they are ready to learn the basics of modern and ballet partnering and repertory, both classical and contemporary. Repertory works are chosen annually to meet the needs of each class of students and to prepare them to meet the demands of the profession. They spend six to eight weeks working with each guest choreographer/artist-in-residence (AIR), or selected members of the Ailey School faculty, and perform the works in formal studio concerts scheduled throughout the year.

In their senior year, students further refine their dance technique and focus on showcasing their performance or choreographic skills through performance and the senior project. Under the guidance and supervision of the Ailey School faculty, students perform at locations in the metropolitan area during the winter. In the spring preceding the senior year, each junior meets with the B.F.A. director and B.F.A. codirector to determine the focus of that senior project. The focus will be on performance or choreography, depending upon the strengths and interests of each student, as approved by the Ailey School director, B.F.A. codirector and selected Ailey School faculty, and will culminate in B.F.A. concerts.

The progress of each student is formally evaluated at the end of each term with written evaluations and individual conferences held with the B.F.A. director, codirectors, and program staff. In addition, at the end of the first year and sophomore year, jury exams are held and all students are reassessed for their continuation in the B.F.A. program. This assessment will consist of a review of:

1. each student’s written dance evaluation
2. their academic record
3. a dance jury composed of:
   - B.F.A. director
   - B.F.A. codirector
   - department chairpersons of the Alvin Ailey School
   - selected faculty members

All B.F.A. students are expected to maintain satisfactory progress in their dance classes at the Ailey School and academic classes at Fordham University.

Program Activities

Apprentice/Membership Opportunities

Full memberships in professional dance companies are available to B.F.A. students in their senior year. Apprentice memberships in professional dance companies are available to B.F.A. students in their junior or senior years. These opportunities are only available by invitation or audition and are subject to the approval of the director and codirector of the program. Apprentice membership courses include:

In addition, students in these courses must register for advanced level Ballet, Horton, and Modern technique courses. Full membership courses include:

Dance Courses for Nonmajors

Fordham undergraduates not pursuing the B.F.A. may enroll for up to four two-credit courses at the Ailey School and apply their courses toward their credit requirement for graduation. Students wishing to take intermediate and advanced level courses must first audition at the Aliley School before registering. In addition to their Fordham tuition, each student will be billed an additional fee per course through Fordham. For further information, please contact the assistant dean. Courses for nonmajors are numbered from DANC 1300 to 1399 and include “Nonmajors” in their title.

Dance Major

Admissions

Admission Requirements and Procedures

Students interested in the Ailey/Fordham B.F.A. program are expected to meet the following general criteria:

- Superior talent and potential for a performing career as a dance artist, and good technique training in modern dance and classical ballet
- Evidence of academic ability as described in the Admission chapter of this bulletin

Candidates should complete the following admission procedures:

- Submit the dance application to the Ailey School by November 1 and the academic application to the Fordham University Office of Admission also by November 1. Applicants should apply for need- and merit-based financial assistance by February 1. Those applicants with questions may contact the Office of Undergraduate Admission at enroll@fordham.edu or 718-817-4000.
• Take the dance audition by invitation in New York or another city in January, February, or March.

While this program does not have a definitive age limit, B.F.A. students are expected to be of an appropriate age to be able to participate fully in all aspects of the program and accomplish the rigorous dance requirements for graduation within the established time frame. Students who wish to transfer into the B.F.A. program must satisfy the dance and academic criteria for advanced standing at both the Ailey School and Fordham University. The program’s four-year length of study may be shortened to three years in the case of very advanced dance students with strong previous undergraduate records.

Students with dance potential who do not meet the B.F.A. admission criteria are encouraged to audition for the Ailey School’s other professional training programs and to reapply to the B.F.A. program.

Requirements

Please note that each course number describes a course that runs for one semester, either fall or spring.

1 Specific information about core requirements can be found on the following pages: Composition II; Texts & Contexts; Faith & Critical Reason; Philosophy of Human Nature; Understanding Historical Change; Social Science; Philosophical Ethics; Sacred Texts and Traditions; Values Seminar

2 More information about the foreign language requirement can be found on the Fordham website. When referencing this page, please note that B.F.A. students must only complete two courses of a foreign language.

3 To view possible liberal arts courses, visit department pages (p. 1175).

Dance Technique and Creative Courses

In their first year, all students are required to take ballet and either Horton or modern daily. Thereafter, students are required to take ballet, Horton, and modern each semester, reaching the most advanced level in a minimum of two of these three major techniques during the senior year.

All men are required to take a minimum of four semesters of men’s ballet and one semester of modern partnering. All women are required to take a minimum of four semesters of pointe, and one semester of modern partnering. Ballet partnering is suggested for women who are advanced in ballet and strong on pointe and for men who are advanced in ballet.

Digital Media and Technology

A technology revolution is taking shape in New York City. Powerful tech giants such as Google and Facebook are joining thousands of tech startups in establishing a base in Manhattan, and existing industries such as media and communications are becoming more digital on a daily basis. These concentrations draw together relevant course offerings from business and liberal arts departments to give students an academic and practical grounding in this field.

Upon completing one of these concentrations, students will be well-positioned for careers in digital analytics, new media management and marketing, development of new digital services and mobile apps, project management, finance and operations, among others.

Technology drives our modern culture.

Many of the world’s largest tech companies make their home in New York City. You can, too.

The Gabelli School offers you the chance to study, live, and work within striking distance of Silicon Alley. Our program positions you for internships at companies from Google to The New York Times Digital to the Food Network.

We will teach you to:

- Develop mobile apps
- Manage social media
- Advance e-commerce
- Identify people’s online shopping patterns

In addition to your business coursework, you can take Fordham College classes in computer science (p. 131), visual arts (p. 601), communication and media studies (p. 114), and other departments to develop a portfolio of knowledge and skills unlike anyone else’s.

Programs

- Concentration in Digital Media and Technology (p. 1148)
- Concentration in Digital Media and Technology (Media Track) (p. 1148)
- Concentration in Digital Media and Technology (Technology Track) (p. 1149)

Concentration in Digital Media and Technology

Requirements

The Digital Media and Technology concentration can be pursued as a primary concentration by Gabelli students pursuing the Global Business major at Lincoln Center who are in the Class of 2023 and earlier.

Gabelli Rose Hill students, as well as Gabelli Lincoln Center students pursuing a primary concentration other than Digital Media and Technology, may pursue a secondary concentration in Digital Media and Technology.

Note: Information about the major (p. 1111) and minor (p. 1112) in Digital Technologies and Emerging Media (p. 1111) available to students at Fordham College (FCIH, FCLC, and PCS) is listed separately.

Primary Concentration

To complete a primary concentration in Digital Media and Technology, Lincoln Center students must take the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INSY 3432</td>
<td>Database Systems</td>
<td>3</td>
</tr>
<tr>
<td>INSY 4431</td>
<td>Web Analytics</td>
<td>3</td>
</tr>
<tr>
<td>INSY 4505</td>

<td>3</td>
</tr>
<tr>
<td>Information Systems Elective</td>
<td>3</td>
<td></td>
</tr>
<tr>
<td>Communication and Media Management Elective</td>
<td>3</td>
<td></td>
</tr>
</tbody>
</table>

1 Courses from the subject code INSY (p. 334) numbered 2302-4999 (of at least 1.5 credits) may fulfill this requirement.

2 Courses from the subject code CMBU numbered 2667-4999 (of at least 1.5 credits) may fulfill this requirement.

Secondary Concentration

To complete a secondary concentration in Digital Media and Technology, Rose Hill students must take the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>INSY 4431</td>
<td>Web Analytics</td>
<td>3</td>

</tr>
<tr>
<td>CMBU 4413</td>
<td>Digital Media &amp; Promo Comm</td>
<td></td>
</tr>
</tbody>
</table>

1 Any course from subject code INSY (p. 334) numbered 3000 or higher may fulfill this requirement.

Concentration in Digital Media and Technology (Media Track)

The digital media and technology concentration (media track) can be pursued as a primary concentration by Gabelli students completing the global business major at Lincoln Center.

Updated: 07-27-2020
Note: Information about the major (p. 1111) and minor (p. 1112) in digital technologies and emerging media (p. 1111) available to students at Fordham College (FCRH, FCLC, and PCS) is listed separately.

Primary Concentration
To complete a primary concentration in digital media and technology (media track), Lincoln Center students must take the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Required Courses</td>

Choose one of the following elective options:

- Two communication and media management electives
- One communication and media management elective and one information systems elective

1. Courses from the subject code CMBU numbered 2667-4999 (of at least 3 credits) may fulfill this requirement. A maximum of one of the following courses may also fulfill this requirement:
   - DTEM 2417 Data Visualization
   - NMDD 3020 Explorations in Digital Storytelling
   - NMDD 3150 Creative Coding

2. Courses from the subject code INSY (p. 334) numbered 2302-4999 (of at least 3 credits) may fulfill this requirement.

Concentration in Digital Media and Technology (Technology Track)
The digital media and technology concentration (technology track) can be pursued as a primary concentration by Gabelli students completing the global business major at Lincoln Center.

Note: Information about the major and minor in digital technologies and emerging media available to students at Fordham College is listed separately.

Primary Concentration
To complete a primary concentration in digital media and technology (technology track), Lincoln Center students must take the following courses:

</table>

One programming course from the following options:

- INSY 3433 Programming with Java
- INSY 3436 ST: Programming with Python
- INSY 3442 Web Apps Design and Development

Disability Studies
Disability studies is an academic disciplinary area offered as a field of study at numerous institutions in the country at the minor, major, masters, and certificate levels. Disability studies programs are encoded in the federal Classification of Industrial Programs (CIP 05.0210) taxonomy, and defined as follows (source):

A program that focuses on the nature, meaning, and consequences of what it is to be defined as disabled and explores the historical, cultural, economic, physiological, and socio-political dynamics of disability. Includes instruction in disability rights, legal issues, and public policy; literature, philosophy, and the arts; and/or research in the social sciences, education, and health sciences addressing social and experiential aspects of disability (source: NCES).

Programs
- Disability Studies Minor

Disability Studies Minor
Students in the minor will gain an interdisciplinary perspective through a series of required introductory and upper level courses. Additionally, disability studies minors will have valuable opportunities to participate in, and contribute to, the Fordham Faculty Working Group on Disability seminars, to attend distinguished lecture and other events (e.g. movie screenings, discussion panels) throughout the year, as well as to engage with the broader community of disability studies scholarship in New York City.

This minor may be of particular interest to those with professional goals in education, human rights, architecture, medicine and allied health, psychology, public policy, social work, and law, as well as to students interested in further academic study in disability studies.

Requirements
Six courses in disability studies are required for the minor.

ENGL/SOCI 4421 Disability, Literature, Culture: Neurological, Mental, and Cognitive Difference In Culture & Context

ENGL 4403 Extraordinary Bodies

ECON 3570 Labor Market and Diversity

ECON 4020 Disability: Economic and Other Approaches

DISA 4900 Independent Study

Select four electives in Disability Studies

1 Selected sections only.
2 Any course with the DISA attribute may count toward this requirement.

Economics

Economics draws upon history, political science, philosophy, and mathematics to analyze topics ranging from how firms, consumers, and governments make sound decisions to societal issues such as unemployment, discrimination, inflation, crime, and environmental decay. It is a challenging discipline which offers students a clear and concise way of thinking about the ordinary business of life and a preparation for a wide array of professional careers. Alumni surveys indicate that over 50 percent of the majors from Fordham College at Rose Hill continue their education at some point in their lives. Of these, 34 percent receive degrees in law and 30 percent complete an M.B.A. Others pursue an M.A. or a Ph.D. in economics, education, or public affairs.

Students majoring in economics can design a program of studies that will prepare them for graduate studies in economics, international affairs, public affairs, business, or law or for directly entering the labor force. Students who plan to work after graduation from Fordham College will find that many job recruiters are favorably impressed by students who have selected this challenging liberal arts discipline. Majors find careers in academics; corporate business, including retailing, financial and consulting services; and the public sector.

Accelerated Master’s Program

Please read the Graduate School of Arts and Sciences Accelerated Master’s Programs section of this bulletin for more information. Early admission to the M.A. Economics program is open to undergraduates who are majoring in economics, the Mathematics/Economics program or International Political Economy (IPE), and who have a cumulative GPA of 3.2 or better. Applicants must apply during their junior year of undergraduate study for the Economics M.A. program through the Graduate Admissions Office. The requirement of GRE scores is waived. Students who later wish to enter the Ph.D. program, however, must submit GRE scores at that time. Graduate financial aid is not available without GRE scores. This policy applies to FCRH, FCLC, and PCS, although LC students must take the graduate classes at Rose Hill.

During senior year, students will take two graduate courses that will satisfy two of the four undergraduate electives necessary for the undergraduate economics major, as well as two core courses for the Economics M.A. Graduate courses taken while still at the College must be approved by the director of graduate studies of the Department. The student will take ECON 5710 Mathematical Analysis in Economics in the fall semester and ECON 6910 Applied Econometrics in the spring semester of senior year. Please note that ECON 5710 Mathematical Analysis in Economics (a graduate class) does not substitute for ECON 5710 Mathematical Analysis in Economics (an undergraduate class) which is required for the undergraduate Economics major.

Economics majors interested in this Five Year Program should complete ECON 3154 Math for Economists by the second semester of junior year.

After completing the bachelor’s program, the student will take ECON 6010 Microeconomic Theory I and three graduate economics elective courses in the fall semester, and ECON 6020 Macroeconomic Theory I and three additional graduate economics elective courses in the spring semester.

The comprehensive examination, which is based primarily on ECON 6010 Microeconomic Theory I and ECON 6020 Macroeconomic Theory I, will be taken in June. Applications are made online through the Graduate School of Arts and Sciences website.

Program Activities

Honors in Economics

An economics major who maintains a cumulative grade point average of 3.2 and an index in economics of 3.3 or better may be invited to participate in the Honors Program in Economics. To receive Honors in Economics, a major must complete a research paper in economics. The research paper will normally be the outgrowth of a topic selected while taking a 3000-level elective in economics. The paper will usually be started during the second semester of junior year, but no later than the fall semester of senior year. It will be due during the tenth week of the student’s final undergraduate semester and must be approved by a committee of three members of the economics faculty. The student will receive a grade of pass when the paper is accepted; this will be noted on the student’s transcript as a one-credit course titled Honors Seminar in Economics. Graduation “with honors in economics” will appear on the student’s transcript.

College Fed Challenge

Students from the Economics Department participate in the annual College Fed Challenge, sponsored by the Federal Reserve Bank of New York and the Eastern Economic Association. During the competition, each team gives a 15 minute presentation, consisting of an analysis of current economic and financial conditions, a forecast of economic and financial conditions for the near-term, a discussion of risks to the economy of special concern to the Fed, and a monetary policy prescription, followed by a 15 minute question-and-answer session from the judges. We are proud to be one of the 25 participating teams.

Omicron Delta Epsilon

The Economics Department houses the Gamma Chapter of Omicron Delta Epsilon, the International Honor Society in Economics. Each spring, the Department honors its outstanding seniors (majors and minors) by induction into this prestigious society.

American Academy of Political and Social Science

The American Academy of Political and Social Science recognizes undergraduates who have an outstanding grasp of theories and methods, an enthusiasm for understanding social issues, and the promise of making contributions to the social sciences in the future. Our nominees for 2005 and 2006 were among 150 undergraduates from leading social science departments across the United States elected as Junior Fellows of the Academy.

Economics Society

The Department is the home of the active Economics Society, a student-organized-and-run club for anyone interested in economics. In the past, the society’s activities have included trips to the New York Stock Exchange and the Federal Reserve Bank; presentations by companies and individuals about internships and career paths; publication of a
Economics majors in Fordham College at Rose Hill and Fordham College at Lincoln Center must request permission to take a course in the major outside the College. Economics majors may count only one internship seminar course toward the 11-course requirement for the major in their senior year.

**Availability**

The minor in economics is available at Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC), and Fordham School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester (PCS).

**Fordham College at Rose Hill students:** The requirements above are in addition to those of the Core Curriculum.

**Fordham College at Lincoln Center students:** The requirements above are in addition to those of the Core Curriculum.

**Professional and Continuing Studies students:** The requirements above are in addition to those of the PCS Core Curriculum.

### Economics Minor

**Requirements**

The minor in economics consists of the following six courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1100</td>
<td>Basic Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1200</td>
<td>Basic Microeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 2140</td>
<td>Statistics I</td>
<td>4</td>
</tr>
<tr>
<td>ECON 2142</td>
<td>Statistical Decision Making</td>
<td>4</td>
</tr>
<tr>
<td>ECON 3154</td>
<td>Math for Economists</td>
<td>4</td>
</tr>
<tr>
<td>ECON 3116</td>
<td>Macroeconomic Analysis</td>
<td>4</td>
</tr>
<tr>
<td>ECON 3118</td>
<td>Microeconomic Theory</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Select three additional courses</td>
<td></td>
</tr>
</tbody>
</table>

1. Gabelli students minoring in Economics take ECON 2140 Statistics I as part of their core curriculum.
2. Any course with the ECON subject code (p. 188) numbered 3000 or higher may fulfill this requirement.

### Economics Major

Students majoring in economics can design a program of studies that will prepare them for graduate studies in economics, international affairs, public affairs, business, or law, or for directly entering the labor force.

Students who plan to work after graduation from Fordham College will find that many job recruiters are favorably impressed by students who have selected this challenging, liberal arts discipline.

Majors find careers in academics; corporate business, including retailing; financial and consulting services; and the public sector.

**Requirements**

Students majoring in economics must complete the following 11 courses in economics.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1100</td>
<td>Basic Macroeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 1200</td>
<td>Basic Microeconomics</td>
<td>3</td>
</tr>
<tr>
<td>ECON 2140</td>
<td>Statistics I</td>
<td>4</td>
</tr>
<tr>
<td>ECON 2142</td>
<td>Statistical Decision Making</td>
<td>4</td>
</tr>
<tr>
<td>ECON 3154</td>
<td>Math for Economists</td>
<td>4</td>
</tr>
<tr>
<td>ECON 3116</td>
<td>Macroeconomic Analysis</td>
<td>4</td>
</tr>
<tr>
<td>ECON 3118</td>
<td>Microeconomic Theory</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>Select three additional courses</td>
<td></td>
</tr>
</tbody>
</table>

1. ECON 1150 CB Honors Macroeconomics may be taken instead of this course.
2. ECON 3116 Macroeconomic Analysis and ECON 3118 Microeconomic Theory must be taken at Fordham.
3. Any course with the ECON subject code (p. 188) numbered 3000 or higher may fulfill this requirement.

### Programs

- Economics Major (p. 1151)
- Economics Minor (p. 1151)
- Mathematics/Economics Major (p. 1151)

**Contribution to the Core**

Economics offers ECON 1100 Basic Macroeconomics and ECON 1200 Basic Microeconomics which fulfill the introduction to the social science core requirement. Either one of the two introductory courses will satisfy the social science core requirement. Many of the department’s upper-level courses will satisfy one of the advanced disciplinary course requirement in social science. In addition, the department regularly offers courses that fulfill the American Pluralism, Global Studies and Value Seminar/EP4 core requirements.

**Visit the Economics department web page.**

For more information

- biweekly newsletter;
- résumé-building workshops. Each year, the Society hosts a Career Evening featuring a discussion by an alumni panel and socializing afterwards.
Program Activities
Majors in this program are eligible for honors at graduation in mathematics/economics. Some majors in this program have done internships at banks or investment firms. Such internships are not required and do not count among the four electives in the major.

For more information
Visit the Math and Economics Program page.

Requirements
Students enrolled in this program are required to take the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

</tbody>
</table>

Select one of the following:

- MATH 3006 Probability
- & MATH 3007 Statistics
- ECON 2140 Statistics I
- & ECON 2142 and Statistical Decision Making

Electives
Select four electives in mathematics or economics ¹

¹ Any course with the MATH subject code (numbered 2000 or higher) or the ECON subject code may fulfill this requirement. Of these four courses, at least one course must be in mathematics and one must be in economics.

Availability
The major in mathematics/economics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in mathematics/economics only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

English
The study of English is for anyone who wants to understand literature and all forms of texts and media. No discipline better prepares its students to understand diverse cultural forms, to craft persuasive arguments, and to write lucidly and beautifully. The range of electives and seminars that make up the bulk of the curriculum allows for flexibility in designing individual majors, while also giving students a comprehensive grasp of the varieties of literature and literary study.

In addition to the regular major, the English department offers a major with a creative writing concentration that emphasizes the interrelations among creative writing, digital media, criticism, and scholarship. As an integrated concentration in the English department with a dual focus on literature and creative work, the creative writing concentration combines literature courses, small writing workshops, and practical industry training to prepare students for advanced study or careers in writing, media, and publishing.

Both those majoring and minoring in English benefit from the resources provided by New York City, a worldwide center for literary activity and publishing.

Program Activities
Events
The Department of English organizes a variety of events, which include lectures and readings given by the Reid Family Writer of Color, the Writer-at-Risk in Residence, the Mary Higgins Clark Chair in Creative Writing, and participants in the Poets Out Loud Reading Series. They also include LitFest, the Golden Gloves Literary Competition, field trips, tea parties, and an informal professor/student book club.

Internships
We encourage students to take advantage of the many internship opportunities that New York City offers. English majors have held internships at magazines and newspapers, television companies, publishing houses, marketing firms, theaters, museums, law offices, advertising companies, fashion studios, technology startups, and political organizations. Credits received for internships count toward the total number of credits required for graduation but not toward requirements for the English major or minor.

Prizes and Scholarships
The department awards several creative and critical writing prizes to students. It also awards scholarships to majors who have demonstrated academic merit and financial need or plan to pursue graduate study in English or a related field.

Sigma Tau Delta, the International English Honor Society
Sigma Tau Delta is an International Honor Society for students of English. Founded in 1924, with approximately 9,000 members inducted annually, the society strives to confer distinction for high achievement in English language and literature in undergraduate, graduate, and professional studies; provide cultural stimulation on college campuses; promote interest in literature and the English language in surrounding communities; and serve society by fostering literacy. The Alpha Chi Omicron chapter of Sigma Tau Delta at Fordham was founded in 2017.
Honors Options

Departmental Honors

The department offers an honors thesis option in English for senior English majors with a 3.6 GPA or higher in English who wish to complete an ambitious project under the direction of a faculty member and graduate with departmental honors.

If you are interested, you should discuss this option with the associate chair and choose a member of the faculty as an adviser for the thesis prior to the semester in which the thesis will be completed. The associate chair will then authorize you to register for ENGL 4998 English Honors Thesis Tutorial, which counts as an elective toward the major. The professor sponsoring the project will set up parameters and deadlines at their discretion. You will write your thesis over the course of one semester, at the end of which there will be a defense of the thesis with the adviser and one departmental reader. That committee then evaluates whether the thesis defense qualifies you to graduate with departmental honors.

The English Major and the Fordham College at Lincoln Center Honors Program

For students in the Class of 2022 and earlier: Students in the Fordham College at Lincoln Center Honors Program fulfill the first-level core English requirements (ENGL 1102 Composition II and ENGL 2000 Texts and Contexts) by taking HPLC 1811 Honors: Writing Intensive and HPLC 1201 Honors: English. Additionally, those students who are writing a senior thesis under the supervision of an English faculty member register for ENGL 4998 English Honors Thesis Tutorial, which will count toward the major. Please see the associate chair to register for ENGL 4998 English Honors Thesis Tutorial. HPLC 4050 Honors: Senior Values Seminar also can count toward the major when it is taught by English or comparative literature faculty.

For students in the Class of 2023 and beyond: Students in the Fordham College at Lincoln Center Honors Program fulfill the first-level core English requirements (ENGL 1102 Composition II and ENGL 2000 Texts and Contexts) by taking HPLC 1811 Honors: Writing Intensive and HPLC 1201 Honors: English. ENGL 2000 counts toward the English major, and HPLC 1201 Honors: English counts toward the major for those Lincoln Center Honors Program students who major in English. Additionally, those students who are writing a senior thesis under the supervision of an English faculty member register for ENGL 4998 English Honors Thesis Tutorial, which will count toward the major. Please see the associate chair to register for ENGL 4998. HPLC 4050 Honors: Senior Values Seminar can also count toward the major when it is taught by English or comparative literature faculty.

The English Major and the Fordham College at Rose Hill Honors Program

For students in the Class of 2022 and earlier: Students in the Fordham College at Rose Hill Honors Program fulfill the first-level core English requirements (ENGL 1102 Composition II and ENGL 2000 Texts and Contexts) by taking HPRH 1001 (Ancient Literature). Rose Hill Honors Program students who major in English may count two Honors Program courses toward the major: HPRH 1051 (Medieval Literature and Art) counts as one of the required Historical Distribution courses, and HPRH 2051 counts as a regular elective for the major. Additionally, those students who write a senior thesis under the supervision of an English faculty member register for ENGL 4998 English Honors Thesis Tutorial, which will count toward the major and fulfill the Honors Program requirement HPRH 4001 Senior Thesis. Please see the associate chair to register for ENGL 4998, and also inform the director of the Honors Program after you have registered so that it can count for HPRH 4001.

For students in the Class of 2023 and beyond: Students in the Fordham College at Rose Hill Honors Program fulfill the first-level core English requirements (ENGL 1102 Composition II and ENGL 2000 Texts and Contexts) by taking HPRH 1102 Foundational Texts: Theology/Classics, ENGL 2000 Texts and Contexts counts for the English major, and HPRH 1102 Foundational Texts: Theology/Classics counts for the major for those Fordham College at Rose Hill Honors Program students who major in English. Moreover, Fordham College at Rose Hill Honors Program students who major in English may count two additional Honors Program courses toward the major: HPRH 1202 Foundational Texts: Literature counts as one of the required Historical Distribution courses, and HPRH 3101 counts either as a regular elective for the major or as one of the required Historical Distribution courses, depending on the focus of the course. Those students who write a senior thesis under the supervision of an English faculty member also register for ENGL 4998 English Honors Thesis Tutorial, which will count toward the major and fulfill the Honors Program requirement HPRH 4101 Senior Thesis Seminar. Please see the associate chair to register for ENGL 4998, and also inform the director of the Honors Program after you have registered so that it can count for HPRH 4101.

The English Minor and the Fordham College at Rose Hill Honors Program

For students in the Class of 2022 and earlier: Students in the Fordham College at Rose Hill Honors Program may count HPRH 1051 (Medieval Literature and Art) towards the minor.

For students in the Class of 2023 and beyond: Students in the Fordham College at Rose Hill Honors Program may count HPRH 1102 Foundational Texts: Theology/Classics towards the minor as fulfilling the Texts & Contexts requirement.

The English Minor and the Fordham College at Lincoln Center Honors Program

For students in the Class of 2023 and beyond: Students in the Fordham College at Lincoln Center Honors Program may count HPLC 1201 Honors: English towards the minor.

Early Admission to the Master’s Program in English

Please read the Early Admission to Graduate School of Arts and Sciences Master’s Programs section, which is located under the Special Academic Programs header in the Academic Programs, Policies, and Procedures chapter of this bulletin. The English director of graduate studies, in consultation with the associate chairs, invites select second-semester juniors to apply for early admission to the M.A. program. Students must formally indicate their desire to opt for early admission into the M.A. program and submit a two-page statement of purpose by March 15. Applications do not need to include GRE scores unless the student is planning to apply for financial aid after completing their bachelor's degree. In order to qualify for invitation, students must have a minimum 3.2 overall GPA, at least a 3.5 average GPA in their English courses, and the recommendation of two English faculty members.

This policy applies to FCRH, FCLC, and PCS. Three graduate courses can double count toward the student's undergraduate and graduate degrees, fulfilling both undergraduate English major and master's-level requirements. Graduate courses taken while the student is still an...
undergraduate must be approved by the director of graduate studies. Seniors take a total of three 5000-level graduate courses during their final two undergraduate semesters. After completing the B.A. in senior year, students then take three 5000- or 6000-level graduate courses in the fall and three in the spring. Students also must complete a capstone project and demonstrate reading knowledge of one foreign language to graduate. Applications are made online through the Graduate School of Arts and Sciences website.

For More Information
Visit the English department web page.

Contribution to the Core
The English department offers ENGL 1102 Composition II, which fulfills the core curriculum requirement in composition and rhetoric. Students who do not place into ENGL 1102 upon admission are required to take ENGL 1101 Composition I, in which they must receive a grade of C or better before they are allowed to advance to ENGL 1102.

The department also offers ENGL 2000 Texts and Contexts, which fulfills the core requirement in English literature and counts toward the distributive requirement in Eloquentia Perfecta 2. All students are required to take Composition II and Texts and Contexts/Eloquentia Perfecta 2.

Unless otherwise specified, non-majors may take the department’s elective (major) offerings toward the core requirement in Advanced Disciplinary Courses in Literature. In addition, the Department of English offers various courses that fulfill core requirements in American Pluralism, Global Studies, Eloquentia Perfecta (EP) 3 and 4, Interdisciplinary Capstone (ICC), and Values.

Programs
Majors
- English Major (p. 1155)
- English Major with a Creative Writing Concentration (p. 1156)

Minors
- Creative Writing Minor (p. 1154)
- English Minor (p. 1158)

Creative Writing Minor
Requirements
The minor in creative writing consists of six courses. Four courses must be in creative writing (courses with the attribute code CVW), and the remaining two courses must be in literature: ENGL courses at the 3000 or 4000 level or courses offered in other departments with the attribute code ENGL.

Requirements for English Majors
In order to minor in creative writing, students majoring in English must take four creative writing courses total (courses with the CVW attribute). They must also take two literature courses beyond those already required for the major (literature courses are ENGL courses at the 3000 or 4000 level or courses offered in other departments with the attribute code ENGL). Because two of the four creative writing courses can double count as electives for the major, however, majors only need to complete four additional courses beyond those already required for the major. In other words, students completing the English major plus creative writing minor will end up taking fourteen courses total, including four creative writing courses:

<td></td>
<td></td>
</tr>
</tbody>
</table>

Additional Information
1. Courses in which a student receives a grade of D or F will not count toward the minor.
2. Up to one cognate course taken in other departments or programs deemed relevant to the minor may be counted with permission of the associate chair.
3. Up to one course taken while studying abroad deemed relevant to the minor may be counted.
4. For students who transfer from another school to Fordham, the department will consider counting up to one course taken prior to arrival at Fordham toward the minor.
5. Credits earned for internships do not count for credit toward the minor. Internship credits do count for general credits toward graduation. In order to receive academic credit for an internship, you must have completed 60 academic credits, have a minimum 3.0 GPA, and register for a tutorial with a faculty member who agrees to serve as your academic adviser. Depending on the amount of academic work involved in the tutorial, your faculty mentor will suggest that you register for a one- or two-credit tutorial. Internships are graded on a Pass/Fail basis.
6. Advanced Placement credits in English Literature and in English Language count toward a student's total number of credits in the college but not within the minor. A score of 4 or 5 in AP English Literature will count toward college elective credits.
7. Students may count no more than one course from the following to their Creative Writing Minor: FITV 2511 Screenwriting I, JOUR 3723 Interviews and Profiles, JOUR 3727 Writing for Magazines, THEA 3700 Playwriting.
8. Courses taken on a Pass/Fail basis cannot be counted towards Creative Writing minor requirements.
Availability
The minor in creative writing is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and the Fordham School of Professional Studies at Rose Hill, Lincoln Center, and Westchester.

English Major
The goals of the English major are to develop:

- an ability to write clear, coherent, organized, and persuasive prose
- an ability to read closely and interpret literary and other cultural texts (including poetry, fiction, and drama)
- an ability to connect the analysis of texts to appropriate historical and other contexts
- a knowledge of literary genres and appropriate use of critical terminology
- a knowledge of literary theory and its relevance to literary analysis
- an awareness of different periods of literary history, from the medieval period to the contemporary
- an awareness that there are a variety of critical approaches to literary and cultural texts
- an awareness of the range of perspectives and aesthetic traditions within English literature, including ones previously considered marginal to the canon

Requirements
The English major consists of a total of ten required courses:

Eight electives, including

Three Historical Distribution courses
- One Race and Social Justice course
- One Departmental Seminar course
- Three additional electives
- Up to two electives may be Creative Writing courses

1 A list of courses fulfilling the Texts and Contexts requirement can be seen on the core curriculum page. Texts and Contexts courses have the TC attribute.

2 Any course numbered above 3000 with the ENGL subject code or the ENGL attribute code counts as an elective. Students may count no more than one course from the following towards the major: FITV 2511 Screenwriting I, JOUR 3723 Interviews and Profiles, JOUR 3727 Writing for Magazines, JOUR 3783 Theater Journalism.

3 Because some electives will double or triple count as Historical Distribution courses, Race and Social Justice courses, and/or Departmental Seminar courses, majors may end up being able to take more than three additional electives.

Requirements in Detail/Supplementary Information

Grades
Courses in which a student receives a grade of D or F will not count toward the major.

The English Major and the Core Curriculum
English majors from the Class of 2022 and earlier are required to fulfill the first-level core English requirements (ENGL 1102 and ENGL 2000) before beginning the major; neither ENGL 1102 nor ENGL 2000 counts toward the major for those in the Class of 2022 and earlier. English majors from the Class of 2023 and beyond, however, can count ENGL 2000 toward the major. Additionally, majors from all classes may count English electives taken to meet the following core requirements toward the major: Advanced Literature Core, ICC, EP3, Values/EP4, American Pluralism, and Global Studies.

Literary Theories Requirement
All majors are required to take Literary Theories (ENGL 3000 or COLI 3000). This course is usually taken during a student’s junior year, but sophomores may also enroll. Literary Theories introduces students to debates in literary and critical theory. The goal of these courses is to reflect on reading strategies, textual practices, and language itself. Students will engage with a range of critical, theoretical, and social issues shaping the field of literary studies today.

Historical Distribution Requirement
At least three of the courses that students take for the major must cover literature from a historical period before 1850. The goal of the Historical Distribution requirement is to encourage students to learn about a diverse range of historical periods and literary forms. The department suggests that students consult regularly with their advisers to ensure that their Historical Distribution course choices are covering a wide variety of literatures written before 1850. Historical Distribution courses have the ENHD attribute code and are included in departmental course listings.

Updated: 07-27-2020
Race and Social Justice Requirement

English majors in the Class of 2023 and beyond are required to take one course with the Race and Social Justice designation. These courses will introduce students to literatures from minority, ethnic, diasporic, postcolonial, colonial, and/or global traditions. They also aim to examine issues of race through the lenses of ethics, social justice, respect for human dignity, and the sustainability of the world in which we live. These courses have the ENRJ attribute code and are included in departmental course listings.

Departmental Seminar Requirement

English majors in the Class of 2023 and beyond are required to take one 4000-level departmental seminar. These seminars can be taken in a student's junior or senior year. Departmental seminars are capped at 15 students each and will provide students with a chance to delve deeply into the study of a particular subject. As part of the seminar, students will also work closely with their instructor to complete a final research project or comparable assignment that allows them to develop their skills as thinkers and writers. These courses have the CVW attribute code and are included in departmental course listings.

Creative Writing Courses

English majors may apply up to two creative writing courses toward their elective requirements. Majors who wish to take additional creative writing courses should consider the creative writing minor (p. 1154) or the English major with a creative writing concentration (p. 1156). These courses have the CVW attribute code and are included in departmental course listings.

Additional Information

1. English majors will receive credit toward the major for certain courses offered by other departments and programs if they carry an ENGL attribute or an ENGL course number. Up to two additional cognate courses in other departments or programs that are deemed relevant to the major may be counted with permission of the associate chair. A list of courses offered in other areas are listed in the Bulletin.
2. Up to two courses may be double counted between major and major. That is, each of the two courses may be counted for both an English major and another, related major. Only one course may be double counted between major and minor.
3. Up to two courses taken abroad with content clearly related to literary study may be considered for credit toward the major.
4. For students who transfer from another school to Fordham, the department will consider counting up to two courses taken prior to arrival at Fordham toward the major.
5. Credits earned for internships do not count for credit toward the English major. Internship credits do count for general credits toward graduation. In order to receive academic credit for an internship, you must have completed 60 academic credits, have a minimum 3.0 GPA, and register for a tutorial with a faculty member who agrees to serve as your academic adviser. Depending on the amount of academic work involved in the tutorial, your faculty mentor will suggest that you register for a one- or two-credit tutorial. Internships are graded on a Pass/Fail basis.
6. Advanced Placement credits in English Literature and in English Language count toward a student's total number of credits in the college but not within the major. A score of 4 or 5 in AP English Literature will count toward college elective credits.
7. Courses taken on a Pass/Fail basis cannot be counted towards English major requirements.

Availability

The major in English is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and the Fordham School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

English Major with a Creative Writing Concentration

Premised on the belief that the study of literature and the practice of writing are mutually reinforcing, the English major with a creative writing concentration emphasizes the interrelations among creative writing, digital media, criticism, and scholarship. As an integrated concentration in the English department with a dual focus on literature and creative work, the creative writing concentration combines literature courses, small writing workshops, and practical industry training to prepare students for advanced study or careers in writing, media, and publishing. In addition, our concentrators benefit from the resources provided by New York City, a worldwide center for literary publishing.

Admissions

Students can apply for admission to this major in the fall semester of their sophomore year or junior year. Applicants will submit a cover letter and a 10 page writing sample of poetry or prose, to be reviewed by a panel of creative writing faculty. To access the online application go to http://bit.ly/fordhamcwmajor.

Requirements

The English major with a Creative Writing concentration consists of a total of eleven required courses:

</tbody>
</table>

¹ A list of courses fulfilling the Texts and Contexts requirement can be seen on the core curriculum page. Texts and Contexts courses have the TC attribute.

² Creative Writing electives are courses with the CVW attribute.

³ Literature electives are ENGL courses at the 3000 and 4000 level or courses offered in other departments with the attribute code ENGL.

⁴ Because some Literature electives will double count as both Historical Distribution and Race and Social Justice courses, concentrators may end up being able to take more than one additional Literature elective course.

Requirements in Detail/Supplementary Information

Grades

Courses in which a student receives a grade of D or F will not count toward the concentration. Courses taken on a Pass/Fail basis cannot be counted towards the English Major with Creative Writing Concentration requirements.

Literary Theories Requirement

All concentrators are required to take Literary Theories (ENGL 3000 or COLI 3000). This course is usually taken during a student’s junior year, but sophomores may also enroll. Literary Theories introduces students to debates in literary and critical theory. The goal of these courses is to reflect on reading strategies, textual practices, and language itself. Students will engage with a range of critical, theoretical, and social issues shaping the field of literary studies today.

Creative Writing Requirement

Four courses that have been designated by the English department as Creative Writing courses are required for the concentration. These courses have the CVW attribute code and are included in departmental course listings. Advanced students may, with permission, also take graduate-level creative writing courses. These courses have the CVWG attribute code and are included in departmental course listings.

Historical Distribution Requirement

At least two of the courses that students take for the concentration must cover literature from a historical period before 1850. The goal of the Historical Distribution requirement is to encourage students to learn about a diverse range of historical periods and literary forms. Historical Distribution courses have the ENHD attribute code and are included in departmental course listings.

Race and Social Justice Requirement

Concentrators in the class of 2023 and beyond are required to take one course with the Race and Social Justice designation. These courses will introduce students to literatures from minority, ethnic, diasporic, postcolonial, colonial, and/or global traditions. They also aim to examine issues of race through the lenses of ethics, social justice, respect for human dignity, and the sustainability of the world in which we live. These courses have the ENRJ attribute code and are included in departmental course listings.

Creative Writing Capstone Requirement

ENGL 4705 Creative Writing Capstone will introduce graduating students to the realities of the writer's life, which necessarily involves not just individual work but also affiliation, cooperation, and community. In the capstone course, students will create and revise portfolios that comprise their creative, scholarly, and extracurricular work during their four years at Fordham. Additionally, students will work collaboratively to put together a public exhibition of a creative writing project.

Additional Information

1. Concentrators will receive credit toward the concentration for certain courses offered by other departments and programs if they carry an ENGL attribute or an ENGL course number. Up to two additional cognate courses in other departments or programs that are deemed relevant to the major may be counted with permission of the associate chair. Relevant courses offered in other areas are listed in the Bulletin.

2. Up to two courses may be double counted between concentration and major. That is, each of the two courses may be counted for both the concentration and another, related major. Only one course may be double counted between concentration and minor.

3. Up to two courses taken abroad with content deemed relevant to the concentration may be considered for credit toward the concentration.
4. For students who transfer from another school to Fordham, the department will consider counting up to two courses taken prior to arrival at Fordham toward the concentration.

5. Credits earned for internships do not count for credit toward the concentration. Internship credits do count for general credits toward graduation. In order to receive academic credit for an internship, you must have completed 60 academic credits, have a minimum 3.0 GPA, and register for a tutorial with a faculty member who agrees to serve as your academic adviser. Depending on the amount of academic work involved in the tutorial, your faculty mentor will suggest that you register for a one- or two-credit tutorial. Internships are graded on a Pass/Fail basis.

6. Advanced Placement credits in English Literature and in English Language count toward a student’s total number of credits in the college but not within the concentration. A score of 4 or 5 in AP English Literature will count toward college elective credits.

**Availability**

The major in English with a creative writing concentration is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and the Fordham School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

**Fordham College at Rose Hill students:** The requirements above are in addition to those of the Core Curriculum.

**Fordham College at Lincoln Center students:** The requirements above are in addition to those of the Core Curriculum.

**Professional and Continuing Studies students:** The requirements above are in addition to those of the PCS Core Curriculum.

**English Minor Requirements**

**For students in the Class of 2022 and earlier:** The minor in English consists of any six English courses beyond the first-level core English requirements (ENGL 1102 and ENGL 2000).

At least four courses must be literature courses (rather than creative writing courses) that carry an ENGL course number or an ENGL attribute. A maximum of two creative writing courses (courses with the attribute code CVW) may be applied toward the minor.

**For students in the Class of 2023 and beyond:** The minor in English consists of the core requirement ENGL 2000 and any five additional English courses (excluding ENGL 1102).

At least three courses must be literature courses (rather than creative writing courses) that carry an ENGL course number or an ENGL attribute. A maximum of two creative writing courses (courses with the attribute code CVW) may be applied toward the minor.

**Additional Information**

1. Courses in which a student receives a grade of D or F will not count toward the minor.

2. Up to one cognate course taken in other departments or programs deemed relevant to the minor may be counted with permission of the associate chair.

3. Up to one course taken while studying abroad deemed relevant to the minor may be counted.

4. For students who transfer from another school to Fordham, the department will consider counting up to one course taken prior to arrival at Fordham toward the minor.

5. Credits earned for internships do not count for credit toward the minor. Internship credits do count for general credits toward graduation. In order to receive academic credit for an internship, you must have completed 60 academic credits, have a minimum 3.0 GPA, and register for a tutorial with a faculty member who agrees to serve as your academic adviser. Depending on the amount of academic work involved in the tutorial, your faculty mentor will suggest that you register for a one- or two-credit tutorial. Internships are graded on a Pass/Fail basis.

6. Advanced Placement credits in English Literature and in English Language count toward a student’s total number of credits in the college but not within the minor. A score of 4 or 5 in AP English Literature will count toward college elective credits.

7. Students may count no more than one course from the following towards the minor: FITV 2511 Screenwriting I, JOUR 3723 Interviews and Profiles, JOUR 3727 Writing for Magazines, JOUR 3783 Theater Journalism.

8. Courses taken on a Pass/Fail basis cannot be counted towards English minor requirements.

**Availability**

The minor in English is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional Studies at Rose Hill, Lincoln Center, and Westchester.

**Environmental Science**

Environmental science is an interdisciplinary major offered on the Rose Hill and Lincoln Center campuses. Students who complete the requirements of this program will graduate with a B.S. degree in environmental science. A minimum grade of C- is required in all courses taken to fulfill the major.

The environmental science major provides students with a solid foundation in scientific principles and analysis, focusing on applications to the environment. The major emphasizes a rigorous curriculum, using an integrated approach that combines concepts and methods across the fields of biology, chemistry, physics, mathematics, and environmental science. Research and training opportunities exist within each of the contributing departments, the Louis Calder Center, and at major collaborative scientific institutions in the New York City area. Following a solid scientific grounding in the first two years, upper-level students choose science elective courses that allow them to tailor their interests toward an emphasis on a life or chemical sciences approach and complete an independent science research project on an environmental topic or an internship at an environmental firm or government agency.

Students majoring in environmental science may not double major in biology, chemistry, general science, or natural science. Students majoring in environmental science may choose any available minor at Fordham provided that they fulfill the requirements stipulated by the department or program offering the minor and have approval from the dean's office.

One the following options (plus all accompanying labs):

**Rose Hill:**
- BISC 1403 Introductory Biology I
- BISC 1404 Introductory Biology II
- BISC 2561 Ecology
- CHEM 1321 General Chemistry I
- CHEM 1322 General Chemistry II
- CHEM 2521 Organic Chemistry I
- PHYS 1501 General Physics I

**Lincoln Center:**
- NSCI 1403 General Biology Lecture I
- NSCI 1404 General Biology Lecture II
- NSCI 2010 Global Ecology Lecture
- NSCI 1321 General Chemistry Lecture I
- NSCI 1322 General Chemistry Lecture II
- NSCI 3121 Organic Chemistry Lecture I
- NSCI 1501 General Physics Lecture I

One of the following: 3 to 4
- MATH 1203 Applied Calculus I
- MATH 1206 Calculus I
& MATH 1207 and Calculus II

One of the following: 3 to 4
- MATH 1205 Applied Statistics
- MATH 1700 Mathematical Modelling

Four advanced Environmental Science Elective courses, below

Two Environmental Policy/Law/Economics courses, below 7 to 8
Two semesters of Research or Internship 8

ENVS 4401 Environmental Science Internship
ENVS 4501 Advanced Environmental Science Research

Students should take two semesters of Research or two semesters of Internship; they may take one of each with the permission of the program director.

Advanced Environmental Science Elective courses

The four advanced Environmental Science elective courses to complete the major are listed below. The list includes only the lecture course code for each of the required courses. Students should must also complete the lab co-requisite for courses that have one (e.g., BISC 2539 General Genetics, BISC 3643 Microbiology, CHEM 2522 Organic Chemistry II, CHEM 3622 Physical Chemistry II, NSCI 2142 Paleocology Lecture, NSCI 3122 Organic Chemistry Lecture II, NSCI 4143 Advanced Microbiology Lecture).

Students who plan to enroll in a graduate science program are strongly encouraged to complete Organic Chemistry II (CHEM 2522 / NSCI 3122) with the appropriate lab as one of their science electives.

Courses with the code BISC or CHEM are offered at the Rose Hill campus, while courses with the code NSCI are offered at the Lincoln Center campus. Students may not receive credit for taking equivalent/mutually exclusive courses on each campus.

Courses in this group have the ENSE attribute.

Availability

The major in environmental science is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in environmental science only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

*Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.*
**Environmental Studies**

Who speaks for Earth and addresses the world’s big environmental challenges? With a degree in environmental studies at Fordham, you can.

You’ll tackle the most pressing issues of our times: Climate change. Habitat loss. Mass species extinction. Natural capital degradation. Environmental health. Environmental justice. Building sustainable societies.

**Study both science and the humanities with a focus on policy solutions**

You’ll complete interdisciplinary coursework in the natural sciences, social sciences, and humanities to gain insight into the physical and societal causes and effects of environmental problems, integrating these disciplines in economic, political, and societal policy solutions.

**Choose your major concentration and career track**

Major concentrations and tracks, such as conservation biology, pre-health, environmental law, sustainable business, sustainable architecture and urban planning, environmental journalism, and sustainable agriculture, are developed through course electives, internships, study abroad, senior thesis research, and our Alumni Career Advisory Board, allowing you to graduate with a clear academic profile and strong professional resume.

**Access world-class Fordham and NYC resources facilities**

Resources and facilities include the following:

- Fordham’s Louis Calder Center Biological Field Station
- St. Rose’s Garden (campus urban agriculture garden)
- The Campus Sustainability Program
- University partnerships with the New York Botanical Garden, the Wildlife Conservation Society/Bronx Zoo, and the Bronx River Alliance (Department of Parks)
- Read more about resources and facilities here.

**Study around the globe**

Study abroad courses and fieldwork can take you to Denmark, South Vietnam, Australia, Africa, and elsewhere, giving you invaluable international experience. They can also count toward the environmental studies major or minor (up to four courses).

**Practice in professional internships what you’re studying in courses**

You’ll start practicing what you’re studying now by taking advantage of internship opportunities in New York City, abroad, and in our special Bronx River Stewardship and Internship Program, incorporating professional experience into your coursework, employment resume, and graduate-school application.

**Pursue your own original research**

Your research in courses, study abroad, and internships culminates in the senior research thesis. You’ll spend a semester or entire year on an original research project under the guidance of faculty members, and publish your research in an online journal.

**Participate in a close-knit community of learners**

Environmental clubs at Rose Hill and Lincoln Center sponsored by our program allow you to participate in a close-knit community of learners beyond the classroom and pursue activities such as campus ecology projects, invited speakers, career fairs, and field trips.

**Environmental citizenship and mission**

You’ll serve the mission of Fordham and our program: to respect the environment, serve the greater good, and be an exemplary environmental citizen and leader.

For more information

Visit the Environmental Studies program webpage.

**Programs**

- Environmental Studies Major (p. 1160)
- Environmental Studies Minor (p. 1162)

**Environmental Studies Major Requirements**

The major requires 12 courses, up to eight of which may also count toward the core curriculum through appropriate course selection.

**Summary of requirements**

**First Year Introductory Course**

This course provides an overview of environmental problems and their societal causes and effects from natural science, social science, and humanities perspectives, and introduces students to interdisciplinary methods of integrating these disciplines in policy solutions to environmental problems.

1. One course in introductory environmental studies.

<table>
<thead>
<tr>

**First Year/Sophomore Natural Science Courses**

The following natural science courses provide foundational knowledge of physics, chemistry, and biology. Additional natural science courses can be taken by choosing a concentration in conservation biology and minorin in biological sciences (see the major concentrations and career tracks page on the program website). If you have relevant AP courses with a score of at least 4, these courses might count toward the following requirements.

2-4. Three of the following natural science courses, at least one of which should be a physical science and one a life science.

Note that some courses have prerequisites that must be completed. Among science courses, courses with the NSCI (Natural Sciences) and HPLC (Honors Program Lincoln Center) subject codes are offered at the Lincoln Center campus while courses with the PHYS (Physics), CHEM (Chemistry), BISC (Biological Sciences), and HPRH (Honors Program Rose Hill) subject codes are offered at Rose Hill campus.

BISC 1002 Ecology. A Human Approach, CHEM 1109 Chemistry of the Environment, PHYS 1203 Environmental Physics, NSCI 1020 Physical Science: Today’s World, NSCI 1040 People and the Living Environment and NSCI 2010 Global Ecology Lecture are recommended, but any course listed below may apply to this requirement.

Courses in this group have the ESNS attribute.

11. One course in research and statistical methods.
ENST 3000 Environmental Research Methods was formerly ENST 2000. This course allows students to start work early on the required senior thesis and prepare for Senior Thesis.

Senior Thesis Capstone

12. Senior Thesis

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENST 4000</td>
<td>Senior Thesis</td>
<td>4</td>
</tr>
</tbody>
</table>

This course allows students to concentrate on a particular area of environmental studies in preparation for employment or graduate school and is offered every spring semester at Rose Hill. It requires a 40-page research thesis with possible inclusion of an internship as a case study. It can be used to fulfill the senior thesis capstone requirement only when taken in the senior year, i.e., in one of the student’s last two semesters. The preparatory course ENST 3000 Environmental Research Methods, or other appropriate research methods course, should be taken prior to the thesis course so that students can begin working on their thesis early.

Availability

The major in environmental studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in environmental studies only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Environmental Studies Minor Requirements

The minor requires six courses, many of which may also count toward the Core Curriculum through appropriate course selection.

Updated: 07-27-2020
Fashion Studies

Is there a better place to study fashion than New York City?

New York City is home to a variety of schools that offer various forms of fashion education. Fordham is unique in that it offers fashion studies in the context of a traditional, four-year, undergraduate, liberal arts college.

We believe that this the ideal context in which to prepare students to enter the fashion industry. It provides them with a broad understanding of the many ways in which fashion functions in the world today: culturally, sociologically, politically, psychologically, and economically.

Like so many other fields, the fashion industry is in a time of transformation. Growth in emerging markets, the rise of new media and social networks, and increasing pressure to develop merchandise that is produced and marketed ethically and sustainably are among the various challenges impacting the world of fashion today. Fordham’s fashion studies minor is designed to empower young people to meet these challenges with the intelligence, innovation, and humanity necessary to bring about positive change in the industry.

Complementary Majors
The fashion studies minor pairs well with many of Fordham’s majors, preparing students to engage with their preferred facet of the industry.

Cultural Majors
Culturally based majors can use their study of fashion to bolster their understandings of different demographics, making them well suited to consumer insights; trend forecasting; marketing; public relations; and working in a museum, archive, or university. (These majors include communication and culture; anthropology; sociology; psychology; women, gender, and sexuality studies; African & African American studies; Latin American and Latino studies; history; art history; medieval studies; and modern languages.)

Creative Majors
Students studying the visual arts may choose to focus their artistic energy on fashion or textile design, fashion photography, illustration, or styling. Those more inclined toward the written word (such as English, creative writing, journalism, or comparative literature majors) might consider fashion journalism, creative direction, or various types of content creation. Theatre, dance, film and television, and music majors may expand their performance knowledge to fields such as costume design, wardrobe supervision, fashion show production, makeup artistry, or modeling.

Business Majors and Pre-Law Students
Fashion is big business. In fact, the industry is valued at more than $2.5 trillion dollars! It’s easy to see why business students (such as those studying accounting, finance, business administration, marketing, or global business) may consider becoming a marketing executive, merchandiser, buyer, CEO, CFO, or accountant of a fashion company. Political science and economics majors as well as pre-law students might consider representing a fashion brand or company, or more specifically preparing for the growing field of fashion law (the Fashion Law Institute is headquartered at Fordham Law School!).

STEM Majors
Two of the biggest topics in fashion are sustainability and the role of technology. Environmental science and environmental studies students will be well prepared to contribute to the development of sustainable fashion, as will chemistry majors who may be interested in creating synthetic textiles or pursuing textile conservation. Computer science and digital technology and emerging media majors might focus on web and app design for a designer or label, or they might innovate new technology for creating or merchandising fashion.

Programs
• Fashion Studies Minor (p. 1164)

Fashion Studies Minor

Requirements

The Fashion Studies minor is an interdisciplinary minor, weaving together business, creativity, and social theory.

Students must take six courses: three required introductory courses and three electives, depending upon their specific area of interest.

Course Title Credits
ANTH 1500 Introduction to Fashion and Culture 4
THEA 1210 Introduction to Fashion Design 3
MKBU 3436 ST: The Business of Fashion 3

Three fashion studies electives 1

1 Any course of three or more credits with the subject code FASH (p. 240) may fulfill this requirement, as may any course with the attribute FASH (see list below).

Fashion Studies electives

Courses in this group have the FASH attribute.

Course Title Credits
ANTH 1500 Introduction to Fashion and Culture 4
ARHI 2620 Introduction to Fashion History 4
COMC 2221 Fashion as Communication: Syntax of Style 4
COMC 3174 Public Relations 4
DTEM 2443 Fashion and Digital Media 4
FITV 2533 Fashion Costuming in Film 4
FITV 3534 Fashion in British Film and Television 4
FREN 3253 Moliere: From Page to Stage 4
JOUR 2787 Fashion Journalism 4
JOUR 3727 Writing for Magazines 4
JOUR 4767 History of Women’s Magazines 4

Updated: 07-27-2020
Finance and Business Economics

Located in New York City, the world’s financial capital, the Gabelli School of Business prepares students for a wide range of careers within the financial services industry. Students may choose from three broad career orientations in the field of finance to focus their academic pursuits: corporate finance, investment management, and financial institutions.

- Corporate finance courses are appropriate for students interested in the investment and financing decisions of business firms and nonprofit organizations. They emphasize the development of analytical techniques and an understanding of how the economic environment influences day-to-day and long-term financial decisions.
- Investment management is intended for students primarily interested in the evaluation of securities and the management of portfolios. Here, the focus is on the relationship between the economic environment and the valuation of securities.
- The financial institutions program is offered in cooperation with the economics department and is intended to serve commercial banks, insurance companies, and other financial institutions not generally covered under corporate finance and investment management.

Students who want to include finance as a component of their degree have multiple options, each of which offers a specific level of depth and structure. Finance may be studied as a major, a primary concentration, or a secondary concentration. The finance area also houses additional areas of concentration that represent growing niche areas within the financial field.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

Visit the Finance Area web page.

Programs

Majors

- Applied Accounting and Finance Major (p. 1165)
- Finance Major (p. 1167)

Primary and/or secondary concentrations:

- Concentration in Alternative Investments (p. 1166)
- Concentration in Finance (p. 1166)
- Concentration in Fintech (p. 1166)
- Concentration in Global Finance and Business Economics (p. 1167)
- Concentration in Value Investing (p. 1167)

Applied Accounting and Finance Major

Requirements

The requirements for the Applied Accounting and Finance Major are as follows:

<table>

Concentration in Alternative Investments

The alternative investments sub-area of finance covers topics such as private equity, venture capital, hard assets, commodities, real estate investment management, and hedge fund investing. These are growth fields with significant hiring potential.

For more information
Visit the Alternative Investment program web page.

Requirements
Alternative investments can be pursued by Gabelli students as a secondary concentration only.

The secondary concentration in alternative investments can be completed by taking any three courses related to alternative investing. All secondary concentration students are eligible to apply for inclusion in the alternative investment program resume book and are encouraged to participate in club programs, skill set training and networking events during the semester.

Course | Title | Credits
---|---|---
FNBU 3447 | Real Estate Finance | 3
FNBU 4448 | ST: Private Equity | 3
FNBU 4455 | ST: Hedge Funds \(^1\) | 3
FNBU 4456 | Special Topic: Venture Capital | 3
FNBU 4466 | ST: Alternative Investing \(^1\) | 3

\(^1\) FNBU 3441 Investments & Security Anlys is a prerequisite for FNBU 4455 ST: Hedge Funds and FNBU 4466 ST: Alternative Investing.

Concentration in Finance

Requirements
All Gabelli students except Lincoln Center students concentrating in Global Finance and Business Economics may concentrate in Finance as either a primary concentration or a secondary concentration.

Primary Concentration

Course | Title | Credits
---|---|---
FNBU 3440 | Corporate Financial Policy | 3
FNBU 3441 | Investments & Security Anlys | 3

Two upper-level finance courses \(^1\)

\(^1\) Any course from the subject code FNBU (p. 256) numbered 3440 or higher may fulfill this requirement.

Note: Students pursuing a primary finance concentration may obtain their class dean’s approval to take one of the following courses offered by the economics department to fulfill one of the requirements for the concentration in finance.

Course | Title | Credits
---|---|---
ECON 3125 | Managerial Economics | 4
ECON 3347 | International Finance | 4
ECON 3636 | Money and Banking | 4
ECON 3637 | Monetary Policy \(^1\) | 4
ECON 3739 | Financial Markets | 4

\(^1\) Prerequisite: ECON 3636 Money and Banking

Secondary Concentration

Students who want to pursue finance as a secondary concentration are required to complete three upper-level finance courses \(^1\).

1. Any course from the subject code FNBU (p. 256) numbered 3440 or higher may fulfill this requirement.

Students pursuing a major, primary concentration, or secondary concentration in finance may not receive credit for taking ECON 3743 Stocks, Bonds, Options, and Futures or ECON 3778 Corporate Finance.

Concentration in Fintech

The Gabelli School of Business offers a three-course secondary concentration in fintech, co-designed by the finance and information systems faculty.

The role of technology in the business world in general, and the finance profession in particular, is exploding. The term “fintech” refers to a range of disruptive applications ranging from Bitcoin to high-speed trading to mobile banking. This secondary concentration is ideal for students who have an interest in these areas and who sense the inherent value in the point where finance and information systems meet.

Requirements
Fintech can be pursued by Gabelli Students as a secondary concentration only. FNBU 4454 ST: Financial Modeling and INSY 3436 ST: Programming with Python are prerequisites for pursuing the concentration.

Course | Title | Credits
---|---|---
FNBU 3450 | ST: Fintech - An Introduction \(^1\) | 3
or INSY 3450 | ST: Fintech - An Introduction | 3
One course from Finance

FNBU 4479 | ST: Algorithmic Trading | 3
FNBU 4430 | Computational Finance | 3
One course from Information Systems | 3 to 4

\(^1\) This is a cross-listed course. Students studying Information Systems should select INSY 3450 and students studying Finance should select FNBU 3450.

Information Systems courses
Courses in this group have the FTIS attribute.

Course | Title | Credits
---|---|---
INSY 3421 | Accounting Information Systems | 3
INSY 3432 | Database Systems | 3
INSY 3433 | Programming with Java | 3
INSY 3441 | Systems Analysis | 3

Updated: 07-27-2020
Value investing is the investment methodology developed by Benjamin Graham and David Dodd, and pursued by investors such as Warren Buffett and the Gabelli School’s namesake, Mario Gabelli, GABELLI ’65. The secondary concentration in value investing was developed by James R. Kelly, lecturer in finance, and launched in 2013. It is well-suited to qualified students who wish to add specificity to their degree.

For more information
Visit the Value Investing program web page.

Requirements
Value Investing can be pursued by Gabelli students as a secondary concentration only.

<table>
<thead>
<tr>

Select four electives from the following (at least two must be upper-level finance courses):

From those listed above

From other upper-level Gabelli School of Business finance or accounting courses  3

From the economics department  4

1 FNB 3441 Investments & Security Anlys is a prerequisite for other courses within the major.

2 The Global Investments requirement may also be fulfilled by the second course in the Student Managed Investment Fund’s two-semester sequence. Students who have been accepted into the SMIF program should see their class dean for details.

3 Any course with the subject code FNB (p. 256) or subject code ACBU, (p. 27) except for ACBU 3434 Intermediate Financial Accounting I or ACBU 3435 Intermediate Financial Accounting II, may fulfill this requirement.

Updated: 07-27-2020
Courses in the ECON department (p. 188) numbered 3000 or higher count toward this requirement, except for ECON 3743 Stocks, Bonds, Options, and Futures and ECON 3778 Corporate Finance, which do not count.

### How Courses are Counted

A finance MAJOR student may count three finance classes toward fulfilling requirements for a finance oriented secondary concentration; otherwise, only one course may double count toward the major and a concentration or minor. A finance CONCENTRATION student may count one class toward the concentration. For example, a finance major may count all three value investing, alternative investments, or fintech secondary concentration courses toward the major. However, a finance concentration may count only one class from any of those secondary finance concentrations. In addition, all finance students may count only one course from an economics minor.

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

### Fordham College at Lincoln Center

Fordham College at Lincoln Center (FCLC) is the dynamic liberal arts college on Fordham’s attractive and self-contained campus at the cultural and communications crossroads of Manhattan. The first Fordham school in Manhattan was founded in 1847, and Fordham schools evolved through locations in Chelsea and Lower Manhattan before moving in 1968 to the Lincoln Square neighborhood of the city’s West Side. This redevelopment included campuses for Fordham, the Juilliard School, and Lincoln Center for the Performing Arts, which is home to the Metropolitan Opera, the New York Philharmonic, and the New York City Ballet. Other neighbors include CBS and ABC Television, the Time Warner Center, and Central Park.

FCLC is a close-knit intellectual and creative community of faculty and students that combines a traditionally strong Fordham liberal arts education with the innovative instructional and preprofessional opportunities readily available at our location amidst the world’s most remarkable concentration of artistic, cultural, media, commercial, and nonprofit institutions. The college provides majors in the humanities, social sciences, and natural science, as well as offering outstanding programs in theatre, dance, visual arts, social work, and education. A vast array of internship experiences are available, and coursework is enriched by incorporating the resources of Manhattan into the life of the college. FCLC’s affiliation with the Ailey School enables Fordham students to study at one of the country's premier schools of dance. Fordham's own Poets Out Loud series brings contemporary poets to campus to read and discuss their work. Distinguished authors, actors and directors, photographers, filmmakers, poets, composers, and award-winning and scholars, authors, and editors in a wide range of academic disciplines. Others are active practitioners, including painters, photographers, filmmakers, poets, composers, and award-winning actors and directors.

The college's urban location also allows students to confront the pressing social and ethical questions of modern life: issues of justice, equality, community, diversity, faith, and human dignity. Opportunities for community service and community-engaged learning are readily available. The social work and education programs immerse students in the work of the city. All seniors participate in a seminar on values and moral choices. Combining the resources of New York City with those of Fordham's Lincoln Center and Rose Hill campuses allows FCLC students to experience unrivaled educational opportunities as the 21st century unfolds.

### The College at a Glance

- FCLC has a student body of approximately 2,000, with small and personalized classes that are in keeping with the Jesuit tradition of caring for each student as an individual.
- The transition to college is facilitated by the First Year Experience program of special seminar events and a system of active faculty advising.
- The college welcomes transfer students. Each year many students receive credit for coursework completed at other universities and go on to complete their bachelor's degrees at FCLC.
- Many graduates of the college continue their education at outstanding medical, dental, law, graduate, and other professional schools across the United States and abroad.
- A strong full-time arts and sciences faculty of about 150 is based at Lincoln Center and is augmented with colleagues from Rose Hill. Adjunct faculty bring special professional expertise to their classes.
- Many members of the faculty are well-known and established scholars, authors, and editors in a wide range of academic disciplines. Others are active practitioners, including painters, photographers, filmmakers, poets, composers, and award-winning actors and directors.

- FCLC maintains programs with the professional schools of Fordham University with whom we share the Lincoln Center campus and with the Graduate School of Arts and Sciences at the Rose Hill campus.
- Our future scientists and physicians work with our multidisciplinary natural sciences faculty and pre-health advisors in their labs, with opportunities at Mount Sinai Hospital, Rockefeller University, Columbia, NYU, Einstein Medical College, and others. The Department of Natural Sciences takes particular pride in its mission: The department is focused on the science education of undergraduates in their lectures and associated labs and in mentoring undergraduate research.
- Qualified students may gain entry to the 3-3 Program with Fordham Law School and thereby save a year of study.
- Qualified students may participate in the 3-2 Cooperative Program in Engineering to receive a B.A. or B.S. degree from Fordham and a B.S. degree in engineering from Columbia University or Case Western Reserve University after a total of 5 years of study.
- Students who meet the requirements may apply for an accelerated master's program in departments that offer a master's degree, saving a year of study.
- Completion of the B.A. in social work enables graduates who matriculate at Fordham University School of Social Service to complete the M.S.W. degree in one year.
- The college, in collaboration with the Graduate School of Education, coordinates a teacher-education tracking leading to certification.
- Business courses offered on the Lincoln Center campus by Fordham’s Gabelli School of Business allow a student to complete a business minor.
- Faculty from theatre, English, and communication and media studies collaborate to offer a minor in creative writing.
- A visual arts complex offers students splendid facilities for painting, drawing, photography, video, and computer graphics.
- The innovative B.F.A. in dance combines the resources of Fordham and the Ailey School.
The College Council

From its very inception, Fordham College at Lincoln Center has recognized that, in order to achieve its objectives, it should foster the development of an academic community among its faculty, students, and administrators. This academic community has manifested itself in the establishment of the College Council.

The College Council is a representative body of students, faculty, and administrators that assists in formulating policies for the college and making recommendations to appropriate University officers and bodies concerning University policies that affect the college. The dean of the college serves as chairperson of the council.

Fordham College at Lincoln Center Alumni Opportunities

All graduates of Fordham College at Lincoln Center (FCLC) are members of the alumni association by virtue of their graduation. Fordham alumni enjoy many opportunities to engage with current students and other alumni across the world. The goal of all alumni activities is to foster lifelong relationships between alumni and Fordham, and to create ways for alumni to share their talents and interests with the University.

The Office of Alumni Relations also sponsors numerous opportunities for FCLC alumni to interact with alumni from all of the schools within the University. The Fordham University Alumni Association connects alumni from all of Fordham's schools. The young alumni program focuses on the specific needs of alumni who have graduated within the last 10 years. The regional club program maintains Fordham's national and international alumni network. The cultural program capitalizes on the unique benefits of New York City for metro-area alumni. RamPass, the alumni ID card, affords alumni special discounts, and allows them to easily return to both campuses.

For more information about opportunities to get involved with the alumni program, please contact the Office of Alumni Relations at 212-636-6520 or visit fordham.edu/alumni_relations.

- Honors Program at FCLC (p. 1217)
- Pre-Law (p. 1314)
- Pre-Medical and Pre-Health (p. 1315)

Academic Curriculum

The college curriculum, leading to the degrees of bachelor of arts, bachelor of science, or bachelor of fine arts, is organized into three parts: the Core Curriculum, the major, and elective courses.

Core Curriculum

The Core Curriculum (p. 1122) consists of a set of required courses distributed across a number of disciplines. Advanced Placement credit and college courses taken elsewhere may be considered for core credit; otherwise the core must be completed in the student’s home college. The core is designed to open up new intellectual vistas; enhance understanding of ways of knowing within the disciplines and of connections among the disciplines; develop writing, research, and quantitative skills in order to prepare students for upper-level study; and situate students intellectually so they are prepared to make the right choice among major fields of study. Students are expected to complete most of the core by the end of sophomore year, with the exception of the advanced disciplinary and interdisciplinary, global studies, pluralism, and values requirements.

The Major

Fordham University offers major fields of study (p. 1169) in a wide variety of areas in each of its undergraduate colleges. Students normally select an academic major before completion of the second year of study. They are assisted in this process by their academic advisers and the academic deans. Requirements for the major are described in the departmental and program sections of the bulletin. The College reserves the right to limit the number of students in a particular major.

In cases where they have developed a special academic interest which is not covered by an established major, students may design an individualized major with permission of the dean of the college and in consultation with academic advisers in the appropriate fields.

The Minor

Students have the option of completing a minor (p. 1169) in addition to a major. A minor requires fewer courses and provides opportunity to pursue a complementary field of study. Some areas of study are offered only as minors, often representing new academic disciplines.

Electives

Coursework that falls neither within the core nor the major is of equal importance to courses in these two categories. Electives enable students to explore intellectual interests and build their own academic
concentrations and special competence. Electives should be chosen with care and with the advice of the academic adviser. To ensure the breadth of learning that electives are intended to promote, at least half of a student’s elective choices should be used to take courses in disciplines other than his or her major.

**Degree Requirements**

Fordham College at Lincoln Center awards both the B.A. and the B.S. degrees, as well as the B.F.A. degree. The bachelor’s degree programs at Fordham College at Lincoln Center Hill are four-year, eight-semester programs. Degrees are awarded upon the successful completion of a minimum of 36 courses and 124 credits, with a minimum cumulative index of 2.000. It is expected that students will be in residence during the final semester in which they complete their degree.

Students ordinarily take 20 courses (usually three-credit) in their first and second years and 16 courses (usually four-credit) in their third and fourth years.

**Educational Philosophy**

*Fordham affirms the value of a core curriculum rooted in the liberal arts and sciences. The University seeks to foster in all its students life-long habits of careful observation, critical thinking, creativity, moral reflection and articulate expression. (From the Fordham University Mission Statement.)*

**Education for Intellectual Excellence**

One purpose of the Fordham University liberal arts core is to enable students to go beyond mere proficiency and achieve a level of excellence in the essential skills of literacy. Excellence in the expressive skills of writing and speaking with logical clarity, that is, *eloquenta perfecta*, is founded on the arts of reading, listening, observing, thinking, and mastery and thorough understanding of the topic under consideration. The first task of the student of the liberal arts is listening and observation for the sake of understanding. Such observation and listening is not, in essence, passive but rather a supremely active engagement of the mind in a genuine conversation. Students of the liberal arts converse not only with those few who are present in the university halls and those who speak their own language but also with those in distant places, those who speak other languages, and those who are absent, perhaps even long dead.

**Education for Freedom**

Education in the liberal arts has traditionally been called “liberal” for several reasons, but among them is the fact that these arts engender the ability to form judgments based on sound reasoning, free of prejudice and free of insufficiently examined premises. Such critical and independent thinking demands knowledge of ourselves and the cultures that have shaped us. Learning to think, if pursued according to its most exacting standards and taken to its greatest depths, demands the actualization of our most distinctly human capacities, including the capacity for freedom. A liberal education prepares the student for a creative life, one capable of transforming its own conditions. In this regard, the liberal arts attempt to make learners aware of and aspirant to the greatness of the human.

**Education for Others and Respect of Difference**

A liberal arts education involves a community of learners. This community, committed to achieving excellence in the practice of the liberal arts, is composed of learners who depend on each other in a task that is too great for any one of them or even any one generation alone. This community of learners forms a republic of learning that transcends any one generation or nationality. The unifying principle of this republic is the preservation and advancement of the arts, the sciences, and wisdom.

The conversation in which Fordham’s core engages its students aims to engender civility, that is, an attitude of respect and openness to the other and to the world. This respect is a foundational virtue both for the University and for modern pluralist societies: for the university because the intelligent conversation at the heart of education is not possible without it; and for pluralist societies because their civic life requires tolerance of differences. Acknowledging and understanding human beings of different historical periods, genders, sexualities, ages, religions, races, ethnicities, and cultures is an intrinsic part of the perspective gained through learning in Fordham’s humanistic Core Curriculum. It invites students to go beyond themselves and the familiar, to understand the world through the eyes of the other, and in so doing, helps prepare them for citizenship in pluralist societies and nourishes the quest for social justice.

**Education for Leadership**

The humanistically educated do not stand by as idle spectators of suffering and strife, but attempt to serve others and the communities to which they belong, that is, their families, their neighborhoods, their countries, and the world. Fordham is not an ivory tower suspended above the world, but a community forming leaders and citizens in the midst of one of the world’s capitals—New York City. Fordham and New York City share a common fate and collaborate in a mission of justice and human welfare that spans from their immediate neighborhoods to the globe.

**Education for Wisdom**

A liberal arts education demands a spirit of inquiry that bars no question in itself and no aspect of life. Fordham’s Core Curriculum requires, therefore, the mastery and questioning of the various ways of knowing demanded by the most diverse subject matters and disciplines. This key part of undergraduate education leads to questions concerning meaning and values, and the nature and purpose of human action in the world, and includes an openness to questions of faith and the transcendent. What begins as a quest for excellence in the practice of writing and speaking leads to a quest for higher things, to a search for the wisdom that transforms life for the better. Socrates insisted at the very beginning of higher education that the eloquent sophist is not the ultimate goal, that in order for higher education to be complete, it must seek wisdom: “We were educated once, and it is indeed taking our whole life to get over it, to cease being astonished at what is” (*Phaedrus*).

**Academic Policies and Procedures**

Academic Policies and Procedures pertaining to students at FCLC:

- Academic Advising (p. 1172)
- Academic Progress (p. 1172)
- Business Coursework (p. 1173)
- Nonmatriculated Students (p. 1173)
- Registration (p. 1174)
- Summer Courses (p. 1174)

Academic Policies and Procedures pertaining to all undergraduate students:
As juniors and seniors with declared majors, students receive their internship opportunities, and workshops for liberal arts majors. early in the fall semester on such topics as international study abroad, class deans offer large informational group meetings for all sophomores receive advising in their department/program of study. The sophomore assistant deans for student support and success, will offer opportunities semester of sophomore year. These sessions, with guidance from our not yet declared a major to continue meeting with their adviser in the fall academic success and experiential learning.

The Core Advising Program at FCRH and FCLC was instituted to meet the University's commitment to cura personalis—the care of the whole person. The program pairs first-year students with full-time faculty and administrators. Approximately 16 to 18 students are assigned to each core adviser, and the students meet with their adviser individually and in groups throughout the academic year. The first individual meeting is held early on to help facilitate a successful beginning. Later in the semester, they will meet again to discuss midterm grades and plans for the subsequent semester. In the second semester, the student and adviser will review the first-semester experience and begin to focus on future academic goals. During group advising sessions held throughout the year, issues covered include course planning, choosing a major, college degree requirements and policies, as well as strategies for academic success and experiential learning.

Our advising program provides the opportunity for students who have not yet declared a major to continue meeting with their adviser in the fall semester of sophomore year. These sessions, with guidance from our assistant deans for student support and success, will offer opportunities to discern major options, complemented by building connections to other resources such as Career Services. Sophomores with declared majors receive advising in their department/program of study. The sophomore class deans offer large informational group meetings for all sophomores early in the fall semester on such topics as international study abroad, internship opportunities, and workshops for liberal arts majors.

As juniors and seniors with declared majors, students receive their primary advising on all matters pertaining to their major from their department or program while the class deans continue to play an active role in advising students in fulfilling their core curriculum and graduation requirements. Students are encouraged to see their adviser regularly to discuss their academic and professional progress, in addition to course selection.

**Academic Advising for Student-Athletes**

The primary mission of the Office of Academic Advising for Student-Athletes is to provide Fordham University’s more than 500 NCAA student-athletes with the resources and direction needed to achieve their scholastic potential and to prepare them for postgraduate scholastic, athletic, and career opportunities. The office brings a breadth and depth of experience in athletics and higher education to their many responsibilities. These responsibilities include general academic counseling, eligibility monitoring, assistance in maintaining satisfactory progress toward degrees, and course scheduling. Mid- and post-semester grade reviews are conducted every semester.

The office has six full-time administrators, all of whom are dedicated to working with and for Fordham’s student-athletes.

**Academic Progress**

**Academic Progress Policy**

Academic progress toward a degree must be maintained for the continuation of study in Fordham College at Lincoln Center. Satisfactory academic progress, as defined by the college, must also be maintained to receive financial aid.

For graduation, the student must successfully fulfill the following requirements:

- Completion of a minimum of 124 credits and 36 courses of three credits or more, with a minimum grade point average of 2.000
- A residency of at least 64 credits (a minimum of 16 courses), exclusive of courses taken on a pass/fail basis
- The Core Curriculum that provides students with a broad-based exposure to the liberal arts
- Completion of a major with a minimum grade point average of 2.000
- Completion of remaining elective credits which students may choose to use for a second major, a minor or a Pre-professional program

Full-time students are expected to complete their coursework in four years. Students who need additional time to complete their degree due to special circumstances, such as illness, a change in major, etc., must complete their coursework in a period not to exceed six years.

Restrictions on the use of the grades W (Withdrawal), ABS (Absent from the Final Exam) and INC (Incomplete) are intended to preserve the character of a Fordham education. Permission to have such grades is the recognition by the University of a pressing need due to an individual’s circumstances. However, a pattern of reliance on these grades contravenes the intentions of an academic program. In addition, a pattern of reliance on grades of W, ABS, and INC will be taken as evidence of failing to maintain reasonable academic progress. Repeated courses will be calculated into a student's GPA and will not replace the original grade, but only the repeated course will be counted toward graduation requirements. In addition, the satisfactory completion of fewer credits than stipulated may warrant dismissal for failure to maintain satisfactory progress toward the Fordham College at Lincoln Center bachelor's degree.
Minimum Credit Completion Policy

<table>

</table>

Please note: Academic status standards differ slightly for students receiving funds from the New York State Tuition Assistance Program (TAP). A schedule is available at the Office of Academic Records.

Business Coursework

Undergraduate liberal arts students in all three liberal arts colleges (FCRH, FCLC, and PCS) may take up to six courses in the Gabelli School of Business. Students should be aware that business courses are three-credit courses, rather than four-credit courses, typically offered in FCRH and FCLC for juniors and seniors. Hence, when considering these minors, students should consult with the junior or senior class dean to be sure they will have the number of credits (124) required for graduation. As an exception, students minoring in business administration as part of a Bachelor of Arts or Bachelor of Science degree must complete a minimum of 120 credits to earn their degrees (compared to 124 credits).

Please note that all of the business school courses must be taken at Fordham University to apply.

A number of minors in business are available to students at FCRH, FCLC, and PCS. While not all minors are available to all students, a list of their requirements is listed here.

Nonmatriculated Students

Qualified students who are not enrolled in a degree program at Fordham and who wish to attend the college as a full time student may apply through the Office of Undergraduate Admission in Room 203. A visiting student may maintain nonmatriculated status for one academic year. After such time, students must receive approval from the Office of Undergraduate Admission in order to continue their studies. Students should contact their degree-granting institution in regard to financial aid assistance and course approval. For a transcript of grades to be sent to their institution, students should apply to the Office of Academic Records.

Visiting Students

Those students who are matriculated at another college or university and who wish to attend the college as a full time student may apply through the Office of Professional and Continuing Studies. This non matriculated status allows students to register for courses for a period of one academic year. After such time, students must receive approval from the Office of Undergraduate Admission in order to continue their studies. Students should contact the Office of Professional and Continuing Studies, Room 301, or 212-636-7333.

Special Students

Students with a degree from an accredited college or university may apply to further their studies through the School of Professional and Continuing Studies. This non matriculated status allows students to register for courses for a period of one academic year. Special students must notify the School of Professional and Continuing Studies of their intention to continue study at the College beyond this period of time.

Alumni Audit

A graduate of any undergraduate college of Fordham University may audit a course on an unofficial basis for a nominal fee; it will not appear on a transcript, and the student receives no credit. Alumni should contact the PCS dean's office (LL302) for details.
Registration

Matriculation

Matriculated students are those who have been admitted as candidates for a degree. A nonmatriculated student is one who has not been admitted as a degree candidate but has received approval to register for credit courses.

Classification of Students

Class standing is determined by the number of credits the student has completed, which in turn determines which class dean the student will work with.

Official Registration

Fordham University recognizes that the responsibility for each student’s academic success is shared by the student, the faculty, and the administration. Therefore, before a student registers for coursework at the University, preregistration advising is provided.

An advising hold is placed on each student. Once students have met with their faculty adviser, this hold is removed and students may register for the next semester. Students must register according to the schedule provided in their registration materials before attending any course. Registration materials are e-mailed to each student’s Fordham e-mail address before official registration in the fall (for the next spring term) and spring (for the next fall term). Students must register before the first day of classes. Students will not be awarded credit for courses they have not registered for by the end of the add/drop period.

Course Changes

Students may change their course schedules by adding/dropping until the deadline specified in the academic calendar.

Registration in Other Fordham Schools

As part of their degree program, students may register for major and elective courses in GSB, PCS, and FCRH. Any other cross-registration (or intra-university registration) requires the prior approval of an assistant dean at the student’s school of matriculation (home school). Students seeking approval for courses in a major, minor, or program must obtain approval from the academic department or program. Students are expected to take core courses FCLC. Certain major courses that meet core requirements may be taken in another Fordham school if students consult before registration with their class dean. Students may not take more than six courses at the Gabelli School of Business (GSB). Students must take more than six courses at the Gabelli School of Business (GSB). Sixty percent of credits taken at Fordham must be taken in the home school.

Credit/Course Load

Full-time status is achieved by registering for 12 or more credits per term; part-time status involves a credit load of fewer than 12 credits. Full-time status is needed for financial aid and residential life. The normal credit load per term is five three-credit courses for first years and four four-credit courses for juniors and seniors.

Students who have demonstrated their ability to carry a 16-credit course load with at least a 3.000 cumulative GPA may request special permission of an assistant dean to enroll in an additional course. Students paying the flat tuition rate will be charged extra tuition for any credits over 18. (B.F.A. students may register for up to 21 credits without additional charges, and students majoring in natural science for up to 20.) Exceptions: Juniors and seniors who have achieved a 3.700 grade point average (cumulative or for the two preceding semesters) are eligible for a scholarship for a fifth course taken to enrich their academic program. Such scholarship courses and credits may not be used to accelerate graduation, that is, to reduce the number of full-time semesters a student spends at Fordham College at Lincoln Center. B.F.A. students may register for up to 21 credits without additional charges, and students majoring in natural science or registered as prehealth may register for up to 20 credits. The college reserves the right to cancel the registration of students who take more than the maximum credit load without permission.

Leave of Absence and Readmission

The leave of absence policy is described in the Academic Programs, Policies, and Procedures chapter of the bulletin.

All former students who wish to apply for readmission may obtain the application form from the Office of Academic Advising (LL804; 212-636-6350).

In addition to the application, a personal statement describing the applicant’s activities while away from college must be submitted. An interview may be required as part of the readmission process.

Readmission decisions are based primarily on the applicant’s previous academic record with the college, although other factors may be considered as well.

Summer Courses

Summer Courses and Courses Taken at Other Universities

Because of the concentrated nature of summer courses, students must have written permission from their class dean to take more than two summer courses or 8 credits in one summer, or more than four summer courses in the course of their college career, whether at Fordham or at another college. The decision to grant permission will be based on the student’s past academic history, as an indicator of the student’s ability to succeed in the courses. It is also recommended that students not take more than one course in each summer session, so that two courses should be taken in consecutive summer sessions whenever possible. During the fall and spring semesters students may not take courses at another college or university. However, students may receive credit for courses in which they earned a grade of C or above, taken during the summer at an accredited four-year college, or for courses taken abroad in an approved program. Students who want to take any courses at another school must have approval ahead of time and a scholastic index of 2.000 or higher (3.000 for study abroad). If the course is to be applied toward a major, permission from the chair or associate chair of that academic discipline is also necessary. Permission for summer school courses does not constitute waiver of residency requirements.
Departments

The following is a list of academic departments and interdisciplinary units at Fordham College at Lincoln Center:

- African Studies (p. 1070)
- African and African American Studies (p. 1068)
- American Studies (p. 1072)
- Anthropology (p. 1088)
- Art History (p. 1089)
- Biochemistry (p. 1095)
- Bioethics (p. 1096)
- Classical Languages and Civilization (p. 1104)

- Urban Studies (p. 1335)
- Women, Gender, and Sexuality Studies (p. 1336)

Supporting Student Success

Assistant Dean for Student Support and Success

At its core, Fordham University is committed to the holistic development of students’ academic and personal success. We offer proactive academic support for our students through student-centered activities and programs, intentional goal-setting, and opportunities for personal and professional discernment. The assistant dean for student support and success can assist you in these areas, as well as connect you with other available resources at the University. Students can contact the assistant dean directly (Tracyann Williams, twilliams126@fordham.edu) or be referred to develop an individualized success plan.

College Writing Center

Providing more than a proofreading service, our tutors will work with you on a variety of logical, rhetorical, and grammatical concerns in your writing. We can assist you with any type of writing from your curriculum, from conception, to composition, to completion. Our aim is not only to help you perfect an individual essay; we want to help you develop the tools you need to become a better writer. Our service is free and, if you come with the right expectations and the willingness to participate actively in the session, extremely effective. Visit the website for more information.

Mathematics Help Room

LC: Lowenstein 302F

The Department of Mathematics runs a Math Help Room staffed entirely by faculty, both full-time and part-time. It is located in Lowenstein 302F and is available 12 hours per week. The exact schedule varies from semester to semester and is posted on the door of that room. The Help Room is available on four different weekdays, one of which has hours in the late afternoon to early evening. No appointment is necessary to come to the Help Room—assistance is provided on a first-come, first-served basis. Any student enrolled in a mathematics course at Fordham is welcome to come and seek help. There is no charge for this service.

Economics Tutoring Center

The Economics Department offers free tutoring services in ECON 1100 Basic Macroeconomics, ECON 1200 Basic Microeconomics, ECON 2140 Statistics I, and ECON 2142 Statistical Decision Making. The Tutoring Center is located at the Math and Economics Help Room on the third floor in Room LL302F. The office telephone number is 212-636-7410. During the regular semester, the Center is staffed four days a week, and the times are posted. Feel free to stop by. If a tutor is available, we will be happy to assist you. If a tutor is not free, you can sign up for a time slot that will work for you. If you are unable to keep an appointment, please call to notify us as soon as possible. Visit the website for more information.

Information Technology Services

Fordham University's information technology services are provided in support of your academic goals. Please visit the Student Technology Services website for detailed information on such services as My.Fordham, your Fordham email account, computer maintenance, and security tips, IT Customer Care, recommended computer specifications, cellular services, and the network.

Updated: 07-27-2020
Fordham University Portal
My.Fordham is the gateway to Fordham’s online resources, including Blackboard; MyFiles (the university file storage system); campus and personal announcements; your Fordham Gmail and Google Apps; and registration, financial aid, bill payment, and academic course information through Banner—the student information system. Tutorials online help you navigate and customize your portal tabs.

To gain access to the portal, you will need to have claimed your AccessIT ID. To do this, open your browser and go to https://my.fordham.edu. In the first time user's box, click the “Click Here to Claim your AccessIT ID and set Your Password” link and follow the on-screen prompts. If you encounter problems, please call the Help Desk at 718-817-3999 for assistance; only they can help you validate your personal information and escalate the issue if necessary.

Computer Labs
The Teaching Computer Labs located on the third floor, Rooms 304, 306, and 308 and the Public Access Lab in the Quinn Library in the Lowenstein Building are maintained by the Instructional Technology Academic Computing (ITAC) Department. At the computer labs students can utilize both Macintosh and Windows computers. Access is available to a wide range of hardware and software for use by the academic community, including business applications (word processing, spreadsheets, etc), programming languages, statistical packages, utilities, access to Internet, and e-mail. Computer user assistants are available to answer any questions. Visit the website for more information.

Library Public Access Hours
Monday–Thursday: 8 a.m. – 2 a.m.
Friday: 8 a.m. – 8 p.m.
Saturday: 9 a.m. – 7 p.m.
Sunday: 12 p.m. – 2 a.m.

Teach Lab Public Access Hours
Monday–Friday: 8:30 a.m. – 9 p.m.

Educational Discounts
Special educational discounts are available on personal computers at Fordham’s Computer Purchases and cellular service at www.fordham.edu/ramcell.

Fordham IT Customer Care
Fordham IT Customer Care provides support to all Fordham University faculty, staff, and students. Questions about your computer’s operating system, initial setup, software applications, claiming your AccessIT ID via the Portal (my.fordham.edu), e-mail access, or network connection may be directed to ITCC by phone, e-mail, or request form. Visit the website for more information.

Hours
Monday–Friday: 8 a.m. – 8 p.m.
Telephone: 718-817-3999
E-mail: helpit@fordham.edu

In-person help is available through our IT Customer Care Centers, located on both the Rose Hill and Lincoln Center campuses, which in addition to the above services also provide warranty hardware support for select vendors.

Rose Hill Campus
Hours: Monday–Friday, 8 a.m. – 8 p.m.

Lincoln Center Campus
Hours: Monday–Friday, 10 a.m. – 6 p.m.
Location: Lowenstein, Room SL19A

Resident Technology Consultant Program
If you live in the residence halls you can contact your Resident Technology Consultant (RTC) for in-room assistance. The RTC is the primary source of technology related assistance for students living in the residence halls and can help with many of the same issues as IT Customer Care. Visit the website for more information.

The Olga M. Ficarra/Francis J. Morison Language Laboratory
Modern language students at Fordham University have access to Fordham’s Language Learning Centers at the Rose Hill and Lincoln Center campuses. Both facilities provide the tools and instructional materials necessary for students to reach a determined level of proficiency as they complete their core language courses in an environment that encourages and promotes the study of language. Both facilities offer various levels of oral/aural language practice via text-based audio, video, and CD-ROM programs and powerful interactive software featuring voice recognition and on-screen performance evaluations. Each facility also features satellite television programming in various languages available at each computer station as well as a state-of-the-art projection system for group viewings of multimedia presentations. At present, Fordham’s Language Learning Centers provide material for practice in Arabic, Chinese, French, German, Italian, Japanese, Portuguese, Russian, and Spanish. The aim of Fordham’s Language Learning Centers is to make available to students and faculty the most up-to-date equipment and the very latest in computer-assisted language learning technology in an inviting and user-friendly environment. Visit the website for more information.

Gerald M. Quinn Library
The Gerald M. Quinn Library is located on the street level of the Leon Lowenstein building. It supports the curricula of Fordham College at Lincoln Center, the Graduate School of Social Service, the Graduate School of Business, and the Graduate School of Education. An open-stack facility, the library houses over 400,000 volumes, over 18,000 periodical subscriptions (full-text online and hard copy), as well as a DVD and CD collection in the AV lab. Fordham’s online catalog (OPAC) reflects the holdings of the Lincoln Center, Westchester, and Rose Hill collections, as well as the Fordham Law School Library, and is available at over 150 PCs throughout the library. More than 230 online databases may be accessed in the library or via remote access. Items at any Fordham library are available by request to Lincoln Center students within 24 to 48 hours. Items at other universities are available to Lincoln Center students through standard interlibrary loan procedures. With a valid Fordham I.D., undergraduates may gain reference (not borrowing) privileges to the Fordham Law School Library. The Sidney Rosenblatt Holocaust Collection is housed in the Quinn Library. Its more than 10,000 titles chronicle the Holocaust through survivor’s memoirs, historical monographs, journals, videos, photographs, and artifacts. There are two public computer labs in the Quinn Library which contain PCs, multimedia PCs, DVD and CD players, and VCRs.

For information regarding the hours, services and policies of the university libraries, please refer to the Fordham University Library website at www.library.fordham.edu or the Fordham University Library Handbook.
Visual Arts Complex

LC: Lowenstein, Street Level, SL 24A-F
Visual Arts Office: Lowenstein 423, 212-636-6303

The 12,000-square-foot Visual Arts Complex at Lincoln Center has studios designed to offer the best possible environment for each discipline. A large airy painting and drawing studio, a dedicated graphics lab with all of the industry standard graphics programs, state-of-the-art film and video-editing and screening facilities, an architectural lab with computers, and large plotter printers and work tables. In addition, there is an outstanding photography area with computer and printing digital capabilities, a well-equipped darkroom, and separate finishing and critique rooms. We make every effort to keep all software and hardware up-to-date and equivalent to industry standards.

All studios are available to students whenever classes are not in session including weekends, evenings, and school breaks.

The department has two galleries at Lincoln Center. The Ildiko Butler Gallery is located near the 60th Street entrance. Exhibits feature senior student projects and museum-quality exhibitions of interest to the entire university community. The Susan Lipani Gallery, located in the Visual Arts Complex, features student work and the work of invited artists related to the curriculum.

Fordham College at Rose Hill

The oldest of the University’s 11 schools, Fordham College at Rose Hill (FCRH) was founded in 1841 by the Most Reverend John Hughes, the fourth bishop and first archbishop of New York. For 133 years, the College was a college for men. In 1974, however, as a result of a merger with Thomas More College, the University’s coordinate college for women, it became coeducational.

As a four-year Jesuit liberal arts college, FCRH invites and challenges its students to develop their intellectual, volitional, and aesthetic faculties by completing a carefully integrated yet flexible liberal arts curriculum that balances core requirements with a concentration in a particular field of study. This curriculum is designed to:

• develop the faculty of clear and critical thinking and of correct and forceful expression
• impart a knowledge of scientific principles and skills; an awareness of historical perspective; an understanding of the contemporary world; and an intelligent appreciation of religious, philosophical and moral values

Through concentration on a specific discipline, the College strives to produce students who have read, reasoned, and written sufficiently in one academic discipline to have been prepared for advanced work, to have been formed by the procedures and techniques of the discipline, and to have absorbed the ideals and ambitions that rise from serious, consistent work in one field under the direction of dedicated teacher-scholars.

In pursuit of these objectives, the curriculum of FCRH is based on the classical and modern languages, the natural sciences, the social sciences, history, and the religious concepts and philosophical systems of Western civilization from ancient times to the present day.

In addition, the College intends, through its various activities, curricular and extracurricular, to contribute to the social, spiritual, and psychological formation of its students so that they will be prepared to deal with others in various walks of life. It wants to inspire in them a desire to contribute to the culture and civilization in which they live and to form in them a trained capacity for the service of their country. It believes that these purposes, and indeed all the purposes of the College, are largely secured through adherence to a well-organized curriculum of study committed to the hands of mature scholars and administered according to high standards of performance.

The College recognizes the variety of individual needs and talents of its students and at the same time recognizes their common desire to contribute to the various spheres of life in which they participate. Therefore, it offers a wide selection of programs of study, including interdisciplinary and individual concentrations designed to meet a broad diversity of interests and the rapidly expanding needs of a changing world.

Visit our website at www.fordham.edu/fchr.

Students should consult the university-wide sections of this bulletin for more information on academic programs, policies, and procedures (p. 1060).

The College Council

The College Council meets six times during the academic year. The membership includes faculty representatives for each department and interdisciplinary program that offers a major on the Rose Hill campus, the director of the honor’s program, the Dean of Students and three students named by the United Student Government.

The council serves as an advisory body to the dean in formulating policies for the College and in making recommendations for University policies that affect the College.

Fordham College at Rose Hill Alumni Opportunities

All graduates of Fordham College at Rose Hill (FCRH) are members of the alumni association by virtue of their graduation. A board of interested and active alumni represents the FCRH alumni constituency. The board partners with the Office of Alumni Relations to provide opportunities that support and advance FCRH through innovative programs and events. The goal of all alumni activities is to foster lifelong relationships between alumni and Fordham and to create ways for alumni to share their talents and interests with the University.

The Office of Alumni Relations also sponsors numerous opportunities for FCRH alumni to interact with alumni from all of the schools within the University. The young alumni program focuses on the specific needs of alumni who have graduated within the last 10 years. The regional club program maintains Fordham’s national alumni network. The cultural program capitalizes on the unique benefits of New York City for metro area alumni. Rampass, the alumni I.D. card, affords alumni special discounts and allows alumni to easily return to both campuses.

For more information about opportunities to get involved with the alumni program, please contact the Office of Alumni Relations at 212-636-6520 or visit our website at www.fordham.edu/alumni_relations.

Majors

• African and African American Studies Major (p. 1069)
• American Studies Major (p. 1072)
• Anthropology Major (p. 1089)

Updated: 07-27-2020
• Art History Major (p. 1090)
• Art History and Visual Arts Double Major (p. 1090)
• Biological Sciences Major (p. 1098)
• Chemistry Major (p. 1103)
• Classical Civilization Major (p. 1105)
• Classical Languages Major (p. 1105)
• Communication and Culture Major (p. 1108)
• Comparative Literature Major (p. 1116)
• Computer Science Major (p. 1119)
• Digital Technologies and Emerging Media Major (p. 1111)
• Economics Major (p. 1151)
• Engineering Physics Major (p. 1285)
• English Major (p. 1155)
• English Major with a Creative Writing Concentration (p. 1156)
• Environmental Science Major (p. 1159)

• Pre-Law (p. 1314)
• Pre-Medical and Pre-Health (p. 1315)

Academic Curriculum
The college curriculum, leading to the degrees of Bachelor of Arts and Bachelor of Science, is organized into three parts: the core curriculum, the major, and elective courses.

Core Curriculum
The Core Curriculum (p. 1122) consists of a set of required courses distributed across a number of disciplines. Advanced Placement credit and college courses taken elsewhere may be considered for core credit; otherwise the core must be completed in the student’s home college. The core is designed to open up new intellectual vistas; enhance understanding of ways of knowing within the disciplines and of connections among the disciplines; develop writing, research, and quantitative skills in order to prepare students for upper-level study; and situate students intellectually so they are prepared to make the right choice among major fields of study. Students are expected to complete most of the core by the end of sophomore year, with the exception of the advanced disciplinary and interdisciplinary, global studies, pluralism, and values requirements.

The Major
The major, or field of concentration (p. 1177), is designed to give the student mastery of a single field and to introduce that student to a field of possible professional involvement. A student will normally select a major by February of their sophomore year. If, at the time of preregistration for the fourth year, the student qualifies for a second major, he or she may request acceptance by that department. If the department finds that the student can complete its requirements satisfactorily in addition to the requirements for the original major, he or she may register for a double major with the final approval of the class dean. If successfully completed, the two majors will be entered on the student’s official record. It is the major that determines the type of degree that is awarded. The college reserves the right to limit the number of students in a particular major.

A student who has a particular interest best pursued by means of an interdisciplinary program of courses not covered by one of the college's established programs may petition to follow an individualized major. Students interested in an individualized major, open only to candidates for the B.A. degree, should discuss their plans with the class dean; final approval will be determined by a committee of faculty.

Students wishing to major in biological sciences, chemistry, computer and information sciences, mathematics, physics, or psychology will be registered for the courses specified by these departments in their first year.

Students interested in premedical or pre-health professions, architecture, the 3-2 cooperative engineering program, or the five-year teacher-education track should indicate this program interest when applying. Changes may be made during the summer prior to beginning of classes. Incoming first-year students will be guided through course selection and registration over the summer by a dedicated adviser. Changes subsequent to the start of classes may be made in consultation with the student’s class dean.

The Minor
A minor is offered (p. 1178) in many departments and in certain interdisciplinary programs. Interested students should consult the listings of the respective departments and programs. Students may register for a minor in their first semester of junior year, using the appropriate forms available in the offices of the class deans.

Electives
The curriculum is rounded out by elective courses chosen by the student in consultation with his or her adviser. To ensure the breadth of learning that electives are intended to promote, at least half of a student’s electives should be in disciplines other than his or her major.

Degree Requirements
Fordham College at Rose Hill awards both the B.A. and the B.S. degrees. The bachelor of arts and bachelor of science degree programs at Fordham College at Rose Hill are four-year, eight-semester programs. Degrees are awarded on the successful completion of a minimum of 36 courses and 124 credits, with a minimum cumulative index of 2.000. It is expected that students will be in residence during the final semester in which they complete their degree.

Students ordinarily take 20 courses (usually three-credit) in their first and second years and 16 courses (usually four-credit) in their third and fourth years. Two-credit laboratory courses do not count toward the 36-course total. The only exception to the 36-course requirement is that students who take (and successfully complete) Introductory Biology (with laboratory) and General Chemistry (with laboratory) in their first semester may take only four courses and thereby reduce the number of courses required for graduation to 35.

Educational Philosophy
Fordham affirms the value of a core curriculum rooted in the liberal arts and sciences. The University seeks to foster in all its students life-long habits of
Education for Intellectual Excellence

One purpose of the Fordham University liberal arts core is to enable students to go beyond mere proficiency and achieve a level of excellence in the essential skills of literacy. Excellence in the expressive skills of writing and speaking with logical clarity, that is, *eloquenta perfecta*, is founded on the arts of reading, listening, observing, thinking, and mastery and thorough understanding of the topic under consideration. The first task of the student of the liberal arts is listening and observation for the sake of understanding. Such observation and listening is not, in essence, passive but rather a supremely active engagement of the mind in a genuine conversation. Students of the liberal arts converse not only with those few who are present in the university halls and those who speak their own language but also with those in distant places, those who speak other languages, and those who are absent, perhaps even long dead.

Education for Freedom

Education in the liberal arts has traditionally been called “liberal” for several reasons, but among them is the fact that these arts engender the ability to form judgments based on sound reasoning, free of prejudice and free of insufficiently examined premises. Such critical and independent thinking demands knowledge of ourselves and the cultures that have shaped us. Learning to think, if pursued according to its most exacting standards and taken to its greatest depths, demands the actualization of our most distinctly human capacities, including the capacity for freedom. A liberal education prepares the student for a creative life, one capable of transforming its own conditions. In this regard, the liberal arts attempt to make learners aware of and aspirant to the greatness of the human.

Education for Others and Respect of Difference

A liberal arts education involves a community of learners. This community, committed to achieving excellence in the practice of the liberal arts, is composed of learners who depend on each other in a task that is too great for any one of them or even any one generation alone. This community of learners forms a republic of learning that transcends any one generation or nationality. The unifying principle of this republic is the preservation and advancement of the arts, the sciences, and wisdom. The conversation in which Fordham’s core engages its students aims to engender civility, that is, an attitude of respect and openness to the other and to the world. This respect is a foundational virtue both for the University and for modern pluralist societies: for the university because the intelligent conversation at the heart of education is not possible without it; and for pluralist societies because their civic life requires tolerance of differences. Acknowledging and understanding human beings of different historical periods, genders, sexualities, ages, religions, races, ethnicities, and cultures is an intrinsic part of the perspective gained through learning in Fordham’s humanistic Core Curriculum. It invites students to go beyond themselves and the familiar, to understand the world through the eyes of the other, and in so doing, helps prepare them for citizenship in pluralist societies and nourishes the quest for social justice.

Education for Leadership

The humanistically educated do not stand by as idle spectators of suffering and strife, but attempt to serve others and the communities to which they belong, that is, their families, their neighborhoods, their countries, and the world. Fordham is not an ivory tower suspended above the world, but a community forming leaders and citizens in the midst of one of the world’s capitals—New York City. Fordham and New York City share a common fate and collaborate in a mission of justice and human welfare that spans from their immediate neighborhoods to the globe.

Education for Wisdom

A liberal arts education demands a spirit of inquiry that bars no question in itself and no aspect of life. Fordham’s Core Curriculum requires, therefore, the mastery and questioning of the various ways of knowing demanded by the most diverse subject matters and disciplines. This key part of undergraduate education leads to questions concerning meaning and values, and the nature and purpose of human action in the world, and includes an openness to questions of faith and the transcendent. What begins as a quest for excellence in the practice of writing and speaking leads to a quest for higher things, to a search for the wisdom that transforms life for the better. Socrates insisted at the very beginning of higher education that the eloquent sophist is not the ultimate goal; that in order for higher education to be complete, it must seek wisdom: “We were educated once, and it is indeed taking our whole life to get over it, to cease being astonished at what is” (Phaedrus).

Academic Policies and Procedures

Academic Policies and Procedures pertaining to students at FCRH:

- Academic Advising (p. 1181)
- Academic Progress (p. 1181)
- Business Coursework (p. 1183)
- Registration (p. 1183)
- Summer Courses (p. 1184)

Academic Policies and Procedures pertaining to all undergraduate students:

- Academic Progress, Probation, Suspension, and Dismissal (p. 1047)
- Admissions Policy (p. 1048)
- Deferred Examinations (p. 1048)
- Grading System (p. 1049)
- Incomplete Coursework (p. 1050)
- Integrity of Full-Time Study (p. 1050)
- Payment of Tuition and Fees (p. 1050)
- Procedure for Appealing a Course Grade (FCRH, FCLC, and Gabelli School) (p. 1050)
- Refund (p. 1051)
- Student Attendance (p. 1052)
- Transcript of Record (p. 1053)
- Undergraduate Policy on Academic Integrity (p. 1054)
- Withdrawal from the University and Leaves of Absence (p. 1060)

Academic Policies and Procedures, university-wide:

- Affirmative Action Policy (p. 1057)
- Campus Safety (p. 1057)
- Equity in Athletics Disclosure Act (p. 1057)
- Nondiscrimination and Title IX Coordinator (p. 1057)
- Recruitment of Jesuits to the Faculty (p. 1057)
Academic Advising

The Core Advising Program at FCRH and FCLC was instituted to meet the special advising needs of first-year students. It is a manifestation of the University’s commitment to cura personalis—the care of the whole person. The program pairs first-year students with full-time faculty and administrators. Approximately 16 to 18 students are assigned to each core adviser, and the students meet with their adviser individually and in groups throughout the academic year. The first individual meeting is held early on to help facilitate a successful beginning. Later in the semester, they will meet again to discuss midterm grades and plans for the subsequent semester. In the second semester, the student and adviser will review the first-semester experience and begin to focus on future academic goals. During group advising sessions held throughout the year, issues covered include course planning, choosing a major, college degree requirements and policies, as well as strategies for academic success and experiential learning.

Our advising program provides the opportunity for students who have not yet declared a major to continue meeting with their adviser in the fall semester of sophomore year. These sessions, with guidance from our assistant deans for student support and success, will offer opportunities to discern major options, complemented by building connections to other resources such as Career Services. Sophomores with declared majors receive advising in their department/program of study. The sophomore class deans offer large informational group meetings for all sophomores early in the fall semester on such topics as international study abroad, internship opportunities, and workshops for liberal arts majors.

As juniors and seniors with declared majors, students receive their primary advising on all matters pertaining to their major from their department or program while the class deans continue to play an active role in advising students in fulfilling their core curriculum and graduation requirements. Students are encouraged to see their adviser regularly to discuss their academic and professional progress, in addition to course selection.

Academic Advising for Student-Athletes

The primary mission of the Office of Academic Advising for Student-Athletes is to provide Fordham University's more than 500 NCAA student-athletes with the resources and direction needed to achieve their scholastic potential and to prepare them for postgraduate scholastic, athletic, and career opportunities. The office brings a breadth and depth of experience in athletics and higher education to their many responsibilities. These responsibilities include general academic counseling, eligibility monitoring, assistance in maintaining satisfactory progress toward degrees, and course scheduling. Mid- and post-semester grade reviews are conducted every semester.

The office has six full-time administrators, all of whom are dedicated to working with and for Fordham’s student-athletes.

Academic Progress

Academic Progress Policy

Academic progress toward a degree must be maintained to continue study in Fordham College at Rose Hill. Satisfactory academic progress, as defined by the College, must be maintained to receive financial aid.

Full-time students are expected to complete their coursework in four years. Students who need additional time to complete their degree due to special circumstances, such as illness, death in the family, a change in major, etc., must complete their coursework in a period not to exceed six years.

Restrictions on the use of grades W, ABS, and INC are intended to preserve the character of a Fordham education. Permission to have such grades is the recognition by the University of a pressing need due to an individual’s circumstances. However, a pattern of reliance on these grades contradicts the intentions of a strong academic program. In addition, a pattern of reliance on grades of W, ABS, and INC will be taken as evidence of failing to maintain reasonable academic progress. Repeated courses will be calculated into a student's GPA and will not replace the original grade.

Minimum Credit Completion Policy

Minimally acceptable standards for credits earned are outlined below. Independent of the student’s GPA, the satisfactory completion of fewer credits than stipulated in the table below may warrant dismissal for failure to maintain satisfactory progress toward the bachelor’s degree.

<table>
<thead>
<tr>
<th>Year of Attendance/</th>
<th>Semesters Until Graduation</th>
<th>Percentage of Attempted Credits Completed ¹</th>
<th>Percentage Completed</th>
</tr>
</thead>
<tbody>
<tr>
<td>First: 6 semesters</td>
<td>65</td>
<td>18-20</td>
<td></td>
</tr>
<tr>
<td>Second: 4 semesters</td>
<td>70</td>
<td>42</td>
<td></td>
</tr>
<tr>
<td>Third: 2 semesters</td>
<td>75</td>
<td>69</td>
<td></td>
</tr>
<tr>
<td>Fourth: 0 or 1 semester until graduation</td>
<td>80</td>
<td>99-100</td>
<td></td>
</tr>
</tbody>
</table>

¹ Transfer credits accepted by Fordham are counted in both credits attempted and credits completed, although the grades are not calculated in the GPA.

Please note: Academic progress standards differ slightly for students receiving funds from the New York State Tuition Assistance Program (TAP). A schedule is available at the Office of Academic Records.

Academic Status

In Fordham College at Rose Hill, both the grade point average and number of credits earned are considered in determining satisfactory academic progress. For each of these criteria, the college has developed minimal standards.

The minimal GPA required for acceptable academic standing appears below, shown by year of attendance and by semesters until graduation. Use the expected degree term of the student to determine the number of fall or spring semesters until graduation. The expected degree term of transfer students is initially determined in their first month of
study. Failure to meet this standard may result in academic probation, suspension or dismissal.

### Academic Standing as Reflected in Grade Point Averages

#### First Year

</tbody>
</table>

### Appeals Process

Academic progress decisions may be appealed, in writing, to the dean of the college. The appeal must be made within three business days of the notification of academic standing. The decision of the dean shall be final.

### Academic Probation

Probation (conditional promotion) is a serious warning that the student must improve his/her academic performance. Students on probation may continue to study at Fordham and may be awarded financial aid. Probationary status is not automatically acquired by the student but must be granted by the dean and is restricted to two consecutive semesters.

Students on probation for two semesters may be subject to dismissal if they are judged not to be making satisfactory progress. No student may enter her/his fourth year on probation or with a deficiency. Students who do not have a cumulative index of 2.000 at the end of their junior year may be permitted to raise their index to 2.000 but only by taking courses during the first session of Fordham University’s summer school.

Students on academic probation are prohibited from participating in extracurricular activities, serving on the University’s residence hall staffs, or representing the University in intervarsity athletic competition.

### Academic Suspension

Suspension is an enforced termination of formal studies and will be granted to a student only once for a minimum of two semesters in the course of her/his college career. A student may be liable to suspension if:

1. He/she fails to maintain satisfactory academic standing as indicated by GPA.
2. He/she receives three failing grades in any semester.

If, after a period of suspension a student wished to continue her/his studies in the college, she/he must formally apply for readmission to the college. In order to be readmitted to the college the student must achieve a 2.750 GPA at an approved baccalaureate institution and show that the deficiencies that caused her/his suspension have been addressed and remedied.

### Academic Dismissal

Academic dismissal is the ultimate sanction imposed for failure to perform satisfactorily in a program of studies. A student may be dismissed from the College for any of the following reasons:

1. He/she fails to maintain satisfactory academic progress as indicated by GPA.
2. He/she attains an index of 1.000 in any semester.
3. He/she is placed on academic probation for three successive semesters.

Once a student has been dismissed from the College for academic reasons, he/she may not take courses in Fordham College at Rose Hill.

### Dismissal Appeal Policy

All academic progress decisions may be appealed, in writing, to the dean of the college. The appeal must be made within three business days of the notification of academic status. It should include documentation of any extenuating circumstances, such as a death in the immediate family or an illness. The dean will make a decision in consultation with appropriate colleagues, and that decision shall be final.

### Academic Course Failures and Removal of Deficiencies

A student who has incurred a failure in a course prescribed for a degree in Fordham College at Rose Hill or in an elective must rectify the deficiency by taking a course approved by the class dean. If the failure is in the student’s major field, the deficiency must be rectified by taking an identical or equivalent course approved by both the department adviser and the class dean.

No grade lower than C will be accepted in rectifying a deficiency. Grades received by rectifying a deficiency through attendance at one of the colleges of Fordham University will be used in computation of the student’s grade index. Grades received at other universities will not be
computed in the index. In both cases the original failing grade remains on
the transcript and is computed in the index.

To rectify a deficiency, a student is normally obliged to attend a summer
session of an approved college during the summer following the
academic year in which the failure was incurred.

Students who, with prior approval of the class dean, register for an extra
course to make up a deficiency, will be charged for the course.

Banner, which handles preregistration for courses, only allows students
who failed a course to retake that course. If a student did not fail a
course, but wants to retake it for a better grade, she/he needs to see both
the department adviser and the class dean.

Business Coursework

Undergraduate liberal arts students in all three liberal arts colleges
(FCRH, FCLC, and PCS) may take up to six courses in the Gabelli School
of Business. Students should be aware that business courses are three-
credit courses, rather than four-credit courses, typically offered in FCRH
and FCLC for juniors and seniors. Hence, when considering these minors,
students should consult with the junior or senior class dean to be sure
they will have the number of credits (124) required for graduation. As
an exception, students minoring in business administration as part
of a Bachelor of Arts or Bachelor of Science degree must complete a
minimum of 120 credits to earn their degrees (compared to 124 credits).

Please note that all of the business school courses must be taken at
Fordham University to apply.

A number of minors in business are available to students at FCRH, FCLC,
and PCS. While not all minors are available to all students, a list of their
requirements is listed here.

Registration

Matriculation

Matriculated students are those who have been admitted as candidates
for a degree. A nonmatriculated student is one who has not been
admitted as a degree candidate but has received approval to register for
credit courses.

Classification of Students

Class standing is determined by the number of credits the student has
completed:

<table>
<thead>
<tr>
<th>Year or Classification</th>
<th>Credits Completed</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Year</td>
<td>0-29</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30-59</td>
</tr>
<tr>
<td>Junior</td>
<td>60-91</td>
</tr>
<tr>
<td>Senior</td>
<td>92 and above</td>
</tr>
</tbody>
</table>

Official Registration

Fordham University recognizes that the responsibility for each student’s
academic success is shared by the student, the faculty, and the
administration. Therefore, before a student registers for coursework at
the University, preregistration advising is provided.

First- and second-year students normally register for five three-credit
courses. Third- and fourth-year students normally register for four four-
credit courses.

By way of exception, third- and fourth-year students who have achieved
a 3.700 cumulative grade point average are eligible for a scholarship
for a fifth course taken to enrich their academic program: one in the
student’s third year and one each in the semesters of the fourth year.
Such scholarship courses and credits may not be used to make up
for previous course withdrawals or incomplete registrations and may
not accelerate graduation, that is, to reduce the number of full-time
semesters a student spends in Fordham College at Rose Hill. To register
for a fifth course, approval of the appropriate class dean is necessary.

For students approved to take an additional course, but who do not
qualify for the scholarship, payment per credit above the student’s
allocated credit limit per semester is required.

Juniors and seniors with a grade point average lower than 3.000 may
not take an additional course except for unusual reasons and with the
approval of the class dean.

Late Registration

Registration at a date later than the day designated may be permitted for
serious reasons by way of exception. Students registering late are held
accountable for any class absences thus incurred.

Course Changes

By the last day of course changes, as specified in the academic calendar,
students should recognize that they have made a serious commitment
to complete the courses for which they have registered. Alterations in
registration after the last day for course changes will be allowed only
if the class dean determines that such a change is important to the
academic program of the student. Students’ non academic commitments
should be arranged so as not to interfere with coursework to which the
student is committed by registration.

Registration in Other Fordham Schools

Students matriculated in Fordham College at Rose Hill are required to
complete their core curriculum in their home school. Courses for the
major and minor should be taken at the home school or at Fordham
College at Lincoln Center; however, with departmental approval, a
limited number of these courses may be taken at Fordham School of
Professional and Continuing Studies. Elective courses not within the
major or minor may be taken at FCRH, FCLC, PCS, and GSB. No more
than six of the total courses required for graduation may be taken in the
Gabelli School of Business, and no more than 40 percent of the credits
taken at Fordham may be taken outside the home school.

Changes of Name or Address

Students are expected to notify the class dean and the Office of
Academic Records immediately of any change of address or change of
name.

Credit Limits

Full-time status is achieved by registering for 12 or more credits per term;
part-time status involves a credit load of fewer than 12 credits. Full-time
status is needed for financial aid.

Sophomores completing a B.A. degree have a credit ceiling of 20 credits.
Sophomores completing a B.S. degree, requiring additional lab courses,
have a credit limit of 21 credits. This is a result of the Core Curriculum,
which encourages sophomores to begin taking upper-level and major courses at an earlier stage in their studies.

Juniors and seniors pursuing a B.A. degree have a credit ceiling of 18 credits. Juniors and seniors completing a B.S. degree have a credit ceiling of 20 credits, allowing them to register for up to 20 credits. If students exceed their credit ceiling, they are charged for each credit above their ceiling.

**Academic Rank in Class**

In Fordham College at Rose Hill, a student’s rank in class is computed on the basis of a minimum of 24 graded credits in a regular academic year. No rank in class will be computed for a student who has fewer than 24 graded credits in an academic year.

Rank in class will be computed only once at the conclusion of the academic year. If grade changes of any kind are made after this time, rank in class will not be recomputed.

**Summer Courses**

**Summer Courses and Courses Taken at Other Universities**

Because of the concentrated nature of summer courses, students must have written permission from their class dean to take more than two summer courses or 8 credits in one summer, or more than four summer courses in the course of their college career, whether at Fordham or at another college. The decision to grant permission will be based on the student’s past academic history, as an indicator of the student’s ability to succeed in the courses. It is also recommended that students not take more than one course in each summer session, so that two courses should be taken in consecutive summer sessions whenever possible. During the fall and spring semesters students may not take courses at another college or university. However, students may receive credit for courses in which they earned a grade of C or above, taken during the summer at an accredited four-year college, or for courses taken abroad in an approved program. Students who want to take any courses at another school must have approval ahead of time and a scholastic index of 2.000 or higher (3.000 for study abroad). If the course is to be applied toward a major, permission from the chair or associate chair of that academic discipline is also necessary. Permission for summer school courses does not constitute waiver of residency requirements.

**Departments**

The following is a list of academic departments and interdisciplinary units at Fordham College at Rose Hill:

- African Studies (p. 1070)
- African and African American Studies (p. 1068)
- American Catholic Studies (p. 1070)
- American Studies (p. 1072)
- Anthropology (p. 1088)
- Art History (p. 1089)
- Biochemistry (p. 1095)
- Bioethics (p. 1096)
- Biological Sciences (p. 1097)
- Chemistry (p. 1103)
- Classical Languages and Civilization (p. 1104)
- Communication and Media Studies (p. 1106)
- Comparative Literature (p. 1115)
- Computer and Information Sciences (p. 1117)
- Disability Studies (p. 1149)
- Economics (p. 1150)
- English (p. 1152)
- Environmental Science (p. 1158)
- Environmental Studies (p. 1160)
- General Science (p. 1211)
- History (p. 1213)
- Humanitarian Studies (p. 1220)
- Integrative Neuroscience (p. 1224)
- International Political Economy (p. 1226)
- International Studies (p. 1227)
- Irish Studies (p. 1234)
- Jewish Studies (p. 1235)
- Latin American and Latino Studies (p. 1236)
- Mathematics (p. 1244)
- Medieval Studies (p. 1247)
- Middle East Studies (p. 1250)
- Modern Languages and Literatures (p. 1251)
- Music (p. 1264)
- New Media and Digital Design (p. 1268)
- Orthodox Christian Studies (p. 1271)
- Peace and Justice Studies (p. 1280)
- Philosophy (p. 1281)
- Physics and Engineering Physics (p. 1284)
- Political Science (p. 1286)
- Psychology (p. 1289)
- Religious Studies (p. 1291)
- Social Work (p. 1294)
- Sociology (p. 1308)
- Theatre and Visual Arts (p. 1325)
- Theology (p. 1331)
- Urban Studies (p. 1335)
- Women, Gender, and Sexuality Studies (p. 1336)

**Supporting Student Success**

**Assistant Dean for Student Support and Success**

At its core, Fordham University is committed to the holistic development of students’ academic and personal success. We offer proactive academic support for our students through student-centered activities and programs, intentional goal-setting, and opportunities for personal and professional discernment. The assistant dean for student support and success can assist you in these areas, as well as connect you with other available resources at the University. Students can contact the assistant dean directly (Christie-Belle Garcia, cgarcia@fordham.edu) or be referred to develop an individualized success plan.
**College Writing Center**

A service free to all Fordham students, the Writing Center encourages and helps improve student writing of all levels and across all disciplines. Our aim is to provide personalized instruction that will enhance students’ prose and help them become more confident writers. To ensure that students reach these goals, we offer up to 90 minutes of one-on-one instruction per week, during which we will assist in all stages of writing, from brainstorming, to drafting, to revising. Additionally, our tutors—a select group of masters and doctoral students—offer collaborative consultations and provide free workshops on academic writing.

Students can register and make appointments at the Writing Center’s web site. If students cannot attend their session, they should log on to the online sign-up site and cancel their appointment. If students are not present at the start of their appointment time, the session will be made available to other students. Walk-ins are also welcome whenever space is available.

Students should bring a hard copy of their assignment and be prepared to work with their tutor.

For more information about hours and locations on each campus, visit the Writing Center’s web site.

**College and Departmental Tutoring Services**

**Gabelli School of Business:** Father Boyle Society and Beta Alpha Psi members provide peer-to-peer tutoring for students seeking assistance in a business course. Interested students should visit Gabelli Access, stop by the Gabelli Study Center (Hughes Hall 4th floor), or email Brian Dunn at bdunn@fordham.edu to reserve a tutor.

**Fordham College at Rose Hill and Fordham College Lincoln Center** offer tutoring services for most academic departments, free of charge. For any subject area not listed below, please consult with the associate chair for undergraduates of the department. Please visit the website for details.

**Biological Sciences:** Biology student tutors are available for walk-in meetings in the Larkin Hall First-Floor Student Lounge.

**Chemistry:** The department offers free, walk-in tutoring for general chemistry and organic chemistry courses.

**Classical Languages (Greek and Latin):** Graduate students in the department provide tutoring for undergraduates in Greek and Latin. Students can consult either their professor or the Chair of the Department of Classics for further details.

**Computer Science:** Tutoring is available for students at both campuses in JMH 301 (RH) and LL 601 (LC). Tutors are available for Structures of Computer Science (CISC 1100) and Discrete Structures (CISC 1400). For more information, contact Palma Sisca in John Mulcahy Hall 340 or at 718-817-4480.

**Economics:** The Economics Tutoring Center is available to assist students in preparing for classes, examinations, and homework, and in mastering the fundamentals of economics. At Rose Hill, the Economics Tutoring Center is located in Dealy Hall E-535. At Lincoln Center, we use several locations for the Economics Tutoring Center. Please see Kerri Maguire in Lowenstein 924 to direct you to the tutoring center location (212-636-6381). Visit the tutoring center’s website for more information.

**English:** Each of Fordham’s three campuses has a writing center. At Rose Hill, the writing center is located in the Walsh Library Reference Area, Room 121. At Lincoln Center, it is located in the Quinn Library at 140 W. 62nd Street, Room 233. The Westchester Campus Writing Center is for Professional and Continuing Studies students and is located in Room 202. Students can register and schedule appointments online.

**Mathematics:** The Math Help Room is located in John Mulcahy Hall 410 (RH) and Lowenstein 819-C (LC).

**Modern Languages:** Free tutoring, practice, and conversation is available in all languages taught by the department. Skilled junior and senior language majors and students who are native speakers serve as tutors. No appointment is needed, but students should check individual tutors’ hours before visiting.

The language learning centers in Keating B25 (RH) and LL 412 (LC) also provide instructional technology for language students, as well as access to international television stations and films.

**Philosophy:** The Philosophers’ Society (Fordham’s undergraduate philosophy club) offers a help room for undergraduate students seeking assistance in understanding material from their core classes. Students are free to ask for help from junior and senior philosophy majors, to ask questions about material covered in their classes, and to seek advice in writing successful papers.

The Department of Philosophy also offers more formal one-on-one tutoring for students who request it. For more information, contact Margaret Donovan at mdonovan@fordham.edu.

**Physics:** The Department of Physics and Engineering Physics provides students with tutoring for introductory physics courses. Contact the department secretary, Esther Morgan, in Freeman Hall 208 or at emorgan@fordham.edu for further information.

**Information Technology Services**

**Web:** https://www.fordham.edu/IT

Fordham University’s information technology services are provided in support of students’ academic goals. Please visit the Student Technology Services website for detailed information on such services as my.fordham.edu, Fordham email accounts, computer maintenance and security tips, IT Customer Care, recommended computer specifications, cellular services, and the network.

**Fordham University Portal**

**Web:** https://my.fordham.edu

My.Fordham is the gateway to Fordham’s online resources including Blackboard; MyFiles (the university file storage system), campus and personal announcements; your Fordham Gmail and Google Apps; and registration, financial aid, bill payment, and academic course information through Banner; the student information system. Tutorials online help you students navigate and customize your portal tabs.

To gain access to the portal, you students will need to have claimed your their AccessIT ID. To do this, open your the browser and go to my.fordham.edu. In the first-time user’s box, click the “Click Here to Claim your AccessIT ID and set Your Password” link and follow the on-screen prompts. If you problems are encountered, problems please call the Help Desk at 718-817-3999 for assistance; only they can help you.
students validate your their personal information and escalate the issue if necessary.

**Computer Labs**

**Web:** [https://www.fordham.edu/computerlabs](https://www.fordham.edu/computerlabs)

Maintained by the Instructional Technology Academic Computing (ITAC) Department, public computer labs are available in the following locations:

- **Rose Hill:** Keating Hall 312, 317, 318, and the Walsh Library
- **Lincoln Center:** Lowenstein 310, 308, 306, 304
- **Westchester:** WC 217 (PCs) and WC 220 (Macs)

Here students can utilize both Macintosh and Windows computers. Access is available to a wide range of hardware and software for use by the academic community, including business applications (word processing, spreadsheets, etc), programming languages, statistical packages, utilities, access to Internet, and e-mail. Computer lab assistants are available to answer any questions.

**Walsh Library Hours**:

- Monday-Thursday: 8:30 a.m. – 12 a.m.
- Friday: 8:30 a.m. – 9 p.m.
- Saturday: 9 a.m. – 10 p.m.
- Sunday: 12 p.m. – 12 a.m.

Some computer labs may be available all night in the late night zone.

**Educational Discounts**

Special educational discounts are available on personal computers at Fordham’s computer purchases.

**Fordham IT Customer Care**

**Web:** [https://www.fordham.edu/helpIT](https://www.fordham.edu/helpIT)

Fordham IT Customer Care is available to all Fordham University faculty, staff, and students. They address questions and problems with initial computer setup, your computer’s operating system, software applications, claiming your AccessIT ID, Gmail, and wireless and network connections. IT Customer Care can be reached by phone or in person during regular business hours, and by email.

Telephone: 718-817-3999
E-mail: helpit@fordham.edu

Monday to Friday, 8 a.m. to 8 p.m.; Saturdays, 10 a.m. – 6 p.m.

**Walk-In Centers Regular Hours** (check our website for summer hours)

- **Rose Hill Campus:**
  - Hours: Monday–Friday, 8 a.m. – 8 p.m.; Saturdays, 10 a.m. – 6 p.m.
  - Location: McGinley Center, Room 229

- **Lincoln Center Campus:**
  - Hours: Monday–Friday, 10 a.m. – 6 p.m.; closed on Saturdays
  - Location: Lowenstein, Room SL19

- **Resident Technology Consultant Program**
  - **Web:** [https://www.fordham.edu/RTC](https://www.fordham.edu/RTC)

If you live in the residence halls, you can contact your Resident Technology Consultant (RTC) for in-room assistance. The RTC is the primary source of technology related assistance for students living in the residence halls and can help with many of the same issues as IT Customer Care.

**Fordham School of Professional and Continuing Studies**

The Fordham University diploma has stood for quality for more than 160 years. And for more than 50 of those years, Fordham’s adult degree program has been among the most highly regarded in the tristate area in pursuing its mission—to provide an outstanding academic program for men and women who are also engaged with career or family responsibilities.

At the heart of Fordham’s reputation, of course, is the quality of its educational program—a program born of the Jesuit tradition of education and built on the belief that a university must do more than equip a graduate with a particular skill or specialized capability. Few students are more pragmatic than adult students. And few understand better than experienced adults that the best program is one that multiplies their options and prepares them not just for the next opportunity but also for the many others that will follow. This defines the liberal arts tradition and the experience that will engage you at Fordham School of Professional and Continuing Studies. It is the educational experience all Fordham students share.

Fordham School of Professional and Continuing Studies enables working adults and other part-time students to choose among three convenient campuses—or to study at all three as their schedules and interests require. Evening, weekend, and online classes are offered at the 90-acre Rose Hill campus, adjacent to the New York Botanical Garden in the Northern Bronx; at the Lincoln Center campus, in the cultural heart of Manhattan at 60th Street and Columbus Avenue; and at the Westchester campus in West Harrison, just off Route 287, near the Hutchinson River Parkway and Route 684.

At each campus, you will find a full-service school dedicated to adult learners in scheduling, advising, activities, policies, and procedures. Most important, you will have access to the faculty and programs of one of the nation’s most highly regarded universities and the opportunity to become part of the Fordham University tradition.

Visit our website at [fordham.edu/pcs](https://www.fordham.edu/pcs).

**Alumni Opportunities**

All graduates of Fordham School of Professional and Continuing Studies (PCS) are members of the alumni association by virtue of their graduation. A board of interested and active alumni represents the PCS alumni constituency. The board partners with the Office of Alumni Relations to provide opportunities that support and advance PCS through innovative programs and events. The goal of all alumni activities is to foster lifelong relationships between alumni and Fordham and to create ways for alumni to share their talents and interests with the University.

The Office of Alumni Relations also sponsors numerous opportunities for PCS alumni to interact with alumni from all of the schools within the University. The young alumni program focuses on the specific needs of alumni who have graduated within the last 10 years. The regional club program maintains Fordham’s national alumni network. The cultural program capitalizes on the unique benefits of New York City for metro area alumni. Rampass, the alumni I.D. card, affords alumni special discounts and allows alumni to easily return to all campuses.
For more information about opportunities to get involved with the alumni program, please contact the Office of Alumni Relations at 212-636-6520.

### Majors

Fordham School of Professional and Continuing Studies offers the bachelor of arts degree and the bachelor of science degree, each of which requires the successful completion of 124 credits. The curriculum for the undergraduate degree program is organized into three parts: the Core Curriculum, the major, and elective courses.

### The Major

Students are expected to choose a major field of study by the time they have accumulated 60 credits (including any transfer credits) toward the bachelor's degree. The courses required for the completion of each major are indicated in the description of each major are linked below.

Many major fields of study are currently available to students of Fordham School of Professional and Continuing Studies and can be completed entirely through evening, weekend, or online classes at Rose Hill, Lincoln Center, or Westchester.

- African and African American Studies (p. 1069)
- Art History (p. 1090)
- Business (p. 1273)
- Communications (p. 1274)
- Economics (p. 1151)
- Education (B.A./M.S.T. Track)
- English (p. 1155)
- History (p. 1214)
- Individualized Major (p. 1222)
- Information Technology and Systems (p. 1276)
- International Studies (p. 1228)
- Latin American and Latino Studies (p. 1237)
- Organizational Leadership (p. 1277)
- Philosophy (p. 1282)
- Political Science (p. 1287)
- Psychology (p. 1290)
- Real Estate (p. 1279)
- Religious Studies (p. 1292)
- Social Work (p. 1307)
- Sociology (p. 1309)
- Theology (p. 1332)
- Visual Arts (p. 1329)
- Women, Gender, and Sexuality Studies (p. 1337)

The following fields of study can also be selected as majors, but many of the courses required are generally offered during the day at Rose Hill or Lincoln Center. PCS students considering these majors should do so only if their schedules are such that they are able to attend day classes to fulfill major requirements.

- Anthropology (p. 1089)
- American Studies (p. 1072)
- Biological Sciences (p. 1098)
- Chemistry (p. 1103)
- Classical Civilization (p. 1105)
- Classical Languages (p. 1105)
- Computer Science (p. 1119)
- Engineering/Physics (p. 1285)
- General Science (p. 1211)
- Mathematics (p. 1246)
- Mathematics/Economics (p. 1247)
- Medieval Studies (p. 1248)
- Middle East Studies (p. 1250)
- French Studies (p. 1256)
- German Studies (p. 1257)
- Italian Studies (p. 1259)
- Music (p. 1265)
- Natural Science (p. 1266)
- Physics (p. 1285)
- Spanish Studies (p. 1263)
- Theater (p. 1327)
- Urban Studies (p. 1335)

### Minors

#### The Minor

Selection of a minor is optional. It constitutes completion of at least six courses in a field of study other than the major and is intended to provide some structure and guidance for a student’s pursuit of knowledge in a second area of interest. The minor, as well as the major, is indicated on the student’s transcript at graduation. With thoughtful selection of their elective courses, most students can complete a minor without exceeding the 124 credits required for the bachelor’s degree.

Minors can be completed in almost every field in which the college offers a major; requirements are listed in each academic department's section of this bulletin.

For information on the minors in business, see the page on Business minors in the Gabelli School of Business.

- African Studies Minor (p. 1070)
- African and African American Studies Minor (p. 1069)
- American Studies Minor (p. 1087)
- Anthropology Minor (p. 1089)
- Arabic Minor (p. 1253)
- Art History Minor (p. 1091)
- Biochemistry Minor (p. 1095)
- Bioethics Minor (p. 1096)
- Bioinformatics Minor (p. 1118)
- Business Administration Minor (p. 1100)
- Classical Civilization Minor (p. 1105)
- Classical Languages Minor (p. 1106)
- Comparative Literature Minor (p. 1117)
- Computer Science Minor (p. 1120)
- Creative Writing Minor (p. 1154)
- Cybersecurity Minor (p. 1120)
- Disability Studies Minor (p. 1149)
- Economics Minor (p. 1151)
- English Minor (p. 1158)
• Environmental Studies Minor (p. 1162)
• French Minor (p. 1255)
• German Minor (p. 1257)
• History Minor (p. 1217)
• Humanitarian Studies Minor (p. 1222)
• Information Science Minor (p. 1121)
• Irish Studies Minor (p. 1234)
• Italian Minor (p. 1259)
• Jewish Studies Minor (p. 1235)
• Latin American and Latino Studies Minor (p. 1240)
• Linguistics Minor (p. 1260)
• Mandarin Chinese Minor (p. 1261)
• Mathematics Minor (p. 1247)
• Medieval Studies Minor (p. 1250)
• Middle East Studies Minor (p. 1251)
• Music Minor (p. 1266)
• New Media and Digital Design Minor (p. 1270)
• Organizational Leadership Minor (p. 1277)
• Orthodox Christian Studies Minor (p. 1272)
• Peace and Justice Studies Minor (p. 1281)
• Philosophy Minor (p. 1284)
• Political Science Minor (p. 1289)
• Psychology Minor (p. 1291)
• Real Estate Minor (p. 1280)
• Religious Studies Minor (p. 1292)
• Russian Minor (p. 1262)
• Sociology Minor (p. 1310)
• Spanish Minor (p. 1263)
• Theology Religious Studies Minor (p. 1334)
• Urban Studies Minor (p. 1336)
• Visual Arts Minor (p. 1331)
• Women, Gender, and Sexuality Studies Minor (p. 1337)

Special Programs
• College at Sixty (p. 1273)
• Credit for Experiential Learning (p. 1275)
• Digital and Social Media Professional Certificate Program (p. 1276)
• Honors Program at PCS (p. 1220)
• Post-Baccalaureate Pre-Medical/Pre-Health Program (p. 1278)

Academic Curriculum

Core Curriculum
In keeping with the Jesuit educational philosophy, the PCS core curriculum is designed to provide the student with a broad humanistic background. As students’ majors and electives allow specialization and individualization in their studies, the core curriculum assures that every student’s undergraduate education is anchored, as a whole, in the liberal arts. The PCS core enables students to go beyond mere proficiency and achieve a level of excellence in the essential skills of literacy. Excellence in the expressive skills of writing and speaking with logical clarity is founded on the arts of reading, listening, observing, thinking, and mastery and thorough understanding of the topic under consideration. Education in the liberal arts has traditionally been called “liberal” for several reasons, but among them is the fact that these arts engender the ability to form judgments based on sound reasoning, free of prejudice and free of insufficiently examined premises. The PCS core enables the student to sample a range of academic disciplines and fields of study, and provides a solid foundation for achievement in any of them.

The core curriculum consists of 12 courses. Advanced placement credit and college courses taken elsewhere may be considered for core transfer credit.

ENGL 1101 Composition I: One Required Course (dependent on advisement)
Instruction in sentence and paragraph construction, reading comprehension skills and analysis, the basic principles of grammar with an emphasis on diagnosing and solving persistent problems, and principles of argumentation and evidence. Weekly assignments and regular grammar exercises to build confidences and competence in college writing.

ENGL 1102 Composition II: One Required Course
This course will build competence and confidence in the use of language for analytic, dialogic, and expressive purposes, develop basic reasoning skills and skills of close and attentive reading, enrich an appreciation of the power and importance of language, and help students learn sound practices with respect to conventions of citation, quotation, paraphrase, and documentation. Prerequisite: Depending on placement, ENGL 1101 Composition I may be required. To move to ENGL 1102 Composition II from ENGL 1101 Composition I, a grade of C or better is required.

ENGL 2000 Texts and Contexts: One Required Course
The introductory core course in English literature, which may include literature in translation, will teach the arts of literary interpretation by developing techniques of close reading, an appreciation of the relations among literary works and the contexts in which they are written and read, and an ability to write critically about the interplay between text and context. The sections of this course will offer students choice among thematic and topical foci, which will be specified in each section title and spelled out in the section’s description. Prerequisite: ENGL 1102 Composition II

PHIL 1000 Philosophy of Human Nature: One Required Course
A philosophical reflection on the central metaphysical and epistemological questions surrounding human nature, which includes discussion of some or all of the following problems: the body/soul distinction and the mind/body problem; the problem of knowledge (relativism, skepticism, the objectivity of knowledge, faith, and reason); free will and determinism; and self and society (subjectivity, personhood, sociality, historicity, and tradition). At least 60 percent of each section of the course is devoted to readings from Plato, Aristotle, Augustine, Aquinas, and Descartes. Each section includes some writings by at least one contemporary figure.

THEO 1000 Faith and Critical Reason: One Required Course
An introduction to fundamental theological issues, including the dialectic between religion and modernity that has shaped our cultural heritage, and some of the ways that various cultures and individuals have confronted the pressing questions of meaning in human life. When appropriate, comparisons with religious traditions other than Christianity are made.
**HIST ****: Understanding Historical Change: One Required Course**

Through the introduction to the discipline of history, students will begin to achieve knowledge of the structure of societies, how they function, and how they change. Each section of the course will consider how to assess evidence, identify and evaluate differing and often contradictory explanations and arguments, and appraise the relative scale and importance of particular changes in the past. Students will be able to choose from different sections of the course each with the title Understanding Historical Change, and a descriptive subtitle such as Ancient Greece, American History, etc.

The following courses have the HC (Understanding Historical Change) attribute:

**Fine Arts OR Social Science: One Required Course from Either Area**

**Fine Arts Option**

By seeing or hearing visual or musical works and understanding them students learn to appreciate the non-verbal and how such works both are influenced by and exercise influence on their cultural milieu. The courses take advantage of and encourage students to appreciate the extensive cultural offerings of New York City.

**Social Science Option**

Students will be introduced to the ways of knowing characteristic of the social sciences through introductory courses in anthropology, communications, economics, political science, psychology, and sociology. The courses will usually focus on a substantive concern of the social science, and include historical overviews, consideration of the variety of research methods typically used (especially empirical research), reviews of the major theoretical orientations and models, and real-world implications and applications to practical problems.

**Mathematical/Computational Reasoning: One Required Course**

The aim of this requirement is to develop the fundamental skills involved in mathematical and computational approaches to problem solving, reasoning, and an understanding of our world. These skills also form the basis for advanced reasoning in many areas and provide a basis for testing logic, solving problems, and evaluating mathematical and computational arguments and evidence in daily life. After completing this requirement, students will be prepared to explore quantitative and computational issues in the natural sciences, the social sciences, and the humanities.

Science majors will fulfill this core requirement through their major courses.

Advanced Disciplinary Study

This portion of the core enables students to deepen and extend their disciplinary study and enrich their major courses, which they will be taking concurrently, through a diverse spectrum of advanced courses, thereby assuring the achievement of intellectual perspective with breadth. The following upper-level courses will build on the knowledge, skills and methodological foundations of the disciplinary introductions to develop and extend their awareness of questions and approaches outside their majors. Courses at this level will generally be numbered in the 3000 range and may be taken when students have completed the introductory disciplinary courses in the area..

PHIL 3000 Philosophical Ethics: One Required Course

This course involves philosophical reflection on the major normative ethical theories underlying moral decision making in our everyday lives. The principal focus of the course is a systematic introduction to the main normative ethical theories, i.e., eudaimonism, natural law ethics, deontological ethics, utilitarianism, virtue ethics, and feminism. The differences among these approaches are illuminated by studying various moral issues. In each section of the course, at least half the readings will be selected from Aristotle and Kant. Each section will include writings by at least one contemporary figure..

Sacred Texts and Traditions: One Required Course

The second theology course, selected from a group of offerings relating to sacred texts and traditions, builds on the foundation of critical reasoning about traditions in the first theology course through analytical study of one religious textual tradition. The sections of this course will offer students a variety of texts from which to choose. All sections
Academic Policies and Procedures pertaining to all undergraduate disciplines.

This course will be designated as a Senior Values Seminar, in the 4000 range, and will cover topics in ethical issues and moral choices through a variety of disciplines.

Advanced Disciplinary Course in Literature, History, or Social Science: One Required Course
Following the introductory literature, history and social science courses, this requirement will enable the student to achieve a sharper focus and more detailed knowledge of complex literary, historical, or social methods, materials, interactions and processes. To fulfill the requirement, one advanced disciplinary course will be taken in one of the following disciplines:

- an advanced literature course numbered 2000 or above, or
- an advanced history course numbered 2000 or above, or
- an advanced social science course numbered 2000 or above

Senior Values Seminar: One Required Course
This course will be designated as a Senior Values Seminar, in the 4000 range, and will cover topics in ethical issues and moral choices through a variety of disciplines.

Academic Policies and Procedures

- Withdrawal from the University and Leaves of Absence (p. 1060)

Academic Policies and Procedures, university-wide:

- Affirmative Action Policy (p. 1057)
- Campus Safety (p. 1057)
- Equity in Athletics Disclosure Act (p. 1057)
- Nondiscrimination and Title IX Coordinator (p. 1057)
- Recruitment of Jesuits to the Faculty (p. 1057)
- Reserved Rights (p. 1058)
- Student Records (p. 1058)
- Support Services for Students with Disabilities (p. 1059)
- University Code of Conduct (p. 1059)

Academic Advising

The advising system in Fordham School of Professional and Continuing Studies is intended to ensure that students are well informed concerning opportunities and requirements at the start of their Fordham careers and repeated throughout. It is also intended to foster the development of personal relationships with deans and faculty through frequent interaction, which is encouraged and facilitated at all times, and required at certain key points in the student's career.

Advisement is an ongoing activity beginning with informational materials and counseling during the admissions process, the starting of a Degree Progress Worksheet for each student, and the presentation of a thorough orientation program. The deans provide assistance and clearance for the student’s first registration for classes. Deans and faculty conduct workshops on topics of interest to new students (study skills, time management, interest assessment, choosing a major, etc.) to extend and reinforce orientation during the term. The student’s second registration is also a “personal” one, in that he or she is cleared to register only after conferring with a dean. For the third and succeeding registrations, consultation with deans and faculty is encouraged and facilitated, but, in the interest of convenience for working adults, will not be required for registration clearance as long as the student is in good academic standing.

When the student declares his or her choice of major, a faculty member of that academic department or the appointed advising dean meets with the student to ensure that departmental requirements are understood and to assist with course planning.

Academic Progress

Academic Progress Policy

Academic progress toward a degree must be maintained for the continuation of study in Fordham School of Professional and Continuing Studies. Satisfactory academic progress, as defined by the school, must also be maintained to receive financial aid.

Fordham University recognizes that the responsibility for seeing that each student succeeds academically is shared by the student, the faculty, and the administration. Therefore, before a student begins coursework at the University, preregistration advising is provided.

For graduation, the student must successfully fulfill the following requirements:

1. Completion of 124 credits with a minimum grade point average of 2.0.
2. At least 49 of those credits must be earned through Fordham courses, exclusive of courses taken on a pass/fail basis; Life
Experience credits; or credits awarded on the basis of CLEP exams, DANTES exams, or NPONSI. (See the Other Academic Programs section of this bulletin.)

3. The completion of the University Core Curriculum that provides students with a broad-based exposure to the liberal arts and sciences.

4. Completion of a major with a minimum grade point average of 2.0.

Restrictions on the use of grade W (course withdrawal) and the temporary grades of ABS (absent from final exam) or INC (coursework overdue) preserve the character of a Fordham education. Permission to have such grades is the recognition by the University of the exigencies of individual circumstances. However, a pattern of reliance on these grades contravenes the intentions of an academic program. In addition, a pattern of reliance on grades of W, ABS and INC will be taken as evidence of failing to maintain reasonable academic progress. Repeated courses will be calculated into a student’s GPA and will not replace the original grade, but only the repeated course will be counted toward graduation requirements. In addition, the satisfactory completion of fewer credits than stipulated may warrant dismissal for failure to maintain satisfactory progress toward the Fordham School of Professional and Continuing Studies bachelor’s degree.

Minimum Credit Completion Policy

<table>
<thead>
<tr>
<th>Year or Classification</th>
<th>Credits Attempted 1</th>
<th>Percentage Completed 1</th>
<th>Minimum Credits Completed 2</th>
</tr>
</thead>
<tbody>
<tr>

<td>greater than 92</td>
<td>80%</td>
<td>99-100</td>
</tr>
</tbody>
</table>

1 Transfer credits accepted by Fordham are counted in both credits attempted and credits completed, although the grades are not counted in the GPA.

2 For Fordham School of Professional and Continuing Studies, pursuing a degree on a part-time basis credits earned will be proportionate. For example, half-time students should complete half of these credits.

Fordham School of Professional and Continuing Studies has established minimum standards of academic progress for each year of attendance. Failure to maintain these standards will result in being placed on academic probation, and the student may be subject to suspension and dismissal. Students on probation may continue to study at Fordham and may be awarded financial aid in keeping with their status, but they should recognize the seriousness of probation. Both full- and part-time students on probation for two terms may be subject to dismissal if they are judged not to be making satisfactory progress toward achieving good academic standing. In addition, students may be subject to dismissal if their GPA falls below those indicated.

Students who are demonstrating substantial progress toward meeting the minimum requirements may petition for an extension to their probation status, which may be granted by the dean of PCS subject to a review and recommendation by the PCS academic affairs committee.

Academic Status

<td>Third or Junior</td>
<td>1.99 or less</td>
<td>1.99 or less</td>
</tr>
<tr>
<td>Graduation</td>
<td>2.00</td>
<td>—</td>
</tr>
</tbody>
</table>

Please note: Academic status standards differ slightly for students receiving funds from the New York State Tuition Assistance Program (TAP). A schedule is available at the Office of Academic Records.

Appeals Process

All academic progress decisions may be appealed, in writing, to the dean of the school. The appeal must be made within two weeks of the notification of academic status. Extenuating circumstances, such as a death in the immediate family, illness, etc., should be included in the documentation provided. The decision of the dean shall be final.

Procedure for Appealing a Course Grade

NOTE: A disagreement about the subjective evaluation of the student’s performance in the class is NOT grounds for appeal. It is assumed that the instructor, as the subject matter expert, is the one most qualified to evaluate any and all work submitted. Therefore, in order for an appeal to be considered, students must demonstrate an objective discrepancy between the way in which they were evaluated and the grading policies and procedures outlined in the syllabus.

Only final grades may be appealed. If students receive a final grade in a course that they wish to appeal, they must appeal the grade prior to the completion of the next semester in which the course was taken even if they are not in attendance; otherwise, the appeal will not be considered. Once students have graduated and have a degree awarded by the University, a grade appeal will not be considered.

Students who believe they have received a grade that does not fairly reflect their academic performance must consider the following before beginning the process of a grade appeal:

1. Double-check the calculation of the final numerical grades for the class based on the percentages each exam/project was worth as stated in the instructor’s syllabus.

2. Objectively assess your attendance record. As partners in learning, students are expected to attend class and contribute.

3. Objectively assess the quality of class participation. If a student’s grade appeal is based solely on a difference of opinion about class participation, it will be virtually impossible to resolve this issue as only the instructor will be able to evaluate this.

4. Compare all of the above with the original class syllabus to determine whether all requirements have been fulfilled as stated by the instructor.

5. Check that the work submitted met the requirements enumerated by the instructor. For example, if a student submitted a well-written and well-researched paper on the life of Plato but the instructor specifically asked for a comparative study of the ideas of Plato, Aristotle, and Socrates, the grade will not be reviewed since the student did not follow instructions as to what was required.

If after all considerations students determine that a grade appeal is warranted, then the following process should be followed:
Level 1: Faculty
Students should contact the instructor to discuss any concerns about their grade PRIOR to beginning any grade appeal process. Students should contact the instructor by the e-mail provided on the syllabus to detail the reason for the grade appeal. The student should initiate contact within 10 days of the posting of the final grade for the semester in which the course was taken.

Level 2: Written Appeal to the PCS Grade Appeals Committee
If all attempts have been made to contact the instructor and failed, or the student has successfully contacted the instructor in writing and subsequent communication did not resolve the dispute by clarifying the basis on which the grade was given, or the instructor clarified the basis on which the grade was given and the student still disagrees with the instructor’s assessment, the student may begin the formal grade appeal process by submitting the appeal to the Associate Dean for Academic Programs. The appeal must be received within 10 days of the faculty’s response.

NOTE: A disagreement about the subjective evaluation of the student’s performance in the class is NOT grounds for appeal. It is assumed that the instructor, as the subject matter expert, is the one most qualified to evaluate any and all work submitted. Therefore, in order for an appeal to be considered, the student must demonstrate an objective discrepancy between the way in which s/he was evaluated and the grading policies and procedures outlined in the syllabus.

By submitting a grade appeal the student acknowledges that upon review and investigation, the determination may result in a final grade:

• Which may be the same as that of the original grade.
• Which may be higher as that of the original grade.
• Which may be lower as that of the original grade.

The Associate Dean for Academic Programs will guide the student as to what materials will be required to submit to start the appeal process that will be reviewed by the PCS Grade Appeals Committee. The grade appeals committee convenes once a semester approximately 6 weeks after the first day of classes to review all outstanding grade appeals. Students will be notified in writing of the decision within 30 days of the meeting of the PCS Grade Appeals Committee.

Level 3: Written Appeal to the Dean
If after receiving the decision in writing from the PCS Grade Appeals Committee, the student remains in disagreement, the final step is to submit an appeal in writing to the Dean of the School of Professional and Continuing Studies within 10 days.

Grade appeals must include:

1. A letter to the dean indicating why the decision rendered by the PCS Grade Appeal Committee is being appealed.
2. A copy of the decision letter received from the PCS Grade Appeal Committee.
3. A copy of the supporting materials submitted to the PCS Grade Appeals Committee.

The dean will only consider appeals based on a lack of due process or evidence that relevant information was not taken into consideration. The final decision rendered by the dean will be the grade that appears on the student’s official Fordham University transcript. The student must be prepared for a final decision that keeps the original grade, is a higher grade, or lowers the original grade, since no further grade appeals of the same course at the University will be considered.

Dismissal Appeal Policy
All academic progress decisions may be appealed, in writing, to the dean of the college. The appeal must be made within three business days of the notification of academic status. It should include documentation of any extenuating circumstances, such as a death in the immediate family or an illness. The dean will make a decision in consultation with appropriate colleagues, and that decision shall be final.

Admissions
Consistent with its mission and traditions, Fordham School of Professional and Continuing Studies welcomes inquiries and applications from men and women who wish to begin or resume their undergraduate degree study primarily through evening, weekend, and online courses, and usually on a part-time basis in light of their career and/or family responsibilities. A candidate applying for admission to Fordham University directly from high school will generally be referred to the full-time day colleges of the University.

Admission requirements are as follows:

1. Submission of a completed application for admission.
2. Candidates meet with the assistant dean of admission at the campus of their choice to discuss the program.
3. A brief College Skills Assessment examination is intended to ensure that all accepted students have the skills requisite for success in a challenging university program. The assessment often identifies areas in need of improvement, and some candidates are admitted on condition that they attend to them early in their Fordham careers. The assessment can be waived in cases where, in the judgment of the admission officer, sufficient skills have been demonstrated in other ways—for example, through recent performance at another accredited university.
4. All applicants must submit documentation of the highest educational level at which they have studied. Therefore:
   • Applicants who have prior college experience must submit an official transcript be sent to Fordham.
   • Applicants who have not attended college must submit or present evidence of having graduated from high school (official transcript or original diploma) or having earned a General Equivalency Diploma. Applicants can present the actual certificate or request that the NYS Education Department send an official GED score report to Fordham by calling 518-474-5906.
   • Applicants who are unable to provide documentation in a timely manner may, at the discretion of the admission officer, and based on their performance in the College Skills Assessment, be admitted conditionally for their first term of study. Further registration for courses will not be permitted, however, until the required documentation is submitted.
5. Applicants may, if they wish, submit other information relevant to their candidacy, such as educational achievements outside formal academic settings, community activities, employment history, and the like.

Rather than using rigid cutoff scores or other predetermined criteria, the admission committee evaluates each application individually. An effort is
made to assess ability, previous achievement, motivation, and maturity of purpose, all of which are essential to success in university studies.

An admission decision and evaluation of transfer credits will be issued as soon as possible after the review of submitted materials and the interview.

Students may apply for admission for either the fall or spring terms. When admitted, they will be invited to an orientation program for new students and will be assisted in their selection of classes.

Individuals who do not intend to pursue a degree can be admitted to enable them to attend the specific courses of their choice, or to complete the courses required for one of several certificate programs that the College offers.

For further information or to schedule an admission consultation, candidates should call the Fordham School of Professional Studies admissions office at the campus of their choice:

Lincoln Center: 212-636-7333
Rose Hill: 718-817-2600
Westchester: 914-367-3302

Information is also available at https://www.pcs.fordham.edu.

**Applicants for Readmission**

Students not in attendance for a semester or more, and not on an official leave of absence, must be readmitted before they can register for classes.

For more information, contact the PCS office at the campus you will be attending.

**Business Coursework**

Undergraduate liberal arts students in all three liberal arts colleges (FCRH, FCLC, and PCS) may take up to six courses in the Gabelli School of Business. Students should be aware that business courses are three-credit courses, rather than four-credit courses, typically offered in FCRH and FCLC for juniors and seniors. Hence, when considering these minors, students should consult with the junior or senior class dean to be sure they will have the number of credits (124) required for graduation. As an exception, students minoring in business administration as part of a Bachelor of Arts or Bachelor of Science degree must complete a minimum of 120 credits to earn their degrees (compared to 124 credits).

Please note that all of the business school courses must be taken at Fordham University to apply.

A number of minors in business are available to students at FCRH, FCLC, and PCS. While not all minors are available to all students, a list of their requirements is listed here.

**Financial Aid and Scholarships**

Financial aid is available for both full- and part-time students. For purposes of financial aid, students who take 12 or more credits in both the fall and spring semesters are considered full-time students. The Office of Student Financial Services on each campus assists students in identifying programs of grants, scholarships, and loans with which to fund part of their education. They also assist with the application process for Federal Pell Grants, New York State’s Tuition Assistance Plan (TAP), Aid to Part-Time Students (APTS), the Stafford Student Loan, and the SLS Loan and can provide information on the Lifetime Learning Credit.

In addition to the availability of these aid and loan programs, Fordham is one of the few universities which offers grant and scholarship funds from its own resources to assist adult learners. In Fordham School of Professional and Continuing Studies, students can qualify for.

**Dean's Scholarships** of $3,500 annually, for newly admitted students whose prior records and/or performance in the admissions skills assessment demonstrate outstanding promise. Scholarships are renewable for up to five years, assuming a B average and the completion of at least 12 credits per year.

**Achievement Awards** of $3,500 based on class rank for the preceding academic year during which the student completed a total of at least 12 credits with a minimum GPA of 3.6.

**University Grants-in-Aid** ranging from $1,500 to $3,800 annually, based primarily on financial need.

**Public Service Grants** provide a tuition reduction of 25 percent for all uniformed and civilian employees of the New York City Police Department; for all uniformed and civilian employees of the New York City Fire Department; and for all employees of Westchester County (including the Medical Center) or municipalities within the county. All candidates for the Public Service Grants will be required to submit documentation of employment.

**Dancer Discount Program** provides a 33 percent discount to full-time professional dancers.

**The Ully Hirsch Scholarship** is awarded annually to a student until degree completion who maintains academic excellence by achieving a minimum 3.0 cumulative GPA after earning at least 24 credits. Information about applications is posted in early spring for the award in the next academic year.

**The Tognino Family Scholarship**, established by John N. Tognino, PCS ’75, provides a scholarship award to a business, economics or organizational leadership major in the School of Professional and Continuing Studies who demonstrates good academic achievement and financial need. Eligible students must have at least 24 earned credits with a minimum 3.0 GPA. Applications are available each spring.

**The Charlotte W. Newcombe Foundation Scholarships** are awarded to women students who are age 25 or over, have earned at least 60 credits with a 3.0 cumulative GPA, and who show financial need. Applications are available in late spring.

**The Morton J. Levy Scholarship** is awarded annually until degree completion to a student who has demonstrated academic excellence by achieving a 3.0 GPA after earning at least 24 credits and who has demonstrated financial need. Preference is given to adult, nontraditional male students. Information about applications is posted in early spring for the award in the next academic year.

**Grade Appeal Process (PCS Students)**

Only final grades may be appealed. If students receive a final grade in a course that they wish to appeal, they must appeal the grade prior to the completion of the next semester in which the course was taken even if they are not in attendance; otherwise, the appeal will not be

Updated: 07-27-2020
considered. Once students have graduated and have a degree awarded by the University, a grade appeal will not be considered.

Complete the Grade Appeal Form

Students who believe they have received a grade that does not fairly reflect their academic performance must consider the following before beginning the process of a grade appeal:

1. Double-check the calculation of the final numerical grades for the class based on the percentages each exam/project was worth as stated in the instructor’s syllabus.
2. Objectively assess your attendance record. As partners in learning, students are expected to attend class and contribute.
3. Objectively assess the quality of class participation. If a student’s grade appeal is based solely on a difference of opinion about class participation, it will be virtually impossible to resolve this issue as only the instructor will be able to evaluate this.
4. Compare all of the above with the original class syllabus to determine whether all requirements have been fulfilled as stated by the instructor.
5. Check that the work submitted met the requirements enumerated by the instructor. For example, if a student submitted a well-written and well-researched paper on the life of Plato but the instructor specifically asked for a comparative study of the ideas of Plato, Aristotle, and Socrates, the grade will not be reviewed since the student did not follow instructions as to what was required.

If after all considerations students determine that a grade appeal is warranted, then the following process should be followed:

Level 1: Faculty

Students should contact the instructor to discuss any concerns about their grade prior to beginning any grade appeal process. Students should contact the instructor by the email provided on the syllabus to detail the reason for the grade appeal. The student should initiate contact within 10 days of the posting of the final grade for the semester in which the course was taken.

Level 2: Written Appeal to the PCS Grade Appeals Committee

If all attempts have been made to contact the instructor and failed, or the student has successfully contacted the instructor in writing and subsequent communication did not resolve the dispute by clarifying the basis on which the grade was given, or the instructor clarified the basis on which the grade was given and the student still disagrees with the instructor’s assessment, the student may begin the formal grade appeal process by submitting the appeal to the Associate Dean for Academic Programs. The appeal must be received within 10 days of the faculty’s response.

Note: A disagreement about the subjective evaluation of the student’s performance in the class is not grounds for appeal. It is assumed that the instructor, as the subject matter expert, is the one most qualified to evaluate any and all work submitted. Therefore, in order for an appeal to be considered, the student must demonstrate an objective discrepancy between the way in which s/he was evaluated and the grading policies and procedures outlined in the syllabus. By submitting a grade appeal the student acknowledges that upon review and investigation, the determination may result in a final grade:

- Which may be the same as that of the original grade.
- Which may be higher as that of the original grade.
- Which may be lower as that of the original grade.

The Associate Dean for Academic Programs will guide the student as to what materials will be required to submit to start the appeal process that will be reviewed by the PCS Grade Appeals Committee. The grade appeals committee convenes once a semester approximately 6 weeks after the first day of classes to review all outstanding grade appeals. Students will be notified in writing of the decision within 30 days of the meeting of the PCS Grade Appeals Committee.

Complete the Grade Appeal Form

Level 3: Written Appeal to the Dean

If after receiving the decision in writing from the PCS Grade Appeals Committee, the student remains in disagreement, the final step is to submit an appeal in writing to the Dean of the School of Professional and Continuing Studies within 10 days. Grade appeals must include:

1. a letter to the dean indicating why the decision rendered by the PCS Grade Appeal Committee is being appealed.
2. a copy of the decision letter received from the PCS Grade Appeal Committee.
3. a copy of the supporting materials submitted to the PCS Grade Appeals Committee.

The dean will only consider appeals based on a lack of due process or evidence that relevant information was not taken into consideration. The final decision rendered by the dean will be the grade that appears on the student’s official Fordham University transcript. The student must be prepared for a final decision that keeps the original grade, is a higher grade, or lowers the original grade, since no further grade appeals of the same course at the University will be considered.

These instructions supersede any prior versions of the PCS grade appeal process.

International Students

Fordham University welcomes international students and currently registers students from about 40 different countries. The Office of International Students serves as a resource center for international students and facilitates their adjustment to life in the United States. A special orientation is held each semester for new international students. Any student unable to participate in orientation must register with the office within two weeks of starting classes. The office assists students in matters concerning immigration, such as visas and I-20 or IAM/P-66 forms, employment, and travel authorizations. The office also provides personal counseling, information on health insurance requirements and banking, and programs to promote cross-cultural and international understanding. Students fluent in English are invited to apply to the degree programs. Those students who are not proficient in the English language will be referred to the Institute of American Language and Culture.

Students are encouraged to complete the High School Certificate, the General Certificate of Education at the Ordinary Level (five passes minimum), the Baccalaureate, Maturita, or the Abitur. All submitted documents must be accompanied by a notarized English translation. Proof of financial responsibility and of thorough competence in the use
and comprehension of the English language should be included among these documents. This last requirement is determined by the results of the Test of English as a Foreign Language. This test is given by the Educational Testing Service, and complete information concerning the test can be obtained by writing to

TOEFL
Educational Testing Service
P.O. Box 6151
Princeton, NJ 08451

International students who are at least 21 years of age are asked to submit the above required material to the PCS Admissions Office at the campus of their choice by July 15 for the fall semester and by November 15 for the spring semester, and also to supply the following: admissions application and fee, personal statement, any official college or university records with certified English translation, and two letters of recommendation. Adult international students will be required to take a placement examination on arrival.

**Nonmatriculated Students**

Qualified students who are not enrolled in a degree program at Fordham are welcome to register for classes. However, they are not eligible for state, federal, or institutional aid through Fordham University.

**Visiting Students**

Those students who are matriculated at another school or university and who wish to attend Fordham may apply for admission at the campus of their choice. A visiting student may maintain nonmatriculated status for one academic year. After such time, students must receive approval in order to continue their studies. Students should contact their degree-granting institution in regard to financial aid and course approval. Students should request that the Office of Enrollment Services send a transcript of their Fordham grades to their degree-granting institution.

**Alumni Audit**

A graduate of any school within Fordham University may audit a course for a nominal fee on a space-available basis; it will not appear on a transcript, and the student receives no credit. Alumni should contact the Office of the Dean for details.

**Registration**

**Matriculation**

Matriculated students are those who have been admitted as candidates for a degree. A nonmatriculated student is one who has not been admitted as a degree candidate but has received approval to register for credit courses.

**Classification of Students**

Class standing is determined by the number of credits the student has completed.

<table>
<thead>
<tr>
<th>Year or Classification</th>
<th>Credits Completed</th>
</tr>
</thead>
<tbody>
<tr>
<td>First Year</td>
<td>0-29</td>
</tr>
<tr>
<td>Sophomore</td>
<td>30-59</td>
</tr>
<tr>
<td>Junior</td>
<td>60-91</td>
</tr>
</tbody>
</table>

**Senior**

Graduation

124

**Official Registration**

Students must register according to the schedule provided in their registration materials before attending any course. Registration materials are sent to each student well before official registration for an upcoming term.

**Late Registration**

A late registration period is held prior to the beginning of classes each semester.

**Course Changes**

Students may change their course schedules with their dean or through the internet registration system by adding/dropping until the deadline specified in the academic calendar.

**Registration in Other Fordham Schools**

As part of their degree program, students may register for courses in the other undergraduate schools of Fordham University at any campus, with the permission of their advising dean.

Except in unusual circumstances, students are expected to take at least 60 percent of their courses in their home school, through evening, weekend, or online study.

Seniors may take an introductory course in one of the graduate schools of the University with the approval of the graduate chairperson.

**Credit/Course Load**

Full-time status is achieved by registering for 12 or more credits per semester.

The typical course load in Fordham School of Professional and Continuing Studies is two or three courses per term. Many students vary their course loads from one term to the next or take an occasional term off, based on changing employment or family responsibilities.

**Transfer Credit**

Up to 75 credits may be accepted in transfer from other accredited institutions or institutions with which there is an affiliation agreement. The nature and level of each course will be considered, provided it was completed with a grade of at least C or the equivalent. The final determination on transfer credits is at the discretion of the advising dean.

Of the total transfer credits accepted, up to 26 may be applied to the requirements of the Core Curriculum. To preserve the character of the Fordham degree, transfer students will ordinarily be expected to complete at Fordham at least one course in literature, philosophy, theology, and history, with the guidance of their academic advisor.

Up to half of the requirements of the student’s intended major may be satisfied by transfer credits, subject to review by the academic department in which the student later officially declares his or her choice of major.

Other credits accepted in transfer will be counted as electives, as well as those which, in the judgment of the student’s major department, should not be counted toward major requirements in that field.
While a preliminary estimate of transfer credits can be made during the admissions process based on unofficial transcripts and student records, the actual award of transfer credit can be made only on the basis of an official transcript provided directly to Fordham University from the institution at which the course was completed, or in a sealed envelope delivered by the student.

Courses and credits accepted in transfer are counted toward the 124 credits required for the bachelor's degree and, where appropriate, satisfy the prerequisites listed for advanced courses as if they were taken at Fordham. The grades received in the transferred courses are not, however, calculated as part of the student's cumulative quality point index at Fordham.

Once enrolled in Fordham School of Professional and Continuing Studies, permission to take courses elsewhere for transfer purposes will be granted only in exceptional circumstances and only for courses at other universities or four-year colleges.

### Supporting Student Success

#### College Writing Center

The writing center at each campus offers tutoring on all levels of writing, from students' first compositions to advanced research papers, and in all aspects of the writing process, from topic development to the teaching of editing techniques. Professional tutors act as advisers; the work remains the student's own. Students schedule half-hour appointments or walk in during the center's hours, which are posted. The services are free to students.

#### Mathematics Help Room

The Mathematics Help Center offers tutoring services designed to assist students who have weak math skills or “math anxiety.” This service is free to students.

#### Periodic Workshops

The Office of the Dean at each campus offers periodic workshops which include topics on study skills, test taking, and time management.

#### Student Services

Students should consult the Student Services section of this bulletin for information on health services, campus ministry, counseling centers, disability services, and career services.

#### Academic Enhancement Courses

The following three-credit courses, open only to students in PCS or the Gabelli School of Business—Evening Program, are especially recommended for new students with no prior college experience or who are returning after an extended absence from the classroom:

**ENGL 1101. Composition I. (3 Credits)**

Instruction in sentence and paragraph construction, reading comprehension skills and analysis, the basic principles of grammar with an emphasis on diagnosing and solving persistent problems, and principles of argumentation and evidence. Weekly assignments and regular grammar exercises to build confidences and competence in college writing.

**IDIS 1010. Critical Reading in the Disciplines. (3 Credits)**

This course will provide students with the critical skills necessary to read successfully and use reference materials at the college level. Selections from disciplines such as literature, psychology, history, and natural sciences will be analyzed for information, main and subordinate ideas, logical structure, inference, tone, and irony. Written exercises and reports will measure students’ comprehension.

**IDIS 1100. The Adult Learner: Identity, Change, and Development. (3 Credits)**

This seminar has been designed to encourage each student to study his or her own unique identity development in adulthood. Each adult learner will be assisted in examining their skills, values, goals, experience, educational background, learning style and personality. Students can use this information for both short and long term career, educational and life planning. This new self-discovery will be developed through assessment testing, occupational research, informational interviewing and consultations with career development and educational specialists. The course utilizes a combination of readings, lecture, class discussions, presentations, exercises, guest speakers and video material.

**PHIL 1010. Introduction to Critical Thinking. (3 Credits)**

The course is intended to sharpen a student's ability to think clearly, consistently, critically, and creatively. The course objective considers principles of sound judgment and helps students learn how to recognize and analyze arguments present in ordinary spoken and written language, how to distinguish correct reasoning from incorrect reasoning, and how to construct valid, sound arguments.

### Gabelli School of Business

The Gabelli School of Business provides an innovative, rigorous, experience-based undergraduate education designed to cultivate future leaders of the business world. Through a unique dual foundation in business and the liberal arts, Gabelli School students learn to write compellingly and persuasively, deliver captivating presentations, comprehend events on a global scale, and understand how the lessons of the past influence our present. These are among the many traits that set Fordham business graduates apart.

Each Gabelli School student may customize a degree program that matches his or her goals. Within the school’s areas of study—accounting, alternative investments, business economics, communications and media management, entrepreneurship, finance, fintech, healthcare management, information systems, law and ethics, management, marketing, social innovation, sports business, sustainability, and value investing—students select majors, minors, and concentrations that give them the background they need to enter the career field of their choice.

The Gabelli School’s focus is unwaveringly global. In recognition of the fact that all commerce today is world commerce, each course weaves in international themes and exposes students to the inner workings of economies across the globe. Students have the opportunity to crystallize this particular element of a Gabelli School education through the secondary concentration in global business, which requires three internationally themed courses, proficiency in a foreign language, and either study abroad experience or a globally oriented internship.

The heart of the Gabelli School program is its dual core curriculum. The integrated business core’s 13 courses provide a solid grounding in business fundamentals while honing students’ ability to clearly express themselves, collaborate in teams, think strategically and creatively, and evaluate their own work. The liberal arts core, also 13 courses, combines economics, English, the fine arts, history, mathematics, philosophy,
and theology to give Fordham business students an uncommonly well-rounded education.

There are other hallmarks of the Gabelli School education as well. One is a commitment to personal and professional development. Through a carefully planned four-year sequence, students become aware of their personal and career goals and chart concrete plans for attaining them. Another is a hands-on, experiential education. Gabelli School course assignments are crafted to replicate the situations that students will face as professionals and to develop the skills needed to handle them successfully. Students engage in business simulations, research actual firms, develop plans to launch their own companies, utilize industry-standard financial analysis software, and much more.

All of this happens in the business capital of New York City. With one campus on Fordham’s Rose Hill campus in the Bronx and the other at Fordham’s Lincoln Center campus, the Gabelli School puts its students in extraordinarily close proximity to the fast-paced corporate world of Manhattan. More than 90% of Gabelli School students hold at least one internship while they are in college. Course syllabi include visits to the headquarters of multinational corporations, institutions such as the New York Stock Exchange and the United Nations, and the workplaces of scores of Fordham alumni. The Gabelli School of Business alumni network is extraordinarily strong; alumni routinely return to campus as guest speakers, act as mentors, and help students to find internships and jobs.

This high degree of alumni engagement is unsurprising given Fordham’s role as a Jesuit university, where helping others is a core value. The Gabelli School’s Jesuit identity comes into play in other ways, too, foremost among them the belief that business must serve a higher purpose than mere profit. Students are encouraged to think about how they, as business leaders, can contribute to the advancement of society and move the world forward in profound and lasting ways. They practice this concept from their earliest days as students, enrolling in local and international service-learning courses; volunteering as mentors and student leaders; launching socially conscious student businesses; and designing their own community service projects for additional credit.

Accreditations and Affiliations

Since its introduction in 1926, the bachelor of science degree program of the Gabelli School of Business has been fully recognized and registered by the University of the State of New York. The school has been a member of the Middle Atlantic (formerly New York State) Association of Colleges of Business Administration since the organization’s formation in 1951. The Gabelli School is accredited by the Middle States Association of Colleges and Secondary Schools and, since 1939, by the Association for the Advancement of Collegiate Schools of Business—International (AACSB), which is recognized as the preeminent accrediting agency for baccalaureate and master’s degree programs in business administration.

As an institution accredited by the AACSB, the Gabelli School has an active chapter of Beta Gamma Sigma, the national honorary business fraternity. Membership is based on, among other things, the maintenance of an outstanding scholastic record. Other active chapters of honorary and professional fraternities with national affiliations include Alpha Sigma Nu, Phi Kappa Phi, and Beta Alpha Psi, the national honorary for financial services.

In addition to these affiliations, accreditations, and associations, the Gabelli School is a member of the American Council on Education’s Internationalization Collaborative, which is an invitational forum for member institutions to advance international education on their campuses and nationally, and is one of only 24 schools worldwide to be selected as a “Champion” university within the United Nations’ Principles of Responsible Management Education initiative.

Majors

Majors at Rose Hill

- Accounting - Public Accountancy Major (CPA-150 track) (p. 1065)
- Accounting - Public Accounting Major (120 credits) (p. 1066)
- Accounting/Information Systems Major (p. 1223)
- Applied Accounting and Finance Major (p. 1165)
- Business Administration Major (p. 1100)
- Finance Major (p. 1167)
- Information Systems Major (p. 1224)
- Marketing Major (p. 1244)

Majors at Lincoln Center

- Global Business Major (p. 1212)

Concentrations

Primary Concentrations

All primary concentrations at Rose Hill may also be pursued as secondary concentrations.

- Rose Hill:
  - Accounting (p. 1068)
  - Business Economics (p. 1101)
  - Consulting (p. 1322)
  - Entrepreneurship
  - Finance (p. 1166)
  - Information Systems (p. 1223)
  - Management
  - Marketing (p. 1243)
  - Social Innovation (p. 1293)

- Lincoln Center:
  - Global Marketing and Consumer Insights (p. 1243)
  - Digital Media and Technology (p. 1148) (available only to students in the Class of 2023 and earlier)
  - Digital Media and Technology (Media Track) (p. 1148)
  - Digital Media and Technology (Technology Track) (p. 1149)
  - Global Finance and Business Economics (p. 1167)
  - Healthcare Management (available only to students in Class of 2022 and earlier)

Secondary Concentrations

- Accounting (p. 1068)
- Alternative Investments (p. 1166)
- Business Economics (p. 1101)
- Business Law and Ethics (p. 1102)
- Business of Healthcare
- Communications and Media Management (p. 1115)
- Consulting (p. 1322)
- Digital Media and Technology (p. 1148)
- Entrepreneurship
- Finance (p. 1166)
- Fintech (p. 1166)
- Information Systems (p. 1223)
- Global Business (p. 1212) (Rose Hill only)
- Management
- Marketing (p. 1243)
- Marketing Analytics (p. 1243)
- Personal Development and Leadership (p. 1241)
- Process and Quality Analytics
- Services Marketing (p. 1243)
- Social Innovation (p. 1293)
- Sports Business (p. 1321)
- Strategic Branding (p. 1243)
- Value Investing (p. 1167)

### Minors

The following business minors are available to Gabelli students:

- Business Law and Ethics Minor (p. 1102)
- Economics Minor (p. 1151)
- Marketing Minor (p. 1244)
- Sustainable Business Minor (p. 1325)

Note that the minor in business administration (p. 1100) is only available to students in FCRH, FCLC, and PCS, although it is taught at Gabelli.

### Academic Curriculum

The Gabelli School of Business offers coursework in a variety of areas. Each student’s academic program has four distinct elements:

1. The liberal arts core (p. 1201)  
2. The business core (p. 1199)  
3. The major (p. 1198) and concentration(s) (p. 1198)  
4. Electives (p. 23)

All students take the same liberal arts core and business core. They customize their academic program by choosing a major, concentration(s), and electives.

Each part of the academic program plays a specific role in a student’s overall education. The liberal arts core is designed to nurture curiosity and to give students the broad liberal arts foundation needed to engage in lifelong learning. The business core provides broad knowledge across all business disciplines while developing a student’s written and oral presentation abilities, capacity for teamwork, critical thinking, and problem-solving skills. The major and concentration(s) allow students to establish a focus in a specific area of business. Electives offer the chance to try new things and to cultivate additional areas of expertise.

### Business Core

Students in the Gabelli School of Business are required to complete thirteen courses, plus four integrated project (IP) courses, in their business core curriculum, as follows:

<table>
<thead>
<tr>

1. Certain students may, by invitation, fulfill this requirement with select sections of HPCB 3221 Financial Management.  
2. Certain students may, by invitation, fulfill this requirement with select sections of HPCB 4441 Honors Strategy.  
3. Certain 3-credit business core courses are split into two 1.5-credit courses; in such cases, those two courses do not count separately, but rather count together as one course.  
4. Integrated Projects (IPs) are semester-long projects that use knowledge from the business core and apply it to real-world circumstances. Students complete one IP per year during their four-year program. All four projects must be completed in order to graduate.

### Degree Requirements

#### Four Year (Day) Program

The Gabelli School of Business program at Rose Hill consists of 40 courses and requires a minimum of 120 credits. (Please note that certain three-credit business core courses are split into two 1.5-credit courses; in such cases, those two courses do not count separately, but rather count together as one course.) Students must achieve a cumulative quality point index (GPA) of at least 2.0 to graduate.

Students who transfer into the Gabelli School of Business from another school must complete a minimum of 20 courses and 60 credits as matriculated Gabelli School students.

Gabelli School students typically take five courses per semester plus one Integrated Project per year. All students who come to Fordham without any prior credit for college coursework must take this number to be
Degree Requirements

on target for graduation in four years. Any deviation from a five-course semester should be approved by the class dean.

See the Gabelli School of Business Core Curriculum and Academic Programs (p. 1199) list for specific course requirements.

Below is a listing of business courses, liberal arts courses, and free electives for the different business majors, along with the number of courses of each type that must be completed for each major.

New York State guidelines require that at least 50% of students’ curricula include courses in the liberal arts. Consistent with these guidelines, certain core coursework at the Gabelli School in the areas of communications, statistics, and ethics are considered to reflect liberal arts content. Such courses include Business Communications, Statistical Decision Making, and Ethics in Business.

Evening Program

The Gabelli School of Business evening program allows students to take classes on a part-time or modified full-time basis, depending on the circumstances.

Admission to the Evening Program

There is no direct admission to the Gabelli School of Business evening program. Students first must be admitted to Fordham's School of Professional and Continuing Studies (PCS). For more information on this initial stage of the process, please visit the School of Professional and Continuing Studies Admissions web pages: http://www.fordham.edu/pcs.

Once accepted to the School of Professional and Continuing Studies, students must complete all of the Gabelli School’s evening prerequisites. These are:

- ECON 1100 Basic Macroeconomics
- ECON 1200 Basic Microeconomics
- ECON 2140 Statistics I
- MATH 1108 Math for Business: Finite
- MATH 1109 Math for Business: Calculus

With those prerequisites complete and other evening-program requirements met, candidates must submit an internal transfer application. Candidates should contact the transfer dean to get more information about the requirements and to begin this phase. Decisions are typically made twice per semester.

Evening Program Schedule

Students take primarily evening-hours business courses and also may choose among a select number of evening and weekend liberal arts courses. All liberal arts core courses must be taken through Fordham’s School of Professional and Continuing Studies (p. 1186).
Evening students who wish to take business courses during the daytime may do so on a limited basis, with approval from the evening program director.

**Evening Curriculum**

The evening program is similar academically to the day program—including a liberal arts core, a business core, a major/concentration, and electives—but varies in its delivery, structure, and approach.

The evening program calls for at least 40 3- or 4-credit courses and 120 credits with a minimum cumulative index (GPA) of 2.0. Students who transfer from another school are required to complete a minimum of 20 courses and 60 credits as matriculated Gabelli School of Business students.

Evening students may generally choose from the same majors and concentrations available to four-year day students and listed in the Areas of Study (p. 1207) section of this bulletin. They also may pursue a secondary concentration or a liberal arts minor, and, if interested, are encouraged to discuss this with the evening program adviser as soon as possible after their acceptance. Please note, however, that there are certain majors and concentrations that are more accessible to evening students and others that are more accessible to day students based upon scheduling concerns. Students should confer with the director of evening programs to determine the best program of study for their needs.

Below is a listing of business courses, liberal arts courses, and free electives—but varies in its delivery, structure, and approach.

**Business Administration Major (p. 1100)**

Academic Policies and Procedures

Academic Policies and Procedures pertaining to undergraduate students at Fordham University:

- Academic Advising (p. 1203)
- Academic Progress (p. 1203)
- Business Minors (p. 1205)
- Dean’s List (p. 1206)
- Registration (p. 1206)

Academic Policies and Procedures pertaining to all undergraduate students at Fordham University:

- Academic Progress, Probation, Suspension, and Dismissal (p. 1047)
- Admissions Policy (p. 1048)
- Deferred Examinations (p. 1048)
- Grading System (p. 1049)
- Incomplete Coursework (p. 1050)
- Integrity of Full-Time Study (p. 1050)
- Payment of Tuition and Fees (p. 1050)
- Procedure for Appealing a Course Grade (FCRH, FCLC, and Gabelli School) (p. 1050)
- Refund (p. 1051)
- Student Attendance (p. 1052)
- Transcript of Record (p. 1053)
- Undergraduate Policy on Academic Integrity (p. 1054)
- Withdrawal from the University and Leaves of Absence (p. 1060)

Academic Policies and Procedures, university-wide:

- Affirmative Action Policy (p. 1057)
- Campus Safety (p. 1057)
- Equity in Athletics Disclosure Act (p. 1057)
- Nondiscrimination and Title IX Coordinator (p. 1057)
- Recruitment of Jesuits to the Faculty (p. 1057)
- Reserved Rights (p. 1058)
- Student Records (p. 1058)
- Support Services for Students with Disabilities (p. 1059)
- University Code of Conduct (p. 1059)

Academic Advising

Each student is different. Some know their major and career paths from the moment they arrive at Fordham. Others have no idea where to start. Still others think they know when they’re first years, but arrive at completely different decisions after a few semesters. The Gabelli School’s academic advisers are adept at coaching students in each of these situations and more.

The entire specialized academic advising staff—first year, sophomore, junior, and senior class deans; the dean of international programs; the transfer dean; the evening program director; and the dean of honors opportunities—helps each student to plan an academic program and learn how to make wise decisions regarding academics, careers, and life in general.

Advisers provide help in identifying goals, choosing courses, investigating majors and concentrations, experimenting with electives, securing internships, and building the portfolio of skills needed to succeed in any given area of business. For more details and contact information for each adviser, visit the Undergraduate Advising web pages.

Academic Advising for Student-Athletes

The primary mission of the Office of Academic Advising for Student-Athletes is to provide Fordham University’s more than 500 NCAA student-athletes with the resources and direction needed to achieve their scholastic potential and to prepare them for postgraduate scholastic, athletic, and career opportunities. The office brings a breadth and depth of experience in athletics and higher education to their many responsibilities. These responsibilities include general academic counseling, eligibility monitoring, assistance in maintaining satisfactory progress toward degrees, and course scheduling. Mid- and post-semester grade reviews are conducted every semester.

The office has six full-time administrators, all of whom are dedicated to working with and for Fordham’s student-athletes.

Academic Progress

Academic Progress Policy

To remain in good standing at the Gabelli School of Business and retain any awarded financial aid, students must meet established year-by-year standards of “academic progress.” Faculty and administrators are
dedicated to supporting students in meeting these standards. For details on standards for each class year, see the Academic Status section.

Full-time students are expected to complete their coursework in four years. Students who need additional time to complete their degrees due to special circumstances, such as an illness or a change in major, must receive approval from the senior class dean to continue their programs. Part-time students are not held to this four-year expectation and may take longer to complete their degrees.

It is extremely important that Gabelli School students develop adequate skills in written and oral English. Each teacher, no matter what the subject, may include an assessment of the student's ability to communicate as part of the grade. The teacher can adjust grades for the quality of the student's writing and has the right to require reports to be rewritten on the basis of poor writing alone.

If a student repeats a course, the original grade will remain and will be calculated into the student's GPA along with subsequent grades.

To preserve the quality of a Fordham education, the Gabelli School restricts the use of grades W (Withdrawal), ABS (Absent from exam), and INC (Incomplete). If a student does establish a pattern of these grades, it is considered evidence of failing to maintain reasonable academic progress.

Students must complete 120 credits and 40 courses to graduate. (Please note that certain 3-credit business core courses are split into two 1.5-credit courses; in such cases, those two courses do not count separately, but rather count together as one course.) If a student does not complete enough credits in the time allotted, he or she may warrant dismissal for failure to maintain satisfactory progress toward the bachelor's degree.

Failure to meet standards of academic progress may result in penalties, including probation, suspension, and dismissal. Students on probation may continue to study at Fordham and may be awarded financial aid, though this is not guaranteed; however, they will need to improve their academic status and return to good academic standing.

**Minimum Credit Completion Policy**

<table>
<thead>
<tr>
<th>Year or Classification</th>
<th>Credits Attempted 1</th>
<th>Percentage Completed 1</th>
<th>Minimum Credits Completed 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>First/First Year</td>
<td>up to 30</td>
<td>65%</td>
<td>18-20</td>
</tr>
<tr>
<td>Second/Sophomore</td>
<td>30-60</td>
<td>70%</td>
<td>42</td>
</tr>
<tr>
<td>Third/Junior</td>
<td>60-92</td>
<td>75%</td>
<td>69</td>
</tr>
<tr>
<td>Fourth/Senior</td>
<td>92+</td>
<td>80%</td>
<td>99-100</td>
</tr>
</tbody>
</table>

1. Transfer credits accepted by Fordham are counted in both credits attempted and credits completed, though the grades are not counted in the GPA.
2. For Gabelli School evening students pursuing a degree on a part-time basis, credits earned will be proportionate. Half-time students should complete half of these credits; three-quarter-time students should complete three quarters of these credits.

<td>75-89 credits</td>
<td>90+ credits</td>
</tr>
</tbody>
</table>

**Academic Status**

Though students must achieve a 2.000 cumulative GPA by the end of their academic program to graduate, minimum standards for the first three years of study are somewhat lower. Please note that for students receiving funds from the New York State Tuition Assistance Program (TAP) and other financial aid, academic standards differ somewhat from the chart below. For further details, consult Fordham's Office of Academic Records.

</tr>
</tbody>
</table>

1. Spring
2. Fall
These standards also apply to transfer students. Both full- and part-time students on probation for two semesters may be subject to dismissal if they do not make satisfactory progress toward good academic standing. In addition, students may be subject to suspension or dismissal if their GPA falls below those indicated.

Course Failures
If a student fails a course, but his or her academic record does not otherwise warrant direction to withdraw from the University, he or she may continue his or her course of study with the understanding of the following:

- That failing any required course is a deficiency that must be made up by repeating the course, normally before the beginning of senior year.
- That a failure in any course becomes a permanent part of a student’s record and influences the student’s GPA even after he or she has repeated the course for a passing grade.
- That the responsibility for repeating and passing a failed course rests with the student, who should arrange to remedy this deficiency as soon as possible.

Make-Up by Equivalent Course
If a student fails a required course at Fordham, he or she must make up that course at Fordham, in all but exceptional cases. Four-year day students who fail a course must retake and pass the class through the Gabelli School of Business, Fordham College at Rose Hill, or the Fordham summer program. Evenings students who fail a course must retake and pass the class through the Gabelli School of Business, Fordham’s School of Professional and Continuing Studies, or the Fordham summer program. Only if scheduling or other circumstances prevent this may a student apply for permission from the class dean to take an equivalent course in another school within Fordham or at another institution.

Students wishing to pursue this option first must get approval from the class dean that the University will accept and give transfer credit for the course in question. If the course is a liberal arts course, the class dean also may require the student to get permission from the chair of the department that offers the course. Forms for this approval process are available from the deans’ offices.

Though the class dean may approve an exception for a student to retake a course outside of Fordham, only courses taken at Fordham count toward a student’s GPA. Students should consider the ramifications of this policy, especially knowing that the original failing grade remains even when a course is successfully retaken: A course retaken and passed at Fordham will yield a higher counterbalancing grade, whereas a course retaken and passed elsewhere will not. In addition, students should note that the University will not transfer in any external course in which the grade received is below a C (2.0 out of 4.0).

The above policies also apply to courses taken outside of Fordham that had not been failed at Fordham (including non-Fordham study abroad programs).

Probation, Suspension, and Dismissal

Probation
Students are given probationary status through the direct action of a dean. In all but rare cases, students may remain on probation for no longer than the equivalent of one academic year.

Suspension
Suspension is an enforced termination of formal studies, typically given for two semesters. A student may be put on suspension if any one or more of these criteria apply:

- He or she fails to maintain satisfactory academic standing as indicated in the Academic Status section of this bulletin.
- He or she receives three failing grades in any semester.
- He or she has more than one academic integrity violation.

If a student wishes to continue his or her studies at the Gabelli School after a suspension, he or she must formally apply for readmission to the school and should contact their Gabelli School class dean for an application. Students are generally required to demonstrate academic proficiency at another four-year college or university prior to returning to Fordham.

Dismissal
A student may be dismissed if either or both of the following criteria are met:

- He or she fails to maintain satisfactory academic standing as indicated in the Academic Status section of this bulletin.
- He or she receives three failing grades in any semester.
- He or she is placed on academic probation for three successive semesters.

If a student has been dismissed for academic reasons, he or she may not continue to take courses in the school. Dismissal is a formal termination of all further studies in the Gabelli School of Business and Fordham University.

Dismissal Appeal Policy
All academic progress decisions may be appealed, in writing, to the dean of the college. The appeal must be made within three business days of the notification of academic status. It should include documentation of any extenuating circumstances, such as a death in the immediate family or an illness. The dean will make a decision in consultation with appropriate colleagues, and that decision shall be final.

Grievance Procedure
Any enrolled student has the right to grieve alleged discriminatory treatment on the part of any Fordham administrative office, department, procedure, or student organization. The student alleging discriminatory treatment has the right to a prompt investigation of the charges, resulting in redress of grievances where cause is found. Internal grievance channels provide for the investigation and adjudication of charges by members of the Fordham community. Two internal procedures have been established: one for grievances in academic matters and a second for grievances in nonacademic matters. In either instance, to be valid, a grievance must be filed within thirty (30) days of the action against which it is directed. Further details concerning these procedures are available in the dean’s office.

Business Minors
Undergraduates in all four of Fordham’s schools—the Gabelli School of Business, Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC), and the School of Professional and Continuing Studies (PCS)—are eligible to pursue business minors of various types. Students may choose one or more of these to complement their major;
each provides a foundational understanding in a specific area. These minors especially may be helpful to liberal arts students who are considering entering the business world after graduation.

Undergraduate liberal arts students in all three liberal arts colleges may take up to six courses in the Gabelli School of Business. Students should be aware that business courses are 3-credit courses, rather than 4-credit courses typically offered in FCRH, FCLC, and PCS for juniors and seniors. Hence, in considering this minor, students should consult with the junior or senior class dean to be sure they will have the required number of credits (124) required by New York State for graduation.

Students in the Gabelli School of Business are required to complete the business core curriculum as part of their degree requirements. Traditional day students will pursue Track 1, while evening students will pursue Track 2.

The availability of the respective business minors to students in each school is listed in parentheses below:

- Accounting (p. 1067) (FCRH)
- Business Administration (p. 1100) (FCRH, FCLC, PCS)
- Business Law and Ethics (p. 1102) (GSB)
- Marketing (p. 1244) (FCRH, FCLC)
- Sustainable Business (p. 1325) (FCRH, GSB)

## Dean's List

The Gabelli School of Business recognizes students' superior scholastic achievement during the annual Dean's List Ceremony.

Students enrolled in the Gabelli School of Business full-time day program earn Dean's List honors by:

- Completing a minimum of 12 credits in each of the fall and spring semesters
- Earning a minimum annual grade point average of 3.600
  - Dean's List with First Honors – 3.900–4.000
  - Dean's List with Second Honors – 3.800–3.899
  - Dean's List – 3.600–3.799

Students enrolled in the Gabelli School of Business evening program earn Dean's List honors by:

- Completing a minimum of 9 credits in each of the fall and spring semesters
- Earning a minimum annual grade point average of 3.600
  - Dean's List with First Honors – 3.900–4.000
  - Dean's List with Second Honors – 3.800–3.899
  - Dean's List – 3.600–3.799

Students in either program with a grade of Incomplete (INC) or Failure (F) during the fall or spring semester are disqualified from Dean's List consideration.

## Registration

### General Registration Policy

Each semester, students are assigned a specific day or days for registration. Registration dates for each semester can be found on the enrollment services website. Students register based on the academic program they are pursuing and to which they have been admitted.

They are responsible for consulting with their class dean to familiarize themselves with their program's requirements and to make sure that their program is correctly listed in DegreeWorks, accessible through the student tab on my.fordham.edu portal. The Gabelli School of Business offers multiple special academic programs; most are open to all students, while others are by admission only. Students with an interest in or questions about any academic programs are encouraged to see their class deans or the individual program directors.

By the last date for course changes, students should recognize that they have made a serious commitment to complete the courses for which they have registered. Alterations in registration after that date are at the discretion of the dean's office. Students should make sure they can complete any non-academic commitments they have—clubs, jobs, internships, and so on—without interfering with the coursework they committed to during registration. If students register late, they are held accountable for any absences they may incur as a result.

Please note that no Gabelli School student shall at the same time be matriculated in any other school or college, either at Fordham University or elsewhere, without the consent of the dean.

### Full-Time Status

Students should maintain full-time status to participate in intercollegiate athletics, University housing, family medical-insurance plans, and, for international students, their student visa. Full-time status means that a student is enrolled in at least 12 credits each semester and completes at least 12 credits each semester. Students who fail to complete at least 12 credits per semester may find themselves ineligible for intercollegiate athletics, University housing, financial aid, scholarships, the outside medical insurance plans under which they are covered through their families, and/or their student visa. Students who anticipate one or more semesters in which they do not maintain full-time status should speak with their class dean and their families as soon as possible to better understand any potential consequences.

To meet the 120-credit and 40-course requirements for on-time graduation, Gabelli School students in the four-year program should register for five courses each semester (plus one Integrated Project per year), with 1.5-credit courses counted as half courses. Any deviation from this five-course format requires a class dean's approval and may require taking summer classes or delaying graduation.

### Program Approval

During the second semester of sophomore year (or, in some circumstances, the first semester of junior year), Gabelli School students must declare their specific program of study; a major and, if needed or desired, one or more concentrations or minors. They declare this program through their class dean, whose offices are on the fourth floor of Hughes Hall. Once the program of study has been recorded, students are responsible to ensure that it is listed correctly in DegreeWorks and They must inform their class dean immediately if there are any errors.

### Program Changes

Students who are contemplating a change in their program of study should seek advice from their class dean immediately. The class dean helps students to take next steps with the academic area chair, and ultimately gives approval for the change.

Students who are considering changing their academic program should do so as early as possible. Changes often involve considerable
adjustments and become increasingly costly in time and credits if delayed beyond the first semester of junior year.

In considering program changes, please note that:

1. courses cannot be added to a program after the first week of class in any given semester without permission; and
2. if any course is dropped without written permission from the class dean, it will result in a failure.

Changes of Name or Address
In the case of a change of name or address, students are expected to immediately notify, in writing, the dean's office and the office of enrollment services. Students also must follow any procedures required by enrollment services.

Areas of Study

General Academic Programs
- Business Administration (p. 1100)
- Global Business (p. 1212)

Academic Areas
- Accounting and Taxation (p. 1064)
- Business Law and Ethics (p. 1102)

- Sustainable Business (p. 1324)
- Strategic Branding (p. 1243)

Personal and Professional Development

Personal and Professional Development Center
The Gabelli School of Business’s Personal and Professional Development (PPD) Center offers a comprehensive slate of programs and activities to help students develop into global business leaders.

All students at Fordham have access to the University-wide Office of Career Services. On top of that, Gabelli School students have an additional advantage in our Personal and Professional Development Center, which offers business-specific career-development programs and direct industry connections. The PPD Center’s offerings include:

- One-on-one advising, including résumé reviews and mock interviews, with industry-specific advisers
- Field-specific programming in accounting, finance, and marketing
- Workshops, networking events, corporate on-site visits, and speaker series
- Industry competitions
- Outreach to target employers and alumni who may choose to hire Gabelli School students
- Online career resources
- Collaboration with business student clubs and organizations

In addition, all major personal and professional development events are listed on the Gabelli School’s online calendar. Students are strongly encouraged to take advantage of the center from their first year onward.

All PPD offerings are part of the Gabelli Progress Status (GPS) Checklist, a four-year sequence designed to help Gabelli School students discover their full potential and tap into it for the benefit of themselves and others. We recognize that the business world is a challenging place, and that a little extra support during a student’s college years can make all the difference in succeeding in it. The checklist is designed to give our students that extra lift toward their personal and professional goals and wraps together elements of self-discovery and self-awareness, career development, and service to others. Students emerge prepared to handle anything that life after graduation might bring their way.

Current students can make an appointment with a PPD team member via GabelliAccess.

The Alumni Network
Finding an alumni community more loyal than Fordham’s isn’t easy. Gabelli School of Business graduates have an uncommonly strong belief in the power of a Fordham education—and in the potential of current students. Alumni and students connect through an extensive networking program, both online and in person.

Students can find out about alumni networking opportunities through the Gabelli School’s online calendar. These events span a very wide range and vary by semester, but examples include:

- The Alumni/Student Supper Club: An alumnus or alumna holds a networking dinner with current students who aspire to work in his or her business field. Supper Club dinners take place at restaurants in the Bronx or Manhattan; either the host or the school picks up the check, so that students are not responsible for the cost of the meal. This small-group format, of perhaps six people total, is the best way to get to know an alumnus or alumna one-on-one.
- Boardroom Series: Alumni visit Hughes Hall to meet in a conference-style format with a small group of students, typically no more than 25. This allows students the chance to approach the alumni afterward to make a personal connection.
- Young alumni panel discussions: Coordinated by the Personal and Professional Development Center, these panels bring together up to a dozen recent graduates to speak with students about what it was like to start their careers.
Fordham sporting events: Student groups such as the Dean’s Council may sponsor halftime celebrations for Gabelli alumni at basketball games and other contests.

In addition, because Fordham’s alumni network is global—our graduates live from Manhattan to Melbourne to Munich—the Gabelli School of Business offers ways for alumni and students to connect online. Please note that you will need to type or copy-paste these URLs into your web browser; if you are looking at the online version of this course bulletin, the links will not work directly because they are external websites.

- Gabelli School of Business Facebook page
- Gabelli School of Business Alumni LinkedIn group

For more information about getting to know our alumni, please visit the Personal and Professional Development Center web page.

**Special Academic Programs**

Gabelli offers many co-curricular programs and activities to its students:

- CFA Track (p. 1208)
- Community Engaged Learning (p. 1208)
- Dual-Degree Programs (p. 1209)
- Global Business Honors Program (p. 1209)
- Honors Thesis Program (p. 1209)
- Internships (p. 1209)
- Research with Faculty (p. 1210)
- Study Abroad (p. 1210)

**CFA Track**

The Chartered Financial Analyst (CFA) charter is a professional designation awarded by the CFA Institute. The CFA charter, perhaps the most respected and recognized investment credential in the world, demonstrates a mastery of a comprehensive body of knowledge important in the investment decision-making process. To earn a CFA designation, a candidate must pass three levels of exams (Levels I, II, III) and meet the experience requirement specified by the CFA Institute. The CFA Body of Knowledge has 10 topic areas: ethical and professional standards, quantitative methods, economics, accounting and corporate finance, global markets and instruments, valuation and investment theory, analysis of fixed-income securities, analysis of equity investments, analysis of alternative investments, and portfolio management. Candidates are tested on all topic areas at each level.

To enroll with the CFA Institute and register for the first exam, a candidate must have a bachelor’s (or equivalent) degree, or be in the final year of his or her bachelor’s degree program at the time of registration. If a student initially enrolls/registers as a final-year undergraduate student with a degree in progress, he or she may not register for the Level II exam until he or she has earned a bachelor’s degree (or has obtained enough professional work experience to meet the program’s entrance requirements).

Many investment firms require entry-level employees to pursue the CFA designation as a condition of employment. However, the CFA Institute’s program is a graduate-level curriculum. Thus, it shows a particular level of commitment for an undergraduate student to be preparing for the exam. We are offering this program as one opportunity for our students to distinguish themselves in a competitive employment market.

At Fordham, the CFA track is a sequence of undergraduate courses offered by the Gabelli School of Business. The courses have been designed to prepare a student to take the CFA Level I exam shortly after graduation. When possible, courses use the same textbooks and reference materials as the CFA curriculum. Also, questions from previous CFA exams are used on some course exams.

A candidate completing the finance courses in the CFA Track should have a basic framework for the fixed-income securities analysis, equity securities, analysis, and portfolio management topic areas. Other required courses in the business school curriculum should give the student a preliminary background in the quantitative analysis and economics sections. The remaining sections (ethical and professional standards, and financial accounting) are covered in the business core curriculum and supplemented with business electives in the curriculum.

Because Fordham is a CFA Program Partner University, a certain number of students may be selected each year to receive CFA student scholarships. These scholarships are provided by the CFA Institute, the global association of investment professionals that awards the Chartered Financial Analyst designation; they provide reduced costs for college or university students enrolling in the CFA Program. Students may not apply directly for a scholarship, but rather must be selected and sponsored by the Gabelli School’s CFA program director. Full details of the scholarship program are provided to students at the start of each fall semester.

**For more information**

To learn more about the CFA charter, please refer to the CFA Institute website. To learn more about the CFA Track at the Gabelli School of Business, please visit the CFA Track information on the Gabelli School of Business webpage.

**Community Engaged Learning**

Two of the hallmarks of a Gabelli School education are learning by doing and business with purpose. These principles come together through community engaged learning.

Community engaged learning at the Gabelli School is available both internationally and in New York. To learn more about international community engaged learning, see the part of this section that deals with Fair Trade. To learn more about community engaged learning in New York City, see below.

In one recent year alone, Gabelli School students volunteered more than 1,300 total hours at nine Bronx nonprofits as part of the community engaged learning program—and gained hands-on experience in the process, along with one additional academic credit. Students have learned from and engaged with local residents in projects that had them assisting low-income residents in filing their income taxes, leading SAT-preparation workshops for high school students, and much more.

The greatest part about the Gabelli School’s community engaged learning program is that students get to choose the organization they help by proposing a project that interests them to the community engaged learning adviser. Students build their resumes and enhance their experience while advancing the cause of a nonprofit, program, or part of the community that matters most to them.

**For More Information**

Visit the Gabelli School web pages to learn more about New York City-based community engaged learning at the Gabelli School, or to propose
a one-credit community learning experience paired with an academic course.

**Dual-Degree Programs**

In today’s business world, advanced degrees carry an ever-greater advantage in helping graduates distinguish themselves in the eyes of potential employers. Certain self-directed, academically capable students can complete their Fordham education through the master’s level in business in five years. There is also a dual-degree program that allows the completion of a law degree in six years. Information on both options is below.

Specific requirements and offerings of the dual-degree programs change often. For that reason, interested students are encouraged to visit the Gabelli School website for the most up-to-date information.

**4+1 Programs**

Fordham undergraduate students can apply to enroll in a business-related Master of Science (M.S.) program immediately after completing their undergraduate degree. For more information, please visit the 4+1 Programs section of the Gabelli School website.

**B.S./J.D. Program**

This six-year dual-degree program, known as the 3-3 Program, enables students to complete an undergraduate degree at the Gabelli School and a law degree at Fordham Law School within a total of six years. Participants study at the Gabelli School for three years and then move on to the law school. The B.S. is awarded in the fourth year, following the completion of the first year of law school. To participate, students must:

- complete all core and major requirements and at least 92 credits before beginning law school
- maintain a superior grade point average, including transfer credits
- have a very strong LSAT score; it is preferable that the LSAT scores be available by December of the academic year in which the application is made

Students who meet these criteria will be eligible to apply to Fordham Law School during their junior year. Interested students should meet with their academic advisers early on to make sure they complete all necessary undergraduate courses and credits. The program may be successfully pursued without advanced placement courses; however, advanced coursework will give students greater flexibility to take electives.

Students who intend to participate in the 3-3 Program must have an interview with the Gabelli School pre-law adviser, who will select candidates to forward to the admissions office at Fordham Law. Admission is not guaranteed and is very competitive. Students must meet Fordham Law’s admissions criteria, which can vary from year to year.

**Global Business Honors Program**

The four-year Global Business Honors Program (GBHP) selects incoming first year students with stellar high school academic records and prepares them for high-level roles in the world’s most dynamic firms and organizations. The approximately 25 students in each GBHP class form a close-knit community of friends and scholars.

GBHP core curriculum courses are especially rigorous and in-depth. They include business mathematics, micro- and macroeconomics, business law, and financial management. In addition to their coursework, participants travel together on intercontinental trips: to London as first year students, and to countries such as Chile and China in the two following years. The international experiences expose students to the global marketplace and the variation of business environments across borders. Over the course of their junior and senior years, GBHP students select a business topic of interest and, working individually or in small groups, complete an original research project with the help of a faculty adviser. Some resulting papers have been selected for presentation at undergraduate research conferences.

**Global Business Honors Program Highlights**

- Each semester, students take two honors courses and three courses from the regular curriculum.
- By graduation, students have experienced business in four continents—Asia, Europe, South America, and North America—through a combination of their Rose Hill semesters and expenses-paid GBHP trips.
- GBHP groups visit top-ranked companies and business organizations in New York and overseas.
- Career-development programs hone participants’ “soft skills,” such as interviewing, networking, international business etiquette, and verbal presentation.

For more information, contact the Dean of Honors Opportunities.

**Honors Thesis Program**

The Honors Thesis Program (HTP) is a three-course sequence that enables high-ability students to conduct original business research of publishable quality.

The Honors Thesis Program begins in the spring semester of a student’s junior year. During that first term, each participant learns research methodology and identifies and begins to define a specific thesis topic. The outcome of this first semester is a proposal that includes a comprehensive literature review and a road map for a theory-based study. At the conclusion of this junior spring semester, the student presents his or her proposal for approval, delivering an oral presentation right before final exam week and a formal written proposal shortly thereafter.

The thesis program continues in the fall of a student’s senior year. Early in (if not before) this second semester, the student must secure an adviser. During this second semester, each student learns more about research, refines his or her specific proposal, and, if pursuing an empirical study, gathers relevant data and begins to analyze it.

The third and final term, the spring of a student’s senior year, includes final data analysis, writing a first draft, and editing that draft—under the adviser’s and Honors Thesis Program director’s supervision—into the final draft of the thesis. All students who complete an honors thesis earn a medal at Awards Night during the week before graduation. The thesis voted best each year earns a special award.

For more information, visit the Honors Program web page.

**Internships**

An internship is a short-term, pre-professional work experience that provides hands-on practice and skill development in a professional environment. Internships may take place during the fall, spring, or summer semesters; may be paid or unpaid; may help you to earn college credit or not; and can be full-time or part-time. On average, 91% of Gabelli
School students hold at least one internship during their college careers. Internships can help students to:

- Explore a possible career interest
- Choose a major or career path
- See the real-world application of concepts learned in class
- Gain work experience and develop marketable skills
- Build a résumé
- Cultivate professional contacts and references
- Test out a possible future employer
- Get into a track toward a permanent job (successful interns may receive full-time offers)
- Earn income

Please note that Gabelli School students may not pursue internships during the school year as first years. They may begin holding internships in the summer following their first year.

Successful internships depend on the right match between a student and employer. For guidance on obtaining an internship that truly will provide advancement toward a desired career, students should seek out the Personal and Professional Development Center staff. Students can search industry information on the CareerInsights database and apply for internships via the CareerLink posting site.

**Academic Credit for Internships**

Students may pursue internships of two types: for-credit and not-for-credit. The following section provides an explanation of the for-credit type and outlines the steps students must take to receive academic credit.

Gabelli School students may earn one-credit per semester for an internship opportunity. Students should work with their class dean to obtain and complete the internship forms to request credit. An internship course does not replace a full course for graduation requirements.

To receive credit for an internship, students must complete these steps:

1. Seek an internship through the Office of Career Services, using its CareerLink database; through the Gabelli School’s Personal and Professional Development Center; by networking; by conducting your own independent search; or with the help of a Gabelli School faculty member. If you want, the Personal and Professional Development Center staff can help you to perfect your résumé and cover letter.
2. Once the internship has been secured, students should consult with their class dean about earning credit.
3. Fill out and sign the internship registration form and statement of responsibility and submit it as instructed within two weeks of starting the internship, if possible. Students should contact their class dean to obtain the registration form and statement of responsibility.
4. Students should register before the semester begins, but they may register after the semester begins with permission from their class dean. Students may not retroactively enroll in the internship course for credit after the semester has ended or near the end of the semester. Note: Many students will obtain their internship during the semester and will still be able to register for the one-credit internship course at that time.
5. Note: International students on F-1 Visas must register for their internship course at that time to obtain the registration form and statement of responsibility. They must register after the semester begins with permission from their class dean.

International students on F-1 Visas should make sure to follow all regulations and give themselves enough lead time to get the paperwork done.

6. Complete a minimum of 60 hours in the internship for the semester (or summer).
7. Students may receive credit for an internship whether the internship is paid or unpaid.
8. Complete the internship course by submitting the online reflection and internship evaluation and attending any required events or class meetings (if applicable). The online reflection and internship evaluation is due by the week of finals and must be submitted online. If a student’s online reflection and internship evaluation are not received by the deadline, a failing (“F”) grade will be awarded.
9. The one-credit internship course is taken on a pass/fail basis only.

Note: Students typically begin their search for an internship about four to five months prior to the planned start date for the internship, but this can vary dramatically depending on the industry and the sector within the industry. Each company, industry, and sector may have different time frames for recruiting interns. Students are urged to see their class dean or a Personal and Professional Development Center staff member for more information.

**Research with Faculty**

Just as the Global Business Honors Program and Honors Thesis Program allow students to conduct their own original research, a separate Gabelli School program offers students the chance to collaborate with professors on faculty research.

Undergraduate research assistantships are open to Gabelli School sophomores, juniors, and seniors who have demonstrated exceptional academic performance and a strong interest in academic inquiry. Students assist a full-time faculty member on his or her research throughout the school year. Opportunities vary each semester in quantity of assistantships available and topics being researched, depending on faculty needs. In this program

- A student works with one or more faculty members on a faculty-directed research project.
- The student is compensated for his or her work and, in some cases, is listed as a co-author of the resulting paper.
- Duration (project, semester, year) is dependent upon faculty needs.
- An application is required. For more details, please contact the Assistant Dean of Honors Opportunities.

**Study Abroad**

Traveling to another country offers an unparalleled advantage for business students. Abroad, Gabelli School students have the chance to immerse themselves in a distinct business culture, make connections at an all-new roster of corporations, learn another language, and expand their cultural fluency. Gabelli School students should integrate as much international experience as possible into their undergraduate careers.

There are three options available to business students, who may take advantage of one or all:

- Full semesters abroad
- Short-term summers abroad
- Seven- to 10-day global immersion courses
Full Semesters and Summers Abroad
The Gabelli School encourages qualified students to study for a semester or summer in another country. Fordham has partnerships with many colleges and universities that offer study abroad opportunities. Applications for these programs can be found in the Office of International and Study Abroad Programs (ISAP).

Of particular interest is the Gabelli School of Business in London program, which combines the advantages of an overseas experience with actual Fordham courses that can be used to fulfill core and major requirements. The Gabelli School in London gives students an advanced socioeconomic understanding of business in the U.K. and Europe through coursework, corporate visits, and cultural excursions. Accounting, marketing, finance, and other disciplines get a fresh context in Europe. This program is available in the fall, spring, and summer semesters.

Global Immersion Courses
No time in your schedule for a full semester abroad? Prefer to experience several countries rather than only one? Already studied abroad for a semester but want to hit one or two more destinations? Global immersion courses meet all of these needs—and more. These seven- to 10-day trips are connected directly with a business class; for example, the Entrepreneurship and Fair Trade course includes a tour to meet business people in India. Travel takes place over winter or spring break or at the end of a semester, to accommodate students’ schedules. Students travel the entire time with Fordham professors and deans, are met on the ground by knowledgeable local guides, and stay in excellent hotels. Global immersion courses include visits to the offices of corporations, exchanges, and markets; meetings with business leaders; excursions to noteworthy historical sites; meals at traditional restaurants; and sometimes even sessions with Fordham alumni who live abroad. Destinations change each semester; past countries visited include Argentina, Brazil, Canada, France, India, Ireland, Italy, Japan, Peru, Singapore, Switzerland, and the United Kingdom.

For more information
Visit the Gabelli School Global Business Education web pages and the Fordham office of International and Study Abroad Programs.

General Science
The general science major provides a broad scientific background for students who wish to pursue a career in science-related fields, including health professions, education, law, science technology, scientific writing and editing, sales, and marketing. The major is designed to provide a basic knowledge of the contributing disciplines while allowing students to gain more in-depth knowledge in chemistry, biology, or physics through upper-level elective courses. All courses in the major are selected from existing courses in the contributing departments (biological sciences, chemistry, computer and information sciences, mathematics, and physics). These courses are taught by faculty members from the contributing departments and conform to the rigorous standards of those disciplines. Upon successful completion of all major and core requirements students graduate with a B.S. in general science.

Each semester, students enrolled in this major must have their choice of courses approved by the program director or assigned adviser. Students must maintain a minimum GPA of 2.0 in the required courses for this major. Students may register for a double major in general science and all other majors except biological sciences, chemistry, environmental science, integrative neuroscience (cell and molecular neuroscience track), and physics; however, any minors in these disciplines are allowed and encouraged. There is no minor in general science.

Note: The general science major is not intended for students planning to attend graduate school in a specific science discipline since they would need to complete the undergraduate major in that particular discipline in order to meet the prerequisites for graduate studies. If there is a real chance that you might wish to pursue a graduate degree in a specific science discipline, or that you might wish to pursue a career for which a degree in a specific science discipline is either required or strongly recommended, then you should choose a discipline-based undergraduate science major (either biological sciences, chemistry, or physics).

For more information
Visit the General Science program web page.

Global Business

### Mathematics

Select both courses in one of the following options: 6 to 10

**Option 1:**
- MATH 1206 Calculus I
- MATH 1207 Calculus II

**Option 2:**
- MATH 1203 Applied Calculus I
- MATH 1204 Applied Calculus II

**Computer Science**
- CISC 1400 Discrete Structures 4
- CISC 1600 Computer Science I
- & CISC 1610 and Computer Science I Lab 4

**Electives**
Select two courses in biology, chemistry, or physics, plus required lab corequisites if applicable 3

1. BISC 1401 Introduction to Biology I and BISC 1402 Introduction to Biology II, which are offered only in the summer, may substitute for this requirement.
2. Students with a demonstrated proficiency in either computer science or information science can inquire with the program director for alternative choices.
3. Each student must take two additional semesters of non-core science courses (biology, chemistry, or physics), including any associated lab courses. These courses must be offered by the biological sciences (p. 61), chemistry (p. 74), or physics (p. 471) departments and be advanced enough that one of the following courses, respectively, is a prerequisite:
   - CHEM 1322 General Chemistry II
   - BISC 1404 Introductory Biology II
   - PHYS 1702 Physics II/PHYS 1502 General Physics II

Both of the elective courses must be in the same discipline.

### Availability

The major in general science is available at Fordham College at Rose Hill. Students in Fordham School of Professional and Continuing Studies may major in general science only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill campus.

**Fordham College at Rose Hill students:** The requirements above are in addition to those of the Core Curriculum.

**Professional and Continuing Studies students:** The requirements above are in addition to those of the PCS Core Curriculum.

### Global Business

Every year, business school graduates emerge into an economy that is more interconnected and more global than the year before. The secondary concentration in global business prepares students to succeed in that world. To complete it, students must demonstrate language proficiency, take global courses, have an international experience, and participate in the International Business Association (IBA).

### Programs

- Global Business Major (p. 1212)
- Concentration in Global Business (p. 1212)

### Concentration in Global Business

The Global Business concentration can be pursued by Gaelli students as a secondary concentration for Rose Hill students only.

Students who want to pursue this secondary concentration must complete four requirements:

#### 1. Learn a foreign language

Complete language courses at least through the Intermediate II level.

#### 2. Take three globally focused courses

Two global business courses, plus one cultural studies course.

#### 3. Experience the world beyond the United States

Spend some time abroad: a full semester; two summer session programs; or two global immersion courses.

#### 4. Join the International Business Association

Demonstrate three years of participation and devotion to increasing knowledge and awareness of global commerce on the Fordham campus and beyond.

For information about the secondary concentration in global business, contact the Gabelli School Dean of International Programs.

1. This concentration uses some existing coursework. For instance, students complete the language requirement as part of their liberal arts electives. Also, one course from a primary area of business study (major or concentration) and one course from the liberal arts core or a liberal arts minor may also count toward the global business secondary concentration. All double-counting courses must be approved in advance by the Dean of International Programs at the Gabelli School of Business.

### Global Business Major

You have a moral compass and a desire to follow a directional compass. You also have big ambitions. In the global business major at Fordham, these qualities are the very bedrock of success. Studying global business administration you’ll become part of the next generation of business leaders through a rigorous and innovative program immersed in the world financial capital of New York City.

The Global Business Administration major allows students to customize their business degrees by picking one primary concentration and combining that with other secondary concentrations or minors. This degree plan also ensures that students have enough room to study abroad at any of our 150+ partner programs worldwide.

This major is available only to Gabelli School students on the Lincoln Center campus.

### For more information

Visit the global business program web page.

---

Updated: 07-27-2020
Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

Requirements

Students pursuing a major in Global Business must select a primary concentration. This may be paired with a secondary concentration or a liberal arts minor from Fordham College at Lincoln Center (p. 1169) or Fordham College at Rose Hill (p. 1178).

Available primary concentrations include:

- Digital Media and Technology (p. 1148) (available only to students in the Class of 2023 and earlier)
- Digital Media and Technology (Media Track) (p. 1148)
- Digital Media and Technology (Technology Track) (p. 1149)
- Global Finance and Business Economics (p. 1167)
- Healthcare Management (available only to students in class of 2022 and earlier)
- Global Marketing and Consumer Insights (p. 1243)

Available secondary concentrations appear below. Courses for these concentrations are primarily offered on the Rose Hill campus.

- Accounting (p. 1068)
- Alternative Investments (p. 1166)
- Communications and Media Management (p. 1115)
- Consulting (p. 1322)
- Entrepreneurship
- Finance (p. 1166) (Global Finance and Business Economics concentrations may not concentrate in Finance)
- Fintech (p. 1166)
- Information Systems (p. 1223)
- Management
- Marketing (p. 1243) (Consumer Insights concentrations may not concentrate in Marketing)
- Marketing Analytics (p. 1243)
- Personal Development and Leadership (p. 1241)
- Process and Quality Analytics (p. 1271)
- Services Marketing (p. 1243)
- Social Innovation (p. 1293)
- Sports Business (p. 1321)
- Strategic Branding (p. 1243)
- Value Investing (p. 1167)

History

The study of history is an important component of a well-rounded liberal arts education. By understanding the origin and development of peoples and nations, their interrelations and interactions, as well as specific areas and movements that have shaped the modern world, the student is better able to comprehend and evaluate contemporary events. A thorough comprehension of history further enables the student to place the study of other disciplines in their historical context. It is, thereby, a valuable asset in the student’s course of study as well as an excellent preparation for many professional careers that require a broad social vision and global awareness.

Program Activities

Honors in History

To graduate with the distinction of Departmental Honors, majors need to maintain a 3.500 G.P.A. Among the 10 courses required for the major, students seeking to graduate with honors will successfully complete a four-credit honors tutorial and thesis (HIST 4999 Tutorial), and a 5000-level graduate course which will be treated as the Department Seminar.

Phi Alpha Theta, the National History Honor Society

The mission of Phi Alpha Theta is to promote the study of history and to create a space for intellectual exchange among students and faculty members. It is one of the few honor and professional historical societies that encourages student participation at all its functions. The Chi Phi Chapter of Phi Alpha Theta at Fordham University sponsors many activities throughout the year, including field trips to museums in the New York area and lectures by notable speakers each semester. Phi Alpha Theta members at Fordham are active in regional and national competitions for scholarly prizes. For information about membership, contact Nicholas Paul, Ph.D., at 718-817-3928.

Accelerated Master’s Program

Please read the Graduate School of Arts and Sciences Accelerated Master’s Programs section (p. 1313), which is located under the heading of Special Academic Programs in the chapter on Academic Programs, Policies, and Procedures of this bulletin. Outstanding history students, with grade point averages of 3.2 or better, may apply for early admission to the M.A. program. Students submit their applications in the spring of their junior year and enter the program in the senior year, when they take two graduate courses. These courses count toward the B.A. and are accepted for the M.A. at Fordham.

With credit for the two courses, students are able to complete a history M.A. in two terms of full-time study after completing their bachelor’s. M.A. students may either complete a thesis, normally as part of a research seminar, or take a comprehensive exam after completion of coursework. Students from the FCRH, FCLC, and PCS campuses are eligible to opt for early admission into the M.A. program, although all graduate courses are given at Rose Hill. The Department of History offers the M.A. in medieval, modern European, American, Latin-American and Latino, gender, and global history. There is also the option of an M.A. without a concentration. Applications are made online through the Graduate School of Arts and Sciences website.

For more information

Visit the History department web page.

Contribution to the Core

Understanding Historical Change

Through the introduction to the discipline of history, students will begin to achieve knowledge of the structure of societies, how they function, and how they change. Each section of the course will consider how to assess evidence, identify and evaluate differing and often contradictory explanations and arguments, and appraise the relative scale and importance of particular changes in the past. Students will be able to choose from different sections of the course each with the title Understanding Historical Change, and a descriptive subtitle such as Ancient Greece, American History, etc. Courses currently offered include:
### Core Requirements

In addition, the department regularly offers courses that fulfill the EP1, EP3, Advanced History Core, American Pluralism, and Global Studies core requirements.

### Programs

- History Major (p. 1214)
- History Minor (p. 1217)

### History Major Requirements

Students who major in history must complete ten courses:

<table>

One American History course 4
One Global History course (African, Asian, Latin American, Middle East, or other approved course) 4
Three upper-level history courses 12
One additional history elective 3 to 4
One Seminar course 4

1. A list of courses fulfilling the Understanding Historical Change requirement can be seen on the core curriculum page and have the HC attribute.
2. Seminar courses include any course numbered HIST 4600 through HIST 4998, any 5000 level course, or one of the following:
   - HIST 4542 Seminar: Italy Through Foreign Eyes
   - HIST 4557 Seminar: The Third Reich
   - HIST 4558 Seminar: Modern European City
   - HPRH 4001 Senior Thesis (for Honors program students)

Students may substitute a second Understanding Historical Change for one of required upper-level courses. Any HIST course numbered HIST 3000:4599 may fulfill the upper-level course requirement, in addition to the courses listed below with the HIUL attribute.

An AP History score of 4 or 5 can replace two of the student’s upper-level electives in history.

In addition, up to two History courses from study abroad can count for upper-level electives.

### Medieval History courses

<td>2 These courses are listed on the history major page (p. 1214), and have the attribute codes HIMH, HIEH, or HIAH.</td>
<td></td>
</tr>
<tr>
<td>One Global History course (African, Asian, Latin American, Middle East)</td>
<td>3 These courses are listed on the history major page (p. 1214), and have the attribute code HIGH.</td>
<td></td>
</tr>
<tr>
<td>Three upper level history courses</td>
<td>4 Any course numbered HIST 3000 to HIST 4599, or a course with the HIUL attribute. A list of such courses may be found on the history major page (p. 1214).</td>
<td></td>
</tr>
</tbody>
</table>

Availability

The minor in history is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

Honors Program at FCLC

The honors program at Fordham College at Lincoln Center is an opportunity for talented and motivated students to explore many areas of learning in a small intellectual community of student scholars and faculty. The program is limited to approximately 18 students in each year and is directed by a faculty member, as well as a faculty adviser who stays with each class through their four years. The honors program gives students a solid grounding in the major academic disciplines, and then prepares the students for independent learning and research, culminating in a senior thesis or project.

Students are selected for invitations to the honors program in the spring before their first year. On rare occasions students are admitted to the program in the middle of their first year or at the beginning of their sophomore year. The honors curriculum replaces the regular Core Curriculum of the college with a series of intensive seminars. A dedicated honors seminar room on the ninth floor of the Lowenstein Center is available for honors classes and other activities. Students enrolled in the honors program gather outside of class for occasional dinners, visits to museums and libraries, and cultural events.

For more information

Visit the Lincoln Center Honors Program web page.

Requirements

During the first year the honors student takes four honors seminars (two each semester) in philosophy, English, theology, and history. In addition, students take a full year interdisciplinary natural science and math class and workshops in writing and public speaking. Honors students also take a year of a modern or classical language at the intermediate level or higher. (If a student starts a new language in the first year, four semesters will be required.)

In sophomore year honors students have more choice in their schedule. Each semester they take two interrelated honors courses that use the resources of New York City. The other six courses taken in sophomore year are chosen by the student in consultation with the class adviser.

In the junior year, the student’s primary focus is on the major course of study, but students also complete an honors course from among the following options:

- They may elect to study abroad in a program approved by the honors committee.
- They may complete a tutorial designed by the student and one or more faculty and approved by the committee.
- They may arrange a special internship/tutorial (e.g., work with an artist, writer, or scientist, with directed academic readings), approved by the committee.
- They may undertake a yearlong directed reading course (outside the student’s major) with written and oral examinations, approved by the committee.

In the senior year, honors students will participate with their peers in a senior thesis workshop and in the honors Senior Values seminar. Finally, to receive honors, students are required to present a thesis or the equivalent (i.e., completed a special scientific research project or artistic project).

The Honors Program at FCRH
Since its founding in 1950, the Fordham College at Rose Hill Honors Program has provided students of exceptional academic talent and intellectual curiosity with the opportunity to pursue their core studies in greater depth, breadth, and intensity. Drawn from every major, Honors students routinely go on to attend the most respected graduate and professional schools and to excel in their chosen fields. What unites the members of the program is their active approach to learning and their desire to go beyond compartmentalized knowledge to an understanding of the whole.

The mission of the Rose Hill Honors Program is to produce and promote a community of scholars for justice. We achieve our mission through a curriculum that in some substantive way focuses on the concerns of diversity and justice in each of its courses, regardless of discipline or subject matter. In small, seminar-style classes that are reading- and writing-intensive and discussion-driven, students learn to analyze and critically assess materials from the humanities, social sciences, and STEM fields. With a course specifically devoted to academic research methods, students also learn to engage in the scholarly life, and each course in the curriculum beyond the first year includes a research or scholarship component. Honors students' research abilities culminate in the senior thesis project, for which students complete an original project in their major field. The program also features two courses specifically devoted to the academic study of justice in both American and global contexts, a course designed to introduce students to the diverse history and culture of the Bronx, and a capstone seminar in which students engage in reflective analysis of a Jesuit, liberal arts education. In all, we seek to provide a Jesuit education for the 21st century.

The Honors curriculum takes the place of the regular Fordham College at Rose Hill core curriculum, with the exception of the language requirement. Most students enter the program at the beginning of their first year, though it is occasionally possible for a certain number of students with strong academic records to join in the middle of that year or at the beginning of their sophomore year.

Because Honors courses usually take the form of small seminars, enrollment in the program is necessarily limited to around 35 students each year. Members of the program are normally expected to maintain a grade point average of 3.5. Successful completion of the program entitles the student to the designation in cursu honorum on the diploma and the transcript.

For more information
Visit the Rose Hill Honors Program website.

Requirements
The Honors Program is an alternative core. Honors students are not required to take any of the other Fordham College core curriculum requirements, with the exception of the general Fordham College language requirement. AP placement may exempt students from the language requirement. Honors students must also fulfill their major requirements as outlined by the respective academic department (p. 1184).

Curriculum
For students beginning as of Fall 2019 (New curriculum)

- Total Credits: 39

---

**GPA Requirement**

Honors students receive the special designation *in cursu honorum* ("in the course of honors") on their diplomas. This is in addition to any other honors earned, such as *cum laude*, *magna cum laude*, and *summa cum laude*. In order to graduate *in cursu honorum*, a student must have a GPA of 3.5 at the end of senior year.

**Study Abroad**

Honors students may study abroad for all or part of junior year. To fulfill the junior Honors course requirements, there are two possibilities: (a) the student takes a comparable course while abroad, as approved by the Honors director, or (b) the student takes the junior year Honors courses upon return in their senior year.

**Advanced Placement Credit**

AP credit is awarded by the College and, where appropriate, earns students credits toward graduation. AP credit does not exempt students from any Honors course.

**Course/Requirement Waivers for STEM/Pre-Health Students**

In the Honors core curriculum (beginning fall 2019), in consideration of the coursework taken towards their majors/pre-professional programs, STEM/pre-health students are waived from the following courses/requirements, as follows:

- HPRH 1101 Interdisciplinary STEM I and HPRH 1201 Interdisciplinary STEM II waiver: majors in biological sciences, chemistry, engineering physics, integrative neuroscience, physics, and students on the pre-health track (with any major).
- HPRH 1101 Interdisciplinary STEM I waiver: majors in computer science or mathematics/computer science. If the above conditions also apply, the student is waived from both STEM courses.

The Foreign language core requirement is waived for the following populations:

- All students pursuing a Bachelor of Science (B.S.) degree as their primary major, except B.S. degree students in psychology.
- Bachelor of Sciences in psychology who are also pre-health.

*Updated: 07-27-2020*
Honors Program at PCS

Fordham School of Professional and Continuing Studies is unique among major universities in offering an honors program tailored specifically for adult students. The program enables students who have demonstrated their capability for independent work of high quality to form mentorship relationships with senior faculty of their choosing and to design projects related to their personal and professional goals.

For more information:
Please contact your advising dean.

Requirements

Students become eligible for nomination to the Honors Program after completion of at least 30 credits toward the bachelor’s degree (which may include transferred credits) and at least four Core Curriculum courses at Fordham with a cumulative grade point average of 3.6. Nominations from among this eligible group are made annually by faculty members and reviewed by the Honors Program Committee.

Students who are invited to participate, and who accept this invitation, will register for a four-credit interdisciplinary honors course, in which they must earn a grade of at least B to continue in the program. Interdisciplinary honors courses are offered each term and rotated among the campuses.

In subsequent semesters prior to graduation, honors students will seek faculty mentorship for two advanced-level study projects. Each project will be done as an independent research course and need not be taken in consecutive semesters. Project grading will be done by the faculty mentor, in consultation with the honors program director or designee.

Projects must be in two different disciplines, only one per semester, and none in the semester of intended graduation. The interdisciplinary honors course or one of the projects may, if appropriate, be counted toward fulfillment of the student’s major. None can substitute for a major or core curriculum requirement.

Upon satisfactory completion of the interdisciplinary honors course, two independent study projects, as well as the completion of all other degree requirements with a final cumulative grade point average of 3.6, students will graduate with the notation in cursu honorum inscribed on their diplomas and transcripts. Students who are unable to fulfill all of these requirements will, nevertheless, receive full academic credit for work which they have completed.

Humanitarian Studies

Humanitarian action, those international endeavors that attempt to relieve the suffering of populations in crisis, and its ideological counterpart, humanitarianism, are powerful notions that cut across many aspects of contemporary life. Even as humanitarianism makes compelling moral claims, its actions are often shaped by political interests, expediency, and a technocratic approach to addressing suffering, all of which have potential to harm the world’s most vulnerable populations. The academy has a vital role to play in both understanding humanitarianism and improving contemporary humanitarian practice. The major in international humanitarian studies allows students to examine technical innovation and undertake theoretical critique of humanitarian activities across a range of crises and actors.

In considering international responses to suffering, undergraduates in this major will draw upon a wide array of intellectual tools and academic frameworks. Ethical, moral, cultural, and spiritual considerations confront logistic, economic, scientific, and geo-political modes of thought in circumstances of vast complexity: violent conflict (including gender-based violence), famine, and natural disaster. The major will also contribute to central aims of Fordham’s mission: research and education that assist in the alleviation of poverty, the promotion of justice, and the protection of human rights as part of a cosmopolitan education that prepares students for leadership in a global society.

An interdisciplinary undergraduate minor that offers students a comprehensive understanding of issues central to contemporary humanitarian affairs, especially as seen through the academic lenses of history, sociology, philosophy, theology, political science, and international studies. Students will examine the global impact of natural and man-made disasters, disease, poverty, conflict, human rights violations, and government and intergovernmental policies on international human communities. The international humanitarian affairs minor offers an in-depth analysis of the humanitarian field that will enable students to acquire theoretical and practical knowledge.

Humanitarian Studies Major

Requirements

The following ten courses are required for the major in Humanitarian Studies:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HUST 4001</td>
<td>The Humanitarian System: Past, Present, and Future</td>
<td>4</td>
</tr>
<tr>
<td>HUST 4500</td>
<td>Evolution of Development and Humanitarian Aid Systems ¹</td>
<td>4</td>
</tr>
<tr>
<td>HUST 4800</td>
<td>International Humanitarian Internship ¹</td>
<td>4</td>
</tr>
<tr>
<td>HUST 4888</td>
<td>Senior Thesis Seminar ¹</td>
<td>4</td>
</tr>
</tbody>
</table>

Two required electives from each of the following subject areas: 20 to 24

- History, Philosophy, and Anthropology Area Studies (see below)
- Humanitarian Affairs, Political Science, Sociology, and Economics (see below)
- Communications, Women’s Studies and Literary Studies (see below)

¹ Please note:
- Students are required to complete HUST 4001 before HUST 4500.
- Students are required to complete both HUST 4001 and HUST 4500 before both HUST 4800 and HUST 4888.
Elective Courses

Students must complete a total of six electives, two from each of the following subject areas.

Note: Because of the diverse range of relevant disciplines and knowledge, the list of electives may not be inclusive of all possible courses. If you are interested in courses that seem relevant but are not listed below, please contact the executive director, Brendan Cahill (brcahill@fordham.edu), to seek approval for your course.

<td>3 to 4</td>
<td></td>
</tr>
</tbody>
</table>

1 Please note:
   • Students are required to complete HUST 4001 before HUST 4500.
   • Students are required to complete both HUST 4001 and HUST 4500 before HUST 4800.

2 Courses that fulfill these requirements are listed under the humanitarian studies major (p. 1220).

Availability

The minor in humanitarian studies is primarily housed at Fordham College at Rose Hill, and is available to both Lincoln Center and Rose Hill students.

Individualized Major

Students are permitted to submit a plan of studies in a concentration that involves courses in two or more departments. A committee of faculty members from those departments will consider the proposal and, if they decide that it is both academically sound and practically workable, will notify the class dean of the proposal. If the class dean approves the proposal, the student may undertake the intended major. The faculty committee will supervise these studies, make necessary changes and, along with the class dean, recommend graduation. Interested students should consult their class dean.

Availability

To permit students to design programs of study that fit their own needs and interests, Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies provide the option of a personalized interdisciplinary major.

Information Systems

Rapid technological advances have radically reshaped business and the economy. Digital technology, combined with globalization, has spawned new markets, new ways of organizing business processes, new work environments, disruptive business models, and new strategic and competitive opportunities for today's business leaders. Electronic commerce, social networking, mobile computing, digital goods and services, cloud computing, and big data are a few of the many digital tech trends that are transforming business and shaping a new economy.

Fordham's information systems (IS) curriculum teaches students how to become business leaders who can harness the power of technology and business analytics to create business value and gain competitive advantage. Students gain a deep understanding of both business and technology and emerge with a skill set that is highly sought after by employers.

The IS faculty recently redesigned the curriculum to position students effectively for the careers and roles that are most called for in today's business world. Students can select courses from three cutting-edge, career-oriented tracks, as follows:

Business Analytics Track

Students prepare for careers in business analytics, a fast-growing area in firms of all types and sizes. Students will be able to collect, clean, structure, integrate, and analyze data to drive management insight, informed decision-making, and superior business performance. The business analytics program provides familiarity with concepts, frameworks, software tools and techniques, and trends.

Digital Business Innovation Track

This track readies students to drive business transformation through digital technologies. Students will acquire an in-depth understanding of digital business trends such as e-commerce, mobile commerce, cloud computing, social technologies, and tech startups. Students will be able to understand and exploit disruptive digital innovation.

Enterprise Architecture Track

Prepares students to design and build business systems, as well as to implement, manage, and leverage enterprise systems within organizations. Students will be able to design and manage sophisticated systems that solve business problems and provide the foundations for redesigned business processes, enterprise-wide integration and information sharing, novel services, and innovative business models. This track includes also a number of industry-specific courses that provide a sophisticated understanding of IT applications within a specific industry, such as health care IT.
Overall, students will:

- Learn to recognize new business opportunities created by digital technologies
- Learn to address the strategic, tactical, and operational issues associated with using information systems successfully in business
- Acquire hands-on tech skills that will enable them to solve business problems and gain an edge in the job market

Gabelli School students may integrate IS into their academic program in several ways:

- As a major
- As a primary or secondary concentration added to a major in business administration
- As a secondary concentration added on top of any major

How courses are counted
Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

For more information

</table>

Total Credits 33

1. Any course with the INSY subject code (p. 334) numbered 3421 or higher counts toward this requirement. Some Computer Science electives may apply with department approval.

2. ACBU 3442 Individual and Business Taxation and ACBU 3443 Assurance and Auditing should both be taken if a student pursues the two CPA-required courses.

Secondary Concentration

The secondary concentration in Information Systems requires any three upper-level courses in subject code INSY (p. 334) numbered 3421 or higher.

Updated: 07-27-2020
Information Systems Major

Requirements

Major and Track Requirements

The information systems major includes six required courses and four information systems electives. All required courses are drawn from the information systems area. While most students choose all four electives from the information systems area, up to two electives can be taken in the computer science department or in other business areas, with the approval of the faculty adviser.

</table>

Four electives from one of the following tracks:
- Business Analytics Track
- Digital Business Innovation Track
- Enterprise Architecture Track

Information Systems Major Electives/Tracks

Information systems major electives (4 courses, 12 credits): Students must take four advanced information systems electives. They are encouraged to use at least three advanced elective courses to specialize in their chosen track. Students also can, after consulting with an information systems faculty adviser, create an optimal mix of electives across tracks to fit their prior expertise and career goals. While most students choose all four electives from the information systems area, up to two electives can be taken in the computer science department or in other business areas, with the approval of the faculty adviser.

Information systems electives sync with the three tracks as follows:

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

Integrative Neuroscience

Neuroscience is one of the most exciting, interesting, and integrative fields in science today. Technological advances of the last 20 years have led to a dramatic rise in neuroscience research across multiple domains, including biology, chemistry, psychology, computer science, and physics, as well as seemingly unrelated fields such as economics.

A primary aim of the integrative neuroscience major is to engage Fordham students in this exciting and rapidly advancing field so that they become competitive candidates for postgraduate education in the neuroscience field. A unique aspect of the integrative neuroscience major is the presence of three tracks (cell and molecular, cognitive, and systems and computational), each focusing on a specific aspect of neuroscience. The design of the major also ensures that students have exposure to each of the disciplines so that their work can be informed by multiple perspectives.

Students majoring in integrative neuroscience may not double major in biology, natural science, computer science, environmental science, or psychology. Students majoring in integrative neuroscience may choose a minor provided that they fulfill the requirements stipulated by the department or program offering the minor and have approval of the Dean’s Office. Students may not choose a minor in a department or program that is aligned with their area of specialization in the integrative neuroscience program. For example, a student in the Cell and Molecular Specialization may not choose a Biology minor or a student in the Cognitive Specialization may not choose a Psychology minor. However, a student in the Cell and Molecular Specialization may choose a Psychology minor. A limited number of course credits of the major may be used to fulfill requirements for the minor.

Each student interested in the integrative neuroscience major will be evaluated at the end of their third semester. Students are required to (1) have taken at least three foundation courses, (2) have a science GPA of 3.2, and (3) not have more than 4 credits less than a B- in their science courses including labs (biology, chemistry, natural sciences, math, computer science, and psychology).

For more information

Visit the Integrative Neuroscience program web page.

Programs

- Integrative Neuroscience Major (p. 1225)
Integrative Neuroscience Major
Requirements

The course requirements for the Integrative Neuroscience major consist of four components: nine foundation courses required of all integrative neuroscience majors; three required, concentration-connected neuroscience courses that emphasize the different concentrations within the major; three concentration courses that allow the student to enhance their study within their chosen concentration; and a research experience lasting a minimum of two semesters, beginning as early as is reasonable for the student and project, but no later than the summer/fall after the junior year.

All majors must also enroll in a capstone research seminar course for students in all concentrations to share and discuss the results of their research with other integrative neuroscience majors.

A minimum grade of C- is required for courses to count towards the major.

Course | Title | Credits
--- | --- | ---
Required Courses | | |
Select one of the following biology options: | | 8 to 10
Option 1: | | |
BISC 1403 & BISC 1413 | Introductory Biology I and Introductory Biology Lab I | |
BISC 1404 & BISC 1414 | Introductory Biology II and Introductory Biology Lab II | |
Option 2: | | |
NSCI 1403 & NSCI 1413 | General Biology Lecture I and General Biology Lab I | |
NSCI 1404 & NSCI 1414 | General Biology Lecture II and General Biology Lab II | |

CISC 4020 | Bioinformatics | |
CISC 4631 | Data Mining | |
PSYC 1200 | Foundations of Psychology | 4
BISC 4532 | Neuroscience | 3
or NSCI 4630 | Neuroscience | |
PSYC 3110 | Cognitive Neuroscience | 4
CISC 3250 | Systems Neuroscience | 4
Three electives in one of these concentrations: | | 9 to 12
Cell and Molecular Neuroscience | | |
Cognitive Neuroscience | | |
Systems/Computational Neuroscience | | |
NEUR 4999 | Neuroscience Research | 3
NEUR 4900 | Neuroscience Capstone Seminar | 1

1 AP Calculus AB (MATH 12AB) or AP Calculus BC (MATH 12BC) credit may fulfill this requirement.
2 Serves as Foundation Course for students pursuing the Systems/Computational Concentration only.
3 PSYC 1200 Foundations of Psychology credit from AP Psychology (score of 4 or 5) may fulfill this requirement.

Availability

The Integrative Neuroscience major is available to students at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham’s School of Professional and Continuing Studies may major in integrative neuroscience only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Courses for Cell and Molecular Neuroscience

Three courses are required from the list below. Note that many courses on the list below have a required lab component. Students may not enroll in two mutually exclusive versions of the same course, where different course numbers are used on each campus to represent a materially identical course (e.g., BISC 2539 General Genetics and NSCI 3133 Genetics Lecture). Please consult your adviser to confirm whether you may enroll in a given course.

Courses in this group have the NECM attribute.

International Political Economy

International political economy concerns understanding of the complex interactions of economics, politics, and cultures driving the global economy.

Fordham offers undergraduate and graduate programs that offer a unique and innovative interdisciplinary approach to analyzing contemporary global economic relations as well as international development issues.

Program Activities

Study Abroad

Majors are encouraged to study abroad during junior year in order to complement their learning experience at Fordham.

Internships

Students may receive credit for internships having an international focus.

Awards

Seniors may apply for membership into Sigma Iota Rho, the National Honor Society for International Studies. Applicants are required to have a minimum GPA of 3.2 and to have applied for prestigious fellowships, such as the Fulbright, or selected internships with international agencies, such as the State Department.

For more information

Visit the international political economy program web page.

Programs

- International Political Economy Major (p. 1226)

International Political Economy Major

The major in international political economy (IPE) explores the nature and complexities of our increasingly interdependent and politicized global economy from an interdisciplinary perspective. Students who complete the major will receive training in political, economic, and quantitative analysis as well as an introduction to other cultures and the opportunity to use their electives to further specialize their studies according to their interests. Students who wish to continue their education in law,
economics, political science, and international affairs will find the major beneficial. Other students will be able to use the major to prepare for employment with banks, businesses, and government agencies concerned with the global economy. Available specializations include foreign language study and global business.

The major is open only to Fordham College at Rose Hill students who have a cumulative GPA of 3.0 or better when they declare their major. Students wishing to major in IPE are also required to submit a one-or two-page essay explaining why they would like major in IPE to the director. Please contact the director for application deadlines.

The major in international political economy (IPE) is administered by the Graduate Program in International Political Economy and Development (IPED). IPED is an affiliate member of the Association of Professional Schools of International Affairs (APSIA).

Requirements
The major consists of eight required core courses and four electives distributed as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>POSC 2501</td>
<td>Introduction to International Politics</td>

<td>4</td>
</tr>
</tbody>
</table>

Select one of the following tracks:

- Foreign Language Elective Track
- Global Business Elective Track
- General Elective Track

Elective Tracks
Four courses chosen from one of three tracks:

Foreign Language Elective Track
Four courses in the same subject with either the ARAB (p. 52), FREN (p. 260), GERM (p. 268), ITAL (p. 364), JPAN (p. 369), MAND (p. 400), RUSS (p. 526), or SPAN (p. 552) subject codes, numbered 1500 to 4999, count toward this requirement.

Global Business Elective Track

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ACBU 2222</td>
<td>Principles of Financial Accounting</td>
<td>3</td>
</tr>
<tr>
<td>ACBU 2223</td>
<td>Principles of Managerial Accounting</td>
<td>3</td>
</tr>
</tbody>
</table>

Select two of the following:

- ECON 3235 Economy of Latin America
- ECON 3240 World Poverty
- ECON 3346 International Trade
- ECON 3347 International Finance

General Elective Track
Any course with the IPE attribute code may fulfill this requirement.

Note that ACBU 2222 Principles of Financial Accounting and ACBU 2223 Principles of Managerial Accounting do not have the IPE attribute and may not count toward the General Elective track. In addition, all courses with the ARAB (p. 52), FREN (p. 260), GERM (p. 268), ITAL (p. 364), JPAN (p. 369), MAND (p. 400), RUSS (p. 526), and SPAN (p. 552) subject codes numbered 1500 to 4999 also count for the major.

Availability
The major in international political economy is available at Fordham College at Rose Hill. Students in Fordham School of Professional and Continuing Studies may major in international political economy only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

International Studies
International studies is carefully designed to prepare students to live, work, prosper—and become good global citizens—in today’s rapidly changing world. It features an interdisciplinary and intercultural curriculum with both classroom learning and real-world experience in the form of internships and study abroad.

International studies offers both rigor and choice. Students complete a specific core of foundational international courses in politics, law, economics, history, and culture. They also choose one of three tracks of specialized study.

The International Expertise Track trains students to analyze international affairs from a global perspective. The Regional Expertise Track develops competency in a region of the world of the student’s own choosing. Students may also apply to enter a Specialist Expertise Track, designed to address important issues, or specific cross-national, cross-cultural, or cross-regional comparisons. This track is selective and requires approval by the director. Each track has a specific language component. Each track has the same goal: to enable students to master the political, economic, environmental, historic, cultural, and sociological dynamics that drive modern life.

International studies prepares students for graduate study and for careers. It is well-crafted for students to move on into international business, law, diplomacy, academia, education, government, international organizations, nongovernmental organizations, public interest advocacy groups, journalism, mass media, and public service.

It also prepares students for a life well-lived. The program follows the Jesuit tradition of cosmopolitan education, respect for other cultures, the dignity of each unique person, and the development of the student as a whole person. Its guiding spirit is Fordham’s own mission: to use education and research to “assist in the alleviation of poverty, the promotion of justice, the protection of human rights, and respect for the environment” and to “foster in all its students life-long habits of careful observation, critical thinking, creativity, moral reflection, and articulate observation, critical thinking, creativity, moral reflection, and articulate
expression.” The international studies program encourages students to use these gifts in the service of the world.

Program Activities

International studies encourages and features experience-based learning. Therefore it strongly supports and helps students participate in both study abroad and internships. The program also organizes lectures, conferences, study tours abroad, and other educational events and experiential learning.

For more information

Visit the International Studies program web page.

Contribution to the Core

International studies offers INST 2500 Introduction to International Studies and INST 3859 Post-1945: A Global History which fulfill the Global Studies core requirement, and INST 4620 The World of Democracy, which fulfills the EP4/Senior Values requirement.

Programs

- International Studies Major (p. 1228)

International Studies Major

Requirements

The major in international studies consists of 13 courses, including a senior thesis and a two-course language requirement in addition to the Fordham core language requirement:

<table>
<thead>
<tr>

</tbody>
</table>

Select six courses from one of the following tracks: 2

International Track

Regional Track

Specialist Expertise Track

Select two courses in addition to the Fordham core language requirement 1

1 The two courses may be advanced courses in the same language used to fulfill the Fordham core or introductory or advanced courses in another language. For the international track they must be two courses in one of the following languages: Arabic, French, Mandarin, Russian, or Spanish. For the regional track they must be in a major language spoken in the chosen region.

2 Five courses approved for the chosen track and a sixth course from either: a) the chosen track; b) any other track; c) from—and in addition to—the language used to complete the International Studies language requirement.

Specialist Expertise Track
Select six courses designed with the faculty adviser and approved by the adviser and the director.

Irish Studies
The Institute of Irish Studies provides an interdisciplinary and intercampus minor that seeks to promote a serious and thoughtful appreciation of Irish history, culture, and society. Courses from such varied disciplines as history, literature, language, theatre, religious studies, art, music, and the social sciences will contribute to a mature understanding of Ireland and the Irish diaspora, particularly in America. The Institute also sponsors public programs, including conferences, lectures, and performances and noncredit courses for the benefit of all Fordham students, alumni, and the general public who might have serious interest in Irish studies.

Program Activities
The Institute of Irish Studies facilitates internships in such places as the Irish Consulate, Irish theatre groups, and Irish publications in New York City. We also facilitate study-abroad opportunities in Ireland. It is possible to do a major in Irish studies by consulting with the class dean and the program director of Irish studies and designing an individualized major.

For more information
Visit the Irish Studies institute web page.

Programs
- Irish Studies Minor (p. 1234)

Irish Studies Minor Requirements
The minor in Irish Studies requires six courses:
### Irish Literature

Courses in this group have the ISLI attribute.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 4149</td>
<td>Modern Drama as Moral Crucible</td>
<td>4</td>
</tr>
<tr>
<td>IRST 3419</td>
<td>Contemporary Irish Literature</td>
<td>4</td>
</tr>
</tbody>
</table>

### Irish History

Courses in this group have the ISHI attribute.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 3260</td>
<td>Medieval Ireland to 1691</td>
<td>4</td>
</tr>
<tr>
<td>HIST 3412</td>
<td>The Tudors</td>
<td>4</td>
</tr>
<tr>
<td>HIST 3430</td>
<td>The World of Queen Elizabeth I</td>
<td>4</td>
</tr>
<tr>
<td>HIST 3455</td>
<td>20th Century Ireland</td>
<td>4</td>
</tr>
</tbody>
</table>

### Jewish Studies Minor

#### Requirements

Six courses in Jewish studies are required for the minor:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 1850</td>
<td>Understanding Historical Change: Jews in the Ancient and Medieval World</td>
<td>3</td>
</tr>
<tr>
<td>HIST 1851</td>
<td>Understanding Historical Change: Jews in the Modern World</td>
<td>3</td>
</tr>
<tr>
<td>HIST 3810</td>
<td>Jews in America</td>
<td>4</td>
</tr>
<tr>
<td>HIST 3815</td>
<td>East European Jewish History</td>
<td>4</td>
</tr>
<tr>
<td>HIST 3834</td>
<td>Gender, Race, and American Mass Media</td>
<td>4</td>
</tr>
</tbody>
</table>

At least one of the six courses taken for the minor should be from outside the history and theology departments. Students should select courses from at least three different departments. In addition, at least one course must be an upper-level seminar, such as an Interdisciplinary Capstone Course or a Values Seminar. No more than one course in Hebrew language (p. 284) may count toward this requirement.

#### History courses

Courses in this group have the JSHI attribute.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 1850</td>
<td>Understanding Historical Change: Jews in the Ancient and Medieval World</td>

<td>THEO 3100</td>
<td>Introduction to Old Testament</td>
<td>3</td>
</tr>
<tr>
<td>THEO 3105</td>
<td>The Torah</td>
<td>3</td>
</tr>
<tr>
<td>THEO 3711</td>
<td>Sacred Texts of the Middle East</td>
<td>3</td>
</tr>
</tbody>
</table>

• an awareness of the complexity of social identities, as well as of social divisions and prejudice;
• the ability to understand how minority cultures live, adapt, and retain their identities among majority cultures;
• the skills necessary to find and interpret complex sources and apply them to a larger project;
• the ability to apply methods and theories from several disciplines to their studies.

### For more information

Visit the Jewish studies program web page.

### Programs

• Jewish Studies Minor (p. 1235)
Latin American and Latino Studies

The Latin American and Latino studies program integrates a series of courses in the humanities, social sciences, and the arts designed to acquaint students with Latin America and the experiences and cultural expressions of the Latino communities in the United States. This interdisciplinary approach aims to expose students to the methods, materials, and tools of various disciplines while addressing two of the program’s and the University’s interrelated major goals: to foster understanding of New York’s local immigrant or diasporic Latino communities and to develop effective, international, global citizenship through learning and service. The major prepares students to enter the fields of international relations, business and finance, social and foreign service, humanitarian affairs, teaching, Hispanic media and communications, publishing, business, finance, and graduate or professional study.

Program Activities

Study Abroad

Study abroad is a rewarding experience in and of itself, but it is especially recommended for LALS majors and minors. Study abroad complements LALS courses while helping students fulfill many of the program’s and the University’s major goals. It helps students achieve the requisite competency in Spanish and gain a better understanding of Latin America and Spain through cultural immersion and service-oriented courses. To this effect the program has established a series of study abroad opportunities for students, ranging from a spring semester or summer abroad in Granada, Spain, and LALSI-approved study abroad programs throughout Latin America, the Caribbean, and Spain, to LALS-sponsored summer and spring study tours.

Upon return from study in a non-Fordham program abroad, students will be able to count toward the major up to four (4) courses for two semesters of study or three (3) courses for one semester of study abroad; and up to two (2) courses toward the minor. For Fordham study abroad programs, such as our summer or spring semester abroad in Granada, LALS majors and minors will be able to count all relevant courses taken abroad. If the student has already declared a LALS major or minor, these courses should be approved prior to going abroad by a LALS faculty adviser.

For more information on studying abroad, please visit the International and Study Abroad Programs page or email isap@fordham.edu.

LALS-Sponsored Programs

Summer and spring semester programs in Granada, Spain

Granada, a world heritage site, is one of the most beautiful and historically-rich cities in the world. It was the hometown of the poet Federico García Lorca, a center of flamenco culture, and a place of intersection for European, North African, and Latin American cultures and scholarship. For a summer or a semester, students will have the opportunity to live in this wondrous city, study the works of García Lorca and Spanish and Latin American cultures, and partake in cultural visits and tours of Andalusia (Andalucía), the region where Granada is located. Interested students should contact Dr. Rafael Lamas at lamas@fordham.edu.

Other LALS-Sponsored Programs

LALS often sponsors study-tour courses in Latin America which offer in-depth, on-site study of the history, arts, and culture of a Latin American city or country. Past courses have included:

- A spring study tour on the colonial artistic traditions of Mexico in Mexico City with Dr. Barbara Mundy (art history); on peace, reconciliation initiatives, and service to communities of displaced families in Bogotá, Colombia, with Dr. Cruz-Malavé (modern languages and literatures) and Dr. Lenis (dean); and on migration in Puebla, Mexico, with Dr. Linda-Fuentes (history).
- A summer course on the development of Cuban culture since the 1959 Revolution in Havana, Cuba, with Dr. Arnaldo Cruz-Malavé (modern languages and literatures), hosted by Casa de las Américas, Cuba’s premier cultural institute.
- LALS will be offering spring study tours on the politics of memory in Santiago, Chile, with Dr. Carl Fischer (modern languages and literatures), on contemporary culture in Havana, Cuba, with Dr. Cruz-Malavé (modern languages and literatures), and on public health in Cali, Colombia, with Dr. Lenis (dean) and Mr. Renaldo Alba (associate director, CSTEP).

Institute Resources

In addition to offering a major, minor, and graduate certificate, the Latin American and Latino studies program sponsors an institute that provides an intellectual home for students and faculty who are interested in Latin America and the Latino immigrant or diasporic communities in the United States: LALSI acts as a clearinghouse for information for faculty and students, invites speakers, organizes conferences and film series, and maintains video and journal collections for the use of its faculty and students. In addition, it sponsors visiting scholars; networks of scholarly exchange between Latin America and the United States, especially on issues pertaining to the relationship between Latin America and its diasporas; and fosters understanding of and service in Latin America through its study abroad programs and study tours of Latin America. Its newsletter, Boletín, which is published twice a year, documents the program’s multiple academic events as well as the research, educational, and service activities of its faculty and students. All Boletín issues are available online at www.fordham.edu/lalsi.

Prestigious Fellowship Opportunities

LALS students have won many prestigious fellowships, including Fulbright Awards, which allow students to pursue their own research abroad. Students need to plan early (preferably in their sophomore year)

Seniors may wish to write a senior essay under the guidance of one of the program’s faculty members.

**Availability**

The major in Latin American and Latino studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Updated: 07-27-2020
Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Latin American and Latino Studies Minor

Requirements

The minor consists of six courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>One introductory course</td>
<td></td>
<td>3 to 4</td>
</tr>
<tr>
<td>Two courses from the social sciences</td>
<td></td>
<td>7 to 8</td>
</tr>
<tr>
<td>Two courses from the humanities/arts</td>
<td></td>
<td>7 to 8</td>
</tr>
<tr>
<td>One elective</td>
<td></td>
<td>3 to 4</td>
</tr>
</tbody>
</table>

See the Latin American and Latino Studies major (p. 1237) for a list of courses that fulfill these requirements.

Since language competency in Spanish is expected, majors and minors should take at least one Latin American/Latino literature course above the 2001 level. Students are highly encouraged to study in Latin America.

Courses that fulfill college requirements may, where appropriate, be credited toward the major or minor. Students whose particular interests do not conform to the pattern of electives described above are encouraged to consult with the director or the associate director to work out a program more appropriate to their needs.

Availability

The minor in Latin American and Latino studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Leading People and Organizations

The leading people and organizations area at the Gabelli School of Business focuses on the following areas:

- Ethical leadership
- Career management, focused on personal and professional calling
- Innovation, including social innovation
- Entrepreneurship, including social entrepreneurship
- Global sustainability management

The area's faculty research has global visibility and is frequently cited in professional journals and the popular press. Some faculty focus mainly on individual-level factors such as character, trustworthiness, or mindfulness. Others look at the group level of what makes highly functional teams work. Many examine how organizations of all kinds can better contribute to solving social problems. Overall, the area's research aims to create insights on how people can manage better.

Faculty contribute to this goal by participating on editorial boards, editing globally prominent journals, and serving in leadership roles in the Academy of Management and other professional associations.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

Programs

Concentrations

- Concentration in Entrepreneurship (p. 1240)
- Concentration in Management (p. 1241)
- Concentration in Personal Development and Leadership (p. 1241)

Related Programs

- Sustainable Business Minor (p. 1325)
- Concentration in Social Innovation (p. 1293)

Concentration in Entrepreneurship

Entrepreneurship: Not just a field, but a mindset.

The Gabelli School of Business prepares its students to tackle real business problems with an arsenal of knowledge, skills, and experiences. The Entrepreneurship program within the Gabelli School of Business turns students into change agents and disruptors to seize countless opportunities in front of them. We do this by re-calibrating how students think about money, failure, what a career is, what kind of lifestyle they want, and what kind of impact they want to have in the world.

Entrepreneurship is not easy. It is not for the faint of heart. But it IS a door to opportunity for students who are intrigued by the path less traveled. For students who value freedom and independence and creativity. For students who don’t like being pigeon-holed in the typical career path. For students looking for an exciting, non-traditional lifestyle.

The Entrepreneurship concentration was developed to deliver a forward-thinking, skills-based curriculum driven by experiential learning to change the way students think. Regardless of one’s career trajectory (the startup world, corporate America, nonprofits, etc.), students learn how to embrace failure, how to vet opportunities, how to pitch ideas, how to be innovators, and how to confidently change the world for the better.

Students at the Rose Hill and Lincoln Center campuses can earn a concentration in Entrepreneurship as either a primary concentration (four courses) or a secondary concentration (three courses).

For more information

Visit the Entrepreneurship Program web page.

Requirements

Entrepreneurship is available to Gabelli School students as either a primary or secondary concentration.

Concentration in Management Requirements

Gabelli students may pursue management as a primary or secondary concentration.

Primary Concentration

Students who want to pursue management as a primary concentration are required to complete four upper-level courses in Leading People and Organizations, Strategy, and/or Operations.

Secondary Concentration

Students who want to pursue management as a secondary concentration are required to complete three upper-level courses in Leading People and Organizations, Strategy, and/or Operations.

Concentration in Personal Development and Leadership Overview

Research shows that those who are able to be effective change makers, are the happiest and most successful.
Are you inspired to become a compassionate leader for change, who wants to revolutionize the world for the better? Then this secondary concentration may be for you!

Personal Development and Leadership will allow you to explore with more intention and guidance what your gifts are and how you can develop and deploy them, no matter the industry you desire to work in some day, or what you wish to achieve in life.

Available at Rose Hill and Lincoln Center, this secondary concentration will teach you to:
- Understand your strengths and gifts
- Help you develop these gifts into skills
- Support you in applying these skills to effectuate change
- Develop and support you in your leadership role after college

**Requirements**

**Secondary Concentration in Personal Development and Leadership**

The Secondary Concentration in Personal Development and Leadership requires completion of three courses (nine credits).

**Marketing**

Marketing identifies customer needs and designs strategies and tactics by which companies satisfy those needs and create value for customers, organizations, and society at large.

In applying economics, psychology, sociology, anthropology, statistics, and mathematics to a vital aspect of the U.S. and global economy, marketing calls for people with broad interests: that is, creative thinkers who are willing to seek new solutions. In turn, marketing concepts today spread far beyond the realm of packaged-goods and durable-goods companies to encompass the business strategies of diverse service firms, nonprofit institutions, and even political entities. Marketing knowledge can be critical to success in any area of business, regardless of specific positions or job titles because marketing includes finding solutions to ever-changing problems and the persuasion of target customers, creative thinking and effective communication skills are necessary.

Marketing courses draw upon many interests and aim to provide the necessary foundation for planning careers in various sub-fields of marketing.

Students may create a track in their marketing major by directing some of their coursework in their major electives in a specific manner. Three possible areas of focus would be strategic branding, marketing analytics, or services marketing. Students pursuing a concentration (in marketing or in other areas of business) may also complete these courses by adding a secondary concentration. If you would like to consider one of these areas of focus, please see your class dean for advice and direction.

**How courses are counted**

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

**For more information**

Visit the marketing area web page.

- Concentration in Marketing (p. 1243)
- Concentration in Marketing Analytics (p. 1243)
• Concentration in Services Marketing (p. 1243)
• Concentration in Strategic Branding (p. 1243)

Concentration in Global Marketing and Consumer Insights

Companies need marketers who can explain people. Unravel the mysteries behind why people buy what they buy, and you will be immeasurably valuable.

The Gabelli School at Lincoln Center's program in global marketing and consumer insights gives you the skills you need to explain the complexities and contradictions of consumer behavior. By drawing together knowledge from marketing, psychology, sociology, and anthropology, you will be able to develop creative new approaches.

The global marketing and consumer insights concentration will teach you to explain people's shopping habits, discover what makes someone choose a certain brand, and find out, online, what makes people click.

Marketing has long relied on traditional psychology-based approaches to consumer behavior. As today's shoppers become harder to predict, however, companies are turning to anthropology to give them a deeper, more nuanced view of how consumers interact with their environment. This concentration prepares students to reveal, understand and leverage consumer insights that can advance the state of marketing. Students take a mix of business and liberal arts courses—often marketing, anthropology and psychology coursework— and then apply their knowledge through a required experiential component, such as an internship or global travel experience.

Graduates of this concentration are ready for careers in the burgeoning field of business anthropology and the careers in consumer insights for which business anthropologists are hired.

Requirements

The global marketing and consumer insights concentration can be pursued by students pursuing the Global Business Administration major at Lincoln Center.

<table>

</tr>
</thead>
<tbody>
<tr>
<td>MKBU 3441</td>
<td>Marketing Research</td>
<td>3</td>
</tr>
<tr>
<td>Three marketing courses</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Secondary Concentration

Students who want to pursue marketing as a secondary concentration are required to complete any three upper-level marketing courses.

1 Any course from subject code MKBU (p. 406) 3226 or higher may fulfill this requirement.

Students pursuing a primary or secondary concentration in marketing may not earn credit for COMC 3172 Principles of Advertising or PSYC 3320 Consumer Behavior.

Concentration in Marketing Analytics

Massive amounts of data are generated when customers make purchases, go online, and even engage in social media. This concentration teaches students to harness, analyze, and produce insights from these data and find solutions for marketing-related problems.

Requirements

Marketing Analytics can be pursued by Gabelli students as a secondary concentration only.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>

<td>Web Analytics</td>
<td>3</td>
</tr>
</tbody>
</table>

Concentration in Services Marketing

The U.S. economy hinges on services such as retail, financial services, tourism, healthcare, and education. But marketing services requires different skills and techniques than marketing consumer goods such as cars or cell phones. This concentration gives students an understanding of the service economy and a command of current approaches to services marketing.

Requirements

Services Marketing can be pursued by Gabelli students as a secondary concentration only.

The following courses are required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKBU 4105</td>
<td>ST: Services Marketing</td>
<td>3</td>
</tr>
<tr>
<td>MKBU 4442</td>
<td>ST: Mktg Fincl Services</td>
<td>3</td>
</tr>
<tr>
<td>MKBU 3449</td>
<td>ST: Customer Experience Mgt</td>
<td>3</td>
</tr>
</tbody>
</table>

Concentration in Strategic Branding

Some of the world's largest brands are worth more than $100 billion. How are dominant brands created, and how are they managed to retain and increase their value? In this concentration, students learn how to
help companies develop, launch, and build memorable brands, both conceptually and visually.

**Requirements**

Strategic Branding can be pursued by Gabelli students as a secondary concentration only.

The concentration requires completion of the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKBU 3439</td>
<td>ST: Branding</td>
<td>3</td>
</tr>

<tr>
<td>ANTH 3470</td>
<td>People and Cultures of Latin America</td>
<td></td>
</tr>
</tbody>
</table>

Two upper level marketing courses

1. Any course from subject code MKBU (p. 406) numbered 3226 or higher fulfills this requirement.
2. This list is a sample of commonly completed classes; however, there are many courses from Fordham College that fulfill this requirement. Please consult your class dean to get approval for a different course to fulfill this requirement.

Students pursuing a major in marketing may not earn credit for COMC 3172 Principles of Advertising or PSYC 3320 Consumer Behavior.

Students must also complete the Gabelli School business and liberal arts Core Curricula. In addition, all students complete between three and seven liberal arts electives depending on their major requirements.

### Marketing Minor

This minor is for FCRH and FCLC students who are interested in applying marketing principles and practices to business needs. It combines classes in marketing, psychology, sociology, and statistics. Because marketing includes persuasion, students must possess effective communication skills. This minor is often of particular interest to students who are pursuing a major in communications.

#### Requirements

The minor in marketing is available consists of six courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MKBU 3225</td>
<td>Marketing Principles</td>
<td>3</td>
</tr>
<tr>
<td>PSYC 2000</td>
<td>Statistics 1,2</td>
<td>4</td>
</tr>
<tr>
<td>MKBU 3435</td>
<td>Consumer Behavior</td>
<td>3</td>
</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSYC 2600</td>
<td>Social Psychology</td>
<td></td>
</tr>
<tr>
<td>PSYC 3410</td>
<td>Creativity</td>
<td></td>
</tr>
<tr>

<td>Introduction to Cultural Anthropology</td>
<td></td>
</tr>
<tr>
<td>ANTH 3351</td>
<td>Comparative Cultures</td>
<td></td>
</tr>
<tr>
<td>ANTH 3470</td>
<td>People and Cultures of Latin America</td>
<td></td>
</tr>
</tbody>
</table>

Two upper level marketing courses

1. Requires PSYC 1200 Foundations of Psychology as a prerequisite.
2. Students whose major requires a statistics course may substitute the statistics course from their major. All others must take PSYC 2000 Statistics.
3. Any course with subject code MKBU (p. 406) numbered 3226 or higher may fulfill this requirement.

Students beginning the Marketing minor are encouraged to take MKBU 3225 Marketing Principles concurrently with PSYC 1200 Foundations of Psychology. The next class students should take is MKBU 3435 Consumer Behavior, which might be paired with PSYC 2000 Statistics.

### Mathematics

The Mathematics Department offers both a major and a minor in Mathematics. The major prepares students for graduate studies or employment in a variety of fields dependent on quantitative and analytical skills. In addition, a student may prepare for teaching mathematics at the middle/high school level by selecting the 5-Year Integrated Teacher Education Track (p. 1311), offered jointly with the Graduate School of Education. (Students interested in this option should seek advising as soon as possible).

The Departments of Mathematics and Economics offer a joint major (p. 1247). The Departments of Mathematics and Computer and Information Sciences also offer a joint major (p. 1245).
Program Activities

The department sponsors student chapters of Pi Mu Epsilon (the national mathematics honors society) and MAA (Mathematical Association of America). In addition, the Math Club sponsors meetings on interesting topics in mathematics and career possibilities. There are opportunities for summer research projects.

For more information

Visit the Mathematics department web page.

Contribution to the Core

The Core Curriculum requirement in mathematical reasoning may be satisfied by one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 1100</td>
<td>Finite Mathematics</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1203</td>
<td>Applied Calculus I</td>
<td>3</td>
</tr>
<tr>
<td>MATH 1206</td>
<td>Calculus I</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1207</td>
<td>Calculus II</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1700</td>
<td>Mathematical Modelling</td>
<td>4</td>
</tr>
</tbody>
</table>

1 MATH 1100 Finite Mathematics and MATH 1203 Applied Calculus I have no college-level prerequisites

Majors in biology, chemistry, computer science, economics, general science, natural science, physics, and psychology should consult with their department advisers, as these majors have specific mathematics requirements. Students in the Gabelli School of Business take MATH 1108 Math for Business: Finite and MATH 1109 Math for Business: Calculus. Gabelli students interested in a math minor should take MATH 1206 Calculus I or MATH 1207 Calculus II in place of MATH 1109 Math for Business: Calculus.

Incoming first years are placed in mathematics courses based on their standardized test scores and their high school transcript record.

Programs

- Mathematics Major (p. 1246)
- Mathematics and Computer & Information Sciences Major (p. 1245)
- Mathematics/Economics Major (p. 1247)
- Mathematics Minor (p. 1247)

Mathematics and Computer & Information Sciences Major

The major, offered jointly by the Department of Computer and Information Sciences (p. 1117) and the Department of Mathematics (p. 1244), is designed to give students an excellent background in computer science and a solid foundation in those mathematical disciplines necessary for a full understanding of computer and information sciences. The program fosters both careful reasoning and a deep understanding of technology, enhancing graduates' marketability. The high degree of difficulty makes this joint major attractive to recruiters from the technology industry; it also prepares students who wish to pursue graduate study in computer science and other applied quantitative fields. Please note: There is no minor in this area; students are instead encouraged to minor in either mathematics or computer and information sciences.

Internships

Some majors in this program have completed internships, but such internships are not required and do not count toward the two electives in the major.

For more information

Visit the Mathematics and Computer & Information Sciences program page.

Requirements

A minimum grade of C- is required for each course counting toward this joint major. An overall average of 2.0 must be separately maintained in mathematics and computer and information sciences courses.

Required courses and sufficient electives to fulfill the major are available on both campuses. Course descriptions are available from each department.

 Majors in this program are eligible for honors at graduation in mathematics and computer & information sciences.

The major requires 14 total courses: 10 common required courses, two courses in one concentration, and two electives. Students must declare a concentration in mathematics or computer and information sciences. The 10 common required courses are identified below.

<table>

Availability
The major in mathematics and computer & information sciences is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in the School of Professional and Continuing Studies may major in mathematics and computer & information sciences only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Mathematics Major Requirements
Eleven courses beyond Calculus 1 and Calculus 2 are required to receive the Bachelor of Arts in mathematics.

<table>

</table>

1 MATH 1108 Math for Business: Finite, MATH 1109 Math for Business: Calculus, MATH 1203 Applied Calculus I, and MATH 1204 Applied Calculus II cannot be used.

2 Either MATH 12AB Transfer Calculus AB or MATH 12BC Transfer Calculus BC (transfer credit from AP Calculus AB or AP Calculus BC), but not both, may fulfill this requirement as a course below the 2000 level.

Availability

The minor in mathematics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham’s School of Professional and Continuing Studies may minor in mathematics only if their schedules are sufficiently flexible to permit them to take day classes at the Rose Hill or Lincoln Center campuses.

Mathematics/Economics Major

This major, offered jointly by the departments of economics and mathematics, is designed to give the student an excellent background in modern economic analysis and a solid grounding in those mathematical disciplines necessary for a full understanding of economic analysis. Because it both demands and fosters careful reasoning as well as a facility with abstract formulations of problem situations, it is an apt prelaw program. Its high degree of difficulty makes it attractive to business recruiters and it is particularly appropriate for graduate studies in economics, business, and other applied quantitative fields.

Program Activities

Majors in this program are eligible for honors at graduation in mathematics/economics. Some majors in this program have done internships at banks or investment firms. Such internships are not required and do not count among the four electives in the major.

For more information

Visit the Math and Economics Program page.

Requirements

Students enrolled in this program are required to take the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ECON 1100</td>
<td>Basic Macroeconomics</td>
<td>3</td>
</tr>
<tr>

</tr>
</tbody>
</table>

Select one of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 3006 &amp; MATH 3007</td>
<td>Probability and Statistics</td>
<td></td>
</tr>
<tr>
<td>ECON 2140</td>
<td>Statistics I &amp; ECON 2142 &amp; Statistical Decision Making</td>
<td></td>
</tr>
</tbody>
</table>

Electives

Select four electives in mathematics or economics

1 Any course with the MATH subject code (numbered 2000 or higher) or the ECON subject code may fulfill this requirement. Of these four courses, At least one course must be in mathematics and one must be in economics.

Required courses and sufficient electives to fulfill the major are available on both campuses.

Availability

The major in mathematics/economics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in mathematics/economics only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Medieval Studies

The medieval studies major is interdisciplinary in nature and enables the student to develop an integrated understanding of medieval civilization through the study of its history, art, music, literature, ways of thought, and religion. Beyond its intrinsic interest, such an understanding of a premodern society provides comparisons and contrasts that shed light

Updated: 07-27-2020
Medieval Studies Major

on modern values and assumptions, and on the origins of many modern institutions. As is the case with liberal arts majors in general, medieval studies majors finish their course of study well prepared for professional careers that require cultural awareness and critical thinking.

Program Activities

The Center for Medieval Studies sponsors an annual lecture series and conference, and hosts receptions and class visits to medieval exhibits and collections in the area.

For more information

Visit the Medieval Studies program web page.

Programs

• Medieval Studies Major (p. 1248)
• Medieval Studies Minor (p. 1250)

Medieval Studies Major

The major consists of 10 courses drawn from seven departments: art history and music, classics, English, history, modern languages and literature, philosophy, and theology. Six courses are required, as follows, with examples of departmental and program offerings that fill the requirement. The final selection of four elective courses should be determined in consultation with program advisers.

Requirements

The major requires ten courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 1300</td>
<td>Understanding Historical Change: Medieval</td>
<td>3</td>
</tr>
</tbody>
</table>

One course required from each of the following sections:

- Medieval Literature
- Medieval Philosophy
- Medieval Theology
- Medieval Art or Music

Medieval Language

Four additional elective courses

1 Any course with the MVST subject code or the MVST attribute code may fulfill this requirement.

In consultation with the director or the associate director, students may be encouraged to take 5000-level courses (graduate courses open to undergraduates) in related departments.

Double Majors

Double majors are given greater flexibility in fulfilling the major requirements. Up to two courses may also count toward both the Medieval studies major and the second major. Students who choose medieval studies as a double major also complete 10 courses, including the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HIST 1300</td>
<td>Understanding Historical Change: Medieval</td>
<td>3</td>
</tr>
</tbody>
</table>

One course in each of the following areas:

- Medieval Literature or Medieval Language

Medieval Philosophy or Medieval Theology

Medieval Art/Music

Six electives

Medieval Literature

Courses in this group have the MVLI attribute.

Updated: 07-27-2020
The major in medieval studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Fordham School of Professional and Continuing Studies students should major in medieval studies only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

**Fordham College at Rose Hill students:** The requirements above are in addition to those of the Core Curriculum.

**Fordham College at Lincoln Center students:** The requirements above are in addition to those of the Core Curriculum.

**Professional and Continuing Studies students:** The requirements above are in addition to those of the PCS Core Curriculum.

### Medieval Studies Minor

**Requirements**

A minor in medieval studies requires the following six courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>LATN 3300</td>
<td>Advanced Latin</td>
<td>4</td>
</tr>
<tr>
<td>THEO 1050</td>
<td>Syriac Language and Literature I</td>
<td>3</td>
</tr>
</tbody>
</table>

**Availability**

The minor in medieval studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

### Middle East Studies

The Middle East studies program is an intercampus, interdisciplinary major that is designed to provide a broad background in the language, literature, history, religion, anthropology, politics, economics, and art of the Middle East and North Africa (defined to include all the countries of the Arabic-speaking world plus Israel, Turkey, and Iran) from ancient times to the present. Through exposure to several disciplines, this University-wide liberal arts curriculum both provides a rich background for work in business, diplomacy, government, philanthropy, and education and prepares students for advanced work in one of the disciplines.

**Program Activities**

**Internship Program**

Students have the option of enrolling in the Middle East studies internship program, which offers opportunities to gain practical experience in the field while simultaneously receiving academic credit (at the student’s discretion). Internships are currently available with the Catholic Near East Welfare Association, the National U.S.-Arab Chamber of Commerce, Human Rights Watch/Middle East, Amnesty International, Human Rights First, and the International Catholic Organizations Information Center.

**Off-Campus Courses**

Students are encouraged to enroll in Middle East studies courses at both the Rose Hill and Lincoln Center campuses although they may complete a Middle East studies major/minor without taking any off-campus courses. Also, credit may be received for work completed in any one of the several cooperative agreements the Middle East studies program has with the American University of Cairo (Egypt), the Arabic Language Institute in Fez (Morocco), the Bourguiba Institute for Arabic Language Study in Tunisia (Tunisia), and the AIMS-sponsored overseas Arabic language program in Tangiers at the Tangiers-American Legation Museum (TALM). In spring 2006, Fordham University entered into a collaborative agreement with St. Joseph University, the French-language Jesuit university in Beirut, Lebanon. MESP Students can attend summer, one and two-semester-long programs in Lebanon and receive appropriate academic credit at Fordham. See the program director, John Entelis, Ph.D., for more details.

**Opportunities for Nonmajors**

Of course, students wishing to take only one or two courses in the program are welcome to do so. Excellent achievement in several such courses would prove attractive to a number of prospective employers.

**For more information**

Visit the Middle East Studies program web page.

**Contribution to the Core**

Middle East studies offers Arabic courses, which, when taken in sequence through to the exit level (ARAB 2001 Arabic Language and Literature), will fulfill the foreign language core requirement. The descriptions for all Arabic language courses can be located in the Modern Languages and Literature section (p. 1251) of this bulletin. In addition, the program offers courses that will fulfill the Global Studies core requirement.

**Programs**

- Middle East Studies Major (p. 1250)
- Middle East Studies Minor (p. 1251)

### Middle East Studies Major

**Requirements**

All majors must complete a minimum of eight one-semester courses composed of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>THEO 3711</td>
<td>Sacred Texts of the Middle East</td>
<td>3</td>
</tr>
<tr>
<td>or THEO 3715</td>
<td>Classic Islamic Texts</td>
<td></td>
</tr>
</tbody>
</table>
Majors and minors are strongly advised to study a Middle Eastern language. Modern standard Arabic is regularly offered in the college and will satisfy the college's language proficiency requirement. If a student has satisfied the language proficiency requirement through a non-Middle Eastern language, as many as two courses in a Middle East language may be counted toward the eight-course requirement for the major and six-course requirement for the minor.

Availability
The minor in Middle East studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may minor in Middle East studies only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Middle East Studies Minor
Overview
Few parts of our world are more in the news or more vital to the international interests of the United States than the Middle East. Business, mass media, law firms, governmental and non-governmental bodies, philanthropic organizations, relief and aid agencies, human rights groups, graduate and professional schools are all eager to recruit bodies, philanthropic organizations, relief and aid agencies, human rights groups, graduate and professional schools are all eager to recruit bodies, philanthropic organizations, relief and aid agencies, human rights groups, graduate and professional schools are all eager to recruit bodies, philanthropic organizations, relief and aid agencies, human rights groups, graduate and professional schools are all eager to recruit bodies, philanthropic organizations, relief and aid agencies, human rights groups, graduate and professional schools are all eager to recruit bodies, philanthropic organizations, relief and aid agencies, human rights groups, graduate and professional schools are all eager to recruit bodies, philanthropic organizations, relief and aid agencies, human rights groups, graduate and professional schools are all eager to recruit bodies, philanthropic organizations, relief and aid agencies, human rights groups, graduate and professional schools are all eager to recruit.

Requirements
All students who minor in Middle East studies must complete a minimum of six courses composed of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>THEO 3711</td>

</table>

Electives
Select three electives

1 Any course with the MEST subject code or the MEST attribute code may fulfill this requirement.

Majors and minors are strongly advised to study a Middle Eastern language. Modern standard Arabic is regularly offered in the college and will satisfy the college's language proficiency requirement. If a student has satisfied the language proficiency requirement through a non-Middle Eastern language, as many as two courses in a Middle East language may be counted toward the eight-course requirement for the major and six-course requirement for the minor.

Availability
The minor in Middle East studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may minor in Middle East studies only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Modern Languages and Literatures
About the Department
The Department of Modern Languages and Literatures offers a variety of programs in languages, literatures, linguistics, and cultures. Its broad aim is to explore the linguistic, cultural, and textual forms by which human beings have constructed and interpreted reality and fictional forms.

The Department prepares students to develop expertise in the following areas: literatures of the world, literary studies, cultural studies, visual culture, intercultural theory and communication/translation, eloquencia perfecta (theater, performance, writing, and public speaking), linguistics and bilingualism/multilingualism, and humanitarianism (anthropology/political science/international studies). Our students demonstrate a commitment to collaborative leadership in community-engaged learning, contact zones, and language cultures (business, health, social justice, translation).

The department offers language courses in Arabic, French, German, Hebrew, Italian, Japanese, Mandarin Chinese, Russian, and Spanish; majors in the following languages and literatures and area studies: French, German, Italian, and Spanish, and minors in Arabic, French, German, Italian, Linguistics, Mandarin Chinese, Russian, and Spanish.

Courses at the 2000 level normally concentrate on advanced language, communication, linguistics, and cultural studies. Courses at the 3000 level normally concentrate on in-depth analysis of literature and artistic productions, intercultural theory, cultural and humanitarian studies, and linguistics. Courses at the 4000 level include Interdisciplinary Capstone Core courses, Senior Values Seminars, and courses that provide students with the opportunity to pursue faculty-mentored research either in the form of an individualized thesis, in our neuro-linguistic or sociolinguistic laboratories, or in the social innovation project on water and migration in Sub-Saharan Africa.

Modern Languages and Literatures also offers a variety of hands-on Community Engaged Learning Courses that enable students to use their linguistic and cultural skills as they work with local New York City communities on a variety of social justice minded issues in addition to MLAL courses taught in English on a myriad of subject matters. The majority of our majors are double majors in a wide variety of fields.
of specialization including among others: communication and media studies, comparative literature, English, humanitarian studies, integrative neuroscience, international political development, international studies, philosophy, psychology, political science, and visual arts.

Program Activities

The department offers a broad range of activities for undergraduates and the broader Fordham community including weekly conversation cafés in the various languages, cultural nights and concerts, literary journals such as Le Bélier, sponsored film screenings, master classes with some of the most preeminent creators in the industry, Fordham Reads Dante, the Bronx Italian American History Initiative (BIAHI), and numerous other interventions. Invited speakers offer formal lectures, informal talks, seminars, and workshops either designed for or open to undergraduates. The French section's Concours d'élégance in partnership with the French Office of Cultural Services offers Fordham students the opportunity to compete both internally and against students from Columbia, CUNY, and NYU.

The students studying abroad at Fordham's center in Granada, Spain, publish the journal Por Granada, which collects the term papers completed in the course Spain in Context. Students taking the MLAL course "Berlin Tales," which includes a study tour to Berlin over spring break, publish their research papers in the journal Kiez Kieken.

Awards and Scholarships

Each year the department bestows a number of awards and scholarships on Fordham students for excellence in the study of foreign languages, literatures, and cultures, and for outstanding commitment to promoting foreign language learning and foreign culture awareness at Fordham and in the larger community. Awards and scholarships include:

- Francis R. Favorini Italian Achievement Award (FCHR)
- French Achievement Award (FCHR)
- German Achievement Award (FCHR)
- Anthony and Cecilia Guardiani Award (FCHR)
- Heydt French Award (FCHR)
- Heydt Spanish Award (FCHR)
- Istituto Italiano di Cultura Award (FCHR)
- Alfred A. Puglisi Travel Award to Italy (FCHR, FCLC, GSB, PCS)
- Russian Award (FCHR)
- Fernand and Santina Vial Scholarship (FCHR, FCLC, GSB)

In addition, honors are awarded to the student with the highest GPA in each of the minors and majors our department offers at FCLC. Students who excel in their German classes will receive a Certificate of Achievement from the German government.

Internships

Students who wish to pursue an internship and receive college credit for it should contact their major adviser and Career Services to identify internship opportunities relevant to their field of study and professional interests. Credits for internship tutorials will be granted depending upon the type of internship, the extent to which the relevant language is used in the work environment, and the significance of the experience for a student's course of study. The number of credits is contingent on the fulfillment of various requirements, such as regular meetings with the adviser, weekly written reports, and completion of a substantial final project, among others.

Below is a sample of organizations at which some of our students have done internships in past years:

- Alliance Française of New York (FIAF)
- Bayern München (the soccer club's NYC office)
- Cultural Services of the French Embassy (CALEC)
- German-American Chamber of Commerce
- Goethe Institute
- Hermès
- Kino Lorber
- Le Figaro (sports division)
- Met Cloisters
- Morgan Library and Museum
- National Organization of Italian American Women (NOIAW)
- New Sanctuary Coalition
- New York African Film Festival
- One Week/Un Acte
- Pergamena parchment makers
- Rare Books Collection at Columbia University Library
- Sorteer
- Theatrical production of Fragments of a Star
- Theatrical production of Les Bonnes at La Mama Theater
- Vogue

Student Clubs and Honor Societies

Modern languages and literatures students are encouraged to share and develop their literary and cultural interests by becoming involved in student clubs and Honor Societies at Rose Hill and Lincoln Center. Such clubs as the following sponsor academic and social events including lectures, film series, outings and dinners to foster an understanding and appreciation of foreign languages and cultures beyond the traditional classroom setting:

- Academia Hispana (RH)
- Le Cercle Français (RH)
- CIAO Amici (LC)
- Deutscher Studenten Klub (RH)
- Insieme Italian Cultural Society (RH)
- La Société Française (LC)
- Honor Societies:
  - Alpha Mu Gamma (foreign languages, RH)
  - Gamma Kappa Alpha (Italian, RH and LC)
  - Pi Delta Phi (French, RH)
  - Sigma Delta Pi (Spanish, RH and LC)

Study Abroad

The faculty of the Department of Modern Languages and Literatures works carefully with each individual student to discover and prepare for a study abroad experience whether for a semester, year, summer, or as part of a Fordham study tour. We have offered courses with study tour components in Austria, Chile, Cuba, France, and Germany and teach in Fordham-sponsored study abroad programs in Granada (Spain), London Centre (United Kingdom), and Rome (Italy). We believe immersive study is one of the best ways to gain linguistic and cultural fluency and encourage our students to study abroad for a semester or an entire academic year. We send students each year to Africa, China, Europe, Latin America, and...
the Middle East, and have relationships with some of the best and most academically rigorous programs in the world.

Students who study abroad can rather easily become a double major in our department and usually at least two of the courses taken abroad can apply to both of the student’s majors or to a major and minor. Students who opt to apply study abroad credits toward their major or minor must seek approval from their major or minor adviser in their language area prior to their going abroad. See program requirements above for accepted maximum number of courses. Additional study abroad credits accepted by Fordham University may be applied as elective credits toward graduation, but not toward the major or the minor. For further information about study abroad, interested students should contact the department and the Office of International and Study Abroad Programs (www.fordham.edu/isap).

For more information
Visit the Modern Languages and Literatures department web page.

Contribution to the Core
The 2001-level course in a modern language other than English fulfills the language requirement. In order to achieve this level of mastery of a foreign language, a mastery that will allow students to comprehend a text of average sophistication in its oral and written form and to comment on it orally and in writing in a coherent and grammatically correct manner, the 2001-level course provides a critical analysis of selected cultural and literary texts, with composition, conversation, and review of pertinent grammatical structures.

Language skills preparation: One to three courses. Students who need preparation before taking the required 2001-level course have:

- Four entry points in French and Spanish, depending upon their prior knowledge of the language:
  - 1001-Introduction I
  - 1002-Introduction II
  - 1501-Intermediate I
  - 1502-Intermediate II
- Three entry points in Arabic, German, modern Hebrew, Italian, Japanese, Mandarin Chinese, and Russian:
  - 1001-Introduction I
  - 1501-Intermediate I
  - 1502-Intermediate II

All those beginning a language at the most basic level take an intensive one-semester course worth five credits in order to accelerate their progress. Other students begin with the course in which they are placed by the department and progress to the 2001 level. Spanish-heritage speakers, who place out of levels 1001 through 1502 of the language, will take SPAN 2301 Spanish for Heritage Speakers instead of 2001 to fulfill the language requirement. Incoming students seeking a substitution/waiver for the foreign language core through the Office of Disability Services must complete this process by the end of the fall semester of their sophomore year.

Exemptions: B.S. and B.F.A. students, B.A. students in PCS, and those majoring in natural science will not have a language requirement unless required for their major.

In addition, the department offers courses that fulfill the American Pluralism, Global Studies, Eloquentia Perfecta 2, 3, and 4, Advanced Literature, Interdisciplinary Capstone, and Senior Values core requirements. It also offers Community Engaged Learning Courses that integrate coursework with service in the diverse and multilingual context of New York City.

Study abroad is an integral part of the study of foreign language, literature, and culture. Students are highly encouraged to study abroad in a foreign-language-speaking country for a semester or a year.

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Programs

**Majors:**
- French Language and Literature Major (p. 1254)
- French Studies Major (p. 1256)
- German Language and Literature Major (p. 1256)
- German Studies Major (p. 1257)
- Italian Language and Literature Major (p. 1258)
- Italian Studies Major (p. 1259)
- Spanish Language and Literature Major (p. 1262)
- Spanish Studies Major (p. 1263)

**Minors:**
- Arabic Minor (p. 1253)
- French Minor (p. 1255)
- German Minor (p. 1257)
- Italian Minor (p. 1259)
- Linguistics Minor (p. 1260)
- Mandarin Chinese Minor (p. 1261)
- Russian Minor (p. 1262)
- Spanish Minor (p. 1263)

**Arabic Minor Requirements**
The Arabic minor consists of six courses, four of which must be taken at Fordham. A minimum grade of C is required in all courses in order to fulfill minor requirements. Students must take six courses numbered ARAB 1501 and above:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ARAB 1501</td>
<td>Intermediate Arabic I</td>
<td>3</td>
</tr>
<tr>
<td>ARAB 1502</td>
<td>Intermediate Arabic II</td>
<td>3</td>
</tr>
<tr>
<td>ARAB 2001</td>
<td>Arabic Language and Literature</td>
<td>3</td>
</tr>
<tr>
<td>ARAB 2400</td>
<td>Approaches to Arabic Culture</td>
<td>4</td>
</tr>
<tr>
<td>Two ARAB electives $^1$,$^2$</td>
<td>6 to 8</td>
<td></td>
</tr>
</tbody>
</table>

$^1$ Electives include any course with the ARAB subject code, and a list can be found here. Up to one translation course may also be applied toward the minor. These classes will have the ARAB attribute.
At least one 3000 level course is required. A 2000-level ARAB course is a prerequisite for all 3000-level ARAB courses.

Students who place out of ARAB 1501, ARAB 1502, ARAB 2001, will replace them with either 2000 or 3000 upper-level elective courses. Students may also apply up to two courses from study abroad toward the minor.

**AP and IB Credit**

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

**Study Abroad**

Studying abroad is not required. However, students interested in the Arabic minor are strongly encouraged to study in an Arabic-speaking country, such as Egypt, Jordan, Morocco, or Syria, for at least one semester. The study abroad programs provide the student with classes of Modern Standard Arabic and an immersion experience in a spoken Arabic dialect. Up to two courses for the Arabic minor may be taken abroad.

**Availability**

The minor in Arabic is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may minor in Arabic only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

**French Language and Literature Major**

**Requirements**

Majors in French language and literature will take a minimum of ten courses numbered FREN 1502 Intermediate French II and higher, and at least six upper-level courses numbered 3000 and above. (Courses numbered lower than 1502 will not count toward the major or minor.)

Students majoring in French language and literature should prepare their schedules in consultation with the assigned departmental major adviser.

These ten courses, to be completed all in French, normally include:

<table>

### Study Abroad

The department encourages students to study abroad for one or two semesters. Students who opt to apply study abroad credits toward their major must have these courses approved by the French language and literature major adviser prior to their going abroad. Students studying abroad for one year may apply up to five study abroad courses toward their major. Additional study abroad credits accepted by Fordham University may be applied as elective credits toward graduation, but not toward the French language and literature major.

### Honors

Students who exhibit exceptional potential and intellectual curiosity and have a minimum GPA of 3.67 in the major may choose to write a senior thesis for Honors in French language and literature. Students should consult their French major adviser for advice and guidelines on this option early in their junior year.

### Availability

The major in French language and literature is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in French language and literature only if their schedules are sufficiently flexible to permit them to take day classes at the Rose Hill or Lincoln Center campuses.

**Fordham College at Rose Hill students:** The requirements above are in addition to those of the Core Curriculum.

**Fordham College at Lincoln Center students:** The requirements above are in addition to those of the Core Curriculum.

**Professional and Continuing Studies students:** The requirements above are in addition to those of the PCS Core Curriculum.

### French Minor Requirements

Minors in French must take six courses numbered FREN 1502 and higher, to be chosen in consultation with the assigned departmental French minor adviser.

Courses for the minor, to be completed all in French, will normally include the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREN 1502</td>
<td>Intermediate French II</td>
<td>3</td>
</tr>
<tr>
<td>FREN 2001</td>
<td>French Language and Literature</td>
<td>3</td>
</tr>
</tbody>
</table>

Updated: 07-27-2020
**French Studies Major**

**Requirements**

The French studies major is an individualized interdisciplinary major consisting of ten courses numbered FREN 1502 Intermediate French II and higher, and will normally include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREN 1502</td>
<td>Intermediate French II</td>
<td>3</td>
</tr>
<tr>
<td>FREN 2001</td>
<td>French Language and Literature</td>
<td>3</td>
</tr>
<tr>
<td>FREN 2600</td>
<td>France: Literature, History, and Civilization</td>
<td>4</td>
</tr>
<tr>
<td>Select three electives numbered above FREN 1502.</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>

1. This course is a prerequisite for all 3000-level FREN courses.
2. Two of these courses must be 3000-level FREN courses.

Courses numbered lower than 1502 will not count toward the minor. A list of courses in French can be found here.

**AB and IB Credit**

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

**Study Abroad**

A maximum of two courses taken abroad for one semester and a maximum of three courses taken abroad for one year may apply toward the French minor. These courses must be approved by the assigned departmental French minor advisor prior to studying abroad.

**Availability**

The minor in French is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may minor in French only if their schedules are sufficiently flexible to permit them to take day classes at the Rose Hill or Lincoln Center campuses.

**French Studies Major**

**Requirements**

The French studies major is an individualized interdisciplinary major consisting of ten courses numbered FREN 1502 Intermediate French II and higher, and will normally include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>FREN 1502</td>
<td>Intermediate French II</td>
<td>3</td>
</tr>
<tr>
<td>FREN 2001</td>
<td>French Language and Literature</td>
<td>3</td>
</tr>
<tr>
<td>FREN 2600</td>
<td>France: Literature, History, and Civilization</td>
<td>4</td>
</tr>
<tr>
<td>Select three electives numbered above FREN 1502.</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>

1. This course is a prerequisite for all 3000-level courses.

Courses numbered lower than 1502 will not count toward the major. All French studies majors will develop an individual course of studies with concentration on a particular target area or track in close consultation with the assigned departmental French studies major adviser. A list of courses in French can be found here.

Students will be able to take courses inside and outside the department. They will be required to keep a portfolio of all their work, provide a written proposal of their unique course of study, and give a final written or oral presentation during the spring of their senior year, in which they demonstrate their independent work in the target area or track. The majority of classes will be taught in French, but up to three related courses in a target area or track may be taken in English when necessary. All such courses must be approved in advance by the French studies major adviser. To this end, students will need to provide their adviser with the course syllabus for approval prior to registering for the class.

**AB and IB Credit**

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

**Study Abroad**

A maximum of four courses taken abroad for one semester and a maximum of five courses taken abroad for one year may apply toward the French studies major. These courses must be approved by the French studies major adviser prior to studying abroad.

**Honors**

Students who exhibit exceptional potential and intellectual curiosity and have a minimum GPA of 3.67 in the major may choose to write a senior thesis for Honors in French studies. Students should consult their French studies major adviser for advice and guidelines on this option early in their junior year.

**Availability**

The major in French is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in French studies only if their schedules are sufficiently flexible to permit them to take day classes at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

**German Language and Literature Major**

**Requirements**

Majors in German will take a minimum of 10 courses numbered GERM 1501 Intermediate German I and higher, to be selected in consultation with the assigned departmental German major adviser.
(Courses numbered lower than 1501 will not count toward the major or minor.) These 10 courses, to be completed all in German, will normally include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 1501</td>
<td>Intermediate German I</td>
<td>3</td>
</tr>
<tr>
<td>GERM 1502</td>
<td>Intermediate German II</td>
<td>3</td>
</tr>
<tr>
<td>GERM 2001</td>
<td>German Language and Literature</td>
<td>3</td>
</tr>
<tr>
<td>Select seven additional courses</td>
<td></td>
<td>28</td>
</tr>
</tbody>
</table>

1 Chosen in consultation with the German major adviser. Any course with the GERM subject or the GERM attribute code may fulfill this requirement.

Students who place out of GERM 1501, GERM 1502, or GERM 2001 will replace them with upper-level elective courses.

**AB and IB Credit**

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

**Study Abroad**

Each year, majors are able to enroll in a spring semester MLAL German course with an integrated study abroad component.

The department encourages students to study abroad for one or two semesters. Students who opt to apply study abroad credits toward their major must have these courses approved by the departmental German major adviser prior to their going abroad. Students studying abroad for one year may apply up to four study abroad courses toward their major. Students studying abroad for one semester may apply up to three study abroad courses toward their major. Additional study abroad credits accepted by Fordham University may be applied as elective credits toward graduation, but not toward the German major.

**Availability**

This major in German is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in German only if their schedules are sufficiently flexible to permit them to take day classes at the Rose Hill or Lincoln Center campuses.

*Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.*

*Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.*

*Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.*

**German Minor Requirements**

Students who minor in German must take a minimum of six courses numbered GERM 1501 Intermediate German I and higher, to be selected in consultation with the assigned departmental German minor adviser.

Students who place out of GERM 1501, GERM 1502, or GERM 2001 must replace them with upper-level elective courses to receive credit toward the minor. A full list of courses in German can be found here.

**AB and IB Credit**

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

**Study Abroad**

Each year, minors are able to enroll in a spring semester MLAL German course with an integrated study abroad component.

Students minoring in German may apply a total of two study abroad courses toward the minor. These courses must be approved by the German minor adviser prior to studying abroad.

**Availability**

The minor in German is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may minor in German only if their schedules are sufficiently flexible to permit them to take day classes at the Rose Hill or Lincoln Center campuses.

**German Studies Major Requirements**

The German studies major is an individualized interdisciplinary major consisting of 10 courses numbered GERM 1501 Intermediate German I and higher, to be selected in consultation with the assigned departmental German studies major adviser.

Students who place out of GERM 1501, GERM 1502, or GERM 2001 must replace them with upper-level elective courses to receive credit toward their course requirements. A list of GERM courses can be found here.

**AB and IB Credit**

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.
Study Abroad

Majors are able to enroll in the MLAL German courses with an integrated study abroad component offered every spring semester. Up to three related courses may be taken from a department other than Modern Languages and Literatures but must be approved by the German studies major adviser in advance.

A maximum of two courses taken abroad for one semester and a maximum of three courses taken abroad for one year may apply toward the German studies major. These courses must be approved by the German studies major adviser prior to studying abroad.

Availability

The major in German studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham’s School of Professional and Continuing Studies may major in German studies only if their schedules are sufficiently flexible to permit them to take day classes at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Italian Language and Literature Major

Requirements

Majors in Italian language and literature will take a minimum of ten courses numbered ITAL 1501 Intermediate Italian I and higher, to be selected in consultation with the assigned departmental Italian major adviser. (Courses numbered lower than 1501 will not count toward the major.)

The 10 courses required for the major, to be completed all in Italian, will normally include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ITAL 1501</td>
<td>Intermediate Italian I</td>
<td>3</td>
</tr>
<tr>
<td>ITAL 1502</td>
<td>Intermediate Italian II</td>
<td>3</td>
</tr>
<tr>

</tbody>
</table>

1 Either course serves as a prerequisite for all 3000-level courses.
2 Any course with the ITAL subject code may fulfill this requirement. Courses with the MLAL subject and the ITAL attribute may also apply with the Italian adviser’s permission.

Students who place out of ITAL 1501, ITAL 1502, or ITAL 2001 will replace them with upper-level elective courses.

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

The department encourages students to study abroad for one or two semesters. Students who opt to apply study abroad credits toward their major must have these courses approved by the Italian major adviser prior to their going abroad. Students studying abroad for one year may apply up to four study abroad courses toward their major. Students studying abroad for one semester may apply up to three study abroad courses toward their major. Additional study abroad credits accepted by Fordham University may be applied as elective credits toward graduation, but not toward the Italian major.

Honors

Honors in Italian will be awarded to students who have a GPA in the major of 3.67 or higher, and who complete an outstanding senior thesis under the direction of an Italian faculty member. Students should consult their Italian major adviser for advice and guidelines on this option early in their junior year.

Availability

The Italian major is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in Italian only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Italian Minor

Requirements

Minors in Italian will take a minimum of six courses numbered ITAL 1501 Intermediate Italian I and higher, to be chosen in consultation with the assigned departmental Italian minor adviser.

Courses for the minor, to be completed all in Italian, normally include the following:

- ITAL 1501 Intermediate Italian I
- ITAL 1502 Intermediate Italian II
- ITAL 2001 Italian Language and Literature
- ITAL 2500 Approaches to Literature
- or ITAL 2561 Reading Culture Through Literature
- Two additional electives in Italian at the 3000-level

Students who place out of ITAL 1501, ITAL 1502, or ITAL 2001 will replace them with upper-level elective courses.

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

Up to two courses for the Italian minor may be taken abroad. These courses must be approved by the Italian minor adviser prior to studying abroad.

Availability

The minor in Italian is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may minor in Italian only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Italian Studies Major

Requirements

The Italian studies major is an individualized interdisciplinary major consisting of ten courses numbered ITAL 1501 Intermediate Italian I and higher. All Italian studies major will develop an individual course of study with concentration on a particular target area or track in close consultation with the assigned departmental Italian studies major adviser.

The Italian studies major will normally include:

<table>

ITAL 1501 will not count toward the major.
In close consultation with an Italian studies major adviser, students
design an individualized course of study, which may include up to three
courses taught in English or offered by other departments and programs on topics relevant to Italian culture and history. Other coursework should be within the Italian program. Sample areas of study may include:

- Italy and the Alps
- Italy, Film, and Media Studies
- Italy, Europe, and the Mediterranean
- Italy and the Italian American Experience/Italy and the Italian Diaspora
- Gendered Italy
- Postcolonial Italy

Students who wish to take courses outside of the department must provide their Italian studies major adviser with a copy of the course syllabus for approval before registering for the course. They will also be required to keep a portfolio of all of their work, and make a final oral or written presentation during the spring of their senior year, in which they demonstrate their independent work in the target field.

**AP and IB Credit**

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

**Study Abroad**

A maximum of three courses taken abroad for one semester and a maximum of four courses taken abroad for one year may apply to the Italian studies major. These courses must be approved by the Italian studies major adviser prior to studying abroad.

**Honors**

Honors in Italian studies will be awarded to students who have a GPA in the major of 3.67 or higher, and who complete an outstanding senior thesis under the direction of an Italian faculty member. Students should consult their Italian studies major adviser for advice and guidelines on this option early in their junior year.

**Availability**

The major in Italian studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in Italian studies only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

---

**Linguistics Minor**

**Requirements**

The Linguistics minor offers students interdisciplinary training in the scientific study of language. Through the study of linguistics, students gain insights into fundamental aspects of human communication and develop a fuller understanding of the complexities of language and communication. Students will finish the minor with heightened awareness of what language is, how language works and is used, and how the study of language intersects with a multitude of disciplines. The Linguistics minor provides students with tools for studying language from diverse perspectives, and these skills complement several areas including anthropology, biology, business, computer science, education, modern languages and literatures, neuroscience, psychology, and sociology.

The Linguistics minor requires six (6) courses:

<table>
<thead>
<tr>

**AB and IB Credit**

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

**Study Abroad**

Students interested in the Mandarin Chinese minor are highly recommended to study in China or another Chinese-speaking country. Students are encouraged to study abroad during the summer, for a semester, or a year to either fulfill some of the required core courses or take upper-level electives. A maximum of two courses for the Mandarin Chinese minor may be taken abroad. Students who opt to apply study abroad credits toward their minor must have these courses approved by the Mandarin Chinese minor adviser prior to their going abroad.

**Availability**

The minor in Mandarin Chinese is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham’s School of Professional and Continuing Studies may minor in Mandarin Chinese only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.
Russian Minor

Requirements

Students minoring in Russian will take a minimum of six courses numbered RUSS 1501 Intermediate Russian I and higher, to be selected in consultation with the assigned departmental Russian minor adviser.

A course of study in Russian normally includes:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>RUSS 1501</td>
<td>Intermediate Russian I</td>
<td>3</td>
</tr>
<tr>
<td>RUSS 1502</td>
<td>Intermediate Russian II</td>
<td>3</td>
</tr>
<tr>
<td>RUSS 2001</td>
<td>Russian Language and Literature</td>
<td>3</td>
</tr>
<tr>
<td>Select two additional 2000-level courses</td>
<td></td>
<td>8</td>
</tr>
<tr>
<td>Select at least one 3000-level elective course</td>
<td></td>
<td>4</td>
</tr>
</tbody>
</table>

Students who place out of RUSS 1501, RUSS 1502, or RUSS 2001 will replace them with 2000- or 3000-level elective courses, a list of which can be found here.

Up to one course in translation may be applied toward the minor if the readings and assignments are done in Russian.

AP and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

Students interested in the Russian minor are strongly encouraged to study in Russia for at least one semester. A maximum of two courses for the Russian minor may be taken abroad. Students who opt to apply study abroad credits toward their minor must have these courses approved by the Russian minor adviser prior to their going abroad.

Availability

The minor in Russian is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may minor in Russian only if their schedules are sufficiently flexible to permit them to take day courses at the Lincoln Center campus. All Russian courses are offered only at Lincoln Center.

Spanish Language and Literature Major

Overview

The Spanish Language and Literature major provides students with a comprehensive knowledge of Hispanic literature and culture from the Middle Ages to the contemporary era. All courses are to be completed in Spanish. Through this major, besides achieving fluency and correct grammar usage in written and spoken Spanish, students are expected to develop a thorough understanding of Hispanic literature and cultures.

Classes focus on close textual analysis, historical contextualization, and the use of current critical perspectives. Majors will become familiar with the major authors and issues defining the diverse cultural traditions of the Hispanic world. In addition to their written work, students are required to participate actively in class discussions and/or make oral presentations.

Requirements

Students majoring in Spanish language and literature will take a minimum of ten courses numbered SPAN 2001 Spanish Language and Literature and higher, to be selected in consultation with the assigned departmental Spanish language and literature major adviser.

All 10 courses for the major must be taken in Spanish and within the department.

These courses normally include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 2001</td>
<td>Spanish Language and Literature ¹</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 2201</td>
<td>Spanish Community Engaged Learning</td>
<td></td>
</tr>
<tr>
<td>or SPAN 2301</td>
<td>Spanish for Heritage Speakers</td>
<td></td>
</tr>
<tr>
<td>SPAN 2500</td>
<td>Approaches to Literature ²</td>
<td>4</td>
</tr>
<tr>
<td>SPAN 3001</td>
<td>Spain: Literature and Culture Survey ³</td>
<td>4</td>
</tr>
<tr>
<td>SPAN 3002</td>
<td>Latin America: Literature and Culture Survey ³</td>
<td></td>
</tr>
<tr>
<td>Select six additional upper-level courses ⁴</td>
<td></td>
<td>24</td>
</tr>
</tbody>
</table>

¹ Students normally begin the major with one of these courses, and may only count one of them towards the major. Courses numbered lower than 2001 will not count toward the major.

² This course is the prerequisite for all courses numbered 3000 and above.

³ These courses are not prerequisites for courses numbered 3000 and above.

⁴ Please note:
   • A minimum of four of these courses must be at the 3000-level or above. A list of courses with the SPAN subject code can be found here. 3000- and 4000-level courses do not need to be taken in numerical order.
   • Advanced language courses at the 2000-level are also available, such as SPAN 2305 Spanish Conversation and Composition, SPAN 2620 Spanish Phonetics, and SPAN 2650 Business Spanish, among others. These courses help interested students to hone their language skills before proceeding to 3000- and 4000-level literature courses.

In addition to SPAN 2001 (or SPAN 2201/SPAN 2301, when applicable) and SPAN 2500 Approaches to Literature, only two more courses can be taken at the 2000-level, and a minimum of six courses, including SPAN 3001 and SPAN 3002, must be numbered 3000 and above.

Heritage speakers of Spanish, who are initially placed in SPAN 2301 Spanish for Heritage Speakers, will fulfill the language core requirement with this course and will begin the Spanish language and literature major at this level.

Students who place out of either SPAN 2001 or SPAN 2301 will replace them with an upper-level elective course.

AB and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture
must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad
The department encourages students to study abroad for one or two semesters. Students who opt to apply for study abroad credits toward their major must have these courses approved by the Spanish language and literature major adviser prior to their going abroad. Students studying abroad for one year may apply up to five study abroad courses toward their major. Students studying abroad for one semester may apply up to four study abroad courses toward their major. Additional study abroad credits accepted by Fordham University may be applied as elective credits toward graduation, but not toward the Spanish major.

Honors
Students who exhibit exceptional potential and intellectual curiosity and have a minimum GPA of 3.67 in the major may choose to write a senior thesis for Honors in Spanish language and literature. Students should consult their Spanish major adviser for advice and guidelines on this option early in their junior year.

Availability
The major in Spanish language and literature is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in Spanish language and literature only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Spanish Minor Requirements
Students minoring in Spanish must take a minimum of six courses numbered SPAN 2001 Spanish Language and Literature and higher, to be chosen in consultation with the assigned departmental Spanish minor adviser.

The six courses for the minor normally include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 2001</td>
<td>Spanish Language and Literature</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 2201</td>

<td>Spain: Literature and Culture Survey</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 3002</td>
<td>Latin America: Literature and Culture Survey</td>
<td>4</td>
</tr>
<tr>
<td>Select three electives numbered SPAN 2302 or above.</td>
<td>12</td>
<td></td>
</tr>
</tbody>
</table>

1 Students normally begin the minor with one of these courses, and may only count one of them towards the minor. Courses numbered lower than 2001 do not count toward the minor.
2 This course is the prerequisite for all courses numbered 3000 and above.
3 Neither course is a prerequisite for taking other 3000- or 4000-level Spanish electives.
4 Any SPAN course numbered 2302 and above may apply, as well as certain other courses such as MLAL 3007 Spanish Linguistics. Two of these elective courses must be above the 3000-level.

Students who place out of either SPAN 2001 Spanish Language and Literature or SPAN 2301 Spanish for Heritage Speakers must replace them with an upper-level elective course.

Heritage speakers of Spanish, who are initially placed in SPAN 2301 Spanish for Heritage Speakers, may fulfill the language core requirement with this course and begin the Spanish minor at this level.

All six courses must be taken in Spanish and in the department except when studying abroad. At least three courses, including SPAN 3001 Spain: Literature and Culture Survey and/or SPAN 3002 Latin America: Literature and Culture Survey, must be numbered 3000 or above.

AB and IB Credit
All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad
A maximum of two courses taken abroad for one semester, and a maximum of three courses taken abroad for a year may be applied toward the Spanish minor. These courses must be approved by the Spanish minor adviser prior to studying abroad.

Availability
The minor in Spanish is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may minor in Spanish only if their schedules are sufficiently flexible to permit them to take day classes at the Rose Hill or Lincoln Center campuses.

Spanish Studies Major Overview
The Spanish studies major is an individualized and interdisciplinary major that allows students to combine their Spanish-language interests with their interests in other fields covered by Fordham’s extensive curriculum. All Spanish studies majors will develop an individual course of study with concentration on a particular target area or track in close consultation with the assigned departmental Spanish studies major adviser.

This combination of coursework enables students both to further enhance their fluency and correct grammar usage and to further develop their understanding of Hispanic literature, cultures, and linguistics.
Requirements

The major consists of ten courses numbered SPAN 2001 Spanish Language and Literature and above. At least seven of the 10 courses for the major must be completed in Spanish.

The Spanish studies major will normally include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SPAN 2001</td>
<td>Spanish Language and Literature ¹</td>
<td>3</td>
</tr>
<tr>
<td>or SPAN 2201</td>
<td>Spanish Community Engaged Learning</td>
<td></td>
</tr>
<tr>
<td>or SPAN 2301</td>
<td>Spanish for Heritage Speakers</td>
<td></td>
</tr>
<tr>
<td>SPAN 2500</td>
<td>Approaches to Literature ²</td>
<td>4</td>
</tr>
<tr>
<td>SPAN 3001</td>
<td>Spain: Literature and Culture Survey ³</td>
<td>4</td>
</tr>
<tr>
<td>or SPAN 3002</td>
<td>Latin America: Literature and Culture Survey</td>
<td></td>
</tr>
<tr>
<td>Four upper-level Spanish electives ⁴,⁵</td>
<td></td>
<td>12</td>
</tr>
<tr>
<td>Three Spanish Studies electives ⁶</td>
<td></td>
<td>16</td>
</tr>
</tbody>
</table>

¹ Students normally begin the major with one of these courses, and may only count one of them towards the major. Courses numbered lower than 2001 do not count toward the major. Heritage speakers of Spanish, who are initially placed in SPAN 2301 Spanish for Heritage Speakers, will fulfill the language core requirement with this course and will begin the Spanish studies major at this level.

² This course is the prerequisite for all courses numbered 3000 and above.

³ Neither course is a prerequisite for taking other 3000- or 4000-level Spanish electives.

⁴ Any course with the subject code SPAN (p. 552) numbered 3000-4999 (not otherwise counted in the major) may fulfill this requirement.

⁵ Students who place out of either SPAN 2001 or SPAN 2301 will replace them with an upper-level Spanish elective and will complete five upper-level Spanish electives (not four).

⁶ Any course with the subject code SPAN (p. 552) numbered 2302-4999 may fulfill this requirement, as may any course with the SPAN attribute code (see list below). Mindful of contextualization and the importance of interdisciplinarity, students are encouraged to take these courses outside of the SPAN subject code (p. 552). Consultation with the major adviser regarding these three courses, and the possibility of making them part of a thematic or discipline-based track, is highly desirable.

Spanish Studies Electives

Courses in this group have the SPAN attribute.

</tr>
</tbody>
</table>

Tracks and Portfolio

All Spanish studies majors will develop an individual course of study on a particular area in close consultation with the assigned departmental Spanish studies major adviser. Sample tracks include:

- Spanish and Visual Arts
- Spanish and the Global Market
- Spanish and Another Related Field in the Humanities
- Spanish in the U.S.
- Spanish and Medieval Studies

Students will be required to keep a portfolio of all their work, provide a written proposal of their unique course of study, and give a final written or oral presentation during the spring of their senior year, in which they discuss a topic that demonstrates the coherence of the chosen track.

AP and IB Credit

All courses counting towards the core language requirement and the major or the minor in a modern foreign language, literature and culture must be taken for credit and a letter grade. When AP or IB credits are awarded as equivalent to the 1502 level in a language, these credits will be applied toward the core language requirement and, as elective credits, toward graduation, but they will not be applied toward the major or the minor in that language.

Study Abroad

A maximum of three courses taken abroad for one semester and a maximum of four courses taken abroad for one year may apply toward the Spanish studies major. These courses must be approved by the Spanish studies major adviser prior to studying abroad.

Honors

Students who exhibit exceptional potential and intellectual curiosity and have a minimum GPA of 3.67 in the major may choose to write a senior thesis for Honors in Spanish Studies. Students should consult their Spanish major adviser for advice and guidelines on this option early in their junior year.

Availability

The major in Spanish studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham’s School of Professional and Continuing Studies may major in Spanish studies only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Music

Note: ‘Art History and Music’ is a single academic department at Fordham, but the academic information for each subject is listed on a separate web
The music major offers students the opportunity to study music historically as a force in the shaping of Western culture and technically as a practical skill, craft, and art. Emphasizing music as a humanistic pursuit integrated into the liberal arts curriculum, it covers a range of courses that include music history, theory, composition, and performance. While the program offers ample opportunities to take private lessons and to participate in campus performance ensembles, it leads to an academic B.A. degree rather than a performance-oriented one. Students are prepared to go on to graduate school, seek careers in music education, and pursue professions that combine music with other fields of study.

No course in which the student earns a grade of D or F may be used toward a departmental major or minor.

Double Majors

The music major can be combined with other courses of study, including a double major. A music major interested in a career in the music industry or in arts management, for example, might consider taking economics or business courses related to the arts. Fordham’s Gabelli School of Business offers a minor in business that can be combined with the music major.

Program Activities

Internships

Music majors can receive credit for a music internship with a recording company or concert agency in New York City during their junior or senior years. With the approval and supervision of the department, majors may receive elective credit for one internship graded on a pass/fail basis.

For more information

Visit the music department web page.

Contribution to the Core

The music program offers MUSC 1100 Introduction to Music History, which fulfills the fine arts core requirement. This course is also available as an Eloquentia Perfecta 1 Seminar. In addition, the department offers American pluralism and global studies courses each year as well as a variety of EP3, EP4, and ICC courses.

Programs

- Music Major (p. 1265)
- Music Minor (p. 1266)

Music Major

Requirements

The music major program consists of 10 one-semester departmental courses and four semesters of campus-based vocal or instrumental ensembles:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSC 1100</td>
<td>Introduction to Music History</td>
<td>3</td>
</tr>
<tr>
<td>MUSC 2140</td>
<td>Fundamentals of Keyboard Musicianship and Keyboard Lab</td>
<td>4</td>
</tr>
</tbody>
</table>

Select three of the following:

- MUSC 2145 Music Theory I 4
- MUSC 2146 Music Theory II 4
- MUSC 2147 Music Theory III 4

Select four semesters of performance in a campus-based vocal or instrumental ensemble 4

One of the following two options:

- One 2000-level elective plus four semesters of individual instruction 8
- Two electives at the 2000-level or higher

Individual Instruction

Music majors may apply four semesters/sections of private vocal/instrumental instruction toward the elective requirement. Majors must enroll in one-credit sections of lessons in order to qualify for course credit toward the major. Majors who wish to continue beyond four semesters/sections should enroll, with the approval of the department, beginning with their fifth semester/section of lessons, in zero-credit sections. Majors who do not intend to complete the four one-credit courses should only enroll in zero-credit sections.

Students will be charged the cost of lessons; applicable fees or rates are published on the music department website.

</tr>
</tbody>
</table>

Theory Courses

The theory courses, which must be taken in sequence, are offered on a two-year cycle. Students unprepared for MUSC 2145 Music Theory I are required to take MUSC 2120 Introduction to Music Theory, which will not apply toward the major.

Students with keyboard proficiency may, upon approval from the department, substitute Keyboard Musicianship (MUSC 2140/2141) with a music elective.
Performance

Music majors must participate in a minimum of four semesters/sections of performance; they may choose from among the faculty-led vocal and instrumental ensembles listed below. Majors must enroll in one-credit sections of ensembles in order to fulfill the requirement. Majors who wish to continue beyond four semesters/sections should enroll, beginning with their fifth semester/section, in zero-credit sections.

Some ensembles carry a lab fee: applicable fees or rates are published on the music department website.

Coached Chamber Music

Students can enjoy playing chamber music together in a coached ensemble (MUSC 1231). The groups are coached by Fordham’s network of private music teachers. Students are placed in appropriate small groups, with up to four players, by instrument and experience. Students will be charged the cost of lessons; applicable fees/rates are published on the music department website.

Availability

The major in music is available at Fordham College at Rose Hill and at Lincoln Center. Students in the Fordham School of Professional and Continuing Studies may minor in music only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill and/or Lincoln Center campus.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Music Minor

Requirements

The department offers a minor consisting of six one-semester departmental courses in music.

Coached Chamber Music

Students can enjoy playing chamber music together in a coached ensemble (MUSC 1231). The groups are coached by Fordham’s network of private music teachers. Students are placed in appropriate small groups, with up to four players, by instrument and experience. Students will be charged the cost of lessons; applicable fees/rates are published on the music department website.

Availability

The major in music is available at Fordham College at Rose Hill and at Lincoln Center. Students in the Fordham School of Professional and Continuing Studies may minor in music only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill and/or Lincoln Center campus.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

<td>16</td>
</tr>
</tbody>
</table>

1. Students with advanced proficiency may, with advisor permission, fulfill this requirement with MUSC 2146 Music Theory II.
2. Any course with the MUSC subject code may fulfill this requirement.

Minors are also eligible to participate in the Private Vocal/Instrumental Instruction or Music Ensemble programs (see the music major (p. 1265) page for options), but may only take up to four semesters/sections for credit (one credit each, on a pass/fail basis). The four one-credit semesters/sections of lessons or ensemble may replace a single four-credit music elective.

Minors must enroll in one-credit sections of lessons and ensembles in order to qualify for course credit toward the minor.

Minors who wish to continue beyond four semesters/sections should enroll, beginning with their fifth semester/section, in zero-credit sections of lessons. Minors who do not intend to complete the four one-credit courses should only enroll in zero-credit sections.

Students will be charged the cost of lessons; some ensembles carry lab fees. Applicable fees/rates are published on the music department website.

Natural Sciences

The department offers a major in natural science which is designed for both the students who wish to complete their academic training at the bachelor level and for those who plan to continue in graduate schools. The major is designed to provide the students with a flexible program enabling the graduate to pursue a variety of careers, including medicine, dentistry, veterinary medicine, and graduate training in life sciences, life science research, or the teaching of science. Students may also major in other fields and complete the pre-medical or pre-dental program.

Most natural science majors conduct scientific research projects at the Lincoln Center campus or at medical research centers in Manhattan and elsewhere.

For more information

Visit the Natural Sciences department web page.

Contribution to the Core

Core Curriculum NSCI courses for nonmajors are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>NSCI 1010</td>
<td>Physical Sciences: From Past to Present</td>
<td>3</td>
</tr>
<tr>
<td>NSCI 1020</td>
<td>Physical Science: Today's World</td>

<tr>
<td>NSCI 2040</td>
<td>Research Design and Analysis</td>
<td>3</td>
</tr>
</tbody>
</table>

**Electives**

Select at least six electives. Of these:

- Four must include a lab
- Two electives do not need to include a lab

1. NSCI 1423 Concepts in Biology Lecture I and NSCI 1424 Concepts in Biology Lecture II may be substitute, respectively, for NSCI 1403 General Biology Lecture I and NSCI 1404 General Biology Lecture II.
2. One Independent Study course, NSCI 4999 Tutorial, may count toward one of the four lab elective courses.

As listed in the concentrations tab (p. 1267), NSCI 4630 Neuroscience is counted as a non-lab elective if taken alone, but may be counted as a lab-elective if taken with NSCI 4032 Neurobiology Laboratory.

Note that NSCI 4032 Neurobiology Laboratory may not be taken on its own and does not fulfill an elective requirement unless taken concurrently with NSCI 4630 or NSCI 4112.

3. NSCI 4172 Diverse Biologies/Shared Humanity or ENGL 4172 Diverse Biologies/Shared Humanity counts as a (non-lab) elective towards the major, but not towards any concentration.

Other courses may be counted at the department chair’s discretion. It is possible to select electives in order to follow special interests and career goals. This must be done in consultation with the student’s departmental adviser. A grade of C- or better is required in all courses taken to fulfill the major. A student may not take the second half of a one-year course if the grade for the first half is below a C-.

Students are advised that the lecture and laboratory components of general biology, general chemistry, general physics, and organic chemistry should always be taken concurrently.

Advanced placement course credit may be substituted in partial fulfillment of these requisites. Students without two semesters’ advanced placement in chemistry should note that NSCI 1321 General Chemistry Lecture I and NSCI 1322 General Chemistry Lecture II is the prerequisite for NSCI 3121 Organic Chemistry Lecture I and NSCI 3122 Organic Chemistry Lecture II.

**Availability**

The major in natural science is available at Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in natural science only if their schedules are sufficiently flexible to permit them to take some day courses on the Lincoln Center campus.

*Fordham College at Lincoln Center students*: The requirements above are in addition to those of the Core Curriculum.

*Professional and Continuing Studies students*: The requirements above are in addition to those of the PCS Core Curriculum.

**Concentrations**

Students may pursue one of three concentrations within the major: chemical sciences (CHS), organismal biology (ORB), or cell and molecular biology (C+M). Students may major in natural sciences without declaring a concentration. Students opting for one of the concentrations must fulfill the following additional requirements:

1. One of the four lab electives must be NSCI 4999 Tutorial, in the field of the student’s chosen concentration.
2. At least two of the three remaining lab electives must be in classes in the chosen concentration, designated in the table below.
3. At least four of the six electives overall (lab or non-lab) must be in classes in the chosen concentration, designated in the table below.

**Elective and Concentration Courses**

The following table indicate (a) which courses count toward the required lab elective courses and (b) which courses count toward the respective concentrations in CHS, C+M and ORB.
New Media and Digital Design

We are in the midst of a constantly changing and ever shifting digital revolution, and new generations are leading the way, discovering new media and new forms of communication seemingly every day. Fordham’s new undergraduate interdisciplinary program in New Media and Digital Design aims to lead the way to train students to actively engage with the media and design worlds on practical as well as theoretical levels. Combining the forces of the Departments of Communication and Media Studies, Visual Arts, English, Computer and Information Science, and the Gabelli School of Business, this interdisciplinary major aims to create such leaders, whose career success will be propelled equally by innovative capability and deep social, historical, and ethical understanding of new media. Students will emerge with a deep understanding of how new media functions, how it makes meaning, and how to use it practically, and wisely, in a wide variety of “real world” settings.

The major’s objectives are as follows:

• To integrate the various disciplinary learning components with the goal of providing a broad foundation for the fields of new media and digital design.
• To use the variety of disciplines to encourage innovative thinking and new applications in the fields.
• To examine, in an analytical manner, the new modes of information-gathering, collaboration, democratic participation, and self-expression in the rapidly changing world of technologically-based media.
• To continually stress the need for students to understand the social and ethical implications of these new forms of human engagement.

For more information
Visit the New Media and Digital Design program web page.

Programs

• New Media and Digital Design Major (p. 1268)
• New Media and Digital Design Minor (p. 1270)

New Media and Digital Design Major

The major consists of a total of 11 courses with four required courses; an ethics, new media and digital design requirement; and six electives. Students declare one of three concentrations: new media and information; art, text and design; new media and commerce, and choose their six electives from their concentration with some flexibility.

As part of the core requirements, all students would be required to do at least one internship during the course of their undergraduate careers in order to gain valuable practical experience for future employment. Our
unique location in the heart of New York City will allow us to build bridges with the local media industry. NMDD will work closely with the career center to facilitate internship and eventual job placement. In addition, all NMDD students will be required to produce a capstone project. We intend to develop a curated, online showcase for these projects, and to incorporate them whenever possible into the research fairs and other existing venues for undergraduate work.

Requirements

The total number of courses required for the major is 11.

</tbody>
</table>

Select one of the following courses:

- NMDD 3150 Creative Coding
- CISC 2350 Information and Web Programming
- CISC 2500 Information and Data Management
- CISC 2530 Digital Video and Multimedia
- CISC 2850 Computer and Data Analysis

Select four additional courses from one of the following groups:

1. New Media and Information
2. Art, Text, and Design
3. New Media and Commerce

1 The list of courses that apply toward each of these options are the same as those required for the concentrations under the New Media and Digital Design Major (p. 1269). One course normally counting for the Ethics requirement of the NMDD major may apply toward this requirement.

Operations

Operations refers to the design, operation, and improvement of the systems that create and deliver a firm's primary products and services. It integrates all aspects of the product and service lifecycle, from product and process design, procurement, planning, and production, to logistics, distribution, and returns. From start to finish, this execution process makes a direct, significant impact on a firm's competitive advantages and financial performance.

Courses in the operations area equip students with a solid understanding of core operations concepts and decisions, rigorous analytical thinking and skills, and a creative mindset so they can deal with all of the complex issues of a supply chain. Moreover, courses incorporate new elements such as sustainability, risk management, and innovation, making them especially relevant to today's increasingly interdependent and competitive global economy.

For students interested in specific business settings, the area also provides courses that explain the operations function in those industries, such as operations in health care.
How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, and primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and a minor in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

Programs

Concentrations

- Concentration in Management (p. 1271)
- Concentration in Process and Quality Analytics (p. 1271)

Concentration in Management

Requirements

Gabelli students may pursue management as a primary or secondary concentration.

Primary Concentration

Students who want to pursue management as a primary concentration are required to complete four upper-level courses in Leading People and Organizations, Strategy, and/or Operations.

Secondary Concentration

Students who want to pursue management as a secondary concentration are required to complete three upper-level courses in Leading People and Organizations, Strategy, and/or Operations.

Concentration in Process and Quality Analytics

The secondary concentration in process and quality analytics prepares students to manage process-quality projects that improve cost, quality, and overall performance. Students will learn to solve problems using a systems-thinking approach, use data and analytics to experiment and create best practices, and identify ways to help organizations save money and increase efficiency.

For more information

Visit the Operations Area web pages.

Requirements

Process and Quality Analytics is available to Gabelli School students as a secondary concentration only.

Process and Quality Analytics Electives

The courses below may apply toward the elective requirement of this concentration. Courses which are double listed with two subject codes (e.g., INSY 3421 and ACBU 3421) may not be taken twice.

Courses in this group have the PRQU attribute.

Orthodox Christian Studies

As an interdisciplinary program, the minor in Orthodox Christian studies explores the artistic, historical, literary, and philosophical and theological aspects of the 2000-year history of Orthodox Christianity.

Program Activities

The minor in Orthodox Christian studies is part of the Orthodox Christian studies program, which also includes the annual Orthodoxy in America Lecture and the Orthodox Christian Fellowship (OCF) student club.

For more information

Visit the Orthodox Christian Studies Center web page.

Programs

- Orthodox Christian Studies Minor (p. 1272)
Orthodox Christian Studies Minor

The Orthodox Christian Studies minor is an interdisciplinary minor focusing on the faith, history, and cultural significance of the Orthodox Christian tradition.

No matter your major, critical study of the Orthodox Christian tradition offers insights and context for understanding some of the world’s most significant issues:

• You’ll find a rich trove of artistic, cultural, historical, literary, philosophical, and religious resources for exploring the human condition past and present.
• Orthodox Christian studies acts as a cultural bridge, connecting religious traditions from throughout Asia Minor, the Balkans, Eastern Europe, the Middle East, and Russia.
• You’ll gain a greater familiarity with the range of modern Orthodox cultures—from Moscow to Baghdad—that is essential for success in today’s global environment.

Students are required to take Byzantine Christianity and can choose from elective courses* across several disciplines, including art and music history, classics, history, modern languages and literature, philosophy, and theology. Courses could include:

• Byzantine and Western Art
• Understanding Historical Change: Medieval
• Russian Short Fiction
• Byzantium and the West
• Hospitality and Cosmopolitanism
• The Crusades

*Courses that meet general college requirements or other major/minor requirements may be applied toward the completion of the Orthodox Studies minor. For example, THEO 3316, Byzantine Christianity, currently fulfills the sophomore theology core requirement.

Fordham University is the only university in the United States that offers a minor in Orthodox Christian Studies, supported by the Orthodox Christian Studies Center. The center’s mission is to foster intellectual inquiry by supporting scholarship and teaching in a way that is relevant to the ecclesial community, public discourse, and the promotion of Christian unity. The center serves as the locus of all curricular, research, and ecclesial community, public discourse, and the promotion of Christian supporting scholarship and teaching in a way that is relevant to the Studies Center. The center’s mission is to foster intellectual inquiry by

Requirements

The minor consists of the following six courses:

<td></td>
</tr>
</tbody>
</table>

Students are encouraged to apply courses that meet general college requirements or other major/minor requirements towards the completion of this minor. For example, the core course Byzantine Christianity (THEO 3316) currently fulfills the sophomore theology core requirement.

Should faculty sabbaticals or other developments create a situation that limits the availability of courses, the directors of the program would have the authority to amend the guidelines regarding the distribution of electives.

Availability

The minor in Orthodox Christian studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

Business Major

Fordham’s School of Professional and Continuing Studies offers a bachelor’s degree in business that provides adult undergraduates with the skills necessary to become effective leaders in the business world. The major provides a broad base of business knowledge in both a theoretical and an applied context, placing students in an optimal position to build a career focused on the future.

The curriculum emphasizes real-world financial and economic issues, accounting, ethics, management, marketing, and best organizational practices. By mastering this comprehensive business curriculum as well as a specialized liberal arts core, Fordham’s adult students are not only able to comprehend the relationships among the functional areas of business but are also able to develop the knowledge base and professional skills required for career advancement in an evolving global business environment.

The program combines an excellent business curriculum with an outstanding liberal arts program so that students graduate with strong analytic, verbal, and writing skills.

For More Information
Visit the Business program page.

Requirements

The major consists of six prerequisites and 12 business courses, several of which also satisfy requirements of the University core curriculum.

Availability

The business major is available at the School of Professional and Continuing Studies.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

College at Sixty

Fordham’s School of Professional and Continuing Studies offers the College at 60 program for men and women who have both the time and desire to be stimulated by new ideas and new friends. College at 60, a nationally recognized program for over 40 years, serves as a springboard into the classroom for persons over age 60 interested in learning among a community of peers in a relaxed, intellectual environment. The program welcomes adults from many walks of life and varied educational backgrounds. Some are recently retired or work part time. Others may have left college early on to marry and raise a family, while many completed college and advanced degrees. What all have in common is a strong desire to learn.

College at 60 offers small, noncredit, liberal arts college courses taught by experienced faculty members, many of whom also teach in Fordham’s undergraduate and graduate schools. These seminars cover a variety of topics, such as creative writing, art history, literature, classical music, science, theater, psychology, philosophy, religious studies, and history.

Program Activities

Each semester, College at 60 provides a series of weekly, free lectures on Wednesday afternoons, usually beginning in mid-October and mid-March. At the end of each academic year in May, we host a Spring Gala reception for all students and faculty. Participation in the College at 60 also entitles you to attend campus events and to use all Fordham facilities, including libraries, computer centers, bookstores, cafeterias, and health centers at the Manhattan, Bronx, and Westchester campuses.

The College at 60 courses are offered at the Lincoln Center campus in Manhattan during the fall and spring semesters. The courses are noncredit, nondegree undergraduate classes.

The fall semester runs from September to December and the spring term from February to May. Daytime courses are offered once a week for a two-hour class session either from 10:30 a.m. to 12:30 p.m. or from 1:30 to 3:30 p.m. to take advantage of off-peak commuting hours. Course schedules are listed in a separate brochure that College at 60 distributes in April and November, and which is available online.

Eligibility for the program is limited to adults over age 60 who have a desire to develop their intellectual interests and a capacity for college-level reading. Making sure that this is the right program for you is done through an introductory meeting with the program director and the completion of a brief application form.

The tuition cost of the courses is modest and indicated in the course schedule brochure.

For more information
Visit the College at 60 program page.

Updated: 07-27-2020
Communications Major

Requirements

Majors take 11 required courses, including the two introductory courses (to be completed by the end of the first semester of the junior year); two media, culture, and society courses; one ethics, law, and policy course (to be taken during the senior year); three courses in a chosen concentration, one of which serves as the introduction to the concentration; and three free electives.

Course requirements for the major are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Introductory Courses</td>
<td></td>
<td></td>
</tr>
<tr>
<td>COMM 1000</td>

<td></td>
</tr>
<tr>
<td>Electives</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select three electives in COMC, DTEM, FITV, JOUR, or in appropriate related programs</td>
<td>4</td>
<td></td>
</tr>
</tbody>
</table>

1 Majors are required to take both introductory courses by the end of the first semester of their junior year.

2 This includes any COMC course except COMC 2329 Introduction to Media Industries. Those majors who wish to concentrate in media, culture, and society must take three additional courses from the media, culture, and society concentration, for a total of five media, culture, and society courses, to fulfill this requirement.

3 See course options under Ethics, Law, and Policy Course Requirement (p. 1107) in the Communication and Media Studies department.

4 Any course with the COMC subject code or the COMC attribute code may fulfill this requirement.

Availability

The communications major and minor is available only to PCS students and to FCHR/FCLC students who matriculated at FCHR or FCLC prior to fall 2016. Although most courses with the COMM subject have been reassigned to COMC, DTEM, FITV, or JOUR, the requirements for the communications major and minor have not changed substantially.

Requirements for the Communications major have been restated using the new subject codes.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Concentrations

Communications majors are required to specialize in one of the program’s five concentrations by taking that concentration’s introductory course plus two additional courses in the same concentration.

Media, Culture, and Society concentration requirements

Courses in this concentration also fulfill the Media, Culture, and Society requirement for all COMM majors.

Availability

A minor in communications is available to all students at Fordham’s School of Professional and Continuing Studies and any student in Fordham College at Rose Hill/Fordham College at Lincoln Center enrolling prior to fall 2016. Students may not major in any of the new Communication and Media Studies department majors (COMC, DTEM, FITV, or JOUR) with a minor in Communications (COMM) or vice versa.

Credit for Experiential Learning

As part of its mission to educate working adults and part-time learners, Fordham School of Professional and Continuing Studies enables students to earn credit for learning that has taken place outside formal academic settings but through which students have mastered knowledge or skills equivalent to what would have been achieved in college-level courses.

There are several ways in which students can demonstrate this learning and be awarded credit toward the baccalaureate degree. These programs provide a substantial savings of time and tuition for students and recognize the experiences and accomplishments that they have already attained:

• CLEP and DANTES/DSST Exams
• ACE/NPONSI National Program on Noncollegiate Sponsored Instruction
• Life Experience Portfolio

For more information

Visit the webpage for receiving credit for experiential learning.

Requirements

Students are eligible for the experiential learning programs after successful completion of at least five courses in residence at Fordham, which must include the courses Composition II and Texts and Contexts.

Students who are in their last two semesters of the degree program are not eligible to participate in the Life Experience Portfolio Program.

A maximum award of 32 credits towards the undergraduate degree may be earned for work completed through any combination of the experiential learning options.

Credits earned through CLEP or DANTES exams, ACE/NPONSI, or the Life Experience Portfolio will be counted within the total number of 75 allowable transfer credits and will not, therefore, reduce the Fordham residency requirement of 49 credits.

CLEP AND DANTES/DSST Exam Programs

Students can earn up to 18 credits for successful completion of exams sponsored by the College-Level Examination Program (CLEP) and the Defense Activity for Non-Traditional Support Subject Standardized Tests (DANTES/DSST). The exams are offered at the Rose Hill and Westchester
students directly with an authentic and trustworthy voice. This program, businesses must now harness the power of digital technologies to reach consumers discover and choose products and services. The social media revolution has transformed the buying process and changed the way consumers discover and choose products and services.

The Digital and Social Media Professional Certificate Program

The social media revolution has transformed the buying process and changed the way consumers discover and choose products and services. Businesses must now harness the power of digital technologies to reach buyers directly with an authentic and trustworthy voice. This program, offered at Fordham’s Westchester and Lincoln Center campuses, helps managers, business owners, and professionals improve their skills in using digital technologies, including social media and mobile marketing techniques.

For more information
Visit the digital and social media certificate webpage.

Requirements
Fordham offers a selection of digital media marketing courses each semester. Students can take individual classes or a series of courses to quality for a professional certificate in digital and social media marketing. The program consists of courses held in the evenings and on Saturdays.

The program is designed to provide students at all stages the tools necessary to create, implement, manage and monitor successful digital marketing strategies. These strategies attract and retain customers and clients, increase revenues, and enhance online traffic and reputation.

Classes are designed to benefit professionals working at nonprofit and for-profit organizations and offer valuable skills to seasoned managers, as well as to recent college graduates.

Certificate Requirement
The Digital and Social Media Professional Certificate will be awarded to students completing any 6 DSMM courses (p. 181) with passing grades. At present, students are required to take at least one social media core course and the search engine marketing course along with 4 additional elective courses. Students are able to enroll in individual courses without registering for the certificate and elect to complete the certificate at a later date within a four-year time frame. Core courses will be repeated and new courses will be added every semester. Individual expertise will be factored into possible course waivers for professionals working in the digital marketing field.

Availability
The Digital and Social Media Professional Certificate Program is available at Fordham School of Professional and Continuing Studies.

Information Technology and Systems Major

The Computer and Information Sciences Department offers a Bachelor of Science degree in information technology and systems (ITS). The ITS major provides students with skills and hands-on experience in systems analysis, database management, web programming, cybersecurity, network administration, and software development. This major emphasizes the needs of capable new technology users across virtually every field of employment. The structure of the information technology systems major allows students to tailor their programs to current workplace demands and long-term career objectives.

For more information
Visit the information technology and systems program webpage.

Requirements
Information technology and systems majors must complete 10 courses in computer science.
Course          | Title                                           | Credits |
----------------|-------------------------------------------------|---------|
CISC 1100       | Structures of Computer Science                  | 3 to 4  |
or CISC 1400    | Discrete Structures                             | 3       |
CISC 1600       | Computer Science I                              | 3       |
CISC 2000       | Computer Science II                             | 3 to 4  |
or CISC 3400    | Java Programming                                |         |
CISC 2201       | Systems Analysis                                | 4       |

Electives        | Select two elective computer science courses 1   | 8       |

1 These electives are chosen with approval of the academic advisor and selected from CISC 2000 Computer Science II - CISC 4999 Tutorial.

Availability

The major in information technology and systems is available through Fordham School of Professional and Continuing Studies at Lincoln Center and Rose Hill.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Organizational Leadership Major

Virtually all advancement for nonspecialist management and supervisory personnel in business, government, cultural institutions and nonprofit organizations is based largely upon the following competencies or skill sets: the ability to communicate effectively; familiarity with essential organizational functions (such as strategic planning, budgeting, information processing, legal issues, and public relations) broad-based learning and the critical thinking skills requisite for continual adaptability to changing responsibilities; and, increasingly, the ability to understand and participate with others in multiple task-groups.

The Organizational Leadership major is available to students in the School of Professional and Continuing Studies on the Lincoln Center, Rose Hill and Westchester campuses. The courses will be offered on-site, online and in hybrid formats.

The target population includes:

- Individuals who need a Bachelor’s degree to advance professionally
- Professionals who want to establish themselves as change agents
- Working professionals and early to mid-career level managers, who may or may not be supervising others.

Requirements

The organizational leadership major consists of nine courses.

Major Requirements

Course          | Title                                           | Credits |
----------------|-------------------------------------------------|---------|
ORGL 2000       | Theories of Leadership, Context and Change      |         |
ORGL 2100       | Information Systems and Technology              |         |
ORGL 2200       | Transforming Managers into Inspired Leaders     |         |
ORGL 2210       | Ethical Decision Making for Leadership          |         |
ECON 2140       | Statistics I                                    |         |

Area Requirement

Students will choose one course from each of the following areas.

Leading Change (Human Capital)

ORGL 2300       | Issues in Human Resource Management             |         |
ORGL 2500       | Change Management and Organizational Culture    |         |
ORGL 2600       | Mediation, Negotiation, Alternative Dispute Resolution |  |
ORGL 2610       | Applied Organizational Behavior and Leadership  |         |

Business Communications

ORGL 2700       | Organizational Communication                     |         |
ORGL 2701       | Business Communications in Leadership            |         |
ORGL 2702       | Interpersonal Communication                       |         |
ORGL 2703       | Digital and Social Media Marketing Communication in Leadership |  |
ORGL 2704       | Interpersonal Behavior within Organizations      |         |

Business Strategy

ORGL 2400       | The Legal Environment of Business                |         |
ORGL 2900       | Entrepreneurship                                 |         |
ORGL 3110       | Strategic Leadership, Development & Diversity   |         |
ORGL 3120       | Leading Innovation: Strategies for Growth       |         |
ORGL 3200       | Special Topics Seminar                           |         |

Senior-Level Capstone Course

ORGL 4000       | Leadership for the 21st Century                  | 4       |

Availability

The major in organizational leadership is available through Fordham School of Professional and Continuing Studies at all three campuses: Lincoln Center, Rose Hill, and Westchester.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Organizational Leadership Minor Requirements

Students minoring in organizational leadership must complete six courses:
The Fordham Post-Baccalaureate Pre-Medical/Pre-Health Program offers its pre-med curriculum primarily in the evening, on weekends, and in summer sessions, with classes at Rose Hill, Lincoln Center, and Westchester. A limited number of day classes are also available during the academic year.

### Committee Evaluation Letter:
The Fordham Postbaccalaureate program Committee on Health Professions (CHP) process is a comprehensive one which provides candidates with several workshops and support to prepare them for the medical school application process. The CHP process includes a committee interview and committee letter for those students who qualify.

Students must submit a preliminary application to be considered as a candidate for the Committee on Health Professions process. The preliminary application will be reviewed by our Board of Evaluators and decisions will be made as to which applicants will be eligible to proceed with the committee process.

In order to apply for the CHP process, students must meet the following criteria:

- Minimum 3.2 GPA
- Minimum 150 hours of health-related work and/or volunteer experience
- Minimum 30 credits of coursework taken in the Fordham Postbaccalaureate program or the PCS Undergraduate program only. Additionally, students must have attended classes in the Fordham Postbac program for at least two semesters (not including summer sessions) prior to applying to the CHP process.
- Completion and submission of CHP process application

Candidates who indicate intent to participate in a spring CHP cohort after the CHP application deadline will not be able to participate in the spring CHP process. (Students may still apply to medical school but will not be able to get a committee letter from the Fordham Postbaccalaureate program.)

Please note:

- Students may apply for the CHP process up to one application cycle after leaving the Fordham Postbaccalaureate program.
- Students completing or who have completed a Fordham College undergraduate degree or postbaccalaureate work at another program are not eligible for the Fordham Postbac CHP process.
- All courses in the basic curriculum must be completed prior to or concurrent with the professional school admissions test and no later than the end of the first summer session of the application year in which the Committee evaluation is sought. The Committee evaluation letter is based on a student’s academic portfolio, which includes the following: coursework, transcripts, personal statement, self-assessment, and biographical information on personal history, including volunteer and/or internship experience and research experience, faculty recommendations, and a personal interview with members of the Committee.

### Availability

The minor in organizational leadership is available at Fordham School of Professional and Continuing Studies at Lincoln Center, Rose Hill, and Westchester.

### Post-Baccalaureate Pre-Medical/Pre-Health Program

The Fordham Post-Baccalaureate Pre-Medical/Pre-Health Program is for students who have completed their undergraduate degrees and are preparing for entry into the health professions but need the prerequisite science courses. Individuals seeking admission to medical, dental, or veterinary schools, or nursing or physician assistant programs, may apply to the School of Professional and Continuing Studies (PCS) for the prerequisite science courses as nonmatriculated students. The official Fordham Post-Baccalaureate Pre-Medical/Pre-Health Program description and information on financial aid and course schedules may be found at pcs.fordham.edu/postbac.

In keeping with the PCS educational philosophy to serve adult students, the Fordham Post-Baccalaureate Pre-Medical/Pre-Health Program
Admissions
Candidates submit an application online for PCS admission as nonmatriculated students, provide official undergraduate transcripts and interview with the program director. The general requirement for consideration is a minimum 3.0 GPA. Once admitted to the Fordham Post-Baccalaureate Program, all remaining courses must be taken at Fordham.

Requirements
Program Requirements
Fordham Post-Baccalaureate Pre-Medical/Pre-Health Curriculum
The basic curriculum includes one year of biology, general chemistry, organic chemistry, physics, calculus and statistics, biochemistry and physiology, psychology and sociology, and English required by most medical and professional schools as prerequisites for admission. Additional upper-level science courses are also available and require prior completion of the basic sequence in biology, general chemistry, and calculus. These courses prepare students for the professional school entrance exams, e.g., MCAT, DAT, VCAT, OAT.

Course | Title | Credits
--- | --- | ---

BISC 3752 | Molecular Biology | 3
BISC 3754 | Cell Biology | 3

1 Organic chemistry I and II, including labs, must be successfully completed before enrollment in microbiology.

Real Estate Major
The core requirements of the Bachelor of Science in Real Estate are designed to ensure that every undergraduate student will have a grasp of the fundamental elements of real estate law, economics, accounting, finance, investment, valuation, and development at the major core level, while the elective concentration will allow each student to pursue a specific subject area.

Requirements
Students majoring in Real Estate must complete the following courses prior to beginning the Real Estate major:

Course | Title | Credits
--- | --- | ---
ECON 1100 | Basic Macroeconomics | 3
ECON 1200 | Basic Microeconomics | 3
ECON 2140 | Statistics I | 4
Total Credits | | 10

Major Requirements
Course | Title | Credits
--- | --- | ---
REAL 1002 | Fundamentals of Real Estate Law | 3
REAL 1004 | Principles of Real Estate Economics | 3
REAL 1006 | Real Estate Accounting Essentials | 3
REAL 1008 | Principles of Real Estate Finance | 3
REAL 1010 | Principles of Real Estate Valuation and Feasibility | 4
REAL 1020 | Real Estate Development Principles and Practices | 4

Real Estate Electives | | 15 to 16
Total Credits | | 35-36

Updated: 07-27-2020

Real Estate Minor

Overview

The undergraduate minor in real estate offers students a unique opportunity to learn how the ever-expanding, multifaceted real estate industry functions and how real estate assets—the built environment in which we all live—are analyzed, financed, and developed. The courses in the minor—real estate law, real estate economics, and real estate finance—especially complement majors in business, economics, communications, legal or political studies, and organizational leadership.

Requirements

Students minoring in Real Estate must complete six courses:

Peace and Justice Studies

Who works for peace and justice in our contemporary world of national, cultural, religious, racial, and gender diversity and conflict?

You can with Fordham’s minor in peace and justice studies, addressing issues of war, terrorism, colonialism, poverty, religious conflict, human rights, multiculturalism, economic and environmental justice, race and gender equality, criminal justice reform, and conflict resolution and peacemaking.

Men and Women For Others

Peace and justice studies embodies Fordham’s mission of ‘men and women for others,’ and is one of the university’s oldest interdisciplinary programs, having been founded in 1986. The program was first inspired by the 20th century movements of liberation theology, social justice and civil rights, and peace activism. Central figures were the peace activist Father Daniel Berrigan, S.J., who taught at Fordham for many years, and Dorothy Day, founder of the Catholic workers movement, after whom Fordham’s Dorothy Day Center For Service and Justice was named (recently renamed as Center For Community Engaged Learning). Other major influences on the program’s formation include Mahatma Gandhi, the Buddhist peace movement, Mother Teresa, and Martin Luther King. Today the program also encompasses the diversity movement and the environmental justice movement, as well as global justice issues inspired by the international human rights movement, the UN’s Sustainable Development Goals, and other international venues of conflict resolution and peacemaking.

Experiential Service and Conflict Resolution Learning

Peace and justice studies is unique among Fordham’s programs in that its students are required to perform service work for local charities, government agencies, or international NGO’s. Students complete at least two credits of experiential service and conflict resolution learning through volunteer work, internships, and co-curricular projects in programs such as the Center for Community Engaged Learning, Multicultural Affairs, Campus Ministry, Global Outreach, United Nations Academic Impact, Study Abroad, or the Social Innovation Collaboratory.

A Distinctive Educational and Professional Profile

The peace and justice minor makes your profile distinctive, and sets you apart, whether your career goals are in government, NGOs, law, business, education, healthcare, community development, environmental organizations, or religious organizations. In the words of student Robin Happel, ‘you don’t necessarily have to handcuff yourself to anything to be an activist. If you want to work on Wall Street, consider a corporate social responsibility division that works for reform, and invest in start-ups like Spes Nova. If you want to be a lawyer, make your pro bono service something meaningful to you, more than just another box to check for the bar. Whatever path you take in life, I promise there is something in Peace and Justice Studies for you.’

**Experiential Learning**

The required two credits of experiential learning regarding peace and justice issues may be earned by completing two of the following short- or long-term service opportunities, or one of them twice. Most students use (6.) below (volunteer or internship work). Service learning work should be reported to the program director after it is completed, so that the credits can be recorded on the student’s Degree Works page.

1. an approved course with a Community Engaged Learning attribute (SL)
2. an approved Global Outreach trip
3. an approved program at the Center For Community Engaged Learning or other Fordham office (e.g., Multicultural Affairs, Campus Ministry)
4. an approved practicum at the Social Innovation Collaboratory
5. an approved study abroad program that includes service learning, e.g., Casa de la Solidaridad (El Salvador), Ubuntu (South Africa), or CIEE Capetown
6. other approved volunteer work or internship

To apply for approval of credits, email the program director 1) a description of the experiential learning service work and 2) the number of work hours/days.

**Capstone courses**

Students are encouraged to take SOCI 4970 Community Service/Social Action, SOCI 4990 Conflict Resolution and Justice Creation, or POSC 3516 Conflict Analysis/Resolution but may substitute any of the courses listed below as well.

*Courses in this group have the PJCP attribute.*

**Availability**

The peace and justice studies minor is available to students in Fordham College at Rose Hill, Fordham College at Lincoln Center, the School of Professional and Continuing Studies, and to undergraduate students at Gabelli School of Business.

**Philosophy**

In Fordham's liberal arts tradition, philosophy has a special role in the development of the mature individual. Philosophy provides students the opportunity to reflect on the most fundamental questions that concern human beings and the ultimate dimensions of their world. The courses in philosophy acquaint students with the intellectual and moral traditions of their civilization and aim to develop in the student the skills necessary to think clearly and carefully for themselves—to question their assumptions and to judge their principles critically with the depth required for them to act as mature, integrated, free persons in their society and to provide it with enlightened, responsible leadership and service.

The major in philosophy is an excellent preparation for graduate school, for professional schools of law, medicine, education, and the ministry, as well as for positions in industry, government, and business in which a liberal arts degree is welcomed.

**Accelerated Master’s Program**

Please read the Graduate School of Arts and Sciences Accelerated Master’s Programs section of this bulletin for more information. The policy on early admissions to the M.A. program in philosophy allows academically strong philosophy majors presently enrolled in FCRH, FCLC, and PCS to attain a master’s degree in philosophy in one year after graduating with a B.A. degree. Philosophy majors who have a cumulative 3.2 overall grade point average or above and at least a 3.5 in philosophy after five semesters of work in their college are eligible to apply for
Philosophy Major

Requirements

Philosophy majors must complete a minimum of ten philosophy courses. Courses fulfilling the period and area requirements are listed below.

1. For Fordham College at Rose Hill Honors Program students in the Class of 2022 or earlier, HPRH 2052 fulfills the Philosophy of Human Nature requirement.
2. For Fordham College at Rose Hill Honors Program students in the Class of 2022 or earlier, HPRH 3051 Ethical Dimensions of Contemporary Social Problems fulfills the Philosophical Ethics requirement.
3. For Fordham College at Rose Hill Honors Program students in the Class of 2022 or earlier, the following courses fulfill Historical Distribution requirements:
   - HPRH 1002 fulfills the Historical: Ancient period requirement.
   - HPRH 1052 fulfills the Historical: Medieval requirement.
   - HPRH 2002 fulfills the Historical: Classical Modern and 19th Century requirement.
4. Any course with the PHIL subject code may fulfill the elective requirement.

All majors are strongly encouraged to acquire a broad background in the history of philosophy and to take at least one course in logic. Majors planning to do graduate work are advised to take Symbolic Logic.

Philosophy majors who wish to concentrate on political philosophy may do so through an individualized major program as described under Interdisciplinary Programs. For details, see the associate chair for undergraduate studies.

Upon declaring a major or minor in philosophy, students should contact the associate chair on the relevant campus to select a faculty adviser to assist in planning his or her program.

Historical period courses

Courses are offered across four historical periods: (1) ancient; (2) medieval; (3) classical modern and 19th-century; and (4) contemporary, which is 20th- and 21st-century.

Ancient philosophy courses

Elective courses

Select four additional courses

Any course with the PHIL subject code may fulfill this requirement.

A Senior Values Seminar in philosophy may also be included.

Upon declaring a major or minor in philosophy, students should contact the associate chair on the relevant campus to select a faculty adviser to assist in planning his or her program.

Availability

The major in philosophy is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at the Lincoln Center campus.

Physics and Engineering Physics

The physics department prepares students for a wide variety of technical careers. We offer three distinct programs of study and two minors. The physics major provides students with a solid physics foundation with advanced courses in physics. It primarily prepares students for graduate study in physics, however, students could pursue other graduate degrees in, for example, architecture, business, finance, law, medicine, or secondary education. Additionally, physics majors are in high demand in many careers straight out of college. The engineering physics major builds on the same physics foundation and gives students a direct focus in one of various concentrations in a related applied field. Such students can pursue many of the same post-college goals that the physics majors do, but have a more applied background to pursue a career in industry or to attend graduate school in engineering. The 3-2 Cooperative Program in Engineering includes three years at Fordham followed by two years at an engineering school (either Columbia University or Case Western Reserve University) resulting in a double major.

All majors in physics should have four years of secondary school mathematics, including trigonometry and courses in secondary school physics and chemistry. Because of the sequential nature of physics courses, it is important to arrange a program at the earliest possible date. Incoming first year students are advised to indicate an interest in physics on their admission forms and to contact the physics department before the beginning of their first semester.

Program Activities

The department carries on active research programs in nuclear and particle physics (theory) and in theoretical condensed matter (mesoscopic and nanoscale) physics. The focus of the experimental research is on materials science, polymer physics, low-temperature physics, liquid crystals, medical physics, and laser optics. Student participation in these programs is strongly encouraged. Through external and internal grants and alumni generosity, the department has funded summer research experiences for approximately six students per year. Many of our students have also obtained summer research experiences at major universities and research labs through programs such as the National Science Foundation's Research Experiences for Undergraduates program. Students have presented their results from these summer research programs at national meetings (such as the American Physical Society).
For more information
Visit the physics and engineering physics department web page.

Contribution to the Core
Physics offers PHYS 1201 Introduction to Astronomy, PHYS 1203 Environmental Physics, PHYS 1206 Physics of Everyday Life, PHYS 1207 Physics of Light and Color, and PHYS 1242 Science Fiction Physics, which count as the core physical science course for non-majors.

Programs
- Engineering Physics Major (p. 1285)
- Engineering Physics Minor (p. 1285)
- Physics Major (p. 1285)
- Physics Minor (p. 1286)

Engineering Physics Major
Requirements
Students majoring in engineering physics are required to take the following courses:

Total Credits 73-75

3-2 Cooperative Program in Engineering
Students enrolled in the 3-2 Cooperative Program in Engineering complete the requirements for the physics degree through the junior year. They then transfer to an engineering program and complete an additional two years. They earn a double bachelor's degree in physics and engineering.

Availability
The major in engineering physics is available at Fordham College at Rose Hill. Students in Fordham School of Professional and Continuing Studies may major in engineering physics only if their schedules are sufficiently flexible to permit them to take day courses on the Rose Hill campus.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

<td>Undergraduate Research II</td>
<td></td>
</tr>
</tbody>
</table>

Electives

Select two physics electives. 1

1 Any course with the PHYS subject code numbered 2000 or higher may fulfill this requirement.

Availability

The minor in physics is available at Fordham College at Rose Hill. Students in Fordham School of Professional Studies may minor in physics only if their schedules are sufficiently flexible to permit them to take day courses on the Rose Hill campus.

Political Science

The goal of the undergraduate curriculum of the Department of Political Science is to expose students to the study of politics and the diversity of approaches and analytical techniques used by political scientists. The faculty of the political science department of Fordham University reflects this diversity, as does the undergraduate political science curriculum. The study of political phenomena and the nature of public life is an integral component of a liberal arts education. Through the curriculum, students also acquire skills in writing, communication, and analytical thought that are critical to a liberal arts education.

Given Fordham’s role as an urban, Jesuit liberal arts university, the diversity offered by the curriculum of the political science department serves the goals of the University in several key ways:

1. it prepares students to think independently, with a tolerance for alternative viewpoints and a concern for current domestic and international issues;
2. it is committed to the development of written and oral expression among its majors;
3. it forces students to think critically and analytically about the relationship between values and public life; and
4. it is committed to providing students with an education that is marked by a concern for the individual student and with the goal of educating men and women for others.

Accelerated Master’s Program

Elections and Campaign Management

Please read the Graduate School of Arts and Sciences Accelerated Master’s Programs section (p. 1313) of this bulletin. Outstanding Fordham undergraduate students with a grade point average of 3.2 or better are eligible to apply for early admission to the M.A. program in elections and campaign management. Students submit their application...
materials in the spring of their junior year and begin the program during the fall of their senior year.

Undergraduate students admitted to the program under the early admissions policy may take up to three graduate courses during their senior year with the approval of the program director. These courses will count toward the B.A. and are accepted for the M.A. in elections and campaign management. Students should also seek the approval of their undergraduate adviser before registering their courses. Students following this option typically complete the degree requirements in their fifth year if they study full time. This policy applies to FCLC, FCRH, Gabelli, and PCS. Courses will be held at both the Lincoln Center and the Rose Hill campuses. Applications are made online through the Graduate School of Arts and Sciences website.

Political Science
Please read the Early Admissions section, which is located under the heading of Special Academic Programs in the chapter on Academic Programs, Policies, and Procedures of this bulletin. Students normally apply at the end of their junior year. Applications do not need to include GRE scores unless the student is planning to apply for financial aid during the completion of their bachelor’s. This policy applies to outstanding students at FCRH, FCLC, and PCS.

In their senior year students take three graduate courses that count toward the B.A. degree and are accepted for the M.A. at Fordham. Graduate courses taken while still at the College must be approved by the director of graduate studies of the department. Students are able to complete an M.A. in political science in two semesters of full-time study, which is normally in their fifth year. Applications are made online through the Graduate School of Arts and Sciences website.

Program Activities
Internships
The political science department does not typically grant academic credit for internships. However, when an internship is integrated with an academic component, such as a tutorial, academic credit is possible. Students should see individual faculty members to discuss internship opportunities and the possibility of receiving academic credit.

The political science department also has formal arrangements for semester-long internship experiences off campus:

Internship in New York City Government
POSC 3120 Seminar: Internship in New York City Government. See Thomas DeLuca. Ph.D., 212- 636-6384, for information about POSC 3120 at Lincoln Center, which is offered during summers only.

Internship in New York State Legislature
The department offers an internship and courses through the New York State Assembly and New York State Senate Internship Programs. For information on these programs, contact Bruce Berg, Ph.D., 718-817-3957.

Washington Semester Program
Fordham University is formally affiliated with the Washington Semester Program of American University in Washington, D.C. Students interested in the Washington Semester Program must fill out an application, which can be picked up from Luz Lenis, Ph.D., sophomore dean, Keating 302, 718-817-4740.

Political Science Honor Society
Political science majors in Fordham’s undergraduate colleges are eligible to become members of Pi Sigma Alpha, the national honor society in political science. Pi Sigma Alpha was founded in 1920, and Fordham’s chapter, the Delta Zeta chapter, was chartered in 1961. Selection is made by department faculty from among seniors who have earned a minimum of 10 credits in political science courses, including at least one advanced-level course, and have achieved a qualifying grade point average both in the major and in their Fordham coursework as a whole. New members are honored at an induction ceremony held in the spring of each academic year.

For more information
Visit the political science department web page.

Contribution to the Core
Political science offers POSC 1100 Introduction to Politics, which fulfills the first social science core requirement. The advanced disciplinary requirement can be fulfilled by taking a second advanced-level course in political science. In addition, the department regularly offers courses that fulfill the American Pluralism, Global Studies, Eloquentia Perfecta (EP1 AND EP3), Interdisciplinary Capstone (ICC), and Values Seminar (EP4) core requirements.

Programs
- Political Science Major (p. 1287)
- Political Science Minor (p. 1289)

Political Science Major
Requirements
All majors must complete a minimum of 10 semester courses in political science including

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

One methods intensive course (listed below)\(^1\)

One course at the 2000 or 3000 level from three of the following four subfields:

- American Politics
- Political Theory
- International Politics
- Comparative Politics

One 4000-level seminar \(^2\)

Select four electives from any course in political science above the 1000 level

---

1. The Methods Intensive course requirement was added in Fall 2017. Students who declared their major prior to Fall 2017 are not required to take this course, and may take an additional elective instead.

2. In the junior or senior year, majors must complete a 4000-level seminar that is not an Interdisciplinary Capstone (p. 1134) core course.

</table>
and an understanding of the ethical dimensions of personal and professional life. A rigorous program of study that provides knowledge of the field of psychology with breadth and depth is complemented by opportunities to engage in psychology in action through research projects, field experiences, and collaborations with professionals in the field. Full-time faculty are highly accessible to students, are committed to teaching and mentoring undergraduates, and engage in one-to-one relationships with all psychology majors as advisers. Students learn about the multiple applications of psychological science to the service of others, and especially those whose human dignity is most threatened in our society. Students are encouraged to integrate their knowledge of psychology with their own developing values and beliefs. Sensitivity to and consideration of cultural, religious, and gender differences are fostered in the study of psychology.

Availability

The major in political science is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Political Science Minor

Requirements

All minors must complete a minimum of six one-semester courses in political science, including

Availability

The minor in political science is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional Studies at Rose Hill and Lincoln Center.

Psychology

The Department of Psychology offers the Bachelor of Science degree for its majors. The department has three primary goals:

1. to prepare students for graduate study in psychology;
2. to enable students to apply psychological skills and knowledge in psychology-related careers; and
3. to foster an understanding of complex human behavior as it is encountered in our personal and vocational lives.

In the Jesuit educational tradition of academic excellence and care of the whole person, students are challenged to develop a capacity for critical thinking, a willingness to submit their efforts to clear and high standards,
Psychology Major

The following meet the requirement:

**Course** | **Title** | **Credits**
--- | --- | ---
PSYC 1004 | The Mind-Body Connection: Introduction to Behavioral Health | 3
PSYC 2600 | Social Psychology | 4
PSYC 2700 | Infant and Child Development | 4
PSYC 2710 | Adolescent and Adult Development | 4
PSYC 2800 | Personality | 4
PSYC 2900 | Abnormal Psychology | 4

2. PSYC 1100 Biopsychology satisfies the natural sciences core requirement for majors and non-majors.

3. Designated sections of the following are required for majors and non-majors:

**Course** | **Title** | **Credits**
--- | --- | ---
PSYC 1100 | Biopsychology | 4
PSYC 2000 | Statistics | 4
PSYC 2100 | Research Methods | 4
PSYC 2200 | Psychology of Well-Being | 4
PSYC 2300 | Forensic Psychology | 4
PSYC 2400 | Family Psychology | 4
PSYC 2500 | Cognitive Neuroscience | 4
PSYC 2600 | Industrial Organizational Psychology | 4
PSYC 2700 | Consumer Behavior | 4
PSYC 2800 | Personality | 4
PSYC 2900 | Abnormal Psychology | 4

4. PSYC 3600 Multicultural Psychology and PSYC 3730 Men and Masculinities meet the American Pluralism requirement.

5. PSYC 3610 Global Health and Psychology meets the Global Studies requirement.

6. The following meet the Interdisciplinary Capstone requirement:

**Course** | **Title** | **Credits**
--- | --- | ---
PSYC 4000 | History and Systems of Psychology | 4
PSYC 4245 | Ethics in Research | 4
PSYC 4310 | Aging and Society | 4
PSYC 4330 | Music and Psychology | 4
PSYC 4370 | Disgust in Literature and Psychology | 4

7. The following courses meet the Advanced Social Science requirement:

**Course** | **Title** | **Credits**
--- | --- | ---
PSYC 3100 | Health Psychology | 4
PSYC 3110 | Cognitive Neuroscience | 4
PSYC 3300 | Industrial Organizational Psychology | 4
PSYC 3320 | Consumer Behavior | 4
PSYC 3330 | Family Psychology | 4
PSYC 3600 | Multicultural Psychology | 4
PSYC 3610 | Global Health and Psychology | 4
PSYC 3640 | Cross-Cultural Psychology | 4
PSYC 3700 | Human Sexuality | 4
PSYC 3730 | Men and Masculinities | 4
PSYC 3820 | Forensic Psychology | 4
PSYC 3850 | Psychology of Well-Being | 4
PSYC 3930 | Introduction to Clinical Psychology | 4

8. The following Values Seminars and Eloquencia Perfecta IV seminars are offered by the department:

**Programs**

- Psychology Major (p. 1290)
- Psychology Minor (p. 1291)

**Psychology Major**

The psychology major provides a broad and rigorous base of knowledge and skills in the discipline while offering students freedom in shaping a program to suit their individual needs. The University requires 124 credits and 36 courses (of three or more credits) for graduation.

Our undergraduate program prioritizes critical, scientific thinking, teaching you to analyze psychological behavior and processes. We emphasize three primary goals in your undergraduate education:

- To prepare you for graduate study in psychology;
- To enable you to apply psychological skills and knowledge in psychology-related careers, and;
- To foster your understanding of complex human behavior as it is encountered in our personal and vocational lives.

Students officially begin the major with PSYC 1200 Foundations of Psychology, which offers an overview of the field and is a prerequisite for the majority of upper-level psychology courses. Psychology majors gain expertise in research methods by studying PSYC 2000 Statistics and then PSYC 2100 Research Methods Lab. Three content courses at the intermediate (2000) level provide majors with breadth through surveys of the knowledge about at least one basic process (e.g., learning, sensation and perception, cognition) and one complex process (e.g., abnormal, development, personality, social). Two courses at the advanced (3000) level offer students detailed and in-depth explorations of a variety of subject matters. The capstone course (level 4000) gives students an opportunity to integrate diverse areas of psychology or to interrelate psychology with other disciplines.

All students are required to take at least one laboratory course beyond Research Methods Lab, which provides hands-on learning and skills in data analysis and research report writing. In addition to the variety of alternatives offered in the requirements mentioned above, the psychology major allows students to pursue individual interests and goals by including one course at any level that the student chooses as a free elective. Finally, one advanced (3000), capstone (4000), or elective course must be a designated diversity course.

A grade of C- or better is required for each course counted toward the major requirement. In addition, a student must earn an overall Psychology GPA of 2.0 or higher to fulfill the requirements of the major.

**Requirements**

Majors must complete 10 psychology courses. The requirements for the major are as follows:
Courses in this group have the PSDV attribute.

Any of the following courses may count toward the Diversity requirement:

- PSYC 2200 Research Methods Lab
- Choose one Basic Process course numbered 2000-2599
- Choose one Complex Process course numbered 2600-2998
- Select one additional 2000-level course
- Select two courses numbered 3000-3998
- Select one additional elective course numbered 1004 or 2100-4995
- Select one capstone course numbered 4000-4995

Any course with the PSYC subject code in the appropriate numeric range may fulfill these requirements.

**Content Laboratory requirement**

*This is not an additional course.* One of the above courses must be a laboratory course, i.e., the title contains the word ‘Laboratory,’ and the course number (mostly) ends in 01.

**Diversity requirement**

*This is not an additional course.* All students majoring in psychology must now take at least one course designated as a diversity course. Diversity courses are designated advanced (3000) or capstone (4000) courses that highlight aspects of individual and cultural diversity and the interpersonal challenges that often result from diversity and context; assist students in recognizing potential for prejudice and discrimination in oneself and others; and explore how psychology can promote civic, social, and global outcomes that benefit others.

The diversity course requirement may be fulfilled by an advanced, capstone, or free elective. The course is required of all incoming majors; we encourage all current majors to enroll in a diversity course.

Any of the following courses may count toward the Diversity requirement:

**Courses in this group have the PSDV attribute.**

- PSYC 3530 Psychology of Sex Roles
- PSYC 3600 Multicultural Psychology
- PSYC 3610 Global Health and Psychology
- PSYC 3640 Cross-Cultural Psychology
- PSYC 3700 Human Sexuality
- PSYC 3730 Men and Masculinities

Students must earn a grade of at least a C- for a psychology course to fulfill the requirements of the major.

**Availability**

The major in psychology is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

**Fordham College at Rose Hill students:** The requirements above are in addition to those of the Core Curriculum.

**Fordham College at Lincoln Center students:** The requirements above are in addition to those of the Core Curriculum.

**Professional and Continuing Studies students:** The requirements above are in addition to those of the PCS Core Curriculum.

**Psychology Minor**

**Requirements**

Minors in psychology are required to take:

**Course** | **Title** | **Credits**
--- | --- | ---
PSYC 1200 | Foundations of Psychology | 4
PSYC 2000 | Statistics | 4
PSYC 2010 | Research Methods Lab | 5
Select one Basic Process course numbered 2000-2599 | 4 to 5
Select one Complex Process course numbered 2600-2998 | 4 to 5
Select one additional 2000-level course | 4 to 5
Select two courses numbered 3000-3998 | 8 to 10
Select one additional elective course numbered 1004 or 2100-4995 | 4 to 5
Select one capstone course numbered 4000-4995 | 4 to 5

Any course with the PSYC subject code in the appropriate numeric range may fulfill this requirement.

**Diversity**

*This is not an additional course.* One of the above courses must be a laboratory course, i.e., the title contains the word ‘Laboratory,’ and the course number (mostly) ends in 01.

Any of the following courses may count toward the Diversity requirement:

**Courses in this group have the PSDV attribute.**

- PSYC 3530 Psychology of Sex Roles
- PSYC 3600 Multicultural Psychology
- PSYC 3610 Global Health and Psychology
- PSYC 3640 Cross-Cultural Psychology
- PSYC 3700 Human Sexuality
- PSYC 3730 Men and Masculinities

**Psychology Minor**

**Requirements**

Minors in psychology are required to take:

**Course** | **Title** | **Credits**
--- | --- | ---
PSYC 1200 | Foundations of Psychology | 4
PSYC 2000 | Statistics | 4
PSYC 2010 | Research Methods Lab | 5
Select one Basic Process course numbered 2000-2599 | 4 to 5
Select one Complex Process course numbered 2600-2998 | 4 to 5
Select one additional 2000-level course | 4 to 5
Select two courses numbered 3000-3998 | 8 to 10
Select one additional elective course numbered 1004 or 2100-4995 | 4 to 5
Select one capstone course numbered 4000-4995 | 4 to 5

Any course with the PSYC subject code numbered 1004 or 2000-4995 may fulfill this requirement.

Speak to the associate chair or other psychology faculty for advice about selecting courses to meet your goals. Students must earn a grade of at least a C- for a psychology course to fulfill the requirements of the major. In addition, a student must earn an overall GPA of 2.0 or higher in psychology courses to fulfill the requirements of the minor.

**Availability**

The minor in psychology is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional and Continuing Studies at Rose Hill, Lincoln Center, and Westchester.

**Religious Studies**

The interdisciplinary program in religious studies explores the roles, meanings, and phenomenology of religion. Some courses (for the most part those offered by the theology department) focus on the religious traditions themselves, their classical texts, historical figures and movements, conceptual and affectual concerns, ethical and social teachings, and cultural and political impacts. Other courses (for the most part those offered by other departments) identify the significance of religion and of religious ideas and symbolism within the wider world of history, society, literature, and the arts.

All students interested in majoring, second majoring, or minoring in religious studies should discuss their interests with the director. In
consultation with the director, each student will develop a program of study. It is important to note that the courses listed in this bulletin are only representative of the choices available. Consultation with the director is necessary for students to have full access to other courses that fulfill major, second major and minor requirements.

Program Activities
The religious studies program offers biyearly roundtables for majors and minors, and cultural outings for all majors.

For more information
Visit the Religious Studies program web page.

Programs
• Religious Studies Major (p. 1292)
• Religious Studies Minor (p. 1292)

Religious Studies Major
Requirements

</tr>
</tbody>
</table>

Updated: 07-27-2020
Among the Additional Course and Electives, at least one must have as a major focus a religion or religions other than Christianity. Students may double-count approved religious studies courses toward the religious studies minor and toward another major, as long as at least 14 different courses are taken to complete the major and minor.

### Availability

The minor in religious studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional Studies at Rose Hill and Lincoln Center.

### Social Innovation

In response to the growing demands for global sustainability from customers, employees, and society in general, more and more companies are discovering the competitive advantages of pursuing social innovation. Students will learn about how this concept is impacting all areas of business activity.

For more information

Visit the social innovation program web page.

### Programs

- **Concentration in Social Innovation** (p. 1293)

### Concentration in Social Innovation Requirements

The Social Innovation concentration is available to Gabelli students. Both primary and secondary concentrations must be taken in conjunction with another primary concentration or major.

Updated: 07-27-2020
Co-Curricular Requirement

Students must select one of the following co-curricular offerings, which should be chosen based on time and commitment level:

- Social innovation practicum
- Service learning with social innovation component
- Social innovation internship
- Global Outreach (GO!) trip
- AshokaU/Clinton Global Initiative conferences
- Social innovation-related academic competitions
- Other (with permission of program director);

Social Work

The mission of the Bachelor of Arts in Social Work (B.A.S.W.) program at Fordham University is to educate students to promote human rights and social justice and improve the well-being of individuals, families, groups, organizations, and communities through culturally competent, evidence-informed, generalist social work practice embedded within an agency context. The school's commitment to excellence in education and scholarship is built on professional social work values and the Jesuit educational tradition with its focus on social justice. The B.A.S.W. program builds upon a strong liberal arts core to establish the social work competencies necessary to effectively serve diverse populations.

The program builds on students' strong liberal arts experience and combines classroom and field education with a strong student advising and support system. Following admission into the major, students participate in classes and activities of the Graduate School of Social Service, a social work program of national stature. This design provides a challenging and stimulating educational environment.

The baccalaureate program was granted full national accreditation in November 2001 by the Commission on Accreditation of the Council on Social Work Education. The program received reaffirmation of its accreditation in 2006, and most recently in 2014. Students completing the social work program are eligible to apply for advanced standing at Fordham University’s Graduate School of Social Service, and/or other graduate schools of social work. If accepted, advanced standing will substantially shorten the time needed to complete a Master of Social Work degree.

Early Admission to Master’s Program

Within five years of completion, students graduating with a B.A. in social work from the program are eligible to apply for advanced standing at Fordham’s Graduate School of Social Service or to other graduate programs in social work that consider advanced standing applications.

The evaluation of applications for advanced standing in the Fordham University Graduate School of Social Service leads to one of the following decisions:

1. Acceptance to the Graduate School of Social Service with advanced standing: The school grants advanced standing. Students enter the advanced level of study and choose from one of the advanced concentrations of study.
2. Rejection: The school rejects the application for admission and does not offer matriculation to the applicant.

Program Activities

Once admitted to the social work major, students will be assigned an adviser during their first and second years of the program. This will provide support over the course of the program.

Students will have access to all student activities open to graduate social work students.

For more information

Visit the Bachelor of Social Work program web page.

Preface

This handbook has been designed to serve students admitted to the Bachelor of Arts in Social Work Program. This handbook provides centralized information about the program. Within this document, students will find an overview of the program’s operating framework, including goals and curriculum design. The handbook contains the policies and procedures that govern students’ participation in the program. The handbook is also provided to field instructors who work with our students in their field education year.

Dr. Gregory Acevedo, BASW Program Director
Associate Professor
Lowenstein Building, Room 503-D
(212) 636-6644
Preparing for Program Admission

Core Curriculum of Fordham University

The core curriculum provides students with a strong liberal arts platform from which to pursue upper-level study in social work. Students are expected to complete a substantial portion of the core curriculum before seeking admission to the social work program. Students are exposed to a wide body of knowledge, and are engaged in the cultivation of a spirit of inquiry, values and ethics, and critical thinking skills. The core consists of 18 courses drawn from nine disciplines and/or families of disciplines and seeks to provide all Fordham students with the liberal arts background that will prepare them for life. Courses may meet more than one core requirement, and detailed information is available in the Undergraduate Bulletin.

Social Work Prerequisites

In order to further strengthen the liberal arts base and bio-psycho-social knowledge of students entering the social work program, the following prerequisite courses are expected to be completed before program admission:

- One sociology course.
- One psychology course.
- One biology course (with emphasis on human biology).
- One American pluralism course.
- One course related to contemporary government or social policy in the United States.
- SOWK 2600 Introduction to Social Work and Social Welfare – This course provides an introduction to the values, knowledge, and skills of the social work profession. Focus is on the historical and contemporary roles and relationships of the social work profession to community problems, fields of practice, vulnerable populations, and social welfare history and policy.

Some of these prerequisite courses may also be applied to requirements of Fordham’s core curriculum and/or to requirements of other majors and programs in the University. Therefore, it is helpful to discuss students’ interest in the social work program as early as possible in their academic careers. With early mentoring by program faculty, students are able to choose courses within the core curriculum that also serve as social work prerequisites (such as biology and American pluralism). As in the case of the core curriculum, the substitutions of courses taken at institutions other than Fordham University are evaluated on a case-by-case basis.

Admissions Policies and Procedures

Applicants to the baccalaureate program in social work must be accepted for matriculation by Fordham College at Lincoln Center, Fordham College at Rose Hill or Fordham School of Professional and Continuing Studies. Following their admission to the University, students may apply to the baccalaureate program in social work once they have completed a substantial number of core courses in the liberal arts (approximately 50 credit hours). Students entering the social work program will be expected to complete the 33 credits of the major within a two-year period (either on a full- or part-time basis) and should consider this in timing their applications. Transfer students will be formally considered for admission in the social work program once they have been admitted to Fordham University and have had a review and determination of credits to be accepted by the University.

The baccalaureate program in social work is interested in applicants who demonstrate both academic competency and personal characteristics that will serve as a sound base for professional development. Therefore, a combination of admissions criteria is used for evaluating applicants.

It is usually expected that an undergraduate GPA of at least 3.0 on a 4.0 scale will have been achieved in courses taken before applying to the social work program. An applicant may have had a successful experience in areas related to social work practice, and/or may have demonstrated a capacity for professional work by virtue of study in other areas related to social work. The GPA is reviewed within the context of the total application.

A basic facility in English communication is required for admission to the program and for continued enrollment. The autobiographical statement that is part of the application provides the social work program with the opportunity to judge whether the applicant has the writing ability necessary to be admitted and to remain in the program. Candidates will want to be certain that their autobiographical statements are fair samples of their abilities to use the written word and are at the same level of proficiency that the faculty might expect in response to writing assignments given in class. Applicants should also note that an interview is required as part of the admissions process.

Also as part of the admission process, the course instructor of SOWK 2600 Introduction to Social Work and Social Welfare is asked to evaluate the performance of students in their class when students apply to the program. This evaluation is based on a variety of factors, including academic achievement, openness to new ideas, and readiness to become seriously involved in the learning process.

There are a number of characteristics deemed to be desirable in people who wish to become a social worker. Among these are maturity of judgment, openness to new ideas, capacity for the development of self-awareness and readiness to change, and acceptance of differences in people. There are other qualities considered essential, which include commitment to social and institutional change and possession of values consistent with those traditionally associated with the social work perspective. Work in social or civic organizations—either paid or volunteer—is viewed favorably as evidence of the kind of motivation sought in applicants. Persons completing letters of reference will be asked to evaluate the applicant on these qualities.

The following is required as part of the application process.

1. Application form completed in full.
2. Autobiographical statement.
4. Three letters of reference, at minimum one of which is from an instructor of a course taken by the applicant within the last two years.
5. Completion and signature on 'Release of Student Records.'
6. Admission interview.

All application materials are held confidential and shared only with those persons directly involved in the admission process. All records and documents become the property of the baccalaureate program in social work of Fordham University.

**Advisement Overview**

All students matriculated in Fordham University are assigned a faculty advisor. Advisors assist students in planning their academic careers, their choices of courses, and the fulfillment of the requirements. In addition, advisors help students to choose majors and to discuss future interests. While students must have some contact with their assigned advisors, they are encouraged to seek guidance from other members of the Fordham community. Most students have had contact with faculty in the social work program before they are admitted.

Students who express interest in social work but are not yet ready to apply can seek consultation with the director of the B.A.S.W. program for information, including suggested plans of study in preparing for admission to the program. University faculty advisors and students interested in social work are strongly encouraged to consult with the program director as frequently as needed. In addition to consultation with program faculty, discussion with students already enrolled in the program is encouraged.

Following admission into the program, the B.A.S.W. program director becomes the student's “official” advisor and assumes the responsibilities of advisors across the University. In addition, students are encouraged to maintain mentoring relationships with faculty in other departments, especially when they are pursuing another major in addition to social work. If a student leaves the program without finishing the required classroom courses and field education, he/she is assigned another faculty advisor from within the University.

The faculty advisement system of the program is operated independently of the Graduate School of Social Service and includes both individual and group components. The program's advisement system supports the development of a sense of community and support among undergraduate social work students and program faculty. It complements the collocated classroom sections and provides forums to address the special needs of students launching social work careers and/or new educational pursuits following graduation.

Students have already become familiar with program faculty during their pre-application advisement period and have met many of their fellow students while taking core curriculum and social work prerequisite courses, such as SOWK 2600 Introduction to Social Work and Social Welfare. These bonds are nurtured as students enter the program together and are introduced to program students already taking social work classes.

The program's advisement activities serve to sustain students as they engage in a rigorous course of study in classroom and field, and include the following:

1. Group advisement.
2. The integrative seminar for students in field education.
3. Frequent individual contacts with faculty advisors.
4. Encouragement of networking among program students through formal and informal mechanisms.

The B.A.S.W. program director assumes responsibility for helping students plan their course of study and work towards their post-graduation goals. The B.A.S.W. program director attends to the needs of students in both classroom and field and assists them in the integration of their classes in social work, their field experiences, their other course work in the University, and other significant life activities.

The B.A.S.W. Program Director meets individually with students for regular consultations and special meetings called by either the faculty advisor or student. Students in field placement participate in the integrative seminar, a group facilitated by the faculty advisor that meets 15 times during the academic year. Attendance at advisement meetings and seminar sessions is mandatory.

**Program Director Functions**

The functions of the B.A.S.W. program director as they relate to students are to:

1. Know the students and their educational program.
2. Contact classroom instructors regarding concerns about students’ academic progress.
3. Plan an academic program with the student.
4. Help identify personal concerns that stand in the way of achieving educational goals.
5. Help students deal with frustration and disappointments.
6. Help students internalize professional norms and controls when this involves clarification of expectations.
7. Enlarge students’ self-awareness and understanding of use of self in the educational professional context.
8. Enrich students’ efforts to develop professional values.

**Course Advising**

**Individual Approaches**

It is necessary that the B.A.S.W. program director to assist students with their plans of study and to evaluate their progress. The B.A.S.W. program director has access to teachers and students. Students may share their academic concerns with their faculty advisors, or teachers may alert the faculty advisor to a student’s potential academic difficulty.

**Group Approaches**

The program facilitates the communication of all students in the program via the B.A.S.W. program Blackboard page, and informal networking is encouraged.

The B.A.S.W. program director provides information about the social work curriculum and program requirements and facilitates the integration of the students in the program and the Graduate School of Social Service community.
Policies and Procedures

Overview

It should be noted that students in the B.A.S.W. program are subject to the policies of Fordham University that govern all undergraduate students. University policies are distributed to all undergraduate students in the student handbook and are discussed in orientation and advising sessions early in their academic careers. The social work program abides by the University’s policies on nondiscrimination, affirmative action, disability, and sexual harassment. While the B.A.S.W. program retains the right to terminate students from the program if warranted, only students’ college of matriculation can end their enrollment in the University.

Policy on Student Continuation: Program Continuance Review

The policy on student continuation in the B.A.S.W. program provides an established procedure to determine if a student in academic difficulty in course work or field education should continue their enrollment in the B.A.S.W. program. This same procedure is followed to consider termination of students for non-academic reasons such as drug use, violent behavior, or criminal misconduct. The program continuance review process is initiated in the event of specified academic and non-academic conditions.

Students enrolled in the social work program must maintain a grade point average of at least 3.0 and either IP (In Progress—first semester field) or S (Satisfactory—second semester field) in field education to maintain good standing in the program. Students must demonstrate satisfactory progress in order to enter field education and must maintain satisfactory progress in both field and classroom courses in order to maintain program standing. In addition to these policies, students are subject to University policies regarding overall academic achievement.

A program continuance review is instituted by the program in the event of any of these conditions:

1. When a student’s GPA (social work courses only) falls below 3.0.
2. When a student receives a grade below B in any of their social work classes.
3. When a student receives a grade less than IP or satisfactory in field practicum.
4. When a student is placed on academic probation by the University.
5. When allegations of substance abuse, violent behavior, criminal misconduct, or other serious non-academic behaviors are made against a student in the program.

The review is conducted by the program director, the associate dean for academic affairs of the Graduate School of Social Service, and the student. The review results in one of the following actions:

1. No action.
2. Probationary status in the social work program.
3. Dismissal from the social work program.

If the student is placed on probation, the terms of the probationary period and mechanisms for removal of probationary status are identified in writing. If the student is dismissed from the program, the student’s college of matriculation is notified.

In cases when the academic or non-academic conditions prompting the review have implications for the student’s continued enrollment in the University, they are shared with the assistant dean of the student’s college of matriculation.

Students have the right to appeal the decisions of the program continuance review. They can appeal in writing to the dean of the Graduate School of Social Service, who has the final decision-making authority in the matter.

Grievance Procedures in Academic and Non-Academic Matters

This statement outlines the program’s policy on appeals and grievances, and includes a formal mechanism for grievances in academic and non-academic matters within the program that have not been dealt with through a program continuance review proceeding.

Students who believe they have been treated unfairly in the program as to enrollment in courses, treatment in the classroom or field practicum, final course grades, academic probation, or termination from the program for academic or non-academic reasons have the right to seek an impartial and formal review.

Students are expected to first make a complaint to the program faculty member, field instructor, or faculty advisor about the treatment regarded as unfair. If a satisfactory resolution of the complaint is not obtained, students are expected to appeal promptly to the program director.

If informal appeals do not result in resolution of the matter, students can request a formal investigation by the Grievance Appeals Committee of the program. This request must be made in writing to the associate dean of the Graduate School of Social Service, and must provide details of the alleged unfair treatment, identifying the particular informal appeal procedures that were used and telling why these procedures did not resolve the matter. This request must be made to the associate dean of the Graduate School of Social Service within two weeks upon completion of the informal appeals.

The Grievance Appeals Committee of the B.A.S.W. program is made up of three members: the associate dean of the Graduate School of Social Service, one faculty member, and one student. A meeting of the committee is not official unless all members are present. Meetings of the committee are closed. Each member of the committee has one vote.

In judging appeals, the committee weighs the evidence supplied by the student making the complaint, upon whom the burden of proof rests. The committee may call upon other persons with relevant information about the matter under review. The faculty member, field instructor, advisor, or administrator against whom the formal complaint is made has the right to present evidence to the committee.

The committee’s function is advisory and, therefore, its decision as to whether unfair treatment did occur is presented to the dean of the Graduate School of Social Service who is responsible for making the final decision. The chairperson prepares a written report that explains the committee’s findings. If and when the committee finds that unfair treatment did occur, it may offer recommendations toward appropriate remedies. However, the dean makes the final decision.

The decision is conveyed to the program director and student as soon as possible. In cases when the academic or non-academic findings of the grievance procedure have implications for continued enrollment in the University, the dean’s finding is shared with student’s college of matriculation.

Updated: 07-27-2020
Grievances on the part of students that involve alleged discrimination in non-academic matters are handled through the University’s Grievance Committee. Such cases may include, but certainly are not limited to, grievances related to allegations of discrimination on the basis of sex, race, disabilities, religion, national origin, or sexual harassment. Also included are any grievances relating to athletics, food services, housing, extracurricular activities, security, or financial aid. Grievances on the part of students that involve academic matters related to another unit or department within the University should be relayed to that unit and/or to the administrative officers of students’ college of matriculation. For more information regarding these types of grievances, students are directed to consult the University student handbook and their faculty advisor for further guidance.

**Attendance Policy**

To gain the most from the Fordham education, students need to be in regular attendance in class and field. However, sometimes emergencies or illnesses can interfere with attendance. Students should contact their faculty advisors if they have any attendance problems in the classroom or field. Excessive absences, even for legitimate reasons, can jeopardize students’ academic standing.

Professors have the option of stipulating their own expectations regarding attendance and class participation. They will be spelled out to students in the course outline and assignments. If students are unclear, they should not hesitate to ask their professors for specific information.

**Registration**

Social work course offerings are posted on the B.A.S.W. program Blackboard page, or students may pick it up in person from the program office. Students are to follow standard undergraduate registration procedures for courses outside the program and the program’s guidelines for social work courses. Students should be aware that the course prefix for the program’s social work courses (SOWK) is different than the graduate course prefix (SWGS).

**Transfer of Academic Credit into the Social Work Program**

The program will consider accepting up to 12 credits for coursework in the social work major. In order to be considered, the course(s) in question must be from a CSWE-accredited B.S.W. program. Students must have received a grade of B or better and the course(s) must have been completed within the previous five years. In addition, the content must correspond to the content of the course(s) in the Fordham program. Transfer credit is not given for generalist social work practice courses or the field practicum.

Requests to transfer credit for courses in the University core curriculum, social work prerequisites, or other courses outside of those in the social work program are reviewed and determined by the Fordham admissions group and undergraduate colleges, in consultation with the program director.

**Application to Advanced Standing and Other Courses of Social Work Study**

Within five years of completion, students who have graduated with a B.A. in social work from the program can submit an expedited application to the advanced standing at Fordham’s Graduate School of Social Service. Students can also apply to other graduate programs in social work that consider advanced standing applications.

**Code of Ethics**

**Code of Ethics of the National Association of Social Workers**

Approved by the 1996 NASW Delegate Assembly and revised by the 2017 NASW Delegate Assembly.

The NASW Code of Ethics is intended to serve as a guide to the everyday professional conduct of social workers. This code includes four sections:

- The first section, ‘Preamble,’ summarizes the social work profession’s mission and core values.
- The second section, ‘Purpose of the NASW Code of Ethics,’ provides an overview of the code’s main functions and a brief guide for dealing with ethical issues or dilemmas in social work practice.
- The third section, ‘Ethical Principles,’ presents broad ethical principles, based on social work’s core values, that inform social work practice.
- The final section, ‘Ethical Standards,’ includes specific ethical standards to guide social workers’ conduct and to provide a basis for adjudication.

**Curriculum and Courses**

**Curriculum**

The Fordham University baccalaureate program in social work is designed to prepare students for positions as generalist social work practitioners in human service agencies. The program builds on students’ strong liberal arts experience required through Fordham University’s core curriculum and selected prerequisites for study in social work. Once students are admitted to the program, they participate in a variety of learning experiences, including eight classroom courses and 600 hours in field placement and integrative seminar, enhanced by individual and group advising activities.

The B.A.S.W. curriculum, built upon a liberal arts perspective, prepares students for generalist social work practice. The curriculum is based on an emphasis on a human rights and social justice perspective within an ecosystemic perspective. In addition, the B.A.S.W. program is committed to the promotion of individual and community well-being.

**Generalist Social Work Practice Framework**

The program’s definition of generalist social work practice was prepared in consultation with faculty and is consistent with the generalist practice model of the Graduate School of Social Service. The curriculum prepares graduates for direct, generalist social work practice with individuals, families, groups, communities, and organizations, provided under the auspices of human service agencies and related institutions. Because emphasis is given to the common factors in social work, graduates have a strong base of knowledge and skills that can be adapted to particular settings, environments, and populations.
The program's generalist practice model is an integrative approach to practice, which attends to the profession's focus on person in environment. Students in the program learn to see beyond the narrow boundaries of separate cases and to appreciate client troubles (e.g., inadequate income, substance abuse, domestic violence) in the context of public issues (e.g., policy debates on welfare reform and health insurance) and agency regulations (e.g., eligibility criteria, screening procedures). They learn to move across system levels and among practice methods based on their assessment to improve the adaptive fit between person and environment in which person is a metaphor for the various size client systems.

The program's vision of generalist social work is distinguished by a common base of knowledge (i.e. ecosystems approach and person-in-environment framework) and common practice principles (i.e. centrality of the client and worker relationship and professional use of self). Fordham believes that a solid understanding and use of phases of assessment, planning, contracting, intervention, and evaluation permeate all social work practice, and continue to do so in light of changes in fields of practice, demographic trends, or in the reconfiguration of service delivery systems.

The knowledge and principles of generalist social work are put into practice through the use of common skills (i.e. engagement and contracting) and roles (i.e. advocate and facilitator). Generalist practice skills and roles are those that are easily adapted to use in diverse settings, across client populations, and levels of intervention that include individual, family, group, organization, and community.

Generalist practitioners have the capacity to move flexibly among roles, with a repertoire of skills applicable to work with client systems of varied sizes. This orientation serves graduates of the program throughout their professional careers. Graduates have the capacity to use their knowledge and skills in serving the needs of clients in a variety of social work venues. Generalist practice also serves as an excellent platform for education and training, including advanced social work practice and specialization in fields of practice, populations, or modalities. Generalist social workers are prepared for life-long learning with the tools to face professional challenges.

The Fordham B.A.S.W. program prepares graduates for direct, generalist social work practice with individuals, families, groups, communities, and organizations, provided under the auspices of human service agencies and related institutions. The education of students in the B.A.S.W. program emphasizes the common factors in social work with a broad range of client populations, in a variety of settings and on multiple levels of practice. Thus, graduates bring a strong base of generalist social work knowledge and skills to be adapted to particular settings, practice, environment, and population. This base is then broadened by specific knowledge about the employing agency, modes of practice, clients, community, constituencies, and other salient factors.

**Combination of Curriculum Elements**

The program's curriculum design incorporates two features: a commingled model of classroom education, and separate and distinct field instruction and advisement for students.

The commingled model of classroom courses is the component of the curriculum that includes both undergraduate and graduate social work students. The model takes advantage of the rich resources of the Graduate School of Social Service by having undergraduate social work students learn in the same classes along with graduate social work students in the foundation year of study. Students are therefore able to interact with a wider range of teaching faculty and fellow students than would be available to such a relatively small cohort.

The diversity of students in terms of age, race and ethnicity, employment history and status, and social work related experiences is remarkably similar to the diversity of graduate students, thus contributing to a “fit.” B.A.S.W. and M.S.W. students report positively on the learning model, that they are prepared for meeting graduate course expectations and that they find they are welcomed and encouraged to be active class members. With the use of master syllabi, common reading assignments and regular meetings of teaching faculty in foundation curriculum sequences further insures consistency across sections. Thus, the program can insure consistency in course content across the sections in which students are enrolled.

The field education component of the program is operated independently, thus enabling the program to maintain its distinct identity and achieve its objectives. A rigorous screening for undergraduate field placements to provide generalist practice opportunities and quality supervision is conducted. Students in field instruction participate in a bi-weekly integrative seminar solely for students in the B.A.S.W. program.

The advisement system of the program is operated independently and includes both individual and group components. The program's advisement system supports the development of a sense of community and support among undergraduate social work students and program faculty. It complements the commingled classroom model, and provides forums to address the special needs of students launching social work careers and/or new educational pursuits following graduation.

**Field Education Overview**

Field education is an integral part of the academic preparation of the baccalaureate program in social work. The field practicum and bi-weekly integrative seminar provide a vital learning experience in professional practice. In the interest of integrating theory and practice, the field practicum is concurrent with classroom instruction in generalist social work practice and social work policy.

The field education component of the B.A.S.W. program is operated independently of the Graduate School of Social Service's field work department. This decision is based on the social work program's intention to maintain the program's distinct identity and objectives and to address the specific needs of undergraduate students.

The program expects its field agencies to adhere to policies on nondiscrimination, affirmative action, disability, and sexual harassment. Agencies that do not adhere to such policies will not be used as field placements.

The responsibility for field placement location and coordination is that of the full time faculty members of the B.A.S.W. program. However, there is a great deal of cooperation and consultation between the program and the field work department of the Graduate School of Social Service. For example, undergraduate and graduate faculty and administrators communicate often during the process of developing new field placements to avoid confusing agencies and duplicating efforts. If one program cannot accommodate a request for students, they share the placement opportunity which is then investigated for appropriateness for the other program.
Field instructors have an M.S.W. degree and at least two years of post-master’s experience. First time field instructors who supervise program students are expected to attend the Seminar in Field Instruction (SIFI) that is offered each year by the Graduate School of Social Service. This seminar, focusing on how social workers can effectively take on the new role of field instructor, is taught by social work program faculty and staff.

The primary purpose of the program’s field experience is to provide students with the opportunity to engage actively in generalist practice that complements and reinforces classroom learning. Students are engaged in every stage of the process, from preparing for entry into the field to their evaluation of the practicum experience. The field component enables the student to demonstrate his/her investment and competence in social work practice.

The setting for field education is a social service agency. The B.A.S.W. field coordinator and field supervisor work closely to plan learning opportunities that meets the educational needs of the individual student and the objectives of the program. Field education settings represent a cross section of social work practice in the greater New York metropolitan region and reflect a wide range of social service programs.

Field Options

The student, in consultation with his/her faculty advisor, has the choice of three field education curriculum models: 21-hour, 14-hour, or work study. Students in this field work model complete the same total hours (600), with the accompanying bi-weekly integrative seminar. The curriculum models are as follows:

- **21-hour field education**: This curriculum model consists of 21 hours of field education, usually scheduled three days per week, for a total of 570 hours in the agency and 30 hours in the integrative seminar for the academic year. Placement begins in September and ends in early May.
- **14-hour field education**: This curriculum model consists of 14 hours of field education, usually scheduled two days per week, for a total of 570 hours in the agency and 30 hours in the integrative seminar for the academic year. Placement begins in September and ends in August.

Some students, because of work schedules, cannot attend placement during weekday business hours. Every effort is made to place these students in agencies during evening hours and weekends. Students requesting an “after-hours” placement must be able to spend a minimum of four consecutive hours a week during the agency’s regular working hours. This requirement provides the student the opportunity to participate in such learning experiences as staff meetings and professional consultations.

Work Study

Some students are able to meet their field education requirement through the social service agency where they are employed in a social work capacity. Students interested in this option complete the field education planning forms indicating this preference. They are asked to speak first to the director of their agency or agency department to gain approval for this request. The program will then evaluate the agency’s appropriateness as a field learning setting for the social work student.

In order to be considered for a work study placement the following criteria must be met:

1. Students must have been employed by the agency for at least six months prior to work study application.
2. Students must have a new learning experience different from their work responsibilities, as their field work component.
3. The supervisor must be a qualified M.S.W., with two years post-M.S.W. experience. This supervisor must be different from the student’s work supervisor.
4. The agency must provide time for the field instructor to meet with the employee/student for a minimum of one hour per week, and to attend the SIFI course if it has not been taken already.
5. The agency must sign the work study agreement insuring that program’s requirements can be met. This formalizes the approval process. This document is available for the faculty advisor in the event that a problem may arise at a later date.
6. The work study agreement is signed by the social work program director and kept in the student’s folder.

Relationship with Field Agency

The program and field work agency are partners in the education of baccalaureate students in social work. The BASW Field Coordinator serves as the field adviser. Because ongoing relationships with agencies are fundamental to ensure sound educational field experiences for students, it is essential that the field adviser maintains a pattern of regular contacts with agencies. Field instructors complete a six-week evaluation of the student that alerts the faculty adviser to any issues early in the internship. Students keep journals which they submit to the B.A.S.W. field coordinator in the Integrative Seminar that enhances communication, and helps to identify any issues in field work. Students are encouraged to share their experience both in and outside of the seminar with the B.A.S.W. field coordinator. Agency visits are the main way of ensuring the maintenance of a relationship and communication necessary for effective educational field experiences for students. Therefore, at least one visit is made to the agency each year. The visit(s) are intended to maximize the potential for student learning by addressing three principal objectives of field teaching:

1. Assist the agency in establishing and maintaining an effective learning environment.
2. Assist and support the agency supervisor in the role of field instructor.
3. Monitor the learning experience, assist the integration of the individual student and relevant agent personnel and productively intervene when learning impediments or difficulties are identified.

During the visit the field coordinator, who also serves as faculty adviser, meets with the field instructor and other relevant personnel to discuss the student’s progress. The visit also may be coupled with an individual conference with the student. The faculty adviser reviews:

1. How field education is affecting the agency
2. Student’s relationship with agency personnel
3. Quality of student contact with clients
4. Nature and number of assignments carried by the student
5. Time allotted for supervisory conferences
6. Nature of the supervisory contract
7. Student’s process recordings
8. Learning opportunities other than specific student assignments

Updated: 07-27-2020
9. Space for students

10. Viability of agency as a field setting

As consultant to the field work agency, the faculty adviser is responsible for knowing the structure, function, staff and other pertinent information about the agency. It is especially important that the faculty adviser be aware of changes in agency structure, services, and staff that may influence the quality of the student's educational experience. Consultation may be planned with the field instructor's supervisor or agency educational coordinator as indicated.

At least two process recordings per semester are submitted by the student so that the individual student's perception and concerns can be reviewed and addressed. The group provides the student, on a consultation basis, with alternate ways of thinking about problems, increased self-awareness, and the opportunity to individualize academic and field career planning. Individual conferences provide the faculty adviser with time to help the student to clearly identify his/her own learning needs and deficiencies, and place these in the context of student strengths, current functioning and future goals. The adviser can assess whether the field placement is providing the student the opportunity to practice with diverse populations and populations at risk, to engage in practice assessment, and to have assignments in accordance with the program's curriculum. The B.A.S.W. field coordinator will meet with the student during the first two months of their internship to systematically review their performance and progress in their internship and classes.

**Integrative Seminar**

All students in field placement participate in the integrative seminar, which meets for a total of 15 sessions during the academic year. The overall purpose of the integrative seminar is to assist students to combine what they learn in the classroom with what they learn in the field. The seminar is structured to provide students with a forum where they can share their experiences from the field and classroom, work towards the development of increased self-awareness, and receive additional knowledge to supplement their academic and practical experience.

The integrative seminar is led by the students' faculty adviser. Attendance is required as part the student's obligation to fulfill 600 field practicum hours. The seminar is considered part of the student's field education and does not earn a separate grade or additional credits for the student.

Upon completion of the integrative seminar, students are expected to:

1. Develop basic skills for building and using peer support
2. Develop an understanding of their professional identity and their role as a generalist practitioner
3. Develop basic skills to manage the affective content inherent in social work practice
4. Develop an understanding of the common base of social work practice across a wide range of settings
5. Develop basic skills necessary for working with diverse populations
6. Develop an awareness of the role of supervision in social work practice and basic skills in regard to how to get the most out of their supervision
7. Develop an understanding of the importance of continuing to work towards an increased sense of self awareness
8. Develop an understanding of how to apply classroom knowledge to their work in their field placements

9. Develop basic skills in critical thinking to enable them to identity, evaluate, and make decisions regarding ethical dilemmas and value conflicts in agency practice in the context of their personal and professional values
10. Develop tentative plans for future employment, education, and/or interests in the profession

The integrative seminar incorporates a variety of learning strategies, including discussion, brief lecture, student presentations, invited guests, etc. It provides a forum for sharing student concerns and problem solving through mutual aid and support. Seminars are limited to approximately 15 to 20 participants and are flexible to the extent needed to allow for student input. The seminar pays particular attention to helping students apply content on diversity, social justice, social policy, and advocacy in the field experience. The energies of the faculty adviser and students are directed towards integration and application of knowledge and skills. Content is timed to the stage of student development over the course of the year and moves to deeper levels of inquiry.

While the seminar's primary focus is students' work in class and field, attention is placed on planning for the future. This may include exploration of practice fields and preparation for employment as well as discussion and planning for future education.

**Placement Process**

In the spring semester prior to entering the field placement, all students complete field forms which reflect their particular interests and experiences. While efforts are made to correspond to the students' interests, the emphasis is placed on arranging a field placement that provides a generalist practice experience. Students are encouraged to suggest possible placements to their faculty adviser for exploration. Follow-up on their suggestions is done by the faculty adviser. The placement is made by the program based upon program requirements, agency capacities, and student needs. Students are informed of their placements by their faculty adviser. Once a potential internship is identified, the field coordinator sends a copy of the student's resume to the potential field supervisor. The field coordinator discusses the opportunity with the student. If it seems like a good match, an interview is arranged between the potential field supervisor and the student.

Before placements begins, the program shares information about the student and the program with the agency. This review of the student's educational and experience background, interests, and learning needs becomes a source for the formulation of an early educational plan for the student. This initial information is useful in planning educational goals and in the field instructor's selection and assignment of cases.

**Practice Assignments**

The field placement provides students with a generalist practice experience. The program views the generalist practice model as an integrative approach to practice which attends to the profession's person-in-environment focus. Through the integration of classroom, field, and advising, students learn to move readily across system levels and among practice methods.

Field agencies are expected to provide a variety of assignments, including work with a range of client systems. Assignments should provide experiences with multi-level practice in which students work with individuals, families, groups, communities, and organizations to the extent possible. At minimum, the field agency should provide opportunities for the student to work with clients at three client system
levels with at least one of the three at the macro level of organization or community (in addition to their work with individuals, families, and/or group). If an agency is not able to provide this minimum range, the faculty adviser assists the field instructor in exploring possible alternatives.

In a 21-hour per week placement, the student should have approximately 11 of those hours in direct service to clients, including collaborative and collateral visits. Students in a 14-hour per week placement should devote at least seven of those hours to direct service to clients. Building up a caseload occurs over time. B.A.S.W. students frequently shadow a social worker or other qualified staff member prior to working independently with clients. All students should have one to one-and-one-half hours of supervision per week. The remaining hours are used for administrative responsibilities, including agency recording, telephone calls, preparing for conferences, writing reports, etc. Time may also be used for consultation with field instructor, staff meetings, and other learning experiences in the setting and within the community. It is not expected that the student be able to complete process recordings during agency time.

Field Agency Requirements

Overview

Agencies having student placements are expected to be committed to the fact that students are learners and understand that performance of students is not that of staff members. Agencies are expected to provide a diversity of assignments according to student educational needs and to provide the concrete needs, such as sufficient workspace, which are necessary for professional practice. At the same time, agency needs are respected. Learning assignments of students should not impede or hamper the agency's everyday functioning.

Agencies are to commit time for their field instructors to supervise students one to one-and-one-half hours per week and time to complete written evaluations. The agency should provide students the opportunity to attend staff meetings, in-service training, or other such meetings as may occur for the general staff.

Agencies need to inform the B.A.S.W. program of changes in any of the following:

1. Agency address or telephone number
2. Agency director or coordinator
3. Field instructor
4. Pending strike or labor dispute
5. Absence of field instructor from the agency for more than one week
6. Student absence for more than three days
7. Significant program or agency changes that affect day-to-day work

Hours, Holidays, Absence, and Make-up Time

Students observe agency hours and holidays except for Thanksgiving, Christmas, and spring recess, when students will not be in field education. Absence from field education up to three days, due to illness or other emergencies, will be managed in the agency. When there are only three days of justifiable absence, the time need not be made up. Arrangements for religious observance are made between the student and the agency. The supervisor should consult with the faculty adviser about any absence in excess of three days. All field placements total a minimum of 570 hours in the field for the academic year. Sometimes students may wish to change the number of hours a week they attend placement with a consequent change in the ending date for the year. Such changes are sometimes possible provided they have the advanced approval of the field instructor and the faculty adviser.

Travel

The agency is expected to reimburse students for travel expenses when travel is part of the required field work assignment.

Home Visits and Safety in the Agency

Home visits are an important part of social work and should be included when appropriate. The agency and student need to make provisions for safety. The social work program recommends the following safety guidelines for students while in field work. Students need to take appropriate precautions regarding:

1. Time of day for home visits
2. Use of main streets for walking
3. Appropriate dress
4. Traveling with official agency identification
5. Use of escorts when necessary for home visits
6. Making sure agency knows date, time, location, and purpose of visit
7. Not being in the agency by oneself
8. Having access to an emergency phone

The agency should provide security to students in the same measure as provided to employees. This includes orienting students to procedures they should follow for their own safety. In the event of an emergency during the placement, the field instructor should be notified as well as the faculty adviser. The program director should be notified if the faculty adviser is not available.

Labor Disputes

In cases where there is an anticipated strike or slowdown, agencies must notify the student's faculty adviser immediately. When social work staff is involved in a strike against the agency, students are withdrawn for the duration of the strike. Students are not expected to cross picket lines. The University assumes neutrality. The faculty adviser will be available for consultation in these instances and assumes responsibility for providing the field practicum experience.

Malpractice Insurance

Students in field work placement are covered by a malpractice policy. The cost for this policy is $30.00, which is charged to students when they register for field education. This policy is only in effect during students’ internship hours. Students who work additional hours in the role as a social worker may want to obtain additional coverage. Upon graduation, students may want to obtain their own liability policy. Members of the National Association of Social Workers are able to apply for liability insurance through their group plan.

Qualifications and Requirements for Field Instructors

Prospective field instructors must be graduates of accredited schools of social work, with at least two years of post-master’s practice in a social service agency. In recommending a field instructor, agencies attest to the supervisor’s ability to impart the knowledge and values of the profession of social work.
Supervisors new to field education must attend a course called Seminar in Field Instruction (SIFI). SIFI is a mandatory course given without charge. Field instructors who have completed the SIFI course at another social work program in the New York City metropolitan area need not take it again. The purpose of SIFI is to provide new field instructors with the knowledge and skills necessary to effectively meet their educational responsibilities as teachers of social work students.

Role and Responsibilities of the Field Instructor

The field instructor is a professional role model for the student. The field instructor conveys specific and general areas of knowledge and skill, provides a stimulus for the student’s systematic and reflective thinking about social work theory and practice, and serves as a source of control and direction. The special kind of educational relationship that is established in this tutorial encounter is crucial for the learner.

Field instructors relate not only to the specific practice or methodological orientation of their agency but teach broader concepts by moving out from the specific case to the general professional experience, relating to the theories underpinning practice. This requires skill in moving back and forth from inductive to deductive levels in teaching. Effective field education not only imparts knowledge but encourages the student in the independent use and testing of the various content areas of the academic curriculum, sets clear goals, and fosters a systematic progression in learning related to the student’s individual learning needs.

Prior to the student’s arrival at the agency, the field instructor should prepare using the information obtained from the school so that there may be appropriate initial activity through which the student’s normal anxiety and insecurity will be lessened. In addition, the student needs to feel that he/she is part of the staff and has something to contribute to the agency.

In order to facilitate the introduction of the student to the agency and to professional practice, the student should be given some general idea of the function and structure of the agency very early. More extensive information on the policies and the functions of the agency and of other agencies and community resources can be given in relation to the student’s individual assignments since it is recognized that the student learns this best in relation to particular situations. The initial interview students have with a potential supervisor provides an opportunity for the student to learn about the agency and the department they may be interning in. They should use this opportunity to ask questions about both the agency and the type of work they would be doing if they were to be an intern there.

There are times when supervisors assign students to special projects that are part of another program or department as part of their learning experience. It may be necessary then to assign another supervisor to help the student with this task. There are other times, such as when the field instructor might be absent, that a task supervisor should be assigned to the student. The task supervisor consults with the student’s field supervisor as to learning needs and progress. The primary responsibility for the student’s learning remains with the field instructor.

The field instructor needs to schedule a minimum of one to one-and-one-half hours per week on a regular basis for individual conferences with each student. Conference periods may be divided into two sessions if necessary. This time should be safeguarded so as not to allow interruptions. During the first few weeks that the student is in the agency, the field instructor should be accessible to the student for brief periods outside scheduled conference time, but this should not take the place of the individual conference. The time given by the field instructor for selecting assignments, reading student’s records, or planning for students should be outside of individual conference periods.

Student conference periods should be planned for, and prepared for by both the student and the field instructor so that each may have the stimulation and responsibility of participating. The student should prepare recordings sufficiently in advance of the conference period to enable the field instructor to read the material. The conference can then be focused on the student’s thinking and understanding and on planning the next steps. It is essential for sound learning that each keep notes of conferences in order to link thinking and planning from one conference to the next and to provide a base for the formal evaluation.

The field instructor’s teaching should be focused on specific situations and consciously correlated with appropriate principles and concepts so that the student is helped to integrate theory and practice. Criticism should be given constructively and in the amount that the student can assimilate. The focus should be kept upon the case material so the student may understand the relevancy of the criticism and not personalize it. Thus the field instructor may suggest better use of self in the helping process without damaging the student’s self-confidence. In this way, the students will be helped to develop a professional self and to feel free to look at their own attitudes and feelings as they affect their work. Students may have problems in relation to understanding and accepting themselves as a social worker. The field instructor is expected to help with this professional identification.

Educational Planning Overview

In order to achieve the objectives of field education, it is essential for the field instructor to develop an educational plan. The first step in formulating this plan is to develop a supervisory contract. Student and supervisor discuss the student’s experience, past supervision, professional interests, and learning goals, as well as curriculum requirements and evaluation criteria. From this, supervisor and student enter into a contract.

The educational contract delineates the following mutual expectations:

1. Number and type of assignments
2. Recording requirements
3. Schedule and format of supervision
4. Educational goals for the semester and the year

This contract will be written by the field instructor and submitted to the faculty adviser. It serves as an important guide for the student and field instructor throughout the year. The educational contract is elastic in that it is open to negotiation as new learning needs arise throughout the year. The educational plan also takes into account the student’s tempo of learning. It indicates how the field instructor will help students use professional strengths to achieve agreed upon learning objectives. It is highly recommended that the student be given assignments and meet some of their clients as soon as possible. It is recommended that early reading of records by the student be limited to those for which the student will be responsible. The faculty adviser provides an educational plan for the field supervisor and student to complete.

Student Process Recording

Process recordings are an essential tool for both learning and teaching the practice of social work. Student written work enables the field
instructor to make an adequate educational assessment of the student and helps the student reorganize his/her learning needs. The faculty adviser will also review samples of student process recordings with the student to assess their progress.

For the baccalaureate program student, process recording is essential to inform the field instructor about what the student is doing with clients. One or two process recordings per week are required throughout the placement. Other techniques for direct monitoring of student work such as audio tape and videotape may be used to supplement, but not replace, process recording. Students should also be taught how to write case summaries, letters, statistical reports, and other records germane to the agency’s program. Process recordings and other materials should be kept in a secure place in the agency in order to insure confidentiality.

Process recording is a teaching method utilizing a detailed written description of what occurs during a client(s)/student contact. At the beginning of the academic year, students and field instructors are given our process recording manual that details the structure of process recordings and provides numerous examples of well-structured recordings.

All process recordings, regardless of format or size of client system, include the verbatim exchange of what transpired during the session. Process recordings should be required for a variety of students’ assignments, and when possible, should include group, family, and community sessions in addition to individual contacts.

**Student Journaling**

Throughout the field work year, students will be required to submit reflective journal entries to their integrative seminar instructor on specific field education issues.

**Student Field Evaluations**

Evaluation is an important part of the educational process and should be ongoing throughout the year. Written evaluations are done twice yearly, shortly before the end of each semester. These formal evaluations enable the program and the student to see how well the student is applying social work knowledge, values, and principles to practice. They provide the opportunity for both field instructor and student to take stock of the student’s skill development and of the supervisory process. The evaluation form also serves as a planning tool. The list of skills contained in the evaluation can guide the field instructor in making assignments and monitoring the student’s work.

**Written Evaluation**

The program provides forms for the written evaluation that is submitted electronically, containing checklist and narrative components. Evaluations should be discussed jointly after the student and field instructor have each reviewed the semester’s work and the evaluation form. However, while the student should have input into the process, it is the field instructor’s evaluation. Following mutual discussion, the field instructor writes the evaluation and reviews it with the student. Students are expected to achieve a rating of “3” in most skill areas.

The written evaluation is divided into sections that address engagement skills, data collection, contracting, intervention and case management skills, and supervisory and professional relationships. Students are given a final rating that includes outstanding, very good, satisfactory, marginal passing, and unsatisfactory performance.

• An ADVANCED COMPETENCY rating is given to students who have demonstrated superlative performance in the field, highly integrating classroom and practice skills with a strongly developed, consistent “conscious use of self.”
• A COMPETENT rating is given to students who fulfill the learning assignments in the field assignment but at a beginning level.
• An APPROACHING COMPETENCY rating is given to students who demonstrate an understanding of practice skills but are very uneven and tentative in their demonstration of skills in practice. There may be difficulties in the supervisory or professional relationship that warrant this assessment.
• An UNSATISFACTORY rating is given to students who do not understand nor are they able to utilize social work skills in practice. They may demonstrate a substantial ethical gap in their social work skills and may demonstrate major difficulties in the relationships with supervisors and professional colleagues.

The student is presented with the completed evaluation and is asked to sign the evaluation, indicating only that it has been read. Field instructors may decide to have a final discussion about the particular ratings and comments, particularly if there is some disagreement.

At the end of each semester, students independently evaluate the field practicum experience as part of the integrative seminar. This evaluation focuses on the student’s assessment of his/her progress, the agency environment for learning, and the contributions of their field instructor.

**Grading of Students in Field Education**

Field education is a year-long course and is graded by the faculty adviser on a pass/fail basis. At the end of the first semester, if the student is progressing well, a grade of In Progress (IP) is given. Grades of satisfactory (S) or unsatisfactory (U) are given upon completion of the course, i.e., at the completion of the 570 hours, in May for 21-hour/week students and in August for 14-hour/week students. Since field education is a full year course, no credit can be given if a student withdraws before the end of the academic year.

The faculty adviser relies heavily, though not exclusively, on the written evaluation from the field supervisor in assigning a field work grade. Other factors that are taken into consideration are:

1. Other information from the supervisor and other personnel at the time of the field visit
2. Student’s process recordings and reflective journaling
3. Information from individual conferences
4. First-hand observation in the integrative seminar
5. Feedback from classroom instructors

Program students are expected to maintain performance standards in the field practicum, as well as in the social work classroom. The full policy describing the maintenance of satisfactory progress in the program and the “program continuance review” mechanism appear in the policy and procedures section of this document.

**In the Event of a Problem**

A learning problem is that which impedes a student’s understanding, acceptance, and use of knowledge in their professional performance. There are multiple circumstances that might result in a learning problem. For example, a learning problem may result from a student’s individual reactions, cognitive style, or approach to new learning situations. The learning problem may also be the result of a difficult match between
supervisor/agency and student. It is important to get to the root of the problem in order to determine an appropriate solution.

The field instructor is expected to discuss, as part of the educational process, the student's emotional reactions, with focus on the case material, as they affect their ability to work with clients. If it becomes apparent that the student has difficulties or any other problems that interfere seriously with training, the field instructor has the responsibility to bring this assessment to the faculty adviser. After reviewing the situation with the field instructor and student, the faculty adviser may request an administrative review.

Students are rarely removed from agencies in the middle of the year. When this is necessary, it is only for serious educational reasons and only after the adviser has attempted to resolve the problem with both student and field instructor. It is important that students and field instructors work through the above process in resolving differences. In the midst of a frustrating situation in the agency, the field instructor or the student may be tempted to short circuit the process and terminate the placement prematurely. Such action makes it very difficult for the program to assess what went wrong and to plan appropriately for the student. The program established the field placement and must be a full partner in any decision to end it. In addition, when early and full use is made of the faculty adviser; many placements that are in jeopardy can be turned into productive learning experiences.

In the case of an "unsatisfactory" evaluation from the field instructor, the faculty adviser has the following options:

1. To reject the unsatisfactory evaluation and give a "satisfactory" grade
2. At mid-year to reject the unsatisfactory evaluation and recommend replacement with the final grade to be determined on the basis of work in the new placement
3. To accept the evaluation and give an "unsatisfactory" (failing) grade in field work. A "program continuation review" meeting will be called, which may determine that the student may repeat the course, subject to availability of an agency, selected by the school, willing to accept the student. The student will be considered on probation and at risk. A placement with appropriate additional support and attention to the student will be sought.
4. To accept the evaluation and give an "unsatisfactory" (failing) grade. A "program continuation review" meeting will be called, and may recommend that the student be discontinued from the program.

There may be times when agencies are unable to fulfill their responsibilities and obligations as field placements. For example: the intended field instructor may leave with no replacement; the quantity or nature of assignments may not be appropriate for student learning; or agencies may be confronting severe external or internal demands and pressures as to present an obstacle to student learning. Under such circumstances, the faculty adviser in conjunction with the student and the program director will review the situation to determine if a change in placement is warranted.

Students with field related concerns are encouraged to confer with their field instructors. Should the concerns remain unresolved, they may confer with their faculty advisers and following that, the program director.

### Goals and Objectives

#### Goals

GSS seeks to prepare B.A.S.W. graduates who will:

1. Function as competent generalist practitioners with a commitment to human rights and social justice.
2. Practice with, and on behalf of, diverse populations, within agency settings to promote individual and community well-being.
3. Critically and systematically examine, evaluate, and utilize research and other sources of evidence to guide their practice within organizational and community contexts.
4. Practice with competency guided by a professional identity, values and ethical standards of behavior, as well as recognizing the need for ongoing professional development.
5. Prepare students for graduate studies in social work.
6. Develop self-awareness and critical thinking through liberal arts and social work classes.

#### Objectives

Upon completion of the B.A.S.W. program, graduates will be able to:

1. Function competently within agency settings.
2. Advocate for human rights and social justice for individuals, families, groups, and communities.
3. Utilize evidence-based practice within field instructor settings
4. Function competently as a generalist practitioner.
5. Promote individual and community well-being.
6. Value diversity within one's role as a social worker.
8. Apply social work values and ethics within agency settings.
9. Demonstrate critical thinking in one's practice with individuals, families, groups, and organizations and communities.
10. Develop a B.A.S.W. professional identity.
11. Demonstrate undergraduate knowledge of government and social work policy within one's agency placement.

#### Curriculum Sequence Objectives

Program objectives are further elaborated into curriculum sequence objectives. These objectives as stated in their respective syllabi are listed by course below.

**SOWK 6005. Contemporary Social Welfare Policy. (3 Credits)**

Students will learn that human rights and justice drive social welfare policies and their implementation at the international, federal, state, and local levels. The course introduces students to the underlying values, assumptions and philosophical perspectives that have influenced the development of the US social welfare system, its goals, policies and programs. Students will learn about policy formulation, analysis, and the role of social work in policy development and implementation within their practice settings at the micro, mezzo, and macro levels. The course introduces students to the historical, social, cultural, political, economic, organizational, environmental, and global influences that affect social policy.

**Prerequisites:** SOWK 2600 or SSCI 2600 or SOCI 2600.
SOWK 6040. Integrating Human Rights and Justice in Practice. (3 Credits)
Every person regardless of position in society or geographic location has fundamental human rights such as freedom, safety, and security, privacy, an adequate standard of living, health care, and education. This course introduces students to how social workers may conceptualize the global intersections and interconnections of justice, equality, and human rights. Students are introduced to an integrated practice framework that promotes human rights and justice and identifies the root causes of global social issues. They will explore theories that address human need, social, economic, and environmental justice, intersectionality, diversity, and oppression and discrimination. In this course, students learn how to recognize the extent to which a culture’s structure and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Students learn to engage in advocacy to advance human rights social, economic, and environmental justice domestically and internationally.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6305. Social Work Skills Lab. (3 Credits)
This skill-based course is anchored in the knowledge of generalist social work practice. Students will develop competency in performing essential social work skills via simulations, role-plays and peer activities. These skills will be applied to working with client systems including individuals, families, groups, communities and organizations. Case scenarios developed for this course will reflect the realities of contemporary social work practice. The emphasis will be on student performance in using the engagement and intervention skills with various client systems.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6320. Social Work Practice With Organizations and Communities. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with organizations and communities. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with organizations and communities. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with organizations and communities.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6323. Social Work Practice With Individuals Across the Lifespan. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with individuals. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with individual clients. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with individuals.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6324. Social Work Practice With Families and Groups Across the Lifespan. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with families and groups. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with families and groups. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with families and groups.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6440. Advanced Clinical Assessment and Diagnosis. (3 Credits)
The course builds on the skills, values, knowledge and processes of the generalist curriculum, serving as a bridge between generalist and advanced assessment theory and practice. Specifically, the course extends the person-in-environment assessment perspective of Generalist Practice with the addition of more intensive assessment of the individual’s inner world, including psychodynamic conflicts processes and ego defenses. The course is entitled “Advanced Clinical Assessment and Diagnosis” rather than “Psychopathology” to remind students that clinical assessment need not lead to a diagnosis of mental illness. The course covers practitioner self-awareness; the relationship between mental health and mental illness; risk and resilience; bio-psycho-social-spiritual assessment; a strength-informed cooperative assessment process; a critical use of the DSM-5, and major types of mental illness and their evidence-supported treatments.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6803. Applied Social Work Research and Evaluation. (3 Credits)
This course introduces students to social work research. It focuses on the scientific method from the process of developing knowledge to critically evaluating research. Students will learn about formulating a research question; research methodology, including study design, sampling, measurement, and data collection methods; ethical issues in research; and understanding how to read and understand research reports and publications.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

Mission and Overview

Program Mission
The mission of the BASW program at Fordham University is to educate students to promote human rights and social justice and improve the well-being of individuals, families, groups, organizations, and communities through culturally competent evidence-informed generalist social work practice embedded within an agency context. The BASW program builds upon a strong liberal arts core to establish the social work competencies necessary to effectively serve diverse populations.

Program Overview
Fordham's social work program builds on students' broad liberal arts experience at Fordham University and combines high quality classroom and field education with an extensive student advising and support system. The social work program is administered and staffed by the Fordham University Graduate School of Social Service. All social work courses and activities take place at the Lincoln Center and Westchester campuses.

The program actively consults and collaborates with other programs and majors within the undergraduate colleges of Fordham University.

The program and its faculty maintain ongoing relationships with the social work practice community to keep current and continually evaluate its curriculum in light of new knowledge, technology, social policies, and employment and market trends.

Students in the social work program must be matriculated at Fordham College at Lincoln Center, Fordham College at Rose Hill, or the Fordham School of Professional and Continuing Studies and are allowed to take courses outside the program at the Lincoln Center (Manhattan), Rose Hill (Bronx), or Westchester campus. They continue to participate in the overall activities of the University and can access all services available to undergraduate students. In matters outside the jurisdiction of the social

Updated: 07-27-2020
work program, students are subject to the policies and expectations of their college of matriculation.

Following admission into the social work program, students participate in classes and activities of the Graduate School of Social Service and become members of the school community. The design of the program—including eight commingled classroom courses of undergraduate and graduate social work students; a 600-hour, yearlong field practicum and integrative seminar; and a faculty advisement system for students at each stage of the program—provides a challenging and stimulating educational environment.

Students are expected to complete the 33 credits of the major within a two-year period either on a full- or part-time basis. The major consists of eight required and sequenced courses of three credits each (meeting weekly at Lincoln Center on Mondays, Thursdays, or Saturdays and at the Westchester campus on Thursdays and Saturdays), and a 600-hour, yearlong field practicum and integrative seminar of nine credits. Following admission, students are assigned a social work faculty advisor who meets with them individually and in group meetings. All students are enrolled in the program for two years. Students may enter the first year of the program in the fall or spring semester and all begin the second year in the fall.

The baccalaureate program is accredited by the Commission on Accreditation of the Council on Social Work Education. Students who are admitted to the BASW program within Fordham University are eligible for expedited admission into the advanced standing MSW program of Fordham University. Advanced standing substantially decreases the number of credit hours required to complete a Master of Social Work degree. The New York State Education Department has granted Fordham University the authority to confer the BASW Degree.

Fordham University offers a financial aid program to help students attend the undergraduate colleges. Some aid is available to both full-time students, taking 12 or more credits, and part-time students, taking six to 11 credits. Some aid is available to full-time students only, and scholarships and awards are also available. The University’s financial aid offices will answer questions and provide further information to prospective students.

### Plans of Study

The coursework is spread across four semesters. You can start your B.A.S.W. program starting in the fall or spring semester.

The first year consists of four classroom courses and faculty advising, and the second year consists of four classroom courses, the Field Practicum and Integrative Seminar, and faculty and field advising.

SOWK 2600 Introduction to Social Work and Social Welfare must be taken before beginning the remaining courses in the curriculum.

Regardless of when you enter the program, you must complete the first year’s four classroom courses before entering the Fieldwork Practicum.

### Social Work Major

The Bachelor of Arts in Social Work (B.A.S.W.) major at Fordham University will prepare you to make a meaningful difference in people’s lives as a generalist social work practitioner. Mirroring the strength of our nationally ranked M.S.W. program, our B.A.S.W. degree features a variety of learning experiences: dynamic classes, hands-on fieldwork education, and guidance and support from a faculty adviser. Our diverse community of compassionate students and faculty round out the stimulating educational environment of the Graduate School of Social Service. With our B.A.S.W. degree, you’ll graduate with the skills and knowledge you’ll need to promote human rights, social justice, and individual and community well-being.

Offered at our campuses in Manhattan and Westchester, the B.A.S.W. degree is equivalent to the Bachelor’s in Social Work (B.S.W.) and is accredited by the Council on Social Work Education (CSWE).

Gregory Acevedo, director of the B.A.S.W. program
212-636-7166
gacevedo@fordham.edu

### Requirements

Students are expected to complete the 33 credits of the major within a two-year period, either on a full- or part-time basis. The major consists of eight required courses of three credits each, and a 600-hour, yearlong field practicum and integrative seminar of nine credits beginning in September.

Following admission, students complete the social work program in two years. Depending on their full-time or part-time status, students may take courses in addition to social work courses.

**Admissions**

Potential applicants should contact the program director, Gregory Acevedo, Ph.D., at (212) 636-6644 or gracevedo@fordham.edu, as early as possible in their planning. All applications and other materials should be sent to:

Fordham University  
B.A. Program in Social Work  
113 West 60th Street, Room 716  
New York, NY 10023

**For more information**

See the admissions page.

**Sociology**

Note: "Sociology and Anthropology" is a single academic department at Fordham, but the academic information for each subject is listed on a separate web page. Information about anthropology programs is listed under anthropology (p. 1088).

Sociology is the study of group life—ranging from the analysis of passing encounters between individuals on a city street to the examination of current trends in globalization. As a social science, it combines scientific and humanistic approaches to study the diversity of social relationships in our modern world. As a liberal arts major, sociology represents excellent preparation for future graduate work by developing critical thinking and research skills, and it similarly provides fundamental grounding for students planning careers in law, business, social work, criminal justice, medicine, and international affairs. The scope of the discipline is quite broad, satisfying a variety of interests. A major or minor in sociology also offers a good background for students whose career goals involve marketing research, teaching, communications, government work, or extensive contact with the public and business. As such, sociology will provide a deeper understanding of the complex social and cultural world that shapes life experiences. The wide selection of courses offers students the opportunity to study crime and criminal justice, urban issues and public policy, social institutions, including education, the economy, religion, the family, and media, as well as social inequalities, including those of class, race, ethnicity, and gender.
Program Activities

Honors and Awards
The department offers the opportunity for students to become members of Alpha Kappa Delta, the international honor society for sociology students. Each spring, students are inducted into Fordham’s Chapter Iota. At Rose Hill, the department honors its seniors at the end of year awards ceremony, Encaenia, by bestowing the Rev. Joseph P. Fitzpatrick, S.J. Memorial Award and the Rev. J. Franklin Ewing, S.J. Memorial Award for the best submitted essay by a graduating sociology and anthropology major, respectively. At Lincoln Center, the department also recognizes excellence in its graduating seniors with departmental honors in sociology and anthropology at its own diploma ceremony. The department also sponsors a Sociology Club, a Criminology Club, and an Anthropology Club at Rose Hill, and a Society for Sociology and Anthropology at Lincoln Center, all organized and governed by students.

Internships
Both sociology and anthropology majors and nonmajors are encouraged to take advantage of the Internship Seminar offered by the department. This course is designed to provide students with the opportunity to develop skills in social analysis, policy development, program evaluation, and interpersonal relations while being of service to others in a real-life setting outside the classroom. Employment opportunities include agencies and corporations in the New York metropolitan area, ranging from organizations in the public sector, including the New York State Department of Corrections, the Legal Aid Society, and the Puerto Rican Family Institute—to organizations in the private sector—including CBS, Merrill Lynch, and IBM. Each student is required to spend a minimum of eight to ten hours per week in an agency (public or private) or organization chosen to fit the individual student’s interests and expertise. All students who enroll in the program are required to do both the internship placement and to take SOCI 4900 Internship Seminar). Field placements must be obtained through the internship program coordinator located in the Office of Career Planning and Placement.

For more information
Visit the Sociology and Anthropology department web page

Contribution to the Core
Sociology and anthropology offer the following which fulfill the first social science core requirement:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ANTH 1100</td>
<td>Introduction to Cultural Anthropology</td>
<td>3</td>
</tr>
<tr>
<td>ANTH 1300</td>
<td>Introduction to Archaeology</td>
<td>3</td>
</tr>
<tr>
<td>SOCI 1100</td>
<td>Introduction to Sociology</td>
<td>3</td>
</tr>
</tbody>
</table>

The advanced social science core requirement may be satisfied by an advanced-level course in sociology or anthropology. The course in Physical Anthropology, ANTH 1200 Introduction to Physical Anthropology, fulfills the life science core requirement for nonmajors. In addition, the department regularly offers courses that fulfill the American Pluralism, Global Studies, Interdisciplinary Capstone, and Eloquentia Perfecta 1 and 3, and Values Seminar/EP4 core requirements.

Programs

- Sociology Major (p. 1309)
- Sociology Minor (p. 1310)

Sociology Major

Requirements
Students majoring in sociology at FCRH, FCLC, and PCS are required to complete 10 courses.

Fordham College at Rose Hill

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Select six electives

1. These required courses are designed to help the student achieve basic sociological literacy and obtain a reasonable grasp of empirical research techniques.

2. Sociology majors are free to choose their remaining elective courses according to their interests and career goals from a broad spectrum of sociology courses offered by the department.

At FCRH, two courses in anthropology may be included among the electives, and with the written approval of the chairperson or associate chairperson, two courses in other social science departments may be counted toward the elective courses, giving the major considerable opportunity to develop an interdisciplinary approach to the study of human social behavior.

**5-Year Integrated Teacher Education Track**

The Fordham University Graduate School of Education (GSE) offers a 5-Year Integrated Teacher Education Track for students enrolled in one of the undergraduate colleges of the University. Programs are offered at the Lincoln Center campus. The 5-Year Track provides an opportunity for students to complete a B.A./B.S. and a 30 credit Master of Science in Teaching (M.S.T) degree in Early Childhood Education, Childhood Education, or Adolescence Education (biology, chemistry, physics, earth science, mathematics, English, or social studies), or TESOL (Teaching English to Students of Other Languages). Dual certification and extensions may also be pursued in early childhood special education, childhood special education, early childhood/childhood education, bilingual Childhood education, and adolescence special education. Extensions are also offered in middle childhood education, TESOL, special education or bilingual education for additional credits.

Students interested in teaching English to students of other languages may pursue a program in TESOL for grades Pre K-12. There are specific language requirements for this program and consultation with the appropriate program adviser is necessary.

The five-year combined degree track consists of early admission to the GSE, integration of 12 GSE credits during senior year, the completion of a B.A./B.S. degree, and a fifth year as a full-time student completing the additional credits in coursework and two semesters of student teaching. Dual certifications are additional credits and might take longer to pursue. After completion of all program requirements, students receive an M.S.T. degree and are eligible for GSE endorsement for New York State Initial Teacher Certification. New York State Certification is reciprocal with many states.

Early advisement and coordination is an important feature of this track. Please note that any student who does not complete successfully all degree requirements will not be endorsed for New York State Initial Teacher Certification.
Graduate School of Education graduates are highly qualified teachers who respect individuals in a multicultural society, excel in academic disciplines, acquire a broad knowledge base, learn in meaningful contexts, become reflective practitioners, and engage in lifelong learning. Fordham is accredited by the National Council for Accreditation of Teacher Education (NCATE).

To find out more about the track, consult with the GSE advisor. For further information about GSE academic programs, please visit the Graduate School of Education Bulletin (p. 896).

Program Activities

Field Experience
Once the Declaration of Interest is submitted, the coordinator will permit registration into the 1 credit Field Experience Seminar (CTGE 4200). Sophomores meet twice each semester, juniors meet three times each semester, and seniors meet once monthly. Seminars are held on both campuses except in senior year when they are held at Lincoln Center along with GSE courses. Field experience requires 30 hours per semester through senior year. The field hours are arranged according to the student’s schedule. The field experience helps the student to examine interest in the teaching profession, gain experience working with children on different grade levels, allows education faculty to learn about student’s suitability for teaching, and prepares the student for the fifth year student teaching experience.

Student Teaching Orientation
Prior to beginning fall student teaching, an orientation is held for students in all programs who are beginning this experience. Students are provided with extensive information, meet with their field specialists, and receive their school and grade assignment for the fall semester.

Student Teaching
In the 5th year, each student completes a full-time student teaching placement at two different sites in the grade levels of the certification area. Students are placed in schools that have partnerships with the GSE and with cooperating teachers that have more than three years of experience teaching. Each works with a field specialist who serves as a mentor and coach and who observes and evaluates the student in their student teaching placement site. A career adviser works specifically with students throughout the job search process. Field and student teaching placements provide more than 600 hours of comprehensive experience in public schools.

New York State Teacher Certification Exams and Workshops
Students are notified about New York State teaching certification requirements: certification exams, specialized workshops, fingerprinting, and application process. Extensive support is provided to students throughout this process.

Final Project
At the end of the fifth year, students prepare a capstone project as a culminating activity. This includes a theoretical and reflective essay highlighting teaching practice and knowledge gained. Adolescence education programs require the completion of a student work sample.

Admissions

There are two application stages to the Five-Year Integrated Teacher Education Track:

First Stage

- Complete a Declaration of Interest Form and submit to the Five-Year Track coordinator at the Graduate School of Education.
- Plan to seek program advisement about core courses to complete the B.A./B.S. Students should plan so as to be able to integrate 12 GSE credits in senior year. Fordham core must include the courses and content required by NYSED for teacher candidates; some core courses may fulfill more than one NYSED requirement.
- Inform major advisor of decision to apply. Advisor will give permission to register for the one-credit Field Experience Seminar.
- Meet with GSE Five-Year Track coordinator.

Second Stage

- Complete a GSE admissions application and submit all required supplemental information in the spring of the junior year for early admission. The application includes a written personal statement, two letters of reference, a resume, and a copy of all transcripts.
- Provide a letter from the undergraduate adviser indicating that 12 GSE credits will be completed during senior year, including field experience and reflective seminar.
- Maintain a minimum grade point average of 3.0 (B or better).
- Meet the general admissions requirements to the Graduate School of Education and for the specific program to which the Fordham undergraduate student is applying. Specific admissions requirements are listed on each program’s page in this Bulletin.

Note: Fordham Juniors who apply to the 5-Year Integrated Track program are not required to submit standardized test scores from the Miller Analogies Test, Graduate Record Examination, or significantly equivalent exam with their application to the program. However, official test scores MUST be submitted during the first semester as a fully-matriculated GSE student.

Requirements

New York State Certification Requirements
Students who meet all program requirements, complete the course of study, and meet established field experience competencies are eligible to receive Fordham University’s endorsement for New York state initial certification in their program area provided they also have:

- earned a passing score on the relevant New York state teacher examinations; and
- completed workshops in child abuse identification, Dignity for All Students Act (DASA), schools against violence education, drug and alcohol abuse, and health and physical education.

Undergraduate Core and Content Requirements
Teacher preparation for state certification includes requirements for general education and pedagogical core courses, as well as specific content courses related to the grade(s) and subjects the candidate will teach. The requirements differ across certification areas and are complex.
They affect the choices that are made to meet the undergraduate core curriculum distribution, as well as selections and scheduling of courses within the major. For example, to meet state certification requirements in the general education core, teacher education candidates need the following liberal arts and science requirements: artistic expression, communication, or written analysis and expression; concepts in history and social sciences; a language other than English; scientific and mathematical processes; and literature. These core/content requirements do not replace Fordham’s requirements.

Students must also meet the admissions prerequisites for their chosen master’s program. For example, students pursuing adolescence education must have the required 30 credits in specific content areas. More information about the requirements for each certification and major can be obtained from the coordinator of the Five-Year Integrated Track at amoliterno@fordham.edu. It is students’ responsibility to meet with their advisers and to ensure they are meeting Fordham undergraduate, GSE, and New York State admissions and completion requirements for their program of choice.

To meet all requirements for the baccalaureate degree and a master’s degree, candidates work closely with their Fordham undergraduate advisers and the GSE adviser.

## Community Engaged Learning

We learn by doing, and we grow as scholars and as citizens when we pursue curious and compassionate engagement with the world around us. Fordham’s two campuses are not set apart from the city in which we reside and the neighborhoods we call home, but rather are integral parts of that city and those communities. Community engaged learning courses give students and faculty the opportunity to deploy the concepts and content introduced in the classroom in the complex and dynamic places and spaces we share.

Fordham’s Center for Community Engaged Learning sponsors courses according to an asset-based approach to engagement. We bring the institutional and academic resources of the University together with the leadership, experience, and richness of our communities to enhance student learning, support faculty research, and build on community strengths. Students mobilize abstract concepts they learn in the classroom by engaging in real-world challenges. They enhance memory and retention by teaching new ideas to young people in local schools and centering in reflective practices together with their classes. They immerse themselves in the various cultures of New York’s vibrant neighborhoods, and speak the myriad languages native to our city. And, they hone civic leadership and take on pressing matters of policy and equity by partnering with elected officials, community boards, activists, and organizations to work for change.

For more information, and for faculty, student, and community resources, please visit Fordham’s Center for Community Engaged Learning.

### Community Engaged Learning Courses

In community engaged learning courses, experiences are employed as a learning resource alongside readings, lectures, discussion, or labs. Community engagement is integrated into the syllabus and classroom approach, and is therefore required of all students enrolled in the course. These courses require up to 20 hours of engagement (the instructor may offer more), robust written assignments, and a reflective classroom activity.

Sections of courses that integrate service as a learning resource will be listed in Banner under the attribute code SL, “Community-Engaged Learning.” Through this notation, students can identify prior to registration those classes in which engagement hours in the community are required.

Community engaged learning courses include the following:

<table>
<thead>

### Cooperative Program in Engineering (3-2 Engineering)

Fordham College at Rose Hill and Fordham College at Lincoln Center offer a five-year program that combines a broad liberal arts education with professional training in engineering. The cooperative program in engineering is an educational affiliation between Fordham University and the School of Engineering and Applied Science of Columbia University, which enables students to prepare for careers in applied science or engineering. This plan leads to a B.A. or B.S. degree from Fordham as well as a B.S. degree from Columbia University. Fordham University also has an affiliation with Case Western Reserve University in Cleveland, Ohio.

Rose Hill students who enter this program may choose to major in chemistry, computer and information sciences, engineering physics, physics, mathematics, or the joint major in mathematics and computer and information sciences. Students at Lincoln Center typically major in either mathematics or the joint major in mathematics and computer and information sciences. The B.S. degree from Columbia University or Case Western Reserve is in one of the following fields: applied mathematics, applied physics, biomedical engineering, chemical engineering, civil engineering, computer engineering, computer science, earth and environmental engineering, electrical engineering, engineering and management systems, engineering mechanics, industrial engineering, materials science, mechanical engineering, and operations research.

The program consists of three years at Fordham and two years at the engineering school. Students who wish to enter the program should have completed a minimum mathematics level of pre-calculus before entering Fordham, since Calculus I (MATH 1206) and Calculus II (MATH 1207) must be taken in the first year. By the end of the junior year at Fordham, the student must have completed all of the major requirements. The cooperative program is very intensive, and it may be necessary for the
student to take certain core curriculum courses during the summer at additional expense. Some courses taken at the engineering school fulfill some of Fordham’s degree requirements. At Rose Hill and at Lincoln Center, both the Fordham and Columbia degrees are awarded at the end of the fifth year.

To retain membership in the cooperative engineering program at Fordham and to permit admission to the engineering college, the student must maintain a 3.0 cumulative grade point average and a 3.0 grade point average in mathematics and science courses. Admission to Columbia is not guaranteed and has among its guidelines a 3.3 cumulative grade point average as well as a minimum grade of B in each pre-engineering requirement.

At the beginning of the spring semester of the junior year, the student must submit an online application for admission to the engineering college. If the student has maintained the required 3.0 averages and successfully completed the required academic program, then the program coordinator will send a recommendation for admission. Official transcripts must also be forwarded at this time. While attending classes at the engineering college, the student must maintain matriculation at Fordham. Students who choose to exit the program may remain at Fordham in their chosen majors.

Occasionally, a student wishes to apply for admission to the engineering school after graduation from Fordham. Such students will be treated as graduate students and will most likely be excluded from any financial aid considerations at the engineering school.

During the FCRH and FCLC New Student Orientations, a special session is held regarding the 3-2 cooperative program in engineering. All students interested in the program are expected to attend the session at their college.

**For more information**
Visit the cooperative program in engineering physics webpage.

The Columbia University website for this program is: www.seas.columbia.edu.

The Case Western Reserve website for this program is: engineering.case.edu/desp/dualdegree.

**Requirements**

1. At least 27 credits in the humanities.
2. A completed major at Rose Hill in chemistry, engineering physics, or physics, or at either campus in mathematics, computer and information sciences, or in the joint major in mathematics and computer & information sciences.
3. The following pre-engineering requirements:
   - Two years of calculus
   - One year of physics with lab
   - One semester of chemistry with lab
   - One class in computer science (C++)
   - One class in economics
   - One class in English composition
4. Additional required courses for the intended field of engineering at either Columbia or Case Western Reserve.

**Graduate Study**

Fordham College at Rose Hill and Fordham College at Lincoln Center make an effort to acquaint students with opportunities for study beyond the baccalaureate level. Students who show special promise in scholarship are encouraged to give serious consideration to graduate study after completion of their college program. At the beginning of junior year, qualified students should consult the appropriate adviser in their major department. Some departments have initiated an early admission to their master’s programs for their most promising undergraduate majors.

In addition, Fordham College seniors are allowed to register for courses in Fordham’s Graduate School of Arts and Sciences. Seniors with an index of at least 3.00 may register for courses offered by their major department. Students wishing to take graduate courses must get permission from the department and the dean of the Graduate School of Arts and Sciences, then contact their class dean to be registered.

**GSAS Accelerated Master’s Programs**

Qualified Fordham College at Rose Hill (FCRH), Fordham College at Lincoln Center (FCLC), Fordham School of Professional and Continuing Studies (PCS), and Gabelli School of Business (Gabelli) juniors may apply for the accelerated master’s to select GSAS programs. Accelerated master’s students apply during their junior (or equivalent) year, and take up to three courses in their senior year to count toward both the bachelor’s and the master’s degree. After an additional year of degree requirements (4+1), students are awarded a joint B.A./M.A. or B.S./M.S. degree.

Please refer to the specific program or the accelerated master’s programs web page for eligibility requirements (such as minimum GPA) and program participation. Programs that offer the accelerated master’s are listed on the accelerated master’s programs web page.

**Higher Education Opportunity Program**

HEOP, funded by New York State, provides financial aid, counseling, and tutorial and other services to carefully selected economically and academically disadvantaged students. Applicants must be residents of New York State, possess a high school diploma or an equivalent, and show potential for success in college. All students accepted by HEOP are required to attend a special summer program prior to the beginning of their first year. For further information, call or write the HEOP office at Freeman Hall, Room 102, 718-817-4205 at Rose Hill, and Lowenstein 803, 212-636-6235 at Lincoln Center.

**Institute of American Language and Culture**

**Institute Overview**

The Institute of American Language and Culture (IALC) offers English as a Second Language (ESL) courses to non-native English speakers in all skill areas: writing, grammar, reading, speaking, listening, and vocabulary. Content-based courses, seminars, and intercultural skills are offered to students at advanced levels of proficiency.

Updated: 07-27-2020
Internships

The Community ESL program provides free adult literacy classes to residents of New York. The Community ESL program does not meet the requirements for student visas.

The full-time ESL program fulfills the United States Immigration and Naturalization Service (INS) requirements for student visas. Acceptance to the Institute does not imply admission to any Fordham degree program.

The Via Fordham Program provides promising international students a different path into an undergraduate college at Fordham University. Admission to Via Fordham is selective. Students interested in Via Fordham must apply for undergraduate admission using the Common Application.

If an international student cannot supply a TOEFL or IELTS score at the time of application to a Fordham undergraduate program, he or she may take the Fordham English Language Test (FErL). Students who spend at least two semesters taking courses at the IALC and reach the highest level of proficiency may not be required to take the TOEFL or IELTS test, but if they are admitted to the University, they must take IALC writing courses until determined to be no longer necessary.

For more information
Visit the Institute of American Language and Culture's web page.

Institute of American Language and Culture
45 Columbus Ave, 3rd Floor
New York, New York 10023
Telephone: 212-636-6353
Fax: 212-636-7045

Internships

The professional achievements of Fordham graduates arise, in part, from the University’s extensive Internship Program. This highly successful program offers students the opportunity to intern with over 2,600 of New York’s most prestigious employers. More than 600 students participate in internships each year. Popular internship sites included Live with Regis and Kelly, ABC, MTV Networks, WNBC, Madison Square Garden, Warner Bros. Pictures, Miramax, Simon AND Schuster, JP Morgan Chase, KPMG, Ernst AND Young, Sony Records, ESPN, Merrill Lynch, Goldman Sachs, Morgan Stanley, Deloitte AND Touche, DKNY, New York Rangers, Universal Pictures, Manhattan District Attorney’s Office, Legal Aid Society, United States Secret Service, Office of the Child Advocate, NYC Council Office of Investigation, Museum of Arts and Science, and many more.

The internship program exemplifies Fordham's dedication and commitment to the education of the whole person. By participating in an internship, students have the opportunity to apply theories learned in class to the realities of a professional situation and explore connections between their major and their career goals.

An internship is a meaningful, well-supervised experiential education experience that benefits both students and organizations. An internship is an excellent way for students to explore career possibilities, gain solid professional experience in their chosen field of interest, and obtain valuable networking contacts. Since full-time employment offers are frequently a direct result of internships, students are strongly encouraged to complete an internship before they graduate.

Fieldwork experience is arranged where students can obtain academic credit and may also include a stipend from the sponsoring organization. Opportunities are available in the fall, spring, and summer semesters in all career fields/industries. Placements can be coordinated on a regional and national basis over the summer. Juniors and seniors generally participate in an internship on a part-time basis while maintaining a full course-load during the fall and spring semesters and generally participate on a full-time basis during the summer. Corporations and not-for-profit organizations participating in the program represent a wide geographic location: Metropolitan New York, the tri state area, and national, as well as international locations.

FCRH, FCLC, PCS College Policy

Each college offers juniors and seniors with a minimum grade point average of 3.00 the opportunity to engage in internships that relate to the student’s major field of study or another field of interest. Students may register for a paid or unpaid internships in one of the following methods:

- Enroll in an internship tutorial and meet with the instructor on a regular basis
- Enroll in an internship seminar within a discipline, if one is available
- Enroll in a general internship seminar, e.g., SOCI 4900 Internship Seminar.

Internships are normally taken for between four and eight credits, with tutorial experiences receiving one to two credits. Normally, students may not repeat internships. Internships are graded on a pass/fail basis. Most internship credits applied toward the major will be in addition to the minimum credit requirement in the major. All internships must be approved by the student’s major adviser prior to the placement of students. Students interested in the internship program should consult with their faculty adviser, the department in their field of interest, and the Office of Career Services, Experiential Education Program.

Gabelli Policy

On average, 91 percent of Gabelli students hold at least one internship during their college careers. An internship is a short-term, pre-professional work experience that provides hands-on practice and skill development in a professional environment that complements and advances the Gabelli education. Students at Gabelli who are interested in pursuing an internship should review Gabelli’s internship policies (p. 1207).

For more information
Visit the Career Services web page.

Pre-Law

American law schools look favorably on applicants who possess a strong liberal arts education, but they do not prescribe a specific, pre-law curriculum. Students can choose the major that interests them most, as law schools do not require any particular major as a prerequisite for admission. Students who are interested in pursuing a legal career, however, are advised to take courses that develop analytical skills and reading and writing abilities.

Most law schools employ three basic academic criteria in selecting applicants: the Law School Admission Test (LSAT) score, the cumulative grade point average, and the undergraduate university attended. Law schools are also looking for well-rounded students who are active and demonstrate leadership in their communities. To assure optimum performance on the LSAT, students should take the exam at a time that affords the best opportunity for preparation, usually in the spring or summer of junior year or in the early fall of senior year. To assure
optimum performance in the classroom, students should choose courses that stimulate their interest and encourage them to excel. In addition, the prudent applicant will consult with the pre-law adviser by the beginning of their junior year, or earlier, in order to maximize chances for success in the highly competitive law school admission process.

For detailed information on advising and programming, students are encouraged to contact their college's pre-law adviser. Additionally, students may wish to join their school's student-run Pre-Law Society, which sponsors lectures on admission to law school, the law school experience, and careers in the law.

3-3 Program
The 3-3 Program enables students to complete their bachelor's and law degrees in six years. Outstanding Fordham undergraduates may be admitted to and matriculate in Fordham Law School after three years of study at Fordham College at Rose Hill, Fordham College at Lincoln Center, Gabelli School of Business, or Fordham School of Professional and Continuing Studies. The B.A./B.S. degree is awarded following completion of the first year of law school. Eligibility requires that a student:

• Complete all core and major requirements and at least 92 credits (transfer students must have completed at least 47 credits at Fordham) before beginning law school.
• Maintain a recommended grade point average of at least A- (3.670) in all undergraduate courses including transferred credits.
• Have a very strong LSAT score, scoring at the 93 percentile or higher is recommended. It is recommended that the LSAT scores be available by December of the academic year in which the application is being made.

Students who meet these criteria become eligible during the fall of their junior year to apply to the School of Law of Fordham University. Before they apply, however, they must receive a favorable recommendation from their pre-law adviser. After receiving such clearance, the director of admissions of the School of Law will invite them for an interview. Students recommended for application are not guaranteed admittance to the law school. Final admission decisions rest with the School of Law. Study abroad is discouraged for 3-3 program applicants, due to the condensed nature of the undergraduate program.

For more information
Visit the Pre-Law program webpage.

Pre-Medical and Pre-Health
Fordham has a long history of preparing students for medical, dental, veterinary, and other allied health careers. Fordham graduates have been accepted to numerous medical schools, including Harvard, Yale, Cornell, Columbia, New York University, Albert Einstein, Mount Sinai, New York Medical College, Tufts, Creighton, Johns Hopkins, Georgetown, Tulane, Loyola University of Chicago, all of the SUNY medical schools, as well as many osteopathic schools of medicine. Students have also gained admission to many top-tier schools of dentistry, optometry, podiatry, and veterinary medicine.

Fordham’s pre-health professions program provides both individual and group advising from the pre-health program advisers throughout their undergraduate years. Group advising sessions are class-specific (first year, sophomore, junior) and are scheduled to help students plan for significant upcoming events, such as taking the MCAT. Students are also encouraged to meet individually with the pre-health program advisers to discuss their progress in attaining acceptance into a health professions program.

Health professions programs do not require a specific major, but instead value a breadth of education along with the completion of specific coursework. Students preparing for a doctoral-level health professions career may therefore pursue majors in the natural sciences, social sciences, or humanities.

Post-Baccalaureate Pre-Medical/Pre-Health Program
The Fordham post-baccalaureate pre-medical/pre-health program is offered through Fordham School of Professional and Continuing Studies (PCS). (p. 1278)

See the Fordham School of Professional and Continuing Studies section of the bulletin for further information.

Program Requirements
Pre-Health Professions Program
Students focused on entering a health profession program such as medicine, dentistry, veterinarian medicine, nursing, or other health professional schools will require successful completion of majors-level science coursework and labs. The courses listed below constitute the minimum requirements for a health professional school application:

The courses listed below constitute the minimum requirements for an application to most health profession programs, regardless of major:

• One year of general biology with lab (BISC 1403, BISC 1404, BISC 1413, BISC 1414)
• One year of general chemistry with lab (CHEM 1311, CHEM 1312, CHEM 1321, CHEM 1322, CHEM 1331, CHEM 1332)
• One year of organic chemistry with lab* (CHEM 2511, CHEM 2512 CHEM 2521, CHEM 2522, CHEM 2541, CHEM 2542)
• One year of general physics with lab (PHYS 1501, PHYS 1502, PHYS 1503, PHYS 1511, PHYS 1512) or (PHYS 1601, PHYS 1602) or (PHYS 1701, PHYS 1702)
• One year of English (satisfied by core requirements)

*General chemistry, including labs, must be successfully completed before enrollment in organic chemistry.

Students planning on completing additional coursework in the sciences should note that the biology and general chemistry foundation courses, plus all applicable labs (all listed above), must be successfully completed prior to enrollment in all upper division biology courses.

In addition, students applying to medical school are required to take the following coursework to meet the required competencies:

• One semester of biochemistry** BISC 3521
• One semester of psychology (PSYC 1200)
• One semester of sociology (SOCL 1100)
• One semester of statistics (MATH 1205, SOCL 2606, ECON 2140, PSYC 2000)

**Biology, general chemistry and organic chemistry plus all labs must be completed before enrollment in biochemistry.

All pre-health students, no matter what their primary fields of study, should master the major concepts and skills of science and mathematics,
and are generally advised to take additional upper-level science coursework to help prepare for standardized entrance exams. In addition, some health professional schools may require calculus as a prerequisite. Subtle variations in this coursework may be necessary for application to programs specific to each discipline.

Students planning to apply to a health professional school are advised to take the appropriate standardized admissions test—MCAT, DAT, OAT, or GRE—in the spring or early summer of the application year at the latest.

**Early acceptance into Doctor of Physical Therapy Program (D.P.T.)**

Fordham University has an early acceptance agreement with New York Medical College (NYMC), for the Doctor of Physical Therapy degree. This program is designed to prepare competent and caring physical therapists that will be able to skillfully practice in a variety of clinical settings and evolve with changes in the health care system.

For a detailed description of the Doctor of Physical Therapy program at New York Medical College, visit their website at www.nymc.edu/pt. Students pursuing any major are welcome to apply. Applicants to the Early Acceptance Program should have an academic record that includes a grade point average of at least 3.2 with a balance of coursework in humanities, social science, and natural science, including required majors level courses, with no grade below C+ in any prerequisite course, including the initial grades of courses that are retaken. No more than one grade of C+ in prerequisite courses.

The following prerequisites, required for admission, should all be taken at Fordham University. The grades of ALL courses are included. Retaking a course does NOT eliminate that course grade from the GPA calculation. Prerequisites taken at an alternate university must be approved by the admissions committee of New York Medical College. See your pre-health advisor to facilitate this request.

- Biology (one general or upper-level course with lab*)
- Physics I and Physics II (each with lab*)
- Chemistry I and Chemistry II series (each with lab*)
- Anatomy & Physiology I and Anatomy & Physiology II series (each with lab*), OR Anatomy (one course with lab*) and Physiology (one course with lab*). Human Anatomy is recommended, but not required.
- Psychology (two courses; physiological or human systems courses preferred)
- Mathematics (one course)
- Statistics (one course)
- All labs must be on campus, in-person labs; online labs are not permitted.

Graduate Record Examination: Scores on the Verbal, Quantitative, and Analytical Writing sections of the Graduate Record Examination (GRE) must meet or exceed the minimal program standards listed on the Physical Therapy Centralized Application Service (PTCAS) program page for New York Medical College.

Applicants must also complete at least 100 total hours of volunteer/work experience across two or more physical therapy settings under the direct supervision of a physical therapist. It is preferred that these settings serve patient populations with a variety of medical diagnoses.

**Early acceptance into Master of Science (M.S.) Program in Speech-Language Pathology**

Fordham University has an early acceptance agreement with New York Medical College (NYMC), for the Master of Science program in speech-language pathology. The speech-language pathology program at NYMC is one of the very few such programs located in a medical university setting, and also one of a few programs with a strong focus on public health. For a detailed description of the Master of Science program in speech-language pathology, visit the program’s website at www.nymc.edu/slp.

Although no formal major is required, speech-language pathology is an applied science that requires an aptitude in foundational sciences. Applicants to the Early Acceptance Program should have an academic record that includes a grade point average of at least 3.4 and a balance of coursework in humanities, social science, and majors-level natural sciences, including

- Introductory Biology (one course with lab) OR General Biology (one course with lab)
- Physics I OR Chemistry I (each with lab)
- Courses in Psychology and/or Sociology (total of at least two courses)
- One course in Mathematics OR Statistics

Any student interested in pursuing admission to an early acceptance program should speak with his or her pre-health adviser as soon as possible.

**Program Activities**

**First-Year Pre-Health Symposium**

The First-Year Pre-Health Symposium is a one-credit course offered in the first semester of students’ first year at the Rose Hill campus. In this course, students read widely about diverse issues facing the medical professions. They also explore ways to engage fully in the academic and extracurricular life of the University. In addition, they work in small groups to discuss challenges common to first-year students in pre-professional programs and propose ways to meet such challenges. First-year students in this symposium work with peer mentors and participate in the student pre-health organization meetings (The Laennec Society).

**Science Integrated Learning Community (SILC)**

First-year science majors and pre-health program students enrolled in science courses have the option to live in the Science Integrated Learning Community (SILC), a residential community on the Rose Hill campus. First-year science majors and pre-health program students occupy two wings of a first-year residence hall. The first-year students living in SILC receive support and peer mentoring from the two science major resident assistants and peer tutors living on the floor. SILC brings together those students who are enrolled in science courses and want to quickly find a support network among their peers. Residents engage in science related activities and participate in events focused on concerns of first-year science students.

**Research Opportunities**

Fordham students have ample opportunities to participate in undergraduate research programs with faculty and gain exposure to the most recent scientific development. Numerous students are active in research projects not only during the summer months, but also during...
the academic year. Many have presented their research at professional conferences and Fordham’s own Undergraduate Research Symposium, and still more are co-authors on scientific publications and contribute to The Fordham Undergraduate Research Journal (FURJ). In addition to participating in research projects on campus, Fordham students are also doing research at the Louis Calder Center (Fordham’s biological field station for ecological research), and other nearby locations including Memorial Sloan-Kettering Cancer Center, Rockefeller University, the Wildlife Conservation Society at the Bronx Zoo, the New York Botanical Gardens, Albert Einstein College of Medicine, St. Barnabas Hospital, and the American Museum of Natural History.

Opportunities to Acquire Clinical and Volunteer Experience
Fordham’s location in New York offers numerous opportunities for students to participate in volunteer programs, obtain physician shadowing experience, work in numerous nearby hospitals, and gain experience through summer internships. Many students gain clinical experience at nearby hospitals, many within walking distance of the campus. Fordham students are actively involved in outreach to the local community and volunteer their time tutoring children from the nearby schools, providing peer mentoring to high school children on health-related issues and serving at local soup kitchens.

Pre-Health Professions Library
The pre-health professions program maintains a library of books focusing on medicine. Most of these books are authored by physicians, but many are written by patients. Some are written by physicians who have experienced medical crises from the patient’s perspective. Students may visit the library in Keating 320, and they may check out books for a period of four weeks.

Laennec Society
The Laennec Society is an organization for students interested in doctoral level health-professional fields. The Laennec Society promotes academic excellence, provides essential information about health-professional occupations, and encourages future healthcare professionals to engage in meaningful service to the community and to each other. The Laennec Society also sponsors lectures by alumni working in health care and by admission’s representatives from professional schools. In addition, it shares information from recent graduates about their experiences in professional school. The Laennec Society focuses some of its meetings on issues pertinent to students in a specific undergraduate year. Seniors attend workshops on interviewing skills, while juniors work together to approach professional school exams and the primary and secondary application processes. Sophomores focus on developing leadership in appropriate service, extracurricular, and research activities. First-year students are welcome at all meetings and have an opportunity to participate in events targeted to their specific needs.

For more information
Visit the pre-health program web site.

ROTC: Reserve Officers' Training Corps
Army Reserve Officers' Training Corps (ROTC)
Fordham University hosts the Yankee Battalion of the Army’s Reserve Officers' Training Corps (ROTC), which exists for:

• College and university students in New York City and the Hudson Valley, who
• Belong to a diverse service-oriented team, and who
• Grow as organizational leaders.

Fordham’s military program began in the late 1840s, when New York State issued 12 muskets to students to defend the school against xenophobic nativist mobs. In 1885, Major General James R. O’Beirne, a Fordham graduate who led the capture of Abraham Lincoln’s assassin, orchestrated a formal partnership between Fordham and the US Army. In 1926, this partnership expanded into today’s ROTC unit, and by World War II, Fordham produced more officers for the Army than West Point.

After Vietnam and 9/11, Fordham and the Army expanded ROTC opportunities for schools across New York City and the Hudson Valley. Today, our distinguished military alumni include general officers like Jack Keane, who led the Army through 9/11, six Medal of Honor recipients from the Civil War to Vietnam, and tens of thousands who have served their country by leading Soldiers.

Fordham’s Department of Military Science is an academic department within the Gabelli School of Business. We teach classes at several locations across New York City and the Hudson Valley, including students from 32 partnered universities and colleges.

Students learn through structured study in the field of military science, anchored by classroom instruction expanded through experiential learning and practical exercises, including physical fitness and outdoor adventure-type activities.

Students who successfully develop and demonstrate leadership talents can serve after graduation as leaders and officers in the active Army, Army Reserve, or Army National Guard.

Students enrolled in ROTC classes can compete for paid-contracts and scholarships, including generous institutional incentives. Military science course credit may fulfill specific college or elective requirements. Courses are taken by students at no cost.

To learn more about the Army ROTC program, including eligibility requirements and scholarship opportunities, please:

• Visit our website at https://www.fordham.edu/rotc,
• Visit our main office at Fordham University’s Rose Hill campus, in Faculty Memorial Hall Room 130.
• Email our Recruiting Operations Officer at rotcroo@fordham.edu, or
• Call us at 718-817-4798.
For more Army ROTC information, please refer to the appropriate chapter of this bulletin. (p. 1319)

**Naval Science**

Fordham University is linked by a formal written agreement with SUNY Maritime College and Maritime's NROTC unit. This permits Fordham students to enroll in the NROTC program at Maritime and be commissioned as officers in the Navy or Marine Corps on receiving their bachelors’ degrees.

To receive a commission, a midshipman must complete all requirements for a bachelor's degree in accordance with Fordham University rules and regulations. He or she also must complete certain courses specified by the Navy. The Navy is interested in producing top-quality officers, so midshipmen are expected to maintain above-average grades. NROTC midshipmen lead basically the same campus life as other Fordham undergraduates.

Those interested in obtaining more information about the four-year and two-year Navy ROTC scholarship and college programs should visit the Navy ROTC website or write to

Professor of Naval Science  
NROTC Unit  
SUNY Maritime College  
Fort Schuyler  
Bronx, NY 10465-4198

For more Navy ROTC information, please refer to the appropriate chapter of this bulletin. (p. 1320)

**Aerospace Studies**

Fordham University is linked by formal written agreement with Manhattan College's AFROTC unit. This permits Fordham students to enroll in the AFROTC program at Manhattan College and be commissioned as Second Lieutenants in the United States Air Force upon receiving their bachelor's degrees.

To receive a commission, a cadet must complete all requirements for a bachelor's degree in accordance with Fordham University rules and regulations. He or she must also complete certain courses specified by the Air Force. The Air Force is interested in producing top quality officers, so Cadets are expected to maintain above-average grades. Scholarship cadets must meet additional grade point requirements. Additionally, Cadets must earn at least a passing score on the Air Force Officer Qualifying Test; pass physical fitness tests each semester; pass a physical exam; and successfully compete for and complete field training.

Those interested in obtaining more information about the four-year and two-year Air Force ROTC Scholarship and College Programs should contact the Unit Admissions Officer. Please call 718-862-7201, visit the AFROTC webpage at www.AFROTC.com.

AFROTC Detachment 560  
Manhattan College  
Leo Engineering Building, Room 246  
3825 Corlear Avenue  
Riverdale, NY 10463

For more Air Force ROTC information, please refer to the appropriate chapter of this bulletin. (p. 1318)

**Air Force ROTC/Aerospace Science**

Fordham University is linked by a formal written agreement with Manhattan College and its Air Force ROTC unit. This permits Fordham students to enroll in the Air Force ROTC program at Manhattan College and to be commissioned as second lieutenants in the U.S. Air Force upon meeting all program requirements and receiving their bachelor's degrees.

Fordham students may compete for scholarships as part of this program, covering as few as two years through as many as three and a half years.

Air Force ROTC cadets lead essentially the same campus life as other Fordham undergraduates. They make their own arrangements for college enrollment and room and board, pursue studies leading to the bachelor's degree, and may take part in any extracurricular activities that do not interfere with their Air Force ROTC requirements. Cadets must wear their uniforms one day per week during the academic year and during professional military training periods: academic classes, official summer programs, summer field training, and base visits. The government furnishes the uniforms. Cadets must conduct themselves professionally at all times when in uniform or when representing Air Force ROTC.

Air Force ROTC classes are held at Manhattan College in the Bronx. Cadets are responsible for arranging transportation.

Those interested in obtaining more information about the Air Force ROTC Program and scholarships should contact:

Unit Admissions Officer, AFROTC Detachment 560  
Manhattan College  
Leo Engineering Building, Room 246  
3825 Corlear Avenue  
Riverdale, NY 10463

Phone inquiries to 718-862-7201  
E-mail inquiries to afrotc@manhattan.edu  
Visit the AFROTC webpage at www.AFROTC.com.

Any student may take any academic courses without entering the AFROTC program. Leadership Laboratory is limited to cadets pursuing a commission in the U.S. Air Force. All courses are offered at Manhattan College.

Requirements can be found here: https://www.fordham.edu/info/20283/curriculum_and_programs

**Requirements**

To receive a commission, a cadet must complete all requirements for a bachelor's degree in accordance with Fordham University rules and regulations. He or she must also complete certain courses specified by the Air Force. Scholarship cadets must meet additional grade-point requirements. Additionally, the cadet must earn a passing score on the Air Force Officer Qualifying Test; pass a physical-fitness test each semester and pass a medical exam; and successfully compete for and complete field training. Contact the detachment for full requirements.

The general academic requirements for a cadet include

- Major in any field of study leading to a bachelor's degree
- Complete the courses or the equivalent in the Aerospace curriculum.
Army ROTC/Military Science

The Yankee Battalion of the Fordham University Army Reserve Officers’ Training Corps (ROTC) program exists for college and university students in New York City and the Hudson Valley who

- Belong to a diverse service-oriented team and
- Grow as organizational leaders.

Our program enhances a student’s college education by integrating leadership and management theory with leadership practicum modules in the curriculum.

Through coursework and in-class practical experience, students develop decision-making, team-building, and time-management skills—leadership qualities essential to success in any field, including corporate and research careers.

Students completing the ROTC program may earn a commission as a second lieutenant in the U.S. Army, Army Reserve, or Army National Guard. Students may participate in the first two years of Army ROTC with no commitment to military service, unless they accept an ROTC contract or scholarship during that time.

We offer a four-year program composed of the Basic Course (typically during the first and sophomore years) and the Advanced Course (typically during the junior and senior years). Graduate students and upper-level students may enroll directly into the Advanced Course under certain conditions.

Four-Year Program

The four-year curriculum combines classroom and leadership laboratory work. Any student is eligible to participate in leadership development courses regardless of academic grade.

During the summer between junior and senior year, students participate in a four-week intensive leadership development exercise at Fort Knox, Kentucky (near Louisville). Upon graduation from college and successful completion of the Advanced Course, students receive commissions as officers in the U.S. Army, U.S. Army Reserve, or Army National Guard.

Two-Year Program

The two-year program is designed for students who did not complete the first two years of the Army ROTC program. If students have at least four semesters remaining in their academic program or are interested in pursuing a graduate degree, they may be eligible to participate in the Advanced Course. Students must validate Basic Course requirements through a variety of options, including attending a paid four-week summer course, taking additional coursework during their first year provided they meet eligibility requirements, demonstrating completion of any service’s enlisted Basic Training Course, or graduating from a certified Junior Reserve Officers’ Training Corps program.

Once students validate Basic Course requirements, they are eligible to receive the same benefits as members in the four-year program.

Scholarships

Army ROTC scholarships are available on a competitive basis to qualified applicants. Two-, three-, and four-year scholarships are available each year, and are awarded through a national selection board or by the Fordham ROTC program’s professor of military science. High school seniors may apply for four-year scholarships through the national board. Scholarships provide full tuition and all mandatory fees, plus $1,200 for books and supplies each year, and a tax-free stipend of $420 or more per month. The scholarship is flexible in that it can be used for either of the following: tuition and all mandatory fees, or room and board.

Non-Scholarship Contracts

Contracts are available to students who have not yet received a scholarship or who do not desire to apply for one. Some contracts provide students a tax-free stipend ranging from $300 to $500 per month, and others afford students the chance to simultaneously study in ROTC while belonging to an Army Reserve or National Guard unit. These simultaneous membership programs offer additional benefits and incentives.

Program of Instruction

The Army ROTC curriculum provides distinctive leadership and management training in conjunction with realistic experience. The program emphasizes leadership theory and practice, organizational management, public speaking, leadership techniques and tactics, professional military ethics, history, resiliency, and wellness.

In the first two years of the program, students attend class once per week. Students may also join weekly practical applications and group workouts three times a week. If students sign a contract or accept scholarships, these weekly practical applications and group workouts become mandatory. Collegiate athletes who meet Army fitness standards are excused from physical fitness training while their sport is in season.

In the program’s final two years, all students attend a weekly class and practical exercise, plus three group workouts a week. Students also participate in a field training exercise each semester that explores small unit leadership training, military tactics, land navigation, rappelling, obstacle negotiation, and familiarization with military equipment like helicopters, tanks, and communications equipment.

Extracurricular Events

The Fordham ROTC program offers students challenging and rewarding extracurricular activities, from community service to high-adventure training. During the academic year, the student-led cadet battalion plans and executes activities ranging from workouts to orienteering to social events like the St. Patrick’s Day Parade and the annual Military Ball. Students participate in ROTC color guards to represent the Army at events throughout New York City and the Hudson Valley, from professional sporting events to concerts in Carnegie Hall. Students can also attend a variety of professional and social events, galas, and ceremonies associated with the Army throughout New York. Fordham also offers a chapter of the Pershing Rifles ROTC Honor Society, recognizing exceptional ROTC students from all military services across the country.

During summers, ROTC students can attend military training such as courses in parachuting, helicopter operations, mountain operations, and combat engineering. We offer academic internships in foreign languages, cyber activities, national research laboratories, foreign military exchanges, and at Army units to prepare students for the wide range of Army officer jobs.

Students who desire to serve in the Army Reserve or Army National Guard may enroll in simultaneous membership programs that allow them to participate in a Reserve or National Guard unit while also studying in ROTC. This program generally entails one weekend of reserve duty a
month and two weeks each summer, during which students will also receive reserve pay and benefits.

After graduation, we offer opportunities—primarily for students going on to law, medical, seminary, dental, or veterinary school—to defer service obligations until completion of graduate studies. Many graduate study opportunities are funded by the Army.

Eligibility Criteria
Enrollment in first-year and sophomore ROTC courses is open to all Fordham students and students from our 32 partner universities and colleges.

To be eligible for Army ROTC scholarships and/or enrollment in junior- and senior-year ROTC courses, students must meet the following requirements:

- Be registered full-time students at Fordham or one of our partner colleges and universities,
- Have good moral character,
- Be medically able to participate, and
- Be a United States citizen (with some exceptions).

Application Procedure
Students normally apply for admission to the four-year program during their first year, but students may enroll in the course or apply for a campus-based scholarship each semester.

Contact Us
To learn more about the Army ROTC program, including eligibility requirements and scholarship opportunities, please

- Visit fordham.edu/rotc;
- Visit our main office at Fordham University’s Rose Hill campus, in Faculty Memorial Hall, Room 130;
- Email our Recruiting Operations Officer at rotcroo@fordham.edu; or
- Call us at 718-817-4798.

Academic Credit
Army ROTC students may be granted credit for military science courses that fulfill certain degree requirements:

- MLSC 2101 Basic Ldshp Devel-Ph 1 and MLSC 2201 Basic Ldshp Dev Phase II each receive three credits. These courses are typically taken during the second year of the ROTC Basic Course.
- MLSC 2201 Basic Ldshp Dev Phase II may be substituted for the Gabelli School of Business’ junior core management course (LPBU 3223 Principles of Management) when taken in combination with MLSC 3201 Adv Ldshp & Mgmt-Ph 2.
- In the junior year, MLSC 3201 Adv Ldshp & Mgmt-Ph 2 is a three-credit elective.
- In the senior year, MLSC 4201 Cmd & Stf Trng & Mgt II counts as a four-credit, non-business elective.

One additional credit may be added to each of these courses if done in conjunction with an approved Community Engaged Learning Credit Project such as the St. James Community Center After-School Tutoring Program or Boy Scout Troop Support.

Other military science courses are not applied to degree requirements. If a military science course is taken for credit, it may count as one of the courses in the student’s normal course load.

All ROTC courses are provided without charge to the student.

Naval ROTC/Naval Science
Naval Science classes and drills are held at SUNY Maritime College, located in historic Fort Schuyler on the Throggs Neck peninsula, and on Fordham’s Rose Hill Campus in the Bronx.

To receive a commission, a Midshipman must complete all requirements for a bachelor’s degree in accordance with Fordham University’s rules and regulations and complete additional courses required by either the Navy or Marine Corps, depending on which branch of service the Midshipman will commission into.

Additionally, Midshipmen must meet all medical/physical requirements prescribed by the Navy or Marine Corps prior to commissioning.

Those interested in obtaining more information about the Navy/Marine Corps ROTC Scholarship and College Programs should refer to the pertinent paragraphs in the Grants and Scholarships section under the Financial Services chapter of this Bulletin.

For more information
Visit the Naval ROTC program webpage

Requirements
For details on Naval ROTC program requirements, please consult the NROTC Required Course breakdown.

Study Abroad
In the long-standing tradition of Jesuit education, Fordham University encourages study that enhances students’ appreciation of the world’s people and their interdependence. Our goal is to enable students to gain an understanding of other cultures and to encourage them to consider incorporating a global dimension into their chosen fields of study. As such, Fordham prides itself on its partnerships with programs that are committed to linguistic, cultural, and academic immersion and are integrated into the host communities. The University is also proud to offer one of the most extensive networks for foreign study of any major university. This network covers six regions (Africa, Europe, the Far East, Latin America, the Middle East, and Oceania), and the sponsored programs are wide-ranging and can accommodate various academic interests.

Fordham University currently maintains two centers abroad. Three of our semester-long programs and summer programs are offered at the Fordham London Centre. Fordham’s semester-long and summer programs in Spain are based at the Universidad de Granada.

Fordham University has exchange partnerships with universities worldwide. Studying as part of an exchange program allows you the highest level of academic immersion through direct enrollment in a host institution. These programs have been developed with the independent student in mind. Courses are often taught in the language of the host country and the majority of your classmates will be local or international students. Programs are offered in 18 different countries including Italy, France, Australia, and many more.
The International and Study Abroad Programs office also maintains a list of approved semester and year-long programs available through other universities and nonprofit organizations to supplement those offered by Fordham University and our exchange partners.

Staff in the International and Study Abroad Programs (ISAP) office are available to answer questions about how to plan for study abroad, how to apply for admission to sponsored programs, what programs cost per term, and what Fordham expects of participants.

For more information and deadlines, please visit the Study Abroad web page.

Tutorials

Juniors and seniors have the opportunity to develop independent research or study opportunities. Students choose a faculty member in the area of study and together design the course including objectives, course requirements and bibliography. Approval must be received from the instructor, the department chair, and one of the deans. Applications for a tutorial can be submitted to this link by the instructor; they will be reviewed by the department chair and the student’s class dean.

Sports Business

Major League Baseball. The NBA. Athlete management and licensing. ESPN, Sports Illustrated, NBC Sports. The range of employers and careers in the sports world is vast, and the Gabelli School has established a secondary concentration to prepare students for the area where business and sports meet.

Programs

• Concentration in Sports Business (p. 1321)

Concentration in Sports Business

The range of employers and careers in the sports world is extraordinarily broad. To prepare students for jobs across this field, the Gabelli School offers a secondary concentration in sports business. It combines three courses with an experience-based capstone component.

The Sports Business concentration can be pursued by Gabelli students as a secondary concentration only.

Capstone Requirement

The students may complete the capstone requirement in any of three ways:

• Presenting scholarly research at the conference of an organization such as the Sports and Recreation Law Association, the Collegiate Sports Research Institute, or the North American Society for Sports Management.
• Holding an approved one-semester internship in a sports field and writing a paper about the experience.
• Traveling during summer or winter break to get an international perspective on the business of sports and writing a paper about the experience.

For more information, please visit the Sports Business program website.

Strategy

Whether you’re working at a law or financial firm, advertising or insurance agency, hospital, pharmaceutical company, or other type of organization, strategy and statistics are key to an organization’s overall performance. Strategy creates a vision and emphasizes resources needed for firms to develop a competitive advantage. Statistics provides the data and tools executives need to make decisions. Together, these disciplines work continuously to support the firm’s long-term sustainability and growth.

At the Gabelli School, students can specialize in either field, preparing for careers as consultants, analysts, general managers, statisticians, strategy staff, and advisors.

How courses are counted

Students must note the following policy for how courses are counted. A student may count a maximum of one class in fulfilling more than one purpose—that is, toward any combination of major, minor, or primary or secondary concentration. For example, only one economics class could count toward both a finance major and an economics minor; any additional economics class would count toward the finance major OR the economics minor, but not both. Similarly, one management class could count toward both a primary concentration in management and in sustainable business, but any subsequent management class would not count toward both. Any exceptions to these rules will be posted within the specific area major, minor, or concentration requirements.

Programs

Concentrations

• Concentration in Business of Healthcare (p. 1321)
• Concentration in Consulting (p. 1322)
• Concentration in Entrepreneurship (p. 1323)
• Concentration in Healthcare Management (p. 1324)
• Concentration in Management (p. 1324)

Concentration in Business of Healthcare

The healthcare sector is one of the fastest-growing areas of the global economy. By integrating healthcare into their coursework, business students will be positioned for jobs in corporate human resources departments, hospitals, clinics, government planning and regulatory agencies, health maintenance organizations, hospital associations, consulting firms, computer vendors, health-insurance companies, and hospital equipment and supplies manufacturers. Graduates who choose to emphasize the healthcare aspect of their management concentration...
could go on for graduate work in health care, social work, or the arts and sciences.

Requirements
Business of Healthcare can be pursued by Gabelli School of business students enrolled at the Rose Hill or Lincoln Center campus.

Concentration in Consulting
Overview
The Consulting Concentration aims for students to learn effective ways of solving business problems by developing skills to anticipate, address, and resolve challenges in managing organizations. Students will learn consulting skills to analyze data, conduct research, work effectively on team-based projects, and persuasively communicate ideas.

Students can pursue consulting at the Rose Hill campus as a:

• Primary concentration in Consulting with a focus in one of the following:
  • Management
  • Strategy
  • IT
  • Marketing
• Secondary concentration in Consulting with a focus in one of the following:
  • Management
  • Strategy
  • IT
  • Marketing

Students can pursue management at the Lincoln Center campus as a:

• Dual concentration in Consulting with a focus in one of the following:
  • Management
  • Strategy
  • IT
  • Marketing
• Secondary concentration in Consulting with a focus in one of the following:
  • Management
  • Strategy
  • IT
  • Marketing

Students and alumni in this field have held jobs and internships at:

• PwC
• Deloitte
• Grant Thornton
• Gartner

• GE Capital
• KPMG Advisory
• EY
• Duff and Phelps
• Stryker Corporation
• Johnson & Johnson

Requirements
Primary Concentration in Consulting
The Primary Concentration in Consulting requires completion of four courses and one experiential education option.

## Concentration in Entrepreneurship

Entrepreneurship: Not just a field, but a mindset.

The Gabelli School of Business prepares its students to tackle real business problems with an arsenal of knowledge, skills, and experiences. The Entrepreneurship program within the Gabelli School of Business turns students into change agents and disruptors to seize countless opportunities in front of them. We do this by re-calibrating how students think about money, failure, what a career is, what kind of lifestyle they want, and what kind of impact they want to have in the world.

Entrepreneurship is not easy. It is not for the faint of heart. But it IS a door to opportunity for students who are intrigued by the path less traveled. For students who value freedom and independence and creativity. For students who don’t like being pigeon-holed in the typical career path. For students looking for an exciting, non-traditional lifestyle.

The Entrepreneurship concentration was developed to deliver a forward-thinking, skills-based curriculum driven by experiential learning to change the way students think. Regardless of one’s career trajectory (the startup world, corporate America, nonprofits, etc.), students learn how to embrace failure, how to vet opportunities, how to pitch ideas, how to be innovators, and how to confidently change the world for the better.

Students at the Rose Hill and Lincoln Center campuses can earn a concentration in Entrepreneurship as either a primary concentration (four courses) or a secondary concentration (three courses).

For more information

Visit the Entrepreneurship Program web page.

### Requirements

</table>
The healthcare sector is one of the fastest-growing areas of the global economy. The management concentration at Lincoln Center prepares students for this sector while giving them a broad, universally applicable management education. Coursework includes healthcare policy, systems, globalization and ethics; healthcare information technology; hospital management; and health benefits management.

By integrating healthcare into their coursework, students will be positioned for jobs in corporate human resources departments, hospitals, clinics, government planning and regulatory agencies, health maintenance organizations, hospital associations, consulting firms, computer vendors, health-insurance companies, and hospital equipment and supplies manufacturers. Graduates who choose to emphasize the healthcare aspect of their management concentration could go on for graduate work in health care, social work, or the arts and sciences.

### Requirements

Healthcare Management can be pursued as a primary concentration by Gabelli students enrolled at the Lincoln Center campus; it is available to students in class of 2022 and earlier only.

The secondary concentration has been renamed Business of Healthcare (p. 1321).

#### Concentration in Management Requirements

Gabelli students may pursue management as a primary or secondary concentration.

#### Primary Concentration

Students who want to pursue management as a primary concentration are required to complete four upper-level courses in Leading People and Organizations, Strategy, and/or Operations.

#### Secondary Concentration

Students who want to pursue management as a secondary concentration are required to complete three upper-level courses in Leading People and Organizations, Strategy, and/or Operations.

1. Course with subject the code LPBU, SABU, or OPBU numbered 3224 or higher fulfill the requirements for the primary and secondary concentration in management except for SABU 4441 Strategy and OPBU 3438 Operations and Production Management.

#### Sustainable Business

Gabelli School students don’t simply want to do business. They want to change the world. Studying sustainable business helps students learn how to make a difference conduct business with purpose. Sustainable business keeps in mind the “triple bottom line” of people, planet, and profit and allows students to be not only leaders but ‘champions.’

Students will see how business can still turn a profit while benefiting human beings around the world: leading with empathy, providing better
working conditions, improving the environment, and finding paths to innovation where others see closed doors.

Programs

- Sustainable Business Minor (p. 1325)

Sustainable Business Minor

People, planet, and profit: Sustainable business strikes a balance among these three factors. Sustainability is becoming a national phenomenon, and companies are taking notice, from the smallest startups to the largest multinational banks. A minor in this field is now open to Gabelli School students and their peers at Fordham College Rose Hill. The sustainable business program aligns seamlessly with Fordham’s mission to “promote research and education that assist in the alleviation of poverty, the promotion of justice, the protection of human rights, and respect for the environment.”

This minor incorporates business, social science, natural science, and building-design curricula. It can enhance a student’s career opportunities in traditional business markets and in the emerging “green sector.” Students who pursue this minor take the foundations course, Sustainable Business, and six additional courses. Courses vary depending on whether the student is a Gabelli School student, an FCRH student majoring in a science, or an FCRH student pursuing in a nonscience major.

For more information

Visit the Sustainable Business program web page.

¹ Either ECON 1100 Basic Macroeconomics or ECON 1200 Basic Microeconomics is a prerequisite for this course.

² ECON 1200 Basic Microeconomics is a prerequisite for this class.

Availability

The sustainable business minor is available to Gabelli students and to Fordham College students who fulfill all of the minor’s requirements. Differences in the minor’s requirements are designed to accommodate what is or is not already contained in each school’s core curriculum.

Theatre and Visual Arts

Theatre

The Fordham Theatre program trains emerging artists to develop their process through mentored exploration in performance, directing, design and production, and playwriting. The best way to learn is by doing, so our experiential curriculum includes 20 studio and four mainstage productions a year. It encompasses classical and experimental work, and is taught by a faculty with diverse aesthetics. Artistic freedom is crucial, so we give students agency; our studio season is created and run completely by students. Process is primary; a result is only a point in time in a continuous process. Collaboration is the keystone of the art of theatre; therefore, the first course for all our theatre majors is a yearlong class in collaboration. Merging the professional world with our training means that we coproduce on our main stage with leading New York City theatre companies. Graduates of the Fordham Theatre program are skilled, flexible, and empowered to meet the demands of our dynamic, evolving field. Ignite your vision. Begin your practice.

Visual Arts

The study of visual arts provides students with technical knowledge and skills as well as a critical and historical understanding of the field. The visual arts at Fordham are open to all students and are taught...
within the context of a liberal arts education. Students are given a knowledge base particularly suitable to today’s visually oriented world and job market. Classes are small, with considerable one-on-one contact with the instructor. Critique is emphasized in all classes, and students are given the resources to develop and take full advantage of their creativity. Engagement in New York City’s culture, museum and gallery tours, studio visits, and visiting artist lectures are integral parts of each concentration’s curriculum. In addition, students are encouraged to explore on their own and to take advantage of all that New York City has to offer as the arts capital of the country. There are opportunities for senior thesis projects, study abroad, internships, and tutorials in each area of concentration.

Program Activities
Ildiko Butler and Lipani Galleries
The Ildiko Butler and Lipani Galleries are maintained by the faculty for professional and student art exhibitions. The gallery director is Stephan Apicella-Hitchcock. Visit the Fordham University Galleries for more information.

Honors in Visual Arts
To graduate with honors, a visual arts student must complete and exhibit a senior thesis project. Majors wishing to have a senior exhibition must submit an application to Junior Review in the spring of their junior year. After Junior Review, students approved for a senior exhibition will work with an adviser and will be admitted to VART 4600 Senior Seminar: Studio Art in the fall of their final year. Students who do not qualify for admission to Senior Seminar may, with instructor and departmental approval, still complete a senior thesis and/or a portfolio.

Visual Arts Awards
Up to three Ildiko Butler Travel Awards are given annually for independent research in the medium of photography. A travel award and a visual arts award are given in honor of Susan Lipani. A portfolio award in honor of James Storey is offered to a senior whose work over their years at Fordham has shown evidence of exemplary talent and potential.

Junior Review
In the spring of their junior year, visual arts majors wishing to do a seminar thesis will submit a portfolio of their work for faculty review. The purpose of this review is to determine admission to the VART 4600 Senior Seminar: Studio Art. A subsequent review the following fall will determine if a student will receive a senior exhibition.

For more information
Visit the Theatre program web page
Visit the Visual Arts department web page

Contribution to the Core
The Department of Theatre and Visual Arts contributes VART 1101 Urbanism, VART 1135 Visual Thinking, and THEA 1100 Invitation to Theatre as courses to fulfill the fine arts requirement. VART 4300 Representation in Art satisfies the Values Seminar/EP4 requirement, but it is not required. It does not count as an elective toward the visual arts major.

Programs
• Art History and Visual Arts Double Major (p. 1326)
• Theatre Major (p. 1327)
• Theatre Minor (p. 1328)

• Visual Arts Minor (p. 1331)

Art History and Visual Arts Double Major

Overview
A double major in Art History and Visual Arts is a desirable choice for students who want the solid background in the humanities that art history offers in tandem with a broad foundation in the visual arts. Students should be aware that some of the courses necessary for completing the double major may be offered only on the Lincoln Center or the Rose Hill campus.

Requirements
For the double major, a total of 15 courses is necessary.

</tr>
</tbody>
</table>

1 Any course with the VART subject code (p. 601) may fulfill this requirement.
   It is assumed that the student will choose courses in more than one visual arts area of study and will pursue advanced courses in at least one of the areas of study.

2 See the Art History major (p. 1090) for courses fulfilling each requirement.

It is suggested that ARHI 1101 Introduction to Art History: Europe, VART 1135 Visual Thinking, and VART 1150 Drawing I be completed by the end of sophomore year.

Availability
The double major in art history and visual arts is available at Fordham College at Rose Hill and Fordham College at Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.
Theatre Major

The Fordham Theatre program is a B.A. program offering four pre-professional concentrations for theatre majors: performance, directing, playwriting, and design and production. Admission into the performance concentration is by audition only. Admission into the directing, playwriting, and design and production concentrations is by interview and a review of portfolio work (directing and design and production) and writing samples (playwriting). Students should visit the Fordham Theatre website to obtain extensive information regarding the program and to schedule an audition or interview via www.fordham.edu/theatre.

Please note that both the theatre major and minor include a lab requirement each semester. If a student fails to complete a lab contract, then he or she loses eligibility to participate in any production (mainstage or studio) the following semester. If a student fails to complete a lab contract twice, then he or she may be dropped from the program.

The Fordham Theatre program has a policy called warn/cut. In cases when the faculty has doubts about whether a student should continue in his or her concentration, a warning is given. Then the student has another semester to dispel the questions. If the evaluation remains unchanged after the following semester, then the student has the option of remaining a theatre minor, but must choose another major.

Completing THEA 3001 Theatre History I: Mythos, THEA 3002 Theatre History II: Modernity, and THEA 3003 Theatre History III: Postmodernism and the Present may replace one Advanced Disciplinary Course in Literature.

Theatre majors are exempt from the fine arts requirement in the core curriculum. The minimum acceptable grade in a major course is C-.

Requirements

The theatre major requires six foundation courses plus coursework in one of four concentrations: performance, design and production, playwriting, or directing.

Course | Title | Credits
--- | --- | ---
THEA 2080 | Collaboration I | 4
THEA 2090 | Collaboration II | 4
THEA 3011 | Text Analysis | 4
**Theatre History** | | 12
THEA 3001 | Theatre History I: Mythos | 
THEA 3002 | Theatre History II: Modernity | 
THEA 3003 | Theatre History III: Postmodernism and the Present | 
THEA 3920 | History of Theatre Design | 1

*Select a concentration:*

Performance
Playwriting
Directing

A theatre major concentrating in design and production must substitute THEA 3920 History of Theatre Design for any of the three required theatre history courses. Students pursuing other concentrations may request permission to take THEA 3920 History of Theatre Design in place of one of the other three theatre history courses.

Availability

Students who attend study abroad theatre programs may apply certain courses to their theatre major, and should consult with an advisor prior to attending a study abroad program.

The major in theatre is available at Fordham College at Lincoln Center. Students in Fordham School of Professional and Continuing Studies may major in theatre only if their schedules are sufficiently flexible to permit them to take day courses at the Lincoln Center campus.

Design & Production Electives

Choose three of the 3-credit elective courses from the list below based on your area of focused concentration in set design, costume design, lighting design, sound design, or stage management.

1. THEA 2070 Theatre Design counts toward this requirement if taken prior to Fall 2019.
2. In general, stage managers should take THEA 3205 From Page to Stage and stage designers should take THEA 2045 Introduction to Directing. Students may consult with their theatre major advisor if they prefer to take the other course.
3. Theatre majors concentrating in design and production must substitute THEA 3920 History of Theatre Design for any of the three required theatre history courses.

¹ With permission, students minoring in Theatre may fulfill the elective requirement with the following courses:
- THEA 2230 Costume Design I
- THEA 2260 Theatre Design: Conceptual Foundations
- THEA 2805 Stage Management I
- THEA 3362 Lighting Design
- THEA 3420 Sound Design I
- THEA 3455 Projection Design I
- THEA 3985 Set Design I

² A maximum of two semesters (8 credits total) of THEA 3700 Playwriting may apply towards the minor.

A student can officially declare a theatre minor in his or her sophomore year only after declaring a major. No D grade work will be credited toward the minor in theatre.

Availability

The minor in theatre is available at Fordham College at Lincoln Center and Fordham College at Rose Hill. Fordham College at Rose Hill students should note that the majority of theatre minor courses are offered only on the Lincoln Center campus. Students in Fordham’s School of Professional and Continuing Studies may minor in theatre only if their schedules are sufficiently flexible to permit them to take day courses at the Lincoln Center campus.

Visual Arts Major

The Visual Arts program offers five areas of study:
- Architecture
- Film and video
- Graphic design
- Painting and drawing
- Photography

Requirements

A visual arts major consists of a minimum of 10 3- or 4-credit courses from those described below, in addition to the core curriculum of your college.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
</table>
| Four Required Courses

Both of the below:
- VART 1135 Visual Thinking
- VART 1150 Drawing I

One of the following:
- ARHI 1101 Introduction to Art History: Europe
- ARHI 1102 Introduction to Art History: Asia
- VART 1101 Urbanism
- VART 3134 20th Century Art: Modernism and Modernity
- VART 3135 Modernism and Its Aftermath

One of the following:
- VART 2800 Seminar Graphic Design
- VART 3030 Art Design and Politics
- VART 3257 Seminar: Avant-Garde Film/Video
- VART 3535 Seminar: History of Photography
- VART 4100 Seminar Modern Art: Critical Perspectives

Six courses distributed among one or more areas of study. ¹

¹ Students are encouraged to work with a faculty adviser to develop an educational plan and select courses. A list of courses in each area of study is available in the Areas of Study tab.

It is strongly recommended that majors start taking visual arts core courses in their first year, and that they complete the first three of the above requirements before the end of their sophomore year.

Students must earn a grade of C or above in order for a required course to count toward their major in visual arts.

A variety of introductory courses in all areas of study except film and video are offered at Rose Hill; more specialized courses are offered at Lincoln Center.

VART 4600 Senior Seminar: Studio Art is open to seniors working on thesis exhibitions; enrollment is contingent upon acceptance at Junior Review.

Availability

The major in visual arts is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and the Fordham School of Professional Studies at Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.
Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Updated: 07-27-2020
locations in New York City invite faculty and students to repeatedly make
the connections between the world’s religious and moral teachings and
the realities of social injustice.

Majoring in theology provides an excellent liberal arts education.
Theology majors learn the crucial skills of thinking critically and
analytically, writing persuasively, communicating effectively, and working
with others cooperatively. They learn how to interpret classic and
contemporary texts, to understand ritual, to analyze and evaluate moral
norms, and to explore patterns of authority in the tradition and in the
cultures it inhabits. Electives allow students to shape the major in light of
their own interests.

The department offers a variety of activities each semester, including
guest speakers, a movie series, musical events, study trips, informal
gatherings with faculty, retreats, and museum visits. All theology majors
and minors are invited to attend regular seminars at which faculty and
graduate students present their current work

The department also has a chapter of Theta Alpha Kappa, the national
honor society for religious studies and theology.

Accelerated Master’s Program

The accelerated M.A. program in theology allows theology majors
presently enrolled in Fordham College at Rose Hill and Fordham College
at Lincoln Center to attain both a bachelor’s degree and a master’s
degree in theology in five years. Graduate courses begin in the student’s
year, providing them with advanced training and enriching the
undergraduate experience. An additional year of study permits the
student to complete all of the theology department’s requirements for the
degree of Master of Arts. For further information, contact an associate
chair.

Program Activities

The department offers a variety of activities each semester, including
guest speakers, a movie series, musical events, study trips, informal
gatherings with faculty, retreats, and museum visits. All theology majors
and minors are invited to attend the monthly faculty seminar at which
faculty present their current work.

For more information

Visit the Theology department web page

Contribution to the Core

The study of theology at Fordham provides an intellectually sophisticated
engagement with the Christian tradition. All first years in Fordham
College and the Gabelli School of Business take THEO 1000 Faith and
Critical Reason, which introduces students to the academic study of
religion as well as the intellectual foundations of theological questions
past and present. All sophomores and juniors take one core theology
course numbered THEO 3000-3799 with the attribute “Sacred Texts and
Traditions,” which introduces students to the historical-critical study of
the scriptures or the classical texts of one or more religious traditions.
Theology department offers courses that fulfill American Pluralism,
Global Studies, Eloquenta Perfecta 3, Interdisciplinary Capstone, and
Values Seminar (Eloquenta Perfecta 4) requirements.

**Visual Arts Minor**

The minor in visual arts is designed for students who would like a
creative component to supplement a major in a related field, such as
communication and media studies, art history, urban studies, or computer
and information sciences. A minor in visual arts might also serve as a
creative complement to majors that would appear at first glance to be
unrelated, like psychology, natural sciences, English, or anthropology.

**Requirements**

Six courses must be taken for a minor, consisting of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>VART 1135</td>
<td>Visual Thinking</td>
<td>3</td>
</tr>
<tr>
<td>Any Art History (ARHI) course, or one of the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>VART 3134</td>
<td>20th Century Art: Modernism and Modernity</td>
<td></td>
</tr>
<tr>
<td>VART 3135</td>
<td>Modernism and Its Aftermath</td>
<td></td>
</tr>
<tr>
<td>VART 4100</td>
<td>Seminar Modern Art: Critical Perspectives</td>
<td></td>
</tr>
<tr>
<td>Any 4 Visual Arts (VART) electives ¹</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

¹ Any course with the VART subject code (p. 601) may fulfill this requirement.

Students must earn a grade of C or above in order for a required course to
count toward their minor in Visual Arts.

**Availability**

The minor in visual arts is available at Fordham College at Rose Hill,
Fordham College at Lincoln Center, and the School of Professional and
Continuing Studies at Rose Hill and Lincoln Center.

**Theology**

The discipline of theology explores the big questions: What does it mean
to be human? How shall we live? What does it mean to believe in (or reject) the existence of God? Why are there so many religions? Christian theology tackles these questions by engaging a variety of disciplines, including history, philosophy, and literary studies. It works critically and appreciatively to discover, interpret, and understand the evolving beliefs and practices of Christianity. In light of Fordham’s Jesuit heritage and Catholic identity, the department focuses on the rich diversity within the Catholic tradition. Coursework emphasizes the mutual influence of faith and culture historically and in the present. New York City provides a valuable resource, especially for engaging in dialogue with other faith traditions of the world. Located in the poorest U.S. congressional district (Fordham’s Bronx campus) and bordering census tracts of both the highest and lowest income levels in Manhattan (at Lincoln Center), our locations in New York City invite faculty and students to repeatedly make...
Programs

- Theology Religious Studies Major (p. 1332)
- Theology Religious Studies Second Major (p. 1334)
- Theology Religious Studies Minor (p. 1334)

Theology Religious Studies Major

The theology religious studies major introduces students to the study of religious textual traditions, the historical and cultural study of religions, foundations of Christian systematic theology and theological and social ethics, and training in theoretical and methodological approaches to the study of religion and theology.

Requirements

All Fordham undergraduates are required to take Faith and Critical Reason (THEO 1000) as well as one Sacred Texts and Traditions course (courses with the STXT attribute code). Although they are part of the Core Curriculum, they also provide a fundamental introduction to the coursework required of the major.

</tr>
</tbody>
</table>

One course counting towards the major must focus on a historical period before 1500 (ancient/medieval). Textual Traditions courses do not fulfill this requirement.

¹ Additionally:
   - Theology courses taken in the Manresa Scholars Program (THEO 1006 Sin and Salvation in Medieval Theology, THEO 1007 Sinners, Saints, and Stories, THEO 1008 Mystics Monks and Mindfulness: Contemplation-In-Action Today, and THEO 1010 Restless Heart: Quest) may fulfill this requirement.
   - The following Theology courses taken in the Fordham College at Rose Hill or Fordham College at Lincoln Center Honors programs may fulfill this requirement: HPRH 1102 Foundational Texts: Theology/Classics, HPRH 3001 Religion in the Modern World, and HPLC 1401 Honors: Theology.

² A Theology elective is any course with the THEO attribute or any THEO course 3000-4999, as well as THEO 1050 Syriac Language and Literature I, THEO 1051 Syriac Language and Literature II, or THEO 1060 Elementary Coptic I.

Availability

The major in theology religious studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Lincoln Center and Rose Hill.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Theology Religious Studies Minor Requirements

The minor consists of four courses in addition to the theology courses all Fordham undergraduates are required to take. Faith and Critical Reason (THEO 1000) as well as one Sacred Texts and Traditions course (courses with the STXT attribute code) are part of the Core Curriculum, but also provide a fundamental introduction to the coursework required of the minor.

### Course | Title | Credits
--- | --- | ---
THEO 1000 | Faith and Critical Reason | 3
Sacred Texts & Traditions (STXT attribute) | 3

Choose one of the following advanced seminars:

- THEO 4300-level: History Culture Society Advanced Seminar
- THEO 4400: Foundations of Contemporary Theology
- THEO 4500: Religion in NYC: Theory & Practice

Three general Theology electives

| Course | Title | Credits |
--- | --- | --- |
THEO 1000 | Faith and Critical Reason | 3
Sacred Texts & Traditions Course (STXT attribute) | 3

Choose two of the following three advanced seminars:

- THEO 4300-level: History, Culture, and Society Course
- THEO 4400: Foundations of Contemporary Theology
- THEO 4500: Religion in NYC: Theory & Practice

Four general Theology electives

1. Additionally:
   - Theology courses taken in the Manresa Scholars Program (THEO 1006 Sin and Salvation in Medieval Theology, THEO 1007 Sinners, Saints, and Stories, THEO 1008 Mystics Monks and Mindfulness: Contemplation-In-Action Today, and THEO 1010 Restless Heart: Quest) may fulfill this requirement.
   - The following Theology courses taken in the Fordham College at Rose Hill or Fordham College at Lincoln Center Honors Program may fulfill this requirement: HPRH 1102 Foundational Texts: Theology/Classics, HPRH 3001 Religion in the Modern World, and HPLC 1401 Honors: Theology.

2. Consult the Core Curriculum page (p. 1123) for a list of courses fulfilling the Sacred Texts & Traditions requirement. Additionally, the following Theology courses from the Fordham College at Rose Hill and Fordham College at Lincoln Center Honors Programs may fulfill this requirement: HPRH 3201 Focused Study: Theology and HPLC 2811 Honors Sacred Texts.

3. See the Theology Religious Studies major page (p. 1332) for the 4300-level courses that fulfill this option.

4. A Theology elective is any course with the THEO attribute or any THEO course 3000-4999, as well as THEO 1050 Syriac Language and Literature I, THEO 1051 Syriac Language and Literature II, or THEO 1060 Elementary Coptic I.

Availability

The minor in theology religious studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center. It is also available to undergraduate students in the Gabelli School of Business.

Theology Religious Studies Second Major

Requirements

In order to accommodate the needs of overlapping requirements, students who double major in Theology Religious Studies and another major have the option to follow a slightly different set of requirements for their Theology Religious Studies program. Double majors may also follow the standard major requirements if they choose.

All Fordham undergraduates are required to take Faith and Critical Reason (THEO 1000) as well as one Sacred Texts and Traditions course (courses with the STXT attribute code). Although they are part of the Core Curriculum, they also provide a fundamental introduction to the coursework required of the major.

The second major comprises eight courses, two of which are Core Curriculum requirements:

| Course | Title | Credits |
--- | --- | --- |
THEO 1000 | Faith and Critical Reason | 3
Sacred Texts & Traditions Course (STXT attribute) | 3

Choose two of the following three advanced seminars:

- THEO 4300-level: History, Culture, and Society Course
- THEO 4400: Foundations of Contemporary Theology
- THEO 4500: Religion in NYC: Theory & Practice

Four general Theology electives

1. Additionally:
   - Theology courses taken in the Manresa Scholars Program (THEO 1006 Sin and Salvation in Medieval Theology, THEO 1007 Sinners, Saints, and Stories, THEO 1008 Mystics Monks and Mindfulness: Contemplation-In-Action Today, and THEO 1010 Restless Heart: Quest) may fulfill this requirement.
   - The following Theology courses taken in the Fordham College at Rose Hill or Fordham College at Lincoln Center Honors Program may fulfill this requirement: HPRH 1102 Foundational Texts: Theology/Classics, HPRH 3001 Religion in the Modern World, and HPLC 1401 Honors: Theology.

2. Consult the Core Curriculum page (p. 1123) for a list of courses fulfilling the Sacred Texts & Traditions requirement. Additionally, the following Theology courses in the Fordham College at Rose Hill and Fordham College at Lincoln Center Honors programs may fulfill this requirement: HPLC 2811 Honors Sacred Texts, HPRH 3201 Focused Study: Theology.

3. See the Theology Religious Studies primary major page (p. 1332) for the 4300-level courses that fulfill this option.

program in Urban Studies

availability

The secondary major is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham's School of Professional and Continuing Studies at Rose Hill and Lincoln Center.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Urban Studies

Designed as an interdisciplinary program, the urban studies major offers a broad introduction to the city and the urban environment. Students combine coursework and research on urban issues with hands-on experience in New York City as well as other American and international cities. The curriculum prepares majors for graduate school and professional programs in teaching, social work, public policy, architecture and urban planning as well as for careers in government service and community development, the nonprofit sector, journalism and law.

Accelerated Master’s Program

Undergraduate students from the Fordham Colleges with a GPA above 3.5 will be invited to apply for early admission to the master’s degree program in Urban Studies (p. 851) in the second semester of their junior year. Students applying for this option are not required to submit GRE scores. Students admitted to the Urban Studies Master’s Program under the early admissions policy will take the two 5000-level required core courses during their senior year (Issues in Urban Studies and Urban Political Processes). These courses will count toward the bachelor’s degree (which is awarded at the end of the fourth year) and are accepted for the master’s, which can be completed by the May of the following year under full-time study.

Program Activities

The Urban Studies Program hosts a wide variety of events throughout the academic year, including lectures, field trips, and tours, and informational lunches. The Urban Studies Week takes place every spring, bringing urban scholars and practitioners to Fordham University for lectures and faculty-student seminars revolving around one particular issue, such as climate change and sustainability, Hip Hop as a culture of (urban) resistance, or immigration. The annual Senior Thesis Dinner presents the outstanding research of graduating seniors. Urban Studies students also take part in undergraduate conferences and research forums.

Urban studies majors have received numerous prestigious awards, including the New York City Teaching Fellows and the City of New York Urban Fellows Programs.

- Urban Studies Minor (p. 1336)

Urban Studies Major

Requirements

The urban studies major consists of 10 courses, including a required internship and senior thesis. Students are also required to demonstrate multidisciplinary diversity. Urban studies courses come from a range of social sciences, such as sociology, economics, history, political science, African American studies, and Latino studies. Architecture, urban design, and environmental studies courses complete the curriculum.

All urban studies electives must be at the 2000 level or above. Only two electives may be cross-listed from the same department. Students study both American cities and the urban environment worldwide. They are encouraged to study abroad during their junior year in order to complement their learning experience at Fordham.

Students may also form their own concentration and program of study in consultation with their adviser, such as architecture and urban design, urban education, community development, urban economic development, public policy, and journalism.

The following courses are required of all majors:

<table>
<thead>
<tr>

</tbody>
</table>

Updated: 07-27-2020
Students should select an internship based on their area of interest and their professional goals. With permission from the director, the Urban Studies internship (URST 4800 Urban Studies Internship or URST 4999 Tutorial) may be substituted or an equivalent internship course in political science, economics, sociology and environmental policy.

Taken in the second half of the senior year. This course allows students to complete the required senior thesis in their area of interest or concentration. The senior thesis may also be completed as a tutorial (URST 4999 Tutorial) with any of the participating faculty in urban studies. The research project is designed in conjunction with the instructor and may be an individual effort or a group endeavor. Formal presentation of the research findings is required for completion of the seminar.

Select six URST courses according to the student's interests and career goals. Any course with the URST subject code or the URST attribute code may fulfill this requirement. Students may also take graduate level courses with permission.

Availability
The major in urban studies is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham School of Professional Studies may major in urban studies only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.

Professional and Continuing Studies students: The requirements above are in addition to those of the PCS Core Curriculum.

Students in Fordham School of Professional Studies may minor in urban studies only if their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Women, Gender, and Sexuality Studies
Women, Gender, and Sexuality Studies is a bi-campus multidisciplinary program with a profound social justice goal—to understand how gender and sexuality shape our culture, daily lives, social institutions, and interactions. We invite you to take an interdisciplinary approach to learning about these forces and their implications.

Originally founded as the Women’s Studies program, the program in Women, Gender, and Sexuality Studies was renamed in Fall 2016. The program takes an expansive view of gender and sexuality studies as both a lens on and a vehicle of social change. Our dynamic interdisciplinary curriculum covers the breadth of the human experience with gender and sexuality. Our courses will challenge you to explore how gender and sexuality affect how we interact with and navigate the world around us while identifying forces that can reshape old axes of power and cultivating new ones. By looking at gender today—especially where it intersects with sexuality, class, and race—you’ll become an expert in these intersectionalities that modern-day scholars have embraced. And since this is an integrative major, you’ll take classes in the humanities, arts, and social and natural sciences that focus on these themes.

Program Activities
The Women, Gender, and Sexuality studies program sponsors events on both campuses that pertain to questions about gender and sexuality studies. We aim to introduce students to key local, national, and international artists, activists, scholars, and policymakers whose work focuses on gender and sexuality, and we often partner with student-led events and initiatives.

For more information
Visit the Women, Gender, and Sexuality Studies program web page.

<td></td>
</tr>
<tr>
<td>WGSS 4930</td>
<td>Senior Thesis</td>
<td></td>
</tr>
</tbody>
</table>

¹ Any course with the WGSS subject code or the WGSS attribute code may apply as an elective, including an internship, project, or thesis.

The senior project or thesis may build upon work completed in an elective course, but all students who do not opt for an internship must register for WGSS 4920 Senior Project or WGSS 4930 Senior Thesis in their senior year. The internship, WGSS 4910, provides field experience and results in a paper. The internship paper, project documentation, or thesis is placed in the library collection of the WGSS program.

Availability

The minor in women, gender, and sexuality studies is available at Fordham College at Rose Hill, Fordham College at Lincoln Center, and Fordham School of Professional Studies at Rose Hill and Lincoln Center.
