Beginning with the premise that works of literature and criticism constitute an ongoing dialogue that shapes and is shaped by historical, cultural, and aesthetic movements, seminar participants will be encouraged to develop their own voices in that literary dialogue.
Attribute: TC.

HPLC 1401. Honors: Theology. (3 Credits)
Introduces students to the issues and methodologies of theology, providing a foundation for the exploration of religious traditions from various perspectives while focusing on the common and varying approaches of those traditions. Ethical, social, and political impacts of religion, along with major historical figures and periods in the history of religion, will be incorporated.
Attribute: REST.

HPLC 1603. Honors: Natural Science I. (4 Credits)
First semester of a two-semester laboratory science course open to Fordham’s strongest students who have not declared a science major. This interdisciplinary course emphasizes problem solving and analysis of classic experiments to explore the interrelationships of chemistry, biology, and physics in advancing our understanding of the principles that govern the natural world. The first semester focuses on two major themes: the interaction of matter and energy and the processing of information and logic by biological systems. The second semester applies the concepts from the first semester to analyze the origin and functioning of complex systems ranging from the early cosmos to the human brain.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESNS, ESPS.

HPLC 1604. Honors: Natural Science II. (4 Credits)
Second semester of a two-semester laboratory science course open to Fordham’s strongest students who have not declared a science major. This interdisciplinary course emphasizes problem solving and analysis of classic experiments to explore the interrelationships of chemistry, biology, and physics in advancing our understanding of the principles that govern the natural world. The first semester focuses on two major themes: the interaction of matter and energy and the processing of information and logic by biological systems. The second semester applies the concepts from the first semester to analyze the origin and functioning of complex systems ranging from the early cosmos to the human brain. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESLS, ESNS.

HPLC 1801. Honors: History. (3 Credits)
Study of the Western cultural tradition from the Enlightenment to the Postmodern era by focusing on the quest for modernity. Course work will focus on the philosophical debates, the search for utopia, the role of the avant-garde, and the cultural tensions that make up the Western experience.

HPLC 1811. Honors: Writing Intensive. (2 Credits)
One-credit course to be offered in conjunction with the first-year honors seminar that does not offer Honors English.

HPLC 1999. Tutorial. (1 Credit)

HPLC 2501. Honors: Art History at the Met. (3 Credits)
This course is designed as an introduction to the major periods of Western art and to the key issues of art history. Using the collections at the Met and other museums throughout the city as primary sources, we will study the role of museums, analyze the form and function of a variety of objects, and consider the roles of patron, artist, and audience. You will have the opportunity to study major monuments of Western art in situ and to gain an understanding of artists and the periods in which they worked. In addition, this course aims to develop visual literacy skills, helping you to analyze and interpret visual information. Some classes will be held at Fordham, but most classes will be held in museums.
Mutually Exclusive: ARHI 1101.

HPLC 2610. Globalization: Seminar. (3 Credits)
This course will introduce you to a comprehensive set of frameworks for the understanding and analysis of globalization understood as a process of global system formation. It provides you with the ability to survey and understand the wide variety of information regarding the historical development of globalization and prepares the student to assess the possibilities for the global future and its impact on our lives.
Attributes: INST, ISIN.

HPLC 2800. Internship. (2 Credits)

HPLC 2803. Honors: Trends in NYC. (3 Credits)
Analysis of topics illustrating the development over time of New York City’s populace, governance, economy and social and cultural organization.

HPLC 2811. Honors Sacred Texts. (3 Credits)
Through a selection of primary works from ancient Egypt, Mesopotamia, and Israel, the New Testament, the Talmud, The Qur’an, and early Muslim writings, students will reflect on the social, historical, and theological contexts in which each writing emerged. Primary emphasis will be placed on the similar yet different ways humans construct themselves and their worlds in relation to the sacred.
Attributes: JWST, MEST, STXT, THEO.
HPLC 2999. Tutorial. (2 Credits)
Supervised individual project designed by the student in concert with one or more members of the faculty. Each course must be approved by the Honors Committee.

HPLC 3800. Internship. (3 Credits)

HPLC 3999. Tutorial. (3 Credits)

HPLC 4050. Honors: Senior Values Seminar. (4 Credits)
Using mostly recent scholarship in philosophy and politics, this class will focus on the history and basis for human rights, and in particular the question of whether we can justify the claim that there are universal basic rights: (1) Are universal rights consistent with a wide array of varying cultures and ways of life? (2) Are concepts of rights somehow inherently ‘western’ or ‘individualist,’ or can relativist doubts about human rights be answered? We will relate the growth of rights law in international treaties to related issues in just war theory, including controversial questions about humanitarian intervention and ongoing transitions to democracy in parts of the developing world. We will also focus on the practical question of how the international order could be restructured if we take seriously the idea that there are universal basic rights to freedom from tyranny and to development out of poverty Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attribute: THEO.

HPLC 4500. Thesis Workshop. (3 Credits)
This course is for seniors in the FCLC Honors program. Participants will workshop thesis drafts and work on presentation skills for both the research showcase and the Honors Program presentation.

HPLC 4800. Internship. (4 Credits)
Combines work with an artist, writer, scientist, or other expert with directed series of academic readings relevant to that experience. (Each course must be approved by the Honors Committee.) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HPLC 4888. Honors: Internship. (3 Credits)
Combines work with an artist, writer, scientist, or other expert with directed series of academic readings relevant to that experience. (Each course must be approved by the Honors Committee.)

HPLC 4999. Honors Tutorial. (4 Credits)
Supervised individual project designed by the student in concert with one or more members of the faculty. (Each course must be approved by the Honors Committee.)

Honors Program - FCRH (HPRH)

HPRH 1101. Interdisciplinary STEM I. (3 Credits)
This course is the first part of a yearlong interdisciplinary study of quantitative reasoning and science, providing an introduction to related issues in just war theory, including controversial questions about humanitarian intervention and ongoing transitions to democracy in parts of the developing world. We will also focus on the practical question of how the international order could be restructured if we take seriously the idea that there are universal basic rights to freedom from tyranny and to development out of poverty Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: ENST, ESLS, ESNS.

HPRH 1102. Interdisciplinary STEM II. (3 Credits)
This is the second part of a yearlong interdisciplinary study of quantitative reasoning and science. The course will include an introduction to important methods, theories, and modes of thinking in the participating fields of biology and chemistry. Attributes: ENST, ESLS, ESNS.

HPRH 1103. Foundational Texts: Philosophy. (3 Credits)
This course will explore primary texts on core philosophical issues in antiquity and beyond, both Western and Asian.

HPRH 1104. Bronx Exploration. (1 Credit)
This course is an introduction to the borough in which Rose Hill Honors students will spend their college years. The course combines readings about and discussions on the history, economy, and culture of the Bronx. There will also be several field trips to important Bronx historical and cultural sites. The course may also include opportunities for community engagement.

HPRH 1201. Interdisciplinary STEM II. (3 Credits)
This course will explore primary texts on core philosophical issues in antiquity and beyond, both Western and Asian.

HPRH 1202. Foundational Texts: Literature. (3 Credits)
This course will examine texts that have been foundational for the development of English literature, including those by influential authors such as Chaucer, Shakespeare, Milton, and Austen. Attributes: ENGL, ENHD.

HPRH 1203. Foundational Topics: History. (3 Credits)
This course will explore primary texts on core philosophical issues in antiquity and beyond, both Western and Asian.

HPRH 1204. Foundational Topics: Art/Music History. (3 Credits)
This course will explore primary texts on core philosophical issues in antiquity and beyond, both Western and Asian.

HPRH 2101. Justice I: The American Experience. (3 Credits)
This course focuses on key concerns of justice in the American experience within the professor's field. At different times, courses in the humanities, social sciences, or STEM fields are offered. Honors students must take at least one Justice course in the social sciences. Attributes: AMST, APPI.

HPRH 2102. Focused Study: History. (3 Credits)
Designed with an awareness of what students learned in their Foundational Topics course, the Focused Study History course delves into a particular topic in history. Students choose among different course topics offered each semester.

HPRH 2103. Research Methods/Oral Presentation. (1 Credit)
This course is an introduction to the basics of academic research and the skills of oral presentation. Components include how to develop a viable research question, how to formulate a research proposal, and how to give an elevator speech, among other topics. Students in the course complete a preliminary research proposal and present it orally to their Honors cohort at the end of the semester.

HPRH 2201. Justice II: Global Contexts. (3 Credits)
This course focuses on key concerns of global justice in the professor's field. At different times, courses in the humanities, social sciences, or STEM fields are offered. Students must take at least one Justice course in the social sciences.

HPRH 2202. Focused Study: Philosophy. (3 Credits)
Designed with an awareness of what students learned in their Foundational Texts course, the Focused Study Philosophy course delves into a particular topic in philosophy. Students choose among different course topics offered each semester.
HPRH 2999. Service Learning-2000 Level. (1 Credit)
In this student-initiated program, the student may earn one additional credit by connecting a service experience to a course with the approval of the professor and the service-learning director.

HPRH 3001. Religion in the Modern World. (4 Credits)
An examination of the way that the world’s major religious traditions have come to terms with the philosophical and practical challenges of modernity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.

HPRH 3051. Ethical Dimensions of Contemporary Social Problems. (4 Credits)
An examination of a particular modern problem from the perspective of both social and ethical analysis. The problem to be considered will vary, although it will generally be either international in scope or able to be viewed from a number of different traditions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: SOCI.

HPRH 3075. Ignatian Education Seminar. (1 Credit)
This seminar will examine the distinctive nature of a liberal arts education in the Ignatian tradition. Intended for those who have completed at least half of their work at Fordham, the seminar will allow such students an opportunity to reflect on their own education in conversation with a small group of their peers and a member of the faculty or administration. This one credit course will meet four times during the semester and will be graded on a pass/fail basis.

HPRH 3101. Focused Study: Literature. (4 Credits)
Designed with an awareness of what students learned in their Foundational Texts course, the Focused Study: Literature course delves into a particular topic in literature. Students choose among different course topics offered each semester. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ENGL.

HPRH 3102. Ignatian Education Seminar. (1 Credit)
This course provides an opportunity for students to learn about and reflect on the distinctive nature of a liberal arts education in the Ignatian tradition, both historically and at Fordham. This course is open to all FCRH, FCLC, and Gabelli sophomores, juniors, and seniors.

HPRH 3201. Focused Study: Theology. (4 Credits)
Designed with an awareness of what students learned in their Foundational Texts course, the Focused Study: Theology course delves into a particular topic in theology. Students choose among different course topics offered each semester. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HPRH 4001. Senior Thesis. (4 Credits)
An extended original research project in one’s major field, prepared under the guidance of a faculty mentor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HPRH 4101. Senior Thesis Seminar. (4 Credits)
This seminar, taken in conjunction with the thesis project in a student’s major, is the culmination of the Honors experience. Students workshop their thesis projects, develop intellectual portfolios of their Honors careers, and create three-minute thesis presentations to present before faculty, family, and friends at the end of the academic year. Students register for the Honors Senior Thesis Seminar in either the fall or spring semester of their senior year; they attend the seminar for the entire year. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HPRH 4999. Tutorial. (1 to 4 Credits)
Independent research and reading with supervision from a faculty member.

**Honors Program - Gabelli (HPCB)**

HPCB 3221. Financial Management. (3 Credits)
An enhanced honors section of Financial Management. This course will discuss financial analysis, planning and control in the business firm; optimum capital structure and leverage; working capital management and sources of suitable short-term funds; long-term investment decisions and capital budgeting; and valuation problems in financing and acquisitions.

HPCB 3435. ST: Evolution of American Bus. (3 Credits)
This course is designed to trace major developments in the nature of capitalism, corporate structures, business ethics, and the constitution and legal statutes. These developments will be followed in American history and literature. In units that include Puritanism, the Colonial Era, the American Revolution, the Federalist Era, the Agricultural and Industrial Revolutions, the Rise of Big Business, the Progressive Era, the Great Depression, and Post-War America, the course will be designed to have readings in history, law, religion, sociology, urban studies philosophy, art history, and other areas.

HPCB 4441. Honors Strategy. (3 Credits)
Ignite Scholars Program section of Strategy. This integrated course brings together the student’s previous study of the functional areas of business. The course focuses on the activities of the chief executive’s top management group in defining the objectives and goals of the organization and in developing programs for the achievement of those goals. Major attention is devoted to the sophisticated, contemplative action of top-level decision makers.

HPCB 4701. Global Business Readings. (3 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HPCB 4703. Probability and Statistics. (4 Credits)
This course is an intensive study of probability theory and statistical analyses for planning, decision making, and operational review. Topics include probability distributions and density functions; descriptive and inferential statistics; and such methods for hypothesis testing as the analysis of variance, simple and multiple regression, categorical analyses, time series analyses, and principal components or axis factoring. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HPCB 4704. ST: Business Practices. (3 Credits)
This course addresses business processes, including strategy, and contemporary issues in business.
HPCB 4800. Ignite Scholars Readings. (3 Credits)
This seminar-based course is open to students in the Ignite Scholars program. It focuses on contemporary literature highlighting technology, innovation, resilience, and ambiguity in the workplace, incorporating examples drawn from governments and from socially innovative companies.

HPCB 4999. Tutorial. (1 to 3 Credits)

Humanitarian Affairs (HUAF)

HUAF 5000. The Humanitarian Toolbox. (0 to 2 Credits)
This course offers an intensive comprehensive and unified training program suitable for humanitarian aid professionals, allowing them to understand all of the available actors and resources within a humanitarian crisis. This multi-disciplinary course is made up of lectures, workshops, and case studies.

HUAF 5001. Current Humanitarian Issues. (0 to 2 Credits)
This course will build on what is learned in HUAF 5000 and introduces historical, political, medical, managerial, legal and communication skills.

HUAF 5010. Humanitarian Negotiation. (0 to 3 Credits)
Many humanitarian aid professionals believe that negotiation is perhaps the activity in which they spend most time both in field and headquarters situations. Almost everything that humanitarian workers need to achieve has to be negotiated with donors, host governments, local structures, communities, beneficiaries, other humanitarian agencies and their own staff. This course gives students an understanding of negotiation theory together with practical historical and current applications. All types of negotiation are examined, from road blocks and negotiations in situ for access to negotiations for peace agreements far from the conflict. Theoretical lectures will be supported with group scenario-based exercises.

HUAF 5012. Contemporary Issues in Humanitarian Action. (3 Credits)
This course will introduce students to the pressing issues and acute challenges of contemporary humanitarian response through three modules on (1) Threats and Vulnerabilities, (2) Accountability in Humanitarian Response, and (3) Innovations in Humanitarian Response. The aim of the course is to examine how the international community forms consensus regarding best practices and how this, in turn, informs humanitarian practice.

HUAF 5013. Fundamentals of Humanitarian Action. (3 Credits)
This course will introduce students to the principles of humanitarian action through three modules on (1) Defining Humanitarian Assistance, (2) Management, and (3) Strategic Planning. The aim of the course is to provide an overview of the critical aspects of international humanitarian coordination from an organizational perspective.

HUAF 5014. Humanitarian Resource Management and Administration. (3 Credits)
This course will introduce students to the operational aspects of humanitarian response and focus primarily on the role of human resources (HR) and financial management. In response to the continuing professionalization of the humanitarian sector, this course will provide students with a common understanding of hiring practices, budgets, management, and donor relations in a humanitarian intervention.

HUAF 5015. Information Management. (3 Credits)
This course will introduce students to the principles and strategies behind the effective flow of information in a humanitarian setting. Gathering and managing information is crucial in order to understand the cause of the emergency, identify impacted populations, and determine crisis-affected geographical locations. The aim of this course is for students to understand the components of a successful information management network within a humanitarian intervention and identify how information can contribute to future preparedness.

HUAF 5016. Monitoring and Evaluation in Humanitarian Response. (3 Credits)
This course will introduce students to the principles and theoretical frameworks behind data collection and analysis in the context of humanitarian response. It will cover qualitative and quantitative research methods used in humanitarian program monitoring and evaluation (M&E). The aim is to give students an overview of basic methodologies utilized in the field as well as the tools to determine appropriate M&E strategies in various humanitarian settings.

HUAF 5020. Humanitarian Aspects of Migration. (0 to 2 Credits)
Migration, whether forced displacement or economic migration of the poorest, is often a major factor in either escaping from poverty, persecution, and danger, or moving into yet more dangerous situations. In attempting to find livelihoods and safety, people often become victims of smugglers or traffickers. Students will be given an enhanced awareness and understanding of the complex interaction between migration and humanitarian interventions from the point of view of the migrant, the authorities of the host nation or region, and of the humanitarian worker. Attribute: IHUA.

HUAF 5025. Cash, Commodities, and Services in a Humanitarian Response. (0 to 3 Credits)
For decades, humanitarian assistance was delivered by the supply of commodities and services, often by international humanitarian organizations. More recently, technological advances have made it practical, and cost-effective, to provide humanitarian assistance through cash transfers. This development has both been welcomed as the new way forward and viewed with some suspicion by others who view it as lacking in accountability. This course will examine the roles played by cash transfers, commodities, and services in response to humanitarian crises, along with the advantages and disadvantages of each. The course will also examine the mechanisms now in place for the further development and regulation of cash transfers. Attribute: HUCB.

HUAF 5030. Humanitarian Logistics. (0 to 2 Credits)
Logistics is one of the most critical components to successful humanitarian assistance. Delivering the right assistance to the right beneficiaries at the right time requires both skills and an understanding of the supply chain. Logisticians must continually add to their knowledge and learn the latest best practices in the field. This course will explain logistics, explore the ways that logistics can affect humanitarian support, and give students an opportunity to analyze case studies and develop methods for improving delivery of support.
HUAF 5031. Community Participation. (0 to 2 Credits)
The humanitarian aid community must cooperate with the national authorities to build or rehabilitate the basic infrastructure needed for access, shelter and the provision of life sustaining services. This work often has to be carried out on an emergency basis in far from ideal circumstances. This course will provide advanced knowledge of the technical requirements for the infrastructure needed in humanitarian emergencies. Students will be exposed to vital managerial decisions they must consider as they supervise teams of technical experts. Following the implementation of immediate infrastructure needs there remains the responsibility of humanitarian agencies to provide a range of basic services until such time as either the service is no longer required, the population has returned to its place of origin or the governmental agencies have the means and manpower to provide the services. This phase is often known as ‘care and maintenance’. Students will have a clear understanding of the implications of these ‘open ended commitments’ to a population and potential exit strategies.

Attribute: URS.

HUAF 5035. Forced Migration: The Humanitarian Challenge of the Decade. (0 to 3 Credits)
Millions of people worldwide have been forcibly displaced across countries and continents for a wide range of reasons, including armed conflict and natural disasters. Some have become refugees or Internally Displaced Persons (IDPs), while others live as irregular migrants. Some have been trafficked and live as victims of modern slavery. All find their futures dependent on political decisions and local perceptions driven by the media. This course will equip students to understand the complexity of forced migration and its relevant legal and protection framework, including International Refugee Law and the Guiding Principles on Internal Displacement. It will also address recent developments and the shift in emphasis from solving the problem of forced migration to the provision of durable solutions. This course is recommended for students who are interested in forced migration or who may wish to work in the areas of protection and response to affected populations. It is also recommended for humanitarian practitioners who are already working in this field and want to improve their knowledge and understanding of these complex issues.

Attribute: HUHR.

HUAF 5040. Communications and Media in Humanitarian Affairs. (0 to 2 Credits)
This course examines the history of representation of humanitarian crisis, and considers the impact of media accounts on the potential for humanitarian action. The role of photojournalism, and the images and narratives of broadcast and press reporting will be evaluated in the context of humanitarian goals and necessities. The dynamics between depiction and public perception, image and empathy, and narratives of compassion and inclusion will be articulated within the larger context of global security and human rights. As conflict, suffering and issue of life and death remain significant global realities, this course details the conditions, practices, messages, obligations, ethics, and limits of telling the stories of those in crisis.

Attribute: IHUA.

HUAF 5045. Humanitarian Advocacy: Communicating the Need and Motivating the Response. (0 to 3 Credits)
Humanitarians work in hostile environments where people are struggling for survival in situations of armed conflict or natural disasters. In such environments, people may have been forced to flee their homes with few—if any—belongings and may have suffered or witnessed human rights violations. Their plight needs to be communicated to the world in a way that will motivate the deployment of the protection and aid they so desperately need. This course will prepare students for the task of advocacy in humanitarian environments. It will focus on the identification of the most vulnerable members of a large group of survivors and the communication of their needs. It will equip students with the skills required to effectively communicate with local authorities as well as the international donor community. Students will learn to write in a different way than the academic style expected in other courses, focusing on effective advocacy messaging. This course is recommended for students who may envision working directly in advocacy for responding to humanitarian needs. It is also recommended for humanitarian practitioners who wish to prepare for a role in advocacy or are already working in this area.

Attribute: HUCB.

HUAF 5055. Human Rights and Human Crises. (0 to 2 Credits)
The course is designed to give students a comprehensive understanding of the foundations and principles of human rights and humanitarian law. Through specific case studies, students will be able to understand the legal aspects involved in humanitarian work, and will provide students with more confidence in their legal abilities when providing humanitarian aid.

Attribute: IHUA.

HUAF 5060. Disaster Management. (0 to 2 Credits)
The course prepares aid workers for the challenges and difficulties associated with both natural and man-made disasters. Students will study past disasters as well as current disaster management techniques and trends toward potential future disasters. After completing this course, students will have a more complete understanding of the different tools and techniques used to respond to crises.

Attribute: IHUA.

HUAF 5070. Leadership & Management in HA. (0 to 2 Credits)
Despite humanitarian agencies’ not-for-profit status, they must be managed and administrated on sound business principles. Students learn the managerial methods and skills required to become senior managers and directors of humanitarian organizations.

HUAF 5075. Leadership & Management in Humanitarian Assistance. (0 to 3 Credits)
When responding to humanitarian emergencies, managers need the right skills to work in exceptional, rapidly changing, and sometimes dangerous situations. While some conventional techniques may be employed, having skills that take into account the environment and the emotional impact of emergencies on teams and individuals is crucial. This course will teach students the skills required to manage teams responding to humanitarian crises. For students planning to work in such environments, it is recommended that they reflect on whether they envisage being in leadership roles or might need to understand the role of those under whose management they will work. The course is also recommended for humanitarian practitioners at all levels who want to improve their leadership and management skills.

Attribute: HULI.
HUAF 5080. Accountability in Hum Act. (0 to 2 Credits)
This course will explore the concept of accountability within humanitarian intervention. In particular, it will look at the contemporary significance of accountability and what specific events have led to a shift from donors and recipients of aid as the agents of accountability.

HUAF 5081. Holding Humanitarian Responders Accountable. (0 to 2 Credits)
The ability to handle external relations successfully has a growing impact—particularly at higher levels of management—on the ability of organizations to deliver humanitarian assistance. In this course, students are given the knowledge and skills to respond to the various external relationships that enable humanitarian agencies to operate successfully in a competitive and often hostile environment. Through case studies, the course teaches techniques for dealing with politically motivated and highly stressed interlocutors.

HUAF 5085. Delivering Humanitarian Response in Dangerous Situations. (0 to 3 Credits)
This course is designed to prepare humanitarians—individual practitioners, managers, and security staff—to work in high-risk environments. Students completing this course will be able to identify the most common security threats and trends in these risks, allowing them to be proactive in reducing their exposure. They will understand the organizational duty of care, learn how to develop compliant security plans, and conduct a security risk assessment. The concept of acceptable risk will be presented, as will the idea of balancing security risk with program delivery. Upon gaining an understanding of security planning, students will be introduced to techniques for critical incident management to reduce the impact of such events. In the final module, students will be taught how to better protect themselves during high-risk events to increase their chance of survival.

HUAF 5090. Ethics of Humanitarian Assistance. (0 to 2 Credits)
Humanitarian aid professionals are confronted with ethical questions in every area of their work. This course will explore these ethical questions, examine alternative ethical grounds for action, and seek to provide humanitarian professionals with a framework for evaluating practical ethical issues that arise, especially through past and current case studies.

HUAF 5095. Strategic Issues in Humanitarian Action. (0 to 2 Credits)
The theory and practice of humanitarianism continuously evolves in response to changes in the international political and economic environment and ongoing evaluation of humanitarian efforts. This course explores humanitarian affairs throughout the past century as a base for evaluating recent developments that will play a vital role in shaping humanitarian action in the future. High-level representatives from the political, international, military, religious, medical, legal and academic sectors contribute to lectures and discussions. Students discuss and develop strategies for responding to and mitigating complex emergencies.

HUAF 5100. Civil Military Cooperation. (0 to 2 Credits)
This course will give students an understanding of the practical workings, opportunities and constraints involved in the cooperation between the military and humanitarian organizations in the delivery of humanitarian assistance. The course begins with the study of the legal, political and structural bases for Civil Military Cooperation which is focused on the practical, rather than the theoretical application. Faculty and students will have the opportunity to share their experience of working in Civil Military situations and the teaching part of the course will culminate in a series of case studies in which the actual working of Civil Military Cooperation in a wide range of types of military deployments will be compared. Students will participate in a half day simulation exercise in which they will gain experience in the outworking of a Civil Military Cooperation in the context of a prepared scenario.
Attribute: IHUA.

HUAF 5150. Mental Health in Complex Emergencies. (0 to 2 Credits)
This is a 12-day training course for mental health professionals and program staff who wish to establish mental health or psychosocial programs in a humanitarian context within conflict and post-conflict areas. The course will aim to provide a practical orientation and training, including how to conduct rapid assessments, designing and setting up mental health services or psychosocial programs (exploring the differences between them), clinical work and therapeutic approaches in non-western contexts. It addresses the issues of cultural validity, conflict resolution and negotiation, taking care of oneself and dealing with burnout. The course will also introduce potential field workers to essentials such as personal security, logistics, and practical aspects of humanitarian work in the field.
Attribute: IHUA.

HUAF 5155. Education in Emergencies. (0 to 2 Credits)
30 million children live in conflict-affected countries. The program looks at the design and implementation of education projects from the emergency phase to post conflict situations, with a special emphasis on the mechanisms required to improve the quality of education during and after humanitarian crises.
Attribute: IHUA.

HUAF 5160. Urban Disaster, Vulnerability and Displacement: Humanitarian Action and Response. (0 to 2 Credits)
Explores global urbanization trends and the challenges created by urban disasters. The course focuses on the hurdles faced by vulnerable and displaced populations in cities and urban settlements and examines how the humanitarian community can better respond to man-made and natural disasters in both formal and informal urban settings. Discussion and debate with experts on urban disaster and populations at risk. Emphasis on humanitarian best practices and potential opportunities to increase resiliency and sustainability in complex urban settlements.
Attribute: IHUA.

HUAF 5200. Protection for Vulnerable Populations. (3 Credits)
This course will provide students with a comprehensive introduction to international practices and norms concerning the protection of vulnerable populations in humanitarian emergencies. The past 20 years of international humanitarian interventions has given rise to standardization of humanitarian activities, with a particular emphasis on protection practices. Students will gain an understanding of the landscape of organizations and entities involved in designing these frameworks and assess their efficacy and continued relevance to protecting vulnerable groups.
Attribute: HUHR.
HUAF 5210. Access to Education During Crisis and Conflict. (3 Credits)
This course will provide students with an introduction to the growing field of education in emergencies. With as many as 40 million children living in countries affected by crisis and conflict it has become increasingly important for humanitarian practitioners to understand the complexities of planning and implementing educational programming in these settings. Building on the theoretical frameworks covered in the course, students will evaluate the relationship between education, international development and humanitarian aid through the use of theoretical texts and case studies from around the globe.
Attribute: HUHR.

HUAF 5300. International Responses to Migration. (3 Credits)
This course will provide students with an enhanced awareness and understanding of the complex interaction between migration and humanitarian interventions from the point of view of the migrant, national authorities, and the international humanitarian community. With the crisis in the MENA region, particularly in Syria, and the mass migration to southern Europe it is imperative for students to understand the different motivations and determinants of action from regional (EU), national and local stakeholders as well as the diverse circumstances of the migrating populations. Students will be encouraged to critique the influence and motivations of mass and social media on the understanding of the economic, political, legal, and cultural factors of migration.
Attribute: HULI.

HUAF 5310. Urban Disasters and Displacement. (3 Credits)
This course will provide an overview of global urbanization trends and explore the challenges created by urban disasters, particularly in areas that receive a high number of displaced and unregistered populations. Students will analyze the current humanitarian response within these urban settings, while discussing existing best practices and potential opportunities to increase the resilience of affected communities in both form and informal urban settlements.
Attribute: HULI.

HUAF 5400. Disaster Risk Reduction. (3 Credits)
This course will provide students with a comprehensive overview of the phases of humanitarian action in order to understand strategies for disaster risk reduction (DRR). Emphasis will be placed on the multifaceted nature of disasters and complex emergencies and the need for community participation as well as the need for local, regional and international coordination. Students will be introduced to and encouraged to critique both current DRR guidelines and the implementation of past guidelines as well as recognize the sources of organized best practices.
Attribute: HUCB.

HUAF 5410. Gender Integration in Humanitarian Action. (3 Credits)
This course will introduce students to the myriad ways in which gender impacts the experience of both the humanitarian crises and subsequent intervention. Students will explore the legal, political, cultural, and economic frameworks that contribute to gender inequality as well as those that provide support for vulnerable groups. Emphasis will be placed on the tension between international guidelines/norms, program implementation, and unanticipated consequences of gender programming.
Attribute: HUCB.

HUAF 5500. Mental Health in Complex Emergencies. (0 to 3 Credits)
Over the past several years, the IIHA has run a popular 12-day course largely for mental health professionals. We will now be offering a distance learning course covering similar materials over a 15-week semester. This is a training course for mental health professionals and program staff who wish to establish mental health or psychosocial programs in a humanitarian context within conflict and post-conflict areas. This course is also open to Fordham graduate students in humanitarian studies or other relevant disciplines. It will aim to provide practical orientation and training, including how to conduct rapid assessments, designing and setting up mental health services or psychosocial programs (exploring the differences between them), and clinical work and therapeutic approaches in non-Western contexts. It will address the issues of cultural validity, conflict resolution and negotiation, taking care of oneself and dealing with burnout. This course will also introduce potential field workers to essentials such as personal security, logistics, and practical aspects of humanitarian work in the field.
Attribute: HUCB.

HUAF 5601. Humanitarian Internship. (1 to 3 Credits)
Students will have an opportunity to intern at prominent international humanitarian organizations, helping them gain the necessary exposure and understanding of the dynamics of such organizations and their mission. Our location enables students to pursue internships at and exposure to various United Nations agencies, diplomatic missions, international nongovernmental organizations, and prominent research and think-tank institutions. Students will complete an internship tutorial that matches their concentration area.

HUAF 5990. Master's Thesis Research I. (2 Credits)
This project is the culminating demonstration of the knowledge and skill gained throughout the MIHA coursework. The thesis will focus on practical examples of past mistakes, contributing possible solutions to the existing literature. The research methods necessary to writing the thesis are taught within the context of each module. Thesis projects should incorporate learning from previous MIHA courses, followed by final editing, defense and approval.

HUAF 5991. Master's Thesis Research II. (2 Credits)
This project is the culminating demonstration of the knowledge and skill gained throughout the MIHA coursework. The thesis will focus on practical examples of past mistakes, contributing possible solutions to the existing literature. The research methods necessary to writing that thesis are taught within the context of each module. Thesis projects should incorporate learning from previous MIHA courses, followed by final editing, defense and approval.

HUAF 5992. MSHS Thesis. (2 Credits)
In order to successfully complete the M.S. in Humanitarian Studies, students will be expected to synthesize the cumulative knowledge gained from their coursework, additional research, and internship experience (if appropriate) to write an original, substantive, and academic final thesis. The subject will be agreed upon between the student and their faculty advisor in conjunction with a humanitarian aid professional recognized by the Institute for Humanitarian Affairs.
HUAF 6000. International Diploma in Humanitarian Assistance. (0 Credits)

HUAF 6020. Int Emergency Relief. (3 Credits)
The course will be centered on presenting, discussing and reflecting on the main issues faced by the humanitarian community, examining these issues from a multi-disciplinary approach, finding new and creative answers and recommending practical tools to improve the effectiveness of humanitarian action. The meaning, methodological challenges, and ethical dilemmas of humanitarian action will be cross themes of the course so that by the end of the program, the students should have: An understanding of the main challenges and dilemmas facing the international humanitarian community through its practice in the field. A comprehensive knowledge of the history of the humanitarian practice, its main actors, and terms-relations in place to configure the landscape of the complexity around this profession. A creative approach to discover the relationship between humanitarian response and the long-term development perspective. An appreciation of the complexity of this human reality in a specific case study. The ability to identify the main ethical dilemmas faced by any humanitarian response.

HUAF 6030. Humanitarian Innovation. (0 to 2 Credits)
This course offers an in depth analysis of the strategic processes governing data and innovation strategies in modern humanitarian organizations, the first course of this kind in New York City. The course will introduce participants to a comprehensive understanding of how to select and adopt tools, strategies and techniques for data and innovation management. Topics covered include innovation portfolio creation and management, date management and processing, data ethics, real time data analytics, humanitarian technology design, and integration of GIS systems in project implementation. Participants will develop the core skills required by modern humanitarian organizations to be competitive and effective even if compared to corporate standards.

HUAF 8999. Independent Study. (1 to 3 Credits)
This is a graduate tutorial/independent study registration for humanitarian studies.

HUAF MTNC. IHA Maintenance of Matriculation. (0 Credits)
Students must maintain continuous registration throughout their studies in the graduate program. International Humanitarian Action students working toward the Master of Arts Degree are to use this registration during each semester when not participating in module.

Humanitarian Studies (HUST)

HUST 3001. Humanitarian Action Workshop. (1 Credit)
Fordham University, in coordination with the Institute of International Humanitarian Affairs (IIHA), conducted the First National Workshop of the Jesuit Universities Humanitarian Action Network (JUHAN) this summer. Approximately 160 Undergraduate students from 20 member Institutions of the Association of Jesuit Colleges and Universities (AJCU) attended this Workshop to broaden their knowledge and understanding on global humanitarian initiatives and the challenges it faces. The three-day Workshop consisted of a main plenary session each day focusing on contemporary topics followed by breakout sessions where students were given an opportunity to attend lectures on cross-cutting and sectorial issues as well as participate in sessions to develop their skills required to be effective in this field. On the final day of the conference, the students met in teams to utilize the knowledge they gained from the workshop and draw an action plan on what initiatives/projects they would implement on their home campuses. The Academic Director of the Institute will meet with the Fordham delegation periodically in the Fall semester to help implement the proposed action plans.

HUST 3500. Famine, Food Security, and Nutrition. (4 Credits)
Increasing global inequality, the effects of climate change, violent conflict and many other factors mean that currently almost forty million people worldwide are in need of food assistance. Starvation and hunger are vast and complex global issues with medical, political and moral importance. This course will examine the wide range of humanitarian attempts to help people suffering from food and nutrition crises, from individual clinical interventions to treat childhood starvation, through to regional attempts to predict the timing and severity of famines and respond to them, and innovative approaches like cash transfer schemes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: HUST 4001.

HUST 4001. The Humanitarian System: Past, Present, and Future. (4 Credits)
In this course, students will consider both theoretical and applied approaches to humanitarian action. The course will be centered on ways of thinking and actions that bridge these two responses. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN, MEST, PJCR, PJST, SOIN, URST.

HUST 4002. International Humanitarian Action and New York City. (4 Credits)
Fordham has long been a world leader in the academic study of humanitarianism and in professionalizing aid work. This course examines international responses to humanitarian crises. We explore the range of actors in emergencies, including faith based organizations, secular international NGOs, United Nations agencies and more. We will examine their motives, capabilities and histories using case studies of the various problems to which they respond: violence, genocide, famine, and displacement and human rights abuses. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HUST 4100. Refugee and Asylum Law. (4 Credits)
This course will examine the evolution of international law governing refugees and asylees from the establishment of the United Nations to the present, and the forms of relief available to refugees and asylees, both immediate and long term. This course will also examine the national responses to the influx of refugees and asylum seekers in four specific countries to be used as case studies: Australia, Hungary, Sweden, and the United States. Legal remedies often reflect the mores and values of nations; accordingly, we will explore the moral and ethical questions presented by the migration policies and asylum law systems of the countries to be studied, including the practice of mandatory and remote detention, extraterritorial adjudication, safe third-country agreements, and the attendant violations of civil and human rights. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: HPSE.
HUST 4200. Forced Migration and Humanitarian Action. (4 Credits)
Forced migration is a central issue in the provision of humanitarian and assistance. This course will examine the causes of forced migration, including violent conflict, natural disasters, development projects, human trafficking and others, and will use a variety of case studies to examine international responses to forced migration, the migrant experience, legal and human rights around migration, and the role of human agencies and NGOs in responding to forced migration. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: HPSE, INST, ISIN, LAHA, LALS, PJCR, PJST.

HUST 4300. Gender-Based Violence in Humanitarian Settings. (4 Credits)
In this course students will examine the myriad causes and consequences of gender-based violence (GBV) in humanitarian settings through legal, historical, political, social, and economic lenses at the national and international levels. GBV is a well-documented public health and human rights issue that is underresourced and poorly responded to in most countries across the globe. In crisis settings, existing systems for physical and social protection are further destabilized or destroyed; we will examine existing international guidelines and identify programming that has sought to address GBV and intervene in GBV in humanitarian settings. This course will use a range of case studies and will emphasize the perspectives of affected populations. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attribute: HCWL.

HUST 4500. Evolution of Development and Humanitarian Aid Systems. (4 Credits)
This course digs deeply into the political economy, politics, infrastructure, design, incentives, and dilemmas related to the current international development and humanitarian aid system. Blending both practitioner and theoretical perspectives, this course takes a critical approach to the evolution of aid systems, with reflection on historical and economic context, interests and motivations, and perceptions of success and failure, among other topics. There is special emphasis on the perspectives and vantage points of affected populations. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: INST, ISIN, SOIN. 
Prerequisite: HUST 4001.

HUST 4501. Humanitarianism and Global Health: Unequal Access for the Displaced and Marginalized. (4 Credits) 
This course will examine the greater impact of global health crises on marginalized groups—conflict affected, displaced, women, the elderly and LGBTQ communities. Exploring through case studies the way international actors—including development institutions, UN agencies, states, private companies, foundations and humanitarian actors—respond to health crises. Trauma, epidemics disease, access to food, gender and human rights will be topics of concern. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: ENST, ESEL, HPSE, INST, ISIN.

HUST 4800. International Humanitarian Internship. (4 Credits)
The Undergraduate course on Humanitarian Action: Theory and Application offers an introduction to humanitarian aid work and provides an understanding of the complexities and challenges the key actors face in an applied context. The course focuses on teaching the common principles of the world of humanitarian affairs, with a cross-cutting, interdisciplinary perspective that also analyzes gender, age differences, human rights frameworks, and indigenous cultural approaches to conflict and post-conflict phenomena. In addition to these teach topics, students will have an opportunity to intern at prominent international humanitarian organizations in New York. These would help them gain the necessary exposure and understanding of the dynamics of such organizations and their mission. Students would be required to meet with, and relate their experiences with the professor periodically and be mentored on how best to utilize the skills they gain to further advance their interests in humanitarian aid work. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: INST, ISIN, SOIN. 
Prerequisites: HUST 4001 and HUST 4500.

HUST 4801. Summer Humanitarian Internship. (1 Credit)
This course offers students the opportunity to reflect on internship with an international humanitarian on intergovernmental organization in New York City.

HUST 4888. Senior Thesis Seminar. (4 Credits)
The seminar is designed to assist Humanitarian Studies Major students through the main stages of their thesis: formulating appropriate questions; undertaking effective research to answer those questions; organizing, analyzing and communicating findings and arguments. The seminar is a single-semester course, taken in students’ senior year. The students will meet weekly to discuss problems of common interest under the guidance of faculty members from a variety of disciplines drawn from the major committee. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attribute: SOIN. 
Prerequisites: HUST 4001 and HUST 4500.

HUST 4999. Tutorial. (1 to 4 Credits)

HUST 5010. Humanitarian Negotiation. (3 Credits)
Many humanitarian aid professionals believe that negotiation is perhaps the activity in which they spend most time both in field and headquarters situations. Almost everything that humanitarian workers need to achieve has to be negotiated with donors, host governments, local structures, communities, beneficiaries, other humanitarian agencies and their own staff. This course gives students an understanding of negotiation theory together with practical historical and current applications. All types of negotiation are examined, from road blocks and negotiations in situ for access to negotiations for peace agreements far from the conflict. Theoretical lectures will be supported with group scenario based exercises.

Independent Study (UG) (INDP)

INDP 1800. Internship. (1 Credit) 
Internship.
Independent Study Law (INGL)

**INDP 2999. Tutorial. (2 Credits)**
**INDP 3800. Internship. (3 Credits)**
**INDP 4800. Internship. (1 to 4 Credits)**
**INDP 4999. Tutorial. (0.5 to 6 Credits)**

**Independent Study Law (INGL)**

**INGL 0001. IDEAL Placement Seminar. (0 Credits)**
**INGL 00S1. Pathway 2: 1st Semester. (0 Credits)**
**INGL 00S2. Pathway 2: 2nd Semester. (0 Credits)**
**INGL 00S6. Pathway 2 (6). (0 Credits)**
**INGL 0101. Independent Study. (1 Credit)**
**INGL 0102. Independent Study - 2 Cr.. (2 Credits)**
**INGL 0103. Independent Study - 3 Cr.. (3 Credits)**
**INGL 0199. Semester Abroad: SKKU Korea. (12 Credits)**
**INGL 0202. Perspectives on Doctrinal Analysis. (2 Credits)**
This course surveys core U.S. legal doctrine in key areas tested on the Uniform Bar Exam (UBE) which will be administered in New York starting in July of 2016. Core subjects will be reviewed and analyzed and then serve as the foundation for practical application on all components (MBE, MEE, and MPT) of the UBE. Periodic exams throughout the semester and a final exam test students’ knowledge and skills toward success on the UBE. This is a graded, two credit course intended for graduating students who wish to jump start their bar exam preparation. It is not a substitute for a full bar review course. If you have additional questions, please contact Cynthia Juco in the Office of Student Affairs: cjuco@fordham.edu.
**Attribute:** JD.

**INGL 0206. Semester Abroad - Comillas. (12 Credits)**
**INGL 0250. SJD Dissertation Development I. (10 Credits)**
**INGL 0252. SJD Dissertation Development II. (10 Credits)**
**INGL 0253. SJD Dissertation Development III. (10 Credits)**
**INGL 0254. SJD Dissertation Development IV. (10 Credits)**
**INGL 0300. Graduate Thesis. (3 Credits)**
**INGL 0302. SJD Colloquium. (1 to 2 Credits)**
The S.J.D. Colloquium, required for all doctoral candidates in residence, will consist of a series of in-person workshops. During each class, upper-level candidate will lead a class on a topic related to his or her dissertation. Each candidate will select, assign, and present readings, leading a discussion about the topic that will include all students in the class.
**Attribute:** LLM.

**INGL 0311. Fashion Law Capstone/Thesis. (3 Credits)**
Students must seek approval from Anthony Agolia or Pamela A. Golkin-Moro in order to register for this course.
**Attributes:** FASL, LAWF.

**INGL 0312. Compliance Capstone: Building Effective Ethics & Compliance Programs. (1 or 3 Credits)**
In this course, students will complete a substantial paper or project, under the close supervision of the course instructor, on the design and implementation of effective ethics and compliance programs. The paper/project is an opportunity to synthesize and apply the learnings from companion course [CRN 42615] and prior compliance courses, and strengthen the analytical, organizational and leadership skills that are needed to be a successful compliance officer.
**Attributes:** CORC, LLM.

**INGL 0601. SJD Dissertation Research I. (8 Credits)**
**INGL 0615. Quantitative Methods for Graduate Students. (1 Credit)**
Quantitative Methods for Graduate Students introduces basic financial concepts and general quantitative reasoning skills that lawyers and compliance officers and other professionals should possess. The course will be required for all LLM students in their first semester of enrollment. Please email Professor Dowd and Gottlieb your resumes and cover letters explaining your post graduation employment plans and if you plan to search for employment, what kind of job you intend to look for? 
**Attribute:** LLM.

Information Systems (Gabelli Graduate) (ISGB)

ISGB 6910. Business Tech & Analytics. (3 Credits)
FT MBA CORE/ PMBA FLEX CORE COURSE (Formerly 'Business IT')
This course focuses on applied tech and analytics skills for business managers/leaders, and strategic use of digital technologies in business. It will help students meet two objectives: (1) Make effective business decisions involving digital technologies and data; (2) Build essential hands-on software skills. We will use and demo a number of hands-on tools useful for managers and business leaders. Students will analyze case studies and will learn to become valuable participants in business decisions involving digital technologies. They will learn how to evaluate business applications, propose digital innovation ideas and work on a semester-long project to make data-driven decisions or develop a proposal/prototype for a company. Topics include enterprise applications, systems development processes, data management, data visualization, data mining, web analytics, IT for competitive advantage, e-commerce, creating a web presence, network effects and platform strategies, digital business models, digital innovation foundations & tech trends, cloud strategies, mobile commerce, social business technologies, adtech and cybersecurity. The course emphasizes active learning and a global perspective, informed by industry speakers from the vibrant NYC tech ecosystem. (This is an MBA core course, and a recommended course for other MS students interested in an introduction to business tech and analytics).
Attributes: BUAN, ISEL.

ISGB 7811. Info Systems - Internship. (1 to 3 Credits)
ISGB 7901. E Business Strategies & Appl. (3 Credits)

This course introduces students to concepts, issues, technologies and trends essential to conducting business in the Internet-based digital economy. The main question answered is: How do you create a successful web presence for your company? The course emphasizes marketing aspect of e-business and hands-on skills on building effective business websites. The course reviews common e-business models (e.g., e-tailing, digital content, digital social media, etc) and applications such as web-based customer relationship management (CRM) and e-procurement. It addresses search engines, web analytics & metrics and discuss cutting-edge issues including e-retailing, content providers, Internet advertising technologies, e-payment systems, regulatory & tax issues, security & privacy concerns and mobile commerce. This course has a global focus through case studies in a variety of business sectors, including retailing, financial services, information services and global e-commerce. Hands-on skills include use of HTML, CSS, Javascript, WordPress, and other related technologies and platforms. In a group project, students will propose an e-commerce business strategy and create a website to implement it.
Attributes: ABEB, ABEF, ABIB, ISDB.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

Updated: 07-27-2020
ISGB 7902. System Analysis & Design. (3 Credits)
(Formerly Systems Development) Companies launch systems development projects when they seek to develop new digitally-enabled services or to solve a multitude of business problems, such as inefficient business processes, poor information sharing etc. This course provides a comprehensive and up-to-date coverage of systems analysis and design and related systems development and software engineering issues in business. This course emphasizes technical skills, managerial skills, approaches, software tools, challenges, opportunities, and success factors in systems development within global companies and startups. Topics include: systems development lifecycle, agile development, open source and global development, capturing and managing system requirements, data and process modeling using the Unified Modeling Language (UML) standard, architectural and detailed design, testing and quality assurance, redesigning and optimizing business processes using cutting-edge BPM methods and software tools. The course addresses both the traditional (structured) and object-oriented approaches to systems development. It teaches the language that connects IT with business units, and cultivates essential skills for IS professionals and other business managers involved in developing new IT business solutions. Hands-on skills acquired include modeling using UML and structured methods, Microsoft’s Visio, IBM’s Rational Suite and IBM’s BPM software and other cloud-based or open-source modeling and development tools and platforms.
Attributes: ABFI, BUAN.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7905. Web Applications Development. (3 Credits)
(Formerly Web Technologies and E-Business Applications) Begins with a brief review of e-business models and applications, such as online purchasing, customer relationship management, electronic marketplaces, application service providers, supply chains, enterprise resource planning and enterprise portals. Studies enabling technologies, such as Web, XML, Semantic Web, HTML, wireless web and XML web services. Also discusses web-based platforms for e-commerce, B2B trade and mobile applications. Reviews emerging XML standards, such as ebXML, RosettaNet and Biztalk, and web-based platforms, including Dot Net and J2EE. Students experience the systems development lifecycle while developing a website to meet business requirements and review real-life examples and case studies.
Attributes: ABEB, ABEP, ISEA.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7910. Info Systems Strategy & Mgmt. (3 Credits)
Focuses on issues of aligning business and technology strategies. Addresses how IT supports business strategy and business processes, the role of the CIO, systems integration, outsourcing, the value of IT, selection of technologies IT strategy and infrastructure, dealing with emerging technologies and organizational issues surrounding technology implementations. This is the Information Systems area capstone course.
Attributes: ABGS, ABIB, BUAN.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7922. Healthcare IT. (3 Credits)
This course introduces students to the subject of health information technology (HIT) and describes the organizational context surrounding the implementation, use, and management of HIT. Students examine the concepts, applications, and strategies of HIT. Key concepts include the role of HIT in enabling quality, safety, and efficiency of health care delivery. The course also surveys the various types of HIT, including electronic health records, clinical decision support systems, master patient indexes, analytics, and telemedicine, among others. The organizational issues of user acceptance, value measurement, alignment, workflow analysis, and management are discussed. And contemporary developments—including the trend toward service-oriented architectures/web services and meaningful use—are highlighted. The key challenges of security, privacy, and compliance with regulations are also examined.
Attributes: ABHM, BUAN, ISEA, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7924. Mobile E-Commerce and Apps. (3 Credits)
Roughly two-thirds if the world’s population participates in the new mobile economy. Leveraging the mobile marketplace requires a conceptual understanding of mobile-commerce as well as the practical skills needed to create the next generation of wireless enabled goods and services. This course will provide both, using a combination of global case studies and hands-on experience in building mobile applications for handheld devices.
Attributes: ABEB, ABER BUAN, ISDB, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7932. Accounting Info System. (3 Credits)
The purpose of this course is to introduce students to the subject of computer-based accounting information systems. The four critical objectives are a sound understanding in business processes, transaction cycles, internal controls and the systems components of each.
Attributes: BUAN, ISEL, ISER.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7933. Audit Data Analytics. (3 Credits)
Introduces audit and accounting students to data analytics foundations, methods and tools. It reviews industry applications and trends. Students will do hands-on projects analyzing audit and other accounting data.
Attributes: BUAN, GB02, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7934. Artificial Intelligence. (3 Credits)
The goal of this course is to acquaint you with the objectives and methods of researchers and practitioners in Artificial Intelligence. We will explore numerous aspects of computational models of intelligence including search and problem solving, planning, machine learning, logic and reasoning, machine perception and robotics, natural-language processing, speech recognition, vision, and cognitive science. We'll also discuss genetic algorithms, fuzzy logic and deep machine learning including neural networks. The ethics of Artificial Intelligence is also addressed. The course is organized as a survey, with hands-on assignments in open source artificial intelligence tools.
Attributes: BUAN, GB02, ISEL.
Prerequisites: BYGB 7967 or ISGB 7967 and BYGB 7977 or ISGB 7977 and BYGB 7990 or ISGB 7990.
ISGB 7942. Optimization Models in Bus. (3 Credits)
Optimization models seek to find the best decisions given a set of constraints. Applications are in diverse areas of business, including finance, logistics and marketing. The course will introduce different kinds of models, including network, linear programming, mixed-integer programming, and non-linear programming, and demonstrate their use in different areas of business. Students will learn how to use optimization software, including solvers and modeling languages.
Attributes: BUAN, ISEL.

ISGB 7943. Programming with Python. (3 Credits)
Do you want to be able to solve business problems through programming/coding? This course introduces key programming concepts, techniques and tools. Students will learn programming/coding using the widely used Python programming language.
Attributes: ABEP, ABFI, BUAN, GB01, ISEL.

ISGB 7944. Sports Analytics. (3 Credits)
Sports businesses achieve superior performance and gain competitive advantage by leveraging data and analytics. The course explores technologies, tools and analytics projects in Sports business.
Attributes: BUAN, GB02, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7945. IT and Sustainability. (3 Credits)
(Formerly Business Design Through IT). This course discusses the transformative role of information and communication technologies (ICTs) in enabling sustainability. ICTs’ effect on sustainability dimensions are felt at both the macro, societal level, as well as at the business level. These include ICTs’ positive impact on development, education, environment, health care, power, transportation, and others. Simultaneously, ICTs themselves are subject to sustainability practices, for example, green computing. Additional topics include the design of smart cities, digital divide, the knowledge society, rebound effects, governance, and world development indicators. Students working in groups will analyze several contemporary cases from a global perspective and also develop an IT-based sustainability plan.
Attributes: ABEB, ABFI, ABGS, ISDB, SOIN.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7955. Project Management. (3 Credits)
Provides the skills project managers need to complete projects on time and on budget. Technology improvements in organizations are implemented through projects, and strong project management skills are a key success factor for companies to achieve the expected benefits from their technology investments. Topics include setting and maintaining project scope, developing work plans, estimating required resources, developing work programs, organizing project teams, super-users, monitoring and controlling projects, maintaining relationships with users and management, status reporting and key factors for realizing the anticipated benefits from the investment. Students use a computer-based project management tool as part of this course.
Attributes: BUAN, ISEA.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7947. Data Mining for Business. (3 Credits)
Discusses data mining techniques and their use in strategic business decision making. A hands-on course that provides an understanding of the key methods of data visualization, exploration, association, classification, prediction, time series forecasting, clustering, induction techniques, neural networks, and other methods. Students work in teams on solving a business problem of their choice, using data mining tools and applying them to real data.
Attributes: ABFI, ASDM, GB01.
Prerequisites: ISGB 6910 (may be taken concurrently) or GBA Waiver Information Systems with a score of 070.

ISGB 7973. Database Management. (3 Credits)
Covers the basics of database management, a critical element of all IT organizations. Databases are the foundation for operational/transaction systems and for management decision-making. Topics include types of databases and the database environment, database analysis and data modeling, database design with relational models, implementation issues such as SQL, data administration, the Internet database environment and distributed databases.
Attributes: ABFI, GB02, ISEA.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7975. Business Analytics for Managers. (3 Credits)
Introduces the concepts of business analytics and such related concepts and techniques as business intelligence, data analytics, data warehousing, data-mining and online analytical processing (OLAP). The course explores the process, contents, and context of managerial decision-making and looks at how business analytics can help in improving management decision-support effectiveness in the various functional areas of business such as marketing, finance and manufacturing. Managers in general—not just IT professionals—stand to gain from the discussion. Students gain hands-on experience in the use of a comprehensive set of Business Intelligence (BI) tools.
Attributes: ASDM, GB01, ISBA, ISEA, ISEL, ISET.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7977. Text Analytics. (3 Credits)
The course introduces the concepts of text analytics, unstructured information analysis and management for better decision making by deriving valuable insights from your enterprise content regardless of source or format. It allows deep, rich text analysis of information. Content analytics can help organizations surface undetected problems, fix content-centric process inefficiencies, improve customer service and corporate accountability, reduce operating costs and risks and discover new revenue opportunities. Student groups will implement a comprehensive content analytic project (SPSS Text Analytics/Content Analytics 2.0/UIMA).
Attributes: ABFI, ISBA, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.
ISGB 7978. Web Analytics. (3 Credits)
Web analytics—also referred to as Web metrics, e-Metrics, or e-analytics—is the science of Internet audience measurement and analysis. It deals with the identification, gathering & formatting of Web usage data, the computation and presentation of metrics, and the exploitation of the results, in order to measure web site success. Meaningful insight is gained from traffic and visitor analytics data. It not only covers the unique measurement challenges associated with segmentation, but also comes with strategic recommendations for focusing the entire analytics process - from where to begin to what your larger, overall web analytics goals should be (Google Analytics, IBM ShowCase Web Analysis).
Attributes: ABEB, ABEP, GB02, ISBA, ISDB, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7980. Bus Modeling w/Adv Sprdsheets. (3 Credits)
Covers the vital role of advanced spreadsheet methods in business modeling and decision-support. Students learn to build and analyze decision-making models using a spreadsheet package (Excel), with extensive hands-on use of the package and add-ins. Students model and solve representative practical problems covering key business functions such as accounting and finance, sales and marketing, management and operations and human resources. Topics include various advanced spreadsheet functions, "what-if" analysis, list and data management tools, Solver and sensitivity analysis, simulation and forecasting models. A basic understanding of Microsoft Excel is required for this course.
Attributes: BUAN, GB02, ISBA, ISEL.

ISGB 7985. Data Warehousing. (3 Credits)
Provides an advanced, comprehensive overview of data warehousing along with in-depth discussion of critical issues in planning, design, deployment and ongoing maintenance. Students gain a clear understanding of techniques for data extraction from source systems, data cleansing, data transformations, data warehouse architecture and infrastructure, and the various methods for information delivery. Additional concepts discussed include data marts, real-time information delivery, data visualization, requirements gathering methods, multi-tier architecture, OLAP applications, Web click-stream analysis, data warehouse appliances, and data-mining techniques. Students undertake hands-on exercises and projects in commercial data warehousing modeling and implementation tools and perform case analyses.
Prerequisite: ISGB 6910.
Attributes: ISBA, ISEA, ISEL, ISET.
Prerequisites: ISGB 6910 or INSY 6910 or ICGB 6910 or GBA Waiver Information Systems with a score of 070 and ISGB 7973.

ISGB 7988. Business Performance and Risk Management. (3 Credits)
This course aims to develop a good understanding of knowledge required and techniques available to enable managers to measure and manage business performance within their organization. The role of business analytics in enabling business performance and risk management is emphasized. The application of analytics to such concepts as balanced scorecard strategy maps, KPI, corporate metrics, corporate governance information communication and dissemination, compliance and regulation assessment and reporting and information assurance is hallmark of this course. The social, ethical, and behavioral dimensions of the role of technology in analytics and performance management are discussed. Students will work on case studies and also engage in a capstone project involving analytics with a tool such as Cognos Insights.
Attributes: GB02, ISBA, ISEL, ISER.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7989. Info Tech in Transnatl. (3 Credits)
Provides practical guidelines for managers to integrate international business with IS planning and operations. As businesses increasingly operate globally, corporations with transnational business strategies must also develop transnational Information Systems. Today’s managers need to coordinate international telecommunications and IS operations as well as exploit the organizational and economic opportunities Information System creates for businesses that operate globally. INTERNATIONAL BUSINESS COURSE.
Attribute: ABIB.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 7990. Big Data Analytics. (3 Credits)
As organizations today generate and store massive amounts of data, they face the key challenge of analyzing the data to gain key insight to make informed decisions. Traditional relational models of data storage and use appear to be ill-suited for these large data sets. Alternative distributed, cloud-based approaches have emerged to handle these big data sets. Frameworks such as the Hadoop platform including the Hadoop Distributed File System (HDFS) and MapReduce (M/R) framework at its core, allows for distributed processing of large data sets across clusters of computers using the Map and Reduce programming model. It is designed to scale up from a single server to thousands of machines, offering local computation and storage. This exploratory course discusses the contemporary topic of big data analytics and introduces Hadoop and related technologies in an introductory fashion. Topics include big data analytics life cycle, technologies, development and management, privacy and security, governance, examples and others. Students will work on workshops and assignments in Hadoop on the Amazon Web Services cloud.
Attributes: ABFI, GB02, ISBA, ISEL.
Prerequisite: ISGB 7967.

ISGB 799D. Cybersecurity for Business. (3 Credits)
This class will explore the concepts of cyber risk management within an enterprise. The course will help a manager develop a solid understanding of cyber risk and successful mitigation strategies to reduce an organizations risk profile. The course will include topics such as IT control assessments, static and dynamic application security, network security, information security policies and standards, threat modeling and analysis, risk/benefits of BYOD (Bring you own device), IOT (The Internet of things), and many other real-time cyber topics.
Attributes: BUAN, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 799L. Study Tour: Germany. (3 Credits)
The study tour to Germany will be held from March 21 - April 1 during the spring/Easter break. It allows students to learn about the business environment in Germany and the European Union. Through academic presentations, company visits, and visits to cultural and historic sites, students will learn how the current business practices in Germany have been influenced by its rich culture, the world wars and the formation of the European Union and technology led globalization. The study tour will include stays in Marburg, Frankfurt, and Munich. There is no prerequisite for the course and it is open to MBA and MS students in good standing. Course related readings and pre-trip and post-trip assignments will be available in the first week of the spring semester. Expenses for the trip, including airfare are expected to be around $2,700 per student (in addition to the tuition for the course). Please contact Prof. Saharia at saharia@fordham.edu with any questions.
Attribute: ABIB.
ISGB 799P. Sports Analytics. (3 Credits)
Sports businesses achieve superior performance and gain competitive advantage by leveraging data and analytics. The course explores technologies, tools and analytics projects in Sports business.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 799R. IT Audit and Information Assurance. (3 Credits)
This course will present an overview of the various elements of IT Audit and Information Assurance. Basic IT audit and information assurance concepts will be discussed and analyzed. General IT and application controls will be covered along with how the controls underlie SOX Section 404 Legislation. The course will also examine business processes, technologies and controls relating to financial reporting. Key components of information systems, including operating system security, database controls, network safeguards, systems development and application maintenance will also be covered. Technology processes supported under COBIT 5 will be discussed along with risk assessment techniques. The challenges around information assurance, data governance and privacy will be explored in detail.
Attributes: BUAN, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 799S. C++ Programming. (3 Credits)
This course will teach Object Oriented programming using the C++ programming language. Students will learn the fundamentals of developing coherent, expressive programs. Students will work on a realistic albeit simplified financial application project.
Prerequisite: ISGB 6910.

ISGB 799V. R Statistical Programming. (3 Credits)
This is a programming course using the R programming language. Applications will focus on data analytics and statistical programming.
Attributes: BUAN, GB01, ISEL.

ISGB 799W. Java Programming. (3 Credits)
This course provides an introduction to business applications programming concepts, techniques and tools. Students will acquire practical skills and experience with object-oriented development using the Java language, one of the most widely used programming languages. Topics include the elements of the language, common Java classes, object-oriented programming including inheritance and interfaces, object-oriented design, and database integration. Case studies in e-commerce and finance will show how Java can leverage the wide variety of available libraries and web services. Course work includes individual assignments and group projects.

ISGB 799X. Fintech -An Introduction. (3 Credits)
FinTech is a new and emerging field of technology that is disrupting the way that many companies are conducting business. FinTech has already “forever” changed many sectors including mobile payments, social media, money transfers, loans, fundraising, travel, trading and asset management. It has completely revolutionized the way companies are developing products, conducting research, establishing directed sales and marketing plans, and utilizing start-up technology. Businesses are using FinTech to expand their products and services at a fraction of its previous cost. Entrepreneurs are utilizing FinTech as a central foundation for research, funding, and product development. Customers are already utilizing FinTech as part of their daily lives - mobile apps, social media, banking, online shopping, entertainment and gaming. This course will introduce students to the breadth of FinTech, and touch upon the technical underpinnings.
Attributes: BUAN, ISEL.
Prerequisites: ISGB 6910 or GBA Waiver Information Systems with a score of 070.

ISGB 799Y. Blockchain Tech & App Dev. (3 Credits)
The main objective of this course is to familiarize you with the ecosystem, technologies, and development skills surrounding Blockchain. The course starts with foundational concepts such as distributed state machine, hash tree, P2P network, GPU processing, cryptocurrency, and cryptography. Using both simulated sandbox and locally installed environments, the course then guide you through the development, front-end integration, and deployment of Blockchain-based smart contracts. Other topics covered include rapid prototyping, design patterns, and agile process to maximize the success likelihood for Blockchain projects. The lab portion of this course involves weekly submissions of programming exercises, assignments and project deliverables. Other topics covered include rapid prototyping, design patterns, and agile process to maximize the success likelihood for Blockchain projects. Prior knowledge required: Proficiency in computer programming; basic knowledge in analysis and linear algebra.
Attributes: ABBC, BUAN, ISEL.

ISGB 799Z. Deep Machine Learning. (3 Credits)
The goal of this course is to acquaint you with the objectives and methods of deep machine learning (DML). We will explore and learn the basic types of deep neural networks including convolutional, recurrent, and generative adversarial, and the type of data each is designed for. Key additional topics include techniques to improve training, preventing overfitting, and best practices for minimizing error. Students will study the major technology trends driving DML. A key takeaway is a working knowledge of the vocabulary of concepts and algorithms in DML. The challenges and issues surrounding the use of DML including design issues, ethics, governance, ownership of data, privacy, security standards, and quality control & validation are also discussed. Emphasis is on business applications. The course is organized as a seminar-style course, with hands-on assignments in DML tools. Familiarity with basic calculus and linear algebra expected.
Attributes: BUAN, GB02, ISEL.
Prerequisites: ISGB 7990 and (BYGB 7967 or ISGB 7967).
ISGB 79AA. Advanced Python for Financial Programming. (3 Credits)
This course on advanced Python programming for financial analytics covers finance topics such as an introduction to the capital markets, including their instruments and analytics (equities, fixed income, currencies, and derivatives); portfolio analysis, including use of simulation for risk analysis, optimization for portfolio balancing, and principal components for risk factor determination; machine learning applications in finance, including fraud detection and loan approval; and real-time data and high-frequency trading. Python topics include integrating Python with spreadsheets (Excel and Google Sheets), databases, web pages, and web services; hands-on exposure to a diverse set of Python financial analysis packages; and techniques and tools for building Python-based systems: defining requirements, system design, unit testing, and source code control.
Attributes: BUAN, GB02, ISEL.
Prerequisite: ISGB 7999.

ISGB 79AB. Programming for Analytics. (3 Credits)
This course covers both Python and R as programming languages. The Python portion of the course empowers professionals to process data, handle complex computations, automate procedures, and conduct research efficiently on a massive scale. This course also introduces and advances the understanding of the R programming language in a statistical environment. Students will understand the fundamental syntax and logic of both languages, and learn how both are applied to solve business problems algorithmically.

ISGB 79AC. Cybersecurity Analytics for Business. (3 Credits)
Cyber attacks pose an increasing threat to the nation's critical infrastructure, including computer networks, cyber-human systems, business applications, sensor networks, and mobile devices. This course provides an introduction to data analytics for multiple aspects of information security and focuses on using data analytics methods for discovering anomalies pertaining to cyber threats through hands-on exercises in programming, visualization, statistical analysis, machine learning, and big data analytics tools.
Attributes: BUAN, GB02, ISEL.

ISGB 79AD. Digital Forensics. (3 Credits)
This course provides students with an introduction to digital forensic science and the systematic process of acquiring, authenticating, and analyzing digital evidence. Technical and managerial topics will be explored, providing students with both theoretical and practical hands-on experience using forensic equipment and software. The topics of e-discovery, data retention, data disposal, litigation, internal investigations, regulatory compliance, and incident response will be covered.

ISGB 79AE. Robotic Process Automation. (3 Credits)
Robotic Process Automation (RPA) is the application of technology that allows employees in a company to configure software (a "bot") to capture and interpret existing applications when processing transactions, manipulating data, triggering responses, and communicating with other digital systems. RPA observes a user's actions when interacting with software and mimics those actions over time. This course will introduce you to the key concepts of RPA and discuss how organizations can automate internal processes to improve productivity and move employees up the work value chain. The managerial issues covered include cultural and technical challenges, value proposition of RPA, privacy and security, training, ownership and governance, etc. The business and societal implications of the effects of automation will also be discussed.

ISGB 8999. Independent Study. (1 to 3 Credits)

ISGB 899A. Disrupting Financial Services. (1.5 Credits)
Graduate students will learn directly from industry experts how new technologies, changing demographics and investor preferences are significantly impacting the delivery of wealth management, creation of investment products and capital market mechanisms. From the global adoption of crypto currencies to the trillion dollar tsunami of money flowing into passively managed ETFs, students will be exposed to the current and future implications of these 'disruptions' and gain helpful insight and intelligence impacting their careers. We will focus on one "disruption" per week with subject matter experts explaining the economic and cultural implications for both winners and losers. This course will be valuable to all students navigating future employment opportunities in financial services.

Information Systems (Gabelli Undergraduate) (INSY)

INSY 2299. Information Systems: GSB Integrated Core Only. (1.5 Credits)
This course introduces students to the subject of computer-based information systems in business. Upon completion of this course students should be familiar with the basic concepts and current developments in the field of information technology and information systems; appreciate the role of information systems in business organizations; and understand the issues that employing information technology raises. Students also learn to use effectively key software tools (spreadsheets and databases) that improve personal productivity and can contribute to business value.

INSY 2300. Information Systems. (3 Credits)
This course introduces students to the subject of computer-based information systems in business. Upon completion of this course students should be familiar with the basic concepts and current developments in the field of information technology and information systems; appreciate the role of information systems in business organizations; and understand the issues that employing information technology raises. Students also learn to use effectively key software tools (spreadsheets and databases) that improve personal productivity and can contribute to business value.
Attributes: BUMI.

INSY 3201. Information Systems: GSB Integrated Core Only. (1.5 Credits)
This course introduces students to the subject of computer-based information systems in business. Upon completion of this course students should be familiar with the basic concepts and current developments in the field of information technology and information systems; appreciate the role of information systems in business organizations; and understand the issues that employing information technology raises. Students also learn to use effectively key software tools (spreadsheets and databases) that improve personal productivity and can contribute to business value.

INSY 3421. Accounting Information Systems. (3 Credits)
This course introduces students to computer-based accounting information systems (AIS). Students master the understanding of business processes, transaction cycles and internal controls, as well as their respective current day systems components.
Attributes: FTIS, PRQU.
Prerequisites: (INSY 2300 or INSY 2299) and ACBU 2222.
INSY 3432. Database Systems. (3 Credits)
This course focuses on database design principles and techniques, including entity relationship model, relational model and normalization. Students will become familiar with SQL (structured query language) and database management system capabilities. The concepts and techniques are applied to practical business data processing environments. The course includes a series of exercises on design and implementation of database applications using commonly available database management systems. It is recommended that MICS majors and ICS primary concentrators take this course concurrent with, or prior to, Systems Analysis (INSY 3441). Prerequisite: INSY 2299 or INSY 2300 or HPCB 2300.
Attribute: FTIS.
Prerequisites: INSY 2300 or INSY 2299.

INSY 3433. Programming with Java. (3 Credits)
(Formerly "Business Applications Development") This course provides an introduction to business applications programming concepts, techniques and tools. Students will acquire practical skills and experience with object-oriented development using the Java language. Topics include the elements of the language, common Java classes, object-oriented programming including inheritance and interfaces, and object-oriented design. Examples will be drawn from various business areas.
Attributes: ENT, FTIS.
Prerequisites: HPCB 2300 or INSY 2299 or INSY 2300.

INSY 3434. Network App and Telecom Policy. (3 Credits)
(Formerly Telecommunications) An intensive examination of network and Internet technologies and standards, network design, network management and business value. Topics include local area networks (LAN), public and corporate networks, Internet backbone, broadband and wireless networks, client/server computing, and telecommunication services. In addition, the course explores strategic and policy issues and trends related to networking and telecommunications, such as network neutrality. Prerequisite: INSY 2299 or INSY 2300 or HPCB 2300.
Prerequisites: INSY 2300 or INSY 2299.

INSY 3436. ST: Programming with Python. (3 Credits)
Do you want to be able to solve business problems through programming and coding? This course introduces key concepts, techniques, and tools. Students will learn to program using the widely used Python programming language. For students new to programming, this is the recommended introductory course.
Attributes: ACIS, ENT.
Prerequisites: INSY 2299 or INSY 2300.

INSY 3437. ST: Sports Analytics. (3 Credits)
Sports businesses achieve superior performance and gain competitive advantage by leveraging data and analytics. The course explores technologies, tools, and analytics projects in sports business.
Prerequisites: INSY 2299 or INSY 2300.

INSY 3438. ST: Cybersecurity in Bus. (3 Credits)
This class will explore the concepts of cyber risk management within an enterprise. The course will help a manager develop a solid understanding of cyber risk and successful mitigation strategies to reduce an organization's risk profile. The course will include topics such as IT control assessments, static and dynamic application security, network security, information security policies and standards, threat modeling and analysis, risk/benefits of BYOD ("bring your own device"), IOT (the Internet of Things), and many other real-time cyber topics.
Attribute: ENT.
Prerequisites: INSY 2299 or INSY 2300.

INSY 3441. Systems Analysis. (3 Credits)
An introduction to the process of developing information systems. Emphasizes soliciting business, user, and functional requirements, and building conceptual models that help to analyze these requirements. Major topics include project identification, selection, and planning; requirements solicitation, development, and management; business process modeling; and traditional and object-oriented system analysis techniques. It is recommended that MICS majors and ICS primary concentrators take Database Systems (INSY 3432) concurrent with, or prior to, this course. Prerequisite: INSY 2299 or INSY 2300 or HPCB 2300.
Attribute: FTIS.
Prerequisites: INSY 2300 or INSY 2299.

INSY 3442. Web Apps Design and Development. (3 Credits)
A well-designed web presence and useful web applications are essential for all companies today. This course focuses on hands-on development of web applications that create business value. Major topics include a review of project planning, system analysis, and project management; architecture design; detailed component, database, network, and user and system interface design; web applications programming and testing; and web applications implementation (deployment and transition to use and support organization). Languages covered include HTML, CSS, JavaScript, and PHP. Note: It is recommended that students take Systems Analysis (INSY 3431) prior to this course.
Attributes: ENT, NMAC, NMDD.
Prerequisites: INSY 2300 or INSY 2299 or HPCB 2300.

INSY 3450. ST: Fintech - An Introduction. (3 Credits)
FinTech is a new and emerging field of technology that is disrupting the way that many companies are conducting business. FinTech has already “forever” changed many sectors including mobile payments, social media, money transfers, loans, fundraising, travel, trading and asset management. It has completely revolutionized the way companies are developing products, conducting research, establishing directed sales and marketing plans, and utilizing start-up technology. Businesses are using FinTech to expand their products and services at a fraction of its previous cost. Entrepreneurs are utilizing FinTech as a central foundation for research, funding, and product development. Customers are already utilizing FinTech as part of their daily lives - mobile apps, social media, banking, online shopping, entertainment and gaming. This course will introduce students to the breadth of FinTech, and touch upon the technical underpinnings.
Attribute: ENT.
Prerequisites: INSY 2299 or INSY 2300.

INSY 4410. IT-Driven Global Supply Chain. (3 Credits)
(Formerly Info Sys in Global Context) This course provides an understanding of the information needs of global business organizations and how information technology can be leveraged for business success on a global scale focusing on global supply chain management systems and business issues. The course examines the role of IT in global firms through a combination of discussions and projects. Prerequisite: INSY 2299 or INSY 2300 or HPCB 2300.
Attribute: GLBB.
Prerequisites: INSY 2300 or INSY 2299.
INSY 4411. ST: Healthcare Info Tech. (3 Credits)
Introduces students to the subject of health information technology (HIT) and describes the organizational context surrounding the implementation, use and management of HIT. Examines the concepts, applications, and strategies of HIT. Key concepts include the role of HIT in enabling quality, safety and efficiency of health care delivery. The course surveys the various types of HIT including electronic health records, clinical decision support systems, master patient indexes, analytics, telemedicine, etc.
Prerequisites: INSY 2299 or INSY 2300.

INSY 4412. ST: IT and Sustainability. (3 Credits)
This course discusses the transformative role of information and communication technologies (ICTs) in enabling sustainability. ICT’s effect on sustainability dimensions are felt at both the macro, societal level, as well as at the business level. These include ICT’s positive impact on development, education, environment, health care, power, transportation, and others. Simultaneously, ICT’s themselves are subject to sustainability practices, for example, green computing. Additional topics include the design of smart cities, digital divide, the knowledge society, rebound effects, governance, and world development indicators. Students working in groups will analyze several contemporary cases form a global perspective and also develop IT-based sustainability plan.
Attributes: ENT, SOIN.
Prerequisites: INSY 2299 or INSY 2300.

INSY 4430. The Law of Innovation. (3 Credits)
The course examines the legal issues that technology entrepreneurs will face as they launch their for-profit, not-for-profit, or both for-profit and not-for-profit businesses. Topics will include business formation; corporate social responsibility; copyright, trademark, patent, trade secret, and privacy contract law (traditional, on the internet, nondisclosure/ noncompete agreements, and tech licensing); good practices for using open source software. We will present both for-profit and not-for-profit practical examples for each topic. The course requires reading the assigned text, which will include judicial opinions and scholarly articles. You will be encouraged to thoroughly read and discuss these sources. Industry experts will provide insights throughout the course as guest speakers. Prerequisite: INSY 2299 or INSY 2300 or HPCB 2300.
Attribute: ENT.
Prerequisites: INSY 2300 or INSY 2299.

INSY 4431. Web Analytics. (3 Credits)
In a global market where Internet usage has increased dramatically, it’s becoming increasingly critical for businesses to be more aware of how their potential customers can find them via online search, understand the value of social media and understand website performance measures. Web analytics course aims to discover useful knowledge from Web hyperlinks, page content and usage log. The course covers the following topics: mining and integration of useful web content information, web structure analysis, social network analysis, web traffic and visitor analysis, Search Engine Optimization (SEO) and Pay-Per-Check (PPC) model in Search Engine Marketing (SEM). The course is a combination of lecture, case studies, hands-on exercises and a real world project.
Prerequisite: INSY 2299 or INSY 2300 or HPCB 2300.
Attributes: ENT, NMAC, NMDD, NMMI.
Prerequisites: INSY 2300 or INSY 2299.

INSY 4432. Mobile Commerce & Apps. (3 Credits)
Roughly two-thirds of the world’s population participates in the new mobile economy. Leveraging the mobile marketplace requires a conceptual understanding of mobile-commerce as well as the practical skills needed to create the next generation of wireless enabled goods and services. This course will provide both, using a combination of global case studies and hands-on experience in building mobile applications for handheld devices.
Attributes: ENT, NMAC, NMDD.
Prerequisites: INSY 2299 or INSY 2300.

INSY 4433. Advanced Python for Business. (3 Credits)
This course covers advanced Python programming using examples in several business areas, including Finance, Marketing, Supply Chain, and Healthcare. Python topics include: - Integrating Python with spreadsheets, databases, Web pages, and Web services - Hands-on exposure to a diverse set of Python packages (in the context of different business areas) - Techniques and tools for building Python-based systems: defining requirements, system design, unit testing, and source code control Using Python for specific analytics models is also covered, including statistics, simulation, optimization, and machine learning.
Attribute: FTIS.
Prerequisite: INSY 3436.

INSY 4434. ST: Data Mining for Business. (3 Credits)
INSY 4435. ST: AIS Consulting Project. (3 Credits)
Students define and implement controls to accurately capture and process data and to protect information assets against internal and external risks. Working in teams and under the guidance of a faculty mentor, students develop client solutions that are rooted in rigorous analysis. At the end of the term, students present their project findings to the client and receive client feedback. Students acquire consulting and project-management skills, and they network with industry professionals in the accounting and information system areas. Prerequisite: INSY 2299 or 2300, ACGB 2222 and 2223.
Attribute: ACIS.
Prerequisites: INSY 2299 or INSY 2300 and (ACBU 2222 and ACBU 2223).

INSY 4449. Enterprise Systems. (3 Credits)
(Formerly Enterprise Integration) This course provides an overview of issues related to implementing and managing information systems that enable enterprise-wide integration in organizations. This course focuses on ERP systems. Prerequisite: INSY 2299 or INSY 2300 or HPCB 2300.
Prerequisites: INSY 2300 or INSY 2299.

INSY 4460. Data Warehousing. (3 Credits)
In this course students will explore issues related to implementing a data warehouse for business intelligence applications. Topics discussed include the use of decision support systems; business intelligence and business analytics; the separation between operational and decision support databases; designing and implementing data warehouses; loading and refreshing data warehouses; the use of tools to retrieve data from a warehouse; and the use of online analytical processing (OLAP) and related tools to analyze data. Prerequisite: INSY 2299 or INSY 2300 or HPCB 2300.
Attribute: ENT.
Prerequisites: INSY 2300 or INSY 2299.
INSY 4505. E-Commerce. (3 Credits)
Internet technologies have become an important platform for business and commerce. This course introduces students to technologies, concepts, and business issues related to e-business and e-commerce. Topics include novel digital business models, applications and strategies; business-to-business and business-to-consumer e-commerce, digital marketing and advertising, social networks and technologies, security and privacy and intellectual property protection. A web authoring package will be used as a tool to assist us in gaining hands-on skills. Cross-listed with MKBU 4504. Prerequisite: INSY 2299 or INSY 2300 or HPCB 2300.
Attributes: ENT, NMAC, NMDD.
Prerequisites: INSY 2300 or INSY 2299.

INSY 4506. Business Analytics. (3 Credits)
This course introduces Business Analytics and such related concepts and techniques as Business Intelligence (BI), data analytics, data warehousing, and data mining. It explores how business analytics can help in improving management decision-support effectiveness in such functional areas as marketing, finance, and manufacturing. The course is intended for business students in general and not just IS/IT specialists. In addition to conceptual material, students will gain substantial hands-on experience with a set of BI tools.
Attributes: OCIT, ENT, FTIS.
Prerequisites: INSY 2300 or INSY 2299.

INSY 4507. Project Management. (3 Credits)
This course provides the project management skills needed to develop information and communications systems on time and within budget. It concentrates on methods and issues of organizing, planning and controlling of projects and the use of computer-based project management tools. Cross-listed with MGBU 4507.
Attribute: OCIT.
Prerequisites: INSY 2300 or INSY 2299.

INSY 4508. Business Modeling With Spreadsheets. (3 Credits)
(Formerly “Advanced Spreadsheet Methods”) Spreadsheets have become the near-exclusive tool used by millions of managers in analyzing business problems. Nowadays, spreadsheets contain many powerful tools that can be used to analyze more sophisticated models and make better decisions. This course introduces students to many advanced features in Microsoft Excel and the key ideas of modeling and management decision making that will be important throughout their careers. Students will learn to build and analyze decision-making models in Excel. The emphasis is “hands-on” use of Microsoft Excel and its add-ins. Students will have opportunities to model and solve various representative practical problems in class and in homework using Excel. Students are expected to have basic understanding of Microsoft Excel prior to enrolling in this class.
Attributes: OCIT, ACIS, FTIS, PRQU.
Prerequisites: INSY 2300 or INSY 2299.

INSY 4706. Honors Thesis II - Info Sys. (3 Credits)
Honors project in Info Systems.

INSY 4800. Global Information Technology Strategy and Management. (3 Credits)
(Formerly Information Resources Management) Information technology is playing an increasingly significant role in businesses’ global strategies. To be effective, one needs to understand how to use information technology to counter competitive forces and exploit opportunities created by globalization and electronic commerce. This capstone course addresses the issues involved in managing information systems resources in a global environment, including long-term planning for information systems, acquiring and implementing information systems resources, data center management, capacity planning and introduction of new technologies. The students will examine political and organizational issues in information systems implementation through case studies of global firms and class discussions. Prerequisite: Completion of at least two ICS upper-level courses; senior standing.
Attributes: ACIS, GLBB, PRQU.
Prerequisites: (INSY 2300 or INSY 2299).

INSY 4999. Independent Study. (1.5 to 3 Credits)

Institute of American Language and Culture (IALC)

IALC 0011. Community ESL 1. (0 to 99 Credits)
IALC 0012. Community ESL 2. (0 to 99 Credits)
IALC 0013. Community ESL 3. (0 to 99 Credits)
IALC 0101. Community ESL 1. (0 Credits)
IALC 0102. Community ESL 2. (0 Credits)
IALC 0103. Community ESL 3. (0 Credits)
IALC 0104. Community ESL 4. (0 Credits)
IALC 0105. Community ESL 5. (0 Credits)
IALC 0106. Community ESL 6. (0 Credits)
IALC 0107. Community ESL 7. (0 Credits)
IALC 1001. Grammar Workshop. (0 Credits)
A free weekly grammar workshop for Fordham students.
IALC 1002. Pronunciation Workshop. (0 Credits)
CEFR: A2-B2. Pronunciation workshop provides an intensive review of English pronunciation for learners at all levels.

IALC 1003. Conversation Workshop. (0 Credits)
CEFR: A2-B2. The conversation workshop provides an opportunity to practice speaking and understanding conversational English in a small-group setting. Students will discuss various topics related to personal interests and current events.

IALC 1004. TOEFL Workshop. (0 Credits)
Free workshop to improve TOEFL and IELTS scores.

IALC 1005. Service Learning Project. (0 Credits)
CEFR: B1-C1. The course encourages student engagement in the local community through volunteer opportunities arranged in partnership with the Center for Community Engaged Learning at Fordham. Special emphasis is on promoting greater awareness of issues in the United States concerning equity, class status, race, and nationality through service-learning experience, readings, films, and discussions.

IALC 1130. Basic Reading and Writing. (0 Credits)
CEFR: A1-A1+. This course introduces basic grammar, general vocabulary, and reading skills in English. Special emphasis will be on understanding and producing short, simple texts and basic words and phrases.

IALC 1135. Basic Reading and Writing B. (0 Credits)
CEFR: A1-A1+. This shortened, 7-week course introduces basic grammar, general vocabulary, and reading skills in English. Special emphasis will be on understanding and writing short, simple texts and basic words and phrases.

IALC 1140. Intermediate Reading, Writing, and Grammar. (0 Credits)
CEFR: A1-A2. This course is designed to strengthen students’ comprehensive grammar integrated with reading and writing skills. Special emphasis will be on understanding a short factual description or report within their own field, and writing a series of simple phrases and sentences linked with simple connectors.

IALC 1145. Intermediate Reading, Writing, and Grammar B. (0 Credits)
CEFR: A1-A2. This shortened, 7-week course is designed to strengthen students’ comprehensive grammar integrated with reading and writing skills. Special emphasis will be on understanding a short factual description or report within their own field, and writing a series of simple phrases and sentences linked with simple connectors.

IALC 1150. High Intermediate Reading, Writing, and Grammar. (0 Credits)
CEFR: A2-B1. This course is designed to enhance students’ comprehensive grammar integrated with intensive and extensive reading and writing skills. Special emphasis will be developing scanning skills to gather information from different parts of a text, and writing connected texts by linking a series of shorter discrete elements into a linear sequence.

IALC 1155. High Intermediate Reading, Writing and Grammar B. (0 Credits)
CEFR: A2-B1. This shortened, 7-week course is designed to enhance students’ comprehensive grammar integrated with intensive and extensive reading and writing skills. Special emphasis will be put on developing scanning skills to gather information from different parts of a text, and writing connected texts by linking a series of shorter discrete elements into a linear sequence.

IALC 1160. Academic Writing Skills. (0 Credits)
CEFR: B1-B2. This course is designed to improve students’ academic writing skills and to help English language learners prepare for mainstream academic environments. Students will be equipped with skills tied to specific learning outcomes along with authentic writing strategies and technical vocabularies. Special emphasis will be on synthesizing and evaluating information and arguments from a number of sources and developing critical and creative thinking in academic writing across different disciplines—science, technology, engineering, arts, and mathematics (STEAM).

IALC 1165. Academic Writing Skills B. (0 Credits)
This shortened, 7-week course aims to improve students’ academic writing skills and to help English language learners prepare for mainstream academic environments. Students will be equipped with skills tied to specific learning outcomes along with authentic writing strategies and technical vocabularies. Special emphasis will be on synthesizing and evaluating information and arguments from a number of sources and developing critical and creative thinking in academic writing across different disciplines—science, technology, engineering, arts, and mathematics (STEAM).

IALC 1170. College Writing 1. (3 Credits)
CEFR: B2-C1. This course is designed to improve students’ strategies for university-level reading, writing, and critical thinking. Students will acquire new ways to read critically and reflect on a variety of academic texts, conduct peer review of writing in progress, and revise work according to feedback from classmates and their instructor. In support of these skills, the course will also review grammar, essay organization, APA, and academic integrity. Special emphasis will be on writing clear, well-structured research papers, underlining the relevant salient issues, expanding and supporting points of view at some length with subsidiary points, reasons, and relevant examples, and rounding off with an appropriate conclusion.
Corequisite: IALC 1270.

IALC 1171. College Writing. (3 Credits)
CEFR: B2-C1. This course will help students develop university-level reading, writing, and thinking strategies. As a participant in complex academic conversations, students will learn to engage with and respond to college-level texts. To this end, students will practice critical reading and writing in common academic genres, including summary-response writing, argumentative essays, and library research. In support of these skills, students will participate in discussions of readings, review key grammar concepts, build their academic vocabulary, provide comments on peers’ writing, and revise work according to feedback from classmates and the instructor. Special emphasis will be on writing clear, well-structured research papers, underlining the relevant salient issues, expanding and supporting points of view at some length with subsidiary points, reasons, and relevant examples, and rounding off with an appropriate conclusion.

IALC 1175. College Writing 2. (3 Credits)
CEFR: B2-C1. This course is a continuation of College Writing I and will introduce students to college-level reading and writing through the lens of culture, identity, and contemporary social issues, among other topics. Students will write well-organized expository essays and opinion essays in response to university-level readings. The focus of the course is on supporting students to acquire the ability to analyze, revise, and edit their own writing, as well as to read and analyze the writings of others; and correcting flaws in grammar, word usage, and sentence and composition structure. In support of these skills, students will also learn key grammar concepts.
IALC 1180. Intro to Research Writing. (0 Credits)
CEFR: B2+-C1. This course is designed to support students in developing the writing skills necessary to meet a range of anticipated writing tasks that they will encounter during their academic careers. Students will learn to communicate effectively within disciplinary contexts, read critically, and use resource materials effectively in research writing. Special emphasis is given to the structure and logic of the author's argument, the use of tables and graphs, the placement of transitions, word choice, and flow.

IALC 1230. Basic Listening & Speaking. (0 Credits)
CEFR: A1-A1+. This course introduces basic grammar, general vocabulary, and communication skills in English. Special emphasis will be on understanding and speaking basic words and short sentences in simple conversations.

IALC 1235. Basic Listening & Speaking B. (0 Credits)
CEFR: A1-A1+. This shortened, seven-week course introduces basic grammar, general vocabulary, and communication skills in English. Special emphasis will be on understanding and speaking basic words and short sentences in simple conversations.

IALC 1240. Intermediate Listening and Speaking. (0 Credits)
CEFR: A1-A2. This course is designed to strengthen students' speaking and listening skills, as well as vocabulary, grammar, and pronunciation skills. Special emphasis will be on building academic vocabulary knowledge, understanding phrases and expressions related to areas of most immediate priority, and giving a simple description or presentation.

IALC 1245. Intermediate Listening and Speaking B. (0 Credits)
CEFR: A1-A2. This shortened, seven-week course will strengthen students' speaking and listening skills, as well as vocabulary, grammar, and pronunciation skills. Special emphasis will be on building academic vocabulary knowledge, understanding phrases and expressions related to areas of most immediate priority, and giving a simple description or presentation.

IALC 1250. High Intermediate Listening and Speaking. (0 Credits)
CEFR: A2-B1. This course is designed to enhance students' academic listening and speaking skills. Special emphasis will be on understanding main points and specific details of a speech or lecture, and presenting a variety of topics fluently with simple reasons and explanations.

IALC 1255. High Intermediate Listening and Speaking B. (0 Credits)
CEFR: A2-B1. This shortened, seven-week course is designed to enhance students' academic listening and speaking skills. Special emphasis will be on understanding main points and specific details of a speech or lecture, and presenting a variety of topics fluently with simple reasons and explanations.

IALC 1260. Academic Communication Skills. (0 Credits)
CEFR: B1-B2. This course is designed to improve students' oral communication skills and help English language learners prepare for mainstream academic environments. Special emphasis is on understanding the main ideas of complex speech on both concrete and abstract topics delivered in standard speech, including technical discussions in a field of specialization, and giving clear, systematically developed descriptions and presentations, with appropriate highlighting of significant points and relevant supporting detail.

IALC 1265. Academic Communication Skills B. (0 Credits)
CEFR: B1-B2. This shortened, seven-week course is designed to improve students' oral communication skills and help English language learners prepare for mainstream academic environments. Special emphasis is on understanding the main ideas of complex speech on both concrete and abstract topics delivered in standard speech, including technical discussions in a field of specialization, and giving clear, systematically developed descriptions and presentations, with appropriate highlighting of significant points and relevant supporting detail.

IALC 1270. Intercultural Skills 1. (2 Credits)
CEFR: B2-C1. This course introduces basic concepts, skills, and strategies to identify and manage cultural and academic expectations in the U.S. Through weekly readings, semester-long research, and practical class discussions, students will learn the importance of preconceptions, context, roles, and power in intercultural communication. Special emphasis is on recognizing a wide range of idiomatic expressions and colloquialisms, identifying opportunities and challenges that arise from cultural differences, and learning ways to address them effectively and appropriately in both academic and social settings.
Corequisite: IALC 1170.

IALC 1271. Intercultural Exchange. (3 Credits)
CEFR: B2-C1. This course is designed for exchange students and introduces the concepts, skills, and strategies to identify and manage cultural and academic expectations in the U.S. The course is designed to familiarize students with contemporary American culture and to help them feel “at home” in NYC. Through weekly readings, ethnographic observations, and practical discussions, students will learn the importance of preconceptions, context, roles, and power in intercultural communication. Special emphasis is on explaining interpretations of culturally-specific opinions, practices, beliefs, and values, pointing out similarities and differences to students’ own and other cultures.

IALC 1275. Intercultural Skills 2. (2 Credits)
CEFR: B2-C1. This course is designed for culturally and linguistically diverse learners and introduces basic concepts, skills, and strategies to identify and manage cultural and academic expectations in the U.S. The students will be introduced to the concept of intercultural communicative competence and learn to use language appropriately and effectively while embracing the “differences.” Special emphasis is on recognizing a wide range of idiomatic expressions and colloquialisms, identifying opportunities and challenges that arise from cultural differences, and learning ways to address them effectively and appropriately in both academic and social settings.

IALC 1280. Adv Academic Communication Skills. (3 Credits)
CEFR: B2+-C1. This course is designed for students to strengthen academic communication skills by participating in a variety of discussions and mini-presentations. Special emphasis is on arguing a case on a complex issue, formulating points precisely, and employing emphasis effectively.

IALC 2026. College ESL Writing I. (6 Credits)
CEFR: B2-C1. This course introduces students to college-level reading and writing through the lens of identity, intercultural communication, and education, among other topics. Special emphasis is on reading critically, reflecting on a variety of texts, and writing well-developed narrative, persuasive, and argumentative academic essays. In support of these skills, students will also learn key grammar concepts.
IALC 2200. Special Topics. (0 Credits)
CEFR: A2-C1. This seven-week course is designed to enhance students’ communication competence on a variety of topics. Special emphasis is on discussing practices and delivering speeches on topics of their interests.

IALC 2240. Int Weekend English Skills. (0 Credits)
CEFR: A2-B1. This weekend course is designed to develop students’ English language skills at the intermediate level, with a focus on developing accuracy and fluency in communication. Special emphasis is on improving reading comprehension, vocabulary knowledge, paragraph writing, and presentation skills.

IALC 2260. Adv Weekend English Skills. (0 Credits)
CEFR: B1-B2. This weekend course is designed to develop students’ English language skills at the advanced level. It will help students build effective communication skills. Special emphasis is on refining accuracy and fluency by reading more complex texts, and developing effective oral presentation/writing skills.

IALC 2300. Presentation & Public Speaking. (0 Credits)
CEFR: B2-C1. This course is designed to prepare students for success in typical public speaking situations and to provide them with the basic principles of organization and research needed for effective speeches. Special emphasis is on giving a clear, systematically developed presentation, with appropriate vocabulary usage, techniques to lessen speaker anxiety, and the use of visual aids to enhance speaker presentations.

IALC 2301. Int Integrated English Skills. (0 Credits)
CEFR: B1-B2. This course is intended for students to think, discuss, compare, and debate in English by reading short fiction, writing complex sentences, giving short presentations, participating in discussions/debates, and producing a digital story. Special emphasis is on producing clear, detailed descriptions and presentations with relevant supporting details.

IALC 2302. Adv Integrated English Skills. (0 Credits)
CEFR: B2-C1. This project-based course will guide students to become editor in chief of a digital publication they create themselves, from concept to completion. By completing small projects every week, students will be exercising writing, speaking, listening, reading, and grammar skills, which will strengthen their English proficiency. Special emphasis is on employing the structure and conventions of various genres, varying the tone, style, and register according to addressee, text type, and theme.

IALC 2303. Intro to U.S. Culture & History. (0 Credits)
CEFR: B1-B2. This content-based course strengthens language proficiency while developing a broader and deeper understanding of various aspects of U.S. culture and history. Special emphasis is on producing clear, detailed text on a wide range of cultural and/or historical topics and explaining a viewpoint on a topical issue giving the advantages and disadvantages of various options.

IALC 2304. Intro to World Religions. (0 Credits)
CEFR: B2-C1. This course introduces the core beliefs, concepts, traditions, and essential elements of major religions practiced widely throughout the world, including but not limited to Hinduism, Buddhism, Daoism, Confucianism, Christianity, and Islam. Special emphasis is on producing well-structured writings on world religions by thinking critically, evaluating collected resources, and synthesizing information.
Insurance Law (ISGL)

ISGL 0351. Insurance Law and Litigation. (2 Credits)
Every lawyer, in private practice, in the business sector, or in government, is likely to be confronted with insurance issues. This course is intended to provide a broad based introduction to insurance law. It will cover the nature and purpose of insurance, from the legal and economic prospective; different types of insurance, including first & third party insurance, personal and commercial insurance and reinsurance; state & federal regulation of insurer’s; issues of insurance coverage and interpretation; and duties and responsibilities of insurers and insureds. Emphasis will be placed on recent insurance cases which have resulted in sweeping changes. The events of 9/11, Katrina, the State Attorney Generals’ investigations of the insurance industry, recent New York Court of Appeals’ bad faith decisions, the AIG bailout, Health Insurance Reform, and the BP Gulf Oil spill and super Storm Sandy have also raised numerous issues, which we will review. The course will be taught from a litigation vantage point since much of insurance law has been developed appropriately highlighting significant points.

Attributes:
- LAWB.

Integrative Neuroscience (NEUR)

NEUR 3999. Tutorial. (3 Credits)

NEUR 4900. Neuroscience Capstone Seminar. (1 Credit)
Senior-level intergrative Neuroscience majors from all three tracks meet weekly in the spring semester to share and discuss the results of their independent research. Students will be required to give a minimum of two presentations of their research, once in first half of the semester and again in the second half. The content of this course will build upon what students learned in NEUR 4999 the previous semester.

NEUR 4999. Neuroscience Research. (0 to 4 Credits)
Independent laboratory research or meta analysis of published work beginning no later than the summer/fall of the senior year. The project will be on a specific neuroscience topic and mentored under the supervision of a faculty member. Grade and credits are given only upon completion of a final research paper or poster that integrates the project findings with previously published studies in neuroscience.

Intellectual Property (IPGL)

IPGL 0105. Patent Practice Skills. (2 Credits)
The patent practice skills course provides students with the opportunity to learn and apply fundamental patent law skills to a variety of practical, real-life law firm and business scenarios. Through a series of fact based exercises and complementary text and case law readings, students will analyze a proposed invention, assess patentability, organize a patent procurement strategy including developing a patent specification, claims and related disclosure and prosecution documents. Students will also learn the fundamentals associated with a freedom to operate analysis, basic principles of patent licensing, and patent due diligence protocols in connection with an IP related acquisition. The final module will focus on post grant review procedures including preparation of IPRs, CBMs and PGR Petitions and related strategies in using these procedures. Post grant review tactics will be discussed in the litigation context, and the mechanics of preparing the Petition. The final project will be directed to preparing an inter partes review (IPR) Petition. Students will explore cutting edge patent law issues in a practice-oriented context that will help them not only develop specific patent practice skills, but will help them understand and apply important patent law principles and cases.

Attributes: IPIE, JD, LAW.
Prerequisite: IPGL 0131.

Updated: 07-27-2020
IPGL 0129. Fashion Law and International Trade. (1 Credit)
This course covers various federal laws and regulations affecting the importation into, exportation from, and sale of fashion products in the United States, with comparative reference to other jurisdictions. It provides a practical, step-by-step approach to reviewing and analyzing diverse fashion products (e.g., apparel, footwear, eyewear, jewelry, etc.) to ensure that they comply with the ever-changing legal requirements enforced by numerous agencies. We will discuss topics such as: country of origin determination and marking (including “Made in U.S.A.” claims), tariff classification and duty rates, duty-free and partial-duty trade agreements, valuation, composition/care labeling, product safety/recalls, use of animal products (e.g., skins, feathers, etc.), addressing governmental inquiries, and judicial proceedings and decisions. With 97% of apparel and footwear sold in the United States manufactured abroad, we will also discuss the potential effects of global events (e.g. “Brexit”) and the U.S. administration’s call for the renegotiation of various bi-lateral and multi-lateral trade agreements (e.g. NAFTA, etc.) and/or the implementation of a blanket “border adjustment tax.” We will also examine practical strategies for working with and addressing the unique requirements of members of the fashion industry, including fashion houses, their in-house counsel, and other parties involved in the movement of such goods. 1 credit.
Attributes: FASL, LAWF, LLM.

IPGL 0130. Copyright Law. (3 to 4 Credits)
This course examines the law of copyrights including discussions of subject matter, ownership, duration, rights, infringement, fair use and remedies. This course will cover the applicable doctrine and precedents but will also address underlying policies. In this context, it will discuss why and how courts, juries, adversaries and clients approach copyright matters and issues in a real-world sense. The course requires very careful reading of opinions and critical thinking about factors that influence decision-making. This is the first step in predicting what will happen in the next case, and in being able to influence that result. We will also explore copyright matters in the news and international developments. This course will be taught remotely on Zoom through synchronous as well as asynchronous sessions. Asynchronous sessions will consist of, for example, listening to Supreme Court oral arguments that will be discussed during our synchronous sessions.
Attributes: IPIF, LAWT, LLM.

IPGL 0131. Patent Law. (2 to 3 Credits)
This course is an introduction to patent law intended both for students intending to focus their practice on patents and for those preparing for a more general commercial practice. Patent law is a fascinating legal topic because of its combination of statutory and common law elements, its international aspects, and the thorny issues that accompany attempts to match the evolution of the law with the evolution of technology. Because of the importance of intellectual property assets and of technology in general, a basic familiarity with patent law is useful in virtually any commercial practice. The course focuses primarily on substantive patent law, including the law governing patentability and the law concerned with enforcing patent rights. A basic introduction to the United States patent system and the respective roles of the US Patent and Trademark Office and the courts will also be given.
Attributes: IPIF, LAWT.

IPGL 0135. Intellectual Property Law. (3 to 4 Credits)
This course introduces the basic principles and policies of intellectual property law. Intellectual property is an increasingly important part of the modern economy. It is also an increasingly important area of legal practice, and one with a language and conceptual structure of its own. This course will teach you that language and structure. We will cover the three main areas of IP protection—copyright, patent, and trademark—and will also touch on adjacent areas such as trade secret law and the right of publicity.
Attributes: IPIF, LAWT.

IPGL 0152. Smart Securities and Block-chain Regulation. (2 Credits)
Tokenization: Security Tokens (“Smart Securities) and Digital Assets: An examination of the regulatory and legal issues of using blockchain technology in capital markets. Instructor: Donna Redel Guest Lecturer: James Jalil Introduction: Beginning in 2018 and continuing through 2019 the financial applications for digital assets and blockchain use cases have continued to progress. In particular, the industry has moved swiftly to security tokens (i.e. securities represented as blockchain based smart contracts or “tokens”) in a move to be “fully compliant” with security regulations. The Securities & Exchange Commission (“SEC”) and the Commodity Futures Trading Commission (“CFTC”) along with several other regulators have provided some preliminary guidance on how existing regulations apply to this technology. However, the pace of technological development, in the view of many, is outpacing the regulatory framework. Security Tokens (Smart Securities or Digital Assets) are an exciting new blockchain application for the financial system. The adoption of security tokens has the promise of reduced costs, increased transparency and compliance, faster settlement, and the potential for improved liquidity for assets such as real estate, art, and even patents. The move to DeFi or Deregulated Finance is reshaping existing financial institutions and fostering startups. In the course we will discuss the most significant legal and regulatory issues associated with the development and utilization of security tokens. We will cover the history of security tokens, how they are issued, how they trade, how they are regulated and debate many of the “less clear” application of the existing regulatory framework. A brief introduction to blockchain technology and crypto currencies will be included so as to better understand the context as well as technology around Security Tokens.
Attributes: CRCP, LAWB, LAWT, LLM, LMCO.

IPGL 0156. Biotechnology Patents in Food, Drug, and Vaccine Regulations. (2 Credits)
There is a thriving biotechnology industry in the United States today and well over 1,450 technology companies developing diagnostic and treatment technologies in medicine, creating more nutritional food and innovating new industrial processes. Yet this $30 billion dollar sector of the economy is not without controversy. The bio in biotechnology comes from living biological entities—people, plants, animals and even bacteria. People are the source of the raw material for the discovery of genes for research, diagnosis and therapy, raising a whole host of issues about rights and responsibilities and societal obligations. Paper required.
Attributes: IPIE, LLM.
IPGL 0203. Law Practice Technology. (2 Credits)

This course will cover the technological tools of law practice, giving students both an opportunity to use these tools and an understanding of their development. Students will explore case management systems, e-discovery tools, competitive intelligence solutions, firm-specific research portals, and some of the other rapidly evolving applications and devices confronting the 21st-century attorney. "Hands-on" use of these tools will be emphasized. Students will also explore the issues arising from new technological developments in law practice. These topics include new ethics requirements for more technologically savvy attorneys, the implications of technology on client confidentiality, and the automation of Alternative Dispute Resolution. Guest lecturers from local law offices may be invited to showcase examples of the technology adopted in their offices and the accompanying best practices.

IPGL 0204. Technological Change and the Law. (2 Credits)

This course surveys the ways in which law interacts with emerging technologies. We will consider a variety of controversies involving, for example, virtual currency, health technologies, surveillance, and robotics.

Attributes: IPIE

IPGL 0215. Surveillance and Privacy in the Digital Age. (2 Credits)

New technologies, from the Internet to cell phones to drones, have reshaped the world in the past few decades. They have brought new modes of communications and new conveniences—as well as new opportunities for surveillance. This course will explore how the current constitutional and statutory frameworks address surveillance in the digital world and how laws and policies should regulate any threats to privacy posed by the use of emerging surveillance technology.

Attributes: CORC, CRCP, IPIE, LAWT.

IPGL 0229. Fashion Modeling Law. (2 to 3 Credits)

The seminar will provide a comprehensive overview of the legal, business and societal issues faced by fashion models and their agencies. Topics will include the structural, legal and regulatory constraints within which the industry functions; formation and dissolution of business relationships among fashion models, agencies and clients; intellectual property rights, use and and misuse, and litigation as a remedy; the effect of digital media and social networking on the fashion modeling business; immigration and finance concerns; and the significant social and cultural issues relevant to the industry.

Attributes: FASL, LAWB, LAWF, LAWI, LAWT, LIP.

IPGL 0231. Patent Litigation. (2 Credits)

The course covers all aspects of patent litigation from pre-filing considerations to appeal and is designed to address problems that arise in real-world lawsuits. Particular attention is devoted to initial pleadings, discovery, motion practice, and the use of technical experts at trial. The role of juries in patent litigation is also discussed, including the recent advent of so-called Markman Hearings. Lastly practical trial preparation techniques, trial practice, and the law of remedies will be explored.

Attributes: IPIS, LAWT, LIDR, LLM.

IPGL 0242. Artificial Intelligence in the Legal Industry. (1 Credit)

In this course, Huu Nguyen, lawyer, computer scientist, and partner at Squire Patton Boggs will provide a solid substantive introduction to the legal, regulatory, and ethical issues raised by artificial intelligence technologies. <p> Students will also get hands-on experience with leading AI-based technologies currently being adopted by law firms for such purposes as e-discovery, legal drafting, data analytics, legal research, and contract due diligence from representatives from LawCheck, Relativity, Zero, Kira, Ross, and more. <p> This course provides the efficient overview of the law of artificial intelligence accompanied with actual use of leading AI-based practice technology products that you need to put you ahead of the competition at interview time.

Attribute: LLM.

IPGL 0293. Fashion Law. (2 to 3 Credits)

This seminar explores the legal substance of style, with emphasis on current issues involving clothing and the global fashion industry. Topics will include the application of intellectual property law to fashion design; counterfeiting and alleged links to organized crime and terrorism; licensing agreements; import/export regulations and quotas; fashion financing; garment district zoning and urban planning; manufacturing and sustainability; consumer protection; sumptuary laws; and civil rights issues related to apparel. Schedule final exam required. If students wish to satisfy the writing requirement, they must complete a 25 page paper in addition to the scheduled final and may receive a 4th credit for the paper.

Attributes: FASL, IPIE, LAWB, LAWF, LAWI, LAWT.

IPGL 0299. Intellectual Property Law and Design. (2 Credits)

What do a couture gown and a semiconductor chip have in common? Neither adapts easily to the traditional categories of the intellectual property law system. <p> IP assumes a fundamental division between expression and function, institutionalized in the separate forms of copyright and patent protection. Most of the created objects that we encounter in our daily lives, however – from the buildings in which we live to the clothes we wear to the icons on our computer screens – combine aesthetic, expressive, and functional elements. <p> This seminar explores the concept of design as it relates to intellectual property law, including the domestic and international doctrines and mechanisms that address the perceived gap between art and craft. In the process, we will examine the theoretical underpinnings of IP law itself, along with the ways in which creative industries ranging from fashion design to information technology to architecture (and many others) have responded to the challenges of the IP regime. Paper required. <p> Pre- or Co-requisite of either intellectual property law, at least one of the primary courses within the intellectual property field (copyright, patent, trademark), or equivalent professional experience.

Attributes: IPIE, JD, LAWT, LLM.
IPGL 0302. Beyond Intellectual Property. (3 Credits)
The course will explore the interconnection between intellectual property and related subjects, focusing on the challenges of advanced technologies, artificial intelligence (AI), machine learning, robots, Blockchain and cyberspace, on intellectual property, privacy and other legal regimes in the 3A era (autonomous, advanced and automated). Are intellectual property laws relevant when AI systems generate artworks or patents? How do AI systems actually work? Are they really human like? Who should be the owner? Who is (can be) responsible for infringements? Can AI systems be subject to legal rights and obligations? Can regulation, transparency or insurance efficiently control these systems? Why is intellectual property regime important to other fields of autonomous entities (autonomous cars, autonomous weapons and autonomous ADR systems)? The course constitutes novel and non-traditional perspectives of the scholarly discourse between advanced digital technologies and intellectual property laws. <p> Each of the topics will be presented and discussed within the practical challenges as well as the theoretical background and international contexts, in the US and in comparative jurisdictions. Moreover, many of the topics are related to either drafts, suggestions or recommendations of international tools being discussed by leading international organizations, especially WIPO (World Intellectual Property Organization). The course will address, inter alia, the following topics: intellectual property, artificial intelligence, machine learning and robots, Blockchain, 3D printings, the challenges to intellectual property in the digital - cyberspace era and cyberspace privacy, theoretical justifications to intellectual property, the mainstream justifications as well as the hidden justifications, intellectual property rights in the workplace, traditional knowledge, intellectual property and gender, access to knowledge for persons with disabilities, freedom of association of workers from the entertainment sector vs. competition and antitrust laws and many more. <p> The unique character of the course will be the involvement of the students in conducting legal research (US laws, comparative and international and theoretical aspects) and preparing a paper to be published and/or to be submitted (subject to certain limitations) to the relevant international organizations (i.e. WIPO). In this way students will work on research projects that promote innovative recommendations through the design, implementation, and reform of relating conventions and have the opportunity to try to influence policy makers. The students will gain not only knowledge and tools on contemporary advanced technology issues as well as theoretical, international and comparative legal knowledge but also will acquire new ways of thinking and practical legal experience. The students of this course have the option to attend an international seminar in the most important intellectual property international organizations: WIPO in Geneva and the Swiss Institute of Comparative Law in Lausanne, subject to the approval and conditions of the specific organization. Some of the final works will have the option of being published, under certain conditions. <p> The course will include three academic hours of class presentations per week including consulting meetings and discussions with the students regarding their research.

Attribute: LAWT.

IPGL 0304. Trademark Law. (2 or 3 Credits)
This course examines the law of trademarks, right of publicity and related doctrines. The emphasis will be on subject matter, ownership, registration, infringement and remedies.<p> This course will cover the applicable doctrine and precedents but will also address underlying policies. In this context, it will discuss why and how courts, juries, adversaries and clients approach trademark matters and issues in a real-world sense. The course requires very careful reading of opinions and critical thinking about factors that influence judicial decision making. This is the first step in predicting what will happen in the next case, and in being able to influence that result.<p> We will also explore trademark matters in the news and international developments.<p> This course will be taught remotely on Zoom through synchronous as well as asynchronous sessions. Asynchronous sessions will consist of, for example, listening to Supreme Court oral arguments that will be discussed during our synchronous sessions.

Attributes: IPIE, LAWT, LIP.

IPGL 0306. Advanced Trademark Law. (2 Credits)
Prerequisite: Trademark Law, IP Law or permission of the instructor. This is a paper course which may be used to satisfy the writing requirement.<p> The course will start where the basic course in trademark law (or IP Law trademark section) left off. It will go deeply into selected areas of trademark law and practice and also address current trademark matters in the news. <p> We will have guest lecturers, including those from trademark practice, the PTO Trademark Trial and Appeal Board, the European IP Office, and the Executive Director of the International Trademark Ass’n.

Attributes: IPIE, JD, LAWT.
Prerequisites: (IPGL 0135 or IPGL 0304).

IPGL 0307. Advanced Copyright Law. (2 or 3 Credits)
An in-depth analysis of selected areas of copyright law including how the law has been developed by the courts and how practitioners can predict and influence these developments. It will also look at how copyright law is used in and affects core copyright industries – those whose primary purpose is to create, produce, distribute or exhibit copyright materials. We will have some guest speakers from these industries. Can use any copyright casebook you had for a course. The preferred casebook is Copyright Law, Ginsburg, et al., 9th edition. Prerequisite: Copyright Law or Intellectual Property Law or copyright course in another school, or for LL.Ms, without prerequisite course, experience in copyright law. Paper required. Satisfies Writing Requirement.

Attributes: IPIE, JD, LAWT, LLM.
Prerequisite: IPGL 0130.
IPGL 0320. Art Law. (2 or 3 Credits)
Integrally related to intellectual property, art law encompasses the complexities of international law, contract law, and Constitutional law. This seminar will examine the intersection between the law and the art world, a complex world of individuals, institutions, and expressive works. We will explore some of the legal issues associated with those intersections and relationships. The seminar will examine participants’ roles, including artists; art patrons and consumers; art dealers and auction houses; government officials; art experts, such as museums, historians, and critics; as well as the ‘bad guys,’ such as forgers, thieves, and looters. We will analyze the relationships between art institutions and those who produce, collect, protect, and ‘deal’ in art. The substance of the course is an exploration of legal issues, including but not limited to, expressive rights, intellectual property, and moral and economic rights. The course will also focus on the international movement of art in times of peace and war, as well as the preservation and protection of antiquities and cultural property. Student evaluation will be based on class participation, a final paper, and the completion of ongoing readings accompanied by short assignments. In addition to class meetings, students will also be required to view films, attend lectures, and visit museums outside of the regularly scheduled class time.
Attributes: IPIE, LAWT.

IPGL 0321. Art Law Practicum. (2 or 4 Credits)
The Art Law Practicum will focus on the relationship between intellectual property and art. Through discussions, assignments, class readings, visual materials, guest speakers, and field trips, this course will examine how copyright, moral rights, trademark, and rights of publicity affect the production and reception of contemporary art. Practical aspects of this course will include issues with interacting, advising, and representing contemporary artists and arts entities who work in and exhibit diverse artistic practices, strategies and media, such as appropriation art, photography, video/film, conceptual art, digital art, and organic materials. This course will also introduce students to major 20th Century and contemporary art movements and theories necessary to understanding contemporary art and law.
Attributes: LAWT, LLM.

IPGL 0322. Programming for Lawyers. (2 or 3 Credits)
This course provides an introduction to computer programming using the programming language Python. The ability to program (or ‘code’) will make you better-prepared to understand and advise clients whose businesses rely on technology (which today includes most clients). It will also help you understand how computer programs affect various areas of law such as privacy, antitrust, discrimination, e-discovery, and criminal investigation. There are no prerequisites for the course, and any student should be able to complete the class, which is open only to those with no significant programming experience. Grading will be based on the completion of problem sets assigned more-or-less weekly; there will be no exam. Attendance in class and labs, including the first class and lab, is mandatory. Attendance in the first week is also mandatory for students who are interested in adding the course if slots open up; those students should email the professor before the first class. In addition, both enrolled students and those hoping to enroll must complete the first reading assignment and problem set prior to the first class. That problem set will be ungraded, but completing it, or trying to, is essential to enable you to decide if the course is for you.
Attributes: JD, LAWT, LLM.

IPGL 0329. Fashion Law Practicum. (2 or 3 Credits)
Prerequisite: Submission of an application to the Fashion Law Institute’s university email address, fashionlaw@fordham.edu, with the subject header, ‘Application for Fashion Law Practicum Spring 2020,’ no later than MONDAY, OCTOBER 1, at noon. The application should consist of a maximum 200-word statement about the applicant’s qualifications, a resume, and a transcript. Applications made in person, submitted in hard copy, or sent after the due date will be given lowest priority. Only students who receive notification that they have been accepted to the course will be permitted to register. The Registrar’s Office will register accepted students. Please note that acceptance into the course and registration are contingent upon subsequent approval by the fashion house or other fashion-related company, nonprofit organization, or law firm to whom the applicant is assigned for the fieldwork component of the course.<p>This advanced seminar, which consists of both a classroom component and a fieldwork placement, will develop students’ skills in the practice of fashion law. Students will complete a series of drafting assignments of increasing complexity, such as a cease-and-desist letter, a licensing agreement, a retail lease, a manufacturing agreement, an employment agreement, a consignment agreement, articles of organization and an operating agreement for a limited liability company, a model release form, sweepstakes rules, website terms of use, and a privacy policy and/or a complaint, each related to an aspect of fashion law. In addition, each student will be assigned to fieldwork placement at a fashion house or other fashion-related company, nonprofit organization, or law firm with a substantial practice in the field of fashion law.
Attributes: EXP, FASL, IPIS, LAWF, LLM.

IPGL 0332. Counseling and Advocacy in Intellectual Property and Information Technology Matters. (2 Credits)
This course is designed as an experiential course for LL.M. students wishing to understand how to address the needs of diverse clients with issues related to intellectual property and information technology law in a comprehensible, business-friendly and cost-efficient manner. Each skill is approached by examining the underlying theories, where available, through readings and class discussions and demonstrations, and then experientially, by means of in-class exercises and simulations in which students assume the role of the lawyer. These role plays provide opportunities to practice the skills in hypothetical situations, followed by self-evaluation and feedback from faculty, actors, and peers. The readings, which will be provided in advance of each class, are primarily redacted drafts of real client communications that have been modified to illustrate best practices and issues surrounding client communication and advocacy. In critically evaluating the readings and in particular, why particular language was utilized or avoided, students will develop their own skills in writing to and on behalf of clients in ways that are calculated to meet the clients’ needs, respect the clients’ time, anticipate their questions and concerns, facilitate appropriate responses, and persuade others.
Attributes: EXP, LAW, LLM.

IPGL 0402. Technological Change and the Law. (2 Credits)
This course surveys the ways in which law interacts with emerging technologies. We will consider a variety of controversies involving, for example, virtual currency, health technologies, surveillance, and robotics.
Attributes: LAW, LLM.
IPGL 0412. Civ Rts/Liberty in Digital Age. (2 Credits)
IPGL 0413. Digital Civil Rights and Civil Liberties in Global Perspective. (3 Credits)

This seminar explores the emerging law of digital civil rights and civil liberties. The digital revolution opens up tremendous social and economic benefits, but also involves perplexing challenges, including human rights challenges implicating, inter alia, privacy, equality, free speech, and freedom of thought. With the Edward Snowden and Cambridge Analytica revelations, many observers have asked whether we now, in effect, live in a post-privacy society. Increasingly, the digital economy is built on a surveillance (or information) economy, in which technology companies depend on mining data on our consumer habits (and even our political preferences) so that this information can be sold and monetized, for example to advertisers or political campaigns.

On the equality front, we now know that artificial intelligence (AI), big data and algorithms can be used in spheres ranging from predictive policing to the online housing market — whether through facial recognition or other online tools — which can promote online profiling based on race, gender, disability, family status, etc.: Amazon recently admitted that a hiring tool it developed to hire skilled tech workers for its digital economy discriminated against women, as AI uses “machine learning” (and “learned”) to exclude those who went to women’s college or used “gendered” language on CVs. On the speech front, the problems include not only censorship of speech, but the challenge of “too much” speech — concerning whose speech is heard, the competition for limited attention span, and the question of online hate speech. As for freedom of thought, while the New York Times and other mainstream media have always curated our news and information (i.e., what appears on the front page or in headlines), search engines, social media platforms, and a wide-range of other forms of technology now shape, curate, and personalize what ideas reaches each individual’s newsfeeds. Through weekly readings and guest speakers, this seminar will explore who gets to decide how to address these thorny issues; the implications for our democracy and individual autonomy; and what mix of government regulation and corporate self-regulation is ideal. These topics are extremely timely, due to discussions in Washington, DC (and elsewhere) over regulation, newly adopted state laws on privacy (notably in California, the home of Silicon Valley), and the European Union’s adoption of the General Data Protection Regulation (GDPR). Moreover, as AI is able to automate a wide-range of jobs (with greater speed, efficiency, and precision than humans), machines will increasingly replace humans in both “blue-collar” and “white-collar” jobs — from robo-truckers (replacing long-haul trucks) to lawyer-bots (replacing junior lawyers in document review). Even where automation merely effects discrete tasks (as with voice assistants, chatbots, and self-driving cars), how will the machine-human interaction shape what it means to be human? How will it change our relationships with each other, with the state, and even with ourselves — in terms of how we perform and express our identities online?

Attributes: INLJ, IPIE, LAWT, LLM.

IPGL 0500. European Union Information Law and Policy. (2 Credits)

This course offers an overview of fundamental issues of the EU Digital Single Market Policy. Enhancing the use of digital technologies and online services is a European horizontal policy, covering all sectors of the economy and the public sector to achieve a Digital Single Market. The European Commission reinforced its Digital Single Market strategy in May 2015 with the global economic objective of supporting the regulatory barriers and transforming the 28 national Markets into one unique digital market. A Digital Single Market is one in which the free movement of goods, persons, services, and capital is ensured and where individuals and businesses can seamlessly access and exercise online activities under conditions of fair competition, and a high level of consumer and personal data protection, irrespective of their nationality or place of residence. This course considers this Strategy and all the legislative proposals, Communications and reviews of previous directives and regulations on different fields of law, enacted by the European Commission. It also considers the role of the other European institutions, especially the European Parliament and the European Court of justice, and their positive impact on the protection of the fundamental rights of European citizens. Finally, this course takes into account the relationship between the EU and the US, for instance regarding the personal data protection, as well as a brief comparison with the US main rules on information law.

Attributes: ICE, LAWI, LAWT.

IPGL 0510. Fashion Law and Finance. (2 Credits)

Product design, manufacture, distribution, and sales within the fashion industry are engaged in on a global level. In order to fully and effectively manage a fashion company, it is necessary to implement a multinational strategy and to take advantage of the growing market. This course intends to introduce many of the aspects of finance and operations that both affect and influence the fashion industry. The course will offer an introduction to subjects including corporations, federal taxation and international law all while exploring their unique effects on the fashion industry. During the course of the semester, outside speakers may be brought in to relate their experiences in the industry and elaborate on topics we discuss in class. Students do not need a background in finance as a prerequisite to taking this course and are encouraged to enroll so as to expand their knowledge of the fashion industry. The course will walk through the evolutionary stages of a global fashion house.

Course Requirements: Class attendance and preparation. Active class participation is strongly encouraged. Readings will be assigned weekly and you are expected to bring the assigned course materials to class. The final exam will be multiple choice.

Attributes: FASL, ICE, LAWB, LAWF, LL.M.

IPGL 0521. International/Comp Patent Law. (2 Credits)

IPGL 0529. Fashion Ethics, Sustainability and Development. (2 Credits)

Ethics is a rapidly growing concern for fashion companies and their attorneys today. Topics covered in this seminar include ethical sourcing, design and manufacturing; supply chain monitoring; blood diamonds and conflict minerals; corporate reporting requirements; eco-chic or ‘green’ fashion and environmental impact; the Federal Trade Commission’s Green Guides; fair trade; cruelty-free fashion; religious fashion; fashion-related nonprofits; corporate social responsibility and charitable co-branding; and fashion’s role in international development, including ethical issues raised by clothing donations to the poor and to developing countries. Students may apply for an optional one-credit fieldwork placement at a fashion company, nonprofit organization, or law firm. Final paper required.

Attributes: EXP, FASL, ICE, INLJ, LAWB, LAWF, LAWI.
IPGL 0602. Intellectual Property and Advanced Technology: Artificial Intelligence and Blockchain. (3 Credits)

"Standing at the edge of the next digital revolution, when we already live in the "3A era" of Advanced, Automated, and Autonomous systems, we have to confront major challenges to the existing intellectual property (IP) regime as well as other fields of law. In this sense, the course takes you for a journey to the nearest future (that is already here for lawyers)."<p>The course focuses on advanced technologies including, artificial intelligence (AI), machine learning (ML), blockchain, robots, along with other revolutionary technologies, such as natural language processing (e.g. Google translate or 'Sofia'). The course addresses major challenges and threats arising from these technologies, such as IP ownership and accountability when AI systems create works of art and invent new inventions; privacy; and equality, within IP and related legal regimes. We discuss the laws, theoretical justifications, and suggest new and creative reforms.<p>The course constitutes novel and non-traditional perspectives of the scholarly discourse regarding advanced digital technologies and IP and other laws while addressing a series of novel legal questions and rethinking traditional legal concepts around the tremendous potential of these technologies and its rapid developments.<p>How do artificial intelligence (AI) systems or blockchain technology actually work? Are AI systems really human-like? How can AI and blockchain systems replace humans, legal and governmental agents? Who will be entitled to the ownership benefits of AI-generated artworks or software? Who will be held responsible for infringements and subsequent damages of AI-generated works? Are robots and AI systems eligible for legal rights and duties? Should IP laws be replaced with other tools? How can regulation, transparency, or insurance efficiently control these systems? <p>As all AI autonomous devices (e.g. autonomous cars and weapons) are copyrightable and patentable systems, the IP regime has become a crucial factor in addressing new technologies from a legal perspective in court decisions. All these developments pose new opportunities and challenging legal implications that lawyers in all legal fields shall address. <p>The course discusses the most updated regulations and court decisions around AI systems and blockchain in the US and around the world and addresses alternative legal and other solutions, encouraging creative thinking and writing, outside the box. The course will include videos, discussions, moot court, assignments, fieldwork, and more. <p>The students will gain not only knowledge about IP laws in the US, in other jurisdictions and internationally, as well as knowledge about contemporary advanced technologies but they will also acquire the most updated laws, practical legal experience, understanding and new legal discourse, innovative ways of thinking that will also give them a major advantage in their legal career.<p>The students of this course have the option to attend a subsequent international seminar and learn with world-leading experts in the most important institution in the world, such as WIPO in Geneva; Oxford University UK, subject to the approval and conditions of the specific organization. <p>Some of the final works will have the option of being published, under certain criteria. <p>The course will include three academic hours of class presentations per week including consulting and discussions with the students regarding their research. The research paper can satisfy the writing requirement. <br>Class meets: Sept. 23, 30, Oct. 5, 7, 14, 19, 21, 26, 28, Nov. 2, 4, 9, 16, 18, 2020. <br><br>Attributes: CORC, IPIE, LAWT, LLM, LWR.

IPGL 0615. Cybersecurity Law and Policy Workshop. (3 Credits)

This seminar will introduce students to the significant challenges that government, law enforcement and the private sector face in addressing cybersecurity risks. The seminar will focus on cyber threats that have significant legal, economic and social consequences and threats that jeopardize national security. Students will learn about US technological vulnerabilities, the existing legal and policy framework and the development of new policies to protect US interests including those for cyber-defenses and the protection of civil liberties. <br><br>Attributes: CORC, CRCF, INLJ, IPIE, JD, LAWJ, LAWT, LLM.

IPGL 0666. Key Intellectual Property Issues: Past, Present And Future. (2 Credits)

This course will examine important IP issues by looking at how they were viewed by experts and courts in the past, how are they viewed now and what if any changes can be expected in the future. The course materials will be panel transcripts from past and present Fordham IP Conferences in which the issues were discussed, case law and related blogs and law review articles. <p>There is no prerequisite. The first two classes will consist of an overview of IP law. The next six classes will be divided in to two classes each for copyright law, trademark law and patent law. There will be some comparison with foreign law. <br>Attribute: LLM.

IPGL 0693. Blockchain, Virtual Currencies, and Tokens: Business and Legal Issues. (2 Credits)

The course will explore the development of Blockchain as a vehicle for innovation, the legal issues surrounding blockchain projects, and the business cases for both public and private blockchains through the examination of concrete case studies. (This course is cross-listed with the Business School) Paper required. <br>Attributes: CORC, CRCF, LAWB, LAWT, LLM.

IPGL 0708. Governing the Algorithmic Society. (2 Credits)

Society is increasingly controlled by algorithms. New technologies based on finding patterns in data are used in choosing who gets jobs, credit, and housing, where to send police, how long people stay in prison, how speech is regulated and opinions influenced. How should society respond? What role does law play in responding to a world increasingly dominated by algorithmic decision-making? What must we or understand the relationship between technology and society in order to answer that question? <p>This interdisciplinary course will explore how algorithmic decision-making challenges some of law’s fundamental stated and unstated assumptions. We will begin with a brief introduction to theories of technology, society, and law, which will serve as the analytical frame for the semester. In each week thereafter, we will move through different social and legal environments, such as employment, policing, trials, and injuries from autonomous vehicles, to understand how and why algorithmic decision-making is challenging to govern. The readings will draw on cutting edge research in law, computer science, and social theory, as well as contemporary news articles and opinion pieces. By the end of the semester, we will better understand not just the relationship between algorithms and society, but how to think about the governance of technology generally, which will become ever more important as new technologies develop in the future. <p>Assessment will primarily be based on class participation and a final paper. While a willingness to scrutinize the details of technology is required, no math is required or expected.
IPGL 0730. Blockchain and Smart Contracts. (2 Credits)
Blockchain technology is a challenge for the law. The decentralization and potential anonymity of blockchains are in important respects antithetical to the authority of the law. As a result, blockchain is a difficult technology to govern and is even a possible substitute for the law in some areas. This seminar will focus on these governance and control issues. The seminar will introduce the technology and some applications of blockchain, but it is not intended as a thorough survey of either. Instead, the focus will be on the interplay of blockchain and the law.
Attributes: CORC, IPIE, LAWFT, LLM, LWR.

IPGL 0781. Fashion Law Drafting. (2 Credits)
Every major fashion brand today is developing and securing its intellectual property — copyrights, trademarks, and patents. In this course, we will review the law and business of fashion licensing, the anatomy of a license agreement, and current trends in the industry in the US and worldwide. Cases regarding copyright and trademark infringement and counterfeiting will be discussed and reviewed. Monthly writing assignments with 1 final paper/presentation. Professor Angela Byun.
Attributes: EXP, FASL, IPIE, LAW, LAWF, LAWT, LLM.

IPGL 0807. Fintech and Artificial Intelligence: Regulatory and Corporate Law Framework. (2 Credits)
"FinTech" and Artificial Intelligence have been innovating many of the services the banking and financial industry provide: New payment, trading and wealth management technologies have been developed, online lending and fund raising is in a process of disruption. Corporations are trying to understand how the use of AI can lead to better decision-making and regulators are pushing ahead. This course introduces students to the US legal framework with a focus on banking and securities regulation as well as some basic corporate law questions. This includes P2P lending, securitised token offerings, crowdfunding and micro lending as well as algorithmic trading, fund management based on algorithmic learning and artificial intelligence, in the boardroom".
Attributes: CRCRP, LAWBB, LLM.

IPGL 0811. Digital Copyright. (3 Credits)
Since the mid-1960s it has been apparent that digital technologies would pose significant challenges to the evolution of U.S. copyright law. During the first several weeks of the term, we will focus on studying how courts have analyzed the proper scope of copyright protection for computer programs. Although copyright law does not generally protect functionality, it does protect some literal and nonliteral elements of programs, which are, by definition, virtual machines that happen to be constructed in texts. We will review the major appellate court rulings on software copyright scope, including the controversial Oracle v. Google rulings of the Court of Appeals for the Federal Circuit, which Google is seeking to persuade the Supreme Court to review. A second focus will be on the evolution of rules establishing direct and indirect liability of Internet service providers and technology platforms for infringements committed by third parties. A third focus will be on limiting principles of U.S. copyright law, such as fair use and exhaustion of rights, as applied to digital uses of copyrighted works. Because the European Union has different rules about digital copyright protections, some comparative analysis will also be featured.

IPGL 0991. Fashion Retail Law. (2 Credits)
This course will explore current legal issues related to fashion retailing, from single-brand boutiques to large multi-brand stores. Topics include the following legal practice areas that impact retail companies: vendor relationships; licensing and manufacturing; e-commerce negotiations and agreements; labor and employment; real estate and leasing; advertising; regulatory; litigation; corporate governance and M&A transactions; risk analysis; and other related topics.

Interdisciplinary (IDIS)

IDIS 0800. Pre-College Skills Development. (0 Credits)
This course, for entering first-year students accepted through HEOP, is a developmental course with seminars aimed to enhance college survival skills by focusing on issues related to time management, study skills, personal growth, financial aid, and career planning. It is offered as part of the mandatory HEOP Summer Program for new first-year students.

IDIS 1001. Quantitative Skills Review Workshop for Social Studies. (0 Credits)
This workshop is the perfect opportunity to get a refresher or review of quantitative skills for those pursuing studies in the Sciences. While the workshop is designed for students in the Post-baccalaurate /Pre-Medical/ Pre-Health program, it is open to all students who need or would like instruction or a refresher in the listed subject areas. The workshop will provide students with the necessary foundation for Chemistry, Physics, Calculus, and Psychology, and other courses needed to prepare for advanced science studies. The 5-session workshop, conducted in a relaxed setting, will cover essential topics that will help prepare you for a rigorous science curriculum. Topics will include a review of basic algebra, refresher on exponents and radicals, functions and graphs, logs and exponents, polynomial and rational equations, calculator use and exponential and logarithmic expressions. An optional trigonometry overview is available. In person lessons, video links and resources will be provided and in-class problem sessions will assist to increase your math skills and confidence.

IDIS 1002. MCAT Problem Solving: A Unique Approach for ESL. (0 Credits)
The purpose of this two-part workshop is to help students effectively handle the reading passages on the MCAT. General preparation strategies for the MCAT will be presented with a focus on the CARS portion of the exam, emphasizing careful and efficient reading of questions, and applying these techniques to the science sections of the test. While this material is designed specifically for pre-med students for whom English is not the first language, the workshop is for anyone who is struggling to handle the large amount of written material on the MCAT. The sessions discuss the structure of the MCAT while helping students identify and address the skills that are being tested. The workshop will provide techniques and strategies that can be adapted for dealing with the verbal aspects of the MCAT.

IDIS 1005. College Skills Development-1. (3 Credits)
IDIS 1006. College Skills Development. (4 Credits)
For pre freshmen students accepted through HEOP. This is a developmental course to enhance student skills related to college composition, critical reading, mathematical analysis, science and economics. It is offered as part of the mandatory HEOP Summer Program for new freshmen. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
IDIS 1007. College Skills Development-2. (3 Credits)

IDIS 1010. Critical Reading in the Disciplines. (3 Credits)
This course will provide students with the critical skills necessary to read successfully and use reference materials at the college level. Selections from disciplines such as literature, psychology, history, and natural sciences will be analyzed for information, main and subordinate ideas, logical structure, inference, tone, and irony. Written exercises and reports will measure students' comprehension.

IDIS 1100. The Adult Learner: Identity, Change, and Development. (3 Credits)
This seminar has been designed to encourage each student to study his or her own unique identity development in adulthood. Each adult learner will be assisted in examining their skills, values, goals, experience, educational background, learning style and personality. Students can use this information for both short and long term career, educational and life planning. This new self-discovery will be developed through assessment testing, occupational research, informational interviewing and consultations with career development and educational specialists. The course utilizes a combination of readings, lecture, class discussions, presentations, exercises, guest speakers and video material.

IDIS 1200. Seminar: Career Transition Leaders. (1 Credit)
Designed to enhance students' personal/professional understanding of career development and life management skills to transition to a professional/corporate career. The course will assist students to obtain internships in a structured, interactive, open form. It will also offer access and networking with employers.

IDIS 3015. Culture and Community. (4 Credits)
A study of culture and community in contemporary American society and lifestyles. The course will study the entire way of life that is faced by various groups in American life. An interdisciplinary consideration of the concepts of culture and community will be studied. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IDIS 3020. War and New York City. (4 Credits)
This course is an explanation of the impact of war on the political, social, economic, and cultural development of New York City. The course will examine wars and times of conflict from several periods in American history, including, but not limited to: the American Revolution, the Civil War, WWII, and September 11th. An integral element of this course will be using the City itself as our classroom. We will be making several field trips to various locations of historical events, museums, etc. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IDIS 3025. Social Problems in America. (4 Credits)
This course will examine and study major issues and problems in contemporary American society in the context of individuals and community in a complex society. Research and writing will use an interdisciplinary approach. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IDIS 3035. The Helping Professions: Theory and Practice. (4 Credits)
This course will examine the helping professions and the issues related to becoming a well-trained professional, including ethics, burnout, motivation, dual relationships, and boundaries. The class will also examine the major theories and the techniques used by psychoanalysis, cognitive behavioral therapy, group therapy, and others.

IDIS 3040. Gettysburg: A Study Tour. (4 Credits)
Three days and 51,000 casualties the Battle of Gettysburg was the turning point of the Civil War and a seminal moment in the history of the United States. So striking was the battle, President Abraham Lincoln vowed that the men who died there did not do so in vain in fact their sacrifice gave a new birth of freedom to the idea of democracy for the world. Robert E. Lee, deeply depressed at his failure, fearing he cost his nation the possibility of independence and peace, offered his resignation to Confederate President Jefferson Davis. This course will examine Gettysburg from several perspectives, including military and political strategy, Lincoln's Gettysburg Address, Davis' and Lee's reactions, and the battle's long-lasting impact on American society and mythology. The course includes an overnight field trip to the Gettysburg Battlefield. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IDIS 3045. Presentation Strategies for Professional Impact. (4 Credits)
Competent and compelling presentations are important in all professional settings. In this class, students develop their public presentation and performance skills by exploring physical and vocal communication techniques. Taught in a workshop format, students explore verbal and nonverbal communication, use of visual aids, organization, and delivery through weekly action-oriented exercises. Students learn strategies to enhance their public persona and gain confidence through instructor and peer feedback, developing the ability to create presentations that have professional impact. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IDIS 3050. A Bloody Lane and Forever Free: Antietam, a Study Tour. (4 Credits)
Antietam – September 17, 1862 was the single bloodiest day in American military history. The 23,000 casualties on that single day were four times the number of casualties at Normandy. The number of men who died in combat that day was twice the number who died in combat during the War of 1812, the Mexican War, and the Spanish-American War combined. Antietam ended the British and French momentum for recognition of the Confederacy and gave President Abraham Lincoln the opportunity to issue the Emancipation Proclamation. This course will examine Antietam from several perspectives, including military and political strategy, Lincoln's Emancipation Proclamation, Davis' and Lee's reactions, and the battle's long-lasting impact on American society. The course includes a two night field trip to the Antietam Battlefield. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IDIS 3060. Civil War in Popular Memory. (4 Credits)
The Civil War has been the topic of over 50,000 books, thousands of websites, and hundreds of multimedia sources – ranging from films to television shows to comic books to video games. Americans have long been fascinated by the Civil War, which cost more Americans their lives than WW I, WWII, the Korean War, and Vietnam War combined. Much of what Americans know about the Civil War did not come from textbooks or scholarly sources or the classroom, but rather from popular culture. This course will explore how the Civil War is portrayed in popular culture and examine how Americans' perception and memory of the Civil War has changed over time – change that often had more to do with American society at the time than the "facts" of the War itself. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
IDIS 3070. Baseball - the New York Game. (4 Credits)
Interdisciplinary course that will trace the relationship between baseball and New York society and culture. The course will study the early history of the game and historical developments as the emergence of the New York City professional teams in connection with government, culture and issues of society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IDIS 3071. Baseball: The American Game. (4 Credits)
Baseball: The American Game is an interdisciplinary course that will trace the relationship between baseball and American society and culture. The course will study the early history of the game and historical developments during the emergence of the American professional teams in connection with government, culture, and issues of society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IDIS 3080. Winners and Losers in Literature and Film. (4 Credits)
Literature and film are filled with so-called "winners" and so-called "losers." Who can claim these titles and why? Who decides and how? In analyzing these topics, we'll explore what can be learned about the human condition in the individual and in society. Works discussed will include, Snow White; Goldilocks and the Three Bears; Death of a Salesman; Charlie Chaplin's Little Tramp; Glengarry Glen Ross; My Left Foot, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IDIS 3090. Democracy and Social Justice: A Global Perspective. (4 Credits)
Through a multi-disciplinary analysis, this course will explore global definitions of freedom, solidarity and the self within a social context. Readings will lead to discussions on resistance models influencing World Order and the criterion of an underclass, that must organize for transformative change for the sake of survival. Analysis of texts and classroom discourse will explore the development of a nation state, its transformative change for the sake of survival. Analysis of texts and classroom discourse will explore the development of a nation state, its emphasis on economic globalization, cultural difference and liberalizationist criticism, in conjunction with an analysis of social ethics and morality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IDIS 3800. Internship. (3 Credits)

IDIS 3999. Tutorial. (3 Credits)

IDIS 4999. Tutorial. (1 to 4 Credits)

**Interdivisional (GSE) (EDGE)**

EDGE 0210. Child Abuse Identification and Reporting Workshop. (0 Credits)
Child Abuse Identification and Reporting Workshop (0 credit)

EDGE 0220. Drug, Alcohol, and Tobacco Training. (0 Credits)
Drug, Alcohol and Tobacco Training (0 credit)

EDGE 0230. Schools Against Violence Education Workshop. (0 Credits)
Schools Against Violence Education Workshop (0 credit)

EDGE 0250. Health and Physical Education Training. (0 Credits)
Health and Physical Education Training (0 credit)

EDGE 0260. Dignity for All Students Training. (0 Credits)
Bullying behaviors and the impact of bullying on students, the importance of bullying behavior prevention and intervention, and key strategies to address bullying.

EDGE 0270. Autism Training Module. (0 Credits)
This module is an overview of Autism Spectrum Disorders (ASD) and will examine the psychological, physiological, social, and educational characteristics of individuals who have been identified as having autism. The module will focus on definition, diagnosis, causes, intervention and program planning.

EDGE 0666. Maintenance of Matriculation. (0 Credits)
ADV. MSE. MST - Maintenance of Matriculation (0 credit) (MAINTENANCE OF MATRCLTN) Added degrees to title as doctoral students were registering for this course instead of either doctoral seminar or mentoring.

EDGE 0990. Dissertation Oral Defense. (0 Credits)
Dissertation Oral Defense (0 credit) (DISSERTATION ORAL DEFENSE)

EDGE 0999. Dissertation Format Review. (0 Credits)
Dissertation Format Review (0 credit) (DISSERTATION FORMAT REVIEW). Notified March 18, 2014 that billing is now from .000 to 1.000.

EDGE 6100. Issues and Trends in American Education. (3 Credits)
The course is designed to provide students with the opportunity to become familiar with the important movements, trends, and innovations that are shaping the education profession.

EDGE 6101. Race and Multicultural Education in American Society. (3 Credits)
Examines the concept of cultural pluralism—the values, traditions, and aspirations of various immigrant and ethnic groups; examines the institutionalized nature of prejudice and its impact on the cultural, economic, social status, and mobility patterns of selected ethnic groups.

EDGE 6106. Hre Practicum I. (3 Credits)
This course integrates the knowledge and skills acquired during the program. In this first practicum, students identify an organizational problem and begin the consultation process. They must identify a sponsor, contract for the assignment, collect data and provide feedback to the appropriate organizational members.

EDGE 6107. Hre Practicum II. (3 Credits)
This course continues the process begun in Practicum I. In partnership with the organization, students design and implement an intervention based on the data collected earlier in the consultation process. They must evaluate the performance outcomes associated with the intervention.

EDGE 6226. Design of Interactive Learning Systems. (3 Credits)
Cognitive theory and programming skills are taught that enable students to develop multimedia instructional software in a variety of paradigms (for example, simulation, coaching, hypertext, multimedia, tutorial, and drill and practice). To ensure instructional effectiveness, emphasis is placed on building instructional strategies (based on cognitive theory) into the design. To ensure usability, human-computer interaction issues are considered (again, based on cognitive theory). Prerequisite: PSGE 5220 or consent of instructor.

EDGE 6703. Meas Hum Res Ed. (3 Credits)
Focuses on understanding, using and developing assessment tools in the workplace. Students design an instrument, collect and analyze data, and write and present their findings. Measurement concepts of reliability and validity are discussed in relation to developing or purchasing assessment tools.
EDGE 8001. Doctoral Research Apprenticeship. (0 Credits)
A seminar (two consecutive semesters and a summer) in which the student is required to attend monthly seminars. The student is required to undertake research with a faculty member, culminating in a research project that demonstrates the student’s ability to do doctoral work. Prerequisite: Permanent Matriculation Status.

EDGE 9990. Independent Study. (0 to 4 Credits)
Designed to enable students to study selected topics in depth and to conduct research. For matriculated students only. An outline of the proposed work must be approved by the adviser. Registration only by approval of professor directing study, chairman of the student’s division, and director of graduate studies.

EDGE 9995. Doctoral Maintenance of Matriculation. (0 Credits)
Doctoral Maintenance of Matriculation (0 credit) (DOCTORAL MATINTENANCE)

EDGE 9999. Dissertation Mentoring. (0 Credits)
Consultation with mentor and dissertation committee on defense of completed dissertation work.

International Business Bridge (IBGB)

IBGB 6001. Applied Finance. (3 Credits)
IBGB 6002. Financial Statement Analysis. (3 Credits)
IBGB 6003. Read & Write for Business I. (3 Credits)
Read & Write for Business I.
Attribute: ESL.

IBGB 6004. Pres & Public Speaking. (3 Credits)

IBGB 6005. Comm: Speaking & Listening. (3 Credits)
Comm: Speaking & Listening.
Attribute: ESL.

IBGB 6006. Excel Applications and Modeling. (3 Credits)
Attribute: ESL.

IBGB 6007. Applied Economics & Analysis. (3 Credits)

IBGB 6008. Marketing Analytics. (3 Credits)

IBGB 6009. Read & Write for Business II. (3 Credits)

IBGB 6010. History of American Business. (3 Credits)
This course will focus on the interrelationships between the business community and the development of the United States of America. The course is divided into three sections that will cover such topics as the colonization of America by the Europeans, industrialization in the United States and the civil war and creating an environment of business regulation.

IBGB 6011. Business Ethics. (3 Credits)
The goal of this course is to help students create a strong base for making sound moral judgments as they evaluate their own values and make managerial decisions; to help them argue ethically in business environments and contribute to group decisions; and to help them understand and evaluate opinions of those from different cultural traditions or ideological backgrounds as they differentiate between what is right and what is politic.

IBGB 6012. American Business Landscape. (3 Credits)
The business landscape in America can be vastly different than your home country. This course will give you a foundation for how various industries operate, what the different business customs are, and how culture plays a large role in business. This will help prepare student for their time spent in New York. The course covers the topics below. A segment of each topic is assigned to groups within the class to prepare a presentation to their classmates. Finance Industry Marketing Industry Accounting Industry Entertainment Industry Government Regulatory Agencies Stock Market Business Etiquette Sports Industry Doing Business Abroad Social Media Education.

International Law (ITGL)

ITGL 0101. Introduction to United States Legal System and Process. (2 or 3 Credits)
This course presents an overview of the U.S. legal system. Subjects include an overview of the U.S. system of government including federalism, separation of powers and checks and balances, and supremacy and preemption; the judicial systems, including the organization and functioning of the federal courts, state judicial systems, and the lawmaking power of the courts; sources of law, including the distinction between primary and secondary sources of law and the use of precedent, including the defining principle of stare decisis and synthesizing case law; and an overview of civil litigation in the U.S. Case reading and analysis is a fundamental aspect of this course.
Attribute: LLM.

ITGL 0103. Perspectives in United States Law. (2 to 4 Credits)
This course will examine current American law based on case law and statutory law related to selected topics in contracts, criminal law, wills, corporations, domestic relations and New York Practice with special emphasis on New York distinctions. Note: No prerequisite required for this course.
Attributes: LLM, LMCO.

ITGL 0121. U.S. Legal System and Law Study. (3 Credits)

ITGL 0123. Law Practice Fieldwork for Graduate Students. (1 to 2 Credits)
Fieldwork graded as credit/no credit.
Attributes: EXP, LAW, LLM.
Prerequisite: ITGL 0226 (may be taken concurrently).

ITGL 0203. International Trade Law. (2 to 4 Credits)
This course covers the international law that governs the cross-border movement of goods, services and investment capital. It focuses on both the multilateral (WTO) treaty law that governs normal trade relations among 164 countries, and the regional (e.g., NAFTA/USMCA) and bilateral treaty law that governs free trade relations for smaller groups. We will look at how governments implement their trade treaty rights and obligations through national law and procedure. We will also discuss how counsel can use this international law to compel a foreign government to more readily admit a client’s goods or services into a foreign market, or to better regulate a foreign enterprise in which a client has invested. Among current topics we will examine are the U.S. trade war with China, U.S. trade conflicts with several countries initiated by U.S. national security tariffs on steel and aluminum, increased U.S. use of temporary antidumping, countervailing and safeguard tariffs, current U.S. trade negotiations with Europe, Japan and the UK, and recent U.S. trade negotiations with Canada, Mexico, South Korea.
Attributes: CORC, ICF, LAWI, LLM.

Updated: 07-27-2020
ITGL 0204. Asian Americans and the Law. (2 Credits)
This 2-credit seminar will examine the history of legal regulation of people of Asian and Pacific descent within the United States and its territories. As background, we will begin with the history of Asians in the United States and the connection between race and national identity. We will then explore the evolution of U.S. state and federal laws concerning Asians, focusing especially on immigration, naturalization, and citizenship; anti-miscegenation, economic discrimination, public benefits including education; and civil rights and the Japanese-American internment during World War II. We will reflect on how the history of past regulation of Asian Americans bears upon current hot-button legal questions involving APAs and others, such as race-conscious admissions policies to selective schools and universities, and how APA experiences compare to those of other non-European descent groups. Grades will be based on class participation, a paper of at least 25 double-spaced typewritten pages (including footnotes) on one of a suggested list of topics, and an oral presentation of the paper. The paper satisfies the Law School's written work requirement; there is no exam.
Attributes: INLJ.

ITGL 0213. Litigation Management for the International Lawyer. (3 Credits)
This course aims to provide students with an overview of the various stages of a United States litigation involving foreign parties including practical advice on how to manage a litigation having connections to multiple jurisdictions. At the outset of the course, students will be presented with a fact pattern involving a foreign company being sued for product liability in the United States. Students will take on the role of the law firm hired by the foreign company to handle this complex, multi-jurisdictional litigation. The course will follow this litigation from the filing of complaints throughout the United States all the way through trial and appeal. Specifically, students will learn and discuss issues such as jurisdiction, evidence, discovery (including e-discovery), and class actions. Students will be presented with issues that arise at various stages of an American litigation and understand strategic considerations and techniques for managing these issues. This course is intended for International L.L.M. students.
Attributes: LAWB, LAWI, LIDR, LMCO.

ITGL 0215. Aviation Law. (2 Credits)
Considers problems in the sources and organization of the law of international and domestic air transport, routes and rates, choice of law and forum, hijacking, exculpatory clauses, carrier liability for personal injury, death, and cargo damage, governmental liabilities, types of liabilities and limitations thereof, ground damage and other offensive aircraft operations, including air pollution and sonic boom.
Attributes: LAWB, LAWI, LLM.

ITGL 0226. Law Practice Seminar for Graduate Students. (1 or 2 Credits)
This seminar will explore various topics related to law practice and developing a robust and sustainable legal professional persona. The seminar will begin with a discussion of goal setting, a theme that will be revisited throughout the seminar. In addition, the seminar will focus on three broad features of defining and developing a professional persona: (1) building blocks—(un)conscious incompetence, habit formation, intelligence for lawyers, and leadership; (2) self-management (mindset and dispositions), time management and organization, and wellbeing and sustainability; and (3) relationships—working with others, talent management, effective communication, and your public professional persona. The course will conclude with student presentations reflecting on what they learned in developing their professional persona over the course of the fieldwork and seminar.
Attributes: EXP, LLM.
Prerequisite: ITGL 0123 (may be taken concurrently).

ITGL 0231. International Litigation and Arbitration. (3 Credits)
This course will examine a number of different themes that arise in U.S. civil litigation relating to international litigation and arbitration, such as choice of law, jurisdiction, discovery abroad, foreign sovereign immunity, and the enforceability of foreign judgments and arbitral awards. Each student will be responsible for one reaction paper and presentation on a week’s reading, as well as a final appellate brief and an accompanying moot appellate oral argument.
Attributes: ICE, JD, LAWI, LDF, LIDR, LLM.

ITGL 0234. International Human Rights Scholarship. (2 Credits)
This two-credit seminar will provide a survey of state-of-the-art scholarship in the field of international human rights, broadly defined. After an introductory session, each week we will read and discuss a recent paper written by a prominent scholar of international human rights. Students must submit six reaction papers limited to 1000 words each over the course of the term. No examination will be given. Students who wish to satisfy the writing requirement may write a term paper for an additional credit. Both LLM and JD students are welcome.
Attributes: ICE, INLJ, PIE.

ITGL 0235. International Litigation & Arb. (3 Credits)
This course will examine a number of different themes that arise in U.S. civil litigation relating to international litigation and arbitration, such as choice of law, jurisdiction, discovery abroad, foreign sovereign immunity, and the enforceability of foreign judgments and arbitral awards. Each student will be responsible for one reaction paper and presentation on a week's reading, as well as a final appellate brief and an accompanying moot appellate oral argument.
Attributes: ICF, LAWI, LDF, LIDR, LLM.

This two credit course will focus on the three branches of government, evolving laws and policy of national security in the twenty first century. Readings will cover the Presidential Powers, constitutional challenges, detention and war, national security litigation, and cyber war policy.
Attributes: INLJ, JD, LLM.
An exploration of the evolution of American law and legal policy throughout the war on terror, with a focus on civil liberties, executive powers, and court decisions. The course will examine the country’s major post 9/11 terrorism prosecutions including the military commissions cases at Guantanamo, and will study the course of legislation and policy related to surveillance, detention and war from the fall of 2001 to the present, including the USA Patriot Act, the FISA Amendments Act, and the 2001 Authorization to Use Military Force. Relevant court decisions from the FISA Court, the Supreme Court, and several circuit court decisions will be included as well. (Writing requirement can be satisfied with this course.)
Attributes: ICE, INLJ, LAWJ, LLM.

ITGL 0295. Introduction to Intellectual Property: A Global Perspective. (2 or 3 Credits)
A brief introduction to intellectual property law and how the United States and Europe have taken different paths in determining what deserves to be considered intellectual property worth protecting. This course will mainly focus on global issues in copyright law but will also examine patents, trademarks, and trade secret protection. The course will also address the conflict in enforcing IP across international borders based on the differences in grantable rights in various countries. The discussion will include the recent changes to U.S. patent law that bring it in line with Europe, a number of recent cases from the United States and Europe, as well as treaties (both signed and still being negotiated).
Attributes: ICE, IPIE, JD, LLM.

ITGL 0307. Emergency and the Rule of Law. (2 to 4 Credits)
This is a class about judicial review during times of emergency. Students will explore an array of recent court decisions involving major questions of national security and immigration policy. Students will first explore a number of Supreme Court and appellate rulings after the 9/11 attacks, focusing on the detention and prosecution of terror suspects at Guantanamo Bay and related matters concerning their safe return to third countries and their rights to access U.S. courts while on and off the Base. Students will also explore an array of immigration-related issues that include detention, prosecutorial discretion, and relief from deportation, as well as the Trump Administration's rescission of Obama-era deferred action programs, the Trump Administration's call for efforts to control migration through a border wall, and its more recent interpretations of U.S. asylum law. These issues will be explored through case law, statutes, court papers, and a rich law review literature. In addition to analyzing these questions from the position of legal doctrine and theory — including the relationship between procedural and substantive law and the different ways that horizontal and vertical separations of power can shape court review — students will also employ the tools of courtroom litigators by learning how advocates marshal non-traditional arguments when approaching new and intractable legal problems for their clients. This latter, more granular inquiry will explore features of complex litigation and the practical skills lawyers use in representing clients, including points of trial and appellate practice, litigation strategy, and legal ethics. There are no prerequisites. This course is recommended for those interested in administrative law, constitutional law, immigration law, and national security law. There will be a take-home exam at the end of the semester.
Attributes: ICE, INLJ, PIE.

ITGL 0320. Admiralty and International Maritime Law. (3 Credits)
Seminar style analysis of Admiralty and International Maritime law based upon decisions by United States Courts (primarily), domestic legislation, and international treaties concerning: jurisdiction practice and procedure maritime property persons cargo chartering services and products casualties marine insurance and general average liability emerging topics.
Attributes: ICE, LAWJ.

ITGL 0321. Comparative Law. (2 to 3 Credits)
The course aims to provide an understanding of comparative law as a method and as a body of knowledge. In the first part of the course you will learn how to compare legal institutions through a theoretical inquiry in traditional, as well as innovative, comparative law methods and how to apply these methods to some of the most controversial topics in the current legal debate. The second part will focus on the classic divide between common law and civil law, in particular in American and European legal traditions. It will also address the new understanding of the world law map. In the third part of the course we will turn our attention to globalization, an area where comparative law is essential in the understanding of many contemporary relevant phenomena. The course will offer case studies on different topics in order to test ability in comparing legal institutions and in using comparative law arguments in cross-border contexts. The course will be graded based on a 24-hour take-home final examination (75% of the final grade) and class participation (25%).
Attributes: ICE, INLJ, LLM.

ITGL 0322. Nuclear Weapons and International Law. (2 Credits)
This international law seminar will explore issues as to the lawfulness of the use and threat of use of nuclear weapons in the Post 9/11 World in light of contemporary strategic realities, including Russia's increased adventurism and reliance on nuclear weapons; Iran's nuclear weapons aspirations and the 2015 agreement; North Korea's nuclear weapons; the instability of Pakistan and possible availability of its nuclear weapons to terrorists; the risks and potential effects of an Indian/Pakistani nuclear war; the spread of terrorism and willingness of terrorists to use nuclear weapons; the July 7, 2017 Treaty on the Prohibition of Nuclear Weapons; the risks of further nuclear proliferation and collapse of the NPT regime; the U.S. withdrawal from the Intermediate-Range Nuclear Forces Treaty; the United States' continuing reliance on nuclear weapons notwithstanding its substantial hegemony over the rest of the world in conventional weapons; the widespread practice of nuclear deterrence; and the relationship between nuclear power plants and nuclear weapons. The course will also focus on facts that are central to the legal analysis, including the characteristics and effects of nuclear weapons; psychological factors that affect policies as to nuclear weapons; litigation throughout the world concerning nuclear weapons; and the 1996 Advisory Decision of the International Court of Justice on the Legality of the Threat and Use of Nuclear Weapons. This is a paper course and students are required to present their papers in class. The assignments will primarily consist of readings from the second edition (in process) of Charles J. Moxley, Jr., NUCLEAR WEAPONS AND INTERNATIONAL LAW IN THE POST COLD WAR WORLD (Austin & Winfield, scheduled for 2020) (to be provided electronically). This course can be used to satisfy the writing requirement.
Attributes: ICE, INLJ.
ITGL 0332. International Mergers and Acquisitions. (1 Credit)
This course provides an overview of, and insight into, the issues and complexities associated with cross border mergers and acquisitions. Course materials focus on comparing and contrasting relevant U.S. and European law and regulation (including the fiduciary duties and responsibilities of Boards of Directors in different jurisdictions), understanding the components of acquisition agreements and examining the differences between friendly and hostile takeovers. Class lectures and discussion use significant recent case studies that the lecturers have worked on to explore the M&A dynamic from the perspective of a deal lawyer participant. Many of the case studies involve transatlantic transactions covering U.S. as well as European legal and regulatory issues and considerations. The class will also discuss and debate M&A tactics as well as important ethical considerations encountered in the day to day life of an M&A practitioner. Adjunct Professor Simpson will be assisted by other Skadden partners and associates during the lectures.
Attributes: LLM.

ITGL 0343. Comparative Constitutional Law and Challenges to Democracy. (2 or 3 Credits)
The course will cover various topics of comparative constitutional law, focusing on one issue each week. Issues will include free speech, drunk driving, elections, courts, gay marriage, emergency powers and response to the pandemics, protection of fundamental rights and liberties, and judicial review. We will also explore how constitutional systems change, both by amendments to the constitutions' text and through the interpretation. We will look into questions such as: (1) Where should the limits of hate speech be? (2) Should DUI offenders have the right to have their drunk driving histories erased? (3) Is solving electoral disputes in courts helpful or dangerous for the integrity of elections? (4) Where should the limits be regarding transparency of government and the judiciary? (5) What are the current trends in constitutions worldwide? The course will be taught by a lawyer who has worked as a consultant to governments or international organizations OSCE, European Union, Council of Europe, Greco, and UNDP in Uganda, Canada, United States, France, Finland, Latvia, Monaco, Malta, Romania, and elsewhere. He led successful impact litigation projects in national and international courts. Students will be graded based on a paper on a chosen topic relevant to comparative constitutional law (six to ten pages, 80% of the grade) and active class participation.
Attributes: CRCP, ICE, INLJ, JD, LAWI, LLM.

ITGL 0344. Comparative Corporate Governance. (2 Credits)
This course examines the wide variety of corporate ownership and governance structures around the world from the perspectives of law, finance, and markets. Selected topics will include controlling shareholder versus dispersed shareholder regimes, Chinese state capitalism, mergers, and corporate finance. Legal rules will be situated in the context of national legal institutions and prevailing political economies.
Attributes: ICE, JD, LLM.

ITGL 0347. Immigration Law. (3 or 4 Credits)
This class is a survey of immigration law and policy in the United States. The course is grounded in the rules governing how newcomers are admitted to and removed from this country. It provides an overview of the agencies that make and implement immigration policy. It examines the various categories of visas for temporary visitors, and the routes to permanent residence and citizenship in the United States. It explores the law of asylum for those who fear persecution in their home countries. In addition, the class sets out the criteria for admission to the United States and deportation from it, and reviews removal procedures, with a particular focus on the interaction between criminal convictions and immigration law. The course also addresses the subjects of undocumented immigration and citizenship. But the study of immigration is more than just learning who gets in and who will be barred at the door or later ejected. Immigration policy brings up broad constitutional issues, draws on (and sometimes flouts) core principles of international and administrative law, and, most fundamentally, raises the questions of who we imagine ourselves to be as a country and who we really are.
Attributes: ICE, INLJ, LAWI, LLM, PIE.

ITGL 0350. Human Rights Seminar. (2 to 3 Credits)
This seminar will allow each student to devise their own human rights project or course of study which might include independent research and writing projects or internships at local human rights organizations. These might also include group projects that could have a regional or substantive focus. Seminar content will reflect the projects of the students.
Attributes: ICS, JD.

ITGL 0356. Human Rts Crowley Cswk. (1 Credit)

ITGL 0357. International Taxation. (2 to 4 Credits)
This course is a comprehensive study of the U.S. international tax rules that apply to foreign persons investing and engaging in business in the U.S. and U.S. corporations investing and engaging in business abroad. The “inbound” portion focuses on how the U.S. taxes foreign persons on their U.S. passive income, business income, and income from the sale of real property. The “outbound” portion focuses on the U.S. foreign tax credit rules, the U.S. anti-deferral regimes, and some aspects of the U.S. transfer pricing regime. We also examine important recent developments, such as corporate inversions and the rise of “stateless income.” The application of income tax treaties is an integral part of the course.
Attributes: BFE, ICE, JD, LAWB, LAWI, LLM.
Prerequisite: TXGL 0348.
ITGL 0359. International Business Transactions. (2 to 4 Credits)
The course introduces students to laws involved when doing business in more than one nation. The goals are to provide: 1. Core subject knowledge to students wanting to take only one international business law course 2. A solid foundation from which to pursue advanced topic-specific international law courses to students interested in international careers. The course is divided into two parts. Part I covers underlying legal concepts: Transnational lawyering by U.S. and foreign attorneys; Dispute resolution: issues of jurisdiction, enforcement, arbitration, discovery; Public international law: customary law, treaties, expropriation, nationalization; World trade system: trade regulation, exchange controls, role of private lawyers; Corporations: nationality, Alien corporations, multinational enterprises, limited liability; Intellectual tax: corporation tax status, US taxation of foreign businesses, tax treaties. Part II adopts a transactional approach. Students examine legal issues within the context of fundamental international business transactions: Transnational sales (choice of law and choice of forum, transportation and financing, export controls, anti-boycott legislation, Foreign Corrupt Practices Act); Agency and distribution agreements (termination, exclusive distributorships); Licensing agreements (international aspects of intellectual property law); Foreign direct investment (choice of business form, national restrictions on foreign investment, protection of foreign investments); Mergers and acquisitions (stock purchase agreement, securities law issues, EC Merger Regulation, Exxon-Florio, privatization); and Joint ventures (Chinese regulation of foreign investment). U.S. and EU antitrust law issues will be covered as they arise in many of these transactions. This course will have a Take-home final exam. Student attendance and participation will also be taken into consideration for the final grade.
Attributes: ICF, LAWB, LAWI.

ITGL 0360. Multinational Corporations. (2 Credits)
This seminar is an introduction to a range of legal issues facing business entities that operate in a transnational setting, and more particularly, the legal issues that they face because of their multinational character. The course will focus, inter alia, on methods of entry into other markets and alternative forms of organization; current trends in the use of joint ventures; regulation of foreign direct investment and vulnerability of multinationals to country risk and expropriation. The course shall also examine the risk analysis and preventive use of contractual provisions; antitrust aspects of doing business across borders, extraterritorial application of U.S. securities, environmental and employment legislation; international regulation and codes of conduct for multinationals. Paper Required.
Attributes: ICE, LAWB, LAWI, LLM.

ITGL 0364. European Union and Intellectual Property Law. (2 to 3 Credits)
Paper required. Satisfies the writing requirement. This course explores IP case law from the European Court of Justice and the enacted and proposed EU directives and regulations which harmonize Member State laws of copyrights, trademarks, patents and industrial designs. In addition, international treaties and organizations, including the WIPO, which affect these laws, are examined. Prerequisite: any intellectual property law course here or in another school, or permission of instructor.
Attributes: ICE, IPIE, JD, LAWI, LAWT.

ITGL 0367. International Arbitration. (2 to 3 Credits)
This is a core course in law and practice of international arbitration as an alternative to litigation, private method of international dispute resolution. We will cover in depth the international arbitration process from the arbitration agreement to arbitral proceeding and arbitral award, as well as post-award moves by the parties, such as requests to the courts for setting aside or recognition and enforcement of arbitral awards. In doing so, we will analyze court decisions and arbitral awards and study the 1958 Convention on the Recognition and Enforcement of Foreign Arbitral Awards (the New York Convention), domestic arbitration laws (the Federal Arbitration Act and laws following the UNCITRAL Model Law on International Commercial Arbitration), the rules of leading arbitral institutions (such as the ICC, AAA/ICDR, and LCIA), the UNCITRAL Arbitration Rules, and the IBA rules and guidelines in international arbitration. We will conclude the course with the overview of investment arbitration, where the focus will be made on investor-state arbitrations conducted under the 1965 Convention on the Settlement of Investment Disputes between States and Nationals of Other States (the Washington Convention). We will largely rely on the casebook supplemented by occasional law review articles and more recent cases. There will be several group practice exercises. The course will be graded based on a 24-hour take-home final examination (60% of the final grade) and class participation, including attendance (40%).
Attributes: ICF, LAWI, LDE, LIDR, LLM.

ITGL 0369. International Environmental Law. (2 Credits)
International Environmental Law is no doubt one of the most demanding and innovative fields in international law. The past two decades have seen the emergence of numerous international principles and rules in this area challenging many of the more established rules and principles in the international legal field. Several multilateral environmental agreements (MEAs) have been adopted and international environmental rules regulate almost every environmental issue one can think of. For example, just to mention a few areas, there are treaties dealing with marine pollution, hazardous activities, atmospheric pollution, waste management, access to information and so on. This course aims to offer an overview of international environmental law to allow students to familiarize themselves with the key concepts in this field. The course will begin with an overview of the key international legal principles and rules dealing with the protection of the environment. It will do so by giving an historical introduction to put the evolution of this field in context. After this introductory lectures, the course will address the role that international institutions play in this field before moving on to examine selected treaty regimes to provide concrete and practical examples of the international regulation of environmental issues. In particular, the course will examine some of the most topical global environmental legal regimes, with particular attention to global environmental problems such as the depletion of the ozone layer, the trans-boundary movement of hazardous waste, the conservation of biological diversity and the international responses to climate change. The course, finally, will examine cross cutting issues, including the relationship between human rights and the protection of the environment, the protection of the environment in times of war and the question of compliance with environmental obligations.
Attributes: ICE, INL, J, LAWI, LLM.
ITGL 0371. Human Rights and Resolving Conflict in Northern Ireland. (3 Credits)

ITGL 0395. Corporate Sustainability, Transnational Business, and Human Rights. (2 Credits)
This seminar is focused on the social dimension of corporate sustainability, defined as a company's delivery of long-term value in financial, social, environmental and ethical terms. In particular, this seminar explores the multifaceted intersection of business and human rights, including labor rights. While some still consider that the social responsibility of business is merely to increase its profits, the idea that business has human rights responsibilities - moral and/or legal - has been steadily gaining acceptance. Growing awareness of the impacts that business can have on human rights - positive and negative - as well as of the increasing power of corporations vis-à-vis the States in which they operate has raised the volume on calls for businesses to ensure that, at a minimum, human rights are respected within their operations and value chain. Key developments include: Well-known human rights organizations, like Amnesty International and Human Rights Watch, have launched human rights and business campaigns and monitor and report on human rights abuses by businesses. Consultancies and law firms advise businesses on how to improve their human rights performance. A growing number of multinational corporations now assess their human rights impacts, have introduced human rights policies and training programs, report on their human rights performance and have hired experts in corporate social responsibility (CSR) and human rights. Some companies even find themselves being sued for their involvement in human rights violations. Major international organizations, such as the United Nations, the International Labour Organization and the OECD, have issued principles and standards outlining the social responsibilities of businesses. In particular, a six year process undertaken by the UN Special Representative of the Secretary-General on Business and Human Rights culminated in June 2011 in the endorsement by the UN Human Rights Council of a set of Guiding Principles on business and human rights. Most recently, in June 2014, the UN Human Rights Council adopted a resolution to embark on a process to elaborate an internationally legally binding instrument on transnational corporations and other business enterprises with respect to human rights. These developments beg questions - which will be explored in the seminar - such as why human rights are or should be a business issue; if so, to what extent; what can a company do to respect and support human rights; and what remedies might be available for those whose human rights have been adversely affected by a business. The seminar addresses the following main areas: A) Why human rights is a business issue B) Some further context for business and human rights C) The international business and human rights framework D) Applications of business and human rights E) Remedies.

Attributes: CORC, CRCP, ICE, INLJ, LAWB, LAWI.

ITGL 0402. European Corporate and Securities Law. (2 Credits)
The course offers a comparative overview on basic principles, rules and precedents of European Corporate and Securities law. We will start with a short introduction into the difference between European law and the laws of national member states. Next, we will go through the law governing each corporate governance actor: boards, shareholders, and the general assembly. We will work on case studies concerning, for example, capital increase, shareholder minority rights, institutional and activist shareholders, and competences of the general assembly. We will then move on to main principles of EU securities law, namely prospectus and disclosure rules, insider trading, and securities fraud. Case studies on an “initial coin offering”, on inside information and securities fraud will be discussed in class. Prerequisite/corequisite: Corporations.
Attributes: ICE, LAWB, LAWI, LLM.

Prerequisite: (BUGL 0201 (may be taken concurrently).

ITGL 0441. International Commercial Arbitration. (2 to 3 Credits)
The course will cover the law and practice of international commercial arbitration through casebook readings, lectures and classroom discussion. The topics covered by the course will include the content and effect of the arbitration agreement, authority to arbitrate, arbitrator qualifications, independence and impartiality, appointment of and challenge to the arbitrators, the arbitral proceedings, choice of law in arbitration context and enforcement of and challenges to the award. The student's grade for the course will be based on a final exam, subject to adjustment up or down by one grade level (e.g., B+ to A- or vice versa) for class participation. The learning outcomes for the course are: (i) understand the legal framework for arbitration for the resolution of cross-border commercial disputes, including arbitral authority, the role of courts, ethical considerations, challenging and enforcing awards and (ii) gain familiarity with the main phases of an international arbitration.
Attributes: ICE, LDE, LIDR, LLM.

ITGL 0442. Human Rights Law. (2 to 4 Credits)
This is the core course in the Law School’s human rights curriculum. The course examines issues ranging from mass atrocities to "hate" speech by neo-Nazis to "cultural" objections to rights to basic rights to housing, sex equality, LGBT rights and more. The course begins with the origins of the idea of rights from an historical, philosophical and analytical perspective. It then turns to the rise of the modern international human rights regime, including its theoretical foundations, examines the basic international and regional human rights instruments and oversight and enforcement institutions, and considers remedies under both international and domestic law. The course considers the role of human rights law in the U.S. domestic system, as an example of the role of national law and institutions in securing human dignity. It also examines the human rights of women and refugees, the relationship between international criminal law and international humanitarian law and human rights law, and the human rights responsibilities of business enterprises. Additionally, the course covers selected rights from a comparative perspective (including international, U.S., and other national approaches) on topics as the protection of economic and social rights, equality and privacy in the context of sexual orientation and gender identity, and the protection of rights in counterterrorism efforts. We will also explore the influences of politics and power on human law.
Attributes: ICF, INLJ.
ITGL 0444. Human Rights and Corporate Social Responsibility. (3 Credits)
This course will focus on international human rights law and practice and how the human rights framework applies to business. The class sessions will be divided into three parts: (I) Foundations of human rights; (II) Business and human rights; (III) Implementation challenges of business and case studies of human rights issues in different industries, including academia. There will be one course paper due at the end of the term. A short draft outline will be due in the middle of the term. The assigned readings are drawn from legal and policy writing, news articles and several business case studies. Part of your grade will be based on class participation; you will be expected to have a basic familiarity with the assigned reading and make reference to it in class discussion.
Attributes: INLJ, LLM.

ITGL 0500. International Development and Trade. (3 Credits)
What role does international trade law have to play in addressing poverty and inequality in the global economy? The course focuses on the intersection of two key objectives of the international order and international economic law: the promotion of central rules and policies for the stabilization and liberalization of international trade; and the encouragement of economic growth and development in poor countries. Thus course will consider the challenge of addressing poverty and development in a climate of increasing challenge to the post-World War II consensus on international trade, and assess the effects of current controversies around trade and development for the fracturing world economic order. The first part of the course will focus on the primary multilateral trade organization, the World Trade Organization (WTO), and its predecessor, the General Agreement on Tariffs and Trade (GATT). The second parol of the course focuses on trade regimes affecting particular regions of the developing world, with special emphasis on U.S. trade law and policy in respect of those regions.
Attributes: ICE, LLM.

ITGL 0501. Market Structure Regulation, Trading and Risk Management. (2 or 3 Credits)
This course examines the advancement and operations of trading (particularly high frequency or quantitative trading) in the context of its regulatory framework and market structure. Emphasis is placed on learning how to architect resilient and scalable technological, legal, risk, and compliance programs to properly design, monitor, manage, and supervise trading environments. The course explores algorithmic trading strategies, high frequency trading, dark pools, and what happens when things go wrong from accidental (flash crashes, firm disasters) and intentional perspectives (market manipulation, rogue trading). Case studies and enforcement actions are used to analyze real situations, navigate market structure, fulfill regulatory requirements, and be equipped to “manage the machines.”
Attributes: CORC, CRCP, LAWB, LLM.

ITGL 0510. Antitrust Law and Enforcement - Comparative Perspectives. (2 Credits)
This seminar will explore selected important and current legal and economic antitrust/competition issues in a comparative law setting, with an emphasis on the U.S. and EU laws and decisions. Specific topics will include: -, institutional differences in enforcement (eg administrative authorities, private actions and courts) and policy; the role of economics and experts; cartels and oligopolies; vertical restraints; abusive unilateral conduct; mergers, joint ventures and other collaboration among competitors (eg sports leagues); hot industries – including high tech, transportation, media, telcom, natural resources, etc. – and related global enforcement issues.
Attributes: ICE, JD, LAWB, LAWI, LLM.

ITGL 0516. International Law. (0 to 4 Credits)
This is an introductory course in international law designed primarily for those who have not previously studied the subject. The course aims to illustrate the importance of international law in relation to many of the central issues that preoccupy national governments and to highlight the extent to which the assumptions underpinning it have changed in recent decades. Like any general international law course, the coverage of topics is necessarily selective given the range of possible subjects. The assumption, however, is that the materials provide an understanding of the essential normative and analytical frameworks required to tackle any issue within the field of public and quasi-public international law. It does so by providing an introduction to diverse specialist areas such as human rights, the use of force, international trade, and the law of the sea, as well as exploring how international law is applied in U.S. courts.
Attributes: ICE, INLJ, LAWI.

ITGL 0530. Understanding War, Crime, and Justice after 9/11: Today’s National Security Law in Context. (2 Credits)
This course examines the philosophical and legal arguments which infused the numerous legal debates surrounding war on terror policies. We will look at the long tradition of philosophical and juridical debates which have focused on the relationship between law and violence and the responses over time of the U.S. government and the courts to these evolving philosophical premises. Readings will include Hannah Arendt, Cesare Becaaria, Richard Posner, Michael Walzer, Robert Cover, among others, as well as several Supreme Court decisions related to war and political violence. <br> (Writing requirement can be satisfied with this course.)
Attribute: ICE.

ITGL 0555. Mediation: International and Comparative Perspectives. (2 Credits)
Mediation is a problem-solving process that focuses on individual interests and attempts to develop solutions that respond directly to those interests. Over the last fifteen years, there has been significant growth and development in the field of international mediation and in some respects, a move away from arbitration as a method of international dispute resolution. Reasons for this trend include: the difficulty of enforcing arbitration awards in some countries; the need for global corporations to find an effective method to resolve cross border disputes; increased cross border on line transaction disputes; and the pressure to manage dispute resolution costs. This seminar will introduce students to the wide variety of contexts in which mediation is practiced in public and private settings, from commercial disputes to United Nations peacemaking efforts. Students will study theories of mediation and explore how different mediation models operate under various cultures and codes of ethics. The course is conducted through lectures, selected readings and simulations. A final research paper is required.
Attributes: ICE, INLJ, LDE, LIDR, LLM.

ITGL 0602. United States Foreign Relations Law. (3 to 4 Credits)
This course will provide an in-depth introduction to the relationship between U.S. constitutional law and public international law. On the domestic side, selected topics will include the courts and foreign relations, Congress v. the President in foreign affairs, the role of the states, and the status of treaties and customary international law. With regard to international law, treaties, custom, jurisdiction, and sovereign immunity. Special emphasis will be placed on the place of international human rights in both the international and domestic legal regimes.
Attributes: ICE, JD, LAWI, LAWJ, LLM.
ITGL 0650. National Security: War, Crime and the Rule of Law. (2 to 3 Credits)
This course is an introductory survey of U.S. national security law. Topics include constitutional design and structure; presidential and congressional war powers; detention, interrogation, prosecution, and targeting of suspected terrorists; electronic surveillance; regulation of covert CIA activities; and issues of secrecy and political accountability. In considering those topics, attention will be paid to comparative institutional competence, the allocation of decision-making authority among institutions, trade-offs between security and liberty, and the relationship between domestic law and international laws and norms. Note, however, that this course focuses predominantly on U.S. law and legal institutions. While the course is open to non-J.D. students, it may be difficult for those who have not taken an introductory course in U.S. constitutional law.
Attributes: INLJ, JD, LAWJ, LLM.

ITGL 0691. International Commercial Law Seminar. (2 Credits)
This seminar covers a broad range of private law topics that often emerge in transnational trade and business. Each topic would be considered from an international or transnational perspective: insolvency law; secured transactions (or commercial finance) law; consumer protection (especially consumer financial protection) law; sales law; payments law; transport law (including shipping, air and road transport); recognition and enforcement of judgments; arbitration and conciliation; and e-commerce. This seminar will be taught from a systems approach, which looks to embed learning about areas of the law from the perspective of the economic and political context in which these laws are produced, implemented and enforced.

ITGL 0718. Labor Law in the International Context. (2 Credits)
This course addresses the development of workers' rights in the global economy and explores various obstacles to their successful realization. Trade, investment, and economic growth have expanded rapidly at the international level in the past 35 years. As a result, the rights of workers in a transnational setting have become critically important—for national governments, multinational corporations, international public bodies, and NGOs as well as for tens of millions of workers. The course will examine legal structures and implementation practices that are shaping the rights of workers in this competitive global setting.
Attributes: CORC, ICE, INLJ, LWR, PIE.

ITGL 0747. International Refugee Law and Policy. (2 Credits)
This course examines refugee law in both theory and practice. The first half of the course will look at the principles of refugee law, examining 1) the refugee definition; 2) procedures to determine qualification; and 3) rights and responsibilities during the course of such procedures. The second half of the course takes a practical approach in examining States' responsibility to grant access to refugee protection, and the policies and practices commonly employed to deflect that responsibility. The course will cover recent measures by the US and EU including safe third country designations and agreements. The course seeks to engage students in reflection and discussion. The grade will be based on class participation, interim written reflections and exercises, and a final paper.
Attribute: INLJ.

ITGL 0782. Global Perspective Entrepreneurship Law. (3 Credits)
This course provides an introduction to the theory and practice of entrepreneurship law from a global perspective, as well as a critical analysis of how entrepreneurship supports and complements human rights and civil society efforts. It includes perspectives on the rise of entrepreneurship associated with the global economy, technology, automation and changing labor opportunities. Topics include the role of entrepreneurship in a global economy, corporate social responsibility, disruptive technologies, microbusiness, social business, social entrepreneurship, the creative economy, sustainable local economies, cooperatives and shared work, and inclusive entrepreneurship. The course will also cover the role of transactional lawyers in representing entrepreneurs and the legal structures that promote profit alongside sustainable economic and human development.
Attributes: JD, LLM.

ITGL 084. IMMIGRATION, ENFORCEMENT, AND PROTECTION FIELDWORK. (1 Credit)
Immigration, Enforcement, and Protection will immerse students in current issues in immigration enforcement and refugee protection in the United States through an academic and experiential component. For the first week of the Winter Term, students will participate in a seminar that explores the unique legal landscape applicable to the border region of the United States through the lens of two dominant but competing policy frameworks in immigration law: international protection and domestic law enforcement. The course will introduce students to key provisions of domestic and international law that assign and restrict the power of federal and state government actors, citizens, and noncitizens in the border region and at ports of entry. It will also examine policy choices related to protection and enforcement with a focus on civil immigration detention and expedited removal proceedings. Students will spend the second week of the Winter Term in Dilley, Texas, working under the supervision of the course instructor and licensed attorneys at Texas Rio Grande Legal Aid ("TRLA"). Students will apply their academic coursework to supervised, limited-scope representation of asylum-seeking families in expedited removal proceedings. Through the seminar component, the course aims to prepare students to think critically about their observations and experiences on-the-ground and to contextualize those observations and experiences within the broader framework of the rule of law at the southern border. By placing them in Dilley under the supervision of TRLA attorneys and Fordham faculty, the course aims to develop students' client counseling and advocacy skills while exposing them to creative, crisis lawyering and providing desperately-needed legal services to a vulnerable population. Students will spend 12.5 hours in the seminar and will perform at least 45 hours of on-the-ground work and given the demands of on-the-ground advocacy very likely more. To meet the requirements of an experiential course, students will be required to set goals during the seminar and write self-reflective assignments and keep a regular journal during the field component in Dilley, Texas. Spanish-language ability is preferred, but not required.<p>
For the fieldwork, students depart Saturday, January 6th, and return Saturday, January 13th. The Feerick Center arranges for and pays for flights from New York City to Texas and back to New York, ground transportation in Texas, and accommodations in Dilley, Texas but not students' food expenses. Acceptance in the course is subject to Feerick Center approval. Registrants will receive instructions after they submit the Winter Registration Form .
Attribute: LLM.
ITGL 0875. Immigration, Enforcement, and Protection. (1 Credit)
Immigration, Enforcement, and Protection will immerse students in current issues in immigration enforcement and refugee protection in the United States through an academic and experiential component. Attributes: INLJ, LAWJ, LLM.

ITGL 0876. Global Business, National Security, and the Law. (1 Credit)
This course will examine the nexus of national security interests and the fight against financial crime, namely the use of economic sanctions and anti-money laundering initiatives to deprive criminal enterprises and terrorists of access to the US financial system. The course will also examine the challenges that global corporations face in trying to abide by the laws involving economic sanctions, second order liabilities, and Foreign Corrupt Practices Act issues. The course will discuss key agencies, including the NSA and DHS, with a focus on the Department of Treasury’s Office of Foreign Asset Control and Financial Crimes Enforcement Network, their mandates and the unique role financial institutions play in executing on those mandates, as gatekeepers to the U.S. financial system. Readings will include a selection of enforcement cases, articles and regulatory guidance that demonstrate how national security policy objectives are dependent, at least in part, on the effective deterrence and detection of financial crime.
Attributes: CRCP, INLJ, LAWJ, LAWJ, LLM.

ITGL 0895. International Business Negotiations: A Simulation with Cardozo School of Law. (3 Credits)
This course is structured around a semester-long, simulated negotiation exercise which is intended to provide an in-depth study of the structuring and negotiating of an international business transaction. This class will be taught in counterpart with a class at Cardozo Law School. Students in this class will represent a U.S. pharmaceutical company, and the students in the class at Cardozo will represent an African agricultural production company. The two companies are interested in working together to exploit a new technology developed by the pharmaceutical company that uses the cassava produced by the African agricultural production company. The form of their collaboration could be a joint venture, a licensing agreement or a long term supply contract. The negotiations between the two classes will take place through written exchanges and through real-time negotiations which will be conducted in face to face meetings, alternating between Fordham and Cardozo. <p>
The purpose of the course is to provide students with an opportunity (i) to experience the sequential development of a business transaction over an extended negotiation, (ii) to study the businesses and legal issues and strategies that impact the negotiation, (iii) to gain insight into the dynamics of negotiating and structuring international business transactions, (iv) to learn about the role that lawyers and law play in these negotiations, (v) to give students experience in drafting communications, and (vi) to provide negotiating experience in a context that replicates actual legal practice with an unfamiliar opposing party (here, the students at Cardozo). Students will also learn about the legal and business issues that may arise in joint ventures, supply agreements and licensing agreements. <p>
The thrust of this course is class participation and active involvement in the negotiations process. Students are expected to spend time outside of class, working in teams, to prepare for class discussions involving the written exchanges, as well as preparing for the live negotiations. Class discussions will focus on the strategy for, and progress of, the negotiations, as well as the substantive legal, business and policy matters that impact on the negotiations. <p>
This class will meet on Thursdays from 6:00 to 8:50. NOTE: Since some of the Thursday live negotiations will take place at Cardozo, students will need to allow for commuting time; it will also be important to be at all negotiating sessions somewhat early to set up and be ready to begin promptly. It should also be noted that negotiation sessions may not end precisely at 8:50; if negotiations are robust, a session may run over to allow for a natural end of discussions. Finally, the last negotiation session will be scheduled for four (4) hours, with the last hour reserved for a collective “debrief” between the students in both classes. <p>
Attribute: LAWJ.
ITGL 0936. Antitrust-Intl Cross Bord Merg. (2 Credits)
Handling an International Cross-Border Merger involves more than just knowing the law. To get a deal negotiated, signed and cleared starts with a knowledge of the law and the regulators, but also requires a sense of what work will work best, when, and with whom. This course examines the business, regulatory, and legal factors that all come into play in getting an international merger negotiated, signed, filed, cleared by antitrust authorities, and closed. We use the actual merger documents and filings used by the parties in the United States and the European Union in a major, multinational acquisition as our working papers. We also use internal client memoranda to consider the client-centered business issues (in addition to the strictly legal ones) involved in mergers and acquisitions. The course starts with an exploration of why companies merge, acquire or divest businesses, to understand what is important to the client in a deal. After a quick review of the governing legal standards, we then move on to the actual filings themselves, including the issues that the regulators raise, why they raise them, and how counsel responds. Finally, we reach the stage of remedies and decrees, including what to divest, how, and where.
Attributes: ICE, LAWB, LAWI, LLM.

ITGL 0950. Introduction to the United States Legal System for M.S.L. Students. (1 Credit)
This course, designed for MSL students, examines the principal features of the U.S. legal system, including federalism the structure and operation of the national government the federal and state judicial systems the use of precedent, methods of reading, analyzing, and synthesizing case law and dispute resolution. The course will be taught on-line, with a few sessions held in the evenings. Online lectures will be available in early August. Students should plan to complete the lectures and required readings before the start of the regular semester. Students will be evaluated on the basis of an examination to be administered early in the semester.

ITGL 0992. Protection of Sexual Orientation and Gender Identity Under International Human Rights. (2 Credits)
This course will explore the protection of LGBTI persons under international human rights law and how sexual orientation and gender identity have been addressed through international and regional mechanisms. In particular, we will analyze specific rights protections identified by key human rights treaty bodies, as well as how these issues have been addressed by the Human Rights Council through various resolutions, the Universal Periodic Review process, and reporting by Special Procedures. We will also compare these approaches to those taken through regional mechanisms such as the Inter-American, European, and African systems. We will use these frameworks to assess rights protections pertaining to such issues as violence against LGBTI persons, criminalization of same sex activity, marriage and same sex relationship recognition, gender markers in government documentation, and equal access to housing, employment, education, and public accommodations. Paper required.
Attributes: ICE, LAWJ.

ITGL 0996. Laws of War. (3 Credits)

International Political Economy and Development (IPED)

IPED 0912. Requirement Preparation. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

IPED 0914. Requirement Preparation in Summer. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

IPED 0922. PhD Comprehensive Examination Preparation. (0.5 Credits)

IPED 0934. Master’s Comprehensive Examination Preparation. (0.5 Credits)

IPED 0936. Master’s Comp Exam-IPED. (0 Credits)

IPED 3999. Tutorial. (3 Credits)

IPED 5550. The UN & Int’l Security. (3 to 4 Credits)

IPED 5560. Conflict Resolution. (3 Credits)
Wars are responsible for the greatest violation of basic human rights, destruction and human suffering. This course studies various attempts at mediation, negotiation, and peace-building that have been used to resolve the conflicts, sometimes without success.
Attribute: HUHR.

IPED 5771. Project M&E: Philippines. (3 Credits)
This course trains students to monitor and evaluate small community development projects. The Philippines, because of its rich and vibrant civil society, offers access to a large number of community organizations and projects focusing on, among other areas, fisherfolk, farmers, indigenous people, women, the rural poor, and the environment. A key component of the course requires students to form research teams that will conduct actual field surveys of local community development projects in the surrounding rural provinces outside metropolitan Manila.
IPED 6000. Latin America: Current Trends. (3 Credits)
The objective of this course is to help students develop the basic tools for political analysis in the context of an overview of the current political environment and economic circumstances of Latin America's main players. The course will provide information and guidelines for understanding the present situation within each of the main influential countries in the region and the interrelationship among these countries. The relationship with the United States and other extraregional players with increasingly important roles in the region, as well as the influence of the Organization of American States will also be explored.

IPED 6010. Emergency Relief Workshop. (0 Credits)
A two day workshop on emergency relief done in cooperation with Fordham's Institute on International Humanitarian Assistance.

IPED 6020. Int'l Emergency Relief. (3 Credits)
(Replaces HAGA 6020). Course studies relief efforts in situations where the capacity to sustain life is threatened frequently by political factors associated with high levels of violence.

IPED 6500. Boren Fellowship Preparation. (0 Credits)
Boren Fellowships provide students opportunity to add important international and language component to their graduate education through specialization in area study, language study, or increased language proficiency in areas of the world that are of significance to U.S. interest. The student will study a less commonly taught language and would be involved in research in a field of study deemed critical to U.S. national security.

IPED 6502. Boren Fellowship: Jordan. (0 Credits)
Boren Fellowships provide students opportunity to add important international and language component to their graduate education through specialization in area study, language study, or increased language proficiency in areas of the world that are of significance to U.S. interest. The student will study a less commonly taught language and would be involved in research in a field of study deemed critical to U.S. national security.

IPED 6503. Boren Fellow: China. (0 Credits)
Boren Fellowships provide students opportunity to add important international and language component to their graduate education through specialization in area study, language study, or increased language proficiency in areas of the world that are of significance to U.S. interest. The student will study a less commonly taught language and would be involved in research in a field of study deemed critical to U.S. national security.

IPED 6504. Boren Fellow: Mozambique. (0 Credits)
Boren Fellowships provide students opportunity to add important international and language component to their graduate education through specialization in area study, language study, or increased language proficiency in areas of the world that are of significance to U.S. interest. The student will study a less commonly taught language and would be involved in research in a field of study deemed critical to U.S. national security.

IPED 6505. Boren Fellow: Senegal. (0 Credits)
Boren Fellowships provide students with an opportunity to add an important international and language component to their graduate education through a specialized area study, language study, or increased language proficiency in areas of the world that are of significance to U.S. interest. Students study a less-commonly taught language and are involved in research in a field of study deemed critical to U.S. national security. The Boren Fellowship assignment for this student recipient is in Senegal.

IPED 6520. Int'l Law & Development. (3 Credits)
Covers international organizations, human rights and environmental law. Attribute: ABGS.

IPED 6700. IPED Fellow: Burkina Faso. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6701. IPED Fellow: Ecuador. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6702. IPED Fellow: East Timor. (0 Credits)
The International and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6703. IPED Fellow: El Salvador. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6704. IPED Fellow: Ghana. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6705. IPED Fellow: Honduras. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6706. IPED Fellow: Jerusalem. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6707. IPED Fellow: Rwanda. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.
IPED 6708. IPED Fellow: Sierra Leone. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6709. IPED Fellow: Lesotho. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6710. IPED Fellow: Cameroon. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6711. IPED Fellow: Uganda. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6712. IPED Fellow: Senegal. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6713. IPED Fellow: Mali. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6715. IPED Fellow: Holy See Mission. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6716. IPED Fellow: Guinea. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6717. IPED Fellow: Philippines. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management and Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6718. IPED Fellow: Haiti. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management and Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6719. IPED Fellow: Malawi. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management and Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development and project assessment.

IPED 6720. IPED Fellow: Kenya. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development, and project assessment.

IPED 6721. IPED Fellow: Zambia. (0 Credits)
The International Peace and Development Fellowship enables a student to gain valuable field experience in project management with Catholic Relief Services. The student will serve overseas as an assistant to a senior project manager dealing with topics that can include project accounting, project design, project proposal development, and project assessment.

IPED 6740. Project Accounting. (1 Credit)
This course is a one-credit, four week review of basic accounting concepts used by project managers working for international relief and development organizations as well as for economic analysts in government and the private sector. Regular and complete accounting courses needed for business careers are offered in the Graduate School of Business.

IPED 6750. Project Design. (1 Credit)
This course is intended to help students (a) understand the origins, purposes and logic of results-based project and program management, (b) know what its major tools are and how they can be used and abused, (c) understand the challenges that the social sector (especially health and education) in developing countries poses to result-based management, and (d) to understand recent trends in international development cooperation that affect project and program management.

IPED 6760. Project Proposal Development. (1 Credit)
A practical course on the written and oral presentation of projects. Students preparing project proposals for Fulbrights and other prestigious awards may take the course at no course for zero credit.
IPED 6901. Women & Public Policy Fellowship. (0 Credits)
The Women & Public Policy Fellowship is an intensive leadership development program offered by the Center for Women in Government and Civil Service (CWGSC). The program is designed to maximize the skills and contributions of women who seek to achieve excellence in public service. The fellowship prepares women for leadership roles in public policy by fostering the knowledge and promoting the skills necessary to become accomplished public service leaders. The fellowship provides policy-related placements in New York State agencies, the Legislature, and statewide nonprofit advocacy organizations.

IPED 8080. IPED Internship. (3 Credits)
IPED 8081. IPED Internship. (1 Credit)
Intended for students who are engaged in an internship in a work that is related to their IPED field of study during the semester/term.

IPED 8085. IPED Internship. (0.5 Credits)
IPED 8090. IPED Intern Fellow. (0 Credits)
IPED 8999. Independent Study. (0 to 6 Credits)
IPED MTNC. Maintenance - IPED. (0 Credits)

International Studies (INST)

INST 1800. Internship. (1 Credit)

INST 1999. Tutorial. (1 Credit)

INST 2500. Introduction to International Studies. (4 Credits)
This course uses an interdisciplinary perspective to explore the issues and questions that define the modern world and contemporary life. It asks: What political, economic, historic, cultural, environmental, and social dynamics and problems shape our world at the global, national, and local level? The goal is to prepare students for the international studies major by teaching them to think, read, research, and write analytically and critically, so they may face the challenges of today's world. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: GLBL.

INST 2800. International Internship. (2 Credits)

INST 3000. International Internship. (4 Credits)
Students intern in internationally oriented organizations and businesses in the New York metropolitan area for approximately 112 hours during the semester. The instructor works with each student to find a placement that meets the student's interests and needs. Students discuss and analyze their internship experience. They also analyze and discuss international affairs in relation to their internships. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ISAF, ISAS, ISEU, ISIN, ISLA, ISME.

INST 3100. The Global Environment. (4 Credits)
The course surveys the impact of globalization on the environment since the end of World War II, and analyzes the outlook for the future. It draws on the social sciences and humanities to study how the internationalization of culture, economics, and politics have transformed the natural and human-made environment the world over. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ASSC, ENST, ESEL, ESHC, ISIN, ISWH, LALS, LASS, PJEN, PJST.

INST 3859. Post-1945: A Global History. (4 Credits)
Students study the dramatic post-World War II transformation of the world, including the role played by economic revival, technological change, institutional innovation, and increasing interconnection between regions. They analyze why it is increasingly important to think globally, even when studying "local" issues, problems, or actions. The course especially brings into focus the fabric of the post-World War II world in order to better analyze contemporary affairs. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ISIN, ISWH, LALS, LAUH.

INST 4000. International Studies Senior Thesis Seminar. (4 Credits)
This is a capstone seminar in which students conceptualize, plan, research, and write their senior thesis under the guidance of the thesis course instructor and their faculty thesis adviser. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

INST 4620. The World of Democracy. (4 Credits)
This course studies democracies across the globe, analyzing the meaning of democracy in different theories and cultures. It then compares the political systems of different nations, asking how democratic they are. It concludes by assessing the state of democracy in the world today. Note: This course is identical to POSC 4620. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ASSC, EP4, ISAF, ISAS, ISEU, ISIN, ISLA, ISME, PJCR, PJST, VAL.

INST 4800. Internship. (4 Credits)

INST 4999. Tutorial. (4 Credits)
In consultation with the Director of the Program, students may take an appropriate tutorial in their area of interest.

Attributes: GLBL, ISIN.
Introductory Law (LWGL)

LWGL 0001. Admin Resched Block. (0 Credits)

LWGL 0105. Legal Process and Quantitative Methods for Lawyers. (1 Credit)
Legal Process will teach new law students about cases, statutes, and other sources of law, with emphasis on common law reasoning and how law develops. Students will be introduced to court structures and the litigation process, as well as fundamental concepts of law and legal argument. Quantitative Methods will introduce students to certain essential lawyering skills.

LWGL 0299. United States Law and Legal Institutions. (3 Credits)
This class will introduce students to the basic features of American law that are both distinctive and foundational for non-lawyers engaged in compliance and other forms of legal and quasi-legal work. Topics will include the structure of American legal institutions, common law reasoning and statutory interpretation, judicial review, the administrative state, federalism, as well as a number of aspects of the legal profession.

LWGL 0708. House Meeting. (0 Credits)

LWGL 0807. First Yr JD Makeup. (0 Credits)

LWGL 0903. United States Law and Legal Institutions. (3 Credits)
This class will introduce students to the basic features of American law that are both distinctive and foundational for non-lawyers engaged in compliance and other forms of legal and quasi-legal work. Topics will include the structure of American legal institutions, common law reasoning and statutory interpretation, judicial review, the administrative state, federalism, as well as a number of aspects of the legal profession.

Italian (ITAL)

ITAL 1001. Introduction to Italian I. (5 Credits)
An introductory course that focuses on the four skills: speaking, reading, writing and listening. Students will be introduced to the basic features of Italian linguistic structures, vocabulary, and culture, which studied interdependently, comprise the Italian Language.

ITAL 1002. Introduction to Italian II. (3 Credits)
This course will enhance the reading, writing, speaking and listening skills acquired by students in Introduction to Italian I or from prior study. It will further promote a deeper understanding of Italian and its literary and cultural traditions.

IRST 3412. Irish America. (4 Credits)
This course tracing the historical experience of Irish immigrants from the mid-17th century to the present day. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IRST 3418. 20th Century Irish Women Literature. (4 Credits)
Introduction to 20th century Ireland and both the role of women and how they were portrayed in literature. Focus on gender roles, sex, and marriage, motherhood and society in a slowly modernizing, independent Ireland. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IRST 3419. Contemporary Irish Literature. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IRST 3450. Irish Language and Culture 2. (4 Credits)
This course is a continuation of Irish Language and Culture I and seeks to advance students knowledge of the Irish language. More emphasis will be placed on advancing conversation skills through the use of interactive modern language teaching techniques. The course also aims to provide a greater context of the language's cultural aspects, such as Osean-n-so song, dance, and folk traditions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IRST 4999. Irish Studies Tutorial. (1 to 4 Credits)
In consultation with the director of the program, students may take a tutorial in Irish studies.

IRST 3409. Irish Language and Culture 1. (4 Credits)
This course tracing the historical experience of Irish immigrants from the mid-17th century to the present day. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IRST 3412. Irish America. (4 Credits)
This course tracing the historical experience of Irish immigrants from the mid-17th century to the present day. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IRST 3418. 20th Century Irish Women Literature. (4 Credits)
Introduction to 20th century Ireland and both the role of women and how they were portrayed in literature. Focus on gender roles, sex, and marriage, motherhood and society in a slowly modernizing, independent Ireland. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

IRST 4999. Irish Studies Tutorial. (1 to 4 Credits)
In consultation with the director of the program, students may take a tutorial in Irish studies.

Italian (ITAL)

ITAL 1001. Introduction to Italian I. (5 Credits)
An introductory course that focuses on the four skills: speaking, reading, writing and listening. Students will be introduced to the basic features of Italian linguistic structures, vocabulary, and culture, which studied interdependently, comprise the Italian Language.

Mutually Exclusive: ITAL 1002.

ITAL 1002. Introduction to Italian II. (3 Credits)
This course will enhance the reading, writing, speaking and listening skills acquired by students in Introduction to Italian I or from prior study. It will further promote a deeper understanding of Italian and its literary and cultural traditions.

Prerequisite: ITAL 1001.

Mutually Exclusive: ITAL 1001.

ITAL 1501. Intermediate Italian I. (3 Credits)

Attribute: IPE.

Prerequisites: ITAL 1001 or ITAL 1002.
ITAL 1502. Intermediate Italian II. (3 Credits)
Review of grammar. Intensive practice in conversation and composition. Reading and discussion of graded literary texts. Conducted in Italian. The second semester of Intermediate Italian consists of an intensive oral and written practice aiming at expanding vocabulary and idiomatic expressions. The course will begin with a review of pronouns (direct, indirect object pronouns, combined pronouns, ci, ne) and verbs (in particular passato prossimo and imperfetto), and will move into the study of more complex linguistic structure including the conditional and subjunctive. Aspects of Italian culture will be presented in readings and activities. Conducted in Italian.
Attribute: IPE.
Prerequisite: ITAL 1501.

ITAL 2001. Italian Language and Literature. (3 Credits)
A critical analysis of selected cultural and literary texts; composition, conversation, and review of pertinent grammatical structures.
Attribute: IPE.
Prerequisite: ITAL 1502.

ITAL 2201. Italian Community Engaged Learning: Art and Society. (3 Credits)
This course is part of the core language sequence and corresponds to ITAL2001, Italian Language and Literature. In this course students develop linguistic, cultural, and intercultural skills by studying Italian texts and artifacts in their socio-political context, with a focus on the period after World War II. By collaborating with an Italian cultural Institution in New York state, students will examine the interplay between the local U.S. community and the institution, with a focus on representation and access, and experience and reflect on the negotiation of communication in an intercultural setting.
Attributes: ITAL, ITMO, MLL.
Prerequisite: ITAL 1502.

ITAL 2400. Acting in Italian. (0 Credits)
Course focuses on improving diction, pronunciation, expansion of vocabulary and conversational skills through the study and performance of dramatic works.
Attributes: IPE, THEA.

ITAL 2500. Approaches to Literature. (4 Credits)
A basic course in Italian literature. Close readings in the major forms, prose fiction, poetry and drama, and an introduction to the varieties of critical strategies for reading them. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.

ITAL 2561. Reading Culture Through Literature. (4 Credits)
This course is designed to introduce students to different aspects of Italian cultural tradition and history by closely reading representative literary texts from the early and modern periods, in a variety of genres including poetry, narrative, and drama. Students will acquire a technical vocabulary and practice different interpretive strategies to speak to the study of Italian literature and culture at the advanced level. The course's thematic focus, and the primary texts and secondary sources may vary. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE.
Prerequisite: ITAL 2001.

ITAL 2605. Italian Conversation and Composition. (4 Credits)
Composition with emphasis on improvement of grammatical skills and facility in Italian phraseology. Recommended for those students continuing in Italian as majors or minors, whose curricula will include historical surveys of Italian literature or civilization. Emphasized skills include letter writing, descriptions and exposition. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: ITAL 2001.

ITAL 2640. Classics of Italian Cinema. (4 Credits)
In this course we will explore selected masterpieces of Italian cinema focusing on the visual techniques and narrative strategies developed by world-renowned filmmakers such as Rossellini, Fellini, Visconti, Antonioni, Wertmüller, Tornatore, Benigni, and others. We will discuss how historical events, national, cultural and gendered Italian identities, fashion, and political and social issues have been represented or constructed by means of innovative and unique cinematic languages. Conducted in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.

ITAL 2700. Filming the City Inside and Out: A Cinematic Journey Through Italy. (4 Credits)
This course introduces students to Italian cinema by focusing on the representation of Italian cityscapes and urban life, as well as the dynamic between urban and “peasant” cultures, the urban center and the rural periphery, in modern Italy from the so-called “economic miracle” of the late 1950s to the present, by internationally renowned filmmakers such as Visconti and Antonioni (Milan), Ermanno Olmi (Lombardy), Pupi Avati (Bologna), Fellini (Romagna), Pasolini, Nanni Moretti and Ferzan Ozpetek (Rome), Mario Martone and Matteo Garrone (Naples), among others. At the same time, students will be introduced to the fundamentals of Italian film analysis. Through screenings, critical readings, class discussions, and essay writing, students will develop the appropriate Italian vocabulary and analytical skills to examine a film focusing on its historical and cultural context, and the narrative, visual and sound techniques it employs. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISEU, ITMO.
Prerequisite: ITAL 2001.

ITAL 2705. The Souths of Italy: Words, Images, and Sounds. (4 Credits)
In this course, we will explore the rich and diverse cultural production in Southern Italy in the twentieth and twenty-first centuries with the purpose of challenging general assumptions and stereotypes about the ‘South,’ and breaking through the North–South divide that has plagued Italian culture since Italy’s unification in the 1860s. We will discuss literary texts, visual texts, and music, focusing on the legacy of the past, gender and family relations, urban culture and rural life, the push for modernization, and regional identities versus globalization, among other topics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISEU, ITMO.
Prerequisites: ITAL 2500 (may be taken concurrently) or ITAL 2561 (may be taken concurrently).
ITAL 2800. Italy and the Arts: Politics, Religion, and Imagination in Medieval and Renaissance Italy. (4 Credits)
This course is directed to undergraduates with interests in figurative arts, literature, the history of art, and the humanities. It explores the great changes that occurred in the arts and in their political and religious role during the period of Italian Renaissance humanism. The course concentrates on the 14th and 15th centuries and presents the multifaceted reality of Italian arts within the context of a rapidly changing society at the dawn of modernity. Students will explore the central role all arts play in one of the most fascinating periods in the history of ideas and creativity through a variety of texts, including literature, figurative arts, music, architecture, and theater from Giotto to Michelangelo. Students will learn about the artists’ conceptions of art, the political role of civil as well as religious patronage, the relation between literary and visual languages, and the birth and evolution of the figure of the artist. Readings include works by Saint Francis, Dante, Boccaccio, Giotto, Petrarch, Leon Battista Alberti, Leonardo da Vinci, and Michelangelo Buonarroti. This course includes the use of media and film. Taught in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITMA, MVST.
Prerequisites: ITAL 2500 or ITAL 2561.

ITAL 2805. Gods, Demigods, and Men: Renaissance and Baroque Italian Theater. (4 Credits)
The course is designed to introduce students to the exploration of the theatrical production in Italy during the Renaissance and the Baroque, from Italian theater’s rebirth in 15th century Florence to the masterpieces of the 16th century. We will analyze the development of characters and their vision of truth, society and human relations, while investigating notions of subjectivity and gender. We will see how men, heroes, gods or half-human and half-supernatural creatures struggle against their own desire and lust (or against impediments and adverse fortune) in order to manipulate reality and resolve dilemmas. Readings will include plays by major authors such as Angelo Poliziano, Niccolo Macheavelli, Lodovico Ariosto, Torquato Tasso, Giordano Bruno, And Gian Lorenzo Bernini, and Opera librettos, such as the Orfeo by Alessandro Striggio, with music by Angelo Monteverdi. Some plays will be read entirely, others as selection. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.

ITAL 2910. Emigration in Literature and Film 1850-Present. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE, ITMO.
Prerequisite: ITAL 2001.

ITAL 2999. Italian Internship. (2 Credits)

ITAL 3002. The Art of Translation. (4 Credits)
The study of transferring texts from one linguistic code into another; analysis of various elements of texts, literal and figurative meaning, style, syntax, etc. will be the focus of the course as well as hands on practice working with different types of texts translating form English into Italian and vice versa. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE.
Prerequisite: ITAL 2001.

ITAL 3005. Translation: Theory and Practice. (4 Credits)
This course provides students with hands on experience in the process of translation. Discussions focus on questions of style, syntax and other elements present in the fabric of texts in the source language and explore ways of rendering those structures in another target language. The course provides windfalls that help students deepen their understanding and improve their knowledge of both source and target languages. Theoretical works will be discussed in historical perspective. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.

ITAL 3011. Dante and His Age. (4 Credits)
Readings from Dante’s Comedy in the light of the cultural production of his day including Proveneal and Sicilian lyric, influential philosophical texts, and economic and political changes in 13th-century northern Italy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, MVLI, MVST.

ITAL 3012. Medieval Storytelling. (4 Credits)
Narrative tradition in medieval Italy from the Novellino to Boccaccio and Seracambi. Taught in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITMA, MVST.
Prerequisites: ITAL 2500 or ITAL 2561.

ITAL 3020. Renaissance and Baroque Novella. (4 Credits)
This course will investigate the evolution of Italian narrative prose from the Renaissance to the Baroque. Particular attention will be devoted to the tradition of the unframed short story (Novella Spicciolata), but we will also explore collections of Novelle composed by major authors such as Bandello, Straparola and Basile. Taught in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITRE.
Prerequisite: ITAL 2001.

ITAL 3021. Vice and Virtue in Medieval Italian Literature. (4 Credits)
Informed by Aristotle’s Nicomachean Ethics and Aquinas’ Summa as well as by writings of Andrea Capellanus, Abelard and others, this course discusses the ethical value systems sustained in works by Jacopone, G. D’Arezzo, Donte, Petroue, Boccaccio, as they first expressed in Poetry and Prose. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITMA.

ITAL 3030. Criminal Tales. (4 Credits)
Representation of violence in its political, organized and subversive manifestations in post-war Italy, its historical evolution, its sociological and anthropological interpretations. Films and various literature will be examined. Authors and directors: Rosi, Savino, Wertmüller, Carofiglio, Camilleri, Mammarella, Ferrara, Salvatores, Giordana, among others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, IPE, ISEU, ISIN, ITMO.
ITAL 3050. Arts and Politics in Italian Humanism. (4 Credits)
This course analyzes the main characters of the early humanist movement in Italy. It focuses on arts and politics and presents authors such as Petrarch, Valla, Loredan de Medes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITMA, ITRE.

ITAL 3051. Survey of Literature. (4 Credits)
The social and cultural background of Italian literature with selected readings and analysis of some of the most representative authors of the time. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE.
Prerequisite: ITAL 2001.

ITAL 3062. Ethics and Economic Value in Medieval Literature. (4 Credits)
This course introduces students to the literary representation of economic values such as profit, work, and utility as they emerge in medieval texts. Students will analyze these values within the critical perspective of the 13th to 15th century authors as seen in their political, historical, and literary contexts. This course includes works from early European lyric poetry, and authors such as Dante, Boccaccio, Petrarch, Erasmus, and Leon Battista Alberti. Students will learn to set their discussions in the broad perspective of European intellectual history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITMA.

ITAL 3063. Saturian Spirits: Art and Literature in Italy. (4 Credits)
As an examination of different literary genres of the Italian Renaissance and Baroque (novella, theatre, poetry, autobiography and epic poems), this course will focus on some of the most important courts of the peninsula (Firenze, Urbino, Mantova, Ferrara, Venezia and Roma), and will explore the relation of the visual arts to the literary production of eminent writers and artists (Brunelleschi, Alberti, Pico della Mirandola, Poliziano, Boiardo, Ariosto, Machiavelli, Michelangelo, Leonardo, Cellini, Vasari, Tasso, Striggio, Marino). In addition to engaging in close-readings of key works, students will be encouraged to investigate other art forms such as paintings, sculpture, architecture and music, in an attempt to address the questions: What role did patronage of the arts play during the Renaissance and Baroque? What did it mean to be a writer and an artist in Italy between the 15th and 17th centuries? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE.

ITAL 3065. Lies and Liars in Medieval and Renaissance Italian Literature. (4 Credits)
In the late medieval and Renaissance periods, philosophers, writers, scientists, and artists regularly addressed the problem of how reality, truth, and untruths were strictly intertwined in contradictory ways. In this course, we will analyze the various forms of deceit in order to explore their implications with regard to freedom and power (both political and personal), sincerity or clarity and opacity of the self. We will read works written by leading authors such as Dante, Boccaccio, Leon Battista Alberti, Lorenzo Valla, Luigi Pulci, Matteo Maria Boiardo, Machiavelli, Ariosto, Galileo, Giordano Bruno, and Torquato Accetto. Taught in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ITRE.
Prerequisites: ITAL 2500 or ITAL 2561.

ITAL 3111. New Italian Cinema. (4 Credits)
The representation of social and cultural issues elaborated in the dramatic, multimedia discourse of playwrights and film directors such as Pirandello, Fellini, Moretti; in works that include Six Characters, La Dolce Vita, La Vita e Bella. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISEU.

ITAL 3120. Renaissance Literature. (4 Credits)
A study of the principal poets and writers of the 15th and 16th centuries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITRE.

ITAL 3125. Magnificence and Power: The Medici and Renaissance Florence. (4 Credits)
The course is dedicated to the study of the relationship between culture and politics. In particular we will discuss how the practice of power and the exercise of patronage affected Florentine writers in the 15th and early 16th centuries, during the period of Medici’s supremacy. It will be central to the course to verify why the Medicean government was surprisingly far from being simply a repressive and propagandistic political regime. Indeed, Florence, during those years, became an extraordinary place for the arts and, in particular, for literature. Many Florentine masterpieces were produced in different genres (novella, theatre, poetry, autobiography, epic poems, dialogue) and were influential in the development and the shaping of 16th century European culture-at-large. This course will focus on the literary production of eminent writers and artists such as, but not limited to, Alberti, Pico della Mirandola, Poliziano, Lorenzo de’ Medici, Luigi Pulci, Machiavelli, Michelangelo. In addition to engaging in close-readings of key works, students will be encouraged to investigate other art forms such as painting, sculpture, architecture and music, in an attempt to address the questions: What role did Medici patronage of the Arts play during the Renaissance in Florence? What did it mean to be a writer and an artist in Florence between the 15th and 16th centuries? Course taught in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITRE.
Prerequisites: ITAL 2500 or ITAL 2561.
ITAL 3215. Love and Honor in the Renaissance Courts. (4 Credits)
This course will focus on some of the most important courts of the Peninsula (in particular Firenze and Ferrara) and will explore the epic poems of eminent writers such as Pulci, Bolardo, Ariosto, Tasso, and Marino. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITMO.

ITAL 3280. The Italian Short Story. (4 Credits)
TBA Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ITRE.
Prerequisites: ITAL 2500 (may be taken concurrently) or ITAL 2561 (may be taken concurrently).

ITAL 3452. Italophone Migrant Literature From Africa and Beyond. (4 Credits)
In this course, we will read works written by contemporary Italophone writers, those who have adopted the Italian language initially to document their experience of migration and later to reflect creatively on their culture and country of origin as well as on Italian society and history. What stories do these writers tell? What personal and historical experiences do they describe and give voice to? What languages and narrative techniques do they employ? What is the cultural impact and political relevance of their work in contemporary Italy when considered in Mediterranean, European, and global contexts? We will consider questions of representation; gender, ethnic, racial, and religious identity; and political and cultural pluralism with a dual aim. First, to explore how Italian society has changed or resisted changing in the last decades by confronting its imperial past and current neo-colonial ambitions under the sustained pressure of mass immigration and global mobility. And second, to discuss how these original artistic voices, and the testimony they give, have enriched Italy's literary canon and tradition while also fostering a novel understanding of Italy's cultural history. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, GLBL, INST, IPE, ISAF, ISEU, ISIN, ISME, ITMO, PJRC, PJST.
Prerequisites: ITAL 2500 (may be taken concurrently) or ITAL 2561 (may be taken concurrently).

ITAL 3500. Comedy and Satire in Italian Cinema. (4 Credits)
Commedia all’Italiana or satirical comedy represents a major contribution to world cinema with a significant approach to modifying social injustice, prejudice, and abuses. A broad range of styles and film techniques provide a forum to analyze film language and visual experiences. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE.

ITAL 3530. The Stage and Society Since 1700. (4 Credits)
Social changes, traditions and reforms, love, family and economics as they are interpreted and cast on the stage by renowned playwrights such as Goldoni, Giacosa, De Filippo, Di Giacomo, Pirandello and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE.

ITAL 3550. Italian Unification: Film/Literature. (4 Credits)
Realism and idealism in the achievement of Italian unification analyzed in the works of filmmakers such as Blasetti and Scola, and in writers like Foscolo, Mazzini, Garibaldi, Lampedusa and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITMO.

ITAL 3553. Italy From Unification to 1945: Literature, Culture, and Society of the Modern Period. (4 Credits)
This course will focus on major cultural figures such as Carducci, Pascoli, D'Annunzio, Ungaretti, Visconti, Montale, and Calvino, among others, and will explore their relationship with and contribution to the social conditions and developments of their times. Taught in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE, ITMO.

ITAL 3625. The Modern Italian Theater. (4 Credits)
Italian playwrights such as: Pirandello, Betti, Fabbri, Dr. Filippo Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE, ITMO.

ITAL 3650. Italy at War. (4 Credits)
In this course we will read literary works—narrative, theater, and poetry—written in Italy during three key periods of its modern history, namely World War I, World War II, and the so-called ‘years of lead’ (the late 1960s through the early 1980s). We will discuss the response of Italian writers and intellectuals to war, fascism, and terrorism by focusing our attention particularly on the techniques that they use to represent, exalt, or denounce individual and collective violence, and to support or critique extreme ideologies, whether on the right or on the left of the political spectrum. In Italian. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISEU, ITMO.
Prerequisites: ITAL 2500 (may be taken concurrently) or ITAL 2561 (may be taken concurrently).

ITAL 3650. Italy at War. (4 Credits)
Outstanding Italian women writers such as Colonna, Morra, Deledda, Ginzburg, Morante, Maraini, Loy. Taught in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISEU, ITMO, WGSS.

ITAL 3701. Italian Women Writers. (4 Credits)
Outstanding Italian women writers such as Colonna, Morra, Deledda, Ginzburg, Morante, Maraini, Loy. Taught in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITMO, WGSS.

ITAL 3901. Narrative and Film. (4 Credits)
The development, trends, and interplay of literary texts and Italian film in the history of the Italian cinema from its origins to today. Films by DeSica, Visconti, Bertolucci, Pasolini, Taviani, Bellochio, Bosco, and Tornatore. Literary works by Pirandello, Bassani, Levi, Boccaccio, Cain and Verga. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ITMO.
ITAL 3910. Italy Today. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISEU, ITMO.
Prerequisites: ITAL 2500 or ITAL 2561.

ITAL 3920. Words on Fire: Poetry/Soc. Today. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.

ITAL 4006. Dante's Cosmos: Medieval Science, Theology, and Poetry in the Divina Commedia. (4 Credits)
This course investigates Dante's cosmos in the Divine Comedy through medieval science, theology, and poetry. Disentangling the context of the Comedy from Dante's encyclopedic culture through reading in the disciplines of his time will lead students to a deeper comprehension of the multidimensionality of Dante's universe than is possible through any singular disciplinary. The course will broaden students' perception of the medieval cosmos in contrast with contemporary notions of cosmology. Taught in English with readings and writing in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, IPE, MVLI, MVST.

ITAL 4010. Anni Di Piombo/Years of Lead: Culture, Politics, and Violence. (4 Credits)
The period from the late 1960s to the early 1980s in Italy, known as "anni di piombo" or years of lead, was characterized by intense social and political unrest, and terrorist activities. The 1969 bombing in Piazza Fontana in Milan and the 1980 bombing of the train station in Bologna serve as the tragic bookends of a decade of political violence culminating in the kidnapping and murder of Aldo Moro by the Red Brigades in 1978. In this course, we will study these years by closely examining the cultural production of the time – literature, film and other media. We will pay particular attention to the social and political motivations underlying extremist activism, both left- and right-wing, as represented in literature and the popular press, and to writers' filmmakers' and intellectuals' diverse responses to politically motivated violence, whether to criticize the terrorists themselves or to question the state-sponsored "strategy of tension". We will also discuss the ways in which these experiences have been revisited and reimagined in recent years, and their relevance for today's Italy. Taught in English with texts in Italian and English translation. Coursework in Italian for credit toward the Italian major or minor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, EP4, IPE, ITMO, VAL.

ITAL 4800. Italian Internship. (2 to 4 Credits)

ITAL 4998. Senior Thesis Tutorial. (4 Credits)
Independent research, supervised by a faculty in the language, leading to the completion of a senior thesis.
Attribute: IPE.

ITAL 4999. Tutorial. (1 to 6 Credits)
Study of a particular aspect of Italian literature or thought. Independent research and readings. Weekly or bi-weekly meetings with faculty adviser. Designed for majors with permission of instructor.
Attribute: IPE.

ITAL 5090. Italian for Reading. (0 Credits)
This course provides students with the skills for reading Italian. It combines instruction of basic structures of grammar and syntax with the application of techniques in building vocabulary, reading comprehension and translation practice in a collaborative learning setting. Students will read texts from various disciplines in the humanities and social sciences and will gain practical experience in translation and research methods.
Attributes: IPE, MVSG.

ITAL 6005. Translation: Theory and Practice. (4 Credits)

Japanese (JPAN)

JPAN 1001. Introduction to Japanese I. (3 to 5 Credits)
An intensive introductory course that focuses on the four skills: speaking, reading, writing and listening, providing students with a basic knowledge of Japanese linguistic structures, vocabulary and culture, which, studied interdependently, comprise the Japanese language.

JPAN 1501. Intermediate Japanese I. (3 Credits)
Through review of grammar, intensive practice in conversation and composition. Reading and discussion of graded literary texts.
Attribute: IPE.
Prerequisites: JPAN 1001 or JPAN 1002.

JPAN 1502. Intermediate Japanese II. (3 Credits)
This continuation course finishes the grammar review and provides further intensive practice in conversation and composition. Reading and discussion of graded literary texts.
Attribute: IPE.
Prerequisite: JPAN 1501.

JPAN 2001. Japanese Language and Literature. (3 Credits)
A critical analysis of selected cultural and literary texts; composition, conversation, and review of pertinent grammatical structures.
Attribute: IPE.
Prerequisite: JPAN 1502.

JPAN 3999. Tutorial. (3 Credits)
Tutorial.

Jewish Studies (JWST)

JWST 3300. Literatures and Cultures of Modern Israel. (4 Credits)
The course will explore major themes in modern Israeli literature, film, art, and popular culture. Among topics discussed will be the social and cultural dynamics of Israeli history and contemporary life, constructions of identity, questions of ethnicity, nationality, gender, war, and conflict, and more. Texts and assignments will be in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, MEST, MLL.

Updated: 07-27-2020
JWST 3474. The Arab Israeli Conflict: Cultural Perspectives. (4 Credits)
The Arab-Israeli conflict is one of the longest and most controversial
carries on the political geography of Arab-Israeli relations. Our texts emphasize the dialectical relationship between art and politics, and the
effect of politics on art. Specifically, we examine how art is instrumental in producing 1) ‘imagined communities’ with stable national identities and 2) political resistance that disrupts these hegemonic metanarratives. We also consider the internal dynamics of Israeli society as represented in literature and film, especially tensions between the Jewish-Arab, Ashkenazi-Mizrahi, and religious-secular communities. By analyzing canonical and more contemporary stories, poems, and films (including those by S. Yizhar, Amos Oz, Said Kashua, Mahmoud Darwish, among others) we explore the dialectic between art and politics in Israeli society since 1948.
Attributes: ALC, COLI, HUST, MEST, MLL, REST.

JWST 4800. Internship in Jewish Studies. (3 Credits)
This internship program will include work at one of Jewish cultural
institutions in New York City—such as the Center for Jewish History, the Museum of Jewish Heritage, or the Dervner Judaica Collection —during the summer or academic year. The internship will require substantive academic work in the archives or art collections and with public educational programs. For example, the training might include: Research and drafting of text to contextualize archival or museum objects; Approaching and documenting the collections; Verifying information in the collections database; Recording information into the collections database; Researching specific objects and artists/ makers; Preparation of archival/museum materials for public/educational workshops; Researching specific objects in preparation for exhibitions and educational programs. The student will produce a final paper and report on the internship, and they will regularly connect with the director of the Jewish Studies program on the progress of the internship.
Attribute: SL.

Journalism (JOUR)

JOUR 1701. Introduction to Multimedia Journalism With Lab. (4 Credits)
A course designed to introduce the student to various fundamentals of journalism today, including writing leads; finding and interviewing sources; document, database and digital research; and study development and packaging. The course also discusses the intersection of journalism with broader social contexts and questions, exploring the changing nature of news, the shifting role of the press and the evolving ethical and legal issues affecting the field. The course requires a once weekly tools lab, which introduces essential photo, audio, and video editing software for digital and multimedia work. This class is approved to count as an EP1 seminar for first-year students; students need to contact their class dean to have the attribute applied. Note: Credit will not be given for both this course and JOUR 1702. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

JOUR 1702. Introduction to Journalism. (4 Credits)
A course designed to introduce the student to various elements of reporting— including writing leads and articles and finding and interviewing sources— as well as the nature of news, the social role of the press, and the ethical and legal issues that face it. Students are encouraged to submit work to the college newspaper for possible publication. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

JOUR 1761. The Power of News. (3 Credits)
This course studies the interaction between the American mass media, politics and public policymaking. We will examine some of the most important interactions between the press and politicians to answer questions about the role of media in American society. The point of the course is to demonstrate the power of news by examining in depth some of the most important interactions of media and American government. After all, the media is no longer just an institution that covers the news—the media now actually help shape the political process as an important political institution in their own right.
Attributes: AMST, APPI, ASAM, FRSS, JPLH, MANR, SSCI.

JOUR 1800. Internship. (1 Credit)

JOUR 2711. Intermediate Multimedia Reporting. (4 Credits)
This course further develops the skills learned in Introduction to Journalism focusing on how to utilize medium effectively across platforms. Students will gain hands-on experience in multimedia reporting, taking into account the unique strengths of each medium. Students will focus on narrative technique and reporting while learning the technical skills required of each platform. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.
Prerequisites: JOUR 1701 or JOUR 1702 or COMM 2082 or COMM 2083.

JOUR 2712. Intermediate Print Reporting. (4 Credits)
This is an intermediate reporting course which focuses on developing investigative skills through the use of human sources and computer-assisted reporting. Students will develop beat reporting skills, source-building and journalism ethics. Students will gather and report on actual news events in New York City. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.

JOUR 2714. Radio and Audio Reporting. (4 Credits)
A survey of the historical styles, formats and genres that have been used for radio, comparing these to contemporary formats used for commercial and noncommercial stations, analyzing the effects that technological, social and regulatory changes have had on the medium. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.
Prerequisites: COMM 2083 or COMM 2082 or JOUR 1701 or JOUR 1702.

Updated: 07-27-2020
JOUR 2722. Intermediate Feature Writing. (4 Credits)
Developing necessary skills for writing soft news and human-interest feature stories for various news media. Creation of strong ideas, leads, narratives, quotations and interviews, as well as the blending of interesting material and personal writing style, are emphasized. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.

JOUR 2725. Writing Workshop. (4 Credits)
The writing workshop is about writing in all of its forms - press releases, op-eds, movie reviews, short stories, more. There is one writing assignment per week. The emphasis is on writing professionally, for either online or print publications. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.

JOUR 2735. Video Journalism. (4 Credits)
Today, Video Journalists are offered a vast array of outlets and possibilities. From “basic” broadcast, to thousands of cable channels, satellite TV, and the internet. From transmedia to social media, twitters and texts, iThis and iThat, all the way to iMAX! What used to be called “simply” Television News, today covers a media cornucopia. From the most mundane, to extraordinary facts, fictions, ideas, sounds, pictures, and effects, the sky seems to be the limit. This class will help students bring that down to earth, to give birth to their ideas and imaginations, desires and dreams, in very concrete form. Together, we will explore the vision, the art, and the craft of Video Journalism, and create pieces that will (hopefully) make people sit up, watch, and listen. Stories that will challenge them, make them think, and ideally inspire them to make their lives and the world a better place. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.

JOUR 2786. Sports Writing and Reporting. (4 Credits)
In this course, students will read from the canon of great sportswriting, from print to broadcast to digital. To gain practice in this craft, students will also complete original reporting assignments in a range of forms, such as game story, column, feature profile, broadcast script, and live tweeting. The evolution of the sports genre will also be connected to essential social movements, such as civil rights, women’s liberation, and the consequence of big money following the birth of TV. For perspective, specific attention will be paid to the treatment of iconic modern American sports figures, including such seminal athletes as Babe Ruth, Muhammad Ali, Lance Armstrong and Serena Williams. Pre-Req: Introduction to Journalism (Jour 1701 or COMM 2082 or COMM 2083) or permission of instructor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, JWRI.
Prerequisites: JOUR 1701 or COMM 2082 or COMM 2083 or JOUR 1702.

JOUR 2787. Fashion Journalism. (4 Credits)
Fashion Journalism combines beat reporting with an emphasis on the cultural, artistic, social, historical and business aspects of fashion. An in-depth review of the history of fashion journalism sets the stage for students to learn and understand the digital revolution in fashion journalism and marketing, including social media, blogs and websites. Topics to be covered include: Catwalk and trend reporting, fashion criticism, feature and fashion writing. Course will enable students to combine the love of writing with the interest in fashion and acquire the skills to become a fashion journalist using different media formats. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: FASH.
Prerequisites: COMM 2082 or COMM 2083 or JOUR 1701.

JOUR 2789. Sports Broadcasting. (4 Credits)
This class will provide a detailed study in all aspects of the sports broadcasting industry. Students will be introduced to a wide array of techniques and philosophies for sports broadcasting, from fundamentals and essentials to advanced learning methods. The course will consist of discussions, critiques, learning exercises, take home assignments and hands-on practice and participation. The course assumes no prior experience in sports broadcasting.
Attribute: JWRI.

JOUR 3715. Writing for Broadcast News. (4 Credits)
An overview of the skills required for the writing of news stories for radio and television including hard news and features. This course is designed to strengthen the student’s ability to write clearly, concisely and accurately for broadcast emphasizing critical thinking skills. Storytelling techniques are explored, as well as writing to film/videotape. Students will eventually write to deadline under simulated newsroom conditions. Four credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Outside of class, students will be required to screen specific news programming and submit critical essays evaluating content. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Pre-Req: COMM 2082 or COMM 2083 or JOUR 1701 or Instructor permission.
Attribute: JWRI.
Prerequisites: COMM 2082 or COMM 2083 or JOUR 1701 or JOUR 1702.

JOUR 3716. Intermediate Television Production. (4 Credits)
A practical, intensive course in all aspects of television news production. Early in the semester, the course will focus on teaching students the basic skills needed to create high-quality television news, including how to write for broadcast, shoot video, edit video digitally, and create taped pieces for air. The course will also cover on-camera skills. Later in the semester, students will put their television skills into action by producing entire newscasts, where they will anchor, direct, and produce all the content. In addition, the course will also cover key journalism concepts including interviewing, story research and using online media resources. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.
Prerequisites: JOUR 1701 or JOUR 1702 or COMM 2082 or COMM 2083. Mutually Exclusive: JOUR 4742.
JOUR 3717. Online Journalism. (4 Credits)  
(Formerly COMM 3978): Recent shifts in media technologies, corporate structure, and the organization of public life have combined to change the role and the practice of journalism. Exploring these changes as a context, this course will introduce conceptual and practical techniques of reporting, writing, and packaging news for the on-line environment today. Students will learn about and actively participate in doing journalism online. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: DTEM, JWRI, NMDD, NMMI.  
Prerequisites: COMM 2083 or COMM 2082 or JOUR 1701 or JOUR 1702.  

JOUR 3718. On-Air Reporting. (4 Credits)  
In this class, students will learn how to craft and present stories for air. The course will include lessons on how to build a news package, how to present for broadcast (both on television and for podcasts), and will include assignments with in-class deadlines. Class will feature visits from working journalists/news personalities in New York City. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attribute: JWRI.  

JOUR 3719. Data Journalism. (4 Credits)  
Obtaining, interpreting, visualizing, and displaying data are essential skills for journalists in the 21st century. This hands-on introductory course in data visualization will help students learn to use data to tell visual stories. Topics discussed will range from where to find data and how to evaluate sources to how to organize data to create visually appealing graphics that tell stories that can be grasped in an instant. Students will critique published visualizations to identify common pitfalls, as they create a data-based story to add to their portfolio. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attribute: JWRI.  

JOUR 3723. Interviews and Profiles. (4 Credits)  
(Formerly COMM 3081): This course includes intensive work in developing and writing profiles accompanied by readings from Boswell to Mailer. This course will help students develop a personal interview style which complements their individual strengths. Students will examine various interview strategies and learn how to compile their notes into a cohesive and compelling narrative. In-depth critiques of profiles will be provided. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: CVW, ENGL, JWRI.  
Prerequisites: COMM 2083 or COMM 2082 or JOUR 1701 or JOUR 1702.  

JOUR 3724. First Person Journalism. (4 Credits)  
First person journalism is nothing new. As part of the New Journalism movement, reporters like Tom Wolfe and Joan Didion have been infusing their storytelling with subjectivity for decades. Still, the digital shift in journalism and explosion of social media has brought a new wave of first person journalism to the web. This course will explore the history of first person journalism and help students use first person perspective to bring reported pieces to life. Students will look critically at the form to consider the limitations of personal narrative in journalism. On that note, this course will not be limited to personal narratives. Students will also work on reported stories in which their experiences as journalists and citizens impacts their storytelling structure. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: JWRI, LALS.  

JOUR 3725. Profile and Biography. (4 Credits)  
Analysis and practice in applying the principles of biographical writing with the emphasis on contemporary forms in books and magazines. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attribute: JWRI.  

JOUR 3727. Writing for Magazines. (4 Credits)  
(Formerly COMM 3084): Intensive practice in developing ideas into non-fiction pieces intended for general interest or specialized publications. Inquiries, field and library research, interviews, presentation of technical subjects to non-specialists. Students may wish to concentrate on areas in which they have particular interest or expertise. Note: Credit will not be given for both this course and COMM 4201/ JOUR 4727. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: CVW, ENGL, FASH, JWRI.  
Prerequisites: COMM 2083 or COMM 2082 or JOUR 1701 or JOUR 1702.  

JOUR 3728. Special Reporting: In-Depth Reporting. (4 Credits)  
An in-depth reporting class focused on the production of a newspaper Special Report on a given topic each year. The class will use a team-based approach to develop a multi-element story package, in print format from conceptualization, through research, reporting, writing, editing, production and publication. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attribute: JWRI.
JOUR 3729. Investigative Reporting. (4 Credits)
All great reporting is investigative reporting. There is some truth to that claim. But investigative journalism is not about breaking news, or what happened yesterday. It’s an explanation of the complex machineries of big systems: policies, business, foreign policy, economics. It involved systematic, in-depth and original reporting, and it takes weeks, months, sometimes years, using multiple media tools: interviews, documents, data. It shows people how power works, and, at its best, it breaks through layers of deception and obfuscation. This is a hands-on course that will require students to study and analyze investigative journalism, major cases and techniques, and undertake investigative projects requiring on the ground reporting and writing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: JOUR 1701 or JOUR 1702.

JOUR 3736. Radio News Techniques. (4 Credits)
This course deals with the fundamentals of radio news reporting. Emphasis is placed on sound gathering, writing and interview techniques. The course will cover spot news reporting, but will also give close attention to NPR style stories; longer form narrative, in-depth audio-rich stories. Emphasis will also be placed on journalism ethics. Students will get practical experience through in-class exercises and field assignments. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM.
Prerequisites: COMM 2083 or JOUR 1702 or COMM 3010 or JOUR 3715.

JOUR 3740. Ethics and Diversity in Journalism. (4 Credits)
This course covers the basics of ethical behavior and norms for multimedia journalists in a connected and complex world. The course covers theories and case studies in the pre-digital and digital eras. The class also includes issues of diversity and inclusion, including covering diverse communities and increasing diversity in the newsroom. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CEMP, LALS, LASS.

JOUR 3741. Journalism Workshop: Reporting. (2 Credits)
(Formerly COMM 2211): A practical workshop course in writing news, features, commentary, reviews, and sports articles, or doing graphics, photography, multimedia and layout. The Rose Hill section is centered on giving students opportunities to write for The Ram, but students can also use the course to improve work being done for the paper, the Fordham Undergraduate Research Journal, Flash, Mode, and other student media at Rose Hill. Students not currently working for student media are also welcome in the Rose Hill section, where they will be taught basics of journalism and given the opportunity to publish articles in The Ram. At Lincoln Center there are four separate sections of the course. Each section has its own focus but all are related to involvement with THE OBSERVER. The sections are: Journalism Workshop/reporting, Journalism Workshop/photography, Journalism Workshop/layout and Journalism Workshop/multimedia.
Attribute: ENGL.

JOUR 3742. Journalism Workshop: Fnn. (2 Credits)
(Formerly COMM 2212): A practical workshop for students working on Fordham Nightly News. The instructor will help students improve all aspects of broadcast journalism, including scriptwriting, shooting, editing and anchoring. All students in this course must volunteer to work on Fordham Nightly News, and will be producing the day’s show as part of the workshop. NOTE: This is a 2-point class. Students who want a full 4-points of Journalism Workshop to equal a full course toward the major in Communication and Media Studies should also sign up for COMM 2211 concurrently, which focuses on basic journalism reporting skills and print writing. Journalism Workshop will NOT be offered at Rose Hill after Spring 2016.

JOUR 3743. Journalism Workshop: Multimedia. (2 Credits)
(Formerly COMM 2213): A practical workshop course in writing news, feature, commentary or sports articles, or doing graphics and layout for The Observer. Students will work as writers or on the layout staff.

JOUR 3744. Journalism Workshop: Photography. (2 Credits)
(Formerly COMM 2214): A practical course in public media journalism held at WFUV-FM. WFUV is a National Public Radio affiliate station based in Keating Hall on the Rose Hill campus. This workshop covers everything from broadcast writing and interviewing techniques to field reporting and journalism ethics and standards. Students will also spend time behind the microphone learning how to deliver news copy in a clear, conversational manner. The professor, George Bodarky, has extensive experience in commercial and public radio journalism, and has won multiple awards for his work. George is president of Public Radio News Directors Inc. and past president of the New York State Associated Press Board of Directors.

JOUR 3760. The Journalist and the Law. (4 Credits)
(Formerly COMM 3205): An investigation of the legal concerns of the working journalist: prior restraint, shield law, libel, invasion of privacy, the Freedom of Information Act. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, ASSC, CEMP, JPLH.
Prerequisites: COMM 1000 or COMM 1010.

JOUR 3763. The Murrow Years: 1938-65. (4 Credits)
This course traces the career and contributions to broadcast journalism of Edward R. Murrow, one of America’s foremost reporters, from his remarkable accounts of London under German bombing attacks to his documentary work on the “See It Now” and “CBS Reports” series. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, JPLH.

JOUR 3764. Television News and Today's World. (4 Credits)
This course examines and analyzes the approaches of the three commercial networks and the Public Broadcasting Service to the major news stories of the day. Each class screens one of the network’s evening news broadcasts and assesses its content, comparing story selection and presentation with the day’s newspaper coverage. Emphasis is placed on students’ comprehension of the week’s salient news developments. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CMST, COMC, JPLH.
JOUR 3765. Television News. (4 Credits)
An examination of the growth and impact of television journalism. Technological and historical changes, techniques and influences of television news. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JPLH.

JOUR 3769. History of Television and Radio News. (4 Credits)
Traces the history of electronic journalism, from its infancy in the 1930’s to the present day; emphasis on the work of the most prominent broadcast journalists of these decades. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, JPLH.

JOUR 3772. Newsmaking. (4 Credits)
A critical study of news gathering and dissemination processes in the contemporary world with emphasis on their cultural, political, and economic effects in modern society. Factors that determine the worthiness of current events and journalistic interpretations reaching national audiences are considered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

JOUR 3776. Social Media for Journalists. (4 Credits)
This is a research and practice-based course on social media, aimed at journalists who will need to understand and use social media. Students will research historical and contemporary innovation relating to social media, and will then develop strategies for creating impact throughout the course of the semester with their own journalistic projects using social media. Readings, discussions, project critiques, and hands-on work will all be used methodologically to allow students to delve into the possibilities of social media. Students will come to understand the power and limitations of social media as both a reporting tool and a tool to aid in the marketing of powerful journalism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JSME.
Mutually Exclusive: DTEM 3476.

JOUR 3781. Arts and Culture Reporting. (4 Credits)
In this course, students will have the opportunity to apply their journalistic skills to the area of art and cultural reporting and criticism, including popular culture (television, movies, pop music, books, etc.) and the fine arts (theater, classical music, dance, and the visual arts, etc.). They will develop an ability to identify, describe, and evaluate for readers/viewers the full range of our culture’s creative output, including live shows and events. This includes recognizing the importance of the historical, social, and political context of what they are reporting on and reviewing. As budding arts and culture journalists, students will learn how to balance being both a reporter and cultural critic, and develop a strong, reliable voice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.

JOUR 3782. Science Journalism. (4 Credits)
At a time when science and technology permeate debates on everything from climate change to stem cell research, to nuclear power to genetically modified foods many Americans lack sufficient understanding of these basic science and health concepts. This course will explore fundamentals in science and medicine reporting emphasizing the essential research and story development skills needed bring complex medical, science and health issues to the general public. It will explore the scientific process, how to evaluate scientific and health information, ethical controversies, and what makes science and medical news. Students will learn how to break, report, translate, and illuminate scientific information, forging journalism that helps build scientific literacy equal to contemporary challenges. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, JWRI.
Prerequisites: COMM 2082 (may be taken concurrently) or JOUR 1702 (may be taken concurrently).

JOUR 3783. Theater Journalism. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CVW, ENGL, JWRI.
Prerequisites: JOUR 1701 or JOUR 1702.

JOUR 3785. Writing for the Media. (4 Credits)
Analysis and practice of writing for a variety of print, broadcast, and online media. Exploring different media contexts such as news, entertainment, public relations, and advertising, the approach in this course assumes that media writers tell stories, that they write for multiple formats, and that they engage in ethical activities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.

JOUR 3788. International Reporting. (4 Credits)
For decades an aura has surrounded international correspondents, the corps of reporters who cover foreign governments, war fronts and conflict zones to bring the news out of some of the world’s most dangerous, complex and influential places. They risk lives and freedom in the struggle to dig out the truth behind government propaganda and military secrecy, whether in battlefields or presidential palaces or besieged regions. This course will define and explore the underpinnings of international reporting and its evolution from the mid-20th century to the digital age. Students will study and practice reporting, writing and video skills. We will examine the importance of understanding foreign cultures, histories and languages, discuss the work and lives of major foreign correspondents, and examine where the art of foreign correspondence stands today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.
Prerequisite: JOUR 1701.
JOUR 4711. Advanced Multimedia Reporting. (4 Credits)
Advanced Internet Reporting picks up where Introduction to Journalism leaves off, offering students a way to continue their study of multimedia journalism in a converged setting. The class will be project-based, with students completing both breaking news and features assignments. Each story for the course will need to be done in both print and video form. Students will also have the option of producing audio or photo slideshow versions of their reports. Completed projects, with the student's permission, will be posted on Fordham news sites like that of The Ram and WFUV News. This course differs from COMM 3083, Advanced Television Production (Bronxnet) in that it will also cover print, audio and photo. It differs from JOUR 3717/COMM 3978, Online Journalism, in that it will not focus on blogging or social media. PREREQUISITE: Intro to Journalism with Lab (JOUR1701/COMM 2083), Advanced Television Reporting (BronxNet) (COMM 3083), Intermediate Television Production (JOUR 3716), or permission of instructor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: JWRI.
Prerequisites: COMM 3083 or JOUR 3716 or COMM 2083 or JOUR 1702.

JOUR 4713. Audio Reporting and Podcasting. (4 Credits)
This class will teach students how to create professional level audio reports and podcasts. Students will learn the major theories and practices of audio journalism. They will also develop practical skills on how to choose stories for audio journalism, write for broadcast, gather and use sound, interview for audio, edit audio journalism, and promote their work. Students will work on both short- and long-form projects. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: JWRI, NMDD, NMMI.
Prerequisites: COMM 2082 or COMM 2083 or JOUR 1701 or JOUR 1702.

JOUR 4727. Advanced Magazine Article Writing. (4 Credits)
Planning, researching, and writing magazine articles. Emphasis is placed on preparing manuscripts of professional caliber. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.

JOUR 4733. Photojournalism. (4 Credits)
American photojournalism emerged in the late 1920s and has an increasing role to play in both news and feature reporting in today's digital world. As online journalism and its audiences take shape, visual storytelling is finding new modes and roles. This course will introduce students to the contemporary practices and production of photojournalism. It will be conducted in a manner similar to the real working world of professional journalism while also touching on the aesthetic, technical, cultural, and historical forces that have shaped its evolution into the present day. Students will be responsible for taking pictures with their own cameras and producing their own digital images, photo slideshows and visual reporting. While the emphasis of the course will be on picture taking and visual storytelling, students will also learn how to edit their own photographs and how to prepare selected images in Adobe Photoshop. (Pre-requisite COMM 2082 or JOUR 1702 or instructor's permission) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, JWRI.

JOUR 4741. Practicum - Observer. (4 Credits)
A practical workshop course in writing news, features, commentary, reviews and sports articles for The Observer, the student newspaper at Lincoln Center. Student will take assignments for The Observer to gain writing experience and clips. In class, students will workshop articles to improve them before publication. We will also address basic journalism skills, including interviewing, researching, and using online-media resources. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.

JOUR 4742. Practicum - Campus Television News. (4 Credits)
This course teaches provides a way for students to gain practical experience in journalism by working on Fordham's student news broadcast, Fordham Nightly News, under the supervision of a professor. Students will learn to generate stories, research, report, write, shoot, edit and present news on television, using Fordham Nightly News as a learning laboratory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.
Prerequisites: COMM 2082 or COMM 2083 or JOUR 1701 or JOUR 1702. Mutually Exclusive: JOUR 3716.

JOUR 4743. Practicum - Ram. (4 Credits)
This course teaches provides a way for students to gain practical experience in journalism by working on Fordham's student newspaper, The Fordham Ram, under the supervision of a professor. Students will learn to research, report, write, shoot, edit and design, using The Ram as a learning laboratory. Because The Ram is not just a print newspaper but also exists in digital form, students will have the opportunity to tell stories across multiple platforms. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.
Prerequisites: COMM 2082 or COMM 2083 or JOUR 1701 or JOUR 1702.

JOUR 4744. Practicum - WFUV. (4 Credits)
This course teaches provides a way for students to gain practical experience in journalism by working in the news department of WFUV, Fordham's public media station, under the supervision of a professor. Students will learn to generate stories, research, report, write, gather and present news on radio and possibly on video and in print, using WFUV as a learning laboratory. Students taking this course should already be involved in the WFUV News Department. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: JWRI.
Prerequisites: COMM 2082 or COMM 2083 or JOUR 1701 or JOUR 1702.
JOUR 4745. Campus Journalism Practicum. (4 Credits)
This course teaches students how to gain practical experience in journalism and academic credit by working on a student media outlet at Fordham under the supervision of a professor. Students will learn to research, report, write, shoot, edit and/or design, using one of the campus publications as a learning laboratory. Students will meet individually with the supervising professor to go over work and improve it, to help ensure that the student leaves the course with a portfolio in journalism. This course is particularly well-suited for students working at The Ram or WFUV, but students who are working or want to work at any campus media outlet are eligible. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: JWR.
Prerequisites: COMM 2083 or COMM 2082 or JOUR 1701 or JOUR 1702.

JOUR 4750. Values in the News. (4 Credits)
Values in the News examines the ethical and moral codes and standards observed, or violated, by the news media in the United States. These standards are under scrutiny in this challenging transition from traditional or legacy media to digital journalism and the advent of various platforms including citizen journalism and social media. Students will analyze contemporary and historical examples of ethical violations and ethical questions in print, television, cable and digital news. The class will research, interpret, analyze and write about these cases and will explore the obstacles journalists face trying to adhere to a set of ethical rules. This seminar is writing intensive and requires class debate. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, APPI, ASAM, ASRP, CELP, EP4, JETH, VAL.

JOUR 4766. Television News Innovators. (4 Credits)
(Formerly COMM 4111): This Interdisciplinary Capstone Course bridges the disciplines of Media Studies and History. It surveys the most prominent figures in the history of electronic journalism—producers, executives, anchors, correspondents—and explains how their work shaped the course of American history. Innovators whose work is studied include Edward R. Murrow, Walter Cronkite, Ted Koppel, Barbara Walters, Mike Wallace, Ed Barldy, Roone Arledge, Ted Turner and Roger Ailes. We discuss the historical episodes covered by these innovators including World War II, McCarthyism, the Civil Rights movement, the Vietnam War, the Iran Hostage Crisis and the 1991 Gulf War before investigating how the coverage of these events in and of itself affected their outcomes. Sections R01 and R02 meet concurrently. Open only to Rose Hill students. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AMST, APPI, ASAM, ASHS, FITV, ICC, JPLH.

JOUR 4770. Media Law and Journalism Ethics. (4 Credits)
Media Law and Journalism Ethics will introduce students to the legal and ethical issues confronting the media on a daily basis. Journalists, in particular, face complicated decisions as technology changes the way news is produced. With communication tools increasing the speed at which news is gathered and disseminated, media industries are growing more powerful. As the journalism industry shifts from traditional newspapers and broadcasting to social media, podcasts and blogs, the rules and limitations also change. This course will explore ethical principles that govern journalism, such as freedom of expression, the right to privacy and the public’s right to know. Students will develop an understanding of the ethical and legal issues that are unique to journalism in a Democracy, and become more critical consumers of news media.

Attributes: CELP, JETH, JPLH.

JOUR 4773. Public Media. (4 Credits)
Public media goes well beyond Big Bird. In this course, we will delve into the history of public media, take a close look at its newsgathering efforts, analyze some of public media's best news programs, and provide you an opportunity to produce your own journalism, specifically audio, with public media's core values in mind. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: CMST, COMC, JWR.

JOUR 4784. Business Journalism. (4 Credits)
If money makes the world go round, as the famous saying goes, then following the money is a creative way to discover gripping stories that can make you stand out as a journalist. But how do you find the money angle? This course will teach you to understand business and economics, and also how to tell financial stories creatively. Over the course of the semester, students will learn ways in which they can ‘follow the money’ in order to tell great multimedia stories about people and institutions. Students will also learn about financial concepts and markets including stocks, bonds, and balance sheets. The course assumes no background in economics or finance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: JWR.
Prerequisites: JOUR 1701 or JOUR 1702 or COMM 2082 or COMM 2083.

JOUR 4999. Tutorial. (1 to 4 Credits)
Independent research and readings with supervision from a faculty member.
JUGL 0104. Philosophical Perspect on Law. (2 Credits)
This seminar will concentrate on three broad sets of questions. The first set concerns the fundamental issue: what does the moral rightness or wrongness of a putative law have to do whether it is really the law? We will focus on the most prominent version of this debate in Anglo-American Legal Philosophy in the past several decades: the debate between H.L.A. Hart and Ronald Dworkin. The second set of questions pertains to the nature of justice: What does justice require of a legal and political system in the modern era? John Rawls’ A Theory of Justice will be the primary emphasis in this part. The third and final part of the course will examine the relation among justice, mercy, and forgiveness, particularly within the criminal law. If justice requires that wrongdoers be punished, how could it be virtuous to forgive wrongdoers or show them mercy? Hampton and Murphy’s book, Forgiveness and Mercy, will be the primary text.
Attributes: JD, LAWJ, LLM.

JUGL 0129. Electoral College. (2 Credits)
This course will explore the origins of the system; the American context in 1787; the impact on the college of political parties; the hidden defects and dangers in the system that manifested themselves; the workings of the system prior to the Civil War; the post-Civil War history and the rise of close elections and faithless presidential electors; and the engagement of lawyers in changing the system, resulting in passage of a popular vote constitutional amendment by the House of Representatives in 1969. The course will analyze current proposals to reform the system, including the national popular vote plan; the impact of the media and polls in the functioning of the system; and the understanding of the Electoral College system by the American people. It will also discuss the intersection of the Electoral College with the presidential succession system.
The course will be taught by Professor John D. Feerick, who served as advisor to the 1966-67 American Bar Association Commission on Electing the President and provided the views of the ABA in testimony before Congress during the period 1967-79. He participated in the drafting of the 1969 proposed amendment, is the author of a major article on the subject for the Fordham Law Review, and has spoken widely on the subject before citizen and other groups.
Professor Feerick will be assisted by adjunct Professor John Rogan, who currently co-teaches a clinic on the presidential succession system and is a graduate of Fordham Law School, Class of 2014. There will be several guest speakers.
The course will examine the relation among justice, mercy, and forgiveness, particularly within the criminal law. If justice requires that wrongdoers be punished, how could it be virtuous to forgive wrongdoers or show them mercy? Hampton and Murphy’s book, Forgiveness and Mercy, will be the primary text.
Attributes: JD, LAWJ, LLM.

JUGL 0203. Judges, Justice and the Rule of Law. (3 Credits)
This introductory jurisprudence class will address basic questions about the structure of our legal system through the writings of legal scholars, judges, justices, and philosophers. Its most basic problematic predates the founding of our nation but strikes many Americans as especially pressing today: what is the rule of law, how can we best adhere to it, and how important is adherence to the rule of law relative to other values? Is there really a tension between justice and the rule of law, and, if so, how should legal officials resolve this tension? Do judges compromise or advance the rule of law when they aim to bring our constitutional order into the present day? Answering these questions will involve exploration of classic debates regarding the nature of law, legal interpretation, and the rule of law. Classes will be a mix of lecture and discussion. There are no prerequisites. There will be a take-home final.
Attributes: INLJ, LLM, PIE.

JUGL 0216. Race, Sex, and Love. (2 to 3 Credits)
The U.S. Supreme Court rendered its landmark decision in Loving v. Virginia invalidating prohibitions on interracial marriage more than 40 years ago. But race still plays a significant role in the intimate lives of most Americans. Decisions regarding whom we date, marry, or with whom we enter into other long-term intimate commitments are very much colored by race and prevailing racial norms. This course will consider why this is so by exploring the role that state laws and practices regarding the family and intimate associations have played in the social construction of race and racial identity. We will also consider the influence of race and racial norms on our attitudes about sexual intimacy, gender roles, and commonly-held conceptions of and approaches to issues such as marriage, reproduction, and parenting.
Students will be encouraged to explore a range of issues relating to race and intimate associations, including how structural issues affect our attitudes about sexual intimacy, gender roles, and commonly-held conceptions of and approaches to issues such as marriage, reproduction, and parenting. Students will be encouraged to explore a range of issues relating to race and intimate associations, including how structural issues affect our attitudes about sexual intimacy, gender roles, and commonly-held conceptions of and approaches to issues such as marriage, reproduction, and parenting.
Attribute: INLJ.

JUGL 0227. Election Law and The Presidency. (2 Credits)
We will study the constitutional, statutory and practical aspects of the process by which we nominate and elect the President of the United States. In addition, we will study eligibility requirements for the presidency; succession issues; removal of a disabled president; and the impeachment of a president.
Attributes: INLJ, PIE.
JUGL 0293. How Judges Decide. (2 Credits)
This class will explore fundamental questions about judging through conversations with and interviews of judges, lawyers and journalists. Whether a case is a civil or criminal matter, one which will be decided by a jury or a judge, the question of how judges decide any of the myriad of issues they confront is critical. The subject is not often explored beyond the simplistic formulation that judges research the law, apply the facts and then reach a conclusion. But this description ignores all of the essential inputs about just what guides a judge in figuring out the law, and finding the facts and applying one to the other. How does a judge’s personal background influence the decision making process? What choices does a judge have when trying to decide how to interpret a statute? Does popular opinion influence how judges decide cases? Should it? Rather than try to understand these and related questions solely from what academics and critics of the system have said, this class will explore these issues and ideas by talking to judges, and lawyers who appear before them. Federal and state court judges will participate in class and will be interviewed by us and you about cases the judges have selected. They are largely cases which could have “gone either way”. You will be required to interview judges in class about the assigned readings, and each of you will have an opportunity to be the “lead” questioner during the semester. The goal is to try to get some understanding of the judge’s values, his or her assessment of the equities and personalities in the case, and in any other psychological or human factors that went into their decision-making.

JUGL 0321. Legal Issues in Gaming. (2 Credits)
This seminar will explore the legal aspects, both practical and policy-oriented, of gaming (including gambling) in the United States from the varied perspectives of game developers and operators, game players and the public interest. In some respects, a gaming business encounters the same issues facing any enterprise, but in other respects unique or at least highly specialized legal issues are confronted by this multi-billion-dollar industry. A major focus of the course will be intellectual property rights in characters and images, logos, programming and ‘look and feel’ which present copyright, trademark and patent issues. We also will explore contract and licensing issues in some depth as they relate to distribution and monetization. Additional topics will include: data privacy, terms of use, government regulation, free speech issues, Indian gaming law and liability issues. A paper on an approved topic will be required.

Attributes: IPIE, JD, LAWT, LLM.

JUGL 0347. Jewish Law: Sources, Principles, Jurisprudence. (2 to 3 Credits)
The five legal sources of Jewish law (Halakha), namely, interpretation, codification, custom, precedent and reason provide the framework for the course. Amongst the major topics are: the tension between the lexical meaning of a text and its legal significance; the definition and significance of the categories of Biblical Law (Deoraya) and Rabbinic Law (Derabbanan); Rabbinic legislation running counter to Biblical law; important legislative landmarks in Jewish family law; the ‘chained wife’ (Agunah); the use of reason as a justificatory principle; questions of life and death, and the balancing of competing claims to life in tragic choice situations.

Attributes: CEED, CETH, HECH, ICE, INLJ, LLM.

JUGL 0358. Jurisprudence. (2 to 3 Credits)
The first part of this seminar is a survey of several major theories and approaches to jurisprudence in the 20th century, theories such as those of H.L.A. Hart, Lon Fuller, John Rawls, and Ronald Dworkin, plus other related topics. We will then turn to some contemporary issues that bear on jurisprudence in a broader sense: Dworkin’s recent attempt to resolve conflicts over human rights and terrorism, religion and the state, and redistributive justice, based on principles of human dignity; and Cass Sunstein’s warnings about the dangers of ‘radical judges’ and the legal theories they and other judges follow, comparing and contrasting Fundamentalism (originalism), Perfectionism, Minimalism, and Majoritarianism as competing models for court decisions. Other short readings may be assigned. Take-home exam.

Attributes: CEED, CETH, INLJ, PIF.

JUGL 0359. Gender, Violence, and the Law. (2 Credits)
This class will discuss the ways in which the law is used to address the intersection between gender and violence. We will cover a broad area that includes intimate partner violence, sexual harassment, sexual assault, and stalking. The course will open with a discussion of the current legal framework to respond to intimate partner violence and sexual assault, then move through evolving conversations on related topics such as the #MeToo movement, sexual harassment, and revenge porn. This class will emphasize critical thinking, with a particular focus on analyzing whether civil and/or criminal legal systems are the most appropriate or effective tools to address what are often very intimate harms.

Attributes: INLJ, LLM, PIF.
JUGL 0399. Philosophical Perspectives on Law . (2 Credits)

JUGL 0529. Race, Gender and Crime. (2 Credits)
It is well known that racial minorities are disproportionately represented in our carceral system. The same observation, however, can also be made with respect to men. This course goes beyond these easy observations to examine the how and why of these disparities. How does the historical context of race and sex relations in this country impact this disparity? And what role has the law played in all of this? To what extent have race and gender informed criminal law and criminal procedure? And what role have criminal law and criminal procedure played in policing and maintaining racial and sexual boundaries? To answer these questions, this seminar examines various criminal law and criminal procedure issues, as well as race-based and gender-based critiques of those issues. The goal of the seminar is two-fold. The first goal is to provide students a deeper understanding of criminal law and criminal procedure issues, putting such issues in historical context. The second goal is to provide students an opportunity to challenge – critically and collegially – basic assumptions about crime, race, and gender. <p> The course is limited to 20 students. <p> There are no prerequisites, but it is recommended that students who enroll in the course have taken Criminal Procedure. This is a laptop free course. <p> Grading: Students will be graded on class participation, and their written work. With respect to the latter, students are required to write four reading response papers (each paper being 5-6 pages) over the course of the semester. Students can also use this seminar to satisfy the Upperclass Writing Requirement. Students seeking to fulfill the Upperclass Writing Requirement will be required to write a 25-page paper.
Attributes: INLJ, LLM.

JUGL 0601. Education Law. (2 to 3 Credits)
This course surveys the law governing schools in the United States. The course will cover the following topics: basic school finance; equality and nondiscrimination with respect to race, sex, and gender identity; the regulation of student and faculty expression; the intersection of schools and religion; the education of children with disabilities; the regulation of private schools; school choice; and the regulation of the ed-tech sector. A small number of additional topics will be covered based upon student interest. The primary focus of the class is K-12 education; higher education will be treated briefly and not comprehensively. Students must write some combination of weekly response papers and a final paper. The course may be used to fulfill the JD writing requirement.
Attributes: INLJ, LLM, PIE.

JUGL 0612. The Presidency. (2 Credits)

JUGL 0622. Islamic, Catholic and Jewish Laws of War, Economic Regulation, and the Environment. (2 Credits)
This seminar will use a conceptually based comparative law approach to explore the major legislative and juridical approaches of Islamic, Jewish and Canon (Catholic) Law toward the issues of (i) war and violence, (ii) social welfare and economic development, and (iii) the environment. The course will begin with an introductory unit examining the norms, structures and history of each legal system. Students will be introduced to legal, ethical and religious concepts that typify, unite and distinguish the three systems and will also become familiar with key historical developments of each. The course will then explore the rich troves of legal rules and approaches of each system in the important areas of the law of war, social welfare and the environment. Each system has a well-developed approach and body of rules regarding these spheres. At the end of this course, students will be able to articulate and compare the approaches each legal system takes and offer examples of how those views have entered into, shaped or have been rejected by American or International Law. <p> Students will have the option to write a paper or complete a take home exam.
Attributes: INLJ, LLM.

JUGL 0709. Intimate Partner Violence and the Law. (2 Credits)
This seminar will provide an overview of the ‘special victims’ offenses of domestic violence (DV) and sex crimes. In the first half of the course, students will be exposed to the evolution of domestic violence law and the many difficult issues involved in the prevention, identification, and prosecution of domestic violence crimes, such as orders of protection, successfully building cases against offenders with reluctant witnesses, and providing services to victims. In the second half of the course, we will focus on sex-based offenses, exploring legal developments and issues faced by sex crimes prosecutors and others, such as how to work with sexual assault victims, the role of forensics and DNA, evidentiary issues including rape shield laws, expert witnesses, and Title IX issues at educational institutions.
Attributes: INLJ, LLM.

JUGL 0730. Conflicts of Interest. (2 Credits)
Often we can’t believe what we hear or trust what we buy. This seminar will consider an important reason for these problems, conflicts of interest. A conflict of interest is present when a person can derive personal benefit from a decision that the person is responsible for making based on other criteria. The law addresses conflicts in many areas and in several ways. Professional regulation, anti-corruption law, securities regulation, antitrust law, and evidence law all address conflicts either explicitly or implicitly. And some conflicts rules ban the relationships that create conflicts, some seek to constrain the decision-making process, and some require only disclosure of the conflict. Surprisingly, however, there is very little systematic analysis of conflicts. In this seminar we will discuss conflicts generally and seek to determine whether the relevant legal rules are appropriate in light of the nature and seriousness of various types of conflicts. We will also consider problems like fake news that are not currently regulated but to which conflicts principles might fruitfully be applied.

Updated: 07-27-2020
JUGL 0781. Gender, Sexuality, and the Law. (2 Credits)
This seminar will examine how the law has dealt with, applied to, and been enforced on issues relating to sexual orientation and gender identity, and how sexual orientation and gender identity influence the application of legal rules to individuals in our society. The seminar will address the role of the law in shaping the social meaning of sexuality and identity, and how legal rights, protections, and deprivations have evolved based on identities as heterosexual, lesbian, gay, bisexual, and transgender in a number of contexts including employment, education, marriage, sexual expression, family relationships and the military. Throughout the course, we will examine the extent to which assumptions about morality, gender, and race have shaped the law’s approach, and the ways in which the movement for lesbian, gay, bisexual, and transgender rights is different from and similar to other rights movements. The course will emphasize constitutional doctrines, including equal protection, due process/privacy, and freedom of speech and association. Our primary text will be Sexuality, Gender and the Law by William N. Eskridge, Jr. and Nan D. Hunter.
Attributes: INLJ, PIE.

JUGL 0807. Feminism and the Law. (2 Credits)
In this collaborative seminar, we will explore current trends at the intersection of feminist theory and the law. Through readings, student led-discussions, guest speakers, and short papers, the seminar participants will explore and come to a view on how feminist theory has, and should, shape the law. The seminar will begin with an overview of feminist legal theory, introducing the students to the landscape of the field. After grounding the discussion in the field’s foundational texts, students will pick a topic to design a student-led class. Students will be responsible for finding appropriate readings and, if desired, a guest speaker. At the end of the semester, students should be able to produce their own distinct vision for the future of feminist legal theory and the study of this area. Please note that enrolled students are expected to take an unusual level of responsibility for their learning and for guiding the content and discussion in each class meeting.
Attributes: PIE, PIF.

JUGL 0929. Market Structure and Democracy. (2 or 3 Credits)
This course will explore the debates in economic and political theory about the appropriate kinds of market structure that support or undermine democracy. We will read Brandeis, Robert Bork, Shumpeter, and other key theorists of market structure and democracy, and then apply these different theories to modern day structural questions, such as net neutrality, merger rules for cable companies, laws governing electrical utilities, and laws governing separation of functions within banking. It is primarily a theory course, not a practice course, and the student needs no background in antitrust, banking, or telecom. Students must stay abreast of the reading assignments and actively participate in class discussions. Informed discussions and dialogue between and among the students and instructor is the center of the course. Classes will proceed on the assumption that everyone has done the readings and has opinions and perspectives worth sharing. Students will be required to write a term paper of 5,000-8,000 words.
Attributes: LLM, PIF.

JUGL 0939. Market Structure and the Pandemic. (1 Credit)

Labor (LBGL)

LBGL 0204. Wage Theft, Employee Rights, and Employer Responsibilities. (2 Credits)
Lawsuits under the Fair Labor Standards Act (FLSA) now comprise almost 15% of the federal court docket in New York and this trend is expected to continue. This course will cover issues relevant to the current employment law practitioner in New York. We will start with the history of the FLSA and New York Labor Law. We will discuss how to compute the applicable minimum wage and overtime, recordkeeping and burden of proof issues, and the definition of a covered employee, including independent contractor issues and exemptions from the FLSA. We will also cover United States Department of Labor and New York State Department of Labor procedures and special rules, issues pertaining to certain industries, such as the restaurant industry and domestic worker industry (nannies, home health aides, etc.), collective and class actions, special litigation issues, settlement of FLSA cases, and retaliation.
Attributes: CORC, LLM.

LBGL 0334. Employment Discrimination. (2 or 3 Credits)
This course will examine the law governing employment discrimination, with a focus on the major federal statutes prohibiting discrimination in employment: Title VII of the Civil Rights Act of 1964 (and amendments); the Age Discrimination in Employment Act (and amendments); and the Americans with Disabilities Act (and amendments). We will also cover certain subjects addressed by state laws, including discrimination on the basis of sexual orientation. Topics will include: the nature and meaning of discrimination; disparate treatment vs. disparate impact; burdens and methods of proof; affirmative action; the relationship between antidiscrimination and accommodation; retaliation; procedures for enforcement of antidiscrimination laws; and remedies. Grade based on take-home final exam. Class participation will also be considered.
Attributes: CORC, INLJ, LAWB, PIE.

LBGL 0359. Labor Law. (3 to 4 Credits)
Federal regulation of labor-management relations in the private sector, primarily through the National Labor Relations Act as amended. The course focuses on employee organizational and representational rights; the selection of a collective bargaining representative; the collective bargaining process; contract administration and enforcement; and the union's duty of fair representation. The course also addresses related issues of US labor law: judicial review of arbitration decisions and promises to arbitrate; successorship and the obligations of a successor employer; and federalism and the preemption of state workplace statutes.
Attributes: INLJ, JD, LAWB, LLM, PIE.

LBGL 0361. Employment Law. (2 or 3 Credits)
This course addresses federal and state law approaches to the relationship between individuals and their employers, including constitutional, statutory, and common-law regulation of the employment relationship. We will discuss the appropriate classification of individuals who perform services in exchange for compensation and engage in a high-level discussion about Title VII, the ADEA, and ADA, which will inform discussions about the hiring process, including recruiting, interviews and background checks. Compensation under the Fair Labor Standards Act, and the balance between an employer’s right to manage it employees and an employee’s right to be left alone will also be covered. Finally, we will consider issues typically associated with termination of employment, including employment at-will and common law exceptions thereto, whistleblower protections, and separation agreements.
Attributes: CORC, INLJ, LAWB, PIE.
LBGL 0375. Labor and Employment Arbitration. (2 Credits)
This course will provide a comprehensive look at the world of labor and employment arbitration -- its history, procedures, laws, ethics and practice, with a specific focus toward labor arbitration. This course will address arbitration topics such as discipline and discharge, contract interpretation and due process issues through a wide diversity of materials including judicial decisions and arbitration awards.
Attributes: INLJ, LDE, LIDR, LLM.

LBGL 0521. Workers, Law & Changing Econ. (2 Credits)
The economy of the United States has undergone massive changes over the past five decades. The law of the workplace, however, has remained largely static. Changes in the structure of work, and the misfit between that structure and current law, have created barriers for workers who seek to organize for collective representation or to enforce basic workplace rights. The result has been deteriorating wages and working conditions for many workers, in particular at the low-wage end of the spectrum. This disproportionately impacts African Americans and other workers of color, immigrants, and women. Through this class, students will develop a comprehensive understanding of the obstacles that workers and advocates face as they attempt to enforce baseline laws and improve wages and working conditions in low-wage sectors, and explore ways that reconfigured laws, new government policies, alternative organizing strategies, and creative lawyering approaches might support efforts to achieve higher standards. Students write three short papers over the course of the semester. There is no final exam.
Attributes: CORC, INLJ, PIE.

LBGL 0906. Executive Compensation and Employee Benefits Law. (2 Credits)
Compensating a modern workforce is one of the most important aspects of running a business. Many different legal considerations play a part, including how to properly incentivize performance while ensuring pay equality, how compensation committees should be structured to ensure fiduciary responsibilities are met, why a diversity of viewpoints are important when determining compensation, and how best to structure equity compensation to take advantage of tax-related incentives. Any in-house counsel or outside business adviser needs to have a good working understanding of the these issues in order to properly advise their clients, and any business entrepreneur must understand these rules in order to create a successful company. <p> Students in this class will achieve a high-level understanding of executive compensation and employee benefits, the market forces driving compensation practices, the regulations governing them, and the relevant case law. There will be a particular focus on recent legislation regarding pay equality and the structure of boards of directors, and the class will discuss the ‘pay ratio’ rule, equal pay act, compensation privacy rules, and the recent California legislation requiring women to make up a ‘representative’ number of women on boards. Students will also learn about the Employee Retirement Income Security Act and the Internal Revenue Code provisions relevant to compensation and benefits. Students will also be exposed to many elements of employment, severance, retention, change in control and equity arrangements. <p> There will be a 3 hour take-home exam (to be taken at the student's convenience during the exam period), which will be a mixture of multiple choice and short essay questions. There will also be short weekly assignments based on the readings to ensure that students are prepared for class. These assignments will not be graded, but students will be required to show a good faith effort in responding to the questions.
Attribute: LLM.

Latin (LATN)

LATN 1001. Introduction to Latin I. (3 Credits)
An introduction to Latin grammar with selected readings.
Attributes: MVLA, MVST.

LATN 1002. Introduction to Latin II. (3 Credits)
This course will enhance the skills acquired by students in Introduction to Latin I or from prior study. It will further promote a deeper understanding of Latin and its literary and cultural traditions.
Attributes: MVLA, MVST.

LATN 1004. Intensive Latin. (4 Credits)
An accelerated introduction to the Latin language covering a full year of grammar in one semester. From here students are able to enter LATN 1501.
Attributes: MVLA, MVST.

LATN 1501. Intermediate Latin I. (3 Credits)
A continuation of LATN 1002 with an introduction to the reading of texts.
Attributes: MVLA, MVST.

LATN 2001. Latin Language and Literature. (3 Credits)
An appreciation of the language, literature, and culture of antiquity through original readings in classical Latin authors.
Attributes: MVLA, MVST.

LATN 3000. Latin Poetry. (4 Credits)
To introduce advanced students of Latin to the lyric poetry of Catullus and Horace through translation, stylistic and metrical analysis and discussion of the poets’ literary tradition. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: COLI.

LATN 3009. Horace: Odes. (4 Credits)
Readings in and literary analysis of the Odes of Horace. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI.

LATN 3015. Caesar's Commentaries. (4 Credits)
This course offers a survey of Julius Caesar’s Gallic Wars. It attempts to situate Caesar’s Commentaries in their historical context and in relation to the larger literary tradition. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, CLAS, MVST.
Prerequisite: LATN 2001.

LATN 3021. Roman Love Poetry. (4 Credits)
Readings from the works of Catullus, Ovid, Propertius and Tibullus. Study of Metrics and Poetic Forms. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
LATN 3037. Sallust. (4 Credits)
A survey of Sallust's historical writings in Latin, primarily the Bellum Catilinae. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, CLAS, MVST, OCST.

LATN 3039. Suetonius. (4 Credits)
Select readings in Latin of Suetonius 'Lives of the Caesars,' with consideration of historical and literary settings.
Attribute: ALC.

LATN 3041. Ovid. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, MVLA, MVST.

LATN 3043. Drama in Ancient Rome. (4 Credits)
Close reading of selections from Plautus, Terence and Seneca. The cultural history of Roman drama. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

LATN 3045. Livy. (4 Credits)
Readings in Livy's History of Rome (Ab urbe condita) in Latin.
Attributes: AHC, ALC, HIST, MVST, OCST.

LATN 3050. Cicero's Orations. (4 Credits)
Reading in the speeches of Cicero. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

LATN 3051. Cicero's 'De Oratore'. (4 Credits)
This course will focus on Cicero's 'De Oratore' (read partly in Latin and partly in English), closely examining its impact on rhetorical and educational theory while considering its place in the history of rhetorical theory since Aristotle.
Attributes: ALC, CLAS, COLI, MVST.
Prerequisite: LATN 2001.

LATN 3055. The Roman Novel. (4 Credits)
Readings from Petronius and Apuleius. Examination of the ancient tradition of prose, narrative, and romance, and of the appearance in antiquity of early forms of the novel.

LATN 3060. Readings in Vergil. (4 Credits)
Readings from Eclogues, Georgics, and Aeneid. Taught in Latin. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, MVLA, MVST.
Prerequisite: LATN 2001.

LATN 3061. Christian Latin. (4 Credits)
A study of the language and literature of the late classical and early Christian eras. Taught in Latin. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, AMCS, COLI, MVLA, MVST, REST.

LATN 3300. Advanced Latin. (4 Credits)
A reading of selections from Ovid's Amores and his Ars Amatoria, with cultural and literary analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, MVLA, MVST.

LATN 3332. Seneca's Letters. (4 Credits)
A select survey of Seneca's Moral Epistles in Latin. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

LATN 3456. Imperial Latin Biography. (4 Credits)
A reading of selections from the imperial lives of the 'Historia Augusta,' with literary and historical analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

LATN 3466. Late Latin Poetry. (4 Credits)
A survey of late-antique Latin poetry, in particular Claudian, Ausonius, Rutilius, and the Centones. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: LATN 2001.

LATN 3999. Tutorial. (3 Credits)

LATN 4999. Tutorial. (1 to 4 Credits)
Classical Civilization.

LATN 5001. Introduction to Latin I. (3 Credits)
An introduction to Latin grammar with selected readings.

LATN 5002. Introduction to Latin II. (3 Credits)
This course will enhance the skills acquired by students in Introduction to Latin I or from prior study. It will further promote a deeper understanding of Latin and its literature and cultural traditions.

LATN 5003. Intermediate Latin. (3 Credits)
A continuation of LATN 5002 with an introduction to the reading of texts.

LATN 5004. Latin Languages and Literature. (3 Credits)
An appreciation of the language, literature and culture of antiquity through original readings in classical Latin authors.

LATN 5006. Intensive Latin. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

LATN 5055. Roman Novel. (3 Credits)
Readings from Petronius and Apuleius. Examination of the ancient tradition of prose narrative and romance and of the appearance in antiquity of early forms of the novel.

LATN 5061. Christian Latin. (3 or 4 Credits)

LATN 5090. Latin for Reading. (0 Credits)
A course designed for graduate students seeking a reading knowledge of Latin in their discipline. Some prior study of Latin is desirable but not necessary.
LATN 5093. Ecclesiastical Latin. (3 Credits)
A study of the grammatical structure, form, and vocabulary of Church Latin, focussing on the Bible, the Church Fathers, and medieval thinkers. Attribute: MVS.

LATN 5211. Latin Prose Composition. (3 to 4 Credits)
LATN 5300. Advanced Latin. (3 Credits)
A reading of selections from Ovid’s Amores and his Ars Amatoriae, with cultural and literary analysis.

LATN 5456. Imperial Latin Biography. (4 Credits)
A reading of selections from the imperial lives of the ‘Historia Augusta,’ with literary and historical analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

LATN 6247. Terence and the Tradition of Roman Comedy. (3 Credits)
This course offers a survey of Terence’s works in Latin and the reception of Terentian comedy in the later literary tradition.

LATN 6321. Roman Elegy. (3 Credits)
A survey of Roman Elegy from Gallus to Ovid. A survey of Roman elegy from Gallus to Ovid.

LATN 6332. Lucretius. (3 Credits)
Literary, philosophical, and philological analysis.

LATN 6361. Horace and the Tradition of Latin Poetry. (3 Credits)
This course offers a survey of Latin lyric poetry from Horace to the medieval period and into the Renaissance.

LATN 6393. Lucan. (3 Credits)
This course offers a close study of Lucan’s ‘Pharsalia’ (‘Bellum Civile’).

LATN 6423. Cicero's Speeches. (3 Credits)
An in-depth analysis of Augustus’s Confessions in Latin.

LATN 6450. Augustine Confessions. (3 Credits)
Readings in the ‘Commentaries,’ with a focus on the literary genre and Caesar’s purposes in writing.

LATN 6454. Livy's First Pentad. (3 Credits)
Select Latin readings from Livy 1-5 with thematic, historiographical, and literary analysis.

LATN 6455. Sallust. (3 Credits)
This course offers a close reading and in-depth analysis of the works of Sallust, “the most brilliant author of Roman history” in Tacitus’s opinion (Ann. 3.30.2). Most of the course will be devoted to the study of Sallust’s two fundamental monographs (Bellum Catilinæ and Bellum Iugurthinum), but we shall read also selected passages from Sallust’s most ambitious but fragmentary Historiae and from works that were not written by Sallust, but attributed to him. Close attention will be devoted also to Sallust’s language and style, the transmission of his texts, and the fortune of his work. In addition to the textual work and discussion of issues of translation, we shall focus on the following broader topics: Sallust’s place within the tradition of ancient historiography, the historical context of his works, and the complex relationship between ancient rhetoric and historiography. Additional readings of ancient sources (e.g., Cicero’s Catilinarian Orations, excerpts from Plutarch’s Life of Marius etc.) will be assigned in translation.

LATN 6464. Seneca’s Tragedies. (3 Credits)
We will read five of Seneca’s tragedies; discussing questions of performance, poetics, politics, historical content, and reception.

LATN 6465. Gellius and the Tradition of Roman Antiquarianism. (3 Credits)
This course surveys the Roman tradition of antiquarianism from the second century BCE to the sixth century CE. We will focus in particular on the Attic Nights of Aulus Gellius and read selection from Varro, Verrius Flaccus, Festus, and Isidore.

LATN 6466. Late Latin Poetry. (3 Credits)
A survey of late-antique poetry, in particular Claudian, Ausonius, Rutilius, and the Centones.

LATN 6471. Suetonius. (3 Credits)

LATN 6521. Latin Palaeography. (3 Credits)
‘From Script to Print.’ A study of the history and development of Latin handwriting from Antiquity to the Renaissance. Also a study of the manuscripts as book (codicology) and cultural artifacts. Some consideration of textual transmission and critical editing. There will be hands-on practice in reading the various scripts. A study of the history and development of Latin handwriting from antiquity to the Renaissance. Also a study of the manuscript as book (codicology) and cultural artifact. Some attention will be paid to textual transmission and critical editing. Primary emphasis will fall on the reading and recognition of the various scripts, with a final project transcribing transcribing and identifying an original manuscript leaf from the Fordham collection. Advanced students in other fields, with specific research needs, may, with permission, develop their own final palaeographical projects.
Attribute: MVS.

LATN 6542. Ovid’s Fasti and the Roman Calendar. (3 Credits)
This course offers a close reading of Ovid’s Fasti in Latin and explores the reception of Ovid’s poem and the Roman calendar in the medieval and renaissance periods.

LATN 6543. Statius, Achilleis. (3 Credits)
A seminar on the unfinished epic by Statius, the Achilleid: reading and discussion of the Latin text, accompanied by research papers presented by the participants. The text is of interest for its later influence, especially in the medieval period in Western Europe, and for its historical positioning: composed in Imperial Rome at the end of the Domitian’s region, around 93 to 95 CE, Achilleid is a summum of the entire Greek and Roman tradition of the poetry, mythology, archaic, Classical, and Hellenistic and a very innovative text, rich in experiments and subversive allusions. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

LATN 7001. Latin Survey I. (3 Credits)
The first part of a two-semester survey of Latin literature.

LATN 7002. Latin Survey 2. (3 Credits)
The second part of a two-semester survey of Latin literature.

LATN 8999. Independent Study. (1 to 3 Credits)
LATN 9101. Introduction to Latin I. (0 Credits)
Latin American and Latino Studies (LALS)

LALS 0912. Requirement Preparation. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

LALS 0914. Requirement Preparation in Summer. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

LALS 2005. American Pluralism. (4 Credits)
Contemporary and historical studies in the racial and ethnic diversity of American (U.S.) society with a special emphasis on the issues of race relations, migration and immigration and their relation to either (1) the distribution of economic or political power or (2) their cultural manifestations in literature, the arts and/or religion. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, HIAH, HIST, HIUL, LAHA, LASS, PLUR.

LALS 3005. Latin American Themes. (4 Credits)
This course allows students to explore ways to synthesize key topics in Latin American and Latina/o Studies (LALS) as an interdisciplinary field of study. It will compare the distinct approaches to these topics of the different disciplines represented by the LALS faculty (including History, Literature, Film Studies, Theology, Art History, Sociology, and Anthropology). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, ALC, AMST, CCUS, COLI, COMC, COMM, LAHA, LAIN.

LALS 3007. Spanish Linguistics. (4 Credits)
This course focuses on the linguistic study of the Spanish language. The course discusses the formal domains of language structure - including speech sounds and their mental representations, sentence structure and semantic meaning, as well as social realities of language use and language change across different varieties of Spanish in the world. The course is taught in Spanish.
Attribute: ASSC.

LALS 3130. Topics in Latin American Music. (4 Credits)
This course examines musical cultures, past and present, across Latin America and its diasporas. Emphasis is placed equally upon musical, technical, and cultural analysis of musical works, styles, and subcultures. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LAHA, LALS.

LALS 3275. Hybrid Futures: A Panorama of Mexican Short Fiction. (4 Credits)
This course will explore the main themes of Mexican science fiction, from the late nineteenth century to today, using a panoramic approach that encompasses different forms of cultural production and media (literature, film, comics, street art, etc.). Through the science fiction lenses we will examine Mexico’s relation to technology and the processes of modernization, as well as the imagined future of labor, gender, and immigration, among other issues. We will frame Mexican science fiction as part of a larger Latin American tradition, while also discussing the connections to more mainstream (i.e. American and English) visions of the genre. All materials will be available online.
Attributes: ACUP, ADVD, ALC, AMST.
Prerequisite: SPAN 2500.

LALS 3343. Crime and Minority Rights. (4 Credits)
This course is designed to present an overview of the problems for decision in the promulgation, invocation, and administration of a law of crimes. Topics include theories of crime, the purpose of punishment, and specific types of crimes. The rights of minorities will be discussed within the context of a viable criminal law. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, LAHA, LASS, URST.

LALS 3344. Crime, Literature, and Latinos. (4 Credits)
This course examines the relationship between criminal law and literature. We will study how writers use stories about the law to express ideas of humanity. We will also examine the interplay between law and morality and discuss how authors have viewed the criminal justice system, with particular emphasis on the experience of Latinos. The reading list will include criminal law and criminal procedure law, as well as works by Latino fiction writers such as Bodega Dreams, Carlito’s Way, and House of the Spirits, and by non-Latino writers such as Billy Budd and The Trial. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASHS, ASLT, COLI, ENGL, INST, ISLA, LASS.

LALS 3346. Latinos and the Media. (4 Credits)
A seminar and workshop on the impact and influence of the news media on Latin Americans and U.S. Latinos and their image by acclaimed journalist and memoirist, Luisita Lopez Torregrosa, former national editor at The New York Times and author of the critically acclaimed memoirs, Before the Rain: A Memoir of Love and Revolution and The Noise of Infinite Longing. This course will discuss and analyze the impact of negative labels and cultural and social typecasting on news written about Latin Americans and U.S. Latinos. It will also examine sources, such as films, memoirs, and scholarly books, as alternative ways to transform and reinvent these images of Latin Americans and Latinos in the news. Students will learn to analyze the presentation of Latin American and Latino subjects in the news and compose news reports and essays that present more expansive and knowledgeable views of the lives and cultures of Latin Americans and U.S. Latinos. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, LAHA.
LALS 3352. Policy Issues and Procedures in Criminal Law. (4 Credits)
Through a casebook and problem solving approach, this course will explore criminal procedure laws—including the Fourth, Fifth, and Sixth Amendments of the Constitution—and how the police implement these laws. Particular emphasis will be placed on the manner in which police practices affect minority communities. The course will also examine and critique the criminal justice system. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: LASS.

LALS 3407. Foreignness & Translation: Multilingual Autobio Writing in Contemp Latin-Am & Latino Lit. (4 Credits)
This course studies manifestations of multilingualism in contemporary Latin-American and Latino literature, more particularly multilingualism that creates a tension between mother tongue and adoptive language when one of the languages is Spanish. It focuses on narratives and memoirs written by authors whose roots are in the Southern Cone (Argentina and Chile: Manuel Puig, Sylvia Molloy, Paloma Vidal, Ariel Dorfman…), the Caribbean (Pérez Firmat, Judith Ortiz Cofer…) and México (Richard Rodríguez, Gloria Anzaldúa, Ilan Stavans…). The paradoxes of multilingualism will be approached formally (categories of multilingualism: alternating between languages, self-translation, code switching…; rhetorical patterns, central tropes), thematically (identity construction and the perception of the self, the affective function of language) and sociologically (the difficulties to publish real bilingual texts as a consequence of unequal relationships of power between North and South). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, INST, ISLA, SPAN.
Prerequisite: SPAN 2500.

LALS 3421. Latin American Fiction. (4 Credits)
A study of Latin American narrative forms. Selected readings from major Latin American writers. Topics such as unity, diversity, magic realism, the search for a national identity, literature and underdevelopment, etc. will be examined in their social and literary context. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AMST, GLBL, LAHA.

LALS 3575. Painting the Empire: Understanding the Spanish Empire Through Art and Literature. (4 Credits)
The Golden Age of Spanish art and literature (known as “el Siglo de Oro”) coincided with the configuration of Spain as a global empire after the rise of the Habsburg dynasty to the Spanish throne (from around 1550 to around 1650). This course proposes a study of the main social, political and cultural conflicts that conformed that empire from a multidisciplinary perspective that combines the works of the empire’s most famous painters (El Greco, Diego Velázquez, José de Ribera, among others) with the works of its most representative writers (Lope de Vega, Miguel de Cervantes, María de Zayas, among others); topics such as the symbolic construction and shaping of space, gender, national identity or social and religious relationships will be approached through a combination of visual and textual representations. The course will also take great advantage of the important collections of Spanish Renaissance and Baroque painting held at several New York institutions such as the Metropolitan Museum of Art of the Hispanic Society of America, including visits to those institutions and field work. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, COLI.
Prerequisite: SPAN 2500.

LALS 3600. Latin America: Current Trends. (4 Credits)
The objective of this course is to help students develop the basic tools for political analysis in the context of an overview of the current political environment and economic circumstances of Latin America’s main players. The course will provide information and guidelines for understanding the present situation within each of the main influential countries in the region and the interrelationship among these countries. The relationship with the United States and other extraregional players with increasingly important roles in the region, as well as the influence of the Organization of American States will also be explored. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AMST, INST, ISLA, LASS, PJRC, PJST.

LALS 3601. Latin American Archeology. (4 Credits)
Latin America is one of the great culture areas of the ancient and modern worlds. The peoples of the region developed unique civilizations long before the arrival of Europeans. This course considers the religion, hieroglyphic writing systems, architecture, political economy, myth, and history of Pre-columbian cultures of Mesoamerica, South America and the Caribbean. We examine the latest archaeological research and primary ethnographic documents to study the Maya, Zapotec, Aztec, Moche, Inca, and Taino culture. A broad historical and geographical sweep allows us a deeper understanding of how the Latin American past continues to shape the present. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AMST, GLBL, LASS.
LALS 3602. Crossing Borders: Migrations, Gender, Sexuality. (4 Credits)
How does migration impact gender and sexuality? How do ideas about the 'border' affect concepts of gender and sexuality? This course uses anthropological work on the border as an analytical frame to address the construction of the meanings of home, identity, belonging, citizenship, the body and space in transnational contexts. Through engagement with migrant communities in the city it will examine how the changing concepts 'female,' 'male,' and transgender as well as sexual identities are redefined and practiced cross-culturally in the transnational Latino migrant experience. A review of contemporary theories about gender and sexuality and visits to Latino migrant communities and organizations in the city. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

LALS 3840. Latin America Through Film. (4 Credits)
Major topics of Latin American cultural criticism through an examination of Latin American and Latino film production, with a special emphasis on the documentary as an alternative to mainstream cinema and television. Latin American media theories and cultural criticism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

LALS 3930. Contemporary Cuban Culture Study Tour. (1 Credit)
This one-week, one-credit, spring study-tour course will explore renewed importance of Havana as both a local and global purveyor of culture since the fall of Soviet-style socialism in the 1990's. It will focus on the city's vibrant contemporary cultural scene in music, art, dance, literature and film as exhibited in museums, galleries, workshops, concert halls, and community centers and will give students a lived sense of the issues, topics and concerns addressed by contemporary Cuban artists in innovative forms that respond to local conditions of economic transitions and to a globalized world market.
Prerequisite: SPAN 2001.

LALS 4005. Queer Theory and the Americas. (4 Credits)
Drawing from the often divergent traditions of Anglo and Hispanic America, this course will take an interdisciplinary approach to queer methodologies for cultural and literary studies. Students will encounter foundational queer theoretical texts (both historical and contemporary) as well as novels, plays, and films, and will explore, for themselves, what queerness means and does. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, COLI, FITV, INST, ISLA, LAHA, SPAN.

LALS 4100. Speaking For/As the Other. (4 Credits)
What are the implications of giving voice to those who are 'voiceless'? This course explores the role of writing and speaking during the encounter of black, Indian, mestizo and Hispanic cultures in Latin America and Latino/a United States. By examining these cultural encounters, the course examines the political and ethical implications of speaking for and as the other. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, EP4, INST, ISLA, LAHA, VAL.

LALS 4192. Rediscovering the New World. (4 Credits)
This course uses the lenses of literary studies and physics to consider the technologies that enabled the Spanish conquest of Mexico, Central America, and the Caribbean. In particular, it highlights 15th- and 16th-century writings of Christopher Columbus, Hernán Cortés, and others on the emergent science of the age of exploration. Concurrently, it examines scientific technologies that have emerged in the last decade and are being used to uncover "lost" pre-Hispanic cultures at sites such as Chichén Itzá, Tulum, and Teotihuacan. Students will hone their critical and analytical skills, and particularly their oral and written expression, in a multidisciplinary context while exploring one of the most dynamic time periods in modern history. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, LAHA.

LALS 4347. Latino Borders. (4 Credits)
This course uses an interdisciplinary approach to examine the experiences of Latin Americans and Latinos. It employs literature and history to introduce students to the benefits of using multiple ways of acquiring knowledge. It then relies on other academic areas such as art and sociology to reinforce its interdisciplinarity. As a capstone course, it allows students to incorporate disciplines from their own academic foundation. It covers topics such as politics, social justice, race, gender, and identity. The course is taught in English, with readings and writings in Spanish. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, COLI, GLBL, ICC.
Prerequisite: SPAN 2500.

LALS 4620. Oscar Romero: Faith and Politics in El Salvador. (4 Credits)
This course will investigate the life and ministry of Oscar Romero of El Salvador. Coming to office in a period of socio-political and religious upheaval, Romero functions as a lens through which students can explore important themes including: the nature and impact of liberation theology, the effects of US Cold War foreign policy, power in the Catholic Church and numerous issues involving the relationship between religion and politics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, LAHA, PJRJ, PJJS, PJST, REST.
Prerequisites: THEO 1000 or THEO 1001 or THEO 1006 or THEO 1010 or THEO 1007 or THEO 1008 or THEO 1009 or HPLC 1401.

LALS 4855. Fascisms, Aesthetics and the Hispanic World. (4 Credits)
This course will explore various iterations of fascism in Spain, Latin America, and the United States in the 20th and 21st centuries. We will concentrate first on debates among historians about the definitions and origins of fascism, and then move on to its aesthetic embodiments throughout the Spanish-speaking world. We will examine primary texts that both uphold and undermine fascist ideals, as well as theoretical texts that illuminate the mechanisms by which this works. Our discussions will be informed by historical, philosophical, and literary approaches to fascism's beginnings its transnational and transatlantic repercussions; and the persistence today of fascist rhetoric and aesthetics on three continents, particularly vis-à-vis the growing Hispanic presence in the US. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, IPE, LAHA, LALS.
Prerequisite: SPAN 2500.
Leading People and Organizations (Graduate) (LPGB)

LPGB 6610. Introduction to Modern Management. (1 Credit)
This course introduces students to the current challenges managers are facing. It provides frameworks of competing theories on human nature and explores their consequences for managing organizations.

LPGB 6613. Leading People and Organizations. (3 Credits)
FT MBA CORE/ PMBA FLEX CORE COURSE. Presents theories of designing the structure and processes of organizations, as well as the elements of the global competitive environment within which such organizations operate and ways of relating to this environment. Explores critical issues related to the individual and the firm. Focuses on defining management’s role and responsibilities in the continual improvement of quality, productivity, and the competitive position of the enterprise. Previous course title: Fundamentals of Management.

LPGB 7610. Leadership and Change. (3 Credits)
Prepares students to meet the requirements of today’s economy, where leadership demands a combination of personal capabilities and insights, as well as in-depth knowledge of organizational change processes and practices. Through readings, cases, class discussions, self-assessment exercises, and leader-directed learning projects, participants gain important insights into their own management style and develop essential knowledge and skills for successful implementation of major change initiatives. Attribute: ABEP.

LPGB 7615. Cross-Cultural Negotiation and Communications. (3 Credits)
Explores how cultural differences and international settings affect business communication and negotiation - key skills for managers who seek to get solutions accepted and implemented. The dimension of culture is used to increase the student-managers’ self-awareness and reflection and to build flexibility in their conceptual understandings and skills. Emphasizes specific strategies, styles and techniques that help the negotiator/communicator. Attributes: ABGS, ABIB.

LPGB 7616. Training and Development. (3 Credits)
An introduction to preparing, offering, and evaluating interventions for personnel training and organizational development. Topics include needs assessment, adult learning, instructional design, and transfer of training from the corporate classroom to the work site.

LPGB 7617. Assessment in Human Resources. (3 Credits)
Prepares students to conduct measurements, assessments, and reports of human resources programs and practices. Topics include job analysis, organizational development surveys, compensation reviews, organizational culture, and benchmarking.

LPGB 7619. Leading Organizational Change. (3 Credits)
Students learn to analyze organizational environments to identify challenges and constraints, to understand stakeholders’ attitudes about the status quo, to understand and manage change according to several change models, and to align business strategies with organizational systems and structures. Elements of strategy, planning, and implementation are included.

LPGB 7623. Contemporary Issues in HR. (3 Credits)
This course provides an in-depth exploration of a current topic, issue, or practice in the area of strategic human resource analysis. The course uses cases, readings, and applied exercises to examine the topic and its implications for HR practice.

LPGB 7625. Team Dynamics. (3 Credits)
Focuses on examining and developing interpersonal skills consistent with modern business’s evolution toward an integrated, self-managing, team-oriented structure. This structure emphasizes group problem-solving, interpersonal communication and leadership among peers. There are two face-to-face class sessions. The rest of the class is taught through asynchronous online modules.

LPGB 7637. Entrepreneurial Mindset. (1.5 or 3 Credits)
This hands-on course is designed to guide students through the necessary steps of developing, testing and launching a new business idea, with an emphasis on embracing an entrepreneurial mindset that is transferable to any role or industry. Projects are customizable to accommodate the needs/demands of students and where they are on their personal entrepreneurial journey. Contemporary methodologies (i.e. Lean Startup) and technology tools are incorporated to build and manage the startup process from concept to market launch. Attributes: ABEP, ABGS.

LPGB 7638. Career Management. (3 Credits)
Helps students plan and control their personal and career development by surveying theoretical concepts and research findings. Through discussions, case analyses and interpretation of diagnostic tests, students acquire the personal insights necessary to complete a self-assessment and career/life plan.

LPGB 7670. Mgmt of Human Resources. (3 Credits)
Studies the personnel function in private and public organizations from the viewpoint of the manager. Topics include recruiting, employment, wage and salary administration, management development, performance appraisal, job evaluation and design, career development, employee turnover, manpower planning, training and affirmative action.

LPGB 769A. Leadership for the 21st Century. (3 Credits)
The challenges of leading organizations, especially businesses, in the current era are vast. Globalization requires competitive strategies and cultural sensitivity, the worsening environmental crisis calls for sustainable practices, and increasing social problems and inequalities increase pressure for social responsibility beyond traditional profit making. Many current management paradigms have to be rethought and remodeled to deal with these challenges effectively. In this course we look at challenges to organizations on the systemic level (environmental and social pressures), the organizational level (employee commitment and stakeholder trust), and the individual level (happiness) and examine ways of dealing with them proactively. Attribute: ABGS.

LPGB 769T. Me, Inc.. (3 Credits)
If you were to conduct your life like a well-run business, what would it look like? The key to unlimited personal and professional success in daily life is in incorporating the best practices of exceptional companies into everyday living. This course begins by sharing basic business principles of the most successful and enduring companies and how they can be applied to your personal life. From there, this practical course will show you how to envision the kind of success you want and craft an 'exceptional living plan' - much like a business plan - that will get you there.
LPGB 76AB. Personal Leadership Development. (3 Credits)
This course will explore emotional intelligence and leadership with an emphasis on self awareness and self management. Various instruments will be used to help students define clearly their personality, motive profile, signature strengths, values and belief systems. Once a level of self awareness is achieved, we will turn to self management to help students make choices that enhance their lives, improve their leadership, and make better career decisions.

LPGB 76AE. Turnaround Management. (1.5 or 3 Credits)
In today’s demanding and fast-paced environment, there is a premium on individuals who can produce outstanding results on a continuing basis. Business as usual is not sufficient to sustain organizational vitality over the long term. Increasingly, leaders are expected to deliver growth and productivity improvements while satisfying clients, motivating employees, and meeting the needs of a myriad of internal and external stakeholders. This course is designed to prepare students to lead organizations to higher levels of performance by applying critical elements of leadership theory and practice.

LPGB 76AG. Managing Innovation Change. (3 Credits)
This course is geared towards deepening the understanding of the challenges, techniques, and burdens associated with initiating and implementing major change in an organization.

LPGB 76AI. Managing Transnational Firm. (3 Credits)
Organizations are complex systems. Different theories of designing structure and processes of such organizations are presented. The elements of the global competitive environment within which such organizations operate and ways of relating to this environment.

LPGB 76AS. Boards and C-Suite Decision Making. (3 Credits)
This course is designed to enhance the MBA’s understanding of the theory and reality of decision making at the most senior levels of the corporate organization. It will focus on decision-making among the Board of Directors, CEO/CFO and other senior management in a variety of contexts and will include international as well as U.S. perspectives. In addition to lectures and case studies, current CEOs, CFOs, and Directors will share their experiences with the class.

LPGB 76AV. Developing the Sustainability Mindset. (3 Credits)
This hands-on workshop/seminar is designed for individuals ready to take leadership roles in contributing to solutions to our species’ greatest challenge - dealing with the climate-change/global-unsustainability situation already impacting our lives, careers, businesses, and societies.
Attributes: ABGS, SOIN.

LPGB 76AW. Leadership & Trust. (3 Credits)
This course will cover some evolving concepts of leadership and then concentrate on how leaders build trust among followers and other stakeholders and how they architect high trust teams and organizations. The course will be centered around Dr. Hurley’s new book The Decision to Trust, which was named one of the best leadership books of 2011 by the Washington Post.
Attribute: SOIN.

LPGB 76BG. New Models of Mgmt. (3 Credits)
This new course will explore the management systems, management processes, and global context required for the 21st-century. There is ample evidence that the ‘business as usual’ management systems, processes, leadership, and goals of the 20th century are inappropriate for the realities of the 21st-century. Building upon the conceptual framework of three technologies (systems) of managing - traditional management, managing for quality and productivity, and managing for global sustainability - this course will explore the possibilities and emerging realities of management systems and leadership for global sustainability. Particular attention will be paid in the course to developing among class members the management skills necessary for this new system of managing and, most importantly, the mindset necessary to provide leadership for this emerging future.

LPGB 76BJ. From Managing Creativity to Leading Innovation: A Survey Course. (3 Credits)
Knowing how and where to innovate and to do so in a way that is sustainable financially, socially, and environmentally makes you invaluable to any employer. In this course you will learn tools and gain insights that can equip you to understand the process of innovation at a deeper level, by understanding its complexity and the multiple levels it can and needs to occur to be successful (including individual creativity, product/service innovation, business model innovation, governance innovation, social/sustainable innovation at the systems level).

LPGB 76BN. Jesuit Leadership and Culture. (3 Credits)
Experience the Spiritual Process that made Saint Ignatius of Loyola; Reflect and Discern on your own Leadership Style and how it compares to the Jesuit Culture of Leadership; Understand the Importance of Team Building in recreating a successful Walking Pilgrimage; Learn the Foundation of Jesuit History.

LPGB 76BQ. Entrepreneurship Bubble: Coworking, Incubators, Startup Contests, and the Purpose Bubble. (3 Credits)
This course provides a focus on the entrepreneurship and innovation bubbles as well as the shortcomings of startup structures. Topics include sources of funding and organizing such as: incubators, coworking spaces, open floor plans, angel investors, venture capital, IPO’s, and governmental mechanisms. Upon completion, students will be able to effectively analyze the weakness of an entrepreneurial venture and innovation processes.

LPGB 76BT. Org Development & Change. (3 Credits)
This is a workshop-oriented, applied course on diagnosing and managing organizational development, especially in a climate of uncertainty. Cases, lectures, guest speakers, and exercises will cover a wide variety of OD applications, practical interventions, and approaches to change evaluation.

LPGB 76BU. Design Thinking. (3 Credits)
Design thinking is an iterative problem-solving process of discovery, ideation, and experimentation that, when combined with business models, provides decision-makers with effective tools for innovation and transformation. This hands-on course will guide students in the use of a variety of design-based tools and techniques to clarify and solve human-centered organizational, business, and public service challenges.

LPGB 76BV. Leading the Sustainable Business Organization. (3 Credits)
This course will outline current challenges and opportunities of modern, sustainable business management. It will focus on leadership opportunities for the advanced business student and highlight best and emerging practices of leadership in the 21st century (incl. Tesla, Unilever, Patagonia and social enterprise).
Everywhere. Related crises are threatening economies across the planet, and business-as-usual isn’t putting as much wealth as the bottom 3.5 billion people on earth. These and millions of species going extinct; inequality is so bad that 8 men have and will get far worse; we are living in the sixth great extinction, with and failed states; the climate crisis has thrown millions into collapse, the rapidly emerging world of sustainable business. The world today is a capstone for the management consulting concentration and the social innovation concentration, as well as the sustainable business minor.

LPGB 76BX. Social Innov Master Class. (3 Credits)
This class is a special offering for students deeply interested in understanding and experiencing the promise of social innovation. In partnership with leading global organizations like the Schwab Foundation, Ashoka, and the World Economic Forum, students will learn from global leaders in the field how social innovation can shape business strategy for the 21st century.

LPGB 76BY. Leading For Impact. (3 Credits)
Have you ever wondered why Tesla, Patagonia and Toms have achieved such remarkable success while generating positive impact for society? This course focuses on social innovation and how businesses can generate social and environmental impact, besides being financially sustainable. Students in this course will learn about the world’s most pressing challenges and how new business models such as sharing economy (Uber, AirBnB), circular economy, IoT, etc. can create innovative solutions that generate positive impact for millions. Students will be provided with a comprehensive overview of the latest social business models and how their own creative ideas may be turned into a viable business venture. This course includes Community Engaged Learning (CEL) and students will be working on projects with community partners.

LPGB 76BZ. Managing Human Performance. (3 Credits)
This course examines compensation theory and practice, including strategic compensation planning as well as the development and management of compensation/reward systems, such as direct wages, indirect payments, and employee benefits. Topics include: economic and behavioral theories of compensation; job-based and knowledge-based pay systems; individual, group/team, and organizational performance pay plans; employee benefits; pay equity; executive compensation; and system administration and implementation issues.

LPGB 76BC. Sustainable Bus Master Class. (3 Credits)
This three-credit intensive will help prepare students to be leaders in the rapidly emerging world of sustainable business. The world today is in crisis: 65 million refugees on the move, fleeing climate change and failed states; the climate crisis has thrown millions into collapse, and will get far worse; we are living in the sixth great extinction, with millions of species going extinct; inequality is so bad that 8 men have as much wealth as the bottom 3.5 billion people on earth. These and related crises are threatening economies across the planet, and business everywhere.

LPGB 76CD. Soft Skills for Success. (3 Credits)
Functional knowledge (e.g. finance, IT, marketing, etc.) must be combined with implementation skills in order to create value. For example, a product manager who knows marketing but who cannot influence his or her advertising agency will not have a great career. Similarly, an investment banker who is great a financial engineering will not be successful unless they can negotiate effectively with people on all sides of the deal. The same with an accounting major who understands the accounting or tax rules but cannot lead the audit team or the many groups that report into the CFO. These implementation skills are often referred to as “soft skills”. This course will cover 8 key soft skills (reading people, influence, self-management, difficult conversations, conflict, negotiation, leading teams, execution) in quick burst format to enhance your skills and maximize your careers prospects in a short period of time. 1. Reading people – Understanding how people differ and how you should approach them to be effective. 2. Influencing people – How to increase the odds that people will act to promote your interests. 3. Managing self to maximize impact – How to understand our strengths and weakness and act to maximize the former and mitigate the latter. 4. Having difficult conversations – How to conduct conversations that may prove emotional or threatening but that need to happen to increase joint understanding, head off conflict and increase productivity. 5. Conflict resolution – How to resolve conflicts among people productively. 6. Negotiation – How to help others serve your interests and you serve theirs in ways that create value. 7. Leading teams and managing meetings – How to understand group dynamics, increase productivity and stay on track when you lead groups of people. 8. Execution – managing in such a way that you under-promise and over-deliver results to increase trust and confidence in your leadership.

LPGB 76CE. Business and the Green Real Deal. (3 Credits)
This course seeks to discern the role of energy choices and systems in responding to the climate challenge, and to specify and critically assess opportunities for business enterprise to take initiative in responding constructively to the climate challenge. Students will be organized into small teams. Each team will prepare a business case for an innovation that responds constructively to some aspect of the climate challenge.

LPGB 76CF. Innovation and Resilience. (3 Credits)
This course focuses on the process of innovation, including the resilience required to weather inevitable ambiguity, risk, mistakes, and even failures along the journey. Topics include: identifying opportunities, managing creativity, evaluating ideas, decision-making in uncertain environments, and resilience.

LPGB 7811. Management Internship. (1 to 3 Credits)
This course is intended for students with a Management internship in this term that wish to receive academic credit for it. The course will begin with an orientation session and will be followed by additional meetings with students. The course instructor will provide additional details to enrolled students.
LPGB 869A. Leadership Forum. (1.5 Credits)
Do you think you can lead? Leading in today’s complex environment is probably more of a challenge than at any other time in our history. The challenge is distinguishing between a true leader and a good manager. Additionally, how do leaders handle work/life balance? The Fordham Leadership Forum brings together many successful CEOs to articulate their road to success and the obstacles they needed to overcome, as well as great institutional leaders who will discuss how fortuity lead to them becoming heads of their respective institutions. Who should take this course? If you intend to eventually run a company, begin your own, or move up within the institution in which you are presently employed, this is probably the right course for you. Sander Flaum is well known as a leader within the pharmaceutical industry, having been the Marketing Head of a large pharmaceutical company as well as CEO of the No. 2 global advertising agency in healthcare. He now runs a marketing and sales effectiveness firm which also trains the ‘rising stars’.

LPGB 869B. Leading Global Corporations. (1.5 Credits)
In this course we will focus on three specific areas: managing large-scale organizational change, creating cultures of integrity for sustainable growth, and developing the inner qualities of the global leader.

Attribute: A/BIB.

LPGB 869D. Research For Final Project. (1.5 Credits)
Under the guidance of a faculty member(s), students will work as a team to analyse and dissect issues and generate recommendations for each group member and their specific action plan. This course will thus allow for some type of ‘return on investment’ for the student.

LPGB 869H. Team Dynamics. (1.5 Credits)
This course is designed to help students understand teams, be a more productive team member, build and lead teams, and manage team conflict. While the theory aspects of the course come from organization theory and behavior, the practice component involves face to face and virtual team interactions, where students experience the relevance of key group dynamics concepts.

LPGB 8999. Independent Study. (0 to 3 Credits)

Leading People and Organizations (Undergraduate) (LPBU)

LPBU 3223. Principles of Management. (3 Credits)
This course introduces the student to the management process within an organization. Special emphasis is placed on the role of the first line supervisor in balancing, coordinating and integrating individual and organizational needs. Other subjects covered are the development of management thought, the role of the supervisor as a decision maker and the processes of planning, organizing, leading and controlling organizational activities.

Attribute: BUMI.

LPBU 3226. Exploring Entrepreneurship. (3 Credits)
An introductory course that allows students to discover and grasp the nuances of entrepreneurship—particularly how to think, feel, and act differently to achieve entrepreneurial success, the three cornerstones of the Entrepreneurship program. Using a variety of reading assignments, case studies, and interactive projects, students will learn how to identify and evaluate potential business ideas, push the limits of their imagination and creativity, challenge the status quo, and learn to embrace change.

Attributes: BLEB, ENT, NMAC, NMDD, SOIN.

LPBU 3227. Innovation and Resilience. (3 Credits)
This course focuses on the process of innovation, including the resilience required to weather inevitable ambiguity, risk, mistakes, and even failures along the journey. Topics include: identifying opportunities, managing creativity, evaluating ideas, decision-making in uncertain environments, and resilience.

Attributes: OPMA, ENT, NMAC, NMDD, SOIN.

Prerequisites: MGBU 3226 or LPBU 3226.

LPBU 3233. ST:Start-Up Venture Experience. (3 Credits)
Intern duty and weekly seminar during which students analyze their work experience with a faculty member. Selected readings, case analysis, and written projects. The course will be taught in a business incubator, and include interaction with startup entrepreneurs. The focus will be real world exposure to the issues and uncertainty that exists for a startup with limited resources.

Attributes: ENT, PRQU.

LPBU 3234. ST: Leading for Impact. (3 Credits)
Have you ever wondered why Tesla, Patagonia and Toms have achieved such remarkable success while generating positive impact for society? This course focuses on social innovation and how businesses can generate social and environmental impact, besides being financially sustainable. Students in this course will learn about the world’s most pressing challenges and how new business models such as sharing economy (Uber, AirBnB), circular economy, IOT, etc. can create innovative solutions that generate positive impact for millions. Students will be provided with a comprehensive overview of the latest social business models and how their own creative ideas may be turned into a viable business venture. This course includes Community Engaged Learning (CEL) and students will be working on projects with community partners.

Attributes: OPMA, ENT, SOIN.

LPBU 3235. ST:Inside Tech Ventures. (3 Credits)
This experiential course is designed to give students the opportunity to gain an in-depth look and understanding of tech-based ventures from inception to exit. The merging of Entrepreneurship and Technology is - and will continue to be - the foundation of business for the foreseeable future. The course includes a one week intensive in Silicon Valley (required) hosted by NASDAQ Entrepreneurial Center. The overall objective is for students to be better prepared to take on a leadership role in a tech-based venture to maximize profitability and impact.

Attributes: ENT, SOIN.

LPBU 3236. Personal Development: The Start—Up Called You. (3 Credits)
Choosing a meaningful career or ‘discovering one’s calling’ can be a challenging and tricky process requiring self-awareness and leadership skills to navigate a path to career success. In this course, a follow-up to The Principles of Management, students learn theoretical frameworks along with research-based methodologies and techniques to address these challenges effectively. Course objectives include: utilizing insights regarding one’s talents and career aspirations to create a personal brand, conveying one’s unique value, improving networking, and creating opportunities.

Attributes: OPMI, ENT.

Prerequisites: MGBU 3223 or LPBU 3223.
LPBU 3237. ST: Leadership Forum. (1.5 Credits)

LPBU 3430. ST: Sustainable Business. (3 Credits)
Foundations of Sustainable Business. This course will provide a general overview of the problems and opportunities provided by the challenges of sustainable management. Students will learn what it means to manage for planet, people and profit simultaneously. In the first part of the class, students will be exposed to the context of business in the 21st century and learn how strategies of the 20th century need to be rethought. In the second part of the class, students will examine the traditional perspectives on the organization (business) and how it needs to be rethought to successfully address the challenges of sustainable management. We will examine business strategy, supply chain management, and the supporting functions of finance, accounting, marketing, communications and information technology.
Attributes: 0CMG, 0PMA, ENST, ENT, ESEC, ESEL, PJEN, PJST, PRQU, SOIN.

LPBU 3433. Industrial Relations and Personnel Management. (3 Credits)
An advanced treatment of issues, problems and techniques in personnel management. Findings from the behavioral sciences are applied to the problems and practices of human resource management in organizations. The course utilize small group and organization-theory as frameworks for analyzing the latest methods in the areas of selection, training, compensation, collective bargaining and performance measurement.

LPBU 3436. ST: Capitalism and Its Alternatives. (3 Credits)
What is the philosophical foundation of capitalism? What are the viable alternatives to capitalism? This course considers answers to these questions from the fields of economics, political theory, and humanistic management. Authors covered include Adam Smith, Milton Friedman, and FA Hayek.

LPBU 3446. ST: Social Entrepreneurship. (3 Credits)
This course discusses ways of creating social value through the principles of entrepreneurship. Social entrepreneurship is a rapidly developing movement that is blurring the boundaries between government, business, and the NGO sector. Social entrepreneurs are individuals with innovative solutions to society's most pressing social problems. Rather than leaving societal needs to the government or business sectors, social entrepreneurs find what is not working and solve the problem, spread the solution, and change the system by persuading entire societies to take new leaps. We study examples of successful social entrepreneurs, such as Mohammad Yunus (Noble Laureate, 2006), and identify patterns that promote positive social change. We will also engage in Social Business Plan writing based on the students' project ideas.
Attributes: 0PMA, ENT, PJEC, PJST, PRQU, SOIN.

LPBU 3449. Leading And Investing in Change. (3 Credits)
This course is designed to provide students with the skills and knowledge to influence and lead social impact in business and generally through a specifically crafted case and exercise. By the conclusion of this course, each student should have a robust toolbox of frameworks and concepts inherent to social impact and social change, and a clear understanding of capital deployment as it relates to impact investments. This class utilizes a digital gaming exercise designed for this type of course. The case $50 Million for Change requires students to step into the role of a player in the impact funding mix in a fictional city and state.

LPBU 3450. Research in Management: Managing Professional Relationships. (3 Credits)
This course introduces students to research in impression management within the organizational behavior field in management. It aims to improve students' understanding of scholarly research effort in defining impression management concepts, theories, methodological techniques, and findings, as well as to improve students' analysis and usage of impression management in the workplace. This course is also designated as Fitness Integrated Learning (FIL), which is an innovative way of teaching and learning course material while students are engaged in a physical activity of spinning. The class will take place in the Spinning studio at the McGinley Center. Students will be riding stationary bikes at their own effort level throughout the duration of the class.
Attribute: 0PMA.
Prerequisites: MGBU 3223 or LPBU 3223.

LPBU 3451. ST: Business Trends & Disruption. (3 Credits)
This course focuses on the inevitable in business: change. In today's business world, your company/industry is either doing the disrupting or being disrupted. Students will do a deep dive into business and technology trends in a variety of industries to learn how to 1) ride the wave of current and future trends, and 2) embrace disruption. The skills, knowledge, and mindset acquired will position students to be impactful thought leaders and change makers.
Attribute: ENT.
Prerequisite: LPBU 3223.

LPBU 3452. ST: Mindful Leadership. (3 Credits)
This course offers students understanding and application of mindful strategies for leaders. The curriculum provides knowledge of how the brain works, how emotions and conflict can disrupt critical thinking, and frameworks for successful collaboration. Students learn about self-reflection, self-regulation, and how mindful leadership can be applied in a variety of professional and global contexts. Mindful practices serve as a foundation for dialogue, collaboration, and change.
Attribute: 0PMI.
Prerequisite: LPBU 3223.

LPBU 3454. ST: Design Thinking. (3 Credits)
Design thinking is an iterative problem-solving process of discovery, ideation, and experimentation that, when combined with business models, provides decision-makers with effective tools for innovation and transformation. This hands-on course will guide students in the use of a variety of design-based tools and techniques to clarify and solve human-centered organizational, business, and public service challenges.
Attribute: ENT.

LPBU 3455. ST: Research for Consulting. (3 Credits)
In this course, students will explore various analytical frameworks for problems companies experience (i.e., environmental challenges, social legitimacy challenges, cost pressures, positioning challenges, human motivation challenges etc.). They will do research to apply the various frameworks and analytical skills needed to address such problems. Students ultimately will develop their research skills and present potential solutions to various sets of problems companies typically hire consultants for. This course will also be designated as Fitness Integrated Learning (FIL), where students will have the option to ride on stationary bikes at their own speed during class lectures.
Attribute: 0CMG.
LPBU 3456. ST: Foundations of Consulting. (3 Credits)
This course focuses on building skills relevant for consulting jobs. It also provides an overview of the consulting industry, its job profiles, and the consulting process. It focuses on managing professional relationships for consulting engagements, including creating offers, pitching offers, project management, team dynamics, leadership, and presentation skills.

LPBU 3457. ST: Applied Innovation Consulting. (3 Credits)
This course offers a real-life consulting engagement in which students will have the opportunity to address pressing business issues and challenges faced by their client organization. Working in teams, students will choose one of two projects and consult to either: 1) Lieutenant Colonel Joe Geraci of the Veteran's Administration, whose clinical psychology research is focused on how we can help our veterans to more effectively transition from the military to civilian life. Specifically, the team will work on planning, delivering, and expanding the scope and impact of (via implementation of the social media plan) the Veteran Multicultural Training at Fordham University and other venues in 2019 and 2020, or 2) Ann Marie Puente, director for The Center For Open Hiring at Greyston, a progressive bakery that bakes brownies for Ben & Jerry's with $20 million in revenues. The company hires anyone that wants to work, using their business model of open hiring, which they pioneered three decades ago. Current emphasis will be on communicating the research, best practices, and learnings of open hiring to other organizations.

Attributes: OCMG, OPM.

LPBU 3458. ST: Awareness & Self Leaders. (3 Credits)
This course will take a deep dive academically and experientially into what we know about individual differences and managing ourselves to create benefit for ourselves and the society we are embedded in.

Attribute: OPMI.

LPBU 3461. ST: Sustainable Fashion. (3 Credits)
This course delves deeply into the principles that define sustainable business, as well as the impact areas that are considered both the cause, and areas of cure, within fashion's environmental, social, and economic footprint. It is through this greater understanding of the forces in sustainability that a more comprehensive set of strategic decisions can be considered in the planning and marketing of business within the fashion industry's transforming reality. Through using different readings, cases, and assignments, students will master the analysis of more deeply structured marketing strategies that filter decisions through a broader lens of people, planet, and profit.

LPBU 3550. ST: Film, Character & Leadership. (3 Credits)
This course uses the inherent power of the cinema to better clarify the topics of character and character-based leadership.

Prerequisites: MGBU 3223 or LPBU 3223.

LPBU 4001. Fair Trade and Microfinance. (3 Credits)
This course examines the structure of Fair Trade as an alternative form of commerce which specifically expresses solidarity with the poor. The course is concerned with running all aspects of a small Fair Trade business. The class acts as employees on a team which seeks to make profit sustainably, yet effectively. Readings support a greater understanding of the realities of poverty.

Attributes: ENT, GLBB, PJEC, PJST, SOIN.

LPBU 4003. Spirituality and Fair Trade. (3 Credits)
This course is designed to ignite a spiritual awareness of economic injustice which ultimately motivates action, large or small. We begin by exploring the mechanisms of poverty, and looking at alternative forms of commerce. We look at why Fair Trade is able to answer some of the human rights issues associated with poverty. Readings highlight spiritual leaders from the past, and the models for action that their life stories provide. How should business students evaluate their lives and their careers? What might ‘solidarity with the poor’ mean, in a variety of contexts.

Attributes: GLBB, PJEC, PJST.

LPBU 4004. Entrepreneurship and Fair Trade. (3 Credits)
This course focuses on the entrepreneurial response to economic injustice, as expressed in the Fair Trade movement. The class will be divided into teams, to consult with emerging Fair Trade businesses in the New York area, ongoing throughout the semester. Against this backdrop we will learn from problem solving methods of entrepreneurs who have involved themselves with using business structures as a means of fighting poverty.

Attributes: ENT, GLBB, PJEC, PJST.

LPBU 4005. ST: Fair Trade Entrepreneurship. (3 Credits)
Fair trade is a global response to social injustice and poverty. Whether it is capital for ‘startups’ or markets for fair trade coffee, the fair trade movement promotes socially and environmental responsibility business practices here and abroad. This course reviews the fair trade movement’s successes and failures to find alternatives to business as usual that reduce poverty and build a sustainable global economy. Students focus on country specific examples of fair trade and microfinance social innovation that reduce poverty by creating viable livelihoods. Marketing, insurance, finance and management can all be applied to build a socially just and sustainable global economy. ‘We urgently need a humanism capable of bringing together the different fields of knowledge, including economics, in the service of a more integral and integrating vision’, Pope Francis argues in his recent Encyclical Letter. This course explores this vision.

Attributes: ENT, IPE, PJEC, PJST, SOIN.

LPBU 4006. ST: Launch Your Startup. (3 Credits)
Come see where theory meets practice! This hands-on, applied course focuses on the creation, evaluation, and development of YOUR business venture. In this course you will create/revise your business model as well as develop, test, and validate your business and customer assumptions. You will also take a deep dive into product and market analysis, your go-to-market strategies, team selection, management, financing, legal considerations, and more! Students who complete the class will have developed comprehensive new venture-planning documents, an investor pitch deck, a minimum viable product, and a validated business model. To enroll in the class, you must have a business or well-developed business idea, which will be presented on the first day of class.

Attribute: ENT.

Prerequisite: LPBU 3226.

LPBU 4440. ST: Advanced Management. (3 Credits)
This course builds on the Principles of Management course and develops students’ leadership capabilities, their collaborative skills, and their understanding of organizations and leading change toward a sustainable business future.

Attribute: OCMG.

Prerequisite: LPBU 3223.
LPBU 4443. ST: Personal Leadership. (3 Credits)
LPBU 4466. ST: Global Immersion Israel. (3 Credits)
The course provides students the first-hand opportunity to explore a vibrant business environment of Israeli organizations. Students are introduced to the management, marketing, and organizational practices across start-up, national, and international organizations within the country of Israel. Through the examination of impactful environmental factors, the role of national cultural, historical, and political setting are analyzed on how they shape and drive the unique business landscape in Israel. The course is a combination of in-class and online learning during the semester and culminating in a global immersion trip to Israel during the winter break.

LPBU 4476. ST: Cross Cultural Negotiation. (3 Credits)
This course exposes students to the legal, ethical, and practical challenges of negotiating globally. It develops negotiation skill sets and enhances appreciation of the impacts of cultural difference and international institutional settings on business negotiations. Case-based simulations offer the opportunity to refine in practice the concepts learned in reading and films. Students will emerge from the course better prepared to work in multi-cultural teams and business settings.

Attributes: OPMA, GLBB, INST, ISIN.

LPBU 4488. ST: Sports Management. (3 Credits)
An in-depth treatment of special topics in sports management, that integrates the sport industry and strategic management, will be explored through the use of case studies, lectures, and projects. Sport management programs that train people for positions in such areas as professional sports, coaching, college athletics, fitness centers, officiating, marketing, and sporting goods manufacturing will be highlighted.

LPBU 4999. Independent Study. (1 to 3 Credits)
Independent Study.

Legal English Institute (LEGL)

LEGL 0102. Foundations of Private Law. (0 to 2 Credits)
Foundations of Private Law offers a unified approach to contract, property, and tort law — the three fundamental areas of private law with which all attorneys should have familiarity. This course will be taught using a traditional case law Socratic method.

LEGL 0103. Introduction to the United States Legal System and Law Study. (0 to 3 Credits)
Introduction to the U.S. Legal System and Study first introduces students to the basics of studying law in the U.S., including tips for reading, outlining, and note taking; case law analysis; approaches to exam taking; and other suggestions for success in U.S. law school. The second part of the course will introduce participants to the basics of the U.S. legal system, including the constitutional foundations of the U.S. legal system, such as federalism, separation of powers and checks and balances, and supremacy and preemption; the judicial systems; sources of law and especially the defining principles of precedent and stare decisis and the practice of synthesizing case law; and U.S. civil litigation.

LEGL 0109. LEI Workshop. (0 to 2 Credits)
LEGL 0110. Legal English Institute Tutorial . (0 to 1 Credits)
LEGL 0129. Fundamental Lawyering Skills. (0 to 3 Credits)
Fundamental Lawyering Skills provides opportunities for participants to practice their interviewing, client counseling, and negotiating skills. You will be exposed to the unpredictable and complex world of legal practice through role plays, and you will receive comprehensive guidance and feedback from your classmates and faculty.

Attributes: EXP, JD.

LEGL 0201. Working with Contracts. (0 to 2 Credits)
LEGL 0260. Becoming a Lawyer. (0 to 1 Credits)
This course will help students in their efforts to develop a professional identity. As law firms move to competency-based models for employment, advancement, and retention, and as job seekers outnumber positions, this course will provide participants with the tools to improve their prospects of career success. Topics will include leadership; the importance of observation and self-reflection and healthy habits of practice; mindset; organization and time management; civility and judgment; communication skills; reliability and accountability; and ability to work with others. Students will get ample experience writing and doing role-plays and other in-class exercises.

LEGL 0299. Communication Pragmatics for Lawyers. (0 to 2 Credits)
Communication Pragmatics for Lawyers will integrate legal and extra-legal content from the other LEI courses into a highly practical, communication-based curriculum. The objective of this course is to polish student’s speaking, writing, listening, and reading abilities into the kind of multifaceted, communicative skill-set that is expected from attorneys practicing at top-tier law firms, businesses, international organizations, and government agencies. Students in this class will learn to integrate the content from LEI’s broad legal coursework into their own English-language communicative framework.

Legal Writing (LTGL)

LTGL 0106. Legal Writing and Research. (0 to 3 Credits)
Training in analysis of legal problems, the legal process, legal writing, and legal research. This is a small-group required course that meets weekly for approximately twelve weeks in the fall semester and eight weeks in the spring. The fall semester focuses on objective writing (law office memoranda) and common law research, while the spring semester concentrates on advocacy writing (briefs) and oral argument skills. Although the number and length of the writing assignments are uniform for all writing sections, the content of the problems varies from professor to professor. Legal research sessions, which meet in a different time slot for six weeks in the fall semester, are conducted by lawyer-librarians on the law library staff. Students learn the process of legal research using basic primary and secondary sources in both print and electronic formats. The course also introduces students to the lawyering skills of interviewing and negotiating.

Attribute: JD.

LTGL 01113. Principles of Legal Drafting. (2 Credits)
This seminar is designed to develop a student's general skills in drafting a variety of legal documents. Documents examined in depth will include wills, commercial leases, judicial opinions, and entertainment law contracts. Other topics will include the drafting of definitions, the development of ‘legalese,’ and the rise of the ‘Plain English’ movement. The number of students in the course will be limited to 12, as each student's writing will receive substantial individual attention from the professor.

Updated: 07-27-2020
LTGL 0129. Discovery Drafting. (2 to 3 Credits)
This seminar covers the preparation of civil discovery papers and related documents in a trial court. Students analyze the discovery issues raised by real cases and hypothetical fact patterns, learn how the discovery process fits within the larger pre-trial preparation process, evaluate, critique, and comment on sample discovery-related documents, and prepare various discovery-related documents, such as initial disclosures, interrogatories, requests for production, requests for admissions and deposition outlines. Students will consider special problems related to electronic discovery, expert discovery, and privilege disputes, and will be required to draft court papers common in situations involving those topics, including letters to opposing counsel, privilege logs, and motions to compel. Students will also gain some experience in specific practice skills based on the discovery and court papers drafted.
Attributes: JD, LAW, LDS.

LTGL 0153. Securities Regulation Drafting. (2 or 3 Credits)
Attributes: BFS, LAW.
Prerequisites: BUGL 0201 (may be taken concurrently) and SCGL 0417 (may be taken concurrently).

LTGL 0156. Entertainment Law Drafting. (3 Credits)
Attributes: IPIS, LAW.

LTGL 0225. Legal Writing and Research for LL.M.'s. (2 Credits)
http://www.fordham.edu/info/23814/llm_legal_writing_program.
Attribute: LLM.

LTGL 0230. Criminal Litigation Drafting. (2 or 3 Credits)
http://www.fordham.edu/info/22148/advanced_legal_writing_program/7316/criminal_litigation_drafting.
Attributes: EXP, INLJ, JD, LDS, PIS.

LTGL 0301. Commercial Drafting. (2 to 3 Credits)
Attributes: BFS, LAW.

LTGL 0302. Advanced Legal Writing Strategies and Skills. (3 Credits)
The class will focus on enhancing each student’s legal writing strategies and skills by engaging in a critical analysis of the trial and appellate judging processes, with a special emphasis on the influences shaping judicial decision-making. Working from an actual case currently pending in a federal or state appellate court, students will analyze and digest a trial record, assess lower court opinions and their underlying rationale, and have an opportunity to write factual statements and construct legal arguments that incorporate the policy implications of the issues reflected in the pending case, thereby moving beyond a strict rule-based analysis. The course concludes with each student having an opportunity to practice her or his oral advocacy skills before a panel of judges, professors, and/or practitioners.
Attributes: JD, LAW, LDS, PIS.

LTGL 0310. Civil Litigation Draft. (2 or 3 Credits)
This class is designed to teach students general principles of strong legal writing through exposure to the types of legal drafting common in civil litigation, with an emphasis on writing a legal brief in support of or in opposition to a motion. By outlining, drafting, and revising their own demand letters and briefs over the course of the semester, students will learn to write clearly, persuasively, and purposefully.
Attributes: LDS, PIS.

LTGL 0316. Family Law Drafting. (2 or 3 Credits)
http://www.fordham.edu/info/22148/advanced_legal_writing_program/7319/family_law_drafting.
Attributes: EXP, JD, LAW.

LTGL 0329. Upper-Class Legal Writing Workshop. (2 Credits)
This 2-credit seminar will build on the first-year legal writing course in developing and enhancing basic legal writing skills. The primary focus will be on writing in a clear, organized, precise, and accessible fashion. Class sessions will review basic principles of good writing, covering in particular issues of structure, style, and grammar (and also analysis to the extent that good legal reasoning is essential to good legal writing). The course will consist of a series of short writing assignments in a variety of substantive areas. Students will learn to write objective, non-litigation documents that new lawyers typically produce in practice, including memoranda, letters, client advisories, judicial opinions, and simple contracts. The course will also explore the writing process (prewriting, writing and rewriting) and teach students effective techniques of self-editing. There is no final examination. Enrollment is limited to 12 students.

LTGL 0345. Trusts and Estates Drafting. (3 Credits)
http://www.fordham.edu/info/22148/advanced_legal_writing_program/7328/trusts_and_estates_drafting.
Attributes: JD, LAW.

LTGL 0351. Employment Law Drafting. (2 or 3 Credits)
This course exposes students to the principles and skills of writing in the employment law context. Students will draft documents commonly used in the course of an employment relationship, such as employment and separation agreements, restrictive covenants, and handbook policies. Students will also draft documents involved in employment discrimination actions in federal court such as demand letters, EEOC charges and position statements, pleadings, mediation statements, and discovery devices. 3 credits.
Attributes: JD, LAW, PIS.

LTGL 0505. Media Law Drafting. (2 or 3 Credits)
http://www.fordham.edu/info/22148/advanced_legal_writing_program/7323/media_law_drafting.
Attributes: IPIS, JD, LAW.

LTGL 0622. Intellectual Property Drafting. (2 or 3 Credits)
http://www.fordham.edu/info/22148/advanced_legal_writing_program/7320/intellectual_property_drafting.
Attributes: IPIS, LAW, LLM.

LTGL 0690. Real Estate Drafting. (2 to 3 Credits)
http://www.fordham.edu/info/22148/advanced_legal_writing_program/7325/real_estate_drafting.
Attribute: LAW.

LTGL 0781. Commercial Litigation Drafting and Mediation. (2 or 3 Credits)
This class will focus on the practical writing, analytic and advocacy skills for litigating and settling a commercial dispute. Students will focus on strategies and briefing for a motion for summary judgment and supporting papers in connection with a paradigmatic example of commercial law litigation, and then engage in a related mediation/ settlement process culminating in a settlement agreement. Based on a common dispute scenario, students will (i) draft supporting, opposing and reply litigation papers (including supporting affidavits) covering the essential elements of the claim and defenses on a motion for summary judgment, (ii) be divided into groups to engage in a global mediation process, and (iii) draft a Settlement Memorandum of Understanding and Settlement Agreement. 3 credits.
Attribute: LDS.
LING 0900. Writing Requirement. (0 Credits)
LING 0901. LLM Writing Requirement. (0 Credits)
LING 0903. MSL Writing Requirement. (0 Credits)
LING 0929. Contract Drafting and Negotiation for Graduate Students. (2 Credits)
This course will focus on the basic principles of negotiation and contract drafting. Special emphasis will be placed on financial and commercial contracts. The course will be divided into three parts. First, we will cover the basic principles of effective negotiation. Second, we will cover the basic principles of clear and unambiguous contract drafting including general principles of proper English usage. Finally, we will review and understand specific types of agreements. Particular attention will be given to the US financial system by studying Credit Agreements and other types of agreements typically used in financing transactions. The course is taught through a combination of lectures and hands-on drafting and negotiation exercises. The final grade will be determined on a weighted basis combining assignments and a scheduled final exam.
Attributes: LAWB, LAWI.

LING 0972. Fashion Law Drafting. (2 Credits)

LING 1225. LLM Writing Facilitation. (0 Credits)

LING 1929. Legal Writing and Research for M.S.L. Students. (2 Credits)
This course will introduce MSL students to the mode of writing that lawyers typically engage in (outside of the litigation context). The goal of the course is to better prepare MSL students for their law school work as well as for aspects of their professional lives in which they may interact with attorneys, corporate officers, or others with whom they need to communicate in well-crafted legal language. The course will help students write in the analytical way common to lawyers and to draft effective legal memoranda, letters, emails and contracts. One class session will introduce and be devoted to the use of standard legal citation form.

Life Experience (LIFE)

LIFE 0999. Life Experience Workshop II. (0 Credits)
LIFE 2999. Life Experience Workshop. (2 Credits)

Linguistics (LING)

LING 1100. Introduction to Linguistics. (3 Credits)
An introduction to linguistics, the study of language. The course surveys the core domains of theoretical linguistics including phonology, syntax, and semantics as well as select areas of applied linguistics. Taught in English.
Attributes: CLAS, COFI, ENGL.

LING 1400. Introduction to Sociolinguistics. (3 Credits)
This course introduces students to the field of sociolinguistics, which studies how language and language use are shaped by social and cultural contexts. The course will provide a survey of important topics in sociolinguistics, including language variation and change; language contact and multilingualism; language standardization; and language ideologies. We will also explore the development of sociolinguistics as a discipline from first wave single-variation studies to third-wave studies on social meaning expressed through language style.
Attribute: MLL.

LING 1500. Introduction to Psycholinguistics. (3 Credits)
An introduction to psycholinguistics, also called the psychology of language. The course focuses on how the mind and brain acquire and process language across the lifespan and in different populations. Taught in English.
Attribute: SSCI.

LING 2025. ‘You talk like a ____’: Language, Identity and Stereotype. (4 Credits)
What does it mean to “talk like a ____”? Can you tell where someone is from by listening to them? Can you guess their race, ethnicity, gender, or social class? This course will explore how language is used in the creation of identity and social difference. Through a variety of linguistic anthropological and sociolinguistic texts, we will look at how ways of thinking about language (language ideologies) affect ways of thinking about people who speak language. We will analyze how language and linguistic difference intersects with authority, power, identity, and performance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ANTH.

LING 2050. Pragmatics of Communication. (4 Credits)
Linguistic competence is central to being a speaker in a speech community. This class brings together readings in pragmatics, sociolinguistics, and linguistic anthropology to explore what it means to be a socially competent speaker. The course examines norms of communication, such as politeness registers and appropriateness in cross-cultural contexts, and analyzes personal and professional communication practices. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MLL.

LING 2075. Politics of Language in China. (4 Credits)
This course examines contemporary language politics in China, including Mandarin promotion, language standardization, and the treatment of minority languages and non-Mandarin dialects. We will explore what counts as a language and what counts as a dialect, and we will look at how language has been implicated in state and nation-building projects. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MLL.

LING 2675. Sounds of New York. (4 Credits)
There are more than 800 languages spoken in New York City. This course introduces students to the vast linguistic diversity in their own backyard. The course will pair theoretical readings with a significant hands-on research project. Students will conduct ethnographic fieldwork among language or speech communities of their choice. Students may choose to work with the Bronx Italian-American initiative. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: MLL, PLUR.
LING 3007. Spanish Linguistics. (4 Credits)
This course focuses on the linguistic study of the Spanish language. The course discusses the formal domains of language structure - including speech sounds and their mental representations, sentence structure and semantic meaning, as well as social realities of language use and language change across different varieties of Spanish in the world. The course is taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, LALS.
Prerequisite: SPAN 2001.

LING 3010. Bilingual Minds. (4 Credits)
Worldwide, there are more bilinguals than monolinguals. Bilingualism research has revealed dynamic social, cultural, linguistic, and psychological characteristics of the bilingual experience. This course focuses on the study of the bilingual mind; that is, how bilinguals learn and process their languages and how the bilingual experience of living with two or more languages influences linguistic and non-linguistic skills and behaviors. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MLL.

LING 3015. Language and Thought. (4 Credits)
This course discusses theories and research in the study of language from a cognitive science perspective. The course elaborates on contemporary issues in the relationships between language and thought, including linguistic relativity and embodied cognition, among other areas. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, NECG, NEUR.

LING 3025. Language Endangerment. (4 Credits)
There are about 7,000 languages spoken at present, and linguists estimate that within 100 years, more than 50% of these languages will be lost. This course explores the interrelated processes of language shift, language loss, and language death, as well as efforts to preserve or revitalize endangered languages. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MLL.

LING 3035. Gender and China. (4 Credits)
This course provides a survey of issues of gender and sexuality in China, from imperial China to the present through literature, film, ethnography, history, and cultural studies. We will ask questions such as, what was it like to be a woman in late Qing-era China, or during the Cultural Revolution? How was gender formative to the creation of modern China? How are gender and sexuality conceived off in a Chinese cultural context? Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, MLL.

LING 3607. Topics in Multilingualism. (4 Credits)
This course discusses the historical and contemporary underpinnings of multilingualism in the globalized world. The course content includes discussion of empirical social and cognitive research on multilingualism as well as multilingual language education and policy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, GLBL.

LING 4020. Language and Race. (4 Credits)
This class explores the role of language in the social construction of race and racism, from the use of linguistic differences to construct racial categories in the 19th century to present-day “English only” policies and the stigmatization of race-based accents and dialects. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, LAHA, LALS, PLUR.

LING 4999. Linguistics Research. (4 Credits)
Students enrolled in Linguistics Research will complete a faculty-mentored independent research project. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MLL.
Prerequisites: LING 1100 and LING 1400 and LING 1500.

LLM-Professional Skills (SKGL)
SKGL 0156. Counseling and Advocacy in Intellectual Property and Information Technology Matters. (2 Credits)
This course is designed as an experiential course for LL.M. students wishing to understand how to address the needs of diverse clients with issues related to intellectual property and information technology law in a comprehensible, business-friendly and cost-efficient manner.
Attributes: EXP, LAWT, LLM.

SKGL 0204. In-House Lawyering and Dispute Resolution. (2 Credits)
In this experiential, skills-based class co-taught by the former General Counsel of Mastercard, students will learn, and practice, the skills necessary to successfully prevent and manage disputes as an in-house lawyer - a skill that is critical if you become an in-house lawyer yourself and quite valuable when you have one for a client. Students will practice handling a dispute, beginning with interacting with senior management upon learning of a dispute, investigating and ascertaining the relative strengths and weaknesses of a matter, including preforming corporate early case assessments. This will include a damages analysis, law firm selection, early mediation decision-making and other methods which will help students understand the various options there are for early dispute resolution and how to determine how best to leverage these tools to drive thoughtful resolutions. The students will also learn about negotiating strategies, what to consider in selecting outside counsel, what to consider in drafting dispute resolution provisions (litigation vs. arbitration) and how to be an effective advocate in a mediation.
Attributes: EXP, LIDR, LLM.
SKGL 0299. Fundamental Lawyering for LLM. (3 Credits)
We will discuss some of the skills that affect most areas of law. We will begin the course with an overview of the professionalism demanded by the profession. We will then move onto communication skills, especially in the context of communicating with those from different backgrounds. After these introductory classes we will tackle the skills of interviewing, fact analysis, counseling, and negotiation. In each of these areas the students will simulate these important areas of practice and critique each other’s performance. There will be a panel where the students will hear from practitioners in various practice areas who will discuss how these skills are applied in their practice. Finally, we will wrap up the class with a discussion of what we can take away from these areas as we potentially head towards trial and students will apply the case theories developed over the course and deliver an opening statement. Students will be evaluated based on participation and preparation in simulations and analysis, developments of theories and strategies, and any written assignments. There will be no examination.
Attributes: EXP, LLM.

SKGL 0321. International Law and Justice Practicum. (2 Credits)
In this course students examine factual scenarios, identifying and analyzing whether international law rights are at risk. Through a series of integrated readings and interactive exercises, activities, and legal writing assignments, students develop lawyering skills as well as a nuanced understanding of the doctrine underlying public international concepts, and the legal theory that has developed around specific areas of international law. Through integrated exercises, students refine their legal writing skills and practice making legal arguments in small group formats and larger public settings, for a variety of audiences and sophistication-levels. With direct oversight and supervision, as well as a system of self-evaluation journaling, each student is provided with detailed feedback and training on their performance in a variety of lawyering tasks in the following four three-week units: Unit 1 - Crimes Against HumanityUnit 2 - Public Environmental International Law Unit 3 - Human Rights and Gender-Based Violence, Human Trafficking, and International Women’s Day and Unit 4 - Blockchain, Cryptocurrencies, and Privacy: Regulation in International Law.
Attributes: EXP, INLJ, LLM.

SKGL 0521. Foreign Account Tax Compliance Act and Global Tax Compliance. (2 Credits)

SKGL 0615. LL.M. International Arbitration Practicum. (2 Credits)
In this experiential learning course, students develop professional skills needed to counsel and represent clients regarding legal, strategic, and ethical issues that typically arise in an international arbitration practice. Through a series of interactive, integrated exercises and legal writing and video assignments, students develop lawyering skills as well as an understanding of international arbitration law, rules and practice. With direct oversight and supervision, as well as written self-evaluation, each student is provided with detailed feedback and training on their performance in a variety of lawyering tasks. The class will include a mock arbitration hearing at the New York International Arbitration Center, one of the world’s leading arbitral facilities.
Attributes: EXP, LAWI, LIDR.

SKGL 0708. Commercial Drafting for LLMs. (2 Credits)
This course will teach you the principles of contemporary commercial drafting and introduce you to documents typically used in a variety of transactions. The skills you gain will apply to any transactional practice and will even be useful to litigators. Upon finishing the course, you will have learned: (i) the business purpose of each of the contract concepts, (ii) how to translate the business deal into contract concepts, (iii) how to draft each of a contract’s parts, (iv) how to draft with clarity and without ambiguity, (v) how to add value to a deal, (vi) how to work through the drafting process and (vii) how to review and comment on a contract.
Attribute: LLM.

SKGL 0780. Advising the Global Commercial Client. (2 Credits)
This course is designed as an experiential course for any LLM student who wishes to understand the needs of the global commercial client in order to provide the best counselling and service. The hypotheticals we will address and role playing are presented from the in-house perspective, but apply equally to students who intend to enter the law firm setting. In-house counsel are among the most important clients for law firm counsel to retain.
Attributes: EXP, LAWB, LAWI, LLM.
SKGL 0909. International Business Transactions: A Practical Perspective. (2 Credits)
This course is designed to introduce the student to several types of frequently encountered private international transactions - joint ventures, private equity, strategic alliances, partnerships, and mergers and acquisitions - and the role that counsel plays from inception to closing. The course will be divided in two units. The first unit, comprising four sessions, will begin with a look at the concept of "risk." Students will learn to identify different types of risk with the goal of understanding the ways they can be allocated among the parties to a transaction. We will discuss what makes a transaction international and how cross border arrangements differ from domestic deals. We will review basic concepts such as capital structure, how businesses are financed, and the interrelation between debt and equity as an introduction to the hypothetical case that we will discuss in the second unit. The second unit will be structured around a simulated negotiation exercise in which the class will be divided in two groups, one representing a US based company and the other a local partner in a third country jurisdiction. The purpose of the course is to provide students with an opportunity to experience the development of an international business transaction in a context that replicates actual legal practice. We will follow the stages of a hypothetical international transaction and the documentation that accompanies each phase. Through practical exercises and interactive participation, we will discuss, analyze and draft a letter of intent, a term sheet and selected sections of deal documents. We will discuss the importance of legal due diligence and how to undertake it. We will look at specific aspects of the US regulatory framework that may impact a cross border transaction as well as cultural barriers and ethical issues that an international lawyer may face in these types of arrangements. Emphasis will be made on real life examples and practical experience. Through direct supervision and self-evaluation, students will receive regular feedback and training during the semester. Negotiations and class assignments will help develop problem solving and written and oral communication skills. Students will gain insight into the dynamics of cross border deals and the different strategies used in negotiations. <p>
Attendance Policy: Mandatory. Students are expected to meet outside of class to develop strategies and prepare for negotiations. <p>
Grading: Class participation accounts for 50% of the final grade. Each student will submit two written memoranda (weeks 8 and 12) with an update on the status of the negotiations, an analysis of the outcome, a description of the strategy to be pursued, the student's contribution to their team, and specific recommendations (two to four pages each memorandum). The two memoranda will account for 30% of the final grade. At the end of the semester, each student will submit a written self-evaluation covering the extent to which course objectives have been realized and his/her personal contribution to their respective team. The self-evaluation will account for the remaining 20% of the grade.
Attributes: EXP, LAWI, LIDR, LLM.

Management Masters (MMGB)

MMGB 6007. Global Investment Principles. (3 Credits)
The objective of this course is to introduce the student to investment principles in the U.S. and in the global capital market. We will understand existing assets and investment vehicles, the functioning of capital market, the theoretical principles that underlie asset pricing, and its applications in the valuations of fixed income and equity securities.
Attribute: MOE.

MMGB 6009. Financial Fundamentals. (3 Credits)
Introduces the financial system and basic methods of valuation. Students will learn how to interpret financial data reported in the press and will discuss topical subjects facing the financial industry and the economy. Course topics include: financial markets, instruments, and institutions; time value of money, net present value, and applications; valuation of stocks and bonds; elements of firm and enterprise value; and risk and return.

MMGB 6010. Global Financial Markets. (3 Credits)
This course is intended as an introduction to global financial markets. We will discuss the instruments traded in the markets, the institutions that support and frame the markets, the trading mechanisms, and the regulatory structure. The course is intended to be descriptive and conceptual. The aim is to familiarize you with the breadth and scope of equity, debt, and derivative markets. We shall discuss the recent developments in the U.S. and the development of financial markets globally.
Attribute: MOE.

MMGB 6111. Accounting and CSR Reporting Principles. (3 Credits)
This course focuses on traditional critical concepts of accounting principles while integrating new CSR (Corporate Social Responsibility) reporting practices for environmental, social, and governance known as ESG.
Mutually Exclusive: ACGB 6111.

MMGB 6411. Finance in Sustainable Org. (3 Credits)
Good financial management is critical for the survival of any organization since it must have enough accessible cash to operate and pay its bills (liquidity) and enough money be able to weather bad times (solvency, resilience). However, some organizations, supported by current finance theory, focus solely on profit and financial value creation, often at the expense of other human needs. In this course we look at finance through the lens of sustainability. After learning key finance concepts we consider how organizations can go beyond current finance theory and use financial tools, techniques, and insights not only to create monetary wealth, but also to support the organization to contribute to a robust, healthy environment and to social justice and inclusion.
Mutually Exclusive: FNGB 6411.

MMGB 6610. Introduction to Modern Management. (0 to 1 Credits)
This course introduces students to the current challenges managers are facing. It provides frameworks of competing theories on human nature and explores their consequences for managing organizations.
Mutually Exclusive: MGGB 6610.

MMGB 6611. Marketing in the Digital Age. (3 Credits)
This course introduces the ways in which marketing creates value in the interactions with other business functions, stakeholders and consumers. It emphasizes why and how successful marketing needs to be customer-driven, especially in the digital age where consumer engagement through various channels is key to a firm’s success. Topics covered include the strategic marketing process; the exchange of value; market segmentation, targeting, and positioning, and the marketing mix in the digital economy.
Mutually Exclusive: MKGB 6710.
MMGB 6613. Leading Organizations in the 21st Century. (3 Credits)
This course presents organizational structure and process theories, focusing on the ways in which organizations operate within and relate to a competitive global environment. This course also explores critical issues related to the individual and the firm; and defines management's role and responsibilities in the continual improvement of quality, productivity, and the competitive position of the enterprise.
Mutually Exclusive: MGGB 6613.

MMGB 6620. Global Initiatives in Management. (2 to 3 Credits)
In this course, students will build on the insights gained in Introduction to Modern Management. Students will explore various global initiatives that are ongoing in terms of addressing global challenges, including climate change, social inequity, and poverty. Students will complete a research project and prepare a case study.

MMGB 6627. Modern Operations & Supply Chain Management. (3 Credits)
Operations/supply chain management is responsible for the design, daily operation, and improvement of operations/supply chain processes to provide a product, a service, or a product-service bundle. This course provides an introduction to this field to understand the major decisions made by operations/supply chain managers along these processes. Topics include operations strategy, process management, service operations, inventory management, quality management, lean supply chain, global sourcing, etc. The course will provide students many hands-on activities to understand the challenges on the supply chain and the impact of operations decisions on financial performance of an organization.
Mutually Exclusive: MGGB 6627.

MMGB 6630. Sustainable Bus Master Class. (3 Credits)
This three-credit intensive will help prepare students to be leaders in the rapidly emerging world of sustainable business. The world today is in crisis: 65 million refugees on the move, fleeing climate change and failed states; the climate crisis has thrown millions into collapse, and will get far worse; we are living in the sixth great extinction, with millions of species going extinct; inequality is so bad that 8 men have as much wealth as the bottom 3.5 billion people on earth.... These and related crises are threatening economies across the planet, and business everywhere.

MMGB 6631. Social Innov Master Class. (3 Credits)
This class is a special offering for students deeply interested in understanding and experiencing the promise of social innovation. In partnership with leading global organizations like the Schwab Foundation, Ashoka, and the World Economic Forum students will learn from global leaders in the field how social innovation can shape business strategy for the 21st century.

MMGB 6632. Applied Innov Consulting. (3 Credits)
This course is a real-life consulting engagement for students with a leading Fair trade company (Fairtrasa). Its CEO, Patrick Stuebi will present real-life challenges his company is facing and selected student teams will work on developing innovative solutions guided by peers and faculty. This course is a capstone for the management consulting concentration, the social innovation concentration, as well as the sustainable business minor.

MMGB 6633. Leadership in 21st Century. (3 Credits)
The challenges of leading organizations, especially businesses, in the current era are vast. Globalization requires competitive strategies and cultural sensitivity, the worsening environmental crisis calls for sustainable practices, and increasing social problems and inequalities increase pressure for social responsibility beyond traditional profit making. Many current management paradigms have to be rethought and remodeled to deal with these challenges effectively. In this course we look at challenges to organizations on the systemic level (environmental and social pressures), the organizational level (employee commitment and stakeholder trust), and the individual level (happiness) and examine ways of dealing with them proactively.

MMGB 6650. Advanced Business Communication. (3 Credits)
Communicating effectively is essential to successful management, yet many managers lack an understanding of their own communication skills. This course instructs students on what effective management communication means for teams and leadership styles, including communicating change, managing stakeholders, empowering others, and presenting compelling ideas. Students learn how to provide constructive feedback and how to examine their own communication style, applying theories and concepts via practical means in course activities and assignments.
Attribute: MOE.
Mutually Exclusive: CMGB 7550.

MMGB 6710. Purpose-Driven Marketing. (3 Credits)
This learning-by-doing course introduces students to purpose-driven marketing: the innovative use of marketing frameworks to enhance individual and societal well-being. Participants will learn how to develop stakeholder-oriented marketing strategies (using segmentation, targeting, differentiation, positioning), adapt the 4Ps of the marketing mix (product, price, placement, promotion), and balance the triple bottom line (people, planet, profit). Class discussions and course projects will address the full spectrum of marketing activities from conducting market research to creating, delivering, and communicating new services.
Mutually Exclusive: MKGB 6710.

MMGB 6820. Managerial Statistics. (3 Credits)
This course introduces students to the basic statistical concepts essential for business research and decision-making, including descriptive statistics, probability distributions, statistical inference, and simple and multiple regression.
Mutually Exclusive: DGGB 6820.

MMGB 7000. Residency. (0 Credits)
Residency is a multi-day experience in New York City, which is required for online students.

MMGB 7637. Crisis Communication and Leadership Strategies. (3 Credits)
Every organization faces crises. Yet, how crisis is handled is critical to helping its brand move forward. Students learn theoretical conceptualizations, public relations and crisis management skills to handle real world crises. Students assess how public-relations fits into the strategic management and decision-making of an organization during a crisis situation. Possible remedies for crisis are examined by applying best strategies for specific situations, using both traditional and new media, while also focusing on strategies and approaches for crisis prevention.
Attributes: ABIB, MEMG, MOE.
MMGB 7660. Business Strategy for the Modern World. (3 Credits)
This course focuses on defining an organization's mission, establishing its objectives, developing strategies for achieving those objectives, and assuring implementation and continual updating of long-term plans.
Mutually Exclusive: MGGB 7660.

MMGB 76AK. Persuasive Corporate Communications. (3 Credits)
Business professionals have long known that the ability to influence is a critical business skill. Developing long-term relationships with clients and developing an effective corporate culture is highly valued. Students will critically examine contemporary scholarship from the academic and applied field detailing effective and ineffective practices for persuading stakeholders at various levels. Students will examine how different communication channels can impact the degree to which an audience is persuaded. The course will focus on internal and external organizational communication.
Attribute: MOE.

MMGB 8999. Independent Study. (1 to 3 Credits)

Mandarin Chinese (MAND)

MAND 1001. Introduction to Mandarin I. (5 Credits)
An introductory course that focuses on the four skills: speaking, reading, writing, and listening providing students with a basic knowledge of Chinese Linguistic structures, vocabulary and culture, which, studied interdependently, comprise the Chinese Language.

MAND 1501. Intermediate Mandarin I. (3 Credits)
Attribute: IPE.
Prerequisite: MAND 1001 or MAND 1002.

MAND 1502. Intermediate Mandarin II. (3 Credits)
Attribute: IPE.
Prerequisite: MAND 1501.

MAND 2001. Mandarin Language and Literature. (3 Credits)
A critical analysis of selected cultural and literary texts: composition, conversation, and review of pertinent grammatical structures.
Attribute: IPE.
Prerequisite: MAND 1502.

MAND 2500. Approaches to Literature. (4 Credits)
An intensive reading course in the major genres (prose, fiction and drama) of Mandarin Chinese literature. A basic introduction to literature in Mandarin Chinese and to the varieties of critical strategies for reading its forms or genres. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.
Prerequisite: MAND 2001.

MAND 2550. Reading Chinese Short Stories. (4 Credits)
This course will introduce students to the narrative of well-known 19th and 20th-century Chinese writers such as Lu Xun, Bing Xin and others. Upon completion of the course, students will have acquired a basic knowledge of modern Chinese literature and will have further enhanced their speaking, reading and writing skills in Mandarin Chinese. Taught in Chinese. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, IPE, ISAS.
Prerequisite: MAND 2001.

MAND 2601. Mandarin Conversation and Composition. (4 Credits)
This course is designed for advanced Mandarin learners to improve their listening, speaking, reading, and writing proficiency. It will enable the learners to acquire up-to-date spoken Chinese by introducing contemporary TV series, mini plays, and movies. Students will also produce written texts based on the materials covered in class. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: MAND 2001.

MAND 2650. Advanced Business Mandarin. (4 Credits)
This course is designed for intermediate high and advanced Chinese learners. The aims of the course are 1) to further develop students' language proficiency in all areas: listening, speaking, reading and writing and 2) to increase students' awareness and appreciation of Chinese culture. Students will learn various aspects of contemporary Chinese society and compare Chinese cultural practice products and perspectives with their own culture to enhance understanding of Chinese people and culture. Class discussions will be held and reading and writing assignments will be assigned regularly to help students improve their skills in articulating Chinese in spoken and written forms. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISAS.
Prerequisites: MAND 2500 or MAND 2550.

MAND 3002. Topics in Chinese Culture. (4 Credits)
This course is designed for intermediate high and advanced Chinese learners. The aims of the course are 1) to further develop students' language proficiency in all areas: listening, speaking, reading and writing and 2) to increase students' awareness and appreciation of Chinese culture. Students will learn various aspects of contemporary Chinese society and compare Chinese cultural practice products and perspectives with their own culture to enhance understanding of Chinese people and culture. Class discussions will be held and reading and writing assignments will be assigned regularly to help students improve their skills in articulating Chinese in spoken and written forms. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISAS.
Prerequisites: MAND 2500 or MAND 2550.

MAND 3015. Learning Mandarin Chinese Through Music and Songs. (4 Credits)
This course introduces to students representative songs of various genres. Through learning lyrics of the songs, students continue consolidate their listening, speaking, reading and writing skills in Mandarin Chinese and continue to learn Chinese culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisites: MAND 2500 or MAND 2550.
MAND 3020. Learn Chinese Through Film. (4 Credits)
It is a course designed for advanced Chinese learners, who successfully completed Mandarin 2500 or equivalent to continue developing their skills in listening, speaking, reading, and writing through studying Chinese films and to achieve a better understanding of Chinese culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISAS.
Prerequisites: MAND 2500 or MAND 2550.

MAND 3030. Masterpieces of Chinese Film: Theory and Texts. (4 Credits)
This course provides an introduction to Chinese film, focusing on important genres, directors and movements. We will follow two parallel (often times intersecting) threads throughout the course: 'politics of film' as well as 'poetics of film.' The former explores Chinese film's engaging dialogue with Chinese sociopolitical issues whereas the latter investigates key terms of film theory such as spectatorship, gaze, apparatus theory, and authorship. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.
Prerequisites: MAND 2500 or MAND 2550.

MAND 3040. Topics in Mandarin Chinese Literature. (4 Credits)
This course examines the rich tradition of Mandarin Chinese literature form 1900 to present. Readings include a variety of genres in Mandarin Chinese, such as short stories, critical essays, poetry and screen plays. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISAS, PJRC, PJST.
Prerequisites: MAND 2500 or MAND 2550.

MAND 3045. Chinese Linguistics. (4 Credits)
This course focuses on the linguistic study of the Chinese language. Students discuss the formal domains of language structure with a focus on Chinese and discuss contemporary research and theory in Chinese linguistics. We will address key topics in Chinese linguistics, like whether Chinese has morphology or a tense/aspect system. The course is taught in Chinese. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LING.
Prerequisite: MAND 2001.

MAND 3050. China in the Headlines: An Advanced Newspaper Reading Course in Mandarin Chinese. (4 Credits)
This course will have students' reading skills in formal written Chinese through studying texts, such as, new reports, editorial essays, and transcripts of interviews. A variety of students will also develop listening and speaking skills through watching news clips and discussion and debate over top stories in Chinese media. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISAS, PJRC, PJST.
Prerequisites: MAND 2500 or MAND 2550.

MAND 3055. China and Globalization. (4 Credits)
This course is designed to further develop students’ all-around Mandarin Chinese language skills through intensive readings related to the multifaceted nature of contemporary globalization and social, political, and economic aspects of developments in the context of China. Students will solidify their advanced-level language skills and develop superior level skills, such as defending one’s view, making a hypothesis, and handling linguistically unfamiliar situations, through activities such as discussion and debate. Students are expected to reach at least advanced-low level at the end of the semester. Courses in Translation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISAS.
Prerequisites: MAND 2500 or MAND 2550.

MAND 4999. Tutorial. (3 to 4 Credits)
MAND 9101. Intro to Mandarin I. (0 Credits)
MAND 9152. Intermediate Mandarin II. (0 Credits)
MAND 9201. Mandarin Language and Literature. (0 Credits)

Marketing (Graduate) (MKGB)

MKGB 6710. Customer-Driven Marketing. (3 Credits)
FT MBA CORE/ PMBA FLEX CORE COURSE This course introduces students to marketing both as a company orientation and as a company function, and emphasizes why and how successful marketing needs to be customer-driven. Interactive class discussions focus on the role and importance of marketing for the entire organization, individuals and society at large. Students learn how marketing interacts with other business functions within a company, as well as how marketing contributes to both the company bottom-line and customers’ well-being. Topics covered include the strategic marketing process; the creation, communication, delivery and exchange of value; market segmentation, targeting, and positioning; and the marketing mix. Lectures, comprehensive case analyses, in-class exercises, and team projects are used to provide a complete understanding of customer-driven marketing practices within a global framework. (Previous title: Marketing Management).
Prerequisites: BEGB 6220 or GBA Waiver Managerial Eco with a score of 070.
Mutually Exclusive: MKGB 6711, MMGB 6711.

MKGB 6711. Marketing in the Digital Age. (3 Credits)
This course introduces the ways in which marketing creates value in the interactions with other business functions, stakeholders and consumers. It emphasizes why and how successful marketing needs to be customer-driven, especially in the digital age where consumer engagement through various channels is key to a firm’s success. Topics covered include the strategic marketing process; the exchange of value; market segmentation, targeting, and positioning, and the marketing mix in the digital economy.
Mutually Exclusive: MKGB 6710.
MKGB 6720. Understanding Digital Consumer. (3 Credits)
Consumer behavior is rapidly changing as channels and shopping offer more options and more data points. This course prepares students for marketing to digital consumers, covering the latest social science research and theories to better understand consumer behavior. The course focuses on applications in managerial decision-making for digital consumers. Topics include motivation, learning, memory, perception, attitude formation and change, perception, consumer and social well-being that aid predicting consumer behavior in traditional marketplaces and on digital platforms.
Mutually Exclusive: MKGB 7720.

MKGB 6730. Contemporary Research Methods. (3 Credits)
This course provides a fundamental understanding of analytical methods and their application in marketing and communications. It covers analytical tools needed to quantify market potential, empirically establish customer needs, and optimize efficiencies of market communications. It discusses the research process and the identification, collection, analysis and dissemination of consumer data. Topics include problem definition, using secondary data, quantitative and qualitative methods, preparation and evaluation of surveys, and data analysis.
Mutually Exclusive: MKGB 7730.

MKGB 7720. Consumer Behavior. (3 Credits)
Analyzes the latest social science research and theories to better understand consumer behavior. Special attention is directed to applications in managerial decision-making. Topics including motivation, learning, memory, perception, attitude formation and change and decision-making are covered to explain and predict how consumers behave in the marketplace.
Attribute: ABGS.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.
Mutually Exclusive: MKGB 6720.

MKGB 7721. Marketing Management for China. (4.5 Credits)

MKGB 7723. Strategic Branding. (3 Credits)
Demonstrates the strategic importance of branding by focusing on the various ways the brands acquire and sustain value in the marketplace. Analyzes relevant and comprehensive theories, and all the necessary tools, ideas and concepts to uncover the brands’ identities and help managerial branding decisions. Topics discussed include socio-cultural perspectives on branding and brand management, emotional branding, financial considerations and consequences of branding decisions.
PREVIOUSLY TITLED: BIG BRAND MARKETING.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7730. Research Methods. (3 Credits)
Provides a fundamental understanding of research methods and their application in different business functions, offering perspectives from both the provider and user of information needed for managerial decision-making. Discusses the research process with an emphasis on the identification, collection, analysis and dissemination of business and consumer data. Topics include problem definition, the use of secondary data, various quantitative and qualitative methods, preparation and evaluation of surveys, and basics of data analysis. REQUIRED COURSE FOR MARKETING CONCENTRATION.
Attributes: ASDM, BUAN.
Mutually Exclusive: MKGB 6730.

MKGB 7746. Business to Bus Mktg. (3 Credits)
Examines marketing as it is applied to business markets and organizational buying/selling with an emphasis on how they differ from consumer markets. Discusses specific issues and problems faced by firms in having organizations as customers. Basic marketing issues as market identification and segmentation, pricing, logistics, advertising and sales promotion are explored within the business-to-business environment.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7750. Global Marketing. (3 Credits)
Examines proven theories and practices of global marketing, as well as the research tools and techniques that can help marketers develop strategic decisions in global markets. Provides a comprehensive overview of global marketing environment and the critical factors involved in choosing the appropriate market-entry strategies for selected foreign markets. Demonstrates successful marketing practices from various emerging markets and regions.
Attribute: ABIB.
Prerequisites: MKGB 6710 (may be taken concurrently) or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7755. Integrated Marketing Communications. (3 Credits)
This course analyzes the planning, execution, and measurement of advertising campaigns, with a focus on developing ad campaigns and media planning that maximize consumer engagement. Topics include the role of advertising in the marketing mix, tools, techniques and processes used in creating advertising strategy, media planning, legal issues and ethical considerations in advertising. An emphasis is placed on creative ways to foster awareness and maintain consumer involvement through digital media platforms and other marketing tools. MKGB 7720 (or MKGB 6720) is suggested as prior coursework.
Attribute: ABEP.
Prerequisites: MKGB 6710 or MKGB 6711 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7765. Sales Management. (3 Credits)
Focuses on personal selling and salesforce management in the context of large and small organizations. Examines the sales process and its relationship to overall marketing strategy, evaluation of salesforce performance and the function of sales manager. Explore such topics as sales planning, forecasting as well as recruiting, selecting, motivating and compensating a salesforce.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7775. Mktg of Finl Services. (3 Credits)
Provides a scientific understanding of tactics and strategies associated with the marketing of financial services. Emphasizes the role of industry deregulation, intensified competition, and the emergence of new technologies and products on the emerging marketing practices used by financial services institutions. Explore consumers’ unique decision-making styles in financial matters, the effects of technology deployment, and the fiduciary constraints that guide marketing activities in the markets for commercial banking services, mutual funds, investment banking services, insurance and other forms of financial services.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.
MKGB 7782. Comm Corp Image Responsibility. (3 Credits)
Analyzes various means and tactics available to public relations practitioners and demonstrates the value of pragmatic public relations activities for businesses. Explores social and ethical concerns about generating publicity and how resulting public perceptions can create or deepen corporate crises. Current practices of planning for and managing crises are demonstrated via a number of guest speakers. Also offered as CMGB 7531.
Attribute: ABGS.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7785. Marketing Strategy. (3 Credits)
Presents an integrated framework on how company marketing decisions can be guided by the environment in which the company is operating, the company’s own strengths and weaknesses, and the future prospects in the marketplace. Provides a synthesis of current research findings on strategic marketing theory through the text and other material, and put theories into practice by the students through the use of computer simulations and case analyses. Enables students to develop the techniques needed to optimize marketing activities related to pricing, advertising, distribution and product development.
Prerequisites: MKGB 7730 or MKGB 6730.

MKGB 7792. New Product Development. (3 Credits)
Provides a sequential methodology for identifying new product opportunities, designing products and services to meet consumer needs. Examines processes and methods used for managing different stages of product development, from idea generation to market testing. Discuss ethical and financial considerations of new product development processes for the business and society at large.
Attributes: ABEP, ABGS.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 7795. Direct Marketing. (3 Credits)
Surveys the various media and methods of direct marketing. Explores the power of direct marketing to access specific markets with refined advertising messages and to gauge more successfully the effectiveness of those messages. Topics include direct mail, catalogs, telemarketing, electronic media, mailing lists, copywriting and copy and media testing.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 779Y. Multicultural Marketing. (3 Credits)
This course delves into how marketers can successfully reach multicultural markets. There will be an overview of marketing principles and a discussion of the impact of race, ethnicity and culture on consumer behavior. The course will take a deep dive into the important marketing considerations for the 3 major multicultural target groups in the U.S. specifically, Hispanic Americans, African Americans and Asian Americans. Through this highly interactive class, students will be educated on the evolving role of marketing in today's diverse culture. Students will learn tools for marketing to Hispanic American, African-American and Asian-American market segments, and analyze and understand the nuances of multicultural marketing communication.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 77AA. Marketing Decision Models. (3 Credits)
Demonstrates the benefits of using systematic analytic and modeling based approach to marketing decision-making and equips. Enables students to work on marketing data with a heavily applied approach and construct models to aid managerial decisions about which strategies to choose.
Attribute: BUAN.
Prerequisite: MKGB 7730.
MKGB 77AF. Services Marketing. (3 Credits)
This course provides in-depth analysis of the unique challenges and opportunities in marketing services to consumers and businesses. Students learn to identify, create and develop winning services marketing strategies. Topics include positioning services in the marketplace, developing the right target market for service companies, buyer behavior and delivery of service quality in both consumer and business markets.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 77AG. Study Tour: Cuba. (1.5 Credits)
As European, Chinese, and Latin American firms build there, Cuba is looking for domestic models that will preserve its egalitarian tradition and its rich historic culture. In this study tour, through class meetings, assigned readings, guest speakers and visiting Cuba, students will learn about this unique culture and economy while it is faced with the challenges of a socialist economic system developing a budding entrepreneurial private sector.
Prerequisites: MKGB 6710 or MIGB 6710.

MKGB 77AH. The Art of Social Business. (3 Credits)
Social Media is not a technology, a tool, or a trend; it is a fundamentally new way for businesses to connect with all of the people that matter at an unprecedented scale. People have embraced social platforms faster than any other form of communication, forcing organizations to ultimately reconstruct their business models. The course will provide students with a foundation of new social business practices across different industries. It will introduce new concepts and theories on how to transform existing business structures or develop new models that are social and personalized at the core. Students will learn how all disciplines within companies, especially marketing and marketing-related functions, are now being socialized (e.g. Marketing, Advertising, New Product Development, HR, Finance, R&D, Operations, etc.) The course will also address how a company’s culture is impacted by creating more connectivity across employees and its customers. Specific areas that will be covered include: Brand and Media Management, Creative and Advertising, Data and Measurement, which will also touch upon consumer privacy. Course work will include readings, in-depth discussions, and three group projects.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 77AI. Innovation in Bus & Energy. (3 Credits)
The purpose of the course is to frame and critique opportunities for business to create innovations in energy systems. Consequently, the course will seek to induce the student to learn about energy systems in different parts of the world, as well as energy systems supporting different sectors of contemporary economies. This course will encourage students to think broadly, which should influence how to gather information and determine what information to gather as specifying context is key to understanding whether an innovation could be viable.
Attribute: ABGS.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 77AJ. Marketing Laboratory. (3 Credits)
This course is based on a simulation to get students in virtual and simulated market environment for data driven, strategic marketing decisions. The Marketing laboratory (ML) presents a context rich environment, beginning with an initial scenario (some history), the teams work through plans, execution, and adaptation to the vagaries of an environment that changes as teams begin to pursue their various strategies, and opportunities to compete against, collaborate with, and even ignore other teams in the space.
Prerequisite: MKGB 7730.

MKGB 77AK. Multiplatform Advtg Sales. (3 Credits)
This course will apply to anyone interested in the Sales, Advertising, Marketing and Product Management professions. The content is designed to educate students on what it takes to be successful in today’s highly competitive and complex advertising sales profession. Students will be provided with an overview of multiplatform advertising properties including print, digital, social and TV, as well as analytics related to advertising sales and audience metrics.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 77AL. Innov in Business & Energy. (3 Credits)
This course aims to frame and critique opportunities for business to create innovations in energy systems. It discusses how contemporary energy systems have evolved and how energy infrastructures vary across regions of the world. It also examines how business decision makers can think about choices of energy and energy systems by encouraging students to think broadly in terms of innovation possibilities.
Attribute: ABGS.

MKGB 77AM. Digital Marketing. (3 Credits)
Digital Marketing is designed to provide students with a thorough knowledge of the digital marketing process. Throughout this course, students will be taught various digital marketing techniques and strategies so they have will have a strong knowledge base once this course is complete.
Prerequisites: MKGB 6710 or MIGB 6710.

MKGB 77AN. Design Thinking. (3 Credits)
Design thinking is an iterative problem-solving process of discovery, ideation, and experimentation that, when combined with business models, provides decision-makers with effective tools for innovation and transformation. This hands-on course will guide students in the use of a variety of design-based tools and techniques to clarify and solve human-centered organizational, business, and public service challenges.

MKGB 77AP. Business Strategy Simulation. (3 Credits)
This course is built upon a decision-making laboratory that creates a context-rich simulated business environment in which teams of students manage simulated businesses. The course not only promotes the synthesizing of knowledge conveyed through the curriculum, it also presents a means for practicing approaches to dealing with rapid and systemic change in a business environment.
Prerequisite: MKGB 6710.

MKGB 77AQ. Marketing Management and Strategy Part 1. (1 Credit)
This one-credit course focuses on the definition of marketing and on understanding the field’s importance for the entire business. It discusses different company orientations and explains how marketing orientation is different from other similar orientations, and how it contributes to overall business performance and societal well-being. Furthermore, it aims to give students an overview of marketing management processes and responsibilities.
MKGB 77AR. Marketing Management and Strategy Part 2. (1 Credit)
This one-credit course focuses on the necessary marketing related analyses that businesses need to perform before they create their strategies and tactics. It includes a detailed analysis of relevant environmental factors, an in-depth understanding of consumer behavior, and identification and analysis of competitors. Cases and real-life examples are used to ensure student understanding of the topics covered.

MKGB 77AS. Marketing Management and Strategy Part 3. (1 Credit)
This one-credit course focuses on different components of the marketing mix. It explains how businesses make tactical decisions regarding their product development and marketing, pricing, managing distribution channels and designing communication and promotion activities. Cases and real-life examples are used to ensure student understanding of the topics covered.

MKGB 77AT. Business and the Green Real Deal. (3 Credits)
This course seeks to discern the role of energy choices and systems in responding to the climate challenge, and to specify and critically assess opportunities for business enterprise to take initiative in responding constructively to the climate challenge. Students will be organized into small teams. Each team will prepare a business case for an innovation that responds constructively to some aspect of the climate challenge.

MKGB 7811. Marketing Internship. (1 to 3 Credits)
This course is intended for students with a Marketing internship for this trimester that wish to receive academic credit for it. The course will begin with an orientation session and will be followed by additional meetings with students. The course instructor will provide additional details to enrolled students.

MKGB 8701. Marketing Analytics. (1.5 Credits)
This mini-course exposes students to a variety of marketing metrics including those related to brand performance in-store (e.g., Nielsen measures used in CPG/brand management) and on-line and the use of those marketing metrics in marketing decision making. The course will cover basic data manipulation and analysis of secondary data from syndicated sources such as Nielsen and IRI. Co-requisite: MKGB 6710 REQUIRED COURSE FOR MARKETING CONCENTRATION Offered in Fall/Spring only.
Attributes: ABEP, ASDM.
Prerequisites: MKGB 6710 (may be taken concurrently) or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 8703. Revealing Consumer Insights. (1.5 Credits)
Applies theories of anthropology and ethnography to the study of consumer behavior and purchase decisions. Topics include the study of cultures and subcultures, ethnographic research designs, customer immersion, and contemporary ethnographic writing.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 8708. Marketing Analytics. (1.5 Credits)
Provides students with a hands-on experience with using various analytical methods and tools to explore digital marketing, including social media marketing and google analytics.
Prerequisite: MIGB 6710 (may be taken concurrently).

MKGB 8709. Digital Marketing Analytics. (1.5 Credits)
This course examines the marketing mix through the lens of the fashion industry. Topics to be covered include merchandising, new product development with an emphasis on private label and celebrity brands, customer loyalty programs, and licensing. We will also explore the key issues and challenges of the fashion business model and discuss emerging trends such as m-commerce, social media and apps.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 8709C. Event Marketing. (1.5 Credits)
This course will cover the basics of event planning and management, including event management, event marketing, and event disruption. It will provide a comprehensive understanding of the role of events in marketing and how to effectively plan and execute event campaigns.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 8709E. Luxury Marketing. (1.5 Credits)
This course will cover the basics of luxury marketing, including market research, brand management, and strategy formulation. It will provide a comprehensive understanding of the role of luxury in the market and how to effectively position and market luxury brands.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 8709G. Retail Buying and Merchandising. (1.5 Credits)
This course will cover the basics of retail buying and merchandising, including merchandise planning and store allocation. It will provide a comprehensive understanding of the role of retail in the market and how to effectively plan and execute retail campaigns.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 8709K. Event Marketing. (1.5 Credits)
This course will cover the basics of event planning and management, including event management and event disruption. It will provide a comprehensive understanding of the role of events in marketing and how to effectively plan and execute event campaigns.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 8709L. Marketing to Young Consumers. (1.5 Credits)
This course will cover the basics of marketing to young consumers, including understanding the behavior and preferences of this demographic. It will provide a comprehensive understanding of the role of young consumers in the market and how to effectively plan and execute marketing campaigns.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.
MKGB 879P. Science of Shopping. (1.5 Credits)
This course will examine the anthropological dimensions of retail shopping from four interconnected perspectives: practical, relational, socio-economic and sensory-physical. Students will learn the pragmatics of shopping – how people manage to navigate a store; they will explore shopping malls in terms of self-identity, social class and feelings of community; they will look at the rituals of Christmas shopping; they will evaluate the sensory dimensions of a store in experiential shopping. From exploring the interplay of these variables, students should receive a practical and theoretical understanding of the retail experience for consumers and its importance to our culture. Students will read a range of materials, write essays and conduct primary ethnographic research in shopping locations.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879R. Psychology of Pricing. (1.5 Credits)
When is it better to price a product at $3.99 compared to $4.00? Should an e-tailer include shipping charges in their products’ prices or add them separately? Among a marketer's tools, price is arguably the most important because it is the only one that represents revenue, rather than a cost, to the firm. Yet decisions like these are often wrought with complexity and uncertainty. This mini course brings structure to the issue through explorations of consumers' beliefs, feelings, and behaviors with respect to prices and pricing tactics.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879T. Mktg with Big Data. (1.5 Credits)
“Big data” describes the enormous numbers of large data sets that are generated through social media, client payment systems, consumer buying patterns and GPS satellite mapping. This course will discuss utilized to manage the terabytes of data produced daily, the methods used to spot trends, and the myriad ways that Big Data can enhance marketing strategies and optimize the ROI of a firm’s marketing budget.
Attributes: BUAN, ISEL.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879U. Consumer Social Responsibility. (1.5 Credits)
This mini-course is aimed at exploring the consumer’s role in shaping the social environment and, as such, focuses on demand-side issues of social responsibility. At the end of this course, students should have a better understanding of how the tools of marketing can be used to prompt socially responsible consumption As a result, students should better understand themselves both as business people and as individuals.
Attribute: ABGS.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879V. Multiplatform Adv'tg Sale. (1.5 Credits)
This mini course will apply to anyone interested in the Sales, Advertising, Marketing and Product Management professions. The content is designed to educate students on what it takes to be successful in today’s highly competitive and complex advertising sales profession. Students will be provided with an overview of multiplatform advertising properties including print, digital, social and TV, as well as analytics related to advertising sales and audience metrics.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

MKGB 879W. Cuba in Transition. (1.5 Credits)
Cuba is looking for business models and partnerships that will preserve its egalitarian tradition and its rich historic culture. In this course, through class meetings, assigned readings, and guest speakers, students will learn about the unique Cuban culture and economy that is faced with the challenges of a socialist economic system developing a budding entrepreneurial private sector.
Corequisite: MKGB 6710.

MKGB 879X. Applied CRM. (1.5 Credits)
Customer Relationship Management (CRM) is the strategic process of selecting the customers a firm can most profitably serve and of shaping the interactions between a firm and their customers. The goal is to optimize the current and future value of the customers for the company. This course introduces students to CRM strategy, teaches the range of metrics used for customer analytics and includes applied, hands-on usage of a real-world CRM system. Students in this course will gain experience in the strategies of and application of CRM for business and marketing effectiveness.
Attributes: BUAN, ISEL.

MKGB 8999. Independent Study. (1.5 to 3 Credits)

Marketing (Undergraduate) (MKBU)

MKBU 3225. Marketing Principles. (3 Credits)
Marketing’s role within an organization is to develop products or services that have value to potential customers, to estimate that value and price accordingly to distribute the goods efficiently and to communicate their value and availability effectively. This course introduces students to techniques and theories that help the marketer to accomplish these tasks, whether for a mom- and-pop store or a global or multinational manufacturer.
Attribute: BUMI.

MKBU 3431. Sales Management. (3 Credits)
American businesses spend substantial sums on personal selling and employ over 6.4 million people in sales and sales-related jobs. This course studies the field in depth with an analytical approach to organizing and managing the sales, function, personnel, development, forecasting, budgeting, communication ethics and the role of government. Selective cases relate theory and practice. Independent (but supervised) research by students is encouraged.
Prerequisite: MKBU 3225.

MKBU 3432. ST: Fashion Marketing. (3 Credits)
This course examines the marketing mix through the lens of the fashion industry. Topics to be covered include merchandising , new product development with an emphasis on private label and celebrity brands, customer loyalty programs, and licensing among others. Students will also explore the key issues and challenges of the fashion business model and discuss emerging trends such as m-commerce, social media and apps.
Attribute: FASH.
Prerequisite: MKBU 3225.
MKBU 3434. Integrated Marketing Communication. (3 Credits)
Advertising is the most pervasive element of the marketing mix: the average American family of four is exposed to 1,500 advertising messages a day! Students will study the role of advertising in the marketing communications mix, allocating the promotional budget and developing advertising strategy; product positioning, creative development, media planning, research and control, legal issues and ethical considerations. Students will apply theories to case discussion and develop a full-fledged competitive advertising campaign for a potential 'client.' Note for Gabelli students: Since MKBU 3434 is an upper-level business course, credit for this course (for transfer students) can only come from accredited business schools (AACSB guidelines) and not from similarly titled courses at liberal arts colleges.
Attributes: CCMS, COMC, COMM, NMAC, NMDD, NMMI.
Prerequisite: MKBU 3225.

MKBU 3435. Consumer Behavior. (3 Credits)
An interdisciplinary approach to the study of consumer behavior and motivation. Topics include behavioral science findings and their implications in the marketing mix; socioeconomics, demographic and cultural influences; theories of promotion and communication; consumer behavior models; attitude measurement; perception and consumerism.
Attribute: FASH.
Prerequisite: MKBU 3225.

MKBU 3436. ST: The Business of Fashion. (3 Credits)
This course explores the dynamic business of fashion which is a significant contributor to the economy of NYC and the United States and is one of the largest employers in our country. Topics discussed will include: textiles, fibers, fabrics, leather and fur as well as product development, fashion enterprises, unique channels of distribution, retailing, merchandising, globalization, the buying and selling of fashion products. Students will also learn basic business concepts such as: forms of business, entrepreneurship, management, human resources, marketing, financial information, and socially responsible behavior and ethical issues in fashion. Whenever possible, guest speakers and visits to fashion-centric exhibits and points-of-interest will be incorporated into course-related activities.
Attribute: FASH.

MKBU 3437. Direct Marketing. (3 Credits)
A comprehensive overview of various aspects of direct marketing is provided. Topics covered include direct mail, catalogs, mailing lists, copy and media testing, fulfillment, preparation of direct response copy, lead generation, and the role of media in the application of direct marketing.
Prerequisite: MKBU 3225.

MKBU 3438. Retailing. (3 Credits)
The retail merchandising function is examined. Topics covered include: retail strategy, trading-area analysis, store location, market analysis and sales forecasting, merchandise planning and management, retail advertising, store image, pricing and analysis of emerging forms of new retail competition.
Prerequisite: MKBU 3225.

MKBU 3439. ST: Branding. (3 Credits)
This course examines the strategic importance of branding by focusing on the various ways the brands acquire and sustain value in the marketplace. It analyzes relevant and comprehensive theories, ideas and concepts to demonstrate how managers can make strategic branding decisions. Students learn about socio-cultural perspectives on branding and brand management, financial considerations and consequences of branding decisions.
Attributes: OCMK, ENT, FASH, NMDD.
Prerequisite: MKBU 3225.

MKBU 3440. Global Marketing. (3 Credits)
This course addresses the need for global approaches to today's business by focusing on product design, promotion, distribution channels and pricing strategies that are tailored to diverse international cultural, political, competitive and economic environments. Specific attention is place on the feasibility of import/export, and national or global policies regarding marketing issues.
Attribute: GLBB.
Prerequisite: MKBU 3225.

MKBU 3441. Marketing Research. (3 Credits)
A practical approach to the study of research principles and procedures as an important tool of marketing, stressing the role of research in planning, operating and controlling marketing activities. Problems are examined from the perspective of managerial decision making in the age of computers. Analytical and qualitative techniques and their applications to 'live' cases are emphasized.
Attributes: OCMK, PRQU.
Prerequisite: MKBU 3225.

MKBU 3442. ST: Marketing Consulting. (3 Credits)
Small groups of students-maximum 3- will work with organizations on a real life marketing problem. The students will work, with the host organization, but not necessarily at the organizations premises, towards a solution. The solution will be formally presented at the end of the semester to the host organization. Additionally the students will be able to draw on a tutor who is an experienced Marketing professional who will provide academic and practical support. This could be in any area of marketing, for eg: Research; Product Development; Communications; Internet. The students will be responsible for finding a host organization. This will be part of the grading criteria.

MKBU 3444. ST: Chinese Cultural Competency. (3 Credits)
China is governed by culture as well as by government. This course is designed to give Fordham students a competitive edge in marketing through and exploration of cultures-American and Chinese. Preconceptions, misperceptions and expectations are presented from both sides, allowing students to find a common ground for effectively marketing a product and negotiating business deals. In a series of interactive meetings, students are presented with a background on each topic and then carry through to active role-playing, dialogue, and written response demonstrating their understanding of the differences between American and Chinese cultural nuances, points-of-view and expectations.
Attribute: GLBB.
Prerequisite: MKBU 3225.

MKBU 3445. ST: Marketing Analytics. (3 Credits)
The course introduces students to a variety of marketing metrics and analyses. Students will be exposed to syndicated sources of data such as Nielsen and IRI, as well as the techniques for manipulating and analyzing primary data.
Attributes: OCMK, ENT, PRQU.
Prerequisite: MKBU 3225.
MKBU 3446. Marketing in China. (3 Credits)
This course provides students with knowledge needed to develop and execute a successful marketing strategy in China and is divided into three modules: Overview of Chinese history, culture and government, and the economy referred to as capitalism with Chinese characteristics; Chinese business etiquette and its role in developing relationships with government officials, members of other organizations, and individuals; marketing strategy planning and execution, including knowledge of first and second tier markets. Students are challenged to explore their personal beliefs and perceptions, employing self-assessment and role playing techniques and debate social issues from all points of view. Implications for other high-context hierarchical cultures are explored.
Attributes: GLBB, INST, ISAS, ISIN.
Prerequisite: MKBU 3225.

MKBU 3448. ST: Social Marketing. (3 Credits)
This learning-by-doing course introduces students to the marketing dimensions of social innovation and sustainable business. Course projects address the full spectrum of marketing activities from conducting market research and identifying market opportunities to improving existing services and developing new services.
Attributes: BLEB, ENT, SOIN.
Prerequisite: MKBU 3225.

MKBU 3449. ST: Customer Experience Mgt. (3 Credits)
This course aims to teach students the discipline, methodology and process used to comprehensively manage a customer’s exposure, interaction and transaction with a company, product, brand or service. It offers an integrated framework for managing customer experiences that would create a competitive advantage for companies.

MKBU 3450. ST: Marketing Entrepreneurial Ventures. (3 Credits)
The entrepreneurial ventures don’t have the time, staff, or money for strategy development, testing, and sequential marketing campaigns. Nonetheless, marketing is critically important. This course will introduce students to theories and best practices in marketing for entrepreneurial ventures. Students will analyze and discuss relevant case studies, and they will apply their learning in assignments and group projects.
Attribute: ENT.
Prerequisite: MKBU 3225.

MKBU 3451. ST: Strategic Product Planning. (3 Credits)
This course aims to introduce students to product planning process, including product line and mix strategies. It covers topics that are relevant to ‘product’ part of marketing mix and management. It focuses on the development and application of value-enhancing strategies used by successful product managers.
Prerequisite: MKBU 3225.

MKBU 3452. ST: Marketing in Energy. (3 Credits)
The purpose of the course is to frame and critique opportunities for business to create innovations in energy systems. Consequently, the course will seek to induce the student to learn about energy systems in different parts of the world, as well as energy systems supporting different sectors of contemporary economies. This course will encourage students to think broadly, which should influence how to gather information and determine what information to gather.
Prerequisite: MKBU 3225.

MKBU 3453. ST: Innovation and Resilience. (3 Credits)
This course focuses on the process of innovation, including the resilience required to weather inevitable ambiguity, risk, mistakes, and even failures along the journey. Topics include: identifying opportunities, managing creativity, evaluating ideas, decision making in uncertain environments, resilience.
Attribute: ENT.

MKBU 3454. ST: Design Thinking. (3 Credits)
Design thinking is an iterative problem-solving process of discovery, ideation, and experimentation that, when combined with business models, provides decision-makers with effective tools for innovation and transformation. This hands-on course will guide students in the use of a variety of design-based tools and techniques to clarify and solve human-centered organizational, business, and public service challenges.
Attributes: 0CMK, ENT, NMAC, NMAT, NMDD, NMMI.

MKBU 3455. Business Anthropology in Global Context. (3 Credits)
Business anthropology is a growing field of study and an emerging professional market, globally. Anthropology holds that there are many different and complex social and cultural ways of ordering life. This course will instruct students on ways to develop and understand local consumer behavior for global brand reach, devise brand strategies for specific markets, and understand brands from a local point of view.
Prerequisite: MKBU 3225.

MKBU 3456. Global Consumer Behavior. (3 Credits)
This course studies consumer behavior in a global context with an interdisciplinary approach. Topics include behavioral science findings and their implications in the marketing mix; socioeconomics, demographic and cultural influences; theories of promotion and communication; consumer behavior models; attitude measurement; perception and consumerism.
Prerequisite: MKBU 3225.

MKBU 3457. Business Anthropology in Global Context. (3 Credits)
Business anthropology is a growing field of study and an emerging professional market, globally. Business leaders increasingly find that insights from anthropology are necessary to reduce complexity and rethink what they can offer their customers on their terms. This course will instruct students on ways to develop and understand local consumer behavior for global brand reach, devise brand strategies for specific markets, and understand brands from a local point of view.
Prerequisite: MKBU 3225.

MKBU 3458. ST: Global Sustainability Mkt. (3 Credits)
This course aims to provide the knowledge and skills necessary to successfully market sustainable products and services in global markets. It examines global trends and issues that influence the success of sustainability marketing and discusses the role it plays for global companies. Students learn about the key elements of developing a successful marketing approach for sustainable offerings in global markets.
Prerequisite: MKBU 3225.

MKBU 3459. Cross Cultural Consumer Insight. (3 Credits)
This course applies theories of anthropology and ethnography to the study of consumer insights in a cross-cultural context. Topics include the study of cultures and subcultures, ethnographic research designs, customer immersion, and contemporary ethnographic writing.
Attribute: SOIN.
Prerequisite: MKBU 3225.
MKBU 3460. ST: Applied Design Thinking. (3 Credits)
This course focuses on a problem solving approach that is human centered, with an emphasis on ideation and open experimentation. A company that is renowned for incorporating all of these is Walt Disney World. The goal of this class is to use Walt Disney World as a case study to learn the application of both Marketing and Design Thinking.
Prerequisite: MKBU 3225.

MKBU 3461. ST: Sustainable Fashion. (3 Credits)
This course delves deeply into the principles that define sustainable business, as well as the impact areas that are considered both the cause, and areas of cure, within fashion's environmental, social, and economic footprint. It is through this greater understanding of the forces in sustainability that a more comprehensive set of strategic decisions can be considered in the planning and marketing of business within the fashion industry's transforming reality. Through using different readings, cases, and assignments, students will master the analysis of more deeply structured marketing strategies that filter decisions through a broader lens of people, planet, and profit.
Attribute: FASH.
Prerequisite: MKBU 3225.

MKBU 3462. Sustainability Marketing. (3 Credits)
This course aims to introduce students to sustainability related marketing concepts. Various approaches to adopt sustainability marketing practices to help businesses support UN Sustainable Development Goals and create more sustainable solutions to create shared value will be discussed. Topics will include circular economy; stakeholder value creation; purpose-driven marketing; sustainable consumption; and sustainability practices in various industries like fashion, retail, supply chain, and tourism, among others.
Prerequisite: MKBU 3225.

MKBU 4101. ST: Psychology of Pricing. (1.5 Credits)
When is it better to price a product at $3.99 compared to $4.00? Should an e-tailer include shipping charges in their products’ prices or add them separately? Among a marketer’s tools, price is arguably the most important because it is the only one that represents revenue, rather than a cost, to the firm. Yet decisions like these are often wrought with complexity and uncertainty. This mini course brings structure to the issue through explorations of consumers’ beliefs, feelings, and behaviors with respect to prices and pricing tactics.
Prerequisite: MKBU 3225.

MKBU 4102. ST: Fashion Marketing. (1.5 Credits)
This course examines the marketing mix through the lens of the fashion industry. Topics to be covered include merchandising, new product development with an emphasis on private label and celebrity brands, customer loyalty programs, and licensing. This course will also explore the key issues and challenges of the fashion business model and discuss emerging trends such as m-commerce, social media and apps.
Prerequisite: MKBU 3225.

MKBU 4105. ST: Services Marketing. (3 Credits)
Services account for over 75% of the GDP in the US and, even in a difficult economic environment, many sectors are growing rapidly. This course will provide in-depth analysis of the challenges and opportunities in marketing services to consumers and businesses. Students will learn how to identify, create and develop winning service marketing strategies. Topics will include marketing principles, buyer behavior and delivery of service quality from both consumer and business-to-business perspectives.
Prerequisite: MKBU 3225.

MKBU 4107. ST: Science of Shopping. (1.5 Credits)
The Science of shopping will examine the anthropological dimensions of retail shopping from four interconnected perspectives: practical, relational, socio-economic and sensory-physical. Students will study the pragmatics of shopping – how people manage to navigate to a store; they will explore shopping malls in terms of self-identity, social class and feelings of community; they will look at the rituals of Christmas shopping; they will evaluate the sensory dimensions of a store in experiential shopping. Form exploring the interplay of there variables, students should receive a practical and theoretical understanding of the retail experience for consumers and its importance to our culture.

MKBU 4108. ST: Marketing to Young Consumers. (1.5 Credits)
This course examines special considerations in marketing products designed for infants, preschoolers, kids and tweens. Topics to be covered include concept/product testing with children, advertising to children, the parent vs. child as decision maker, and the role of peer influence on decision making.
Prerequisite: MKBU 3225.

MKBU 4109. ST: Revealing Consumer Insights. (1.5 to 3 Credits)
This course aims to teach students about revealing insights and underlying themes from vast consumer data to identify opportunities for improving consumer products, brands and services. Students will learn to discover insights and overall consumer trends and use them to make strategic marketing decisions.
Prerequisite: MKBU 3225.

MKBU 4111. ST: Cuba in Transition. (1.5 Credits)
Cuba is looking for business models and partnerships that will preserve its egalitarian tradition and its rich historic culture. In this course, through class meetings, assigned readings, and guest speakers, students will learn about the unique Cuban culture and economy that is faced with the challenges of a socialist economic system developing a budding entrepreneurial private sector.

MKBU 4112. ST: Data Driven Sales Strateg. (3 Credits)
This course provides a working understanding of different analytical tools like CRM software, Social Selling strategies and techniques to mine publicly available market data to strengthen sales engagements. In-class role playing utilizing the popular “Challenger Sales” methodology, presentation training and digital tools demonstrations are used enable best-in-class data-driven sales skills.
Prerequisite: MKBU 3225.

MKBU 4441. Marketing Strategy. (3 Credits)
Students exercise the business skills they have developed in previous course work in all functional fields by applying these techniques and theories to a series of marketing challenges. Case analysis and discussion present an integrated approach to decision making that will achieve corporate objectives.
Attribute: OCMK.
Prerequisite: MKBU 3225.
MKBU 4442. ST: Mktg Fincl Services. (3 Credits)
The objective of this course is to provide an understanding of the successful strategies associated with the marketing of financial services. Financial services have witnessed a significant growth in marketing activity during the past five years due to industry deregulation, intensified competition, and the emergence of new technologies and products. These changes have made it critical for business students who anticipate being active in financial services to expand their skill sets and to explore new approaches for successful marketing of these services. Many of these approaches are found through systematic exploration of opportunities arising from the financial decision making styles of consumers the dynamics by which technology will be influencing consumer choices in the near future. This course is intended for students who anticipate becoming active marketers of financial services at some point in their careers. Having completed this course, students should be able to manage consumer marketing activities for a wide array of financial services organizations.

MKBU 4443. ST: Performing Arts in the 21st Century. (3 Credits)
To chart careers with the widest possible scope for their talent, performers must understand the economic system in which they operate. This course provides a basic understanding of the complex business of the arts, through a series of guest lectures by managers of orchestras, theater, dance, and opera companies, record companies, etc. No business experience is required. Offered in collaboration with the Julliard School on their campus at Lincoln Center.
Attributes: CMST, COMC, COMM, THEA.
Prerequisite: MKBU 3225.

MKBU 4446. ST: Entertainment Marketing. (3 Credits)
This is a survey course addressing the fundamental planning and strategic concepts and processes essential for marketing entertainment goods and services in today's competitive domestic and global environments.
Prerequisite: MKBU 3225.

MKBU 4447. ST: Omnichannel Retailing. (3 Credits)
This course will explore the retailing industry that supplies merchandise and experiences to end users, an industry that has always been highly competitive but that has experienced unprecedented and precipitous change in the past 20 years. It covers all the aspects of retail management - both physical and digital - as the industry learns how to cope in an ever-changing environment. Students will use lectures, mini-cases, site visits, and other vehicles to cover the field and how it is facing its challenges.
Prerequisite: MKBU 3225.

MKBU 4448. ST: Bus to Bus Marketing. (3 Credits)
This course offers a comprehensive study of the nature and scope of industrial or business-to-business markets. It focuses on the skills students need to understand the unique needs of business customers and succeed in marketing and management roles within B2B businesses. Topics include exploring business markets and business marketing: creating value for business customers; designing product, pricing and channel strategies.
Prerequisite: MKBU 3225.

MKBU 4451. ST: Data Driven Marketing Decisions. (3 Credits)
The course aims at offering students advanced analytical marketing and decision making tools in order to help them solve typical marketing managerial situations. It will allow students to simulate data driven marketing decisions and formulate sound recommendations. The course will deal with lectures that will immediately be applied to case studies and in-class exercises.
Attribute: PRQU.
Prerequisite: MKBU 3225.

MKBU 4454. ST: Sports Marketing. (3 Credits)
The entertainment sector is a major industry. Within that sector, sports activities are targeting a number of demographic and other segments of the population. While some sports (collegiate and professional) are quite successful in their marketing strategies, others struggle to gain or to hold their audience within a competitive market place. This course evaluates the marketing mix of those sports teams and institutions that are successful and assesses the marketing ingredients of those sports activities that are struggling to gain a larger or profitable share of the audience.
Attribute: SJOR.
Prerequisite: MKBU 3225.

MKBU 4456. ST: Global Corporate Communication. (3 Credits)
The ability to influence is a critical business skill for business professionals in any industry, including consulting. This course focuses on corporate communication, including both internal and external communication. It includes sessions with faculty and industry professionals. We first define corporate communication and persuasion to better understand how organizations develop long-term relationships with clients, as well as internal and external stakeholders. We will discuss how to assess corporate communication, as well as various modes of effective corporate communication. Students will demonstrate their ability to assess stakeholders and audit an organization's communications. They will also gain experience in developing communication plans.

MKBU 4457. ST: CB Consulting Project. (3 Credits)
A team of undergraduate students will have the opportunity to participate in a one semester project acting as consultants in an advisory role. Students will be given a consulting project and asked to complete a plan for a final course of action for which a company can undertake. Students will apply their academic and individual expertise to the development of this plan.

MKBU 4458. ST: Introduction to Public Relations. (3 Credits)
Strategic and tactical approaches are given to public relations as a business and as a business/management tool. Emphasis is on planning and executing public relations programs and activities, including relations with the news media and other external communications as well as internal/organizational communication.
Prerequisite: MKBU 3225.

MKBU 4459. ST: Marketing the Arts. (3 Credits)
Learn how to incorporate marketing techniques, public relations and advertising to develop specific strategies targeting new audiences. These classes will stress how to communicate, present materials and create events that will identify and stimulate new participants. Samples of materials and case studies will be utilized. Selected communities will be analyzed and techniques discussed to best involve them in audience development. For this course, ‘the Arts’ will include theater, dance, museums, painting and the plastic arts. Guest speakers will add both theoretical and practical insights.
MKBU 4462. ST: Global Immersion: Rome. (3 Credits)
This class aims to teach how a city as a whole could be incorporated into the marketing mix and be used for marketing purposes. It is a mix of rigor and eclecticism delivered in an accessible manner, in historical city of Rome. Class meetings prior to departure will be comprised of lectures focused on the class model, as well as film screenings to provide context and prepare students for their experience in Rome.

MKBU 4463. ST: Global Immersion Ireland. (3 Credits)
This study tour course focuses on doing business in Ireland and the European Union by allowing students to personally experience business practices and culture in this major global market. Students meet with faculty and periodically during the preceding semester to discuss reading assignments and tour arrangements. Students travel to Ireland in early January, to meet as a class with local businesses, advertising agencies, the U.S.-Irish Chamber of Commerce, government agencies, and manufacteres and retailers.

Attribute: GLBB.

MKBU 4465. ST: Study Tour in Paris. (3 Credits)

MKBU 4466. ST: Global Immersion Israel. (3 Credits)
The course provides students the first-hand opportunity to explore a vibrant business environment of Israeli organizations. Students are introduced to the management, marketing, and organizational practices across start-up, national, and international organizations within the country of Israel. Through the examination of impactful environmental factors, the role of national cultural, historical, and political setting are analyzed on how they shape and drive the unique business landscape in Israel. The course is a combination of in-class and online learning during the semester and culminating in a global immersion trip to Israel during the winter break.

MKBU 4469. ST: Global Immersion Germany. (3 Credits)
This course offers students an introduction to the field of social entrepreneurship. It will examine the evolution of social innovation and entrepreneurship theory and practice, compare and contrast organizational models and supportive ecosystems in the United States and Germany, and engage students in charting a course for the future.

MKBU 4477. ST: Study Tour to Spain. (3 Credits)
This course includes travel to Spain for business and cultural site visits as well as pre-travel lectures, assigned readings, pre-travel exam, company research assignments, and a final research paper.

Attribute: GLBB.

MKBU 4484. ST: Study Tour of Tokyo. (3 Credits)
This class aims to teach how a city as a whole could be incorporated into the marketing mix and be used for marketing purposes. It is a mix of rigor and eclecticism delivered in an accessible manner, in extraordinary mega city of Tokyo. Class meetings prior to departure will be comprised of lectures focused on the class model, as well as film screenings to provide context and prepare students for their experience in Japan.

Prerequisite: MKBU 3225.

MKBU 4485. ST: Study Tour Iceland. (3 Credits)
Students will have the opportunity to learn firsthand the journey Iceland has taken from a country in the middle of a major financial crisis in 2008, to a new era of economic growth beginning in 2011 with growth in GDP as well as declined trends in unemployment. Visits to a variety of marketing/business related companies, both domestic and foreign, will focus on marketing to a segment of the EU that is still in the process of transforming a challenging situation into a country with an improved consumer confidence. A visit to Iceland’s capital, Reykjavik, will be a representation of the marketing difficulties that once faced this now thriving city. In addition to business visits, cultural visits will enable students to understand the impact that this financial crisis has had on the social/cultural environment. Students will experience what many regard as ‘One of Europe’s Recovery Success Stories’.

Prerequisite: MKBU 3228.

MKBU 4505. E-Commerce. (3 Credits)
This course introduces students to concepts, issues and technologies for transacting electronic business. Topics include use of Internet and Web technologies for interacting with customers and suppliers, electronic business-to-business and business-to-consumer transactions, capturing and processing transactions online, electronic publishing and entertainment, electronic payment, and settlement systems, security and privacy, encryption and firewalls and corporate intellectual property protection.

Attribute: ENT.

Prerequisites: INSY 2300 or INSY 2400.

MKBU 4706. Honors Thesis II - Marketing. (3 Credits)
Honors project in Marketing.

MKBU 4999. Independent Study. (1 to 4 Credits)

Marketing Intelligence (MIGB)

MIGB 6710. Customer-Driven Marketing. (3 Credits)
This course introduces students to marketing both as a company orientation and as a company function, and emphasizes why and how successful marketing needs to be customer-driven. Interactive class discussions focus on the role and importance of marketing for the entire organization, individuals and society at large. Students learn how marketing interacts with other business functions within a company, as well as how marketing contributes to both the company bottom-line and customers’ well-being. Topics covered include the strategic marketing process; the creation, communication, delivery and exchange of value; market segmentation, targeting, and positioning; and the marketing mix. Lectures, comprehensive case analyses, in-class exercises, and team projects are used to provide a complete understanding of customer-driven marketing practices within a global framework.

MIGB 7720. Consumer Behavior. (3 Credits)
Analyzes the latest social science research and theories to better understand consumer behavior. Special attention is directed to applications in managerial decision-making. Topics including motivation, learning, memory, perception, attitude formation and change and decision-making are covered to explain and predict how consumers behave in the marketplace.
MIGB 7732. Data Driven Mktg Decisions. (3 Credits)
Analyzes the latest social science research and theories to better understand consumer behavior. Special attention is directed to applications in managerial decision-making. Topics including motivation, learning, memory, perception, attitude formation and change and decision-making are covered to explain and predict how consumers behave in the marketplace.
Attribute: ASDM.

MIGB 7785. Marketing Strategy. (3 Credits)
Marketing Strategy.

MIGB 779H. Marketing Decision Models. (3 Credits)
Marketing Decision Models.

MIGB 7792. Applied Project. (3 Credits)
Applied Project.

MIGB 8701. Marketing Analytics. (1.5 Credits)
This course exposes students to a variety of marketing metrics, including those related to brand performance in-store (e.g., Nielsen measures used in CPG/brand management) and online, and the use of those marketing metrics in marketing decision-making. The course will cover basic data manipulation and analysis of secondary data from syndicated sources such as Nielsen and IRI.

MIGB 8702. Exp Career Dev Portf I. (0 Credits)

MIGB 8703. Reveal Consumer Insights. (1.5 Credits)

MIGB 8704. Qualitative Research. (1.5 Credits)

MIGB 8705. Applied CRM. (1.5 Credits)
Customer Relationship Management (CRM) is the strategic process of selecting the customers a firm can most profitably serve and of shaping the interactions between a firm and their customers. The goal is to optimize the current and future value of the customers for the company. This course introduces students to CRM strategy, teaches the range of metrics used for customer analytics and includes applied, hands-on usage of a real-world CRM system. Students in this course will gain experience in the strategies of and application of CRM for business and marketing effectiveness.

MIGB 8706. Experimental Design. (1.5 Credits)

MIGB 8707. Language of Consumers. (1.5 Credits)

MIGB 8709. Digital Marketing Analytics. (1.5 Credits)
Provides students with a hands-on experience with using various analytical methods and tools to explore digital marketing, including social media marketing and google analytics.

MIGB 8712. Exp Career Dev Portf II. (0 Credits)

MIGB 8730. Introduction to Marketing Research. (1.5 Credits)
Provides a fundamental understanding of marketing research methods and their applications, offering perspectives from both the provider and user of information needed for managerial decision-making. Discusses the marketing research process with an emphasis on the identification, collection, analysis, and dissemination of data. Topics include problem definition, the use of secondary data, various quantitative and qualitative methods, preparation and evaluation of surveys, and basics of data analysis.
Prerequisite: MIGB 6710.

MIGB 8731. Survey & Questionaire Design. (1.5 Credits)
Provides the framework, skills, and tools to develop valid and reliable marketing research techniques. Working in support of marketing objectives, this course examines practical executions of research surveys with consumers and businesses. Enables students to structure and scale research surveys with a variety of implications and methods of analysis, measurement, and evaluation.

MIGB 8999. Tutorial. (1.5 Credits)

Master's Seminar (Gabelli) (MSGB)

MSG 6801. Cdc Launch to Landing. (0 Credits)
Designed for the MBA cohort to participate in numerous personal and professional development activities to enhance employability and ensure ‘career readiness.’ Students will be required to attend a recruitment overview, complete a career assessment and attend a related small group discussion session, complete an Excel workshop, and meet with a career adviser at least once per term to fulfill the career check-in component of the course.

MSG 6802. Launch to Landing II. (0 Credits)
This course builds on the foundation laid in Launch to Landing I. In order to ensure further career readiness, students will take part in a workshop to help them develop cross-functional leadership skills and participate in a presentation-skills workshop as well as a negotiation-skills workshop. Students are also required to meet with a career adviser at least once per term to fulfill the career check-in component of the course.

MSG 6810. Gabelli Launch +. (0 Credits)
Gabelli Launch +.

MSG 6820. Value and Value +. (0 Credits)

MSG 809A. Adv Pres and Public Speaking. (1.5 Credits)
A course on advanced skills in public speaking and presentation skills.
Attribute: ESL.

MSG 809B. Advanced Corporate Communications. (1.5 Credits)
A course on advanced communication skills in the corporate environment.
Attribute: ESL.

Mathematics (MATH)

MATH 0100. Effective Mathematical Thinking. (2 Credits)
A preparatory course to assist students in PCS with the analytical, computational and reasoning skills necessary to succeed in further mathematics courses including Finite Mathematics. Emphasis is on the use of problem solving tools and critical thinking. Topics include numeration, algebra, functions and graphs, probability and sets, logical thinking, and patterns and sequences. This course does not satisfy the mathematical reasoning core curriculum requirement.

MATH 1000. Precalculus. (3 Credits)
This course does not fulfill the Mathematics reasoning portion of the Curriculum. The course is designed to allow students entry into calculus courses.

MATH 1001. Math for Business: Precalculus. (3 Credits)
A preparatory course to assist students at GSB to take Math for Business: Calculus. Topics include inequalities; linear, polynomial, rational, exponential, logarithm and inverse functions and their graphs; distance, lengths and area of simple regions. This course does not satisfy the mathematical reasoning core area requirement.
MATH 1002. Mathematics in Music. (3 Credits)
In this course, students focus on relationships between mathematics and music. Topics include integers, rational and real numbers, equivalence, relations, geometric transformations, logarithms, sequences and series, groups, rings, modular arithmetic, periodic functions, and elementary trigonometric series. The mathematical topics describe diatonic and chromatic scales, intervals, rhythm, meter, form, melody, chords, progressions, temperament, just intonation, and timbre from music. The course assumes familiarity with algebra and functions, as well as basic staff notation; Calculus and Music Theory are not prerequisites.
Attributes: MANR, MCR.

MATH 1100. Finite Mathematics. (3 Credits)
Solutions to systems of linear equations, counting techniques including Venn diagrams, permutations, combinations, probability, Bayes theorem, Markov chains. This course is designed to introduce general liberal arts students to the use of mathematics as a tool in the solution of problems that arise in the ‘real world’. Applications will be chosen from areas such as business, economics, and other social and natural sciences. These applications will be based upon mathematical topics chosen from a field called Finite Mathematics. Specific topics to be covered may include Linear Programming, Probability, Statistics, and Finance. The only prior knowledge expected is arithmetic, elementary algebra, and graphing, which students should already be familiar with from previous high school or college courses and/or the Mathematics Workshop. It will be presumed that students possess basic skills in these areas.
Attribute: MCR.

MATH 1108. Math for Business: Finite. (3 Credits)
Open only to CBA students. Solutions to systems of linear equations, elementary matrix theory, linear programming, elementary counting techniques, probability, mathematics of finance.

MATH 1109. Math for Business: Calculus. (3 Credits)
Open only to CBA students. Calculus for business majors. Topics include derivatives of polynomial, rational, exponential and logarithm functions. Curve sketching and optimization problems. The definite integral. Applications are drawn from business and economics.

MATH 1198. Honors Business Math. (4 Credits)
Review of Calculus. Solutions of systems of linear equations using matrix algebra. Discrete and continuous probability. Applications to business. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MATH 1200. Topics in Applied Calculus. (1 Credit)
This course covers basic concepts of single-variable calculus with applications relevant for business, economics, life sciences, and social sciences.

MATH 1203. Applied Calculus I. (3 Credits)
This course is designed for students who do not intend to take Calculus 2 or other upper-level math courses. Topics include derivatives of polynomial, rational, exponential, and logarithm functions; curve sketching; and optimization problems.
Attributes: ENVS, MCR, NEUR.

MATH 1204. Applied Calculus II. (3 Credits)
A continuation of MATH 1203. Topics include derivatives of trigonometric functions, methods of integration and applications, calculus of functions of several variables, Lagrange multipliers.
Prerequisite: MATH 1203.

MATH 1205. Applied Statistics. (3 Credits)
Course designed for students in fields that emphasize quantitative methods. It includes calculus based preliminary probability material followed by introduction to the basic statistical methods such as estimation, hypothesis testing, correlation and regression analysis. Illustrations are taken from a variety of fields. Practical experience with statistical software.
Attribute: ENVS.
Prerequisites: MATH 1203 or MATH 12AB or MATH 12BC.

MATH 1206. Calculus I. (4 Credits)
Calculus for science and math majors. Functions, limits, continuity, Intermediate Value Theorem. The derivative and applications, antiderivatives, Riemann sums, definite integrals, the Fundamental Theorem of Calculus. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENVS, MCR, NEUR.

MATH 1207. Calculus II. (4 Credits)
A continuation of MATH 1206. The definite integral, area, volumes, work. Logarithm, inverse functions, techniques of integration, Taylor polynomials. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: MATH 1206 or MATH 12AB or MATH 12BC.

MATH 12AB. Transfer Calculus AB. (3 Credits)

MATH 12BC. Transfer Calculus BC. (3 Credits)

MATH 1700. Mathematical Modelling. (4 Credits)
This course shows how discrete and continuous mathematical models can be built and used to solve problems in many fields. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENVS, MCR, NEUR.
Prerequisites: MATH 1206 or MATH 1207 or MATH 12AB or MATH 12BC.

MATH 1800. Internship. (1 Credit)

MATH 1999. Service Learning-1000 Level. (1 Credit)
In this student-initiated program, the student may earn one additional credit by connecting a service experience to a course with the approval of the professor and the service-learning director.

MATH 2001. Discrete Mathematics. (4 Credits)
This course introduces students to higher order mathematical thinking in the context of writing proofs using discrete structures. Topics include elementary logic; basic proof techniques such as direct proof, proof by contradiction, case division, contraposition, induction; division, Euclid’s algorithm, modular arithmetic; set theory, relations and functions; and equivalence. Additional topics may include cardinality of sets, combinatorics, and graphs. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: MATH 1206 or MATH 1207 or MATH 12AB or MATH 12BC.
MATH 2004. Multivariable Calculus I. (4 Credits)
The calculus of sequences and series, power series, uniform convergence, vector methods of solid geometry, vector valued functions, functions of several variables, partial derivatives, gradients, Lagrange multipliers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: MATH 1207.

MATH 2005. Multivariable Calculus II. (4 Credits)
This is a continuation of MATH 2004. Topics include vector fields and their derivatives, multiple integrals, line and surface integrals, and the theorems of Gauss, Green and Stokes. Additional topics, as time permits, may cover one or more of the following: differential forms, functions of a complex variable, equations of fluid mechanics, or mean and Gauss curvature.
Prerequisite: MATH 2004.

MATH 2006. Linear Algebra I. (4 Credits)
Topics include systems of linear equations, Real and complex vector spaces, linear independence, dimension, linear transformations, matrix representations, kernel and range, determinants and eigenvalues. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: MATH 1206 or MATH 1207 or MATH 12AB or MATH 12BC.

MATH 2011. Programming for Math and Science. (4 Credits)
Basic Python programming and scripting and basic algorithms of linear algebra. Students will develop their own Python implementations of these algorithms, which form the basis of many computational methods in the sciences. The course is accessible to students in the physical and social sciences, computer science and math. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: CISC 1600.

MATH 3001. Linear Algebra II. (4 Credits)
Topics include vector spaces over arbitrary fields, triangular form, Jordan canonical form, inner product spaces, coding theory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: MATH 2001 and MATH 2006.

MATH 3002. Differential Equations. (4 Credits)
Topics covered in this course include existence and uniqueness theorems for ordinary differential equations, linear differential equations, power series solutions, Laplace transform and numerical methods. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: MATH 2004.

MATH 3003. Real Analysis. (4 Credits)
This course focuses on analysis on Euclidean spaces. Topics include limits, continuity, uniform continuity, sequences of numbers and functions, modes of convergence, differentiability, Riemann integrability, and associated theorems. Students who have not taken MATH 2004 prior to taking Real Analysis may request permission from the instructor. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: MATH 2001 and MATH 2004.

MATH 3004. Complex Analysis. (4 Credits)
Topics include complex numbers and mappings, analytic functions, Cauchy-Riemann equations, Cauchy integral theorem, Taylor and Laurent series expansions, residue theory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: MATH 2004.

MATH 3005. Abstract Algebra I. (4 Credits)
Topics include well ordering and induction, unique factorization, modular arithmetic, groups, subgroups, Lagrange’s theorem, normality, homomorphisms of groups, permutation groups, simple groups.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: MATH 2001 and MATH 2006.

MATH 3006. Probability. (4 Credits)
Topics include discrete and continuous probability models in one and several variables, expectation and variance, limit theorems, applications. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: MATH 2004.

MATH 3007. Statistics. (4 Credits)
Topics include sampling distributions, estimation, testing hypotheses, analysis of variance, regression and correlation, nonparametric methods, time series. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: MATH 3006 and MATH 2004.

MATH 3008. Number Theory. (4 Credits)
Topics include divisibility and related concepts, congruencies, quadratic residues, number theoretic functions, additive number theory, some Diophantine equations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: MATH 2001.

MATH 3009. Mathematics of Finance. (4 Credits)
The market for options, a type of contract in finance, has grown quickly in the past fifty years. In this course we will explore the Nobel Prize-winning Black-Scholes-Merton model for valuing these contracts. We will introduce basic notions of probability (such as Brownian motion) as well as basic notions from finance (such as the No Arbitrage Principle) and use these to derive and solve the Black-Scholes equation. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: MATH 3006.
MATH 3010. Scientific Communication. (4 Credits)
Students develop skills in written and oral communication needed to produce scientific articles, monographs and presentations that are accomplished in both form and content. The course covers both the use of LaTeX to produce work that meets the highest standards of design and typography, and the techniques of writing, organization, and scholarly citation needed to ensure that this work accurately embodies, effectively communicates, and professionally documents the author’s scientific thought. Students will learn the ins and outs of generating and using copyright material, and how to present data in forms of pictures, tables, graphs, or schematics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MATH 3012. Math of Infinity. (4 Credits)
Elementary set and function theory. Notion of counting infinite sets, including Hilbert’s infinite hotel. Cardinality and infinite cardinals. Cantor’s work on infinite sets. Additional topics may include: well-ordered sets and math induction; prime number generators; the Riemann zeta function; logic and meta-mathematics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MATH 3800. Internship. (3 Credits)
MATH 4001. Mathematical Ethics Practicum. (4 Credits)
In this class, which fulfills the Senior Values seminar requirement of the Core Curriculum and serves as a capstone to both the pure and applied tracks of the Mathematics major, students will learn the ethical responsibilities of mathematicians, both as interpreters and as creators of mathematics. The course will combine historical and contemporary case studies with practical training in the skills and disciplines students must master to assume full ownership of their mathematics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MATH 4004. Topology. (4 Credits)
Topics include open sets and continuity in metric spaces and topological spaces, subspaces and quotient topologies, compact sets, connected sets. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MATH 4006. Numerical Analysis. (4 Credits)
Topics include approximation of functions, interpolation, solution of systems of equations, numerical integration, and solutions to different equations, error analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MATH 4009. Topics in Geometry. (4 Credits)
This course focuses on the study of Euclidean and Non-Euclidean geometries using both axiomatic and discovery based approaches. We review some of the basics in logic and study some of the proofs presented in Euclid’s Elements before focusing on more advanced topics. We may use Geometer’s Sketchpad in making discoveries and conjectures. We will study the history of the parallel postulate, the discovery of Non-Euclidean Geometry and the attendant philosophical implications. We will build models and focus on some interesting properties in hyperbolic geometry. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisite: MATH 2004.

MATH 4020. Differential Geometry. (4 Credits)
This course introduces the geometry of curved spaces in many dimensions, which are the basis of subjects such as Einstein’s theory of gravitation. Topics include manifolds, tangent spaces, the Gauss map, the shape operator, curvature, and geodesics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisites: (MATH 2004 and MATH 2006).

MATH 4022. Partial Differential Equations. (4 Credits)
This course is an introduction to partial differential equations. Topics include first-order, diffusion, wave, and Laplace equations; Fourier series; Green’s functions; and finite difference methods. Partial differential equations are a fundamental tool in physics, and they find broad application in geometry, acoustics, image processing, and finance. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisites: MATH 2005 or (MATH 2006 and MATH 3002).

MATH 4999. Independent Study. (1 to 4 Credits)

MATH 5001. Probability. (4 Credits)
An introductory course in probability theory intended for schoolteachers working on a graduate degree in mathematics education. It presents standard probability topics: combinatorial probability, overview of basic random variables, limit theorems. The course includes pedagogical components such as lesson studies focusing on effective presentation of probability topics in the classroom. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MATH 5003. Geometry. (4 Credits)
This course focuses on the study of both Euclidean and Non-Euclidean Geometry using axiomatic and discovery based approaches. It is intended for teachers working on a graduate degree in mathematics education. The course includes a pedagogical component such as lesson studies focusing on effective presentation of geometry topics in the classroom and the use of GSP. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisites: MATH 2004 and MATH 2006.
Medieval Studies (MVST)

**MVST 0912. Requirement Preparation. (0 Credits)**
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

**MVST 0914. Requirement Preparation in Summer. (0 Credits)**
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

**MVST 0922. PhD Comprehensive Examination Preparation. (0.5 Credits)**
MVST 0930. PhD Certificate Comprehensive Examination. (0 Credits)

**MVST 0936. Master’s Comprehensive Examination-Medieval Studies. (0 Credits)**

**MVST 0937. Master’s Research Paper Preparation. (0.5 Credits)**
For students preparing their MA thesis in Medieval Studies.

**MVST 1210. Literature and Society. (3 Credits)**
This course explores different literary genres (such as saga and myth, romance, ballads and poetry, drama and devotional treatises) from different medieval cultural contexts (such as Icelandic society, feudal society, the clergy and urban society). The texts chosen for study, as well as the particular societal contexts, will vary from instructor to instructor. **Attributes:** MVLI.

**MVST 1250. Traditions of Storytelling. (4 Credits)**
Comparative study of traditions of storytelling, placing questions of narrative form within global cultural and historical contexts. Selections from ancient forms of storytelling will be considered alongside modern examples from European and American literature. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. **Attributes:** ACUP, AMST.

**MVST 3057. Medieval German Literature: Potions, Passions, Players, and Prayers. (4 Credits)**
This course will introduce students to the rich literary and cultural heritage of Medieval Germany. The texts will all be read in English translation, but we will go over some passages in their original languages in class to catch some of the flavor of the Medieval German. Topics covered will include pre-Christian charms, the epic of the Nibelungs, love poetry, and urban carnivalesque plays. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. **Attributes:** ALC, GERM, MVLI, MVST. **Prerequisite:** GERM 2001.

**MVST 3102. Medieval Women Writers. (4 Credits)**
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. **Attributes:** MVLI, WGSS.

**MVST 3210. King, Court, and Crusade: Writing Knightly Life in the High Middle Ages. (4 Credits)**
This course will view the medieval world through a lens provided by the life and writings of one man, John of Joinville (d. 1317). John was a knight, a crusader, and a close friend of King Louis IX of France (canonized as Saint Louis). He wrote a Life of Saint Louis that is rich with information about his own life, as well as the saintly king’s. We will use the Life to open an examination of key themes in the knightly experience in the high middle ages, including: power, faith, the crusades, noble culture, family and social relations. It will also consider the usefulness of biography/autobiography in understanding the past. **Attributes:** AHC, HIMH, HIST.

**MVST 3215. Medieval Fashion and Its Meanings. (3 Credits)**
In medieval Europe, the importance of dress as a signifier of identity changed drastically over time. Relatively unimportant in the early Middle Ages, by the 14th century dress had become a primary means of expressing individual identity as well as class, gender, status, and other forms of group membership. In this course, we aim to demonstrate the ways in which dress and culture shape and are shaped by one another, illuminating the Middle Ages in a non-traditional way and encountering new tools for historical analysis. Our work will culminate in a research project: students will choose a particular type of medieval garment and trace its evolution, the factors which shaped it, and the effect of that garment or those garments on society. **Attributes:** FASH, HIMH, MVAM.

**MVST 3500. The Knights of the Round Table. (4 Credits)**
In this course, we will look for the traces of King Arthur and his Knights in modern-day London and its environs. Reading the foundational texts of Arthurian literature right where it all happened, we will be able to go to the sites and see the artifacts that remain. We will be reading excerpts from the early annals and chronicles, which laid the foundation for Arthur’s fame in history, and we will follow the exploits of some of the most prominent members of the Round Table as they were depicted in medieval literature: Sir Gawain, the ladies’ man (Sir Gawain and the Green Knight, Geoffrey Chaucer’s “Wife of Bath’s Tale), Sir Perceval, the Grail Knight (Chevalier des Tours, Percival), Sir Tristrem, the knight who fell in love with his uncle’s wife, (Gottfried von Strassburg, Tristan and Iseold) and Merlin the sorcerer (in the modern rendition by Mary Stewart, The Crystal Cave). We are planning excursions that will take us to Winchester to have a look at the tangible, wooden, “Round Table,” Stonehenge, the mythical stone circle associated with Merlin and his craft, and Canterbury, the destination of the most important pilgrimage on English soil. In London, we will visit Westminster Cathedral, the British Library, Museums holding Arthurian artifacts, and the Crypt of St. Martin-in-the-Fields for some brass rubbing and afternoon tea. This immersion into medieval culture will allow us to read Arthurian literature in a way uniquely possible in London. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. **Attribute:** MVLI.
MVST 3535. Building the Ideal City: Ethics and Economics Foundations of Realizable Utopias. (4 Credits)
This course introduces students to the investigation of the role that economic concepts such as profit, work, utility, and exchange play in defining the ideal city as a realizable political project. Students will explore ethical and economic concepts and their interrelation in the debate on the best form of State and government that developed from antiquity to modern American utopian communities. This course includes texts from various sources—philosophical, theological, juridical, and literary. Through these readings, students will learn how theoretical and practical ideas on the best form of society developed in time and still influence modern political thought. The course also focuses on the impact of the socioeconomic doctrines of the Catholic Church in shaping the idea of a possible, realizable, ideal city. Among the texts and authors included are Plato, St. Augustine, Thomas Aquinas, Dante, Boccaccio, Thomas More, Leon Battista Alberti, Tommaso Campanella, Francis Bacon. Taught in English with coursework in Italian for credit in Italian. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, APPI, ASHS, ASRP, INST, ISIN, ITAL, ITMO, MYPH, MVST.

MVST 3700. Medicine, Magic, and Miracles: Sickness and Health in the Early Middle Ages. (4 Credits)
This course provides an introduction to the systems of learned medicine of western Europe from Late Antiquity to the High Middle Ages. Using a wide range of sources, including medical texts, hagiography, liturgy, and modern scientific studies, we will explore the distinctions between medical theory and practice, the relationship of secular and ecclesiastical authorities to the compilation of medical knowledge and the fundamental question of what constitutes medicine and what does not. In addition, we will consider the changing definition of illness and health through an investigation of medieval responses to the cataclysm of the Black Death. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIMH, HIST.

MVST 3701. Royal Saints of Medieval Europe: Politics, Liturgy and Gender. (4 Credits)
This course investigates how kings and queens became saints during the European Middle Ages, alongside broader debates about medieval notions of sanctity, gender, and power. Using varied sources including hagiography, liturgy, chronicles, and material culture, we will explore the reasons why royal saints were remembered and the ways they were venerated in the celebrations of the Church. Through a series of case studies, we will also consider the uses of royal saints as propaganda by church and secular authorities to legitimize their rule, promote ongoing Christianizing efforts, and engender zeal for the Crusades.

MVST 3800. Cloisters, Castles, and Kings: Medieval Bavaria. (4 Credits)
This course will explore medieval secular and church history as it manifested itself in the literature and culture of Bavaria. Includes a study abroad component. Spring break visit to Regensburg and Munich. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, GERM, MLL.

MVST 4003. War and Peace: Just War Theory. (4 Credits)
This is a Senior values seminar, usually offered in Philosophy. It is a course in applied ethics. It will involve the application of a normative ethical theory to the moral problems associated with war. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVPH.

MVST 4005. The Medieval Traveler. (4 Credits)
This course follows the routes of pilgrims, crusaders, merchants, nobles and peasants as they charted a course for lands of promise and hoped-for prosperity. In Medieval Traveler, we will read selections from the diaries, chronicles, and historical literature written by and about travelers in the Middle Ages. We will begin and end with travelers who sought miracles, marvels, and new trading routes on the cusp of the known world. We will focus in particular on the practicalities of medieval travel, and well as the reasons for traveling: the sacred, the profane, and everything in between. This will be an interactive class, be prepared to discuss and debate issues of interest. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENGL, ENRJ, GLBL, HIMH, HIST, HIUL, ICC, MVL, OCST, REST.

MVST 4006. Dante's Cosmos: Science, Theology, and Literature. (4 Credits)
This course investigates Dante's cosmos in the Divine Comedy through medieval science, theology, and poetry. Disentangling the context of the Comedy from Dante's encyclopedic culture through reading in the disciplines of his time will lead students to a deeper comprehension of the multidimensionality of Dante's universe than is possible through any singular disciplinary. The course will broaden students perception of the medieval cosmos in contrast with contemporary notions of cosmology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, ITAL, ITMA, MLL, MVTH.

MVST 4007. The Medieval Foundations of Modernity: Petrarch and the Origins of Modern Consciousness. (4 Credits)
This course retraces the foundations of modern consciousness in Petrarch's works through poetry and philosophy. Students will concentrate on Petrarch's library and philosophical works to explore the passage from a medieval to a humanist vision of the self and of the world. The interdisciplinary approach of the course will provide a deeper understanding of Petrarch's ideas on the educative role of the intellectual, the crisis of scholastic thought, and the emergence of a new perception of the self. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, ICC, ITAL, ITMA.
MVST 4008. Medieval Autobiographies. (4 Credits)
Although writing about oneself is often considered classical or modern, and autobiography was not classified as a genre until the eighteenth century, a handful of medieval clerics, monks, mystics, nobles and merchants wrote about their own lives. These autobiographical accounts, and the conventions and societies that shaped them are the topic of the course. By asking both the questions of genre, narrative voice, subjectivity and authorship usually posed by literary analysis, and the historical questions of what such sources about past authors, audiences and the societies that read and copied the lives, the goal is to understand autobiography and the sources themselves from an interdisciplinary perspective. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HIST, ICC, MVLI.

MVST 4009. Medieval Jerusalem. (4 Credits)
What has made Jerusalem so beloved to – and the object of continual strife for – Jews, Christians, and Muslims? This course will explore the ancient and medieval history of Jerusalem, from its Jebusite inhabitants before the time of King David through Suleiman's construction of the modern city walls in the 1540s. Students will learn to analyze a variety of literature, through which we will explore the themes of sacred space, conquest, destruction and lament, pilgrimage and religious polemic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, JSPM, JWST, MEST, OCHS, OCST, REST.

MVST 4100. Modern Sounds, Early Music. (4 Credits)
Medieval and Renaissance music's fragmentary survival has inspired scholars, performers, composers, and artists to realize what remains according to varying creative urges and ideological preoccupations. This course examines the cultures of early music as well as their living legacies. Studying musical traditions from 1000 to 1600, we build a technical vocabulary for discussing music and seek to understand how historical change affects aesthetics, music-making, and listening from 1000 to the present. We also study the reception of medieval music—how it has been rejected, restored, recreated, and reimagined—to consider how 'the medieval' is historically produced. No prior musical experience is required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVAM.

MVST 4654. Medieval London. (0 to 4 Credits)
This course draws on material and documentary sources to explore the townscape of medieval London—its wards, streets, and buildings—and the social life of its people, including their daily routines, work, and rituals. We will examine such documentary sources as chronicles, charters, and wills, along with material evidence from human skeletons, excavated houses and churches, coins pottery and clothing.
Attributes: HIMH, HIST, ICC.

MVST 4998. Study Tour: Medieval Spain. (4 Credits)
One of the great medieval pilgrimage routes, the Camino de Santiago crosses northern Spain from the passes of the Pyrenees to Santiago de Compostela. This study tour will consider the legends of the Camino, some of its many surviving monuments, and the modern revival of the pilgrimage by walking for two weeks with the peregrinos/as from Leon to Santiago de Compostela. This class will meet periodically at Fordham before the walk to discuss reading assignments and prepare. A journal is required at the end of the course. Fees and travel costs not included. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HIMH, HIST, MIUL, ICC, LALS, LAUH.

MVST 4999. Independent Study. (1 to 9 Credits)

MVST 5024. Medieval Political Thought. (3 to 4 Credits)
This course is a seminar specifically designed around an exhibition at the Metropolitan Museum of Art opening in March 2012. Byzantium and Islam: Age of Transition (7th-9th century). The exhibition offers a unique opportunity to study not only the impact on the visual arts of the interaction of the Byzantine and Islamic cultures at this critical historical period, but also to examine the art of architecture of Carolingian France and Visigothic Spain from this perspective. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 5050. World of Late Antiquity: Introduction to History, Art, and Culture. (4 Credits)
This course offers an introduction to the history, art and culture of the Late Antique world from the third to the sixth century. We will explore the older narratives of decline in this period alongside powerful alternatives proposed by scholars more recently, drawing on both primary sources and monuments and critically examining the secondary literature that studies them. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: CLAS.

MVST 5064. The Divine Comedy: Poetry, Theology, and the Medieval Imagination. (4 Credits)
This seminar offers an in-depth study of the poetic and theological imagination of Dante's Divine Comedy. We will combine close reading of selected cantos with primary and secondary works illuminating key aspects of Dante's literary and theological invention. Issues will be discussed within the historical and ideological contexts of the relevant theological and poetic debates in Dante's time. We will consider Dante's theological influences, such as Augustine, Boethius, Bernard of Clairvaux, and Bonaventure, and explore theological topics such as medieval Christian practices of pilgrimage, scholastic debates about atonement and the afterlife, cosmology, and the relationship between erotic love and divine union in Christian mystical theology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
MVST 5070. Manuscript Culture. (4 Credits)
Introduction to principles, materials, and study of medieval manuscripts and primary documents as well as to problems of evaluation of the cultural contexts of their production and use. Ancillary topics will include manuscript illumination, the resources of codicology and paleography, the preparation and evaluation of modern editions, the assessment of readership and patronage, material philology and the materialism of the middle ages, the development of libraries. Students will do hands-on work with primary sources at the Morgan Library, the rare book collection of the New York Public Library, and the rare books and manuscripts collection in Walsh Library. Final projects will be tailored to the students' primary research areas and expertise. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 5077. Editing Medieval Texts. (4 Credits)
This is a course in the theory and practice of editing, especially as it relates to medieval texts, with most of the examples coming from Middle English. We'll give attention to documentary, historical, and aesthetic approaches, and we will spend some time exploring digital methods and concerns. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ENGL.

MVST 5078. Medieval Books & Materials. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 5080. Interdisciplinary London: Medieval Manuscripts, Sources, Methods. (4 Credits)
An introduction to methodologies in Medieval studies through a focus on the primary sources and material culture of medieval London. The course will center on how an interdisciplinary approach that draws on a range of sources (textual, visual, and material) and methods (employed in archaeology, digital humanities, history, literary studies, and paleography/codicology) can enrich our understanding of one medieval place and its people. Training in paleography is an important element of the course.

Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: HIST, MVSG.

MVST 5095. Medieval Pilgrimage. (4 Credits)
Pilgrimage will be conceptualized broadly, entertaining a variety of aims for travel and also considering the pilgrimage form as a purely conceptual exercise as well as a journey with more practical aims. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ENGL, ENME.

MVST 5100. Cultures of Music and Sound in the Medieval World. (4 Credits)
Music and Sound enriched every facet of pre-modern life, liturgy and ritual above all. This interdisciplinary seminar introduces medievalists - especially those without formal musical education - to the cultures of medieval and Renaissance music. It should enable students from any discipline to engage music and the sonic more fully in their research and teaching. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 5101. Modern Sounds, Early Music. (3 Credits)
Medieval and Renaissance music's fragmentary survival has inspired scholars, performers, composers, and artists to realize what remains according to varying creative urges and ideological preoccupations. This course examines the cultures of early music as well as their living legacies. Studying musical traditions from 1000 to 1600, we build a technical vocabulary for discussing music and seek to understand how historical change affects aesthetics, music-making, and listening from 1000 to the present. We also study the reception of medieval music - how it has been rejected, restored, recreated, and reimagined - to consider how 'the medieval' is historically produced. No prior musical experience required.

MVST 5102. Theorizing Medieval Sound: Medieval Sonic Worlds. (4 Credits)
In this interdisciplinary seminar, we read widely and listen actively to the texts, music, and objects of the European Middle Ages to find out just how closely we can come to encountering medieval sonic worlds. Using an electric array of primary, secondary, and theoretical works, we study medieval sound cultures and the production of sonorous meanings for medieval listeners in all their complexity. At the same time, we investigate how open-minded engagement with the sonorous Middle Ages can challenge us to rethink prevailing popular and scholarly attitudes towards the body, the senses, media, and the past.

MVST 5200. Medieval Iberian Lit & Soc. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 5201. The Renaissance of the 12Th Ce. (4 Credits)
This graduate seminar explores the religious, intellectual, literary, and cultural contours of the 'long' 12th Century with equal weight given to the diversity of medieval sources that survive and to modern historiographic interpretations. The class will include visits to the Cloisters museum and to the Morgan library. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 5202. Medieval Monsters: Terrors, Aliens, Wonders. (4 Credits)
Taught in conjunction with an exhibition of medical manuscripts at the Morgan Library & Museum, this course examines the vital role played by monsters in medieval art and culture. The course is taught by the curators who will include gallery visits and meetings at the Morgan and will involve original research and work on an online exhibition.

MVST 5205. Court Culture Med Iberia. (4 Credits)
This course will explore the cultural, social, political and religious tensions that helped to form medieval Iberian courtly communities from the 10th to the 15th centuries. The unique situation of Iberia during this period, when the centralization and consolidation of sovereignty occurred in different religious and cultural contexts (Islamic and Christian) and political territories (Castile, Aragon) allows for a diverse, rich and contrasted analysis of medieval court culture. Our approach will be multidisciplinary and include literary texts, artistic manifestations, legal codes, religious writings, and chronicles. Among the courts to be studied will be the Omeyan court of the 10th century Cordoba, the Muslim kingdoms of 11th century Granada and Zaragoza, the Christian courts of Alfonso X of Castile and Jaume I of Aragon, and the late medieval court of Isabella Ferdinand. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
MVST 5300. Occitania: Language and Power. (4 Credits)
This course introduces students to the cultural world of a medieval “south”: Occitania. Texts in Old Occitan include documentary writing, historical narrative, and the poetry of the troubadours. Topics include urban/rural communities, gender and power, the Albigensian crusade and its aftermath and the beginning of vernacular book production.
Attributes: ENG1, ENME.

MVST 5305. Writing East: Outremer and Identity in the Middle Ages. (4 Credits)
As the stage for the central events of the Gospel narrative, the lands of the eastern shore of the Mediterranean long occupied a central place in the collective imagination of Latin western Europe. Over the course of the Middle Ages, however, increasingly frequent encounters resulting from trade, pilgrimage, and crusade not only enriched the European image of the East, but vastly enhanced the significance to how medieval Christians approached the eastern Other. This course will trace the rise of a discourse of differences centered in what was called in England and France, ‘Outremer’, the land beyond the sea. Together with medieval literary productions, histories, letters and travel narratives, we will read works from the growing body of scholarship on this important topic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENG1, ENME.

MVST 5310. Chivalric Romance. (4 Credits)
This seminar will look at the genre of the chivalric romance at the intersection of different vernacular traditions and genres. What happens to Chrétien de Troyes’ classics when they are adapted to the language and culture of another country? And how does the romance relate to the chanson de geste, the saint’s life, the lai, or the fabliau? What if the protagonist is not a knight but rather a woman? A Saracen? A pope? Or a combination of some of the above? The goal of this seminar will be to provide an overview of the wide range of romance themes and adaptations in Europe, including their reception to the present day. Students are expected to read and a well-annotated Middle English romance in the original. All other texts can be prepared in translation, while some of the class time will be dedicated to closely reading some crucial passages in the original Latin, Old French, and Middle High German. Open to seniors with a G.P.A. of 3.0 or better. Please consult your advisor.

MVST 5570. Medieval Crusades. (4 Credits)
This course adopts an interdisciplinary approach to the study of the medieval crusades in the Levant, southern France, Iberia, and the Baltic, with attention paid to the Islamic and Byzantine perspectives. The sources to be discussed include chronicles, charters, sermons, literary texts, songs, and hagiography, as well as architectural and artistic monuments and objects. Among the themes to be treated are crusader motivations, crusades and memory, European ‘colonization’, women and family in crusading society, crusading liturgies, the military orders, and diplomacy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 5707. Meditation, Contemplation, and the Spiritual Senses. (4 Credits)
The late Middle Ages saw an astonishing proliferation of texts, practices, and styles of devotion seeking to draw human beings closer to God through the body. New emphasis on Christ’s humanity and Aristotelian natural philosophy prompted the rediscovery of the five corporeal senses and their cognitive processes in devotional literature. In this course, we will examine the languages, knowledge, desires, and anxieties surrounding the senses in a diverse corpus of texts, probing them for their theological import as much as for their literary design. Major authors: Aristotle, Augustine, Origen, Hugh of St. Victor, Bonaventure, Richard Rolle, Chaucer, Margery Kempe, Meditationes Vitae Christi. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENG1, ENME.

MVST 5708. Struggling Toward God: Meditation and Prayer in the 11th- and 12th-Century Monastery. (4 Credits)
This course explores the dimensions of medieval monastic contemplation in the heyday of Benedictine and Cistercian spiritual writing, the 11th and 12th centuries. The course will aim to answer the following questions: What did extra-liturgical prayer and meditation look like for medieval monks and nuns? When, where, and how was it practiced? Was there a set way to engage with monastic meditation, or were there a variety of medieval monastic meditative experiences in the 11th and 12th centuries? What did monks and nuns perceive as the limitations of monastic prayer and meditation? What extra-textual tools did monks and nuns rely upon to stimulate their practices of meditation? And what does monastic meditation reveal about the emotional lives of Benedictine and Cistercian monks and nuns in the high Middle Ages? Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 6209. Themes in Preconquest Lit. (4 Credits)
This course is an advanced-level seminar on the language and literature of Anglo-Saxon England. We will read (in Old English) texts including poetry, homilies, saints’ lives, and chronicles. Substantial attention will also be given to Anglo-Saxon palaeography and relevant critical literature, with the aim of providing students with the resources needed for the scholarly study of OE. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 6232. Fr of Eng: Doc & Lit Cult. (4 Credits)
This course focuses on law, mercantile, medical and other forms of documentary and civic texts in the French of England, as well as literary texts, both the well-known and the under-researched: texts with Middle English versions will be included wherever possible. For newcomers to the subject, a linguistic practicum, which should be regarded as obligatory, is offered in the hour preceding the class meeting: some knowledge of modern French is a must. Some linguistic work together with seminar student presentations and discussion takes place in each class. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
MVST 6700. Medieval Scholasticism. (4 Credits)
This interdisciplinary graduate course will provide an introduction to the history, theology, and philosophy of the Scholastic movement in the High Middle Ages. Topics to be considered include: the economic, social, political, religious, and educational transitions that together constitute the ‘renaissance of the twelfth century’; the rise of open urban schools and the development of the university; and characteristic modes of thought and discourse in scholastic theology and philosophy. Thinkers to be examined include Anselm of Canterbury, Hugh and Richard of St. Victor, Peter Abelard, the school of Laon, Peter Lombard, Albert the Great, Thomas Aquinas, Bonaventure, John Duns Scotus, and William of Ockham. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MVST 8100. Internship for Medievalists. (1 Credit)
This is the obligatory tutorial to be taken in conjunction with any internship taken at libraries, museums, or other institutions of professional interest to medievalists. The student will meet with the instructor regularly to reflect on their internship experience and document their work in an appropriate format (journal, blog etc)

MVST 8500. Independent Research. (1 to 4 Credits)
MVST 8501. Independent Research. (1 Credit)
MVST 8999. Tutorial. (0 to 4 Credits)
MVST MTNC. Maintenance-Medieval. (0 Credits)

Middle East Studies (MEST)

MEST 1999. Tutorial. (1 Credit)

MEST 2000. Introduction to the Modern Middle East. (4 Credits)
A multidisciplinary introduction to the modern Middle East and North Africa from the perspectives of history, anthropology/sociology, economics, political science and international affairs. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAM, AFSS, AFST, GLBL, INST, ISME, JWST.

MEST 2400. Middle East Dilemmas. (4 Credits)
This course examines intellectual, political, and social change and reaction to it in the Middle East from 18c to the 21c. Focus is on the impact of the West, the transformation of identities, the constancy of tradition, the establishment of modern nation-states, and the effects of globalization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISME, JWST.

MEST 2600. Medieval Islam. (4 Credits)
This course surveys the rise of Islam in Arabia and its spread throughout the Mediterranean and beyond. It examines Muslim civilization and its institutions in the medieval period, the impact of Turkic and Mongol invaders, and the rise of the Ottoman and Safavid Empires. Emphasis is on the political and cultural role of the religious and military classes, on the impact of Islam on gender and minorities, and on the various exchanges with Christendom. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MEST 3324. Israel in Fiction and Film. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, INST, ISME.

MEST 3500. Modern Egypt. (4 Credits)
This course will survey the transformation of Egypt from the end of the 18th century to the present. A dormant Ottoman province when Napoleon Bonaparte invaded it in 1798, by the end of the 19th century, Egypt had turned into the region's entrepot while evolving as a center of political and cultural dynamism. During the Cold War, the country emerged as the USSR's main client in the Middle East until the Camp David Accords of 1979 when it became a strategic partner for the US. Topics to be covered include British economic and French cultural imperialism; the genesis of Egyptian nationalism; urbanization; gender issues; foreign resident minorities; the Muslim Brotherhood; the formation of a modern indigenous bourgeoisie; Nasser's revolution, its impact, and his pan-Arabism; Sadat's domestic and regional policies, crony capitalism under Mubarak; and the re-Islamization of society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, INST, ISME.

MEST 3501. Modern Turkey and Iran. (4 Credits)
This course will assess the ideas, events, and personalities that contributed to the transformation of the Ottoman and Persian Empires into modern Turkey and Iran respectively in the past two centuries. Topics examined comparatively will include the impact of the West, the internal forces of modernization, Islamist and other reactions to such developments, the formation of nationalist identities, authoritarian transition to modern democracy in Turkey and Islamist republic in Iran education, industrialization, urbanization, religion, and mass politics, gender and minorities, and the impact of regional dynamics since the end of World War II. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MEST 3502. Palestine-Israel Conflict. (4 Credits)
This course examines the issues, events, and personalities that shaped dynamics between Jews and Palestinians from 19th-century nationalism to the present. Topics include land and its symbolism, religious identity, political aspirations and frustrations, the origins and consequences of wars, as well as regional and global interplay. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MEST 3620. Islam in America. (4 Credits)
This course will examine the history of Islam and the experience of Muslims in American from the time of the slave trade to the present day. Through a close analysis of both primary and secondary materials, students will explore – through speaking and writing exercises – the rich diversity of US Muslim communities and their multi-faceted contributions to the global umma and the formation of an “American Islam”. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, PLUR.
MEST 3701. Urban Theatre Dance and Music. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, INST, REST.

MEST 3800. Internship. (3 Credits)

MEST 3901. The Middle East in Film. (4 Credits)
Using documentaries and features from Algeria to Yemen, this course examines politics, religion, gender, and minorities as well as love, comedy, and music, sometimes all together, and their impact on the region’s diverse societies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MEST 4001. Seminar: Middle East. (4 Credits)
Advanced research-oriented seminar for students who have already completed one or more introductory and elective courses in Middle East studies. Required of all majors and minors. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, INST, IPE, ISME.

MEST 4331. U.S. in the Middle East: 1945-Present. (4 Credits)
Examines how the US replaced Great Britain as the pre-eminent power in the Middle East in the post-WWII era. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN, ISME.

MEST 4701. Urban Theatre, Music, Dance: Culture and the Formation of the Middle East Identities. (4 Credits)
This course draws on the two disciplines of the performing arts (as viewed through performance studies) and anthropology to examine how Middle East identities are embodied, constructed, and transcended through gesture, sound and enactment – both religious and aesthetic – in the cities of Casablanca, Cairo, & Istanbul. Anthropological approaches to the study of Muslim ritual traditions and devotional practices (e.g., dhikr, ziyaarāt, majlis, hajj, tāʿlīya, #alāt and tajwīd) that seek to discern a more transcendent human experience, nature and identity in relation to the divine, will be compared/contrasted with performing studies’ approaches to speech, gesture, music, dance, sound and spectacle that emphasize contingency, aesthetics, and shifting social, political, and cultural influences on identity formation over time. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, ICC, INST, ISME, REST.

MEST 4999. Tutorial. (1 to 4 Credits)
Independent research and reading with supervision from a faculty member.

Military Science ROTC (MLSC)

MLSC 1001. Leadership Laboratory I. (0 Credits)
Provides practical experience with the setting of a military organization to develop discipline and team work. The course provides opportunities to apply learned leadership principles and to plan, instruct and practice military skills such as drill and ceremonies, marksmanship, communications and physical fitness. Students in the Basic Course are organized into squads and platoons under the supervision of Advanced Course cadets. Senior cadets are responsible for Basic Course training and logistics and function as officers within the cadre battalion. Cadets who will attend ROTC National Advanced Leadership Camp are provided with an intensive program of military and leadership skills enhancement and assessment under cadre direction.

MLSC 1002. Leadership Laboratory I. (0 Credits)
Provides practical experience with in the setting of a military organization to develop discipline and team work. The course provides opportunities to apply learned leadership principles and to plan, instruct and practice military skills such as drill and ceremonies, marksmanship, communications and physical fitness.

MLSC 1101. Intr Ldrship & US Army 1. (0 Credits)
This is an introductory course open to all students without obligation. It focuses on the military as a profession and examines its organization, ethics and values. The course explores the responsibilities and impact of leadership and the rules, customs and traditions of military service. Students are introduced to the fundamentals of land navigation, physical fitness, drill and ceremonies, first aid and public speaking.

MLSC 1201. Basic Ldrshp & Mgmt II. (0 Credits)
Open to all students without obligation. The course explores leadership principles, decision-making and team building. Students are introduced to tactical systems and the field environment. Students learn advanced techniques in land navigation, terrain association, and first aid. Students also begin their program in professional military reading.

MLSC 2001. Leadership Laboratory II. (0 Credits)
Provides practical experience within the setting of a military organization to develop discipline and team work. The course provides opportunities to apply skills such as drill and ceremonies, marksmanship, communications and physical fitness. Students in the Basic Course are organized into squads and platoons under the supervision of Advanced Course cadets. Senior cadets are Leadership Camp are provided with an intensive program of military and leadership skills enhancement and assessment under cadre direction.

MLSC 2002. Leadership Laboratory II. (0 Credits)
Provides practical experience within the setting of a military organization to develop discipline and team work. The course provides opportunities yto apply learned leadership principles and to plan, instruct and practice military skills such as drill and ceremonies, marksmanship, communications and physical fitness.

MLSC 2101. Basic Ldrship Devel-Ph 1. (3 Credits)
Open to all students without obligation. Continues the basic leader development process. The course focuses on applying the fundamentals of leadership and team-building skills. Students gain an understanding of small team dynamics and the roles and responsibilities of junior leaders. The course further reinforces the ideals of service, ethics and values and develops students’ confidence in their own skills, knowledge and attributes.
MLSC 2201. Basic Ldship Dev Phase II. (3 Credits)
Open to all students without obligation. The course continues the application of leadership and team-building principles. Proficiency in individual skills and leadership abilities is assessed during situational training to evaluate students in leadership roles. Advanced techniques in problem analysis, sound decision making, planning and organizing, delegation, control and interpersonal skills. Advanced small team operations, movement techniques and tactics are emphasized.

MLSC 3001. Leadership Laboratory III. (0 Credits)
See MLSC 4001 for description.

MLSC 3002. Leadership Laboratory III. (0 Credits)
Provides practical experience within the setting of a military organization to develop discipline and team work. The course provides opportunities to apply leadership principles and to plan, instruct and practice military skills such as drill and ceremonies, marksmanship, communications and physical fitness.

MLSC 3101. Adv Ldrship & Mgmt-Ph 1. (0 Credits)
Expands and refines the leader development process. This is an intensive program to prepare cadets for tasks, skills and responsibilities associated with Advanced Camp. Cadets are trained and evaluated on the full range of leadership skills and attributes. Written and oral communication skills, motivational behavior, interpersonal skills, administrative procedures, decision-making and military field skills are emphasized. Must be taken in conjunction with MLSC 3001.

MLSC 3201. Adv Ldrship & Mgmt-Ph 2. (3 Credits)
Expands on the skills introduced in MLSC 3101 and incorporates increasingly challenging situations involving military technical, tactical and leadership skills. Advanced training in marksmanship and physical fitness is emphasized. Course culminates with several field training exercises where students are placed in simulated combat and evaluated on performance. Course is designed to bring cadets to peak proficiency in physical conditioning and leadership ability. Must be taken in conjunction with MLSC 3001.

MLSC 3001. Leadership Laboratory IV. (0 Credits)
Provides practical experience within the setting of a military organization to develop discipline and team work. The course provides opportunities to apply leadership principles and to plan, instruct and practice military skills such as drills and ceremonies, marksmanship, communications and physical fitness.

MLSC 4101. Cmd/Stf Train & Mgmt-Ph1. (0 Credits)
Refines military skills and knowledge to the precommissioning level. Senior students assume leadership roles as cadet commanders, staff officers, or staff assistants responsible for the planning, coordination and execution of all cadet training and operations. Training focuses on Army legal, administrative, and logistical systems and training methodologies. It reinforces individual competencies and maximizes opportunities for practical application of leadership skills. Must be taken in conjunction with MLSC 4001.

MLSC 4201. Cmd & Stf Trng & Mgt II. (4 Credits)
Culminates the leader development process at the precommissioning level. Designed to prepare cadets for transition from cadet to Second Lieutenant. Instruction seeks to expand the frame of reference. Cadets examine ethical and legal issues related to being an officer and continue to improve their leader and decision-making skills. Several practical exercises and field training events supplement classroom instruction. Must be taken in conjunction with MLSC 4001. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MLSC 4999. Tutorial. (3 Credits)

Modern Languages (MLAL)

MLAL 1010. Spanish Colonialism Through Film. (3 Credits)
This course examines the diverse (personal, social, and national) narrations of one essential time period in the history of the Americas: the age of Spanish colonization of the New World. In particular, the course considers the recounting of this era through literary and visual means, through mainstream (the conquerors) and alternative (the conquered) perspectives, and through modern and traditional media.
Attributes: EP2, LAHA, LALS, MANR, SL, TC.

MLAL 1100. Introduction to Linguistics. (3 Credits)
An introduction to linguistics, the study of language. The course surveys the core domains of theoretical linguistics including phonology, syntax, and semantics as well as select areas of applied linguistics. Taught in English.
Attributes: CLAS, COLI, ENGL.

MLAL 1400. Introduction to Sociolinguistics. (3 Credits)
This course introduces students to the field of sociolinguistics, which studies how language and language use are shaped by social and cultural contexts. The course will provide a survey of important topics in sociolinguistics, including language variation and change; language contact and multilingualism; language standardization; and language ideologies. We will also explore the development of sociolinguistics as a discipline from first wave single-variation studies to third-wave studies on social meaning expressed through language style.
Attribute: MLL.

MLAL 1500. Introduction to Psycholinguistics. (3 Credits)
An introduction to psycholinguistics, also called the psychology of language. The course focuses on how the mind and brain acquire and process language across the lifespan and in different populations. Taught in English.
MLAL 2000. Texts and Contexts: Remembering Italy's Long Century in Literature, Film, and Music. (3 Credits)
This course examines the way in which the literary and artistic forms of modern Italy represent political and social movements such as revolution, unification, modernization, and migration. We will focus on texts from the 19th, 20th and 21st centuries that utilize differing modes – such as fiction, nonfiction, film, poetry, and music – and we will analyze how these texts draw upon, reflect and refashion the meaning of historical events. In juxtaposing texts of different types, we will explore the mechanisms by which symbols and ideas are inherited through and adapted to differing contexts. Taught in English.
Attributes: EP2, TC.
Prerequisite: ENGL 1102.

MLAL 2025. 'You talk like a ___': Language, Identity and Stereotype. (4 Credits)
What does it mean to “talk like a ___”? Can you tell where someone is from by listening to them? Can you guess their race, ethnicity, gender, or social class? This course will explore how language is used in the creation of identity and social difference. Through a variety of linguistic anthropological and sociolinguistic texts, we will look at how ways of thinking about language (language ideologies) affect ways of thinking about people who speak language. We will analyze how language and linguistic difference intersects with authority, power, identity, and performance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ANTH.

MLAL 2100. Advanced German Grammar. (4 Credits)
The course is designed to help students gain more insight into the structure of the German language and to further develop and strengthen their knowledge of German grammar. Survey and practice of German grammar as well as more advanced features of German syntax and style. Course will be conducted in English with readings and exercises in German. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: GERM.
Prerequisite: GERM 2001.

MLAL 2601. Russian Conversation and Composition. (4 Credits)
This course provides intensive practice of spoken and written language with an emphasis on vocabulary building and idiom fluency. The course uses various media from film to news sources in order to expand students’ familiarity with contemporary Russian culture. Recommended for students interested in pursuing upper-level Russian literature and culture courses. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MLAL 2820. German Texts on Film. (3 Credits)
Subtle: Paralles and doppel ganger. Thix course investigates identity through paralles lives and uncanny encounters.
Attribute: COLI.

MLAL 3000. Gender and Sexuality Studies. (4 Credits)
This course investigates contemporary theories of gender and sexuality from a range of disciplinary perspectives. The course explores how gender and sexuality function as dimensions of social identity, difference, inequality, and power. Students will be introduced to a range of theoretical schools that concern a range of identities, respond to earlier theoretical formulations, and engage activism and historical experiences. Students will be introduced to concepts such as the social construction of gender, queerness, gender difference, intersectionality, universalism, identity politics, reproductive justice, materialist and/or versus symbolic theories, masculinity studies, critical race theory, sex positivity and pornography studies, and a range of feminist accounts of gender. The course foregrounds feminist, queer, critical race, postcolonial, and other critical scholarly literatures and methods. While it focuses on the contemporary period (after 1975), the course surveys a range of theories, situating them in social and political context. Disciplinary focus may vary from year to year, but the interdisciplinary character of the field will be retained. Taught in English. Coursework in Spanish for credit toward the Spanish major or minor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, BEHR, COLI, LALS, PLUR, SPAN, WGSS.

MLAL 3001. The Italian American Experience in Literature and Film. (4 Credits)
The Italian American experience has found cogent and compelling expression in numerous works of fiction, poetry, drama and cinema. The rich documents left by immigrants from the earliest times to the contemporary writers provide a rich body for exploring styles, achievements, traditions and, generally, the life of Italian Americans and their changing status and civic concerns. The course discusses the representation of Italian American identity, stereotypes, family relationships, sexual mores, political and social values. The contribution of Italian Americans to the various art forms of the American world will be highlighted. The discussions will include theories from the most recent ethnic studies. Authors and critics to be studied are Di Donato, Tusiani, Mangione, Ardizzzone, Puzo, Barolini, Stella, Gardaphè, Marazzi, Scorsese, among others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST.

MLAL 3003. Intercultural Theory. (4 Credits)
In this course, we will explore the ‘contact zone’ as a theoretical concept and a site of encounters, conflicts, and negotiations. In her book Imperial Eyes: Travel Writing and Transculturation (1992), Mary Louise Pratt describes the contact zone as ‘...the space in which peoples geographically and historically separated come into contact with each other and establish ongoing relations, usually involving conditions of coercion, radical inequality, and intractable conflict’. Like Pratt, the contact zones as we study them will not only stress ideas of co-existence and interaction, but also insist on ‘asymmetrical relations of power’. Over the course of the semester, we will focus in particular on the following themes: home/displacement, temporality, personhood/community, translingualism/transculturation/translation, and recycling/adaptation/appropriation/imitation. In this course, not only will we study the contact zone but we also envision the classroom as a multilingual, multicultural and multidisciplinary contact zone that fosters creative responses through a series of activities and collaborative projects. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, SPAN.
MLAL 3007. Spanish Linguistics. (4 Credits)
This course focuses on the linguistic study of the Spanish language. The course surveys the formal domains of linguistics - including phonetics, phonology, syntax, semantics, and sociolinguistics – with an exclusive focus on the Spanish language. The course is taught in Spanish.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASCC.

MLAL 3010. Politics and Poetry in the Middle Ages: The Rise of Vernacular Culture in the Mediterranean. (4 Credits)
This course analyzes the development of vernacular culture and literature in the Mediterranean during the Middle Ages. Students will explore the political, historical, and linguistic context within which vernacular languages and cultures emerged between the XI-XIII centuries. Following Dante's Divine Comedy - the first linguistic and poetic "map" of the Middle Ages - students will retrace the interrelations linking the Italian vernacular culture to the other traditions within the "romance" domain in the Mediterranean. With the imperial court of Frederick II in Sicily, the Pope in Rome, and the most powerful centers of trade and finance in Florence and other Italian city-states, the Italian peninsula provides a special standing point for the analysis of the relationship between poetry and power in different political contexts: the court of the emperor Frederick II and the powerful communal republics in center and northern Italy will be the focus of the course. Among the texts, authors, and movements included are: Provençal and Italian trobadores; the "Sicilian School" and the encyclopedic culture at the court of the emperor Frederick II (poetry, law, philosophy, medicine, astronomy, translations); religious literature and the Tuscan School of poetry (S. Francis, Jacopone da Todi, Guittone d'Arenzo); the "New Sweet Style" (Guido Guinizzelli, Guido Cavalcanti, Dante Alighieri). Fulfills the Advanced Literature requirement of the core and satisfies the requirement of Minor and Major in Italian. Cross-listed with MVST and COLI. Taught in English with coursework in Italian for credit in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, ITAL, MVLI, MVST.

MLAL 3030. Masterpieces of Chinese Film: Theory and Texts. (4 Credits)
This course provides an introduction to Chinese film, focusing on important genres, directors and movements. We will follow two parallel (often times intersecting) threads throughout the course: 'politics of film’ as well as ‘poetics of film.’ The former explores Chinese film’s engaging dialogue with Chinese sociopolitical issues while the latter investigates key terms of film theory such as spectatorship, gaze, apparatus theory, and authorship.
Attribute: ALC.

MLAL 3043. Modern Chinese Literature. (4 Credits)
Survey of modern Chinese literature: this course will introduce students to major writers and canonical works from China's modern period. We will discuss formal aesthetics, historical contexts, cultural upheaval and transformation, gender and class relations, family and kinship, as well as dialogues between national and regional imaginaries. All readings in English (students may opt to read in Chinese). No previous knowledge of China or Chinese required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, GLBL, INST, ISAS.

MLAL 3045. Women in Chinese Literature and Society. (4 Credits)
In this course we will examine issues of gender and representation in the context of Chinese society. We will explore the roles that women have played in China, how women are portrayed in various Chinese texts and genres - poetry short stories and novels, and films - and how Chinese women write about themselves and others. This course is taught in English and no prior knowledge of Chinese is required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, ISAS.

MLAL 3047. Chinese Culture: Traditions and Transformation. (4 Credits)
This course provides a broad introduction to Chinese culture from earliest times to the contemporary period. Students will engage with diverse genres including philosophical texts, Buddhist sutras, folklore, modern fictions, films and visual materials. We will explore topics on Chinese culture, including philosophical and religious systems, the status of art, gender roles, encounters between tradition and modernity, and legacies of Maoism. All readings in English (students may opt to read in Chinese). No previous knowledge of China or Chinese required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, GLBL, INST, ISAS.

MLAL 3057. Medieval German Literature: Potions, Passions, Players, and Prayers. (4 Credits)
This course will introduce students to the rich literary and cultural heritage of Medieval Germany. The texts will all be read in English translation, but we will go over some passages in their original languages in class to catch some of the flavor of the Medieval German. Topics covered will include pre-Christian charms, the epic of the Nibelungs, love poetry, and urban carnaval plays. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, GERM, MVLI, MVST.
Prerequisite: GERM 2001.

MLAL 3059. Gender Benders. (4 Credits)
This course serves as an introduction to the theme of “German Speaking Gender Icons,” and it will investigate constructions of gender identity, histories of embodied differentiation, and “cultural practices” in various German-speaking contexts. The course also aims to take a closer look at lives of gender non-conformists and their relationships to migrant communities. As many left their homes to seek a better future, this course will investigate how gender identities shaped their quests for improved living conditions, which ultimately impacted their respective communities and institutions. Students will engage with historical and theoretical readings by German-speaking authors to promote reflection and critical engagement. They will also create an original research portfolio related to the content of the class. This course is taught in English. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI.
MLAL 3060. Magic and Reality in Russian Literature. (4 Credits)
Explores the traditions of Mysticism and the Fantastic in Russian literature. By analyzing magical motifs both as an exploration of the inexplicable and as an artistic means to counter social and ideological oppression, students will develop their understanding of different periods and aspects of Russian, Soviet and Post-Soviet culture. Selected readings include works by Pushkin, Gogol, Dostoevsky, Bulgakov, Petrushevskaya and Pelevin, among others. Conducted in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, ISEU, OCST.

MLAL 3065. Dostoevsky. (4 Credits)
This course explores the oeuvre of Fyodor Mikhailovich Dostoevsky (1821-1881), one of the greatest Russian novelists and world literature's most insightful psychologists. Select texts include: The Gambler, The Idiot, The Adolescent, The Brothers Karamazov (dubbed by Freud "the most magnificent novel ever written"), several short stories, etc. TAUGHT IN ENGLISH. May count toward Minor in Russian if course work is completed in Russian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: OCST, RUSS.

MLAL 3070. Russian Visions: The Interplay Between Russian Literature and Art in Mid-19th/Early 20th Century. (4 Credits)
This interdisciplinary course explores the interaction between the Russian visual arts and Russian literature during two artistically flourishing periods of Russian and early Soviet history in the nineteenth and twentieth centuries. The first is the rise of the daguerreotype in Russia (and photojournalism shortly thereafter) in conjunction with the rise of the Natural School in Russian literature in the 1840s. The second is the pinnacle of the Russian avant-garde (1917-1932: and visual art and photojournalism shortly thereafter) in conjunction with the brilliant work of dissident writers from several movements such as Constructivism, Zaum, Russian Cubism and Cubo-Futurism) in conjunction with the brilliant work of dissident Soviet writers during this time. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, ENGL, INST, ISEU, OCST, RUSS.

MLAL 3080. Tolstoy, Dostoevsky and the Meaning of Life and Death. (4 Credits)
We will read two works – one large book on Russian family life, one short meditation on death – from each of Russia's two most famous authors: Leo Tolstoy and Fyodor Dostoevsky. We will read Tolstoy's Anna Karenina (1878) and The Death of Ivan Ilych (1886) and Dostoevsky's The Brothers Karamazov (1880) and The Dream of a Ridiculous Man (1877). Tolstoy and Dostoevsky are each profound psychologists and religious philosophers. While Tolstoy masters interpersonal and societal relations, Dostoevsky illuminates the extreme ranges of the human psyche. Tolstoy's Levin in Anna Karenina asks "What is the meaning of life?" and Dostoevsky's Ivan Karamazov struggles to reconcile God's creation with the suffering of innocent children. The two novels were written in close proximity of each other and bear fruitful comparisons. Tolstoy's The Death of Ivan Ilych explores the mind of a prestigious court official who is terminally ill. Dostoevsky's The Dream of a Ridiculous Man reveals the story of a man who dreams his own death. These two great authors are often pitted against each other, but Dostoevsky himself described Tolstoy's Anna Karenina as "flawless," and Tolstoy adored Dostoevsky's religious teachings in The Brother's Karamazov expressed through the character of Father Zosima. This course shows how the works of the great Russian writers compliment our understanding of life and death. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISEU, OCST, REST, THEO.

MLAL 3085. The Russian Icon in Literature, Theology, Avant Garde Art, Film, Music, Museums and Politics. (4 Credits)
A multimedia modern history of the Russian icon beginning with theological and liturgical background (Lazarev's The Russian Icon: From It's Origins to Sixteenth Century, Florensky's "Reverse Perspective," as well as modern scholarship of Uspensky's Semiotics of the Russian Icon, and Theology of the Russian Icon), examining how it shaped literature 19th: Chekhov- the St. George and the Dragon as a plot structuring device for a series of short stories); Dostoievsky-selected scenes from Notes From the Dead House, "The Dream of a Ridiculous Man;" and The Brothers Karamazov. Then we'll track the icon's dynamic influence on the Russian Avant-garde (Constructivism, Russian Cubism and Suprematism), continuing with it's incorporation into Soviet film (Askoldov and Tarkovsky), and bringing it up to modern times with Putin's repeated use of the Theotokos Icon in photography as a propaganda device. Our course will incorporate a field trip to Rutgers to visit the Zimmerli Museum, a local Russian Orthodox Church, MoMA and Met Breuer. Come contemplate infinity and visit liminal realms. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISEU, OCST, REST, THEO.

MLAL 3090. 100 Years of War and Peace. Revolution in Russia and Soviet Literature: Tolstoy, Bulgakov and Bely. (4 Credits)
This course explores three masterpieces of Russian and Soviet revolution that reflect the ongoing war and peace of the Russian psyche. We'll begin with Tolstoy's War and Peace (1867), continue with Andrei Bely's Petersburg (1913), and end with Bulgakov's Master and Margarita (1967). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.
MLAL 3095. The Apocalypse Course: Russian and American Revelations. (4 Credits)
This interdisciplinary course explores the revelatory moment that reverberates through historical and personal time. The course is rooted in John’s Book of Revelation according to Russian religious philosophy. Comparative studies include the following: Last Judgement Icons with Michelangelo and Kandinsky’s apocalyptic masterpieces; Blok’s ‘The Twelve’ and T.S Eliot’s ‘The Hollow Men’; Gogol’s ‘The Portrait’ and O’Connor’s ‘The Enduring Chill’; Bulgakov’s ‘Master and Margarita’ and Vonnegut’s ‘Slaughterhouse-Five’; Tarkovsky’s ‘Sacrifice’ and HBO’s ‘The Leftovers’; Scriabin’s Second Symphony and Bob Dylan’s ‘Hard Rain.’ Fulfills Orthodox Christian minor. Taught in English, Russian track available. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, OCST, RUSS.

MLAL 3100. History of Language. (4 Credits)
This course examines the change of language structure through time. Special attention is paid to language contact and the socio-historical contexts that created language changes as well as the syntactic and phonological rule systems that govern language change. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: LING.

MLAL 3200. Machiavelli’s Utopia. (4 Credits)
In this course we will analyze The Prince as well as Machiavelli’s creative work (e.g., his theatrical piece The Mandrake Root and his short story Belfagor. By adopting an interdisciplinary approach for the examination of both the historical and the artistic context in which Machiavelli lived, we will address the question of how and why The Prince was misinterpreted by Italian and European intellectuals and humanists of Machiavelli’s time, leading to a misperception of many of the text’s core ideas in an historical moment in which Europe was steadily transforming itself into a domain of absolutism (we will read Reginald Pole, Innocent Gentillet, Erasmus, Montaigne, among others). We will retrieve the original cultural context in which Machiavelli wrote: a climate of strong limitation of political creativity and liberty, which lead Machiavelli to compose The Prince (1513 ca.) inspired by an utopian desire for a new leader who could reconcile all the contradictions of Italy. Course taught in English. Coursework in Italian for credit in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, ITAL.

MLAL 3202. Ariosto to Galileo: The Invention of Modernity in Renaissance Italy. (4 Credits)
Ariosto and Galileo represent two chronological ends of a revolutionary intellectual period in the Italian Renaissance culture. Between the years 1516 (date of the first edition of Ariosto’s Orlando Furioso) and 1610 (date of edition of Galileo’s Sidereus Nuncius), Italian civilization contributed significantly to the shaping of a new idea of reality. The course is dedicated to the study of this particular period in which masterpieces such as the Furioso, Torquato Tasso’s pastoral poem Aminta, and his epic poem Jerusalem Delivered, as well as Galileo’s works (Sidereus Nuncius, Copernican Letters, Dialogue Concerning the Two Chief World Systems) become the founding texts of a new realism that questioned and distrusted appearances and, by doing so, prepared the intellectual background where Galileo could develop his new scientific method and discover intellectual models useful for his innovative comprehenshion of the natural world (with strong implications about the separation of theology and science). Recent scholarship insists on the deep influence that literary humanism had on Galileo’s mind who, no surprise, was a reader, a writer of literature and also a literary critic (for example he wrote about Ariosto and also an incomplete commentary on Tasso’s Jerusalem). The course is therefore dedicated to the study of the relationship of literature to the History of Science with close reading of the above mentioned works and also following an interdisciplinary approach devoted to the exploration of the artistic civilization around Ariosto, Tasso, and Galileo. Taught in English with coursework in Italian for credit in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC.

MLAL 3203. Dante and His Translators. (4 Credits)
According to the conservative estimates, there are hundreds of translations into English of The Divine Comedy. Which one is the real Dante? Umberto Eco wrote a book on translation entitled Saying Almost the Same Thing. Comparing a few of these translations, such as those of Ciardi, Singleton, and Mandelbaum, may actually reveal aspects and meanings of the original that the translations slightly altered or that may be missing altogether. So which Dante are we reading? How do translations influence interpretations? This course will discuss the various translations as well as theories of translation in order to deepen our understanding of the Divine Comedy. Taught in English. If you are counting this course towards your Italian major or minor, the coursework must be done in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ITAL, MVLI, MVST.

MLAL 3210. Islam and Italy. (4 Credits)
From Medieval Sicily to the Renaissance and the modern world, the involvement of Arab culture in Italy has been both varied and enduring in nature. This course examines interaction between these two cultures from the 900s to today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.
MLAL 3250. Culture and Society in Italian Cinema. (4 Credits)
A study of the social, political, and cultural conditions in Italy from 1945 (post-World War II) to today as interpreted by the visual language of significant film directors such as Rossellini, Visconti, Fellini, Antonioni, and Sorrentino, among others. Taught in English with coursework in Italian for credit in Italian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, ITAL, ITMO.
Prerequisite: ITAL 2001 (may be taken concurrently).

MLAL 3300. Literatures and Cultures of Modern Israel. (4 Credits)
The course will explore major themes in modern Israeli literature, film, art, and popular culture. Among topics discussed will be the social and cultural dynamics of Israeli history and contemporary life, constructions of identity, questions of ethnicity, nationality, gender, war, and conflict, and more. Texts and assignments will be in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

MLAL 3307. Germany and Migration. (4 Credits)
Migrants have played a role in many countries’ culture. Germans started coming to the U.S. in the 17th century, and about 17% of Americans have German ancestry. Migrants entered Germany starting around the turn of the 20th century, and today about 2% of Germany’s population has a migration background. How do migrants assimilate and learn the language of their new country? What influences do migrants have on a country’s culture and language? In the first part of the semester, we will examine the migration of Germans to the United States, and in the second part we will focus on migration into Germany. Taught in ENGLISH.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, ALC, AMST, ASSC, COLI, INST, ISEU, ISIN.

MLAL 3325. 'The Gatekeepers?' Documentary Cinema in Israel. (4 Credits)
The course presents a survey of Israeli documentary cinema from the 1940s to the present. Topics covered include: early Zionist documentary, the shadow of the Holocaust, The Occupation, militarism and war, Orthodox Judaism and other minority groups, social protest and its cinematic representation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, ISME, JWST.

MLAL 3350. Promised Land: Israeli Culture Between Utopia and Dystopia. (4 Credits)
From its inception, Zionism was imbued with utopian energies. Tel-Aviv, the first Hebrew city is named after a utopian novel, Herzl’s Alteanland (Old-New Land). The Kibbutz phenomenon is often studied as an example of a concrete, real-life utopia. Since the 1973 October War, however, we have seen also a marked increase in the production of Hebrew literary dystopias, usually depicting the destruction of the Jewish State. This course explores Israeli culture through the prism of utopia/dystopia.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, ISME, JWST, MEST.

MLAL 3402. Introduction to Russian Drama. (4 Credits)
This course examines the modern Russian theatrical tradition from the nineteenth century to the present and explores a range of plays that include works by Pushkin, Gogol, Ostrovsky, Chekhov, Bulgakov, Shvarts, Petrushevskaya, Pelevin, Grishkovets, among others. Conducted in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, ISEU, OCST.

MLAL 3405. Masterpieces of Russian Film. (4 Credits)
Examining some of the most critically acclaimed works of Russian, Soviet, and post-Soviet cinema, students will gain an insight into a variety of historical, cultural, and social contexts through the creative lens of Dziga Vertov, Sergei Eisenstein, Andrei Tarkovsky, Alexander Sokurov, Kira Muratova, Larissa Shepitko, and other Russian-language directors. The course focuses on analyzing cinematic ‘texts’ through critical watching, reading, thinking, and writing. Taught in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, ISEU, OCST.

MLAL 3410. Arab Cinema: History and Cultural Identity. (4 Credits)
This course provides a comprehensive overview of cinema in the Arab world, tracing the industry’s development from colonial times to the present. It analyzes the ambiguous relationship with commercial Western cinema, and the effect of Egyptian market dominance in the region. Tracing the influence on the medium of local and regional art forms and modes of thought, both classical and popular, the class shows how indigenous and external factors combine in a dynamic process of “cultural repackaging.” We will focus on Iraq, Lebanon, and Palestine while exploring problematic issues such as European coproduction for Arab art films, including their relation to cultural identity and their reception in the region and abroad. Class discussions will be in English. All readings will be in English translation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ARAB, CCUS, COLI, COMC, INST, ISME, MEST.

MLAL 3440. Arabian Literature in English Translation. (4 Credits)
A survey of Arabic literature from the sixth century A.D. to the present, this course will explore the development of the literary genres of the Arabic canon while keeping a keen (and critical) eye on the political, cultural, religious and social circumstances that have accompanied—and, in many cases, given rise to—their development. What is considered literature in the Arabic canon? What is the relationship between literature and politics? What impact has the Quran had on Arabic literature? What is the role of women in the Arabic literary tradition? What kind of dialogue has there been between Arabic and Western literatures? What is commitment in contemporary Arabic literature? Class discussions will be conducted in English. All readings will be translated into English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ARAB, COLI, GLBL, INST, ISME, MEST.
MLAL 3442. Arabic Culture and the News Media. (4 Credits)
The American news media portrays the Arab world as one of endless political upheaval and repression, with a culture shaped strictly by Islam. This course broadens students’ understanding of contemporary Arab societies through the study of Arab TV/radio/print/internet news as well as propaganda and cartoons from government-run outlets, national-resistance activists, democracy-promoting movements, and even jihadists. In this course, the news is used to investigate cultural issues—including authority and decision-making, religion, gender, and family dynamics—in Arab societies as well as to explore American-Arab relations. Through a study of media, students can compare Arab culture as portrayed by American media and American culture to how it is portrayed by the media in the Arab world. This class is conducted in English, with materials in English or Arabic with English subtitles. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, ARAB, COLI, INST, ISIN, ISME, MEST.

MLAL 3450. The Arab Spring in Arabic Literature. (4 Credits)
A survey of Arabic literature from 2011 to the present, this course will explore the development of the literary genres of the Arab Spring in the Middle East. What is the relationship between literature and politics? We will read short stories, poetry, graphic novels, blogs, and the Facebook pages of prominent literary and social figures, redefining and modernizing the notion of what is literature in order to work out whether the revolution could have been predicted and how it took place. Class discussions will be in English. All readings will be in translated into English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ARAB, COLI, INST, ISME, PJRC, PJSJ, PJST.

MLAL 3474. The Arab-Israeli Conflict: Cultural Perspectives. (4 Credits)
The Arab-Israeli conflict is one of the longest and most controversial conflicts in the world. Through careful analysis of Israeli literature and film, this course provides a nuanced cultural and political history of Arab-Israeli relations. Our texts emphasize the dialectic relationship between art and politics, representation and history, as well as aesthetic and ethics. The course thus explores the effects of art on politics, and the effect of politics on art. Specifically, we examine how art is instrumental in producing 1) ‘imagined communities’ with stable national identities and 2) political resistance that disrupts these hegemonic metanarratives. We also consider the internal dynamics of Israeli society as represented in literature and film, especially tensions between the Jewish-Arab, Ashkenazi-Mizrachi, and religious-secular communities. By analyzing canonical and more contemporary stories, poems, and films (including those by S. Yizhar, Amos Oz, Said Kashua, Mahmoud Darwish, among others) we explore the dialectic between art and politics in Israeli society since 1948.
Attributes: ALC, COLI, INST, ISME, JWST, MEST.

MLAL 3475. Oppositional Thought in Islamic Literature. (4 Credits)
This course will explore various schools of thought and practice in Islamic literature. Works will range from the writings of early Islamic scholars like Al-Ashari, Mutazila, Al-Ghazali, and Rumi to the resurgence of the literalist approach to Islamic scripture in the contemporary Arab world. The course will be taught in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ARAB, COLI, INST, ISME.

MLAL 3500. Writing Under German Censorship: A Culture of Banned Books. (4 Credits)
This course examines the politics of censorship of literature in German society during the twentieth century. Books, articles, pamphlets, and magazines have been classified threatening to the regime, they have been seized from libraries and bookstores across Germany, they have been burned on bonfires during nighttime parades, and they were eliminated from all media. Writers and creators have been infiltrated and observed, fined, jailed, tortured or killed in the name of governmental censorship. We will examine a range of systems and orchestrated campaigns of censorship of the Nazi regime as well as the government of the former German Democratic Republic. We will look at the implementation of censorship, and we will read important authors who have been banned or self-censored within the larger context of twentieth-century Germany. Taught in English. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, GERM, INST, ISAS.

MLAL 3504. Study Tour: Berlin Tales: Germany’s Kiez. (4 Credits)
This course will take us on a journey-a journey that will start in the urban sphere of New York City in a classroom reading historical texts and cultural narratives on the metropolis Berlin. But during Spring Break 2012, we will also have a truly unique opportunity of traveling together to discover the actual streets of Berlin, the center of modernity in Germany itself. We will read authors who present conflicting views and engaging perspectives on four distinct Berlins: The Jewish Berlin of the Weimar Republic, Berlin during the Third Reich, the City as the Capital of East Germany, and lastly, Berlin as booming Metropolis of the 21st Century. And together, we will visit Berlin to discover different life styles, the pulse of minorities, and the nostalgic feeling of Ostalgie or present day Berlin. TAUGHT IN ENGLISH. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, GERM, INST, ISEU.

MLAL 3515. Food for Thought. (4 Credits)
This course analyzes literature (in English translation) from German-language countries that showcases the whole range of food consumption, from excess, such as in the myth of the Schlaraffenland (The Land of Cockaigne), to starvation as in Franz Kafka’s Hungerkünstler (Starvation Artist), and cannibalism (Der Fan by Eckhart Schmidt). The miraculous sustenance provided to saints in their vitae as well as the ultimate inspiration for many of them, the Last Supper, will receive special attention. This course is being developed in collaboration with the Center for Community Engaged Learning and will include the opportunity to volunteer in a local soup kitchen. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, GERM, SL.
MLAL 3535. Building the Ideal City: Ethics and Economics Foundations of Realizable Utopias. (4 Credits)
This course introduces students to the investigation of the role that economic concepts such as profit, work, utility, and exchange play in defining the ideal city as a realizable political project. Students will explore ethical and economic concepts and their interrelation in the debate on the best form of State and government that developed from antiquity to modern American utopian communities. This course includes texts from various sources - philosophical, theological, juridical, and literary. Through these readings, students will learn about the theoretical and practical ideas on the best form of society developed in time and still influence modern political thought. The course also focuses on the impact of the socioeconomic doctrines of the Catholic Church in shaping the idea of a possible, realizable, ideal city. Among the texts and authors included are Plato, St. Augustine, Thomas Aquinas, Dante, Boccaccio, Thomas More, Leon Battista Alberti, Tommaso Campanella, Francis Bacon. Taught in English with coursework in Italian for credit in Italian. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, AMST, APPP, ASHS, ASRP, INST, ISIN, ITAL, ITMO, MVPH, MVST.

MLAL 3600. Women's Voices in German and Austrian Literature. (4 Credits)
This course focuses on the role of women in German and Austrian society in particular on literary and theoretical texts produced by women in the nineteenth, twentieth, and twenty-first centuries. To articulate their ideas and to establish themselves on a public stage, women writers have used different forms of expression over the course of time such as letters, diaries, poems, novellas, political pamphlets, theoretical articles, dramas and essays. We will study the different genres by exploring questions of gender, authorship, personal, national and transnational identities, and the politicization of the private sphere within the cultural context of Germany and Austria. By analyzing literary texts of authors like Lou Andreas-Salome, Else Lasker-Schuler, Anna Seghers, Ingeborg Bachmann, Marlen Haushofer, Monika Maron, Herta Muller and Julia Franck and drawing on visual arts, film, and feminist theory, we will still situate German-speaking women writers with a global context. Topics to be considered in relation to the literary texts are women as writers and artists, sexuality and bodies, friendship and intimacy, politics and political activism, as well as writing and identities. TAUGHT IN ENGLISH. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ALC, ARAB, COLI, INST, ISME, MEST, PJRC, PJST.

MLAL 3624. Music and Nation in the Arab World. (4 Credits)
Though music is a domain of individual expression, it may also reflect or respond to social, cultural and historic influences of a time and place. This course explores the ways in which music acts as an expression of national identity in the Arab world. It considers this relationship in a region where the idea of nation has multiple meanings, and where conflicting factors such as regional diversity and the notion of pan-Arabism exists. Specifically, the course focuses on how particular types of music, including the Aleppian, Waslah, Al-Qasida al-Qhinaiy, and Al-Muwashah, have affected the development and embodiment of national identity in the 20th century. Course materials are presented in English, however students of Arabic language are encouraged to Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ARAB, COLI, INST, ISME, MEST, PJRC, PJST.

MLAL 3701. Villains, Vamps and Vampires: An Introduction to German Cinema. (4 Credits)
Film is a powerful art form and means of communications. The messages embedded in the mesmerizing images often escape us, and we miss the opportunity to understand something about the culture that produced it. With this class we will attempt to explore 20th- and 21st Century ideas and concepts of German identity, culture, history and politics through German film analysis and readings around the topics and genres of villains, vamps and vampires. Each of these genres deal with our most primal nature and its fears: our nightmares, our vulnerability, our alienation our revulsions, our terror of the unknown, our fear of death, our loss identity, and last but not least our often ambiguous relationship to power and sexuality. With this course we intend to read German Cinema through these genres from its inception in the 1890’s until the present. It includes an examination of early expressionist and avant-garde films from the classic German cinema of the Weimar era, fascist cinema, postwar rubble films, New German Cinema from the classic German Cinema from the 1970’s, post 1989 heritage films as well as 21st Century German Films. TAUGHT IN ENGLISH. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, ASAM, COLI, INST, ISEU, WGSS.
MLAL 3710. Fin-De Siecle Vienna: Klimt, Cafes, and Cemeteries. (4 Credits)

Vienna at the turn of the 19th to the 20th century was an important center for intellectuals, artists, architects, the opera and literature as well as the sciences not only for Austria, but for the rising movement of Modernism in Europe at large. In Vienna, this intellectual ferment was played out less in universities or elite salons but rather in the cafes and artist studios of their time. There, the Viennese celebrated life and pleasure but also concerned themselves with death quite happily; they sing and write about it, play with it and build monuments to it. This course will examine various aspects of the Viennese contribution to the birth of Modernism and address the most important authors and artists of their time. We will discuss Jugendstil and Impressionism, the architecture of Adolf Loos and Otto Wagner, authors like Arthur Schnitzler, Robert Musil, and Hugo von Hofmannsth, and give an introduction to the psychoanalysis of Sigmund Freud, whose ‘Interpretation of Dreams’ and ‘Studies on Hysteria’ left their mark on the period. But most excitingly of all during spring break, we will also have the unique opportunity of traveling together to discover the actual streets of Vienna, visit the ‘Zentralfriedhof’ and marvel at Gustav Klimt’s ‘Beethovenfries’ at the ‘Wiener Secession’. Taught in English. Note: Four-credit hours of class preparation that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, GERM, INST, ISEU.

MLAL 3800. Cloisters, Castles, and Kings: Medieval Bavaria. (4 Credits)

This course will explore Medieval secular and church history as it manifested itself in the literature and culture of Bavaria. Includes a study abroad component. Spring break visit to Regensburg and Munich. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, COLI, GERM, MVST.

MLAL 3820. Memory and Identity in Modern Italy. (4 Credits)

This course focuses on the historical and cultural process of nation building in the 19th- and 20th-century Italy. Particular attention will be paid to the formation and conceptualization of an Italian national identity as presented or questioned in literary works by Bufalino, Consolo, Levi, Morante, Sciascia and Tomasi di Lampedusa, and films by Blasetti, Rossellini, Scola, the Taviani brothers and Visconti. Conducted in English. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, COLI.

MLAL 3822. The Arabian Nights. (4 Credits)

This course will examine the cycle of stories, known as the Arabian Nights or 1001 Nights. In the first half of the course we will read some of the major tale cycles and study the relevant historical and cultural contexts. In the second half of the course we will consider a number of adaptations- novels, plays, and films- that have been inspired by the Nights. Class discussion will be in English. All readings will be in English and in English Translation.) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, ARAB, COLI, MEST.

MLAL 3993. Advanced Spanish Immersion in Granada. (3 Credits)

Students will take an upper-level content course at the University of Granada and engage in a number of cultural excursions within Granada, a recognized World Heritage Site by UNESCO and one of the most beautiful cities in the world and a center of flamenco culture. Students will also participate in two short trips to Sevilla and Córdoba. All course activities are organized by the instructors who also supervise the academic progress of students and comment on their weekly reflections. Note: Only participants in Fordham in Granada can register for this class.

Attribute: ALC.

Prerequisite: SPAN 2001.

MLAL 3999. Tutorial. (3 Credits)

Independent research and reading with supervision from a faculty member.

MLAL 4005. Queer Theory and the Americas. (4 Credits)

Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AMST, ASHS, ICC, WGSS.

MLAL 4010. Anni Di Piombo/Years of Lead: Culture, Politics, and Violence. (4 Credits)

The period from the late 1960s to the early 1980s in Italy, known as “anni di piombo” or years of lead, was characterized by intense social and political unrest, and terrorist activities. The 1969 bombing in Piazza Fontana in Milan and the 1980 bombing of the train station in Bologna serve as the tragic bookends of a decade of political violence culminating in the kidnapping and murder of Aldo Moro by the Red Brigades in 1978. In this course, we will study these years by closely examining the cultural production of the time – literature, film and other media. We will pay particular attention to the social and political motivations underlying extremist activism, both left- and right-wing, as represented in literature and the popular press, and to writers’, filmmakers’ and intellectuals’ diverse responses to politically motivated violence, whether to criticize the terrorists themselves or to question the state-sponsored “strategy of tension”. We will also discuss the ways in which these experiences have been revisited and reimagined in recent years, and their relevance for today’s Italy. Taught in English with texts in Italian and English translation. Coursework in Italian for credit toward the Italian major or minor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: COLI, EP4, ITAL, VAL.
MLAL 4016. Rewriting the Mediterranean (20th and 21st Centuries). (4 Credits)
Historically the Mediterranean has been a region where different ethnicities, cultures and religions have emerged, dissolved or coexisted. The enduring encounter of East and West, North and South on its shores and in its waters, however, has been far from peaceful. In this seminar, we will discuss contemporary writers and intellectuals from the Mediterranean, who build on the rich artistic heritage and vital cultural traditions of the region to confront the legacy of centuries-old political and religious divisions. We will analyze the modern construction of the ideas of “Mediterranean culture” and “Mediterranean identity” in the current post-national context by examining fiction and essays by Vincenzo Consolo, Assia Djebar, Juan Goytisolo, Amin Maalouf, Orhan Pamuk and Abraham B. Yehoshua, among others. By telling stories set in the Southern and Eastern Mediterranean – from Italy and Spain to Turkey, Israel and the Middle East – these writers reimagine early civilizations and recast their histories in the present to critique modernity’s narratives of socio-economic and political control, cultural domination and religious exclusion, and offer novel forms of cultural production and critical practice fostering cross-cultural interaction and intercultural understanding. We will conduct our analyses within the conceptual frameworks provided by historians Fernand Braudel, Iain Chambers, David Abulafia and Ian Morris, anthropologist Talal Asad, sociologists Franco Cassano and Edgar Morin, economist Serge Latouche, literary scholar Predrag Matvejevic, and cultural critic Edward Said. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISEU, ISIN, ISME, ITAL, MEST, OCST, PJRC, PJST.

MLAL 4347. Latinos: Fact and Fiction. (4 Credits)
This course uses an interdisciplinary approach to examine the experiences of Latin Americans and Latinos. It employs literature and history to introduce students to the benefits of using multiple ways of acquiring knowledge. It then relies on other academic areas such as art and sociology to reinforce its interdisciplinary. As a capstone course, it allows students to incorporate disciplines from their own academic foundation. It covers topics such as politics, social justice, race, gender, and identity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, GLBL, ICC, LALS.

MLAL 4999. Tutorial. (2 to 4 Credits)
Independent research and reading with supervision from a faculty member.

MLAL 5016. Rewriting the Mediterranean (20th and 21st Centuries). (3 Credits)
Historically the Mediterranean has been a region where different ethnicities, cultures and religions have emerged, dissolved or coexisted. MLAL 8999. Independent Study. (0 to 4 Credits)
Independent Study.

Music (MUSC)

MUSC 1050. Music Focus: Rock and Pop Issues and Debates. (3 Credits)
Rock and Pop music have generated controversies from their first appearance, whether the issues surrounded the words, the rhythms, the marketing, or other aspects. This seminar will focus on a combination of recordings, primary source readings, and recent scholarship on rock and pop to evaluate critically some of the most important debates about race, gender, class, age, authorship and copyright, commercialism and individuality, identity and general musical quality. Consistent with the goals of EP seminars, the emphasis will be on critical thinking through class participation, presentations and writing.
Attribute: FRTE.

MUSC 1051. Who Cares If You Listen?! Music, Culture, and the Critical Ear. (3 Credits)
This course both introduces students to the technical language of music (to understand how music "works") and asks them to hear music as embedded in culture and history (to understand how it "means" for individuals, societies, and epochs). Close analysis of individual works and styles is paired with critical interventions that speak to broad social and intellectual questions. Repertoire will be drawn from Western traditions (canonical and noncanonical) as well as non-Western traditions. This course may include attendance at live performances. This course does not assume any background in music. Students at all levels of musical literacy—including none at all—are welcome.
Attributes: FACC, MANR.
MUSC 1100. Introduction to Music History. (3 Credits)
This course presents a survey of music history, with a focus on developing the skills of thinking and writing critically about music. Students will learn to listen in a focused way and relate what they hear to issues of musical “meaning” and general culture. Students will learn some technical vocabulary that will help them describe or advocate for any music they encounter, and they will apply this vocabulary to examples throughout the semester, for instance a Beethoven Symphony or a Duke Ellington jazz arrangement. Sections may have different focuses in terms of geography or chronology.
Attributes: ACUP, ASAM, ASHS, FACC, FRFA.

MUSC 1210. Music for Dancers I. (3 Credits)
This two-course sequence develops general knowledge of the major historical periods, styles and genres of western music, as well as familiarity with world music. It also provides critical tools to understand the basic components of music: melody, harmony, rhythm, texture, tempo, dynamics, instrumentation. To cultivate musicality, class taught, in part, through practical application: singing and rhythm exercises, elementary score reading etc. Open to B.F.A. students only.

MUSC 1211. Music for Dancers II. (3 Credits)
This two-course sequence develops general knowledge of the major historical periods, styles and genres of western music, as well as familiarity with world music. It also provides critical tools to understand the basic components of music: melody, harmony, rhythm, texture, tempo, dynamics, instrumentation. To cultivate musicality, class taught, in part, through practical application: singing and rhythm exercises, elementary score reading etc. Open to B.F.A. students only.

MUSC 1231. Chamber Music Instruction. (0 to 1 Credits)
Consists of ten weekly coachings for ensembles of 3-5 musicians (can be instrumental, vocal, or a combination of the two). Interested students should contact the Dept. of Art History and Music for more information. Groups are formed at the start of the semester and includes an end-of-semester performance. Pass/Fail only. Lab fee.

MUSC 1241. Concert Choir-Rose Hill. (0 to 1 Credits)
Rehearsal and performance of selected choral music. Requirements include regular attendance at two weekly rehearsals, dress rehearsals, and regularly scheduled performances. By audition and permission of the instructor. Interested students should contact Campus Ministry for more information. For Rose Hill-based students. Pass/Fail only.

MUSC 1242. Concert Choir-Lincoln Center. (0 to 4 Credits)
Rehearsal and performance of selected choral music. Requirements include regular attendance at two weekly rehearsals, dress rehearsals, and regularly scheduled performances. By audition and permission of the instructor. Interested students should contact Campus Ministry for more information. For Lincoln Center-based students. Pass/Fail only.

MUSC 1245. Women’s Choir. (0 to 1 Credits)
The Fordham University Women’s Choir focuses on development of the female voice, both technically and artistically. It also strives to introduce its members to literature from all music history eras and genres. Because the concept of the women’s choir is relatively new to the world of music, many of the compositions performed are contemporary, opening the ensemble to new works by budding composers. Membership to this ensemble is open to students from both the Rose Hill and Lincoln Center campuses.

MUSC 1260. Vocal Instruction: Classical. (0 to 1 Credits)
A sequence of private weekly lessons in classical voice, available for credit to all students. Students’ progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1261. Vocal Instruction: Jazz. (0 to 1 Credits)
A sequence of private weekly lessons in jazz voice, available for credit to all students. Students’ progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1262. Instrumental Instruction: Piano Classical. (0 to 1 Credits)
A sequence of private weekly lessons in classical piano, available for credit to all students. Students’ progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1263. Instrumental Instruction: Piano Jazz. (0 to 1 Credits)
A sequence of private weekly lessons in jazz piano, available for credit to all students. Students’ progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1264. Instrumental Instruction: Guitar Classical. (0 to 1 Credits)
A sequence of private weekly lessons in classical guitar, available for credit to all students. Students’ progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1265. Instrumental Instruction: Guitar Jazz. (0 to 1 Credits)
A sequence of private weekly lessons in jazz guitar, available for credit to all students. Students’ progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1266. Instrumental Instruction: Flute. (0 to 1 Credits)
A sequence of private weekly lessons in flute, available for credit to all students. Students’ progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1267. Instrumental Instruction: Clarinet. (0 to 1 Credits)
A sequence of private weekly lessons in clarinet, available for credit to all students. Students’ progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1268. Instrumental Instruction: Brass Horns/Saxophone. (0 to 1 Credits)
A sequence of private weekly lessons in a brass instrument, available for credit to all students. Students’ progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.
MUSC 1269. Instrumental Instruction: Violin/Viola. (0 to 1 Credits)
A sequence of private weekly lessons in violin/viola, available for credit to all students. Students' progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1270. Instrumental Instruction: Cello. (0 to 1 Credits)
A sequence of private weekly lessons in cello, available for credit to all students. Students' progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1273. Instrumental Instruction: Miscellaneous. (0 to 1 Credits)
A sequence of private weekly lessons in an instrument available for credit to all students. Student's progress is monitored by the department. By audition and permission of the instructor. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1274. Organ Instruction. (0 to 1 Credits)
This sequence of private weekly lessons in organ instruction is available for credit to all students. Students' progress is monitored by the music department, and the course may be taken on a Pass/Fail basis only. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1280. Instrumental Instruction: Drums. (0 to 1 Credits)
Students take a sequence of private weekly lessons in drums, available for credit to all students. Students' progress is monitored by the department. Pass/Fail only. NO REFUND AFTER DROP/ADD: To confirm the exact fee for this course in the given semester, consult http://www.fordham.edu/musiclessons which lists the current fee information.

MUSC 1281. Orchestra. (0 to 1 Credits)
Rehearsal and performance of selected orchestral music. Requirements include regular attendance at rehearsals and performances. By audition and permission of the instructor. Pass/Fail only.

MUSC 1291. Jazz Ensemble. (0 to 1 Credits)
The Jazz Ensembles are hosted in collaboration with Jazz at Lincoln Center (JALC) and meet weekly in the Irene Diamond Education Center at JALC (20 West 60th St). The ensembles are taught by Fordham University instructors and focus on a wide range of jazz styles and levels for each ensemble. Students will have the opportunity to work with Fordham University instrumental instructors, JALC teaching artists, and other special guests throughout the semester. All Chamber Jazz Ensembles perform a concert at the end of the term. Credit toward the music major/minor ensemble performance requirement is offered.

MUSC 1300. Chamber Orchestra. (0 to 1 Credits)
The Chamber Orchestra is a Lincoln Center-based musical ensemble open to all students, University wide. The group will hold weekly rehearsals culminating in one or more performances each semester. The Chamber Orchestra invites all orchestral instruments to join, including string, woodwind, brass, and percussion players. Pass/Fail only. Lab fee.

MUSC 1301. Jazz Orchestra. (0 to 1 Credits)
The Fordham Jazz Orchestra is open to students interested in learning about and performing music by great jazz composers and arrangers, including Duke Ellington, Benny Carter, Thad Jones, Count Basie, Dizzy Gillespie, Mary Lou Williams, Charles Mingus, John Clayton, and Wynton Marsalis, among others. The Jazz Orchestra will provide ensemble, sectional, and solo experience in a big band jazz format. Improvisation is encouraged, but not required for participation. The Jazz Orchestra is hosted by Jazz at Lincoln Center (JALC) and meets weekly in the Irene Diamond Education Center at Jazz at Lincoln Center (20 West 60th St). Members will have the opportunity to work with Fordham University instrumental instructors, JALC Teaching Artists, and other special guest artists. The Jazz Orchestra will perform a concert at the end of the term. Credit toward the music major/minor ensemble performance requirement is offered.

MUSC 1302. Afro-Latin Music Ensemble. (0 to 1 Credits)
The Afro-Latin Music Ensemble focuses on traditional and popular music primarily from Ecuador and Colombia as well as popular Afro-Latin rhythms from across Latin America and the Caribbean. The music includes a variety of instruments—such as hand drums, bass drums, shakers, guitar, and the marimba—all of which accompany call-and-response singing. As Afro-Caribbean music is pervasive throughout the region and incorporated into traditional styles as well, students will also learn the fundamentals of various Latin American instrumental techniques. The ensemble focuses on participatory music, so beginners are encouraged to join and play, while experienced musicians will still be able to advance their own techniques.

Attributes: LAHA, LALS.

MUSC 1303. Collegium Musicum. (0 to 1 Credits)
Vocal and instrumental ensemble exploring Medieval, Renaissance, and Baroque music.
Attribute: MVST.

MUSC 2014. Jazz: A History in Sound. (4 Credits)
This course studies jazz historically from the turn of the 20th century to the present, through both the shifting relations between white and black cultures in America, and the changes in musical tastes and practices over time. It considers the development of New Orleans, Swing, bebop, modal, fusion, and contemporary jazz styles, with special attention to the contributions of Armstrong, Ellington, Parker, Davis and Coltrane. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, PLUR, URST.

MUSC 2022. Broadway Musicals. (4 Credits)
This course studies Broadway's musical theater in its ever-changing forms. It surveys the history of musicals from the 19th century to the present, drawing on the work of influential figures such as the Gershwin brothers, Rodgers & Hammerstein, and Stephen Sondheim. It focuses on skills to analyze how books, lyrics, and music work in a musical, and it fosters critical thought in probing how musicals reflect and engage the political, economic, and social concerns at given moments in American culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM.
MUSC 2031. Rock and Pop Music Since World War II. (4 Credits)
Rock and pop music have played key roles in Western culture for over half a century. This course considers the roots and musical features of rock and related styles, their changing status within ‘mainstream’ culture, and the musical and ethical issues they raise. From the R&B music of the early 1950’s to the British Invasion, punk, disco, rap, alternative and the spread of electronica, pop musicians have moved billions of people, while raising questions about race, gender, generation gaps, commercialism, and globalization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM.

MUSC 2048. World Music and Dance. (4 Credits)
This course will take an approach based on the premise that to study music is to study people, community, history, religion, politics and dance, as well as to study musical styles, forms and instruments. This approach provides the student with an appreciation of the sound, power and meaning of music as it exists within culture. Previously titled Worlds Of Music. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, LAHA, LALS.

MUSC 2120. Introduction to Music Theory. (4 Credits)
Intro to Music Theory is a course designed for the student who wants to learn the basics of reading music notation (music written on the staff using treble and bass clefs), as well as the fundamentals of music theory such as scales, keys and key signatures, and intervals. This course assumes little to no formal musical training, and students need not be able to read music before taking this class. Students who do read music already, but lack some knowledge in theory fundamentals, are also encouraged to take this course. This class is a pre-requisite to Music Theory I (MUSC 2145) for those with no formal music theory training.

MUSC 2121. Ear Training. (4 Credits)
Ear Training is an aural skills class designed to enhance the student musician’s ability to hear music in context as well as increase fluency in sight-reading and performance. Students will learn to both recognize by ear, and sing on command, the diatonic intervals, as well as training in rhythm and solfège. While there is no course pre-requisite, students must be fluent in reading music and have some knowledge of music theory fundamentals, such as the topics covered in Introduction to Music Theory (MUSC 2120).

MUSC 2140. Fundamentals of Keyboard Musicianship. (3 Credits)
This is an intensive hands-on course in the basic skills necessary for the expression of musicianship at the keyboard. First, we learn to read, write, and interpret the fundamental elements of music theory: pitch, clef, and interval; rhythm and meter; scales and key signatures. Then, we apply these tools to the analysis and realization of triads and seventh chords, using both Roman numerals and jazz lead-sheet notation. No prior background assumed.
Corequisite: MUSC 2141.

MUSC 2141. Keyboard Lab. (1 Credit)
Offered in conjunction with MUSC 2140. This practical lab focuses on applying music-theoretical skills at the keyboard: playing diatonic scales and chord progressions; mastering specific compositions from the classical repertoire; developing a reliable sense of rhythm and meter; acquiring basic improvisational strategies and the technique of realizing jazz and popular styles from lead sheets.
Corequisite: MUSC 2140.

MUSC 2145. Music Theory I. (4 Credits)
Music Theory I is the first in a series of three required semester-long courses designed to offer a comprehensive overview of the theory of tonal music, especially of classical music during the Common Practice era, but also relating to the other genres, such as jazz and popular music. This course will cover the following subject areas: fundamentals of music theory, 2 and 3-voice counterpoint, triadic harmony, and the basics of four-part writing. This course is required for all music majors and minors. Students who do not have any prior music theory experience may be required to take an introductory level course, MUSC 2120, as a pre-requisite. Instructor permission should be granted before enrolling. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MUSC 2146. Music Theory II. (4 Credits)
Music Theory II is a continuation of the required three-course music theory sequence. The class will deal primarily with the principles of diatonic harmony as found in classical music of the Common Practice era, as well as through more contemporary and popular styles. Students will learn about chord construction and progressions, and continue in the study of voice-leading principles (as exemplified by four-part writing) begun in Music Theory I. This course is required for all music majors. Music Theory I (MUSC 2145) is a pre-requisite to this course, though some students with past music theory experience could be admitted upon instructor approval. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: MUSC 2145.

MUSC 2147. Music Theory III. (4 Credits)
This course is the last in the required three-course music theory sequence. It extends the principles of harmony and voice leading learned in MUSC 2146 (Music Theory II) and covers chromatic harmony, especially as practiced in the 19th century and in popular styles, as well as advances in musical forms. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: MUSC 2146.

MUSC 2148. Music Theory IV. (4 Credits)
This final music theory course focuses on further exploration of counterpoint, musical forms, and advanced analytical approaches. Students will study imitative counterpoint, such as fugal writing, the Sonata Principle in the 19th and 20th centuries, and will learn to write about music using technical language. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: MUSC 2147.

MUSC 2222. Music Composition. (4 Credits)
This class will engage in the study of instrumental music composition covering a wide range of stylistic approaches and historical genres. Students will compose several short musical works over the course of the semester culminating in a final project that will be performed in a workshop setting by professional musicians. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: MUSC 2145 and MUSC 2146.
MUSC 2231. Introduction to Jazz Improvisation. (4 Credits)
Introduction to the practice of jazz improvisation including scales, chords, transcription, stylistic analysis and performance. Students will play through exercises in class and transcribe solos for their own instruments. Open to all students regardless of background and experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MUSC 2233. Jazz Arranging and Orchestration. (4 Credits)
This class covers basic tools and skills for learning about the sounds of different instruments and voices used in a jazz ensemble. We will learn how these elements can be combined to create various styles and effects specific to jazz music. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MUSC 2300. Electronic Music and Music Production. (4 Credits)
An introduction to the creation, editing, and sequencing of electronic and recorded music using MIDI, computer software, sampling, and audio recordings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MUSIC 2800. Internship. (2 Credits)

MUSC 3110. Music Before 1600. (4 Credits)
This course spans 2000 years: from Pythagoras and Ancient Greek musical culture, to the birth of a commercial music industry in Renaissance Italy. We will examine carefully a number of musical worlds in order to extend our abilities as listeners, writers, analysts, and musicians. We will combine a study of musical style and technique with discussions of mysticism, gender and sexuality morality, science, economics (class, commerce, and colonialism), and art and architecture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: MVAM, MVST, REST.

MUSC 3111. Modern Sounds, Early Music. (4 Credits)
Medieval and Renaissance music’s fragmentary survival has inspired scholars, performers, composers, and artists to realize what remains according to varying creative urges and ideological preoccupations. This course examines the cultures of early music as well as their living legacies. Studying musical traditions from 1000 to 1600, we build a technical vocabulary for discussing music and seek to understand how historical change affects aesthetics, music-making, and listening from 1000 to the present. We also study the reception of medieval music—how it has been rejected, restored, recreated, and reimagined—so as to consider how ‘the medieval’ is historically produced. No prior musical experience is required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: MVAM.

MUSC 3121. Baroque Music: Music Between Ancients and Moderns. (4 Credits)
Musicians of the Baroque era (c. 1600-1750) distinguished themselves through the creation of distinctively modern sounds even as they found inspiration in the past: Monteverdi, Vivaldi, Handel, Bach (and their contemporaries) created music that continues to be performed. To understand what music meant during the Baroque, and what Baroque music might mean to us today, we will combine a study of musical style and technique with discussions of: sexuality, science and the occult, drama, morality, religion, class, colonialism, and the cultural upheavals of the Enlightenment. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MUSC 3122. Music, Enlightenment, and Revolution. (4 Credits)
From the 1750’s to Beethoven’s music in the early nineteenth century, this course examines the cultural issues of this crucial period in music history and their reflection in the compositions of such composers as Pergolesi, Gluck, Haydn, Mozart, and Beethoven. It considers how changing ideas about nature, government, social class, improvisation, dance, and language—as well as national rivalries, war, and technological advances—shaped the music that has come to represent the ‘classical’ era in European art music. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MUSC 3123. Music in the Romantic Century. (4 Credits)
Most of our current behaviors and beliefs with respect to Western music were first shaped in the cultural discourse of the 19th century. This course examines these as part of the interactions of 19th-century music composition, performance, and criticism with the major social, intellectual and cultural movements of the age, focusing on the work of Beethoven, Rossini, Berlioz, Wagner, Verdi, Brahms and Mussorgsky. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: COLI.

MUSC 3124. Music in the 20th Century. (4 Credits)
Beginning with the innovations of Mahler, Debussy, Schoenberg, and Stravinsky, this course traces the main developments in the history of the 20th century Western music to the present. It examines both the music and its engagement with such social and cultural issues as the challenge of modernism; the technological revolution, high vs mass culture, art in democratic and totalitarian societies; and the impact of jazz, popular and world music. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

MUSC 3130. Topics in Latin-American Music. (4 Credits)
This course examines musical cultures, past and present, across Latin America and its diasporas. Emphasis is placed equally upon musical, technical, and cultural analysis of musical works, styles, and subcultures. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LAHA, LALS.
Prerequisite: MUSC 1100.
MUSC 4000. Music and Nationalism. (4 Credits)
Since modern nationalism first emerged in the eighteenth century, music has been used in many ways by nationalists to shape and to stand for their cultural and political claims. This interdisciplinary course will examine how music helped motivate the earliest interest in 'folklore,' and how 'classical' and even recently 'popular' musics have drawn on these foundations. We will examine how historians, musicologists, folklorists, composers, sociologists and others have treated music in this context. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ICC.

MUSC 4999. Tutorial. (1 to 4 Credits)
Independent research and readings with supervision from a faculty member.

Natural Science (NSCI)

NSCI 1010. Physical Sciences: From Past to Present. (3 Credits)
Designed to introduce the non-science major to the development of concepts and theories in chemistry and physics. Topics will include atomic theory, interactions of energy and matter, light, and astronomy. Laboratory sessions will complement the lecture topics.

Attribute: PSCI.

NSCI 1020. Physical Science: Today's World. (3 Credits)
This course will introduce the non-science major to the applications of physics and chemistry to medical, industrial, and environmental issues. Laboratory sessions will complement the lecture topics.

Attributes: ENST, ESNS, ESPS, PSCI.

NSCI 1030. Human Function and Dysfunction. (3 Credits)
Introduces the non-science major to intrinsic and extrinsic factors affecting the human body. Topics include genetic engineering, neuroscience, behavior, and disease. Laboratory sessions will complement the lecture topics.

Attributes: BESN, BIODE, LSCI.

Prerequisites: NSCI 1010 or NSCI 1020.

NSCI 1040. People and the Living Environment. (3 Credits)
Introduces the non-science major to the place of humans in global biological systems. Topics include principles of population and community ecology, learning and behavior, evolution and sustainability. Laboratory sessions will complement the lecture topics.

Attributes: ENST, ESLS, ESNS, INST, ISIN, LSCI, PJEN, PJST, SOIN, URST.

Prerequisites: NSCI 1010 or NSCI 1020.

NSCI 1050. Health and Disease I. (3 Credits)
Designed to introduce the non-science major to basic and applied life sciences as they impact human health. Topics include genetic, pathogenic, immunologic and neurologic dysfunction, and current and future treatments of these disorders. Laboratory sessions will complement the lecture topics. This is the second of a two-course sequence that fulfills the science core requirement.

Prerequisite: NSCI 1050.

NSCI 1051. Health and Disease II. (3 Credits)
Designed to introduce the non-science major to basic and applied life sciences as they impact human health. Topics include diseases associated with genetic, pathogenic, immunologic and neurologic dysfunction, and current and future treatments of these disorders. Laboratory sessions will complement the lecture topics. This is the second of a two-course sequence that fulfills the science core requirement.

Prerequisite: NSCI 1050.

NSCI 1321. General Chemistry Lecture I. (4 Credits)
An introductory course covering treachemical bonding, thermochemistry, properties of gases. Lecture: three hours; recitation: one hour. (Every fall.) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ENST, ENVS, ESNS, ESPS, NEUR.

Prerequisites: MATH 1203 (may be taken concurrently) or MATH 1206 (may be taken concurrently) or AP Mathematics: Calculus AB with a score of 004.

Corequisite: NSCI 1331.

Corequisite: NSCI 1332.

Mutually Exclusive: CHEM 1321.

NSCI 1322. General Chemistry Lecture II. (4 Credits)
A continuation of NSCI 1321. Properties of liquids, solids and solutions; chemical kinetics, equilibria, and thermodynamics. Lecture: three hours; recitation: one hour. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ENVS, NEUR.

Prerequisite: NSCI 1321.

Corequisite: NSCI 1332.

Mutually Exclusive: CHEM 1322.

NSCI 1331. General Chemistry Lab I. (2 Credits)
The laboratory to accompany NSCI 1321. Lab fee.

Corequisite: NSCI 1321.

Mutually Exclusive: CHEM 1331.

NSCI 1332. General Chemistry Lab II. (2 Credits)
The laboratory to accompany NSCI 1322. Lab fee.

Prerequisite: NSCI 1331.

Corequisite: NSCI 1332.

Mutually Exclusive: CHEM 1332.

NSCI 1403. General Biology Lecture I. (3 Credits)
Theoretical and experimental aspects of biology through study of structural and functional interrelationships at the cellular and organismal levels. Chemical and cellular basis of life, integrating and functional systems and maintenance of homeostasis. Lecture: three hours. (Every Fall)

Attributes: ENST, ENVS, ESLS, ESNS, NEUR.

Corequisite: NSCI 1413.

Mutually Exclusive: BISC 1403.

NSCI 1404. General Biology Lecture II. (3 Credits)

Attributes: ENST, ENVS, ESLS, ESNS, NEUR.

Prerequisites: NSCI 1403 or NSCI 1423.

Corequisite: NSCI 1414.

Mutually Exclusive: BISC 1404.
NSCI 1413. General Biology Lab I. (2 Credits)
The laboratory to accompany NSCI 1403. Lab fee.
Corequisite: NSCI 1403.
Mutually Exclusive: BISC 1413.
NSCI 1414. General Biology Lab II. (2 Credits)
The laboratory to accompany NSCI 1404. Lab fee.
Prerequisite: NSCI 1413.
Corequisite: NSCI 1404.
Mutually Exclusive: BISC 1414.
NSCI 1423. Concepts in Biology Lecture I. (3 Credits)
The goal of this course is to provide insight into the fundamentals of Biology. Particular areas of emphasis include understanding the theoretical and experimental aspects of the biology of animals emphasizing structural and functional interrelationships at the cellular and organismal levels. Topics include cellular and biochemical basis of life, functional anatomy, neurobiology and homeostasis. Lecture: three hours. (Every Fall)
Attributes: ENST, ESLS, ESNS, NEUR.
Corequisite: NSCI 1433.
NSCI 1424. Concepts in Biology Lecture II. (3 Credits)
Theoretical and experimental aspects of the biology of animals emphasizing structural and functional aspects of self-perpetuation. Topics include reproduction, heredity, behavioral biology, evolution and organism-environment interactions. Lecture: three hours. (Every Spring)
Attributes: ENST, ESLS, ESNS, NEUR.
Prerequisites: NSCI 1423 or NSCI 1403.
Corequisite: NSCI 1434.
NSCI 1433. Concepts in Biology Lab I. (2 Credits)
The laboratory to accompany NSCI 1423. Lab fee.
Attribute: ENVS.
Corequisite: NSCI 1423.
NSCI 1434. Concepts in Biology Lab II. (2 Credits)
The laboratory to accompany NSCI 1424. Lab fee.
Attribute: ENVS.
Prerequisite: NSCI 1433.
Corequisite: NSCI 1424.
NSCI 1501. General Physics Lecture I. (3 Credits)
The fundamental physics course for majors in natural sciences. A study of physical quantities, phenomena, and laws in mechanics, heat and sound. Lecture: three hours; recitation: one hour. (Every fall.)
Attributes: ENST, ESLS, ESNS, NEUR.
Prerequisites: MATH 1203 or MATH 1205.
Corequisite: NSCI 1511.
NSCI 1502. General Physics Lecture II. (3 Credits)
The continuation of General Physics I with studies in electromagnetism, optics, relativity, atomic and nuclear physics. Lecture: three hours; recitation: one hour. (Every spring.)
Prerequisite: NSCI 1501.
Corequisite: NSCI 1512.
NSCI 1511. General Physics Lab I. (1 Credit)
The laboratory to accompany NSCI 1501. Lab fee.
NSCI 1512. General Physics Lab II. (1 Credit)
The laboratory to accompany NSCI 1502. Lab fee.
Prerequisite: NSCI 1511.
NSCI 1701. Physics I. (3 Credits)
A study of mechanics, thermodynamics, electricity and magnetism, optics and atomic physics.
Prerequisites: MATH 1207 or AP Mathematics: Calculus BC with a score of 004.
Corequisites: NSCI 1511, NSCI 1703.
Mutually Exclusive: PHYS 1701.
NSCI 1702. Physics II. (3 Credits)
Continuation of NSCI 1701.
Prerequisites: NSCI 1701 or PHYS 1701.
Corequisites: NSCI 1512, NSCI 1704.
Mutually Exclusive: PHYS 1702.
NSCI 1703. Physics I Recitation. (0 Credits)
Discussion and problem solving on topics to be covered in NSCI 1701 Physics I.
Corequisite: NSCI 1701.
NSCI 1704. Physics II Recitation. (0 Credits)
Discussion and problem solving on topics to be covered in NSCI 1702 Physics II.
NSCI 1999. Tutorial. (1 Credit)
NSCI 2010. Global Ecology Lecture. (3 Credits)
An introduction to the principles of ecology, with emphasis on global environmental problems of the present day. The interaction of biological principles with social, political and economic systems. Selected topics include the ecology of global habitats, population biology, air and water pollution, waste disposal and environmental impacts. (Fall, even years.)
Attributes: ENST, ENVS, ESLS, ESNS, INST, ISIN, PJEN, PJST.
Prerequisites: NSCI 1030 or NSCI 1040 or NSCI 1051 or NSCI 1404 or NSCI 1424 or HPLC 1604.
NSCI 2010. Global Ecology Lab. (2 Credits)
The laboratory to accompany NSCI 2010. Lab fee.
Prerequisite: NSCI 2010 (may be taken concurrently).
NSCI 2018. Biology of Aging. (3 Credits)
The emphasis in this course is on present knowledge regarding biological, anatomical, physiological, and cytological changes in people during the aging process. Topics include somatic mutation, cancer and changes in the genetic material, immune systems in aging, free radicals, hormones, sensory systems, neurobiology of aging, and possible directions for future research. (Spring, odd years.)
Attributes: DISA, NECM, NEUR.
Prerequisites: NSCI 1404 or NSCI 1424 or HPLC 1604.
NSCI 2040. Research Design and Analysis. (3 Credits)
Modern methods in the natural sciences generate an embarrassment of riches with respect to data. Scientists need effective methods for acquiring, interpreting, and presenting data. This course provides an overview of the theory and practice of data handling in the modern natural sciences. Topics will include efficient and effective study designs, statistical and graphical aids to summarizing, presenting, and drawing conclusions from data, and accessing and drawing conclusions from biological data bases. The course will reflect the fact that the data handling today is heavily computer based. (Annually in the spring or fall.)
Attribute: NEUR.
Prerequisites: (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or (HPLC 1604) and (MATH 1206 or MATH 1203).
NSCI 2060. Environment: Science, Law, and Policy. (3 Credits)
Using problem-based investigations and case studies, students will examine scientific, legal and policy aspects of selected topics. The course includes field trips to environmentally sensitive sites and guest speakers.
Attributes: ENST, ENVS, EPLE, ESEL, ESLS, ESNS, ESPL, ESPS, LPGP, SOIN, URST.
Prerequisites: (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or NSCI 1040 or HPLC 1604.

NSCI 2122. Immunology Lecture. (3 Credits)
(Formerly NSCI 2012 or 2022.) An introduction to the concepts of immunology, including theory, clinical applications and techniques.
Attributes: NECM, NEUR.
Prerequisites: (NSCI 1404 and NSCI 1414 or HPLC 1604 or NSCI 1424 and NSCI 1434) and (NSCI 1322 and NSCI 1332).
Mutually Exclusive: NSCI 2012, NSCI 2022.

NSCI 2141. Vertebrate Anatomy Lecture. (3 Credits)
(Formerly NSCI 2041.) The origin, relationships and anatomy of vertebrates. Current concepts in evolutionary theory. Emphasis is given to mammals, particularly humans. A systems approach is used to consider the embryological origins as a guide to the anatomical structures in the adult. It is recommended to have previously taken NSCI 3154.
Attributes: NECM, NEUR.
Prerequisites: (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or HPLC 1604.
Corequisite: NSCI 2841.

NSCI 2142. Paleoecology Lecture. (3 Credits)
An exploration of life and landscapes of the deep past with a focus on the last 2.5 million years of ecosystem change or islands and continents. Readings will be drawn from current sources and peer reviewed publications. Laboratory work will include evaluation of pollen, spores and micro-charcoals data from lake and bog deposits. With a view to understanding current trends, we will examine how prehistoric animal and floral communities have transformed with climate and the arrival of modern humans.
Attributes: ENSE, ESTN, ENVS.
Prerequisites: (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or HPLC 1604.
Corequisite: NSCI 2842.

NSCI 2800. Internship. (2 Credits)
NSCI 2800. Internship. (2 Credits)

NSCI 2822. Immunology Lab. (2 Credits)
(Formerly part of NSCI 2022.) Optional lab for NSCI 2122 Immunology. Laboratory work will include hematology, serology, and antibody biochemistry. Laboratory section meets weekly. Spring even years. Lab fee.
Prerequisites: (NSCI 1404 and NSCI 1414 or NSCI 1424 and NSCI 1434 or HPLC 1604) and (NSCI 1332 and NSCI 1322).
Corequisite: NSCI 2122.

NSCI 2841. Vertebrate Anatomy Lab. (2 Credits)
(Formerly part of NSCI 2041.) Lab for NSCI 2141, required. Lab fee.
Prerequisites: (NSCI 1404 and NSCI 1414) or HPLC 1604.
Corequisite: NSCI 2141.

NSCI 2842. Paleoecology Lab. (2 Credits)
Lab work will include evaluation of pollen, spores and micro-charcoal data from lake and bog deposits. Lab work may also include field work. With a view to understanding current trends, we will examine how prehistoric animal and floral communities have transformed with climate and the arrival of modern humans.
Prerequisites: NSCI 1322 and (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or HPLC 1604.
Corequisite: NSCI 2142.

NSCI 2999. Natural Science Tutorial. (2 Credits)

NSCI 3014. Molecular Ecology Lab. (2 Credits)
This course will introduce students to the field of Molecular Ecology, the use of molecular methods to address evolutionary, behavioral, conservation, and ecological questions. This laboratory course will provide hands-on training in molecular ecology experimental and analytical skills. In addition, students will gain experience in experimental design, the critical evaluation of the scientific literature and in written and oral scientific communication. This will be accomplished in the context of semester projects that the students design and implement.
Prerequisites: (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or (HPLC 1604).

NSCI 3121. Organic Chemistry Lecture I. (4 Credits)
(Formerly NSCI 3021.) Comprehensive organic chemistry course which includes an understanding of how structure relates to activity, pi bond chemistry, stereochemistry, elimination versus substitution reactions, and an introduction to infrared and nuclear magnetic resonance spectroscopies, and mass spectroscopy.
Attribute: ENVS.
Prerequisite: NSCI 1322.
Corequisite: NSCI 3821.
Mutually Exclusive: CHEM 2521.

NSCI 3122. Organic Chemistry Lecture II. (4 Credits)
(Formerly NSCI 3031.) A continuation of NSCI 3121. Topics include electrophilic aromatic substitution carbonyl chemistry, condensation reactions, UV and mass spectroscopy, proteins, carbohydrates and lipids. Every spring. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENSE, ENVS, NECM, NEUR.
Prerequisite: NSCI 3121.
Corequisite: NSCI 3822.

NSCI 3133. Genetics Lecture. (3 Credits)
(Formerly NSCI 3023 or 3033.) This course will examine aspects of genetics including the biological basis of inheritance, the molecular and cellular biology of genes, genetic engineering, and evolution and population genetics. We will focus on classic and cutting edge genetic experiments, tools, and model organisms in order to understand fundamental genetics principles and to explore real-world applications in medicine, agriculture, and industry.
Attributes: ENSE, ENVS, NECM, NEUR.
Prerequisites: (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or (HPLC 1604) and (NSCI 1331 and NSCI 1332).
Mutually Exclusive: BISC 2539, NSCI 3023, NSCI 3033.
NSCI 3154. Cell and Development Biology Lecture. (3 Credits)
(Formerly NSCI 3054 or 3044.) Study of growth, patterning, and differentiation in multicellular organisms, with an emphasis on vertebrate and invertebrate model organisms. This course discusses our current understanding of how multicellular organisms are formed based on experiments in classical embryology, cell biology and developmental genetics. This course emphasizes interpretation and analysis of experiments. (Spring, even years)
Attributes: NECM, NEUR.
Prerequisites: (NSCI 1404 and NSCI 1414 or NSCI 1424 and NSCI 1434 or HPLC 1604) and (NSCI 1322 and NSCI 1332).
Mutually Exclusive: BISC 3754, NSCI 3044, NSCI 3054.

NSCI 3821. Organic Chemistry Lab I. (2 Credits)
(Formerly NSCI 3022.) A laboratory course introducing the student to the experimental techniques of organic chemistry. Lab Fee.
Attribute: ENVVS.
Corequisite: NSCI 3121.
Mutually Exclusive: CHEM 2541.

NSCI 3822. Organic Chemistry Lab II. (2 Credits)
(Formerly NSCI 3032.) A continuation of NSCI 3821. Lab Fee.
Attribute: ENVVS.
Corequisite: NSCI 3122.
Mutually Exclusive: CHEM 2542.

NSCI 3833. Genetics Lab. (2 Credits)
(Formerly part of NSCI 3033.) Optional lab for NSCI 3133 Genetics. Lab fee.
Prerequisites: (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or (HPLC 1604) and (NSCI 1331 and NSCI 1332) and (NSCI 3133) (may be taken concurrently).
Corequisite: NSCI 3133.
Mutually Exclusive: CHEM 2549.

NSCI 3854. Cell and Development Biology Lab. (2 Credits)
(Formerly part of NSCI 3054.) Optional lab for NSCI 3154 Cell & Development Biology. Lab fee.
Prerequisites: (NSCI 1404 and NSCI 1414 or NSCI 1424 and NSCI 1434 or HPLC 1604) and (NSCI 1332 and NSCI 1322).
Corequisite: NSCI 3154.

NSCI 3999. Tutorial. (3 Credits)
Independent research and reading with supervision from a faculty member.

NSCI 4032. Neurobiology Laboratory. (2 Credits)
Laboratory course designed to complement Neuroscience (NSCI 4630) or Animal Physiology (NSCI 4112). This course provides hands-on experience that reinforces theoretical knowledge of Neuroscience, including circuits, intrinsic properties of neurons, synaptic communication, and the role of genes in behavior. We use electrophysiological methods to record electrical activity in invertebrate neurons, muscle cells, and plant cells. We also use behavioral approaches using different species to understand the link between neuronal function and behavior. Lab fee.
Prerequisites: NSCI 4630 (may be taken concurrently) or NSCI 4112 (may be taken concurrently).
Mutually Exclusive: .

NSCI 4080. Pharmacological Chemistry. (3 Credits)
This course presents the chemistry of molecular recognition between drugs and their targets (receptors, ion-channels, enzymes and nucleic acids) and how this information is used to design new drugs with specific biological functions. In addition to traditional theories of structure and function in drug design, the course will include the most recent research publications in nanoparticle drug delivery, pharmacogenetics (the study of genetic factors and gene-environment interactions that influence drug delivery, bio-availability, metabolism, clearance, and toxicity) and innovative methods for treating cancer. Ethical considerations of the use and misuse of drugs will also be addressed.
Prerequisites: NSCI 3122 and (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or (HPLC 1604).

NSCI 4081. Neurochemistry. (3 Credits)
This course explores the function of the nervous system on the chemical level, with emphasis on the structure and function of the neurotransmitters and their receptors and psychoactive drugs of use and abuse.
Attribute: NECM.
Prerequisites: NSCI 3122 (may be taken concurrently) and (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or (HPLC 1604).

NSCI 4112. Animal Physiology Lecture. (3 Credits)
Covers processes by which homeostasis is maintained, particularly in humans, including basic cell properties; development of biopotentials; the integrating systems (nerve, muscle, and endocrine); and the functional systems (cardiovascular, respiratory, digestive, reproductive, and excretory). Formerly NSCI 4012 or 4022.
Attributes: ENSE, ENVVS, NECM, NEUR.
Prerequisites: (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or (HPLC 1604) and (NSCI 1322 and NSCI 1332) or (HPLC 1604 and NSCI 1322 and NSCI 1332).
Mutually Exclusive: NSCI 4012, NSCI 4022.

NSCI 4143. Advanced Microbiology Lecture. (3 Credits)
(Formerly NSCI 4043.) Study of structural and functional characteristics of bacteria, fungi, viruses, and unicellular and multicellular eukaryotic animal parasites. Topics will include cell structure, physiological pathways, microbial genetics, disease mechanisms, and ecology. Laboratory experiments will acquaint students with techniques of isolation, culture, and identification of organisms from soil, water, food, and air; bacterial genetics and ecology.
Attributes: ENSE, ENVVS.
Prerequisites: HPLC 1604 or (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) and (NSCI 1322).
Corequisite: NSCI 4843.
Mutually Exclusive: NSCI 4043.

NSCI 4144. Microanatomy Lecture. (3 Credits)
(Formerly NSCI 4044.) Microscopic anatomy of mammalian cells and tissues. Theoretical analysis and practical techniques illustrate the interrelationships of structure and function in tissues and organs. Spring, odd years.
Attributes: NECM, NEUR.
Prerequisites: (NSCI 1404 and NSCI 1414) or (HPLC 1604).
Corequisite: NSCI 4844.
Mutually Exclusive: NSCI 4044.
**NSCI 4153. Biological Chemistry Lecture. (3 Credits)**

An introduction to the chemistry of biological molecules (carbohydrates, proteins, polynucleic acid and their constituents, and lipids), emphasizing their biosynthesis and role as biostructural building blocks. Other specialized topics to be covered include enzyme kinetics, mechanism and regulation; energy conversion and dynamics. (Every fall)

**Attributes:** ENSE, ENVs, NECM, NEUR.

**Prerequisites:** NSCI 3031 or NSCI 3122.

**Mutually Exclusive:** CHEM 4221.

**NSCI 4172. Diverse Biologies/Shared Humanity. (4 Credits)**

This course draws on readings and approaches from biology and literary studies to gain understanding of the diversity of human experience. Students will study the biological (genetic, metabolic, developmental, and neuronal) factors contributing to differences in human behavior, cognition, ability/disability, and appearance. Through the study of first-person narratives, poems, and other texts (including film), students will gain insight into the lived experiences of people they might not otherwise have come to know, even as they deepen their appreciation of the interdependence of self and other. Through reflection on readings in literature and science, students will come to recognize more fully what these disciplinary approaches offer to understanding our place in the world and our responsibilities to one another.

**Attributes:** BEHR, BESN, BIOE, COLI, DISA, ENGL, ICC, PLUR.

**Prerequisites:** (ENGL 2000 or COLI 2000 or CLAS 2000 or MLAL 2000 or HPLC 1201 or HPRH 1001) and (NSCI 1030 or NSCI 1051 or NSCI 1322 or NSCI 1404 or NSCI 1424 or NSCI 1502 or NSCI 1702 or HPLC 1604).

**NSCI 4176. Molecular Biology Lecture. (3 Credits)**

(Formerly NSCI 4076.) This course covers the biology of the gene, including regulation and mechanism of replication, transcription and translation as well as principles of genetic engineering. The course emphasizes interpretation and analysis of experiments. The laboratory focuses on analysis and manipulation of DNA and RNA. (Spring, odd years). Completion of NSCI 3133 or NSCI 4143 are recommended along with required courses.

**Attributes:** NECM, NEUR.

**Prerequisites:** NSCI 3122 and (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or (HPLC 1604).

**Corequisite:** NSCI 4876.

**Mutually Exclusive:** BISC 3752, NSCI 4076.

**NSCI 4222. Science, Technology, and Society Values. (4 Credits)**

This course serves as a capstone seminar for senior natural science majors. Students will explore original literature, the relationship of the natural sciences to other disciplines, and ethical considerations in the sciences. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**Attributes:** ENVS, EPLE.

**NSCI 4630. Neuroscience. (3 Credits)**

The goal of this course is to provide students majoring in integrative neuroscience or in natural sciences with a sophisticated understanding of neuroscience. The topics covered in the first half of the course focus on fundamental properties of neurons, including intrinsic biophysical properties, synaptic transmission, neurogenetics, and anatomical organization. This knowledge is essential and serves as a foundation for more complex topics in the second half, such as understanding of all sensory systems, circadian rhythms, behavior, and learning and memory. We use several neuroscience texts as well as recently published science literature. Concurrent enrollment in NSCI 4032 (Neurobiology Laboratory) is strongly recommended.

**Attribute:** NEUR.

**Prerequisites:** NSCI 1322 and (NSCI 1404 and NSCI 1414) or (NSCI 1424 and NSCI 1434) or (HPLC 1604).

**Mutually Exclusive:** BISC 4532.

**NSCI 4812. Animal Physiology Lab. (2 Credits)**

(Formerly part of NSCI 4012.) Optional lab for NSCI 4112 Animal Physiology or NSCI 4630 Neuroscience. This course provides hands-on experience that reinforces theoretical knowledge of human and animal physiology, including circuits, intrinsic properties of neurons, synaptic communication, cardiac function, muscle function, lung function, and human brain activity. We use electrophysiological methods to record physiological activity, including: synaptic activity from invertebrate neurons, muscle function in invertebrates and humans, lung function and humans. Lab fee.

**Corequisite:** NSCI 4112.

**Mutually Exclusive:**

**NSCI 4843. Advanced Microbiology Lab. (2 Credits)**

(Formerly part of NSCI 4043.) Lab for NSCI 4143, required. Lab fee.

**Corequisite:** NSCI 4143.

**NSCI 4844. Microanatomy Lab. (2 Credits)**

(Formerly part of NSCI 4044.) Lab for NSCI 4144, required. Lab fee.

**Corequisite:** NSCI 4144.

**NSCI 4853. Biological Chemistry Lab. (2 Credits)**

(Formerly NSCI 4065.) A one-semester laboratory course to familiarize advanced students with the research techniques applied to proteins and nucleic acids. Included are subcellular fractionation, spectrophotometry, gel electrophoresis, centrifugation, and column chromatography. Lab fee. (Every semester) Prerequisites: NSCI 3031 or NSCI 3122; corequisite NSCI 4153 or NSCI 4065.

**Prerequisites:** (NSCI 3031 or NSCI 3122) and NSCI 4153 (may be taken concurrently).

**Mutually Exclusive:** CHEM 4231.

**NSCI 4876. Molecular Biology Lab. (2 Credits)**

(Formerly part of NSCI 4076.) Lab for NSCI 4176, required. Lab fee.

**Corequisite:** NSCI 4176.

**NSCI 4999. Tutorial. (1 to 4 Credits)**

A laboratory project under faculty supervision is an integral component of the course. One course may be counted as a laboratory elective in the major. (Every semester).
NAVY 1100. Naval Laboratory I. (0 Credits)
Midshipmen are provided the opportunity in laboratory to develop personally while participating in activities as a team leader or team member. Naval Science Laboratories are a blend of academic lectures on naval theory and naval administration and practical training in physical readiness, military discipline, and an appreciation of the customs and traditions of the Naval Service. All NROTC midshipmen, STA-21 and MECEP students are required to attend.

NAVY 1101. Introduction to Naval Science. (3 Credits)
This course introduces students to the naval profession and to concepts of sea power, emphasizing the mission and organization of the Navy and Marine Corps. Included is an overview of officer and enlisted ranks and rates, training, education, and career patterns. The course also covers naval courtesy and customs, leadership, and nomenclature, and it exposes students to the professional competencies. First-year students, fall semester.

NAVY 1102. History of Sea Power. (3 Credits)
A study of the U.S. Navy and the influence of sea power on history. This course incorporates both a historical and political science process to explore the major events, attitudes, personalities, and circumstances that have imbed the U.S. Navy with its proud history and rich tradition. It deals with issues of national imperative in peacetime as well as war; varying maritime philosophies which were interpreted into naval strategies and doctrines; budgetary concerns which shaped force realities; and the pursuit of American diplomatic objectives, concluding with the current search for direction in the post-Cold War era. Substitutes for sophomore history requirement. Required of all NROTC scholarship and college program midshipmen. First year, spring semester.

NAVY 2200. Naval Laboratory II. (0 Credits)
Midshipmen are provided the opportunity in laboratory to develop personally while participating in activities as a team leader or team member. Naval Science Laboratories are a blend of academic lectures on naval theory and naval administration and practical training in physical readiness, military discipline, and an appreciation of the customs and traditions of the Naval Service. All NROTC midshipmen, STA-21 and MECEP students are required to attend.

NAVY 2201. Naval Leadership I. (2 Credits)
A comprehensive study of organizational behavior and management in the context of the naval organization. Senior year, fall semester, for Navy Option midshipmen. (Maritime NVSC 401.) Degree credit through CBA.

NAVY 2204. Navigation and Naval Operation I. (3 Credits)
Piloting and celestial navigation including theory, principles, procedures, the use of charts, visual and electronic aids, and the theory and operation of magnetic and gyro compasses. Celestial navigation is covered in depth. Practical skills are developed. Topics include tides, currents, effects of wind and weather, plotting, use of navigation system, and day's work in navigation. Required of all Navy Option NROTC midshipmen. Sophomore year, spring semester. Degree credit through CBA. (Maritime NVSC 211).

NAVY 3300. Naval Laboratory III. (0 Credits)
Midshipmen are provided the opportunity in laboratory to develop personally while participating in activities as a team leader or team member. Naval Science Laboratories are a blend of academic lectures on naval theory and naval administration and practical training in physical readiness, military discipline, and an appreciation of the customs and traditions of the Naval Service. All NROTC midshipmen, STA-21 and MECEP students are required to attend.

NAVY 3303. Naval Ship Sys I (Engineering). (3 Credits)
A study of ship characteristics and types, including ship design, hydrodynamic forces, stability, compartmentation, propulsion, electrical and auxiliary systems, interior communications, ship control, and damage control; theory and design of steam, gas turbine, and nuclear propulsion; shipboard safety, and firefighting. Required of all NROTC midshipmen. Junior year, fall semester.

NAVY 3304. Naval Weapons Systems. (3 Credits)
Modern naval weapons, attention is given to airborne, surface systems. The facets of command, control, integration. Required of all Navy Option, CBA. (Maritime NYSC 303)

NAVY 3305. Naval Operations & Seamanship. (3 Credits)
A continued study of relative motion, formation tactics, and ship employment. Introductions to naval operations and operations analysis, ship behavior and characteristics in maneuvering, applied aspects of ship handling, afloat communications, naval command and control, naval warfare areas, and joint warfare are also included. The course is supplemented with a review/analysis of case studies involving moral/ethical/leadership issues pertaining to the concepts listed above. Designed for seniors in the NROTC program, fall semester.

NAVY 3311. Evolution of Warfare. (3 Credits)
History of warfare, focusing on the impact of major military theorists, strategies, tacticians, and technological development. Required of all Marine Option NROTC midshipmen and MECEP students. Junior year, fall semester. (Maritime NVSC 311)

NAVY 3312. Amphibious Warfare. (3 Credits)
History of amphibious doctrine and the conduct of amphibious operations. Emphasis is on the 20th century, especially World War II. Present-day potential and limitations of amphibious operations, including the rapid deployment force concept, are explored. Required of all Marine Option NROTC midshipmen and MECEP students. Junior year, spring semester. Degree credit through GSB.

NAVY 4400. Naval Laboratory IV. (0 Credits)
Midshipmen are provided the opportunity in laboratory to develop personally while participating in activities as a team leader or team member. Naval Science Laboratories are a blend of academic lectures on naval theory and naval administration and practical training in physical readiness, military discipline, and an appreciation of the customs and traditions of the Naval Service. All NROTC midshipmen, STA-21 and MECEP students are required to attend.

NAVY 4402. Naval Leadership II. (3 Credits)
The study of naval junior officer responsibilities in naval administration. This capstone course in the NROTC curriculum builds on and integrates the professional competencies developed in prior coursework and professional training. Required of all NROTC midshipmen, STA-21, and MECEP students. Senior year, spring semester. Degree credit through GSB.

NAVY 4403. Navigation and Naval Operations II. (3 Credits)
A study of the international and inland rules of the nautical road, relative motion vector analysis theory, relative motion problems, formation tactics, and ship employment. Also included are an introduction to naval operations analysis, ship behavior and characteristics in maneuvering, applied aspects of ship handling, and afloat communications. Required of all Navy Option NROTC midshipmen. Senior year, fall semester.
New Media and Digital Design (NMDD)

NMDD 1001. Explore New Media and Digital Design. (3 Credits)
This course critically explores notable histories, geographies and practices of digital design. Students will gain an understanding of fundamentals of contemporary design paradigms, internet architecture and governance and the politics of designing media that operates at intimate, local and global scales.

NMDD 1800. Internship. (1 Credit)
NMDD 1999. Tutorial. (1 Credit)
NMDD 2999. Tutorial. (2 Credits)
NMDD 3020. Explorations in Digital Storytelling. (4 Credits)
This class explores storytelling in emerging platforms. From the still image and the soundscape, we will evolve to discuss digital filmmaking, game design and interactive web narratives. Integrated workshops in cinematography, sound and video editing, and other storytelling technologies will enable students to create story projects of their own. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCMS, COMC, COMM, CVW, NMAT.

NMDD 3150. Creative Coding. (4 Credits)
This course will develop programming skills used in the digital humanities, all in the context of critical and cultural media studies. Students will learn basic coding concepts such as variables, loops, graphics, and analyzing sound data, and will connect them to current debates in the culture of coding. No previous coding experience is required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: DTEM.

NMDD 3308. Professional Social Media. (4 Credits)
This course explores the landscape of social media in applied, professional contexts. Through case studies across industries, it explores professional social media work and develops knowledge fundamentals for digital professionals, including effective writing for social media, strategies for engagement, community management, and professional measurement and reporting. The goal of this course is to teach you how to 'be social', and to provide you with the social media tools you need to pursue a communications career in the digital age. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCMS, COMC, COMM, DTEM, JOUR, NMAC, NMAT.

NMDD 3338. Digital Strategy for Cause Marketing. (4 Credits)
This course provides a comprehensive overview of the current landscape of digital cause marketing. Students will have a chance to explore the variety of tools, best practices and strategies commonly found in the industry while taking a deep dive into case studies of digital content marketing for social causes in action. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAC, NMMI.

NMDD 3450. User Experience Design: Design for Empowerment. (4 Credits)
This course focuses on how human-centered design and participatory design methods can be used as approaches to empowerment. Students will gain a hands-on experience with conducting user research, synthesizing findings into insights, ideating, sketching, rapid prototyping, and validating concepts with users. Course reading, discussions, and activities will be organized into a user-experience project to help students get out and interact with real users, needs, and challenges.
Attributes: DTEM, NMAC, NMAT, NMMI.

NMDD 3880. Designing Smart Cities. (4 Credits)
“Smart Cities” represents the rapid integration of digital media and communication networks into all modes of urban living and the reorientation of urban economies toward digital industries. This course takes a community-engaged learning approach that combines an introduction to smart urbanism with a collaborative research and design project. Coursework involves partnering with the Lincoln Square Neighborhood Center to conduct a digital needs assessment and design digital interventions that prioritize access, empathy, and participation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, CCUS, COMC, COMM, DTEM, DTMM, JOUR, NMAC, NMAT, NMMI, SL, URST.

NMDD 3890. Data Visualization and Representation. (4 Credits)
The word ‘data’ is everywhere these days, mostly in reference to just how much of it we are generating at all times. But once we have this data, how can we create tools that enable us to better understand exactly what it means? This class explores the world of data visualization and representation. We will look at a wide variety of examples, including charts and infographics, interactive and web-based projects, and abstract, sculptural, or more artistic works. Students will examine and evaluate a variety of different forms of information design and they will create their own, using the fundamentals of computer programming. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: DTEM.

NMDD 3900. Internship Seminar. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
NMDD 3999. Tutorial. (3 Credits)
NMDD 4600. Senior Capstone Seminar. (4 Credits)
A seminar and hands-on working group for senior capstone projects in the New Media and Digital Design program Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: NMDD 1001.

NMDD 4800. Internship. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
NMDD 4999. Tutorial. (4 Credits)
Operations (Graduate) (OPGB)

OPGB 6627. Operations Management. (3 Credits)
MBA FLEX CORE COURSE. Studies the operations of both manufacturing and service organizations with the objective of simultaneously optimizing the quality and productivity of the operations systems. Develops techniques for strategic planning and system design, such as quality control, aggregate and capacity planning, project planning, scheduling and control, material and inventory management and just-in-time production.
Attributes: BUAN, ISEL.

OPGB 76AA. Transnational Mgt&Sys Oper. (3 Credits)
The operations function for both manufacturing and service organizations is studied with the objective of the simultaneous optimization of the quality and productivity of the operating systems. Techniques for strategic planning and system design.

OPGB 76AP. Project Management. (3 Credits)
Provides the skills project managers need to complete projects on time and on budget. Technology improvements in organizations are implemented through projects, and strong project management skills are a key success factor from companies to achieve the expected benefits from their technology investments. Topics include setting and maintaining project scope, developing work plans, estimating required resources, developing work programs, organizing project teams, super-users, monitoring and controlling projects, maintaining relationships with users and management, status reporting, and key factors for realizing the anticipated benefits from the investment. Students use a computer-based project management tool as part of this course.

OPGB 76BB. Studies in Quality Management. (3 Credits)

OPGB 76BR. Health Care Operations Mgt. (3 Credits)
Health Care Operations Management is a discipline that integrates scientific principles of operations management to determine the most effective and efficient methods to support patient care delivery. The biggest challenge in health care is to provide high quality care while at the same time keeping cost down. As such, all health care sectors must be driven by process management, quality improvement, information technology, knowledge management, and resource alignment. This course addresses the challenge in many ways, from the design of patient flow to streamlined process, from resource management to supply chain management, from quality control to patient safety, from forecasting to capacity planning, from continuous improvement to project management.
Attributes: OCGT, PRQU.

OPGB 76CA. Transnational Mgt&Sys Oper. (3 Credits)
Prerequisites: MGBU 2142 or HPCB 4703 or ECON 2142 or SABU 2142.

OPBU 3438. Operations and Production Management. (3 Credits)
The operations function within an organization is responsible for managing the process flow that an organization has to use to produce a product, deliver a service, or both. Operations managers are responsible for the design, the daily operation, and the improvement of these processes. This course provides an introduction to the field of operations management: to understand the key decisions and to see how these decisions directly impact an organization's competitiveness and market performance.
Prerequisites: MGBU 2142 or HPCB 4703 or ECON 2142 or SABU 2142.

OPBU 3442. ST: Health Care Operations Mgt. (3 Credits)
Health Care Operations Management is a discipline that integrates scientific principles of operations management to determine the most effective and efficient methods to support patient care delivery. The biggest challenge in health care is to provide high quality care while at the same time keeping cost down. As such, all health care sectors must be driven by process management, quality improvement, information technology, knowledge management, and resource alignment. This course addresses the challenge in many ways, from the design of patient flow to streamlined process, from resource management to supply chain management, from quality control to patient safety, from forecasting to capacity planning, from continuous improvement to project management.
Attributes: OCGT, PRQU.

OPBU 3449. ST: Process Mgt & Six Sigma. (3 Credits)
This course focuses on process management and how to improve organizational processes by using a body of knowledge known as Six Sigma. A process is the unity of multiple activities that transform required inputs into desired outputs. Poorly-designed processes produce defective goods and services that lead to customer dissatisfaction and a higher level of internal and external failure cost. Therefore, continually improving process performance is critical to organizations' survival and success. Class lectures, discussions, and case studies in the course cover the methods and tools used for a Six Sigma project, such as project selection, process mapping and analysis, data collection, statistical data analysis, root-cause analysis, and creative thinking for both continual and breakthrough improvements.

OPBU 3451. ST: Team Dynamics. (3 Credits)
This course is designed to help students understand team dynamics, be a more productive team member, build teams, lead teams, and address team challenges. Through a combination of lectures and team-based activities, students will learn about concepts such as team design, team performance, team identity, decision making, conflict in teams, creativity, leadership, and diversity in teams.
Attributes: OCMG, OPMA.

OPBU 3453. ST: Business Dynamics. (3 Credits)
The course introduces the modeling process that world-class firms use for improving collegial learning and performance. Role-playing games and simulation models and cases challenge participants' critical thinking about business transformations. Using the iThink and Vensis software, course participants capture their perceptions of decision situations in very-user-friendly models, and generate new insight into how business enterprises adapt to the new transnational realities, through the co-alignment of competitive and collective tactics.
ORGL 2200. Theories of Leadership, Context and Change. (4 Credits)
Designed to provide a context for the beginning student in the Organizational Leadership major, this course presents a range of theoretical perspectives and a common vocabulary for discussing leadership. It includes an analysis of historical concepts and contemporary theories, focusing on the idea of leadership and the contributions of several disciplines to our understanding of it. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 2100. Information Systems and Technology. (3 Credits)
This course introduces computer terminology, hardware, and software related to the business environment. The focus of this course is on business productivity software applications and professional behavior in computing, the use of software to support decision-making and to enhance productivity. The course will emphasize the importance of the ethical use of technology and how technology can both advance and hinder organizational growth.

ORGL 2200. Transforming Managers into Inspired Leaders. (4 Credits)
This course will take an integrative view of the organization’s transformation, detailing which capabilities are most critical to success while providing key references to what defines the roles of leaders and how managers can acquire and develop leadership skills. There will be a focus on how managers are able to creatively innovate, inspire, and engage people to adapt to fast-paced transformation and minimize the risk of failure. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 2210. Ethical Decision Making for Leadership. (3 Credits)
Focuses on basic ethical viewpoints as a foundation and examines specific characteristics of business life through cases and examples. The fact that there is not one universal set of behaviors one considers ethical and no guidelines to follow to determine ethical behavior poses unique challenges to contemporary leaders. Yet, leaders are faced with situations where individual values may conflict with those of teams or organizations. Topics include professional responsibility and loyalty, conflict of interest, and employee rights, personal integrity and critical thinking in decision making.

ORGL 2300. Issues in Human Resource Management. (4 Credits)
An overview of current issues in human resource management in organizations. Topics include: career development, recruitment, retention, training, interviewing, performance appraisal and improvement, employee relation, technology, legal issues, compensation, motivation, ethics, work-life balance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 2400. The Legal Environment of Business. (3 Credits)
The course provides the student with foundational information about the U.S. legal system and dispute resolution, and their impact on business. The major content areas will include general principles of law, the relationship of business and the U.S. Constitution, state and federal legal systems, the relationship between law and ethics, contracts, sales, torts, agency law, intellectual property, and business law in the global context. Emphasis will be placed on how law impacts decision-making and leadership strategies.

ORGL 2500. Change Management and Organizational Culture. (4 Credits)
This course will explore individual and group behavior in organizations. Scholarly perspectives, theoretical frameworks, practitioner methods, and measurement instruments within the field of organizational behavior and change management will be presented. Academic content and skills exercises emphasize the social, psychological, and cultural dynamics and practices influencing individual and group behavior. Key focus areas of the course include theories of organizational behavior, cultural change models, and the leader’s role in assessing, facilitating, and achieving change. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 2600. Mediation, Negotiation, Alternative Dispute Resolution. (4 Credits)
A review of the history principles and practices of ADR (Alternative Dispute Resolution)—including mediation, negotiation, arbitration, conflict resolution—increasingly used in all areas of society (Law, Business, Family). Combines lectures and exercises. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 2610. Applied Organizational Behavior and Leadership. (4 Credits)
This course is designed for students to understand and apply major theories and research in industrial psychology for use in organizational settings. The course provides an overview of individual, group, and organizational issues related to relationships and performance. The purpose of the course is for students to discover how behavioral and psychological concepts can be applied in business and careers. The course prepares students for leadership positions in business and nonprofit organizations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
ORGL 2700. Organizational Communication. (4 Credits)
A hands-on review of communication theory and practice in organizations, including writing, oral presentations, and up-down/across communications. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 2701. Business Communications in Leadership. (3 Credits)
Business Communication is designed to facilitate students’ understanding of crucial communication principles and to develop effective writing skills. This course provides opportunities to analyze complex issues, organize thought logically, and communicate these complex ideas concisely. The core purpose of this course is to develop expertise in the theories and practices that will enable you to become an effective communicator in professional settings.

ORGL 2702. Interpersonal Communication. (4 Credits)
This course is designed to explore the field of ideas relating to human modes of communication and personal relationships in the shaping of our social environment and in formulating leadership styles. This course focuses not on developing a particular set of “skills” (communication competence), but to explore the overarching structures that influence interpersonal interaction and investigate research on some of the major topics of interpersonal communication. Students will explore such topics as the development of the self-concept, perception, language, nonverbal communication, and conflict management.

ORGL 2703. Digital and Social Media Marketing Communication in Leadership. (4 Credits)
Social media represents a new class of communication platforms that have become quickly interwoven into society. The course will examine various applications and strategies for communicating through social media, including managing personal and professional social media messages, social media content development and dissemination, and the importance of social media to business. The intention is to broaden perspectives, and to approach SMM from a communication strategist's standpoint. Students will begin to appreciate the true value of digital and social media to consumers, to managers, and to other corporate stakeholders.

ORGL 2704. Interpersonal Behavior within Organizations. (4 Credits)
This course in interpersonal behavior is designed to give you exposure to essential concepts for analyzing, understanding, and managing human behavior in organizations and the behavioral influences which affect productivity, organizational effectiveness, and efficiency. The course will tie concrete organizational situations to effective management practices. The course will investigate: individual behavior in organizations, including personality, decision-making, and ethics and the impact on the organization; interpersonal behavior, including teamwork, conflict, leadership, social networks, and power and influence; and organizational factors affecting behavior, including reward systems, culture, and organizational design. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 2800. U.N. and Political Leadership. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 2900. Entrepreneurship. (4 Credits)
A hands-on overview of entrepreneurship today—its history, role in society, theory, and practice. Topics include developing a business plan, market analysis, value position, exit strategy, entrepreneurs, and managing creativity in organizations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 3000. Leading with Emotional Intelligence. (4 Credits)
Leading with emotional intelligence is the capacity for effectively recognizing and managing our own emotions and those of others. It is self-awareness and self-management, social awareness, and social management and other items. The course relates IQ to organizational effectiveness and personal success. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 3100. Strategic Leadership, Development & Diversity. (4 Credits)
The course will focus on developing the cross-cultural competence you need to lead effectively in the modern collaboration-powered global marketplace – one that is more diverse than ever before on multiple dimensions. This course is designed to provide leaders with evidence-based insights, as well as proven individual, interpersonal, enterprise level strategies to successfully harness the power of diversity and inclusion in teams, organizations, markets, and societies.

ORGL 3120. Leading Innovation: Strategies for Growth. (4 Credits)
In this course, students will gain a deeper understanding of why companies need exceptional leaders who can manage both exploiting established businesses and exploring innovative products and services. Through concrete examples, students will learn how to bring products to the right markets in a timely and efficient manner. They will be able to reflect on their own personal development and leadership skills. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisite: ORGL 2000.

ORGL 3200. Special Topics Seminar. (4 Credits)
This course will comprise distinct content models that relate to leadership and/or organizational behavior. The selected topics will address contemporary issues in organizational leadership. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 4000. Leadership Concepts and Cases. (4 Credits)
This course combines historical examples with vision into the future of organizational development to identify the qualities and responsibilities that will dramatically redefine and improve leadership performance in today's rapidly changing world of work. This course, through case study analysis, will help students identify and understand fundamental shifts in leadership development shifts that are essential if organizations are to grow and prosper. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 4800. Internship. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

ORGL 4999. Leadership Tutorial. (1 to 5 Credits)
Pastoral Counseling (PCGR)

PCGR 6310. Human Growth and Development. (3 Credits)
This course will explore the development from birth and adolescence through the tasks and crisis of middle and later life. Stage theories, cognitive, social and emotional development will be the focus of this course. Special consideration will be given to spiritual life issues throughout the development process.

PCGR 6380. Theology of Pastoral Counseling and Spiritual Care. (3 Credits)
This course addresses contemporary psychological and spiritual issues in the field of pastoral care and counseling, including addiction, trauma, and anxiety, and proposes a theological method for reflecting on them. Attribute: CSGE.

PCGR 6382. Social and Cultural Foundations of Pastoral Counseling. (3 Credits)
This course explores the social and cultural foundations of counseling twofold: the foundations of mental health counseling and the foundations of multicultural counseling. Specific focus is given to counseling individuals, couples, and families from diverse groups and populations.

PCGR 6384. Professional Ethics in Pastoral Counseling. (3 Credits)
An exploration of critical issues in the ethical practice of counseling and psychotherapy, this course addresses the roles and responsibilities of the professional counselor. Using case studies and small group work, students will explore potential ethical conflicts and methods of ethical reasoning, as students develop skills to work through ethical conflicts in the counseling setting.

PCGR 6386. Pastoral Counseling Theory. (3 Credits)
This course explores the major theories of counseling, including psychodynamic, cognitive, and family systems. Special consideration is given to the application of theoretical models to clinical practice, and by extension their application to pastoral and spiritual care.

PCGR 6390. Psychopathology & Diagnosis. (3 Credits)
The course will introduce students to the basics of psychopathology and psychological diagnosis for use in clinical and pastoral work. This course is designed to help students cultivate the ability to think critically and creatively, so that they can work from a diagnostic standpoint that is human, flexible, empathetic, and nonjudgmental, with a focus on the real person one meets in the consulting room or ministry setting. Within this framework, the course will cover interviewing and assessment skills, DSM-5 categories, ethical considerations, character/personality issues, and pastoral assessment. Case studies will be used to practice the art of diagnostic formulation, with an eye toward treatment planning and case formulation.

PCGR 6410. Psychology and Religion/Spirituality. (3 Credits)
This course explores spirituality, faith, and religious experience from a psychodynamic viewpoint. The theories of Freud, Jung, Winnicott, and contemporary relational writers are engaged in order to explore how our psychology affects our religious lives and vice versa. The class addresses issues of fantasy, God images, play, religion and the body, and “healthy” and “unhealthy” uses of religion. Using text, experiential exercises, and critical reflection, we will engage our own religious history and traditions, and consider what it means to be a fully alive human being.
Attribute: CSGE.

PCGR 6420. Marriage/Family Therapy. (3 Credits)
A systemic approach to family treatment. A survey of the major contributors to the field, using videotape demonstrations of family sessions. Genograms will be used to explore family-of-origin issues.

PCGR 6440. Pastoral Counseling Skills. (3 Credits)
This course provides an introduction to the basic skills of effective helping. A focus on presence, empathy, compassion, and self-awareness forms the foundation for learning specific skills directed toward fostering exploration, insight, and action in the helping relationship. The course includes both discussion and small-group live practice, and is suitable for any student who works closely with people in a helping capacity.

PCGR 6510. Advanced Life Span Issues and Career Counseling. (3 Credits)
This course explores the advanced lifespan issues of adulthood through the lens of clinical practice and pastoral/spiritual care. Specific focus will be given to issues of career, vocation, and social justice advocacy.

PCGR 7330. Assessment and Appraisal of Individuals, Couples, and Families. (3 Credits)
This course provides students with an overview of the assessment and appraisal process as it relates to Masters-level counseling students seeking licensure as a professional counselor. Students will be introduced to the foundational history of assessment, overall assessment principles, and the properties of reliability and validity as they relate to the validation of psychological test instruments. Both standardized and nonstandardized assessment instruments will be reviewed with attention paid to how they can be integrated successfully into counseling sessions. Ethical and legal considerations will be addressed, and the use of assessments with diverse populations will be discussed.

PCGR 7410. Research Methods in Pastoral Counseling. (3 Credits)
This course will be a review of research in pastoral counseling. It will introduce basic concepts and methods of quantitative and qualitative research, consider ways of studying change as a result of counseling interventions and programs, and familiarize students with basic skills in evaluating research literature.

PCGR 7420. Death, Dying, and Bereavement. (3 Credits)
This course will focus on personal experiences with death and loss; the theological perspectives of major world religions on death and grief; myths about and components of grief; meaning making; issues facing the terminally ill; appropriate care for the bereaved in differing situations; and our own self-care as pastoral care workers and pastoral mental health counselors.

PCGR 7422. Group Process: Theory and Techniques. (3 Credits)
This course emphasizes a science-practitioner model of group counseling that includes an experiential and didactic introduction to the group process, theory, and techniques. The experiential component of the group process will include modeling facilitation, structured exercises, and debriefing of immediate experiences. The didactic component of the course will include discussions of readings, lectures, videos, and presentations. This course is not available for audit.

PCGR 7450. Trauma: Counseling and Ministry Issues. (3 Credits)
An introduction to trauma theory and care issues to enhance the practices of counseling, pastoral care, and ministry. This course includes neuro-psychological, psychodynamic, and relational approaches to trauma-informed work, integrates theological and spiritual perspectives.
PCGR 7471. Clinical Instruction and Integration Process I. (3 Credits)
This course is designed to accompany the Field Placement for students in the Clinical Pastoral Counseling 60-Credit Program. Students will engage current approaches to counseling and psychotherapy in dialogue with their own clinical work. Classes will focus on the presentation of students’ clinical work in connection with relevant topics in the clinical literature, addressing such matters as transferece and countertransference, addictions treatment, spiritual issues, and working with trauma. The aim of the course is to integrate previous classroom work and clinical experience, so that students are prepared to begin work as professional counselors and therapists.

PCGR 7472. Clinical Instruction and Integration Process II. (3 Credits)
This continuation course is designed to accompany the field placement for students in the clinical pastoral counseling 60 Credit Program.
Prerequisite: PCGR 7471.

PCGR 8999. Tutorial. (0 to 6 Credits)

Pastoral Ministry (PMGR)

PMGR 6610. Theology of Ministry. (3 Credits)
This course treats ministry as a culturally complex and theologically significant practice. Starting from contemporary concerns, we ask where ministry comes from, what it can be today, and where it might go. We focus on developing responsible and relevant accounts of ministry that enrich practice today.

PMGR 6612. Ministry with Latinxs. (3 Credits)
This course presents a comprehensive introduction to the principal issues related to U.S. Latinx Christianities from an ecumenical perspective. The course is divided into three parts: The Landscape of Latinxs in the U.S., Latinxs and the Churches, and Hispanic Ministries. Among the topics covered are: the history of the principal Latinx groups in the U.S. (Mexicans, Puerto Ricans, Cubans, Dominicans, and Central Americans), the churches’ responses to Latinxs, parish ministry, youth ministry, the sacraments, popular religiosity, and an introduction to U.S. Latinx/Hispanic theology.

PMGR 6613. U.S. Latinx Theology. (3 Credits)
This course presents an introduction to the theological output of U.S. Latinx theologians from an ecumenical perspective. We begin with an overview of U.S. Latinx theology as a contextual theology and then proceed topically, looking at U.S. Latinx Catholic theology, U.S. Latina feminist theology, and U.S. Latinx Protestant theology.

PMGR 6616. Latinx Preaching. (3 Credits)
A practicum in preaching to Latinx congregations with review of the pertinent literature on different preaching styles and Latinx audiences. Facility in Spanish required.

PMGR 6617. Latinx Spirituality. (3 Credits)
This course presents an introduction to the way Latinxs live out their relationship to God or their faith in God or spirituality. While the focus of the course will be on Latinx Christian spirituality—both Catholic and Protestant—attention will also be paid to non-Christian Latinx spiritualities, especially Santería. We begin with an overview of the variety of spiritualities practiced by Latinxs and then proceed topically looking at popular Catholicism, the Latinx celebration of the sacraments, Marian devotion (especially to Our Lady of Guadalupe), New Ecclesial Movements (especially the Charismatic Renewal and the Neo-Catechumenal Way), Mainline Latinx Protestant spirituality, and Latinx Pentecostalism.
Attribute: CSGE.

PMGR 6618. Hisp Family Ministry & Catechesis. (3 Credits)
Latinxs are deeply religious, and their way of experiencing God and life is often different from that of the U.S. mainstream culture. This course will study the lived reality of U.S. Hispanic families. It will challenge participants to critically reflect, analyze, and articulate in what ways family ministry and family catechesis is embodied in families and faith communities today; to explore what helps or hinders religious development within families, and the responsibility of church and society to foster growth in faith; to explore experientially based frameworks for ministering with Latinx communities; and to nuance their role as religious educators. Our conversation partners will include the writings of U.S. Hispanic theologians and religious educators.

PMGR 6650. Ethics in Pastoral Ministry. (3 Credits)
Ethics in Pastoral Ministry is an online course that addresses ethical conduct in ministry for professionals working in a supervisory or leadership capacity with emphasis on legal issues and moral decision-making. The course will focus on the formation of conscience as it relates to the self, ministry, and society. It includes case studies and the application of ethical principles to real-life situations as well as the study of theory. It is theoretical, establishing a theological basis for ethical conduct and moral decision-making, and practical, giving students skills and resources to deal with the various issues they may encounter in ministry.

PMGR 7510. Theology of Ministry. (3 Credits)
This course treats ministry as a culturally complex and theologically significant practice. Starting from contemporary concerns, we ask where ministry comes from, what it can be today, and where it might go. We focus on developing responsible and relevant accounts of ministry that enrich practice today.

PMGR 7616. Latinx Preaching. (3 Credits)
A practicum in preaching to Latinx congregations with review of the pertinent literature on different preaching styles and Latinx audiences. Facility in Spanish required.

PMGR 7617. Latinx Spirituality. (3 Credits)
This course presents an introduction to the way Latinxs live out their relationship to God or their faith in God or spirituality. While the focus of the course will be on Latinx Christian spirituality—both Catholic and Protestant—attention will also be paid to non-Christian Latinx spiritualities, especially Santería. We begin with an overview of the variety of spiritualities practiced by Latinxs and then proceed topically looking at popular Catholicism, the Latinx celebration of the sacraments, Marian devotion (especially to Our Lady of Guadalupe), New Ecclesial Movements (especially the Charismatic Renewal and the Neo-Catechumenal Way), Mainline Latinx Protestant spirituality, and Latinx Pentecostalism. This course is for Doctor of Ministry students only and will require doctoral-level participation and additional research/writing elements.

PMGR 7618. Hispanic Family Ministry & Catechesis. (3 Credits)
Latinxs are deeply religious, and their way of experiencing God and life is often different from that of mainstream U.S. culture. This course will study the lived reality of U.S. Hispanic families. It will challenge participants to critically reflect, analyze, and articulate in what ways family ministry and family catechesis is embodied in families and faith communities today; to explore what helps or hinders religious development within families, and the responsibility of church and society to foster growth in faith; to explore experientially based frameworks for ministering with Latinx communities; and to nuance their role as religious educators. Our conversation partners will include the writings of U.S. Hispanic theologians and religious educators. This course is available only to doctoral students.
PMGR 7650. Ethics in Pastoral Ministry. (3 Credits)
Ethics in Pastoral Ministry addresses ethical conduct in ministry for professionals working in a supervisory or leadership capacity with emphasis on moral decision-making. The course will focus on the formation of conscience as it relates to the self, ministry, and society. It includes case studies and the application of ethical principles to real-life situations as well as the study of theory. It is theoretical, establishing a theological basis for ethical conduct and moral decision-making, and practical, giving students skills and resources to deal with the various issues they may encounter in ministry.

PMGR 7688. Spec Topics: Pastoral Studies. (3 Credits)
This is a special topics course in pastoral studies. Each time the course runs it will be focused on a unique and current aspect of ministry. Please see the course book for the term in question to find a description of the course as it will run each time it is given.

PMGR 7712. Ministry with LatinxS. (3 Credits)
This course presents a comprehensive introduction to the principal issues related to U.S. Latinx Christianities from an ecumenical perspective. The course is divided into three parts: The Landscape of Latinxs in the U.S., Latinx and the Churches, and Hispanic Ministries. Among the topics covered are: the history of the principal Latinx groups in the U.S. (Mexicans, Puerto Ricans, Cubans, Dominicans, and Central Americans), the churches’ responses to Latin@s, parish ministry, youth ministry, the sacraments, popular religiosity, and an introduction to U.S. Latinx/Hispanic theology. This course is for Doctor of Ministry students only and will require doctoral level participation and additional research/writing elements.

PMGR 7713. U.S. Latinx Theology. (3 Credits)
This course presents an introduction to the theological output of U.S. Latinx theologians from an ecumenical perspective. We begin with an overview of U.S. Latinx theology as a contextual theology. We then proceed thematically, looking at U.S. Latinx Catholic theology, U.S. Latina feminist theology, and U.S. Latinx Protestant theology. This course is for Doctor of Ministry students only, and it will require doctoral-level participation and additional research/writing elements.

PMGR 8030. Capstone/Pastoral Studies (MA). (3 Credits)
The concluding capstone course for all students in the M.A. Pastoral Studies degree.

PMGR 8530. Evangelization: Faith & Culture. (3 Credits)
This course is a theological exploration that treats evangelization as an important stake in Christian tradition that involves Christian practice with practices of contemporary society. We look continually to the real-world contexts of students and to an intensive consideration of what evangelization entails in a culturally, religiously diverse world.

PMGR 8628. Pastoral and Practical Theology. (3 Credits)
This is a class about the foundations and formations of practice-minded theologies, especially as those theologies inform and enrich the practice of pastoral professionals. Fundamental questions about the relationship between religious tradition and contemporary practice are explored.

PMGR 8632. Research Seminar: Pastoral Theology and Practice. (3 Credits)
This seminar prepares D.Min. students to write their doctoral thesis. We explore some fundamental approaches to conducting research into pastorally significant experience today, so as to deepen students’ research competence and facilitate readiness for conducting ministry-relevant research. Students will generate a sound draft of a proposal for their D.Min. thesis.

PMGR 9999. ST Tutorial-Pastoral Ministry. (3 Credits)
This course is reserved for students pursuing a special research topic in Pastoral Ministry with the approval of the area faculty and Dean.

Peace and Justice Studies (PJST)

PJST 1800. Internship. (1 Credit)
A proctored internship in a peace-focused or justice-focused organization, with approval of program director. This fulfills one of the two experiential learning requirements for the minor.

PJST 3110. Introduction to Peace and Justice. (4 Credits)
This course introduces students a wide variety of theories and applications within the field of Peace and Justice Studies – surveying insights from fields such as political science, international relations, criminal justice, psychology, religion, gender studies, economics, sociology, anthropology, urban studies, the fine arts and others. This class is intended to be interactive and participatory in nature. The course includes readings, lectures, class discussions, games, case studies, role plays, training exercises and simulations; students examine a range of conflict intervention options and are able to evaluate the relative strengths and disadvantages of a variety of skills and techniques. Each week of the class explores a dominant theme and branch of research in this wide and diverse discipline, which provides a foundation for further investigation and engagement in the field. The class builds the capacity analyze and intervene in a variety of conflicts at an interpersonal, organizational, neighborhood, state, national and international level. In particular, students learn how and why various conflict interventions succeed or fail depending on contextual factors. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, ISIN, PJIN.

PJST 3200. Environmental Justice. (4 Credits)
This course focuses on the environmental justice movement in the United States and internationally. Environmental justice is defined as the equitable distribution of environmental burdens and benefits among racial and socioeconomic groups and among developed and developing countries. Issues such as pollution, climate change, biodiversity loss, industrial agriculture, food security, urban sprawl, and public health are treated. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, BESN, BIE, ENMI, ENST, EPLE, ESEJ, ESEL, ESPL, INST, PJEN, POAP, URST.

PJST 4999. Tutorial. (1 to 4 Credits)
Independent research and reading with supervision from a faculty member.

Philosophy (PHIL)

PHIL 0912. Requirement Preparation. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

PHIL 0914. Requirement Preparation in Summer. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).
PHIL 0925. Phd Qualify Papers-Philosophy. (0 Credits)

PHIL 0930. PhD Comprehensive Examination-Philosophy. (0 Credits)

PHIL 0932. Master's Special Project. (3 Credits)
Students in the M.A. program have the option of completing a three-credit special project. Faculty members will evaluate the special project on a Pass/Fail basis.

PHIL 0936. Master's Comprehensive Examination-Philosophy. (0 Credits)

PHIL 0938. Masters Thesis. (6 Credits)
Students in the M.A. program have the option of completing a six-credit thesis. Faculty members will evaluate the thesis on a High Pass/Pass/ Fail basis.

PHIL 0940. Logic Examination. (0 Credits)

PHIL 0950. Proposal Development. (1 Credit)

PHIL 0960. Proposal Acceptance. (3 Credits)

PHIL 0970. Dissertation Mentoring- Philosophy. (0 Credits)
The Philosophy PhD. student is required to register for Dissertation Mentoring, which has a 3 credit fee, the semester after the student's proposal is accepted.

PHIL 1000. Philosophy of Human Nature. (3 Credits)
A philosophical reflection on the central metaphysical and epistemological questions surrounding human nature, which includes discussion of some or all of the following problems: the body/soul distinction and the mind/body problem; the problem of knowledge, (relativism, skepticism, the objectivity of knowledge, faith and reason); free will and determinism; and self and society (subjectivity, personhood, sociality, historicity and tradition). At least 60 percent of each section of the course is devoted to readings from Plato, Aristotle, Augustine or Aquinas, and Descartes. Each section includes some writings by at least one contemporary figure. Selected sections will be offered as Eloquencia Perfecta I seminars.
Attribute: FRPT.

PHIL 1003. Lost Interlocutor: Philosophy of Human Nature. (3 Credits)
This course examines the philosophical views of pre-Socratic thinkers, Plato, Aristotle, Augustine, Aquinas, Descartes, and Ignatius of Loyola and their connections to contemporary science, religion, and Jesuit education. We analyze primary texts, critique theories, compose philosophical arguments, and critically challenge the thinking of multiple perspectives. These skills comprise the greater philosophical tradition that stems from the ancients to us today. Salient themes of our lives —knowledge, understanding, truth, falsity, doubt, goodness, mortality, reality, evidence, belief, love—stir fundamental questions that need systematic investigation in order to make sense of our human nature and give greater purpose to life. Since this Manresa course satisfies the FCRH first year Eloquencia Perfecta I requirement, it stresses critical spoken dialogue and writing-intensive assignments. It also consists of interactive (and fun) out-of-class learning experiences, and the professor even feeds you at most of these. This course satisfies the Philosophy of Human Nature Core requirement for both FCRH and Gabelli students. Attributes: FRPT, MANR, PHFR, SL.

PHIL 1010. Introduction to Critical Thinking. (3 Credits)
The course is intended to sharpen a student’s ability to think clearly, consistently, critically, and creatively. The course objective considers principles of sound judgment and helps students learn how to recognize and analyze arguments present in ordinary spoken and written language, how to distinguish correct reasoning from incorrect reasoning, and how to construct valid, sound arguments.

PHIL 1099. Service Learning-1000 Level. (1 Credit)
In this student-initiated program, the student may earn one additional credit by connecting a service experience to a course with the approval of the professor and the service-learning director.

PHIL 2999. Tutorial. (2 Credits)
Independent research and reading with supervision from a faculty member.

PHIL 3000. Philosophical Ethics. (3 Credits)
This course involves philosophical reflection on the major normative ethical theories underlying moral decision making in our everyday lives. The principal focus of the course is a systematic introduction to the main normative ethical theories, i.e., eudaimonism, natural law ethics, deontological ethics, utilitarianism, virtue ethics, and feminism. The differences among these approaches are illuminated by studying various moral issues. In each section of the course, at least half the readings will be selected from Aristotle and Kant. Each section will include writings by at least one contemporary figure. Attributes: HHPA, HUST, PETH.
Prerequisites: PHIL 1000 or PHIL 1003 or HPRH 1002 or HPRH 1103.

PHIL 3109. Environmental Ethics. (4 Credits)
This senior values seminar surveys major theories in environmental ethics dealing with our moral duties regarding nature: for example, environmental stewardship, sustainable development, environmental justice, ecological virtue ethics, animal rights, biocentrism, Leopold’s land ethic, and ecological feminism. It has not only philosophical but also scientific, economic, political, and design dimensions as it deals with such topics as global warming, alternative energy, pollution control, suburban sprawl, deforestation, biodiversity loss, and the prospect of a sixth mass species extinction event threatening the future of human and nonhuman life as we know it. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: ENMI, ENST, ENVS, EPLE, ESEJ, ESEL, PHMP, PJEN, PJST, SOIN, SRVL, URST.
Mutually Exclusive: PHIL 4409.

PHIL 3115. Paradoxes in Value and Morality. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3125. Hume's Ethics. (4 Credits)
David Hume famously (or infamously) declared that “[r]eason is, and ought only to be the slave of the passions, and can never pretend to any other office than to serve and obey them” (THN 2.3.3). But what does moral theory look like when feelings are the foundation for morality? In this course, we will explore Hume's sentimentalist moral theory, examining Hume’s 'A Treatise on Human Nature' and 'An Enquiry Concerning the Principles of Morals,' along with supplementary excerpts from Hume's letters and essays, and occasional pieces of secondary literature. We will study Hume's views on meta-ethics, moral psychology (the passions/emotions and sympathy), moral motivation and freedom, moral judgment, virtue (including justice), and happiness. While this course is primarily focused on Hume's own views, we will also engage with present-day Humean positions in moral philosophy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: PHMP.
Prerequisites: (PHIL 1000 or PHIL 1003 or HPRH 1002) and PHIL 3000.
PHIL 3130. Philosophy of Law. (4 Credits)
The nature and philosophical foundations of law. Relations of justice and morality, civil and moral law, and their respective rights and obligations. Types and conceptions of law; natural law, legal realism, legal positivism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: PHMP.

PHIL 3131. Philosophy of Economics. (4 Credits)
Economics grew out of philosophy, carrying forward key philosophical ideas that continue to operate as grounding assumptions, goals, and regulatory ideals in the discipline. Some of these philosophical ideas have been challenged on the grounds of realism, coherence, usefulness, consequences, and compatibility with important values like justice, fairness, human dignity, democracy, liberty, equality, and the general welfare. Philosophy of Economics analyzes, criticizes, and creatively rethinks both classical and contemporary texts that deploy and challenge the philosophical ideas that continue to guide economics as a discipline that has great influence in framing and rationalizing public policy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: PHMP.

PHIL 3140. Market Failures, Public Goods, and Justice. (4 Credits)
This course focuses on a fundamental question for social justice: Which goods and services should be provided by free markets, which should generally be supplied by nonprofits (NGOs), and what is the remainder that should be secured by government? No economic background is assumed on the part of the student, but the course will examine economic conceptions of public goods that markets cannot optimally supply, as well as debates about expanding this category. We will consider arguments that some choices concern objective goods and harms that should not simply be left to consumer decisions in free markets, and consider what the institutional preconditions of effective markets include. A range of public goods, including some at the global level, will also be debated. Readings will include recent popular works on types of market failure that are now widely debated, some philosophical work on public goods, and an introduction to elementary game theory with simple matrices. We will also consider a few recent articles and book chapters arguing that some functions often performed by government should be taken over by the nonprofit sector, and will question what social justice concerns the rapid growth of this sector may raise. Students of all political orientations are welcome! Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: PJEC, PJST.

Prerequisite: PHIL 3000.

PHIL 3145. Democracy and Constitutional Order: Classical American Philosophy. (4 Credits)
Democratic justice has two main poles: popular sovereignty and constitutional order. Founders of the American federal government in the Revolutionary period sought to balance these values, but the idea that people might vote for slavery brought them into crisis. This forced civic republicans, including Lincoln, to articulate the moral preconditions of legitimate democracy in a clearer way. With federalist arguments for more centralized power as a starting point, this course will consider alternative conceptions of democratic justification that emerged from the American debates with an eye to contemporary applications. In particular, we will clarify and debate proposed constitutional reforms that are being considered today. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: PHMP.

Prerequisite: PHIL 3000.

PHIL 3181. Philosophy of Technology. (4 Credits)
This course will explore the philosophy of technology, seeking to understand the way in which technology is transforming our relationships to ourselves, to other people, and to our world. Guiding questions for the course include: What is technology? Is technology necessarily good or bad for human flourishing, or is just neutral? How are science and technology related? Do we need a special ethics of technology? The course will explore multiple traditions and historical periods, with special emphasis on analytic and continental philosophy in the 20th and 21st centuries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: PHHN.

Prerequisites: PHIL 1000 or PHIL 1001 or PHIL 1002 or PHIL 1003 or HPRH 1002.

PHIL 3195. Political Libertarians and Critics. (4 Credits)
An exposition and critique of political libertarianism - a philosophical theory developed by Ayn Rand, Hayek, Friedman, Nozick, Navescon and others - that has come to dominate neoconservative political thought in the U.S. We will read major libertarian texts and criticisms by David Gauthier, Hazlett, Rawls, Singer, and other defenders of public goods. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, ASRP, PHMP.

PHIL 3200. Introduction to Logic. (4 Credits)
A study of the methods and principles that distinguish correct argumentation. Attention is given both to the nature of argument and to its applications. Topics discussed include induction, deduction (including symbolic notation) and the common fallacies. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: LING, PHKM.
PHIL 3204. Symbolic Logic. (4 Credits)
Humans are capable of altering their behavior, verbal and otherwise, in light of deductive consequences and in conformity with standards of logical consistency. Although Aristotle, the Stoics, and others developed formal techniques for the evaluation of logical consequence and consistency, the early 20th Century witnessed an unprecedented expansion in the scope and power of those techniques through the construction of formal languages based on mathematical principles. Students consider the modern development of formal logical techniques including propositional logic, first-order logic, and if time permits, a system of intentional logic (e.g. modal logic), and then explore some of the philosophical issues surrounding them. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: PHKM.

PHIL 3235. Theories of Knowledge. (4 Credits)
Analysis and study of the central issues in epistemology; illusion and reality, sense perception, and reason; extent, validity and limitations of human knowledge. Classical and contemporary texts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHKM.

PHIL 3238. Idealism and Realism. (4 Credits)
Do minds have a privileged position in the world? Do objects, moral values, beauty, and truth exist independently of the mind? Or might objects, moral values, beauty, and truth depend in some way on minds? And if so, how? This course will examine various answers to these and related questions from both historical figures and contemporary figures.
Prerequisites: PHIL 1000 or PHIL 1001 or PHIL 1002 or PHIL 1003 or HPRH 1002.

PHIL 3243. Philosophy of Cognitive Science. (4 Credits)
Unlike inanimate objects such as rocks, we are aware of the world around us. Energy from the sun heats both the rock and you, but unlike the rock you also feel the heat, you know that it comes from the sun, you can understand what it is, and can think about it even when it is absent. How exactly are we able to do this? What makes us capable of thinking, feeling, and perceiving? Cognitive science is an interdisciplinary attempt to answer questions like these. This course explores some of the dominant research programs in cognitive science with an eye to understanding and critically evaluating the philosophical assumptions on which they depend. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NECG, NEUR, PHKM.

PHIL 3253. Relativism and Philosophy. (4 Credits)
This course analyzes and evaluates various forms of contemporary relativism: epistemological, ontological, and moral. It also investigates whether human rationality is so diverse as to be relativistic in nature. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHKM.

PHIL 3254. Philosophy of Perception. (4 Credits)
This course examines a selection from the many contemporary philosophical debates about our perceptual awareness of the external world. The course involves issues in epistemology (e.g. what is perceptual information?), philosophy of mind (e.g. representationalism, perceptual content), neuroscience (e.g. how does the visual system work?), and metaphysics (e.g. color theory). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NECG, NEUR, PHKM.

PHIL 3257. Skepticism. (4 Credits)
Skepticism about the possibility of knowledge, and in particular about our knowledge of the external world, has a long history, from Sextus Empiricus to Hume and Berkeley up to a wide array of present-day debates. As it is plausible that epistemological theory emerges from a dialectic with skepticism, analysis of skeptical arguments gives substance to our claims to have achieved knowledge. This course examines many of these arguments, historical and contemporary. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHKM.

PHIL 3258. Relativism and Skepticism. (4 Credits)
On the road to knowledge, skepticism is a 'go slow' or perhaps a 'stop' sign, while relativism says 'the speed limit is your to determine'. Both view challenge sedate norms of epistemology and each other. This course examines in detail contemporary versions of skeptic and relativistic claims about our knowledge of and judgments about, the world and ourselves. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHKM.

PHIL 3266. Philosophy of Science. (4 Credits)
Critical appreciation of the relation of the physical and social sciences to philosophy. The course takes a historical and systematic approach, dealing with the methods and theories of science from the 17th to the 20th century from a philosophical perspective. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, BIOE, PHKM.

PHIL 3301. Problem of God. (4 Credits)
A systematic study of the existence of God, of His nature, of His relation to the world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMCS, PHME, REST.
PHIL 3306. Faith After the Death of God. (4 Credits)
Can belief in God be justified, or are there compelling reasons to suspend judgment or to believe that there is no God? This course will debate the rationality of faith after death of God and the rise of atheism in modernity. The course will investigate whether it is rational to believe in God and what would be the epistemological foundations necessary for beliefs about the existence of God or about the nature of God. Students will examine proofs for the existence of God from classic sources, e.g., Aristotle, Neo-Platonism, Augustine, Aquinas, and rationalism, as well as from defenders of skepticism and atheism. Students will read major authors on these questions, both classic and contemporary, such as Hume, Kant, Nietzsche, Aquinas, Plantinga, Feser, Eliade.
Prerequisites: PHIL 1000 or HPLC 1001 or HPRH 1002.

PHIL 3307. Faith and Rationality. (4 Credits)
The course will focus on the rationality of belief in God. What is required for belief in God to be rational? Are there any proofs that God exists? Does the fact of evil in the world prove that God does not exist? What role does religious experience play in the justification of religious belief? Emphasis on contemporary authors. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: PHKM, REST.

PHIL 3310. Issues in Philosophy of Law. (4 Credits)
This course will examine and critically evaluate different accounts of the nature of law; the relationship between law and morality; the rule of law and constitutional government; judicial review and interpretation; foundations of private law; the foundations of public law. These and related issues in the philosophy of law shall be discussed and illustrated by reference to specific legal cases and controversies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHMP.

PHIL 3330. Philosophy of Religion. (4 Credits)
The course will focus on issues in the philosophy of religion from the view point of the divine attributes. Traditional proofs for God's existence, forms of evidentialism and anti-evidentialism, and dilemmas concerning divine simplicity, foreknowledge, as well as the problem of evil, will be treated. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: PHME, REST, RSTE.

PHIL 3348. Concepts and Reality. (4 Credits)
In the Critique of Pure Reason, Immanuel Kant raised the question of how concepts relate to reality. This course will examine 20th and 21st century attempts to answer Kant's question. Topics discussed may include (1) the nature of concepts, (2) varieties of conceptual schemes, (3) the distinction between descriptive and revisionary metaphysics, and (4) intentionality; authors discussed may include Robert Brandom, John McDowell, Peter Strawson, and Wilfrid Sellars. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHME.

PHIL 3350. Problems in Metaphysics. (4 Credits)
Nature and methods of metaphysics, our knowledge of being, self-identity and process, the unity and interrelationship of beings, action as unifying principle, causal explanation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: PHME, REST.

PHIL 3354. Problem of Evil. (4 Credits)
‘Do bad things that happen prove that there is no God? This course shall focus on this question and consider what has been said about it form ancient times right up to what people are saying about it today. We shall pay attention to what has been argued for and against the existence of God given that there is much that is bad in our world. We shall try also to evaluate what a number of philosophers have said about this fact.’
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMCS, PHME.

PHIL 3355. Metaphysics. (4 Credits)
This course introduces students to major metaphysical questions and problems, such as free will and determinism, persistence through time, necessity and identity, possible worlds, universals and particulars, change, substance, causation, realism vs. anti-realism, and the prospects of immortality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHME.

PHIL 3360. Contemporary Metaphysics. (4 Credits)
An examination of some issues in metaphysics, with an emphasis on 20th and 21st century texts and figures. Topics may include universals and particulars, space and time, constitution, identity and persistence, free will, necessity and possibility, the mind-body problem and causation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHME.

PHIL 3342. Harry Potter and Philosophy. (4 Credits)
This course will use the Harry Potter novels to explore several central themes in philosophy, and will use philosophical analysis to interpret the books and their cultural impact. Some central topics of the course will include: the nature and relationships of minds, souls, and bodies; the conflict of good and evil and some related issues in moral psychology and the ethics of ‘love’; metaphysical implications of the magical world of HP and its enchantment of muggles. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, ASLT, ASRP, CCUS, COMC, COMM, PHHN.
This course aims to acquaint the student with the basic problems and directions of Western philosophy as developed in its early and decisive phase by the principal thinkers of ancient Greece, Pre-Socratics, Plato, Aristotle and Plotinus are among the figures that can be treated, as well as Stoicism and Epicureanism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: CLAS, OCHS, OCST, PHAN, REST.

This course will explore the tradition of philosophy as Socrates, Plato, and Aristotle knew and responded to this tradition. Particular attention will be paid to ancient theories of the physical world and the universe as well as to the influence on contemporary thinkers, such as Nietzsche and Heidegger. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: CLAS, PHAN.

This course is an examination of philosophy during the extraordinarily dynamic era that began after Alexander the Great had spread Hellenistic ideals throughout the ancient world. The course will enter into the debates among the five major schools of Hellenistic philosophy - Stoicism, Skepticism, Cynicism, Epicureanism and Neo-Platonism. Students will read representative authors from each school, but since philosophy was regarded as a way of life during this period, students will read authors from many walks of life, such as the Roman emperor, Marcus Aurelius, the statesman, Cicero and the Poet, Virgil. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: CLAS, PHAN.

This course is a general introduction to Plato's thought on ethics, epistemology, and metaphysics as represented by dialogues from his early and middle periods. Readings from the early dialogues will include the Euthyphro, Apology, Crito, and the Protagoras. Readings from the middle dialogues will include the Meno, Phaedo, Gorgias, Phaedrus, and the Republic. No previous study of Plato is required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: CLAS, MVPH, MVST, PHAN.

Prerequisite: PHIL 3000.

Although Plato wrote at least 28 dialogues, his philosophy is usually taught from only a few, such as the Apology, Meno, Phaedo, and Republic. This course examines his philosophy as expounded in the many dialogues seldom read in undergraduate courses. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: CLAS, PHAN.

This course will discuss some of the various ways in which the Christian East was influenced by and employed ancient philosophy in order to grapple with central philosophical questions such as the nature of the soul, its relation to the body, human freedom and choice, fate and providence, the pursuit of virtues and vices, the role of reason and of beauty, and the divine energies. Thinkers discussed may include Gregory of Nyssa, Nemesius of Emesa, Maximus the Confessor, and John of Damascus. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: MVPH, MVST, PHAN.

The origins of medieval philosophy. The Carolingian renaissance. Anselm. Abelard and 12th-century humanism. Philosophical currents of the 13th century; introduction of Aristotle into the University of Paris; the reaction of the Augustinian philosophers to Aristotle; Bonaventure, Aquinas and Siger of Brabant. Duns Scotus. William of Ockham and the rise of nominalism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: MVPH, MVST, OCST, PHMD.

A study of St. Augustine's most popular philosophical work, The Confessions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMCS, CLAS, MVPH, MVST, OCHS, OCST, PHMD, REST, RSHR.

By examination of the Divine Comedy and other works by Dante, this course will consider such important philosophical themes and divine providence, free choice of the will, the sources of ethics, and the nature of happiness. The course will involve study of various ancient and medieval thinkers whom Dante used to explore the perennial questions of human existence. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: MVPH, MVST, PHHN.

Prerequisites: PHIL 1000 or HPRH 1002 or HPRH 1051.
PHIL 3560. Philosophy of Aquinas. (4 Credits)
Historical setting, doctrinal influences, themes of knowledge and the meaning of person; metaphysics and God; freedom and ethics; and reason and revelation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. 
Attributes: MVPH, MVST, PHMD.

PHIL 3565. Four Medieval Thinkers. (4 Credits)
This course introduces the thought of Augustine, Anselm, Aquinas and Buridan, and its influence on the development of medieval philosophy, especially in the philosophy of mind and natural theology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: MVPH, MVST, PHMD, REST.

PHIL 3570. Beauty in the Middle Ages. (4 Credits)
This course will be an investigation of medieval theories of beauty and aesthetics. Classic texts will be drawn from three periods: antiquity, the early Middle Ages, and thirteenth-century Scholasticism. Authors will include Plato, Plotinus, Augustine, Dionysius the Pseudo-Areopagite, Bonaventure, and Aquinas. A component of the course will examine certain moments in medieval art in order to investigate the relation between theory and art. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: MVPH, MVST.
Prerequisite: PHIL 1000.

PHIL 3591. Medieval Political Philosophy. (4 Credits)
An investigation of the major political theories of the Middle Ages from the collapse of the Roman Empire in the West until the eve of the Protestant Reformation. Students will read the classic texts of this era from Augustine's 'City of God' to Masilus of Padua's 'The Defender of Peace.' Special attention will be given to different theories of kingship and of the basis of political authority and the relationship between papacy and empire. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction. Attributes: MVPH, MVST, OCST, PHMD, PJRJ, PJST.

PHIL 3600. Descartes and the Rationalists. (4 Credits)
The course considers the great rationalist systems of philosophy on the continent in the pre-Kantian period. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCM.

PHIL 3604. Rationalists and Empiricists Epistemologies. (4 Credits)
This course will address the epistemological problems stemming from Descartes' "methodological skepticism" and their proposed solutions in early modern philosophy ranging from Descartes through British Empiricism to the rationalism of Kant. The course will also trace the conceptual roots of the problems of modern epistemologies in late-medieval philosophy, and seek their resolutions for contemporary philosophy through this historical analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCM.

PHIL 3606. Early Modern Philosophy: Self and World. (4 Credits)
In this class, we will read, examine, and interpret the works of several figures in Early Modern philosophy (roughly the 17th and 18th centuries). Along with the revolutions in scientific theory and practice that characterized this period, there were revolutions in the ways we understand fundamental philosophical questions and their possible answers. Some of the topics we will focus on are the nature of the human being as a thinking and feeling creature, the gendered human being, the human being in relation to other animals, and the human being in relation to other human beings. Readings will be chosen from Montaigne, de Gournay, La Boetie, de las Casa, Hobbes, Cavendish, Locke, Descartes, Elisabeth of Bohemia, Malebranche, de Lambert, du Chatelet, Hume, Voltaire. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ACUP.
Prerequisites: PHIL 1000 or PHIL 1001 or PHIL 1002 or PHIL 1003 or HPRH 1002.

PHIL 3609. Modernity and Its Critics. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCM.

PHIL 3620. Immanuel Kant. (4 Credits)
A study of Kant's philosophy concentrating on the Critique of Pure Reason. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCM.

PHIL 3622. Kierkegaard. (4 Credits)
Known occasionally as the "founder of existentialism," Søren Aabye Kierkegaard (1813-1855) had a profound and lasting impact on philosophical reflection on the nature of the self, faith, ethics, rationality, and the possibility and meaning of philosophical discourse more generally. This course will take a comprehensive approach to Kierkegaard's thought, reading selections from both his pseudonymous works and religious discourses, as well as looking at those, like Heidegger, Sartre, and de Beauvoir, among others, who were significantly influenced by Kierkegaard's writings. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: PHIL 3000.
PHIL 3623. Marx as a Philosopher. (4 Credits)
Karl Marx is more commonly approached as an economist, sociologist, or political theorist than as a philosopher. But this class will explore the original philosophical positions offered by Marx as well as the philosophical basis and results of his often polemical exchanges with others. Topics include Marx’s philosophy of history, philosophical anthropology, materialist critique of idealism, as well as his normative social and political philosophy. We will also discuss Marx’s theory of revolution and his stance on the limits of philosophy itself. The goal is to develop the possible internal consistency, social applicability, and limits of Marx’s philosophy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: PHCM, PJSJ, PJST.

PHIL 3631. 19th Century Philosophy. (4 Credits)
Study of post-Kantian developments in philosophy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCM.

PHIL 3643. Heidegger. Being and Time. (4 Credits)
A course on Martin Heidegger’s Being and Time, one of the most important philosophical works of the twentieth century. Readings in addition to noteworthy commentary will include some of the political controversies associated with Heidegger’s thought. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, PHCO.

PHIL 3652. Contemporary French Philosophy. (4 Credits)
This course introduces the work of French thinkers from the 20th and 21st centuries. Themes under consideration might be subjectivity, violence, justice, embodiment, and epistemology. Figures covered may include Badiou, Deleuze, Derrida, Foucault, Irigaray, Kofman, Le Doeuff, Lyotard, Merleau-Ponty, and Ranciere. Reference may also be made to recent developments of French theory in the Anglo-American context, including in feminist theory and social and political philosophy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASRP, COLI, INST, ISEU, JWST, PHCO.

PHIL 3653. Latin American Philosophy. (4 Credits)
This course will introduce students to select texts in Latin American and Caribbean Philosophy. Central themes will include the (persistent) effects of the colonial period, the inheritance of various European philosophies, and the possibility of a distinctive Latin American Philosophy. Currents and thinkers may include Sor Juana Inés de la Cruz, Simon Bolivar’s influence, Leopoldo Zea and Positivism, the Negritude Movement in Martinique, Liberation theology and philosophy, and Latina/o Thought in North. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASRP, COLI, INST, ISLA, LAHA, LALS, PHCO, PJSJ, PJST.

PHIL 3655. Philosophy and Language. (4 Credits)
Early in the 20th Century, philosophy took what has been called ‘the linguistic turn.’ While continental structuralists and post-structuralists developed theories according to which all concepts are interpretative, in analytic philosophy, positivists tried to reduce many key questions of metaphysics and epistemology to issues of usage. This course will survey major contemporary theories of sense, reference, and meaning that have developed since the mid-20th century, explaining their methodological implications for the analysis of other philosophical topics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, PHKM.

PHIL 3661. Husserl and Heidegger. (4 Credits)
This course investigates the nature, methods, and development of phenomenology through a study of its two major, German thinkers. The course will compare and contrast the views of Husserl and Heidegger on (1) the concept and method of Phenomenology, (2) intentionality; and (3) subjectivity. It will also illustrate the differences between the two by examining their failed collaboration on the Encyclopedia Britannica entry for phenomenology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCO.

PHIL 3662. Merleau-Ponty. Philosopher of the Body. (4 Credits)
This course is devoted to an intensive study of one important and innovative book: Maurice Merleau-Ponty’s Phenomenology of Perception, one of the most groundbreaking and influential works of philosophy in the 20th century. Rejecting the assumption that mind and body are separate, Merleau-Ponty offers an account of the sensorimotor body as the subject of experience rather than giving that role to consciousness or a disembodied mind. His rich, first-person, descriptive account of perception demonstrates that the animate body in sensation and movement is our original meaning-making relation to the world. While our study will focus on reading systematically through this single primary text, we will also have a few readings that contextualize influences on Merleau-Ponty, as well as his impact on current scholarship. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCO.

PHIL 3665. Philosophy and Judaism in the 20th Century. (4 Credits)
This course is devoted to the thought of Jewish philosophers in the 20th century on such topics as the ethical encounter between self and other; chosenness and election; Jewish-Christian relations; redemption and messianism; forgiveness and hospitality; as well as responses to the Shoah, to Zionism, and to the Palestinian question. We will take up these themes as discussed in the texts of such thinkers as Franz Rosenzweig, Martin Buber, Simone Weil, Walter Benjamin, Jean Wahl, Emmanuel Lévinas, Hannah, Arendt, Vladimir Jankélévitch, Jean-François Lyotard, Jacques Derrida, and/or Judith Butler. Four-credit courses that meet for 150 minutes per week require additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, JWST.
Prerequisites: (PHIL 1000 or PHIL 1003 or HPRH 1002) and PHIL 3000.
PHIL 3667. Philosophy of Space and Time. (4 Credits)
Space and time are fundamental features of the physical universe in which we live, and are essential to our consciousness of the world. Philosophers from Augustine to Leibniz and Kant have asked what time is, whether it is a real feature of the causal order of nature or rather imposed by our conscious experience. Developments in 20th century physics and philosophy have forced us to rethink the relation of space and time, reconsider whether the future might be as real as the past, and whether time really ‘moves’ forward. The course will explore the leading contemporary theories and draw connections with developments in science. No advanced background in physics is required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHME.

PHIL 3670. Existentialism. (4 Credits)
A survey of themes in the main 19th and 20th century existentialist writers, such as Jean-Paul Sartre, Martin Heidegger, Soren Kierkegaard and Friedrich Nietzsche. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, INST, ISEU, PHCO.

PHIL 3671. Phenomenology and Existentialism. (4 Credits)
An investigation of themes central to the development of phenomenology and existentialism. Themes to be studied might include methodology, intentionality and consciousness, subjectivity, anxiety or dread, embodiment, emotions, the Other, authenticity, freedom, agency and action, history and historicity, the individual versus community, social and political responsibility. Readings will be drawn from Edmund Husserl, Martin Heidegger, Jean-Paul Sartre, Maurice Merleau-Ponty, Soren Kierkegaard, and Friedrich Nietzsche. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCO.

PHIL 3672. Continental Philosophy of Religion. (4 Credits)
An introduction to contemporary philosophy of religion from a Continental perspective, considering issues of religious experience, the manifestation (or ‘truth’) of faith, and/or a philosophical analysis of religious practices. The course may include texts from thinkers such as Paul Ricoeur, Jean-Luc Marion, Michel Henry, Jean-Louis Chrétien, Jean-Yves Lacoste or John D. Caputo. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: PHCO, PHHN.
Prerequisites: PHIL 1000 or HPRH 1002 or HPRH 1051.

PHIL 3673. Existentialism and Literature. (4 Credits)
Existentialism and Literature seeks to examine how the ideas of existentialist philosophy—in such thinkers as Kierkegaard, Nietzsche, Heidegger, Marcel, Sartre, Camus, Blanchot and Merleau-Ponty—are expressed in and through literature. Alongside philosophical writings, we will read literary works by such writers as Dostoevsky, Rilke, Kafka, Sartre, de Beauvoir, and Camus. Themes include the nature and structure of the self; authenticity and inauthenticity; alienation and the fear of death; meaning and meaninglessness, and the existence or absence of God.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCO.

PHIL 3674. Philosophy of the Novel. (4 Credits)
A philosophical consideration of the novelistic form as a phenomenon of modernity and in relation to myth and tragic consciousness. Readings will be from authors such as Euripides, Racine, Pascal, Freud, Lukacs, Goldmann, Freud, and Girard. Note: This four-credit course will be reading-intensive. In addition to the philosophical literature, students will be expected to read Flaubert's 'Madame Bovary' and Dostoevsky's 'Demons' in their entirety. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHIL 1000 or PHIL 1001 or PHIL 1002 or PHIL 1003 or HPRH 1002 or HPRH 1051.

PHIL 3711. Humanitarianism and Philosophy. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HHPA, HUST, INST, ISIN, PHMP, PJCR, PJST.

PHIL 3712. Global Environment and Justice. (4 Credits)
Ethical principles of sustainability and an 'endowment model' of intergenerational justice applied to the world’s largest-scale environmental problems, such as usable land and food yields, fresh water supplies, loss of rainforests and biodiversity, clean air and global warming, fossil fuels and alternative energies, and population growth and poverty. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, ENMI, ENST, ESEJ, ESEL, GLBL, HHPA, HUST, INST, ISIN, PHMP, PJCR, PJEN, PJST, SOIN.

PHIL 3713. Human Rights and Global Justice. (4 Credits)
This interdisciplinary class will focus on the development of the human rights paradigm in international law and philosophical questions about how we can justify universal basic rights. For example, are universal rights consistent with a wide array of varying cultures and ways of life? Are concepts of rights somehow inherently ‘western’ or ‘individualist’, and can relativist doubts about human rights be answered? We will also look at some debates about the content of such rights, e.g. rights to educational opportunity, to welfare or subsistence, to basic health care, to membership in a culture, to immigration, to a sustained environment and other controversial cases. We will also consider humanitarian intervention in the name of rights, problems with the UN system, and ways that the international order could be restructured if we take seriously the idea that there are universal basic rights to freedom from tyranny and to development out of poverty. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, BIOE, HHPA, HUST, INST, ISIN, LALS, PHMP.
PHIL 3714. Kant and Hegel. (4 Credits)
This course will examine the relationship between the philosophical writings of Immanuel Kant and G.W.F Hegel. Kant’s philosophy was understood by many of his contemporaries primarily as a philosophy of freedom, and in the first part of this course we will attempt to understand the pivotal role that the relationship between nature and freedom plays in both Kant’s theoretical and moral writings. During the second part of the course, we will examine both Hegel’s criticisms of Kant’s philosophy and the ways in which Hegel’s philosophy, nevertheless, attempts to develop particular Kantian insights. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCM.
Prerequisites: (PHIL 1000 and PHIL 3000).

PHIL 3715. Kant on Morality and Religion. (4 Credits)
In the 18th century, Immanuel Kant developed a theory of autonomy that revolutionized moral and religious thought. This course will examine Kant’s moral philosophy and philosophy of religion in writings like the Critique of Practical Reason, Critique of Pure Reason, Groundwork for the Metaphysics of Morals, Metaphysics of Morals, and Religion within the Boundaries of mere Reason. Topics discussed may include (1) Kant’s categorical imperative, (2) Kant’s theory of human autonomy, (3) Kant’s concept of God, (4) Kant’s theory of moral belief in God and immorality, (5) Kant’s treatment of the problem of evil, and (6) Kant’s view of the relationship between morality and revealed religion. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, BIOE, PHCM.

PHIL 3716. Hegel and His Successors. (4 Credits)
An introduction to the philosophy of Hegel (focusing on the Phenomenology of Spirit) with a consideration of some important 19th & 20th century interpretations and criticisms. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHCM.
Prerequisite: PHIL 3000.

PHIL 3720. African American Philosophy. (4 Credits)
Using texts by Frederick Douglass, Sojourner Truth, W.E.B. DuBois, Alain Locke, Martin Luther King, Jr., Malcolm X, James H. Cone, Angela Davis, Cornel West, Patricia Hill Collins, Howard McGary, William E Lawson, Leonard Harris, Lucius Outlaw and others, this course will focus on pillars, prophets and prospects for African American philosophy, a ‘philosophy born of struggle’ created by profound critical and transformative voices from times of chattel slavery to the present that plays an influential role in American philosophy and American society today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASRP, COLI, PJSJ, PJST, PLUR, WGSS.

PHIL 3722. Native American Philosophy. (4 Credits)
This seminar-style course will explore the philosophical contributions of Native Americans (also known as American Indians, and best known by the names these diverse people have given themselves), including insights about how to preserve our biotic community and to live with one another amidst our American pluralism in ways that are spiritually satisfying. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASRP, COLI, ENST, ESEJ, ESEL, PJEN, PJST, PLUR.

PHIL 3731. Philosophy of the City. (4 Credits)
This course interweaves philosophical reflections on the nature and need of cities, from ancient times to the present, with classical and contemporary works on: urban planning theory and practice, sociology, economics; and political science. Readings will include Jane Jacobs, The Death and Life of Great American Cities; Sharon M. Meagher, ed., Philosophy and the City; Classic to Contemporary Writings, Richard T. LeGates and Frederic Stout, ed., The City Reader (Sixth Edition); and Margaret Kohn, The Death and Life of the Urban Commonwealth.
Attributes: AMST, ASRP, PHHN.
Prerequisites: PHIL 1000 or HPRH 1002 or HPRH 1051.

PHIL 3756. Chinese Philosophy. (4 Credits)
A study of the philosophical traditions of Confucianism, Taoism, and Buddhism (including Ch’an, which spread to Japan as Zen) with special attention to the tension between ethico-political and mystical-religious dimensions of these traditions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: GLBL.

PHIL 3759. Buddhist Philosophy. (4 Credits)
The course is a historically-based introduction to Buddhist philosophy that gives students a basic understanding of the central ideas, issues and approaches in the various Buddhist traditions. Students will be encouraged to bring Buddhist philosophy into dialogue with some Western philosophical perspectives. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, INST, ISAS, REST.

PHIL 3770. Daoist and Zen Philosophy. (4 Credits)
An examination of the classic Chinese texts of philosophical Daoism (Daodejing and Zhuangzi) and the related schools of Chinese Chan and Japanese Zen Buddhism. We will balance discussion of these traditions in their original Asian context with assessment of their relevance for contemporary issues such as personal well-being and environmental ethics.
Attributes: GLBL, INST, ISAS.
Prerequisites: PHIL 1000 or HPRH 1002 or HPRH 1051.
PHIL 3800. Internship. (3 Credits)

PHIL 3810. Democratic Theory. (4 Credits)
Democratic theory draws on diverse intellectual, historical, and philosophical traditions to analyze and propose solutions to issues of identity, community, inclusion, capabilities, powers, opportunities, and sustainability as these emerge within contemporary living in the realms of politics, economics, ethics, and culture. In this course, students will study the historical development of democratic theory, some of the contemporary issues on which democratic theorists focus, and some of the differing methods and perspectives that theorists from diverse philosophical traditions—e.g., analytic, pragmatic, continental, and critical-theoretical—bring to these issues. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: PHMP.

PHIL 3815. Political Philosophy. (4 Credits)
This course explores various conceptions of justice on both national and international levels, from the perspective of contemporary political philosophy. Topics include distributive justice, the politics of recognition, reparations for past injustices, the process of transition from unjust to just regime, global justice, and environmental justice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: PHMP.

PHIL 3850. Hermeneutics. (4 Credits)
Hermeneutics is the philosophical theory and practice of interpretation. The course will focus especially on Hans-Georg Gadamer’s and Paul Ricoeur’s philosophical approaches to understand and interpreting texts and experiences in the realms of art, history, religion, literature (especially narrative), formation of the self, politics and justice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: COLI.
Prerequisite: PHIL 1000.

PHIL 3865. Critical Theory Frankfurt School. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: JWST, PHCO.

PHIL 3901. Philosophical Issues of Feminism. (4 Credits)
Philosophical exploration of issues raised by historical and contemporary reflection on the relationship between the sexes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: PHHN, WGSS.

PHIL 3903. Philosophy and Feminist Theory. (4 Credits)
A philosophical exploration of issues raised by historical and contemporary reflection on the relationship between the sexes. In this course, we will explore how the tradition of philosophy has responded to gender and account for the struggles to bring feminist discourse to philosophical theory. We will examine the connections between Marxist, post-modern, existentialist and phenomenological theories to the issues of women and gender-identity politics. Counts for Women's Studies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: COLI, PHHN, PHMP.

PHIL 3904. Feminist Philosophy. (4 Credits)
A survey of feminist philosophy, focusing on its contributions to social and political philosophy. Balances historical and issue-based approaches, surveying feminist contributions to philosophical accounts of rights, equality, and personhood, as well as power and oppression, liberation and resistance, subjectivity and sociality. Figures studied may include Mary Wollstonecraft, Simone de Beauvoir, Shulamith Firestone, Gayle Rubin, bell hooks, Catharine MacKinnon, Marilyn Frye, Nancy Fraser, Sandra Bartky, Iris Marion Young, Audre Lorde, Patricia Hill Collins, Monique Wittig, Judith Butler, Sally Haslanger, and Martha Nussbaum. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: JWST, PHMP, PJGS, PJST, WGSS.

PHIL 3906. Emotions and the Good Life. (4 Credits)
Whereas Oscar Wilde thought ‘The advantage of the emotions is that they lead us astray’, Francis Bacon thought the emotions were essential to our experiencing the world as we do: ‘For a crowd is not company; and faces are but a gallery of pictures; and talk but a thinking cymbal, where there is no love.’ George Santayana thought our humanity diminished without a proper emotional life: ‘The young man who has not wept is a savage, and the old man who will not laugh is a fool!’ This course will investigate the nature of the emotions, their relation to cognition, and the role they play in the good life for humans. Readings will be drawn from authors as diverse as Aristotle, Descartes, Hume, William James, Jean-Paul Sartre, and Nancy Sherman. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: PHHN.

PHIL 3907. Existentialist Feminism. (4 Credits)
Existential Feminism includes the classical existentialism of Jean-Paul Sartre in dialogical exchange with the feminist thinking of Simone de Beauvoir. Philosophies like Nietzsche, Heidegger, Bataille, Merleau-Ponty, Marcuse, Foucault, and Bourdieu (via the sociology of Michel de Certeau), in addition to Lacanian psychoanalytic theory can illuminate thinkers like Luce Irigaray but also, and in another context, the writings of authors like Elfriede Jelinek and the political thinker, Hannah Arendt. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: PHCO.
PHIL 3908. Philosophy of Happiness. (4 Credits)
The class examines the major theories of happiness in the Western philosophical tradition. Attention will also be given to some religious traditions, Asian philosophies, and contemporary discussions of happiness in philosophy and psychology. Throughout there will be consideration of the relationship between happiness and morality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHHN.

PHIL 3910. Shakespeare and Aquinas. (4 Credits)
A philosophical study of human emotions by reading ‘in tandem’ certain plays of Shakespeare and the treatises by Thomas Aquinas on the passions and on human nature in general. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: MVPH, MVST, PHHM.

PHIL 3920. Evil Choices. (4 Credits)
What makes a bad choice evil? And what motivates somebody to do evil? Are only morally depraved persons capable of making evil choices? Or can an evil choice be made by someone who might be considered good or even admirable under other circumstances? Is it possible to choose evil for evil’s sake? Or is every evil choice motivated by a desire to obtain some good, for oneself or for others? This course explores these questions with the help of great philosophers throughout history. We consider ancient accounts of evildoing (Plato and Aristotle), medieval views on Lucifer (Augustine, Anselm, and Aquinas), modern approaches to radical evil (Kant), and contemporary reflections on the Holocaust. We will also read some contemporary psychological research. Our goal is not only to better understand evil, but also to shed some light on human nature and our capacity to choose good in the face of evil. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHHN.
Prerequisite: PHIL 3000.

PHIL 3930. Philosophy and Literature. (4 Credits)
Philosophy and Literature is devoted to the study of philosophical theories of literature, including studies of literary and poetic language, of the relationship between literary and other kinds of knowledge, of the philosophical meaning of literary works, and of questions regarding the status of the author and reader in the work of literature. The course covers readings from the history of philosophy and from recent philosophical and literary sources. Philosophers and authors studied include Plato, Aristotle, Nietzsche, Heidegger, Iser, Blanchot, Bachelard, Sartre, Nehamas, and de Bolla, as well as literary works by Rilke, Proust, Moravia, and writers of Holocaust literature. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, OCST, PHHN.

PHIL 3935. Ethics and Mental Health. (4 Credits)
This course focuses on concepts central to our understanding of mental health, ways in which those concepts impact categorization and treatment of mental disorder, and ethical issues that arise in mental health care contexts as well as concerning mental health in wider social contexts.
Attribute: PHMP.
Prerequisite: PHIL 3000.

PHIL 3945. Philosophy and Art. (4 Credits)
Philosophy and Art is a course in philosophical aesthetics for upper-level students with interests both in philosophy and in the various artistic and literary disciplines. Starting from a historical survey of discussions of art, we consider issues such as mimesis and representation, the ontological and epistemological value of art, the structure of artistic experience, and the status of the artist as the origin of the work of art. Readings include selections from Plato, Aristotle, Hume, Kant, Hegel, Nietzsche, Freud, Dewey, Merleau-Ponty, Heidegger, Danto, Foucault and de Bolla, and are presented in conjunction with studied attention to works of visual art as well as works in other media. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, PHHN.

PHIL 3970. Humanity's Value. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEVL, BIOE.
Prerequisite: PHIL 3000.

PHIL 3975. Philosophy as a Way of Life. (4 Credits)
This course considers the role of philosophy in a happy life. Is a philosophical reflection necessary for a life worth living? Special attention will be given to the ancient Greek conception of philosophy as a way of life, especially in the writings of Plato and the Stoics, but modern understandings of philosophy will be considered as well. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHHM.

PHIL 3978. Philosophy and Digital Media. (4 Credits)
Participants in this course will examine the classic distinction, beginning with Plato, between orality and literacy, with an overview of the signal changes in mass reproduction from books to lithographs, photographs, film, and audio recording to today's digital, online and cell-phone mediated culture, including texting and the Twitter and Instagram suffusion of everyday life, old new media like faxes and email, not to mention the ever changing varieties of social media, blogs, feeds, etc. To explore the changes wrought by the various technological means of 'reproduction,' 'communication,' and 'representation,' on human life and expression, authors to read include Walter Benjamin and Martin Heidegger as well as Theodor Adorno, in addition to McLuhan, Anders, Kittler, Baudrillard, and a bunch of ever changing new names. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHHN.
Prerequisite: PHIL 1000.
PHIL 3979. Philosophy and Media. (4 Credits)
Philosophy has been concerned with media since Plato's Phaedo. Beginning with a discussion of orality and literacy and moving to explore so-called “new media,” including cell phone accessibility and its texting culture to the Twitter and Instagram suffusion of everyday life, faxes/ email, Facebook, YouTube, etc. Participants will also review the signal change in the 19th C. from traditional print forms to photography, films, and recording. Examining the change wrought by technological means of reproduction on human life and expression. Possible authors include Benjamin, Adomo, Illich, de Certeau, Anders, Kittler, Attali, Baudrillard, Vinilio, and Laruelle. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3980. Contemporary Issues in Metaphysics. (4 Credits)
Metaethics steps back from moral debates to ask metaphysical, epistemological, and semantic questions about morality itself. The metaphysical questions seek to understand the nature of morality, asking questions such as: are there objective moral facts, or is morality culturally determined? If there are objective moral facts, are they like scientific facts? The epistemological questions seek to understand how we can know or be justified in believing moral claims. The semantic questions seek to understand what we mean when we use moral terms: are we making truth claims or are we just expressing our feelings? In this course, we will explore contemporary answers to these kinds of questions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3990. Environmental Worldviews and Ethics. (4 Credits)
Survey of environmental philosophy worldviews and ethics such as the universe story, deep ecology, the land ethic, zoocentrism, biocentrism, ecofeminism, ecotheology, utilitarian economics, environmental pragmatism, ecological virtue ethics, and environmental justice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3999. Tutorial. (3 Credits)
Independent research and reading with supervision from a faculty member.

PHIL 4001. Politics and Biopower. (4 Credits)
This course will examine the recent trend in Continental Philosophy that makes central the concept of life in understanding contemporary politics. The primary focus will be on the work of Michel Foucault and Giorgio Agamben, with readings also by Carl Schmitt, Hannah Arendt, Judith Butler, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4044. Modern Ethical Theories. (4 Credits)
This course is an introductory survey of major theories and themes in twentieth-century moral philosophy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4050. Seminar: Justice and Social Identity. (4 Credits)
This senior values seminar examines the multicultural environment of today's Western democracies which demands group recognition that challenges prevailing conceptions of justice and selfhood, and forces philosophers to rethink how our personal identity is formed and interpreted in relation to society. Ethnic and cultural aspects of personal identity and their implications for pressing issue in democratic justice will be studied. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4101. Happiness and Well-Being. (4 Credits)
An investigation into the nature and value of happiness and well-being (understood as connected concepts) from the perspective of both psychology and philosophy. Emphasis will be placed on research about the topic in each discipline, but efforts will also be made to explore fruitful interactions between the two disciplines in understanding the topic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4102. Environmental Policy and Ethics. (4 Credits)
This seminar is designed primarily for philosophy, environmental studies and natural science majors and presuppose substantial previous course work in one or more of these disciplines. Using these disciplines, the ethical dimensions of environmental problems will be explored from an interdisciplinary perspective. Requirements include a 40 page essay blog, three class presentations, and a hands-on learning practicum outside of class (minimum 1 hr per week). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4103. Human Error: Philosophical and Psychological Perspectives. (4 Credits)
This course takes error in human judgment and reasoning as its central topic. Human error is something we know about firsthand: we all make mistakes. That's a platitude, but in this course we will try to say more. Through reading and discussion of classic and recent work by philosophers and psychologists, we'll think carefully about error and the significance of error for our intellectual lives. What factors lead us to err? What kinds of mistakes are there to make? What's the reasonable response to learning that we may have make an error? What can be done to get things right more often? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4104. The Philosophy and Economics of Law. (4 Credits)
This course examines the different ways in which philosophers and economists think about the law, with a focus on property, tort, contract, and criminal law. Readings are both historical and contemporary. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4105. Seminar: Philosophy and Media. (4 Credits)
Philosophy has been concerned with media since Plato's Phaedo. Beginning with a discussion of orality and literacy and moving to explore so-called “new media,” including cell phone accessibility and its texting culture to the Twitter and Instagram suffusion of everyday life, faxes/ email, Facebook, YouTube, etc. Participants will also review the signal change in the 19th C. from traditional print forms to photography, films, and recording. Examining the change wrought by technological means of reproduction on human life and expression. Possible authors include Benjamin, Adomo, Illich, de Certeau, Anders, Kittler, Attali, Baudrillard, Vinilio, and Laruelle. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4106. Contemporary Issues in Metaethics. (4 Credits)
Metaethics steps back from moral debates to ask metaphysical, epistemological, and semantic questions about morality itself. The metaphysical questions seek to understand the nature of morality, asking questions such as: are there objective moral facts, or is morality culturally determined? If there are objective moral facts, are they like scientific facts? The epistemological questions seek to understand how we can know or be justified in believing moral claims. The semantic questions seek to understand what we mean when we use moral terms: are we making truth claims or are we just expressing our feelings? In this course, we will explore contemporary answers to these kinds of questions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4107. Environmental Worldviews and Ethics. (4 Credits)
Survey of environmental philosophy worldviews and ethics such as the universe story, deep ecology, the land ethic, zoocentrism, biocentrism, ecofeminism, ecotheology, utilitarian economics, environmental pragmatism, ecological virtue ethics, and environmental justice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4108. Tutorial. (3 Credits)
Independent research and reading with supervision from a faculty member.

PHIL 4109. Politics and Biopower. (4 Credits)
This course will examine the recent trend in Continental Philosophy that makes central the concept of life in understanding contemporary politics. The primary focus will be on the work of Michel Foucault and Giorgio Agamben, with readings also by Carl Schmitt, Hannah Arendt, Judith Butler, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4110. Modern Ethical Theories. (4 Credits)
This course is an introductory survey of major theories and themes in twentieth-century moral philosophy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4111. Seminar: Justice and Social Identity. (4 Credits)
This senior values seminar examines the multicultural environment of today's Western democracies which demands group recognition that challenges prevailing conceptions of justice and selfhood, and forces philosophers to rethink how our personal identity is formed and interpreted in relation to society. Ethnic and cultural aspects of personal identity and their implications for pressing issue in democratic justice will be studied. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4112. Happiness and Well-Being. (4 Credits)
An investigation into the nature and value of happiness and well-being (understood as connected concepts) from the perspective of both psychology and philosophy. Emphasis will be placed on research about the topic in each discipline, but efforts will also be made to explore fruitful interactions between the two disciplines in understanding the topic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4113. Environmental Policy and Ethics. (4 Credits)
This seminar is designed primarily for philosophy, environmental studies and natural science majors and presuppose substantial previous course work in one or more of these disciplines. Using these disciplines, the ethical dimensions of environmental problems will be explored from an interdisciplinary perspective. Requirements include a 40 page essay blog, three class presentations, and a hands-on learning practicum outside of class (minimum 1 hr per week). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4114. Human Error: Philosophical and Psychological Perspectives. (4 Credits)
This course takes error in human judgment and reasoning as its central topic. Human error is something we know about firsthand: we all make mistakes. That's a platitude, but in this course we will try to say more. Through reading and discussion of classic and recent work by philosophers and psychologists, we'll think carefully about error and the significance of error for our intellectual lives. What factors lead us to err? What kinds of mistakes are there to make? What's the reasonable response to learning that we may have make an error? What can be done to get things right more often? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4115. The Philosophy and Economics of Law. (4 Credits)
This course examines the different ways in which philosophers and economists think about the law, with a focus on property, tort, contract, and criminal law. Readings are both historical and contemporary. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
PHIL 4305. The City as Text: Modernity and Modernism in London. (4 Credits)
This course examines the relationship between theoretical ideas of modernity and the literature and art criticism of modernism, with London as its cultural geography. Philosophical descriptions of modernity and theories of Marx, Darwin and Freud serve as a basis for understanding transformations in human self-understanding that characterize the mid 19th to early 20th centuries. We examine modern literary works influenced by these transformations, all written and set in London, by Dickens, Kipling, Rhys, Woolf, Eliot, Yeats, and the modernist art critics Fry and Hulme. Interconnections between theory, literature, and art are emphasized through readings and excursions in the city. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4310. Human Rights in Context. (4 Credits)
Human rights have become a universal language of protest. When and how did this happen? What are human rights and how and why are they justified? Do they mean the same thing in all the contexts in which they are invoked around the world? To address such questions we focus on how different methodologies – mainly historical, philosophical, and ethnographic – produce knowledge about human rights. For instance, what can we learn by identifying historical continuities and discontinuities between different conceptions of rights? What can we learn about human rights from the kind of conceptual analysis that many philosophers do? How can the "thick description" of ethnography help us understand the meaning and effects of human rights discourse in various settings? Finally, can historical, philosophical, and ethnographic approaches to human rights be fruitfully combined? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, ICC, PJCR, PJIN, PJST.
Prerequisite: PHIL 3000.

PHIL 4315. Jane Austen and Moral Philosophy. (4 Credits)
This course will examine the novels of Jane Austen as works of moral philosophy, asking both how these works of fiction can be considered as such and also what moral questions and positions we can find in them. Moral topics to be considered include the role of emotions in morality, moral education and the cultivation of virtue, moral perception and judgment, and the relation of the individual to society. We will also read selections from works (philosophical and literary) by authors who were near contemporaries of Austen’s, including Samuel Johnson, David Hume, Jane Collier, Hannah More, Adam Smith, and Mary Wollstonecraft. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ICC.
Prerequisite: PHIL 3000.

PHIL 4405. Freedom of Expression and Toleration. (4 Credits)
This course will examine ethical and political questions regarding freedom of expression and toleration. We live in a world of diverse viewpoints and diverse religious beliefs. In the United States, the freedom to express these viewpoints and exercise those religious beliefs is guaranteed by the First Amendment. But what ethical and political values can be taken to underlie these rights? How should the state act in order to uphold those ethical and political values? How should the state act in order to uphold those ethical and political values? How should individuals react when encountering viewpoints and beliefs at odds with their own? And how might underlying ethical and political values guide us regarding controversial cases of free expression? This course will attempt to answer these questions. The course will focus primarily on the philosophical foundations of free express and religious toleration but will also consider how those philosophical foundations relate to further controversial cases of speech. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, VAL.

PHIL 4407. Gender, Power, and Justice. (4 Credits)
The seminar examines the impact of gender norms, roles and assumptions on the moral structure of social life. The seminar will draw on the extensive materials available from feminist theory of ethics, law, and society; the developing body of work on the cultural construction of masculinity, and its moral and social impacts; and new interest in gender differences and women's welfare in global context. The subject cannot fail to be fundamental to student's personal experiences of social and political life. especially as they make the transition from college years to the workplace or to professional training. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPJ, ASHS, EP4, VAL, WGSS.

PHIL 4408. Hospitality and Cosmopolitanism. (4 Credits)
This course examines contemporary approaches to hospitality as it relates to 'otherness' and cosmopolitanism. Issues addressed include personal and political forgiveness, representations of cultural and racial 'others' in media and literature, and the relation between the search for identity and openness to foreigners. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, OCHS, OCST, VAL.

PHIL 4409. Environmental Ethics. (4 Credits)
This senior values seminar surveys major theories in environmental ethics dealing with our moral duties regarding nature, including environmental stewardship, sustainable development, environmental justice, ecological virtue ethics, animal rights, biocentrism, Leopold's land ethic, and ecological feminism. It has not only philosophical but also scientific, economic, political, and design dimensions, as it deals with such topics as global warming, alternative energy, pollution control, suburban sprawl, deforestation, biodiversity loss, and the prospect of a sixth mass species extinction event threatening the future of human and nonhuman life as we know it. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENMI, ENST, EP4, ESEJ, ESEJ, PHMP, PJEN, PJST, VAL.
Mutually Exclusive: PHIL 3109.
PHIL 4410. Love and Empire. (4 Credits)
Previously PHIL 3510. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CLAS, EP4, PHAN, VAL.

PHIL 4412. Classical Values: Art of Living. (4 Credits)
This course considers the art of living a human life, focusing on classical values including poetry and philosophy, with special attention to the Stoic conception of the cultivation or care of the self. Readings include Homer and Pindar as well as Epictetus and Marcus Aurelius and commentaries ranging from Nietzsche and Foucault to Pierre Hadot, Alasdair MacIntyre, and Alexander Nehamas. Previously PHIL 3512. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CLAS, EP4, VAL.

PHIL 4413. Religion and Morality. (4 Credits)
An exploration of the religious life in terms of the question, What does it mean to be religious? The seminar will then study differing views of the relation of the religious to the moral life, personal and social, including the formation of conscience and moral judgment, from writers such as Augustine, Kierkegaard, Kant, Levinas and Marx. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CLAS, EP4, VAL.

PHIL 4416. Art, Morality, and Politics. (4 Credits)
The seminar explores the inter-relationship among artistic, moral and political values. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMCS, AMST, APPI, ASHS, ASRP, BEVL, BIOE, EP4, HHPA, HUST, LPHP, REST, VAL.

PHIL 4418. Issues of Life and Death. (4 Credits)
The objective of this course is to make students aware of several issues in biology and medicine that require moral reflection, judgment, or decision, while also indicating how justified moral conclusions are reached. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMCS, AMST, APPI, ASHS, ASRP, BEVL, BIOE, EP4, HHPA, HUST, LPHP, REST, VAL.

PHIL 4422. Harry Potter and Philosophy (ICC). (4 Credits)
This course will use the Harry Potter novels to explore several central themes in philosophy, and will use philosophical analysis to interpret the books and their cultural impact. Some central topics of the course will include: the nature and relationships of minds, souls, and bodies; the conflict of good and evil and some related issues in moral psychology and the ethics of 'love'; metaphysical implications of the magical world of HP and its enchantment of muggles. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, CCUS, ICC.

PHIL 4423. Business Ethics. (4 Credits)
Business ethics is the study of moral values and conduct in business institutional contexts. The seminar will combine study of ethical theories with analysis of case studies involving real-world ethical issues that managers, employees, firms and other business stakeholders are dealing with today and that members of the class may face in the future. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, PJEC, PJST, VAL.

PHIL 4425. Buddhist Moral Thought. (4 Credits)
This course focuses on Buddhist ethical thought and practice, as well as interpretations and developments of this from Western perspectives. We will discuss topics such as karma, happiness, enlightenment (nirvana), meditation and moral development, emotions such as compassion and anger, as well as free will, responsibility, and determinism. We will also examine practical issues such as human rights, environmental ethics, and war and violence. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, INST, ISAS, VAL.

PHIL 4430. Education and Democracy. (4 Credits)
In this seminar we will investigate the relationship between education and democracy. In what ways does democracy depend on education? Do some educational practices promote democratic values better than others? Should education be in the service of politics at all? We will examine answers to these questions and others found in a number of different philosophical traditions, reading the work of authors such as John Dewey, Paolo Friere, bell hooks, Martha Nussbaum, and Jacques Ranciere. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, VAL.

PHIL 4436. Rethinking Citizenship. (4 Credits)
This course will reflect on the concept of citizenship, the rights and responsibilities, the practice of citizenship and some contemporary challenges to the notion of citizenship. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, LALS, VAL.

PHIL 4442. Fantasy and Philosophy. (4 Credits)
An interdisciplinary study of moral themes in J.R.R. Tolkien’s ‘Lord of the Rings.’ The course focuses on Tolkien’s artistic treatment of such philosophical questions as the lure of power, good and evil, freedom and fate, the nature of the divine, the natural environment and the function of literature in human life. We may consider similar themes in the works of other prominent fantasy authors. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, MVPH, MVST, VAL.

PHIL 4444. AI, Sci Fi, and Human Value. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, COMC, COMM, EP4, VAL.
Prerequisite: PHIL 3000.

Updated: 07-27-2020
PHIL 4455. Respectful Disagreement. (4 Credits)
This seminar concerns a problem that has broad practical implications, concerns how we should conduct our intellectual lives, and is of great interest in philosophy: what should we do when we find out that someone we consider just as intelligent and informed as we are on a certain topic disagrees with us on that topic? If we stick with our opinioon are we being arrogant? If we give up our old belief are we considered spineless? We all hold opinions we know are denied by people we consider our peers or even superiors on the relevant topic, whether it's religious, political, or specific to our favorite fields of study. This seminar examines this common situation. Previously PHIL 3255. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, VAL.

PHIL 4469. Sex, Love, and the Virtues. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, VAL.

PHIL 4470. Lincoln: Democratic Values. (4 Credits)
This senior seminar will survey key themes in American political philosophy from the Federalist Papers to the Lincoln-Douglas Debates, focusing on rival conceptions of the moral conditions that must be met for democratic government to count as legitimate, or capable of making law that deserves our principled allegiance. Using famous texts by Henry Jaffa and Gary Wills, we will consider the relation between popular sovereignty and human rights; the balance between personal conscience and constitutional order; and arguments for greater centralization of power for essential coordination and to secure basic justice. We will reconstruct this ideal of democratic justice from the tradition of 'civic republicanism' as it developed in the Federalist and Whig parties up to 1860. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, PJCR, PJST, VAL.

PHIL 4473. War and Peace: Just War Theory. (4 Credits)
This seminar in applied ethics will examine the history and development of just war doctrine with special attention given to its medieval and classical theorists, e.g., Augustine, Aquinas, Vitoria, Suarez and Grotius. Students will debate the central questions just war theory was developed to address: what war is, whether war may be waged, and if so under what circumstances and in what ways. Before investigating just war theory, students will examine two rival ethical theories about war, namely, pacifism and realism. The closing weeks of the semester will focus on current issues and challenges for just war doctrine, especially preemptive war, terrorism, and counter-insurgency. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEVL, EP4, INST, ISIN, MVPH, MVST, PJCR, PJIN, PJST, PJWT, REST, VAL.

PHIL 4480. Technology and Values. (4 Credits)
This senior values seminar examines the challenge that modern technology presents to our traditional ethical standpoints and, ultimately, to the very idea of an ethical culture insofar as modern technology has shifted from merely serving the culture to shaping the culture in fundamental ways regarding the measure of our humanity. Previously PHIL 3180. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, VAL.

PHIL 4484. Freedom and Responsibility. (4 Credits)
The course will investigate several problems concerning freedom, responsibility and the morality of punishment. Is freedom possible in a world completely governed by physical laws? How can I be blamed (or praised) for my actions, given that upbringing, character, and environment are largely matters of luck? Is the practice of punishing criminals morally justifiable? How? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, BIOE, EP4, VAL.

PHIL 4486. Evil, Vice, and Sin. (4 Credits)
This senior values seminar takes a negative strategy in approaching moral questions by focusing on actions labeled 'evil', 'vicious', 'sinful' in order to create an opportunity for reflecting on the reality and experience of evil from which we might evolve some positive conception of 'value' as well as the context and nature of moral choice and conscience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASRP, EP4, VAL.

PHIL 4800. Internship. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4911. Seminar: Nietzsche. (4 Credits)
Typically linked to the doctrine of Will to Power and the claim 'God is dead,' Nietzsche taught and wrote on Classical Greek antiquity for a decade before retiring to write his most famous works. Students will have an opportunity to read and debate his books from The Birth of Tragedy out of the Spirit of Music to The Antichrist. We will also discuss his challenges to the idea of truth and lie, including his epistemology, and his paradoxical thought experiment: "the eternal return of the same." Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: PHIL 1000 or PHIL 1001 or PHIL 1002 or PHIL 10003 or HPRH 1002.

PHIL 4990. Senior Thesis: Philosophy. (4 Credits)
A work of supervised philosophical research of at least 10,000 words. To register students must get the permission of the associate chair for undergraduate studies in the Spring semester of their junior year.

PHIL 4999. Independent Study. (1 to 4 Credits)
Supervised individual study project.
PHIL 5001. Introduction to Plato. (3 Credits)
Study of Plato's developing thought, starting with the materials he inherited from poetic and philosophical forerunners, and analyzing how his original ethical-political interests compelled him to confront epistemological, metaphysical, and theological concerns. Course will focus mainly, but not exclusively, on early and middle dialogues.
Attributes: CEED, CEMP, CLAS, MVSG, PGAN.

PHIL 5002. Nineteenth Century Philosophy. (3 Credits)
Post-Kantian developments in philosophy from Hegel to Nietzsche.
Attribute: PGCM.

PHIL 5003. Natural Law Ethics. (3 Credits)
A study of the natural law tradition in ethics: its origins in classical philosophy, its integration with Christian thought in the Middle Ages, and its application to selected contemporary problems. A study of the principles of natural law ethics and its applications to selected current moral problems. The course includes a treatment of the historical origins of the theory of natural law, with special emphasis on the relevant texts of Thomas Aquinas from the Summa Theologicae. Among the topics treated will be the relation of morality to positive law and to divine law, the nature and limits of authority, the common good, the nature of the human person, virtue and vice, and such principles as subsidiarity double effect, and finality.
Attributes: CEED, CEMP, HECH, PGOC.

PHIL 5005. Classical Modern Philosophy. (3 Credits)
A study of the history of philosophy from Descartes to Kant.
Attribute: PGCM.

PHIL 5009. Introduction to Aristotle. (3 Credits)
An introduction to the thought of Aristotle through the study of the De Anima and the Metaphysics.
Attributes: CEED, CEMP, MVSG, PGAN.

PHIL 5010. Introduction to St. Thomas Aquinas. (3 Credits)
This course will be a general introduction to Aquinas's philosophical thinking. We shall pay special attention to his philosophy of God. We shall also turn to what he says about questions such as the scope of human knowledge, the nature of the human being, and the nature and significance of human action. As well as being expository, the course will consider the cogency of Aquinas's position on various topics. It will also try to relate what Aquinas says to what other philosophers, especially modern philosophers, have had to say. The course will not presuppose any previous detailed knowledge of Aquinas on the part of students.
Attributes: CEED, CEMP, MVSG, PGMD.

PHIL 5012. Introduction to St. Augustine. (3 Credits)
This seminar provides a systematic survey of the main themes of St. Augustine's philosophy and theology. Topics will include faith and reason, divine ideas, time, eternity, and creations, the theology of the Holy Trinity, the nature of the soul, the freedom of the will and divine predestination, good and evil, original sin and divine grace, and the human history as the history of salvation. The unifying theme of the discussion will be a synthetic account of St. Augustine's Neoplatonic Christian anthropology, occasionally contrasted with St. Thomas Aquinas' Aristotelian Christian anthropology. The discussion will be organized around student presentations and two term papers on topics other than one's presentation topics.
Attributes: CEED, CEMP, MVSG, PGMD.

PHIL 5051. Existentialism and Critical Phenomenology. (3 Credits)
This course studies the 20th-century French existential phenomenologists as germinal for the contemporary critical turn in phenomenology. Readings will be both classical and contemporary, and authors may include Husserl, Sartre, Merleau-Ponty, Beauvoir, Fanon, Ahmed, Guenther, Al-Saji, Ortega, and Salamon.
Attribute: PGCC.

PHIL 5075. Continental Philosophy and Faith. (3 Credits)
A survey of significant movements in 20th century European philosophy in regard to their consideration of and impact on questions of faith or religion, especially in regard to postmodern culture, the 'death' of the subject, and the grounding of rationality.
Attribute: PGCC.

PHIL 5098. Sem: Philosophic Integration 1. (3 Credits)
This course supports the student in constructing an adequately grounded and coherent personal synthesis of the five systematic areas of philosophy, i.e., metaphysics, epistemology, philosophy of the human person, philosophy of God, and ethics. Appropriate course work in each of these areas, as well as in the history of philosophy, is presupposed. For students in MAPR program.

PHIL 5099. Sem: Philosophic Integration 2. (3 Credits)
A continuation of PHIL 5098, Seminar: Philosophical Integration I.

PHIL 5100. Logic I. (3 Credits)
An introduction to symbolic logic.

PHIL 5114. Normative Ethical Theory. (3 Credits)
This is a masters-level introduction to major theoretics approaches in normative ethics, including virtue ethics (mainly in the Aristotelian tradition), utilitarianism, deontological or rights-based theories, and contractualism. It does not cover natural law theories or alterity ethics. The main readings will focus on contemporary examples of these normative theories with some attention to applications, historical sources may be included as needed, but our discussion will focus on the strengths and weaknesses of the theories rather than on historical developments. The course assumes no particular background, though it is helpful if students have read some Aristotle, Kant, and Mill before.
Attributes: CEED, CEMP, HECH, PGCA.

PHIL 5209. Ancient Philosophy. (3 Credits)
This course studies major figures at the foundation of Western philosophy, reflecting on the questions the philosophers posed and the teachings they developed in response. Pre-Socratics, Plato, Socrates and Aristotle, as well as Stoics and Epicureans are among those to be examined. There will be opportunities to connect the ideas of Greek and Roman antiquity with early Eastern philosophies as well as later Western philosophies.
Attribute: PGAN.
PHIL 5305. Confronting Moral Controversy. (3 Credits)
Moral and political controversy is everywhere, but it can seem like it never gets anywhere. Our society is deeply divided over certain controversial topics—such as abortion, affirmative action, animal rights, free speech, pornography, and climate change. This course will ask students to confront these moral controversies, and it will focus primarily on developing three crucial skills. First, students will learn to read and interpret influential articles by moral philosophers on these issues. Second, students will develop the ability to argue productively about these controversial issues with other students who might not share their opinions. Third, each student will develop and defend a moral principle (or set of principles) that can justify their own particular moral views. Students should leave the course better equipped to deal with moral and political controversy in their lives and careers.

Attributes: CEED, CEMP CETH, PGCA.

PHIL 6025. Philosophy’s Origins. (3 Credits)
Starting with the beginnings of Philosophy in Greek antiquity (i.e., the testimonies and fragments of works transmitted from the early pre-Socratics of the 6th century B.C.E), the seminar takes up three intersecting topics. The first considers commentary from the classical Greek era to the 20th century on how and why this new inquiry, ‘philosophy’, originated. The second, related topic is the role, indeed the centrality, of the topic of ‘origins’ for the early Greek thinkers themselves. The third seminar topic is the concept of ‘origins’.

Attribute: PGAN.

PHIL 6120. Democratic Political Economy. (3 Credits)
This course investigates the contributions philosophy has to make to the interdisciplinary project of developing a general, context-sensitive, and justice-oriented framework for democratic political economy. The thinkers discussed come from a variety of traditions, including analytic philosophy, pragmatism, feminism, critical theory, African-American philosophy, and indigenous philosophy.

Attribute: PGOC.

PHIL 6190. Feminist Political Philosophy. (3 Credits)
We will balance a study of feminist critiques with a study of feminist contributions to reimagining political theories, institutions, and practices. We will focus our study around a current scholarly debate in the field, while inquiring into the philosophical context of this debate in canonical texts and figures.

Attribute: PGOC.

PHIL 6215. French Phil of Education. (3 Credits)
An examination of philosophies of education in recent French thought, paying particular attention to the teaching of philosophy itself. Authors studied include Bourdieu, Derrida, Le Doeuff, and Ranciere.

Attribute: PGOC.

PHIL 6242. Language and Identity. (3 Credits)
In this course we will examine the relationship between language and identity, primarily as it is theorized by three thinkers writing in French: Jacques Derrida, Edouard Glissant, and Barbara Cassirer.

PHIL 6251. American Pragmatism. (3 Credits)
A survey of the central themes and figures of American Pragmatism from Peirce to the present.

Attribute: PGOC.

PHIL 6252. American Philosophy. (3 Credits)
From transcendentalism to naturalism: Emerson, Royce, Peirce, James and Dewey.

Attribute: PGOC.

PHIL 6270. Pragmatist Ethics. (3 Credits)
This course will consider the elements of ethics present in the tradition of American pragmatism from roughly 1860 to 1960. We will engage with texts from some or all of the following thinkers: Charles Peirce, William James, Jane Addams, W.E.B. Du Bois, John Dewey, Ella Lyman Cabot, George Santayana, Josiah Royce, George Herbert Mead, Alain Locke, and Clarence Irving Lewis.

Attribute: PGOC.

PHIL 6410. Understanding and Wisdom. (3 Credits)
The course will mainly deal with contemporary work from epistemology and philosophy of science on these topics, but we will also look at some ancient traditions that are relevant, as well as spend a few classes looking at continental and hermeneutical approaches.

Attribute: PGCA.

PHIL 6420. Expertise. (3 Credits)
Specialization and division of labor have scored tremendous gains in human knowledge. We live in a world of expertise and experts. But the mere existence of expertise does not settle all of the practical and intellectual questions we face about properly taking advantage of expertise—and not being taken advantage of by experts who mislead and misinform. Over the past couple of decades, philosophical questions about expertise, trust in experts, and the abuse of expertise have gained attention, and that growing literature will be our focus in this seminar. Here are some of the questions we will consider. What is the nature of expertise and the function of experts? Does the nature of expertise vary by field or domain? How can non-experts effectively identify expertise? What is required for non-experts to trust experts reasonably or rationally? How can experts effectively signal their credentials and reliability to non-experts? When should conflicts of interest undermine the value of expertise or our trust in experts? What are the various misuses of expertise, and how can these be mitigated? Can there be expertise about philosophical topics? In the main, our readings will be from social epistemology and the philosophy of science, but some readings will be drawn from the social sciences, psychology, and the history of science.

Attribute: PGCA.

PHIL 6436. Philosophy of Time and Persistence. (3 Credits)
This course is an exploration of the contemporary analytic debates regarding the nature of time and ontological persistence, with special focus on the relationship between the human person and time.

Attribute: PGCA.

PHIL 6457. Mind-Body Problem. (3 Credits)
The ‘mind-body problem’ refers loosely to the philosophical difficulties involved in integrating the image of ourselves as free, rational beings having beliefs, desires, hopes, fears, joys, loves, etc. with the image of ourselves as complex biochemical systems. We consider some of these difficulties with an eye to understanding how they have shaped approaches to human nature both in philosophy and in scientific disciplines such as psychology, and then consider whether any of these difficulties can be overcome using the resources available to the currently dominant philosophical theories. Finally, we examine the claim that there are viable historical alternatives to these theories capable of circumventing the mind-body problem altogether.

Attribute: PGCA.

PHIL 6460. Intentionality. (3 Credits)
This course explores the key concept of intentionality both in its medieval and in its modern varieties, as it functions in various medieval and modern theories of cognition and mental representation.

Attribute: PGMD.
PHIL 6471. Responsibility and Blame. (3 Credits)
In this course: we will examine the nature of moral responsibility, the nature of blame, and the connection between them. We will ask questions such as the following. Does moral responsibility require free will? Can we understand blame exclusively in terms of attitudes such as resentment and indignation, or must blame have an outward manifestation? Does understanding the nature of blame shed light on the nature of moral responsibility?
Attribute: PGCA.

PHIL 6472. Responsibility, Blame, and Forgiveness. (3 Credits)
In this course, we will examine the natures of moral responsibility, blame, and forgiveness, as well as the connections between them.
Attribute: PGCA.

PHIL 6505. Medieval Philosophical Theories of the Fall. (3 Credits)
This course will be devoted to the study of some medieval interpretations of the Christian doctrines of the fall of the devil and of original sin. The focus will be philosophical. We will study the positions of Anselm of Canterbury, Thomas Aquinas and John Duns Scotus. Some of the questions taken into account will be: 'Is it possible to choose evil for evil's sake?' and 'What is the motive of a morally wrong action?'
Attribute: PGAN.

PHIL 6580. Virtue Epistemology. (3 Credits)
Virtue epistemologists are especially interested in what it is that makes people intellectually excellent- what it is, for example, that makes a person a responsible inquirer, of what is that makes his or her beliefs amount to knowledge. In this class we will consider the main positions and some of the most recent developments in the area of virtue epistemology.
Attribute: PGMD.

PHIL 6630. Discourse Ethics. (3 Credits)
This seminar will trace the development of Jurgen Habermas's 'discourse ethics.' We will also analyze alternative versions of discourse ethics in the work of Karl-Otto Apel, Albrecht Welmer, Seyla Benbabib, and Rainer Forst, and consider challenges from communitarians like Charles Taylor and contractualists such as Thomas Scanlon and Stephen Darwall.
Attribute: PGCC.

PHIL 6680. Discourse Ethics. (3 Credits)
This course examines ancient accounts of human cognitive and moral psychology. The primary focus will be on Plato and especially Aristotle, since their accounts are the most complete, but Epicurean and Stoic psychology will also receive attention.
Attribute: PGAN.

PHIL 6680. Topics in Phil of Rel.. (3 Credits)
This course will introduce and discuss a range of topics in the philosophy of religion. Topics to be considered will include: the propriety and possibility of natural theology; arguments for God's existence; the problem of evil; the attributes of God; life after death.
Attribute: PGCA.

PHIL 6800. Hermeneutics. (3 Credits)
This course provides a general introduction to contemporary hermeneutics, with a special focus on the problem of the relation between subject and text.
Attribute: PGCC.

PHIL 7009. Plotinus. (3 Credits)
This course will examine in detail Plotinus' original positions in metaphysics, epistemology, psychology, and ethics as presented in the Enneads along with his polemics against the Stoics, Epicureans, Peripatetics, and quasi-philosophical schools such as the Gnostics.
Attribute: PGAN.

PHIL 7012. Plato's Dialogues. (3 Credits)
By most counts, Plato wrote 28 dialogues that are recognized as genuine. These dialogues vary greatly in length, content, and approximate time of composition. Most people, including philosophers, have an acquaintance with only a few of these dialogues, for instance, the Phaedo, Meno, Apology, and Republic, all of which probably belong to one period of Plato's writing. An accurate understanding of Plato's philosophy must be based on the study of his entire philosophical corpus. This might be said of any philosopher, but Plato is unique because he never reveals what his own philosophical commitments are. We need all the help we can get to understand him. It would be impossible to study all 28 dialogues in one semester. The Laws, for instance, are 339 tedious Stephanus pages long. It is assumed that some dialogues are familiar to students. The course will therefore cover as many unfamiliar but nevertheless important dialogues as possible from all periods of Plato's writing. The general content and purpose of each dialogue will be debated, and then central, especially significant passages will be discussed in some detail with the help of secondary literature. Student involvement with what will be covered and how to interpret it is expected.
Attribute: PGAN.

PHIL 7018. Ancient Psychology. (3 Credits)
This course examines ancient accounts of human cognitive and moral psychology. The primary focus will be on Plato and especially Aristotle, since their accounts are the most complete, but Epicurean and Stoic psychology will also receive attention.
Attribute: PGAN.

PHIL 7031. Alienation and Reification. (3 Credits)
This seminar traces the development of two central concepts in critical social theory with the aim of evaluating their current relevance for social criticism. We begin with Marx and Lukács and then consider their influence on Frankfurt School theorists such as Horkheimer, Adorno, and Habermas. We conclude with recent attempts by Honneth and Jaeggi to rejuvenate the two concepts within social philosophy.
Attribute: PGCC.

PHIL 7039. Aquinas's Philosophy of God. (3 Credits)
This course is devoted to explaining and commenting on Aquinas's philosophy of God and presented in texts such as his Summa Contra Gentiles, his Summa Theologiae, and his De Potentia. Attribute: PGMD.

PHIL 7042. Buridan on the Soul. (3 Credits)
This course is going to be based on the new edition of the Latin text and annotated translation of Buridan's 'Questions on Aristotle's De Anima' along with a companion volume of critical essays, analyzing his sometimes astonishingly modern ideas concerning the nature, powers and workings of human and animal souls, consciousness, and understanding, shedding a stark light on the historical origins and conceptual roots of some of the most persistent problems in post-Cartesian philosophy of mind.
Attribute: PGMD.

PHIL 7058. Bonaventure's Metaphysics. (3 Credits)
This course is a survey of the metaphysics of Bonaventure, one of the important representatives of Scholastic thought. Students will investigate major elements of his ontology and natural theology. Particular attention will be given to his treatment of the transcendentals, analogy, and his apophteticism.
Attribute: PGAN.
PHIL 7069. Medieval Logic and Metaphysics. (3 Credits)
This seminar is going to approach medieval logic and metaphysics not as a piece of history, but as genuine philosophy, to be taken seriously by a contemporary philosopher. The course is going to present an extended argument to show that if medieval metaphysical notions are reconstructed against their proper theoretical background (supplied by the sophisticated logical theories of the medievals, as opposed to modern analytic theories or vague historical intuitions), then they can provide us with a comprehensive, unified conceptual framework for discussing our genuine concerns which is unmatched in our fragmented “post-modern” culture. Although this course is primarily offered for philosophers, philosophically-minded medievalists and theologians may profit from it as well, especially if they are interested in tackling the logical subtleties of medieval metaphysical and theological discussions, No previous training in modern (or traditional) logic will be assumed. Main topics of discussion include: meaning (signification) and reference (supposition) in medieval logic; universals and common natures; mental language; nominalism, realism and ontological commitment; the concept of being and theories of the copula; the existence and essence of God; the immateriality of the intellective soul and the hylomorphic mereology of human nature; essentialism, nominalism and skepticism in late-medieval philosophy.
Attribute: PGMD.

PHIL 7071. Aquinas: Questions on God. (3 Credits)
Attribute: PGMD.

PHIL 7076. Metaphysical Themes in Duns Scotus. (3 Credits)
This course focuses on central metaphysical issues in the thought of Duns Scotus, such as being, substance, essence and individuation.
Attribute: PGMD.

PHIL 7080. Medieval Views on Cognition and Certainty. (3 Credits)
In this course, we will study some medieval thinker’s views on cognition and certainty. The main focus will be on the debate of cognition and the role of divine illumination in the years following Thomas Aquinas’s death in authors such as Henry of Ghent, John Duns Scotus, and Peter Auriol. Some consideration will be given to the influence that the later medieval debate had on early modern philosophy.
Attributes: MVSG, PGMD.

PHIL 7106. Kant I. (3 Credits)
The aim of this course is to achieve an appreciation of, and some facility with the problems and mode of philosophizing that dictate the arguments in Kant’s Kritik der reinen Vernunft. Accordingly, the course is organized along thematic lines that, while corresponding to specific passages and sections of the Kritik, provide a route through the text as a whole. After an initial introduction to the structure and context of teh work as a whole, the course will focus primarily on the positive doctrines of Kant’s critical or transcendental philosophy as presented in the Transcendental Aesthetic and the Transcendental Analytic of the Transcendental Logic.
Attribute: PGCM.

PHIL 7110. Descartes and Spinoza. (3 Credits)
Primarily a study of Descartes’ Meditations, preceded by a reading of his Regulae and Discourse on Method, and a study of Spinoza’s Ethics, preceded by a reading of his Emendation on the Understanding and selections from other works.
Attribute: PGCM.

PHIL 7122. The Limits of Thought in Kant and Post-Kantian Philosophy. (3 Credits)
In the Critique of Pure Reason, Kant argues that the categories provide a priori knowledge of appearances but cannot yield knowledge of things in themselves. Kant’s claim raises a general question about the limits of conceptual thought. This course will examine the development of this question in Kant and post-Kantian thought.

PHIL 7140. Kant and German Idealism. (3 Credits)
This course will examine Kant’s detailed treatment of issues in the Critique of the Power of Judgement and will examine how thinkers like Hegel, Schelling, and Schiller helped to develop the German Idealist tradition in the wake of Kant’s third and final critique.
Attribute: PGCM.

PHIL 7145. Phenomenology and Religious Experience. (3 Credits)
This course is a philosophical investigation into major traditional and contemporary forms of religious life and experience, such as asceticism, liturgy, monasticism, mysticism, spirituality, and fundamentalism.
Attribute: PGCC.

PHIL 7149. Hegel’s Phenomenology. (3 Credits)
A reading of Hegel’s Phenomenology of Spirit, in the context of his other writings and in conversation with various other philosophers.
Attribute: PGCM.

PHIL 7153. Husserl’s Later Thought. (3 Credits)
An investigation of Husserl’s later philosophy by way of a careful reading of Cartesian Meditations and the Crisis.
Attribute: PGCC.

PHIL 7156. Husserl and Heidegger. (3 Credits)
This course will examine the relation between Husserl and Heidegger at two points of direct contact: (1) Heidegger’s discussion of Husserl’s phenomenology in his 1925 Marburg lectures, and (2) the failed attempt at collaboration in co-authoring an article on phenomenology for Encyclopedia Britannica. We shall examine the first by reading the relevant sections of Husserl’s Logical Investigations and the first volume of Ideas for a Pure Phenomenology and Phenomenological Philosophy, volume 1, before turning to the first part of Heidegger’s History of the Concept of Time. We shall examine the latter by reading the various drafts of the article and the relevant correspondence as presented in Psychological and Transcendental Phenomenology and the Confrontation with Heidegger (1927–1931). Where appropriate, we shall also look at relevant selections from Husserl’s “Ideas,” volume 2, his Cartesian Meditations and Crisis as well as Heidegger’s Being and Time.
Attribute: PGCC.

PHIL 7157. Phenomenology. (3 Credits)
This course will examine some of the major themes in the phenomenological literature: methodology; intentionality; and self-awareness; embodiment; subjectivity; agency and action; the Other; and social cognition. Readings will include both historical and contemporary figures.
Attribute: PGCC.

PHIL 7159. Kierkegaard. (3 Credits)
Sources, development, influence of Kierkegaard’s thought.
Attribute: PGCC.

PHIL 7161. Nietzsche. (3 Credits)
Detailed investigation of principal Nietzschean themes.
Attributes: PGCC, PGCM.
PHIL 7164. First Philosophy: Nietzsche, Heidegger, and the Presocratics. (3 Credits)
This seminar focuses on Friedrich Nietzsche's lectures on The Pre-Platonic Philosophers and his essay on the tragic age in addition to Martin Heidegger's lecture courses and essays on Pre-Socratic thinking. Research emphasis highlights contemporary readings of the Presocratics.
Attributes: PGCC, PGCM.

PHIL 7166. Recognition and Intersubjectivity. (3 Credits)
This course will examine the notion of recognition, as well as the related notion of intersubjectivity, in philosophical discourses extending from the late eighteenth century to the present time.
Attribute: PGCM.

PHIL 7203. Merleau-Ponty. (3 Credits)
This course is a study of the development of the major themes of Merleau-Ponty's thought. Topics may include Merleau-Ponty's adaptation of phenomenology through his study of perception and embodiment, his philosophy of language and his engagement with structuralism, the relationship of phenomenology and ontology in his thought, his account of intersubjectivity, his account of time and institution, his engagement with psychoanalysis, his philosophy of the natural world and animality, his engagement with other thinkers such as Bergson or Sartre, his account of childhood and development, his political philosophy, and his influence on contemporary traditions such as critical phenomenology or theories of embodied cognition.
Attribute: PGCC.

PHIL 7204. Wittgenstein and Later Wittgenstein. (3 Credits)
A focus on Wittgenstein's classic texts (Tractatus, Philosophical Investigation, On Certainty) along with later receptions of Wittgenstein's work.
Attribute: PGCA.

PHIL 7210. Whitehead. (3 Credits)
An analysis of the development of the philosophy of organism in Whitehead's earlier works and its full expression in Process and Reality.
Attribute: PGOC.

PHIL 7215. Wittgenstein's 'Philosophical Investigations'. (3 Credits)
Following an introduction to the life and writings of Ludwig Wittgenstein (1889–1951), this course will consist of a detailed reading and discussion of his Philosophical Investigations. We will work through this text in class while trying to understand what it is saying. We will also aim to reflect on its philosophical value.
Attribute: PGCA.

PHIL 7229. Derrida. (3 Credits)
A study of major texts of Jacques Derrida dealing with such themes as writing, difference, and deconstruction, as well as his relation to traditional and contemporary figures.
Attribute: PGCA.

PHIL 7235. Husserl's 'Ideas II'. (3 Credits)
This course is a close reading of Book II of Husserl's Ideas Pertaining to a Pure Phenomenology and to a Phenomenological Philosophy, subtitled "Studies in the Phenomenology of Constitution".
Attributes: PGCC, PHCO.

PHIL 7236. The Emotions and Moral Perception. (3 Credits)
This course will examine phenomenological (and some comparable non-phenomenological) accounts of (1) the nature of the emotions and (2) their role in evaluation, in general, and moral evaluation, in particular.
Attribute: PGCC.

PHIL 7240. Contemporary Metaethics. (3 Credits)
Metaethics steps back from substantive moral debates to ask questions about morality itself. We will consider a range of positions in order to see the benefits and limitations of different ways of answering these questions, and each student will work at developing her or his own answers throughout the term.
Attribute: PGCA.

PHIL 7310. Self-Cultivation Philosophies. (3 Credits)
Self-cultivation philosophies propound a program of development for radically improving the lives of human beings on the basis of an understanding of human nature. We will study the nature and variety of these practice-oriented philosophies through an examination of prominent examples from ancient India, China and Greece as well as more recent approaches in Western philosophy.
Attribute: PGOC.

PHIL 7340. Humility and Arrogance. (3 Credits)
This course examines epistemological questions concerning humility and arrogance, taken in a broad sense to include open-mindedness, overconfidence, intellectual hubris, and dogmatism. What is humility and does it enhance our inquiry? Is arrogance ever beneficial in our pursuit of truth? Readings for the course focus on good inquiry, expertise, disagreement, and the nature of epistemic virtues and vices.
Attribute: PGCA.

PHIL 7350. Evidential Undermining. (3 Credits)
Sometimes we gain confidence that a belief is false. Sometimes we gain evidence that our grounds for a belief are not good grounds. The latter is a case of ‘evidential undermining’. We will explore several important recent arguments that purport to show that particular moral, philosophical, and religious beliefs face evidential undermining.
Attribute: PGCA.

PHIL 7370. Moral Emotions. (3 Credits)
This course explores historical engagements with the question of what role the emotions should play in our moral lives, focusing on, but not limited to, work from the Early Modern period. Topics to be covered may include: sympathy/empathy, pity and compassion, resentment and gratitude, shame and guilt, and pride and humility.
Attribute: PGCC.

PHIL 7459. Heidegger's Being and Time, Black Notebooks. (3 Credits)
We will read Heidegger's 1927 Sein und Zeit, which may be found in English in a range of translations, along with several other works in order to situate a reading of the recently published Black Notebooks, and even more recently translated for publication in English. The topic is not merely the controversial and scandalous question of what is called Heidegger's anti-Semitism but also the status of his published and unpublished writings in addition to the question of the question of the question of being.
Attribute: PGCC.

PHIL 7465. The Emotions. (3 Credits)
This course will examine and evaluate competing theories of the emotions, their relation to evaluation or values, their relation to action, and their relation to moral judgment and decision-making.
Attribute: PGCA.
PHIL 7580. Biopolitics and Necropolitics. (3 Credits)
Foucault, in The History of Sexuality, Volume 1, states that the 18th century witnessed the emergence of a new kind of power concerned with the control of life. This description of contemporary politics has given rise to rich debates on the question of the meaning of life and death in relation to political power. What kind of life is at stake in this description, and where is death in this account? What is the impact of race and gender in the analyses of power that Foucault provides? We will start with Foucault’s lecture courses from the Collège de France from 1976 to 1978, where he develops his accounts on biopower and security. We will then bring these in dialogue with other accounts that focus primarily on the role of death, or what has come to be called “necropolitics,” as a kind of power that is concerned with regulation of death in politics. Readings include work from Giorgio Agamben, Achille Mbembe, Jasbir Puar, Judith Butler, and Saidiya Hartman.

Attribute: PGCC.

PHIL 7605. Philosophical Aesthetics. (3 Credits)
This course provides a general introduction to the study of philosophical aesthetics, with readings of works by figures from the history of Western philosophy up to today. Issues to be addressed might include the question of ’art’ itself, the meaning of the so-called ’end of art’, the role of the museum and gallery in the so-called ’art world’, the question of ’high’ and ’low’ art, feminist aesthetics, and environmental aesthetics.

Attribute: PGCC.

PHIL 7650. Aristotelian Ethics. (3 Credits)
This course, ’Aristotelian Ethics’ is centrally concerned with Aristotle’s book, ’The Nicomachean Ethics.’ We will work through the book in detail, mostly in the order that the text is presented. Along the way, we shall examine some relevant secondary literature in the field.

Attributes: CEEP, CEMP, PGAN.

PHIL 7664. Philosophy of Literature. (3 Credits)
Philosophy of Literature is devoted to studying the tensions and connections between philosophical analysis and the evocations and descriptions of literary experience. We will consider the philosophy of hermeneutics insofar as this grounds literary interpretation; the philosophical problems concerning the status of the author and the reader in respect to the generation of meaning; the ethics of literary representation; and the ontology of literary language. Our readings will be drawn from such sources as Gadamer, Sartre, Bachelard, Heidegger, iser, Natanson, Nehamas, Hamburger, and Blanchot.

Attribute: PGCC.

PHIL 7675. Moral Genealogies. (3 Credits)
In this course, we’ll explore the many ways in which moral ideas, beliefs, responses, practices, and institutions can be analyzed historically. Can such analysis deliver substantive and interesting normative conclusions? We will try to find out by studying such figures as Hobbes, Hume, Rousseau, Feuerbach, Nietzsche, Freud, and Foucault, as well as contemporary analytic ’debunking’ arguments made by Richard Joyce, Sharon Street, and Peter Singer.

Attribute: PGOC.

PHIL 7730. Recent Work in Epistemology. (3 Credits)
This seminar will examine recent articles and books in contemporary epistemology. The seminar’s themes will likely include: the nature of reasons and evidence, the challenge of skepticism, and the purpose of epistemological theorizing. The seminar’s texts will feature perspectives from traditional, social, feminist, and virtue epistemology.

Attribute: PGOC.

PHIL 7752. Divine Providence. (3 Credits)
This course will offer an exploration of the analytic tradition’s treatment of divine providence, focusing on traditional problems and contemporary solutions. The course would cover puzzles regarding free will and divine foreknowledge, along with Thomist, Molinist, Ockhamist, and Open Theist solutions to such problems. In so doing, the course will delve into contemporary debates on free will, grounding, modality, and propositions, as those debates determine what is an acceptable solution to questions about divine providence.

Attribute: PGCA.

PHIL 7758. Human Dignity. (3 Credits)
This seminar will focus on recent philosophical work on the concept of dignity. Issues discussed will include the connection between the idea of human dignity and equal status, the role of dignity in constitutional law, how various modes of social suffering and moral injury are tied to the concept of dignity, and the relation between the concepts of human dignity and human rights.

Attribute: PGOC.

PHIL 7760. Dimensions of Political Justice. (3 Credits)
An intensive introduction to key themes in contemporary analytic political philosophy, including contractarian and consequentialist theories of justice; human capabilities and other possible grounds for universal basic rights; collective action problems, market failures and public goods; other problems for libertarian conceptions of legitimate government (including equal opportunity, reward according to merit, and initial acquisition); and (time permitting) issues in global justice including globalizing democracy.

Attributes: CEEP, CEMP, PGCA.

PHIL 7857. Topics in Contmp Metaphy. (3 Credits)
The full course title is ‘Topics in Contemporary Metaphysics.’ In this course one central topic of current work in analytic metaphysics will be investigated thoroughly. The topics change every time the class is offered.

Attribute: PGCA.

PHIL 8001. Sem: Phil Education. (3 Credits)
Detailed investigation of methods in the teaching of philosophy and preparation for teaching Fordham core courses.

PHIL 8050. Proseminar: Philosophy Research/Writing. (0 to 3 Credits)
A detailed study of methods for successful philosophical research and writing.

PHIL 8070. Professional Writing Seminar. (0 Credits)
This seminar is designed to assist advanced graduate students in Philosophy and prepare for successful academic careers doing research and publishing in Philosophy. Participants will meet regularly to discuss student work and strategies for effective professional writing and success in publishing. This will assist them in preparing articles for publication in professional philosophy journals as well as developing writing samples for job applications. The seminar will be open to PhD candidates who have successfully defended a dissertation proposal. Students may repeat the course.

PHIL 8999. Independent Study. (0.5 to 4 Credits)

PHIL 9999. Independent Study. (0 Credits)

PHIL MTNC. Maintenance-Philosophy. (0 Credits)
Physics (PHYS)

PHYS 1201. Introduction to Astronomy. (3 Credits)
Includes discussions of the solar system, stars, galaxies and cosmology. Method of making observations. An investigation of physical phenomena including lenses spectroscopy and refraction. Direct observation through the telescope of celestial objects depending on their position and weather conditions. Astro photography and film development is also available. The lab is intended for the student with little mathematical background. Note that there will be regular night-time observation labs. (No lab fee).

Attribute: PSCI.

PHYS 1203. Environmental Physics. (3 Credits)
An introductory course for non-science majors. Topics include heat engines, energy supply and consumption, nuclear fission and fusion; renewable energy resources, fossil fuels, and acid rain. Emphasis will be on basic physical principles as applied to environmental issues. Course requirements include several laboratory experiments. The laboratory is designed to investigate various physical properties of the environment. Experiments will include water-testing and air quality measurements as well as the rudiments of electronic circuitry and the investigation of radioactivity in the environment. There is no lab fee.

Attributes: ENST, ESNS, ESPS, PSCI, SOIN, URST.

PHYS 1206. Physics of Everyday Life. (3 Credits)
An introductory course for non-science majors. Topics include physical phenomena that one comes across in everyday life. Physical principles will be explained and numerous examples—many from sports—will be presented. There will be multiple laboratory experiments that will give students a better understanding of several physical quantities. The experiments will illustrate aspects of mechanics, wave motion, heat and electricity and magnetism. There is no lab fee.

Attribute: CO09.

PHYS 1207. Physics of Light and Color. (3 Credits)
An introductory course for non-science majors. Topics include laser light and how lasers influence our lives, with examples from telecommunications, compact disk players, laser surgery, and holograms. An investigation of the human eye and the mechanism of color vision. Course requirements include several laboratory experiments. The laboratory is designed to investigate various physical properties of laser light and color. There is no lab fee.

Attribute: PSCI.

PHYS 1242. Science Fiction Physics. (3 Credits)
This course will use science fiction as a way to understand basic ideas in physics. Topics such as energy, momentum, mechanics, special and general relativity, among other areas of physics will be studied in the context of science fiction. We will use these physical ideas to determine in many cases whether or not various ideas (such as faster-than-light travel, teleportation, artificial gravity, and more) in science fiction stories would be viable.

Attribute: PSCI.

PHYS 1501. General Physics I. (3 Credits)
An introductory course in physics at the noncalculus level. A study of the basic laws of classical and modern physics, including mechanics, heat, sound, electricity and magnetism.

Attributes: ENST, ENVS, ESNS, ESPS.

Corequisite: PHYS 1503.

PHYS 1502. General Physics II. (3 Credits)
Continuation of PHYS 1501.

Corequisite: PHYS 1504.

PHYS 1503. General Physics I Recitation. (0 Credits)
Discussion and problem solving on topics to be covered in PHYS 1501 General Physics II.

Corequisite: PHYS 1501.

PHYS 1504. General Physics II Recitation. (0 Credits)
Discussion and problem solving on topics to be covered in PHYS 1502 General Physics II.

Corequisite: PHYS 1502.

PHYS 1511. Physics I Lab. (1 Credit)
Measurements in mechanics, heat, waves, electricity and magnetism, optics and atomic and nuclear physics. Lab fee.

Attribute: ENVS.

PHYS 1512. Physics II Lab. (1 Credit)
Continuation of PHYS 1511. Lab fee.

PHYS 1601. Introduction to Physics I. (4 Credits)
This is an introductory calculus-based course for physics majors—a study of mechanics, thermodynamics, electricity and magnetism, optics, and atomic physics. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ENST, ESNS, ESPS.

PHYS 1602. Introduction to Physics II. (4 Credits)
This is a continuation of PHYS 1601, a calculus-based introductory physics course. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisite: PHYS 1601.

Corequisite: PHYS 1604.

PHYS 1603. Introduction to Physics I Recitation. (0 Credits)
Discussion and problem solving on topics to be covered in PHYS 1601 Introductory Physics I.

Corequisite: PHYS 1601.

PHYS 1604. Introduction to Physics II Recitation. (0 Credits)
Discussion and problem solving on topics to be covered in PHYS 1602 Introductory Physics II.

Prerequisite: PHYS 1601.

Corequisite: PHYS 1602.

PHYS 1701. Physics I. (3 Credits)
This is an introductory calculus-based physics course for students who have completed one year of college calculus (MT 1206-1207 or equivalent). It provides a study of mechanics, the physics of motion, starting with velocity and ending with harmonic motion.

Attributes: ENST, ESNS, ESPS.

Mutually Exclusive: NSCI 1701.

PHYS 1702. Physics II. (3 Credits)
The course is the second-semester continuation of PHYS 1701. It is a calculus-based physics course that examines waves, sound, optics, electricity, magnetism, and electronics.

Corequisite: PHYS 1704.

Mutually Exclusive: NSCI 1702.

PHYS 1703. Physics I Recitation. (0 Credits)
Discussion and problem solving on topics to be covered in PHYS 1701 Physics I.

Corequisite: PHYS 1701.
PHYS 1704. Physics II Recitation. (0 Credits)
Discussion and problem solving on topics to be covered in PHYS 1702 Physics II.
Corequisite: PHYS 1702.

PHYS 2005. Introduction to Modern Physics. (4 Credits)
A survey course of the more important areas of modern physics. Topics include special theory of relativity, introduction to quantum mechanics, atomic physics, molecules and solids, nuclear structure and elementary nuclear physics applications and particle physics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 1601 and PHYS 1602.

PHYS 2010. Lab Methods and Techniques. (1 Credit)
Topics to be covered are (a) lab safety procedures, (b) machining techniques using Machine Shop equipment and tools, (c) maintenance of equipment, (d) handling of high voltage electrical equipment, (e) trouble shooting and diagnostic tests of electronic equipment, (f) handling of precision instruments, and (g) any other topics deemed necessary to make the lab a safe place to work.
Prerequisite: PHYS 1601.

PHYS 2011. Intermediate Laboratory. (2 Credits)
Measurements in electricity and magnetism. This course will also include practical machine shop experience. Lab fee.
Prerequisites: PHYS 2305 or PHYS 2005.

PHYS 2101. Engineering Statics and Dynamics. (4 Credits)
The following topics will be covered: forced system resultants, equilibrium or rigid body, structural analysis, internal forces, friction, center of gravity centroid, moments of inertia, virtual work, impulse and momentum, rigid-body kinematics, relative motion, Coriolis accelerations, and rigid-body kinetics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 1601 and PHYS 1602.

PHYS 2102. Mechanics of Materials. (4 Credits)
An introduction to the mechanical properties of materials including their response to: stress, strain, torsion, bending and shear. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHYS 2111. Introduction to Inventions and Patents. (1 Credit)
Introduction to the creative process that drives innovation and inventorship. Includes discussions on creative development of ideas, formalizing patent applications, commercialization and technology transfer.

PHYS 2201. Classical Mechanics I. (4 Credits)
An introduction to classical mechanics including kinematics and dynamics of particles and rigid bodies. Includes a discussion of D’Alembert’s principle, Lagrange’s equations and Hamilton’s principle. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 1601 and PHYS 1602 and PHYS 2005.

PHYS 3001. Electricity and Magnetism I. (4 Credits)
Electrostatics, dielectric media, direct current circuits, magnetism and magnetic media, transients and alternating currents, electromagnetic induction, Maxwell’s equations, electromagnetic waves and wave guides.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 1601 and PHYS 1602 and MATH 2005.

PHYS 3013. Experimental Techniques in Engineering and Physics. (3 Credits)
Experimental Techniques in Engineering and Physics seeks to provide broad overview of engineering and physics concepts and experimental methods through lectures and laboratory experiments. The experiments are designed to demonstrate the physical principles learned in engineering and physics courses. In addition to experimental procedure, focus will be placed on technical writing and presentation.
Prerequisite: PHYS 2010.

PHYS 3100. Math Methods in Physics. (4 Credits)
Implicit function theorem, Jacobians, curves and line integrals, multiple integrals, surface and volume integrals, divergence theorem, Stokes’ theorem, and Green’s theorem. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHYS 3101. Math Methods in Physics I. (4 Credits)
Matrices and determinants, series expansion, complex numbers and functions, Fourier series, ordinary differential equations, partial differential equations, and special functions of physics, theory of special relativity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: MATH 2005.

PHYS 3102. Math Methods in Physics II. (4 Credits)
Continuation of PHYS 3101. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: PHYS 3101.

PHYS 3103. Math Methods in Physics III. (4 Credits)
Topics to be covered include suffix notation and tensor algebra, theory of complex variables, contour integration, applications of contour integration, Sturm-Liouville Theory, integral equations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHYS 3201. Fluid Mechanics. (4 Credits)
This course introduces the fundamentals of fluid statics, dimensional analysis and modeling, viscous flow in pipes, channel flows, laminar flow, transition, turbulence; flow past an object, wake, separation, vortices, drag; convection, conduction, transition from periodic to chaotic behavior, compressible flow; transition to turbulence. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: PHYS 1601.
PHYS 3205. Fundamentals of Engineering Thermodynamics. (4 Credits)
Basic principles and laws of thermodynamics and their relation to pure substances, ideal gases, and real gases. Use of thermodynamic property tables. Development of concepts of reversibility and availability. First and Second Law application to engineering systems; power and refrigeration cycles. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 1601 and PHYS 1602.

PHYS 3211. Computational Physics and Programming I. (2 Credits)
An introductory course in the use of computers to numerically solve problems in physics using C++. Topics include numerical solution of non-linear equations, interpolation and extrapolation, numerical differentiation, and integration. No prior knowledge of computer language is required.

PHYS 3224. Science Fiction Physics for Majors. (4 Credits)
This course will use science fiction as a way to understand advanced topics in physics. Energy, momentum, mechanics, and special and general relativity, among other areas of physics, will be studied at an upper level in the context of science fiction. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 3001 and PHYS 3101.

PHYS 3401. Thermo and Stat Physics. (4 Credits)
Fundamental principles, first and second laws, thermodynamic functions; a discussion of the kinetic theory of gases and introductory statistical mechanics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 1602 and PHYS 2005.

PHYS 3555. Modeling, Simulation, and Design. (4 Credits)
This course introduces students to fundamental concepts of mechanical design, solid modeling, and prototype development. Topics to be covered include industrial design principles, orthographic projections, and assemblies. Students will engage in designing, simulating, and manufacturing mechanical components. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 1601 and PHYS 1602.

PHYS 3601. Optics. (4 Credits)
Wave propagation, interference, diffraction, and polarization; electromagnetic theory of light. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 2005 and PHYS 3001.

PHYS 4003. Classical Mechanics II. (4 Credits)
Lagrange’s equations, variational principles, Hamilton’s equations, canonical transformations, Hamilton-Jacobi theory, rigid body motion, small oscillations, central forces and Kepler’s planetary motion. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 2201 and PHYS 3101.

PHYS 4004. Electricity and Magnetism II. (4 Credits)
Continuation of PHYS 3001. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 1601 and PHYS 1602 and PHYS 3001.

PHYS 4005. Quantum Mechanics I. (4 Credits)
Foundations of quantum mechanics, Schrödinger equation, Hermitian operators, solution of the Schrödinger equation, harmonic oscillator, hydrogen atom, angular momentum operators, variational method, perturbation theory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 2005 or PHYS 2305.

PHYS 4006. Quantum Mechanics II. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHYS 4010. Introduction to Electrical Engineering. (4 Credits)
Electrical circuit laws and theorems, transient and steady-state response, phasors, frequency response, resonance. Diode and transistor circuits, digital logic devices. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 2002 or PHYS 3001.

PHYS 4011. Nuclear and Particle Physics. (4 Credits)
A survey of nuclear and particle physics for advanced undergraduate students. It explores the common roots and tools of the nuclear (medium energy) and particle (high energy) fields. The primary goal is to understand the basic ideas of the Standard Model of quarks, leptons and the fundamental interactions of the universe. Specific topics include properties and simple models of nuclei, fundamental interactions and their mediators, quarks and leptons, symmetries and tests of conservation laws, physics beyond the Standard Model, and other ideas in theoretical and experimental nuclear and particle physics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 4005 and (PHYS 2005 or PHYS 2305).

PHYS 4012. Solid State Physics. (4 Credits)
An introduction to the elastic, thermal, electromagnetic, and optical properties of solids; energy bands, semiconductors, superconductors, surface and defect structures and device applications. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PHYS 1601 and PHYS 1602 and PHYS 2005.

PHYS 4020. Biomechanics. (4 Credits)
Engineering principles such as mechanics, rigid body dynamics, fluid dynamics and solid mechanics are applied to the study of biological systems such as ligaments, tendons, bone, muscles, joint, etc. Methods for both rigid body and deformational mechanics are developed in the context of bone, muscle, and connective tissue. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: PHYS 2102.
PHYS 4021. Medical Instrument and Imaging. (4 Credits)
Introduction to the physics and the practical technology associated with such methods as X-ray computed tomography (CT), magnetic resonance imaging (MRI), functional MRI (f-MRI) and spectroscopy, ultrasonics (echocardiography, Doppler flow), PET scans as well as optical methods such as bioluminescence and optical tomography. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHYS 4025. Machine Dynamics and Mechanical Design. (4 Credits)
The principles of dynamics as applied to the analysis of the accelerations and dynamic forces in machines such as linkages, cam systems, gears, belts, chains, couplings, bearings, brakes, clutches, and flexible mechanical elements. Concepts of engineering design, material selection, failure theories, fracture and fatigue. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHYS 4211. Computational Physics II. (3 Credits)
A continuation of PHYS 3211, this course will cover advanced topics in programming and their applications in physics. Topics can include, but are not limited to, numerical partial differential solvers, parallel computing, and optimization of numerical algorithms.
Prerequisite: PHYS 3211.

PHYS 4401. Undergraduate Research I. (4 Credits)
Participation of the undergraduate in research under the direction of one of the faculty. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHYS 4402. Undergraduate Research II. (4 Credits)
Participation of the undergraduate in research under the direction of one of the faculty. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHYS 4999. Independent Study (1-4 Credits). (1 to 4 Credits)
Independent research and reading with supervision from a faculty member.

Political Science (POSC)

POSC 0912. Requirement Preparation. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

POSC 0914. Requirement Preparation in Summer. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

POSC 0922. PhD Comprehensive Examination Preparation. (0.5 Credits)

POSC 0934. Master’s Comprehensive Examination Preparation. (0.5 Credits)

POSC 1100. Introduction to Politics. (3 Credits)
Introduces students to major approaches to the study of politics. Discusses such key concepts as power, democracy, and justice, analyzes a variety of political actors, including political parties, interest groups, and voters, and examines the functioning of different political institutions in comparative perspective.
Attributes: AMST, APPI, FRSS, SSCI.

POSC 1298. Government and Politics Comparative. (3 to 6 Credits)

POSC 1800. Internship. (1 Credit)

POSC 1999. Tutorial. (1 Credit)
Independent research and reading with supervision from a faculty member.
Attribute: PLUR.

POSC 2001. Political Analysis. (4 Credits)
Provides students with the essential methods and concepts for the quantitative analysis of political phenomenon, such as polls and election returns. Techniques of analysis introduced will include graphics, descriptive statistics, cross-tabular and correlation analysis, hypothesis testing, and computer applications. The goal of the course is to make the student a component consumer of political analysis. It will also focus on how political analysis is used in the real world, e.g. by campaign strategists and governments. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS.

POSC 2102. Introduction to Urban Politics. (4 Credits)
A study of politics and power within urban political systems, including an examination of their historical development, current political economy, and prospects for the future. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, PLUR, POAP, POCP, URST.

POSC 2202. Introduction to American Politics. (3 Credits)
An introduction to American government and politics. The course is a 3 credit version of POSC 2201: American Government & Politics, designed for summer sessions.
Attributes: AMST, APPI, POAP.

POSC 2203. Introduction to the American Legal System. (4 Credits)
This course is an introduction to the American legal system in theory and practice. It will examine issues of jurisprudence, as well as some of the procedural and substantive areas of the law. Among the legal principles/topics to be considered: The Rule of Law; The Bill of Rights; Precedent; Test Case; ‘Reasonable Person’ Standard; Judicial Standing; U.S. Supreme Court; Organization of U.S. Court Systems; Freedom of Speech (‘Hate’ Speech); Legal Rights of College Students; Wrongful Convictions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, POAP.

Updated: 07-27-2020
POSC 2205. The U.S. Congress. (4 Credits)
A study of the historical development and current operation of the U.S. Congress. Particular attention is paid to the impact of elections, political parties, formal and informal rules and procedures, and congressional committees on the policies produced by Congress, and to Congress’ relation to the executive branch. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS.

POSC 2401. Introduction to Political Philosophy. (4 Credits)
This course will study the major philosophers from Plato to Marx, discussing questions such as the best regime, the nature of justice and the relation between the individual and the community. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: POPT.

POSC 2501. Introduction to International Politics. (4 Credits)
A look at modern nation-states in terms of national character, resources, industrial and military capacity, and geography. An examination of their foreign policies in terms of alliance and balance of power theories as influenced by regional and international organizations and movements. A study of war and its alternatives, such as diplomacy, peaceful change, peaceful settlement of disputes, and future models of world order. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, IPE, ISIN, ISIP; MEST, POIP.

POSC 2610. Introduction to Comparative Politics. (4 Credits)
This course involves the systematic study and comparison of the world's political systems. It seeks to explain differences between as well as similarities among countries including the United States. Comparative politics is particularly interested in exploring patterns, processes, and regularities among political systems. It looks for trends, for changes in patterns, and tries to develop general propositions or hypotheses that describe and explain these trends. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, IPE, ISIN, ISIP; LALS, LASS, POCP.

POSC 2800. Introduction to Political Economy. (4 Credits)
This course examines the relationship between politics and economics, exploring the ways in which societies overcome collective action problems and build institutions that facilitate cooperation and exchange. It introduces the major theoretical frameworks for understanding political economy and examines several contemporary issues in the United States, such as race, gender and class disparities; housing; hunger; education; government regulation; the relationship between domestic and international political economies; and more. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: POIP.

POSC 2999. Tutorial. (1 to 2 Credits)
Independent research and reading with supervision from a faculty member.

POSC 3120. New York City Internship. (4 Credits)
The purpose of this course is to help students gain practical experience in the operation of New York government and politics by working in offices of elected officials, governmental agencies, or non-partisan public interest organizations. Requirements will also include readings, short papers and discussions based on the internship experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, ASSC, POAP, URST.

POSC 3121. New York City Politics. (4 Credits)
An analysis of the New York City political system. Attention will be paid to the participants in New York City government and politics, the factors that influence policymaking in New York City, as well as public policies produced by the system. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, ASSC, LALS, LASS, PLUR, POAP, URST.

POSC 3131. Politics, Urban Health, and Environment. (4 Credits)
This course will examine the intersection of urban life, individual and community health and public policy. It will examine the evolution of urban public problems, the urban environment and the role and responsibility of society and the political system to respond to individual and health issues in urban settings. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, BESN, BIOE, ENST, ESEL, ESPL, HPSE, HUST, LPGP, PJEN, PJST, POAP, SOIN, URST.

POSC 3209. Constitutional Law. (4 Credits)
A casebook analysis of central issues of constitutional law. Examines the Constitution's origins, judicial review, federalism, separation and balance of powers, domestic and foreign affairs, the commerce clause, substantive due process, the rise of the administrative state, philosophies of interpretation. Presents the Constitution as defining a structure of government, rights and political economy. Examines the Constitution's role in American political development and democracy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, POAP.

POSC 3210. Civil Rights and Liberties. (4 Credits)
A casebook analysis of Supreme Court decisions on civil rights and civil liberties. Topics include freedom of speech and religion, the right to privacy, gender and racial equality, the death penalty, and protections against unreasonable searches and seizures. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, PJCR, PJST, POAP.

POSC 3213. Interest Group Politics. (4 Credits)
An examination of pressure groups and their role in the political process. Special attention will be paid to the origins of groups, who joins and who does not and how groups affect their own members. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, PLUR, POAP.
POSC 3214. The U.S. Congress. (4 Credits)
A study of the historical development and current operation of the U.S. Congress. Particular attention is paid to the impact of elections, political parties, formal and informal rules and procedures, and congressional committees on the policies produced by Congress, and to Congress’ relation to the executive branch. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, POAP.

POSC 3215. American Political Parties. (4 Credits)
Examines the workings of American political parties and their role in the political system. Analyzes the role of parties across time, the effect of parties on the campaigns of presidential and congressional candidates, and the impact of parties on the workings of both the presidency and Congress as policymaking institutions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, POAP, POMI.

POSC 3217. The American Presidency. (4 Credits)
An examination of presidential leadership, including the development, growth, and exercise of presidential power. Includes analysis of republican foundations of the presidency, organization and operation of office, role in domestic and foreign policy, relations with Congress, and the importance of character. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, POAP.

POSC 3219. Constitutional Law and the Death Penalty. (4 Credits)
The course will examine the historical, philosophical, religious, and legal roots underlying the use of the death penalty by political systems. Part of the course will focus on contemporary U.S policy regarding the death penalty, relevant legal cases and social commentary. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, POAP.

POSC 3220. Criminal Law and Justice in the U.S.. (4 Credits)
This course analyzes criminal law and justice, specifically using the Amendments (4th, 5th, 6th, and 8th) and how they relate to criminal procedure. The course will use current issues with criminal justice reform as a framework. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC.

POSC 3223. Constitutional Law: Criminal Justice. (4 Credits)
Case method analysis of Supreme Court decisions in the area of Criminal Justice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, POAP.

POSC 3225. Human Trafficking and the Law. (4 Credits)
The course will examine human trafficking and the ways in which the legal system addresses it in the United States. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BESN, PJCR, PJST, PJWT.

POSC 3228. Civil Rights. (4 Credits)
A casebook analysis of legal responses to public and private discrimination, with emphasis on race and gender. Examines Supreme Court decisions, laws, and politics, involving the 5th, 13th, 14th, 15th, and 19th amendments, equal protection and level of scrutiny, civil and voting rights, public accommodations, employment, private associations, schools, privacy, 'natural' roles, the public/private dichotomy. Studies movements for equality. Evaluates busing, affirmative action, pay equity and other remedies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, PJCR, PJIN, PJST, PLUR, POAP.

POSC 3231. Judicial Politics. (4 Credits)
This course provides an introduction to the study of law and courts as political institutions and judges as political actors. Topics include judicial behavior and policymaking, the politics of Supreme Court nominations, the role of public opinion in shaping judicial doctrine, and the impact of courts on society. Because this is an American Pluralism course, a major objective of the course is to increase knowledge of how reform groups have used the courts to combat discrimination based on race, sex, and sexual orientation. The course also explores how the structure of the legal system systematically advantages some litigants more than others based on class. The primary institutional focus is the U.S. Supreme Court, but we also study other courts as well, including the state supreme courts and lower federal courts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, LPGP, LPHP, PLUR, POAP, POMI.

POSC 3232. Family, Law, and Society. (4 Credits)
An upper-level course aimed at dissecting the family court system, American democracy, and state/federal judicial processes as they pertain to family issues. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: WGSS.
Prerequisite: POSC 1100.

POSC 3233. Youth and the Law. (4 Credits)
An upper-level political science course that investigates the intersection of judicial practice, American democracy, and youth within the criminal justice system. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.
Prerequisite: POSC 1100.
POSC 3234. Government's Response to Organized Crime. (4 Credits)
Traditional Organized Crime, often referred to as the Mafia, historically has controlled and corrupted multiple industries, notably the private sanitation industry. Despite multiple criminal investigations, arrests and convictions, that stranglehold continued for decades. This course will examine how traditional organized crime infiltrated industries and labor, and what the organization of those industrials looked like when controlled by the Mafia. We will examine in detail the private sanitation industry in NYC, how it was controlled by organized crime and how that control was broken by a government initiate that combined criminal prosecutions with an innovative administrative approach to regulation and enforcement.

POSC 3301. Campaigns and Elections. (4 Credits)
This course undertakes an in-depth study of campaigns and voting, with an emphasis on the presidential and congressional elections. We will examine elections from the perspectives of candidates, political parties, interest groups, the media, political consultants, and voters. In addition, we will address some basic questions about elections in America: What are the rules? Who wins and why? What difference do elections make?
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASSC, POAP.

Mutually Exclusive: POSC 4216.

POSC 3307. Environmental Politics. (4 Credits)
The course introduces students to the history and evolution of environmentalism and environmental policy from a comparative perspective. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, ENMI, ENST, ENVS, ESEL, ESPL, INST, IPE, ISIN, PJEN, PJST, POAP, SOIN, UREST.

POSC 3309. Gender in American Politics. (4 Credits)
This course examines the role of gender in American politics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, POAP, POMI, WGS.

POSC 3310. Racial and Ethnic Politics. (4 Credits)
This course provides an introduction to the major theoretical frameworks in the racial and ethnic politics literature. The class will help students better understand how incorporation, identity, and participation shape political identity in the US. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AFAM, AMST, APPI, ASHS, ASSC, LALS, LASS, PLUR, POAP.

POSC 3311. American Social Movements. (4 Credits)
A survey of American social movements. Students will be introduced to empirical and theoretical scholarship on movement mobilization and tactics, focusing on how movements address marginalization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, POAP.

POSC 3313. Political Psychology. (4 Credits)
This course draws from psychology and political science to explore the psychological sources of political behavior. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, POAP, POMI.

POSC 3315. Political Participation. (4 Credits)
Studies the relation between participation, political effectiveness and American democracy. Analyzes who participates and how; who doesn't, and why. Examines political participation and questions of gender, race, education, class and ideology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, POAP.

POSC 3316. Mass Media and American Politics. (4 Credits)
This course looks at the role that the mass media play in American Politics specially and democracy in general. Particular topics will include the evolution of media-governmental relationships, the impact of technological and economic forces on the media's role in politics, and the growth of government concern with media relations. We will also consider the impact of the media on the attitudes and behaviors of citizens, the public agenda and the policy making process. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASHS, ASSC, CMST, COMC, COMM, JOUR, POAP.

POSC 3319. Film and Politics. (4 Credits)
Views and analyzes films in class as a means of exploring the relationship between popular culture, political values/ideologies, and political socialization in American life. Also studies genre, filmmaking style and structure, and overt versus subtle messages to further examine film's point of view. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASHS, ASSC, POAP.

POSC 3321. American Public Policy. (4 Credits)
Analysis of the process of policy making at the national level, including the politics of selected policy issues. Students examine how some issues never make it to the public agenda and the forces that shape those that do. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, POAP.

POSC 3326. Latino Politics. (4 Credits)
The class will cover the history and contemporary role of Latinos in the U.S. political system. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASRP, ASSC, LAIN, LALS, LASS, PJ, PJST, POAP.
POSC 3327. Gender and Sexuality in US Politics. (4 Credits)
This course locates gender and sexuality central to the study of US politics, looking at how gender and sexuality shape opinion formation, candidacy, election outcomes, group identity formation, political interests, policy design, and political representation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, WGSS.

POSC 3404. American Political Thought. (4 Credits)
What does it mean to be an American? What are the principles of American politics? This course poses these questions to key figures in American political thought, including Jefferson, Hamilton, Madison, Tocqueville, Du Bois, Goldman, Rawls, Strauss, and Connolly. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASRP, ASSC, POPT.

POSC 3405. Radical and Conservative Thought. (4 Credits)
Some modern thinkers have advocated far reaching changes in the political and economic systems, notably the followers of Karl Marx in their pursuit of socialism, or, more radically, communism. Other political thinkers are defenders of classical ideals of liberty or of tradition. We shall read and discuss some key primary writings by thinkers advocating radical political change and by thoughtful defenders of tradition. Writers on the Left include Marx, Lenin, Trotsky, and Marcuse. Those on the Right include Ortega y Gasset, Carl Schmitt, Oakeshott and Hayek. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

POSC 3407. Late Modern Political Thought. (4 Credits)
Through the late 18th century and thereafter, friends and foes of classical liberalism attempted to think through, amend, or accommodate themselves to Rousseau's criticism of modern philosophy, political and science. This course studies those efforts through a reading of selected texts by such thinkers as Rousseau himself, Kant, Hegel, Marx and Nietzsche. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

POSC 3408. The Civil Rights Movement and the Courts. (4 Credits)
This course will focus on the myriad ways the United States legal system both aided and hindered the advance of civil rights and equal opportunities for African Americans. The course will cover such topics as the constitutional origins of slavery; court decisions concerning slavery; the theory of states' rights; and Thurgood Marshall's career. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, HUST, PJCJ, PJST, WGSS.

POSC 3411. Classical Political Thought. (4 Credits)
The politics of the Ancient World will be studies through the writings of Sophocles, Euripides, Plato, Aristotle and others in order to understand ideas of family, property, freedom, torture, truth, and the struggles for individual and collective power. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, CLAS, POPT.

POSC 3412. Modern Political Thought. (4 Credits)
Through selected readings of major political theorists, this course will examine the ideas of the individual, the state, and society, from the 16th through the 19th century. The course will trace the development of such theories as democracy, socialism, communism, and totalitarianism. Writers whose works will be examined include Machiavelli, Hobbes, Locke, Rousseau, Wollstonecraft, Hegel, Marx, and Freud. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: APPI, ASHS, ASSC, POPT, WGSS.

POSC 3413. Contemporary Political Philosophy. (4 Credits)
This course considers contemporary answers to the perennial questions of political philosophy, including what is human nature? and what political principles accords with human nature? We read leading figures in liberalism (Rawls), conservatism (Strauss), civic republicanism (Arendt), communitarianism (Taylor), and postmodernism (Deleuze and Guattari, Connolly). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASRP, ASSC, POPT.

POSC 3414. Politics, Nature, and History. (4 Credits)
Some thinkers have appealed to nature as a way of understanding the political community and its concerns. Others have claimed that history is far more important than human nature in understanding politics. We shall be looking at this debate as it unfolds in the writings of political thinkers both in antiquity and in the modern era. We shall be discussing writings from such theorists as Aristotle, Augustine, Hobbes, Kant, Nietzsche, Freud, Skinner, and Heidegger. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, POPT.

POSC 3415. Politics, Reason, and Revelation. (4 Credits)
How do different prominent political thinkers, such as Augustine, Maimonides, Locke, Spinoza, and Mill view the compatibility of the demands of religion and the needs of political communities? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: APPI, ASRP, ASSC, POPT.

POSC 3416. Liberalism and Its Critics. (4 Credits)
Modern liberal political thought, its intellectual roots and varieties; consideration of the best of liberalism's critics; examples will be drawn from philosophical, popular and public policy sources. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASSC, POPT.
POSC 3418. Islamic Political Thought. (4 Credits)
The relationship between religious authority and political legitimacy in the classical and modern Islamic worlds. Various ways Muslims over the past 1,400 years have thought about the proper distribution of power and authority in their societies. What is an 'Islamic state,' and has there ever actually been such a thing? How did classical Muslim thinkers deal with the disjunction between political reality and political ideals? How have Sunni and Shiite thinkers differed in their conceptions of proper government? How useful a concept is 'Islamic fundamentalism,' and how modern is it? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAM, AFSS, AFST, ASSC, HPSE, HUST, INST, IPE, ISAS, ISME, MEST, PJRJ, PJST, POPT, REST.

POSC 3419. Politics and (Science) Fiction. (4 Credits)
We shall be reading and discussing works of fiction, especially science fiction and fantasy, which center upon political themes and ideas. Such works will deal with modern political movements such as libertarianism, communism and fascism. Authors include, among others C.S. Lewis, R. Heinlein, A. Rand, G. Orwell, and N. Spinrad. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

POSC 3420. Women and Film. (4 Credits)
Students will examine the representation of women as subject of film and politics. Through texts placing women's history in context with emancipation in political life, students will view films which address these controversies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, POPT, WGSS.

POSC 3421. Political Theory in Popular Culture. (4 Credits)
This course introduces students to political ideologies such as liberalism, conservatism, socialism, anarchism, nationalism, fascism, feminism, ecologism, and multiculturalism. The course then sees how these ideas express themselves in the Marvel Universe, including the comic books, movies and Netflix series. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, CCUS, COMC, COMM, POPT, REST.

POSC 3422. Politics of the Present. (4 Credits)
A survey of recent and contemporary political thought, focusing on 19th- and 20th-century writers. Readings will include Lenin, Goldman, Bernstein, Nietzsche, Freud, Michels, Weber, deBeauvoir, Sartre, Camus, and Irigaray. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, ISEU, POPT.

POSC 3426. Sex Wars. (4 Credits)
Students will read the works of sex radicals in the 19th, 20th, and 21st century political thought. Beginning with key texts on slavery by L. Brent and F. Douglass, we will study ideas and concepts regarding power and resistance in the works of S. Freud, E. Goldman, S. de Beauvoir, L. Irigaray, J. Genet, J. Baldwin, V. Solanos, A. Davis, M. Foucault, and others in order to explore contemporary feminist, queer and transgender theories and politics.
Attributes: ADVD, AMST, APPI, ASHS, WGSS.

POSC 3429. Democratic Theory. (4 Credits)
This course studies theories of modern democracy, their historical antecedents, their foundational assumptions about power, human nature and identity, and areas of agreement and disagreement between them over key ideas such as rights, equality, citizenship, justice, and difference. It evaluates contemporary democratic practices in the era of globalization through the lens of each theory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, ISIN, POPT.

POSC 3436. Capitalism and Its Alternatives. (3 Credits)
What is the philosophical foundation of capitalism? What are the viable alternatives to capitalism? This course considers answers to these questions from the fields of economics, political theory, and humanistic management. Authors covered include Adam Smith, Milton Friedman, and FA Hayek.

POSC 3456. Late Modern Political Thought. (4 Credits)
Through the late 18th century and thereafter, and foes of classical liberalism attempted to think through, amend, or accommodate themselves to Rousseau’s criticism of modern philosophy, political and science. This course studies those efforts through a reading of selected texts by such thinkers as Rousseau himself, Kant, Hegel, Marx and Nietzsche. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, POPT.

POSC 3502. UN and Political Leadership. (4 Credits)
In this summer course, diverse aspects of diplomacy, desicion-making and political leadership at the United Nations will be reviewed, theory, research practice and ethical issues considered. Includes excercises, fieldwork, and visits to the U.N or diplomatic community. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

POSC 3507. International Human Rights. (4 Credits)
An examination of the international system for the protection of human rights: legal and political theory, cultural relativism, diplomatic protection and the concept of human rights law; legal instruments and institutions; substantive law. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, COLI, HPSE, HUST, INST, IPE, ISIN, POIP, URST.

POSC 3511. War and Peace. (4 Credits)
This course introduces the student to the leading theories of the causes of war and peace. After an introduction to the major theoretical perspectives on conflict, strategy and interstate wars (wars between political rivals) will be the primary focus in the first half of the course. Later we will examine the role of ethnicity and nationalism in internal conflicts, as well as non-conventional forms of warfare. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, HUST, INST, ISIN, PJCR, PJIN, PJST, PJWT, POIP.
POSC 3515. Revolution. (4 Credits)
An introduction to theories of revolution, and examination of classical and contemporary cases of revolution and a framework for considering the structure of revolution in the future. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.
Mutually Exclusive: POSC 4037.

POSC 3516. Conflict Analysis/Resolution. (4 Credits)
This course focuses on post-Cold War international conflict analysis as an instrument of peacemaking. We will analyze inter-state, internal, state-formation, and protracted social conflict and focus on the development of conflict analysis and resolution as an interdisciplinary component of international studies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, HPSE, HUST, INST, IPE, IRST, ISIN, PJCP, PJCR, PJST, POIP.

POSC 3520. Mideast and the World. (4 Credits)
An introduction to the international politics of the Middle East and North Africa defined as the whole of the Arab world plus Israel, Turkey, Iran, and those states neighboring these countries that have influence on the region's external relations. Emphasis will be placed on the colonial and postcolonial periods with particular attention paid to the post-World War Two era. Competing theoretical approaches to the study of international politics will precede a more issue-based analysis of the key factors that animate the region's behavior in world affairs. Topics receiving in-depth treatment include: inter-state conflicts, oil politics, political system types and their relationship to international politics, the role of religion, terrorism, external actors influence on the region, United States foreign policy goals, instruments, and actions, among others. No prior background in Middle East studies is assumed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAM, AFSS, AFST, COLI, GLBL, INST, IPE, ISIN, ISME, MEST, PJRC, PJST, POIP.

POSC 3521. Global Governance. (4 Credits)
International organizations play a pivotal role in global governance but there is still considerable debate about why these organizations exist, whether they matter in global politics, and whether they help or hinder international cooperation. Consequently, the goal of this course is to help students develop a broad understanding of global governance and the role international organizations play. We also spend time on the problems of international cooperation and the role of international institutions in the resolution of these issues. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, HPSE, HUST, INST, IPE, ISIN, POIP.

POSC 3522. United Nations. (4 Credits)
Structure and powers of contemporary international organizations; the role of the U.N., and regional organizations as related to war, peaceful change, and development. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAM, AFSS, AFST, ASSC, HPSE, HUST, INST, IPE, ISIN, PJCP, PJCR, PJIN, PJST, POIP.

POSC 3526. Democracy, Terrorism, and Modern Life. (4 Credits)
This course examines the requisites of democracy and modernity as ways of thinking and ways of life and the threat posed to them by terrorism. It asks, what is terrorism, why does it exist, how fundamental are the conflicts it is embedded in, how extensive a threat is it to the U.S. and others, and how can it be stopped? It analyzes the vulnerabilities (and considers the strengths) of modern, highly technological, media driven, highly integrated, international liberal social and economic regimes and the modern philosophical systems with regard to terrorism, and considers ways to mitigate points of danger. Finally, it considers the advantages of democracy and modernity in overcoming this threat. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, INST, ISIN, PJST, PJWT, POIP.

POSC 3527. United Nations Peace Operations. (4 Credits)
This course examines the challenges of contemporary peacekeeping, peace enforcement, and peacebuilding through the institution of UN peace operations. Students will explore the generational evolution of UN peace operations since 1945, and focus on key issues related to effective peacekeeping, peace enforcement, and peacebuilding, including sovereignty/non-interference; troop-contributing country interests and political will; civil-military interactions; civilian protection; mission mandates and rules of engagement; and regional as well as UN headquarters politics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASSC, HPSE, HUST, INST, ISIN, PJCP, PJCR, PJST, POIP.

POSC 3530. U.S. Foreign Policy. (4 Credits)
This course will consider the goals and instruments of United States foreign policy, both in the security and economic realms, as well as through an historical context. Students will examine how foreign policy is made, contending explanations, as well as the main actors involved. Current issues and controversies will be used to test different theoretical approaches. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASSC, HPSE, HUST, INST, IPE, ISIN, POIP.

POSC 3531. US Security Policy. (4 Credits)
This course analyzes US security policy, specifically including the topics of American military operations and policy, the increase in unconventional warfare, and the threats unique to the 21st century world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, INST, ISIN.
POSC 3532. The Development of Human Rights Law. (4 Credits)
Many of the most significant and concerning trends in international law and international relations today stem from fundamental questions and disputes about the nature of human rights. This course serves as an introduction to the law, theory, and practice of international human rights. Beginning with a consideration of the philosophical origins of the concept of human rights, the course will examine the historical development of notions of human rights and how those notions were operative in historical circumstances. Special attention will be paid to the Holocaust: its historical antecedents, Nazi policies and actions with regard to race, and lessons drawn by the international community from this tragic chapter in modern history. The course will also consider various mechanisms for the promotion, protection, and implementation of international human rights, including those of international organizations (such as the United Nations), regional institutions (such as the Organization of American States), and nongovernmental organizations (such as Human Rights Watch). Wherever possible, the discussion of international human rights law will relate to contemporary developments in human rights internationally, as well as within the United States. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HUST, ISIN, ISIP, POIP

POSC 3540. Politics of Cyberspace. (4 Credits)
Advancements in cyberspace and cyber technology have changed how nation states relate and interact with each other. Increasingly, states rely on cyberattacks against other states to achieve various geopolitical ends. The focus of this course is thus to examine how state-sponsored cyberattacks affect conflict and cooperation between states. Topics covered include how states, their adversaries, and non-state actors engage online, how political and economic factors influence cyber conflict propensity, and what strategies can be used to manage interstate cyber conflict. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, ISIN, POIP

POSC 3605. Comparative Democracy. (4 Credits)
An examination of current explanations of stable democracy and an attempt to apply them to small, fragmented democracies of Western Europe. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, GLBL, INST, IPE, ISEU, POCP

POSC 3610. Political Economy of Development. (4 Credits)
This course provides an introduction to the politics and comparative study of international development, both human and economic. A central question will help organize the course: why have some countries developed successfully, while others have not? Whereas much of Western Europe, North America and East Asia have experienced economic development, much of Africa has not. Latin America, Eastern Europe and Eurasia are hybrids, with both pockets of success and failure. While defining what success or failure may mean in light of globalization, our collective focus will be on how best to understand such differences. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, GLBL, HPSE, HUST, INST, IPE, ISIE, ISIN, LALS, LASS, PJEC, PJST, POCP, POMI, SOIN, URST.

POSC 3613. Political Movements. (4 Credits)
Explores modern political resistance to established forms of power. Analyzes goals, programs, and ideologies of political movements. Whether they seek revolution or reform, political movements make urgent moral and political claims on society and can even transform social and political systems. This course evaluates such impact on society and the state. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, ISIN, POCP

POSC 3614. Political Institutions. (4 Credits)
Suppose for a moment that you are a political advisor to the United States government or a major Intergovernmental Organization (IGO) and your task is to come up with an ideal combination of political institutions for a new democracy. You are asked to choose among different types and combinations of institutional rules and practices - such as the organization and operation of the executive, the structure of the legislature, the type of electoral system, and the relationship between the central and local governments. Which political institutions would you recommend? Why? We will ask whether an optimal combination of political institutions exists by examining the effect of these institutions on a broad range of outcomes such as political inclusiveness, citizen participation, economic growth and income distribution, political conflict among the branches of government, proximity between government policy and voter preferences, public goods provision, political corruption, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, POCP

POSC 3616. Political Economy of Poverty. (4 Credits)
This course examines the causes of widespread poverty in the developing world from a political economy perspective. The aim is to understand the relationship between political, economic, and social phenomena in causing, perpetuating, and alleviating poverty across the globe. Course readings include classic texts in the field, policy strategies and debates, and case studies on Latin America, Middle East, South and East Asia, and sub-Saharan Africa. Critical analysis of the issues and approaches is strongly encouraged. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, GLBL, HPSE, HUST, INST, IPE, ISIE, ISIN, LALS, LASS, PJEC, PJST, POIP, POMI, SOIN.

POSC 3621. European Politics. (4 Credits)
Introduction to the politics of contemporary Europe including analyses of political economy, democratic governance, and political integration. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, IPE, IRST, ISEU, POCP.
POSC 3622. Politics of the European Union. (4 Credits)
The European Union (EU) embodies a unique political and economic partnership. With the total population of almost 500 million people, it is one of the largest economies in the world and a major trade partner with the United States. Furthermore, EU is an influential actor in world politics. How does EU work? What are the prospects for the expansion of the euro zone? How do citizens of EU affect policymaking processes at a supra-national level? This course will address these issues through the analysis of EU institutions, policies, and political processes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, IPE, IRST, ISEU, POCP.

POSC 3624. The Qur'an and Hadith in the Global Political Perspective. (4 Credits)
This course analyzes: the Qur'an as a Muslim common constitution and a sacred and historical book; Hadith (Sunnah) as a second source of Muslim faith and of Qur'an interpretation; the relationship between Christians, Jews and Muslims through Qur'an and Hadith; the misunderstanding of Qur'an and Sunnah in the terror era. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, ISIN, ISME, MEST, REST.

POSC 3631. China and Russia in Comparative Perspective. (4 Credits)
This course provides a broad overview of political, socioeconomic, and cultural developments in contemporary China and Russia. Both countries have recently experienced streaks of positive economic growth and begun to reassert their political muscle in the international arena, as seen in China's vital role in US negotiations with North Korea and Russia's annexation of the Crimea and engagement in military operations in eastern Ukraine. The course places an analysis of current events in historical perspective, examining the emergence and development of the communist states, along with the introduction of market reforms and the persistence of state repression. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, GLBL, INST, ISAS, ISEU, ISIN, POCP.

POSC 3632. China and U.S. in Global Era. (4 Credits)
This course compares China and the U.S. with respect to political system, culture, philosophy, and political economy. It includes lectures, discussion, joint Chinese-American student study projects, and field trips to important historic and contemporary Chinese political and cultural sites in southern China, and in Hong Kong and Macau. The class concludes with a discussion of the future of Chinese-American political and economic relations in the contemporary era of globalization. Fee Required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, GLBL, INST, IPE, ISAS, ISIN, POCP.

POSC 3633. China and US-Global Era/Study Tour. (4 Credits)
This course compares China and the U.S. with respect to political system, culture, philosophy, and political economy. It includes a two-week study-abroad study tour and lectures, discussions, joint Chinese-American student study projects, and field trips to historic Chinese political and cultural sites in Beijing, Guangzhou, and Hong Kong. It also includes independent research and analysis in conjunction with the professor. Its goal is to enable students to better comprehend the future of evolving Chinese-American political and economic relations in the contemporary era of globalization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, GLBL, INST, ISAS, ISIN.

POSC 3634. The Great Law of China. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN.

POSC 3635. China, Japan, Korea, and the U.S. in the Global Era. (4 Credits)
This course is a study tour and independent study to familiarize students with the political systems and cultures of China, Japan, and Korea and the relations between these countries and with the United States.
Attributes: ASSC, INST, ISAS, ISIN.

POSC 3641. Latin American Politics. (4 Credits)
An examination of Latin American politics from theoretical and case study perspectives. Topics include parties and interest groups, militarization of the state, environmental politics, revolution, development and human rights. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ASSC, GLBL, INST, IPE, ISLA, LAIN, LALS, LASS, POCP.

POSC 3645. Politics of Immigration. (4 Credits)
The course examines the politics of contemporary immigration. Topics include the construction of citizen and alien, the (re)negotiation of immigrant sexuality and sexual identity, the racialization of naturalization, the family and immigration law, the formation of social movements around immigrant rights, and a comparative analysis of immigration policies in the U.S. and those in Europe. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPL, ASHS, ASSC, HPSE, HUST, INST, IRST, ISIN, ISLA, LALS, LASS, PJJSJ, PJST, PLUR, POCP, URST, WGSS.

POSC 3651. Comparative Politics of the Middle East. (4 Credits)
An introduction to the comparative politics of the Middle East and North Africa (MENA) viewed from the competing theoretical perspectives of political economy and political culture. Focus will be placed on identifying key conceptual and empirical variables that help explain the nature and behavior of MENA states in the modern period. Among the relevant issues to be discussed include political elites, ideologies, institutions, parties, civil society, democracy, authoritarianism, conflict, political economy, religion, women, and ethnic groups, among others. No prior background in Middle East studies is assumed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, GLBL, HPSE, HUST, INST, IPE, ISME, MEST, OCST, POCP.
POSC 3652. State-Society Relations in the Middle East. (4 Credits)
States and societies are never synonymous, and often find themselves at odds with one another. The countries of the Middle East are no stranger to such gulf between “citizens” and “regime.” Here, individuals and groups use a range of formal and informal norms and practices to respond to the state. Everyday decisions such as what to wear, with whom to interact, or what jokes to tell can subtly undermine regime narratives. Under-the-table economic practices, such as clientelism and patronage, call into question the state’s ability to govern its citizens. And, in extreme situations, collective actions, such as protest or revolution, can threaten the foundations of the state itself. This course will pull together resources from such diverse fields as cultural studies, political economy, and political psychology to examine these processes of consent and dissent, and we will read in-depth qualitative analyses as well as quantitative analyses from survey research. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISME, MEST, POCP

POSC 3653. Religion and Society in the Middle East. (4 Credits)
It can seem as though every conversation about the contemporary Middle East inevitably turns to questions of religion. Are Islam and democracy compatible? What are the sources of fundamentalism, and why do fundamentalists sometimes turn to violence and terrorism? Why do religion, politics, and conflict seem so intertwined in this region? A vast array of religious traditions have long histories in this part of the world, and religious narratives in the Middle East have been a force for violence and conflict, peace and economic well-being. This course will examine the deeply embedded role of religion in Middle Eastern societies, drawing on tools from such diverse disciplines as political science, psychology, sociology, and philosophy. Our goal will be to explore the ways in which religion has shaped, and been shaped by, the broader social and political realities of the Middle East over time. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, INST, MEST, POCP

POSC 3800. Internship. (3 Credits)
Supervised placement for students interested in work experience.
Attribute: ASSC.

POSC 3915. International Political Economy. (4 Credits)
This course introduces various theoretical frameworks explaining the international political economy and examine topics including trade, monetary policy, exchange rates, finance, multinational corporations, international institutions, and economic development. There is a particular focus on the distribution of benefits within an increasingly globalized world, and the ways in which interest groups work to advance their favored economic policies within this system. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, INST, IPE, ISIE, ISIN, LALS, LASS, PJEC, PJST, POIP, URST.

POSC 3999. Tutorial. (3 Credits)
Independent research and reading with supervision from a faculty member.

POSC 4001. Rhetorical Arts & Politics in the Ignatian Tradition: A London Study Tour. (4 Credits)
The purpose of this course is to introduce students to the rhetorical arts as defined in the classical, Jesuit, and contemporary political traditions, with students developing and refining their rhetorical skills in an intensive one-week field experience in the dynamic context of contemporary London. The team-taught interdisciplinary seminar makes full use of the resources available to students at Fordham's London Centre, with reading, writing, and discussion-based assignments linked to excursions grounded in London's politics and culture, as well as daily practice in public speaking and eloquencia perfecta exercises and skill building techniques in the Ignatian tradition with pointed links to civic virtue. Preceding the study tour, during the spring semester, students engage in four two-hour preparatory seminars, with critical discussion, reading, and writing assignments relating to classical and contemporary rhetoric. The course satisfies the EP3 and ICC core requirements and is cross-listed as an elective for the political science major/minor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, POCP

POSC 4013. Religion and American Politics. (4 Credits)
This interdisciplinary seminar explores the nexus of religion and American public life. After treating topics related to electoral politics (e.g. candidate religion, voter religion, “value voters,” religious rhetoric), students will then engage a series of “hot topics” that encompass (and often combine) both religious and political discourse. The goal is to provide students with two alternative, yet complementary methods of analyzing the intersection of religion and American politics: one from a political science perspective and one from a theological perspective. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMCS, AMST, APPI, ASRP, ICC, IRST.

POSC 4015. American Economic Policymaking. (4 Credits)
This course surveys the major economic policies made by the U.S. government, political influences on economic policy making and the consequences of economic policy on politics. Some of the policies we will look at will include macroeconomic policy, fiscal and monetary policy, taxes, regulation and trade. Influences on economic policy making include the president, congress, interest groups and the public. We will also discuss the trade off between economic efficiency and equity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ICC, LPBC, LPGP, POAP, URST.
POSC 4020. Place, Space, and Immigrant Cities. (4 Credits)
This course will introduce students to the main issues and current debates on immigrant minorities in large urban areas. Due to their density, cities represent microcosms of interaction and identity formation among and between different minority and majority groups. This often manifests itself spatially, as certain neighborhoods become areas of residence and territorial concentration for immigrant minorities. In the process of settling, immigrants also start identifying strongly with their spaces of settlement. This course will trace the historical patterns of this process, as well as explore its contemporary manifestations, as cities are being rediscovered and “gentrified,” rendering their neighborhoods into fierce battlegrounds of spatial contestation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ICC, INST, ISEU, ISIN, POCP, URST.

POSC 4025. Youth and Politics. (4 Credits)
Youth is widely regarded as the future of the nation and an agent of social change. How do young people participate in politics? What influences youth’s voting behavior and engagement in protest activity? What is the impact of family, schools, and social media on youth’s civic engagement? The course will address these issues from an interdisciplinary, cross-national perspective by drawing upon literature in anthropology, political science, psychology, and sociology and comparing youth experiences in the United States, East Asia, Eastern Europe, and the Middle East. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASHS, ICC, INST, ISIN, PJRC, PJST, POCP, URST.

POSC 4037. Social Movements and Revolutions. (4 Credits)
Over the course of world history, various social movements were formed to challenge dominant power relations and bring about social change. Drawing upon literature in history, political science, and sociology, this course examines a wide range of challenger organizations and revolutions. In particular, this course discusses the development of several twenty-first century social movements and revolutions in the United States and abroad, including Black Lives Matter, the Occupy Wall Street, Otpor (Serbia), the Arab Spring (Middle East), Umbrella Revolution (Hong Kong), and EuroMaidan (Ukraine).
Attributes: ADVD, AMST, APPI, ASHS, ASRP, ICC, INST, ISIN, LALS, LASS, PJST, POCP.
Mutually Exclusive: POSC 3515.

POSC 4055. What Is College For?. (4 Credits)
This course begins with a close reading of 'The Idea of a University,' John Henry Newman's classic account of the purposes of higher education, and an introduction to philosophy and theology. Next, the course will cover the history of American higher education and Catholic higher education in particular. We will study the origins of liberal arts colleges, the emergence of land grant and research universities, the growth and popularization of American higher education after World War II, and the current education landscape, including community colleges and online options. The course will consider such questions as the role of theology in the core curricula at contemporary Catholic universities, Jesuit values and U.S. News and World Report values, the Catholic preferential option for the poor and the student body at Catholic colleges, and the relationship between Catholic colleges and the surrounding communities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ICC.

POSC 4210. Seminar: State, Family, and Society. (4 Credits)
This seminar will examine the relationship between political systems and the family by exploring the connection between varying philosophical/ideological perspectives on state intervention in the family. Public policy issues to be discussed will include marriage and divorce, adoption and foster care, child care, family and child autonomy and child and domestic abuse. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASHS, EP4, PJRC, PJST, POAP, VAL, WGSS.

POSC 4215. Seminar: Presidential Elections. (4 Credits)
The course will analyze the dynamics of presidential elections, including pre-nomination stage, nominations, campaigns, and voting behavior. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, POAP.

POSC 4216. Seminar: Campaigns and Elections. (4 Credits)
The primary goal of this course is to provide an introduction to the major theoretical frameworks on campaigns, elections, and parties in the U.S. to better understand how incorporation and participation shape the multifaceted political identities of citizens and residents in the U.S. This course will largely push students to solidify and clarify their understanding of incorporation, democracy, inclusion, and rights at this particular historical moment, more specifically in relation to partisan and racial group identity in the U.S., incorporation of underrepresented groups over time, and the future of representation of all groups, both descriptive and substantive. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS.
Prerequisite: POSC 1100.
Mutually Exclusive: POSC 3301.
POS 4260. The Political History of Sex and Sexuality in the United States. (4 Credits)
This seminar examines the history of activism and political organizing by lesbian, gay, bisexual, and transgender people in the United States between 1950 and 2012. Using an interdisciplinary approach - across gender and sexuality studies, queer theory, critical race theory, political science, and history - we will explore: 1) the ways what lesbian, gay, bisexual, and transgender identities have been constructed in the context of US politics and 2) how lesbian, gay, bisexual, transgendered, and ‘LGBT’ political interests achieve their meaning and are co-constituted by their intersections with other axes of identity, such as race, ethnicity, class, nation, and ability. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, WGSS.
Prerequisite: POSC 1100.

POS 4305. Seminar: American Politics. (4 Credits)
This course studies contemporary American political development through analysis of the historical and philosophical roots, current ideologies and practices, and likely future of U.S. politics. Using democratic theory, and political, and policy analysis it examines selected aspects of contemporary political behavior, agendas, ideologies, and institutions to explain current trends in American politics. It studies, in particular, the relation between power, social structure, and politics in order to assess the viability and character of political democracy today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, POAP.

POS 4315. Seminar: Polarization in American Politics. (4 Credits)
This course will examine the causes and consequences of partisan polarization in American politics. Topics to be covered include polarization in Congress, are ordinary citizens polarized, the role of religion, class and race in fueling partisan polarization on the policy making process. Since this is a seminar students are expected to be able to work and the impact independently by carrying out an extensive research project addressing some aspect polarization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, POAP.

POS 4400. Seminar: Global Justice. (4 Credits)
What is global justice and how can we achieve it? This course considers answers to this question from Enlightenment philosophers, and contemporary liberals, cosmopolitans, feminists, neoliberalists, realists, Muslims, and Buddhists. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, HPSE, HUST, INST, IPE, ISIN, PJCP, PJCR, PJST, POPT, URST, VAL.

POS 4420. Seminar: Nationalism and Democracy. (4 Credits)
An examination of nationalism with particular attention to its effects on democratic principles and practices and its intersection with identity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: POPT, WGSS.

POS 4515. Seminar: International Politics of Peace. (4 Credits)
Students in this course will integrate informed analysis and reflection to critique, orally debate, and articulate in writing their ideas regarding how actors in international politics can nurture, envision, (re)build, manage, enhance, and enforce ‘peace’ in contemporary international politics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, HPSE, HUST, INST, IPE, ISIN, PJCP, PJCR, PJIN, PJST, POIR, VAL.

POS 4526. Seminar: The Politics of Humanitarian Intervention. (4 Credits)
Political decisions about when, how, and whether to intervene in other countries’ affairs have been framed in humanitarian terms. The course provides students with an overview of the politics of humanitarian intervention and asks them to consider a variety of perspectives on the feasibility, effectiveness, ethics, and altruism of protecting civilians with force. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HPSE, HUST, INST, ISIN, PJCR, PJST.

POS 4535. Seminar: Post-Cold War Human Rights and Protection Architecture. (4 Credits)
This seminar will explore the politics surrounding the unprecedented growth, development and advancement of the global human rights regime and protection of civilians architecture following the demise of the Cold War. The context of the emerging global governance order at the end of the 20th century will form the backdrop for the study of this transformation, and students will analyze the normative, political and peace and conflict dynamics that precipitated and informed its growth and development as well as develop a mastery of the theory and practice of international human rights and civilian protection. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN.

POS 4545. Seminar: Russian Politics and Society. (4 Credits)
As a successor to the Soviet Union, the Russian Federation is one of the largest and most powerful countries in the world. The course will provide an overview of Russian history, politics, and society. The course will begin by examining the rise and the fall of the Soviet Union. Next, the course will examine Russian politics from the early 1990s to the present day. The course will conclude with a discussion of Russian foreign policy and US-Russian relations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISAS, ISEU, POCP.

POS 4620. Seminar: The World of Democracy. (4 Credits)
This course studies democracies across of the globe. It analyzes the meaning of democracy in different cultures and theories, and compares political systems, including democratic nations that aspire to democracy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, INST, ISAF, ISAS, ISEU, ISIN, ISLA, ISME, PJCR, PJST, POCP, VAL.

POS 4800. Internship. (1 to 4 Credits)
Analysis and discussion of selected topics and problems in political economy. Provides students the opportunity to work on guided research projects tailored to the student’s interests and the course’s objectives.

Updated: 07-27-2020
POSC 4900. Seminar: Democracy, Development, and the Global Economy. (4 Credits)
This course seeks to understand, analyze, and critique both liberalism and its alternatives. Specifically, we will explore how democracies and nondemocracies integrate into the global economy and how, in turn, the global economy impacts state politics, poverty, and prosperity. The goal of the course is to critically and scientifically assess the significance and success of diverse domestic political institutions and policies in advancing human welfare in our current era of economic interdependence. The course is structured to first cover the fundamental structures and values of democratic and underdemocratic political institutions, liberal and state capitalist market models, and various economic development theories. Then, in the second part of the course, we will critically evaluate and discuss the complex relationships between these phenomena (democracy, development, and the global economy), focusing on the capacity, sustainability, and success of liberal goals and organizational structures in advancing the human condition. This is an advanced writing, research, and discussion based course for students interested in international political economy, international development, and/or comparative politics. We will dedicate substantial class time to research design and methodology, including case study analysis. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, INST, IPE, ISIN, PJEC, PJST, VAL.

POSC 4999. Tutorial. (0 to 8 Credits)
Student and faculty member together design a course to meet the student's needs and interests, and to advance the student's knowledge and scholarship. The faculty member works directly with the student and guides the student's reading and research and/or analysis project. A tutorial is dependent on the faculty member's agreement to participate. It usually is a one-on-one collaboration, but also may be designed to accommodate several students at the same time.

POSC 5100. American Political Behavior. (3 Credits)
The nature and sources of mass political behavior, with a focus on questions of mass-elite linkages derived from democratic theory; political attitudes, their origin and measurement; mass participation—electoral and non-electoral—and its systemic consequences.
Attributes: AMST, ASHS, DATA.

POSC 5130. Political Institutions and Processes. (3 Credits)
Legislative, executive, and judicial powers. The formation and implementation of public policy. Institutional norms and behavior in American national government.
Attribute: DATA.

POSC 5140. Themes in Urban Public Policy and Power. (3 Credits)
We see around us a city constantly in change, dynamic change, in which multiple actors compete daily. What are they competing for? And why? What does power mean for those actors? How is it to be defined? Who wins, who loses, and why? What are some of the policy issues that confront actors in a city whose only constant is change? We will during the weeks that follow look in a survey fashion at a series of urban issues and ideas, often with a focus on New York City. We will also hear from and be able to talk with guest speaker personalities with unique histories and perspectives. This should help inform our thinking about the issues we discuss, their historical and political context, and their salience.
Attributes: HECs, PMMA, URSG.

POSC 5238. Strategies of Political Communication. (3 to 4 Credits)
How to build campaign messages based on an understanding of vote determinants, research tools, and candidate psychology.
Attribute: PMMA.

POSC 5240. Fundamentals of Political Campaign Management. (3 to 4 Credits)
Will introduce the basic elements of political campaign management, focusing on the role and the responsibilities of the modern campaign manager at all levels of campaigns; local, congressional, statewide, and national.

POSC 5243. Campaign Finance and Ethics. (3 or 4 Credits)
Designed to introduce students to the current campaign finance laws that regulate elections for federal and non-federal political candidates.
Attributes: CEED, CENS.

POSC 5244. Elections and Campaign Management Internship. (3 Credits)
A professional-level internship in a political consulting firm or campaign organization, which will give students direct, practical experience and where they can apply what they have learned in classes to a real world setting.

POSC 5245. Political Communications: Earned Media In the Age of Digital and Social Media Boom. (3 Credits)
This course will explore how campaigns develop strategies to attract media attention, publicity, and news coverage. Topics include speechwriting, press releases, press conferences, and social media communications.
Attribute: PMMA.

POSC 5246. Technology and Campaigns. (3 Credits)
This course will explore the use of modern technology in campaigns. Students will learn how to capitalize on developments in technology and new media for electioneering purposes to target, mobilize, and persuade voters. Students will also learn how to use campaign management software, database management, and GIS mapping technologies, to execute effective campaigns.
Attribute: PMMA.

POSC 5247. Data Analytics for Political Campaigns. (1 Credit)
This course will explore how campaigns can use data analytics to target and deliver voter appeals and mobilization efforts. Topics include: micro-targeting, data analysis, polling research and quantitative analysis.
Attribute: PMMA.

POSC 5250. Introduction to Quantitative Analysis. (3 Credits)
An introduction to the major theoretical frameworks of quantitative research. This course will give students first-hand experience at the fundamentals of research design and quantitative methodologies used in American political science.

POSC 5251. Political Survey Research. (3 Credits)
This course is designed to take students through the entire process of conducting both telephone and Internet public opinion surveys, with a specific look at political polling method. It applies academic and practical research to teach question writing and selection, survey construction, managing and fielding questionnaires, and analyzing and writing about data. Its goal is to provide students with a working knowledge of how to conduct and analyze their own surveys as well as how to evaluate others' surveys.
Attribute: DATA.

POSC 5255. Public Opinion Certificate Practicum. (3 Credits)
This course will take students through the process of designing, implementing, and analyzing an actual public opinion survey. Students will be responsible for managing every aspect of the Fordham American Faith (FAF) survey, gaining vital experience in hands-on survey work.
Prerequisites: POSC 5251 and POSC 5250.
POSC 5257. Survey Research Data Analysis. (3 Credits)
This course will focus on topics in and application of survey data analysis, particularly on interpretation and presentation of survey results. Students will learn to construct and use survey weights, to employ scaling of survey items, to use static to make conclusions regarding pre-state hypotheses. There will be an emphasis on visual presentation of descriptive statistics and the results of statistical models. Furthermore, the course will cover linear and logistic regression analysis.
Prerequisite: POSC 5250.

POSC 5299. Special Topics: Campaigns. (3 Credits)
This is the capstone course for the M.A. in Elections and Campaign Management. Students, in groups, design campaign plans from start to finish. It is restricted to students in the M.A. program.

POSC 5301. Modern Political Thought. (3 to 4 Credits)
This course considers the relationship between religion and politics by reading Euro-American political thinkers such as Spinoza, Leibniz, Kant, Hume, and Locke. We also consider how post-Enlightenment philosophers—such as Michel Foucault, Jürgen Habermas, Tariq Ramadan, and Abdullahi Ahmed An-Na’im—address the Islamic revival. Attributes: CEED, CENS.

POSC 5500. Comparative Pol Analysis. (3 Credits)
Problems of stability and change in the First, Second, and Third Worlds are examined with relation to socioeconomic factors that affect, and are affected by, institutions, processes, and policies. Attributes: INST, IPED, URSG.

POSC 5560. Conflict Resolution. (3 or 4 Credits)
This course will focus on the nature of international and regional conflict during the post-Cold War period in terms of both current theory and the reality of recent conflict situations. Topics will include: analysis of the causes of contemporary conflicts; assessment of current international, regional and national approaches to conflict resolution; psychological implications of civil and ethnic conflicts; challenges of multiparty international mediation; and consideration of the role played by international, regional and community level institutions in addressing conflict situations. Particular emphasis will be placed on what theories and ideas actually work when put in to practice.
Attributes: CEED, CENS, INST, IPED, IRST.

POSC 5600. Analysis of Int’l Pol. (3 Credits)
Designed to stimulate and clarify our theorizing about foreign policy and global politics; also it presents a critical overview of many of the key perspectives and problems that characterize such analysis.
Attributes: INST, IPED.

POSC 6250. International Business and Governments. (3 Credits)
Overview of the major principles, theories and issues regarding the role of contemporary international business within an interdependent world political economy. Course topics include corporate strategy, identity, governmental policies, diplomacy, foreign policy, ethics, meida, entrepreneurship, and trade. Specific case-study materials will be used to supplement academic literature.

POSC 6530. Political Economy of Development. (3 Credits)
This course provides an introduction to the politics and comparative study of international development, both human and economic. A central question will help organize the course: why have some countries developed successfully, while others have not? Whereas much of Western Europe, North America and East Asia have experienced economic development, much of Africa has not. Latin America, Eastern Europe and Eurasia are hybrids, with both pockets of success and failure. While defining what success or failure may mean in light of globalization, our collective focus will be on how best to understand such differences.s.
Attributes: HULI, IPED, URSG.

POSC 6552. Political Economy of the Middle East. (3 Credits)
Comparative analysis of Middle Eastern actors, institutions, and processes since World War II, paying special attention to the role of international forces in shaping national development and to the role of the Middle East as a major international actor and arena.
Attributes: IPED, MEST.

POSC 6640. Pol of Global Econ Rel. (3 to 4 Credits)
Implications of growing intertwining of foreign and domestic policies, economic and political aspects of international relations. Special attention to the growth of dependency and interdependence, importance of transnational actors (such as multinational corporations), and distribution of benefits and influence between poor and rich areas in the international order.
Attributes: ABGS, CEED, CENS, IPED.

POSC 6991. Political Risk Analysis. (3 Credits)
This course is primarily a research/writing course that culminates in an original paper where you will be required to analyze the political risks associated with a country of your choosing. While there will be only a minimal number of lectures, the instructor will serve as your individual mentor as you develop and present your paper. As part of the process of writing this paper, you will study methods used to assess and manage the political risks associated with foreign investment and international business; learn how to assess the domestic political climate of a country by examining factors such as the levels of political violence, the stability of the government, and the existence of political democracy, and make an overall assessment of a country’s economic climate by evaluating key macroeconomic indicators. You will also learn the importance of studying foreign relations of a country in order to evaluate the likelihood of any conflict it might have with its neighbors.

POSC 8988. Gbvt and Pgl of North Africa. (3 Credits)
This course is an independent study for IUDC Consortium students from member schools. The course addresses the political systems of the North African Region.

POSC 8999. Independent Study. (1 to 4 Credits)

POSC MTNC. Maintenance-Pol.Science. (0 Credits)

Property Law (PRGL)

PRGL 0107. Property. (4 to 5 Credits)
An introduction to the law of personal and real property. Topics may include possession, finding, gifts, bailments, estates in land, future interests, adverse possession, concurrent ownership, easements, covenants running with the land, servitudes, zoning, takings, nuisance, land conveyancing, title assurance, and the economic and philosophic bases of property rights. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: JD, LMCO.
PRGL 0223. Land Use and Real Estate Development Skills. (2 Credits)
This course will provide students with practical skill development in real property and land use issues. A review of effective skills needed in the representation of clients before land use administrative agencies as well as employment of best practices in drafting real property documents will be studied. Consideration of special issues to be addressed in appearing before Planning, Zoning and other real property administrative bodies will be undertaken. This class will explore drafting requirements concerning real property matters as well as client concerns from an applicant, municipal entity and citizen group viewpoint when advocating for or against real estate projects. Real property issues involving civil rights and RLUIPA cases will also be reviewed from a practical perspective representing clients. Litigation skills involving real property and land use cases will be studied and also developed from both the drafting of pleadings perspective as well as use of “courtroom” skills for utilization in practice before administrative agencies.
Attribute: LAW.

PRGL 0299. Affordable Housing. (2 Credits)
This seminar explores the law and policy of affordable housing. We will begin with an overview of housing market dynamics—both for those who rent and those who own their homes—and ways in which housing markets fail. We will then turn to the primary policy tools that have developed in response, examining in detail several cutting-edge topics including the subprime mortgage crisis, on-going challenges for ensuring fair housing and equal opportunity, and sustainability and “green” affordable housing.
Attributes: INLJ, LLM, PIE.

PRGL 0315. Coops and Condominiums. (2 Credits)
Basics of the condominium and cooperative forms of ownership of real property. Includes discussion of legal nature and structure of condominiums and cooperatives; comparison of the two; review of the critical underlying documentation of each (declaration of condominium and by-laws and cooperative proprietary lease and by-laws); special tax aspects of each; regulatory concerns, including offering plans; tax aspects of each; review of documentation and procedures in typical transactions; loans; title insurance; operating issues of the associations; special topics of conversions, commercial properties, etc.
Attributes: JD, LAWB, LLM.

PRGL 0363. Land Use Law. (2 or 3 Credits)
The course will provide an overview of land use law and planning, including the application of zoning and land use controls that have shaped American cities and towns, environmental impact review under both the National Environmental Policy Act and New York State Environmental Quality Review Act, and the use of eminent domain by federal and New York State agencies. Topics will also include the preservation of historic resources and landmark buildings, urban renewal, the protection of parkland under the public trust doctrine, and measures to address climate change through local planning. In addition to reviewing statutes and case law, the course will provide a how-to-do approach to land use planning, utilizing examples of large development projects currently occurring in New York City.
Attributes: INLJ, PIE.

PRGL 0415. Real Estate Finance. (2 or 3 Credits)
A broad review of the legal aspects of real estate finance, including an understanding of the parties involved and their expectations, responsibilities and roles, loan types and structures, due diligence concerns, terminology, documentation, negotiating positions and default and enforcement issues. Class work will include negotiations and periodic memoranda.
Attribute: LAWB.

PRGL 0422. Real Estate Transactions. (2 to 3 Credits)
This class focuses on the law and practice of buying, selling, and financing real estate. In the course of the semester, we will explore themes inherent in real estate transactions, including the role of the lawyer in real estate transactions, the primary client risks that transactional lawyers in real estate need to understand, and the tools that real estate attorneys bring to the identification, allocation, and management of those risks. This is a course, in short, about real estate as deal making and the myriad ways attorneys structure transactions, negotiate, draft documents, engage with clients, and resolve disputes.
Attributes: LAWB, LLM.

PRGL 0515. Res Landlord Tenant Law. (2 Credits)
This course covers the practical and theoretical aspects of residential landlord-tenant summary proceedings and plenary actions in Housing Court, Civil Court, Supreme Court, and other courts across New York State and of appeals from those courts. Emphasis is placed on prosecuting, defending, settling, trying, and appealing residential nonpayment, holdover, and HP (repair) cases; lease interpretation; and market, rent-regulated, cooperative, and other tenancies. Students will write a short paper and complete a take-home exam.
Attributes: JD, LLM.
Prerequisite: CVGL 0101.

PRGL 0929. Housing Policy and the Making of New York. (2 Credits)
The seminar will focus on the rich history of housing policy in New York City. The coursework will explore the evolution of housing rights through an intersectional lens of class, disability, race and gender. <p> The final grade will be based on class participation, a paper due by Class 6, and a final exam. <br> Class participation 20%-<br> Paper 30% <br> Final exam 50%
PSGE 0810. Adv Cert/Professional Practice in School Psychology Comprehensive Assessment. (0 Credits)
Advanced Certificate Comprehensive Exam/Assessment in School Psychology (0 credit) (ADV CERT COMPS)

PSGE 0815. Adv Cert/Professional Practice in Bilingual School Psychology Comprehensive Assessment. (0 Credits)
Advanced Certificate Comprehensive Exam/Assessment in Bilingual School Psychology (0 credit) (ADV CERT COMPS)

PSGE 0900. Maintenance of Matriculation. (0 Credits)
Maintenance of Matriculation.

PSGE 0905. Doctoral Comprehensive in Counseling Psychology Exam/Assessment. (0 Credits)
Part one of the doctoral comprehensive exam or assessment for PhD program in counseling psychology.

PSGE 0910. Doctoral Comprehensive Exam/Assessment in Counseling Psychology. (0 Credits)
Part two of the doctoral comprehensive exam or assessment for PhD program in counseling psychology.

PSGE 0915. Doctoral Comprehensive Exam/Assessment in Educational Psychology Part I. (0 Credits)
Doctoral Comprehensive Exam/Assessment in Educational Psychology Part I (0 credit) (DOCTORAL COMPS I)

PSGE 0920. Doctoral Comprehensive Exam/Assessment in Educational Psychology Part II. (0 Credits)
Doctoral Comprehensive Exam/Assessment in Educational Psychology Part II (0 credit) (DOCTORAL COMPS II)

PSGE 0925. Doctoral Comprehensive Exam/Assessment in Educational Psychology Part III. (0 Credits)
Doctoral Comprehensive Exam/Assessment in Educational Psychology Part III (0 credit) (DOCTORAL COMPS III)

PSGE 0930. Doctoral Comprehensive Exam/Assessment in School Psychology Part I. (0 Credits)
Doctoral Comprehensive Exam/Assessment in School Psychology Part I (0 credit) (DOCTORAL COMPS I)

PSGE 0935. Doctoral Comprehensive Exam/Assessment in School Psychology Part II. (0 Credits)
Doctoral Comprehensive Exam/Assessment in School Psychology Part II (0 credit) (DOCTORAL COMPS II)

PSGE 0999. PES Proposal Acceptance. (0 Credits)
During the semester the dissertation proposal is completed.

PSGE 5203. Introduction to Research. (3 Credits)
Presentation of the basic concepts, tools, and methods of research in education and psychology.

PSGE 5204. Research Methods in Counseling. (3 Credits)
Basic concepts, tools, and methods of research in counseling.

PSGE 5210. Statistical Methods in Education and Psychology. (3 Credits)

PSGE 5301. Psychological Factors in Young Children with Disabilities. (3 Credits)
This course provides an overview of the characteristics of disabing conditions in young children. It introduces the psychological, environmental, and biological conditions, and the interactions among them that place children at risk for developmental delays and disabilities. It discusses the sociocultural and political contexts impacting child development, and the effectiveness of various intervention approaches and models so as to provide students with a knowledge base and skills for interventions.

Mutually Exclusive: CTGE 5155, CTGE 6305.

PSGE 5302. Psychology of Adolescent Development and Learning. (3 Credits)
Theory and study of development and learning process during the adolescent years. This course examines the cognitive, psychosocial, and character development of children from age 12 to 18 and young adults, their learning abilities and processes; and individual, sociocultural, and other environmental factors affecting their learning and development.

PSGE 5314. Psychology of Classroom Organization and Management. (1 Credit)
The study of teacher-pupil interactions in classrooms. Characteristics of effective learning environments, time and behavior management, classroom climate, and leadership. Causes of student misbehavior and techniques for prevention and correction. Open only to matriculated students in one of Fordham's initial teacher education programs.

PSGE 5316. Psychology of Child Development and Learning. (3 Credits)
This course will review current thinking in the study of child development as reflected in prevailing developmental theory and research. Course readings and assignments will address developmental issues throughout childhood within the physical, cognitive, and socioemotional domains. Special emphasis will be placed on the changes in learning that occur during infancy and childhood.

PSGE 5318. Human Development and Learning: Pre-K?Grade 12. (3 Credits)
This course will provide an overview of psychological principles relevant to the process of learning and teaching as applied to the kindergarten through secondary-school learner. Topics will include theories of human development and learning, models of learning and instruction, and academic assessment.

PSGE 5500. Psychological Factors in Children with Disabilities. (3 Credits)
An introduction to understanding children with disabilities and special health care needs. Study of the physical, social, emotional, and learning characteristics of children identified as disabled.

PSGE 5505. Psychology of Learning Disabilities. (3 Credits)
Identification of social, emotional, and learning characteristics of children diagnosed as brain injured, neurologically impaired, or learning disabled. Exploration of perceptual disabilities, language, and motivational and behavioral aspects of children who have learning problems.

PSGE 5620. Introduction to Professional School Counseling I. (3 Credits)
An introduction to the profession of counseling. The processes and techniques of counseling are studied. Emphasis on the development of active listening skills. Prevention and remediation are addressed.

Corequisite: PSGE 5622.
PSGE 5621. Foundation of Professional Counseling and Consultation. (3 Credits)
An introduction to the profession of counseling. The processes and techniques of counseling are studied. Emphasis on the development of active listening skills. Prevention and remediation are addressed. Must be taken with PSGE 5623.
Corequisite: PSGE 5623.

PSGE 5622. Pre-Practicum in Professional School Counseling I. (3 Credits)
Guided and supervised experience in individual counseling using a variety of counseling techniques. Must be taken with PSGE 5620.
Corequisite: PSGE 5621.

PSGE 5623. Clinical Instr Couns Process. (3 Credits)
Guided and supervised experience in individual counseling using a variety of counseling techniques. Must be taken with PSGE 5621.
Corequisite: PSGE 5621.

PSGE 5625. Theories Fam Couns: Asst. (0 to 3 Credits)
This course covers leading theories of family counseling and reviews a variety of family assessment procedures and techniques. The course has an applied focus and integrates multicultural and social justice perspectives in understanding and working with families both within and across cultures.

PSGE 5627. Couns College & Post HS. (3 Credits)
This course provides systematic training in counseling for post high school planning including the college admission and selection process. Students will be introduced to concepts and practical skills required for competency in working with diverse populations: the traditionally aged college student applicant, the disadvantaged, the minority student, the gifted, the learning disabled, the student athlete, and the adult.

PSGE 5630. Theories of Counseling for School Counselors. (3 Credits)
This course is designed to review and evaluate various theories of counseling. Students will be able to compare, contrast, and critique the theoretical approaches in terms of each of the theory’s strengths, weaknesses and utility for multicultural populations and for furthering social justice advocacy. This course must be taken with PSGE 5632.
Corequisite: PSGE 5632.

PSGE 5631. Couns Theory & Practice. (3 Credits)
This course is designed to review and evaluate various theories of counseling and to encourage students to develop their own conceptualizations of the counseling process. This course must be taken concurrently with PSGE 5633.

PSGE 5632. Social Justice Practicum in Professional School Counseling. (3 Credits)
Students will be placed in a 100-hour social justice oriented pre-practicum in a high need school. They will be conducting both direct and indirect counseling under the supervision of a certified school counselor. During the first half of the class, students will serve as a peer supervision of the pre-practicum experience. In the second half of the class, students will practice advanced counseling skills using a different theoretical orientation each week. This course must be taken with PSGE 5630.
Corequisite: PSGE 5630.

PSGE 5633. Pre-Practicum in Applications of Counseling Theory to Practice. (3 Credits)
This course is the second semester of a two-semester pre-practicum experience. It must be taken concurrently with PSGE 5631 Counseling Theory and Practice. Students will apply various theories of counseling to specific cases though role plays and taped practice counseling sessions. Feedback will be provided by the instructor and peers.
PSGE 6325. Psychology of Media. (3 Credits)
This course is designed to examine key issues and theoretical perspectives within the interdisciplinary field of media psychology. Course readings will concern the psychological underpinnings of various forms of media, including television, telecommunications, and multimedia, and their impact on the viewer from a psychosocial and cognitive vantage point. Special emphasis will be placed on the child and the adolescent user.

PSGE 6337. Advanced Educational Psychology: Instructional Design. (3 Credits)
Theories and models of instructional design. Applications of theory and research in educational psychology to the analysis and development of instructional programs.
Prerequisite: PSGE 6312.

PSGE 6338. Design and Evaluation of Creativity Programs. (3 Credits)
Design, development, and evaluation of education and training programs to encourage creative thinking and problem solving. General problem-solving skills vs. discipline-based programs. Teacher and staff-development efforts. Selection and measurement of relevant creativity outcomes.

PSGE 6341. Psychology of Personality and Individual Differences. (3 Credits)
Theory and research in differential psychology applied to educational settings. Topics include age, sex, intellectual, socioeconomic, racial, and ethnic differences; cognitive styles; and special-talent abilities.
Prerequisite: PSGE 6312.

PSGE 6345. Social Psychology. (3 Credits)
Social psychological theories, concepts, and research are studied. Topics include interpersonal relations, social learning, social motivation, communication, attitudes, groups and organizations, and social change.

PSGE 6401. Seminar in the Psychology of Bilingual Students. (0 to 3 Credits)
This seminar provides a theoretical foundation for understanding critical issues that impact on the psychological functioning of bilingual children and adolescents in the schools. The main objectives are to develop a multicultural psychological perspective, including an understanding of the acculturation process, the nature of bilingualism, bilingual assessment, and bilingual pedagogical issues.

PSGE 6417. Developmental and Intellectual Disabilities. (3 Credits)
This course focuses on the assessment and diagnosis of several disorders of early childhood onset. These disorders include mental retardation, autism, other pervasive developmental disorders, Rett's Disorder, Asperger's Syndrome, and various learning disabilities. The etiologies of these disorders, as well as how they are manifested throughout the life span, will be highlighted by reviewing relevant research and through course discussions.

PSGE 6418. Emotional Disorders of Childhood and Adolescence. (3 Credits)
Survey of causes and consequences of emotional problems of children and implications for educational planning. The major psychiatric and psychological classification systems are studied, as are the effects of social and cultural factors on emotional development.

PSGE 6446. Consultation With Families in a Diverse Society. (3 Credits)
The purpose of this course is to provide students with the skills necessary to be effective consultants with families of young children.

PSGE 6602. Human Development. (3 Credits)
This course presents an overview of human development through the life span. Theories of psychosocial development are emphasized, as are the implications of life stage for counseling assessment and intervention. Multicultural and feminist perspectives on human development are included.

PSGE 6603. Multicultural Issues in Professional Psychology. (0 to 3 Credits)
The course is designed to provide psychologists, counselors, and school personnel with the requisite knowledge for working with clients and students of diverse racial, ethnic, and cultural backgrounds. Intervention techniques for working with a variety of racial/ethnic and special populations are included.

PSGE 6605. Counseling Program Development and Evaluation. (3 Credits)
The purpose of this course is to provide students with an introduction to principles and methods of counseling program development and evaluation. Psychoeducational, therapeutic, developmental, and culturally appropriate interventions will be considered on individual, group, and system levels. The course focuses on developing and evaluating the effectiveness of counseling interventions based on research evidence. Students will apply the knowledge they gain—through course instruction, assigned readings, and focused reviews of literature relevant to their particular counseling interests—to develop a proposal for a counseling intervention program and design a plan for its implementation and evaluation. Prerequisites: PSGE 5620, 5622, 5204.

PSGE 6607. Assessment in Counseling. (3 Credits)
This course is an introduction to basic issues and procedures in counseling assessment and testing across the life span. It is part of the PSGE 6602 – PSGE 6607 counseling module, and the content is geared toward practicing professional counselors in a variety of settings. Multicultural and ethical issues are infused throughout the course content.

PSGE 6609. Advanced Assessment and Appraisal in Counseling. (3 Credits)
This course is required for students in the Mental Health Counseling program. This class focuses on clinical assessment in mental health counseling with an emphasis on objective inventories of personality and psychopathology. Students will be exposed to a number of assessments of personality and psychotherapy, with a particular emphasis on the range of inventories. Students will also learn diagnostic interviewing and semi-structured assessments of psychopathology. Multicultural and ethical issues are infused throughout the course content and process. Must have previously taken PSGE 6607.
PSGE 6615. History and Systems of Psychology. (3 Credits)
This doctoral-level course provides students with an overview of the development of psychological thought, from its culturally indigenous origins in roughly 3000 BC, to Western influences in the late 19th century, through to the present and anticipated future of the field. Major topics include: philosophical influences in psychology, structuralism, functionalism, behaviorism, Gestalt, psychoanalysis, multicultural psychology, and recent theoretical developments. While this course is organized in terms of the major schools of thought that have defined the field of psychology, there is extensive coverage of the history of “constructs” that have shaped the field of psychology, as well as exploration of pioneers in the field across race, gender, sexual orientation, and other individual differences. The course aims to promote a critical analysis of the history of psychology through deconstruction of the cultural and historical milieu that influenced the system of thought or construct under consideration. The place of counseling, vocation, multicultural, and social-justice-oriented psychology will be emphasized.

PSGE 6630. Group Counseling. (3 Credits)
Principles of group dynamics that have implications for group counseling are studied. Must be taken with PSGE 6632.
Attributes: CPCE, CPJE.
Prerequisites: PSGE 5620 and PSGE 5622.
Corequisite: PSGE 6632.
PSGE 6632. Pre-Practicum in Groups. (3 Credits)
The course is an experientially focused group-counseling course in which students participate as both group members and leaders. Must be taken with PSGE 6630.
Corequisite: PSGE 6630.
PSGE 6640. Career Counseling. (3 Credits)
Theories, research, and processes of career development are examined. Must be taken with PSGE 6641.
PSGE 6641. Pract Career Counseling. (3 Credits)
Focus is on assessment techniques and methods of career development. A case-study approach is used. Must be taken with PSGE 6640.
Prerequisites: PSGE 5620 and PSGE 5622.
Corequisite: PSGE 6640.
PSGE 6642. Practicum in Career Counseling. (3 Credits)
Focus is on assessment techniques and methods of career development. A case-study approach is used. Must be taken with PSGE 6640.
Corequisite: PSGE 6640.
PSGE 6645. General Psychopathology. (3 Credits)
This course will provide a comprehensive overview of psychopathology. The survey will begin by contextualizing notions of psychopathology within the historical milieu of the cultures of psychology and psychiatry. Methodological and taxonomic issues will be explored with an emphasis on the paradigm presented by DSM-IV. The major adult psychiatric disorders (both Axis I and Axis II) will be studied in detail. Related diagnostic and assessment strategies will also be discussed. Through readings and in-class activities, students are expected to develop an understanding of etiological, diagnostic, and treatment issues related to the various disorders addressed.
PSGE 6650. Ethics and Professional Issues in Counseling. (3 Credits)
An integrating seminar in which the role and function of counselors in society are examined. Philosophical and psychological roots of counseling are studied, and the ethical guidelines of the major professional organizations are analyzed. Important issues facing the counselor are also studied. Must be taken with PSGE 6652. Prerequisites: Areas I, II, III, and IV from the counseling curriculum.
PSGE 6655. Field Experience III in Mental Health Counseling. (3 Credits)
This course is offered as an option of a third field experience course (summer I only) for those master's students in mental health counseling who completed the minimum number of supervised hours in the first two practica. Students function as mental health counselors under supervision in a hospital, college, or other agency settings. Students are responsible for locating and contracting with their own qualifying site, subject to the approval of the coordinator of master's field experiences and their adviser. The course includes group supervision, case presentations, and content specific to developing mental health counseling competencies. Prerequisite: PSGE 6653.

PSGE 6656. Multicultural Counseling. (0 to 3 Credits)
This course is designed to equip students with the awareness, knowledge, and skills for counseling culturally diverse clients. Students will be exposed to leading theories of multicultural counseling and racial/ethnic identity development and will be involved in case-study analysis, role plays, and other diverse experiences.

PSGE 6659. Trauma Interp Neurobio. (0 to 3 Credits)
Shall bridge the gap between advances in neuroscience & the practice of psychotherapy topics: the brain & affect regulations, neurobiology of attachment, brain integration & the neurobiology of psychotherapy.

PSGE 6702. Fundamentals of Educational and Psychological Measurement. (3 Credits)
Survey of measurement methods in education and psychology. Basic psychometric properties of tests, principles of test development, types of tests, and evaluations of tests are studied.

PSGE 7210. Experimental Design. (3 Credits)
Attribute: ASDM.

PSGE 7211. Correlational Design and Analysis. (1 to 3 Credits)
Regression analysis (RA) and the design and interpretation of research using the general linear model (GLM). Interpretation Multiple R, beta coefficients, standard error. Dummy coding and interaction effects. Also, path analytic methods. Prerequisite: PSGE 7210.

PSGE 7213. Application of Multivariate Techniques in Education and Psychology. (3 Credits)
Survey of multivariate statistics, including regression, discriminant function, canonical correlation, multivariate analysis of variance, and factor analysis. Emphasis is on the use of these techniques.
Attribute: ASDM.
Prerequisite: PSGE 7211.

PSGE 7301. Advanced Developmental Psychology. (3 Credits)
Analysis of recent theory and research in developmental psychology. Prerequisite: PSGE 6301 or PSGE 6302.

PSGE 7312. Adv Cert Pro-Seminar in the Professional Practice of School Psychology. (0 Credits)
This course is designed to develop students’ basic skills related to the practice of school psychology. The topics to be covered include professional identity development, school culture, engagement in the supervision process, and professional writing and communications.

PSGE 7412. Personality Assessment. (3 Credits)
Introduction to the theory of personality assessment. Practice in administration, scoring, and interpretation of selected projective techniques used with children, with emphasis on the Rorschach, Thematic Apperception Tests, and Drawings. Registration limited to matriculated students in school psychology with the permission of the instructor.
Prerequisite: PSGE 7508.

PSGE 7413. School Psychology: Advanced Assessment Seminar. (3 Credits)
This advanced seminar on assessment is designed to provide students with theoretical knowledge and applied skills in specialized areas of assessment. The specific topics covered will be offered as separate sections on an alternating basis. The major topics may include advanced personality assessment, neuropsychological assessment, preschool assessment, and dynamic assessment. Prerequisites: PSGE 7508 and permission from the instructor.

PSGE 7418. Non-Biased Assessment and Decision-Making. (3 Credits)
In-depth examination of issues, research, and models in non-biased assessment. Topics will include adaptive behavior, problems in classification, test bias, fairness, and judicial and legislative influences.
Attribute: PMTM.

PSGE 7422. Instructional Consultation. (3 Credits)
Assessment and remediation of children with school learning problems. Teacher consultation, observation, task analysis, and evaluation of learning problems. Prerequisites: PSGE 7442 and PSGE 7445.

PSGE 7423. Therapeutic Interventions in the Schools. (3 Credits)
This course is presented in two parts. The first part focuses on treatment efficacy, various therapeutic orientations, ethics, and law. In the second half, practical, empirically based intervention techniques appropriate for school psychological services for children and adolescents are discussed. Current best practices in the treatment of social, behavioral, and emotional problems are emphasized.

PSGE 7424. Advanced Assessment Seminar: Bilingual Assessment. (0 to 3 Credits)
This course is designed to train graduate students in how to conduct bilingual assessments. Conceptualization of assessment incorporating specific ways of taking both culture and language into account shall be reviewed. It will extend prior knowledge of how to minimize bias in assessment and test construction.

PSGE 7425. Advanced Intervention Seminar: Preschool Intervention. (3 Credits)
This course is designed to be a topical seminar that will cover a number of major issues and trends in preschool intervention.

PSGE 7426. Advanced Intervention Seminar: Educational Intervention. (3 Credits)
This course is designed to be a topical seminar that will cover a number of major issues and trends in educational interventions.
PSGE 7427. Advanced Intervention Seminar: Bilingual Intervention. (3 Credits)
The Advanced Seminar in Interventions is designed to integrate the knowledge and competencies gained from courses in learning, cognition, instructional consultation, and instructional design with specific academic instructional techniques designed to improve students’ learning. The focus of this course will include a review of current cognitive theories (e.g., metacognition, study strategies, and motivation) and recent research in academic subjects (e.g., reading, writing, mathematical thinking, and inquiry based learning), and in areas related to bilingual and multicultural education. As part of this course, students will use data from formal and informal assessments to plan and implement a six-week academic intervention with one or more students. This course is to be taken concurrently with a field experience (typically practica or internship) facilitating the application and evaluation of an instructional intervention with multilingual and bilingual students (similar to an RtI model).

PSGE 7428. Advanced Intervention Seminar: Therapeutic Intervention. (3 Credits)
This course is designed to be a topical seminar that will cover a number of major issues and trends in therapeutic interventions. Intensive supervision will be provided.

PSGE 7429. Integration of Assessment Techniques. (3 Credits)
Supervised pre-internship experience in the integrated use of psychoeducational tests; histories; observation; and clinical interviews in the study of children, adolescents, and adults with learning and behavioral problems. Special considerations of assessment of minority children are addressed. The experience is based in the Rosa A. Hagan School Consultation Center and Early Childhood Center, where students will conduct assessments with clients and attend weekly staff meetings. Registration limited to matriculated students in school psychology or with the permission of the instructor. Prerequisites: PSGE 7508, PSGE 7412, and PSGE 7418.
Corequisite: PSGE 7499.

PSGE 7432. Personality Assessment Lab. (0 Credits)
A required 7-hour lab that meets 1 hour every other week. The lab must be taken concurrently with PSGE 7412. Students receive supervised practice in test administration, learn various scoring and data analyzing programs and software, as well as gain experience in case conceptualization and report writing.
Corequisite: PSGE 7412.

PSGE 7435. Neurobiological Bases of Human Behavior. (3 Credits)
Focus is on neuropsychology as a science, and its purpose is to assist psychology students in developing an understanding of the theoretical bases and principles underlying brain-behavior relationships. This course will be designed so that students of school, counseling, and educational psychology will be prepared in and introduced to the theoretical foundations of neuropsychology.

PSGE 7442. Role and Function of the School Psychologist. (3 Credits)
An analysis of the role of the school psychologist. Emphasis is on models for delivering effective services. Consideration of ethical and legal issues.

PSGE 7444. Psychology: History and Ethics. (3 Credits)
The course provides a survey of the development of theoretical issues and methodology of psychology from the early Greek philosophers to current trends, including historical and current approaches from various cultures. Additionally, ethical principles and practice considerations for the science and practice of psychology will be explored through a variety of sources.

PSGE 7445. Theories of School-Based Consultation. (3 Credits)
Theory and practice in school-based consultation, including mental health, ecological/behavioral, and organizational consultation.

PSGE 7452. Clinical Supervision of School Psychologists. (3 Credits)
This course, conducted mainly as a practicum, analyzes the process of supervision and the basic steps in providing supervision of school psychologists. Emphasis is placed on actual supervisory experience, providing supervision to others, with students expected to spend two laboratory hours weekly in addition to regular class. Registration limited to PhD students in school psychology.

PSGE 7456. Evaluation of Psychological Services Delivery Programs. (3 Credits)
Theories, models, and practice of program evaluation in psychological and educational services. Prerequisites: PSGE 5210 and PSGE 6702.

PSGE 7480. Advanced Certificate Internship in School Psychology I. (1.5 to 3 Credits)
Experience in providing school psychological services under qualified supervision which, in conjunction with PSGE 7481, is the equivalent of a full academic year. During the internships, students attend seminars on campus. Completion of appropriate coursework and program permission required. For Advanced Certificate students only.

PSGE 7481. Advanced Certificate Internship in School Psychology II. (1.5 to 3 Credits)
A continuation of PSGE 7480.

PSGE 7482. Advanced Certificate Internship in Bilingual School Psychology I. (1.5 to 3 Credits)
Experience in providing school psychological services to a bilingual population under qualified supervision which, in combination with PSGE 7483, is the equivalent of a full academic year. Completion of appropriate coursework and program permission required. For bilingual Advanced Certificate students only.

PSGE 7483. Advanced Certificate Internship in Bilingual School Psychology II. (1.5 to 3 Credits)
A continuation of PSGE 7482.

PSGE 7490. Doctoral Internship in School Psychology I. (1.5 to 3 Credits)
Experience in providing school psychological services under qualified supervision that, in conjunction with PSGE 7492, combines to be counted as the equivalent of a full academic year. Completion of appropriate coursework and program permission required (open only to PhD-degree students).

PSGE 7492. Doctoral Internship in School Psychology II. (1.5 to 3 Credits)
A continuation of PSGE 7490.

PSGE 7499. Integration of Assessment Techniques Lab. (0 Credits)
A required 7-hour lab that meets 1 hour every other week. The lab must be taken concurrently with PSGE 7429. Students receive supervised practice in test administration, learn various scoring and data analyzing programs and software, as well as gain experience in case conceptualization and report writing.
Corequisite: PSGE 7429.

PSGE 7500. Clinical Practicum in School Psychology. (3 Credits)
Supervised pre-internship field experience in psychological services, eight hours weekly in an agency or school offering clinical services to children or adolescents. Registration limited to matriculated students in school psychology. Program approval required.
PSGE 7501. Clinical Practicum in Bilingual School Psychology. (3 Credits)
Supervised pre-internship field experience in psychological services, eight hours weekly in an agency or school offering clinical services to bilingual or limited English proficient children or adolescents. Registration limited to matriculated students in school psychology. Program approval required.

PSGE 7502. Consultation Practicum in School Psychology. (3 Credits)
Supervised pre-internship fieldwork in delivering consultation services in schools eight hours weekly. Integrating seminar meets on campus. Registration limited to matriculated students in school psychology; completion of appropriate coursework and program approval required.

PSGE 7503. Consultation Practicum in Bilingual School Psychology. (3 Credits)
Supervised pre-internship field experience in delivering consultation services in schools serving bilingual or limited English proficient students, eight hours weekly. Integrating seminar meets on campus. Registration limited to matriculated students in school psychology; completion of appropriate coursework and program approval required.

PSGE 7507. Research Seminar in the Practice of Professional School Psychology. (3 Credits)
This is an advanced seminar designed to enhance skills in research methods useful in gathering and sharing information on the clinical utility of evidence-based practices.

PSGE 7508. Cognitive Assessment. (3 Credits)
This course is designed to provide students with an in-depth knowledge of the process of cognitive assessment, including administration, scoring, and interpretation of several intelligence tests. Students are expected to assess several individuals and to write reports based on these assessments. The knowledge base that students are expected to obtain through this course consists of the history of intelligence testing, current theories of intelligence, alternative approaches to traditional assessment procedures, and issues in the measurement of intelligence.

PSGE 7510. School Psychology Externship I. (0 Credits)
The externship provides an opportunity for students in the school psychology program to enhance research or practice-related skills and competencies above and beyond those typically required in the program. Participants are supervised by a field supervisor at an external setting and by school psychology faculty member(s). The externship could be taken after the completion of appropriate coursework or practica. Prerequisite: permission from instructor.

PSGE 7511. School Psychology Externship II. (0 Credits)
A continuation of PSGE 7510.

PSGE 7518. Cognitive Assessment Lab. (0 Credits)
A required 7-hour lab that meets 1 hour every other week. The lab must be taken concurrently with PSGE 7508. Students receive supervised practice in test administration, learn various scoring and data analyzing programs and software, as well as gain experience in case conceptualization and report writing.
Corequisite: PSGE 7508.

PSGE 7520. Doctoral Externship in School Psychology. (1.5 or 3 Credits)
The externship consists of a specific professional experience during which students enhance the attitudes, knowledge, and skills learned during the program and practiced as part of their practica experience. The focus of the externship is on improving one's skills in a specific area of school psychology practice in preparation for internship or future employment. Goals for the externship should be in keeping with the school psychology program goals.

PSGE 7530. Counseling Psychology Externship I. (0 Credits)
This course is intended for doctoral students in the Counseling Psychology program who wish to gain additional clinical experience by working in the field. Students must have completed the entire doctoral practicum sequence. Prerequisite: PSGE 7658.

PSGE 7531. Counseling Psychology Externship II. (0 Credits)
This course is intended for doctoral students in the Counseling Psychology program who wish to gain additional clinical experience by working in the field. Students must have completed the entire doctoral practicum sequence. Prerequisite: Counseling Psychology Externship I.

PSGE 7532. Counseling Psychology Externship—Summer. (0 Credits)
This course is intended for doctoral students in the Counseling Psychology program who wish to gain additional clinical experience by working in the field. Students must have completed the entire doctoral practicum sequence. Prerequisites: PSGE 7530 and PSGE 7531.

PSGE 7609. Advanced Personality Assessment. (3 Credits)
Introduction to the theory of projective personality by assessment. Practice in administration, scoring and interpretation of selected projective techniques of children and adults, with emphasis on the Rorschach, Thematic Apperception Tests and Drawings. Registration limited to doctoral students.

PSGE 7612. Assessment in Personality. (3 Credits)
Covers the ethics, administration, scoring and interpretation of both projective and objective personality tests. Students shall receive supervision in these aspects of testing.

PSGE 7615. Adult Psychopathology. (3 Credits)
The course provides an overview of the etiology, course assessment, and treatment of adult disorders. Psychological, biological, and sociocultural perspectives of psychopathology are examined and differential diagnostic issues are explored. This course is intended for advanced (post-master’s) graduate students. For doctoral students.

PSGE 7619. Advanced Personality Assessment Lab. (0 Credits)
This required seven-hour lab meets for one hour every other week. Students receive supervised practice in test administration, learn various scoring and data analyzing programs and software, and gain experience in case conceptualization and report writing.
Corequisite: PSGE 7609.

PSGE 7620. Theories of Counseling. (3 Credits)
Consideration of the major theories of counseling, including psychodynamic, cognitive, behavioral, and phenomenological models. Common factors and distinct features are analyzed, as is the research supporting the models. Recent integrative efforts are studied.

PSGE 7630. Psychology of Small Groups. (3 Credits)
The principles of group dynamics are analyzed with an emphasis on contemporary theories of group behavior.

PSGE 7640. Psychology of Career Development. (3 Credits)
A critical analysis of theories and research concerning career development. Application of psycho-logical theories to the career development of diverse persons are studied.
Prerequisite: PSGE 6640.
PSGE 7649. Clinical Supervision and Consultation in Counseling Psychology. (3 Credits)
Students will study the developmental processes involved in the training of therapists. The nature of the supervisory relationship will be explored in depth and students will identify skills necessary for sound supervisory practice. Clinical consultation in mental health settings will also be addressed.
Prerequisite: PSGE 7655.

PSGE 7654. Doctoral Practicum in Counseling Psychology I. (3 Credits)
This is the fourth course in the series of 4 practicum courses for doctoral students in counseling psychology. Students engage in closely supervised practice of counseling and psychotherapy in a professional setting for a minimum of sixteen hours each week. Approval of the site and supervisor by the practicum coordinator is required as is the student's eligibility to start the practicum. Theoretical emphasis of this semester is on integrative approaches to psychotherapy. Taping of counseling sessions is required. Master's level practicum.
Prerequisite: PSGE 7655.

PSGE 7655. Doctoral Practicum in Counseling Psychology II. (3 Credits)
The course is the second half of the field experience in counseling psychology required of students who are matriculated in the counseling psychology program. The course requirements are as described for PSGE 7654.
Prerequisite: PSGE 7654.

PSGE 7656. Doctoral Practicum in Counseling Psychology III. (3 Credits)
This is the third semester of practicum for doctoral students in counseling psychology. Students engage in closely supervised practice of counseling psychology in a professional setting 16 hours each week, including one hour of face-to-face, individual supervision by a doctoral-level psychologist. Approval of the site and supervisor by the practicum coordinator is required. Taping of counseling sessions is required.
Prerequisite: PSGE 7655.

PSGE 7657. Practicum in Supervision in Counseling Psychology. (3 Credits)
Theories and methods of clinical supervision will be studied. This course requires weekly supervision of master's-level trainees following the class period.
Prerequisite: PSGE 7656.

PSGE 7658. Doctoral Practicum in Counseling Psychology IV. (3 Credits)
This is the fourth course in the series of 4 practicum courses for doctoral students in counseling psychology. Students engage in closely supervised practice of counseling and psychotherapy in a professional setting for a minimum of sixteen hours each week. Approval of the site and supervisor by the practicum coordinator is required as is the student's eligibility to start the practicum. Theoretical emphasis of this semester is on integrative approaches to psychotherapy. Taping of counseling sessions is required.
Prerequisite: PSGE 7656.

PSGE 7660. Research: Min Level Achieve. (0 Credits)

PSGE 7664. Internship in Counseling Psychology I. (0 Credits)
A full-year, full-time experience in providing psychological services under qualified supervision in an approved agency (PSGE7668, PSGE7669). A formal application process is required, which must be completed and approved by the program in the year prior to the beginning of the internship. All coursework except the dissertation seminar must be completed before enrolling in this course.

PSGE 7666. Internship in Counseling Psychology II. (0 Credits)
The second term (Fall, Spring, Summer) of the internship requirement that is described in PSGE 7667.

PSGE 7669. Internship in Counseling Psychology III. (0 Credits)
The third term (Fall, Spring, Summer) of the internship requirement that is described in PSGE 7667.

PSGE 7668. Internship in Counseling Psychology II. (0 Credits)
Qualitative research methods useful in the field of counseling psychology are examined. An overview of philosophy of science is included.

PSGE 7681. Quantitative Research Methods in Psychology and Education I. (3 Credits)
This first course in a two-semester sequence on applied statistical methods focuses on quantitative data analysis techniques used in the social sciences, with special emphasis on designs and methods in psychological research. Students will also cover analysis of variance (ANOVA) and multiple regression—the predominant tools for analyzing experimental and non-experimental quantitative data. Completion of an extensive statistics project is an essential component of this course.

PSGE 7682. Quantitative Research Methods in Psychology and Education II. (3 Credits)
This second course in a two-semester sequence on applied statistical methods focuses on quantitative data analysis techniques that are frequently used in the social sciences, with special emphasis on designs and methods in psychological research. Topics covered in this course include advanced regression analyses, multivariate approaches (MANOVA, path analyses), and factor analysis. Completion of an extensive statistics project is an essential component of this course.

PSGE 7683. Qualitative and Single Case Design Research Methods I. (3 Credits)
PSGE 7684. Qualitative and Single Case Design Research Methods II. (3 Credits)

PSGE 7711. Psychometric Theory. (3 Credits)
Classical and modern test theories, latent trait analysis, scaling methods, and introductory factor analysis are studied. Prerequisites: PSGE 5210 and PSGE 6702.

PSGE 7712. Recent Trends in Measurement and Evaluation. (3 Credits)
Seminar on issues and developments in testing and evaluation. Original research and writing are required.
Prerequisite: PSGE 7711.

PSGE 7900. Proseminar in Psychological and Educational Services. (0 Credits)
The proseminar serves as an orientation to the research process, allows students to learn about faculty research interests and encourages discussions of research topics. It constitutes an initial developmental step in the research process and is linked to the Experimental Design and Statistics Methods courses.

PSGE 8001. Research Apprenticeship. (0 Credits)
In the Research Apprenticeship in Psychological and Educational Services, the student is required to work closely with a research apprenticeship faculty sponsor to develop and carry out a research project over the course of up to three consecutive semesters. The student must register for PSGE 8001 for the first semester and PSGE 8002 for subsequent semesters.
PSGE 8002. Research Apprenticeship II. (0 Credits)
In the research apprenticeship in psychological and educational services, the student is required to work closely with a research apprenticeship faculty adviser to develop and carry out a research project over the course of two to three consecutive semesters. The student will register for this course during subsequent semesters of research apprenticeship.
Attribute: YEAR.
Prerequisite: PSGE 8001.

PSGE 8100. College Teaching Internship in Psychology and Services. (0 Credits)
Supervised field experience as a college-level instructor. On-campus seminars. Prerequisite: Permission of the program faculty.

PSGE 8672. Social and Ethical Responsibilities in Counseling Psychology. (3 Credits)
The social, professional, legal, historical, and ethical issues and standards relevant to the field of counseling psychology will be explored. This course is taken during the first semester of doctoral study in counseling psychology.

PSGE 8999. Dissertation Seminar in Psychological and Educational Services. (3 Credits)
Consultation with faculty on the development and conduct of dissertation research. Prerequisite: Permission of program faculty.

PSYC 0990. Independent Study. (1 to 3 Credits)
Designed to enable students to study selected topics in depth and to conduct research. For matriculated students only. An outline of the proposed work must be approved by the adviser. Registration requires the approval of the professor directing study, the division chairperson and the director of graduate studies.

Psychology (PSYC)

PSYC 0912. Requirement Preparation. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

PSYC 0914. Requirement Preparation in Summer. (0 Credits)
For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

PSYC 0922. PhD Comprehensive Examination Preparation. (0.5 Credits)

PSYC 0930. Psychology Doctoral Comprehensive Examination. (0 Credits)

PSYC 0940. Proposal Development. (1 Credit)

PSYC 0950. Proposal Acceptance. (3 Credits)

PSYC 0970. Dissertation Mentoring-Psychology. (3 Credits)
The Psychology Ph.D. student is required to register for Dissertation Mentoring, which has a 3 credit fee, the semester after the student’s proposal is accepted.

PSYC 1004. The Mind-Body Connection: Introduction to Behavioral Health. (3 Credits)
The overall goal of the course is to provide a comprehensive perspective on how psychology can augment the understanding and treatment of significant public health problems. In addition, this course will prepare students for future coursework or participation in behavioral health research.
Attributes: MANR, PLUR, SL, SSCI.

PSYC 1100. Biopsychology. (3 Credits)
An introduction to the biological bases of psychology. Research will be presented with an emphasis on how the activity of the nervous system, as shaped by phylogeny and ontogeny, determines behavior. Students replicate classic studies, analyze the results, and prepare lab reports.
Attributes: LSCI, NEUR.

PSYC 1200. Foundations of Psychology. (4 Credits)
A systematic examination of the methods and content of psychology as a life science. A survey of history and development, principles, and theories of psychology related to sensation and perception, learning, cognition, motivation, developmental, personality, abnormal, and social psychology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PSYC 1800. Internship. (1 Credit)

PSYC 1999. Service Learning-1000 Level. (1 Credit)
In this student-initiated program, the student may earn one additional credit by connecting a service experience to a course with the approval of the professor and the service-learning director.

PSYC 2000. Statistics. (4 Credits)
This course covers descriptive statistics and (parametric and nonparametric) inferential statistics. It emphasizes mastery of statistical concepts and utilization of statistical software. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: NEUR.
Prerequisite: PSYC 1200.

PSYC 2010. Research Methods Lab. (5 Credits)
A hands-on introduction to research methods in psychology. In the lab, students will replicate classic studies from different areas of psychology, analyze the results, and write APA-style lab reports. The lectures introduce these areas and relevant methods, placing the methods in broad historical and ethical contexts.
Attributes: NECG, NEUR.
Prerequisite: PSYC 2000.

PSYC 2200. Learning. (4 Credits)
Course focuses on the research and theories in animal and human learning. Empirical findings are discussed in relation to competing theories of learning, memory, and adaptive behavior. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: PSYC 1200.

PSYC 2201. Learning Laboratory. (5 Credits)
Course focuses on the research and theories in animal and human learning. Empirical findings are discussed in relation to competing theories of learning and adaptive behavior. Students replicate classic learning studies, analyze their results, and prepare APA style lab reports.
Prerequisite: Research Methods Lab.
Prerequisite: PSYC 2010.

PSYC 2301. Sensation and Perception Lab. (5 Credits)
A survey of research on the senses, especially vision and hearing. Biological, psychophysical and cognitive perspectives will be considered. Students replicate classic studies, analyze the results and prepare APA style lab reports. Prerequisite: Research Methods Lab.
Attributes: NECG, NEUR.
Prerequisite: PSYC 2000.
PSYC 2401. Memory Laboratory. (5 Credits)
Covers historical approaches to memory, information processing and connectionist models of memory studies, analyze the results, and prepare APA style lab reports.
Attributes: NECG, NEUR.
Prerequisite: PSYC 2010 (may be taken concurrently).

PSYC 2500. Cognition. (4 Credits)
The analysis of the process of acquiring and using knowledge: perceptual recognition, attention, memory, imagery, language, problem solving, decision making, and the development of these processes throughout one's life. (Spring, odd years). Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: LING.

PSYC 2501. Cognition Laboratory. (5 Credits)
The analysis of the process of acquiring and using knowledge: perceptual recognition, attention, memory, imagery, language, problem solving and decision making. Students replicate classic studies, analyze the results, and prepare APA style lab reports.
Attributes: NECG, NEUR.
Prerequisite: PSYC 2010.

PSYC 2600. Social Psychology. (4 Credits)
An examination of how others shape an individual's behavior. A review of selected topics of interpersonal behavior, including antisocial and prosocial behavior, prejudice, attraction, social influence, attitudes and persuasion, research methods. (Every semester) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: SSCI, URST.

PSYC 2601. Lab in Social Psychology. (5 Credits)
(formerly PSYC 3470) This course involves social psychological research concerned with relationship formation, nonverbal behavior, attitude change, and group processes. Research on these topics will be conducted using laboratory designs, survey research, and observational techniques. Students will conduct both laboratory and naturalistic observations, analyze the results, and prepare APA-style lab reports and may be offered an opportunity to propose and conduct a research project of their own choosing.
Prerequisite: PSYC 2010.

PSYC 2700. Infant and Child Development. (4 Credits)
A study within the framework of research and theory of emotional, intellectual and social growth of the child, with emphasis on norms in development and child-rearing practices. (Every Fall) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: SSCI.

PSYC 2710. Adolescent and Adult Development. (4 Credits)
This course reviews the study of physiological, cognitive, emotional, personality and social change from puberty across the remainder of the life span. This course will also consider the influence of theories and methods of research on what we know, and can find out, about people and the contexts in which they live their lives. (Every Spring) Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LING, SSCI.

PSYC 2800. Personality. (4 Credits)
A critical survey of theories concerned with the origin and development of personality, including psychoanalytic theory, behaviorism, trait theory, field theory and humanistic psychology. Attention will be given to conceptual problems, controversies and empirical verification. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: SSCI.

PSYC 2900. Abnormal Psychology. (4 Credits)
Analysis of the development and structure of the abnormal personality. Consideration of neuroses and major psychoses as well as the diagnosis, treatment and prevention of mental disorders is given. (Every semester) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: SSCI.

PSYC 2999. Independent Study. (1 to 2 Credits)

PSYC 3100. Health Psychology. (4 Credits)
(Formerly PSYC 3020) An introduction to the study of psychological factors in health and illness. The major models, research methods, interventions, and issues in health psychology and behavioral medicine will be examined. Topics include stress-illness, compliance, social support and coping, as well as prevention and health education. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, BESN, BIOE.
Prerequisite: PSYC 1200.

PSYC 3110. Cognitive Neuroscience. (4 Credits)
This course reviews the neural basis for cognitive and perceptual processes including attention, vision, sensation, perception, language, motor control, learning and memory, executive functions, emotion, and social behavior. Basic structural and functional neuroanatomy are explored and empirical methods which inform inferences about the brain bases of cognition are reviewed. The course surveys research in cognitive neuroscience and covers a functional analysis of disorders vis a vis cognitive theory and the brain behavior relationship. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, BESN, LING, NEUR.
Prerequisites: PSYC 1200 or PSYC 1100 or BISC 1403 or NSCI 1433.

PSYC 3300. Industrial Organizational Psychology. (4 Credits)
The application of psychological methods and concepts to business and industry. Includes personnel selection, placement and training, work environment, motivation and morale, the organization as a complex system, and an introduction to organization development. (Every Fall) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.
Prerequisite: PSYC 1200.
PSYC 3320. Consumer Behavior. (4 Credits)
The role of psychological factors such as learning and memory, perception, motivation, personality, and information processing in the behavior of humans as consumers. Emphasis is placed on the two-way information flow between consumers and producers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, FASH.
Prerequisite: PSYC 1200.

PSYC 3330. Family Psychology. (4 Credits)
(Formerly PSYC 4250) An introduction is given to the transgenerational emotional process within the family, that is, to the family as a system across generations. Subsystems (such as parent child, sibling, family of origin) will be studied in relationship to individual development and family functioning. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC.
Prerequisites: PSYC 1200 or AP Psychology with a score of 004.

PSYC 3340. Urban Psychology. (4 Credits)
How living in a large city can affect an individual's behavior and personality. Investigations into the 'urban personality,' stress, family, friends and strangers, crowding, the built environment, adaptation. Includes field research. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESEL, URST.
Prerequisites: PSYC 1200 or AP Psychology with a score of 004.

PSYC 3360. Sports Psychology. (4 Credits)
This course involves an application of psychological theory and research to athletes and sport at youth recreational, and elite levels. Special attention is devoted to the connection between sports and spirituality, ethics, character development, and parenting. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: SJOR.
Prerequisites: PSYC 1200 or AP Psychology with a score of 004.

PSYC 3400. Psychology of Education. (4 Credits)
An overview of psychological principles relevant to the process of learning and teaching. The relationship of education to society in general and to the student in particular is stressed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PSYC 1200 or AP Psychology with a score of 004.

PSYC 3410. Creativity. (4 Credits)
An investigation of the creative process, both theoretically and phenomenologically. Students conduct case studies of a creative enterprise, based on autobiographical and/or interview material. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: PSYC 1200 or AP Psychology with a score of 004.

PSYC 3530. Psychology of Sex Roles. (4 Credits)
The study of the development of sex differences and sex roles in women and men. The study of the psychological implications and consequences of sex role development in men and women will be discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: PSDV, WGSS.
Prerequisites: PSYC 1200 or AP Psychology with a score of 004.

PSYC 3550. Consciousness. (4 Credits)
This course critically reviews philosophical/historical, psychological, and biological approaches to consciousness. Topics include the mind/body problem, phenomenology, psychoanalysis and the unconscious, altered states of consciousness, attention, volition and the will, and theories of consciousness. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: NECG.
Prerequisite: PSYC 1200.

PSYC 3600. Multicultural Psychology. (4 Credits)
The focus of this course is the multicultural applicability of scientific and professional psychology. Traditional psychological theories, scientific psychology, psychological tests, and the practice of psychology will be examined and critiqued from cultural and socio-historical perspectives. Contemporary psychological theories and research specific to men, women, gay men, lesbians, and race/ethnicity will be reviewed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ASSC, BESN, BIOE, LALS, LASS, PJRC, PREDIT, PLUR, PSDV, URST, WGSS.
Prerequisites: PSYC 1200 or PSYC 1100.

PSYC 3610. Global Health and Psychology. (4 Credits)
In order to address the needs of diverse populations, culturally-congruent training in health psychology is essential. The goal of this course is to provide a global perspective on understanding and treating significant public health problems and integrating cultural considerations into this framework. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, BESN, BIOE, DISA, GLBL, PSDV.
Prerequisite: PSYC 1200.

PSYC 3640. Cross-Cultural Psychology. (4 Credits)
This course examines the role of culture in shaping a broad spectrum of human experience around the globe. This course begins with a consideration of three important themes: Culture as meaning; the nature of cultural competence & ethnocentrism; and the phenomena of international migrations and acculturation. Then, it examines important conceptual and methodological issues in cross-cultural research. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ASSC, PSDV.
Prerequisite: PSYC 1200.
PSYC 3700. Human Sexuality. (4 Credits)
An exploration of the physical characteristics that make up the core of male and female sexuality, as well as the psychological components in all sexual unions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ASSC, PSDV, WGSS.
Prerequisite: PSYC 1200.

PSYC 3730. Men and Masculinities. (4 Credits)
Traditional/classical psychodynamic theories on masculinity will be reviewed, as well as the more contemporary ‘new psychology of men’ literature and research. Traditional masculinity ideology as a system of values will be examined and critiqued, with a focus on examining how masculine values underline men’s personal morality and societal mores. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASSC, PLUR, PSDV, WGSS.
Prerequisites: PSYC 1200 or AP Psychology with a score of 004.

PSYC 3810. Trauma and Family Violence. (4 Credits)
The goal of this course is to provide an introduction to the field of trauma and family violence, including the causes and consequences of rape, partner violence and child abuse and neglect. Assessment, treatment and prevention issues will also be discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HCWL, HUST.
Prerequisites: PSYC 1200 or AP Psychology with a score of 004.

PSYC 3820. Forensic Psychology. (4 Credits)
Focuses on the interaction of clinical psychology and the law. Addresses issues related to forensic assessment and expert testimony, understanding and treatment of criminal offenders, similarities and differences between assessment of adult and juvenile offenders. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.
Prerequisites: PSYC 1200 or AP Psychology with a score of 004.

PSYC 3850. Psychology of Well-Being. (4 Credits)
This course will provide students with the knowledge and skills to lead a more fulfilling and happy life. It will show how to handle stressors and demands more efficiently, approach mistakes as opportunities cultivate personal relationships, develop personally meaningful goals, and achieve greater equanimity.
Attribute: ASSC.
Prerequisite: PSYC 1200.

PSYC 3930. Introduction to Clinical Psychology. (4 Credits)
An introduction to clinical psychology, including major schools of clinical interventions, the relation between assessment and clinical practice, including specific areas of evaluation (such as intellectual, personality, and observational/behavioral). Areas of specialization will also be covered. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.
Prerequisite: PSYC 1200.

PSYC 3950. Behavior Modification. (4 Credits)
The goals of the course are to teach the principles of behavior and their application to complex human behavior. Students will understand basic principles of behavior, how to analyze complex human behavior in terms of those principles, how to collect data and plot it on graphs, how conduct research to determine the causes of behavior, and the basics of how to change behavior. This course does not make a student competent to conduct therapy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: PSYC 1200.

PSYC 3999. Tutorial. (1 to 3 Credits)

PSYC 4000. History and Systems of Psychology. (4 Credits)
The development of psychological thought through the history of psychology as a science is traced. Attention is given to the application of the philosophy of science to psychology. Systems covered include associationism, structuralism, functionalism, Gestalt psychology, psychoanalysis, behaviorism, and cognition. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ICC.
Prerequisite: PSYC 1200.

PSYC 4200. Advanced Statistics w/Lab. (4 Credits)
This course is the second course of statistics for psychology majors. It is best suited for students who (a) want to build a stronger background in statistics, (b) are planning to apply to graduate schools or medical schools, (c) are planning to pursue careers related to statistics and data analytics, (d) are working on an honor's thesis. The goals of this course are the following: 1. To strengthen students’ statistical thinking, including understanding the basis of probability, probability distributions, conditional probability, Bayes theorem, frequentist statistics and Bayesian statistics, as well as the recent challenge of replication crisis. 2. To strengthen students’ familiarity with the selected statistical methods that are covered in the first statistics course (PSYC 2000 Statistics), such as analysis of variance and multiple regression. These selected statistical methods are popular in psychological research and in real-world applications. We will review the basics of these methods and will teach the details of these statistical methods that are not covered in the first course, including assumptions, consequences of violating the assumptions, diagnostics of the assumptions, power analysis, and alternative statistical procedures when the assumptions are violated. 3. To teach students statistical methods that are popular in psychological research and in the real-world applications but are not covered in the first course, such as mediation analysis, moderation analysis, and factor analysis. When teaching each statistical method, students will be exposed to real research data and problems. In the lab section, students will learn the concepts, mathematical machinery, and software implementation of each statistical method using SPSS. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PSYC.
Prerequisite: PSYC 2000.
PSYC 4245. Ethics in Research. (4 Credits)  
This course will examine approaches to responsible research practices across the natural and social sciences, with particular attention to research involving human participants. The course will provide an overview of the research process, foundations in research ethics, and provide examples of research across disciplines that exemplify scientifically valid and ethically sound research methods planning, implementation, and dissemination. In particular, the course will draw on long-standing research traditions in the field of sociology, and psychology in order to provide a foundation upon which ethical issues can be discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: BIOE, ICC.  
Prerequisite: PSYC 1200.

PSYC 4310. Aging and Society. (4 Credits)  
A cross-disciplinary course that draws on research and theory from psychology and such other disciplines as sociology, anthropology, economics and political science to explore the biological, cognitive and psychosocial features of human aging. Attention is given to normal and abnormal development, to the interrelations between physical and mental health and to optimal aging. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: ADVD, AMST, ASHS, BESN, BIOE, DISA, ICC, PJRC, PJST, PSDV.  
Prerequisite: PSYC 1200.

PSYC 4330. Music and Psychology. (4 Credits)  
A cross-disciplinary course that examines what psychological research and theories and an analytical approach tell us about music. Topics include perception and performance of music, emotional responses and cross-cultural approaches. Requires a background in psychology and/or music. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: ICC, NECG.

PSYC 4340. Law and Psychology. (4 Credits)  
An introduction to (a) the issues relevant to understanding human behavior from the perspective of law and psychology and (b) the contributions of psychology as a behavioral science to such legal issues as legal evidence, juries, and criminal and civil responsibility. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: AMST, APPI, ASHS, EP4, PJCJ, PJST, VAL.

PSYC 4370. Disgust in Literature and Psychology. (4 Credits)  
The course covers disgust in literature, film, and experimental psychology. Includes basic level aspects of disgust eliciting material (foods, bodily secretions) up to moral dimensions and stigma. Disgust is considered from a cross cultural and multicultural perspective for each topic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: ACUP, ASHS, ASLT, ENGL, ICC.  
Prerequisite: PSYC 1200.

PSYC 4800. Internship. (3 to 4 Credits)  
PSYC 4810. Clinical Child Psychology. (4 Credits)  
(Formerly PSYC 3270) This course provides an overview of the descriptive characteristics, diagnosis, and treatment of the primary psychological and behavioral disorders of childhood and adolescence. A fieldwork component offers supervised experience in a setting serving children with problems. (Every Fall).  
Prerequisite: PSYC 1200.

PSYC 4820. Community Psychology. (5 Credits)  
This course focuses on the prevention of psychological disorders and the promotion of wellness across the life span. Topics covered include stress, coping, and social support; risk and protective factors for adjustment and maladjustment; empowering disenfranchised groups; developing and evaluating prevention and early intervention programs; and facilitating social change and responsive community organizations. Includes a fieldwork component that is integrated with class discussion.  
Attributes: PSDV, URST.

PSYC 4850. Community Mental Health. (4 Credits)  
This course considers issues that arise when implementing mental health interventions within diverse communities, especially those communities traditionally underserved by our health care system. Topics covered include factors that maintain inequality in mental health treatment, culturally-sensitive practices in conducting clinical psychological research, and ethical approaches to translating evidence-based psychological principles into practice. Includes a fieldwork component that is integrated with class discussion and seeks to address mental health needs within the Bronx. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: PJRC, PJST, SL.

PSYC 4900. Psychology and Human Values. (4 Credits)  
This senior values seminar explores pioneering theories and research in the psychology of values. Topics include human motives/goals; the sense of right and wrong; cognitive, social, cultural, spiritual and gender aspects of ethical decision making; behavior in morally challenging situation; and virtue in relationships, work and community. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: BEVL, BIOE, EP4, VAL.

PSYC 4920. Youth, Values, and Society. (4 Credits)  
This course explores the history and current place of youth in society from a multidisciplinary perspective and consider how this social construction of youth influences their development of values. It explores the history of social constructions of adolescence and youth and the current place of youth in our society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: ADVD, AMST, APPI, ASHS, ASRP, BEVL, EP4, PSDV, SOIN, URST, VAL.

Updated: 07-27-2020
PSYC 4997. Honors Thesis in Psychology I. (4 Credits)
This course, typically taken in the fall of senior year, involves carrying out the Honors Thesis. Typically, this includes data collection and analysis, and initial work on the written report. Students should have reviewed the relevant literature and completely planned the thesis prior to beginning the course. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: PSYC 2010.

PSYC 4998. Honors Thesis in Psychology II. (4 Credits)
This course, taken in the spring of senior year, involves completion of the thesis. The student prepares and revises the final written report, and defends the thesis orally. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisite: PSYC 4997.

PSYC 4999. Tutorial. (1 to 5 Credits)
Supervised individual research projects.

PSYC 5100. Psychometric Theory. (3 Credits)
This course mainly covers what is commonly referred to as the classical test theory (CTT). It intends to provide you with the conceptual and technical skills necessary to develop and evaluate psychological tests and measures, and to provide foundations for further study of measurement theory, including but not limited to factor analysis and item response theory. A list of topics covered in this course include introduction to CTT, reliability, and validity of a test, and item analysis. The lab will assist software implementations (including Excel, SPSS, AMOS, and possibly R) and provide students hands-on experiences on how to plan psychometric analysis for a newly developed scale.
Attribute: PSYM.

PSYC 5335. Social Development. (3 Credits)
This course explores social development from infancy through young adulthood. Focusing on biological bases, social groups, peers, family, community, and culture, the course will explore multiple facets of social development. The course materials include primary readings, and the course format will be discussion based. At the end of the course, students are expected to have a solid foundation in the primary domains of social development as well as an understanding of the importance of social development across the lifespan.
Attribute: CLMB.

PSYC 5710. Issues in Social Psychology. (3 Credits)
The person in society: interdisciplinary approaches; personality and culture: subculture, class, and community. Development and the self-cognitive and motivational elements in the acquisition of language, attitudes, and values. Group membership, role behavior, and group dynamics.
Attributes: CLMB, PMPE.
PSYC 6066. History and Systems. (3 Credits)
This course surveys the history of the major systems of psychology from pre-Socratic philosophers to contemporary cognitive science and neuroscience. Key men and women who contributed to the development of theories about and methods used to study personality, emotion, intelligence, cognition, and psychobiology are discussed within their historical, religious, cultural, and political contexts.
Attributes: CEED, CENS, CLMB.

PSYC 6070. Research Practicum II. (3 Credits)
This course is the second in a 2-course sequence designed to expose the student to the process of conducting applied clinical research and facilitate his or her own independent research project. This course is typically taken during the semester in which the student intends to complete the Master’s Thesis. The research project that forms the basis of the students MA thesis is developed in consultation with the faculty mentor and research supervisor (note that under some circumstances both these roles may be fulfilled by the same individual. Decisions regarding the specific research project, including the length and depth of the introduction, the nature and sophistication of statistical analyses, and the format for compiling the results into a final document, will ultimately rest with the faculty mentor and reader.

PSYC 6106. Cognitive Assessment with Lab. (3 Credits)
Intensive supervised practice in administration, interpretation, and reporting of individual intelligence tests for children and adults. Students will learn and practice the administration and scoring of major developmental assessment instruments.
Attribute: PSYM.

PSYC 6119. Personality Assessment with Lab. (3 Credits)
Administration and introductory interpretation in personality assessment and research, concentrating on the Rorschach and TAT. Students will learn and practice the administration and scoring of major personality assessment instruments.
Attribute: PSYM.

PSYC 6140. Developmental Assessment. (3 Credits)
Theory of assessment procedures based on developmental norms. Supervised practice in administration and interpretation of assessments, concentrating on the Brazelton, the Bayley, and the McCarthy Scales.

PSYC 6170. Multicultural Seminar. (3 Credits)
Focus on multicultural perspective for understanding and working with diverse populations. Will examine issues of gender, race/ethnicity, sexual orientation, religion, etc. in the provision of psychological services.
Attribute: CLMB.

PSYC 6184. Behavioral Assessment with Lab. (3 Credits)
This course will establish an understanding of behavioral assessment and its implications for intervention, evaluation and research. Theoretical foundations, methods, and application of behavioral assessment to case formulation and treatment will be emphasized.
Attributes: CLRM, CPAE, CPCE.

PSYC 6190. Forensic Assessment. (3 Credits)
Psychologists who work in legal settings are often confronted with questions and diagnostic dilemmas that rarely arise in traditional clinical settings. As a result, a number of specialized assessment techniques have been developed over the past few decades, many of which are designed to address specific psycho-legal issues. In this course, students will develop a theoretical understanding and practical experience selecting and administering specialized forensic assessment instruments. The course will be roughly equally divided between understanding the theoretical underpinnings and psycho-legal utility of forensic assessment instruments as well as practical issues in their administration, scoring, and interpretation. The types of forensic assessment instruments covered include tests of malingering and deception, risk assessment tools and techniques, sex offender and psychopathy assessment, and personality assessment in the context of forensic evaluations. In addition, more specialized instruments, such as those designed to assess competence to stand trial, will be reviewed.
Attributes: CPAE, CPCE.

PSYC 6205. Clinical Geropsychology. (3 Credits)
This course considers the implications of the melding of gerontology and clinical psychology for the delivery of psychological services to the elderly. Topics considered include: (a) personality, cognition, and physical changes in aging; (b) psychopathology (e.g., depression, anxiety, psychosis, Alzheimer’s disease) in the elderly; (c) assessment issues and methods with older adults; and (d) psychotherapy and consultation approaches with the elderly and their support systems.
Attributes: CLRM, CPCE, CPIE.

PSYC 6210. Psychotherapy Theories. (3 Credits)
Comprehensive overview of most of the major contemporary approaches to psychotherapy, with special emphasis on underlying assumptions, techniques employed, and goals.

PSYC 6225. Personality Theories and Research. (3 Credits)
This course covers major theories and empirical literatures in contemporary personality psychology. These include evolutionary, biological, social-cognitive, and psychometric perspectives on the dimensions and functions of personality. Meanwhile, we address diverse methodological approaches—such as observational, experimental, and behavior-genetic designs—in research on personality and its correlates. Throughout, we aim to connect students’ own research activity to recent substantive and methodological developments in personality science.
Attributes: CLMB, PMPE.

PSYC 6245. Cognitive Behavioral Therapy. (3 Credits)
The course covers major theories of cognitive and behavioral therapy, as well as empirical evidence to support methods. Assessment, conceptualization, and treatment planning employing cognitive behavioral therapy is emphasized. Applications with special populations are covered, and we also cover how cognitive behavioral therapy is part of a systematic evidence-based approach to evaluation and treatment.
Attributes: CLRM, CPCE, CPIE.

PSYC 6250. Dialectical Behavior Therapy. (3 Credits)
This seminar reviews the major principles, strategies, and methods of Dialectical Behavior Therapy (DBT). The course includes an overview of the theories underlying DBT treatment, discussion of the existing research supporting DBT as an evidence-based treatment for severe emotion dysregulation and chronic suicidality, and practice of basic skills and techniques used within this therapeutic modality. Class sessions include didactics, discussion, video demonstrations, and behavioral rehearsal of DBT skills.
Attribute: CPIE.
PSYC 6251. Foundations of Neuropsychology. (3 Credits)
This course will provide a broad understanding of human brain-behavior relationships, neuropsychological theory, and the application of this knowledge to the clinical evaluation and treatment of individuals with brain disease or damage. The course will begin with an overview of clinical neuropsychology and its history, functional neuroanatomy, evidence based neuropsychological practice, and the foundations for resea and theory of clinical neuropsychology (including the connection between neuropsychological evaluation and the practical implications of neuropsychological conditions), diagnosis of neurocognitive disorders, and neuropsychological intervention techniques. Finally, this course reviews non-neurologic considerations in CNS functioning and neuropsychological evaluation, including multicultural, ethical and forensic issues in clinical neuropsychology.
Attributes: CLRM, CPAE, CPCE.

PSYC 6253. Neuropsychological Assessment With Lab. (3 Credits)
This course will review the practice of neuropsychological assessment and basic concepts related to classes of cognitive functions. We will discuss psychometric principals germane to neuropsychological assessment as well as the use of neuropsychological assessment for clinical practice. Laboratory activities will support the acquisition of knowledge related to the practice of neuropsychological practice, including test selection, administration, scoring, date interpretation, and report writing.
Attributes: CPAE, CPCE.

PSYC 6257. Child Neuropsychology. (3 Credits)
The relationship between development of brain structure and cognitive functions are discussed. Tests used to assess a variety of functions including memory, attention, achievement, visual spatial skills, executive function, and motor function are presented. Learning disabilities, attention deficits, pediatric neurological disorders, and other relevant topics are covered.
Attributes: CPAE, CPCE.

PSYC 6259. Topics in Developmental Cognitive Neuroscience. (3 Credits)
This seminar covers topics in developmental cognitive neuroscience across the lifespan. Topics include neural correlates of cognitive development (memory, face perception, executive functioning), structural and functional brain changes associated with aging, and normal and pathological (e.g. Alzheimer’s disease) cognitive changes associated with aging.

PSYC 6275. Family Psychology. (3 Credits)
Provide basic knowledge of family systems theory as a pre-requisite for understanding family psychology and family therapeutic intervention. Provides a survey of research models and findings relevant to family processes and therapeutic practice.
Attribute: CLRM.

PSYC 6280. Brief Psychotherapy. (3 Credits)
This course will provide an overview of the major approaches to brief psychotherapy. Various theoretical perspectives are included: psychodynamic, cognitive, behavioral, and interpersonal.
Attributes: CPAE, CPCE.

PSYC 6285. Evidence-Based Psychodynamic Therapy. (3 Credits)
This course develops students’ understanding of psychodynamic psychotherapy. The course covers what psychodynamic therapies are, including the foundation, application, and variety of models within this broad umbrella. The course will provide an in-depth exploration of the empirical research for this treatment approach. Students will evaluate the inherent differences in researching psychodynamic therapies given the oftentimes not-observable variables of study. There will be an emphasis on healthy debate and discussion in evaluation of the psychotherapy research to be discussed. This course will also focus on the existing outcome research for psychodynamic psychotherapy as compared to other non-psychodynamic models. Students will critically analyze evidence-based therapy models for different symptomatology, including anxiety, depression, and personality disorders.
Attributes: CLRM, CPCE.

PSYC 6290. Health Disparities and Social Inequity. (3 Credits)
This course focuses on the psychosocial correlates and consequences of health disparities involving individuals and groups that have been historically marginalized by society and in some cases by the health sciences and professions. Readings and class discussions will examine the relationship of contextual factors such as poverty, racial/ethnic discrimination, environmental hazards, incarceration, institutionalization and public policy to social and health inequities faced by children and adults with HIV/AIDS, mental illness, intellectual disabilities, and substance abuse disorders. The role of psychology in the emerging health and human rights paradigm in the United States and globally will also be explored.
Attributes: CEED, CENS, CLRM, CPCE, HECS, PMPE.

PSYC 6298. Psychoanalytic Theory. (3 Credits)
Theory, research methods, and therapy of the psychoanalytic movement will be explored, including the work of Freud and ego psychological, neofreudian, Jungian, interpersonal, object relational, self, archetypal, and existential orientations. Attention will focus on clinically relevant topics such as human development, personality, dreams, and psychopathology, using case material for illustrations.
Attributes: CLRM, CPCE, CPCE.

PSYC 6300. Developmental Psychology: Foundations. (3 Credits)
This course will cover the historical and theoretical foundations of developmental psychology and the emergence of the discipline of Applied Developmental Psychology. Major historical and contemporary theories of development and key topics and research will be considered across domains, with emphasis on core readings, developmentalists, and turning points in the field.
Attributes: CLRM, PMPE.

PSYC 6310. Culture, Ethnicity, and Race. (3 Credits)
‘Culture, Ethnicity, Race and Development’ reviews how these concepts have been defined in psychological research. We then examine how these social influences affect youth development by focusing on topics in four areas: theories of ethnicity and race in human development, family, social dynamics and cultures.
Attributes: CEED, CENS, HUCB.

PSYC 6330. Cognitive Development. (3 Credits)
Theories and research in structuralism, neo-structuralism, information processing, connectionism and contextualism are investigated.
Attributes: CLMB, PMPE.
PSYC 6350. Applied Developmental Psychology. (3 Credits)
This course will provide an introduction to the roles and activities of professionals in applied developmental psychology. Topics will include definitions of the field, ethical issues, public policy, research design, and program evaluation.
Attributes: CEED, CENS, HECS.

PSYC 6370. Cognition and Affect. (3 Credits)
A development and comparative examination of significant cognitive theories and research Structuralist, contextualist, information processing, and connectionist perspectives as well as research from infant to elderly cognition are covered.
Attribute: CLMB.

PSYC 6380. Anxiety Disorder Seminar. (3 Credits)
The course addresses the etiology of various anxiety disorders research related to anxiety disorders and treatment options. This course is an in-depth coverage of the major anxiety disorders, beginning with etiological and maintaining factors, as well as information processing and behavioral features, and ending with psychosocial treatment and case management. Special attention is given to specific cases an illustrative of each condition, and complicating factors involved in case management.
Attributes: CLRM, CPCE, CPIE.

PSYC 6385. Depression and Suicide. (3 Credits)
This course seeks to provide you with an overview of the etiology, diagnosis, and treatment of depression and suicidality. We will examine various models of vulnerability to depression, including psychodynamic, behavioral, cognitive, and interpersonal models. Research findings in these areas will also be examined. Furthermore, this course will provide you with an overview of the epidemiology, assessment, and treatment of suicidal thinking and behavior.
Attributes: CLRM, CPCE, CPIE.

PSYC 6390. Global Mental Health. (3 Credits)
This course provides a survey of models, mechanisms, and critiques surrounding Global Mental Health. Materials are drawn from the burgeoning global mental health literature (e.g., Vikram Patel, Jorgen Unutzer, Helena Verdelli) transcultural psychiatry (Authur Kleinman, Laurene Kirmayer), post-conflict psychosocial mental health field (Ager, de Jong), and mental health capacity building. A section on methods in the middle of the course provides opportunities for students to review research design. Requirements will include weekly reflection papers, a term paper, and an exam. Outside speakers may be invited for selected lectures.
Attributes: CLRM, CPCE, CPIE, HUCB.

PSYC 6530. Developmental Psychopathology. (3 Credits)
This course will consider developmental disabilities and psychopathologies and the contexts, both natural and designed, that exacerbate or ameliorate these conditions. The ideas of disability, pathology, and dysfunction, and the contrasting ideas of ability, health, and functionality will be considered in relation to each other.
Attributes: CLRM, CPCE.

PSYC 6654. Introduction to Neuroscience. (3 Credits)
An exploration of the neuro-anatomical, physiological, and chemical substrates of human behaviors, including movement, sensation, perception, cognition, emotion, and personality. Both typical and atypical behaviors will be considered, as will developmental issues.
Attribute: CLMB.

PSYC 6670. Psychopharmacology I. (3 Credits)
This course covers the major psychiatric medication used in direct service delivery setting for mental health care. Special attention will be give to the role of psychotropic medication in the conduct of psychological services, including case management and treatment facilitating/interfering matters.
Attributes: CLRM, CPCE.

PSYC 6802. Introduction to Psychology Statistics w/ Lab. (3 Credits)
This course will replace PSYC 6800 and PSYC 6801. Most psychological research depends on statistical methods. This course aims to provide an introduction of a variety of statistical methods for psychological research.

PSYC 6830. Psychology Research Methodology. (3 Credits)
The course will cover a variety of topics involving research methodology and design. Pitfalls and potential solutions to many experimental and quasi-experimental methodologies will be addressed. Students will complete their own research project during this course, including design, finding subjects, experimentation, analysis, and write-up.

PSYC 6850. Evaluation of Psychological and Social Programs. (3 Credits)
Review of the literature relating to the scientific evaluation of psychological programs in the areas of mental health, addiction, compensatory education, and societal innovation. Extensive discussion of the use of quasi-experimental designs, and numerous methodological issues and pragmatic problems associated with evaluation studies.
Attributes: CLRM, DATA, SOIN.

PSYC 6900. Psychometric Theory. (3 Credits)
This course introduces several testing and measurement theories, including classical test theory, generalizability theory, and item response theory. The course will cover the statistical underpinnings, software implementation, and applications in real settings.

PSYC 7010. Psychology and Criminal Law. (3 Credits)
This course is designed to provide an overview of the interaction between psychology and the criminal law. We will focus primarily on the three major aspects in which psychologists are involved in the criminal justice system: competence to stand trial evaluations, mental state at the time of the offense (mens rea and the insanity defense), and the assessment of risk/prediction of future dangerousness. Because the interaction of psychology and law is by definition interdisciplinary, this course is co-taught by a forensic psychologist (Professor Rosenfeld) and attorney (Professor Cohen), and is open to both psychology graduate students law students. The content of the course is evenly divided between understanding the legal issues involved and the application of psychological principals to these legal issues. In additional, specific topics such as forensic psychological assessment and expert testimony will be discussed.
Attributes: CEED, CENS, CLRM, CPCE.
PSYC 7020. Psychology and Civil Law. (3 Credits)
This course covers a number of the areas in which psychologists consult on forensic matters outside of the criminal arena. The semester will be divided relatively evenly between the reviewing case law and legal standards and issues related to clinical practice. Specific legal issues discussed will include the concept of torts and malpractice, causation, best interest standards, and standards of proof. The first application of these issues is one civil law, including the role of psychologists in personal injury and sexual harassment cases, and discussion of the current. The second area of focus concerns the role of psychologists in the family court, including a child custody and visitation evaluations, termination of parental rights, and divorce mediation. Finally, we discuss issues that arise in the elderly and medically ill such as informed consent, decision-making competence, physician-assisted suicide, and testamentary capacity. Overarching issues such as psychological testing, report preparation, and expert testimony are discussed in the context of these topics.
Attributes: CEED, CENS, CLRM, CPCE, HECS.

PSYC 7030. Psychology and Juvenile Justice. (3 Credits)
This course provides an overview of the interaction between psychology and the juvenile justice system focusing on four areas: 1) developmental theories and trajectories of antisocial behavior, 2) assessment and identification of risk and protective factors among justice system-involved youth, 3) clinical evaluations related to legal questions, and 4) empirically supported treatment/program.
Attributes: CLRM, CPCE.

PSYC 7111. Psychopathology. (3 Credits)
An overview of the primary types, causes, and symptoms of a working knowledge of the basic tools used in clinical diagnosis, including diagnostic evaluation skills in the assessment of specific psychological disorders, as well as case formulation skills from different theoretical perspectives.

PSYC 7112. Clinical Diagnosis. (3 Credits)
This course is designed to promote the development of a working knowledge of the basic tools used in clinical diagnosis, including diagnostic evaluation skills in the assessment of specific psychological disorders, as well as case formulation skills from different theoretical perspectives.

PSYC 7113. Developmental and Prevention Science. (3 Credits)
This course introduces students to theories and research concerned with the integration of the developmental and prevention sciences to understand and address social-emotional and cognitive problems with a focus on middle childhood. Focusing first on theoretical perspectives from developmental science and key principles in prevention science, including risk and resilience in development, the course will then examine issues related to developmental transitions and contexts of development as well as challenges in targeting preventive interventions on multiple domains and mechanisms of development, and the science and practice of developmental preventive interventions in organizational, community, political-economic, and policy contexts. The course materials include primary readings, and the course is discussion based. Students will gain an understanding of core principles and research demonstrating the many ways developmental and prevention sciences are mutually informative.
Attributes: CLRM, PMPE.

PSYC 7250. Treatment of Substance Abuse. (3 Credits)
This course will cover theories and supporting research data concerning the development and maintenance of substance abuse disorders. It will concentrate heavily on specific techniques and regimens developed especially for the treatment of substance abuse disorders. Emphasis will be placed on psychosocial forms of treatment.
Attributes: CLRM, CPCE, CPIE.

PSYC 7500. Computerized Multistage Testing. (3 Credits)
This course provides a general overview of adaptive and multistage test (MST)’s important concepts. The MST design is described, why it is needed, and how it differs from other test designs, such as linear test and CAT designs, and how it represents a middle ground between the linear and intern-level adaptive tests. It will illustrate and discuss the processes of test design, assembly, routing, scoring, applications, and operational implementation considerations, as well as the most recent development on software for simulations to aid the operational implementation.

PSYC 7804. Regression with Lab. (3 Credits)
This course covers all types of regression analyses and related ideas. Hands-on experience and development of expertise in conducting regression analyses.
Attributes: CLMB, DATA.

PSYC 7806. Multidimensional Scaling. (3 Credits)
A consideration of the theory and applications of the scaling of data, univariate and multivariate, metric and non-metric in psychology and related sciences. Emphasis is on the various theoretical models for scaling data multi-dimensionally and their computer program analogues.

PSYC 7811. Missing Data Analysis. (3 Credits)
Missing data is common in behavioral research. This course covers the concepts of missing data (e.g., mechanisms of missing data, categorizations of missing data), research designs in minimizing missing data, planned missing data designs, and statistical methods in handling missing data with different types of data (cross-sectional, longitudinal, categorical, multilevel). Software implementation of these techniques will be introduced and covered.
Prerequisite: PSYC 7804.

PSYC 7812. Factor Analysis. (3 Credits)
Theories of factor organization and techniques of factor analysis. Critical evaluation of major research on the identification of aptitude and personality traits.
Attributes: CLRM, PMTM, PSYM.

PSYC 7815. Cluster Analysis. (3 Credits)
Cluster Analysis is a generic term for a range of methods that use criteria, and algorithms for discovering and defining groups of similar objects, subjects, concepts, stimuli, or other entities. Current methods and their comparative evaluation are presented in the context of behavioral science applications. The interrelationship of cluster analysis with factor analysis, multidimensional scaling and discriminant analysis is discussed. Students are expected to use the computer to analyze behavioral science data in the course.
Attribute: PSYM.

PSYC 7816. Introduction to Multivariate Analysis. (3 Credits)
This course covers elements of matrix theory, multivariate regression, exploratory factor analysis, principal component analysis, discriminant analysis, the generalized T-distribution, multivariate analysis of variance, and canonical regression. It also includes a treatment of pattern, profile analysis, and a brief introduction of correspondence analysis.
Attribute: CLMB.
PSYC 7821. **Advanced Multivariate Analysis for Psychology. (3 Credits)**
This course will cover the major multivariate statistical techniques used in social and behavioral sciences. The topics covered are similar to those in introduction to Multivariate Analysis; the multivariate normal distribution, the multivariate general linear model (MANOVA, Multivariate Multiple Regression, MANCOVA), discrimination and classification, canonical correlation analysis, and methods of analyzing covariance and correlation structures such as principal components and factor analysis. The coverage on this class goes beyond application of these techniques by focusing on their statistical and theoretical foundations, and by emphasizing matrix algebra computations.

PSYC 7827. **Models of Decision and Choice. (3 Credits)**
This course will cover normative and descriptive models of individual choice and decision-making beginning with Expected Value and concluding with Cumulative Prospect Theory. The course will emphasize the interface and exchange between theory and experimentation. In particular we will focus on the ways in which theory has changed and adapted in response to empirical behavioral results.

PSYC 7830. **Structural Equation Modeling. (3 Credits)**
The course and lab familiarizes students with methodology topics include: determination of model parameters, fitting models to data, etc., LISREL, EQS, AMOS, MPLUS and SEPATH.
Attributes: DATA, PMTM.

PSYC 7832. **Meta-Analysis. (3 Credits)**
This course will introduce participants to the methodology of systematic reviews of scientific literatures and meta-analysis—a set of techniques designed to synthesize research findings across studies as the basic units of data analysis. The course will cover all major synthesis (meta-analysis) with special attention to the unique features of such analyses. Participants will read and critique published meta-analyses and will gain experience with some meta-analysis software.
Attributes: CLRM, PSYM.

PSYC 7835. **Categorical Data Analysis. (3 Credits)**
The goal of this course is to introduce statistical models for categorical data, which are common in behavioral sciences. These include binary data (sick vs. not), ordinal data (coarse Likert scales), nominal data (answers yes, answers no, answers “don’t know”), and count data (how many events in a given amount of time). The course will introduce relevant statistical theory for categorical distributions; cover models such as logistic, Poisson, ordinal or nominal regression, etc., and show how they fit in the framework of the generalized linear model (GLM); and discuss the interpretation of these models.
Attributes: ASDM, PSYM.

PSYC 7850. **Hierarchical Linear Models. (3 Credits)**
This course introduces linear models (regression, ANOVA and ANCOVA) for populations having a hierarchical structure. An example of such a structure would be students grouped in universities. Here there is assumed to be a population of universities and, for each university, a population of students. Suppose there is some outcome variable of interest (perhaps GPA in this example). Predictors for this variable might be available at the student level (admission test scores) as well as the university level (selectivity). Hierarchical linear models provide an appropriate framework for exploring data obtained from such a structure (involving a sample of universities and a sample of students from each of the sampled universities). Bayesian, non-Bayesian, and Empirical Bayesian approaches will be discussed and compared.
Attributes: CLRM, PMTM.

PSYC 7880. **Statistical Mediation Analysis. (3 Credits)**
This course will provide a comprehensive introduction to statistical mediation analysis including estimation of effects, consideration of assumptions, and limitations of method. Course topics will cover computer intensive applications of mediation, including multivariate models with multivariate models with multiple indicators and mediators, as well as longitudinal and hierarchical models. The goal of this course is to prepare students for applying mediation to their own program of research.

PSYC 7890. **Qualitative Methods. (3 Credits)**
This course examines strategies available for the analysis of data not appropriately addressed by typical statistical methodologies. This course provides knowledge of qualitative research methods and skills necessary to carry out this kind of research in psychology. Principles, procedures, ethics, and illustrative studies in phenomenology, grounded theory, narrative psychology, hermeneutics, heuristic research, psychoanalysis, action research, programs of evaluation, and feminism will be explored. Hands-on activities include the formulation of research problems, design, data collection, analysis, validation, and report writing.
Attribute: CLMB.

PSYC 7920. **Item Response Theory. (3 Credits)**
This course focuses on item response theory psychometric models, including two- and three-parameter models. Theory and application are discussed and studied, using the various models.
Attributes: CLRM, DATA.

PSYC 7940. **Bayesian Statistics. (3 Credits)**
This course provides students with an understanding of the philosophy, concepts, and mathematical theories for Bayesian statistics. It also covers the Bayesian applications of common statistical techniques in psychological and behavioral research, such as regression. The course will also teach students using popular statistical software packages for Bayesian analysis.
Attribute: PMTM.

PSYC 7950. **Correspondence Analysis. (3 Credits)**
Correspondence Analysis (CA) is often regarded as principal component analysis of categorical data. The categorical data refer to contingency tables or any Likert-type data. Different from ordinary factor or component analysis that estimates factors or dimensions from column-wise variables, CA is eligible to estimate dimensions from row variables (actually row categories), in addition to estimating the column dimensions. CA also estimates the relationship (i.e., phi correlation) between the rows and columns, using the chi-squared statistics, and presents the relationship in a graphical display. CA may be considered as simultaneous principal component analysis for both rows and columns.
Attribute: PMTM.

PSYC 7960. **Equating Test Scores. (3 Credits)**
Test equating methods are used to produce scores that are comparable across different test forms. The course will provide a detailed overview of the observed-score equating (OSE) methods and framework, and of the IRT OSE method; the assumption that underlie different methodologies and the relevant data collection designs will also be discussed. In this course, theoretical issues will be considered along with numerical examples and software demonstrations using real data.
Attribute: PSYM.
PSYC 7965. Experimental Design. (3 Credits)
This class exposes students to the basic principles of experimental design and the appropriate tools for analysis of results from experimental studies. We will cover single- and multi-factor designs, blocking and repeated measures designs, analysis of covariance and the special statistical issues associated with multible comparisons and non-orthogonal designs.

Attributes: ASDM, PMTM.

PSYC 7990. The Teaching of Psychology. (3 Credits)
Theory and practice of college teaching will be reviewed. Topics will include lecturing, demonstrations, assessment methods, out of class writing assignments, syllabus preparation, local requirements and values.

PSYC 8001. Internship in Applied Psychological Methods. (3 Credits)
Students will identify a research project or program evaluation project in collaboration with their site supervisor and their internship mentor, and complete that project, drawing upon skills learned during the course of the Master’s program. Students will have one semester to complete this project.

PSYC 8013. Psychometric Topics Seminar I. (0 Credits)
This seminar is intended for students in the psychometrics and quantitative psychology Ph.D. program. Students are required to take five semesters of PSYC 8013 and 1 semester of PSYC 8014. The seminar includes invited talks, research presentations, journal article/book chapter open discussions, and professional development topics related to psychometrics and quantitative psychology.

PSYC 8014. Psychometric Topics Seminar II. (3 Credits)
This seminar is intended for students in the psychometrics and quantitative psychology Ph.D. program. Students are required to take five semesters of PSYC 8013 and 1 semester of PSYC 8014. The seminar includes invited talks, research presentations, journal article/book chapter open discussions, and professional development topics related to psychometrics and quantitative psychology.

PSYC 8015. Identification of Child Abuse. (0 Credits)
The seminar will deal with the identification and reporting of child abuse. The sequelae of child abuse and maltreatment (medical, psychological, and legal) will be discussed. New York State laws and regulations dealing with reporting responsibilities will receive special emphasis.

PSYC 8023. Clinical Topics Seminar. (0 Credits)
All students attend this Clinical Topics Seminar (CTS) for 6 semesters (the first three years). CTS is intended to serve multiple goals, including facilitating the professional development of graduate students through, among other things, formal didactic presentations, opportunities to give formal research presentations (of the MA thesis, in the fall semester of the third year) and case conferences (in the spring semester of the third year), and guest lectures by faculty and invited speakers. Other topics rotate across different semesters and years (e.g., specific topic presentations that are covered sequentially and in more depth on a rotating three-year cycle).

PSYC 8025. Research Colloquium. (0 Credits)
Students will learn about research being conducted by faculty members, other graduate students, and invited speakers from other institutions.

PSYC 8040. Independent Research. (3 Credits)
This course offers opportunities for students to work with individual faculty on individual projects of their own design.

PSYC 8043. ADP Research Apprenticeship I. (3 Credits)
A research apprenticeship for all students in the Applied Developmental Program, taken within the first two years of study. Students, working under the direct supervision of a Developmental faculty member, gain firsthand experience in design, implementation, and analysis of a research project pertaining to the development of infants, children, adolescents, mid-life, or older adults.

PSYC 8044. ADP Research Apprenticeship II. (3 Credits)
A continuation of PSGA 8043.

PSYC 8045. ADP Research Apprenticeship III. (3 Credits)
A continuation of research apprenticeship I and II for all students in the Applied Developmental Program taken within the first two years of study. Students working under the direct supervision of a developmental faculty member, gain firsthand experience in design, implementation and analysis of research, project pertaining to the development of infants, children, adolescents, mid-life, or older adults.

PSYC 8050. Pre-Doctoral Thesis. (3 Credits)
Under the direction of a faculty mentor, student conducts a short-term research project, analyzes results, and prepares a report in a journal article format.

PSYC 8060. Research Seminar I. (1 to 3 Credits)
Prior to beginning work on dissertation, each doctoral student prepares a written proposal of the research project and discusses it orally at a meeting of the seminar. Required of all doctoral students.

PSYC 8070. Research Seminar II. (3 Credits)
Each doctoral student is required to make a written and oral progress report on the dissertation research after completion of data gathering and analysis.

PSYC 8080. Clinical Psychology Internship. (1 Credit)
To be taken only after completion of all other degree requirements.

PSYC 8081. Applied Dev. Internship. (1 Credit)

PSYC 8082. Psychometric Internship. (1 Credit)

PSYC 8202. Clinical Externship I. (3 Credits)
This course provides a didactic and group supervision structure that addresses students developing the range of clinical skills that sequentially prepare them for an internship and, eventually, independent practice as a psychologist. The focus of Externship I/II is on basic interviewing and therapy skills, intervention planning, and effective use of supervision to guide clinical service delivery. The clinical externship is completed by students in their second year of doctoral training. Didactics and group supervision focus on both assessment and treatment skills that are incorporated into students’ clinical training at external externship sites.

PSYC 8203. Clinical Externship II. (3 Credits)
Continuation of PSYC 8202.

PSYC 8212. Clinical Externship III. (3 Credits)
This course provides a didactic and group supervision structure that addresses students developing the range of clinical skills that sequentially prepare them for an internship and, eventually, independent practice as a psychologist. The focus of Externship III/IV is on continued growth in interviewing and therapy skills, intervention planning, case conceptualization, report writing, and effective use of supervision to guide clinical service delivery. Didactics and group supervision focus on both assessment and treatment skills that are incorporated into both students’ clinical training at external externship sites as well as within the program training clinic.
PSYC 8213. Clinical Externship IV. (3 Credits)
Continuation of PSYC 8212.

PSYC 8221. Clinical Externship V. (1 Credit)
This course provides a didactic and group supervision structure that addresses students developing the range of clinical skills that sequentially prepare them for an internship and, eventually, independent practice as a psychologist. The focus of Externship V/VI is on continued growth in interviewing and therapy skills, intervention planning, case conceptualization, report writing, and effective use of supervision to guide clinical service delivery. Didactics and group supervision also address exposure and experience to models of supervision and case consultation. Students receive hands-on experience conducting supervision through a peer supervision process and gain practical experience in case consultation via their external externship training.

PSYC 8223. Clinical Externship VI. (1 Credit)
Continuation of PSYC 8221.

PSYC 8271. Child Psychotherapy. (3 Credits)
This course will provide foundational knowledge relevant to conducting individually oriented child and adolescent therapy. The course will address issues such as the unique challenges that are involved in working with children and adolescents, evidence-based approaches to child and adolescent treatment, and major psychological disorders that children and adolescents experience, and how to intervene.
Attributes: CLRM, CPCE, CPIE.

PSYC 8350. Applied Dev Psy Pract I. (3 Credits)
Supervised work in the application of developmental psychology to field settings. Students complete a project, such as a needs assessment or program design and evaluation practicum site.
Prerequisites: PSGA 6350 (may be taken concurrently) and PSGA 6000 (may be taken concurrently).

PSYC 8351. Applied Dev Psy Pract II. (3 Credits)
Continuation of PSYC 8350.

PSYC 8999. Independent Study. (1 to 3 Credits)
Under the direction of a faculty mentor, student conducts a research project not directly related to either the second-year project (PSGA 8050) or the doctoral dissertation.

PSYC 9999. Dissertation Direction. (1 Credit)

PSYC MTNC. Maintenance-Psychology. (0 Credits)

Public Media (PMMA)

PMMA 5001. Public Interest Media Theory and Practice. (3 Credits)
Serving as a core introductory course for the Public Media MA program, this class examines central topics in the study and practice of media in the public interest. Students consider what is the role of media and communication in promoting (or constraining) positive social change, and what unique roles do journalists and strategic communication professionals play throughout this process? What do we mean, exactly, by concepts such as public media, the public interest, social justice, and civic engagement? How do historical and contemporary power dynamics, information technologies, and economic structures shape the types of stories that dominate the public sphere, and how do resistant voices find ways to disrupt those narratives over time? Course readings and multimedia materials are drawn from a wide variety of academic disciplines and professional sectors, while course assignments ask students to grapple with real-world topics, aiming to not only analyze social problems but also identify potential solutions.

PMMA 5002. Public Journalism. (3 Credits)
This course will teach students how to operate effectively as a multimedia reporter for public or nonprofit media in a converged world. It also covers the basic tenets, conventions, and traditions of journalism in the public interest. This will largely be a hands-on journalism course. The course will mostly cover print, audio, and video. It will also cover data journalism, watchdog journalism, augmented journalism, social media, ethics, law, diversity, and other issues essential to the profession today. This course is open to senior undergraduates majoring or concentrating in journalism with the instructor’s permission.
Attribute: JOUR.

PMMA 5003. Strategic Communication. (3 Credits)
Scholars and practitioners alike have devoted decades to the study of how organizations communicate to achieve their goals. They have analyzed advertising and public relations since the inception of these professions; they have also sought to investigate the protests of activists and the tactics of NGOs. This class will follow this intellectual tradition, weaving together insights from sociology, psychology, business, media studies, and a number of other disciplines to explore strategic communication in the contemporary world. To help direct this course, in keeping with the mission of the Public Media MA program, the focus will be on how strategic communication can be used to advance social justice and the public interest. This entails not simply studying the campaigns of organizations doing good but also confronting tough questions about how these well-intentioned groups can communicate in ways that are ethical, effective, and equitable.

PMMA 5011. Multimedia Tools. (1.5 Credits)
In this hands-on intensive course, students learn the basics of photography, audio recording/editing, and video recording/editing. By the end of this course, students will be comfortable creating and editing their own media and using the equipment necessary to do so. Best practices for the use of cameras, recorders, and video equipment will also be covered. Students will create their own multimedia project and present it at the conclusion of the intensive.

PMMA 5012. Fundamentals of Web Design. (1.5 Credits)
This is a hands-on course in designing and developing in digital spaces. By the end of this course, students will receive beginner knowledge in areas of digital design thinking, web development, UX/UI design, data analysis, and prototyping. Students will also acquire experience using the web content management system called Wix for the purposes of creating an online portfolio and/or interactive webpages. The “final project” of the intensive is (1) media/journalism or media/advocacy strategic plan backed by data that addresses a social issue and (2) a supplementary digital or physical prototype of the idea (i.e., app, charts/graphs, proposal, etc.).
PMMA 5101. Freedom of Expression. (3 Credits)
This course examines the history and theory of freedom of expression in the United States. We will trace the philosophical and political origins of free speech, examining key assumptions about human nature, individual liberty, and the role of government in a Democracy underlying the First Amendment. The Constitutional Framers gave us an incredible gift of freedom. But with that freedom comes responsibility. This class explores that tension. When, if ever, should expression be regulated in a Democratic society? When should the rights of the individual be curtailed to protect the group? Should all forms of media have the same degree of freedom? What special challenges are posed by the development of new communication technologies? Are there any types of speech that should be restricted? If so, which ones, and who should decide? Are there certain circumstances when free speech should be curtailed in order to support other interests, such as diversity, equality or respect for differences in religious beliefs? Should limits on speech be allowed in the name of national security? Should certain forms of expression be prohibited during wartime? What kind of restrictions can be placed on public protests? Should propaganda be legal? An investigation of our nation's history -- and the major Supreme Court cases dealing with freedom of expression -- suggests that despite often lofty rhetoric about liberty. Americans actually have a great deal of ambivalence about free speech. By studying the application of First Amendment theory to various situations, such as flag burning, hate speech, restrictions on public protests, leaks of classified material and dissent during wartime, we will explore just how much freedom we actually have, and how much we really want to have.
Attributes: CEED, CENS, PMTC.

PMMA 5102. Press, Politics, and Public Policy. (3 Credits)
This course covers the interaction between the American mass media, politics, and public policymaking. We examine some of the most important interactions between the press and politicians to answer questions about the role of the media in American society.
Attribute: PMTC.

PMMA 5103. Environment and the Media. (3 Credits)
This course focuses on the intersections between contemporary environmental issues, communication and media systems, culture, and social change. This class will explore the unique contributions that perspectives from communication and media theory can bring to the study of "the environment" and "the natural world." The course will also consider how these perspectives can inform strategic communication practices that aim to bolster long-term global environmental sustainability. Case studies will cover a diverse set of environmental topics, including climate change, environmental justice, the global industrial food system, public understandings of scientific risk, human-animal relations, and environmental media and journalism.
Attributes: CEED, CENS, PMTC.

PMMA 5104. Theories of Media, Culture, and Society. (3 Credits)
This course uses primary sources to deepen students' understanding of the inter-relationship between media, culture, and society. One of the main objectives is to open students' reading and analysis skills by exposing them to difficult theoretical material in an environment designed to help them learn to read this kind of text.
Attribute: PMTC.

PMMA 5105. Media Ethics. (3 Credits)
This course will examine the practices of mass media from the standpoint of producers and the public, with focus on intellectual property, privacy, confidentiality, conflict of interest, censorship, corporate responsibility, and new technologies.
Attribute: PMTC.

PMMA 5106. Race, Gender, and Digital Media. (3 Credits)
This course examines the theory, history, politics, and aesthetics of digital media. We will utilize an intersectional feminist approach to explore race, gender, and broader questions of identity and difference from early computing to social networking. Topics include diversity in the tech industry, virtual communities, and online activism. Ultimately, the class will discuss the role that digital media plays in promoting—or preventing—civic engagement and social change.
Attributes: CEED, CENS, PMTC, URSG.

PMMA 5140. Themes in Urban Public Policy and Power. (3 Credits)
We see around us a city constantly in a state of change, dynamic change in which multiple actors compete daily. What are they competing for? And why? What does power mean for those actors? How is it to be defined? Who wins, who loses, and why? What are some of the policy issues that confront actors in a city whose only constant is change? We will look at a series of urban issues and ideas, often with a focus on New York City. We will also hear from and be able to talk with guest speakers with unique histories and perspectives. This should help inform our thinking about the issues we discuss, their historical and political context, and their salience.

PMMA 5201. Social Media and Civic Engagement. (3 Credits)
This theoretical course focuses on how social media impacts political participation, crowdsourcing (and the role of mobile), the role of digital networks in contemporary social movements, networked/participatory citizenship.
Attribute: PMTC.

PMMA 5202. Digital Media and Social Responsibility. (3 Credits)
This course examines the choices and responsibilities that shape personal identity and common humanity for those who regularly employ the tools of digital media and computer technology. Regular use of digital media enables individuals to separate from their physical selves and from the community spaces in which they have traditionally lived. This course focuses on the resulting ethical tensions.
Attribute: PMTC.

PMMA 5203. Technology & Public Comm.. (3 Credits)
This course focuses on the study of technology in the context of public communication, and is primarily concerned with the role that media, technology, and symbol systems play in shaping communication, consciousness, and culture, from the evolution of our innate capacity for speech and language, to the development of writing systems, to the invention of the printing press with movable type, to our contemporary electronic media environment.
Attribute: PMTC.

PMMA 5204. Civic Media. (3 Credits)
Participating in local life can be difficult. Information is hard to obtain and validate, local meetings are difficult to attend, networks are challenging to build. Increasingly, governments, advocacy groups, community organizers, and individual citizens are turning to digital tools to increase and improve the conditions in which we live and enhance our opportunities to engage. We will look at academic research surrounding citizenship and engagement in a digital era and cover research into many genres of civic media, from citizen journalism to hackathons, tech for development, activist art hacker culture, and games for good. This class will not only explore the various goals campaigns are using digital tools to meet, but will also focus on what type of citizen these tools are enabling and encouraging people to become.
Attributes: CEED, CENS, PMSC, PMTC.
PMMA 5205. Social Entrepreneurship. (3 Credits)
This course provides an overview of the use of business and entrepreneurial skills to drive social change. Students will analyze different definitions of social entrepreneurship, examine the fundamental theories and frameworks of social entrepreneurship, and engage with current debates around social change. Social ventures around the New York City area will be used as case studies of sustainable solutions to social problems.
Attribute: PMTC.

PMMA 5206. Social Media and Political Campaigns. (3 Credits)
Social media has changed political campaigns in ways both incremental and monumental. This course will lead students in analyzing the practices, strategies, and tactics of contemporary campaigning in order to learn best practices across a variety of social media channels, understand how such practices impact traditional theories of political communication, and assess their role in our democracy. This class will be oriented around changes seen in the 2016 and 2018 elections, and will emphasize how both to do the work of social media campaigning as well as how to study it. Over the course of the semester, we will focus on cutting-edge issues like bots and misinformation, meme production, microtargeting in social media ads, gamification, using Twitter to drive earned media, and more. Students will read both practitioner and academic approaches to each topic, and will develop a final project that can be either applied or research-based.
Attributes: PMSC, PMTC.

PMMA 5207. Mapping Injustice. (3 Credits)
This course centers “mapping” as an organizing theme for understanding and engaging social justice and injustice because of its expanding role in literally and metaphorically arranging contemporary life. The everyday adoption of new spatial media—such as web-based mapping platforms, geosocial apps, and locative data—increasingly ordain how society understands the past, experiences the present, and plans for the future. To map social (in)justice is to consider how spatial media can help draw together dichotomies such as medium/method, art/science, and ontology/epistemology so as to trace, represent, and rework matters of inequity.
Attribute: HUHR.

PMMA 6101. Audio Narrative (Reporting and Production). (3 Credits)
THIS COURSE TAKES PLACE OFF CAMPUS AT WNYC STUDIOS (Varick Street in Hudson Square, Manhattan). From spot news to feature reporting, students in this course will learn how to produce audio journalism with public media values. The class will focus on how to craft and report compelling, attention-holding narratives. The course will cover the fundamentals of strong audio journalism, including quality sound gathering, strong interview techniques, writing for the ear, and authentic vocal delivery.
Attributes: PMMJ, PMTC.

PMMA 6102. Video Narrative (Reporting and Production). (3 Credits)
This course is a workshop for students who want to elevate their skills in creating videos that have strong lines and exhibit best practices in reporting and production. Students will learn the elements that go into making compelling videos, including story selection, casting and interviewing your characters, shooting strong visuals, and writing and editing for clarity and impact. You’ll also learn to weave facts and issues into the narrative and make sure your stories are journalistically sound.
Attributes: PMMJ, PMTC.

PMMA 6103. Data Journalism and Interactive Graphics. (3 Credits)
This class will blend theories of digital media and journalism with journalistic practice and the development of skills related to both understanding and translating big data. This emerging discipline touches on information and interactivity design, mapping, graphing, animation tools, and data analysis. In this class, we will apply these interdisciplinary areas of study to the practices of reporting and editing as they relate to gathering, analyzing, and visualizing interactive data-driven stories. We will focus on not only on official journalism, but also include awareness-raising efforts by advocacy/civic groups.
Attributes: DATA, PMMJ.

PMMA 6104. Alternative and Advocacy Journalism. (3 Credits)
Students will learn how to produce, aggregate and disseminate journalistic content with the explicit goal of making disadvantaged communities better informed, connected to one another, and able to influence policy decisions. We will focus the voice-giving role played by citizen journalism, giving special attention to the content, economics, and community-building role played by ethnic, youth, homeless, incarcerated media sectors, and the role played by digital media.
Attributes: HUHR, PMMJ, PMSC.

PMMA 6105. Cross-Platform Journalism. (3 Credits)
*THIS COURSE TAKES PLACE OFF CAMPUS AT WNET STUDIOS—(8th Ave & 50th St)* This course is offered in collaboration with WNET, New York’s public television station. The course will focus on teaching students to craft video pieces for public television, including story generation, interviewing, reporting, writing, shooting video and editing. The course will also cover how to create content for digital media including websites and social media platforms. Students will learn best practices in broadcasting and discuss ethical issues facing multimedia journalists, particularly those in public media.
Attribute: PMMJ.

PMMA 6106. Online Journalism. (3 Credits)
This course centers on the most current trend facing journalism today: the Internet’s effect on the content of news media and the work of reporters. The course begins with a survey of open source journalism and convergence culture, examining the collision between old and new media, and the mass amateurization of professional communication. We will consider the transformation of journalism in the digital age in light of the apparent shrinking size of articles, the reduction in readers’ attention span, and the decline of deep reading.
Attribute: PMMJ.

PMMA 6107. Opinion Writing. (3 Credits)
This course explores the great American tradition of opinion writing and commentary in traditional print and evolving online formats in order to gain an understanding of contemporary social, professional and intellectual concerns in the practice of journalism. This is as much an exploration of critical thinking as it is of writing, so there will also be emphasis on aspects of philosophy, logic and argumentation. The course will attempt to cover print, broadcast and all forms of new media.
Attribute: PMMJ.

PMMA 6108. Advanced Interviews and Profiles. (3 Credits)
This course will teach students advanced reporting and profile writing for different multimedia journalism platforms. Heavy emphasis will be placed on the art of interviewing. Students will learn how to compose interviews, invite subjects to interact with them on the meaningful level, and engage with public issues.
Attribute: PMMJ.
PMMA 6109. First Person Journalism. (3 Credits)
First person journalism is nothing new. As part of the New Journalism movement, reporters like Tom Wolfe and Joan Didion have been infusing their storytelling with subjectivity for decades. Still, the digital shift in journalism and explosion of social media has brought a new wave of first person journalism to the web. This course will explore the history of first person journalism and help students use first person perspective to bring reported pieces to life. Students will look critically at the form to consider the limitations of personal narrative in journalism. On that note, this course will not be limited to personal narratives. Students will also work on reported stories in which their experiences as journalists and citizens impacts their storytelling structure.
Attribute: PMMJ.

PMMA 6110. Digital Storytelling. (3 Credits)
This class explores storytelling in emerging platforms. From the still image and the soundscape, we will evolve to discuss the tools and narrative forms across digital film-making, game design and interactive web narratives. Exposure to and workshops in integrated storytelling technologies will enable students to create story projects of their own.
Attribute: PMMJ.

PMMA 6201. PR for the Public Interest. (3 Credits)
This course is designed to simulate the real-world public relations needs of an organization in the non-profit, advocacy or public interest sectors. It covers the wide range of PR needs and functions such organizations have, preparing students to succeed in organizational environments from large, established charities or NGOs to start-ups, from grassroots advocacy groups to blended businesses involving social entrepreneurship.
Attribute: PMSC.

PMMA 6203. Marketing and Branding in the Public Interest. (3 Credits)
Social marketing seeks to integrate research, best practice, theory, audience, and partnership insight to inform the delivery of social change programs that are effective, efficient, equitable and sustainable. This course offers a strategic framework for developing a social media advocacy campaign, using social and digital media to help shape public debate, mobilize public action and to speak directly to those with influence to help bring about social change.
Attributes: CEED, CENS, PMSC, PMTC.

PMMA 6204. Cross-Platform Comm Strategies. (3 Credits)
This course will use theory and practice to learn the skills needed to produce cross-platform campaigns that successfully target and reach key populations. Additionally, we will focus on the socio-technical conditions that make this approach necessary and practical in today’s media environment. We will highlight areas of viral content, the politics of platforms, translating messages across channels, and creating spreadable media within the context of advocacy, electoral and nonprofit sectors.
Attribute: PMSC.

PMMA 6205. Online Analytics and Metrics. (3 Credits)
In this course, you will learn how to use data to construct, analyze, and circulate stories that are important to you. Analytics from email CMS systems, websites, and social media can tell you about who’s reading your content, what messages are working (and which aren’t), and help you increase or refine their reach. This course will focus on theories behind using data to assess refine, and target messages, and cover best practices for doing so through hands-on work with a variety of commonly-used platforms.
Attributes: DATA, PMSC.

PMMA 6206. Persuasion and Public Opinion. (3 Credits)
This course blends theory and practice to explore how we convince others to change their attitudes or behavior in order to accomplish specified goals. Working in multiple contexts, the course is designed to help students become better analysts and evaluators of persuasive messages in several social and political arenas; better persuaders—better at recognizing opportunities for influence, and at employing effective strategies for convincing others and building support; and more versatile at persuasion across a variety of communication channels and media platforms.
Attributes: HUCB, PMSC.

PMMA 6207. International Communication. (3 Credits)
This course aims to provide students with an international perspective to better understand communication theories and practices in different parts of the world. This global vision is especially important for communication scholar-practitioners, who will need to examine different actors, relationships, and trends in the global communication landscape as they get ready for their own role in their future career. This course will combine conceptual learning and class projects to help students gain both a theoretical foundation and firsthand research experience about international communication. Topics such as globalization, media and technology, audience, advocacy, and much more will be discussed in this course.
Attributes: HUCB, PMSC.

PMMA 6208. Data and Communication. (3 Credits)
Obtaining, interpreting, visualizing and displaying data are essential skills for communication professionals in the 21st Century. Featuring hands-on practice and examples, this course explores a wide range of data based communications, ranging from campaign strategy to data journalism and advertising tactics. Students will work on in-depth projects that require a demonstrable understanding of data, visualization, strategy, testing and evaluation.
Attributes: PMSC, PMTC.

PMMA 6209. Storytelling for Public Good. (3 Credits)
In this class, students will focus on how to craft stories that inform, mobilize, or persuade, and ultimately serve the public interest. Special attention will be paid to the role of narrative in both journalism and advocacy and changing channels of storytelling, including film and television, long form and citizen journalism, interactive documentaries, and games for social change.
Attribute: PMSC.

PMMA 6210. Cross Platform Production. (3 Credits)
This course will provide students with a variety of production skills for media-oriented professions, including shooting and editing for sound, still image, and video, with an eye toward editing for a variety of digital platforms. Students will be expected to produce professional quality content over the course of the semester. This will build upon the Public Media program’s summer workshop course.
Attribute: PMSC.

PMMA 6398. Internship. (3 Credits)
The internship will be chosen by the student, working in conjunction with the graduate director. This internship is to be supervised by an appropriate faculty member, and will involve regular meetings, bi-monthly reports, and a final written summary of the internship experience.
Students have the possibility to do an internship for three credits per semester, for a total of up to six credits for the program. The internship will be chosen by the student, working in conjunction with the graduate director and Fordham University's career center. This internship is to be supervised by an appropriate faculty member, and will involve regular meetings, bi-monthly reports, and a final written summary of the internship experience.

This course represents the culmination of the student's course of study. He/She will create a final project based on projected future plans and career path.

PMMA 8999. Independent Study. (1 to 4 Credits)
PMMA MTNC. PMMA - Public Media. (0 Credits)

Maintenance-PMMA.

Quantitative Finance (QFGB)

QFGB 8900. Greenpoint/Finastra Project. (0 Credits)
The goal of this program is conceptual learning and hands-on research with real-life portfolios and enterprise systems, including the Finastra Capital Markets Fusion Platform. At the end of the program students are expected to have enriched their learning—and their CVs—with projects that have direct industry applicability and through achievements that will enhance their employment prospects and career growth. The research will include FRTB QIS on a portfolio, model sensitivity of PLA tests, impact of specific portfolio features, and risk parameters on FRTB SA and IMA charges.

QFGB 8901. Accounting I. (1 to 3 Credits)
Provides a basic understanding of the preparation and analysis of corporate financial statements. Introduces generally accepted accounting principles (GAAP) and the standard-setting process. Discusses current issues in the reporting process, such as the benefits and problems of the Sarbanes-Oxley Act.

QFGB 8902. Basics of Economics. (1 to 3 Credits)
Covers both microeconomics and macroeconomics. Microeconomics topics include theory of demand and the nature of profit and utility maximizing market equilibrium that constitute the economic basis of finance theory and applications. The macroeconomics segment defines the major components of the economy, outlines a simple model of long-run, real economic behavior with competitive, market clearing prices, then establishes a companion model of short-run adjustments without flexible pricing.

QFGB 8903. Basics of Finance. (1 to 3 Credits)
Provides a conceptual framework for decision-making processes in many diverse areas of finance. Concepts including time value of money, stock and bond valuation, project and firm valuations, risk and return measures, portfolio management, basic CAPM and APT, diversification and hedging are reviewed. Basic theoretical aspects of corporate finance, such as dividend policy and capital structure, are also introduced.

QFGB 8905. Math for Quantitative Finance. (1.5 Credits)
Reviews the basics of mathematics in preparation for advanced courses in the MSQF program. Topics include: Special functions, Multivariate calculus, Optimization, Integration, Differential equations (ODE and PDEs), and Linear algebra.

QFGB 8906. Probability and Statistics. (1.5 Credits)
Reviews the basics of probability and statistics in preparation for advanced courses in the MSQF program. Topics include special distributions like binomial, poisson, normal, lognormal, gamma, beta, and fat-tailed distributions.

QFGB 8907. Introduction to Web Technology: Blockchain. (0 Credits)
Blockchain technology is affecting the financial services industry and considered to be the biggest disruption in payments, financial contracts, and almost all other aspects of the financial services industry. The goal of this course is to give students a basic understanding of and hands-on experience with the web technology tools necessary for blockchain technology. This 0-credit course will be offered in the fall and must be taken prior to Blockchain Application Development course offered in the spring, which will involve development of a real blockchain application via various hands-on projects. Second-year M.S. in quantitative finance students are encouraged to take this introductory course in the second half of the fall term. The instructor will be a top industry expert in blockchain technology and its applications in the financial services industry.

QFGB 8911. Adv Financial Modeling. (2 Credits)
Provides the foundation for developing skills in the quantitative analysis of financial decisions, primarily using Microsoft Excel. Topics include business planning, forecasting, sensitivity and scenario analyses, risk and return measures, portfolio analysis, binomial option pricing and Value-at-Risk (VAR) analysis. Emphasizes practical skills to produce computer models that are useful for a variety of decision-making purposes.

Attribute: BUAN.

QFGB 8914. Basic of Derivatives. (2 Credits)
Introduces deferred delivery (i.e. exchange-traded futures and OTC-traded forward) markets and option markets. The course covers the following: (1) briefly examines the institutional features of these markets; (2) discusses hedger, arbitrageur and speculator strategies; (3) provides and analytical foundation for the pricing of these contracts; (4) reviews some of the available empirical evidence concerning these markets; and (6) uses the data to perform small-scale suggestive tests of the theories and strategies.

QFGB 8915. Introduction to Stochastic Calculus. (2 Credits)
Focuses on the practical applications of stochastic differential equations subject to appropriate boundary conditions, solving valuation problems, and using measure-transformations as required in advanced financial engineering practice to value assets within a risk-neutral framework. Builds a theoretical foundation for continuous-time models that are essential for the pricing and hedging of financial derivatives.

QFGB 8923. Machine Learn & Econometrics. (2 Credits)
Covers estimation of parametric and non-parametric techniques commonly used in finance, applying high-frequency financial databases. Discusses properties of financial data, linear time series data analysis, basic theory of statistical inference with linear models, general linear models, conditional Heteroskedasticity models, nonlinear models and Bayesian inference and estimation.

Attribute: BUAN.

QFGB 8924. Equity Style Derivatives. (2 Credits)
Designed to complement and extend the topics discussed in Basics of Derivatives (QF 8914), this course includes all types of derivatives where a commodity, equity, or currency is the underlying asset. Hull's software and a Bloomberg/Reuters terminal are used for pricing options and gathering data. The data to perform small-scale suggestive tests of theories and strategies is used.
QFGB 8925. Simulation Applications. (2 Credits)
Introduces state-of-the-art computational techniques essential for implementing financial models, pricing derivatives, obtaining numerical solutions to estimation problems, and simulating stochastic systems in risk management. Provides conceptual framework for gaining experience on simulation design and implementation using MATLAB. This course builds a skill set that combines financial modeling, data analysis, and computation.
Attributes: ASDM, BUAN.

QFGB 8926. Finance Theory. (2 Credits)
Introduces financial theory with a particular emphasis on portfolio choice and the fundamentals of asset pricing. Focuses on both the partial equilibrium theory (CAPM), and the general equilibrium theory (Arrow-Debreu Pricing Theory) with brief introductions on the arbitrage-based theories. Introduces the basics of asymmetric information and how the problems it imposes can be mitigated via security design. It also emphasizes and understanding of the theories of Discrete-Time Asset Pricing; studies the application of the theory of stock options to real options and complex corporate liabilities; and explores the basic foundation of the GMM tests of asset-pricing theories.

QFGB 8927. Introduction to C++. (2 Credits)
This course will introduce quantitative finance students to programming in C++.

QFGB 8928. Auto Trading Systems - Intro. (3 Credits)
This course discusses key issues involved in the design of an Auto (Algorithmic) Trading Systems, and provides hands-on experience. The end product is a prototype Auto Trading System designed by students that successfully trades in the real market (stock, futures, option) using live data feeds from exchanges. Issues covered include: typical structures of trading systems; efficient processing of live information; minimizing trade slippages; handling large number of securities; asynchronous information processing; GUI interfaces; etc. Industry experts are invited to discuss new developments. Key programming techniques will be reviewed at the beginning, very briefly. The course is suitable for students in MSGF, MSQF, and other master level students with programming skills equivalent to one formal course (e.g. R, Matlab, VBA, etc). Students with less programming skill may take the course if approved by instructor.

QFGB 8930. Advanced Fund Strategy and Evaluation. (2 Credits)
This course is designed to help students gain a better understanding of the asset management industry in the U.S. The course covers some of the most important topics in the fund industry, including developments and implementations of fund trading strategies and performance evaluation models, fund trading costs, and the behavior patterns of fund investors and fund managers.

QFGB 8931. Fixed Income Securities. (2 Credits)
Introduces fixed-income securities, basic fixed-income concepts, the different sectors of the fixed-income market, and basic math and mathematics. Studies quantitative fixed-income analysis and its use in valuing bonds and quantifying risk-return characteristics. Involves extensive training in the mathematical formulation of bond valuation problems and in the use of the existing models and software to solve these problems.

QFGB 8932. Advanced Options Theory. (2 Credits)
Introduces modern financial econometric techniques wih a special focus on applications to finance. Both the theoretical framework for making statistical inference and exemplary applications using data in modern finance are emphasized. The course involves extensive use of commercial software packages as well as implementing new financial econometric techniques using high-level programming language, such as MATLAB.

QFGB 8934. Interest Rate Derivatives. (2 Credits)
Studies continuous time no-arbitrage models of yield curves and pricing of fixed-income securities and derivatives. In particular, treasury bonds as well as more complicated instruments, such as options on bonds, interest rate swaps, option on interest rate swaps, caps, floors, and Mortgage Backed Securities are priced and analyzed.

QFGB 8935. Risk Management. (2 Credits)
Builds strong understanding of the risks of individual products and methods of hedging and/or replication those products. Also examines firm-wide risk issues from a financial perspective which requires aggregation of multiple positions and consideration of interrelationships among asset price fluctuations. Regulatory and other non-market risk issues are considered and simulation techniques for modeling risk are practiced.
Attribute: ASDM.

QFGB 8942. Advanced Finance Theory. (2 Credits)
This course build upon Financial Theory I (QF 8922) and examines cross-sectional and time series properties of asset returns. Offers and indepth statistical review of several theoretical models of inter-temporal asset pricing. Microstructure effects on short-term asset returns as well as test of returns predictability are covered.

QFGB 8943. Large-Scale Data Modeling. (2 Credits)
Explores financial modeling topics using large data sets and various econometric techniques applied in a variety of financial problems. Topics include modeling the yield curve in the US and other countries, application of pattern recognition techniques in developing stock-rating systems, factor models in portfolio construction, and portfolio performance evaluation. Emphasis on project analysis using SAS to process large data sets and develop appropriate models for solving real problems in equity and fixed-income research.
Attribute: BUAN.

QFGB 8944. Credit Risk Mgmt. (2 to 3 Credits)
Introduces modern credit risk models with particular focus on credit derivative instruments. Focuses on derivative market methods, rather than accounting analyses of business risks. Exposes students to institutional practices and commonly used data. Students will be expected to thoroughly understand professional software output, along with the risks and rewards of credit product strategies.

QFGB 8946. C++ for Finance. (2 Credits)
This course uses C++ to solve Finance problems. Two types of students will take this course. One type is the student with a strong computer programming background (perhaps an engineering undergraduate), but who has not taken C++ or applied it to finance problems. The other type may have been a finance undergraduate student who has little computer programming experience before entering the MSQF program. The latter student must take the spring introduction to C++ course offered by the computer science department before taking this course in their second fall term.

QFGB 8947. Advanced Derivative Pricing. (2 Credits)
This course covers advanced option pricing.
QFGB 8948. Quantitative Methods for Portfolio Management. (2 Credits)
Introduces the scope of the quantitative concepts used in asset management, with focus on practical application, challenges and limitations in constructing optimal portfolios, evaluating performance and portfolio risk. Involves extensive discussions of case studies and group project.* Subject to NY Approval.

QFGB 8949. Advanced Financial Econometric. (2 Credits)
This course takes up Bayesian estimation of small-scale financial sector and macro-econometric models. Counter-factual simulations will also be used, as well as monte-carlo methods for evaluating confidence intervals. In addition to Bayesian estimation, the course will make use of extensive data sets to investigate topics such as contagion effects across countries in financial markets, and neural networks for predictive accuracy. * Subject to NY Approval.

QFGB 8950. Alternative Investments. (2 Credits)
The course is an introduction to the rapidly evolving universe of alternative investments. Delivered in modules, the course covers a broad array of alternative strategy classes (Quantitative/Systematic, Fundamental Long/Short, Global Macro, Private Equity) ranging across all major asset classes (Equities, Fixed Income, Currencies, Commodities, Derivatives).* Subject to NY Approval.

QFGB 8951. Internship and Project Report. (2 to 4 Credits)
A professional project report and presentation are the final outputs of this course. Students complete these projects under the supervision of a faculty member. Both individual and group-projects are possible.

QFGB 8952. Business Comm for Quants A. (1 Credit)
Covers the basics of professional speaking and writing. Develops oral and written presentation skills essential for successful careers. Coordinated with summer term internship to give students the opportunity to apply their new communication skills in a business setting.

QFGB 8953. Research Seminar 1. (1.5 Credits)
This fall course features a series of lecturers from the finance industry. They discuss research projects that their companies are working on.

QFGB 8954. Research Seminar 2. (1.5 to 3 Credits)
This spring course features a series of lecturers from the finance industry. They discuss research projects that their companies are working on.

QFGB 8955. Computational Finance. (2 Credits)
This course provides a hands-on in-depth introduction to the Python language as well as surveys tools used in data and computational science, focusing on their application to the field of quantitative finance. Attribute: BUAN.

QFGB 8957. Applied Capital Markets and Financial Regulations. (3 Credits)
This course will explore how the market structure has fundamentally changed after the 2008 liquidity and credit crisis, and how this crisis has impacted on liquidity, balance sheets, risk taking, and returns across the entire financial services industry. The new reality is that regulation has changed the landscape of Wall Street and the dynamic of how the sell-side and buy-side will interact in the foreseeable future.

QFGB 8958. Lectures in Applied Port Mgt. (3 Credits)
This advanced Portfolio Management course quickly reviews Modern Portfolio Theory (MPT) conceptual underpinnings and builds on MPT 2.0. It delves into contemporary liability driven asset allocation, MPT 2.0 and portfolio management industry practices, issues and concerns. Lectures, problem solving, and self-study along with extensive hands-on tools using Microsoft Excel based models will be used to provide a practitioner’s perspective. We will review and demo contemporary asset allocation optimization and forecasting techniques, new asset class pricing and valuation, performance and risk attribution, tail risk measurement and management tools etc. using real time vendor based (third party) solutions. As prerequisites - the student should have class exposure to investment and portfolio analysis, Excel, stats, and basic regressions.

QFGB 8959. Machine Learning for Finance. (2 Credits)
This course explores the world of Machine Learning and financial applications. We will investigate how it uses large amounts of structured or unstructured data to discover patterns and hidden topics, transforming raw data into knowledge for decision making. We will investigate real and practical examples from finance, tracing parallels between data science, statistics, and data analytics. Attribute: BUAN.

QFGB 8960. Advanced C++ for Finance. (2 Credits)
Advanced C++ for finance.

QFGB 8961. Business Comm for Quants B. (1 Credit)
Covers the basics of professional speaking and writing. Develops oral and written presentation skills essential for successful careers.

QFGB 8962. Dynamics of Banking & Fin Mkts. (3 Credits)
This course is designed to provide students a well-rounded and hands-on perspective on the practical functioning and decisions in financial markets and banking.

QFGB 8963. Stress Tests and Cap Adequacy. (3 Credits)
The financial crisis of 2007-08 taught us all a lesson: that preparedness is everything. How resilient and prepared will we be, and how fast will we be able to recover? This is the key focus of this course: how to plan for moments of distress so that firms such as yours have capital of a sufficient quality to survive potential storms. We will demonstrate how to create a robust capital plan and test it for moments of hypothetical stress. We will investigate exactly how a bank holding company and an insurance company should conduct their capital plan, highlighting the significant differences between the two industries. By the end of the course, you will be able to create a capital plan for your business on your own.

QFGB 8964. Arpm Bootcamp-Intensive Quant. (3 Credits)
Consolidates portfolio and risk manager’s expertise into a structured and rigorous quantitative framework. Empowers avid learners with background in hard sciences to gain the deep technical knowledge necessary to operate across the complex world of quantitative trading, asset management, and risk management. Topics include data science and machine learning: classical / Bayesian multivariate statistics, and econometrics; financial analytics; market, credit & liquidity risk management; estimation error and model risk; and much more. ARPM Lab online (theory, case studies, Python & MATLAB code, slides, exercises). Obtain ARPM Certificate of Attendance & 40 GARP CPD.
QFGB 8965. Trading - Market Making and Algorithms. (3 Credits)
This course will introduce students to basic market microstructure, algorithmic trading, and quantitative investment strategies. Mathematical and statistical techniques along with their computational implementation in R or Python will be used throughout the course.
Prerequisites: QFGB 8911 and QFGB 8923 and QFGB 8926.

QFGB 8966. Behavioral Finance. (2 Credits)
Over the past several decades, the field of finance has developed a successful paradigm based on the notions that investors and managers are generally rational and that the prices of securities are generally efficient. In recent years, however, anecdotal evidence as well as theoretical and empirical research has shown this paradigm to be insufficient to describe various features of actual financial markets. In this course we will use psychology and more realistic settings to guide and develop alternative theories of financial markets. We will examine how the insights of behavioral finance complement the traditional paradigm and shed light on investors' trading patterns, the behavior of asset prices, corporate finance, and various financial market practices through lectures, case studies, and our own discussions.

QFGB 8967. Bank Capital and CCAR. (2 Credits)
This course will provide an overview of the range of risks that banking institutions undertake to perform their role as credit intermediaries. It will delve into the choices that bank managers make to measure the risks they undertake, and will explore the approaches that a bank can take to translate risk measurement into stress tests of a bank's capital position. Students will have an opportunity to apply methodologies discussed while developing a model to stress test a bank's exposure to market, credit, or operational risk for the purpose of testing the adequacy of a bank's capital position.

QFGB 8968. Blockchain Technology and Application Development. (3 Credits)
The main objective of this course is to familiarize you with the ecosystem, technologies, and development skills surrounding Blockchain. The course starts with foundational concepts such as distributed state machine, hash tree, P2P network, GPU processing, cryptocurrency, and cryptography. Using both simulated sandbox and locally installed environments, the course then guides you through the development, front-end integration, and deployment of Blockchain-based smart contracts. Other topics covered include rapid prototyping, design patterns, and agile process to maximize the success likelihood for Blockchain projects. The lab portion of this course involves weekly submissions of programming exercises, assignments, and project deliverables. Prior knowledge required: Proficiency in computer programming; basic knowledge in analysis and linear algebra.
Attributes: BUAN, ISEL.

QFGB 8969. Systematic Investment Strategies. (2 Credits)
This lecture series will cover a variety of topics on quantitative investment management. We start with an overview of the evolution of the current state of affairs, both with respect to individual strategies as well as topics related to their management within the context of a portfolio. We will first cover the basic set of thematic strategies (e.g., value/reversion, momentum/trend, carry, volatility, etc.) across different asset classes with some representative specific strategies covered in detail. We will then consider extensions and refinements. We will also cover various portfolio construction approaches for baskets of systematic strategies and their consequences. The lecture series will feature readings from "Wall Street" practitioner research series at the major asset managers and investment banks, with guest lecturers from industry on specific topics. Students will be expected to participate via data collection, strategy construction, and back-testing analysis, etc.

QFGB 8970. Programming with Python. (3 Credits)
Do you want to be able to solve business problems through programming and coding? This course introduces key programming concepts, techniques, and tools. Students will learn programming and coding using the widely used Python programming language. This section of Programming with Python will include additional finance applications.

QFGB 8971. Artificial Intelligence. (3 Credits)
The goal of this course is to acquaint you with the objectives and methods of researchers and practitioners in artificial intelligence. We will explore numerous aspects of computational models of intelligence including search and problem solving, planning, machine learning, logic and reasoning, machine perception and robotics, natural-language processing, speech recognition, vision, and cognitive science. We'll also discuss genetic algorithms, fuzzy logic and deep machine learning including neural networks. The ethics of artificial intelligence is also addressed. The course is organized as a survey, with hands-on assignments in open source artificial intelligence tools.

QFGB 8972. Deep Machine Learning. (3 Credits)
The goal of this course is to acquaint you with the objectives and methods of deep machine learning (DML). We will explore and learn the basic types of deep neural networks including convolutional, recurrent, and generative adversarial, and the type of data each is designed for. Key additional topics include learning techniques to improve training, preventing overfitting, and finding best practices for minimizing error. Students will study the major technology trends driving DML. A key takeaway is a working knowledge of the vocabulary of concepts and algorithms in DML. The challenges and issues surrounding the use of DML including design issues, ethics, governance, ownership of data, privacy, and security standards. Quality control and validation are also discussed. Emphasis is on business applications. The course is organized as a seminar-style course, with hands-on assignments in DML tools. Familiarity with basic calculus and linear algebra expected.

QFGB 8973. Cybersecurity Analytics for Business. (3 Credits)
Cyber attacks pose an increasing threat to the nation's critical infrastructure, including computer networks, cyber-human systems, business applications, sensor networks, and mobile devices. This course provides an introduction to data analytics for multiple aspects of information security and focuses on using data analytics methods for discovering anomalies pertaining to cyber threats through hands-on exercises in programming, visualization, statistical analysis, machine learning, and big data analytics tools.

QFGB 8999. Independent Study. (1.5 to 3 Credits)
Independent study.
Real Estate (REAL)

REAL 1002. Fundamentals of Real Estate Law. (3 Credits)
This course introduces the legal concepts, laws, regulations, and risks involved in the acquisition, development, financing, leasing, and sale of real property. It discusses forms of ownership and co-ownership, the real estate transaction process from contract to closing, private property rights, and governmental restrictions on private property. The effect of mortgages, liens, and other encumbrances on the quality of title are also weighed. Students are introduced to estates and interests, deeds, easements, covenants, transferable development rights, eminent domain, zoning ordinances, environmental laws, and the legal aspects of a variety of commonly used real estate contracts including listing agreements, letters of intent, options, purchase and sale agreements, mortgages, insurance, construction contracts, and leases. Negotiation strategies, ethical issues, and fiduciary duties are addressed throughout the course.  
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140.

REAL 1004. Principles of Real Estate Economics. (3 Credits)
This course discusses the economic reasons for the growth and decline of real estate markets, along with the economic basis for location decisions by residential and commercial owners and tenants. The course includes a comprehensive overview of real estate market analysis, from the macroeconomic perspective to sector-specific drivers and considerations. Building upon a discussion of the basic principles of urban economics, the course explores the correlations of real estate valuations to regional and national economies, as well as the impact on specific property types resulting from macroeconomic business and growth cycles, key policy decisions, and changing monetary conditions. The course also examines the economic structure of major metropolitan areas, the influence of local governments on urban economic growth, the impact of urban economic growth on supply and demand for specific property types, and the factors that cause certain regions to thrive while others decline. The course identifies key indicators for tracking economic and real estate performance, as well as useful data sources and techniques for analyzing and forecasting real estate demand and supply for specific property types in specific markets. Class discussions will include current economic and real estate events and their potential impacts on real estate markets.  
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140.

REAL 1006. Real Estate Accounting Essentials. (3 Credits)
This class introduces general financial accounting principles, concepts, and rules, as established by U.S. Generally Accepted Accounting Principles (GAAP) and the International Financial Reporting Standards (IFRS). The fundamentals of financial statement development and analysis, including balance sheets, income statements, cash flow statements, and statements of owners’ equity are covered, in addition to cash versus accrual accounting and accrual accounting rules that are specific to real-estate entities, including property owners, developers, and managers. The tax implications of business entity selection are introduced, along with tax accounting for the development, operation, and sale of cash flow producing properties including like-kind tax-free exchanges. Key topics to be covered are lease abstracts, rent rolls, security deposits, vacancy and collection loss, miscellaneous income, effective gross income (EGI) annual reports, fixed and variable operating expense (OE), net operating income (NOI), variance analysis, financial audits, operating budgets, capital budgets, replacement reserves, depreciation, property taxes, and before-tax cash flow (BTCF) and after-tax cash flow (ATCF).  
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140.

REAL 1008. Principles of Real Estate Finance. (3 Credits)
This course offers students a comprehensive orientation to how residential and commercial properties are financed and analyzed. It covers the investment property income statement, income and expense analysis, time value of money concepts, discounted cash flow analysis, capitalization theory, forms of debt and equity finance, mortgage concepts and terminology, mortgage instruments, equity concepts, and investment analysis. The course also introduces students to the broader real estate capital markets, securitization, the sources and uses of real estate funds, components of a capital structure, and the role of government in real estate finance.  
Prerequisites: ECON 1100 and ECON 1200 and ECON 2142.

REAL 1010. Principles of Real Estate Valuation and Feasibility. (4 Credits)
This course introduces the theory, principles, and techniques for conducting valuation and feasibility studies of real property. The course emphasizes the importance of market analysis in the valuation and development process. The course covers real property concepts and characteristics, influences on real estate values, types of value, economic principles, market area analysis, and highest and best use. Students learn the three approaches to value—the income capitalization, cost, and sales comparison approaches—to reach an opinion of value. After examining income capitalization methods and formulas, students learn how rates and multipliers are derived. The cost approach is explored, showing how the cost of constructing a reproduction of, or replacement for, an existing structure is estimated. Land and site valuation are also covered. Finally, the sales comparison approach is covered, including researching the market, verifying information, selecting units of comparison, conducting a comparative analysis, and adjusting findings. Students learn basic concepts and terminology of market analysis and marketability studies and how marketability studies provide vital information for the highest and best use decision.  
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 1020. Real Estate Development Principles and Practices. (4 Credits)
This course presents a step-by-step examination of the real estate development process from idea conception to project completion. Students are introduced to the phases, procedures, and complexities of developing and redeveloping various property types, including multifamily, office, and mixed-use real estate. Students study the principal stages of development, including preliminary planning and market analysis, feasibility studies, site selection and acquisition, deal structure, financing, permitting, entitlements, design, construction, marketing, and asset management. This course also examines trends including mixed-use projects, public and private partnerships, and transit-oriented development.  
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

Updated: 07-27-2020
REAL 2002. Real Estate Financial Modeling. (4 Credits)
This course provides students with a fundamental understanding of the essential Time Value of Money (TVM) concepts and calculations employed in common real estate financial models and investment analyses. Beginning with an introduction to the property income statement, the pro forma and essential Excel software keystrokes, the course progresses to financial modeling best practices and more sophisticated Excel software techniques. Students will learn to develop a practical financial model from a set of project assumptions and merge appropriate TVM principles with Excel functions, tools, formulas, and shortcuts to arrive at investment decisions. Students will prepare basic income and expense models and amortization schedules while progressing forward to direct capitalization and discounted cash flow (DCF) analyses.
Attribute: REE.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 2004. Real Estate Management. (3 Credits)
This course introduces students to the core competencies and specialized skills needed to professionally plan and manage residential multifamily buildings, commercial office buildings, and corporate workspace for real estate owners, businesses, and third-party management companies. Through the study of established management practices with real-world applications, this course introduces students to the world of property management, corporate real estate, and facility management. Students study the Management Plan, the Management Agreement, management organizational structures, ownership obligations, management responsibilities, management fees, operating procedures, repositioning for value creation, staffing, training, supervision, risk management and insurance, leadership, communication, and ethics.
Attribute: REE.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 2006. Global Real Estate Markets. (3 Credits)
This course introduces students to real estate markets and investment activity beyond the U.S. border. It develops a due diligence framework to undertake comparative analyses of international real estate transactions, investments, and development projects across borders and within specific markets. The course focuses on the macro-economy, financial and real estate capital markets, currency concerns, taxation, legal issues, land use policy, political activity, regulations and statutory requirements, and cross-cultural negotiations of various key markets. Current global topics will be used to anchor learning and be the basis for class discussions in this comparative analysis.
Attribute: REE.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 2008. Building Design and Construction. (4 Credits)
This course provides an overview of the design and construction process for residential and commercial real estate assets. Students gain an understanding of the construction project life cycle; the roles of the owner, architect, engineer, contractor, and project management representative; and the most commonly used construction methods and materials. Topics of study include project delivery methods, the phases of design, project teams and organizations, types of contracts, cost estimating, construction planning and scheduling, construction budgets, field supervision, community and public agency relations, risk management, insurance, safety, and sustainable building practices.
Attribute: REE.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 2010. Special Topics in Real Estate. (4 Credits)
These courses, which will be offered periodically, are designed to enhance the student's educational experience by supplementing the standard array of courses with topics that are very highly specialized. Areas of study will include real estate finance, investment, and development. In most cases, they will be of interest to those students who desire a more intense exposure to a particular aspect of real estate.
Attribute: REE.
Prerequisites: ECON 1100 and ECON 1200 and ECON 2140 and REAL 1002 and REAL 1004 and REAL 1006 and REAL 1008.

REAL 5002. Real Estate Finance. (3 Credits)
This course covers the principles of commercial real estate finance including valuation methodologies, income and expense analysis, derivation of capitalization rates, concepts of commercial leasing, forms of debt and equity, valuation of land and key principles of construction loan finance.

REAL 5004. Real Estate Accounting and Tax. (3 Credits)
This course covers accounting concepts, rules, regulations, and reporting requirements for income-producing properties; tax tools for financial statements and real estate investments; accounting principles and income tax analysis for decision-making; and accounting and tax implications of real estate ownership structures and real estate transactions.

REAL 5006. Real Estate Legal Concepts and Contracts. (3 Credits)
This course provides an overview of the typical, major legal agreements that are involved with every commercial real estate transaction. The course is broken into four segments: legal overview, purchase/sale agreements, leases, and financing agreements.

REAL 5008. Real Estate Economics and Market Analysis. (3 Credits)
This course discusses economic base analysis, macroeconomic factors influencing metropolitan areas and links connecting economic fundamentals to property market performance. Delineation of market and submarket areas will be stressed, along with the differences arising from specific property types including office, retail, industrial, housing, and hotels. The dynamics of cities will be studied, especially as they relate to property market performance.

REAL 5010. Real Estate Structures and Capital Markets. (3 Credits)
The course covers the structure and operation of public and private, debt and equity real estate capital markets and the means by which this capital is channeled into commercial real estate to finance local transactions. Key topics include capital sources, participants, risk and return, tranches, capital asset pricing model (CAPM), CMBS, REOCs and REITs.
REAL 5012. Real Estate Valuation and Investment Analysis. (3 Credits)
Students in this course evaluate a range of investment opportunities in commercial real estate from the perspective of the investor (equity) and the lender (debt). Students analyze investment assumptions and model cash flows using Excel. Valuation techniques utilized include income capitalization and discounted cash flow analysis. Students examine pricing, returns, investment horizon, hold vs. sell strategies, financial leverage, sizing debt based on lender parameters and the impacts of leverage on returns.
Prerequisites: REAL 6022 and REAL 5002 and REAL 5004 and REAL 5008.

REAL 5014. Negotiation in Real Estate. (1.5 Credits)
This course provides an introduction to negotiation along with a strong foundation in a number of key concepts, including the three major roles of the conflict specialist, theories of communication and conflict, approaches to negotiation and their limitations, private versus court-centered approaches to resolving conflict and psychological biases and barriers in addressing conflict. Students explore new roles for conflict specialists with an eye towards preparing themselves to engage in various negotiation scenarios that arise in the real estate industry.

REAL 5016. Ethical Issues in Real Estate. (1.5 Credits)
Students in this course study how ethics are considered from various points of view: historically, relationally and transactionally. In a series of different situations commonly occurring in the real estate industry, students consider the ethical issues present and then evaluate the adequacy of the real world responses to those issues.

REAL 5050. Construction Contracts, Claims, and Dispute Resolution. (1.5 Credits)
This course examines the essential elements of commonly used contracts, including the rights, duties, and obligations of the owner and contractor. It offers the legal knowledge to review, understand, and evaluate the terms and conditions of construction contracts to minimize the risk of project disruptions, claims, disputes, and litigation. This course also provides an overview of project delivery methods, the bidding process, contract formation, contract forms, contract conditions, general conditions, subcontracts, privity of contracts, riders, defaults and terminations, changed conditions, changes and extra work, payments, lien law, surety bonds, damages for delay, claims, and methods of dispute resolution. Discussions will include the riskier provisions, including the incorporation by reference clause, the contingent payment clause, the no damage for delay clause, cardinal changes, and terminations for cause and convenience.

REAL 5052. Construction Financial Management. (1.5 Credits)
The general objectives of this course are for students to gain a comprehensive understanding of the key factors of effective construction financial and cost control. Students will develop cost control and tracking methods to monitor and control project budgets for successful project outcomes. The course covers accounting systems and financial analysis; owner and subcontractor credit risk underwriting; project funding; project cash flow and financing metrics; critical path analysis as it pertains to cost; general conditions, insurance, and risk management; sales taxes; progress payment disbursement; forecasting and trends; and the use of associated reports. Students will gain practical knowledge of concepts of construction financial and cost control and apply this knowledge toward the development of a response to an unplanned event with the goal of minimizing its impact on the project.

REAL 5054. Construction Cost Estimating and Bidding Strategies. (1.5 Credits)
This course will expose students to the theory, processes, and practices to prepare construction cost estimates and final project bids. Students will begin with an understanding of key terminology and progress into core topics including pre-construction and detailed estimates; planning for the estimate, design, and constructability review; general conditions; predesign; conceptual and preliminary budgets; cost of labor; pricing of material; time/cost analysis design review; unit prices; lump-sum bids; direct and indirect costs; mark-up; overhead; profit; bonds; insurance; and internal and external management considerations. This course will proceed with discussions on the bidding process, the bid package, subcontractor bid comparisons, qualification, bid solicitation, bid leveling and notification, bid analysis, and final bid price. Case studies, problems, and exercises are used extensively.

REAL 5056. Construction Scheduling and Impact Analysis. (1.5 Credits)
This course will expose students to a variety of network-based scheduling principles and tools including advanced Critical Path Method (CPM) construction scheduling techniques and the Precedence Diagramming Method (PDM). The course will cover project resource allocation, resource leveling, schedule development, schedule updating, schedule impacts of date constraints, project time and cost trade-offs, activity duration estimating, work breakdown structures, and an overview of construction contract scheduling specifications. An introduction to other scheduling methodologies and the use of schedules in construction claims will be addressed.

REAL 5058. Pre-Construction Project Planning and Development. (3 Credits)
Pre-construction project planning and development efforts play a key role in the overall success of a project, providing an opportunity for discovery, risk assessment, and strategic planning. This early planning can have a significant impact on project outcomes and offer substantial time and cost savings. This course examines the essential planning and analyses performed prior to the construction phase of a project to determine project scope, schedule, and cost estimate. It offers the knowledge to define project objectives, determine feasibility, manage risks, and analyze schedule and cost impacts to ensure optimal project performance and customer satisfaction.

REAL 5060. Construction Project Monitoring, Controls and Execution. (3 Credits)
Pre-construction project planning and development efforts play a key role in the overall success of a project as they provide the opportunity for discovery, risk assessment, and strategic planning. This early planning can have a significant impact on project outcomes and offer substantial time and cost savings. This course examines the essential planning and analyses performed prior to the construction phase of a project to determine the project’s scope, schedule, and cost estimate. It offers the knowledge to define project objectives, determine feasibility, manage risks, and analyze schedule and cost impacts to ensure optimal project performance and customer satisfaction.

REAL 5102. Real Estate Risk and Portfolio Management. (3 Credits)
This course discusses the theory and principles of investments and portfolio management. Students acquire a working knowledge of the risks associated with individual real estate investments, such as asset-specific underwriting, credit evaluation, and tenant credit risk and then explore advanced topics including portfolio selection, calculation of efficient sets, and portfolio performance evaluation for the holding entity.
Prerequisites: REAL 5002 and REAL 5004 and REAL 5006 and REAL 5008 and REAL 5010.
REAL 5104. The Real Estate Development Process. (3 Credits)
This course provides a practical analysis of the phases of the real estate development process including conceptualization, site acquisition, planning and design, construction, financing, leasing and marketing. Leadership, management and control of the development team are featured issues.
Attribute: CONM.
Prerequisites: REAL 5002 and REAL 5006.

REAL 5106. Real Estate Asset Management. (3 Credits)
Students learn how to develop an investment strategy and an actionable asset management plan based on that strategy for increasing the value of real estate assets under management on behalf of ownership. Students examine acquisitions, leasing, operations, budgets, capital expenditures, repositioning, refinancing, dispositions and distressed and foreclosure workouts using financial modeling, underwriting, risk analysis, and performance benchmarking concepts and tools. The decision-making process will be examined from the property, asset and portfolio management perspectives.
Prerequisites: REAL 5002 and REAL 5004 and REAL 5006 and REAL 5008.

REAL 5108. Real Estate Credit Analysis and Underwriting. (3 Credits)
Students learn how to underwrite and structure commercial real estate (CRE) loans for the acquisition, development and construction of income-producing properties. A combination of market, risk and financial analysis tools will be used to assess commercial investment properties and borrower credit worthiness, and to make prudent, defensible lending decisions.
Prerequisite: REAL 5002.

REAL 6001. Real Estate Financial Modeling. (1.5 Credits)
Students gain a comprehensive understanding of real estate financial modeling principles and practices to prepare models for income and expense presentation and analysis, direct capitalization, and discounted cash flow (DCF) analysis. Students develop the vocabulary and preliminary critical thinking skills needed to develop real estate financial models. The course will emphasize effective presentation of data and productivity.
Attribute: REFI.

REAL 6002. Real Estate Development Feasibility Study. (3 Credits)
This course examines the components of a real estate development feasibility study report. Students refine leadership, team and presentation skills to deliver a comprehensive and persuasive report on a currently available real estate project.

REAL 6003. Private Equity. (1.5 Credits)
In this course, students develop an understanding of the taxonomy of different real estate private equity strategies, including core, core plus, value-add, and opportunistic. Students learn how real estate funds are set up and managed, how to align the general partners’ fees and incentives with the limited partners’ interests, and exit strategies such as initial public offerings (IPOs), recapitalization, and secondary sales. The course examines the role of private equity real estate investments within a portfolio comprising various asset classes, with a focus on performance measurement, diversification gains, and risk measurement.
Attribute: REFI.
Prerequisite: REAL 5002.

REAL 6004. Adaptive Reuse and Sustainability. (1.5 Credits)
Utilizing sustainable principles and building practices, this comprehensive course challenges students to think critically about reusing existing building stock and maintaining historic structures. It encourages adaptive reuse by owners and developers entering the design review process. The goal is to help developers think critically about the opportunities presented by adaptive reuse.
Attributes: CONM, REDV.

REAL 6005. Commercial Mortgage-Backed Securities. (1.5 Credits)
In this course, students learn the history, structure, and key building blocks (commercial real estate loans) of commercial mortgage-backed securities (CMBS), as well as the transaction, ratings, and offering process. The participants, legal documents, and federal regulations that govern CMBS are also examined. Topics covered include the perspectives of originators, structurers, loan sellers, attorneys, ratings agencies, investors, servicers, and special servicers. The course will focus primarily on conduit deals, but will also introduce single-asset and single-borrower transactions and a securitized financing tool used primarily by commercial mortgage REITs: CLOs.
Attribute: REFI.
Prerequisites: REAL 5002 and REAL 5010.

REAL 6006. Development Project Leadership, Management and Communications. (1.5 Credits)
Gain essential leadership, management and reporting skills and strategies to effectively control the design and construction process, ensuring that every decision is made in the owner's best interest. Become acquainted with different types of reporting, and learn best practices and tools needed to improve performance, standards and timely project delivery.
Attributes: CONM, REDV.

REAL 6007. Real Estate Investment Trusts. (1.5 Credits)
Students gain an understanding of the history, operations, and mechanics of REITs, and how REITs are an important link between the real estate capital markets and the property markets. Topics covered include real estate space and asset markets, measurement and determinants of real estate prices, market trends, valuation methods, and returns and benchmarks.
Attribute: REFI.
Prerequisite: REAL 5010 (may be taken concurrently).

REAL 6008. Affordable Housing. (1.5 Credits)
In this course, students acquire an understanding of the history and current state of affordable housing in the US in general and NYC in particular. Students learn from a combination of formal lectures and interviews with past and current industry participants and leaders. The focus of the course is examine the multiple factors that must be addressed in the planning and execution of affordable housing projects.
Attribute: REDV.

REAL 6010. Development Project Finance. (1.5 Credits)
This course presents the principles of development project finance. Students acquire best practices for submitting a loan request to a lender for interim construction loan project financing, long-term permanent 'take-out' financing, and mini-perm financing. Students will become familiar with the presentation of project pro forma, construction loan types, the requirements of a development team, the lender's credit criteria, the loan proposal, hard and soft cost budgets, valuation, project feasibility and documentation. This course includes discussion of privately and publicly funded infrastructure investment considerations.
Attributes: CONM, REDV.
REAL 6012. Global Real Estate Investment. (1.5 Credits)
This course provides a comparative and critical approach to undertaking international real estate transactions, investments and development projects by providing a framework for analyzing real estate investments across borders within specific markets.

REAL 6014. Land Use Law. (1.5 Credits)
Real estate development is profoundly impacted by land use law and environmental regulations. A successful developer must navigate through land use controls, federal, state and city environmental regulations, landmark and historic preservation restrictions and community concerns, in addition to building and fire codes and other safety regulations.
Attribute: REDV.

REAL 6016. Real Estate Entrepreneurship Business Planning. (1.5 Credits)
This course integrates the concepts, tools and practices of entrepreneurship. Students learn to be superior opportunity assessors and shapers, to understand the integration of people and process in entrepreneurship, to write, articulate and present a new venture execution plan, to understand the alternatives and trade-offs in financing, starting and operating a venture, and to gain a better understanding of their personal entrepreneurial capabilities.

REAL 6018. Real Estate Research and Technology. (1.5 Credits)
This course examines the growing and ever-changing technology ecosystem within the real estate industry (CRE tech or Proptech) and the various methods to perform essential market research using these platforms. Students gain an understanding of key areas of the real estate technology space, prominent business models, major contributors, growth initiatives and emerging markets.
Attribute: REFI.

REAL 6020. Internship. (1.5 Credits)
Internship.
Attribute: REFI.

REAL 6022. Special Topics in Real Estate. (1.5 Credits)
These courses, which will be offered periodically, are designed to enhance the student's educational experience by supplementing the standard array of courses with topics that are very highly specialized. Areas of study will include real estate finance, investment and development. In most cases, they will be of interest to those students who desire a more intense exposure to a particular field of study.
Attributes: CONM, REDV, REFI.

REAL 6050. Construction Technology. (1.5 Credits)
This course provides an overview of the latest methods, materials, and systems used in the construction of the core and shell and interior components of high-rise buildings. Topics include working drawings; specifications; site work; foundations; steel and reinforced concrete framing; glass, masonry, and exterior wall systems; drywall construction systems; light gauge metal framing; brick, stone, and miscellaneous masonry; fireproofing; doors, windows, glass, and glazing; finish ceilings; finish flooring; and acoustic materials.
Attribute: CONM.

REAL 6100. Applied Project. (3 Credits)
The Applied Project capstone course provides for a comprehensive application of core, flex core and elective course principles, concepts, and professional practice to real world real estate investment projects.
Prerequisites: REAL 6022 and REAL 5002 and REAL 5004 and REAL 5006 and REAL 5008 and REAL 5010 and REAL 5012 and REAL 5104 and REAL 6002.

REAL 6200. Research Project (Thesis). (3 Credits)
Students work with a qualified supervisor to conduct research, collect data, analyze, test their hypotheses and write up their findings. The finished thesis must demonstrate the student's ability to conduct comprehensive research and articulate original ideas and thought processes that make a practical contribution to the existing body of knowledge in the field of real estate.

Religion (GSRRE) (RLGR)

RLGR 0920. Writing for Grad Research I. (1 Credit)
Course will cover how to write at the graduate level in Theology, Spirituality, Pastoral Ministry, and Counseling and Religious Education. Course topics will include composition, structure, style, coherence and analysis.

RLGR 0921. Writing for Grad Research II. (1 Credit)
Continuation of RLGR 0920. Course will cover how to write at the graduate level in Theology, Spirituality, Pastoral Ministry, and Counseling and Religious Education. Course topics will include composition, structure, style, coherence and analysis.

RLGR 6010. Old Testament. (3 Credits)
An in-depth examination of the first five books of the Bible. Historical origins of these texts in ancient Israel and the continuing significance of their central theological themes of promise, law, creation, election, redemption, and liberation. Introduction to the exegetical methods of modern biblical study.

RLGR 6011. New Testament. (3 Credits)
This course will engage questions about the development of the Christian canon while reading parts of the New Testament in the context of first century Judaism.

RLGR 6018. John's Gospel in Greek I. (3 Credits)
A close reading of the Greek text with detailed exegesis of selected passages.

RLGR 6019. John's Gospel in Greek II. (3 Credits)
A close reading of the Greek text with detailed exegesis of selected passages.

RLGR 6024. The Prophets. (3 Credits)
A study of Old Testament prophets and prophetic books from historical, literary, and theological perspective with particular focus on the prophets’ roles and their enduring message.

RLGR 6030. Christology. (3 Credits)
This is an introductory Christology course principally from a Roman Catholic perspective. Biblical, historical, and contemporary Christology will be examined.

RLGR 6031. Theology of the Human Person. (3 Credits)
This course traces the variegate history of Christian understandings of the human person. It examines past and present theologies of body, soul, sin, and grace, as well as contemporary theological literature on social, environmental, and cosmic contexts as constitutive of human experience. This includes a consideration of different forms of “othering” and their intersection.

Updated: 07-27-2020
RLGR 6032. Church and Society. (3 Credits)
This course explores how the global Christian church emerged from Christ’s kerygma and developed in different historical and cultural contexts. The course covers the emergence of historical divisions in the Christian Church and of the ecumenical movement’s response. While the course focuses on Catholic ecclesiology, it also covers Orthodox and Protestant perspectives on key themes such as authority, governance, and practice. Throughout the course, there is an emphasis on the critiques and perspectives offered by liberation theology and feminism. It asks the students to imagine how the Christian Church can adapt to its contemporary context in the student’s ministerial or professional setting.

RLGR 6033. Sacraments: Theology and Rites. (3 Credits)
An introduction to the history and theology of the sacraments, and the contemporary rites that are used to celebrate them in the Roman Catholic Church.

RLGR 6555. Pastoral Research. (1 Credit)
A course reviewing the latest methods and approaches in pastoral research.

RLGR 6872. History of the Jesuits. (3 Credits)
This course offers an intensive look at the founding and progress of the society of Jesus. Starting with the founder, St. Ignatius of Loyola the course will progress through key documents and missionary activity up to the 21st century.

RLGR 7031. Theology of the Human Person. (3 Credits)
This doctoral-level course traces the variegated history of Christian understandings of the human person. It examines past and present theologies of body, soul, sin, and grace, as well as contemporary theological literature on social, environmental, and cosmic contexts as constitutive of human experience. This includes a consideration of different forms of “othering” and their intersection. The 7000-level course is for Ph.D. and D.Min. students only, and it requires work beyond what is required in the 6000-level course.

RLGR 7032. Church and Society. (3 Credits)
Doctoral-only section (DMIN and PHD). This course reviews how the community established by Jesus Christ, also known as the Church, has been theologically understood over time. It explores how the global Christian Church emerged from Christ’s kerygma and developed in different historical and cultural contexts. The course covers the emergence of divisions in the Christian Church and of the ecumenical movement’s response. While the course focuses on Catholic ecclesiology, it also covers Orthodox and Protestant perspectives on key themes such as authority, governance, and practice. Throughout the course, there is an emphasis on the critiques and perspectives offered by liberation theology and feminism. It asks the students to imagine how the Christian Church could adapt to its contemporary context in the student’s ministerial or professional setting. The 7000-level course is for Ph.D. and D.Min. students only, and it requires work beyond what is required in the 6000-level course.

RLGR 7555. Pastoral Research. (1 Credit)
A course reviewing the latest methods and approaches in pastoral research.

RLGR 8872. History of the Jesuits. (3 Credits)
This course offers an intensive look at the founding and progress of the society of Jesus. Starting with the founder, St. Ignatius of Loyola the course will progress through key documents and missionary activity up to the 21st century.

RLGR 8999. Independent Study. (3 Credits)
A tutorial in the area of Religion.
REGR 6150. Foundations for Intercultural Ministry and Religious Education. (3 Credits)
Ministerial contexts are spaces of intercultural encounters that can serve to positively affect the practice of ministry and religious education. This special topics course will explore key pillars for understanding these encounters as revelatory moments that can be constructive for the “kin-dom” of God. Among the literature explored in this course will be theories of intercultural teaching and learning, anti-racist identity development, and cultural studies critiques, all within the context of students’ self-exploration of their own cultural identities. From this exploration, students will envision how their own ministerial praxis can be shaped to form liberating spaces for intercultural ministry and solidarity.

REGR 6170. Spirituality and Arts. (3 Credits)

REGR 6180. Religious and Educational Development of Children and Youth. (3 Credits)
This course inquires into the spiritual, moral, and educational development of children and the implications of this development for religious education. Emphasis is placed on developing a theology of childhood, and the influence of childhood faith development on adult spirituality.

REGR 6181. Family Ministry: Sp Questions. (3 Credits)
Investigation and analyses of specific problems related to family ministry. Topics will include single-parent families, families of ‘special needs’ children, ‘hurting’ families, and ministry for leadership couples and families.

REGR 6202. Youth & Young Adult Ministry. (3 Credits)
Explores the personal and communal development of youth and young adults (11-30) through church teaching and such disciplines as philosophy, psychology, and sociology, education and religious education. A comprehensive framework for nurturing the faith and spirituality of youth and young adults is presented as an organizing framework for the course.

REGR 6204. Special Questions: Youth and Young Adult Ministry. (3 Credits)
This course offers a study of identity formation, sexual development, social consciousness, the influence of popular media culture, attitudes toward authority, and Generation X and millennial spirituality. Participants will explore ways of reenvisioning religious education and pastoral ministry to respond more adequately to contemporary youth culture.

REGR 6220. Ministry & Leadership. (3 Credits)
An investigation of the basic structures of organization and principles of administration and supervision as they apply to parish and other religious education settings. Emphasis is placed on the person and the role of leadership within evolving structures of parish and various learning communities.

REGR 6311. Digital Catechesis. (3 Credits)
The Digital Catechesis course provides a new social landscape for imagining faith formation and religious education today. This new landscape integrates Pope Francis’ clarion call for the New Evangelization and the worthy potentials of the New Media, to come up with a leadership agenda that offers ways to explore and call into question traditional assumptions and understanding of both the catechetical and the technological. The course’s goal is to lead pastoral leaders to viewing digital catechesis as a vital expression of the truly catechetical in contemporary religious context.

REGR 6524. Latinx Spirituality. (3 Credits)
This course presents an introduction to the way Latinx people live out their spirituality, faith, or relationship with God. We begin with an overview of the ways Christian and non-Christian Latinx people practice their spiritualities. We then proceed topically, looking at popular Catholicism, Latino sacramentality, Marian devotion, new ecclesial movements, mainline Latino Protestant spirituality, and Pentecostalism.

REGR 6705. Religion Society & Culture. (3 Credits)
Explores various ways of thinking about how Christians and Christian faith communities can and should relate to the broader social world of which they are a part. Emphasis is placed on developing a heightened awareness of the ways religious educators and pastoral ministers can enable people to work for greater peace and justice in the world.

REGR 6999. Religious Education Final Integration Seminar. (3 Credits)
The Master of Arts program in religious education concludes with this final integration course (offered each spring). The course involves a terminal research project on a topic determined by the faculty.

REGR 7102. Foundations of Rel Educ. (3 Credits)
An examination of the various theological, philosophical, and educational models that inform the foundations of religious education. The attempt will be made to show how these models have influenced different schools, theorists, practitioners and materials of religious education. Criteria for evaluating the adequacy of competing models will be offered. Additional Doctoral readings and assignments per instructor.

REGR 7120. Education Peace/Justice. (3 Credits)
This course is for PHD Students only. Focuses on developing a greater understanding of the social ministry of the Christian churches. After a historical survey of Christian attitudes toward peace and justice, participants will explore ways of bringing a concern for peace and justice issues into liturgy, preaching, religious education and pastoral ministry. The course also examines how to relate Christian understandings of peace and justice to everyday work, and civic, political and family life.

REGR 7130. Theo Issues:Religious Ed & Min. (3 Credits)
This course is for PHD Students only. The course explores major Christian classical themes in contemporary theological development. Foundational concepts of revelation, scripture and tradition, Trinity, creation, Jesus the Christ, and sin and grace are examined. The practical ministerial and educational implications of these developments will be collaboratively pursued.

REGR 7140. Curriculum and Religious Education. (3 Credits)
This course is for Ph.D. students only.

REGR 7150. Foundations for Intercultural Ministry and Religious Education. (3 Credits)
Ministerial contexts are spaces of intercultural encounters that can serve to positively affect the practice of ministry and religious education. This special topics course will explore key pillars for understanding these encounters as revelatory moments that can be constructive for the “kin-dom” of God. Among the literature explored in this course will be theories of intercultural teaching and learning, anti-racist identity development, and cultural studies critiques, all within the context of students’ self-exploration of their own cultural identities. From this exploration, students will envision how their own ministerial praxis can be shaped to form liberating spaces for intercultural ministry and solidarity. This course is open only to doctoral students.

REGR 7170. Spirituality and Arts. (3 Credits)
This course is for PHD Students Only.
REGR 7180. Religious and Educational Development of Children and Youth. (3 Credits)
This course inquires into the spiritual, moral, and educational development of children and the implications of this development for religious education. Emphasis is placed on developing a theology of childhood, and the influence of childhood faith development on adult spirituality. Additional doctoral readings and assignments per instructor.

REGR 7202. Youth & Young Adult Ministry. (3 Credits)
Explores the personal and communal development of youth and young adults (11-30) through church teaching and such disciplines as philosophy, psychology, and sociology, education and religious education. A comprehensive framework for nurturing the faith and spirituality of youth and young adults is presented as an organizing framework for the course.

REGR 7204. Spec Ques:Youth&Young Adul Min. (3 Credits)
This course is for PHD Students only. Offers a study of identity formation, sexual development, social consciousness, the influence of popular media culture, attitudes toward authority, and Generation X and Millennial Generation spirituality. Participants will explore ways of re-envisioning religious education and pastoral ministry to respond more adequately to contemporary youth culture.

REGR 7230. Spec Issues in Religious Ed. (3 Credits)
This course is an in-depth study of three key issues in the field of religious education. Its focus is the systematic treatment of: 1. An exploration of teacher-learning as the practice of revelation; 2. The nature, direction and scope of religious development; and, 3. The meaning of professional and its link to the professional identity of the religious educator. The three themes will be examined within the context of the current challenges facing church and culture.

REGR 7311. Digital Catechesis. (3 Credits)
Doctoral Students Only The Digital Catechesis course provides a new social landscape for imagining faith formation and religious education today. This new landscape integrates Pope Francis’ clarion call for the New Evangelization and the worthy potentials of the New Media, to come up with a leadership agenda that offer ways to explore and call into question traditional assumptions and understanding of both the catechetical and the technological. The course's goal is to lead pastoral leaders to viewing digital catechesis as a vital expression of the truly catechetical in contemporary religious context.

REGR 7705. Religion Society & Culture. (3 Credits)
Explores various ways of thinking about how Christians and Christian faith communities can and should relate to the broader social world of which they are a part. Emphasis is placed on developing a heightened awareness of the ways religious educators and pastoral ministers can enable people to work for greater peace and justice in the world. See Doctoral requirements on syllabus.

REGR 7910. Special Topics: Religious Education. (3 Credits)
See syllabus online for details of this special elective offering.

REGR 8102. Historical and Philosophical Foundations of Religious Education. (3 Credits)
This course—for doctoral students only—is an examination of the various theological, philosophical, and educational models that inform the foundations of religious education. The attempt will be made to show how these models have influenced different schools, theorists, practitioners, and materials of religious education. Criteria for evaluating the adequacy of competing models will be offered.
REGR 8202. Youth & Young Adult Ministry. (3 Credits)

Open to Doctoral Students only. Explores the personal and communal development of youth and young adults (11-30) through church teaching and such disciplines as philosophy, psychology, sociology, education and religious education. A comprehensive framework for nurturing the faith and spirituality of youth and young adults is presented as an organizing framework for the course.

REGR 8204. Special Questions: Youth and Young Adult Ministry. (3 Credits)

This course—open to doctoral students only—offers a study of identity formation, sexual development, sexual consciousness, the influence of popular media culture, attitudes toward authority, and Generation X and millennial generation spirituality. Participants will explore ways of re-envisioning religious education and pastoral ministry to respond more adequately to contemporary youth culture.

REGR 8230. Spec Issues in Religious Ed. (3 Credits)

This course is open to students who have completed, or are enrolled in, a course in religious education. It focuses on the theoretical and practical aspects of religious education. The course will cover topics such as educational philosophy, methodological issues, and the application of this theory to contexts of faith communities. Foundational issues explored will include the meaning of adulthood, adult learning, and development, and adult social worlds.

REGR ADVI. Faculty Advising. (0 Credits)

REGR MTNC. Maintenance of Matriculation. (0 Credits)

**Remedies Law (RMGL)**

RMGL 0204. Remedies. (3 Credits)

Students are expected to master the basis concepts of the equity and law traditions. We study of legal and equitable civil remedies for tort, contractual, employment law, and constitutional claims. Equitable remedies such as injunctions, specific performance, restitution, reformation, and rescission are a focus. Particular attention is given to structural injunctions, centering on the history of public school integration litigation engendered by Brown II. Attention is given to compensatory and punitive damages, both in actions in tort and for breach of contract under the Uniform Commercial Code. Particular attention is given to mass tort remedies for economic loss, as in the BP Gulf Oil spill, and structured settlements in mass tort cases such as the J&J Hip Implant cases. Also covered are statutory remedies such as declaratory judgments and attorneys fees as damages in intellectual property and civil rights cases. Students have the option of completing, a take-home essay exam, term paper or upper level writing requirement.

Attributes: LDF, LIDR, LMCO.

RMGL 0402. Human Rights: Coming to Terms with Historical Justice Through Reparations. (2 Credits)

The course provides a unique opportunity to review how the United States and other countries have addressed the issue of broad remedies for mass wrongs that affect a group in society, whether financial, historical or moral. It will look at the legal, philosophical, and ethical underpinnings of different approaches that have been or might be taken, as well as the difficulties of creating and implementing such remedies from both an ethical and a practical perspective. Students will be exposed to a broad array of legal thinking, both historically and geographically, and will learn about the challenges of translating philosophical ideas into reality, an important skill set that has general relevance for those interested in the application in society of human rights and other legal principles. <p> The types of core issues that the course will seek to address are:<br> 1. What constitutes reparations?<br> 2. For what wrongs should reparations be made?<br> 3. Who should be responsible to make reparations?<br> 4. Who should be entitled to reparations?<br> 5. How should funds be distributed?<br> 6. What should be the venue to decide on reparations?<br> 7. Who speaks for the victims?<br> 8. What is the impact of reparations?<p> The course will include review of reparations and compensation related to the Holocaust. It will also look at how the subject has arisen in the context of slavery, the treatment of Native Americans and the internment of Japanese-Americans. Furthermore, national and international litigation, negotiations and agreements in this rapidly emerging area of the law will be discussed. The course will be taught by Gideon Taylor, who has led efforts in this field. Paper Required.

Attributes: INLJ, LLM.

**Research (Law) (RHGL)**

RHGL 0011. Introduction to LLM Research. (0 Credits)

RHGL 0101. ADVANCED LEGAL RESEARCH ESSENTIALS. (1 to 3 Credits)

The ALR: Essentials course provides students with an overview of the most important topics in legal research. In this one-credit course, students will re-visit and expand upon the skills learned in Basic Legal Research, including research strategy best practices and how to find cases. New topics, such as legislative history, are introduced, and significant opportunities for practice and feedback are provided. This course is occasionally offered as an online course and may be offered in the fall or summer. Some asynchronous work may be assigned. <p> <b>ALR: Essentials</b> (1 credit, spring semester)<p>

RHGL 0102. Advanced Legal Research: Public Interest. (2 Credits)

Please visit: http://lawlib1.lawnet.fordham.edu/services/advlegres.pdf for the course description.

Attribute: PIS.
RHGL 0103. Advanced Legal Research: LL.M. Workshop. (1 Credit)
Please visit: http://lawlib1.lawnet.fordham.edu/services/advlegres.pdf for the course description.
Attribute: LL.M.

RHGL 0201. Advanced Legal Research: Taxation. (1 to 2 Credits)
The ALR Taxation course focuses on teaching the skill of efficient research methodology for the area of federal income taxation. Significant treatment will be given to describing the tax legislative process, the importance of the various tax primary sources, and the major tax-specific research tools. Students will be able to locate relevant primary and secondary tax materials and will be able to select the source that is most appropriate given considerations of time, cost, and availability of sources.
Attribute: EXP.

RHGL 0202. Advanced Legal Research: New York Legal Materials. (1 or 2 Credits)
The ALR: New York Legal Materials course provides students with a focused overview of New York state and city legal materials. In this one-credit course, students will build upon the skills learned in Basic Legal Research while learning New York state and city resources. Students will be introduced to new topics, such as legislative history and local laws, and there will be significant opportunities for practice and feedback.

RHGL 0203. Advanced Legal Research: Administrative Law. (1 to 2 Credits)
The ALR Administrative Law course focuses on comprehensive research of administrative law sources, including statutes, regulations, regulatory decisions, and guidance. Students that complete the course will gain an understanding of what these sources are, how they relate to each other, and their functions within the practice of law. Particular attention is paid to legislative and administrative procedure.
Attribute: EXP.
Prerequisites: ADGL 0302 or FCGL 0129.

RHGL 0204. Advanced Legal Research: International Humanitarian Law. (2 Credits)
Please visit: http://lawlib1.lawnet.fordham.edu/services/advlegres.pdf for the course description.
Attributes: ICE, INLJ.

RHGL 0205. Advanced Legal Research: Foreign and International Law. (2 Credits)
The ALR: Foreign and International Law course introduces students to researching in other jurisdictions and legal systems, including public and private international law. Students that complete the course will learn how to find and use a comprehensive selection of foreign and international legal research tools, as well as gain an understanding of what these sources are and their functions within the practice of law. Potential topics include international trade, human rights, the European Union, and mixed jurisdictions.
Attributes: ICE, INLJ, LAWI, LIDR.

RHGL 0206. Advanced Legal Research: Copyright, Trademark, and Patent. (2 Credits)
The ALR: Copyright, Trademark, and Patent course focuses on researching intellectual property materials including application materials, agency materials, cases, regulations, and statutes. Students that complete the course will have an in-depth understanding of intellectual property resources and be able to locate copyright, patent and trademark information from paid and unpaid sources as well as locate relevant cases, regulatory materials, and statutes.
Attributes: IPIS, LAWT.

RHGL 0207. Advanced Legal Research Law Practice Technology. (2 Credits)
This course will cover the technological tools of law practice, giving students both an opportunity to use these tools and an understanding of their development. Students will explore case management systems, ediscovery tools, competitive intelligence solutions, artificial intelligence, blockchain, and other rapidly evolving applications and devices confronting the 21st-century attorney. Hands-on use of these tools will be emphasized. Students will also explore the issues arising from new technological developments in law practice. These topics include new ethics requirements for more technologically savvy attorneys and the implications of technology on client confidentiality.
Attributes: EXP, LL.M.

Russian (RUSS)

RUSS 1001. Introduction to Russian I. (5 Credits)
An introductory course that focuses on the four skills: speaking, reading, writing and listening providing students with a basic knowledge of Russian linguistic structures, vocabulary and culture, which studied interdependently, comprise the Russian Language.

RUSS 1501. Intermediate Russian I. (3 Credits)
Attribute: IPE.
Prerequisites: RUSS 1001 or RUSS 1002.

RUSS 1502. Intermediate Russian II. (3 Credits)
The second semester continues and amplifies the work of the first. Conducted in Russian.
Attribute: IPE.
Prerequisite: RUSS 1501.

RUSS 1901. Grammar Review Russia Speaker. (4 Credits)
For heritage speakers of Russian. Will improve the literacy of native Russian speakers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.

RUSS 1999. Tutorial. (1 Credit)
A critical analysis of selected cultural and literary texts; composition, conversation, and review of pertinent grammatical structures.
Attribute: IPE.
Prerequisite: RUSS 1502.
RUSS 2300. Russian From Intermediate to Advanced. (4 Credits)
This course helps students progress from Intermediate to Advanced proficiency (ACTFL) or form 1 to 2 on the ILR scale. We will develop 4 skills: 1) Engage in conversation to communicate information on autobiographical topics, as well as topics of community, national or international interest; 2) When reading, understand main ideas and supporting details of authentic narrative and descriptive texts; 3) When listening, understand main ideas and most supporting details in connected discourse on a variety of general interest topics, such as news stories, explanations, instructions, anecdotes, or travelogue descriptions; 4) In writing, use a variety of cohesive devices up to several paragraphs in length and exhibit control of the most frequently used syntactic structures and a range of general vocabulary. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: RUSS 2001.

RUSS 2500. Approaches to Literature. (4 Credits)
This course examines the masterpieces of the nineteenth-century Russian prose, using a broad selection of the excerpts from the literary works of Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy and Chekhov. One of the goals of the course is to analyze how these writers expanded the boundaries of the genres in which they worked, even as they exposed the acute social problems of their time. Taught in Russian. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: IPE, OCST.
Prerequisite: RUSS 2001.

RUSS 2601. Russian Conversation and Composition. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.

RUSS 2640. Russian Short Fiction. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.

RUSS 2650. Media and the Russian State: News Outlets From 19th Century to Present Day Russia. (4 Credits)
This course consists of two primary components: 1) an intermediate/advanced Russian language study and 2) a survey of censorship in Russian and Soviet history. It is available to both intermediate and advanced students of Russian and fulfills a Russian language requirement. The language track offers Russian grammar instruction that will prepare students to read and research advanced Russian texts. The cultural component of this course offers a survey of censorship in Russian and Soviet history, spotlighting great works of art under censorship. The course takes its starting point with imperial censorship in the second half of the 19th century, including press censorship leading up to and during WWI. We continue with artists’ battles against Soviet censorship and Socialist Realism, using case studies of: writers Zamyatin, Boris Pilinyak, Boris Pasternak, and Joseph Brodsky; filmmakers Sergei Eisenstein and Aleksandr Askoldov; classical composers Shostakovich and Prokofiev; and Malevich's Suprematism, which includes a class trip to observe MoMA's permanent collection. Finally, we will analyze Putin's state-sponsored news outlets and compromised freedom of expression in present day Russia. Heritage students will read original Russian texts and post responses in Russian. Scholarship and literature will be available in English for non-heritage speakers. Discussions will be in both Russian and English. Completion of 2001 or instructor approval required. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE, OCST, PJMJ, PJST.
Prerequisite: RUSS 2001.

RUSS 3002. Genres and Styles Russian Literature. (4 Credits)
This course will introduce students to a wide variety of genres in both synchronic as well as in diachronic aspect. It will undertake a close analytical examination of a number of types of literary and folkloric texts. These masterworks of Russian literature will be analyzed in terms of their defining features such as their intrinsic imaginative system, language devices, themes, and ethical function, which are significant for the chronologically relevant cultural tradition. The course will enable students to perceive the literary works in their multi-dimensional depths as the students will engage in a deeper analysis of each text surveyed. The course will include texts from the present day to the distant Russian literary past. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE.

RUSS 3250. Translating Russian Poetry, Music, Animation, Film, and Journalism. (4 Credits)
We will use the arts to grow our vocabulary and increase our cultural understanding. We will read and translate the poetry of Pushkin in the original Russian, hear and translate the great bards Okhudzhaeva and Vyotsky, watch and translate the great Soviet films 'Autumn Marathon' and 'Summer' and selected Soviet animations, and read contemporary journalism from modern Russian cultural magazines such as Znak, Polka, and Meduzza. Conducted in Russian.
Attribute: ALC.
Prerequisite: RUSS 2001.
SCGL 0299. Securitization. (2 Credits)
This course examines the legal aspects of the multi-trillion dollar securitization industry. Securitization is a method of finance which seeks to minimize the bankruptcy risks that are faced by commercial lenders, but it provides other benefits to lenders and borrowers alike. The course will focus on the bankruptcy law, uniform commercial code, banking law, tax and international law issues that arise in structuring securitization transactions and how such issues are addressed by securitization attorneys in today's legal and business environment.
Attributes: CORC, CRCP, LAWB, LLM.

SCGL 0402. Broker Dealer. (2 Credits)
Broker-dealer regulation explores the federal and state securities laws and the self-regulatory system and rules under which brokerage firms and their associated persons operate. We also contrast other regulatory schemes, including for investment advisers, fund managers and swap entities. We take a pragmatic look at the regulatory challenges faced by financial services firms and the lawyers who advise industry participants. Topics include broker-dealer registration and exemptions from registration, sales and trading, research, investment banking, cross-border securities activities, supervision, managing conflicts of interest and controlling inside information, enforcement defense, arbitration and litigation. The course is conducted in an informal seminar style and requires a paper.
Attributes: CORC, CRCP, LAWB.

SCGL 0417. Securities Regulation. (3 or 4 Credits)
Emphasizes the Securities Act of 1933, the registration process, statutory and administrative exemptions from registration, and civil liabilities. Surveys the reporting requirements of the Securities Exchange Act of 1934 and the state Blue Sky laws. Examines the role of the Securities and Exchange Commission and the ethical obligations of securities lawyers. Open to students who have completed at least one semester of Corporations and Partnerships.
Attributes: BFF, CORC, CRCP, LAWB, PIE.
Prerequisite: BUGL 0201 (may be taken concurrently).

SCGL 0423. Sec Regulations Refashioned. (2 Credits)
Securities Regulation Refashioned provides students with an insider’s perspective of the U.S. system of securities regulation and recent fundamental reforms. We will discuss the effects and effectiveness of topical regulation, such as the implementation of the Dodd-Frank and JOBS Acts. We will examine current issues in regulatory enforcement, including the prominent securities scandals and frauds of recent years. Students will also learn about the substantive and procedural law governing broker-dealers and investment banking firms. The course focuses on the real-world application of securities regulation and, where possible, seeks to provide students with practical experience in preparation for legal practice. In prior years, we have invited leading members of the securities industry to guest lecture during the course of the semester. Our syllabus is tentative, and we attempt to modify it during the semester to meet the students’ interests and respond to developments in the securities industry.
Attributes: CORC, CRCP, LAWB.

SCGL 0605. Securities Litigation. (2 Credits)
This course will be a review of and clinical exercises with respect to certain aspects of securities litigation. It will focus on the key differences between traditional civil litigation and securities litigation including class action procedures. The initial focus will be a review of the provisions of the key securities laws that can lead to liability, particularly Sections 11 and 12 of the Securities Act of 1933 and Section 10(b) of the Securities Exchange Act of 1934, and Rule 10b-5 thereunder. Intertwined with the review of Rule 10b-5 cases will be clinical components. First, a five minute moot oral argument (based only on materials assigned), addressing the issue of scienter on a motion to dismiss. Second, a five minute moot oral argument (based only on materials assigned) on a motion to dismiss or other key issues such as materiality, pleading standards, etc. Again, no outside research is required or permitted for either of these exercises. The next phase will review a variety of recent Supreme Court decisions addressing current issues in class action certification. This next phase will also include a clinical component focusing on a review of an actual class action complaint and a motion to dismiss with a discussion as to the tactics, strengths and weaknesses presented. There will be a final clinical component at the end of the Rule 10b-5 and class action sections which will be the preparation of a draft brief insert with respect to a motion to dismiss of no longer than 500 words (two typewritten pages). Time permitting, we will also review less intensely insider trading issues, international securities fraud litigation, including the Morrison decision, and its argument before the Supreme Court, and securities arbitration as providing a remedy for individual investors. Because a general course in securities regulation is not a prerequisite, there may be digressions along the way on capital markets and other regulatory issues. The basic course text will be Nagy, Painter and Sachs, Securities Litigation and Enforcement: Cases and Materials. In addition, a compilation of the relevant statutes and regulations is required. Grading will be, 20% general class participation, 20% for each of three “practical” components (the two moot arguments and brief point draft) (or 60% total) and 20% from a final.
Attributes: LAWB, LLM.

Service Learning (SERV)

SERV 0099. Community-Engaged Learning. (1 Credit)
Through the Community-Engaged Learning Interdisciplinary Seminar offered each semester, students independently make the connection between a course they are enrolled in and service to the community. By completing 30 hours of service, attending a series of interdisciplinary seminars, and writing integrative essays, students deepen course concepts connecting to societal issues through ongoing dialogue and reflection. After successful completion of all requirements, students may earn 1 additional credit for the course with which they are connecting the community-engagement experience. To participate in this interdisciplinary seminar, students must: 1. Pre-register for SERV 0099 and choose the section for their home campus. 2. Choose which course and service agency with which they would like to partner (Center for Community-Engaged Learning staff can assist with placement at an agency). 3. See the seminar instructor for required agreement forms and additional seminar parameters.
Attribute: SL.
The course introduces students to the historical, social, cultural, political, economic, and environmental factors that influence healthcare; and international health issues and programs. Students should expect to learn about overcoming challenges in healthcare from the context of a developing country.

**Social Work (graduate) (SWGS)**

**SWGS 0000. Advanced Standing.** (33 Credits)
Transcript registration code to permit advanced standing students to bypass course prerequisites for select advanced courses.

**SWGS 0766. Maint Matric - No Mentor.** (0 Credits)
Students who have been granted permission, for serious personal reasons, to take a leave of absence from the program register for this course each semester.

**SWGS 0799. Maint Matric - Mentored.** (0 Credits)
Intended for students who have completed all course requirements and require faculty mentoring and the use of the library and other university facilities while completing research and writing the dissertation.

**SWGS 0930. Phd Comp Exam-Basic Policy.** (0 Credits)

**SWGS 0931. Phd Comp Exam-Advanced Policy.** (0 Credits)

**SWGS 0932. Phd Comp Exam-Basic Practice.** (0 Credits)

**SWGS 0933. Phd Comp Exam-Adv Practice.** (0 Credits)

**SWGS 0934. Phd Comp Exam-Resrch (Qual).** (0 Credits)

**SWGS 0935. Phd Comp Exam-Resrch (Quan).** (0 Credits)

**SWGS 0936. Phd Comp Exam-Theory.** (0 Credits)

**SWGS 5000. Ch First - Ch Abuse & Mal.** (0 Credits)

**SWGS 5002. LMSW Review Course.** (0 Credits)
LMSW Review Course.

**SWGS 5100. Seminar in Field Instruction.** (0 Credits)

**SWGS 5500. Executive Education Training.** (0 Credits)

**SWGS 6000. Transfer Elective.** (3 Credits)

**SWGS 6005. Contemporary Social Welfare Policy.** (3 Credits)
Students will learn that social welfare policies and their implementation at the federal, state, and local levels drive the realization of human rights and justice. The course introduces students to the underlying values, assumptions and philosophical perspectives as well as the social, economic and political factors that have influenced the development of this country’s social welfare system, including its goals, policies and programs. Students will learn about the role of social work in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and ways they can actively engage in policy practice to effect change within those settings. The course introduces students to the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They will also become knowledgeable about policy formulation, analysis, implementation, and evaluation.

**SWGS 6006. Social Policy I: Policy and Profession.** (3 Credits)
Students will learn that social welfare policies and their implementation at the federal, state, and local levels drive the realization of human rights and justice. The course introduces students to the underlying values, assumptions and philosophical perspectives as well as the social, economic and political factors that have influenced the development of this country’s social welfare system, including its goals, policies and programs. Students will learn about the role of social work in policy development and implementation within their practice settings at the micro, mezzo, and macro levels and ways they can actively engage in policy practice to effect change within those settings. The course introduces students to the historical, social, cultural, economic, organizational, environmental, and global influences that affect social policy. They will also become knowledgeable about policy formulation, analysis, implementation, and evaluation.

**SWGS 6007. Social Policy II: Policy Practice and Human Rights Advocacy.** (3 Credits)
This is the second of two required courses covering content on social welfare policies and services. Building on the first course, this course introduces the knowledge, skills and strategies necessary to examine the impact of specific social policies on clients, agencies, service delivery and practice, and to influence these policies as participants in the major arenas where policy is analyzed, formulated and changed. This course is offered with a broad focus upon diverse fields of practice or, alternatively with a focus on a specific practice area. Prerequisite: SWGS 6006. This Foundation- level course is usually taken while the student is in the Advanced phase of the program.

Attribute: SOIN.

**SWGS 6008. SW & the Law.** (3 Credits)
The legal foundations for social welfare policies and programs are examined, including the history and development of the rule of law, civil liberties and civil rights, sources of different systems of law, due process and legal institutions. Special attention is given to professional relations between lawyers and social workers, their differing values and ethical systems and on preparing social workers to practice in and with the courts.

**SWGS 6009. Soc Pol Anal for Macro Prac.** (3 Credits)
This course further develops the analytical and political skills needed by social work leaders to effectively address the multiple and complex social issues affecting communities, organizations, planning and administration. Students are exposed to advanced policy analysis skills such as fiscal analysis of government budgets and legislative analysis. The course explores the different ways in which social policies are made and implemented at each level of government, and ways in which analysis can be used by administrators, community and organizational practitioners to affect purposeful change. This course builds on basic policy skills and research principles from foundation-year courses by applying them to questions of policy suitability and effectiveness.
SWGS 6017. Empow PR Immigr & Refuge. (3 Credits)
Empowerment Practice with Immigrants and Refugees is an advanced lecture-seminar course that focuses on critical approaches to practice with/in immigrants and refugees. This course builds on HBSE, social policy, research, and micro and macro practice content in the Foundation Curriculum. This course focuses on: 1) introduction of post-colonial perspective and theoretical representations of immigrant and refugee communities, 2) critical examination of the principles of empowerment practice and understanding of trauma and recovery, 3) effects of displacement and transnational migration on immigrant and refugee individuals and their communities; and 4) social service provision strategies pertaining to working with/in immigrant and refugee communities.

SWGS 6028. Child Abuse. (3 Credits)
This course focuses on intervention with abused children and battered women from an ecological perspective. It highlights the need for trauma-specific interventions with individuals and families, as well as system-wide advocacy with social and cultural institutions that contribute to the continuation of abuse within family relationships.
Attribute: LCSW.

SWGS 6030. Death & Dying. (3 Credits)
This course examines the experience of death as encountered by social workers in clinical practice. The focus is on providing a theoretical base for understanding the psychosocial aspects of loss, death and bereavement across the life cycle. Additional emphases include strategies, techniques and goals of interventions in clinical work with the bereaved.
Attribute: LCSW.

SWGS 6036. Social Work Practice with Service Members, Veterans, and Their Families. (3 Credits)
This course, open to all advanced year social work students, explores the role of social work within the military in meeting the needs of active duty soldiers, veterans and their families. The course begins with an exploration of social work practice within the military from an historical perspective. The changing demographic makeup of the military and the implications for social work practice are also a part of this exploration. Issues related to the development of cultural competence and cultural sensitivity when working with the military are also explored. The course then focuses on developing an evidence-based understanding of the current social service, mental health, and health needs of active duty soldiers, veterans, and their families and the intervention methods being used to respond to these needs. While the needs of soldiers returning from Iraq and Afghanistan are emphasized, the similar and different needs of veterans from previous conflicts are also considered. The challenges being faced by social workers in meeting the needs of military women, single parents, gay and lesbian soldiers and immigrant soldiers and their family members are also explored. Students analyze and critique current methods of intervention at all levels of practice and consider ways that the social work profession could further contribute to meeting the needs of active duty soldiers, veterans, and their families.

SWGS 6040. Integrating Human Rights and Justice in Practice. (3 Credits)
Every person regardless of position in society or geographic location has fundamental human rights such as freedom, safety and security, privacy, an adequate standard of living, health care, and education. This course introduces students to how social workers may conceptualize the global intersections and interconnections of justice, equality and human rights. Students are introduced to an integrated practice framework that promotes human rights and justice and identifies the root causes of global social issues. They will explore theories that address human need, social, economic, and environmental justice, intersectionality, diversity, and oppression and discrimination. In this course, students learn how to recognize the extent to which a culture's structure and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Students learn to engage in advocacy to advance human rights social, economic, and environmental justice domestically and internationally.
Attributes: CEED, CETH.

SWGS 6050. Human Rights and Social Justice. (3 Credits)
Every person regardless of position in society or geographic location has fundamental human rights to freedom, safety and security, privacy, an adequate standard of living, health care, and education. This course introduces students to how social workers may conceptualize the global intersections and interconnections of justice, equality and human rights. Students are introduced to an integrated practice framework that promotes human rights and justice and identifies the root causes of global social issues. They will explore theories that address human need, social, economic, and environmental justice, intersectionality, diversity, and oppression and discrimination. In this course, students learn how to recognize the extent to which a culture's structure and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Students learn to engage in advocacy to advance human rights social, economic, and environmental justice domestically and internationally.
Attributes: CEED, CETH, HECS.

SWGS 6103. Social Work and AIDS. (3 Credits)
This course focuses on the impact of HIV and AIDS upon individuals, families and communities. A knowledge base from social work, social sciences, psychology, psychiatry, medicine, law and public policy is used to explore policy and practice implications. Advocacy and case management interventions are stressed.

SWGS 6104. Spirituality & Soc Wk PR. (3 Credits)
This course will explore a number of holistic concepts under the definition of spirituality. The many ways spirituality can be used in a variety of social work practice settings will be the main theme. A range of methods of spiritual practice and approaches to healing will be taught.
Attribute: LCSW.
SWGS 6106. Domestic Violence: Social Work and the Law. (3 Credits)
This course—open to both social work and law students—explores the roles of social work and law in the field of domestic violence. The course is based on the premise that increased interdisciplinary understanding will lead to more effective intervention for both victims and perpetrators. Jointly taught by a social work professor and a law professor, the course provides students with both historical and contemporary perspectives on the social and legal response to domestic violence. An understanding of the practice skills required in the performance of social worker and lawyer roles is emphasized. Specifically, students explore roles in detection, crisis intervention, assessment, and intervention. Students must complete the Foundation requirements.

SWGS 6110. Forensic Social Work Practice. (3 Credits)
Forensic Social Work Practice, prepares social workers to practice at the intersection of social work, public health, and the legal system in order to tackle contemporary social problems, such as health disparities and mass incarceration. Many forensic populations, such as racial and ethnic minorities, at-risk youth, the elderly, veterans, immigrants, LGBTQ persons, persons with disabilities, or those living in poverty or communities of violence often lack access to quality services and political, civil, social, economic, and cultural justice. Course participants learn and apply a human rights legal framework and social justice and empowerment theories to guide multi-level prevention, assessment, and interventions with historically underserved individuals, families, and communities. After completing the course, participants will increase their knowledge, values, and skills for collaborative empowerment practice with forensic populations in diverse practice settings, such as healthcare, social service, and legal settings, including protective services, the courts, and corrections.

SWGS 6208. Human Behavior: Social Environment I. (3 Credits)
This is the first of a two-semester course sequence. The course presents content from the behavioral sciences and related professional literature regarding those theoretical constructs and insights most relevant for social work practice. It uses an ecosystems perspective to coordinate and synthesize a broad range of knowledge pertinent to practice concerning the transactional and interactional aspects of large and small systems.

SWGS 6209. Human Behavior: Social Environment II. (3 Credits)
The second semester course in the Human Behavior and Social Environment sequence discusses human development over the life course. Similarities and variations in personal and social functioning; in social, cultural and physical environments; in complex organizations and social institutions. All are examined for insights concerning the interplay between people and their environment. This focus includes biological, psychological and sociocultural factors and how the environment affects individual development. Prerequisite: SWGS 6208.

SWGS 6305. Social Work Skills Lab. (3 Credits)
This skill-based course is anchored in the knowledge of generalist social work practice. Students will develop competency in performing essential social work skills via simulations, role-plays and peer activities. These skills will be applied to working with client systems including individuals, families, groups, communities and organizations. Case scenarios developed for this course will reflect the realities of contemporary social work practice. The emphasis will be on student performance in using the engagement and intervention skills with various client systems.

SWGS 6320. Social Work Practice With Organizations and Communities. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with organizations and communities. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with organizations and communities. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with organizations and communities.

SWGS 6321. Generalist Practice I with Individuals, Families, Groups, Organizations, and Communities. (3 Credits)
This is the first of a three-course sequence that uses a unifying generalist intervention framework to help students make sense of the breadth and depth of the social work profession. The course integrates Human Behavior in the Social Environment theories and constructs throughout the lifecourse from infancy to old age, death, and dying. The unifying framework provides clear guidelines for students about each phase of practice when working with individuals, families, and groups by following a multi-step planned change model. The model includes the practice phases of: preparation, engagement, assessment, planning/contracting, implementation, evaluation, termination/referral and follow-up. This approach allows a wide range of flexibility for the application of theories and specific skills. Students will gain a foundation upon which they can continue to add and build skills.

SWGS 6322. Generalist Practice II with Individuals, Families, Groups, Organizations, and Communities. (3 Credits)
This is the second of a three-course sequence that uses a unifying generalist intervention framework to help students make sense of the breadth and depth of the social work profession. The course integrates Human Behavior in the Social Environment theories and constructs throughout the lifecourse from infancy to old age, death, and dying. The unifying framework provides clear guidelines for students about each phase of practice when working with individuals, families, and groups by following a multi-step planned change model. The model includes the practice phases of: preparation, engagement, assessment, planning/contracting, implementation, evaluation, termination/referral and follow-up. This approach allows a wide range of flexibility for the application of theories and specific skills. Students will gain a foundation upon which they can continue to add and build skills.

SWGS 6323. Social Work Practice With Individuals Across the Lifespan. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with individuals. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with individual clients. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with individuals.

SWGS 6324. Social Work Practice With Families and Groups Across the Lifespan. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with families and groups. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with families and groups. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with families and groups.
SWGS 6403. Family Oriented Treatment. (3 Credits)
This course provides an introductory overview of major themes of family intervention. The approach is eclectic and integrates theory and practice. The styles of Ackerman, Satir, Minuchin, Bowen, and others are emphasized.
Attributes: LCSW, SWIF.

SWGS 6404. Crisis Intervention. (3 Credits)
This course emphasizes the theoretical base that guides crisis intervention and trauma treatment with individuals, families and groups across the life cycle. Case materials illustrate the assessment and resolution of crisis and trauma in a variety of contexts.
Attribute: LCSW.

SWGS 6409. Pract Older People & Fams. (3 Credits)
This course focuses on direct practice with older people and their families. The course examines the social context of aging, the aging process, associated changes and the effects on older people and their families. Emphasis is on the nature of support systems and the social work role in maintaining and enhancing older people's function and well-being. The role of caregivers, when elders are limited in their capacity to function independently, is examined.
Attribute: LCSW.

SWGS 6413. Clinical SW Prac 1. (3 Credits)
The first of a two-course sequence in advanced clinical social work practice, this course expands and deepens the knowledge base of generalist practice, emphasizing advanced assessment with clients across the life cycle, and evaluation of practice. Treatment planning with individuals, families and groups are all explored. Special attention is given to the assessment of trauma. Prerequisite: SWGS 6319, 6321, 6322; concurrent field practice is required.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6415. Sem: Clinical SW Prac. (3 Credits)
This required course assists students in integrating the knowledge gained in the required clinical practice courses and in field instruction. By developing and presenting an internship case, students demonstrate their ability to integrate theory and practice. Prerequisite: SWGS 6413; concurrent SWGS 6414 and field practice are required.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6416. Advanced Integrated Practice With Individual, Families, and Groups. (3 Credits)
This clinical course furthers generalist practice with experience in the use of evidence-based and informed practice that responds to major mental health concerns. A focus will be developing competence in effective use of self in applying brief treatment modalities that include skills in working with the change process, crisis intervention, interpersonal therapy (IPT) and/or solution oriented approaches. An introduction to working with clients who have experienced trauma will include the fundamentals of cognitive behavioral models to support use of advanced clinical skills. Students will develop client service plans based on the selection of appropriate theories, intervention models, and evidence informing interventions, including psychoeducation. Students will gain experience as reflective and collaborative practitioners utilizing a practice orientation that attends to human rights and social justice for diverse individuals, families, groups and communities.
Attribute: SWIF.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6417. Pract: Abusers Alc & Othe. (3 Credits)
This course examines the diagnostic and treatment implications for social work practice with alcoholics and those dependent on other drugs. Addictions are viewed from a bio-socio-psychological perspective. The diversified roles of the social worker are emphasized.
Attributes: LCSW, SWIF.

SWGS 6418. School Social Work Pract. (3 Credits)
This course focuses on the knowledge, values and skills appropriate for social work practice within the school setting. Understanding of the school context and its politics is highlighted. Special attention is given to working with students, teachers, parents and administrators as well as on interfacing with the community. Emphasis is placed on the tasks of social assessment for educational planning, the formulation of goals and objectives, record keeping, accessing school resources and external referrals. Theoretical approaches include problem solving, crisis and role theory, play therapy, brief treatment and group treatment.
Attributes: LCSW, SWIF.

SWGS 6420. Clin SW Prac II Adults & Fam. (3 Credits)
This clinical course furthers generalist practice with experience in the use of evidence-based and informed practice that responds to major mental health concerns. A focus will be developing competence in effective use of self in applying brief treatment modalities that include crisis intervention, motivational interviewing and solution focused approaches. Introduction to working with trauma, with fundamentals of cognitive behavioral models for at risk populations will provide experience in use of advanced clinical skills. Students will gain experience and develop competence in developing a client service plan based on clinical assessment and case formulation that is the basis for choice of theory and evidence to inform intervention. Applied logic modeling will prepare students to identify clinical processes and skills that contribute to specific outcome. Students will gain experience as reflective and collaborative practitioners utilizing a practice orientation that attends to human rights and social justice for diverse individuals, families, groups and communities.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6421. Clin SW Prac II Chil Yth & Fam. (3 Credits)
Clinical Social Work Practice II with Children, Youth, and Families uses a developmental framework within a dynamic ecosystems perspective that is trauma-informed as a foundation for advanced clinical practice. Attachment theory anchors assessment and intervention with preschoolers and their families; theories and models of play therapy and social competency are examined as ways to promote social and emotional men-tal health for school-aged children. Intervention with adolescents focuses on individual youth as well as family system intervention, group practice in school and residential contexts, and community-based multi-system models. The role of prevention, early intervention, and trauma-specific interventions are explored in relation to children, youth and their families. This advanced clinical practice course focuses on the use of evidence to inform practice and the implementation of evidence-based treatment models as they support best-practices. This course aims to create reflective practitioners who can make differential assessments, understand the use and purposes of different modalities of intervention, and learn to develop integrated treatment interventions that are theoretically informed and research-based. The multiple modalities examined in this course include culturally responsive work with parent-child dyads, psycho-education for multi-family groups, parent education, individual, group and family interventions as well as community based practices.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.
SWGS 6422. Indiv Oriented Treatment. (3 Credits)
This course provides an overview of the principles, premises and practices of a selected sample of current theories and methods of intensive individual treatment. Examining and comparing the clinical dimensions of history-taking, diagnosis, symptomatology, time and relationship, it focuses on critical appraisal of commonalities and differences across theories with a view toward developing an integrated approach to direct social work treatment of individuals.
Attribute: LCSW.

SWGS 6426. Cognit & Behav SW Pract. (3 Credits)
This course focuses on the theory and practice of cognitive-behavioral social work. Several common problems of children, adolescents and adults are examined, including aggression, depression and anxiety disorders. Techniques that effectively treat these problems such as cognitive reframing, behavior modification, assertiveness training, stress management, the use of homework and bibliotherapy and the evaluation of practice will be introduced.
Attributes: LCSW, SWIF.

SWGS 6428. Soc Wk Pract with Adolesc. (3 Credits)
Adolescence is explored within a developmental context in this course. The importance of maturational norms, family dynamics, class and cultural factors and peer group influence are examined. Particular attention is paid to adolescents at psychosocial risk and to the development of assessment and intervention skills with the adolescent client.
Attribute: LCSW.

SWGS 6429. Meths of Group Intervent. (3 Credits)
This course focuses on group practice as an integral part of social work intervention. It includes theories and methods of work with groups for prevention and treatment, and the use of groups in staff and team relationships. Theory and practice are integrated through an eclectic approach. Teaching is augmented by group exercises.
Attribute: LCSW.

SWGS 6430. Advanced Clinical Assessment and Diagnosis I. (3 Credits)
This course builds on and extends the person-in-environment and eco-systems assessment perspectives of Generalist Practice, specifically by adding assessment of ego functions and defenses, unconscious processes, and internal conflicts. The course also presents critical understanding and utilization of the DSM-5.

SWGS 6431. Adv Clin Assess & Diagno II. (3 Credits)
This course continues the work of biopsychosocial assessment from a social-work value base that was presented in Advanced Clinical Assessment and Diagnosis I. After a review of the core human rights and social justice values that serve as foundation for both 6430 and 6431, it focuses on specific areas of biopsychosocial well being and illness, beginning with those first observable in childhood and adolescence. In subsequent modules, the biopsychosocial functioning related to confronting trauma, connecting to reality, relating to others, managing the body experience, being cared for, and responding to the vicissitudes of life. The course presents the skills and knowledge for the differential assessment of people across the life span, emphasizing the importance of recognizing both strengths and vulnerabilities at all ages and in all areas of functioning. As in Advanced Clinical Assessment and Diagnosis I, at the conclusion of the course students should be able to: complete comprehensive assessments of mental well mental illness in various areas of biopsychosocial functioning; create working case formulations based on their assessments; critically utilize the DSM-IV when appropriate; and identify empirically informed interventions relevant to their case formulations and diagnoses.

SWGS 6432. Comparative Methods of Psychotherapy with Individuals. (3 Credits)
This course provides an overview of the principles, theoretical premises, and practices of a select sample of current theories and methods of intensive individual treatment, including attachment theory, psychodynamic theories, cognitive behavioral therapy, dialectical behavioral therapy, and trauma treatment. Examining and comparing the clinical dimensions of assessment and diagnosis, intervention strategy, and client/worker relationship, the course focuses on a critical appraisal of commonalities and differences across theories and examines the literature on evidence-based practice. It focuses on a set of common factors present in interventions with individuals and considers the variables of race, ethnicity, gender, and sexuality as it situates theories in an ethical and value-informed framework. The course emphasizes the applicability of various theories in direct social work treatment.
Attribute: SWIF.

SWGS 6433. Relational Pr-Ch/Adol/Adults. (3 Credits)
This course will emphasize the application of relational theories of attachment theory, ego psychology, object relations theory, self psychology and women's relational theory to social work practice. Risk and protective factors in child development will also be considered. Case materials of children, adolescents and adults will be discussed.

SWGS 6434. Evidence Based Mh Pract. (3 Credits)
This course is aimed at developing the knowledge and skills necessary for working with individuals with a diagnosis of serious mental illness using recovery-oriented, evidence-based practices. Students will become familiar with evidence-based practices, within a recovery-oriented paradigm, as a general approach to practice as well as specific evidence-based interventions to use for individuals with a diagnosis of serious mental illness. It is assumed that students will have a basic knowledge of serious mental illness, however, a review will be provided. Students will learn to examine research literature to determine the various levels of support for specific interventions and essential principles for translating research into practice. In addition, they will identify the appropriate treatment outcomes that reflect effective, quality mental health practice. Each evidence-based practice presented will also be examined for its utility with diverse groups. Providing assessment and treatment to a diverse group of individuals with a diagnosis of serious mental illness is the focus of this course and will be discussed in detail. This is a clinical elective and SWGS 6430 Advanced Clinical Assessment and Diagnosis is required.
Attributes: LCSW, SWIF.
Prerequisite: SWGS 6430.

SWGS 6436. Trauma Trmt/Child & Adol. (3 Credits)
This course will introduce students to the common concepts underlying evidence-based treatment for traumatized children and adolescents, using a case analysis format. Trauma is broadly defined, and includes children and adolescents exposed to traumatic events including, but not limited to natural disasters, war, abuse and neglect, medical trauma and witnessing interpersonal crime (e.g. domestic violence) and other traumatic events. The course will highlight the role of development, culture and empirical evidence in trauma-specific interventions with children, adolescents and their families. It will address the level of functioning of primary caregiving environments and assess the capacity of the community to facilitate restorative processes.
Attributes: LCSW, SWIF.
SWGS 6438. Social Work Practice: LGBT Individuals. (3 Credits)
This lifespan-based course examines issues affecting lesbian, gay, bisexual, and transgender (LGBT) individuals and their identities as well implications for clinical social work practice. Based upon an understanding of the ways in which heterosexism and homophobia are embedded in the social milieu, students will identify strategies for serving these populations. The course will include the nature of sexual orientation, LGBTQ identity formation, transgender identity, as well as family and relationship configurations. The course will focus on the mental and physical healthcare needs of LGBTQI individuals, the role of religion and spirituality, as well as possible clinical interventions that increase positive mental and physical health outcomes.

Attribute: SWIF.

SWGS 6439. Evid Based Pract Child& Fam. (3 Credits)
Pre-Requisite - SWGS 6901.
Attributes: LCSW, SWIF.
Prerequisite: SWGS 6901.

SWGS 6440. Advanced Clinical Assessment and Diagnosis. (3 Credits)
The course builds on the skills, values, knowledge and processes of the generalist curriculum, serving as a bridge between generalist and advanced assessment theory and practice. Specifically, the course extends the person-in-environment assessment perspective of Generalist Practice with the addition of more intensive assessment of the individual’s inner world, including psychodynamic conflicts processes and ego defenses. The course is entitled “Advanced Clinical Assessment and Diagnosis” rather than “Psychopathology” to remind students that clinical assessment need not lead to a diagnosis of mental illness. The course covers practitioner self-awareness; the relationship between mental health and mental illness; risk and resilience; bi-psycho-social-spiritual assessment; a strength-informed cooperative assessment process; a critical use of the DSM-5, and major types of mental illness and their evidence-supported treatments.

SWGS 6442. Social Work Practice and Integrated Behavioral Health Care. (3 Credits)
This course, designed for people in their specialist year, prepares students for the direct practice of integrated behavioral health in primary care and other health care settings. Students will become knowledgeable of the roles of behavioral health providers working in health care settings, theories and models of care delivery, and systemic and cross-cultural issues affecting health and health outcomes. Building upon core competencies from generalist practice, students will develop skills in engagement, assessment, intervention, and evaluation in integrated health care. In addition, students will develop social work competencies necessary for supporting patients across a range of health conditions and health care settings and effective interprofessional practice. The importance of ethics and collaborating with individuals, families, and the health care team will be underscored.

Attribute: SWIF.

SWGS 6443. Suicide Assessment & Treatment. (3 Credits)
Suicide Assessment & Treatment.

SWGS 6444. Interventions in Clinical SW. (3 Credits)
Apply theoretical concepts to practice experience.

SWGS 6445. Social Work Practice in Healthcare. (3 Credits)
This course focuses on clinical social work practice in health care settings using a biopsychosocial–spiritual approach with an emphasis on gaining skills in assessing and intervening with individual patients and family members. Students will learn about best practices in patient-centered care and issues in health care across the life span. They will learn what it’s like to work on an interdisciplinary team and how to work in different health care settings. Students will gain an awareness of the issues in health care and social work practice in relation to age, gender, gender identity, and expression, sexual orientation, disability, socioeconomic class, ethnicity, and social justice related to disenfranchised populations. Students will learn about social determinants of health, health care disparities, health literacy, and health promotion. Health care across the lifespan and with different cultural groups will be examined. Students will understand the impact and meaning of serious and life limiting health conditions in individuals and families, including the psychosocial and spiritual issues. Students will learn about the values and ethics for the profession in health care practice, common ethical dilemmas in health care, and how to assess and address ethical dilemmas. Self-care strategies are discussed.

Attribute: SWIF.

SWGS 6471. Palliative Social Work. (3 Credits)
Palliative Social Work.

Attribute: SWIF.

SWGS 6472. Grief, Loss and Bereavement. (3 Credits)
This course will investigate: the theoretical framework(s) for understanding grief, loss and bereavement; review multiple experiences/definitions of grief; address the impact of both culture and religion on the grief experience; review complicated and uncomplicated grief in adults; and address the basics of childhood and adolescent grief. The course will also introduce various counseling intervention techniques, and present a sample of complementary and cognitive focused interventions.

Attribute: SWIF.

SWGS 6474. Comparative Models of Interventions with Individuals. (3 Credits)
This course provides an overview of the principles, theoretical premises, and practices of a select sample of current theories and methods of intensive interventions with individuals. The course will examine and provide a critical assessment of theories, including psychodynamic and self-psychologically informed interventions, attachment theory and its relationship to clinical practices, and trauma treatments such as EMDR and Somatic Experiencing treatments. Additionally, it will look at the role of cognitive-behavioral and dialectical behavioral treatments.

Attribute: SWIF.

SWGS 6598. International Audit. (0 Credits)
Audit of a GSS course at an international campus.

SWGS 6599. Continuing Education SW. (0 Credits)

SWGS 6605. Community Organization. (3 Credits)
This course provides a history of community organizing, especially in the context of the social work profession and as a way of meeting the needs of vulnerable and at-risk populations and communities. Focus is on the various community organizing models and the array of roles and functions of community organizers. Emphasis is on practice strategies and tactics for assessing, planning, implementing, and evaluating community organizing projects and campaigns.

Attribute: SWOC.

SWGS 6614. Integrating Technology in Social Work Practice. (3 Credits)
PREVIOUS TITLE: TECHNOLOGY IN SOCIAL WORK PRA.
SWGS 6615. Supv & Staff Development. (3 Credits)
This course examines supervision and staff development as management functions in diverse agency settings and within the context of social work values and ethics. The philosophy, functions, principles and methods of supervision as well as staff development and training are covered. Emphasis is given to the knowledge and skills required to motivate and retain an effective and multicultural workforce, and to effectively supervise varying levels of staff (volunteers, nonprofessionals, professionals) during turbulent times.
Attribute: SWOC.

SWGS 6616. Prog & Proposal Dev. (3 Credits)
Students learn, step-by-step, to develop and prepare proposals, design programs, seek foundation funding and respond to grant requests. Attention is given to what makes programs and proposals effective and would enhance the likelihood of funding. Emphasis is on how program proposals relate to both organizational mission and funding interests and offer opportunities to serve underserved, neglected, vulnerable and at-risk populations.

SWGS 6622. Advanced Integrated Practice With Organizations and Communities. (3 Credits)
This course prepares social work practitioners who operate within and through frameworks of human rights, social, economic and environmental justice, and empowerment practices. Learners will be trained to engage in social change at all levels of society in order to become social workers who are committed to equity all forms. By cultivating advanced community and organizational practice skill development, the course focuses on transforming and enhancing capacities in communities and organization through inclusive and collaborative strategies while increasing access to resources innovations and collaborations. A multidimensional model of organizational and leadership practice within a macro practice lens is used to organize and integrate theories, research, and content. Emphasis is on learning to implement changes within macro level contexts that is consistent with social work values, human rights, social justice and equity.
Attribute: SWOC.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6624. Int Social Dev-Global Cxt. (3 Credits)
This course aims to expand students' understanding of the global context and to equip students to work with diverse communities locally or internationally. International social development increasingly becomes the core component of change, hence the essence of social work as a profession with international coherence and global reach. As small communities everywhere are part of a larger machinery affecting the social and economic tapestry of the world, it is crucial for social work professionals to gain a better understanding of significant global issues, and to be prepared to engage in global social development, as agents of change. The course will focus on enhancing students' skills in the areas of community building; community needs assessment and capacity mapping; community organizing; stakeholder analysis; and advocacy. The course is designed around the following themes: (1) international social development and social work theoretical perspectives and the roles of a social worker in the global context; (2) globalization, global issues and the consequences of these issues for communities and their residents from an international perspective; (3) human rights and the implications of choosing to become an agent of change from a human rights perspective; and (4) international social development current approaches; best practices and future trends. This is an administrative elective.
Attribute: SWPP.

SWGS 6625. Fundraising. (3 Credits)
A significant portion of work in the social welfare arena involves the nonprofit sector, which depends on philanthropic resources and public funding to function and survive. Resource development in the nonprofit sector relates to every dimension of social work practice. On a micro level, funding supports the direct services provided by social workers and other human service professionals. On a macro level, organizational administrators and community leaders collaborate with foundations and other philanthropic entities to support organizational, community, and societal change. This course introduces students to resource development and stewardship via two predominant channels: fundraising and grant making. The course emphasizes supporting the well-being of vulnerable populations. In addition to the development of foundational knowledge and concrete skills, the course conceptualizes philanthropy and fundraising within the framework of human rights, social justice and the NASW Code of Ethics.
Attribute: SWOC.

SWGS 6626. Social Innovation: Theory and Practice for Change Makers. (3 Credits)

SWGS 6627. Leadership and Macro Practice 1. (3 Credits)
frameworks of human rights, social and economic justice, and empowerment. Our students will become social workers who are committed to social change in all forms, transforming and building capacities in communities and organizations, through inclusive and collaborative strategies, via anti-oppressive practices, increasing access to resources, innovations, and collaborations.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6628. Leadership and Macro Practice 2. (3 Credits)
The two-semester Leadership and Macro Practice course prepares social work practitioners who operate from the frameworks of human rights, social and economic justice, and empowerment. Our students will become social workers who are committed to social change in all forms, transforming and building capacities in communities and organizations, through inclusive and collaborative strategies, via anti-oppressive practices, increasing access to resources, innovations, and collaborations.

SWGS 6702. Advanced Integrated Policy Practice. (3 Credits)
This advanced policy practice course builds on the competencies acquired in the foundation year. The course introduces a rights-based approach to policy practice and advocacy. Using human rights principles, students will learn how to use specific policy analysis frameworks to plan for and develop advocacy strategies that facilitate social change. Students will learn and apply specific advocacy skills, addressing policy issues in community, organization, and legislative settings.
Attribute: SWPP.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6705. Comparative Social Policy and Advocacy. (3 Credits)
This course explores the similarities and differences among helping systems in the United States and other societies. This includes consideration of historical, economic, political, and social forces which influence the nature and functioning of those systems. Other topics covered include social development and the globalization of social problems.
Attribute: SWPP.
SWGS 6715. Health Care Policy and Advocacy. (3 Credits)
This advanced policy practice course builds on the competencies students acquire in their generalist year. The course focuses on health care policies and advocacy and expands upon the rights-based approach to policy practice in health care. Students will actively participate in analyzing existing disparities in health and health care and the causes of these disparities by reviewing the evolution and interactions of federal, state, local government, and private policies. The course will address the current system and its challenges and opportunities, highlighting the importance of affordability, accessibility, quality, and availability. Students will learn to apply rights-based advocacy skills, addressing policy issues in community, organizational, and legislative settings.
Attribute: SWPP.

SWGS 6801. Social Work Practice in Research 1. (3 Credits)
This course introduces students to social work research. It focuses on the scientific method from the process of developing knowledge to critically evaluating research. This course focuses on: problem formulation; research methodology, including study design, sampling, measurement, and data collection; and ethical issues in research.

SWGS 6802. Social Work Practice in Research 2. (3 Credits)
In this second course in the foundation research sequence, students implement the proposed class research projects. The course includes content on data collection and analysis, how to interpret the theoretical and practical meaning of findings for social work practice, and how to report on and present data. Basic computer skills and statistical concepts (SPSS) are presented through 'hands on' training in the computer laboratory.
Prerequisite: SWGS 6801.

SWGS 6803. Applied Social Work Research and Evaluation. (3 Credits)
This course introduces students to social work research. It focuses on the scientific method from the process of developing knowledge to critically evaluating research. Students will learn about formulating a research question; research methodology, including study design, sampling, measurement, and data collection methods; ethical issues in research; and understanding how to read and understand research reports and publications.

SWGS 6805. Science and Psychotherapy. (3 Credits)
This course explores the interconnections of science and the practice of psychotherapy. Topics include psychotherapy outcome, process, and neuropsychological research; the debate over manualized therapy and common factors; clinical use of measures; research on the impact of gender identity, race/ethnicity, sexual orientation, and social class on therapy process and outcome; and implications of psychotherapy research for the diverse practice roles of social workers.
Attribute: SWRE.

SWGS 6806. Program Evaluation. (3 Credits)
The use of evaluative research in social welfare planning, program development and theory building is examined. Recent evaluations of social work practice, including interventions on a social policy, neighborhood, family and individual level, are reviewed. Traditional research designs are considered, but emphasis is placed on emerging models of evaluation. Course is appropriate for students preparing for direct service practice. Note: Research students, with approval from the director of the doctoral program, may enroll in the SWGS 7000 course listed in the Doctoral Course Offerings.
Attribute: SWRE.

SWGS 6807. Qualitative Inquiry in Social Work Practice. (3 Credits)
This course is devoted to qualitative inquiry in social work as a method to promote individual and community well-being and empowerment. Students will become more competent in using a variety of traditional and emerging qualitative approaches. These methods include narrative, phenomenology, grounded theory, ethnography, practice and arts-based action, and participatory action research. The course prepares students to engage in qualitative research aiming to explore the issues experienced by oppressed individuals, groups, and communities. The course also addresses how to translate research findings into practice.
Attribute: SWRE.

SWGS 6812. Advanced Research I. (3 Credits)
This is the first of a two-course sequence in which students design and conduct an original research project submitted as a master's thesis. The course focuses on techniques of a literature review, definition of a research problem, hypothesis formulation, design of data collection instruments and writing a research proposal. Prerequisite: SWGS 6805 (unless a waiver has been obtained by examination); concurrent field practice required.

SWGS 6813. Advanced Research II. (3 Credits)
This is the second of a two-semester sequence in which each student completes an original research project as a master's thesis. The course focuses on advanced data analysis using statistical software, including data management, data transformations, presentation of data using tables and graphs and report writing. Prerequisites: SWGS 6805 (unless a waiver has been obtained by examination) and SWGS 6812; concurrent field practice is required.

SWGS 6814. Advanced Integrated Practice Evaluation and Research. (3 Credits)
This course focuses on intervention and program evaluation research. Students will develop skills in designing evaluation strategies to provide evidence for practice. The course will include how to critically analyze, monitor, and evaluate interventions and program processes and outcomes. Application of findings to improve practice effectiveness at the micro, mezzo, and macro levels will be discussed.
Attribute: SWRE.
Prerequisites: SWGS 6322 or SWGS 6324 or SWGS 0000.

SWGS 6901. Fieldwork and Integrative Seminar 1. (3 to 4.5 Credits)
Actual practice with a limited work load under close supervision designed to assist the student in applying theory to practice and to enable the student to master fundamentals of generalist practice. Includes 10 two-hour seminar sessions. Fourteen hours per week from September through July; 21 hours per week from September through May.

SWGS 6902. Fieldwork and Integrative Seminar 2. (3 to 4.5 Credits)
Actual practice with a limited work load under close supervision designed to assist students in applying theory to practice and to enable students to adapt fundamentals of practice to a particular concentration and field. Includes 10 two-hour seminar sessions. Prerequisite: SWGS 6901; Advanced Standing students are exempt from this prerequisite. Fourteen hours per week from September through July; 21 hours per week from September through May.

SWGS 6903. Fieldwork & Is 1 Online. (3 or 6 Credits)
Fieldwork & Is 1 Online.

SWGS 6904. Fieldwork & Is 2 Online. (3 to 9 Credits)
Fieldwork & Is 2 Online.
SWGS 6907. Field Practicum Laborato. (0 to 3 Credits)
This required laboratory course for students who enter as experienced employees in the human services complements the Generalist Social Work Practice with Individuals, Families and Groups I and II. The focus is on the integration of classroom learning with practice. Assignments are closely related to issues covered in these practice classes. Class participation, process recording, presentations, role-playing and focused journal writing are important tools in the course. Upon satisfactorily completing this course, students will receive three credits and will be eligible for SWGS 6908, Combined Field Work in the following academic year.

SWGS 6908. Combined Field Work. (7 or 8 Credits)
Open only to students admitted to the Experienced and Employed Social Service Practitioner plan, this course combines a review of fundamentals of practice with a focus on applying fundamentals in a particular concentration and field of practice. Students are in placement 28 hours per week from September through May, and are required to attend 10 two-hour seminar sessions during the work day or in the evening.
Prerequisite: SWGS 6907.

SWGS 6911. Foundation Field Instruction. (0 Credits)

SWGS 6912. Advanced Field Instruction. (0 Credits)

SWGS 6918. Combined Field Instruction. (7 or 8 Credits)

SWGS 7002. Adv Stat in Soc Welf. (3 Credits)
Building on SWGS 7012, this course covers such topics as ANCOVA, MANCOVA, linear regression methods, logistic regression, and an introduction to path analysis. The course links theory, statistics, hypothesis testing and measurement. Students are expected to be proficient in the use of SPSS statistical package.

SWGS 7003. Qual Meth SW Research. (3 Credits)
This course explores the conditions under which qualitative research methods are desirable and feasible, the nature of qualitative information, and the relationship between the researcher and the research subject. Methods of qualitative research, as well as the process of developing inferences from findings are examined.

SWGS 7004. Philosophy of Science. (3 Credits)
This course examines theory and theory development and their roles in social work. Focus is on social work epistemology, salient issues in social work theory, and the critical appraisal of ways of knowing.

SWGS 7005. Theories of Social Work. (3 Credits)
This course explores, critically examines and compares the major theories of social work practice with individuals. It covers the historical contexts in which theories emerged, their underlying assumptions and their empirical support. The course draws on the works of major social work thinkers as it spurs students to consider implications for theory development and research.

SWGS 7006. Program Performance/Practice. (3 Credits)
Evaluation of program performance and practice.

SWGS 7007. Advance Social Work Practice. (3 Credits)
This course focuses on the use of translational research, development, evaluation research, and complex and chaotic systems theories to advance social work practice. The focus will be on social work practice within a human rights and social justice framework in diverse settings with marginalized and diverse populations (i.e., agencies, hospitals, residential settings, and communities).

SWGS 7008. Family and Group Work. (3 Credits)
This course parallels in format and structure SWGS 7005. In it, students examine the major theories of group work and family practice, the evidence base for practices, and innovations in practice, research and theory.

SWGS 7011. Statistics Lab. (0 Credits)
This lab class is taken with SWGS 7012, Statistics I.

SWGS 7012. Statistics I. (3 Credits)
This course introduces the statistical techniques most commonly used in social welfare research. The course will include the following topics: an introduction to descriptive and inferential statistics, level of measurement, frequency distribution, cross-tabulations, measures of central tendency, parametric vs. nonparametric statistics, normal curve, z scores, confidence intervals, introduction to significance testing, t scores, chi square, correlation and one way ANOVA. Computer analysis using statistical software is taught with an emphasis on interpretation of results.

SWGS 7013. Statistics 2 Lab. (0 Credits)
This lab class is taken with SWGS 7002, Statistics II.

SWGS 7102. Organizational Theory. (3 Credits)
This course examines the major theoretical perspectives that describe and explain organizational behavior and organizational processes, including classical, human relations, political economy and organizational culture approaches. Emphasis is placed on the application of organizational theory to human service organizations and the management of them.

SWGS 7200. Soc Pol Theo & Analysis. (3 Credits)

SWGS 7202. Bioethics Principles. (3 Credits)
This course will include an overview of the philosophical foundations of the principles of medical ethics and present a methodology for their employment in the attempted resolution of these questions. Of particular importance will be consideration of the issues of patient and professional autonomy, confidentiality, informed consent, distributive justice and the movement toward managed care, euthanasia and physician assisted suicide. The course will be conducted as a seminar centered on the analysis of case studies.
Attribute: HECS.

SWGS 7300. Internship. (3 Credits)
This course or SWGS 7301 provides social work experience for non-M.S.W. doctoral students in a research, policy-making or educational setting. Can be taken during a regular semester or during the summer semester for 140 hours.

SWGS 7301. Internship. (6 Credits)
This course provides experience for non-M.S.W. doctoral students in a research, policy-making or educational setting. It can be taken for two semesters, during the academic year or summer session, for 280 hours in lieu of SWGS 7300.

SWGS 7302. Internship. (0 to 6 Credits)
This two semester course provides experience for doctoral students in a practice, research, policy-making or educational setting. It can be taken for two semesters during the academic year or summer session, in lieu of SWGS 7300 or 7301.

SWGS 7408. Indep't Stud Child/Fam. (3 Credits)
This course is designed to assist students in further developing their understanding of problems and issues in services to children and families. The student, with the aid of a mentor, will select one area of special interest for extensive reading, study, and investigation.

Updated: 07-27-2020
SWGS 7409. Child & Family MH Policy. (3 Credits)
This course examines current research in policy, service delivery and practice in mental health and with children and families. Emphasis is placed on the identification of necessary knowledge, research gaps and the application of effective research methods. This course may be substituted for SWGS7403 or SWGS 7614 in the curriculum.

SWGS 7502. Pol Dev Impl Elderly. (3 Credits)
This course focuses on major policies determining entitlements for older persons in the United States, roles of governmental and private sectors, inequities in American society affecting older persons. A second focus is on comparative analysis of gerontological social policy in other countries, including Third World nations. A third component is the synthesis of strategies for effective social policy for older persons.

SWGS 7503. Research Iss Aging. (3 Credits)
This course includes a survey of practice and theoretical knowledge of aging developed through research efforts. Work will focus on the content and the methodology of research studies and their contributions to policy, practice and policy in the field of aging. Emphasis is on identification of knowledge in aging and application of research methods.

SWGS 7508. Theories Prac Older Pers. (3 Credits)
This course will focus on different theories on aging and the range of programs which have developed to meet the differential needs of older people. Practice issues relevant to diverse older populations such as the frail elderly; healthy, active older persons; ethnic and racial minorities; and isolated persons will be discussed. Emphasis will be placed on emerging theories on aging and research efforts designed to expand knowledge of the aging process.

SWGS 7509. Indepn't Stud in Geronto. (3 Credits)
This course is designed to assist students in further deepening their understanding of problems and issues in gerontology. The student, with the aid of a mentor, will select one area of special interest for extensive reading, study and investigation.

SWGS 7605. Social Work Education. (3 Credits)
This course examines the principles, policies, philosophies and processes of learning and teaching in social work. It reviews the historical evolution of social work education and develops implications for classroom and field instruction. Attribute: SOIN.

SWGS 7606. Tchng for the Profession. (3 Credits)
This course examines in depth the philosophy, principles, processes and pragmatics of teaching and learning in classroom and field setting. Emphasizes 1) educational concepts, premises, models, frameworks and 2) planning effective curriculum and teaching strategies.

SWGS 7610. Women and Poverty. (3 Credits)
This course will focus on low-income women in the USA. Attending to the multidisciplinary dimension of race, class and gender, the course will explore ways in which poverty affects quality of life, opportunities, choices and human potential. Contemporary policy issues will be explored and varied social change strategies critically analyzed for their potential in achieving economic justice for women.

SWGS 7616. Ind'l Study in Mental He. (3 Credits)
This course is designed to assist students in deepening their understanding of problems and issues in mental health. The student, with the aid of a mentor, will select one area of special interest for extensive reading, study and investigation.

SWGS 7620. Theories in Mh/Psych Dev. (3 Credits)
This course covers topics related to data management and analysis, including using data files, calculating sample size, preparing data analyses plans, and maintaining the quality of one’s data at each phase of the research enterprise.

SWGS 7680. Attribute: SOIN.
This course examines current research in policy, service delivery and practice in mental health and with children and families. Emphasis is placed on the identification of necessary knowledge, research gaps and the application of effective research methods. This course may be substituted for SWGS7403 or SWGS 7614 in the curriculum.

SWGS 7781. Poverty and Race. (3 Credits)
This course provides an overview of U.S. social policies. It reviews the evolution of American social welfare policies, social welfare theories, and examines the condition, conceptual framework and empirical evidence of policies that target poverty in the United States. Particular emphasis is placed on the impact of policies on marginalized and disenfranchised populations.

SWGS 7782. Policy Implementation. (3 Credits)
Drawing on theories of implementation and innovation, this course provides an in-depth examination of policy implementation in different fields of practice. It focuses on factors that promote and hinder policy implementation, as well as the historical contexts in which major policies have been implemented.

SWGS 7783. Policy Analysis Seminar. (3 Credits)
Using available frameworks for policy analysis, this course encourages students to critically analyze existing policies. It considers the implications of these analyses for the study of policy development, implementation and evaluation.

SWGS 7791. Advanced Seminar I. (1 or 2 Credits)
Concurrent with or following their advanced year research methods and specialization courses, all students take three advanced seminars. A faculty member with expertise in children and families, gerontology, or mental health research leads each seminar. The purpose of the seminars is to expose students to current research issues and methods in these substantive areas. In the process of examining such topics as the state of knowledge in each field, debates and controversies, research design, and emergent policy and practice themes, students are helped to develop and refine their research and scholarly interests in ways that lead to dissertation ideas.
SWGS 7792. Advanced Seminar II. (1 or 2 Credits)
Concurrent with or following their advanced year research methods and specialization courses, all students take three advanced seminars. A faculty member with expertise in children and families, gerontology, or mental health research leads each seminar. The purpose of the seminars is to expose students to current research issues and methods in these substantive areas. In the process of examining such topics as the state of knowledge in each field, debates and controversies, research design, and emergent policy and practice themes, students are helped to develop and refine their research and scholarly interests in ways that lead to dissertation ideas.

SWGS 7793. Advanced Seminar III. (1 or 3 Credits)
Concurrent with or following their advanced year research methods and specialization courses, all students take three advanced seminars. A faculty member with expertise in children and families, gerontology, or mental health research leads each seminar. The purpose of the seminars is to expose students to current research issues and methods in these substantive areas. In the process of examining such topics as the state of knowledge in each field, debates and controversies, research design, and emergent policy and practice themes, students are helped to develop and refine their research and scholarly interests in ways that lead to dissertation ideas.

SWGS 7800. Research Practicum. (0 Credits)
This one semester course is designed to provide advanced year students with practical experience in social work research. Students are expected to work under the supervision of a faculty member on some aspect of an ongoing research endeavor.

SWGS 7801. Teaching Practicum. (0 Credits)
This one semester course is designed to provide advanced year students with practical experience in teaching at a graduate or undergraduate level. Students may fulfill this requirement by teaching a graduate or undergraduate level course or by working as a teaching assistant for a faculty member for seven hours per week.

SWGS 7950. Doctoral Foundation Seminar I. (3 Credits)
SWGS 7960. Foundations Seminar II. (3 Credits)
Part II of a two semester course that will orient first year doctoral students to the social work scholarly community. The course will cover topics such as: Understanding human rights, social, economic and environment justice; Ecosystem and micro/mezzo and macro perspectives.

SWGS 8999. Independent Study. (3 Credits)

Social Work (undergraduate) (SOWK)

SOWK 2600. Introduction to Social Work and Social Welfare. (4 Credits)
Introduction to values, knowledge and skills of social work professions. Focus on historical and contemporary rules and relations of social work profession. Also includes social welfare history and policy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

SOWK 2999. Tutorial. (2 Credits)

SOWK 4999. Tutorial. (1 to 4 Credits)

SOWK 5005. Contemporary Social Welfare Policy. (3 Credits)
Students will learn that human rights and justice drive social welfare policies and their implementation at the international, federal, state, and local levels. The course introduces students to the underlying values, assumptions and philosophical perspectives that have influenced the development of the US social welfare system, its goals, policies and programs. Students will learn about policy formulation, analysis, and the role of social work in policy development and implementation within their practice settings at the micro, mezzo, and macro levels. The course introduces students to the historical, social, cultural, political, economic, organizational, environmental, and global influences that affect social policy.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6040. Integrating Human Rights and Justice in Practice. (3 Credits)

Every person regardless of position in society or geographic location has fundamental human rights such as freedom, safety and security, privacy, an adequate standard of living, health care, and education. This course introduces students to how social workers may conceptualize the global intersections and interconnections of justice, equality and human rights. Students are introduced to an integrated practice framework that promotes human rights and justice and identifies the root causes of global social issues. They will explore theories that address human need, social, economic, and environmental justice, intersectionality, diversity, and oppression and discrimination. In this course, students learn how to recognize the extent to which a culture's structure and values, including social, economic, political, and cultural exclusions, may oppress, marginalize, alienate, or create privilege and power. Students learn to engage in advocacy to advance human rights social, economic, and environmental justice domestically and internationally.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6305. Social Work Skills Lab. (3 Credits)
This skill-based course is anchored in the knowledge of generalist social work practice. Students will develop competency in performing essential social work skills via simulations, role-plays and peer activities. These skills will be applied to working with client systems including individuals, families, groups, communities and organizations. Case scenarios developed for this course will reflect the realities of contemporary social work practice. The emphasis will be on student performance in using the engagement and intervention skills with various client systems.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6320. Social Work Practice With Organizations and Communities. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with organizations and communities. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with organizations and communities.

Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.
SOWK 6323. Social Work Practice With Individuals Across the Lifespan. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with individuals. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with individual clients. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with individuals.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6324. Social Work Practice With Families and Groups Across the Lifespan. (3 Credits)
This course uses a generalist framework to prepare students for direct social work practice with families and groups. Learners explore the theories, knowledge and fundamental skills necessary to practice successfully with families and groups. Students will learn the multiple phases of practices from engagement through termination. Students will be introduced to the ethical and legal obligations that guide social work practice with families and groups.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6440. Advanced Clinical Assessment and Diagnosis. (3 Credits)
The course builds on the skills, values, knowledge and processes of the generalist curriculum, serving as a bridge between generalist and advanced assessment theory and practice. Specifically, the course extends the person-in-environment assessment perspective of Generalist Practice with the addition of more intensive assessment of the individual’s inner world, including psychodynamic conflicts processes and ego defenses. The course is entitled “Advanced Clinical Assessment and Diagnosis” rather than “Psychopathology” to remind students that clinical assessment need not lead to a diagnosis of mental illness. The course covers practitioner self-awareness; the relationship between mental health and mental illness; risk and resilience; bio-psycho-social-spiritual assessment; a strength-informed cooperative assessment process; a critical use of the DSM-5, and major types of mental illness and their evidence-supported treatments.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6803. Applied Social Work Research and Evaluation. (3 Credits)
This course introduces students to social work research. It focuses on the scientific method from the process of developing knowledge to critically evaluating research. Students will learn about formulating a research question; research methodology, including study design, sampling, measurement, and data collection methods; ethical issues in research; and understanding how to read and understand research reports and publications.
Prerequisites: SOWK 2600 or SSCI 2600 or SOCI 2600.

SOWK 6901. Fieldwork and Integrative Seminar 1. (4 to 5 Credits)
Actual practice with a limited work load under close supervision designed to assist the student in applying theory to practice and to enable the student to master fundamentals of generalist practice. Includes 10 two-hour seminar sessions. Fourteen hours per week from September through July; 21 hours per week from September through May.

Sociology (SOCI)

SOCI 1025. Sociology of American Culture. (3 Credits)
A course for international students that introduces them to the study of American culture and identity; readings from the social sciences, literature, and history.
Attributes: ACUP, ADVD, AMST, APPI, ASHS, ESL, PLUR, SSCI.

SOCI 1050. Sociology Focus. (3 Credits)
Sociologists are concerned with the production of personal identity through cultural practices. In the contemporary Western context, we imagine ourselves to be individuals who are free to invent and reinvent ourselves— to ‘be all we can be.’ This ideology of self-invention, and the related value of self-reliance, have profound implications for how we live our lives, and for how we understand the lives of others. Students will investigate questions of agency and interdependence through critical readings of the autobiographies of Benjamin Franklin, Frederick Douglass, Helen Keller and others. Key sociological frameworks of analysis will be drawn from the work of George Herbert Mead, C. Wright Mills, Erving Goffman, Michel Foucault, and Nikolas Rose. Selected readings from critical disabilities studies (e.g. Robert McRuer and Rosemary Garland Thomson) will also inform course discussions.
Attributes: FRSS, SSCI.

SOCI 1100. Introduction to Sociology. (3 Credits)
An introduction to sociology with a focus on its nature as a scientific discipline. The analysis of society through the use of sociological theories, concepts, and methods. This course is required prior to all other sociology courses and seeks to stimulate students to continue to deepen their understanding of societies.
Attributes: FRSS, SSCI.

SOCI 1999. Tutorial. (1 to 3 Credits)
Independent research and reading with supervision from a faculty member.

SOCI 2200. Sociology of Culture. (4 Credits)
‘Culture’ is a people’s entire way of life expressed in language, art, law, religion, and other collective practices such as work, leisure, sports, food, and dress. Aspects of contemporary cultures including multiculturalism groups identity, and global consciousness are studied. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASHS.

SOCI 2300. Social Networks. (4 Credits)
This is not a course about social media but about social structure. The heart of the social network approach is the insight that people are interdependent, and the fact that social structure emerges from regularities in this interdependence. Thus, our social networks shape our information, opportunities, values, and behavior. In this course, we will analyze social networks of various kinds with a focus on the structure of relationships (offline as well as online) and their consequences. The social network approach has been used to model friendship patterns, the spread of diseases or ideas through populations, the rise of social movements, the structure of terrorist cells, how we find information, and the structure of markets, among other topics. What this research has in common is the fundamentally sociological focus on the ways behavior is shaped by the patterns of relationships among people, organizations, or ideas. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

SOCI 2410. Inequality: Class, Race, and Ethnicity. (4 Credits)
The recent history of the U.S. as a nation of distinct socioeconomic classes and the persistence of racial and ethnic conflict as a factor affecting inequality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, LALS, LASS, PLUR, URST.
SOCI 2420. Social Problems of Race and Ethnicity. (4 Credits)
This course explores the historical and contemporary issues surrounding the impact that race and ethnicity have in society. Students will examine how racial and ethnic criteria often guide important economic, political, and social decisions that affect access to resources by various groups and which usually have major consequences for the individual. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, LALS, LASS, PJIN, PLUR, URST.

SOCI 2505. Religion and Social Change. (4 Credits)
The course explores questions about religion and social change in domestic and international contexts and how religious institutions adapt to changes in gender roles, urbanization, migration, and religious and ethnic pluralism. What roles have religious movements, including fundamentalism, played in modernization? Students examine under what conditions religion is compatible with the global spread of democracy, environmentalism or individualist conceptions of human rights. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, INST, IPE, ISIN, PJJR, PJJSJ, PJST, REST.

SOCI 2606. Social Science Statistics. (4 Credits)
Introduces the student to the basic concepts of both descriptive and inferential statistics. Both models will be presented, their assumptions delineated, and their application to research in the social sciences emphasized. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, URST.

SOCI 2607. Social Science Research and Statistics. (4 Credits)
This course provides an overview of the methodological approaches used in the social sciences, both in terms of designing research studies, and analyzing and interpreting data. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: URST.

SOCI 2625. Data for Social Change. (4 Credits)
Data is a powerful tool that people and movements have often used to achieve social change. In this course, we will explore a number of case studies where grassroots movements and community change organizations have used data, alongside organizing and storytelling, to change policy and impact societal inequities. Students will also learn to work with data in spreadsheets and simple database formats, creating relationships between data points, perform simple yet powerful calculations, and then visualize and present this data in both charts and maps. Students will all contribute to a joint final report using NYC Open Data sources on a current and relevant topic. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

SOCI 2650. Basic Research Methods. (4 Credits)
A survey of the basic tools for data collection and research design. Focus on decisions involved in the selection of the research problem, research design and the interpretation of data. Methods to be explored include participant observation, survey analysis, content analysis and the case study approach. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: URST.

SOCI 2701. Introduction to Criminal Justice. (4 Credits)
An overview of the criminal justice system: law, its sociology, and its social and political functions. A critical examination of law enforcement agencies, the judicial system, and corrections. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, URST.

SOCI 2703. Social Deviance. (4 Credits)
The study of deviance is closely related to social power and social class. Deviance from, or conformity to, social rules or norms raises the question, Who rules? The study of deviance has been particularly concerned with issues of class, race, ethnicity, gender, and sexuality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: URST.

SOCI 2705. Criminal Justice Policy. (4 Credits)
This course provides an overview of policies instituted at each level of the criminal justice system including police, corrections and courts. The class will focus on evaluating the benefits, costs and possible consequences associated with these policies. Focus will also be placed on the development of criminal justice policy taking into consideration: history, context, theoretical frameworks, and political factors. Special topics that will be covered include evidence-based interventions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

SOCI 2716. Social Change. (4 Credits)
This course will critically analyze structural and cultural change in community and society; the rate, degree, mechanisms, and planning of change as well as major theories of social change. Social movements, historically, have been a major catalyst for change. Changes caused by global capitalism and the market economy in the late 20th and early 21st centuries, and reactions to these changes, will also be examined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

SOCI 2800. Sociological Theory. (4 Credits)
A survey of classical and contemporary theory that gives students a grasp of the history, nature, and significance of theory for the study of contemporary societies and sociocultural processes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS.
SOCI 2801. Social Theory at the Cinema. (4 Credits)
This survey of classical and contemporary theory looks at sociological analysis through the lens of mainstream and independent cinema. The course considers the history, nature and significance of theory for the study of contemporary societies and sociocultural processes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

SOCI 2845. Drugs, Law, and Society. (4 Credits)
This course examines the social organizations of illegal commerce in narcotics and other drugs, looking at this transnational business from the point of production to the points of consumption throughout the world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: URST.

SOCI 2847. The 60s: Sex, Drugs, Rock & Roll. (4 Credits)
The 1960's was one of the most tumultuous eras in American history, marked by a revolutionary movement led by youth struggling for freedom on many levels. African Americans, with white support, struggled against the oppression of racial segregation of the South in the Civil Rights movement: young people sought sexual freedom and the right to experiment with drugs; musicians broke away from the restraints of traditional pop and folk songs and created rock and roll; politically minded youth attacked the traditional institutions of political and economic power by protesting against the war in Vietnam; women challenged traditional male attitudes that confined them to domesticity or inferior status in the work place and in society; gays organized against the repressive laws and prejudices against homosexuality. This course will show how all of these social strands intertwined using films, music and writings from the era. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AMST, APPI, ASAM, ASHS, ASSC, WGSS.

SOCI 2850. Methods Social Research I. (4 Credits)
Students are introduced to the fundamentals of empirical research while actively being involved in the research process by conducting their own survey. The first course includes a survey of different methodologies used by social scientists. Students gain hands-on experience in writing a literature review, specifying a research question, developing research hypotheses, designing a questionnaire and collecting data through interviewing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: URST.

SOCI 2851. Methods Social Research II. (4 Credits)
The second course focuses on data analysis. Students learn simple descriptive and inferential statistics in conjunction with how to use the computer. These skills provide the basis for obtaining answers to research questions and testing hypotheses so that students can write their final research reports. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: URST.

SOCI 2855. The Journalist as Sociologist. (4 Credits)
Journalists and sociologists both closely observe society with the goal of making sense of complex interactions. Their methods and techniques overlap and inform each other's work, but they also differ in significant ways. In this class students will explore the intersecting and conflicting practices journalists and sociologists use to understand social organization. How does journalism benefit from sociological imagination? How can sociology be informed by the narrative methods of journalists? Students will study and produce journalism focused on social issues such as economic pressures in cities, neighborhood change, housing, immigration, racism, political participation, crime and social activism to understand how journalists use narrative and research, qualitative and quantitative techniques, to do a form of immediate, public, accessible sociology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ASSC.

SOCI 2925. Media, Crime, Sex, and Violence. (4 Credits)
Turn on the television set, pick up the local newspaper, go on the Internet or watch a movie. Wherever you turn, you will find the media saturated with stories about corrupt cops and honest cops, drug dealers and drug users, murderers and victims, organized crime and serial killers, crusading district attorneys and defense attorneys, corrupt lawyers and hanging judges, violent prisoners and convicted innocents. How accurate are these representations? What are the ideological messages and cultural values these stories communicate? In this course, you will learn how to demystify media representations in order to understand how and why they are produced, and who is responsible for their production. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, APPI, ASAM, ASHS, ASSC, PJMJ, PJST, URST, WGSS.

SOCI 2960. Popular Culture. (4 Credits)
This course will investigate the nature of contemporary popular culture. How do people spend their 'spare time'? Does this vary with social class? Is sport the new religion? And how does this differ from that of earlier periods and simpler societies? (Every year) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AMST, APPI, ASAM, ASHS, ASSC, URST.

SOCI 2965. Science Fiction and Social Crisis. (4 Credits)
In a dreamworld inhabited by battle weary heroes and heroines who confront alien forces, where machines find human beings disposable and wizards' spells sometimes fail, where madmen create monsters that threaten humanity, we enter a realm in which science fiction often stands as a metaphor for the human condition, resurrecting quasi-mythological perceptions that have all but vanished in our nonfictional scientific world. Through the use of selected readings, feature films and lectures, this course will examine the sociological insights that science fiction films and literature offer about how we live our lives in the 'here and now' of the post modern world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, AMST, ASHS, ASSC.
SOCI 2966. Imagining Other Worlds. (4 Credits)
Confronted as we are by many major social problems throughout the United States and the world, is it possible to even imagine a better society than the present one. Drawing on utopian texts and science fiction novels and films, student will work in teams to blueprint a small-scale community of their choice that improves upon one that presently exists. The students will examine specific social structure such as families, educational institutions, gender relations, and political power, etc. They will work together and conduct fieldwork such as interviews, photography of sites, and graphic designs, to make a presentation at the end of the course. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

SOCI 2999. Tutorial. (2 Credits)
Independent research and reading with supervision from a faculty member.

SOCI 3000. Latinx Images in Media. (4 Credits)
This class will analyze changing Latinx images in U.S. media. The emphasis will be on English-language film and television productions. Gender, color, and class issues will be examined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AMST, ASAM, ASHS, CCUS, COMC, COMM, LALS, LASS, PLUR, URST, WGSS.

SOCI 3001. Ethical Issues in Criminal Justice. (4 Credits)
This course focuses on normative and applied ethics as they pertain to the policies and practice of the U.S. criminal legal system. By the end of the course, students will be familiar with ethical issues that arise in our current system of law and justice (and adjacent systems such as child welfare and family court), the contexts in which ethical breaches take place, the consequences of ethical violations, and as mechanisms for preventing and addressing them. Students also will be introduced to a framework for ethical decision making. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, AMST, APPI, ASHS, ASSC, INST, ISIN, LALS, LASS, PJRC, PJST, URST.

SOCI 3017. Inequality in America. (4 Credits)
A study of the ways in which inequalities of wealth, power, and prestige are institutionalized in complex societies. Social class and social status as they relate to other aspects of social organization and the life chances of individuals. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AMST, APPI, ASHS, ASSC, INST, ISIN, LALS, LASS, PJRC, PJST, URST.

SOCI 3021. Sociology of Medicine. (4 Credits)
This course explores the social context of health, disease, and illness in American society. Thematic issues include the experience of illness, the medical (and other healing) professions, health care policy, and the relations between providers and patients. The effects of social inequality on health and health care delivery are probed throughout the course. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, ASHS, BESN, LPHP, URST.

SOCI 3044. Poverty and Community Development. (4 Credits)
This course is intended to provide students who have an interest in academic service learning with knowledge, skills and attitude they will need to shape their understanding of the socio-economic challenges of poverty, unemployment and inequality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ICC, PJEC, PJST.

SOCI 3046. International Sociology. (4 Credits)
An examination of the impact of globalization on worldwide social development goals; the formation of transitional families in Africa, Asia, the Americas and Europe; family strategies of migration for social and economic gain; and, policies to safeguard the human rights of transitional families. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: GLBL, HPSE, HUST, INST, IPE, ISIN, ISWH, LALS, LASS, URST.

SOCI 3054. Time, Memory, and Identities. (4 Credits)
Does the past shape the present or do demands of the present shape how the past is remembered? Does time exist outside of human society or is it socially constructed? What role does memory play in the way identities are shaped? This upper-level undergraduate course explores these and similar questions through the writings of scholars such as Maurice Halbwachs, Howard Schuman, Karl Mannheim, Robin Wagner-Pacifi, and Eviatar Zerubavel. The class will consist of lectures and discussions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ASSC.

SOCI 3066. Global Media: Race, Class, Gender and Ethnicity. (4 Credits)
This course will include readings on global media and pay particular attention to the representation and reception of racial, ethnic, gender and class groupings in mass media today. It will also examine how television programs exported from the US have affected basic social institutions, values and perceptions of race/ethnicity, class and gender in other countries, and in the US. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

SOCI 3067. Language, Media, Power. (4 Credits)
The main objective of this course is to understand the relationship between language, media, and society, with a particular focus on the power dimension of language. The course will explore the role of language in articulating, maintaining, and subverting power relations in society, in terms of racial, gender, and class hierarchies. We will look at the dialectic relationship between language and society: language as a social practice both influences and is influenced by the structures and forces of contemporary social institutions. We will analyze the role of media in the construction and maintenance of discourses, how a particular frame is constructed and reinforced, and the social consequences of such frames. We will analyze the language on immigration, the language on reproductive rights, and the language on poverty, as paradigmatic case studies to understand the power dimension of language and media in the United States. We will also look at the role of social movements in the construction of language, and the public struggles over framing and meaning. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ASSC.

Updated: 07-27-2020
SOCI 3070. The City and Its Neighborhoods. (4 Credits)
The course will introduce students to current debates about the urban experience. We will explore a variety of themes, including immigration, race, and ethnicity, urban culture and history, urban sociology and anthropology, urban politics and policy, and urban planning. The class will help students readily available sources of data to ‘discover’ New York City neighborhoods. The class will include several outings to different New York City neighborhoods. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, LALS, LASS, URST.

SOCI 3102. Contemporary Social Issues and Policies. (4 Credits)
Global issues such as world hunger, human rights, and nuclear war, as well as American issues concerning inequalities of wealth, civil rights, crime, family, and the role of government, are examined in this course. In addition to gaining an understanding of the social, political, and economic dimensions of these issues, students will carefully consider underlying value principles and religious ethics. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, INST, ISIN, LASS, LPGP, LPHP, PJRC, PJST.

SOCI 3110. Global Conflict: Wars/Religion. (4 Credits)
Around the world, religion motivates both peace and justice efforts as well as lethal conflict. In this course, we explore the sociological context of these paradoxical dynamics and the promise of world movements aimed at a dialogue and nonviolence. An interdisciplinary perspective will introduce the student to the classical sociological studies of religion and conflict, contemporary issues of globalization, and the challenge of peaceful resolution. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, HPSE, HUST, INST, IPE, ISIN, LALS, LASS, MEST, P JIN, PJRJ, PJST, PJWT.

SOCI 3114. Sociology of Health and Illness. (4 Credits)
This course will focus on health, illness, and medicine from a sociological perspective. It will provide students with an overview of the development of medicine as in institution, the impact of medicine on society, the socialization of health care practitioners, the social determinants of health and illness, healthcare policies in the U.S. and around the world, and patients' experiences with illness. By the end of this course, students will be able to: (1) develop an understanding of the ways in which society and medicine influence each other, (2) connect multiple social factors with people's health, and (3) grasp the construction of diverse illness identities in patients with chronic diseases. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, ASSC, BESN, BIOE, DISA.

SOCI 3120. Controversies in Religion and International Relations. (4 Credits)
This course examines religious and secular organizations' involvement in international policy domains such as development, humanitarian aid, human rights, STI prevention, and biological reproduction, with special attention to tensions that emerge over competing religious and cultural frameworks. We will explore how different perspectives-economic, medical, human rights, security, justice-variably prioritize or marginalize different voices, ethical considerations and potential solutions to the social problems we examine. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASRP, ASSC, BESN, WGSS.

SOCI 3136. Inequality-Why/Effects. (4 Credits)
What are the causes and consequences of inequality? Special consideration is given to the inequalities associated with class, sex and racial/ethnic membership. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, LASS, LPGP, PJRC, PJST, PLUR, URST.

SOCI 3142. Environmental Sociology. (4 Credits)
This course provides an overview of the central debates in environmental sociology. We will examine the relationship between human societies and the natural environment as well as current environmental issues and relevant events from a sociological perspective. Some of the key questions that we will address include how pollution levels, waste management and resource depletion are distributed across key social categories; how societies respond to environmental risks and disasters; and how can we achieve more effective and equitable policies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, ENST, ESEL, ESHC, PJEN, PJST, URST.

SOCI 3145. Environment Technology Society. (4 Credits)
An introduction to the origins, breadth and present-day relevancies of environmental sociology. Topics include contextual analyses of philosophies of nature, historical emergence of industrial society - the nature of the materials cycle, cultural and cinematic (key films) analyses of environmental crisis, specific hands-on case studies, today's challenges and social movements, all this to bridge sociology and the natural and social sciences. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, ENMI, ENST, ESEL, ESHC, PJEN, PJST.

SOCI 3148. Population and Economic Development Issues. (4 Credits)
An examination of the interrelationships among development, population growth and migration. Fertility and migration (including urbanization) in the Third World will be reviewed in the context of development perspectives. The determinants and consequences of fertility and migration and their policy implications will be considered in a number of development sectors. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, GLBL, HPSE, HUST, INST, IPE, ISIN, LALS, LASS, PJEC, PJST, URST.
SOCI 3149. Economic Sociology. (4 Credits)
Economic sociology is the study of how the economy intersects with our culture, institutions, and social context. In this course, we seek to understand how economic activity, including the organization of production and consumption and the allocation of work, goods and profits and other scarce resources, is shaped by social relations. We will analyze the institutional and social foundations of markets and other mechanisms that facilitate the interaction of individuals, groups, institutions, societies and their environments in making their livelihoods, covering a variety of topics including information and uncertainty, economic inequality and stratification, globalization, social networks in markets, finding jobs, black markets, the market for human organs, and corporate crime and malfeasance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LALS, LASS.

SOCI 3151. Sociology of Education. (4 Credits)
We spend a great deal of our youth in school. As taxpayers, our dollars provide major funding for school systems. Through a study of the current goals, functions, and structures of educational institutions, how these have changed over time, and how they are interrelated to other major institutions in society, students will gain insights into social factors affecting their own experiences and their responsibility as taxpayers, as future parents, and, for some, as future teachers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: LPGP.

SOCI 3152. Sociology of Sports. (4 Credits)
In all societies, sports and athletics are socially organized into official events, group rituals, tests of manhood, areas for the expression of political sentiments. In modern societies they have become major industries (and their players, cultural heroes and celebrities); spectator sports and their audiences are important features of post-industrial societies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, SJOR.

SOCI 3154. Political Sociology. (4 Credits)
This course will examine, discuss, and debate how power is distributed within and amongst groups on the local, national, and international levels. Some of the topics explored include the Elite, Pluralist, Marxist, Realist, and Corporatist perspectives; trends in democratization, voting, and political participation; the ideologies and utopian visions that sometimes motivate political action; the role of the media and special interest groups as agents of political socialization; and the global dominance of the West. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

SOCI 3149. Sociology of Health and Illness. (4 Credits)
This course takes a sociological perspective on health and illness, considering them not simply as biological or medical phenomena but products of complex social, economic, political, and cultural forces. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ASSC.

SOCI 3242. Mental Health and Human Rights. (4 Credits)
This multi-disciplinary course examines mental health institutions and practices through the lenses of human rights and civil liberties. Course material focus on social, political, and economic factors that have shaped accepted understandings and treatment of mental illness historically and into the present, and various ways that gender, race, class and sexuality have played into societal distinctions between sick and well. Some specific topics include forensic psychiatry, civil commitment, deinstitutionalization and homelessness, diagnostic inflation, coercive forms of treatment and social movements advocating for the rights of individuals who receive mental health intervention. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: PJRC, PJST.

SOCI 3249. For the Death of Me! Socio-Cultural Perspectives on Death and Dying. (4 Credits)
The primary goal of this course is to explore the social and cultural implications of the biological experience of human death and dying. Examples of topics that will be covered include: mortuary rituals and funerary behavior; the cultural construction of death, the effects of death on the social fabric, morning and bereavement, end-of-life issues, as well as ethical and moral issues relating to death. Throughout the course, we will examine the fascinating variety of social and cultural responses to the biological fact of death. In doing so, we will explore Anthropological and Sociological literature that seeks to explain or interpret that tremendous variety. The course will be cross-cultural in Its outlook and will require students to make conceptual connections between theoretical literature and empirical observations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, BESN.

SOCI 3255. Sociology of Media. (4 Credits)
This course examines the role of the media, particularly the news media, as a dominant institution in a contemporary democratic society. Students will examine news media content, the structure of news media organizations, and the relationship of news media organizations to other dominant institutions. The materials used for examination will be a variety of contemporary case studies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASAM, ASHS.
**SOCI 3256. Political Sociology in Film. (4 Credits)**
Film has played a central role in shaping the political landscapes of the 20th and 21st centuries and our collective understanding of them. The objective of this course is to enable students to read and analyze global and domestic politics through the medium of film an provide them with a firm grasp of theoretical and empirical issues in contemporary world politics from a sociological perspective. This course makes use of documentary, short-, and feature-length films to interrogate key themes in political sociology and analyze the most important political developments of our time. It also aims to provide students with an appreciation of the complex relationship between art and politics, history and mythology. Substantive areas of study will include: (1) terrorism and war (including civil war, military intervention, and the Cold War); (2) globalization, human rights, and ‘development’; (3) transnational and domestic social movements; (4) democratic and undemocratic political regimes; and (5) colonialism and imperialism. Readings will be drawn primarily from the field of sociology, but also from political science, history, and film and cultural studies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**Attributes:** PJGS, PJIN, PJRC, PJST, PLUR, URST, WGSS.

**SOCI 3260. Politics of Reproduction. (4 Credits)**
The biological reproduction of the human species is a complex process that engages all major institutions of society: family, religion, morality, health, economy, and government. Using cross-cultural and social historical materials, this course will examine cases in which the control over reproduction is contested, focusing on such issues as family limitation, new reproductive technologies, and child custody. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**Attributes:** PJGS, PJST, WGSS.

**SOCI 3406. Race/Social Construct. (4 Credits)**
This course concerns the evolution of racial typologies and classification system in the U.S. We will draw on a variety of texts from natural and social sciences, law, and literature to examine how ‘scientific’ typologies of race are actually more reflective of power dynamics and social hierarchies than biological or genetic differences. Our goal is to understand the continuing significance of race in terms of social and economic power, as well and individual self-conceptualizations and identity politics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**Attributes:** ADVD, AMST, ASHS, ASSC, LALS, LASS, URST.

**SOCI 3409. Race and Gender in Visual Culture. (4 Credits)**
This course will explore how different racial, engendered and class elements affect visual culture. Particular emphasis will be placed upon the cultural production in the Americas but this will be contrasted with other areas and regions from today’s globalized and migrant world. The students will be taught how to assess visual culture and the varying powerful and multi-faceted medium it represents. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**Attributes:** AMST, CCUS, COMC.

**SOCI 3410. Migration/Globalization. (4 Credits)**
The study of immigration and migration has become more important as the movement of people around the globe has increased in magnitude and frequency. The course will focus on migration in the context of globalization, that is, the growing integration of economics and societies around the world. We will also give attention to assimilation, transnationalism, the state and the regulation of immigrants and selected topics such as gender, culture and family. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**Attributes:** ASSC, HPSE, INST, LALS, LASS, PJRC, PJST.

**SOCI 3415. Development and Globalization. (4 Credits)**
This course will investigate development and globalization issues. Initially taking a broad theoretical approach and then delving into specific nation-state case study examples, students will be challenged to consider how globalization in terms of technology-based interconnectedness, cultural Westernization, economic liberalization, and political/social democratization is changing the lives of people throughout the world. Aspects of integration, assimilation, and reactionary movements and trends will be explored. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

**Attributes:** AMST, APPI, ASHS, ASSC, INST, IPE, ISIN, LASS, URST.
SOCI 3418. Contemporary Immigration in Global Perspective. (4 Credits)
Over the past decades, immigration has again transformed the United States. It is also producing significant changes in other countries, from the European nations that used to send their citizens to the United States more than a century ago, to oil-rich Middle Eastern states and developing nations. This class explores multiple questions related to immigration: Why do people migrate across international borders? Can states control migration, especially ‘unwanted’ migrants? We examine the policies that let some people in, while keeping others out and then consider incorporation, the process by which foreign ‘outsiders’ become integrated in their new home. Are immigrants and their children becoming part of the U.S. mainstream? What is the mainstream? The arrival of newcomers also affects the cultural, economic, political and social dynamics of the countries and communities that receive them. How do sociologists evaluate and theorize immigrant integration? Finally, the course looks at topical debates around membership, including citizenship. The large-scale movement of people raises questions about belonging, nationality, and social cohesion. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, HPSE, HUST, INST, ISIN, LALS, LASS, PJRC, PJST, PLUR, URST.

SOCI 3426. Race, Racism, and Whiteness. (4 Credits)
Normally approached from the standpoint of people of color, analyses of race and racism in America remain incomplete without a consideration of the particular historical, cultural, and epistemological dimensions of white experience. In this senior-level special-topics course, students will critically examine this legacy from an anti-racist perspective. After reviewing canonical observations about whiteness by Black intellectuals’ including W.E.B. Du Bois, James Baldwin, Frantz Fanon, and Bell Hooks, students will have an opportunity to consider more recent submissions to the field of critical whiteness studies, including the historical work of figures like Noel Ignatiev, as well as cultural analyses by figures like Richard Dyer. In addition to coming to a greater appreciation of the particularities and contradictory dimensions of whiteness (a category that, even in critical race theory, is often rendered as an abstract universal), students will work toward devising an understanding of what might constitute an effective anti-racist practice for white people today. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AMST.

SOCI 3427. Hispanics/Latinos in the USA. (4 Credits)
Explores the Hispanic mosaic in the U.S. Special emphasis is given to Hispanic education, culture and assimilation; the political significance of Hispanics; issues of gender, color and race, and work and the changing economy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMCS, AMST, ASHS, INST, ISLA, LALS, LASS, PLUR, URST.

SOCI 3456. Modern American Social Movements. (4 Credits)
Social movements in 20th-century America have been vehicles of political protest, social change, and sometimes also resistance to change. Under what circumstances are social movements successful and what has been their impact on American institutional life and popular culture? In addition to a general and theoretical assessment of social movements, this course introduces students to particular movements that have formed over such issues as alcohol consumption, racism, war, and abortion. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, LALS, LASS, PJEN, PJSJ, PJST, PLUR, WGSS.

SOCI 3460. Sociology of Emotion in Public Space. (4 Credits)
As we move from a print-oriented society to a visually-oriented society, display of emotion in mass publics establishes new forms of social interactions. The social arenas that we inhabit become real-life stages of presentation of self and observation of others, which ultimately establish imagined public communities that inform our perceptions of public life. This course explores social arenas such as public parks, memorials, stadiums, and public street life within the context of media, race, class, sex, culture, and the globalized community. Individual and group performances in these spaces establish dramas where authenticity is perpetually sought after in the hope of discovering life-affirming experiences. Through the use of selected readings, films, and lectures, the course emphasizes sociological insights on our role as participants in emotional dramas in public. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

SOCI 3470. Global Refugee Migration. (4 Credits)
This course is designed as a survey of the major issues associated with the subject of refugees. We shall proceed by dealing with a series of different themes including defining a refugee, causes of refugee situations, asylum and protection, emergency relief and non-governmental organizations, the impact of refugees on receiving countries, resettlement and repatriation. The last four weeks of the course will focus on the Middle East and Africa. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: INST, ISIN, PJST, PJWT.

Updated: 07-27-2020
SOCI 3471. Undocumented Migration. (4 Credits)
The undocumented category is technically not a “legal” category but is indirectly established by immigration law as it creates categories of admission. The number of undocumented immigrants began to increase after the 1965 amendments to the Immigration and Nationality Act of 1952, which restricted immigration from Latin America. Between 1990 and 2007, the number of undocumented immigrants living in the United States tripled but then stalled and declined slightly, perhaps as a result of the Great Recession. Although the majority of the undocumented are from Mexico and the popular stereotype is of migrants sneaking across the Southern Border, this category is composed of all individuals who entered the country without inspection, as well as visa overstayers; it thus includes people from every region of the world. The class will explore these dimensions and other aspects of the contemporary situation of undocumented immigration and immigrants in the U.S. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, LALS.

SOCI 3500. Contemporary Family Issues. (4 Credits)
This class focuses on the sociology of the family by exploring issues relating to the status and functioning of families in contemporary United States society. The issues examined include sexuality, childbirth, divorce and remarriage, domestic violence, links between generations and the current state of social policy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, LALS.

SOCI 3502. Work, Inequality, and Society in 21st Century America. (4 Credits)
How has the world changed and what will it look like in the future? How will it meet the needs of those entering the job market, & how can we democratically govern the conditions of the employment? This course examines the organization and development of labor markets and work in the contemporary United States. Topics will include the structure of occupations & the growth of service, information and ‘creative’ sectors: the changing character of jobs and the rise of ‘precarious’ labor: discrimination and access to opportunities: the interaction of gender, work and family; wages; income inequality & the provision of benefits like health insurance and retirement security; unions and movements for economic justice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ASSC, URST.

SOCI 3503. Work, Family, and Gender. (4 Credits)
This course examines how two key institutions in society – the workplace and the family – interact with one another. Special emphasis is placed on the critical ways that work-family balance and conflict are conditioned by gender. The course will cover the impacts – both negative and positive – of work demands upon individuals’ family lives, as well as the effects of family obligations upon workers and workplaces. Students will be familiarized with voluntary responses to work-family challenges on the part of individuals, families, and employers, as well as relevant public policies in the U.S. and around the world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, WGSS.

SOCI 3506. Diversity in American Families. (4 Credits)
This course focuses on the forms and structures of the family with emphasis on practices and ideologies, and how they vary by race/ethnicity, immigration status, gender, and sexuality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, ASSC, LALS, LASS, PLUR, WGSS.

SOCI 3507. Queer Theory. (4 Credits)
Drawing on aspects of poststructuralist theory to extend the critical insights of post-New Left movements for gender and sexual liberation, queer theory has since the mid-1990s become a major intellectual current in a variety of cognate fields including sociology, anthropology, women's studies, cultural studies, media studies, and more. In this senior-level special-topics course, students will familiarize themselves with key themes and debates in queer theory through a critical evaluation of canonical works by figures including Adrienne Rich, Eve Kosofsky Sedgwick, Judith Butler, Jose Esteban Munoz, and Lee Edelman, as well as through an assessment of the observations of detractors like Adam Isaiah Green. Following the work of jasbir Puar, the course will conclude with an analysis of ‘pink washing’ and the corresponding incorporation of queer issues into the hegemonic national projects of Israel and the United States. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, PLUR, WGSS.

SOCI 3601. Urban Poverty. (4 Credits)
This course deals with contemporary issues and problems in cities, with a special focus on residential segregation and urban poverty. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, LALS, LASS, LPGP, PJEC, PJST, PLUR, URST.

SOCI 3602. Urban Sociology. (4 Credits)
One of the most significant developments in human history has been the development of cities. This course will examine the evolution and contemporary characteristics of cities in sociological perspective. The course includes a descriptive overview of the growth and development of cities and a discussion of the current state of urban America. Particular attention will be paid to New York City. We will also analyze various theoretical approaches to understanding urbanization, such as the human-ecological and Marxist theories. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, APPI, ASHS, ASSC, LALS, LPGP, PJEC, PJST, PLUR, URST.

SOCI 3603. Urban America. (4 Credits)
This course offers an introduction to urban sociology and to the study of American urban society. Particular attention will be paid to New York City. Topics include the rise of “global” cities like New York, metropolitan growth and inequality, urban policy, and politics, patterns of class, racial, and ethnic group formation, and local community organization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASSC, PJRC, PJST, PLUR.
SOCI 3606. The Global City. (4 Credits)
What's so special about New York? Why have we come here? What binds so many diverse people together? The answer to these questions is usually contested, but the debate in urban sociology has increasingly had to do with the concept of the 'global city.' The globalization paradigm started in the 1970s when the importance of cities grew as the continued relevance of national boundaries was increasingly questioned. This class will trace the historical emergence of the global city, covering the economic restructuring of the 1970s, the central theoretical literature, and several thematic topics exploring new neighborhood dynamics, labor relationships, new forms of segregation and fragmentation, as well as changing issues in central aspects of urban life, such as public space, shopping and consumption, immigration, etc. We will maintain a special focus on New York City, and by the end, you will have your own answers to such timeless urban questions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, URST.

SOCI 3610. The Family. (4 Credits)
The study of American family patterns within the context of cultural variations throughout the world. Course will examine past myths about the American family; present trends in American family life, such as changing sex roles, new concepts of child rearing, and adjustment of kin networks to metropolitan settings; and newly emerging forms of marriage and the family. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, ASSC, WGSS.

SOCI 3621. Soc Iss Documentary Filmmaking. (4 Credits)
With wars and terrorism rampant throughout the globe, polarization in religion and politics, challenges to sexual freedom and democratic social movements, explosions of unimaginable wealth amidst unbearable poverty, and countless other social narratives both hidden and apparent, it is the documentary filmmaker in the trenches who records, analyzes, and preserves in word and image the momentous events taking place here and now. This course looks at the role of documentary filmmakers in today's society as they capture and expose to public view the great upheavals of our times and the power struggles that lie behind them. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASHS, ASSC, WGSS.

SOCI 3622. Film and Religious Experience. (4 Credits)
Film and the Religious Experience is designed to give students a lively and challenging introduction to the major themes of religion from a sociological perspective, using film as the catalyst. The course will combine lectures with group discussion inspired by screenings (comprising Hollywood classic and contemporary films, early silents, documentaries, and experimental works) and readings (foundational texts by Durkheim, Weber, and William James to more recent books such as Religion in Film, John R. May and Michael Bird, eds.). The focus will be on the Judeo-Christian tradition and the Americas, but will also include some discussion of Eastern religions and alternative/outsider communities.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS.

SOCI 3670. Hispanic Women. (4 Credits)
An examination of the changing roles of Hispanic women with regard to Hispanic men, motherhood, the labor force experience, sexual awareness, media myths, political and economic power and women's liberation. The structural position and changing concepts of Hispanic women in the Americas will be examined through the lenses of analytical work and literature. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LAHA, LALS, LASS, PLUR, URST, WGSS.

SOCI 3708. Law and Society. (4 Credits)
How and when did law originate? What functions does law serve to the society and to the individuals within that society? Students will examine theories of jurisprudence and alternative sociological perspectives dealing with selected legal and constitutional issues in the United States and Europe. Particular attention is focused on legal policy and social change. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC.

SOCI 3710. Violence and Politics. (4 Credits)
From the Battle of Blair Mountain to the recent explosion of riots in the wake of Darren Wilson's exoneration in Ferguson, Missouri, the story of American politics is indelibly marked by violence. Sometimes embraced, often denounced, but even more often sidestepped, debates about violence have tended to return (like all repressed phenomena do) with a frequency that only underscores their Importance. In this interdisciplinary undergraduate seminar, students will draw upon the insights of Sociology and other disciplines to assess America's social, historical, and cultural relationship to political violence. After reviewing theories of political violence by thinkers like Walter Benjamin and Carl Schmitt and subjecting foundational texts by figures like Thomas Jefferson and Louis Adamic to analytic scrutiny, students will consider important case studies including the historic split between Civil Rights and Black Power In the late 1960s, the Stonewall Rebellion of 1969, feminist engagements with violence after the second wave, and debates about violent tactics in the anti-globalization and Occupy movements. The course will conclude with an analysis of the ubiquitous and refracted forms of violence that pervade contemporary American culture (e.g. in video games) and an inquiry into recent police and vigilante violence against young Black men, including Oscar Grant, Trayvon Martin, and Michael Brown. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS.

SOCI 3711. American Criminal Justice. (4 Credits)
This seminar course focuses on the administration of criminal justice and its relation to society, the police, prosecutor, defense attorney, judge, jury and correction agency. Observations at the courthouse allow for examination of constitutional rights, plea bargaining, jury selection, insanity defense and media coverage. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, URST.
SOCI 3713. Criminology. (4 Credits)
This course surveys the state of knowledge and theories explaining criminal behavior and attempts to control it by society. Although the sociological perspective on crime is emphasized, class discussion and the text attempt to examine the subject from a multidisciplinary point of view, especially with respect to legal, biological, and psychological views of crime. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, LASS, LPGP, PJCJ, PJST, URST.

SOCI 3714. Terrorism and Society. (4 Credits)
This course examines the history and societal causes of terrorism in its many forms, and the state's and society's counter-terrorist response. Among issues to be examined are the nature of terrorist ideology and the source of support for, and opposition to, terrorism among the people that terrorists claim to represent. Other issues to be examined are prevention preparedness and emergency responses to terrorist attacks, and political, civil, and human rights challenges faced by countries dealing with terrorism in the 21st century. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, ASSC, HPSE, HUST, INST, IPE, ISIN, LPGP, MEST, PJST, PJWT.

SOCI 3720. Mass Incarceration. (4 Credits)
This course considers what the disciplines sociology, the law, public health, and social work contribute to our understanding of the causes and consequences of mass incarceration in the US. We will consider underlying assumptions about drug use, justice and punishment; how social forces (e.g., religion, the economy, Jim Crow, and politics) have shaped official responses to drug use and other social problems; and examine the social, legal, public health, and economic consequences of mass incarceration and the War on Drugs for individuals, families, communities, and contemporary society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, PJCJ, PJST, PLUR, URST.

SOCI 3730. Crime in Time and Space. (4 Credits)
One of the most consistent findings in criminological research is that crime is not evenly distributed within the environment. This begs the question: why is crime concentrated in certain areas, times and seasons? In this course, students will be introduced to the theoretical and empirical research that has attempted to explain these processes. Students will also be introduced to spatial analysis using geographic information systems software packages including ArcGIS. Special topics that will be covered include homicide, burglary, robbery, and assault. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, COMC, COMM, ICC, THEO.

SOCI 4004. Art Worlds: Anthropology and Sociology Perspectives. (4 Credits)
The study of culture generally, and art world more specifically, allows us to understand the arts not only as aesthetics experiences, but also as institutional, economics, social, and political phenomena. Incorporating methods and insights from sociology and anthropology, and drawing on the resource of the immediate context of New York City's cultural communities and institutions, the course will introduce students to issues in and methods for cultural analysis. The analysis of art worlds will include: 1) a consideration of the intentions of creative agents or producers; 2) the distribution of these objects within particular systems; and, 3) the reception and interpretation of these objects by and within particular social groups or communities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ICC.

SOCI 4020. Place, Space, and Immigrant Cities. (4 Credits)
This course will introduce students to the main issues and current debates on immigrant minorities in large urban areas. Due to their density, cities represent microcosms of interaction and identity formation among and between different minority and majority groups. This often manifests itself spatially, as certain neighborhoods become areas of residence and territorial concentration for immigrant minorities. In the process of settling, immigrants also start identifying strongly with their spaces of settlement. This course will trace the historical patterns of this process, as well as explore its contemporary manifestations, as cities are being rediscovered and ‘gentrified,’ rendering their neighborhoods into fierce battlegrounds of spatial contestation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, INST, ISIN, LPGP, URST.

SOCI 4052. An Ethics of Modern Selfhood: The Pursuit of Authenticity. (4 Credits)
The modern and postmodern self or identify, examined as a series of personal and moral conflicts and dilemmas. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, COMC, COMM, ICC, THEO.
SOCI 4105. Religion, Gender, and Sexuality. (4 Credits)
This course considers the intersections of religion, gender, and sexuality. In many parts of the world, including the United States, and in many religious traditions, cultural and religious identity and continuity hinge on gendered practices and closely controlled sexual regimes. The goal of this course is to understand how religious institutions, communities, doctrines, practices and traditions shape gendered ideologies and practices, debates about sexuality and gendered division of labor, and the lives of men and women who participate in these religious communities. The course is organized conceptually; rather than learning about specific religious traditions, we will discuss thematic issues at the intersection of religion, gender, and sexuality. At various junctures we will discuss specific examples that span religious traditions, geographical locations, and historical periods. The course will therefore provide students with a sense of how contemporary and seemingly local debates are rooted in much broader conversations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ASRP, BESN, ICC, INST, ISIN, PLUR, REST.

SOCI 4245. Ethics in Research. (4 Credits)
This course will examine approaches to responsible research practices across the natural and social sciences, with particular attention to research involving human participants. The course will provide an overview of the research process, foundations in research ethics, and provide examples of research across disciplines that exemplify scientifically valid and ethically sound research methods planning, implementation, and dissemination. In particular, the course will draw on long-standing research traditions in the field of sociology, and psychology in order to provide a foundation upon which ethical issues can be discussed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BIOE, ICC.

SOCI 4400. Gender, Bodies, and Sexuality. (4 Credits)
This course explores how gender and sexuality shape and organize our lives. We will examine how gender is built into structures, institutions, and ideologies of social life as well as the interaction between gender and other axes of inequality, including race, class, and sexual orientation. The course will examine the experiences of men and women in addition to those who do not fit into these gender categories. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ICC, PLUR, WGSS.

SOCI 4408. Diversity in American Society. (4 Credits)
An examination of historical and contemporary diversity in the United States. Diversity is defined according to ethnicity, race, religion, class, and other relevant social groups. A comparison of the situation of old and new ethnic and immigrant groups will be made with special attention to factors affecting integration into the society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASHS, ICC, LALS, LASS, LPGP, PLUR, URST.

SOCI 4421. Disability, Literature, Culture: Neurological, Mental, & Cognitive Difference in Culture & Context. (4 Credits)
Disability studies, the central focus of this course, is an inherently interdisciplinary field. Drawing particularly on two of its constituent disciplines, literature and sociology, this course will explore the questions and problems raised by neurological, mental, and cognitive disabilities as they relate to identity, community, and belonging. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ASRP, BESN, ICC, INST, ISIN, PLUR, REST.

SOCI 4900. Internship Seminar. (4 Credits)
Placement in a work setting of their choice provides students with an opportunity to assess their own career goals, while simultaneously enriching their understanding of how social groups function. Issues and topics from the sociology of formal organizations, including work role socialization, the organization as a social system, the bureaucracy and its public, formal and social processes in organizations, managerial ideologies and the relation between character and career are discussed. Placements must be obtained through the Internship Program located in the Career Planning and Placement Office. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

SOCI 4902. Internship Seminar: Community Organizations. (4 Credits)
This seminar explores the context, forms, and goals of community organization in the United States with a focus on urban, social, and environmental issues. Class meetings with proceed in tandem with students’ internship placements in local community-based organizations or other agencies. Students may choose their own internships, and assistance will be provided to help those in search of placement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, LALS, LASS, URST.

SOCI 4961. Urban Issues and Policies. (4 Credits)
A discussion of urban issues and policies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, ICC, LPGP, PJRC, PJST, URST.

SOCI 4962. Health/Inequality in the US. (4 Credits)
This course examines the patterns and causes of health inequalities across key social groups in the United States. Grounded in a social-ecological approach to health, students examine how the distribution of money, resources, and power creates marked differences in the social and physical conditions within which we live our lives. These conditions, known as the ‘social determinants of health,’ contribute greatly to the formation of health inequalities. Examples of the social determinants that are examined include race/ethnicity, social class, gender, sexual identity, migration/nativity status, and residential location Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, PLUR.

Updated: 07-27-2020
SOCI 4963. Population and Society. (4 Credits)
This course provides an introduction to the core areas of social demography (fertility, mortality, and migration) along with some other areas that demographers study (health disparities, residential segregation). Students will also be introduced to the data and methods used in demography, including mortality and fertility rates, the life table, and life expectancy. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, SOCI.

SOCI 4970. Community Service/Social Action. (4 Credits)
This course will deepen students understanding of the meaning of community service and social action in America and challenge them to confront the moral issues and social commitments necessary to be members of a just democratic society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, APPI, ASHS, EP4, LALS, LASS, PJCP, PJCR, PJST, SL, URST, VAL.

SOCI 4971. Dilemmas of the Modern Self. (4 Credits)
Modern selfhood or identity is studied as a series of conflicts or dilemmas "What is a self today?" What are the special problems of ourselves as modern and post-modern 'subjects'? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASHS, EP4, VAL.

SOCI 4990. Conflict Resolution and Justice Creation. (4 Credits)
This course examines the psychological, social, and philosophical foundations of peacemaking and conflict resolution drawing on theories and experience from sociology and philosophy, and to some extent theology. The course will include experiential exposure to workshops on conflict resolution and non-violent social action techniques, drawn from social justice organizations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, INST, ISIN, LALS, LASS, PJCP, PJCR, PJST.

SOCI 4998. Senior Thesis. (4 Credits)
Independent research under mentor guidance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, INST, ISIN, LALS, LASS, PJCP, PJCR, PJST.

SOCI 4999. Tutorial in Sociology. (1 to 4 Credits)
Supervised individual study. Provides an opportunity for students to work closely with an individual faculty member on a specific topic or project.
Attributes: CEED, CENS, URSG.

SOCI 5518. Issues in Urban Sociology. (3 Credits)
A survey of the field of urban sociology and selected urban social problems. We begin with a review of the field as an intellectual tradition, from its roots in classical theory and the Chicago school to more contemporary concepts and approaches to urban and regional analysis. Substantive topics include economic and physical development, national and local politics and policy, inequality, spatial segregation formation, collective identity, and mobilization.
Attributes: CEED, CENS, URSG.

SOCI 5505. Vulnerable Pop & Migratn. (0 to 2 Credits)
This course focuses on refugees, asylum seekers and displaced persons in the context of global migration. It will provide an increased understanding of how human rights and ethical issues are present in national and global migration policies and programs. The course will also demonstrate how definitions and estimates of migrants, refugees, asylum seekers and displaced persons give rise to human rights and ethical considerations and consequences. (Only open to IDHA)
Attributes: URSG.

SOCI 5808. Migration and Microfinance. (3 Credits)
This course examines the classical theorists, including Durkheim, Weber, Marx, and Simmel in relation to their historical period and relevance for contemporary scholarship.
Attributes: CEED, CENS, HECS, IPED, URSG.

Spanish (SPAN)

SPAN 1001. Introduction to Spanish I. (5 Credits)
An introductory course that focuses on the four skills: speaking, reading, writing and listening providing students with a basic knowledge of Spanish linguistic structures, vocabulary and culture, which studied interdependently, comprise the Spanish Language.
Mutually Exclusive: SPAN 1002.

SPAN 1002. Introduction to Spanish II. (3 Credits)
This course will enhance the reading, writing, speaking and listening skills acquired by students in Introduction to Spanish I or from prior study. It will further promote a deeper understanding of Spanish and Hispanic cultures.
Prerequisite: SPAN 1001.
Mutually Exclusive: SPAN 1001.

SPAN 1501. Intermediate Spanish I. (3 Credits)
Attribute: IPE.
Prerequisites: SPAN 1001 or SPAN 1002.

SPAN 1502. Intermediate Spanish II. (3 Credits)
Attribute: IPE.
Prerequisite: SPAN 1501.

SPAN 2001. Spanish Language and Literature. (3 Credits)
Study of selected literary texts and review of pertinent grammatical structures, textual analysis, composition, and conversation. Conducted in Spanish.
Attribute: IPE.
Prerequisite: SPAN 1502.
SPAN 2201. Spanish Community Engaged Learning. (3 Credits)
This advanced Spanish course develops students’ abilities in reading, writing, speaking, and oral comprehension. The goals of the course are for students to understand and communicate in standard Spanish in everyday contexts; to comprehend a variety of written, visual, and sounds texts, including literary works, newspaper articles, and films; and to comment on these texts orally and in writing in a coherent and grammatically correct manner. Grammar review will be an integral part of the reading, viewing, and writing activities for the course. The community-engaged learning component of this course treats the topic of Hispanic migration as a contemporary—not just historical—occurrence. Students will work in the community for an average of four hours every week using their Spanish and improving their language skills in a highly contextualized environment unmatched by the classroom experience. At the same time, they will gain first-hand knowledge about the immigrant experience while seeing real-world applications for their language skills.
Attribute: PLUR.
Prerequisite: SPAN 1502.

SPAN 2301. Spanish for Heritage Speakers. (3 Credits)
An advanced review of grammar for students with bilingual experiences in English and Spanish. Study of selected literary texts, films, and other materials will help students strengthen and further develop their written and oral skills in Spanish.
Attribute: IPE.

SPAN 2305. Spanish Conversation and Composition. (4 Credits)
Intensive practice of the spoken and written language with emphasis on proper use of idioms and buildings of vocabulary based on topics of interest and relevance. A basic course for prospective majors and minors, not open to Spanish native speakers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: IPE, LAHA, LALS.
Prerequisites: SPAN 2001 or SPAN 2201 or SPAN 2301.

SPAN 2500. Approaches to Literature. (4 Credits)
A basic course in Spanish literature. Close readings in the major forms, prose fiction, poetry and drama, and an introduction to the variety of critical strategies for reading them. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE, LAHA, LALS.
Prerequisites: SPAN 2001 or SPAN 2201 or SPAN 2301.

SPAN 2620. Spanish Phonetics. (4 Credits)
Sounds of the Spanish language. Analysis of standard Spanish pronunciation in contrast with regional varieties of the Hispanic world through transcriptions, speech analysis, and live presentations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LAHA, LALS.
Prerequisites: SPAN 2001 or SPAN 2301.

SPAN 2650. Business Spanish. (4 Credits)
This course emphasizes key communicative skills to provide students with tools to work in Spanish in a wide variety of capacities. Students will learn essential vocabulary and discuss different cultural practices in the professional Spanish-speaking world. The class will explore important sectors of the economy in Spain, Latin America, and the United States as well as geographic elements (trade agreements, political circumstances, etc.) that shape them. Attention will be paid to both for-profit and non-profit models. Taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: IPE, LAHA, LALS.

SPAN 2655. Creative Writing in Spanish. (4 Credits)
This course will explore various modes of creative writing (journals, short stories, microcuentos, poems, etc.). Readings about the process of writing by Hispanic authors, and certain exemplary texts will serve as guide and inspiration, while a workshop format will allow for revising and developing as second language writers. Taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: IPE.
Prerequisite: SPAN 2500.

SPAN 2700. Hispanic Legends. (4 Credits)
This course will introduce students to fundamental myths, folktales, and fables from a variety of Spanish-speaking countries and periods. Special attention will be paid to sources, interpretation, and analysis of these stories. Among topics to be considered are the types, structure and patterns of legends, the role of the hero, common devices such as personification, and orality. Written assignments include analytical essays, response papers, and creative writing. Taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: IPE, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3001. Spain: Literature and Culture Survey. (4 Credits)
A broad survey of Spanish culture through the study of some of its major literary figures and texts. The course will examine representative texts from important artistic movements in Spain, such as the Renaissance, the baroque, neoclassicism, romanticism, realism and postmodernism. By the end of the course, students will be able to define the main characteristics of these movements and will be familiar with important literary figures, such as Garcilaso de la Vega, Calderón de la Barca, Lope de Vega, Moratin, Bécquer, Larra, Leopoldo Alas, Pardo Bazán, Antonio Machado, Unamuno, Ramón Séneda, Aleixandre and Martín Gaite. Students will also be familiar with Spanish history and its relationship to the cultural field. Prereq: SPAN 2500 or Instructors Permission; Taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISEU, LAHA, LALS.
Prerequisite: SPAN 2500.
SPAN 3002. Latin America: Literature and Culture Survey. (4 Credits)
(May be applied to other groups depending on topic offered) The study of Spanish-American society through its cultural expressions: literature, art, music, film, and print journalism. To focus, in a given semester, on topics such as: ‘Literature and Art in Colonial Spanish America,’ ‘Literature and Film in Contemporary Spanish America,’ ‘Revolution in Spanish American Literature and Art,’ ‘Civilization and Barbarism,’ ‘National Identity, Race, and Gender in Spanish America,’ ‘Dictatorship and Resistance in Spanish America,’ and others. Taught in Spanish. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, ASLT, COLI, GLBL, IPE, LAHA, LAIN, LALS.
Prerequisite: SPAN 2500.

SPAN 3005. Themes in Latina/o and Latin American Studies. (4 Credits)
This course allows students to explore ways to synthesize key topics in Latin American and Latina/o Studies (LALS) as an interdisciplinary field of study. It will compare the distinct approaches to these topics of the different disciplines represented by the LALS faculty (including History, Literature, Film Studies, Theology, Art History, Sociology, and Anthropology). Conducted in English. Coursework in Spanish for credit toward the Spanish major and minor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, CCUS, COMC, COMM, IPE, LAHA, LAIN, LALS.
Prerequisite: SPAN 2500.

SPAN 3007. Spanish Linguistics. (4 Credits)
This course focuses on the linguistic study of the Spanish language. The course discusses the formal domains of language structure - including speech sounds and their mental representations, sentence structure and semantic meaning, as well as social realities of language use and language change across different varieties of Spanish in the world. The course is taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ASSC, IPE, LAHA, LALS, LING.
Prerequisite: SPAN 2001.

SPAN 3066. Survey of Latin American Film. (4 Credits)
A panoramic view of the cinema of Hispanic America and Brazil, from the Golden Age of Mexican film to the present. Particular emphasis will be placed on students' use of the language itself of film studies, as well as on the connections between transnational networks of filmmakers and the emergence of pan-Latin American identities. Taught in Spanish. Prereq: SPAN 2500 or Instructor's Permission. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, INST, IPE, ISLA, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3072. Geographies of Power/Injustice. (4 Credits)
Throughout this course, the aim is to develop in students a critical perspective on the spatiality of social life, that is, to foster students understanding of how relations of power and dispossession are inscribed into the built environment in both urban and rural landscapes. Through in-depth study of 20th and 21st century Spanish American works of fiction and film, we will study how space (which simultaneously shapes, and is shaped by, social life) is politically produced and reproduced, thus creating structures of privilege and advantage for some, and of social control and cultural, gender and class exclusion or domination for others. Taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, INST, IPE, ISLA, LALS.

SPAN 3075. Crime Fiction in Hispanic Literature. (4 Credits)
This course examines a very popular genre—crime narrative (el relato policial)—and its sociocultural particularities. Short stories and novels by major Spanish and Latin American writers will be examined in the context of globalization. Authors may include Garcia Marquez, Borges, Bianco, Piglia, Valenzuela, Aponte Alsina, Ocampo, Pitot, Saer, and Biyo Casares. This course is taught in Spanish. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, LALS, MLL.
Prerequisite: SPAN 2500 (may be taken concurrently).

SPAN 3166. Trends in Latin American Film. (4 Credits)
This course analyzes trends in Latin America's cinematic production since the 1990s, when the neoliberal model of economic development and the politics of globalization were adopted by several countries within the region, such as Mexico, Argentina, Brazil, and Peru. The political and economic changes resulted in deep cuts in state-sponsored cultural programs, including less direct investment in and incentives for the three largest-producing countries of the region: Argentina, Brazil, and Mexico. In addition, as a result of the economic shortages of the post-Soviet "special period" of the 1990s, film production in Cuba—another major film producer in the region—dropped by almost half. This new economic and political context prompted significant changes in the region's cinematic landscape and altered the very specific ways in which "Latin American film" was understood. Film now became mainly conceived as a cultural product of consumption, made possible mostly through transatlantic co-productions, and its main purpose was to conquer both local and global commercial and specialized markets (e.g., film festivals). Previous radical politics and struggles for cultural autonomy were in many ways either left behind of significantly transformed. In this course, we will explore the new conditions of film production and circulation developed since the 1990s in several Latin American countries, as well as different aesthetic and political trends both in fiction and documentary filmmaking. The analysis of specific films alongside their historical and geographical contexts will serve as case studies to discuss the changing role of film in Latin America during the past 30 years.
Attributes: ACUP, ADVD, ALC, AMST, COLI, GLBL, LAHA, LALS.
Prerequisite: SPAN 2500.
SPAN 3210. Transatlantic Picaresque. (4 Credits)
Exploration of the origins of this uniquely entertaining genre, its most exemplary manifestation in Spain, and its transatlantic resource in the New World. Texts include Lazarillo de Tormes, El Buscon, De Don Catrin de La Fachenda, El Lazarillo de Ciegos Caminantes, and others.
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3230. Sinful Business. (4 Credits)
Analysis of greed in Colonial and Golden Age writings on New World treasure. Exploration of Classical and Jungian roots of negativity toward commercial navigation. Prose and poetry by authors such as Horace, Ovid, Cabeza de Vaca, Sigüenza y Gongora, Quevedo, and Gongora. Taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE, LAHA, LALS.
Prerequisite: SPAN 2500 (may be taken concurrently).

SPAN 3250. God, Gold, and Glory. (4 Credits)
In-depth examination of colonial narratives of exploration and conquest. Comparative study of text and film representations of this powerful moment of Spanish imperialism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3275. Hybrid Futures: A Panorama of Mexican Short Fiction. (4 Credits)
This course will explore the main themes of Mexican science fiction, from the late nineteenth century to today, using a panoramic approach that encompasses different forms of cultural production and media (literature, film, comics, street art, etc.). Through the science fiction lenses we will examine Mexico’s relation to technology and the processes of modernization, as well as the imagined future of labor, gender, and immigration, among other issues. We will frame Mexican science fiction as part of a larger Latin American tradition, while also discussing the connections to more mainstream (i.e. American and English) visions of the genre. All materials will be available online.
Attributes: ACUP, ADVD, ALC, AMST, INST, IPE, ISLA, LALS.
Prerequisite: SPAN 2500.

SPAN 3285. Trends in Mexican Cinema. (4 Credits)
In this course, we will examine Mexican cinema’s major trends and genres. We will discuss some of Mexico’s most important films and film criticism, while also paying attention to less prominent cinematic artifacts. We will study these films not only as aesthetic but also political and social works, highlighting topics such as race relations, national identity, and modernization.
Attributes: ALC, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3300. Modern Latin American Visual Culture. (4 Credits)
In this course, we will identify, follow, and compare a number of narrative and historical currents as they are represented in Latin American visual culture, from independence to the present. We will do this across a broad variety of media, including concrete poetry, performance art, photography, painting, film, television, sculpture, comics, and theater. We will focus on theoretical, historical, ethical, political, and identitarian approaches to these different disciplinary categories of visual culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, INST, IPE, ISLA, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3301. Federico Garcia Lorca and His World. (4 Credits)
The course is an in-depth study of the works and person of Spanish author Federico Garcia Lorca (1898-1936) in its socio-historical, artistic and cultural contexts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISEU, LALS.
Prerequisite: SPAN 2500.

SPAN 3305. Posthuman Mestizaje and the Non-Human Turn in Mexican Culture. (4 Credits)
The course will study the posthuman subjects that emerge in Mexican culture in the late nineteenth century. We will study cyborgs, zombies, and other forms of posthuman beings and their relation to modernity. Secondly, we will focus on the non-human: technological objects, artificial intelligences, commodities, and other entities that have had a life on their own. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISLA, LALS.
Prerequisite: SPAN 2500.

SPAN 3310. Latin American Science Fiction. (4 Credits)
This course explores Latin American science fiction as a mode of discourse that has engaged with pressing social issues in the region, including questions of modernity and technological dependence in a globalized world. At the same time, we will see how this genre is becoming a space to speculate about the future of race, class, and gender relations in Latin America. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, LALS.
Prerequisite: SPAN 2500.
This course studies manifestations of multilingualism in contemporary Latin-American and Latino literature, more particularly multilingualism that creates a tension between mother tongue and adoptive language when one of the languages is Spanish. It focuses on narratives and memoirs written by authors whose roots are in the Southern Cone (Argentina and Chile: Manuel Puig, Sylvia Molloy, Paloma Vidal, Ariel Dorfman...), the Caribbean (Pérez Firmat, Judith Ortiz Cofer...) and México (Richard Rodríguez, Gloria Anzaldúa, Ilan Stavans...). The paradoxes of multilingualism will be approached formally (categories of multilingualism: alternating between languages, self-translation, code-switching...); thematically (identity construction and the perception of the self, the affective function of language) and sociologically (the difficulties to publish real bilingual texts as a consequence of unequal relationships of power between North and South). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, GLBL, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3515. New Spanish Literature: Rewriting the Public Sphere in 21st Century Spain. (4 Credits)
This course explores the emergence of a new generation of Spanish writers whose texts actively engage in the main debates of the 21st century public sphere, such as migration, sexuality, and nationalism. An analysis of these major works aims to shed light on the features that conform that generation of writers as well as on the ways they intervene, shape and question the Spanish public sphere. Authors like Nají el Hachmi, Elvira Navarro, Remedios Zafra, Sara Mesa, Alberto Conejero, Aixa de la Cruz, and Quan Zhou, among others, will be discussed. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3525. Cultures of Sexual Dissidence in Latin America. (4 Credits)
In this course, we will explore an alternative canon of Latin American literary and cultural production, created by and about subjects whose sexualities have been positioned, from the colonial period on, as divergent from the ‘norm.’ Topics to be covered include theoretical approaches to ‘queer’ studies rooted in the region (and tensions with queerness conceived as a North Atlantic epistemological framework), alliances between radical feminism and LGBTQ movements, debates about trans people, the pros and cons of political militancy, and the relationship between sexuality and diaspora. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, GLBL, LAHA, LALS, MLL, WGSS.
Prerequisite: SPAN 2500.

SPAN 3530. Excess in Spanish Lit. (4 Credits)
National identity in Spain was constructed beyond European ethics and aesthetics. This course focuses on the tragic consequences of presenting Spain as the Other, examining representations in modern literature and film. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3535. Unus Mundus: Deconstructing ‘Time’ Through Spanish Literature. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISEU.
Prerequisite: SPAN 2500.

SPAN 3540. Spain and Islam. (4 Credits)
Islam has been a major constant in the construction of Spanish national and cultural identity from the Middle Ages to our present day. This course will explore the nature of this Islamic constant through the different political and cultural contexts of Spanish history. Course material will include literary sources from Medieval lyric to modern fiction as well as other cultural forms, including Medieval music and contemporary cinema. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISEU, LAHA, LALS, MEST, MVLI, MVST.
Prerequisite: SPAN 2500.

SPAN 3550. Expressing the Colonies. (4 Credits)
This course will consider Colonial texts following the age of discovery and conquest. Exploration of Sor Juana, el Inca Garcilaso, Balbuena, Acosta, Vázquez de Espinosa, and others will seek to identify how the writings contributed to the expression of the newly established colonies and institutions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3560. Reimagining the Colonies. (4 Credits)
Study of modern Latin American historical fiction (novels and short stories) set in the Colonial period. Exploration of the factors that inform contemporary authors’ literary imaginations as they envision and recreate this crucial period in Latin American history. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ISEU, LAHA, LALS, PJRC, PJST.
Prerequisite: SPAN 2500.

SPAN 3561. Representing the Gypsy. (4 Credits)
This course will explore the representation of the gypsy in Spanish literature and culture from the late Middle Ages to the present. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, ISEU, ISLA, LAHA, LALS, PJRC, PJST.
Prerequisite: SPAN 2500.
SPAN 3575. Painting the Empire: Understanding the Spanish Empire Through Art and Literature. (4 Credits)
The Golden Age of Spanish art and literature (known as “el Siglo de Oro”) coincided with the configuration of Spain as a global empire after the rise of the Habsburg dynasty to the Spanish throne (from around 1550 to around 1650). This course proposes a study of the main social, political and cultural conflicts that conformed that empire from a multidisciplinary perspective that combines the works of the empire’s most famous painters (El Greco, Diego Velázquez, José de Ribera, among others) with the works of its most representative writers (Lope de Vega, Miguel de Cervantes, María de Zayas, among others); topics such as the symbolic construction and shaping of space, gender, national identity or social and religious relationships will be approached through a combination of visual and textual representations. The course will also take great advantage of the important collections of Spanish Renaissance and Baroque painting held at several New York institutions such as the Metropolitan Museum of Art of the Hispanic Society of America, including visits to those institutions and field work. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, COLI, IPE, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3582. New York in Latinx Literature and Film. (4 Credits)
This course explores New York as represented by Spanish and Latin American exile writers and native Latinx New Yorkers. Students focus on the city as a metaphor for artistic creation in a global world, a center for a cosmopolitan Spanish and Latin American diasporic avant-garde, and as constructed by the Latinx imagination in writing and film. The course syllabus includes authors such as Martí, Lorca, Burgos, Thomas, Piñero, Arenas, Braschi, Hijuelos, and Leguizamo, and filmmakers such as Ichaso, Morales, and Troyano. This course is conducted in Spanish. Please note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, ASLT, COLI, IPE, LAHA, LALS, PLUR.
Prerequisite: SPAN 2500.

SPAN 3583. New York City Latino Theatre and Performance. (4 Credits)
Explores the diversity of Latino performance styles in NYC, from theatrical performances to performance art and spoken word, by studying the works presented in NYC’s Latino repertory theaters, musical theater venues, performance art and spoken word presentations, such as El Repertorio Espanol, Teatro Circulo, the Puerto Rican Travelling Theater/ Pregones Theater, and INTAR. It will study the works of performance artists such as Carmelita Tropicana and Josefinda Baez, of spoken word poets such as Willie Perdomo, Edwin Torres and Caridad del la Luz, and Alberto Sandoval-Sanchez, and Diana Taylor. Conducted in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: IPE, LALS, PLUR.
Prerequisite: SPAN 2500.

SPAN 3610. Children's Gaze in Latin American Literature. (4 Credits)
This course examines Latin American short stories, novels and poetry which focus on the way children and adolescents view the world and how they process their immediate socioeconomic and geographic contexts to construct their world view and find their place in society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, COLI, GLBL, IPE, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3625. Spanish-American Short Fiction. (4 Credits)
This course will cover the short story and the short novel in Spanish America from the middle of the 20th century. Authors may include Borges, Rulfo, Aponte-Alsina, Cortázar, Onetti, Garcia Marquez, Ferré, Bolaño, Zambra, Pitil, Piglia, and Castellanos. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, COLI, GLBL, INST, IPE, ISLA, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3642. Spanish-American Literature and Popular Music. (4 Credits)
The significant role of popular music such as bolero, tango, milonga in Latin American Postmodern Novel. Authors may include: M. Puig, R. Sanchez, G. Cabrera Infante, L. Otero, M. Montero, R. Ampiero. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, COLI, INST, IPE, ISLA, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3701. Spanish-American Women Writers. (4 Credits)
Texts by Spanish-American women writers from the Colonial period to the present. Issues of female writing and representation. Evaluation of the status of writing as a woman in recent critical theory. Authors may include: Sor Juana, Mistral, Bombal, Castellanos, Poniatowska, Ferre, and Allende. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, ASLT, COLI, IPE, LAHA, LALS, WGSS.
Prerequisite: SPAN 2500.

SPAN 3710. Contemporary Latin American Fiction. (4 Credits)
In this course we will study the major trends in Latin American fiction from the second half of the 20th Century onwards. Significant attention will be placed on writers of the 1960’s ‘bloom’ generation, their technical innovations and their role as intellectuals. Major post-boom authors will then be studied focusing on themes such as migration, transnationalism, memory, end-of-the-century politics of identity, and the increasing professionalization of the Latin American writer. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, COLI, INST, IPE, ISLA, LAHA, LALS, WGSS.
Prerequisite: SPAN 2500.
SPAN 3712. Literatures of the Latin American Boom and Post-Boom. (4 Credits)
We will first explore the ‘Boom,’ a time in the 1960s and 70s when certain Spanish American authors (such as García Márquez, Cortázar, Vargas Llosa, Fuentes, and Donoso) became known internationally for their sophisticated narrative techniques, engagement with politics, and re-imagining of national identity. We will then examine how more contemporary works of Spanish American fiction (by such authors as Poniatowska, Bolaño, Fuguet, and Eltit) grapple with the legacy of the ‘Boom.’ Other issues to be discussed include modernism, ‘magical realism,’ historical fiction, and works by authors transitioning between the Boom and Post-Boom (including Puig, Sarduy, and Allende). Taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, INST, IPE, ISLA, LALS.
Prerequisite: SPAN 2500.

SPAN 3715. Latin American Cyberliterature. (4 Credits)
Latin American Cyberliterature explores the articulation of cyberspace and literature and analyzes the use of hypertexts, blogs and blognovels by Faverón, Neuman, Paz Soldán, Volpi, Rivera Garza and Pron. Taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, COLI, INST, IPE, ISLA, LALS.
Prerequisite: SPAN 2500.

SPAN 3730. Writing Violence: Peru, 1980-2000. (4 Credits)
In this course we will study the different representations of violence in Peruvian narrative, poetry and film whose main subject was the armed conflict during the 1980’s and 90’s between the Peruvian state and subversive groups (Shining Path and MRTA). Most reading will be literary but the course has a strong interdisciplinary nature since a thorough study of historical, sociological and anthropological texts related to this period of Peruvian history and culture will be included. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, GLBL, INST, IPE, ISLA, LAHA, LALS, PJST, PJWT.
Prerequisite: SPAN 2500.

SPAN 3770. Cultures of Memory and Post-Memory in Contemporary Chile. (4 Credits)
This course will explore artifacts and movements of cultural memory -- literature, criticism, film, photography, and other media -- that illuminate efforts in Chile to come to terms with the country’s recent dictatorial past. We will also discuss these artifacts in light of the idea of “postmemory”: how affiliations to, and representations of, this past are (re)constructed in the present and projected into the future. The course will include a week-long trip to Santiago, Chile over spring break. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISLA, LALS.
Prerequisite: SPAN 2500.

SPAN 3771. Cultures of Memory and Post-Memory in Contemporary Chile. (1 Credit)
This course will explore artifacts and movements of cultural memory -- literature, criticism, film, photography, and other media -- that illuminate efforts in Chile to come to terms with the country’s recent dictatorial past. We will also discuss these artifacts in light of the idea of “postmemory”: how affiliations to, and representations of, this past are (re)constructed in the present and projected into the future. The course will meet once a week during the semester, and then include an optional, one-credit, two-week-long trip to Santiago, Chile immediately after the semester ends.
Attribute: IPE.

SPAN 3800. The Spanish Diaspora. (4 Credits)
This course proposes a study of the main religious, political and intellectual Spanish diasporic waves from 1492 to 1939. By exploring different literary and cultural sources produced both inside and outside Spain it aims to determine the impact of exile and displacement in the formation of Spanish national identity. Taught in Spanish. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISEU, LAHA, LALS.
Prerequisite: SPAN 2500 (may be taken concurrently).

SPAN 3809. Argentine Literature and Film. (4 Credits)
The course will examine in Argentina the fruitful dialogue between literature and film. Analysis of the writers who incorporated into their writing procedures derived from film and created new models of representing reality. Among the authors to be explored are: Manuel Puig, Jorge Luis Borges, Julio Cortatzar, Adolfo Bioy Casares, Eduardo Sacheri, Guillermo Martinez. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, INST, IPE, ISLA, LALS.
Prerequisite: SPAN 2500.

SPAN 3820. Hispanic Caribbean Literature. (4 Credits)
This course covers important topics in Hispanic Caribbean literature, film, and performance such as national identity, gender, sexuality and race, colonialism, border conflicts and empire, dictatorship and resistance, revolution, migration, exile, and transnational relations between the U.S. diasporas and their home countries. Special attention will be paid to artistic response to disasters in the area. Authors will include Martí, Palés Matos, Guillén, Mir, Bosch, Carpentier, L. R. Sánchez, A. L. Vega, Santos-Febres, Rita Indiana Hernández, Padura, Junot Díaz, L. Negrón, and A. Obejas. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, ASLT, COLI, GLBL, INST, IPE, ISLA, LAHA, LALS.
Prerequisite: SPAN 2500.
SPAN 3850. Narrating the City. (4 Credits)
As a result of massive internal migration, Latin America is now a predominantly urban space. This course explores the various ways in which the city has been imagined in contemporary Latin American film and literature. Analyzing works from a variety of countries and cultural traditions, we will discuss how literary and filmic fiction depict how individuals interact with different configurations of urban space, and how these interactions reproduce or challenge established structures of power. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, ALC, AMST, COLI, INST, IPE, ISIN, ISLA, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3908. Francoist Spain. (4 Credits)
This course focuses on cultural production during the regime of Francisco Franco (1939-1975), and examines the regime's ideological approach to the arts by studying the personalities and legislation that shaped the Francoist aesthetics. The course puts state sponsored and subversive art and dialogue with official policies and the struggle for their control to produce a more nuanced understanding of Franco's Spain. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, IPE, LALS.
Prerequisite: SPAN 2500.

SPAN 3950. The Fantastic in Spanish Literature and Film. (4 Credits)
An exploration of the fantasy genre and subgenres in Spanish culture (its evolution, its social and political implications) from medieval chivalry novels and miracles to 21st century horror movies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, INST, IPE, ISEU, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 3995. Spanish in Context. (0 Credits)
Students will receive instruction at their level of language competency at the University of Granada. They will also engage in a number of cultural excursions and activities within beautiful Granada, a UNESCO World Heritage Site and a center of flamenco culture. Students will also participate in two short trips to Sevilla and Córdoba as well as a longer trip to the Algarve. All program activities and cultural visits are organized by the program director, who also supervises the academic progress of all students. Please note: Only Fordham in Granada participants can register for this class.
Attributes: IPE, MLL.

SPAN 3999. Tutorial. (3 Credits)
Independent research and readings with supervision from a faculty member.
Attribute: IPE.
Prerequisite: SPAN 2500.

SPAN 4001. Cervantes and Don Quixote. (4 Credits)
Lectures, readings and discussion of Don Quixote. Cervantes' importance for the development of modern fiction. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, COLI, IPE, LAHA, LALS.
Prerequisite: SPAN 2500.

SPAN 4018. Cuba: Revolution, Literature and Film. (4 Credits)
This interdisciplinary capstone course will study the representation of the Cuban revolutionary process in literature, history, and film. It will explore some of the major topics on the Cuban revolutionary process from the vantage point of historical, literary and cinematic accounts: the relationship of intellectuals to the state, the revision of the past as antecedent to the Cuban revolution and its policies, the place of race, gender and sexuality in revolutionary culture, the Mariel exodus and the revolution's relationship to Cuban diasporic communities, the critique of revolutionary rhetoric during the post-Soviet “special period” and issues related to consumption, gender, sexuality, race, urban development and subjectivity during the current period of economic and cultural transition from socialism. It will use an interdisciplinary historical, literary and cinematic approach to examine the Cuban revolutionary process. Conducted in English with texts in Spanish and English translation. Coursework in Spanish for credit toward the Spanish major and minor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CCUS, COMC, COMM, FITV, GLBL, ICC, INST, IPE, ISLA, LALS.

SPAN 4100. Speaking For/As the Other. (4 Credits)
What are the implications of giving voice to those who are ‘voiceless’? This course explores the role of writing and speaking during the encounter of black, Indian, mestizo and Hispanic cultures in Latin America and Latina/o United States. By examining these cultural encounters, the course examines the political and ethical implications of speaking for and as the other. Conducted in English with texts in Spanish and English translation. Coursework in Spanish for credit toward the Spanish major and minor. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, EP4, IPE, LAHA, LALS, VAL.
SPAN 4347. Latinx Borders. (4 Credits)
This course uses an interdisciplinary approach to examine the experiences of Latin Americans and Latinos. It employs literature and history to introduce students to the benefits of using multiple ways of acquiring knowledge. It then relies on other academic areas such as art and sociology to reinforce its interdisciplinary nature. As a capstone course, it allows students to incorporate disciplines from their own academic foundation. It covers topics such as politics, social justice, race, gender, and identity. The course is taught in English with readings and writings in Spanish.
Attributes: ACUP, ADVD, AMST, APPI, COLI, GLBL, ICC. 
Prerequisite: SPAN 2500.

SPAN 4511. Spanish Civil War. (4 Credits)
This course examines how the Spanish Civil War has been represented in Spanish Cultural Production both during the war and in the decades following Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, ICC, INST, IPE, ISEU, LAHA, LALS. 
Prerequisite: SPAN 2500.

SPAN 4520. Spain in Context. (4 Credits)
Focusing on the relationship between creativity and society, the course explores the literature and culture of Spain’s diverse regions. The course comprises the following elements: classes taught by Dr. Lamas, trips, cultural visits, and workshops with prestigious Spanish intellectuals and artists (at the so-called tertulias). Students work in groups towards a final project, which will be presented in class as a Podcast, and handled to the instructor as a journal article ready for publication in the magazine Por Granada, available in print and on line. The course is offered in conjunction with Fordham in Granada. Only students enrolled in the Program can register for this class. Granada, a recognized World Heritage Site by UNESCO, is one of the most beautiful cities in the world. It is the hometown of Federico García Lorca, and a center of flamenco culture. The Alhambra Palace, the Albaicín neighborhood, the Cathedral, and the numerous Baroque churches of the city are testimonies of its rich past, which continues to be alive through its vibrant university community. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, IPE, LALS, PJRC, PJST. 

SPAN 4800. Internship. (4 Credits)
This course will explore various iterations of fascism in Spain, Latin America, and the United States in the 20th and 21st centuries. We will concentrate first on debates among historians about the definitions and origins of fascism, and then move on to its aesthetic embodiments throughout the Spanish-speaking world. We will examine primary texts that both uphold and undermine fascist ideals, as well as theoretical texts that illuminate the mechanisms by which this works. Our discussions will be informed by historical, philosophical, and literary approaches to fascism’s beginnings its transnational and transatlantic repercussions; and the persistence today of fascist rhetoric and aesthetics on three continents, particularly vis-à-vis the growing Hispanic presence in the US. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, IPE, LAHA, LALS. 
Prerequisite: SPAN 2500.

SPAN 4998. Senior Thesis Tutorial. (4 Credits)
Independent research, supervised by a faculty in the language, leading to the completion of a senior thesis.
Attribute: IPE.

SPAN 4999. Tutorial. (1 to 4 Credits)
Study of a particular aspect of Hispanic literature or thought. Independent research and readings. Weekly or bi-weekly meetings with faculty adviser. Designed for majors with permission of instructor.
Attribute: IPE. 
Prerequisite: SPAN 2500.

SPAN 5090. Spanish for Reading. (0 Credits)
Spanish for Reading. 
Attribute: IPE.

SPAN 8999. Independent Study. (0 Credits)
The independent study is a supplement to regularly scheduled courses and enables students to pursue their individual academic interests within the context of their program. To be eligible for an independent study, students must be matriculated, in good academic standing, and have completed at least eight credits of graduate study at GSAS. Students must complete the Graduate Tutorial form, found on the GSAS Student Resources web page, and acquire the approval of the instructor, department chair/program adviser, and dean’s office to register. The dean’s office will review and process the registration.

SPAN 9101. Introduction to Spanish I. (0 Credits)
SPAN 9152. Intermediate Spanish II. (0 Credits)
SPAN 9305. Spanish Conversation & Comp. (0 Credits)

Spirituality (SPGR)

SPGR 6702. History of Christian Spirituality I. (3 Credits)
This course will explore a number of the significant figures and themes that characterized the development of Christian spirituality from its beginnings until the 15th century. Readings will be drawn from classical spiritual texts from the Eastern Orthodox and Roman Catholic traditions and relevant secondary literature. Authors and texts typically include the Martyrdom of Saints Perpetua and Felicity, Origen, The Life of Anthony, John Cassian, Augustine, Pseudo-Dionysius the Areopagite, Life of Benedict, Gregory the Great, Maximus the Confessor, John Climacus, Symeon the New Theologian, Anselm, Bernard of Clairvaux, Mechthild of Magdeburg, Bonaventure, and Catherine of Siena. The course is organized around certain themes, including community life, prayer, mysticism, reform/conversion, and asceticism.

SPGR 6703. History of Christian Spirituality II. (3 Credits)
This course provides a solid grounding in the historical-critical, hermeneutical, and theological engagements with Christian mysticism/spirituality from the 16th century through the mid-20th century. In addition to focusing upon representative Catholic, Protestant, Reform, and Orthodox traditions, we examine recent expressions of globally contextualized Christian spiritualities. Course readings draw from classical spiritual texts and relevant secondary literature. Authors and texts typically considered include Ignatius Loyola, Martin Luther, Teresa of Ávila, Madame Guyon, Francis de Sales, George Herbert, The Pilgrim’s Tale, Pierre Teilhard de Chardin, Howard Thurman, Gustavo Gutiérrez, C.S. Song, and Desmond Tutu, among others. Additionally, selected themes in Christian spirituality are considered, including feminist, ecological, and social justice spiritualities.
SPGR 6720. Sacramental Spirituality. (3 Credits)
Drawing upon Christian scripture and tradition, this course explores and develops present-day sacramental spiritualities. A variety of embodied practices and material realities will be considered in their sacramental aspects—i.e., insofar as they provide an opportunity to experience the divine in and through corporeality. This course will emphasize all of creation as sacramental; it will include a consideration of Christ and the Church as sacraments, the sacraments of initiation (RCIA), healing sacraments (reconciliation and anointing), marriage as a sacrament, and ‘sacramentals.’ The study and discussion will be ecumenical and interreligious, interdisciplinary and multicultural.

SPGR 6746. Franciscan Spirituality: Francis, Clare and Bonaventure. (3 Credits)
Explores the religious experiences of Francis and Clare from their own writings as well as biographical materials and examines the spiritual teachings that Clare and Francis bequeathed to the religious orders they founded. Special emphasis is placed on the balance they achieved between the contemplative and active lifestyles and on the evangelical values that characterize the Franciscan approach to ministry. Some consideration will be given to representative Franciscan figures who have exemplified the interplay of theology, spirituality and ministry, suggesting outlines of the same for today.

SPGR 6752. Christian Contemplation and Action. (3 Credits)
Drawing on the work of Philip Sheldrake, this doctoral-level course explores the writings and lives of five representative themes of contemplative prayer and active ministry. The Way of Discipline, The Contemplative-Mystical Way, The Way of Practical Action, The Way of Beauty, and The Prophetic Way. Representative authors include Thomas Merton, Julian of Norwich, Ignatius Loyola, Teresa of Avila, G.M. Hopkins, Gustavo Gutiérrez, and Dorothy Day, among others. The course considers these sources and traditions as living fonts of and challenges to our contemporary spirituality, and provides a broad overview for more specific studies in Christian spirituality.

SPGR 6792. Contemporary Christian Spirituality. (3 Credits)
This course examines foundations, issues, movements, and persons affecting the practice of Christian spirituality in a postmodern context. Issues discussed will include embodiment, prayer, work, and sexuality. Movements will include feminism, ecology, and compassion/justice.

SPGR 6794. Women Mystics. (3 Credits)
This course will explore the experiences and theologies of women mystics as reported or portrayed throughout Christian history. Students will read selections from hagiographical texts, from the sayings of the Desert Mothers, from historical texts such as the Trial of Joan of Arc, and from the writings of women mystics themselves—such as Hildegard of Bingen, Clare of Assisi, Marguerite Porete, Catherine of Siena, Julian of Norwich, Teresa of Avila, Margaret Mary Alacoque, Thérèse of Lisieux, and Mother Teresa of Calcutta. Lectures will draw upon history, sociology, psychology, theology, and other disciplines to contextualize the consideration of these readings and to invite a careful comparison with present-day experiences. Students will also be invited to ponder the forces that have shaped our current canon of mystics and saints: Whose lives remain invisible to our study, and why?

SPGR 6811. Meditation East/West. (3 Credits)
A Practical theoretical treatment of the tradition of Christian prayer and Eastern Meditation. Included are guided practices, reading and reflection.

SPGR 6830. Discernment in the Christian Tradition. (3 Credits)
This course offers a two-fold introduction to Christian traditions for the discernment of spirits. During the first half of the course, we pursue a historical review of the various articulations of spiritual discernment from New Testament foundations through the 16th century. During the second half of the course, we concentrate on the theory and practice of Christian discernment and decision-making grounded in the writings of St. Ignatius Loyola. We engage in a critical, close reading of Ignatius’ ‘Rules for the Discernment of Spirits’ (weeks 1 and 2) and ‘The Election,’ both texts from ‘The Spiritual Exercises,’ as well as selected letters and other writings by Ignatius. This course also emphasizes each student’s personal appropriation of this material through the discussion of discernment case studies.

SPGR 6834. Methods in Christian Spirituality. (3 Credits)
This course introduces graduate students to the academic discipline of Christian spirituality and to methods for researching and writing at the M.A. level, including an introduction to the Turabian Manual for Writers of Research Papers, Theses, and Dissertations. In consultation with the professor, students are free to pursue a research topic of their choosing; however, their research agenda must include a Christian spirituality component. Students already working on a thesis may, with the professor's consent, use a chapter thereof as their research paper for this course. Course topics include defining the academic discipline of Christian spirituality; the relationship between spirituality and theology; experience as an object of study; and the approaches to context, historical consciousness, multidisciplinarity, and hermeneutic theory. In this practical seminar, students collaboratively learn to research and write at the graduate level, as well as explore the rich offerings of Christian spirituality as an academic discipline.

SPGR 6910. Introduction to Supervision. (3 Credits)
The first course in Fordham GRE’s Advanced Certificate in Supervision, Introduction to Supervision offers participants intensive immersion in supervision basics, including case preparation, supervision theory, spirituality, and ethics. Students will have repeated practice offering supervision to others and giving feedback to classmates as they do the same.
SPGR 6912. Practicum in Formal Supervision. (3 Credits)
The second course in Fordham GRE's Advanced Certificate in Supervision, the Practicum in Formal Supervision offers students individualized supervision and mentoring as they begin or grow their supervision ministry. In addition, this course provides opportunities for students to adapt a professional code of ethics for use in their context; to create a supervision resource kit; and to read, write about, and discuss supervision processes with their classmates and instructor.
Prerequisite: SPGR 6910.

SPGR 6914. Practicum in Informal Supervision. (3 Credits)
The third course in Fordham GRE's Advanced Certificate in Supervision, the Practicum in Informal Supervision offers students individualized supervision and mentoring as they develop their supervision ministry. In addition, the course provides opportunities for students to explore their own spiritual senses and intuition as they listen to others; to engage psychological concepts related to supervision; and to read, write about, and discuss supervision processes with their classmates and instructors.
Prerequisite: SPGR 6912.

SPGR 6916. Practicum in Group Supervision. (3 Credits)
The fourth course in Fordham GRE's Advanced Certificate in Supervision, the Practicum in Group Supervision offers students individualized supervision and mentoring as they continue their supervision ministry in the field, this term establishing and facilitating their own supervision group. Further, the course supports students in researching a supervision topic of their choice and culminates in a written capstone project.
Prerequisite: SPGR 6914.

SPGR 6920. Supervision Capstone Intensive. (3 Credits)
The final course in Fordham GRE's Advanced Certificate in Supervision, the Supervision Capstone Intensive offers participants an opportunity to present original research and a demonstration project on a supervision-related topic of their choice; to engage in collaboration with their peers and instructors; to offer constructive, compassionate feedback to their peers; and to integrate the skills they have honed in their yearlong practice of supervision.
Prerequisite: SPGR 6916.

SPGR 7702. History of Christian Spirituality I. (3 Credits)
This course will explore a number of the significant figures and themes that characterized the development of Christian spirituality from its beginnings until the 15th century. Readings will be drawn from classical spiritual texts and relevant secondary literature. Authors and texts typically include the Martyrdom of Saints Perpetua and Felicity, Origen, The Life of Anthony, John Cassian, Augustine, Pseudo-Dionysius the Areopagite, Life of Benedict, Gregory the Great, Maximus the Confessor, John Climacus, Symeon the New Theologian, Anselm, Bernard of Clairvaux, Mechthild of Magdeburg, Bonaventure, and Catherine of Siena. The course is organized around certain themes, including community life, prayer, mysticism, reform/conversion, and asceticism. This course is for Doctor of Ministry students only and will require doctoral-level participation and additional research/writing elements.

SPGR 7703. History of Christian Spirituality II. (3 Credits)
This doctoral-level course provides a solid grounding in the historical-critical, hermeneutical, and theological engagements with Christian mysticism/spirituality from the 16th century through the mid-20th century. In addition to focusing on representative Catholic, Protestant, Reform, and Orthodox traditions, we examine recent expressions of globally contextualized Christian spiritualities. Course readings draw from classical spiritual texts and relevant secondary literature. Authors and texts typically considered include Ignatius Loyola, Martin Luther, Teresa of Ávila, Madame Guyon, Francis de Sales, George Herbert, The Pilgrim's Tale, Pierre Teilhard de Chardin, Howard Thurman, Gustavo Gutiérrez, C.S. Song, and Desmond Tutu, among others. Additionally, selected themes in Christian spirituality are considered, including feminist, ecological, and social justice spiritualities. The capstone requirement is a 20-page research paper.

SPGR 7720. Sacramental Spirituality. (3 Credits)
Drawing upon Christian scripture and tradition, this doctoral-level course explores and develops present-day sacramental spiritualities. A variety of embodied practices and material realities will be considered in their sacramental aspects—i.e., insofar as they provide an opportunity to experience the divine in and through corporeality. This course will emphasize all of creation as sacramental; it will include a consideration of Christ and the Church as sacraments, the sacraments of initiation (RCIA), healing sacraments (reconciliation and anointing), marriage as a sacrament, and 'sacramentals.' The study and discussion will be ecumenical and interreligious, interdisciplinary and multicultural.

SPGR 7740. Spiritual Direction Practicum I. (3 Credits)
The Spiritual Direction Practicum I offers participants the opportunity to learn about the dynamics of prayer as a personal relationship with God, the spiritual direction relationship, elements of Ignatian spirituality, and the role of supervision. A grade of pass and an instructor's evaluation confirming skill development are required to move to Spiritual Direction Practicum II. Ordinarily, the practicum courses are taken at the conclusion of one's program; however, with the approval of the Spirituality Faculty Committee, a student still needing to fulfill a limited number of course requirements may also apply for admission to the practicum courses. The following courses are ordinarily completed before taking the practicum courses: Old Testament; New Testament; Christology or Theology of the Human Person; and Sacraments or Sacramental Spirituality or Church and Society. With faculty approval, one or more of these courses may be taken concurrently with the practicum courses. Note: This course is pass/fail only. The following courses must be taken before the Spiritual Direction Practicum begins for all students: Theology of Spiritual Direction; Discernment in the Christian Tradition; and Pastoral Counseling Skills.

SPGR 7741. Spiritual Direction Practicum II. (3 Credits)
This course is a continuation of SPGR 7740. A grade of pass for SPGR 7740 and an instructor's evaluation confirming skill development at a successful level is required to register for this course. The course registration must take place with request to the assistant dean after Practicum I grades have been posted. Note: This course is pass/fail only.
SPGR 7746. Franciscan Spirituality: Francis, Clare and Bonaventure. (3 Credits)
Doctoral students only- please see syllabus requirements for doctoral students. Explores the religious experiences of Francis and Clare from their own writings as well as biographical materials and examines the spiritual teachings that Clare and Francis bequeathed to the religious orders they founded. Special emphasis is placed on the balance they achieved between the contemplative and active lifestyles and on the evangelical values that characterize the Franciscan approach to ministry. Some consideration will be given to representative Franciscan figures who have exemplified the interplay of theology, spirituality and ministry, suggesting outlines of the same for today.

SPGR 7752. Christian Contemplation and Action. (3 Credits)
Drawing on the work of Philip Sheldrake, this doctoral-level course explores the writings and lives of five representative themes of contemplative prayer and active ministry. The Way of Discipline, The Contemplative-Mystical Way, The Way of Practical Action, The Way of Beauty, and The Prophetic Way. Representative authors include Thomas Merton, Julian of Norwich, Ignatius Loyola, Teresa of Avila, G.M. Hopkins, Gustavo Gutiérrez, and Dorothy Day, among others. The course considers these sources and traditions as living fonts of and challenges to our contemporary spirituality, and provides a broad overview for more specific studies in Christian spirituality. The capstone requirement is a 20-page research paper.

SPGR 7760. Christian Spirituality and Leadership. (3 Credits)
This course examines the intersection between classic texts in Christian spirituality and contemporary texts on leadership studies. The oldest corporations in the West are the monasteries and the Catholic Church. Many spiritual treatises are aimed at helping people understand how to lead communities in an effective manner through word and example. Contemporary writers about leadership, such as Jim Collins, stress spiritual qualities such as humility and hope as important for leading companies into greatness. Whereas the spiritual writings have little quantitative evidence associated with them, the leadership studies provide such analysis; however, books on leadership studies tend to lack any depth behind such concepts as humility or even good advice as to how to achieve it, which texts from the history of Christian spirituality provide. By bringing these horizons together, the course will help students to understand the practical value of Christian spirituality in business, administration, and politics.

SPGR 7792. Contemporary Christian Spirituality. (3 Credits)
This course will explore contemporary foundations, issues, movements, and persons impacting the practice of Christian spirituality in a postmodern context. Issues discussed will include embodiment, prayer, work, and sexuality. Movements will include feminism, ecology, and compassion/justice. This course is for doctoral students only and will require doctoral-level participation and additional research/writing elements.

SPGR 7794. Women Mystics. (3 Credits)
This doctoral-level course will explore the experiences and theologies of women mystics as reported or portrayed throughout Christian history. Students will read selections from hagiographical texts, from the sayings of the Desert Mothers, from historical texts such as the Trial of Joan of Arc, and from the writings of women mystics themselves—such as Hildegard of Bingen, Clare of Assisi, Marguerite Porete, Catherine of Siena, Julian of Norwich, Teresa of Avila, Margaret Mary Alacoque, Thérèse of Lisieux, and Mother Teresa of Calcutta. Lectures will draw upon history, sociology, psychology, theology, and other disciplines to contextualize the consideration of these readings and to invite a careful comparison with present-day experiences. Students will also be invited to ponder the forces that have shaped our current canon of mystics and saints: Whose lives remain invisible to our study, and why?

SPGR 7811. Meditation East/West. (3 Credits)
A Practical theoretical treatment of the tradition of Christian prayer and Eastern Meditation. Included are guided practices, reading and reflection. DMIN/PHD Students Only.

SPGR 7830. Discernment in the Christian Tradition. (3 Credits)
This doctoral-level course offers a two-fold introduction to Christian traditions for the discernment of spirits. During the first half of the course, we pursue a historical review of the various articulations of spiritual discernment from New Testament foundations through the 16th century. During the second half of the course, we concentrate on the theory and practice of Christian discernment and decision-making grounded in the writings of St. Ignatius Loyola. We engage in a critical, close reading of Ignatius' 'Rules for the Discernment of Spirits' (weeks 1 and 2) and 'The Election,' both texts from 'The Spiritual Exercises,' as well as selected letters and other writings by Ignatius. This course also emphasizes each student's personal appropriation of this material through the discussion of discernment case studies. Capstone requirement is a 20-page research paper.

SPGR 7834. Methods in Christian Spirituality. (3 Credits)
This course introduces doctoral students to the academic discipline of Christian spirituality and to methods for researching and writing at the doctoral level, including an introduction to the Turabian Manual for Writers of Research Papers, Theses, and Dissertations. Course topics include defining the academic discipline of Christian spirituality; the relationship between spirituality and theology; experience as an object of study; and the approaches to context, historical consciousness, multidisciplinarity, and hermeneutic theory. In this practical seminar, students collaboratively learn to research and write at the graduate level, as well as explore the rich offerings of Christian spirituality as an academic discipline. In consultation with the professor, students are free to pursue a research topic of their choosing; however, their research agenda must include a Christian spirituality component. Students already working on a DM in thesis/project or Ph.D. dissertation may, with the professor’s consent, use a chapter thereof as their research paper for this course. The capstone requirement is a 20-page research paper.

SPGR 7870. Spiritual Direction: Theology and Practice. (3 Credits)
This course explores the experience of spiritual direction from the standpoint of both the director and the one directed. It situates the contemporary ministry of spiritual direction within the history of the Christian tradition, and draws upon interdisciplinary and interreligous perspectives in order to examine critically a diversity of past and present theologies, processes, and models of spiritual direction.

SPGR 7888. Special Topics: Spirituality. (3 Credits)
Reserved for special courses in Spirituality.
SPGR 7902. Ignatian Spirituality for Ministry. (3 Credits)
Limited to DMin students. Engaging in ministry within an Jesuit/Ignatian spirituality context involves pursuing a Christian vision of the world rooted in the experience and writings of the sixteenth-century Basque saint, Ignatius of Loyola. In this hybrid course, we (1) examine the life of Ignatius against the background of his socio-historical and theological context, (2) engage in a close, critical reading of representative texts, and (3) survey various contemporary approaches to the appropriation of his spiritual tradition, with an emphasis upon ministerial practices. We examine especially two important primary sources, his Autobiography, dictated to a fellow Jesuit near the end of his life, and The Spiritual Exercises, a remarkable and influential handbook for personal and spiritual growth. We also read excerpts from his Spiritual Journal, the Constitutions of the Society of Jesus, and Letters. Capstone requirement: 20-page research paper, which is due later in the spring semester.

SPGR 8500. Comprehensive Exam MA Christian Spirituality. (0 Credits)
Required for completion of the MA in Christian Spirituality concentrations, Generalist and Spiritual Direction.

SPGR 8870. Spir Dir. Theol & Pract. (3 Credits)
(PHD and DMIN students only) This course explores the experience of spiritual direction from the standpoint of both the director and the one directed. It situates the contemporary ministry of spiritual direction within the history of the Christian tradition, and draws upon interdisciplinary and interreligious perspectives in order to examine critically a diversity of past and present theologies, processes, and models of spiritual direction.

SPGR 8998. Special Topics: Spirituality. (3 Credits)
A tutorial in the area of religion.

**Strategy (Graduate) (SAGB)**

SAGB 7618. Organization Theory. (3 Credits)
While discussion of business is often couched in economic terms, more often than not business is influenced by sociological and psychological factors. In this class, you will study the key dimensions of what is known as ‘Macro OT’ (sociological perspectives) and ‘Micro OT’ (psychological perspectives). Macro OT coverage will include Institutional Theory (legitimacy, certifications, and isomorphism), Network Theory (structure, position, tie type, and network dynamics), and Social Movement Theory and Media Construction (performances). Micro OT coverage will include Search Theory and Organizational Learning Theory (exploration vs. exploitation), Decision-making Biases (confirmation bias, anchoring, etc.) and Agency Theory (monitoring and incentive alignment). Other Meso Theoretical Constructs covered include Identities, Myths and Artifacts, Roles, and Deviance/Conformity.

SAGB 7622. Consulting Skills. (3 Credits)
Students develop the skills involved in each phase of the consultation process: contracting with clients, gathering critical performance data, diagnosing the information for improvement opportunities, providing feedback to the client, and building strategies for intervention. This course prepares students for different types of client-consultant relationships, internally and externally.

SAGB 7626. BIMBA: Global Policy. (4.5 Credits)
This intensive course is designed to give students an in-depth understanding of Brexit, including the implications for the British economy and the companies that operate in it. Students meet three times as a class in preparation for travel to England. This course may count toward a Finance or Management concentration. Please see your program director or dean-adviser for further registration information.

SAGB 7660. Strategy. (3 Credits)
FT MBA CORE/ PMBA FLEX CORE COURSE. Focuses on defining an organization’s mission, establishing its objectives, developing strategies for achieving those objectives, and assuring implementation and continual updating of long-term plans. This course integrates the knowledge and skills developed in the core courses. (Previous title: Business Policy)

SAGB 7661. Strategy. (3 Credits)
This course introduces the strategic management framework, integrating the perspectives of different functional areas in understanding a firm’s performance. Learning goals involve the development of diagnostic reasoning skills, the practice of strategy communication skills, and the application of a toolkit to analyze issues relevant to the development of an appropriate strategy for a firm. Lectures, case studies, and project work are part of the pedagogy of this course.

SAGB 7671. Industry Analysis and Strategic Planning. (3 Credits)
Discusses techniques for analyzing the long-term attractiveness of different industries and develops a framework to understand the nature of competition and the relative competitive position of firms within industries. Emphasizes global factors that affect industry attractiveness and competitive positioning. In particular, highlights the impact of differences in and the competitive advantages of nations and trade, as well as the development of global standards for the long-term profit potential of industries. While this course emphasizes the industry level, it also includes competitive factors of firms within industries to introduce a framework for strategic planning at the firm level.

Attribute: ABIB.

SAGB 769K. History of Business. (3 Credits)
This course will focus on the interrelationships between the business community and the development of the United States of America. The course is divided into three sections that will cover such topics as the colonization of America by the Europeans, industrialization in the United States and the civil war, and creating an environment of business regulation.

SAGB 769Y. Value Innovation. (3 Credits)
This course will introduce students to blue ocean strategy and value innovation: the strategic logic of high growth. Students will learn how to develop value innovation strategies that reshape industries and lead to the creation of new market space. The course will include lectures, class team work, and case studies.

SAGB 76AD. Quantitative Methods and Decision Analysis. (3 Credits)
A study of quantitative methods and decision making analysis.

SAGB 76AX. Strategic Management and the Pharmaceutical Industry. (3 Credits)
This course will introduce students to the skills and techniques in researching highly regulated industries, using the pharmaceutical industry as an example. The industry is going through major transformations, with the basic business model being threatened. This course will analyze the reasons for this and will help in defining newly emergent business models in the Pharmaceutical industry. The uncertainties created by turbulence in the political, economic, social, and techno-scientific systems will be highlighted as well as the creative solutions being attempted.

Attribute: ABHM.
SAGB 76AY. Introduction to Healthcare Systems. (3 Credits)
This course will describe the different elements of the healthcare system and highlight the role of the payers, providers, patients, healthcare service workers, and the industry (pharmaceutical, devices, supplies, and diagnostics) within the context of a larger social system governed by local regulations and different demographic realities. While the emphasis will be on the United States, key differences with other systems such as in Europe, Canada, Brazil, and China will also be presented. The role of key associations in the U.S. such as the AMA, IOM, PhRMA, patient advocacy groups, and unions will be described. Emerging trends in the system in the United States will be presented as will the impact of other countries on the U.S.
Attribute: ABHM.

SAGB 76BC. Judgment and Decision Making. (3 Credits)
Decision-making is a central human activity, but how good are we at it? Scientific evidence suggests that our decisions are often biased and flawed, resulting in disappointing or even disastrous outcomes. This course draws upon contemporary research in economics and psychology to answer two questions: (1) how should we rationally approach decision-making, and (2) why is it that our actual decision-making is so often irrational?

SAGB 76BH. Hist of International Business. (3 Credits)
History of International Business explores the transition from an agrarian to a modern business economy of four nations: China, Russia/Soviet Union, Germany and Japan. Each of these nations came to understand that economic modernization was vital for true independence in the world of the nineteenth and twentieth centuries. How they faced their unique challenges shaped the futures of their nations, often bringing down governments and forcing radical reformation of their societies. History of International Business will explore these efforts and relate them to the continuing challenges of the twenty-first century economy.

SAGB 76BK. The Rose Program. (3 Credits)
This course is intended for students who want to learn more about regulation in the financial services industry and want to get actively involved in shaping the regulatory space. Top performing project teams will present their proposals to a panel of Wall Street executives and will be invited to Washington, D.C. (all expenses paid) to present to regulators.

SAGB 76BL. History of Labor in America. (3 Credits)
This course will examine the development of the labor movement in America, starting with its colonial roots in the eighteenth century, through the rapid growth of the movement in the nineteenth century as America industrialized, to the increasing politicization of the movement as it reached the height of its influence in the twentieth century, and ending with an analysis of the modern decline of organized labor. Discussions will include the changing legal climate within which the unions operated, the often hostile business climate against which the unions organized, and the struggles against internal corruption within the unions.

SAGB 76BM. Innovation in Business and Energy. (3 Credits)
This course aims to frame and critique opportunities for business to create innovations in energy systems. It discusses how contemporary energy systems have evolved and how energy infrastructures vary across regions of the world. It also examines how business decision makers can think about choices of energy and energy systems by encouraging students to think broadly in terms of innovation possibilities.
Attribute: ABGS.

SAGB 76BO. Urban Lab. (4.5 Credits)
This interdisciplinary course explores groundbreaking issues in urban research with the goal of inspiring new ways to think about the city’s future and Fordham’s role in helping to shape that future. The course includes a lab component focused on applied research and scholarship, deep engagement with the urban community, and the development of innovative solutions. Students will work with civic and community organizations, public agencies, and urban experts to identify, evaluate, and implement effective policies and programs in specific topic areas.

SAGB 76BP. Current Topics in Healthcare. (3 Credits)
Healthcare management operates in a very dynamic environment. As healthcare policies change with new administrations so do the priorities of providers and payers. The patients feel the impact of these changes the most, while the industry has to continuously re-assess the validity of its business models. Further, new technologies, scientific breakthroughs, and system innovations keep healthcare administrators on their toes. This course provides an opportunity to discuss the most prevalent issues in healthcare as they are happening. Guest lecturers and professors provide their views on different challenges that the healthcare industry faces including policy, operations, risk taking and decision-making uncertainties, and the developing solutions. Students will participate in these discussions and do a final paper on one of the topics of their choosing. Each formal lecture will be followed by one or two in-depth discussion sessions.

SAGB 76BS. Blockchain: Industry Disruptor and Creator. (3 Credits)
Blockchain (the technology underlying Bitcoin and Ethereum) is a transformative technology that will up-end existing industries and spawn completely new ones. In this course, students will study the fundamentals of blockchain and examine its potential impact on industries as diverse as banking, energy, music, and non-profits.
Attributes: ABBC, ABER, ABFO.

SAGB 76BT. Business Strategy Simulation. (3 Credits)
The design of this course is built upon a decision-making laboratory that creates a context-rich simulated business environment in which student teams manage simulated businesses. The course promotes the synthesizing of knowledge conveyed through the curriculum, and it also presents a means for practicing approaches to dealing with rapid and systemic change in a business environment.

SAGB 76BU. Machine Learning Strategy. (3 Credits)
To achieve competitive advantage, managers need to make certain decisions about activities along their value chains. This course tries to help students (i.e., future or current managers) understand how they can use machine learning (ML) techniques for such decisions. While ML is a vast and rapidly-evolving domain, the underlying logic and concepts are well identified. Therefore, to make the best use of our time, we not only cover the current techniques and applications of ML but also its fundamental concepts rooted in statistics. This approach will give students the necessary tools to self-teach as they enter the job market and ML evolves. While students are not expected to be expert statisticians, a basic understanding of statistics will be helpful. Nevertheless, willingness to learn and explore beyond class would make a significant difference in students’ learning journey. The course covers both the theory and application of ML using conventional lectures, lab sessions, case studies, web-service platforms (involving Amazon Web Services, Azure, etc.), and guest lectures by pioneering adopters of ML from the industry.

SAGB 76BY. Current Issues in Contemporary Business. (3 Credits)
This course seeks to frame and critique opportunities for business to create innovations in energy systems. It discusses how contemporary energy systems have evolved and how energy infrastructures vary across regions of the world. It also examines how business decision makers can think about choices of energy and energy systems by encouraging students to think broadly in terms of innovation possibilities.

SAGB 76BZ. Corporate Innovation. (3 Credits)
This course aims to frame and critique opportunities for business to create innovations in energy systems. It discusses how contemporary energy systems have evolved and how energy infrastructures vary across regions of the world. It also examines how business decision makers can think about choices of energy and energy systems by encouraging students to think broadly in terms of innovation possibilities.
SABU 2142. Statistical Decision-Making. (3 Credits)

This course will focus on the interrelationships between the business community and the development of the United States of America. The course is divided into three sections that will cover such topics as the colonization of America by the Europeans, industrialization in the United States and the civil war and creating an environment of business regulation.

SABU 3441. Intro Health Care Systems. (3 Credits)

This course will describe the different elements of the healthcare system and highlight the role of the payers, providers, patients, healthcare service workers and the industry (pharmaceutical, devices, supplies and diagnostics) within the context of a larger social system governed by local regulations and different demographic realities. While the emphasis will be on the United States key differences with other systems such as in Europe, Canada, Brazil and China will also be presented. The role of key associations in the US such as the AMA, IOM, PhRMA, patient advocacy groups and unions will be described. Emerging trends in the system in the United States will be presented as will the impact of other countries on the US.

Attribute: OCST.
Prerequisites: MGBU 3223 or SABU 3223.

SABU 3447. ST: Current Topics Healthcare. (3 Credits)

Healthcare management operates in a very dynamic environment. As healthcare policies change with new administrations so do the priorities of providers and payers. The patients feel the impact of these changes the most while the industry has to continuously re-assess the validity of its business models. Further, new technologies, scientific breakthroughs and system innovations keep healthcare administrators on their toes. This course provides an opportunity to discuss the most prevalent issues in healthcare as they are happening. Guest lecturers and professors provide their views on different challenges that the healthcare industry faces including policy, operations, risk taking and decision-making uncertainties and the developing solutions. Students will participate in these discussions and do a final paper on one of the topics of their choosing. Each formal lecture will be followed by one or two in-depth discussion sessions.

Prerequisites: MGBU 3441 or SABU 3441.

SABU 3448. Health Business Practicum. (3 Credits)

This course offers students concentrating in Healthcare Management to do an internship at an approved healthcare institution or conduct research on a specific topic at Gabell’s Global Healthcare Innovation Management Center.

Prerequisites: MGBU 3441 or SABU 3441.

SABU 3452. ST: Industry Analysis and Strategic Planning. (3 Credits)

Discusses techniques for analyzing the long-term attractiveness of different industries and develops a framework to understand the nature of competition and the relative competitive position of firms within industries. Emphasizes global factors that affect industry attractiveness and competitive positioning. In particular, highlights the impact of differences in and the competitive advantages of nations and trade, as well as the development of global standards for the long-term profit potential of industries. While this course emphasizes the industry level, it also includes competitive factors of firms within industries to introduce a framework for strategic planning at the firm level.

Attribute: OCST.

SABU 3552. ST: The Rose Program. (3 Credits)

This course is intended for students who want to learn more about regulation in the financial services industry and want to get actively involved in shaping the regulatory space. Top performing project teams will present their proposals to a panel of Wall Street executives and will be invited to Washington, DC (all expenses paid) to present to regulators.

SABU 3562. ST: Singapore Global Immersion: Entrepreneurship, Innovation and Economic Development. (3 Credits)

Innovation is generally believed to be a major driver of economic growth and development as it may increase the output of an economy for a given level of input. Entrepreneurs play an important role in translating technological inventions into commercially viable innovations, thereby contributing to economic growth and development. While this account of economic development seems simple enough to understand by policy makers, countries significantly vary in terms of prosperity and economic development.

SABU 4430. ST: Machine Learning Strategy. (3 Credits)

To achieve a competitive advantage, managers need to make certain decisions about activities along their value chains. This course tries to help students (i.e., future or current managers) understand how they can use machine learning (ML) techniques for such decisions. While ML is a vast and rapidly evolving domain, the underlying logic and concepts are well identified. Therefore, to make the best use of our time, we not only cover the current techniques and applications of ML but also its fundamental concepts rooted in statistics. This approach will give students the necessary tools to self-teach themselves as they enter the job market and ML evolves. While I don’t expect students to be expert statisticians, a basic understanding of statistics will be helpful. A willingness to learn and explore beyond class would make a significant difference in students’ learning journeys. The course covers both the theory and application of ML using conventional lectures, lab sessions, case studies, web-service platforms (involving Amazon Web Services, Azure, etc.), and guest lectures by pioneering adopters of ML from the industry.

Attribute: OCST.

SABU 4431. ST: Blockchain: Industry Disruptor. (3 Credits)

Blockchain (the technology underlying Bitcoin and Ethereum) is a transformative technology that will up-end existing industries and spawn completely new ones. In this course, students will study the fundamentals of blockchain and examine its potential impact on industries as diverse as banking, energy, music and non-profits.
SABU 4432. ST: Managing Innovation and Technology. (3 Credits)
This course will introduce students to theoretical and practical aspects of the crossroads between technology and innovation. The course will take students on a journey through the different stages of the entrepreneurial process of technology innovation, including converting the innovation into a business model innovation, financing, and marketing. Students will practice and develop skills that include writing a full business plan (including financials and a marketing plan), negotiations with investors, and making a presentation in a startup pitch competition.

SABU 4433. Strategic Analysis for Consultants. (3 Credits)
Entering the career path of a consultant demands particular skills—scoping and pricing projects, identifying promising markets and estimating demand, identifying data from various sources and pairing them for analysis, and so forth. This course—required for all consulting concentration and secondary concentration students at the Gabelli School—helps to bolster these skills.

SABU 4434. Measurement and Data Visualization. (3 Credits)
Consultants are interested in answering questions such as: How well is this company run? How is the company funded? How are employees spending their time? To answer these questions, they may look at company records, speak to employees and customers, or make site visits. Decisions need to be made on how to collect, summarize, analyze, and present these disparate pieces of information. In this course, we think about how to approach these issues, from developing appropriate and ethical metrics and heuristics to creating accessible visualizations.
Attribute: 0CST.

SABU 4435. ST: Judgment and Decision-Making. (3 Credits)
The purpose of this course is to make you a better decision maker both professionally and in your personal life. The course is organized around two distinct approaches to decision-making. The normative approach concerns how we should make decisions. Should I buy the cheaper car or the car with better gas mileage? Should I buy a house or rent an apartment? In the first part of this course you will learn how to structure and solve complex decision problems involving uncertainty and conflicting objectives. The descriptive approach concerns how we actually do make decisions. Why do people not save enough for retirement, or why do they invest their money irrationally? Why do entrepreneurs invest time and effort when past evidence suggests that they will most likely fail? The second part of the course will draw on research from behavioral economics and psychology in order to understand common biases and errors in judgment and decision-making, and we will learn methods for avoiding those errors in our own lives and work.
Attribute: 0CST.

SABU 4436. ST: Strategic Management and the Pharmaceutical Industry. (3 Credits)
This course will introduce students to the skills and techniques in researching highly regulated industries, using the pharmaceutical industry as an example. The industry is going through major transformations, with the basic business model being threatened. This course will analyze the reasons for this and will help in defining newly emergent business models in the pharmaceutical industry. The uncertainties created by turbulence in the political, economic, social, and techno-scientific systems will be highlighted as will the creative solutions being attempted.

SABU 4441. Strategy. (3 Credits)
This integrated course brings together the student’s previous study of the functional areas of business. The course focuses on the activities of the chief executive's top management group in defining the objectives and goals of the organization and in developing programs for the achievement of those goals. Major attention is devoted to the sophisticated, contemplative action of top-level decision makers.

SABU 4444. ST: Adv Concepts In Strategy. (3 Credits)
The objective of the course will be to build upon the basic strategy skills developed during MGBU 4441. Companies are facing serious strategic challenges as the pace of technological change has increased, competitors have become more aggressive and customers have become more demanding. The course will examine advanced strategy concepts through case studies of companies at strategic crossroads, white papers and articles describing new strategy concepts and actual events occurring in the marketplace. Students will be asked to contribute to weekly lectures, take a traditional mid-term exam and participate in small teams to produce a final project. The final project will address a company at a strategic crossroads and propose a recommended course of action for that company to meet its current challenge or exploit a potential opportunity.

SABU 4456. ST: Global Corporate Communication. (3 Credits)
The ability to influence is a critical business skill for business professionals in any industry, including consulting. This course focuses on corporate communication, including both internal and external communication. It includes sessions with faculty and industry professionals. We first define corporate communication and persuasion to better understand how organizations develop long-term relationships with clients, as well as internal and external stakeholders. We will discuss how to assess corporate communication, as well as various modes of effective corporate communication. Students will demonstrate their ability to assess stakeholders and audit an organization’s communications. They will also gain experience in developing communication plans.
Attribute: 0CST.

SABU 4999. Independent Study. (1 to 3 Credits)

Supreme Court (SUGL)

SUGL 0386. Curr Supreme Crt Controversies. (2 Credits)
Concentrates on Supreme Court practice, the constitutional decisions of the most recent term, and leading constitutional issues on the current docket. Enrollment is limited. Notes/Miscellaneous: PAPER REQUIRED . Attributes: JD, LLM.

Symposium (SYMP)

SYMP 0001. Pre-Health Symposium. (1 Credit)
An introduction to medical, dental and other health professions schools requirements together with an opportunity to interact with members of different health professions.
SYMP 0002. First Year Symposium. (0 Credits)
SYMP 0003. Pre-Law Symposium. (1 Credit)
This symposium will familiarize students with careers in the law, as well as the essential elements of a strong law school application. Emphasis will be placed on the academic, extracurricular, and professional conduct expectations necessary to enter the legal profession. The symposium will feature guest speakers from different sectors of the legal profession, as well as admissions officers from area law schools.
SYMP 0005. Pre-Health Peer Mentors. (0 Credits)
Attend all sessions of Pre-Health Professions Symposium, lead a group of 8-10 first-year health professions students in academic and community life.

SYMP 0007. First Year Research Experience. (1 Credit)

SYMP 0008. Manresa CEL Ignatian Symposium. (1 Credit)
The one-credit (pass/fail) Manresa Symposium explores the relationship between Jesuit education and experiences of Community-Engaged Learning (CEL). The Symposium highlights the collaboration between Manresa faculty, Jesuit-in-residence house master, residence hall staff, Office of Mission Integration and Planning and its Center for Community-Engaged Learning, and Bronx community partners. Both on and off-campus, the Symposium emphasizes respectful dialogue, solidarity, reflection, and critically informed action in the Jesuit educational tradition. All readings, materials, and services are provided at no charge. The Symposium is open to FCRH and Gabeli Manresa students.

SYMP 0009. Big Data. (1 Credit)
Wherever we go and whatever we do, data is being collected: purchases, registrations, clicks, ‘likes’, tweets, ‘favorites’ and more. This unprecedented volume, variety and velocity of electronically captured information, known as Big Data, is transforming the way we live, work, think and behave. This interdisciplinary symposium will expose students to opportunities and challenges currently facing the fields of law, business, science and government. Students will learn techniques and tools for understanding and processing this new form of digital knowledge. No prior background is required.

SYMP 0010. West Wing ILC. (1 Credit)

SYMP 1000. Nutrition Essentials. (1 Credit)
We ARE what we eat. Therefore we should know exactly what we are eating and how it affects our bodies. Nutrition is the science of food and how food nourishes our bodies and impacts our health. This course/symposium will help you to understand: what nutrients are in food, what nutrients your body requires, how your body utilizes those nutrients, how to know your food is safe and what is a ‘healthful’ diet for you and your lifestyle (whether you are an athlete, non-athlete, have weight issues etc). Such knowledge will help you maintain overall wellness FOR LIFE.

SYMP 1100. Commuter Leadership Seminar. (1 Credit)
This one-credit course will be offered to freshman commuter students interested in exploring effective leadership styles and skills that will contribute to their development and growth in and out of the classroom. In addition to this, students in our community will form connections with students who share a common goal of developing their leadership skills further, while navigating the challenges of commuting to college. By the end of the semester, the class will develop a digital repository for community-based leaders.

SYMP 1200. Foundation in Research Engagement. (1 Credit)
This one credit course will offer interested students exposure to basic research skills, across disciplines, in order to bolster their training as they pursue further coursework and experiences and/or augment their learning in this area. The goals of the seminar will be to provide participants with a foundation in research methods and project implementation; by the end of the semester, the class will prepare a series of multi-disciplinary projects to be presented at the Undergraduate Research Symposium.

SYMP 2500. The Matteo Ricci Seminar. (1 Credit)
The Matteo Ricci Seminar focuses on helping students develop a broad-based perspective on the contemporary world, their location in it, and the role of learning in creating a more just society. In the spring, students will identify and begin to work closely with faculty advisors in their areas of expertise. Seminar meeting will focus on the postgraduate opportunities for which students will be applying, and by the end of the academic year, each participant will have an outline of a research project that s/he plans to work on, with direction from her/his academic advisor, over the summer and during the 2011-2012 academic year.

SYMP 2600. Discerning Your Future: An Ignatian Guide. (1 Credit)
This FCRH seminar offers students the opportunity to learn and practice tools for discernment, both in big choices and in everyday living. The seminar, through readings and conversations with the instructor and partners, will focus on helping students with decision-making and reflection. The instructor will facilitate discussion, readings, and activities centered on lived experiences and guided exploration of key questions for young adults in the current climate. Each student will be expected to meet with the instructor individually as well. Students will also be expected to write four short reflection papers during the course of the semester.

Taxation (Gabelli) (TXGB)

TXGB 7001. Corporate Taxation. (3 Credits)
Studies federal income tax laws that apply to the formation, operation, dissolution, and liquidation of corporations. Focuses on the tax impact of various financial transactions upon the corporation, as well as on the shareholders. Issues of distributions and reorganizations, accumulated earnings tax, and personal holding companies are covered. Discusses related multiple corporations, earnings and profits, and book-to-tax adjustments. Also studies S corporations and other ways of mitigating double taxation. Includes a brief review of corporate acquisitions and reorganizations.

Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7010. Federal Research and Procedures. (3 Credits)
Concentrates, during the first part of the course, on the skills needed to research and answer tax questions. Then focuses on the procedures to resolve disagreements — both pre-and post-audit — with the Internal Revenue Service.

Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7015. Partnerships. (3 Credits)
Analyzes the uses, formation, operation and termination of partnerships. Topics include the "substantial-economic-effect doctrine," distributions, sale and exchange of interest, partnership termination, liquidation and disproportionate distributions and limited partnerships and their use as tax shelters.

Prerequisite: TXGB 7001 (may be taken concurrently).

TXGB 7020. Tax Planning for Individuals. (3 Credits)
This course emphasizes the relationship of estate and gift taxes to the income tax. It explores the philosophy underlying federal policy toward the three taxes and the issue of transferring assets. It also introduces basic elements of estate planning, such as trusts, annuities, joint interests, and life insurance.

Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.
Prerequisite: distinctive tax characteristics of major business states, such as New

Discusses the basic elements of state and local taxes, and surveys the

TXGB 7055. Taxation of Executive Compensation. (3 Credits)
Covers the tax consequences as well as various strategies relating to
the design and implementation of executive compensation programs
including stock options, restricted stock, stock appreciation rights,
phantom stock and golden parachutes; employee benefit plans, including
health care, disability, life insurance, educational assistance, dependent
care and cafeteria and flexible spending plans; and retirement plans,
including qualified pension, profit-sharing and stock bonus plans, as well
as non-qualified supplemental executive retirement plans (SERPS), top
hat plans and excess benefit plans.
Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of

TXGB 7065. Current Problems in Tax. (3 Credits)
This course analyzes the major provisions of new federal tax legislation,
case ruling and regulations. Examining their impact on individual
taxpayers, business, investments, retirement plans, estates, trusts and
practices and procedure. The course uses the current legislative changes
to keep up with the constantly changing tax environment.
Prerequisite: TXGB 7001.

TXGB 7076. Tax Accounting. (3 Credits)
Provides an understanding of the application of Accounting Standard
Codification (ASC) Topic 740, Income Taxes. Focuses on the financial
reporting of income tax amounts on the Statement of Operations,
Statement of Financial Position, Statement of Stockholders’ Equity, and
the Statement of Cash Flows, tax footnote, and related disclosures.
Also covers audit issues related to income tax balances, disclosures,
identifying tax risks, and internal controls to mitigate such risks.
Prerequisite: TXGB 7001.

TXGB 7068. Taxation of U.S. and Foreign Expatriates. (3 Credits)
Analyses how salaries, benefits and special allowances can be structured
to minimize individual tax liability under U.S. law for citizens working
abroad and foreigners working in the United States. Encompasses filing
requirements, cost-of-living differentials, foreign business expenses,
foreign tax-credit limitations and avoidance of double taxation.
Prerequisite: TXGB 7025.

TXGB 7081. IT and Data Analytics for Taxation. (3 Credits)
Focuses on the skills needed to research and authoritatively answer
complex tax questions and on how technology impacts the tax research
process. A general framework for tax research is introduced and the
framework is applied to contemporary tax research technologies by
analyzing i) the types of research questions and issues that these
technologies enable, ii) how tax research workflow has evolved and
will continue to evolve, iii) the changing role of human judgment in an
environment populated with “tax expert systems,” and iv) how expert
tax systems can be made to be authoritative. A hands-on survey is also
provided of the most important tax technologies in commercial use.

TXGB 7085. Foreign Taxation. (3 Credits)
Introduces the tax systems of major foreign countries from two
standpoints taxation of U.S. companies investing or operating in foreign
countries and taxation of foreign enterprises investing or operating in the
U.S.. Extends concepts discussed in TXGB 7045.
Prerequisite: TXGB 7045.
TXGB 709C. Civil and Criminal Tax Enforcement. (3 Credits)
This course focuses on the federal tax crime statutes enumerated in the Internal Revenue Code and the impact on tax practitioners in their capacity as expert witnesses for the defense, as government witnesses against the client, and as the targets of a criminal investigation. The student will be introduced to the function of the Criminal Investigation Division of the Internal Revenue Service and its investigative techniques, as well as to the legal process via the role of the Justice Department. This course may be taken as an elective for students in the MS in Taxation, MTA, MS in Accounting as well an elective in the MBA Program.
Prerequisite: TXGB 7001 (may be taken concurrently).

TXGB 7184. Individual and Business Entity Taxation. (3 Credits)
Explores the sources and ideas underlying tax laws and their development in relation to fiscal and social policy. Emphasizes the application of basic concepts in tax planning for individuals and businesses. Topics include gross income, exclusions, deductions, credits, property transactions, basis, and the alternative minimum tax.
Attribute: ABEP.
Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

TXGB 719L. Sustainability Research and Reporting. (3 Credits)
This course enables students to develop a deep understanding of industry standards and expanding regulations and guidance by examining current company disclosures and evaluating to what level such disclosures reflect the company's associated industry standard. Students will form their own views on how companies' disclosures compare to the standards with respect to their relevance, fair representation, and usefulness in helping investors assess performance on material sustainability topics.

TXGB 7811. Taxation - Internship. (1 to 3 Credits)
This course is intended for students with a Taxation internship for this trimester that wish to receive academic credit for it. The course will begin with an orientation session and will be followed by additional meetings with students. The course instructor will provide additional details to enrolled students.

TXGB 8999. Independent Study. (3 Credits)

**Taxation Law (TXGL)**

TXGL 0206. Tax Planning and Transactions. (2 Credits)
Course will focus on the practical and substantive tax considerations in the life of a U.S. multinational corporation. From deciding the best ways to sell a product in a foreign market, to establishing a holding company, and considering a move outside of the U.S., to adopting the best methods and accounting backgrounds are neither expected nor advantageous. Grading and Method of Evaluation: Final exam. <p>Professor Katsoris Section Description: This course surveys the basic principles of federal taxation, exploring income, deductions, and property transactions. Although it concentrates on the taxation of individuals, the principles introduced are applicable to all taxpayers. A comparison of income taxation with consumption taxation runs throughout the course. There is an emphasis on tax policy, and a focus on the role of taxation in social policy. Math is not the instructor's strength.

Attributes: BFF, LAWB, LAWI, PIE.

TXGL 0328. Corporate Tax. (3 or 4 Credits)
This course presents the tax considerations of doing business in the corporate form. The course includes the formation of the corporation, distributions to shareholders, stock redemptions, partial and complete liquidations, reorganizations, spin-offs, and the survival of net operating loss carryovers following changes in corporate structure or shareholders. Prerequisites: Income Taxation or permission of the instructor.
Attributes: BFF, LAWB, LAWI.

TXGL 0339. Estate and Gift Taxation. (2 or 3 Credits)
An introduction to the fundamental principles of federal estate and gift taxation and estate planning, including inter vivos and testamentary transfers, trusts, the marital and charitable deductions, powers of appointment, life insurance, jointly held property, IRAs, and generation skipping transfers.
Attributes: JD, LL.M.

TXGL 0348. Income Taxation. (2 to 4 Credits)
Professor Rebecca Kysar—An introduction to the fundamentals of federal income taxation with a focus on the determination of gross income, personal and business deductions, and exemptions; an analysis of timing issues and assignment of income principles; and a study of the character of gain or loss upon the disposition property. Alongside these foundational concepts, the professor also emphasizes tax policy. Math and accounting backgrounds are neither expected nor advantageous. Grading and Method of Evaluation: Final exam. <p>Professor Katsoris Section Description: A study of the income taxation of individuals, estates, trusts, and partnerships covering such items as gross income, permissible exemptions and deductions, accounting problems and capital gains and losses. <p>Professor Sugin Section Description: This course surveys the basic principles of federal taxation, exploring income, deductions, and property transactions. Although it concentrates on the taxation of individuals, the principles introduced are applicable to all taxpayers. A comparison of income taxation with consumption taxation runs throughout the course. There is an emphasis on tax policy, and a focus on the role of taxation in social policy. Math is not the instructor’s strength.

Attributes: BFF, LAWB, LAWI, PIE.

TXGL 0357. Tax Policy. (3 Credits)
This seminar examines tax policy through the lens of distributive justice. It begins by considering the traditional criteria for evaluating taxes: equity and efficiency, with a focus on whether economic efficiency and economic justice are reconcilable goals. Students read some political theory in order to explore the meaning of fairness in taxation. Having mastered basic economic and philosophical tools, students turn to the classic tax policy issues of progressivity and choice of tax base (income, consumption, and wealth), and also examine selected policy issues, which change each year. Topics have included: taxation of the family, taxation of the poor, taxation of human capital, personal deductions, exemption for nonprofit organizations, transitions in the tax law, tax expenditures, social security, and the politics of tax. The readings are a combination of classics in the tax policy literature and exemplars of contemporary debates. The class regularly discusses current events.<p> Tax Policy is an intensive writing class in which each student must write six short papers and discuss them with the class. There is no exam. Income Taxation is not a prerequisite, but an interest in justice in taxation is. The short paper requirement is somewhat modified for students seeking to satisfy the writing requirement.
Attributes: INLJ, JD, LAWB, LAWI, LL.M, PIE.
TXGL 0369. Global of Am Corp: Tax & Reg Pol. (2 Credits)
Globalization of American Corporations: Tax and Regulatory Policies This course will review the legal issues faced by US multinational corporations as they expand their operations outside the United States. Topics covered will include: the tax impact of their international businesses; US and foreign regulatory concerns, such as anti-trust, employment, intellectual property, as well as the global response to such expansion in the form of trade laws, local taxes and popular opposition to expansion. We will also review financial issues, such as structuring mergers and acquisitions, international debt and equity offerings and legal governance.
Attributes: LAWB, LAWI.

TXGL 0375. Corporate Strategy and Taxation. (2 Credits)
This course will review the role income tax considerations play in corporate strategy and in determining a corporation’s financial planning and results. Taxes and strategic planning will be reviewed as part of determining business structure, debt and offerings, mergers and acquisitions, international business expansion, capital structure, and choice of business location. This course can be used to satisfy writing requirement.
Attributes: LAWB, LAWI.

TXGL 0402. Tax and Budget Policy. (2 Credits)
This course will explore issues in tax policy, predominantly at the intersection of tax and budget policy. The seminar will begin with an overview of income taxation, as well as the basics of the federal budget process. We will explore the roles of all three branches of federal government in setting budget policy, including the law governing this process and its recent failures. We will also focus on major policy decisions now facing lawmakers in the tax and budget areas. A tentative list of topics includes (1) the reconciliation process and tax legislation, (2) the failures of budget process in the international tax realm, (3) tax expenditures and “fiscal illusion” in the budget process, (4) temporary tax legislation, (5) dynamic estimates vs. conventional estimates, and (6) distributional analyses. <p> Grades will be based primarily on a requirement.
Attributes: LAWB, LAWI.

TXGL 0410. Nonprofit Law. (2 or 3 Credits)
The nonprofit sector, which accounts for an increasingly significant share of the U.S. economy, is regulated by both state and federal law. This course blends business law, tax law, public interest law, and constitutional law. It considers many of the unique legal and policy issues that face charities, including eligibility for tax exemption, restrictions on political activities, prohibition on private benefit for individuals, regulation of fundraising, and limitations on commercial enterprise. The course compares the law and theory of business organizations with that of nonprofit organizations in the context of fiduciary duties and executive compensation.
Attributes: BFE, PIE.

TXGL 0780. Partnership Taxation. (3 or 4 Credits)
This course addresses the tax treatment of partnerships and partners, problems associated with the formation, operation and dissolution of the partnership, sale of a partnership interest, termination, and retirement and death of a partner. We examine actual partnership agreements and apply fundamental partnership tax concepts to a series of problems. In past years, we have had guest lectures by distinguished practitioners. Students should note that partnership tax rules apply generally to all business entities that are not publicly traded, such as general and limited partnerships, LLCs, and play an especially important role in real estate ventures. <br>Prerequisites: Federal Income Taxation or permission of the instructor.
Attributes: BFF, JD, LAWB, LAWI, LLM.
Prerequisite: TXGL 0348.

Theatre (THEA)

THEA 1100. Invitation to Theatre. (3 Credits)
This course guides the student on an experiential tour of mounting a theatrical production. The role of the playwright is defined and each student will write a short scene. The function of the director is demonstrated by analyzing multiple stagings of the same text; each student will direct a scene. The actor is a primary element of theatre; each student will act a scene. We will explore the role of the designer who creates the physical world of the play; each student will conceive a design. Interwoven with the production elements will be a survey of theatre history focusing on Greek, Elizabethan, contemporary and global theatre. Students will attend live performances of plays.
Attributes: FACC, FRFA.

THEA 1160. Design Fundamentals. (4 Credits)
This course explores the art and the business of fashion design by tracing its history in Europe and America; understanding the contribution of fibers to the medium; communicating design details through several modes of drawing; and investigating the market factors that shape contemporary fashion industry around the globe.
Attributes: FASH, THME.

THEA 1170. Introduction to Fashion Design. (3 Credits)
This course covers the fundamentals of design, including color theory, texture/patterns/motifs, placement in space, scale, 2D/3D layout theories, and studies in traditional visual unities. These topics will be explored through many forms of 2D and 3D exercises, including drawing.
Attribute: THME.

THEA 1180. Internship. (1 Credit)
Internship.

THEA 1999. Tutorial. (1 Credit)

THEA 2010. Acting I. (4 Credits)
The course aims to strip away preconceived notions of acting, forge a visceral understanding of the unity of body and voice, demonstrate that expanding the imagination is the highest skill of the craft, and explore the nature of transformation; theatre is an art of radical change. Required Vocal Lab.
THEA 2015. Acting for Non-Majors. (4 Credits)
Introductory acting technique for non-theatre performance majors.
Emphasis on developing and freeing the voice, body, imagination, and emotions. Activities of the course include vocal and body warm-ups, theatre games and exercises, improvisation, and scene work.
Attribute: THME.
THEA 2035. Drawing and Drafting for the Theatre. (4 Credits)
This course will cover basic drawing principles (line in space, shadow and light) and then delve into drafting for the theatre through Vectorworks. Each student will learn how to draft and become familiar with how every drafting package for each discipline should look—for example, how a lighting drafting package is different from a scenic drafting package or from a technical drafting package. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: THME.
THEA 2035. Drawing and Drafting for the Theatre. (4 Credits)
This course will cover basic drawing principles (line in space, shadow and light) and then delve into drafting for the theatre through Vectorworks. Each student will learn how to draft and become familiar with how every drafting package for each discipline should look—for example, how a lighting drafting package is different from a scenic drafting package or from a technical drafting package. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: THME.
THEA 2045. Introduction to Directing. (4 Credits)
This class introduces students to some of the basic tools of theatre directing by having them craft several short pieces that explore ways of using space, movement, gesture, light, sound, objects and spoken words to communicate a story to an audience. Open to non-majors.
Attribute: THME.
THEA 2070. Theatre Design. (4 Credits)
Create a world for a play complete and true unto itself by thoroughly researching the text and characters through visual and emotional research. Learn to react viscerally and instinctively to the text and then articulate that reaction through various forms used in the professional theatre: models, costume sketches, lighting sketches, sound landscapes, projection, drawings and research. This course will serve to instill a thorough process that can be utilized for the remainder of one's career and will guarantee that a production will result whether you're a playwright, director, designer or any theatre artist. No prior coursework required. Open to non-majors.
THEA 2080. Collaboration I. (4 Credits)
First semester of a full-year course for all theatre majors. The class introduces students to the areas of acting, directing, playwriting, design, and stage management, with focus on the art of collaboration.
THEA 2090. Collaboration II. (4 Credits)
Second semester of a full-year course for all theatre majors. The class introduces students to the areas of acting, directing, playwriting, design, and stage management, with a focus on the art of collaboration.
THEA 2230. Costume Design I. (3 Credits)
Study of the principles involved in the design of costumes for the stage with an emphasis on research, the development of drawing and painting skills, and the investigation of character.
Attributes: FASH, THDP
THEA 2235. Costume Design II. (3 Credits)
Continuation of THEA 2230: Costume Design I.
Attribute: THDP.
Prerequisite: THEA 2230.
THEA 2260. Theatre Design: Conceptual Foundations. (4 Credits)
As Design Fundamentals is to the body, so Theatre Design: Conceptual Foundations is to the soul. The spine of the course is to manifest physically (through research and visual exercises) what has been formed conceptually, through emotional response to text and other stimuli.
Corequisite: THEA 1160.
THEA 3001. Theatre History I: Mythos. (4 Credits)
This semester begins with an examination of ancient performance traditions and the pivotal work of the ancient Greeks in the context of ancient cosmologies and in light of the function of the mythic imagination. It continues with an exploration of the centrality of mythos to the development of major theatrical movements in the Western Theatre from Medieval, through Renaissance and Elizabethan, and Neoclassicism. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

THEA 3002. Theatre History II: Modernity. (4 Credits)
This semester explores the umbilical connection between the volatile sweep of modernity and the development of protomodernist and modernist theatre. Advances in science and industry, expanded universes without and within, and tectonic socio-political changes all informed the dynamic expansion of form and function of the theatre. The course includes examination of the major schools of Western Modernism, notable works by artists in the late 19th and early 20th centuries, as well as an exploration of the profound influences of non-Western forms and artists upon these schools. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ALC.

THEA 3003. Theatre History III: Postmodernism and the Present. (4 Credits)
This semester focuses primarily, though not exclusively, on contemporary U.S. theatre and performance, with an emphasis on core ideas of post modernity and their centrality to the development of the wide range of artists, companies, and forms that have emerged since the mid 20th century. The impact of theatre engaging questions of cultural pluralism, sovereignty, race, class, gender, and sexual orientation is considered in light of concurrent historical events. Particular attention is given to the rich complexities of methodology, representation and community as theatre, at the top of the 21st century, continues its evolution. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, AMST, ASAM.

THEA 3011. Text Analysis. (4 Credits)
Through careful, intensive reading of a variety of plays with different dramatic structures and aesthetics, students begin to see that options exist for interpreting a script. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: THME.

THEA 3017. Song as Scene I. (4 Credits)
Learn how to effectively present musical material by exploring the text and combining it with sure vocal technique. An accompanist is present at each class, and different types of songs will be explored, ballad, up-tempo, comic/character, and pop/rock. Acting exercises will be used to fully flesh out the songs. Seamless transitions from scene to song to scene will be examined. The notion of singing as simply acting on pitch will be stressed. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: THME.

THEA 3030. Actor’s Vocal Technique I. (2 Credits)
Vocal exercises for the actor to help release the voice, develop larger breathing capacity, and agility in articulation. Work on developing physical ease while exploring varieties of vocal projection through speech and song, and text.

THEA 3040. Actor’s Vocal Technique II. (2 Credits)
Advanced exploration of the voice.

THEA 3050. Movement for the Actor I. (2 Credits)
This course will include: 1) Vigorous physical training to develop physical stamina along with Yoga breath-work and stretches to increase flexibility, agility, focus and concentration; 2) Butoh-influenced image work to develop body awareness and sensitivity as well as stimulate movement by images exercised by one’s imagination; 3) Creating characters by exploring the center, weight, rhythm, colors and temperament of the character; 4) Individual and group improvisational exercises to learn to trust and act upon organic impulses.

THEA 3060. Movement for the Actor II. (2 Credits)
Continuation of THEA 3050: Movement I. This course will include: 1) Continuation from Movement I of developing physical stamina and intensifying breath and Yoga work; 2) Continuation of Movement I based on Butoh-influenced image work; 3) Deeper exploration of character work and also taking the character out of the naturalistic realm to invite another layer of understanding on a more unconscious level; 4) Exploring abstract movement; 5) Creating group and solo pieces.

THEA 3066. Musical Theatre Intensive. (4 Credits)
A five-week summer intensive that offers a varied schedule of four classes: Musical Theatre workshop, Vocal techniques, Dance for Musical Theatre, and Acting. Monday through Thursday from 10 a.m. to 5 p.m., students will work in the classroom as a company. The early afternoon and evenings will include field trips, guest seminars, and attendance at Broadway, off-Broadway, and off-off Broadway plays and musicals. Find the program application online at fordham.edu/summer.
Attribute: THME.

THEA 3090. Stage Combat. (3 Credits)
Students will become familiar with the concepts, techniques, and safety practices of stage combat. Each class begins with a warm-up/stretch and then moves into strengthening and isolation work. Each class ends with work on original, ongoing choreography.
Attribute: THME.

THEA 3100. Acting IV. (4 Credits)
A scene study course with an emphasis on integrating Stanislavsky technique with non-linear, non-realistic texts. The actors will work with playwrights outside the canon of mainstream realism, such as Samuel Beckett, Gertrude Stein, Naomi Wallace, Erik Ehn, Heiner Muller, Adrienne Kennedy, Richard Foreman, Ruth Margraff, Caryl Churchill, Lisa D’Amour, Daniel Alexander Jones, and Suzan-Lori Parks. Work with heightened movement and voice extends the actors’ vocabulary. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
THEA 3205. From Page to Stage. (4 Credits)
Page to Stage is an introductory directing class focused on translating a dramatic text into theatrical performance. The class is required for directing majors and open to theatre majors in other tracks. Using a single focal text, students will work individually and in teams on class exercises and homework assignments that explore key aspects of the director's craft when working on a play script, including text analysis, research, collaborating with designers and actors, staging, and the rehearsal process. The semester culminates in a final evening presentation of staged scenes from the model play. Prerequisite: THEA 3011: Text Analysis, except with special permission.
Prerequisite: THEA 3011.
THEA 3253. Moliere: From Page to Stage. (4 Credits)
This course taught in French explores French Theatre and offers the opportunity to engage in the creative process from page to stage. Students will have the opportunity to participate in different capacities, such as performers, designers, dramaturgs, and stage managers. This course emphasizes the importance of working collaboratively. Students enrolled in the French and Theatre Programs will share their strengths and learn from each other. We will combine reading, theory, and analysis of a single play by Molière, and put what we learn into practice in rehearsal. The semester will end with a public performance.
Attributes: ALC, THPL.
THEA 3265. Writing for Theatre. (4 Credits)
This course encourages students to become playwrights and to improve their fluency in French. This is a creative writing course for theater with an opportunity to produce and perform an original sort play. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: FREN 2600 or FREN 3253 or THEA 3253.
THEA 3362. Lighting Design. (3 Credits)
Investigates how lighting design completes the visual world. We explore how light can transform the theatrical space. Lighting is the key element to the forward movement of a theatrical production as it creates transitions between scenes and defines time and place as the story is told. We will also examine alternative functions and use of light within photography and architecture. Open to non-majors.
Attributes: THDP, THPL.
THEA 3374. Lighting Design II. (3 Credits)
Continuation of THEA 3362: Lighting Design I.
Attributes: THDP, THPL.
THEA 3420. Sound Design I. (3 Credits)
From the physics of sound waves to the finesse of cueing, Sound Design covers the foundations of the field. The class will touch on topics in acoustics, system design, vocal reinforcement, sound effects, playback and audio development software, and the role of sound design in the rehearsal and tech process. The goal is to develop the conceptual rigor and practical technique to support a small production with an integral audio component.
Attributes: THDP, THPL.
THEA 3425. Sound Design II. (3 Credits)
A continuation of Sound Design I.
Attribute: THDP.
Prerequisite: THEA 3420.
THEA 3455. Projection Design I. (3 Credits)
Explore the growing design field of Projection Design. Learn to use text and research to inspire ideas for projections in a play. Through storyboarding each student will learn how projections can integrate into the space and world of a play.
Attributes: THDP, THPL.
THEA 3460. Projection Design II. (3 Credits)
Continuation of THEA 3455: Projection Design I.
Attribute: THDP.
Prerequisite: THEA 3455.
THEA 3564. French Theatre and Performance. (4 Credits)
This course explores French theater and offers the opportunity to engage in the creative process from page to rehearsal to a full public performance at the end of the semester. It also teaches students how to express themselves more effectively in French and develops their ability to communicate thoughts and feelings to others. We will combine acting, history, reading, theory, and analysis of major modern playwrights. Invited guests from the French and bicultural theater community in New York City will share their experiences with students and provide opportunities for students to practice their new skills and learn more. Taught in French. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, THME.
Prerequisite: FREN 2600.
THEA 3600. Master Class in Design. (4 Credits)
This course is taught by a designer who is a luminary in the field, and will explore theory, practice and career issues for designers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: THDP.
THEA 3700. Playwriting. (4 Credits)
This playwriting workshop is the cornerstone of the playwriting program. It intentionally welcomes writers of many levels of experience to one dynamic space. The goals of the workshop are to teach basic craft and create an environment that will guide the writers' explanation of their individual voices. We concentrate on four major issues: storytelling, character, structure, and language.
Attributes: CVW, ENGL, THME.
THEA 3800. Internship. (2 to 3 Credits)
Supervised placement for students interested in work experience.
THEA 3900. Cueing and Narrative. (3 Credits)
This course will incorporate the study of both Lighting and Sound Design to explore storytelling through Theatrical Design choices.
THEA 3910. Period and Style. (3 Credits)
This course will incorporate the study of both Scenic and Costume design to explore storytelling through theatrical design choices. This course will concentrate on how history and period specifically aid in creating the world of a play.
THEA 3920. History of Theatre Design. (4 Credits)
This course surveys architectural and mode-of-dress movements in history and explores how those movements have informed stage design through the ages. It will cover movements from the ancient (Western and Eastern) through contemporary times. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: THME.

THEA 3985. Set Design I. (3 Credits)
Investigates how the design of an environment creates the world of a play. Working with plays, students will use text analysis, character development and emotional response to develop ideas about the space. Through visual research, models and sketches, students learn their process of creating a set and practice articulating their ideas.
Attributes: THDP, THPL.

THEA 3987. Set Design II. (3 Credits)
Continuation of THEA 3985: Set Design I.
Attribute: THDP.
Prerequisite: THEA 3985.

THEA 3999. Independent Study. (3 Credits)
Independent research and reading with supervision from a faculty member.

THEA 4000. Creating a Character I. (4 Credits)
Advanced scene study employing exercises and exploration specifically designed to give the actor a technique with which to develop a distinct characterization. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: THPE.
Prerequisite: THEA 3100.

THEA 4001. Creating a Character II. (4 Credits)
Continuation of THEA 4000: Creating a Character I.
Attribute: THPE.
Prerequisite: THEA 4000.

THEA 4025. Flying Solo. (4 Credits)
This will be an intensive, practical course for students interested in creating a short solo performance piece. Creative work will be accompanied by in-depth documented research into the student’s particular area of interest. In addition to their creative work, each student will be responsible for a substantive research project on a performance artist, assigned to them by the instructor.
Attributes: THME, THPL.

THEA 4045. Young, Gifted, and Black. (4 Credits)
This interdisciplinary course will explore themes of political, social, and personal transgression and transformation in the cultural tradition of Black American Theatre and performance from the Harlem Renaissance, through the Black Arts Movement to the present. The interrelationship of text, music, and movement will be highlighted to underscore significant aesthetic innovations and also to allow for a discussion of plays, playwrights, and performers in the fullest possible context.
Attributes: ACUP, ADVD, AMST, ASAM, PLUR, THME.

THEA 4100. Acting Shakespeare. (4 Credits)
An investigation of the various historical and contemporary techniques of acting Elizabethan verse through close textual analysis and in-class performance of scenes from Shakespeare’s plays. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: THPE.
Prerequisite: THEA 3100.

THEA 4120. Acting Shakespeare II. (4 Credits)
Advanced Scene and text work in Shakespeare. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 4143. Shakespeare: Text and Performance. (4 Credits)
This course will study Shakespeare’s plays first as texts and then as performance, focusing on the literary/historical aspect of a play, and then the same play as a theatrical script for realization on stage. Through close readings from widely disparate points of view, we will grasp how the theatre engages audiences and creates meanings, and how time and culture are expressed in both text and performance. We’ll investigate questions about adaptation, authorship, the status of ‘classic’ texts, and the transition from manuscript to stage and film. The final project can be an essay, the student’s short video of a Shakespeare excerpt, or a brief performance. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENGL, ENHD, ICC.

THEA 4144. Hamlet: Text and Performance. (4 Credits)
We will study Shakespeare’s Hamlet as a historical/literary text and as a theatrical script. Through close readings from desperate points of view, we will encounter how the theatre acts to create meanings, and how time and culture are expressed in text and performance. Areas of study will include set design, costumes, film adaptations, literary re-writings, pop culture renditions, and references in music and advertising.
Attributes: ENGL, ENHD, ICC.

THEA 4145. Dramaturgy. (4 Credits)
The word dramaturgy, ‘the art or technique of dramatic composition or theatrical representation,’ describes a series of practices that include aspects of playwriting, directing, and theatrical scholarship. This interdisciplinary seminar takes a capacious view of the practice of dramaturgy, approaching it as both a creative and a scholarly practice. As dramaturges, we will be literary and performance scholars, researching theater history, dramatic theory, and the broader cultural and historical contexts of our theatrical projects; we will also work as practitioners, collaborating with our peers to translate diverse texts into theatrical events. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ICC.
THEA 4148. Medieval Drama. (4 Credits)
Divine mysteries and scurrilous scatology, Everyman's workaday struggles and a king's political quandaries, lavish one-night courtly entertainments and massive Biblical plays performed by an entire community: the drama of the English late Middle Ages (roughly 1350-1500) was resourceful, local, non-professional, and endlessly inventive. In this course, we study medieval English drama along three axes: as literary texts full of humor, pathos, and meaning; as evidence for historical performance practice and theater history; and as scripts brimming with possibility for performance. Combining intensive reading of medieval play texts with key works by important theater practitioners, we examine medieval drama on its own terms and ask what it means to read and perform these works in the 21st century. To help answer this question, students collaboratively design, direct, and stage a medieval dramatic work of their choosing as a final project. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENGL, ICC, MVLI, MVST.

THEA 4151. Performing Medieval Drama. (4 Credits)
In the English late Middle Ages (roughly 1350-1500), theater was a thoroughly local affair. Performances spanned from one-night-only entertainments, acted by lavishly costumed noblemen for their peers, to massive cycles of city-specific religious plays, performed annually over a period of days by an entire community. Scurrilous scatology stood alongside the most divine of mysteries; the humble, menial struggles of Everyman had their place on stage just as much as the social and political quandaries of a king. In this course, we will study medieval English drama both as a body of literature and as a repository for medieval performance rhetorics we can experiment with in the present day. A series of assignments over the course of the semester will help us understand late medieval plays and their unique theatricality. The semester culminates with a collaboratively staged and publicly performed medieval drama of the student's choosing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENHD, MVLI, MVST.

THEA 4152. The Tempest: Text and Performance. (4 Credits)
This course will study Shakespeare's play The Tempest as a historical/ literary text and simultaneously as a theatrical script that we will act in the classroom, focusing on a single scene at a time. Through close readings from disparate points of view, we will investigate how the theatre acts to engage audiences and create meanings, and how time and culture are expressed in both text and performance. Students will read several adaptations of the play, as well as viewing film versions and adaptations such as Prospero's Books. We'll investigate questions about adaptation, authorship, the status of a "classic" text and its variant forms, and the transition from manuscript to stage to film. Assignments will include readings, essays, and presentations. Quizzes will include regular exercises in blank verse, especially iambic pentameter. The final project can be a scholarly essay, the student's short video of an excerpt from The Tempest, or a brief performance. No acting background is necessary. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENGL, ENHD, ICC.

THEA 4250. Acting for the Camera I. (4 Credits)
Introduces the actor to the techniques of acting for the mediums of television and film, including issues of scale, angle, and material. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: THPE.
Prerequisite: THEA 3100.

THEA 4250. Acting for the Camera II. (4 Credits)
Continuation of THEA 4250: Acting for the Camera I.
Attribute: THPE.
Prerequisite: THEA 4250.

THEA 4301. Performance and Art. (3 Credits)
This acting course for dancers will work in developing original scenes based on poetry, sculpture, paintings and scene study. Emphasis on work with physical actions and creating a physical and psychological score to illuminate actor-created work. Focus on imagination, writing and performance skills. For Alvin Ailey BFA majors.

THEA 4302. Russian Theatre Workshop. (2 Credits)
This course conducted in Moscow includes work in acting, movement, dance, voice, Russian theatre history, and a study of the current Russian theatre. There is also an alternate program of scenography, costume design, and theatrical design theory and history. It is taught by the faculty of the Moscow Art Theatre School.

THEA 4305. Clown and Improvisation. (4 Credits)
Examining different comedic traditions, students will study techniques from commedia dell'arte, clown and improvisation. Drawing on the teachings of contemporary artists such as Keith Johnstone and Philippe Gaulier, the course will demonstrate and sharpen comedic skills by creating a sense of continuity between traditional and contemporary comedy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: THPE.

THEA 4400. Senior Audition I. (2 Credits)
Prepares students to audition for professional theatre companies, agents, casting directors, and graduate schools. Students develop audition pieces and also learn to prepare cold readings. Guidance also provided in the preparation of headshots and professional resumes.

THEA 4410. Senior Audition II. (0 to 2 Credits)
Preparation of the Senior Showcase, in which students present scenes for producers, agents, and casting directors.

THEA 4425. Design Showcase. (2 Credits)
This course focuses on presenting and discussing students' work as a design or manager while developing their understanding of the business of theatre and their potential role in it. We look at portfolios, resumes, and CVs, cover letters, and production books, and talk with established professionals and recent graduates about the best strategies for entering the New York and regional theatre communities. Design and Production students only, required for participation in the annual Design Showcase. 
Prerequisite: THEA 2070.
THEA 4500. Theatre, Creativity, and Values. (4 Credits)
This Senior Values Seminar is designed to give students an opportunity to examine and reflect upon creativity and the theatre. How does creativity mark the distinctness of the human person? How does human creativity point to the presence and action of God? What purpose does the theatre serve for society? Emphasis is placed on personal integration of philosophical principles and personal technique and craft. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMCS, EP4, THME, VAL.

THEA 4501. Directing Production Workshop. (3 Credits)
An advanced production class that guides students through the process of producing a fully-staged production for public performance.
Attribute: THPL.

THEA 4505. Design Production Workshop. (3 Credits)
This course is designed to run with Directing Workshop to merge design and directing students in practical production experiences. In the process, students will hone their ability to analyze text, shape a design idea, communicate with artistic collaborators, create working drawings and models, plan a production schedule, and create and manage a budget. Designers must be working on a project in the studio season. Stage Managers vet their process on the mainstage.
Attribute: THPL.

THEA 4500. Internship. (4 Credits)
Supervised placement for students who are interested in work experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 4500. Internship. (4 Credits)
Supervised placement for students who are interested in work experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 4999. Tutorial: Theatre and Drama. (1 to 4 Credits)
Independent research and reading with supervision from a faculty member.

THEA 5000. Theatre History I. (4 Credits)
We will seek a perspective on the developments in the theatre from Ancient Greece, Japan, and India, and through the Elizabethans using major plays as our focus. We will explore their context—when, where, and why they were written—the lives of the playwrights, and the culture and the politics of their society.

THEA 5100. Theatre History II. (4 Credits)
The course explores the major developments in Theatre from 1879 to the present using major plays of Ibsen, Strindberg, Chekhov, Wedekind, Stein, Brecht, O'Neill, Artaud, Genet, Beckett, Soyinka, Mishima, Kennedy, Hansberry, Churchill, Parks, and the movements of performance art and Butoh. We explore their context (when, where and why they were written), the lives of the playwrights, and the culture and the politics of their society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 5700. Playwriting Workshop. (4 Credits)
The primary goals of the course are to hone basic craft and to create an environment that will guide the writers’ exploration of their individual voices. We concentrate on four major issues: storytelling, character, structure, and the poetic voice. The course is taught from overlapping perspectives of traditional and alternative techniques. Exercises are rooted in storytelling techniques and character development. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ENGL.

THEA 5750. Playwriting Strategies. (4 Credits)
This course offers a series of workshop classes that focus on writing strategies, generating new work, and giving writers unique tools for confronting and overcoming obstacles and challenges the playwright faces. The playwrights will be introduced to readings and interviews by and about other playwrights on generative writing process, the act of rewriting, and new forms of creating a stage event. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 5800. TV Comedy Writing. (4 Credits)
This course will focus on the art of creating, pitching, and selling a comedy series. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 5810. TV Dramatic Writing. (4 Credits)
This course will focus on the art of creating, pitching, and selling a dramatic series. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 6400. Design for Playwrights. (4 Credits)
Playwrights write texts to be performed in actual space, so the playwright who begins from imagining the place where action occurs is activating the essential core of the dramatic imagination. Playwrights must understand how to collaborate with designers, and benefit enormously from inviting a designer into the creative process early. It advances the playwright’s craft to learn the designer’s craft of line, shape, drawing, model making and findings way to embody thematic ideas in concrete visual images and environments. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 6430. Adaptation. (4 Credits)
Introduction to the craft of adaptation for the stage and screen. Emphasis will be placed on learning to recognize and evaluate the kinds of source material that invite adaptation, and subsequently how to effectively translate elements from that material to craft powerful stories. Class discussion, lectures, readings, and guest seminars will examine source material that includes short stories, novels, biographies, and true stories developed from journalistic sources as well as examples of its successful adaptation. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 6500. Shakespeare. (4 Credits)
An exploration of Shakespeare’s plays from a playwright’s perspective on craft. How does Shakespeare achieve what he does? What techniques does he employ to generate his vast range of characters and meanings?

THEA 6770. Screenwriting. (4 Credits)
This course focuses on analyzing and writing screenplays for film and television. Class time is devoted to exercises, lectures, and assignments that focus on creating and improving plots and premise, developing potent characters, understanding and honing structure, and sharpening dialogue. In-class activities and lectures are supplemented with guest seminars, film viewings, and screenplay readings, followed by discussion and analysis on themes of craft, including plot, character, technique, and structures.
THEA 6780. Screenwriting: Idea to Execution. (4 Credits)
 Writers will explore the art, craft, and business of writing for the screen, with a focus on the 'classical' principles of screenwriting. Each writer will complete the first half of a feature length screenplay. Classes will be a mixture of lecture, discussion, screenplay analysis, writing exercises, discussion of viewed films and in-class workshopping of scripts.

THEA 6980. Contemporary Theatre. (4 Credits)
 A playwright is the person who has ear to the rail, the one who channels the zeitgeist. To that end this class will obsess on the present moment. What is happening in politics now? Literature? Science? Where in New York City theatre and global theatre are these revolutions and innovations finding expression? Writers will see never-before-produced plays, meet with the makers of new work, and use those experiences to write a play that resonates with the present moment.

THEA 6990. The Playwright Prepares. (4 Credits)
 This semester focuses on preparing the second-year playwrights for submitting their plays to theatres, film and television studios, contests, and agents. Visiting designers, managing directors, film and television producers will enhance the students’ understanding of the community they are entering. Contemporary theatre issues are also discussed, particularly those related to the role of the playwright in our society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEA 7000. Production. (4 Credits)
 This seminar serves as a foundational course for the full-length thesis productions that spring. Contemporary theater issues are also discussed, particularly those related to the role of the playwright in our society.

THEA 8999. Independent Study. (0 to 4 Credits)

Theology (THEO)

THEO 0912. Requirement Preparation. (0 Credits)
 For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement, such as comprehensive exam, Master’s thesis, or dissertation submission.

THEO 0914. Requirement Preparation in Summer. (0 Credits)
 For Ph.D. and Master’s students, registration necessary to maintain continuous enrollment while preparing for a milestone requirement during the summer. (e.g., to be used by Ph.D. students after the oral examination/defense and prior to receiving the degree).

THEO 0922. PhD Comprehensive Examination Preparation. (0.5 Credits)

THEO 0930. PhD Comprehensive Examination-Theology. (0 Credits)

THEO 0934. Master’s Comprehensive Examination Preparation. (0.5 Credits)

THEO 0936. Master’s Comprehensive Examination-Theology. (0 Credits)

THEO 0938. Master’s Capstone-Theology. (0 Credits)
 Required interdisciplinary capstone project for all M.A. students in Theology.

THEO 0950. Proposal Development. (1 Credit)

THEO 0960. Proposal Acceptance. (3 Credits)

THEO 0970. Dissertation Mentoring-Theology. (0 Credits)
 The Theology Ph.D. student is required to register for Dissertation Mentoring, which has a 3 credit fee, the semester after the student’s proposal is accepted.

THEO 1000. Faith and Critical Reason. (3 Credits)
 An introductory theology course designed to acquaint students with the analytical study of religion and religious experience, and to give them some critical categories of evaluating the history of theological discourse. The academic study of some of the forms, concepts, experience, and theological formulations found in Christianity and various other traditions will be introduced.

THEO 1006. Sin and Salvation in Medieval Theology. (3 Credits)
 This Manresa seminar will provide a survey of Christian understandings of sin and salvation in the medieval West, c. 400-1500. Theologians whose writings on these topics will be considered include Augustine, Anselm, Peter Lombard, Thomas-Aquinas, Bonaventure, John Duns Scotus and Martin Luther.

THEO 1007. Sinners, Saints, and Stories. (3 Credits)
 This course will explore both the ways that biblical narratives have informed the traditional self-understanding of the western world and the ways in which that self-understanding has been complicated in the modern era. Of particular interest for this course is 1) the different biblical presentations of what it means to be a “sinner” or a “saint,” 2) the further reflection on these narratives and topics found in post-biblical literature, and 3) the competing narratives that may be found in the modern world.

THEO 1008. Mystics Monks and Mindfulness: Contemplation-In-Action Today. (3 Credits)
 This course explores the tensions between contemplation and action in the modern world by engaging writings by and about the Ignatian, Buddhist, Benedictine, and Islamic traditions. Given the demands to act in and improve the world, what is the role of silence, contemplation, and devotion? This course may include field visits to off-campus religious communities. This course satisfies the Faith & Critical Reason Core requirement for both FCRH and Gabelli students.

THEO 1010. Restless Heart: Quest. (3 Credits)
 Many writers throughout history, have described their personal quest for the transcendent. Writers—both classical and popular, devout believers and atheists, some reverent, some vulgar—describe this quest as a matter of first losing and then finding oneself. This seminar will explore the search of several of these writers through their autobiographies.

THEO 1050. Syriac Language and Literature I. (3 Credits)
 This course is part of a two-semester introduction to Syriac, a dialect belonging to the Aramaic language branch. The first semester will introduce the scripts, cover grammatical foundations, and expose students from early on to the reading of texts. The second semester will be mostly spent reading Syriac literature, but some time will be devoted to select special topics in Syriac grammar. It is possible to take the first semester only.

THEO 1051. Syriac Language and Literature II. (3 Credits)
 This course is part of a two-semester introduction to Syriac, a dialect belonging to the Aramaic language branch. The first semester will introduce the scripts, cover grammatical foundations, and expose students from early on to the reading of texts. The second semester will be mostly spent reading Syriac literature, but some time will be devoted to select special topics in Syriac grammar. It is possible to take the first semester only.

THEO 1050. Syriac Language and Literature I. (3 Credits)
 This course is part of a two-semester introduction to Syriac, a dialect belonging to the Aramaic language branch. The first semester will introduce the scripts, cover grammatical foundations, and expose students from early on to the reading of texts. The second semester will be mostly spent reading Syriac literature, but some time will be devoted to select special topics in Syriac grammar. It is possible to take the first semester only.

THEO 1051. Syriac Language and Literature II. (3 Credits)
 This course is part of a two-semester introduction to Syriac, a dialect belonging to the Aramaic language branch. The first semester will introduce the scripts, cover grammatical foundations, and expose students from early on to the reading of texts. The second semester will be mostly spent reading Syriac literature, but some time will be devoted to select special topics in Syriac grammar. It is possible to take the first semester only.
THEO 1060. Elementary Coptic I. (3 Credits)
This course is part of a two-semester introduction to Coptic, the latest stage of the Egyptian language. The first semester will introduce the script, cover grammatical foundations, and expose students from early on to the reading of texts. The second semester will be mostly spent reading Coptic literature, but some time will be devoted to select special topics in Coptic language and culture. The two semesters can be taken independently from one another.
Attributes: CLAS, MEST, REST.

THEO 1800. Internship. (1 Credit)
THEO 1999. Tutorial. (1 Credit)
Independent research and readings with supervision from a faculty member.
Attribute: GLBL.

THEO 2800. Internship-Theology. (2 Credits)
THEO 2999. Tutorial. (1 to 2 Credits)
Independent research and reading with supervision from a faculty member.
Prerequisite: THEO 1000.

THEO 3100. Introduction to Old Testament. (3 Credits)
History, literature and religion of ancient Israel.
Attributes: JSTH, JWST, MEST, MVST, MVTH, REST, STCJ, STOT, STTXT.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1010 or HPLC 1401 or THEO 1007 or THEO 1009 or THEO 1008.

THEO 3102. Book of Genesis. (4 Credits)
This fascinating and influential book of the Bible will be studied for its historical origins, literary forms, and theological ideas. In addition, the course will address the impact of the stories in Genesis on the development of western culture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: MVST, MVTH, STCJ, STOT, STTXT.
Prerequisites: THEO 1000 or THEO 1009 or THEO 1008 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1010 or THEO 1007.

THEO 3105. The Torah. (3 Credits)
Study of different types of literature found in the first five books of the Hebrew Bible and of the methods for its interpretation. This course will focus on the process by which this material moved from oral tradition to written literature to sacred scripture in Israel.
Attributes: JSTH, JWST, MEST, MVST, MVTH, STCJ, STOT, STTXT.
Prerequisites: THEO 1000 or THEO 1009 or THEO 1008 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1010 or THEO 1007.

THEO 31020. The Prophets. (3 Credits)
A study of prophecy in the Bible from its origin in the religious practices of the ancient Near East to the final literary shape of biblical books. Moses, Elijah, Amos, Hosea, Jeremiah, Isaiah and Ezekiel are among the figures to be studied.
Attributes: MEST, MVST, MVTH, STCJ, STOT, STTXT.
Prerequisites: THEO 1000 or THEO 1009 or THEO 1008 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1010 or THEO 1007.

THEO 3200. Introduction to New Testament. (3 Credits)
This course is an introduction to the literature that comprises the New Testament. Attention will be devoted to the historical setting of the New Testament, the process by which the New Testament writings came into existence, and the structure and content of each writing. Where appropriate, comparisons will be made with similar themes in Jewish and Greco-Roman literature of the period, and opportunities to utilize various methods of textual interpretation will be provided. On a more general level, the course's specific focus on the New Testament will serve as a vehicle to explore broader intellectual questions of theology and historical study: what does it mean to investigate a religious text from a critical perspective? What is the relationship between historical-critical inquiry and the text's ongoing role as scriptural or authoritative for Christians in modern society? What are the different ways in which modern Christians bridge the gap between the New Testament's ancient context and their own contemporary interpretation and application?
Attributes: AMCS, CLAS, MVST, MVTH, REST, STCJ, STNT, STTXT.
Prerequisites: THEO 1000 or THEO 1009 or THEO 1008 or HPRH 1001 or THEO 1006 or THEO 1010 or HPLC 1401 or THEO 1007 or THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005.

THEO 3207. The First Three Gospels. (3 Credits)
Introduction to the gospels of Mark, Matthew and Luke. The formation of the gospels, the distinguishing characteristics of each, and the life and teachings of the historical Jesus.
Attributes: MVST, MVTH, STCJ, STNT, STTXT.
Prerequisites: THEO 1000 or THEO 1009 or THEO 1008 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1010 or THEO 1007.

THEO 3212. Gospel of John. (3 Credits)
Literary and theological analysis of the fourth gospel; special attention to the theme of personal revelation in Jesus Christ, the motif of misunderstanding and the thematic unity of the gospel as a whole.
Attributes: AMCS, CLAS, MVST, MVTH, STCJ, STNT, STTXT.
Prerequisites: THEO 1000 or THEO 1008 or THEO 1009 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1010 or THEO 1007.

THEO 3250. Jesus in History and Faith. (3 Credits)
A study of the early Christian understanding of Jesus' life and ministry as this understanding is expressed in the Gospels, and of the so-called problem of the 'historical Jesus' which issues from a critical reading of these texts. This course will cover several divergent readings of Gospel texts by contemporary scholars.
Attributes: STNT, STTXT, THAM.
Prerequisites: THEO 1000 or THEO 1008 or HPRH 1001 or THEO 1006 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3310. Early Christian Writings. (3 Credits)
A selective study of the writing of prominent Christian theologians from Justin Martyr to Augustine, concentrating on early beliefs concerning God, Christ, the Church and the sacraments.
Attributes: CLAS, MEST, MVST, MVTH, OCST, REST, STCJ, THAM, THHC.
Prerequisites: THEO 1000 or THEO 1007 or HPRH 1001 or THEO 1006 or HPLC 1401 or THEO 1007.

THEO 3314. St. Augustine of Hippo. (3 Credits)
A study of the life and thought of St. Augustine (354-431). Particular attention is given to his early philosophical writings, the Confessions, and his teaching on sin and grace. Students read Augustine's works in translation and write several short papers.
Attributes: CLAS, MVST, MVTH, OCST, STTXT, THAM, THHC.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1010 or HPLC 1401 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1001.
THEO 3316. Byzantine Christianity. (3 Credits)
Historical and critical study of classic authors and texts in the Orthodox tradition including: Basil of Caesarea, John Chrysostom, John Climacus, John of Damascus, and Gregory Palamas.
Attributes: MEST, MVST, MVTH, OCST, REST, STXT, THAM, THHC.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPRH 1001 or HPLC 1401.
THEO 3317. Women of the Christian East. (3 Credits)
This Sacred Texts and Traditions course focuses on three overlapping but distinct aspects of women’s religious life in Eastern Christian societies: (1) the theological framework by which (male) religious authorities understood gender difference, (2) the multiple forms of women’s piety that were celebrated as holy, and (3) the real-life experience of Eastern Christian daughters, wives, nuns, deaconesses, and empresses. Throughout the course, we will examine authoritative texts central in the Orthodox Christian tradition—including Hebrew and Christian scriptures, Church Fathers, hagiography, and hymnography—as well as additional historical sources such as letters, imperial edicts, and works of art.
Attributes: OCST, STXT, THAM, THHC.

THEO 3320. Augustine, Aquinas, and Luther. (3 Credits)
This course provides a historical introduction to the life and thought of three of the most significant and influential theologians in the history of Christianity. The course will be divided into three units, one per theologian, and the general rubrics within each unit will be ‘Faith and Reason’ and ‘Nature and Grace.’
Attributes: MVST, MVTH, REST, STXT, THAM, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3330. Medieval Theology Texts. (3 Credits)
Historical and critical study of classic theological texts of Augustine, Pseudo Dionysius, Anselm, Bonaventure and Thomas Aquinas. Doctrine of God, the human person and Christ; relation of theology and philosophy.
Attributes: MVST, MVTH, OCST, REST, STXT, THAM, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3332. Christians, Muslims, Jews in the Medieval Period. (3 Credits)
This Sacred Texts and Traditions course explores theological writings from Christians, Muslims, and Jews in the Middle Ages. We will explore moments of both inter-religious conflict and peaceful co-existence, and we'll interrogate what this complex, distant history can teach us about possibilities of mutual understanding among members of Christian, Islamic, and Jewish faiths today.
Attributes: JWST, MVST, MVTH, OCHS, OCST, REST, STXT, THAM, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.

THEO 3340. Christian Mystical Texts. (3 Credits)
This course will introduce students to classic texts from the Christian mystical tradition with a primary focus on their close interpretation and analysis. Broader topics may include the nature of religious experience, explorations of the category of “mysticism” itself, gender and mysticism, and the interpretive issues at stake in comparing mystical texts across time and culture. Depending on instructor, course may focus on mystical texts from one particular period in the history of Christianity, or it may range from the patristic, medieval, modern, and/or contemporary periods. This course counts as core course in the Sacred Texts and Traditions serious.
Attributes: MVST, MVTH, REST, STNT, STXT, THAM, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1008 or THEO 1006 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3345. The Book of Revelation. (3 Credits)
The course includes a close reading of the final book in the Christian New Testament with special attention to contemporary biblical scholarship as well as various interpretations offered in times of crisis throughout Christian history.
Attributes: MVST, MVTH, REST, STCJ, STXT.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1008 or THEO 1009 or THEO 1010 or HPRH 1001 or HPLC 1401 or THEO 1007.

THEO 3350. Apocalyptic Literature: Ancient & Modern. (3 Credits)
This course examines the multifaceted phenomenon of apocalyptic thought, beginning with the texts of Second Temple Judaism and the New Testament, where we see a specific ‘unveiling’ of events signaling the End of History. Using both textual and historical analysis, we will consider the social, political, and religious contexts of this pattern of thought in its setting in antiquity and then consider its subsequent functions and interpretations in medieval, modern, and postmodern periods, including novels and films.
Attributes: STXT, THAM, THHC.

THEO 3360. Reformation Texts. (3 Credits)
This course will examine major Protestant and Catholic texts from the sixteenth century with attention to their religious, social and theological context and their importance for their respective ecclesial communities.
Attributes: STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3361. Protestant Texts. (3 Credits)
An exploration of major Protestant texts from the Reformation to the present, focusing on themes that have been especially prominent in Protestant Christian thought, e.g. sources of revelation, justification, ecclesiology, the role of images/material objects in worship, Christianity’s relationship to culture, etc. Students will be introduced to major Protestant figures and movements within Protestant theology through careful reading of significant theological texts. The course will focus especially on texts from the 18-20th centuries, concluding with an exploration of theological diversity within contemporary Protestantism.
Attributes: REST, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3371. The American Transcendentalists: Spirituality Without Religion. (3 Credits)
This course explores the spirituality and religious thoughts of the transcendentalists in the context of the 19th century liberal Protestant Christianity in the U.S. We will examine the influences of the transcendentalist movement (including Kant, German Romanticism, Indian Vedic traditions, and Swedenborg), read closely the most important works of it major figures (including Emerson, Thoreau, Alcott, and Fuller), and consider its influence on ecological spirituality, social progressivism, and post-religious spirituality in contemporary U.S. culture.
Attributes: STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.
THEO 3375. American Religious Texts and Traditions. (3 Credits)
A critical and contextual reading of significant texts in American religious history, focusing on diverse traditions and the history of religious debate about American culture, social structures, and identity. Major themes may include: nationhood and religious identity, secularism, religion and violence, new religious movements, religious pluralism, religious rights and freedoms, church-state relations, psychology and religion, religious intersections with race and ethnicity, spirituality, religious histories of liberation and oppression, religion and sexuality, religion and gender, science and religion, colonialism, religion and economic practice. Students will encounter themes through a variety of primary source materials, applying and critically assessing different modes of analysis. Genres considered may include autobiography and memoir, political speech, fiction, poetry, sermons, legal documents, self-help literature, scriptures, manuals and pamphlets, as well as various types of film, television, social media, art, music, and material culture.
Attributes: ACUP, AMCS, AMST, APPJ, ASHS, ASRP, PLUR, REST, STXT, THAC, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005.

THEO 3376. Spirituals, the Blues, and African-American Christianity. (3 Credits)
In the makings of the modern western world, the Christian imagination and African American cultural production have held a longstanding relationship. Afro-Christian, Afro-Blue is an invitation to read, view, and listen to two genres of African-American cultural production: the Blues, and the Spirituals. The course focuses specifically on the proliferation of these two genres in the early decades of the 20th Century. Through engagement with the Spirituals and the Blues, students will weigh in on three substantive problems in the making of the Americas: the involuntary presence of Africans and their descendants in the Americas, the God reality, and the religious meaning of Africa. The insights in the Blues and the Spirituals provide a sonic angle into how Americans have used their imagination of the Sacred to continuously restructure and reimagine options for life and living. Students will be afforded a unique opportunity not only to read texts, but also to listen to and view the sonic productions of a people and their efforts to speak, sing, and moan the Sacred otherwise.
Attributes: ACUP, ADVD, AFAM, AMST, ASAM, ASRP, REST, STXT, THHC.

THEO 3380. US Latinx Spiritualities. (3 Credits)
According to social scientists Robert Putnam and David Campbell, Latinx Catholics make up more than one third of the U.S. Catholic Church and are well on their way to achieving majority status. In light of these developments, such as the unprecedented numbers of religiously "unaffiliated" or "nones," the majority of which have come from the Catholic Church. How did the Catholic Church—its theologians, the millions of everyday faithful, and the Vatican—respond to, sometimes deepening, sometimes informing, and oftentimes critiquing these challenges? Controversies forced the Church not only to make pronouncements on the crises of the moment, but to refine and sometimes revise some of its basic foundational beliefs about human nature, revelation, reason, truth, and God.
Attributes: AMCS, INST, ISIN, REST, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1010 or HPLC 1401 or THEO 1007 or THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005.

THEO 3390. Church in Controversy. (3 Credits)
This course traces the Catholic Church's negotiations with the revolutionary challenges inaugurated by modernity. Topics will vary according to the instructor, but may include the colonial missions, the Enlightenment, the Holocaust, the Second Vatican Council, the rise of feminism, changing notions of normative sexuality, and more recent developments, such as the unprecedented numbers of religiously "unaffiliated" or "nones," the majority of which have come from the Catholic Church. How did the Catholic Church—its theologians, the millions of everyday faithful, and the Vatican—respond to, sometimes deepening, sometimes informing, and oftentimes critiquing these challenges? Controversies forced the Church not only to make pronouncements on the crises of the moment, but to refine and sometimes revise some of its basic foundational beliefs about human nature, revelation, reason, truth, and God.
Attributes: AMCS, INST, ISIN, REST, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1010 or HPLC 1401 or THEO 1007 or THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005.

THEO 3342. Catholic Social Teaching. (3 Credits)
This course is an introduction to modern Catholic social teaching. Major papal and conciliar documents will be read and critically examined from various Christian and non-Christian perspectives. Their relation to contemporary social issues will be explored.
Attributes: HHPA, HUST, PJRJ, PJST, REST, RSHR, SOIN, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3346. The Bible and Social Justice. (3 Credits)
A study of social justice in the Hebrew and Christian scriptures that involves historical, literary, theological, and ethical interpretations. Students will explore key biblical texts that address themes such as poverty, war, justice, power, and marginalization in historical context, within a history of interpretation, and in light of contemporary practice and theory.
Attributes: AMST, APPJ, ASRP, LAHA, LALS, PJRJ, PJST, REST, STXT, THAM, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3340. Christ in World Cultures. (3 Credits)
At the center of the Christian tradition stands the person of Jesus Christ. Yet from a global perspective, Christianity takes many forms in its many contexts. This course examines the ways in which the Christian faith interacts with diverse world cultures and asks the central question, how do cultural differences shape contemporary interpretations of Jesus as the Christ?
Attributes: AMCS, GLBL, INST, ISIN, LAHA, LALS, REST, STXT, THHC.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPRH 1001 or HPLC 1401.

THEO 3361. Scripture and the Struggle for Racial Justice. (3 Credits)
This course explores the ways Christian scriptures have been used throughout American history as tools for both oppression and liberation in the struggle for racial justice and the creation of a multi-religious nation. By looking closely at the interpretive practices throughout various eras of American history, students are equipped to consider: (1) the continuity and diversity of Christian textual traditions, (2) the embedded locations of active agents involved in scriptural interpretation, (3) the impact of scriptural interpretation and textual traditions on U.S. legal systems and social practices, and (4) the ongoing need to investigate how sacred texts and traditions function for inclusion and exclusion.
Attributes: LAHA, LALS, REST, STNT, STOT, STXT, THHC.
THEO 3620. Great Christian Hymns. (3 Credits)
This course will examine the poetry of Christian hymnody, beginning with the New Testament to the present, in order to unpack the rich and divergent theology expressed through its language and symbol, metaphor and doxology.
Attributes: AMCS, MVST, MVTH, REST, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3655. The Journey of Faith: Autobiography as Sacred Text. (3 Credits)
Spiritual autobiography carries the lifeblood of religious experience. Through the reading of selected autobiographies, this course provides an inter-religious study of the personal quest for the transcendent.
Attributes: REST, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1006 or THEO 1010 or THEO 1007.

THEO 3670. Theology and Contemporary Science. (4 Credits)
A college level introduction to multiple dialogues underway between Christian theologians and scientists. There are biblical, theological, and contemporary elements to the course. Within the study of theology, special attention is given to methods of inquiry engaged in dialogue with the sciences. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: REST, RSCS, RSTE, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1006 or THEO 1010 or THEO 1007.

THEO 3711. Sacred Texts of the Middle East. (3 Credits)
This course introduces students to religious literature from the Middle East, broadly conceived. In the course, students will learn to analyze and contextualize texts from Ancient Egypt and Mesopotamia as well as foundational texts of Judaism, Christianity, Islam, and Zoroastranism, including the Hebrew Bible and rabbinic writings, the New Testament and early Christian writings, the Qur'an and early Islamic writings. Special attention will be paid to the interactions of these traditions and communities as well as to their enduring legacies.
Attributes: GLBL, HHPA, HUST, INST, ISME, JSTH, JWST, MEST, MVST, MVTH, OCST, REST, STSN, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005.

THEO 3713. Classic Jewish Texts. (3 Credits)
An exploration of Jewish beliefs through close readings of the Bible and post-Biblical Jewish texts (Mishnah, Talmud, midrash, liturgy). The course will focus on Jewish methods of biblical interpretation, legal discussion, and the relationships between texts, practice and theology in Jewish tradition.
Attributes: GLBL, JSTH, JWST, MEST, MVST, MVTH, REST, STSN, STXT, THHC, WGSS.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.

THEO 3715. Classic Islamic Texts. (3 Credits)
This course explores the sacred texts of Islam including the Quran, and Hadith, medieval philosophical, liturgical and legal texts.
Attributes: GLBL, HHPA, HUST, INST, ISAS, ISIN, ISME, MEST, MVST, MVTH, REST, STSN, STXT, THHC, WGSS.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.

THEO 3720. Hindu Literature and Ethics. (3 Credits)
This course involves a study of the four aims of life (purushartha) in Hinduism: kama (enjoyment), artha (material gain), dharma (sacred law), and moksha (liberation). Readings, drawn from a variety of classic and modern Hindu texts, will be viewed in their historical contexts as developments in the evolution of Hinduism.
Attributes: GLBL, HHPA, HUST, INST, ISAS, REST, RSCS, RSTE, STSN, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.

THEO 3724. Classic Buddhist Texts. (3 Credits)
This course is an in-depth study of the Buddhist textual tradition starting with the early sectarian canon in South Asia and progressing through Chinese Buddhism to Japan, with a strong emphasis on Zen Buddhism. We will explore these religious texts in terms of their historical, cultural and artist contexts.
Attributes: GLBL, HHPA, HUST, INST, ISAS, REST, STSN, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3725. Buddhism in America: A Multimedia Investigation. (3 Credits)
This course traces the history of Buddhism in the United States from the nineteenth century to the present. It asks whether Buddhism in America is a single object of study, and whether we should understand it as a “religion.” It further explores different techniques and media at our disposal for considering the primary concerns of American Buddhists (using films, podcasts, etc.)
Attributes: AMST, ASRP, PLUR, RSCS, RSTE, STSN, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3728. Buddhist Meditation. (3 Credits)
What constitutes valuable knowledge in Buddhist communities, past and present? How does meditation enable the acquisition of meaningful knowledge? This course introduces students to a variety of strategies that Buddhist communities over the past 2,500 years have employed in order to discipline the minds and bodies of practitioners. Course assignments are intended to help students understand what is at stake in Buddhist debates about meditation and to prepare students to ask themselves how these debates might be relevant to the pursuit of transformative knowledge in their own lives.
Attributes: GLBL, INST, ISAS, REST, STSN, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.

THEO 3731. Japanese Religions: Texts and Arts. (3 Credits)
This course is an in-depth study of the Buddhist textual tradition starting with the early sectarian canon in South Asia and progressing through Chinese Buddhism to Japan, with a strong emphasis on Zen Buddhism. We will explore these religious texts in terms of their historical, cultural and artist contexts.
Attributes: GLBL, HHPA, HUST, INST, ISAS, REST, STSN, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401 or THEO 1007.

THEO 3732. Classic Islamic Texts. (3 Credits)
This course explores the sacred texts of Islam including the Quran, and Hadith, medieval philosophical, liturgical and legal texts.
Attributes: GLBL, HHPA, HUST, INST, ISAS, ISIN, ISME, MEST, MVST, MVTH, REST, STSN, STXT, THHC, WGSS.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.

Updated: 07-27-2020
THEO 3733. Chinese Religions. (3 Credits)
An introduction to the 'The Three Teachings' (san jiao): Confucianism, Daoism, and Buddhism. What do these traditions have to say about what it means to be 'human'? What are humans' most essential ethical qualities? What forces in the world, within and without, dictate what it is to be 'human'? The class will explore these questions as they appear in highly revered writings, including some of the world's most influential philosophical and ethical works (including The Analects, Mencius, the Daodejing, Zhuangzi, and The Lotus Sutra). The class also explores how foundational Chinese ideas relate to Chinese religious rituals and 'folk religion' (concerning ancestors, divination, and immortality).
Attributes: GLBL, INST, STSN, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008.

THEO 3785. Spiritual Exercises and Culture. (3 Credits)
This course will be a comparative study of spiritual exercises across religions and cultures. Beginning with the exercises of Ignatius of Loyola, we proceed to the reception of his exercises in diverse global Christian contexts, feminist theology, and modern psychology. We then study lesser-known Christian spiritual exercises and their relation to Ignatius. Working backward, the course then turns to the ancient Mediterranean exercises that gave birth to Christian exercises. We conclude by studying spiritual exercises in religions and spiritualities beyond Christianity. Questions about comparative theological method will surface throughout.
Attributes: REST, STXT, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1010 or THEO 1007 or THEO 1009.

THEO 3822. The Bible in Cultural Conflict. (4 Credits)
The Bible has been a source of conflict for centuries. This course explores the complex causes and lasting effects of some famous controversies that involve the Bible. These include several biblical stories that have disturbed readers since antiquity; reactions to the work of Galileo and Charles Darwin, and their effects into the present; the origins and persistence of Fundamentalism; the Bible and slavery; and the place of the Bible in changing ideas about gender and sexuality. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: MEST, REST, THHC.

THEO 3826. Women in the Bible. (4 Credits)
In this course, we will employ various traditional exegetical and recent feminist tools to examine figures from both the New and Old Testaments including Eve, Sarah, Hagar, Ruth, Elizabeth and the Samaritan women as well as figures from the extra-Biblical Apocrypha. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: JWST, REST, STJC, WGSS.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008 or HPRH 1001 or HPLC 1401.

THEO 3827. Bible and Human Sexuality. (4 Credits)
This course examines key biblical texts that have figured in discussions of human sexuality from antiquity to the present. In particular, it will explore how shifting paradigms of interpretation in different historical periods have informed the reading of the Bible in relation to sexual ethics, identity, and practice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, THAM, THHC, WGSS.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008 or HPRH 1001 or HPLC 1401.

THEO 3832. Christian Thought and Practice I. (4 Credits)
Christian Thought and Practice I surveys the variety of Christian thought and practice from the beginning of Christianity to the late antique period. The course aims to encourage a critical examination of such theological themes as; God, Christ, grace, church, sacraments and ethics. Topics will be situated within the broader historical study of social, economic, political and cultural forces. Students will engage a wide range of Christian texts, art, rituals and other artifacts including classical theology, sermons and literature. Engagement with traditional Christianity by everyday Christian men and women, reflected in such genres as memoirs, ethnography and historical writing will be studied, as well as influential philosophical critiques of Christianity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: OCST, REST, THHC.
Prerequisites: THEO 1000 or THEO 1009 or HPRH 1001 or THEO 1007 or THEO 1008 or HPLC 1401 or THEO 1006 or THEO 1010.

THEO 3833. Christian Thought and Practice II. (4 Credits)
Christian Thought and Practice II surveys the variety of Christian thought and practice from the late antique period through the middle ages. The course aims to encourage a critical examination of such theological themes as God, Christ, grace, church, sacraments, and ethics. Topics will be situated within the broader historical study of social, economic, political and cultural forces. Students will engage a wide range of Christian texts, art, rituals, and other artifacts including classical theology, sermons, and literature. Engagement with traditional Christianity by everyday Christian men and women, reflected in such genres as memoirs, ethnography and historical writing will be studied, as well as influential philosophical critiques of Christianity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: MVST, MVTH, OCST, REST, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008 or HPLC 1401.
THEO 3834. Christian Thought and Practice III. (4 Credits)
Christian Thought and Practice III surveys the variety of Christian thought and practice from the Reformation to the present. The course aims to encourage a critical examination of such theological themes as God, Christ, grace, church, sacraments, and ethics. Topics will be situated within the broader historical study of social, economic, political, and cultural forces. Students will engage a wide range of Christian texts, art, rituals, and other artifacts including classical theology, sermons, and literature. Engagement with traditional Christianity by everyday Christian men and women, reflected in such genres as memoirs, ethnography and historical writing will be studied, as well as influential philosophical critiques of Christianity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: THHC.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008 or HPRH 1001 or HPLC 1401.

THEO 3839. Theologies of America. (4 Credits)
A course in historical theology that examines the role of religion in the formation of American and political culture. The course will utilize various interpretive approaches to uncover how the 'American self' is both the most religious and the most secular in the industrialized West. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: PLUR, REST, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1004.

THEO 3840. Theisms and Atheisms. (4 Credits)
Does God exist? "Theism" says yes; "atheism" says no. But there's a prior question: what is a god? There are, in fact, as many theisms as there are conceptions of god—and just as many atheisms. In this course, we will examine the variety of theisms and corresponding atheisms through readings and discussions in theology, philosophy, anthropology, psychology, and critical theory. We will investigate not only arguments for and against God's existence but also the function of these beliefs, that is, what's at stake both personally and socially. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: REST.

THEO 3843. Religious Faith and Doubt in Western Thought. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Prerequisites: THEO 1000 or THEO 1006 or THEO 1009 or HPRH 1001 or THEO 1007 or THEO 1010 or THEO 1008 or HPLC 1401.

THEO 3844. Eschatology. (4 Credits)
An introduction to Christian eschatology with a biblical, historical, and contemporary component. Surveys biblical, apocalyptic, and New Testament teachings and developments in patristic, medieval, reformation, and modern Christianity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: MVST, MVTH, THAM.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008 or HPRH 1001 or HPLC 1401.

THEO 3852. LGBTQ Arts and Spirituality. (4 Credits)
This course offers a broad examination of LGBTQ affiliations and identities considered through history and across religious traditions. It juxtaposes the vision of mystics with artistic vision, identifying common spiritual elements in both, and culminates in an examination of the contemporary arts of New York City as an example of LGBTQ spirituality. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: REST, THHC, WGSS.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1009 or HPRH 1001 or THEO 1007 or THEO 1010 or THEO 1008 or HPLC 1401.

THEO 3854. Ignatian Spirituality. (3 Credits)
Focusing upon classic texts and their contemporary application, this course offers a historical-critical, hermeneutical, and theological engagement with selected texts by Ignatius, including his Spiritual Exercises, Constitutions, Autobiography, Spiritual Journal, and letters. Additionally, we will examine various methods of Ignatian contemplation, meditation, discernment of spirits, and discernment of God's will in our lives.

Attributes: STXT, THHC.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008 or HPRH 1001 or HPLC 1401.

THEO 3856. Introduction to Bioethics. (4 Credits)
This course introduces students to contemporary bioethics topics through (a) an overview of different meta-ethical approaches to understanding moral status and personhood, b) discussion and readings on how these approaches can be applied to unraveling the complex threads of contemporary bioethics arguments related to the treatment/care/use of individuals, animals and the environment: and (c) introduction to the legal and social contexts in which bioethics public policies are framed. In addition to engaging a substantial amount of theological and philosophical literature, students will also be exposed to multidisciplinary perspectives (in the form of both texts and guest speakers) from disciplines such as biology, psychology, sociology, feminism, and ecology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: BIOE, DISA, PJGS, PJST, REST.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008 or HPRH 1001 or HPLC 1401.
THEO 3860. Contemporary Conversations in Theology. (4 Credits)
Conceived as a "capstone" course for the theology major/minor, this course examines recent methodological developments in the disciplines of theology and religious studies with particular emphasis on their interaction with contemporary critical theory. Particular topics to be engaged may include hermeneutics, historiography, secularism, the human subject, gender/sexuality, and the problem of political and/or moral action. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
**Attributes**: REST.
**Prerequisites**: THEO 1000 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008 or HPRH 1001 or HPLC 1401.

THEO 3871. Religion and Film. (4 Credits)
The study of faith and doubt portrayed in cinema. Students will view and analyze films that present struggles of the human spirit, the secular portrayal of the Christ-figure, the role of the secular 'messiah' or hero in Western society, the conflict between religious and secular authority, and the dilemmas of moral choice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
**Prerequisites**: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008.

THEO 3874. Religion in America. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
**Attributes**: AMCS, AMST, APPI, ASRP, PLUR, THAC, THHC.
**Prerequisites**: THEO 1000 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008 or HPRH 1001 or HPLC 1401.

THEO 3876. Muslims in America. (4 Credits)
This course will examine the history and experience of Muslims in the United States from the time of the slave trade to the present day. Through a close analysis of both primary and secondary materials, students will explore the rich diversity of US Muslim communities and their multi-faceted contributions to the global ummah and the formation of an 'American Islam'. Particular emphasis will be given to the impact of 9/11 and the 'war on terror' on the representations, challenges, and the experience of Muslims in America. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
**Attributes**: ADVD, AMCS, AMST, APPI, ASHS, ASRP, MEST, PJRJ, PJST, PLUR, RSHR, STSN, THHC.
**Prerequisites**: THEO 1000 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008 or HPRH 1001 or HPLC 1401.

THEO 3882. Comparative Mysticism. (3 Credits)
This course engages and compares mysticisms across time and space, and the philosophies and practices that inform them. Materials will be drawn from ancient Greek and Roman philosophies, South Asian religions, Christian, Jewish, and Muslim traditions, Renaissance hermeneutics, Daoyn techniques, and shamanism. Students will examine how various forms of mysticism from around the world have made their way into modern, western practices, such as yoga, meditation, nature spirituality, fitness culture, cryotherapy, AI, and transpersonal philosophies. Through careful comparison of the words, artifacts, gestures, rituals, and sound expressions of mystics in each context, students will consider how self-transcendence and ineffable encounters with the divine or an ultimate reality are mediated through the situated body in similar yet different ways, and reflect on what those similarities and differences might suggest.
**Attributes**: GLBL, JSTH, JWST, MEST, MVST, OCST, REST, STXT, THAM, THHC.

THEO 3883. Medicine and Healing in Islam. (4 Credits)
This course explores Muslim perceptions of health, disease, medicine and healing across time and space, and in conversation with the religious traditions of Islam. Through a focused set of topics and a variety of methodological approaches, students will investigate more broadly epistemologies of health, healing and disease, practical application of knowledge and wisdom, and cultural histories of the body. Specific topics will include medicine and the cosmos; health and the environment; astrology, magic and ritual; sex, childbirth and pediatrics; cosmetic surgeries and reproductive technologies; and perceptions of suffering and pain, disability, mental illness, and old age, as they are addressed in both medieval and modern contexts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
**Attributes**: GLBL, INST, ISIN, ISME, STSN, THHC.
**Prerequisites**: THEO 1000 or THEO 1009 or THEO 1008 or THEO 1006 or THEO 1010 or HPRH 1001 or HPLC 1401 or THEO 1007.

THEO 3884. Sufism: Islam's Mystical Tradition. (3 Credits)
What is the significance of studying Sufism—Islam's mystical tradition—in an age filled with news about extremist groups such as al-Qaeda and ISIS? Can Sufism's message of peace, love, compassion, and universality act as an antidote to extremist Islam? This course offers a detailed exposition of the origins, development, and various expressions of Sufism. We will begin with an inquiry into what Sufism is and what it is not, and then turn our attention to its practical and theoretical dimensions. We will explore these multiple dimensions with a focus on the Sufi understanding of the nature of love, beauty, self, God, desire, and ecstasy. This shall be done by surveying the conceptual development and unfolding of the tradition through a close reading of primary texts of some of Sufism’s principal representatives, both classical and modern. Through readings and discussions of the works of Rabi'a, al-Ghazali, Attar, Ibn al-Farid, Rumi, Ibn Arabi, Hafez, and more, students will become familiar with the various manifestations of mystical Islam.
**Attributes**: MEST, REST, STSN, STXT, THHC.
**Prerequisites**: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1010 or THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1010.
THEO 3885. Women, Gender, and Islam. (3 Credits)
The rights, roles, and appearance of Muslim women have long been
the focus of intense and polemical debate in the Muslim world. Both
within Muslim societies and in the Western media, the image of the
Muslim woman has been taken as emblematic of the perceived virtues
or failings of the Islamic tradition. Women and gender are thus crucial
to understanding the political, social, economic, and intellectual life
of Muslim communities from seventh-century Arabia to the present-
day United States. This course will cover significant moments in the
religious and intellectual history of Muslim societies and explore several
modern cases of gender in Islam. Through each, we will be asking several
questions, including: Why is Islam often stereotyped as oppressing
women? How do we square this claim with the view of many Muslim
men and women that Islam speaks of true equality between man and
woman? How significant is the metaphysics of gender as presented in the
Qur’an and mystical literature in dealing with the notion of equality? After
addressing the development of Islamic thought about women and gender,
attention will be paid to portrayals of Muslim women in contemporary
popular media and academic work.
Attributes: MEST, REST, RSHR, STSN, THHC, WGSS.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1001 or
THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005 or THEO 1006 or
THEO 1007 or THEO 1008 or THEO 1010.
THEO 3954. Apocalyptic Themes in Film. (3 Credits)
This course is a college level introduction to the use of apocalyptic terms,
themes and rhetoric in contemporary films. Apocalyptic in religious
writings is “crisis” literature. This assumption will be explained prior to
surveying usage of apocalyptic in religious and secular films. Apocalyptic
may have no religious implications. Students will develop a template
of types of apocalyptic terms and usage as well as review film maker’s
intentions.
Attributes: AMST, REST.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1009 or HPRH 1001 or
THEO 1007 or THEO 1010 or THEO 1008 or HPLC 1401.
THEO 3960. Religion and Race in America. (4 Credits)
This course explores the ways religion and race function in the American
landscape as sources of both belonging and discrimination, in historical
and contemporary perspectives. Special attention will be paid to
theological discourses and religious communities as sites of both racism
and race-justice. Four-credit courses that meet for 150 minutes per week
require three additional hours of class preparation per week on the part of the
student in lieu of an additional hour of formal instruction.
Attributes: AMST, LAHA, LALS, PJRJ, PJST, PLUR, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or
THEO 1009 or THEO 1010 or THEO 1008.
THEO 3961. Religion, Sex, and Culture in America Since 1700. (4 Credits)
This course explores the complex and shifting engagement among
religion, sex, and culture in North America from the eighteenth century to
the present. Its treats a variety of religious traditions and explores how
faith communities defined sexuality and gender relations in theological
and spiritual terms and, in turn, helped to shape approaches to sex and
sexual morality in the broader American culture. Four-credit courses that
meet for 150 minutes per week require three additional hours of class
preparation per week on the part of the student in lieu of an additional
hour of formal instruction.
Attributes: ACUP, AMST, ASRP, THHC, WGSS.
Prerequisites: THEO 1000 or THEO 1008 or THEO 1009 or THEO 1006 or
THEO 1010 or HPRH 1001 or HPLC 1401 or THEO 1007.
THEO 3970. Catholics in America. (4 Credits)
History and culture of Spanish and French Catholicism in the colonial
and post-colonial periods of the United States. Detailed study of English-
speaking Catholicism from its beginnings to its present position.
Relationships between Catholicism and American culture. Four-credit
courses that meet for 150 minutes per week require three additional
hours of class preparation per week on the part of the student in lieu of
an additional hour of formal instruction.
Attributes: AMST, ASRP, PLUR, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or
THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008.
THEO 3993. Wartime Religion in U.S. History. (4 Credits)
This course explores American religion during the Civil War, World Wars I
and II, the War in Vietnam, and the War in Iraq. The anxieties and passions
of wartime open up dialogue on the ‘justice’ of particular conflicts, but
they also prompt reflection on more basic questions of human meaning,
suffering, loss, and death, and the sources and boundaries of selfhood.
Four-credit courses that meet for 150 minutes per week require three
additional hours of class preparation per week on the part of the student
in lieu of an additional hour of formal instruction.
Attributes: AMST, APPI, ASRP, THAC, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or
THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008.
THEO 3995. Religion and the American Self. (4 Credits)
A course in historical theology that examines the role of religion in the
formation of American social and political culture. The course will utilize
various interpretive approaches to uncover how the ‘American self’ is
both the most religious and the most secular in the industrialized West.
Four-credit courses that meet for 150 minutes per week require three
additional hours of class preparation per week on the part of the student
in lieu of an additional hour of formal instruction.
Attributes: AMCS, AMST, APPI, ASRP, PLUR, THAC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or
THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008.
THEO 4005. Women and Theology. (4 Credits)
In this student-initiated program, the student may earn one additional
credit by connecting a service experience to a course with the approval of
the professor and the service-learning director.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1009 or
HPLC 1401 or THEO 1007 or THEO 1010 or THEO 1008.
THEO 4006. Women and Theology. (4 Credits)
An examination of feminist/womanist approaches to the mystery of God.
Four-credit courses that meet for 150 minutes per week require three
additional hours of class preparation per week on the part of the student
in lieu of an additional hour of formal instruction.
Attributes: AMCS, EP4, PJGS, PJST, VAL, WGSS.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or
THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008.
THEO 4008. Religion and Ecology. (4 Credits)
A course to study the earth as a matter of ethical and religious concern.
Starting with biblical texts and classical doctrines, students will analyze
the resources of the Jewish/Christian traditions that value the natural
world. Four-credit courses that meet for 150 minutes per week require three
additional hours of class preparation per week on the part of the student
in lieu of an additional hour of formal instruction.
Attributes: AMCS, AMST, CORE, ENMI, ENST, EP4, EPLE, ESEJ, ESEL,
PJEN, PJST, REST, THHC, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or
THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008.
THEO 4009. Medieval Jerusalem. (4 Credits)
What has made Jerusalem so beloved to – and the object of continual strife for – Jews, Christians, and Muslims? This course will explore the ancient and medieval history of Jerusalem, from its Jebusite inhabitants before the time of King David through Suleiman’s construction of the modern city walls in the 1540s. Students will learn to analyze a variety of literature, through which we will explore the themes of sacred space, conquest, destruction and lament, pilgrimage and religious polemic. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, MEST, OCST, THAM, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008.

THEO 4010. Death and Dying. (4 Credits)
An attempt to confront the reality of death, its practical consequences and its religious significance through D SEXUALITY (4.00 credits). A theology course that fulfills the senior values requirement in the college core. The course explores the theological interpretations of human sexuality. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, BIOE, EP4, LPHP, REST, THHC, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008.

THEO 4011. The New Testament and Moral Choices. (4 Credits)
This course will examine the principles of Christian living that emerge in the testimonies of Jesus and Paul as recorded in the New Testament and explore the ways in which they might apply these principles critically and responsibly in moral discernment of some of today’s most debated and troublesome alternatives. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: SRVL, THAM, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1009 or THEO 1007 or THEO 1010 or THEO 1008.

THEO 4013. Religion and American Politics. (4 Credits)
This interdisciplinary seminar explores the nexus of religion and American public life. After treating topics related to electoral politics (e.g. canidate religion, voter religion, ‘value voters,’ religious rhetoric), students will then engage a series of ‘hot topics’ that encompass ( and often combine) both religious and political discourse. The goal is to provide students with two alternative, yet complementary methods of analyzing the intersection of religion and American politics- one from a political science perspective and one from a theological perspective. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMCS, AMST, APPi, ASRP, ICC, IRST.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4014. Religion and Law. (4 Credits)
Increasingly, conflicts about religion in U.S. society are being contested, and occasionally resolved, through legal means. This course asks these overarching questions: How have parties, lawyers, and judges thought about religion? What solutions have they developed with regard to the conflicts about values embodied in the disputes they argue and decide? To what extent is the legal system able to resolve such conflicts? And to what extent should it try? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, REST, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1001 or THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1010.

THEO 4016. Homosexuality and Christian Ethics. (4 Credits)
The issue of homosexuality, and the treatment accorded to LGBTQ persons, are among the most contentious matters facing Christian faith communities today. The disputes present among Christians are also highly relevant to public policy debates over same-sex concerns. This course will be a comprehensive examination of the various stances and moral evaluations found in the discipline of Christian Ethics on the topic of homosexuality, and the implications for social practices and church ministry concerning gay and lesbian persons that arise from these positions. While the course will study positions and debates present in the Catholic church, these will not be its exclusive focus.
Attribute: WGSS.

THEO 4025. Future of Marriage 21st Century. (4 Credits)
An ethical examination of Christian marriage. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMCS, AMST, APPi, ASRP, EP4, REST, VAL, WGSS.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1010 or HPLC 1401 or HPRH 1001 or THEO 1007 or THEO 1008 or THEO 1009.

THEO 4026. Theologies of Peace. (4 Credits)
This “Eloquentia Perfecta” senior values seminar explores how to continue the long tradition of religious voices, ideas, and institutions contributing to reconciliation and playing a constructive role in forging more peaceful relationships among nations, communities and people of all faiths. Topics will include the just war theory, credal pacifism, and the role of conscience in making judgments about potentially justifying the use of force. Students will participate in debates and other participatory exercises as we explore optimal ways to encourage peace in our hearts, our neighborhoods and the international arena. Our in-class practice of dialogue will reflect the commitment to dialogic approaches to conflict transformation so desperately required today throughout our globalized society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEVL, BIOE, EP4, INST, ISIN, PJCR, PJCR, PJST, REST, VAL.
THEO 4027. The Ethics of Life. (4 Credits)
Jewish, Christian, and Muslim traditions have yielded complex religious responses to ethical, human dilemmas involving life/death issues. This course examines some of those responses in relation to sexuality, love and family, punishment, health and disease, death, and the environment through the lenses of Jewish, Christian and Muslim authors, texts, and traditions. Students will investigate how such responses are crafted in a liberal, pluralistic society, and assess their own reactions to religious difference and challenges to their own fundamental values. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, BEVL, BIOE, EP4, MEST, REST, THHC, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4028. Religion & Bioethics. (4 Credits)
Religions have always shaped medical practice. In our religiously diverse world, religions intersect with medicine at many levels: patients, practitioners, institutional providers, laws, and even international relations. We will explore how these intersections affect bioethics in our religiously diverse culture. We will look at traditional bioethical questions about what is permitted and forbidden in individual patient care, but we'll also examine questions like the following: Christianity's impact on the development of medicine; the ethical and religious impact of religiously affiliated hospitals' ethical and religious directives; the challenges of accommodating patients and practitioners' diverse religious beliefs in a medical system that is not religiously neutral; how religious communities have both shaped and used the fundamental principles of bioethics; the impact of religious convictions on bioethics beyond care of individual patients (for instance, issues of access to healthcare). Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, THHC, VAL.

THEO 4030. Moral Aspects of Medicine. (4 Credits)
The course examines the role of faith in the moral issues raised by advancements in medical science. The course will survey issues such as reproductive technologies, the patient-physician relationship, euthanasia and physician suicide, health care reform, AIDS and the human genome project. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEVL, BIOE, EP4, LPHP, REST, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4035. Professional Responsibilities and Organizational Ethics. (4 Credits)
Applies ethical concepts and theories from religious ethics to professional and corporate social responsibilities. Special attention is given to professional and corporate social responsibilities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, BIOE, EP4, REST, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1004 or HPLC 1401.

THEO 4036. Human Nature After Darwin. (4 Credits)
This course enters contemporary theological, political and scientific debates about how to conceptualize human nature after Darwin. We read Epicures, Lucretius, Augustine, Aquinas, Darwin and contemporary theologians, political theorists and scientists. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, ICC, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4037. Nature in Historical and Ethical Perspective. (4 Credits)
In anthropological, theological, and ethical discourse, nature has often been appealed to as that which is, by definition, outside of culture and history. However, nature's meanings -- especially in social-relational significations that it carries--have varied over time, according to a range of contexts and "controlling images." This Interdisciplinary Capstone Course will analyze historical and contemporary methodologies and significations of the term "nature," in ways that facilitate critical scrutiny of how this potent term is deployed in contemporary political, scientific, environmental, and religious discourse. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, THAM, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.

THEO 4040. Home, Away, and In-Between. (4 Credits)
This course draws on historical theology and literature to explore diverse human engagements with displacement. Reading focus on specific contexts and modes of displacement as they have upset and remade truth for those involved. Key examples include diaspora, quest, alienation, conversion, migration, and relocation. We will encounter characters and real-life actors whose experiences of these conditions—whether literal or metaphorical, whether cultivated or imposed—put them in highly charged space between feeling "at home" and "away." In addition to studying the responses of literary characters and religious actors, we will explore the ways the disciplines of literature and theology themselves invite practitioners into experiences of disorientation and reorientation. We will also consider the relationship between literature and theology as ways of knowing about displacement and its meanings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, REST, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.
THEO 4050. On Time and Its Value. (4 Credits)
For over two millennia, human beings have been asking enduring questions about the nature of time, the ways in which time might best be structured, how to use one's time wisely, and how to change temporal habits. These questions are not merely academic or theoretical; they matter, and they are timely. Like all college students, you are managing your own school, work, and social schedules. You probably feel the pressure of technology and the new, faster-paced temporal rhythms of being constantly connected — and simultaneously, you might worry that you are wasting too much time online. You live in an era in which scientists are warning that our climate is changing irreversibly and that we are running out of time to implement sustainable solutions. In the midst of all this existential talk about time, you are also trying to figure out what to do with your time after you graduate. In other words, conceptions and discourses about time and how to spend it are a big part of your life already. In this course, you are invited to think expansively about the topic of time, both theoretically and practically. We begin by exploring interdisciplinary debates about time across the sciences, arts, and humanities (in physics and philosophy, geology and biology, religion and theology, literature and music, and so on). Then we turn to the global history of clocks, calendars, and chronologies, as they were developed and used from antiquity to modernity. We end by exploring debates about the value of rest, leisure, diversion, and free time. Exploring time through an interdisciplinary and intercultural lens will help you contextualize your own relationship to time within a long history of time and temporal reckoning. You will finish the semester empowered to make informed, bold, and ethical choices about how to use the time that is yours. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ICC, THAM, THHC.
Prerequisites: THEO 1000 or THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPRH 1001 or HPLC 1401.

THEO 4051. Religion and the Making of the Self. (4 Credits)
What is the nature of the self? Is the self made in God's image or is it constructed and constantly negotiated through social interactions? And how do conceptions of the self inform our ethical choices? This course examines how religious perspectives on human nature shape the nature of the ethical life, focusing especially on the ways one's first-personal experiences of selfhood pose an existential crisis of meaning. This is an interdisciplinary course that investigates conceptions of the self and their moral implications from multiple religious, philosophical, and sociocultural vantage points. The readings include materials from Greek and Hellenistic thought, Hinduism, Buddhism, Judaism, Christianity, Islam, phenomenology, existentialism, and cultural studies. The course's point of departure is cross-cultural and thematic since we will explore the main themes concerning the meaning of the self in several religious and intellectual traditions. Topics include, inter alia, self-knowledge, the care and practices of the self, meditation, emotion and subjectivity, self-transcendence, and human flourishing. By navigating one's way through the ethical dilemmas of selfhood faced by the modern (and postmodern) subject, this course explores the interrelationship between religious belief, self-formation, and morality.

Attributes: EP4, VAL.

THEO 4055. What is College For?. (4 Credits)
This course begins with a close reading of 'The Idea of a University', John Henry Newman's classic account of the purposes of higher education, and an introduction to philosophy and theology. Next, the course will cover the history of American higher education and Catholic higher education in particular. We will study the origins of liberal arts colleges, the emergence of land grant and research universities, the growth and popularization of American higher education after World War II, and the current education landscape, including community colleges and online options. The course will consider such questions as the role of theology in the core curricula at contemporary Catholic universities, Jesuit values and U.S. News and World Report values, the Catholic preferential option for the poor and the student body at Catholic colleges, and the relationship between Catholic colleges and the surrounding communities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, ASRP, ICC.

THEO 4105. Religion, Gender, and Sexuality. (4 Credits)
This course considers the intersections of religion, gender, and sexuality. In many parts of the world, including the United States, and in many religious traditions, cultural and religious identity and continuity hinge on gendered practices and closely controlled sexual regimes. The goal of this course is to understand how religious institutions, communities, doctrines, practices and traditions shape gendered ideologies and practices, debates about sexuality and gendered division of labor, and the lives of men and women who participate in these religious communities. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ICC, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1010 or HPLC 1401 or THEO 1007 or THEO 1008 or THEO 1009.

THEO 4400. Foundations of Contemporary Theology. (4 Credits)
This advanced seminar introduces students to foundational topics in Christian systematic theology, including doctrines of God, Trinity, Christology, soteriology, and ecclesiology, and explores challenges to and rearticulations of these traditional themes in the 20th and 21st centuries, including, for example, liberation theologies, black theologies, feminist and queer theologies, theologies of religious pluralism, and ecological theologies. The course will encompass both historical foundations and contemporary conversations in systematic and constructive theology, with attention to communities of Christian thought outside of the Western European and North American contexts. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, ASRP, ICC.
THEO 4411. Religion, Theology, and New Media. (4 Credits)
An interdisciplinary capstone course, this course examines the historical and theoretical significance of the intersection between communication, technologies and religious communities. Drawing on the disciplinary methods and assumptions of both communication and media studies and theology, the course will ask students to critically and theoretically explore the significance of religion as a cultural phenomenon as well as to take seriously the theological significance of media practices as articulated by religious subjects. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMCS, AMST, APPI, ASRP, ICC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4415. Filmmaking and Religious Expression. (4 Credits)
This course seeks to cultivate in students a ‘sacred look’ at the world, themselves, and their fellow humans by means of filmmaking, informed by select texts of spirituality. Through close viewings of films, close readings of texts, small and large group discussions, this course seeks to develop an informed sense of wonder, a grasp of the spiritual aspects of filmmaking, and a broader sense of the kinship between art and faith. The course culminates in the production of a short film by each student on a topic relating to faith, spirituality, or religious expression. Prior filmmaking experience is not required. At the center of our engagement with filmmaking are three guiding theological questions: (1) how does filmmaking relate to the expression of the human spirit? (2) how does filmmaking make present the expression of the divine? and (3) how does filmmaking make manifest the relationship between the two? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: OCST, REST, THAM, THHC.

THEO 4420. Early Christian Art in Context. (4 Credits)
This course surveys Christian art and artifacts from antiquity through the medieval period, situating them in multiple contexts: Christian theology; engagement with other forms of religious art; political developments; ritual settings; and the ethics of modern discovery and curation. The course includes several site visits to museums. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: MVST, OCAH, OCST, THAM, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPRH 1401.

THEO 4430. Sex, Gender, and Sexuality in Early Christianity. (4 Credits)
This course will explore theological ideas and practices related to the complexities of human life as sexed, gendered, and sexualized within the early Christian tradition. After a brief examination of the biblical foundations for later patristic reflection on these issues, it will focus primarily on the different Eastern traditions of thought and practice emerging out of Asia Minor, Egypt (both Alexandria and the desert), and Syria. Some attention will also be given to Western (i.e., Latin) sources for comparative purposes. The course is an upper-level elective in theology and also satisfies an elective requirement in the Orthodox Christian studies minor. As such, its goals are twofold: 1) to study carefully relevant primary texts of the early Christian tradition with an eye to improving skills in close reading and analysis of theological sources, and 2) to learn how to read, comprehend, and critically engage with scholarly arguments in the fields of theology and religious studies. Thus, assigned readings will include both primary texts and scholarly articles and chapters that argue for particular interpretations of the primary texts. These are different kinds of reading and require the cultivation of different sets of analytical and critical skills—we will work to develop both throughout the course of the semester. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, REST, VAL.

THEO 4455. Eucharist, Justice, and Life. (4 Credits)
This course explores the intrinsic relationship between celebrating the liturgy, especially the Eucharist, and living lives of justice, peace, and social responsibility. Such topics as world poverty, hunger, immigration, violence, global warming, and the care of the planet will be examined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, REST, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4500. Religion in NYC: Theory & Practice. (4 Credits)
Conceived as a capstone course for Theology Religious Studies majors and minors, this course will familiarize students with key concepts, methods, and tools in Theological and Religious Studies, while asking students to use those concepts and tools to produce knowledge about religion through site-specific New York City-based research projects. Students will complete a substantial research project throughout the semester. The course will focus on a different location-based theme each year (e.g. Trauma and Memory at Ground Zero, Excavating Religious Experience at NYC museums, Prophetic Religion in Bronx Communities, Urban Contemplation, etc.). Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
THEO 4520. Animals, Angels, and Aliens: Beyond the Human in Christian Thought. (3 Credits)
Contemporary theologians focus almost exclusively on the human. Indeed, some prominent theologian’s explicitly claim that all theology can be understood as anthropology. But in this course we will use both new trends and ancient sources to push beyond the human into other areas of concern. The Christian (and Jewish) traditions have very interesting things to say, for instance, about non-human entities like animals, angels and even aliens. In addition to looking carefully at these sources, we will think about their implications for contemporary moral and political issues surrounding food production and consumption, lab experiments, ecological protection, and even cyborg technology and transhumanism.
Attributes: BEHR, ENST, ESEJ, ESEL, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4545. Bath Cultures and Bathing Rituals From Antiquity to Brooklyn. (4 Credits)
This course draws on the two disciplines of history and anthropology to examine the culture of bathing in the Greco-Roman world and its reception in Byzantium, medieval Islam, and concludes with a look at its ‘Orientalized’ fetishizing in the contemporary US. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: CLAS, ICC, MEST, OCST, REST, THAM, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401.

THEO 4570. Orthodox Christian Ethics. (4 Credits)
This Course will explore the two-thousand year tradition or Orthodox Christian Ethics. Students will be asked to resolve modern moral dilemmas by reading ancient Orthodox texts and their modern commentators. As such, the purpose of the course is twofold: 1) to develop an understanding of Christian ethics within an Orthodox theological perspective; 2) to develop the ability to make ethical judgments and to reflect critically on those judgments on established Orthodox theological principles. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, OCST, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4600. Religion and Public Life. (4 Credits)
The course explores the role of religion in public life, focusing primarily on American democracy and its separation of church and state. The course will focus on religion’s voice in public debate over issues such as health, poverty, and biomedical and economic issues, whether specifically religious arguments and language should have place in public discourse, and the role of discourse in a pluralistic society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMCS, AMST, APPi, ASHS, ASRP, EP4, MEST, THAC, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4610. Malcolm, Martin, Baldwin, and the Church. (4 Credits)
This course will engage the social thought and religious faith of these persons, both individually and in relation to each other. We will examine the challenges each posed both to Christian faith and to U.S society - especially their critiques of American understandings of justice; the relevance of religious faith to the struggle for racial justice; and the response of the Catholic Church to these men, the movement they represented, and the enduring reality of racial injustice. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVM, AMST, ASRP, PLUR, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1010 or HPLC 1401 or THEO 1007 or THEO 1008 or THEO 1009.

THEO 4620. Oscar Romero: Faith and Politics in El Salvador. (4 Credits)
This course will investigate the life and ministry of Oscar Romero of El Salvador. Coming to office in a period of socio-political and religious upheaval, Romero functions as a lens through which students can explore important themes including: the nature and impact of liberation theology; the effects of U.S Cold War foreign policy, power in the Catholic Church and numerous issues involving the relationship between religion and politics. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: GLBL, INST, ISLA, LALS, PJRJ, PJSJ, PJST, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1010 or HPLC 1401 or THEO 1007 or THEO 1008 or THEO 1009.

THEO 4630. G.O. Deeper. Interdisciplinary Inquiries. (4 Credits)
This Interdisciplinary Capstone Course is designed to build on (1) what these students have learned by offering them an opportunity to consider their immersion experience in light of critical inquiries in sociology, anthropology, and critical social theory; associated with (2) conflict studies, cultural studies, and postcolonial theory, and (3) in theology. The course is designed above all to cultivate skills to describe, analyze, and evaluate critical issues in local practices pertaining to personal life, family life, social and political life, housing, work, and indigenous cultures, including faith cultures of practice and belief. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, PJCP, PJCR, PJST, REST.

THEO 4840. Jesus and Salvation. (4 Credits)
This course explores Christian belief in Jesus Christ (Christology) with an emphasis on how this belief is intertwined with the understanding of salvation (soteriology). Reflecting on the biblical accounts of salvation in Jesus, along with examining the development of classic christological doctrine, students will inquire how this tradition relates to critical issues raised today. How is Christian belief in Jesus and salvation relevant to questions of identity, religious pluralism, global inequality, and environmental crises? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: THEO 1000 or THEO 1006 or THEO 1010 or HPRH 1001 or HPLC 1401 or THEO 1008 or THEO 1009 or THEO 1007.
THEO 4847. Theologies of Liberation. (4 Credits)
This course will explore the challenge of living Christian values in a global community marked by extreme poverty, structural injustice and the threat of ecological devastation. The study of the values of Jesus, Catholic social teaching and various Christian theologies of liberation will inform the students' consciences on issues of economic justice, the distribution of wealth and power and the proper use of the earth's resources. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEVL, EP4, PJIN, PJRJ, PJSJ, PJST, VAL.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4851. Death of Religion?. (4 Credits)
This seminar examines the major critiques of religion that have emerged in modernity from philosophy, social and political theory, literature, anthropology, and even theology. Readings may include engagement with seminal thinkers such as Friedrich Nietzsche, Hannah Arendt, Franz Fanon, and others, and will engage topics such as atheism, skepticism, secularism, and evil, as well as consider some of the more creative responses, both inside and outside traditional religious thought. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Prerequisites: THEO 1000 or HPRH 1001 or THEO 1002 or THEO 1003 or THEO 1004 or THEO 1005 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.

THEO 4853. Spirituality and Politics. (4 Credits)
This course will examine three twentieth-century Roman Catholic movements that espoused both a novel approach to spirituality/mysticism and embodied a distinctive politics on three different continents: the French Catholic revival, the Catholic Worker movement in the U.S and liberation theology in Latin America. The twentieth century witnessed a remarkable engagement of Catholics with the meaning of their faith and its role in social and political issues of their times, particularly around issues of war and poverty. From each of these three sites of renewal, the students will ask questions such as: How did these new movements come about? How are their views articulated in various texts and embodied in personal and communal practices? What is the legacy of these twentieth-century movements' spirituality and politics for us today? As an interdisciplinary seminar, students will rely on the methodological approaches in the disciplines of history and systematic theology to pursue these questions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMCS, ICC, PJRJ, PJSJ, PJST, REST.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4864. The Consistent Life Ethic: From Cardinal Bernardin to Pope Francis. (4 Credits)
The contemporary pro-life movement has been widely criticized for being too closely identified with the U.S. religious right. But as this course will make clear, the history of this movement—and the pro-life ethic advocated by figures like Cardinal Bernardin, St. John Paul II, and Pope Francis—is a very different kind of thing. This course will study the origins, development, and current place of the "Consistent Life Ethic" (CLE). Always concerned with more than abortion, the CLE had resistance to war and other kinds of violence at the very heart of what it was from its pre-Roe beginnings. The course will have a particular focus in the implications of the "growing edge" of the movement as articulated by Pope Francis—particularly his focus on resisting throwaway culture with a culture of encounter and hospitality. In addition to more traditional pro-life issues, this course will explore how Francis’ pro-life principles apply to topics like sexual violence and the #MeToo movement, welcoming and supporting migrants, mass incarceration, violence against LGBT persons, neocolonialism, the moral status and treatment of non-human animals, and even the violence and throwaway culture present in the practice of U.S. football. The course will also focus on challenges to the CLE, including the idea (espoused by both those who identify with left and those who identify with the right) that the Consistent Life Ethic collapses important moral and political distinctions between the issues in an unhelpful way. Especially as the U.S. enters a major phrase of political realignment—where the basic assumptions of our national secular politics over the past two generations no longer obtain—the "socially conservative and economically liberal" position (held disproportionately by African and Latinx U.S. Americans) toward which the CLE moves is getting increased attention. The course will conclude with discussion of possible viable alternatives to the right/left political binary. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: EP4, VAL.

THEO 4870. Economic Foundations of Catholic Social Teaching. (4 Credits)
This course explores the economic thought that has served as the basis of the Church’s teaching on issues like capitalism, socialism, poverty, wages, unions, the environment, and economic responsibility from Leo XIII’s encyclical Rerum Novarum to the present and current economic research that may guide future Church teaching. This will be done through lectures, readings from primarily 19th and 20th-century economic works, and discussion of how these works’ ideas are evident in papal encyclicals and other Church documents. The course will include case studies of how Catholic social teaching has influenced national social and economic policies in Europe and the U.S. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMCS, AMST, APPI, ASRP, BEHR, BIOE, ICC, REST.
Prerequisites: ECON 1100 or ECON 1200 or ECON 1150 or ECON 1250 or THEO 1000 or HPRH 1001 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010 or HPLC 1401.
THEO 4950. Christianity and Gender/Sexual Diversity: Interdisciplinary Perspectives. (4 Credits)
Employing perspectives from history, theological ethics, and LGBT studies, this course will investigate what it means to take queer perspectives on Christianity sexuality, and discipleship. Readings will include biblical, historical, and contemporary materials that seek to illuminate the ways in which Christians and Christian communities have responded to sexual and gender diversity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: BEHR, ICC, THHC.
Prerequisites: THEO 1000 or HPRH 1001 or HPLC 1401 or THEO 1006 or THEO 1007 or THEO 1008 or THEO 1009 or THEO 1010.

THEO 4999. Tutorial. (1 to 4 Credits)
Independent research and reading with supervision from a faculty member.
Prerequisites: THEO 1000 or HPRH 1001.

THEO 5000. Biblical Hebrew Intro. (4 Credits)
This course is an intensive introduction to the grammar, syntax and vocabulary of Biblical Hebrew. By the end of the course students will be able to read passages from the Hebrew Bible with the help of a dictionary, and will have learned sufficient vocabulary to ensure a rewarding reading experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEO 5015. Teaching Theology. (0 Credits)
Classical and contemporary discussions on the practice of teaching theology, particularly as understood in the Roman Catholic tradition, introducing the field of professional theology and its relationship to other disciplines, and engaging in careful, critical reflection on the vocation of the teaching theologian.

THEO 5017. Theology Dissertation Seminar. (0 Credits)
A colloquium for workshoping dissertation chapters in progress.

THEO 5025. Exodus in Hebrew. (3 Credits)
This course combines exegesis of Exodus in Hebrew with intermediate-level study of biblical Hebrew. We will read chapters 1-24 and 32-34 of Exodus in Hebrew. Our study of the Hebrew language will progress from a review of grammatical forms to a more advanced understanding of the syntax of biblical Hebrew.

THEO 5070. Elementary Coptic I. (3 Credits)
The course introduces students to Coptic, the latest stage of the Egyptian language, by acquainting them with the script, providing them with grammatical foundations, and exposing them from early on to the reading of texts.

THEO 5071. Elementary Coptic II. (3 Credits)
Completion of Coptic grammar and reading of Biblical texts in Sahidic Coptic. Continuation of Elementary Coptic I. Other students welcome subject to instructor approval.

THEO 5072. Christian Texts in Coptic. (3 Credits)
Intermediate and advanced readings in Coptic, which may include biblical, monastic, and Gnostic texts.

THEO 5073. Syriac Language and Literature I. (3 Credits)
This course is the first of a two-semester introduction to Syriac, a dialect belonging to the Aramaic language branch. The first semester will introduce the Estrangela and the Serto scripts, cover grammatical foundations, and expose students from early on to the reading of texts. The second semester will be mostly spent reading Syriac literature, but some time will be devoted to select special topics in Syriac grammar.
Attributes: MVSG, OCST, REST.

THEO 5074. Syriac Language and Literature II. (3 Credits)
This course is the second of a two-semester introduction to Syriac, a dialect belonging to the Aramaic language branch. The first semester introduced both the Estrangela and the Serto scripts, covered grammatical foundations, and exposed students from early on to the reading of texts. The second semester will be mostly spent reading Syriac literature, but some time will be devoted to select special topics in Syriac grammar.
Attribute: MVSG.

THEO 5080. Introduction to Biblical Greek. (3 Credits)
This course an intensive introduction to the grammar and syntax of New Testament Greek. Sufficient attention will be devoted to vocabulary to enable rewarding experience in reading an exegesis.

THEO 5090. Biblical Aramaic. (3 to 4 Credits)
An introduction to the language through comparison with Hebrew morphology and readings from the Aramaic sections of the Old Testament.

THEO 5230. Advanced Greek. (3 Credits)
This course includes both a rapid review of Greek grammar and syntax, and also intermediate/advanced readings from Hellenistic and/or early Christian texts.
Attribute: MVSG.

THEO 5300. Hist of Christianity I. (3 to 4 Credits)
Development of central concepts of Christianity from the Apostolic Fathers to the Reformation.
Attribute: MVSG.

THEO 5301. Hist of Christianity II. (3 Credits)
Catholic and Protestant theologies after the first century of the Reformation, from the 17th to the 20th centuries, including both European and USA theological developments.

THEO 5400. Topics in Islam: Texts and Traditions. (3 Credits)
This course explores major topics in Islam, including notions of revelation, God, law, theological speculation, gender issues, philosophy, mysticism and science. Comparisons with Jewish and Christian materials will be brought to bear on the topics for discussion when relevant.
Attributes: HHPA, HUST.

THEO 5401. Introduction to Islam. (3 Credits)
This course provides a basic introduction to Islam through close readings of the Qu’ran as well as theological, philosophical, legal, exegetical and literary writings. Special focus will be given to comparative themes, such as God, revelation, prophecy, reason, ritual, and ethics. Attention will be paid to sources and pedagogical concerns involved in the creation of undergraduate courses on Islamic topics and themes.
Attribute: MVSG.

THEO 5405. Teaching Buddhism. (3 Credits)
This course will provide short units on Buddhist thought, Buddhist practice, and Buddhism in America, and it will emphasize strategies for incorporating elements of these units into undergraduate religion courses.
THEO 5500. Religion and American Public Life. (3 Credits)
This course introduces students to the intricate and delicate topic of how religious voices and institutions interact with the public life of the United States. Topics include church-state relations in the courts, voting according to religious conscience, the influence of civil religion, secularization, public theology, culture wars, faith-based lobbying, and religion in the media and popular culture.
Attributes:CEED,CEMT.

THEO 5550. New Methods: American Religion History. (3 Credits)
The past thirty years have produced significant changes in the ways historians, theologians, and ethnographers describe, explain, and theorize Americans’ religious worlds. Problems include how to account for the experiences of women and racial and ethnic minorities, the relationship of doctrine to practice, the legacy of the enlightenment, the religious meanings of objects and places, the importance of borders and identity, and the significance of class in theological expression. This course investigates new answers to these and other questions, assessing them in light of their contributions and limitations in the effort to make sense of North America’s past and present. The work of the semester involves close reading of contemporary historical and ethnographic texts, covering periods from the colonial era to the present. The emphasis rests both on American religious history and on new ways of making sense of religious lives, which may be applicable beyond the North American context.

THEO 5620. Introduction to Systematic Theology. (3 Credits)
An introduction to major schools and methods in contemporary systematic theology.

THEO 5630. Systematic Liberation Theology. (3 Credits)
The course will examine theologies of liberation originating among marginalized peoples of the Americas. In addition to studying their origins and major figures, the course will focus on how liberation theologies rethink a range of themes in systematic theology including: Christology, anthropology, soteriology, and ecclesiology.
Attributes:CEED,CEMT.

THEO 5640. Introduction to Theological Ethics. (3 Credits)
This introductory course will examine the sources and methods of Christian ethics, as well as contemporary questions in the discipline including gender and identity, racism, and bio-and environmental ethics.
Attributes:CEED,CEMT.

THEO 5820. Old Testament Interpretation. (3 to 4 Credits)
Introduction to the multi-faceted project of interpreting the religious literature of ancient Israel and the sacred Scriptures of the church, in order to develop competence in a variety of exegetical approaches to the Old Testament. These include patterns of patristic and medieval interpretation, the classic modern methods of scholarly analysis, and selected contemporary approaches.

THEO 5890. New Testament Interpretation. (3 to 4 Credits)
History, literature, and religion of the New Testament, studied in the context of the time and circumstances that produced them.

THEO 6000. History, Theory, and the Study of Religion. (3 Credits)
This course provides a thorough introduction to recent developments in historiography and critical theory as they bear upon the discipline of religious studies and the critical study of theology.

THEO 6026. Ancient Judaism. (3 Credits)
This course provides a survey of the literature and history of both Palestinian and Diaspora Judaism, including late biblical texts, apocrypha, pseudepigrapha, the Qumran Scrolls, Philo, and Josephus.

THEO 6031. The Psalms. (3 Credits)

THEO 6039. Biblical Ethics. (3 Credits)
This course will explore a number of ways that the Bible has been used to inform ethical behavior. Special attention will be paid to the ethical implications of different interpretive approaches to the biblical text, as well as to the fact that the Christian Bible has two testaments, each of which contains a variety of approaches to ethics.
Attributes:CEED,CEMT.

THEO 6040. The Neighbor: Biblical Witness and Contemporary Ethics. (3 Credits)
With the rise of nationalism and xenophobia, the neighbor has reemerged as a category of thought among philosophers and theologians who are seeking a path beyond the polarization of friend vs. enemy. The course will explore the biblical roots of the disclosure about the neighbor in the writings of Levinas, Derrida, Badiou, Santner, Reinhard, Zizek and others. Special attention will be devoted to biblical texts from Leviticus, Ruth, Jonah, the Gospels, and Paul.

THEO 6042. The History of Jerusalem: Jewish, Christian, and Muslim Perspectives. (3 Credits)
In this course, students will learn about the ancient and medieval history of Jerusalem, from its Jebusite inhabitants before the time of King David through Suleiman’s construction of the modern city walls in the 1540s and the later Ottoman years. Students will gain experience analyzing a variety of sources—biblical and Qur’anic texts, exegetical materials, travel narratives, legal documents, maps, poetry, literature, art, archaeology, and architecture—and use a range of different (inter)disciplinary and theoretical lenses through which to study them.
Attribute:CEED.

THEO 6130. Matthew Mark and Method. (3 Credits)
This graduate seminar offers both detailed analysis of Gospels of Matthew and Mark and a survey of contemporary critical methods as applied to these Gospels. Sessions will examine the two texts through the lenses of Christology; Discipleship and Ethics; Feminist Criticism; Form Criticism; ‘Historical Jesus’; Literary Criticism; Political Theology; Postcolonial Criticism; Reduction Criticism; and Text Criticism.

THEO 6192. Greco-Roman Context/Xtnt. (3 Credits)
This course creates a context for understanding the encounter of early Christianity with Greco-Roman culture by exploring Hellenistic and Roman history, politics, religion, social relations, economics, education, rhetoric, philosophy, literature, and the theatre.

THEO 6194. History Theory & Xtianity. (3 Credits)
This course will provide a thorough introduction to recent developments in historiography and critical theory in light of the so-called ‘linguistic turn.’ It will also explore the methodological relevance of these theoretical shifts for the study of pre-modern Christianity/historical theology.

THEO 6195. Inventing Christianity: Apostolic Fathers, Apostologists, and Martyrs. (3 Credits)
A seminar on the literature produced by Christ believers during the second and third centuries CE—the so-called “Apostolic Fathers,” defenses of Christian faith and life, and accounts of the deaths of martyrs. The course seeks to comprehend the diverse ways in which Christian identity was shaped and to reconstruct the social experience of the early Christians.
THEO 6196. Early Christian Ritual. (3 Credits)
This graduate seminar surveys the evidence for ritual practices in the first few centuries of Christianity. Through engagement with theoretical literature on ritual and identity formation, we will explore what can be known about early Christian practices and interrogate our means of knowing it. Much of the course will focus on the rituals of initiation and their diverse interpretations in ancient sources, but other topics will be covered as time allows. Prior study of early Christian history and/or New Testament is recommended.

THEO 6198. Self in Early Christianity. (3 Credits)
An examination of different notions of ‘the self’ in early Christianity with particular attention to ancient ideas about status, gender, ethnicity, and cultural identity, as well as their implications for Christians in the pre-Constantinian era.

THEO 6211. Paul, Prisoner and Martyr: Political Theology in Early Christianity. (3 Credits)
A close reading of the authentic letters of Paul from prison (Philippians and Philemon), supplemented by an investigation of the image of Paul as the ‘prisoner of Christ’ in Colossians, 2 Timothy, 3 Corinthians, the Acts of the Apostles, and the Acts of Paul.
Attribute: MVSG.

THEO 6214. Old Testament Theology. (3 Credits)
An examination of recent attempts to use the Old Testament as a resource for systematic theological thought. Among the topics to be considered are the nature of divine revelation in creation and history and the implications of the human response to that revelation.

THEO 6300. Apostolic Fathers. (3 Credits)
A seminar in the body of first and second century Christian literature known as the ‘Apostolic Fathers,’ so as to gain an understanding of this literature as an expression of the life and thought of its authors and the churches in which it arose and was preserved. A secondary concern of the course involves the use of the Apostolic Fathers as historical sources for the reconstruction of the social experience of the early Christians.

THEO 6305. Introduction to Rabbinic Literature. (3 Credits)
In this course, students will explore the vast corpus of rabbinic literature and the historical, intellectual, religious, social, legal and political circumstances in which rabbinic Judaism developed in Palestine and Babylonia between the first and seventh centuries C.E. Students will gain experience reading different genres of rabbinic texts; become familiar with cutting-edge scholarship in the field; experiment with various methodologies in the study of late antiquity; and learn about a formative period in Jewish history.

THEO 6360. Alexandrian Theology. (3 Credits)
Reading and interpretation of selected writings of Clement of Alexandria, Origen, Athanasius, Didymus the Blind, and Cyril of Alexandria, against the background of the pagan and Jewish traditions of Alexandria.
Attribute: MVSG.

THEO 6365. Cappadocian Fathers. (3 Credits)
A wide-ranging but analytic reading of the most important writings of Basil of Caesarea, Gregory Nazianzus and Gregory of Nyssa, with particular attention to the doctrine of the Trinity, to Christian anthropology, and to spirituality.
Attribute: MVSG.

THEO 6367. Byzantine Christianity: History and Theology. (3 Credits)
The graduate-level survey course introduces students to the theological ideas and historical transitions that captivated the minds of Eastern Christians from the 8th to the 15th centuries. Through a careful reading of primary sources (in English translation) and the scholarly debates about those sources, we will explore the Iconoclastic controversies, the expansion of Christianity to the Slavs, the experience of Christians living under Islamic authority, and a host of issues related to rupture between Eastern and Western Christianity. In most circumstances, successful completion of this course authorizes doctoral students in Theology to teach the undergraduate cognate course.
Attribute: MVSG.

THEO 6400. Theological Anthropology and Human Diversity. (3 Credits)
As the subdiscipline of ‘theological anthropology’ speaks about the nature of our being human, how does it take into account the great variety in evidence among human beings? Particularities of race, religion, culture, disability, sexual orientation and gender will be placed in conversation with classic text.
Attributes: CEED, CEMT.

THEO 6425. St. Augustine in Context. (3 Credits)
This course investigates the life and writings of Augustine of Hippo in the context of late antiquity including philosophical and religious influences upon him as well as the controversies and archeological remains of his ministry.
Attribute: MVSG.

THEO 6426. St Augustine of Hippo. (3 Credits)
An introduction to the life and thought of St. Augustine that will include an examination of his principal theological controversies (e.g. against manichaeism).
Attribute: MVSG.

THEO 6444. Medieval Modernists: Modern Appropriations of Medieval and Ancient Christianity. (3 Credits)
In twentieth century Europe, an astonishing range of intellectuals were animated and energized by the study of pre modern and early modern Christianity. For theologians, historians, philosophers, and literary figures, Christian medieval and patristic sources were galvanizing forces of transformation, and harbinger of ethical, theological, and political renewal. This course investigates the various appropriations of medieval and ancient Christianity from the Catholic nouvelle theologe movement (Henri de Lubac, M.D. Chenu, and Jean Danielou in particular), literature (Charles Peguy), philosophy, (Hannah Arendt and Luce Irigaray), and historiography (Michel de Certeau), along with secondary works by Amy Hollywood, Joan Wallach Scott, and others.

THEO 6445. Affect, Emotion, and Religious Experience. (3 Credits)
This course examines recent work in affect theory and the history of emotions (and their philosophical antecedents) as potential resources for historical and theological accounts of religious experience.
Attribute: MVSG.

THEO 6461. Mystical Theology. (3 Credits)
Examines the influences of Neoplatonic philosophy and the writings of Pseudo-Dionysius on medieval Latin Christianity, with attention to both ‘negative’ theological language and reflection on the paths to and modes of union with God. Modern deconstructive, psychoanalytic, and feminist approaches to mysticism will also be considered.
Attribute: MVSG.
THEO 6463. From Lollards to Luther. (3 Credits)
This course offers an introduction to the key themes, events, and thinkers of Christianity during the transition from what historians refer to as the late medieval to what they call the early modern period. Topics will include theological method; humanism; heresy and reform; gender; scripture; and the relationship between the church and civil society.

Attribute: MVSG.

THEO 6465. Asceticism and Monasticism. (3 Credits)

THEO 6466. Hagiology. (3 Credits)

THEO 6480. Xianizing the Barbarians. (3 Credits)
The course examines the 'Christianizing' of pagan peoples (Roman, Germanic, Slavic) during the late ancient and medieval periods. We begin with two basic questions: what evidence is there for the 'Christianization' of Europe? And how do we explain it?.

Attribute: MVSG.

THEO 6490. Christianity and Violence. (3 Credits)
This course explores the often ambivalent relationship between Christianity and violence in the pre-modern world. Readings include a broad range of primary sources including martyr acts, liturgical hymns, canon law, and Crusader chronicles as well as influential scholarly assessments of the history of Christianity and violence.

THEO 6505. Histories of Colonialism, Empire, Theology. (3 Credits)
This interdisciplinary course traces the interconnected histories of colonialism, European empire, and Christian theology in the 15th-20th centuries, with focus on the 18th-20th centuries. Special attention will be given to questions of historiography and theoretical method: the pairing of material history and philosophical/theological inquiry, the creation of 'religion' as a discursive category, the role of Christian theology in funding, resisting, or augmenting imperial projects, and the diversity of Christian forms of like birthed in the circum-Atlantic world.

THEO 6509. Theology and Religious Pluralism: Christian Tradition in a Religiously Plural World. (3 Credits)
This is a course on theological method in light of our contemporary context of religious diversity. The central question of the course is how Christian systematics is impacted by an awareness of religious difference. The investigation will explore Theologies of Religious Pluralism, Comparative Theology and Interreligious Dialogue, among other topics.

THEO 6510. Socially Engaged Theology. (3 Credits)
This course will examine the tradition of theology engaged with social concerns and emerging from within broader social movements. Students will be invited to participate in current social projects with local organizations as part of our exploration.

Attributes: CEED, CEMT.

THEO 6530. Modern Catholicism & Difference: Negotiating With Cultural & Religious Others (From 1534-Present). (3 Credits)
This course explores the ways in which Catholics -- laity, monks and nuns, theologians, Church officials -- have adapted to change, appropriated and resisted the presence of new neighbors, and built their own complex identities in negotiation with others. What difference does a deep, historical knowledge of modern Catholicism bring to the questions of difference in history we all ask today in the creation of social, political, and religious communities? Starting with the founding of the Jesuit order in 1534, themes will include efforts of the Dominicans in the Middle East, Jesuit missions, Catholic acquiescence and resistance to antisemitism during WWII, racism and racial justice, and more.

Attributes: CEED, CEMT.

THEO 6543. Aesthetics, Religion, and Modernity. (3 Credits)
This course will explore the rise of 'aesthetics' as a category to supplant, explain, enrich, and/or revive religious discourse within the philosophical and economic projects of Western modernity. Focus will be given to the historical conditions that made aesthetics a compelling rival or reviver of traditional religious belief and practice in the 18th-20th centuries.

THEO 6544. Belief and Unbelief Tol & Into. (3 Credits)
Descriptions: This graduate seminar explores two related phenomena: the historical development of varieties of religious belief and unbelief; and the practice of religious tolerance and intolerance in modern Europe and North America. Since course readings focus on major historical transitions in theological, social, cultural, political, and intellectual life, students will encounter a range of methodological approaches and source materials and will develop a broad interpretive framework for understanding Western religious history since the sixteenth century.

THEO 6551. U.S. Religious History. (3 Credits)
This course consists of two parts: a survey of classic works in American religious history, followed by student immersion in archival work at manuscript collections in the New York City area. Students will conduct original historical research on sites of religious significance located in Metropolitan New York.

THEO 6553. Readings in American Religion. (3 Credits)
This course offers an historical study of theology in America that is attentive to contemporary discussions of theory, method, and historiography. Readings include primary and secondary sources in American theology and religious history from the coming of the Europeans to the 1980s. Topics may include: Colonialism and Borderlands Theologies, Puritanism, the American Enlightenment, Slave Religion, Evangelicalism, Transcendentalism, the Black Church, Immigrant Catholicism, New Thought, Mormonism, Social Gospel, Fundamentalism, U.S. Catholic Counterculture, Neo-Orthodoxy, U.S. Buddhism, Civil Rights, Liberation Theology, the Nation of Islam, and Eco-Theology.

THEO 6600. Modern Orthodox Theology. (4 Credits)
Examination of Twentieth-Century Orthodox Theological Texts. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

THEO 6606. Theological Anthropology. (3 Credits)

THEO 6607. Christian Theologies of Salvation. (3 Credits)
The course will examine the Christian doctrine of salvation including themes such as atonement, grace, redemptive suffering, and the hope for liberation. The course will focus on how contemporary theologians critically and creatively dialog with traditional soteriologies to articulate salvation in light of the challenges of our times.

THEO 6612. New Methods in Constructive Theology. (3 Credits)
This course explores current approaches that distinguish the field of constructive theology. Possible topics include: ethnographic research, theopoetics, interreligious theology, techniques for new media and public theology, activism and advocacy, critical theories, and interdisciplinary approaches.

THEO 6615. Rahner, Lonergan, and Transcendental Method. (3 Credits)
Lonergan and Rahner represent two distinctive approaches to what is frequently called 'transcendental method' (although Lonergan had reservations about the term as applied to him). This course will examine Lonergan's often neglected but crucial philosophical work insight, along with Rahner's more specifically theological writings. The two will be compared with each other as well as with contemporary and post-modern critics.
THEO 6616. Contemp Theol of Trinity. (3 Credits)
An introductory survey of the historical development of the doctrine and an exploration of contemporary interpretations of the Trinitarian mystery in Lonergan, Rahner, and Muhlen.

THEO 6620. God in Contemp Theology. (3 Credits)

THEO 6621. God in Comparative Theology. (3 Credits)
Examination and comparison of notions of God or the Absolute (Brahman, Dharmakaya, etc.) in major theological traditions: Jewish, Christian, Muslim, Hindu, Buddhist. Classic texts will be read.

THEO 6630. Church in Contemp Theol.. (3 Credits)
Some contemporary ecclesiologies from the point of view of the Church's relationship with the world.

THEO 6631. Missiology: Mission of Church in Age of Turmoil and Strife. (3 Credits)
The theology of the Church's Mission and its practice will be explored from global perspectives.

THEO 6634. Black Theologies and the Decolonial Option. (3 Credits)
This course examines how black American constructive theologians engage with people's struggles for decolonization and racial freedom. Special attention will be given to recent insights in decolonial theories and the analysis of epistemology, race, gender, being, and economics.

THEO 6642. Political Theology. (3 Credits)
This course will discuss and critically analyze contemporary theologies of the political, with attention being given to the recent debate over political liberalism. Texts from a variety of theologians and theological perspectives will be examined, as well as recent attempts at political theology by non-theologians.

THEO 6651. The Liturgy: How Christians Worship. (3 Credits)
This course will focus on the Roman Catholic liturgy – leitourgia – the people's work for God. We will draw a list of topics concerning three areas: the theory of liturgical reform, the history of the "Mass," and related concerns for the liturgy, e.g., the role of justice, inculturation, feminist worship, music, and architecture.

THEO 6652. The Liturgy: A Work of Praise and Justice. (3 Credits)
This course focuses on the Christian liturgy as the work of the people in praise of God. The fruit of this work is for the faithful to stand in right relationship with God and with one another, creating a just community.

THEO 6657. Eucharist and World Today. (3 Credits)
This course will put Eucharistic theology and practice dialogue with concerns regarding hunger, violence, and exploitation in our contemporary world.

THEO 6659. Latinx Theology. (3 Credits)
This class will analyze the diverse ways in which Latina and Latino communities in the United States have sought to speak of God and God's relationship to their marginal existence. The course will examine the origins of Latinx theology, the particular questions that have guided theologians working with Latinx communities, and the critiques and growing edges of the field.

THEO 6671. Contemporary Christology. (3 Credits)
Current trends in Christological theology, including those of the post-Vatican II era (e.g., Rahner, Schillebeeckx, et. al.)

THEO 6674. Ecological Theology. (3 Credits)
In the light of contemporary scientific understandings of the cosmos and attendant ecological concerns, this course will study reinterpretations of Christian doctrine and ethics of the last 40 years that have been in dialogue with these developments.

THEO 6676. Sexual Ethics. (3 Credits)
An in-depth examination and critical appraisal of current discussions in Christian theological reflection relating to human sexuality. Specific attention will be given to emerging paradigms for the ethical evaluation of sexual behaviors, identities, and relationships being advanced in light of developments in social mores and ecclesial consciousness. Attributes: CEED, CEMT.

THEO 6710. Issues in Fundamental Moral Theology. (3 Credits)
Fundamental moral theology has undergone dramatic shifts in understanding since the moral manuals. It is now characterized by a pluralism in method and perspective that would have been inconceivable. This advanced seminar will examine several issues in the field of fundamental moral theology that have received recent critical attention. Among these will be topics such as conscience and its formation, culturally entrenched social evil, change in magisterial teaching, the concept of natural law, the influence of cultural pluralism on moral formation and reasoning, and the role of the "sensus fidelium" in moral doctrine.

THEO 6721. African American Theological Ethics. (3 Credits)
This course, which surveys African American theological and social ethics, is open to both M.A. and Ph.D. students.

THEO 6731. Christian Ecological Ethics. (3 Credits)
This course examines distinctly Christian approaches to ecological ethics, including comparative historical perspectives, methods, and key topics.

THEO 6732. Ethics and Economics. (3 Credits)
An examination of contemporary economic social issues with the aid of Catholic social teaching, and with a critical use of economic science. The social issues examined include but are not limited to poverty, pollution control, protectionism, unemployment, and inflation.

THEO 6733. Theology and Science. (3 Credits)
This graduate-level course attends to the history, methodologies, content of conflict, and major questions that have occurred at the intersections of scientific and theological inquiry.

THEO 6735. Ecological Ethics. (3 Credits)
This course considers the rise of ecological consciousness, environmental history, and ethical reflection in light of western philosophical and theological traditions. It aims to provide students with substantial, foundational knowledge in twentieth and twenty-first century environmental thought as well as emerging approaches to global environmental problems.

Attributes: CEED, CEMT, HECH, HULI.

Attributes: CEED, CEMT, HULI.
THEO 6737. God/Mystery of Suffering. (3 Credits)
David Hume has articulated what many consider to be the problem of evil for the Western theistic traditions. Indeed, for nearly three hundred years, philosophers of religion and philosophers of religion and philosophical theologians have attempted to resolve the problem of the alleged inconsistency of God’s infinite goodness, power, knowledge, and the reality of human suffering, especially innocents’ suffering. The presumption of the present seminar is very simple. Hume’s pithy rendering does not articulate the problem—or at least the whole problem. In light of this presumption, this seminar shall critically examine the various ways Christians have responded to suffering. The goal of this seminar is to have the students be able to understand the history of responses to the problems of evils in the Christian traditions, and to evaluate those responses.

THEO 6738. The Mystical-Prophetic Turn in Modern Catholic Theology. (3 Credits)
The course analyzes the thought of Johann Metz, Gustavo Gutierrez, and David Tracy as responses to the challenges of late modernity. By identifying the authors’ contexts and influences, investigating their central ideas, and engaging their critics, the course explores the philosophical and theological implications of the mystical and prophetic traditions of Christianity retrieved by political, liberation, and public theologies for contemporary thought. Other thinkers to be considered include: Rahner, Lindbeck, Ratzinger, Balthasar, Gadamer, Adorno, Ellacuria, Johnson, Goizueta, Dionysius, John of the Cross, and various biblical authors.

THEO 6740. Catholic Social Thought. (3 Credits)
Catholic social thought as found in the social encyclicals, emphasizing their theological contexts, social scientific constructs, historical background and philosophical presuppositions.
Attributes: CEED, CEMT, SOIN.

THEO 6745. Sociology of Religion. (3 Credits)
In this advanced seminar, students will analyze original texts of the classic theorists of religion—including Emile Durkheim, Max Weber, Clifford Geertz, Peter Berger, Mircea Eliade, Mary Douglas, and Robert Bellah. Topics will include secularization theory, theodicy, ritual, symbolism, religious evolution, and the religious roots of social change. Our investigation of religion in the contemporary world will lead us to investigate religious congregations and phenomena, including civil religion, generational change, popular religiosity, and spirituality.
Attributes: CEED, CEMT, CETH.

THEO 7222. New Perspectives on Paul. (3 Credits)
This course will examine contemporary interpretations of Paul from the post-World War II period to the present. Topics will include the so-called ‘New Perspective’ and recent engagements with Paul in continental philosophy.

THEO 7731. Religion and Revolution. (3 Credits)
Using El Salvador (1975-1995) as a case study, the course will examine theological and socio-political questions that emerge when believers engage in revolutions. Primary focus on theological figures and themes such as Oscar Romero, Jean Donovan, Ignacio Ellacuria, comunidades de base, the preferential option for the poor, and Christology, will be supplemented with interdisciplinary reflection on critical theory (Marx et al.), postidealist epistemology (Zubiri), and postcolonial identity (Bhabha).

THEO 7736. Bioethics. (3 Credits)
This course attempts to put the Roman Catholic and broadly Christian bioethical traditions in conversation with their secular interlocutors—toward the end of examining whether or not these traditions have a place in public bioethical discourse and what that contribution might look like. Among the issues to be examined are distribution of healthcare resources, reproductive and other biotechnologies, the moral status of ‘the other’ in bioethics, and withdrawal/refusal of medical treatment.
Attributes: CEED, CEMT, HECH.

THEO 8998. IUDC Consortium Tutorial: Advanced Syriac Readings. (3 Credits)
This course is an independent study/tutorial for IUDC Consortium students from member schools, and offers an exploration of linguistic and theological aspects of Syriac writings from Late Antiquity.

THEO 8999. Independent Study. (0 to 4 Credits)
Independent Study.

THEO 9000. Professional Development Seminar. (0 Credits)
The seminar introduces advanced doctoral students to the job search process, provides help in compiling a strong application dossier, prepares students for interviews and job talks, advises students about negotiating offers, and assists students in strategizing their career paths within and beyond the academy. In addition to a number of seminar meetings, students will receive individualized attention, help editing their application materials, and practice with interviews and job talks.

THEO 9999. Dissertation Direction. (1 Credit)
THEO MTNC. Maintenance-Theology. (0 Credits)

Torts (TOGL)

TOGL 0108. Torts. (4 or 5 Credits)
A study of the causes of action arising from breaches of legally recognized duties relating to the protection of person, and property, including the traditional tort actions and new and developing areas of tort liability. Various defenses, immunities and privileges are discussed. The course includes a critical analysis of the fault concept of liability. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: LMCO.

TOGL 0203. Torts at the Supreme Court. (2 Credits)
Even though the common law of torts is predominantly a matter of state law, the United States Supreme Court has taken up a variety of important tort issues over the years. These include, among others: punitive damages, federal preemption in products liability cases, qualified immunity in constitutional torts, and the treatment of public figures in the law of defamation and privacy. We will explore a range of tort cases at the U.S. Supreme Court from the past, as well as those that are before the Court in the 2019 Term. Students will do class presentations and a take-home final examination. A key goal of the class/seminar will be to involve students in debates about current tort and constitutional law issues that are being and have been before the United States Supreme Court. Just right for those interested in Torts or Constitutional Law.
Attributes: LDE, LLM.
TOGL 0226. Advanced Torts: Defamation and Privacy. (3 Credits)
Tort law recognizes that words and images can injure, and through causes of action libel, slander, and the rights of privacy, it attempts to compensate the victims of those injuries. This course begins with traditional tort law of defamation, traces the development of that through key Supreme Court cases of the 1960s, and provides a close examination of current defamation law. Some of the contemporary controversies to be addressed include: the existence and scope of the 'fact/opinion' distinction; the use of defamation causes of action in employment-related litigation; the developing 'neutral reportage' principle and the proper accommodation of defamation principles to new technologies of communication. Notes: Take-home exam or paper option.
Attributes: IPIE, LLM.

TOGL 0227. Constitutional Torts. (2 Credits)
This course will explore issues concerning how private individuals obtain remedies against governmental actors for violation of their constitutional (and sometimes statutory) rights. The class will address prerequisites to relief, such as the state action doctrine, and will touch on substantive rights such as substantive and procedural due process, the 4th Amendment right to be free from unreasonable search and seizure, and the 8th Amendment right not be subjected to cruel and unusual punishment.
Attributes: INLJ, LMCO.

TOGL 0360. Consumer Financial Protection Law. (2 to 4 Credits)
Consumer spending is a multi-trillion dollar sector that drives the U.S. economy. This course provides an overview of the consumer finance system—the way in which consumers finance and manage their consumption—and examines the business, economics, politics, and regulation of this sector of the economy. Consumer finance is a business-to-consumer industry, and this course focuses on both consumer and financial institution concerns in transactions. The course examines the regulatory structure and methods of consumer finance regulation, as well as the specific economics and regulation of major consumer financial products. Considerable attention will be given to the new Consumer Financial Protection Bureau and its powers and politics. The course's coverage will roughly track the authority of the CFPB: deposit accounts, payment products (debit and credit cards), credit products (credit cards, mortgages, payday, and auto loans as well as debt collection and restructuring services), some insurance products; and advice and restructuring services. Attention will also be given to how financial institutions finance their operations, access to financial services, and to the special role of consumer finance in the socioeconomic of the middle class.
Attributes: BFE, CRCP, INLJ, LAWB, LLM.

TOGL 0780. Business Torts. (2 Credits)
Students will demonstrate a basic understanding of commonly litigated business torts, including the basics of the economic loss rule, misappropriation, fiduciary duties, deceptive marketing, business disparagement, misappropriation of trade secrets and trademark. Students will be able to recognize situations in which these causes of action are available and analyze those causes of action.
Attributes: LAWB, LLM.
URST 3340. Urban Psychology. (4 Credits)
In 1800, London became the first city in human history to top the 1-million mark. How does living in a large city impact us—our inner personality, outer behavior, values and relationships? This interdisciplinary urban studies course focuses on this question, including the methods and findings of behavioral research on: the growth of cities, crowding, prosocial and antisocial behavior; primary and secondary relationships, ethnicity, happiness, deviance, pace of life, urban personality, the future of cities. This Fordham course in London meets three days weekly (Tues/ Wed/Thurs), including related excursions and fieldwork on city life. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

URST 3800. Internship. (3 Credits)
Supervised placement for students interested in work experience.

URST 3999. Tutorial- Urban Studies. (3 Credits)

URST 4800. Urban Studies Internship. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

URST 4890. Research Seminar. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

URST 4999. Tutorial. (1 to 4 Credits)
Independent research and reading with supervision from a faculty member.

Graduate Courses

URST 5000. Issues in Urban Studies. (3 Credits)
Required foundation course for M.A. in Urban Studies. Introduces students to current debates in urban studies and to modern urban theory. Themes covered include: immigration, race and ethnicity, urban culture and history, urban sociology, urban planning, city and globalization.
Attributes: DATA, HULI, PMMA.

URST 5020. Urban Political Processes. (3 Credits)
Examines urban political systems concentrating on the primary institutions and processes that comprise the urban milieu. Focuses on the major theories and approaches that attempt to explain urban politics and urban political systems.
Attributes: INST, ISIN, PMMA.

URST 5030. American Suburb: Rise and Fall. (3 Credits)
Examination of 19th Century origins of suburb as counterpoint to the city and the role of nature in shaping the design of this new form of country living. The twentieth century transformation of the suburb into the American dream will be evaluated in light of the resultant sprawl and the policy critiques of this pattern of growth. The class project will involve the design of a sustainable suburb for the 21st century.
Attribute: HIST.

URST 5035. City and Climate Change. (4 Credits)
This course is an examination of the impact of climate change and sea level rise on cities. It covers international examples as well as American cities, with particular focus on the New York metropolitan area. There are weekly readings and discussion. Experts from various interdisciplinary fields form part of the material developed in this course. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: URSU.
Prerequisite: URST 5000.

URST 5040. Urbanism. (3 Credits)
Overview of urban philosophy and urban planning theory in the modern period with emphasis on contemporary scholarship as well as planning methods and techniques. Course scope is international.
Attributes: INST, ISIN.

URST 5045. Informal Cities. (3 Credits)
This course will examine informal organization as it takes place under the impact of political crisis, natural and manmade disasters, and the ongoing crisis of poverty. A variety of sources will be used including written records, films, and imagery.

URST 5066. Urban Health and Environment. (3 Credits)
This course will examine the intersection of urban life, the urban environment, individual and community health, and public policy. In doing so, it will examine the evolution of urban public health problems, the urban environment, and the role and responsibility of the political system to respond to individual and community health issues in urban settings. A variety of approaches to the study of urban public policy as well as selected issues from the study of urban public and environmental health will be highlighted.
Attributes: CEED, CETH, ENST, ESEL.

URST 5070. Environmental History of the American City. (3 Credits)
A survey of New York City's history that emphasizes its changing economy, ecology, geography, and society over 400 years. Subjects include the political economy of poverty, the global outreach of New York, its capacity to change the environment of other places, and urban redevelopment. Students will conduct preliminary research and prepare a prospectus for a research project.
Attributes: ENST, ESEL, ESHC.

URST 5080. On the Waterfront: Maritime New York History and Policy. (3 Credits)
This course will explore the rich exchange of goods and people which made New York a 'river city,' the problematic legacy of that long maritime history, and the complex array of public policy questions that are redefining our relationship to the edge.

URST 5081. Brooklyn Waterfront: The Social Production of Space. (3 Credits)
This course examines the social, economic, ideological, and technological forces that produced the new Brooklyn waterfront. Brooklyn Bridge Park is the case study and focuses on its historic transformation from a ferry landing and the largest private freight terminal in the world into a public waterfront park at the beginning of the 21st century. The course explores the role of public policy, community debates, as well as the historical memory, visual images, and local uses that shaped the new vision of this space. Field work and research at the Brooklyn Historical Society required.
URST 5090. Lincoln Center Arts. (3 Credits)
Considers the performing and visual arts and how they are mediated by the stature of the Lincoln Center complex. Topics include John D. Rockefeller 3rd’s dream, the politics and design of the complex, Robert Moses and Lincoln Square, history of the arts in NYC, politics and economics of the arts.

URST 5095. Space, Place, Immigrant Cities. (3 Credits)
This course will introduce students to the main issues and current debates on immigrants in large urban areas in the U.S. Due to their density, cities represent microcosms of interaction and identity formation among and between different groups. This often manifests itself spatially, as certain neighborhoods become centers of residence and territorial concentration for immigrants. In the process of settling, immigrants also start identifying strongly with their space of settlement. This course will focus on the contemporary manifestations of immigrant settlement in cities, while also paying attention to new settlement patterns in reconfigured metropolitan spaces.

URST 5140. Themes in Urban Public Policy and Power. (3 Credits)
This course surveys a series of issues and ideas in urban public policy in order to understand why urban actors compete, what power means to them, and what sorts of dynamic policy issues they confront.

URST 5252. Urban Theory and the Modern City. (3 Credits)
Provides an overview of key theory themes of the 20th/21st American city and explores the modern city at the crossroads of socio political study and interdisciplinary urban research. Themes include city and society, class and urban space, urban poverty, race and culture, diversity in the global city, crisis and conflict, gender and sexuality, sovereignty, just cities, sanctuary cities, and more.

URST 5900. Global Cities. (3 Credits)
URST 6080. Urban Studies Fieldwork. (1 to 6 Credits)
Required internship or field research in New York City or another large scale US or foreign city, depending on student interest. Students must have completed 12 credits and received approval from program director to enroll in this course. The field study may be related to the required research project. Maintenance-open enrollment.

URST 6200. Research Skills in Urban Studies. (3 Credits)
Introduces students to urban research methods, setting up research design including deriving hypotheses and conclusions and the application of qualitative and quantitative approaches.
Attribute: DATA.

URST 6999. Urban Studies Research. (1 to 6 Credits)
Required research project for Master’s Thesis or project. Prerequisites: 12 completed units, URST 6080, and program approval. Leads to completed thesis or project.

URST 7999. Urban Lab. (4 Credits)
Graduate course with field study component on specific urban topics. Co-taught by faculty across the university and open to all graduate students. Focuses on applied urban research and community engagement. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

URST 8100. Urban Studies Internship. (0.5 to 6 Credits)
This is an internship course for graduate students working on internships, and for international students working on their Curricular Practical Training (CPT). 0.5-6 credits.

URST 8999. Independent Study. (1 to 4 Credits)

Visual Arts (VART)

VART 1055. Figure Drawing. (4 Credits)
This course focuses on the study of the figure through direct observation. Various techniques of rendering and diverse media will be explored. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 1101. Urbanism. (3 Credits)
A historical introduction to the issues, principles and processes of urban design in western societies. Lectures will trace the evolution of selected cities (from ancient Athens to contemporary Los Angeles) taking into consideration the design decisions that have affected our built environment and urban culture. Field Trips. (Satisfies Fine Arts core requirement).
Attributes: FACC, FRFA, INST, ISEU, ISIN, URST, VAAR.

VART 1124. Photography I. (4 Credits)
Instruction is offered in basic camera and darkroom techniques of black-and-white photography. Class will also include critiques of students’ work and discussions of aesthetic questions pertaining to photography. Students should have adjustable cameras. Additional darkroom hours required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COMM, VAPH.

VART 1128. Introduction to Digital Photography. (4 Credits)
This class is an introduction to the fundamentals of digital photography. Assignments throughout the semester encourage students to explore some of the technical and aesthetic concerns of the medium. Photoshop is used as the primary editing tool. A 3.2 or higher megapixel camera is required. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAT, NMDD, VAPH.

VART 1135. Visual Thinking. (3 Credits)
A foundation course in visual communication. The course will cover the following topics: visual perception, composition, light and color, drawing perspective, words and images, graphic design, and photography and photo montage.
Attributes: COMM, FACC, FASH, FRFA, NMAT, NMDD.

VART 1138. Watercolor Painting. (4 Credits)
An introductory course in watercolor exploring the possibilities of the medium. Students will develop an understanding of value, color and composition while using techniques such as wet into wet, dry brush, washes and layering. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 1150. Drawing I. (4 Credits)
Work in pencil, ink, charcoal, and other graphic media designed to involve students in various approaches and attitudes toward representation and expression in drawing. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: VAAR, VAPD.
VART 1160. Architectural Language. (4 Credits)
(Formerly VART 2060 - Architectural Design I.) Introducing the basic language of 3D form and space making, this studio course involves students in the process of architectural vision, critique, analysis and creation. Emphasizing short, elementary in-class assignments, students learn to use the same tools—sketching, diagramming, scale model making, and computer modeling and animation—used by design professionals to shape our world. Lab fee. All are welcome. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: URST, VAAR.
Mutually Exclusive: VART 1161.

VART 1163. Computer Drafting for Architectural Interiors and Stage Designs. (4 Credits)
Work with Vectorworks, Rhino, and Sketch Up CAD software to draw existing architectural interiors then redesign and renovate the spaces; as well as create Theatrical Designs for theatre stages and special corporate events that are site specific at locations around the city. This course is intended for VART Architecture and THEA Design students but is open to anyone interested in learning about Computer Drafting and Design. Offered at FCLC 1st Summer Session. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAAR.

VART 1180. Painting I. (4 Credits)
An introductory course in painting, emphasizing basic formal and technical concerns. Acrylic paints will be used. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 1265. Film/Video I. (4 Credits)
An introduction to film/video production techniques used to make short projects. Students will study composition, lighting, and editing in creating their own Super 8 mm film and digital video work. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COMM, FIPR, FITV, NMAT, NMDD, VAFV.

VART 1800. Internship. (1 Credit)
Internship in Visual Arts.

VART 1995. Phone to Book. (4 Credits)
Phone to Book is an introductory course that uses smartphones to generate images, which are then carefully sequenced into bound books through print, on-demand publishing platforms. Creating digital images and quality photographic books has never been more accessible thanks to current technology; nevertheless, traditional questions remain: what is a good image, and how does picture sequencing influence meaning? This course introduces students to basic phone camera usage and digital editing techniques, along with traditional photographic concerns and editorial strategies. Further, through demonstrations, assignments, and critiques, Phone to Book provides a balance between technical and aesthetic matters relating to photographic practice. By the conclusion of the course, each student will have produced a book of original content that is intentionally structured and thoughtfully designed. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ENV5, EPLE, ESEL, ESSD, URST, VAAR.
VART 2055. Environmental Design. (4 Credits)
This introductory course explores the physical relationship between mankind and nature. Slide presentations, field trips and readings will outline the histories and forms of settlement patterns, landscapes and gardens, and our increasing interest in sustainable development, renewable energy and conservation. Sketching, design and model-building in landscape settings. Intended for design, history and science students. Required field trips and lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, ENST, ENVS, EPLE, ESEL, ESSD, SOIN, URST, VAAR.

VART 2070. Architectural Design I. (4 Credits)
A design studio course, synthesizing contextual, artistic, environmental and functional requirements in the design of public spaces, landscapes, furnishings, and buildings. A relatively simple term project, set in a landscape environment, is prefaced by exercises in analysis, skill building, theory, critique and fabrication. (Formerly VART 2060/3070 Architectural Design). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESEL, ESSD, THEA, URST, VAAR.

VART 2080. Interior Design Through Form, Function, & Light. (4 Credits)
Introduction to Interior Design will explore how form, function, and light are integral to the design process when creating a welcoming and dynamic space. We will design our own interiors from personal domestic spaces to large scale public spaces. We will work on renovation projects as well as new construction. We will explore basic design principles and learn how to apply design elements that support your style choices and help you communicate your ideas. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAAR.

VART 2121. Abstraction. (4 Credits)
We think abstractly and routinely navigate the complex abstract structures of our world. Abstract art- the major art form of the last century has tried in many different ways to come to grips with this situation. This course rather than treating abstraction as a style considers it as a way of thinking visually as a structure for creativity and expression. Working across material disciplines, the course will employ painting, drawing, and three dimensional techniques. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 2130. Painting II. (4 Credits)
Intermediate instruction is offered in painting. Emphasis will be placed on developing individual approaches to the solving of creative problems within the context of 20th-century historical and critical concerns. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.
Prerequisites: VART 1150 or VART 1180.

VART 2140. Collage and Mixed Media. (4 Credits)
A course emphasizing the formal, material and thematic exploration inherent in collage and mixed media techniques. Different visual disciplines and approaches will be combined to produce two- and three-dimensional work. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 2150. Drawing II. (4 Credits)
A workshop in various techniques and media. Field trips to museums and galleries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 2155. Environmental Design. (4 Credits)
This introductory course explores the physical relationship between mankind and nature. Slide presentations, field trips and readings will outline the histories and forms of settlement patterns, landscapes and gardens, and our increasing interest in sustainable development, renewable energy and conservation. Sketching, design and model-building in landscape settings. Intended for design, history and science students. Required field trips and lab fee. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ASAM, ENST, ENVS, EPLE, ESEL, ESSD, SOIN, URST, VAAR.

VART 2080. Interior Design Through Form, Function, & Light. (4 Credits)
Introduction to Interior Design will explore how form, function, and light are integral to the design process when creating a welcoming and dynamic space. We will design our own interiors from personal domestic spaces to large scale public spaces. We will work on renovation projects as well as new construction. We will explore basic design principles and learn how to apply design elements that support your style choices and help you communicate your ideas. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESEL, ESSD, THEA, URST, VAAR.

VART 2080. Interior Design Through Form, Function, & Light. (4 Credits)

Attributes: ENST, ESEL, ESSD, THEA, URST, VAAR.

VART 2170. Architecture I. (4 Credits)
A design studio course, synthesizing contextual, artistic, environmental and functional requirements in the design of public spaces, landscapes, furnishings, and buildings. A relatively simple term project, set in a landscape environment, is prefaced by exercises in analysis, skill building, theory, critique and fabrication. (Formerly VART 2060/3070 Architectural Design). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESEL, ESSD, THEA, URST, VAAR.

VART 2080. Interior Design Through Form, Function, & Light. (4 Credits)
Introduction to Interior Design will explore how form, function, and light are integral to the design process when creating a welcoming and dynamic space. We will design our own interiors from personal domestic spaces to large scale public spaces. We will work on renovation projects as well as new construction. We will explore basic design principles and learn how to apply design elements that support your style choices and help you communicate your ideas. Attributes: ENST, ESEL, ESSD, THEA, URST, VAAR.

VART 2265. Film/Video II. (4 Credits)
Advanced film/video production techniques will be explored as students complete several projects over the course of the semester. Students will shoot 16mm film and video and learn sound design and post-production digital effects. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COMM, FIPR, FITV, NMAT, NMDD, VAFV.
Prerequisite: VART 1265.

VART 2400. Fundamentals of Website Design. (4 Credits)
This class will introduce the key concepts in designing and building websites from an aesthetic and technical perspective. Through lecture, critical analysis and hands-on assignments students will learn how to design and build a creative and effective website. The focus of the class will be on presenting and exploring the fundamental industry standard programming language and website practice: HTML, CSS, Navigational Structures, interactivity, and Information Architecture. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAT, NMDD, VAGD.
Prerequisite: VART 2003.
VART 2500. Typography and Design. (4 Credits)
Structured as a lab course, the fundamental perception, concept and method of graphic design will be introduced through a series of set projects and exercises. We will explore how graphic design can engage, inform and challenge the viewer as well as how the design of visual communication is influenced by social, political and cultural issues. Through lectures, slide presentations, assignments and class discussions, we will examine the formal aspects of typography, the relationship between type and image, and the impact of new technologies on design practices today will be examined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAT, NMDD, VAGD.

VART 2530. Photojournalism for Publications. (4 Credits)
This hands-on workshop is designed for a student interested in the use of photography in publications. Students will work directly with The Observer on all aspects of photography from conception to publication in print and web. The practice of publishing is taught: social media, copyright, fair use, etc., with a real feel for working in photojournalism. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPH.

VART 2545. Projects and Concepts. (4 Credits)
A multi-media studio course that emphasizes creative solutions to a varied series of visual problems. The student will be able to use painting, drawing, collage, photography, sculpture, and video, as well as installation and performance to make artworks that “think out of the box”. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 2550. Designing Books, 'Zines' and Chapbks. (4 Credits)
All students with an interest in self-publishing are welcome to the class. The focus will be on the design, layout, and production of a publication from cover to the copyright page. You will learn through weekly assignments and readings about design, type, paper, and binding techniques. We will look at and critique the numerous ‘indie’ publications available and the final product will be a self-published book, ‘zine,’ or chapter-book. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COMM, NMAT, NMDD, VAGD.
Prerequisite: VART 2003.

VART 2600. Graphic Design Concepts. (4 Credits)
In this class the focus will be on both the practical and creative aspects of the design process. Assignments will include magazine, book and brochure designs. Social responsibility in the context of a design’s ability to educate, inform and propagate, and deceive will also be examined. Emphasis will be placed on the articulation of ideas, process, writing skills and preparation of files for output as well as presentation, craftsmanship and typography. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAT, NMDD, VAGD.
Prerequisite: VART 2003.

VART 2700. Logos, Branding, and Presentation. (4 Credits)
This advanced level class will focus on the development, design and presentation of an organizational product identity. The assignment will include research, a written proposal and a final presentation of a design for a logo, product, brochure and a promotional material. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAC, NMAT, NMDD, VAGD.
Prerequisite: VART 2003.

VART 2800. Seminar Graphic Design. (4 Credits)
This seminar course is open to all students interested in graphic design. Class will include visits to designers’ studios, slide lectures, assigned readings and written essays. We will look at the role of the designer in society both in the past and present, and examine the art of graphic design. Permission. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: NMDD.

VART 2999. Tutorial. (2 Credits)
Independent research and readings with supervision from a faculty member.
Attributes: VAAR, VAFF, VAGD, VAPD, VAPH.

VART 3001. Documentary Photography. Japan. (4 Credits)
This intensive class is designed as a platform for intermediate and advanced level students to further develop their photographic production with an emphasis on generating documentary projects focusing on the people, culture, and architecture of Japan. The megacity of Tokyo will serve as the starting point for our investigations, with image making itineraries that will take us from the cosmopolitan ward of Shinjuku, to the center of youth culture in Shibuya; and from the cutting edge fashion districts of Harajuku, to the temples and shrines of Asakusa. Concurrent with our photographic explorations we will examine contemporary exhibitions in venues such as the Tokyo Metropolitan Museum of Photography in Ebisu, as well as view the ancient collections housed in Japan's oldest and largest museum, the Tokyo National Museum in Ueno. Traveling by Shinkansen bullet train at 300 km/h (186mph), we will make our way south to Kyoto, the nexus of traditional Japanese culture and history with approximately two thousand temples, shrines, and gardens that we can utilize as both the catalyst and stage for our photography. The extraordinary wealth of visual stimuli we will experience in Japan over ten days will certainly inspire, as well as function as the backdrop against which to critically discuss the strategies that photographers employ in communicating their interests. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAAR, VAFF, VAGD, VAPD, VAPH.
The class will survey the history of the publication of photography books from early works published in the mid-19th century, albums with tipped-in original photographs, through the invention of off-set reproduction at the turn of the 19th century, and self-made digital books at the end of the 20th. Influential books and formats will be reviewed. The class will visit a museum collection to see examples of rare out-of-print and limited edition items, such as Alexander Gardner’s Photographic Sketchbook of the Civil War, William Bradford’s Arctic Regions, and others. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, AMST, ASAM, VAPH.

VART 3030. Art Design and Politics. (4 Credits)
How can art and design be used as a form of social activism? This studio-art course pushes beyond the confines of the classroom/gallery, taking art "to the streets" with collaborative, student-directed creative initiatives that effect positive change in the real world. The course structure is flexible, with projects driven by the particular interests of the students enrolled. We will dive into ethical conundrums related to social justice and explore the intersection of activist, research, and aesthetic strategies. Readings, guest lectures by artist-activists, and seminar-style classroom brainstorms over potluck dinners will provide students with the tools and inspiration to meaningfully engage with communities in a joint effort to see power and reimagine it in innovative ways. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: HCWL, HUST, NMDD, NMDE, PJSJ, PJST, VAAR, VAFV, VAGD, VAPD, VAPH.

VART 3055. Ecology for Designers. (4 Credits)
An introduction to functional ecosystems, and the application of that knowledge to the re-design of the urban built environment. Energy use patterns, resource management, water cycles, productivity, food production, systems integration will be inspected, leading to the proposition of a hypothetical urban ecosystem, which may include water re-cycling, habitat restoration, bio-mimicry, renewable energy, and vertical farming. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ENST, ESEL, ESSD, URST, VAAR.

VART 3131. Abstraction II. (4 Credits)
An advanced class in abstraction. Painting, drawing, three-dimensional work, photography, and video are used to investigate issues in abstraction. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 3132. Projects and Concepts II. (4 Credits)
An advanced multi-media studio course emphasizing creative solutions to a variety of visual and conceptual problems. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 3134. 20th Century Art: Modernism and Modernity. (4 Credits)
A survey of the major developments of modern art from the late 19th century until today, with an emphasis on work done before 1940. This course will undertake the larger task of understanding modernism in art as a visual response to the conditions of modernity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 3135. Modernism and Its Aftermath. (4 Credits)
This course provides an overview of contemporary art, stressing work done since World War II but also exploring the early 20th-century roots of modern art and modernism. In addition, various postmodern approaches will be examined. We will pay particular attention to abstract expressionism, pop art, minimalism, post-minimalism (both American and European), Earth art, and conceptual art. This course satisfies the second art history requirement for the visual arts major.
Attributes: ACUP, AMST, ASAM, VAPD.

VART 3186. Photography III. (4 Credits)
Continuation of studies in photography at the advanced level. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPH.
Prerequisite: VART 2185 (may be taken concurrently).

VART 3250. Mobile User Experience Design. (4 Credits)
In this course, students learn what it takes to create a mobile app using the human-centered design approach. Through hand-on exercises, students will learn how to understand the user with research, wireframing, screen design, and prototyping using industry standard software (no coding required). By the end of the class, students will have a portfolio-quality mobile app that solves a real-world problem. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAC, NMAT, NMDD, VAGD.
Prerequisites: VART 2003 or NMDD 1001.

VART 3251. Film Video Postproduction. (4 Credits)
Through demonstrations and field trips, students will learn how to work with professional technicians to complete their films. Film processing, color correction, sound design, music scoring, special effects, title design, and distribution will all be discussed. Students will complete exercises and finish a short film that can be submitted to festivals. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

VART 3257. Seminar: Avant-Garde Film/Video. (4 Credits)
This studio course will explore the practice of current avant-garde film and video from a visual arts perspective. Various artists’ strategies for creating challenging work will be considered, including the use of abstraction, appropriated imagery, autobiographical detail, disjunctive sound image relationships and other aesthetic choices. The course will include field trips to view current experimental films and videos at museums, film festivals and art galleries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAFV.
VART 3258. Film/Video Installation. (4 Credits)
Students will create their own video installations using multiple monitors and mixed sounds. Using video monitors and film loops, students will create their own moving image pieces for the gallery/museum context. We will consider historical background and how contemporary practitioners use multiple screens and sound to explore unexpected terrain. Students will present their video installation work in a gallery show at the end of the semester. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAFV.
Prerequisite: VART 1265.

VART 3261. Documentary Film/Video Production. (4 Credits)
Students will plan, shoot, and edit a short non-fiction film. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: FIPR, FITV, VAFV.
Prerequisite: VART 1265.

VART 3262. Narrative Film/Video Production. (4 Credits)
Students will plan, shoot, and edit a short fiction film. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAFV.
Prerequisite: VART 1265.

VART 3267. Urban Film Video Production. (4 Credits)
After looking at ways in which the city has been framed historically in films, students will pursue research in the city using video as their tool. Using interviews, screen text, voice over, and other documentary techniques, students will explore a project of interest to them and make a series of short films that reveal an aspect of the urban milieu. In class sessions and in one on one meetings with the professor, students will propose and refine their project and gather feedback about communicating in visual language on city issues. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COMM, URST, VAFV.

VART 3268. Film/Video Animation. (4 Credits)
This course will explore two- and three-dimensional film and video animation. We will study the works of film artists in the hopes of gleaning inspiration from the history of animation. Students will create their own films in this class using flat art (drawings, paintings, photographs, or collages) or sculptural objects. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: NMAT, NMDD, VAFV.

VART 3269. Supervised Internship. (2 to 3 Credits)
Supervised internship for students interested in work experience.
Attributes: VAFV, VAGD, VAPD, VAPH.
VART 3810. Seminar in Graphic Design. (4 Credits)
This seminar course is open to all students interested in graphic design. Class will include visits to designers’ studios, slide lectures, assigned readings and written essays. We will look at the role of the designer in society both in the past and present, and examine the art of graphic design. Social responsibility in the context of a design’s ability to educate, inform or propagate and deceive will also be examined. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAGD.

VART 3999. Tutorial. (3 Credits)
Independent research and readings with supervision from a faculty member.
Attributes: VAAR, VAFV, VAGD, VAPD, VAPH.

VART 4090. Senior Project Architecture. (4 Credits)
In this advanced studio seminar, students may pursue a specific design project with the consent and guidance of a visual arts faculty member. Portfolio preparation. A program proposal, with a schedule, bibliography, and proposed site, is due at the outset. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: URSG, VAFV.
Prerequisites: VART 3070 or VART 3080.

VART 4100. Seminar Modern Art: Critical Perspectives. (4 Credits)
A seminar class with readings, discussions, and presentations, emphasizing critical and historical trends in modern and contemporary art. Current museum and gallery exhibitions will be explored. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: VAPD.

VART 4300. Representation in Art. (4 Credits)
Representation in Art: Film/Video. Photography and Painting will deal with the ethics of representation, and consider how art deals with depictions of people. What is an artist’s responsibility to his/her subject? This seminar will provide a sense of ethical insight and social morality into this aspect of visual literacy and will encourage students to be critical, active and engaged artists and viewers. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: COLI, EP4, VAFV, VAL.

VART 4600. Senior Seminar: Studio Art. (4 Credits)
This is a course for senior visual arts students who wish to have a senior project exhibition. The seminar will discuss critical issues relating to the making, presentation, and interpretation of contemporary art. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: VAAR, VAFV, VAGD, VAPD, VAPH.

VART 4800. Internship. (4 Credits)
Supervised placement for students who are interested in work experience. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

VART 4999. Tutorial. (1 to 5 Credits)
Supervised individual projects in photography, painting/drawing, graphic design, architecture or filmmaking/video. May be continued to a maximum of eight credits.
Attributes: VAAR, VAFV, VAGD, VAPD, VAPH.

VART 5555. Urban Film Video Production. (3 Credits)
After looking at ways in which the city has been framed historically in films, students will pursue research in the city using video as their tool. Using interviews, screen text, voice over and other documentary techniques, students will explore a project of interest to them and make a series of short films that reveal an aspect of the urban milieu. In class sessions and in one on one meetings with the professor, students will propose and refine their project and gather feedback about communicating in visual language on city issues.
Attributes: URSG, VAFV.

VART 8999. Tutorial. (1 to 4 Credits)
Tutorial.

Women, Gender, and Sexuality Studies (WGSS)

WGSS 2999. Service Learning-2000 Level. (1 Credit)
WGSS 3000. Gender and Sexuality Studies. (4 Credits)
This course introduces students to theories of gender and sexuality from a range of disciplinary perspectives. It is the new introductory course for the WGSS program. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, APPI, ASHS, ASSC, BIOE, COLI, INST, ISIN, PJGS, PJST.

WGSS 3001. Queer Theories. (4 Credits)
An introduction to the academic discipline of queer theory, focusing on foundational thinkers (e.g., Butler, Foucault, Sedgwick, and others as well as their philosophical and psychoanalytic precursors and interlocutors. The course will also address selected issues currently under discussion in the discipline. These may include the role of activism, the relationship between queer theory and feminism theory, attention to race, and intersections with postcolonial theory. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ACUP, ADVD, AMST, ASAM, ASHS, ASLT, COLI, INST, ISIN, PJGS, PJST, PLUR.

WGSS 3002. Feminist and Women’s Studies. (4 Credits)
This course provides a historical perspective on feminism and women’s experience, including 19th and 20th century American movements for women’s rights as well as texts that influenced the development of feminist thought and theory. It is one of three required courses for WGSS program. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ADVD, AMST, ASHS, ENRJ, PJGS, PJST.
WGSS 3004. Transnational Feminisms. (4 Credits)
Transnational feminism first emerged as a critical response to global feminist platforms organized around notions of universal sisterhood and the presumption of women's shared oppression. This course considers how the field of transnational feminist scholarship has expanded to engage a wide range of topics pertaining to modern forms of state power, including critical studies of economic restructuring, settler colonial rule, human rights, global carceral regimes, and the criminalization of borders. Throughout, the class will emphasize how a transnational perspective unsettles U.S.-centric approaches to feminism and engages with local struggles as intimately shaped by colonial histories and transnational processes. With these critical tools in place, we will work to imagine possibilities for building feminist alliances across borders and practicing decolonizing forms of solidarity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ANTH, APPI, AHS, ASSC, INST.

WGSS 3067. Contemporary Women Poets. (4 Credits)
In this course, students will read poetry written by women poets in the 20th and 21st centuries with a focus on the imaginative representation of women's lived experience. We will read the work of poets who address the themes of feminine embodiment and sexuality, women's roles as mothers and daughters, women's work (both professional and domestic), and the role poetry plays in enabling women to discover a language to contain their experience. Among the (possible) poets we will read are Sylvia Plath, Ann Sexton, Elizabeth Bishop, Lucille Clifton, Anna Swir, Adrienne Rich, Marie Ponsot, Eavan Boland, Louise Erdrich, Kate Daniels, Mary Karr and A.E. Stallings. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENRJ, IRST.

WGSS 3141. Women in Africa. (4 Credits)
This course examines the formal and informal participation of African women in politics, their interaction with the state and their role in society. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AFAM, ASSC, GLBL, INST, ISAF, ISIN.

WGSS 3318. Early Women Novelists. (4 Credits)
A study of the rise of female authors in the early modern period. We will address problems of gender and rigorously analyze the basic literary and historical dimensions of each text. Authors will include Behn, Burney, Woolstencraft, Radcliffe, Austen, Emily and Charlotte Bronte. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ALC, ENGL.

WGSS 3415. European Women 1500-1800. (4 Credits)
This course will explore the role of women in northern European society from the 16th to the end of the 18th centuries. It will examine issues of gender, and contemporary attitudes concerning women. Among the subjects that this course will address are women's work, education, marriage and childbirth. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHC.

WGSS 3416. European Women 1800-Present. (4 Credits)
This course will be an exciting exploration of the changing status, roles, and achievements of women in Western Europe from the French Revolution at the dawn of industrialization to the present day. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, HIST, INST, IPE, ISEU.

WGSS 3459. Transgender History. (4 Credits)
This course examines the making of transgender life in the modern world. We will begin in late 19th-century Europe with the emergence of sexuality, contextualizing early sexological writings in relation to contemporaneous cultures of sexual and gender nonconformity, to literary and historiographical works in which gender-variant figures appear, and to the gender dynamics of high imperialism. In this way, we will sketch out the historical matrix that gave birth to the modern invert. We will treat transgender people not only as objects of historical narratives but also as creators of historical representations. We will engage with late 20th- and early 21st-century histories of transgender life in various places, including Europe, the United States, and other areas of the world.
Attribute: AHC.

WGSS 3503. Work, Family, and Gender. (4 Credits)
This course examines how two key institutions in society - the workplace and the family - interact with one another. Special emphasis is placed on the critical ways that work-family balance and conflict are conditioned by gender. The course will cover the impacts - both negative and positive - of work demands upon individuals' family lives, as well as the effects of family obligations upon workers and workplaces. Students will be familiarized with voluntary responses to work-family challenges on the part of individuals, families, and employers, as well as relevant public policies in the U.S. and around the world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AMST.

WGSS 3537. Satire, Sex, Style: Age of T. Nash. (4 Credits)
Considered for a long time to be a 'minor' Elizabethan writer with 'nothing to say', Thomas Nashe managed to produce a varied and astonishing, if ultimately costly and futile, body of work during the last decade of the sixteenth century, spanning erotica, picaresque fiction, and fierce invective, satire, and polemic. This course will offer a close look at Nashe's unique rhetorical style in relation to the vivid literary culture of his times, focusing on how Nashe's work pushes to the extreme various impulses in Elizabethan literature that tend to get overlooked in conventional accounts of the period. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: AHC.

WGSS 3826. Modern US Women's History. (4 Credits)
The history of American women from the first women's rights convention in 1848 to the present. We will study women's everyday lives (including at home and work), major events like the campaign for suffrage, World War II, and the women's liberation movement, and representations of women in popular culture (magazines, movies, and T.V.). Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AHC, AMST, PLUR.
WGSS 3901. Philosophical Issues Feminism I. (4 Credits)
Philosophical exploration of issues raised by historical and contemporary reflection on the relationship between the sexes. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

WGSS 3930. Sex and Gender in South Asia. (4 Credits)
In this course, we will explore histories of women, gender, and sexuality in South Asia from the 18th century to the present. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, GLBL.

WGSS 3911. Introduction to Gay and Lesbian Literature. (4 Credits)
This course will read texts by a diverse range of Anglophone authors, emphasizing the cultural history of same-sex identity and desire, heteronormativity and oppression, and queer civil protest. It will also consider the problems of defining a queer literary canon, introduce the principles of queer theory, and interrogate the discursive boundaries between the political and personal. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AHC, GLBL.

WGSS 4005. Queer Theory and the Americas. (4 Credits)
Drawing from the often divergent traditions of Anglo and Hispanic America, this course will take an interdisciplinary approach to queer methodologies for cultural and literary studies. Students will encounter foundational queer theoretical texts (both historical and contemporary) as well as novels, plays, and films, and will explore, for themselves, what queerness means and does. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ACUP, ADVD, ALC, AMST, ASHS, COLI, ENGL, ICC.

WGSS 4105. Religion, Gender, and Sexuality. (4 Credits)
This course considers the intersections of religion, gender, and sexuality. In many parts of the world, including the United States, and in many religious traditions, cultural and religious identity and continuity hinge on gendered practices and closely controlled sexual regimes. The goal of this course is to understand how religious institutions, communities, doctrines, practices and traditions shape gendered ideologies and practices, debates about sexuality and gendered division of labor, and the lives of men and women who participate in these religious communities. The course is organized conceptually; rather than learning about specific religious traditions, we will discuss thematic issues at the intersection of religion, gender, and sexuality. At various junctures we will discuss specific examples that span religious traditions, geographical locations, and historical periods. The course will therefore provide students with a sense of how contemporary and seemingly local debates are rooted in much broader conversations. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ADVD, AMST, ASHS, ASRP, ICC, PLUR, REST.

WGSS 4127. Seminar: Novels By Women: Jane Austen to Toni Morrison. (4 Credits)
An intensive study of novels by Jane Austen, George Elliot, Virginia Woolf, Zora Neale Hurston, and Toni Morrison. Our reading will be supplemented by literary criticism and historical contextual material. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC, ENGL.

WGSS 4318. Seminar: Early Women Novelists. (4 Credits)
A study of the rise of female authors in eighteenth-century England. We will address problems of gender, race and class, as well as the basic literary and historical dimensions of each text we read. Authors will likely include Aphra Behn, Eliza Haywood, Frances Burney, Mary Wollstonecraft, Ann Radcliffe, Jane Austen, and Charlotte or Emily Brontë. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: ALC.

WGSS 4341. Race, Sex, and Science. (4 Credits)
This course introduces students to interdisciplinary debates about the relationship between race, sex, and gender, on the one hand, and science, technology, and medicine, on the other. We will examine two interrelated questions: How do scientific claims influence cultural understandings of race, gender, and sexuality; and how do cultural beliefs about race, sex, and gender influence scientific research and knowledge production? The course will explore the role that understandings of race, sex, and gender have played in the development of Western science; the relationship among race, sex, gender, and scientific research in genomics and health disparities research (among other fields); and finally, the ways in which race, gender, and social inequalities become embodied and affect human biology. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: AMST, ICC, LALS, PLUR, SOCI, URST.

WGSS 4344. Reproductive Technologies: Global Perspective. (4 Credits)
The interdisciplinary course will focus on issues in technology and reproduction, emphasizing the view that reproduction is not simply a biological process, but one that is laden with symbolic, political, and ideological meanings. Drawing on the fields of anthropology, sociology, history, public health, law, and science, technology and society. We will examine the contested meanings of reproduction, in particular how reproductive technologies are changing lives around the globe. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attributes: GLBL, ICC.
WGSS 4400. Gender, Bodies, Sexuality. (4 Credits)
This course explores how gender and sex shape our lives and the world around us, our experiences of our bodies, and definitions of sexuality. Our focus will be on gender/sexuality as key dimensions of all social structures and institutions, with a particular interest in the intersection between gender and sexuality and the shaping of gendered and sexed bodies. We will examine gender, sex, and sexuality as social constructions, as social relations, as contested sets of cultural meanings, as lived experiences, and as dimensions of social structure. We will discuss challenges to and fissures in the sex/gender/sexuality system. Course materials include theoretical writings, empirical studies, autobiographical reflections, and films. These materials will inspire us to consider the social, economic, cultural, and institutional forces that shape our lives. Students will develop a critical perspective on the sources and consequences of social constructs and inequalities that shape us as individuals, our culture, and the social institutions that we inhabit, such as schools, the workplace, the state, and the family. This includes a critical evaluation of widespread assumptions about gender that we often take for granted, such as the naturalness of categories of “man” and “woman,” “femininity” and “masculinity,” and “heterosexual” and “homosexual.” Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: AMST, ICC, PLUR.

WGSS 4800. Internship. (4 Credits)
Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

WGSS 4910. Internship. (4 Credits)
Placement in an agency or organization that deals with women’s issues. Under a faculty member’s supervision, the student writes a paper which integrates the internship experience with course work and research. All students meet monthly with the program co-director and one another for group discussions of their work. *This course requires the approval of the Director of Women, Gender, and Sexuality Studies. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

WGSS 4920. Senior Project. (4 Credits)
A substantial project on a subject in Women’s Studies submitted, with appropriate documentation, by students in theatre and the visual arts and evaluated by two faculty advisers in their field. All students meet monthly with the program co-director and one another for group discussions of their work. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

WGSS 4930. Senior Thesis. (4 Credits)
A substantial paper on a topic in Women’s Studies written under the direction of a faculty adviser and a second reader. All students meet monthly with the program co-director and one another for group discussions of their work. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

WGSS 4950. Christianity and Sexual Diversity. (4 Credits)
Employing perspectives from history, theological ethics, and LGBT studies, this course will investigate what it means to take queer perspectives on Christianity sexuality, and discipleship. Readings will include biblical, historical, and contemporary materials that seek to illuminate the ways in which Christians and Christian communities have responded to sexual and gender diversity. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: ICC, REST.

WGSS 4999. Tutorial. (1 to 5 Credits)
GABELLI GRADUATE SCHOOL OF BUSINESS

No matter what your career goal, Fordham has a business program tailored to match it.

How do we make this possible?

Drawing on the depth of expertise of over 120 full-time business faculty members and the breadth and flexibility of myriad graduate business courses, we are able to offer three variants of the M.B.A. program—a full-time cohort M.B.A., Professional M.B.A. (including part-time), and Executive M.B.A.—along with numerous specialized Master of Science and Advanced Certificate programs developed for the business niches that seek today's student talent.

To learn more about the Gabelli Graduate School of Business, visit the Fordham website.

A-Z Academic Program Index

A
- Accounting Concentration (p. 667)
- Accounting Technology Analytics (Adv Cert) (p. 659)
- Applied Statistics and Decision Making (M.S.) (p. 677)

B
- Blockchain Secondary Concentration (p. 668)
- Business Analytics (M.S.) (p. 677)
- Business Analytics for Managers (Adv Cert) (p. 660)

C
- Communication and Media Management Concentration (p. 668)
- Corporate Compliance Secondary Concentration (p. 668)

D
- D.P.S. in Business (p. 661)
- Dual Degree in Business Analytics (M.S.) and Information Technology (M.S.) (p. 678)

E
- Electronic Business Secondary Concentration (p. 669)
- Entrepreneurship Secondary Concentration (p. 669)
- Executive M.B.A. (p. 665)

F
- Finance Concentration (p. 670)
- Financial Computing (Adv Cert) (p. 660)
- FinTech Concentration (p. 670)
- Full-Time Cohort M.B.A. (p. 666)

G
- Global Finance (M.S., on campus and online) (p. 679)
- Global Sustainability Secondary Concentration (p. 671)

H
- Health Administration (M.S.) (p. 680)
- Healthcare Management Secondary Concentration (p. 672)

I
- Information Systems Concentration (p. 672)
- Information Technology (M.S.) (p. 681)
- International Business Bridge (p. 688)
- International Business Secondary Concentration (p. 673)

M
- Management (M.S., on campus and online) (p. 682)
- Management Concentration (p. 673)
- Marketing Concentration (p. 674)
- Marketing Intelligence (M.S.) (p. 683)
- Media Management (M.S.) (p. 684)

P
- Ph.D. in Business (p. 663)
- Pre-MBA Program (p. 688)
- Professional Accounting (M.S.) (p. 684)
- Professional M.B.A. (p. 675)
- Professional Taxation (M.S.) (p. 686)
- Public Accountancy Concentration (p. 675)

Q
- Quantitative Finance (M.S.) (p. 686)

S
- Strategic Marketing Communications (M.S. Online) (p. 687)

Academic Areas
- Accounting and Taxation (p. 611)
- Business Law and Ethics (p. 616)
- Communication and Media Management (p. 617)
- Finance and Business Economics (p. 620)
- Information Systems (p. 639)
- Leading People and Organizations (p. 645)
- Marketing (p. 648)
- Operations (p. 654)
- Strategy (p. 655)

Accounting and Taxation

Accounting is the language of business, and Fordham professors help their students to become fluent in that language. Core-level accounting classes give students the basic skills to interpret and analyze financial statements, while upper-level and special-topics courses—such as Corporate and Partnership Taxation, International Accounting, and Ethics
in Financial Reporting—let them specialize their knowledge. Fordham's accounting faculty works with highly motivated students through the university’s chapter of Beta Alpha Psi and routinely coaches teams of undergraduates and graduates in prestigious accounting competitions organized by multinational accounting firms.

Programs

The accounting and taxation area provides coursework to develop sophisticated usage of accounting information and expertise in taxation. It offers courses leading to five degrees:

- M.B.A. in Public Accountancy (p. 675)
- M.B.A. Concentration in Accounting (p. 667)
- M.S. in Professional Accounting (p. 684)
- M.S. in Professional Taxation (p. 686)
- Advanced Certificate in Accounting Advisory
- Advanced Certificate in Auditing and Assurance
- Advanced Certificate in Corporate Taxation
- Advanced Certificate in Individual Wealth Management Taxation

Courses

Area courses, listed in detail in this section, span three broad categories:

- Financial accounting courses that provide an understanding of U.S. Generally Accepted Accounting Principles (GAAP) and International Accounting Standards to develop skills in financial statement preparation and analysis
- Taxation courses that focus on tax research and compliance
- Audit courses that address auditing from financial statement, information technology, ethics, and compliance perspectives

Accounting Courses

ACGB 0001. Fund Act I (Peking Univ). (4.5 Credits)

ACGB 6111. Fundamentals of Accounting I. (3 Credits)

MBA CORE COURSE This core course in accounting is required of all Gabelli graduate students in every concentration. Provides insights into how accounting information can be used by investors and creditors to measure the results of business operations. Students requiring more in-depth accounting knowledge can select electives in financial and/or managerial accounting as their advisers suggest.

Attribute: ASDM.

Mutually Exclusive: MMGB 6111.

ACGB 7045. International Tax and Accounting. (3 Credits)

Introduces the complexities of international taxation by focusing on the U.S. tax system's impact on U.S. companies investing or operating abroad and on foreign companies investing or operating in the U.S. Topics include tax treaties, foreign tax credits, and controlled foreign operations. It also addresses global initiatives with respect to taxation and accounting. TXGB 7010 is recommended as a prior course.

Prerequisite: TXGB 7001.

ACGB 7076. Tax Accounting. (3 Credits)

This course focuses on the financial reporting provisions related to income taxes. Students will learn how to (1) calculate and identify income tax amounts reported on the income statement, balance sheet, and statement of cash flows; and (2) prepare the income tax footnote to the financial statements and related disclosures. The course will also cover some audit issues related to income tax balances and disclosures, and students will learn to identify tax risks and internal controls to mitigate such risks.

ACGB 7105. Financial Accounting. (3 Credits)

Develops the ability to analyze and interpret financial statements and studies the effects of alternative accounting standards and practices on income statements, balance sheets and statements of cash flows.

Attribute: ABEP.

Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7120. Ext Fin Info & Rptg. (3 Credits)

Focuses on the theory and techniques utilized in corporate financial reporting. Examines the standards and pronouncements of the Financial Accounting Standards Board (FASB) and the Securities and Exchange Commission (SEC) with regard to their impact on financial statements. Emphasizes the analysis and understanding of financial reports rather than the mechanics of their construction. Designed primarily, but not exclusively, for students in the public accounting programs.

Prerequisites: (ACGB 7105 or GBA Waiver Financial Acct with a score of 070) and (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

ACGB 7125. Financial Statement Analysis. (3 Credits)

Gives students in the general MBA program a better understanding of financial statements and the information they communicate on the operating, investing and financing activities of corporations. Focuses on the impact of financial accounting principles, disclosure standards and alternative accounting practices on financial reports. Examines and evaluates traditional and non-traditional methods of financial statement analysis.

Attribute: ASDM.

Prerequisites: (ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070) and (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

ACGB 7128. Advanced Financial Statement Analysis. (3 Credits)

Augments the concepts taught in ACGB 7125. Also introduces state-of-the-art tools based on modern financial theory for analyzing financial reports. Topics may include: off-balance-sheet financing; damage assessment and litigation regarding misrepresentation; new reporting standards; and international accounting standards and consolidation issues.

Attribute: ASDM.

Prerequisite: ACGB 7125.

ACGB 7130. Adv Ext Info & Rptg. (3 Credits)

Critically examines accounting principles and standards for corporate financial reporting with particular emphasis on mergers and other consolidations, asset sales and divestitures. Additional topics include fund accounting, foreign currency, partnerships and segment and interim reporting.

Prerequisites: (ACGB 7120 or GBA Waiver Ext FinInfoReprt with a score of 070).
ACGB 7136. International Accounting. (3 Credits)
Provides students with an understanding of accounting problems and issues encountered by multinational corporations (MNCs) operating in an international environment. Most businesses today, large and small, have customers or clients throughout the world. The course covers the general problems facing MNCs, which will prepare students to interpret financial statements of MNCs.
Attribute: ABIB.
Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7140. Valuation of Intangibles. (3 Credits)
Familiarizes students with the process of developing Generally Accepted Accounting Principles (GAAP). The course covers the Financial Accounting Standards Board (FASB) and its interaction with the Securities and Exchange Commission (SEC). A major portion of the course is devoted to an analysis of current financial reporting issues being addressed by the FASB and the impact that alternative solutions could have on reported financial results. The course also includes a discussion of various international accounting standard-setting bodies and their roles in financial reporting, domestically and abroad.
Prerequisites: ACGB 7120 or ACGB 7125 or GBA Waiver Ext FinInfoReprt with a score of 070.

ACGB 7155. Managerial Accounting Analysis. (3 Credits)
MBA FLEX CORE COURSE For students in the general MBA program, focuses on product and service cost determination and using cost analysis in management decision making, control and performance evaluation. Oriented toward the manager as a user and interpreter of accounting information. Teaching includes case analysis and problem-solving.
Attribute: ABEP.
Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7160. Internal Reporting & Control. (3 Credits)
The objective of this course is to provide students with an understanding of IT internal controls, including the IT audit function as it relates to Sarbanes Oxley. Emphasizes the identification of information technology control weaknesses as well as their impact on risk management.
Prerequisites: ACGB 7171 or GBA Waiver Audit Acct Sys1 with a score of 070.

ACGB 7171. Auditing of Accounting Systems I. (3 Credits)
Familiarizes students with the audit procedures required under Generally Accepted Auditing Standards (GAAS). Among the topics covered are audit planning, evaluating internal control, auditing transaction cycles and audit reports. Directed toward students in the general accounting programs who plan to take the Uniform Certified Public Accountant examination.
Prerequisites: ACGB 7105 (may be taken concurrently) or GBA Waiver Financial Acct with a score of 070.

ACGB 7176. Advanced Audit Concepts and Practices. (3 Credits)
This class focuses on audit-testing techniques and the current auditing environment. Audit-testing techniques include statistical sampling and analytical procedures. The class will also cover recent trends in audit litigation, IRS uses of statistical methods, and forensic techniques. Conducted as a seminar, students will work individually and in groups on case studies and a term paper. Oral and written presentations are required.
Prerequisites: GBA Waiver Audit Acct Sys1 with a score of 070 or ACGB 7171.

ACGB 7184. Individual and Business Entity Taxation. (3 Credits)
Explores the sources and ideas underlying tax laws and their development in relation to fiscal and social policy. Emphasizes the application of basic concepts in tax planning for individuals and businesses. Topics include gross income, exclusions, deductions, credits, property transactions, basis and the alternative minimum tax.
Attribute: ABEP.
Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 7185. Derivatives and Analytics for Accounting. (3 Credits)
This course is designed to provide a broad introduction to both the valuation of derivative securities and the accounting for derivative securities used for both speculative and hedging purposes. Specific accounting standards related to derivatives will be used to provide guidance on the accounting for these securities. Microsoft Excel is used extensively to both value and account for the derivative securities.
Attribute: ISEL.
Prerequisite: ACGB 6111.

ACGB 7186. Derivatives and Their Accounting. (3 Credits)
This course is designed to provide a broad introduction to both the valuation of derivative securities and the accounting for derivative securities used for both speculative and hedging purposes.

ACGB 7187. Valuation of Intangibles. (3 Credits)
This class focuses on the identification, economic characteristics, valuation, and accounting of intangible assets and intellectual property (IP). Valuation techniques include the analysis of transactions for comparable assets, discounted projected cash flows from use in operations or from royalty streams, and replication cost. Case studies are used to illustrate how intangible assets and IP are valued in practice and how merger and acquisition transactions can succeed or fail depending on whether intangible assets and IP are properly valued. The accounting analysis focuses on both the determination of cost and the periodic assessment for impairment.

ACGB 719B. Forensic Accounting. (3 Credits)
Forensic Accounting.
Prerequisites: ACGB 7105 or GBA Waiver Financial Acct with a score of 070.

ACGB 719C. Financial Accounting/Financial Statement Analysis. (3 Credits)
Study of financial accounting and financial statement analysis.

ACGB 719D. Accounting Information Systems. (3 Credits)
The purpose of this course is to introduce students to the subject of computer-based accounting information systems. The four critical objectives are a sound understanding in business processes, transaction cycles, internal controls and the systems components of each.
Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

ACGB 719E. Data-Based Operation Controls. (3 Credits)
The primary focus of the class will be on the use of data-driven analytics to help managers make key operating and strategic decisions. A secondary focus will be on the use of data-driven analytics for the purpose of internal control.
Prerequisite: ACGB 7155.
ACGB 719F. Accounting Controls. (3 Credits)
The primary focus of the class will be on the use of data-driven analytics to help managers make key operating and strategic decisions. A secondary focus will be on the use of data-driven analytics for the purpose of internal control.

Attribute: ASDM.

Prerequisite: ACGB 7155.

ACGB 719G. Audit Data Analytics. (3 Credits)
Introduces audit and accounting students to data analytics foundations, methods and tools. It reviews industry applications and trends. Students will do hands-on projects analyzing audit and other accounting data.

Attributes: ASDM, BUAN, ISEL.

ACGB 719H. IT Audit and Information Assurance. (3 Credits)
This course will present an overview of the various elements of IT Audit and Information Assurance. Basic IT audit and information assurance concepts will be discussed and analyzed. General IT and application controls will be covered along with how the controls underlie SOX Section 404 Legislation. The course will also examine business processes, technologies and controls relating to financial reporting. Key components of information systems, including operating system security, database controls, network safeguards, systems development and application maintenance will also be covered. Technology processes supported under COBIT 5 will be discussed along with risk assessment techniques. The challenges around information assurance, data governance and privacy will be explored in detail.

Attributes: ASDM, BUAN, ISEL.

ACGB 719J. Industry Analysis and Strategic Planning. (3 Credits)
Discusses techniques for analyzing the long-term attractiveness of different industries and develops a framework to understand the nature of competition and the relative competitive position of firms within industries. Emphasizes global factors that affect industry attractiveness and competitive positioning. In particular, highlights the impact of differences in and the competitive advantages of nations and trade, as well as the development of global standards for the long-term profit potential of industries. While this course emphasizes the industry level, it also includes competitive factors of firms within industries to introduce a framework for strategic planning at the firm level.

Attribute: ASDM.

ACGB 719L. Sustainability Research and Reporting. (3 Credits)
This course enables students to develop a deep understanding of industry standards and expanding regulations and guidance on sustainability by examining current company disclosures and evaluating to what level such disclosures reflect the company’s associated industry standard. Students will form their own views on how companies’ disclosures compare to the standards with respect to their relevance, fair representation, and usefulness in helping investors assess performance on material sustainability topics.

ACGB 719M. Financial Modeling for Accounting. (3 Credits)
Develops (using Excel) the type of financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Covers modeling of financial statements and models in many other important practical areas, such as time value of money, project evaluation, bonds, investment management and derivatives. Emphasizes using most powerful and useful tools in Excel, such as logical functions, PivotTables, Data Table, Scenario Manager, and Goal Seek to solve problems that closely resemble real-life situations.

ACGB 719N. Business Risks In A Global Digital Economy. (3 Credits)
Our global, digital world has created a complex landscape with unprecedented challenges and risks for business. This course analyzes the ever-changing challenges companies face in this new environment. Lectures will discuss government policies, strategies, and tactics driving enforcement activity and outline the most effective approaches for preventing, detecting, and responding to these risks. Students will gain an understanding of these challenges in both the private and public sectors in varying industries.

ACGB 719P. Professional Practice Research Seminar. (3 Credits)
Accounting research is applied research that focuses on the study of technologies and technical practices used by accounting practitioners in social and organizational settings. This course identifies specific issues of importance to public practitioners. Students will be provided with guidance and tools to research practical solutions and explore ways to communicate their findings with stakeholders. Students will collaborate with prominent members of the accounting profession, such as partners and/or directors from one of the major international accounting firms. The firms recognize that academic research is a requirement for accounting academic career progression, and an important contributor to the development of knowledge and scholarship for the profession and society. Under the supervision of a faculty member, students will have an opportunity to enhance their research skills, improve their communication skills, and expand their professional network through their interaction with prominent members of the profession.

ACGB 7811. Accounting Internship. (1 to 3 Credits)
This course is intended for students with an Accounting internship for this trimester that wish to receive academic credit for it. The course will begin with an orientation session and will be followed by additional meetings with students. The course instructor will provide additional details to enrolled students.

ACGB 819A. Valuation and Modeling for Accounting. (1.5 Credits)
This course expands on valuation techniques discussed in Modern Financial Analysis and Valuation Techniques. Students will have the opportunity to learn the modeling techniques used by today's Wall Street practitioners associated with Discounted Cash Flow Analysis, Merger Analysis, Purchase Price Allocations and Synergy DCFs.

Attribute: ASDM.

Prerequisite: ACGB 819B (may be taken concurrently).

ACGB 819B. Modern Financial Analysis. (1.5 Credits)
Learn how the financial services industry applies valuation techniques in a deal context! In this mini-course, you will demystify the theory behind the analytics and ultimately appreciate the "art" and "science" of valuation analytics. What is a company worth? What is someone willing to pay? The answers depend on: who the seller is; who the potential buyer(s) is; the context of the transaction and the current market conditions.
ACGB 8999. Independent Study. (3 Credits)

Taxation Courses

TXGB 7001. Corporate Taxation. (3 Credits)
Studies federal income tax laws that apply to the formation, operation, dissolution, and liquidation of corporations. Focuses on the tax impact of various financial transactions upon the corporation, as well as on the shareholders. Issues of distributions and redemptions, accumulated earnings tax, and personal holding companies are covered. Discusses related multiple corporations, earnings and profits, and book-to-tax adjustments. Also studies S corporations and other ways of mitigating double taxation. Includes a brief review of corporate acquisitions and reorganizations.
Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7010. Federal Research and Procedures. (3 Credits)
Concentrates, during the first part of the course, on the skills needed to research and answer tax questions. Then focuses on the procedures to resolve disagreements — both pre-and post-audit — with the Internal Revenue Service.
Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7015. Partnerships. (3 Credits)
Analyzes the uses, formation, operation and termination of partnerships. Topics include the “substantial-economic-effect doctrine,” distributions, sale and exchange of interest, partnership termination, liquidation and disproportionate distributions and limited partnerships and their use as tax shelters.
Prerequisite: TXGB 7001 (may be taken concurrently).

TXGB 7020. Tax Planning for Individuals. (3 Credits)
This course emphasizes the relationship of estate and gift taxes to the income tax. It explores the philosophy underlying federal policy toward the three taxes and the issue of transferring assets. It also introduces basic elements of estate planning, such as trusts, annuities, joint interests, and life insurance.
Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7025. Tax Planning for High Net Worth Individuals. (3 Credits)
Focuses on the practical aspects of taxing wealthy individuals. Reviews general income-tax planning for wealthy individuals; dealing with passive activities (tax shelters); the use and limitations of qualified plans; investment planning (debt versus equity, timeframe, asset allocation); life, disability and liability insurance exposures; retirement planning; and estate planning.
Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7030. Corporate Tax Planning Strategies. (3 Credits)
Offers an in-depth study of Subchapter C of the Internal Revenue Code: the complicated rules governing organization, reorganization and liquidation of corporations. Explores such topics as leveraged buyouts, corporate takeovers and personal holding companies. Provides the groundwork essential for corporate tax planning and the analysis of mergers and acquisitions.
Prerequisite: TXGB 7001.

TXGB 7035. Federal Taxation of Financial Instruments and Transactions. (3 Credits)
Fed Tax of Fin Instr & Trans.
Prerequisite: TXGB 7001 (may be taken concurrently).

TXGB 7041. Research Project. (3 Credits)
Offers an opportunity to research a topic in taxation agreed to by the professor and the student. The research is focused on both academic and legal references and may be integrated with current or anticipated tax practice. A written research paper and an oral presentation are required.
Prerequisites: TXGB 7001 and TXGB 7010.

TXGB 7045. International Tax and Accounting. (3 Credits)
Introduces the complexities of international taxation by focusing on the U.S. tax system's impact on U.S. companies investing or operating abroad, and on foreign companies investing or operating in the U.S. Topics include tax treaties, foreign tax credits, and controlled foreign operations. TXGB 7010 is recommended as a prior course.
Prerequisite: TXGB 7001.

TXGB 7048. Taxation Planning with Trusts. (3 Credits)
Trusts are used in all facets of income tax, gift tax, estate tax and financial planning. Some trusts are created primarily for tax-planning purposes, but others are more general. This course analyzes and evaluates many creative and current planning uses of the following trusts: irrevocable and revocable trusts, grantor trusts, testamentary trusts, trusts for minors, dynasty trusts, life insurance trusts and corporate trusts.
Prerequisite: TXGB 7020.

TXGB 7050. State and Local Taxes. (3 Credits)
Discusses the basic elements of state and local taxes, and surveys the distinctive tax characteristics of major business states, such as New York, New Jersey, Illinois and California.
Prerequisite: TXGB 7001.

TXGB 7056. Taxation of Executive Compensation. (3 Credits)
Covers the tax consequences as well as various strategies relating to the design and implementation of executive compensation programs including stock options, restricted stock, stock appreciation rights, phantom stock and golden parachutes; employee benefit plans, including health care, disability, life insurance, educational assistance, dependent care and cafeteria and flexible spending plans; and retirement plans, including qualified pension, profit-sharing and stock bonus plans, as well as non-qualified supplemental executive retirement plans (SERPS), top hat plans and excess benefit plans.
Prerequisites: ACGB 7184 or GBA Waiver IndvBus Entity Tax with a score of 070.

TXGB 7065. Current Problems in Tax. (3 Credits)
This course analyzes the major provisions of new federal tax legislation, case ruling and regulations. Examining their impact on individual taxpayers, business, investments, retirement plans, estates, trusts and practices and procedure. The course uses the current legislative changes to keep up with the constantly changing tax environment.
Prerequisite: TXGB 7001.

TXGB 7076. Tax Accounting. (3 Credits)
Prerequisite: TXGB 7001.
TXGB 7080. Taxation of U.S. and Foreign Expatriates. (3 Credits)
Analyzes how salaries, benefits and special allowances can be structured to minimize individual tax liability under U.S. tax law for citizens working abroad and foreigners working in the United States. Encompasses filing requirements, cost-of-living differentials, foreign business expenses, foreign tax-credit limitations and avoidance of double taxation.
Prerequisite: TXGB 7025.

TXGB 7081. IT and Data Analytics for Taxation. (3 Credits)
Focuses on the skills needed to research and authoritatively answer complex tax questions and on how technology impacts the tax research process. A general framework for tax research is introduced and the framework is applied to contemporary tax research technologies by analyzing i) the types of research questions and issues that these technologies enable, ii) how tax research workflow has evolved and will continue to evolve, iii) the changing role of human judgment in an environment populated with "tax expert systems," and iv) how expert tax systems can be made to be authoritative. A hands-on survey is also provided of the most important tax technologies in commercial use.

TXGB 7085. Foreign Taxation. (3 Credits)
Introduces the tax systems of major foreign countries from two standpoints taxation of U.S. companies investing or operating in foreign countries and taxation of foreign enterprises investing or operating in the U.S.. Extends concepts discussed in TXGB 7045.
Prerequisite: TXGB 7045.

TXGB 709C. Civil and Criminal Tax Enforcement. (3 Credits)
This course focuses on the federal tax crime statutes enumerated in the Internal Revenue Code and the impact on tax practitioners in their capacity as expert witnesses for the defense, as government witnesses against the client, and as the targets of a criminal investigation. The student will be introduced to the function of the Criminal Investigation Division of the Internal Revenue Service and its investigative techniques, as well as to the legal process via the role of the Justice Department. This course may be taken as an elective for students in the MS in Taxation, MTA, MS in Accounting as well an elective in the MBA Program.
Prerequisite: TXGB 7045.

TXGB 7184. Individual and Business Entity Taxation. (3 Credits)
Explores the sources and ideas underlying tax laws and their development in relation to fiscal and social policy. Emphasizes the application of basic concepts in tax planning for individuals and businesses. Topics include gross income, exclusions, deductions, credits, property transactions, basis, and the alternative minimum tax.
Attribute: ABEP
Prerequisites: ACGB 6111 or GBA Waiver Fundamentals Acct with a score of 070.

TXGB 719L. Sustainability Research and Reporting. (3 Credits)
This course enables students to develop a deep understanding of industry standards and expanding regulations and guidance by examining current company disclosures and evaluating to what level such disclosures reflect the company’s associated industry standard. Students will form their own views on how companies' disclosures compare to the standards with respect to their relevance, fair representation, and usefulness in helping investors assess performance on material sustainability topics.

TXGB 7811. Taxation - Internship. (1 to 3 Credits)
This course is intended for students with a Taxation internship for this trimester that wish to receive academic credit for it. The course will begin with an orientation session and will be followed by additional meetings with students. The course instructor will provide additional details to enrolled students.

TXGB 8999. Independent Study. (3 Credits)

Business Law and Ethics

The law and ethics area provides students with valuable courses that examine and analyze legal and ethical concepts that are critical to the business environment.

All students in the primary-model M.B.A. program are required to take BLGB 6310 Business Law I, which explores the requirements of a business contract and the rights and obligations of the parties to a contract. It also examines the functions of business organizations, such as partnerships, limited liability companies, and corporations. They are also required to take the one-year course BLGB 6321 Markets, Business, and Society that examines ethical issues in business.

Accounting students must also take BLGB 7320 Business Law II, which is a requirement for the CPA examination. Because the topics in the class center on sales contracts and negotiable instruments, this course may be useful to students in other programs as an elective.

Courses

The law and ethics area offers elective and special topics courses that may be of interest to students across the range of Fordham's business programs. They cover topics such as securities law, international business law, business ethics, international business ethics, employment law, sports law, white-collar crime, and business organizations.

Descriptions are below.

BLGB 6310. Business Law I. (3 Credits)
MBA FLEX CORE COURSE Introduces the fundamental concepts and legal principles that are applicable to the American legal system, its development and inherent ethical considerations. Discusses the basis and structure of business contracts; the creation and characteristics of agencies, partnerships, limited liability companies and corporations; and the rights and liabilities of agents, partners, directors and shareholders. Students analyze cases and discuss and solve problems.
BLGB 6321. Markets, Business, and Society. (3 Credits)
MBA CORE COURSE Markets, Business, and Society is about the responsibilities of businesspeople. It is based on the assumption that business, like law and medicine, is a profession whose practitioners carry out an important role in society. When individuals enter the profession, they take on a distinctive set of responsibilities that go with the role. The purpose of the course is to provide a realistic understanding of these responsibilities and a set of practical tools to help students carry them out. This is the only course at the MBA program focusing on the question: what is the right thing to do in business? Other courses explore the causes and consequences of wrongdoing and the institutions that regulate conduct in business. This course will also consider these empirical topics but only as background. Instead, the focus of Markets, Business, and Society is normative reasoning about gray area problems in business, which involve conflicts of values, clashing responsibilities, ambiguous standards, factual uncertainties, aggressive stakeholders, and intense time pressures, among others. The course will help students develop their decision-making principles and devise implementation plans that meet relevant economic, legal, and ethical responsibilities and fulfill the organization’s values and commitments. Deciding on a course of action will require careful analysis, thoughtful deliberation, and, in some instances, difficult trade-offs. By working through the choices and dilemmas presented in the course, students will hone their skills in decision making and action planning while also building their own decision-making frameworks.

BLGB 7320. Business Law II. (3 Credits)
Examines the legal aspects of business and focuses on personal property, sales, product liability, secured transactions, insurance, negotiable instruments, banking and bankruptcy. Students analyze applicable provisions of the Uniform Commercial Code and cases and problems on the above topics.
Attribute: ABEP.
Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 7325. Law of Trad & New Media. (3 Credits)
Analyzes the legal parameters and constraints on freedom of expression that govern traditional and new communications technologies. Probes the various constitutional, statutory and regulatory protections accorded the Internet and more traditional media, such as print, broadcast and cable, as well as governmental attempts to regulate certain aspects of these technologies. Topics include modern First Amendment interpretation, defamation, privacy, commercial speech, indecency/obscenity, contracts, intellectual property and e-commerce. Also offered as CMGB 7556.
Attribute: ABEB.

BLGB 739C. International Business Ethics. (3 Credits)
In this course we analyze global business activities from a moral perspective. Also, we will examine debates about what it means for a multinational firm to compete successfully in the world marketplace with moral integrity, and what obligations it has to respect transnational laws, codes of conduct and ethical guidelines.
Attributes: ABGS, ABIB.
Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 739F. Contemporary Iss Intl Bus Law. (3 Credits)
A study of the contemporary issues of international business law.
Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 739M. Blockchain, Virtual Currencies, and Tokens: An Examination of Business and Legal Issues. (3 Credits)
The course is designed to provide students with an understanding of the current developments in the dynamic blockchain industry. We will explore new protocols, crypto currencies, and the development of new classes of digital assets including securities tokens, real estate and art tokenization. The students will learn how to analyze the business projects and associated legal issues relating to the blockchain industry. In order to understand where this fast paced industry is today as well as it's prospects for the future, the course will explore the development of blockchain as a vehicle for innovation, the legal issues surrounding blockchain projects, exchanges, and the business cases for both public and private blockchains through the examination of concrete cases. The course will debate topics including: the tension between innovation and regulation; the feasibility of decentralization; building networks based on trust. Guests speakers from top blockchain venture studios, governmental regulatory agencies and legal experts will join the classes to broaden the discussion of new projects and explore the opportunities and challenges facing the industry.
Attributes: ABBC, ABFO, LAWB.

BLGB 739N. Risk & Rspon in Organizations. (3 Credits)
Ethics and compliance has emerged as a key discipline in preventative law, gathering increasing attention and corporate resources. With this growth, and as corporations face unprecedented lack of trust and scrutiny of their conduct, the role of the compliance officer has expanded. Compliance officers are increasingly grappling with questions of ethics that extend beyond legal risk, organizational culture, and voluntary CSR and human rights standards. It is often held that compliance officers are most likely to be successful when they are closest to the operations and decisions of core business lines. However, compliance teams are often forced to rely on second hand assessments of risk, reward and reason, and lack visibility of the myriad facts, circumstances and dilemmas faced by corporate managers and employees on the ground. This course will introduce key dimensions of organizational risk and responsibility – (sometimes called non-technical or non-financial risk). It will cover a range of established and emerging compliance issues, including corruption, political risk, human rights, CSR, leadership, culture and behavior. The course will include academic and business readings as well as interactive case studies, where students will apply practical solutions to real risk and corporate integrity challenges faced by multinational organizations in a variety of sectors, and explore the consequences for the compliance function.

BLGB 7400. TMBA: International Business Law and Ethics. (3 Credits)
TMBA:Intnt'l Bus Law & Ethics.

BLGB 839A. Contemporary Ethical Issues in Business. (1.5 Credits)
This course explains various ethical schools of thought and their application to business.
Prerequisites: BLGB 6310 or GBA Waiver Business Law I with a score of 070.

BLGB 8999. Independent Study. (3 Credits)

Communication and Media Management

The communication and media management faculty includes leading scholars and industry professionals who bring cutting-edge research and experiences to the classroom. Their courses are useful to students pursuing degrees outside this area as well, providing a thorough
grounding in all facets of organizational communication that can benefit professionals in all business fields.

Area faculty also run Fordham's Center for Communications, which brings prominent communications and media figures to campus for special lectures and symposia.

Programs
The communications and media management area oversees programs designed for students pursuing careers in the communication, media, information, and entertainment industries:

- M.B.A. Concentration in Communications and Media Management (p. 668)
- M.S. in Media Management (p. 684)
- Online M.S. in Strategic Marketing Communications (p. 687) (Interdisciplinary)

Courses
CMGB 6550. Advanced Business Communication. (3 Credits)
Communicating effectively is essential to successful management, yet many managers lack an understanding of their own communication skills. This course instructs students on what effective management communication means for teams and leadership styles, including communicating change, managing stakeholders, empowering others, and presenting compelling ideas. Students learn how to provide constructive feedback and how to examine their own communication style, applying theories and concepts via practical means in course activities and assignments.

Attribute: MOE.

Mutually Exclusive: CMGB 7550.

CMGB 7500. Media Systems and Markets. (3 Credits)
Introduces students to all of the key elements that constitute contemporary media systems and to the key stakeholders in—and evolving dynamics of—contemporary media markets. Includes comparative analyses of international media systems and the economic, technological and regulatory parameters under which they operate. Also provides historical, economic and technological perspectives on the evolution of media systems and markets. PREVIOUSLY TITLED: MEDIA & COMMUNICATION INDUSTRIES.

Attribute: ABEB.

CMGB 7525. Cross Cultural Negotiation and Communication. (3 Credits)
Explores how cultural differences and international settings affect business communication and negotiation—key skills for managers who seek to get solutions accepted and implemented. The dimension of culture is used to increase the student-managers' self-awareness and reflection and to build flexibility in their conceptual understandings and skills. Emphasizes specific strategies, styles, and techniques that help the negotiator/communicator.

Attributes: ABGS, ABIB, BLEB.

CMGB 7530. Innovation in Media Business Models. (3 Credits)
This course examines the factors that have contributed to the emergence, institutionalization, and decline of traditional media business models, as well as to exploring, assessing, and critiquing the wide range of new and innovative business models that are emerging in the contemporary media environment. Students will draw upon these analyses to develop new business models or innovative variants of existing business models for discussion and critique.

Attribute: ABEP.

CMGB 7531. Comm Corp Image Responsibility. (3 Credits)
Demonstrates the value of pragmatic public relations activities through basic principles, case studies and guest speakers. Examines how inept communications and resulting public perceptions can create or deepen corporate crises. Stresses criteria for selecting outside counsel, establishing relationships with the media and communicating with employees and stockholders. Also offered as MKGB 7782.

Attributes: ABGS, MEMG.

CMGB 7534. Leadership with PR. (3 Credits)
Examines the use of public relations strategies to replace or augment more traditional communications efforts. Agency publicists and company representatives discuss this trend. Case studies illustrate how techniques such as video press releases, expert spokespeople and inventive news pegs are used as part of an overall communications plan.

Attribute: MEMG.

CMGB 7537. Crisis Communication and Leadership Strategies. (3 Credits)
Every organization faces crises. Yet, how crisis is handled is critical to helping its brand move forward. Students learn theoretical conceptualizations, public relations and crisis management skills to handle real world crises. Students assess how public-relations fits into the strategic management and decision-making of an organization during a crisis situation. Possible remedies for crisis are examined by applying best strategies for specific situations, using both traditional and new media, while also focusing on strategies and approaches for crisis prevention.

Attributes: ABI,B, MEMG, MOE.

CMGB 7540. Intensive Sector Analysis: Music Business. (3 Credits)
This course has a rotating focus each semester that it is offered, but in each instance will involve an intensive focus on a single industry sector. Specific sectors that will be the subject of semester-long intensive analysis include the Television Industry, the Music Industry, and the Motion Picture Industry. Students will apply the analytical skills and conceptual understandings developed in other courses in the curriculum to achieving a detailed understanding of the challenges and opportunities facing an individual media sector. Students will also gain a detailed understanding of the history, evolution, economics, and key stakeholder dynamics of these individual industry sectors.

Attribute: MEMG.

CMGB 7541. Applied Project. (3 Credits)
This course will operate as a real-world company working on an engagement for an actual client. Team members will be assigned management responsibility as well as individual deliverables. This applied project is an opportunity for students to get real-world business experience in designing, developing, and delivering an analytical assignment.

CMGB 7550. Leadership Communication. (3 Credits)
MBA FLEX CORE COURSE A leader's success hinges on the ability to communicate effectively with diverse stakeholders in divergent settings. This applied course introduces students to academic theories that describe, explain, and predict effective and ineffective leadership communication behaviors. Throughout the semester students solicit candid and constructive feedback about their leadership communication strengths and improvement opportunities. Then, they apply practical strategies, validated by academic research, to improve their communication effectiveness as leaders. Previously titled Management Communication.

Mutually Exclusive: CMGB 6550, MMGB 6650.
CMGB 7554. Consumer Adopt of New Med. (3 Credits)
Examines new communications technologies using guest speakers, videotapes and case studies. Surveys cable, video, satellite transmission, digital television, Internet media and other new and emerging forms of information transmission, with particular emphasis on their interaction and impact on society and business. PREVIOUSLY TITLED: NEW MEDIA AND MASS COMMUNICATIONS.

Attribute: ABEB.

CMGB 7556. Law of Trad & New Media. (3 Credits)
Analyzes the legal parameters and constraints on communication that govern traditional and new communications technologies, focusing on the Internet. Probes the various constitutional, statutory and regulatory protections accorded the Internet and more traditional media, such as print, broadcast and cable, as well as governmental attempts to regulate certain aspects of them. Topics include modern First Amendment interpretation, defamation, privacy, commercial speech, indecency/obscenity, contracts, intellectual property and e-commerce. Also offered as BLGB 7323.

Attributes: ABEB, MEMG.

CMGB 7561. New Media Product Dev Prac I. (3 Credits)
Intended to help students understand the practical application and integration of compelling content and the various formats of modern media in business application. The course includes most forms of video, audio, and social media. Students will develop a media strategy, delivery plan, and create actual media to solve communications challenges for real companies.

Attribute: MEMG.

CMGB 759B. Sports Media& Promotional Comm. (3 Credits)
Sports Media and Promotional Communication examines the mass media industry in relation to the sports field. The sports industry is unique in its economic structure and its consumers – the sports fans. The course focuses on the ‘off-the-field’ industries of television, digital communication, advertising, sponsorship, marketing, and public relations that greatly impact all sports. The course looks at various sports as well as various forms of media and various promotional communication strategies. Students will get an understanding of the industry today, as well as learn about the history of the sports media and the pivotal people who helped shape the field.

CMGB 759L. Comm for Entrepreneurs. (3 Credits)
This advanced course, granted an “Entrepreneurship and Venture Initiation” (ENT) designation, will help you launch your venture. Specifically, this class with help you: (1) Pitch your ideas with clarity and confidence. (2) Sell your ideas to critical stakeholders. (3) Brand yourself and establish your credibility in less than 60 seconds. (4) Spin your ideas so they “stick” in a crowded marketplace. (5) Gain valuable feedback about your ideas, brand, and expertise.

Attribute: ABEP.

CMGB 759O. International Comm & Neg. (3 Credits)
Addresses three broad topics: 1. Culture and Behavior: How culture, and cultural differences, affect human behavior in general and communication in particular. 2. Culture and business communication needed adaptations in correspondence, presentations, and meeting behavior to accommodate cultural differences. 3. Culture and Negotiation. How culture becomes a factor in business negotiations, how it changes ‘the game’.

CMGB 759R. Social Media. (3 Credits)
Study and application of social media communication and strategy, including social media platforms and user devices, message distribution, and personal and professional online, social environments. The course examines relationships between the technical affordances of technology and the social norms, and how to understand emerging technologies (and social media that doesn’t exist yet!). Students will also gain practical social media skills: understanding the landscape, learning “best practices,” and using different social media technologies throughout the class to create and propagate content.

Attributes: ABEP, MEMG.

CMGB 759Z. Gaining Global Bus Pers:Galway. (3 Credits)
This course provides students the opportunity to travel to Galway, Ireland and participate in a week-long study program that will focus on global business from an Irish perspective. The objectives of the course include: Understand the business environment in Ireland; Understand the role of multinational versus start-up organizations within Ireland; Identify benefits to investing in Ireland; Practice key communication skills for global business. The course will include academic sessions and industry site visits. Participants of the course will include Executive MBA students, MBA students, eligible MS students, and executive education participants. Please click here for more information. Please contact Francis Peti, Associate Dean at peti@fordham.edu for additional information on registration, logistics and cost. Professor Dr. Meghann L. Drury, Ph.D., M.A., H.Dip.B.S. Assistant Professor, Communication and Media Management.

Attribute: ABIB.

CMGB 75AA. Media Exec Playbook. (3 Credits)
This course will take an in-depth look at the Strategies, Plans, and Programs developed and implemented by Media Industry Executives to help their businesses survive and thrive in an increasingly changing and competitive media industry environment. The course will include case studies, topic-specific projects, and reviews of current industry trends, issues, and opportunities. Media industry executives and subject matter experts will be asked to guest lecture certain classes to provide a practical perspective about how to address and solve industry challenges. The class will look at the business’ audience and marketplace dynamics, content offerings, media distribution and delivery platforms, branding, marketing, business models, and Operations. We will also review how a business’ Mission, Vision, Strategic Plan, Goals, Strategies, Priority Initiatives, Operating Plans, Financials, etc., create a successful business. The course includes lectures, discussion and guest speakers along with current articles and other readings, video materials, and digital sources. Whenever possible, the course draws on Fordham’s unique setting in New York City, the media capital of the world.

CMGB 75AB. The Power of Open Knowledge. (3 Credits)
This is a hybrid course and include active participation in MOOC (Massive Open Online Learning Course). The goal of this course is to prepare business students to the foundations of open knowledge creation, use, dissemination, and evaluation, to collaborate with professionals from other cultures and disciplines, and to work effectively in rapidly changing knowledge environments. It has been designed to help students develop a high level of self-determination in their own learning, which is a critical skill for future professional success.
CMGB 75AC. Organizational Comm & Theater. (3 Credits)
In this course students critically analyze theatrical works about business and leadership issues using through the lens of organizational communication theories. Throughout the semester students analyze a range of theatrical works and performances through readings, guest lectures, and attendance at theatrical events outside of class. Upon completion of the course students will have developed a unique perspective on how theatrical works bring organizational communication concepts and theories to life.

CMGB 75AD. The Storytelling Project. (3 Credits)
In this course students apply narrative theories from multiple disciplines - communication, psychology, literature, neuroscience, and theater - to critically analyze the anatomy of effective and persuasive stories. Investigating historical folklore and contemporary narrative paradigms from the 21st century, students analyze why some stories and forms are more persuasive, inspiring, and mythic than others. Through practice and developmental coaching, students enhance their own repertoire of persuasive storytelling abilities and discover their own authentic and rhetorical voices.

CMGB 75AE. Graduate Study Tour Poland. (3 Credits)
Media and technology industries in Poland and Central Europe Study Tour Course for Graduate Business students Krakow, Poland.

CMGB 75AF. Business and Entertainment. (3 Credits)
This course will give students the opportunity to analyze different entertainment artifacts (television programs, movies, theatrical productions, and written publications) using a curated body of academic organizational communication theories.

CMGB 75AG. Intensive Sector Analysis: TV. (3 Credits)
Television has been one of the cornerstones of media for over 75 years and has become a medium through which we understand and study our culture. From the Moon Landing to “Who Shot JR”, to the White Ford Bronco chase, to the 2016 presidential election, television has helped to shape our industrial paradigms, social trends, and culture, and has served as a mirror to society. This class will study the sociocultural issues and effects associated with television by looking at it from various angles - including social, economic, political, and entertainment perspectives - and by reviewing the past, present, and future of television.

CMGB 75AH. Professional Communication. (3 Credits)
This course will prepare you for communicating in the workplace with multiple levels in an organization. We will examine group communication, decision making in organizations, professional presentations, and strategic communication, including issues and solutions for each. This course is appropriate for multiple levels in an organization, and you do not need a background in communication. It will help you better communicate at work whether you are a seasoned communicator or a novice wanting to improve.

CMGB 75AJ. Financial Media. (3 Credits)
Financial Media examines the complex interactions between business, politics, and the press. The course is designed to help students achieve a better understanding of how business content is delivered and retrieved in the current media environment. The course focuses on the dynamics of reporting about companies and business industry leaders who are using the media to deliver critical messages to several stakeholder groups, including investors and consumers. The course provides numerous examples of business or political leader interactions with the media and debates their communication strategy as well as their outcomes.

CMGB 75AK. Persuasive Corporate Communications. (3 Credits)
Business professionals have long known that the ability to influence is a critical business skill. Developing long-term relationships with clients and developing an effective corporate culture is highly valued. Students will critically examine contemporary scholarship from the academic and applied field detailing effective and ineffective practices for persuading stakeholders at various levels. Students will examine how different communication channels can impact the degree to which an audience is persuaded. The course will focus on internal and external organizational communication.

Attribute: MOE.

CMGB 75AL. Investor Relations. (3 Credits)
A corporate Investor Relations program formulates and communicates the financial performance and strategic direction of diversified corporations to the global investment community. Investor Relations professionals are well versed in accounting, compliance, finance, governance, marketing and communications. They collaborate with senior management and the Board of Directors to convey and interpret corporate matters to the public. This course will teach students the skills and competencies required to become a corporate Investor Relations professional. The course utilizes a course textbook, case studies, investor relations guest speakers and participation in investor relations events.

CMGB 75AM. Sponsorship. (3 Credits)
Total global sponsorship spending is now an estimated $60 billion annually with most major companies employing sponsorship as a way to achieve a variety of brand goals. This course focuses on the unique advantages of sponsorship as a form of marketing communication. Students will understand how and why sponsors choose certain properties, how properties prospect, recruit, and retain sponsors, the unique opportunities for brand exposure and brand recall, the brand image opportunities created through a brand association, and the importance of product category exclusivity. Special attention will be placed on sponsorship activation and the development of a flexible, customizable sponsorship to fulfill specific brand goals. The course will also focus on evaluation and measurement in determining the effectiveness of the sponsorship.

CMGB 75AN. Digital Media Sales Technologies and Strategies. (3 Credits)
This course will provide a thorough understanding of the technologies underpinning digital media sales and advertising technology (Adtech) and the strategies by which publishers maximize monetization. Students will learn about the full life cycle of digital advertising and all the different technologies and ad impression funnels. The course will cover the different types of ad capabilities and monetization strategies that are available on all existing types of digital content, such as websites, apps, social platforms, and OTT. Students will be challenged to synthesize all aspects of ad tech and provide a critical analysis toward potential monetization strategies and the upcoming industry predictions.

CMGB 7811. Media Management Internship. (1 to 3 Credits)
CMGB 8999. Independent Study. (3 Credits)

Finance and Business Economics

The goal of the finance M.B.A. curriculum is to provide students with the conceptual foundation and technical skills necessary to make sound financial decisions in a changing domestic and international business environment. In particular, the program aims to develop a thorough understanding of global financial markets and instruments, business valuation and shareholder value creation, implementation of financial strategy through various forms of corporate restructuring, risk management in a global context, and the nature of risk and reward in
formulating long-term investment strategies. The curriculum emphasizes interaction with practitioners in a number of innovative course offerings.

M.B.A. students with special quantitative skills may consider specializing in the advanced applied corporate finance track. Students who qualify and are selected will take a special set of courses, chosen in consultation with their academic advisor. The finance and business economics area also offers M.B.A. students the option of a full concentration in finance and elective courses in business economics. Students are encouraged to work with their advisor and faculty members to plan their program relatively early in the course of their studies.

The M.S.G.F. degree is offered in two formats: residential, which is housed entirely at Fordham, and collaborative, which is delivered in cooperation with select University partners. For more information, visit the M.S.G.F. program page.

The M.S.Q.F. degree prepares students to meet the global financial service industry’s need for graduates who have both a deep knowledge of finance and a command of the latest quantitative techniques for financial problem-solving. For more information, visit the M.S.Q.F. program page.

Programs
As the Gabelli School’s largest academic area, finance and business economics offers several graduate paths:

- M.B.A. Concentration in Finance (p. 670)
- M.S. in Global Finance (p. 679)
- M.S. in Quantitative Finance (p. 686)
- M.B.A. Secondary Concentration in Corporate Compliance (p. 668)
- M.B.A. Concentration in FinTech (p. 670) (Interdisciplinary)
- Advanced Certificate in Financial Computing (p. 660) (Interdisciplinary)
- M.B.A. Secondary Concentration in Blockchain (p. 668) (Interdisciplinary)

Courses
Below are the courses currently offered by the finance and business economics area.

Business Economics Courses

BEGB 6220. Econ Analysis & Bus Decisions. (3 Credits)
MBA CORE COURSE Presents economic theories to examine business pricing, production, marketing, and profits within different market structures and environments. Topics include: consumer choice and demand; the behavior of firms; market power and structure; the efficiency of competitive markets; externalities and social costs; information and behavior under uncertainty. The course also discusses social costs and benefits of business actions and related ethical and regulatory issues. (Formerly Managerial Economics)
Attribute: BUAN.

BEGB 7240. Money Credit Interest Rates. (3 Credits)
Studies the role of money, credit and interest rates in the efficient and ethical functioning of domestic and global financial markets. This building-block course assumes a background in macroeconomics and finance, and it establishes a foundation for further study in all areas of finance. Topics include: flow of funds and interdependency within the financial system; the Federal Reserve System and its role in money creation; interest rates; the links between interest rates and the growth of money; and the effects of inflation and term structure. Prerequisites: BEGB 6220 and FNGB 6411. Also offered as FNGB 7441.
Attribute: ABEP.
Prerequisites: (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

BEGB 7243. Contemp Issues Global Fin. (3 Credits)
Explores current issues relevant to the global financial system, including international commercial and investment banking and international investments. Emphasizes the underlying conditions and fundamental trends in various sectors of international finance. Also offered as FNGB 7458.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

BEGB 7244. Global Finance. (3 Credits)
The first half of the course focuses on the theories and practices of world trade, including comparative advantage, the changing trade competitiveness of nations, and protectionism. The second half focus shifts to developing countries: including foreign investment and technology, and investment and trade opportunities, policies and regulations. For SATURDAY / HYBRID sections of this course, there will normally be 4 class meetings, and the balance on-line / contact the professor for further detail. Prerequisite: BEGB 6220.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

BEGB 7251. Intl Trade & Development. (1.5 or 3 Credits)
The first half of the course focuses on the theories and practices of world trade. Topics include comparative advantage, the changing trade competitiveness of nations and protectionism. During the second half, the focus shifts to developing countries: the process of economic development, including the contribution of foreign investment and technology as well as investment and trade opportunities, policies and regulations.
Attributes: ABGS, ABIB.
Prerequisites: BEGB 6220 or GBA Waiver Managerial Eco with a score of 070.

BEGB 7300. TMBA: Global Managerial Eco. (3 Credits)
TMBA: Global Managerial Eco.
Finance Courses

FNGB 6411. Intro Financial Sys & Methods. (3 Credits)
FT MBA CORE/ PMBA FLEX CORE COURSE. Introduces the financial system and basic methods of valuation. Students will learn how to interpret financial data reported in the press and will discuss topical subjects facing the financial industry and the economy. Course topics include: financial markets, instruments, and institutions; time value of money, net present value, and applications; valuation of stocks and bonds; elements of firm and enterprise value; risk and return. (Formerly Financial Environment)
Prerequisites: (ACGB 6111 (may be taken concurrently) or GBA Waiver Fundamentals Acct with a score of 070) and (BEGB 6220 (may be taken concurrently) or GBA Waiver Managerial Eco with a score of 070).
Mutually Exclusive: MMGB 6411.

FNGB 7415. Credit Management. (3 Credits)
This course focuses on the analytic approach (stemming from Basel II capital accords) and will help students make wise credit decisions and manage lending portfolios. Topics include the latest lending techniques based on cash flow, advanced forecasting methods (including simulation and stochastic optimization), pricing, portfolio management, default probability, valuation analysis risk rating and credit derivatives.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7421. Prins of Modern Finance. (3 Credits)
Provides a conceptual framework that allows both corporate finance and portfolio investment decisions to be viewed and understood in a unified context of risk and return. Examines concepts of valuation, risk and return, diversification, asset pricing and efficient markets.
Prerequisites: (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

FNGB 7422. Corporate Finance. (3 Credits)
Studies corporate finance and its specific decisions. Topics include evaluating capital expenditure proposals, forecasting financing requirements and selecting sources of financing. The course also discusses working capital management, dividend policy and contingency planning, and addresses the additional challenges of multinational firms. Students taking FNGB 7422 Corporate Finance will not receive credit for FNGB 7400 Business Finance.
Prerequisite: FNGB 7421.

FNGB 7423. Mergers, Acquisitions, and LBOs. (3 Credits)
Focuses on identifying and evaluating target companies and structuring deals. Also considers the economic and social impact of such changes in corporate ownership. Students analyze recent cases, evaluate strategic rationale, examine deal structuring and assess financial impact.
Prerequisite: FNGB 7421.

FNGB 7431. Options and Futures Markets. (3 Credits)
Examines the institutional aspects of options and futures markets and discusses the strategies of hedgers, arbitrageurs and speculators. Provides an introductory analytical foundation for pricing futures and option contracts.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7433. Fixed Income Analysis. (3 Credits)
Introduces techniques for valuing fixed income securities and their derivatives. Emphasizes pricing and risk-measurement for government, corporate and mortgage-backed instruments. Analyzes embedded options using the binomial model. Develops fixed-income trading and portfolio management techniques, including the use of repo, futures, options, swaps and credit derivatives. Examines theory and empirical evidence on the term structure of interest rates, including the derivation of spot and implied forward yield curves.
Prerequisite: FNGB 7421.

FNGB 7441. Money Credit Interest Rates. (3 Credits)
Studies the role of money, credit and interest rates in the efficient and ethical functioning of domestic and global financial markets. This building-block course assumes a background in macroeconomics and finance, and it establishes a foundation for further study in all areas of finance. Topics include: flow of funds and interdependency within the financial system; the Federal Reserve System and its role in money creation; interest rates; the links between interest rates and the growth of money; and the effects of inflation and term structure. Prerequisites: BEGB 6220 and FNGB 6411. Also offered as BEGB 7240.
Prerequisites: (FNGB 6411 or GBA Waiver Fin Environment with a score of 070).

FNGB 7455. Global Finance. (3 Credits)
The first half of the course focuses on the theories and practices of world trade, including comparative advantage, the changing trade competitiveness of nations, and protectionism. The second half focuses on developing countries: including foreign investment and technology, and investment and trade opportunities, policies and regulations. For SATURDAY / HYBRID sections of this course, there will normally be 4 class meetings, and the balance on-line / contact the professor for further detail. Prerequisite: BEGB 6220.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7458. Contemp Issues Globl Fin. (3 Credits)
Explores current issues relevant to the global financial system, including international commercial and investment banking and international investments. Emphasizes the underlying conditions and fundamental trends in various sectors of international finance. Also offered as BEGB 7243.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 7460. Portfolio Management. (3 Credits)
Examines portfolio objectives and links them to appropriate investment strategies. Considers the asset-allocation decision, equity and fixed-income portfolio management, return enhancement/risk control techniques and performance evaluation. Commercial-level portfolio optimization software is applied to a range of institutional portfolio problems.
Prerequisite: FNGB 7421.

FNGB 7470. Real Estate Finance. (3 Credits)
Discusses the major factors affecting the valuation and financial structuring of real estate, including general tax and depreciation policies. Presents the roles of principal lending institutions, mortgage banks and investment banks in real estate lending, syndications and partnerships. Also surveys real estate-related securities and their markets.
Attribute: ABEP.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.
FNGB 7475. Marketing of Financial Service. (3 Credits)
Provides a scientific understanding of tactics and strategies associated with the marketing of financial services. Emphasizes the role of industry deregulation, intensified competition, and the emergence of new technologies and products on the evolving marketing practices used by financial services institutions. Explore consumers’ unique decision-making styles in financial matters, the effects of technology deployment, and the fiduciary constraints that guide marketing activities in the markets for commercial banking services, mutual funds, investment banking services, insurance and other forms of financial services.
Prerequisites: MKGB 6710 or GBA Waiver Marketing Mgmt with a score of 070.

FNGB 749A. Financial Modeling. (3 Credits)
This course helps students develop the type of excel –based financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Students deliver written and oral presentations of their models and practice critical skills for a successful career in finance.
Attribute: ASDM.
Prerequisite: FNGB 7421.

FNGB 749C. Technical Analysis. (3 Credits)
We will examine the changes in the asset class over time – from the formation of American Research & Development in 1946 to the formation of some of the angel-type funds of the present. We also will examine the geographical differences between venture funds – West Coast and East Coast. We also will look at specialization – the beginnings of IT-focused investing and the move into healthcare and finally into energy. Finally we will examine the phenomenon of global venture capital. How does that vary from the way venture capital is practiced in the US. The class will be taught in modules and we also will rely on practitioners and experts to visit with the class. Where possible, the students will be asked to visit venture capital fund presentations, expert briefings as well as personal briefings.
Attribute: ABEP.
Prerequisite: FNGB 7421.

FNGB 749E. Venture Capital Financing. (3 Credits)
This course is designed to inform students about how the markets and individual stocks behave (i.e., technical analysis), and how they differ from the economy and individual companies (i.e., fundamental analysis).
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749F. Equity Analysis. (3 Credits)
This course will feature a series of guest lecturers who are highly regarded experts in their respective areas. The course will cover wealth management, private equity, equity analysis in general and analysis within specific industry sectors such as retail, media, insurance, etc. We are looking for highly motivated students who will ask lots of questions and who will engage the guest lecturers in meaningful dialog during the discussion periods.
Prerequisite: FNGB 7421.

FNGB 749J. Sustainability and Finance. (3 Credits)
In this course we explore how the evolving needs of society are changing the way financial theories, tools, and techniques are conceived and applied. GLOBAL SUSTAINABILITY COURSE.
Attributes: ABEP, ABGS.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749M. Hedge Fund. (3 Credits)
This course will provide an overview of hedge funds and the hedge fund industry including structure, regulation, major strategies, operations and risk management, due diligence, performance and the role of hedge funds in asset allocation and the global financial system.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749R. Student Managed Invest Fund. (3 Credits)
The Fordham Graduate School of Business Student Managed Fund consists of 2 consecutive semester-long courses. The courses are designed to simulate the experience a student can obtain as an intern in the asset management industry. We focus in this first course on the examination and evaluation of individual securities investment on a stand-alone and comparable basis. Students will be trained on construction of a disciplined investment process using "Value Investing" strategy as the core foundation based on research work accentuated by Benjamin Graham and David Dodd. Students are expected to develop relationships with the Wall Street "sell-side analyst(s)" covering his or her stocks as well as the Investor Relationship (IR) person(s) of the targeted stocks. A team of industry experts, fundamental analysts, portfolio managers, risk managers and other investment professionals will work closely with students to ensure that the students are exposed to various tools and methods that are currently being employed in the industry.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749U. Global Financial Markets. (3 Credits)
This course provides a comprehensive overview to the workings of the global financial markets, the functions and goals of the key financial institutions, and the role played by central banks and regulatory agencies. It will cover international money markets, international equity markets, the foreign exchange market, forward markets for commodities and financial instruments, bond markets and derivative markets.
Prerequisites: BEGB 6220 and FNGB 7421.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 749X. CFA Competition and Workshop. (0 Credits)
While this course is for 0-credit, it has a heavy work load and provides valuable practical experience. Students will be arranged into teams. Each team will write a full sell-side coverage report, build out a presentation, and pitch it to Fordham Wall Street Alumni.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AD. Student Mgt Investment Fund II. (3 Credits)
In the second class, in the spring semester, students will learn the practice of asset allocation with focus on advantages and pitfalls of asset allocation theory. Coverage includes practiced methodologies in assessing and measuring risk, including applications of the BARRA risk models, strategies for entry and exit, and portfolio revision. A lot of care will be taken to expose the students to real-life aspects of portfolio management. This includes arranging lectures from portfolio managers, with different philosophies on portfolio selection and risk management.
Prerequisite: FNGB 749R or Corequisite: FNGB 7460.
Prerequisite: FNGB 6411.
FNGB 74AG. Finance in the Healthcare Ind. (3 Credits)
This course will present a historical development of the American healthcare system and will address the current challenges faced by both health insurers and providers, specific to managed care, reimbursement methods, and contracting. Students will learn to apply the standard tools of financial analysis and financial management in the complex and evolving setting in which the global healthcare system is currently situated. Students will also learn how to analyze the key financial indicators specific to hospitals and their direct application towards managed care contracting initiatives, debt restructuring and bond rating status. Finally, the course will address the future of health insurance and managed care.
Attribute: ABHM.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AH. Global Corp Governance. (3 Credits)
Examines how modern publicly traded corporations are governed in the global markets. It discusses the roles of the board of directors, corporate management, institutional investors, and other shareholders, and also discusses the effects of the recent legislation and financial market developments on corporate governance. Provides international comparisons of corporate governance structures and issues arising in contests for corporate control.
Attribute: ABIB.
Prerequisite: FNGB 7421.

FNGB 74AI. Global Equity Portfolio Management. (3 Credits)
Provides a comprehensive overview of equity portfolio management in theory and practice. Examines portfolio objectives and links them to appropriate investment strategies. It covers pricing of equities, the asset-allocation decision, return enhancement/risk control techniques, performance evaluation and recent changes in international fund management. Analyzes international investment strategy and the relative merits of various approaches.
Attribute: ABIB.
Prerequisite: FNGB 7421.

FNGB 74AJ. Global Risk Management. (3 Credits)
Covers market risk and volatility, calculation of VaR (value at Risk), Monte Carlo Simulation, credit risk and use of credit derivatives, operational risk, counterparty risk and other topics. Discusses risk regulations, including Basel II, recent developments in Basel III, and recent regulations on the banking industry in the U.S.
Attribute: ABIB.
Attribute: ABIB.
Prerequisite: FNGB 7421.

FNGB 74AK. Raising Capital and Investing in Global Financial Markets. (3 Credits)
Provides a comprehensive overview of the going-public decision. Examines the strategies and process of corporate restructuring and investing activities, such as mergers and acquisitions, corporate diversification, spin-offs, carve outs, asset sell-offs, tracking stock, exchange offers, and debt restructuring.
Attribute: ABIB.
Prerequisite: FNGB 7421.

FNGB 74AL. Adv Corporate Finance. (3 Credits)
This course teaches the art of applying corporate finance theory and essential tools and techniques to strategic decision-making in critical real-life situations faced by organizations. The course enhances the students' understanding of corporate finance by providing a comprehensive examination of selected advanced topics, such as alternative valuation methods, real options in corporate finance, decision trees, international operations, mergers and acquisitions, risk arbitrage, debt capacity and leveraged buyouts, private equity, warrants and convertibles, and ethical issues. The learning experience is based on lectures and a series of business cases involving individual and group work, classroom discussions, and written assignments, as well as readings and problem-solving. The case studies are drawn from a variety of industries and countries, including emerging markets, and involve complex real challenges. The course is designed for students who are already familiar with valuation, cost of capital, capital structure theory and option pricing theory and who want to learn more advanced skills and techniques required for making important executive-level decisions. Note: Students should be proficient with computer spreadsheets and financial calculators.
Prerequisite: FNGB 7422.

FNGB 74AM. Emerging Markets. (1.5 or 3 Credits)
This course explores how the major “emerging market” (EM) states have evolved from “traditional” societies with “underdeveloped” economies into modern societies with more developed economies ever since the Berlin Wall came down. Because these EM states reformed and opened up their economies, they benefited from their vast human and commodities resources and rapidly increased their per capital income.
Attribute: ABIB.
Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74AN. Investment Banking. (3 Credits)
This course is intended to give students a practical introduction to investment banking and its role in helping corporations raise capital from the global capital markets. Topics include: venture capital, public offerings, private placements, going public, stock and bond financing, convertibles and other hybrid instruments, design of innovative securities, swaps and other derivative instruments, mergers and acquisitions and leveraged buyouts.
Attribute: ABEP.
Prerequisite: FNGB 7421.

FNGB 74AO. Alternative Investments. (3 Credits)
The course is an introduction to the rapidly evolving universe of alternative investments. Delivered in modules, the course covers a broad array of alternative strategy classes (Quantitative/Systematic, Fundamental Long/Short, Global Macro, Private Equity) ranging across all major asset classes (Equities, Fixed Income, Currencies, Commodities, Derivatives). The first half of the course constructs a broad framework for the evaluation of alternative strategies, focusing on the quantitative strategy class as a diverse and relatively easier-to-evaluate source of investment ideas for discourse and case study. The second half progresses through the remainder of the alternative strategy classes under the evaluation framework, ties together the role of alternatives within an asset allocation framework, studies subjective decision making in the context of alternatives and concludes with student presentations of their favorite investment thesis from the course. Throughout, there will also be discussion of career development both within and without the alternative investment space.
Prerequisite: FNGB 7421.
FNBG 74AP. Real Estate Capital Markets. (3 Credits)
This Real Estate Capital Markets course will cover both the primary and secondary debt and equity markets linked to real estate assets. While the underlying real estate assets in the primary markets will be covered, a greater portion of the class will be devoted to the secondary debt and equity markets, mainly dealing with mortgages, mortgage backed securities, and Real Estate Investment Trusts (REITs). A distinguishing aspect of this course is the focus on the intersection of the primary and secondary real estate capital markets, investor perspectives, and the impact of macroeconomic factors. Additionally, this course will include a robust mix of quantitative and qualitative factors in order to provide a holistic, less technical perspective on the real estate capital markets, and the real estate industry at large.
Prerequisites: FNBG 6411 or GBA Waiver Fin Environment with a score of 070.

FNBG 74AQ. Adv Global Portfolio Mgt. (3 Credits)
The course will review (1) basics of modeling of securities' returns and volatility in the context of portfolio management / "buy-side"; (2) theoretical basis and empirical evidence of risk-return trade off and investor preferences; (3) main approaches to portfolio construction and challenges with their practical application; (4) performance evaluation, and other relevant portfolio management topics.

FNBG 74AR. ST: Corporate Restructuring. (3 Credits)
The course discusses the strategies, valuation, and processes of corporate restructuring decisions such as mergers and acquisitions, corporate diversification, spin-offs, carve-outs, asset sell-offs, tracking stock, exchange offers, and/or debt restructuring. It also discusses various securities issuances, including initial public offerings.
Prerequisite: FNBG 6411.

FNBG 74AS. Financial Modeling. (3 Credits)
Develops (using Excel) the type of financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Covers modeling of financial statements and models in many other important practical areas, such as time value of money, project evaluation, bonds, investment management and derivatives. Emphasizes on using most powerful and useful tools in Excel, such as logical functions, PivotTables, Data Table, Scenario Manager, Goal Seek to solve problems that closely resemble real-life situations.
Prerequisites: FNBG 6411 or GBA Waiver Fin Environment with a score of 070.

FNBG 74AT. Fintech Compliance- Asia to Us. (3 Credits)
An overview of the components of an effective global Corporate Compliance Program. Examination of the Part C Risk Assessment and the Seven Steps of a corporate compliance and ethics program. Review of compliance program design and best practices, including the roles of the corporate compliance office and in-house counsel, risk assessments, Foreign Corrupt Practices Act, global codes of conduct, corporate governance, monitoring and re-evaluation.
Attribute: ABFF.
Prerequisites: FNBG 6411 or GBA Waiver Fin Environment with a score of 070.

FNBG 74AU. Algorithm Trading. (3 Credits)
Electronic algorithms are being used by major institutions, investment banks, and hedge funds to trade stocks, bonds, currencies, and a plethora of financial derivatives. Algorithms are being used for all aspects of trading - from asset allocation and stock selection, to execution and implementation, and for risk management and regulatory and compliance reporting. In this course, students will learn the necessary skill sets, and underlying math, statistics, and programming skills to build, develop, manage, and implement profitable algorithms across all asset classes.
Attribute: ABFF.
Prerequisite: FNBG 7421.

FNBG 74AV. Seminar in Value Investing. (3 Credits)
This survey course is designed to introduce the fundamentals of the Graham and Dodd value approach to investment analysis. The course will be segmented into two parts: the basic structure of the analytical approach to value investing and its relationship to many of the elements of the MBA curriculum will be described through lectures, exercises, readings, in-class discussions and homework assignments; the last sessions of the course will be devoted to student presentations of their investment recommendations. Parts of the course will entail empirical data analysis.
Prerequisite: FNBG 7421.

FNBG 74AW. Applied Capital Markets and Financial Regulations. (3 Credits)
This course will explore how the market structure has fundamentally changed after the 2008 liquidity and credit crisis, and how this crisis has affected liquidity, balance sheets, risk taking, and returns across the entire financial services industry. The new reality is that regulation has changed the landscape of Wall Street and the dynamic of how the sell-side and buy-side will interact in the foreseeable future.
Prerequisites: FNBG 6411 or GBA Waiver Fin Environment with a score of 070.

FNBG 74AX. International Fin Mgt. (3 Credits)
The goal of this course is to explain the concepts of corporate finance and their applications in an international setting. We will examine opportunities and problems that are faced specifically by multinational and foreign corporations and will compare corporate finance practices around the world. Topics covered in the course include foreign exchange rate mechanics, international parity theories, forecasting and hedging, international cost of capital, capital budgeting, capital structure, and valuation of foreign investments.
Prerequisite: FNBG 7421 (may be taken concurrently).

FNBG 74AY. Global Financial Markets. (3 Credits)
This course is intended as an introduction to Global Financial Markets. We will discuss the instruments traded in the markets, the institutions that support and frame the markets, the trading mechanisms and the regulatory structure. The course is intended to be descriptive and conceptual. The aim is to familiarize you with the breadth and scope of equity, debt, and derivative markets. We shall discuss the recent developments in the US and the development of financial markets globally.
Prerequisite: FNBG 7421 (may be taken concurrently).

FNBG 74AZ. Innov in Business & Energy. (3 Credits)
This course aims to frame and critique opportunities for business to create innovations in energy systems. It discusses how contemporary energy systems have evolved and how energy infrastructures vary across regions of the world. It also examines how business decision makers can think about choices of energy and energy systems by encouraging students to think broadly in terms of innovation possibilities.
Attribute: ABGS.
FNGB 74BA. Communicating Finance Theory. (0 Credits)
This lecture series will provide a summary of many financial topics. The class will also train students to communicate knowledge of this material to professionals at financial institutions.

FNGB 74BB. Applied Investment Principles. (3 Credits)
This course provides applications that follow Principles of Finance or Global Investment Principles. EXCEL models will be applied to CAPM modeling of Risk and Return, to Factor Models, and to Portfolio Attribution. Data may be drawn from Boomerang, Yahoo Finance, and other sources.

Prerequisite: FNGB 7421.

FNGB 74BC. Research in Value Invest. (3 Credits)
Prof. Johnson, a leading expert in the field of Value Investing, will lead a small, project based seminar that focuses on best practices in the field.

Selective enrollment by approval of the instructor.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74BD. Impact Investing. (3 Credits)
This course will discuss investment strategies that have a societal orientation from both financial and socially responsible perspectives. The key questions are: how can we allocate money in a manner that is beneficial to all stakeholders and viable in a business sense, and, what are the appropriate metrics to evaluate such investments. Impact investments to be analyzed include government and ESG (environmental, social, governance) policies, micro finance, philanthropy, and green energy.

Attribute: ABGS.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.

FNGB 74BE. Lectures in Applied Port Mgt. (3 Credits)
This advanced Portfolio Management course quickly reviews Modern Portfolio Theory (MPT) conceptual underpinnings and builds on MPT 1.0. It dives into contemporary liability driven asset allocation, MPT 2.0 and portfolio management industry practices, issues and concerns. Lectures, problem solving, and self-study along with extensive hands-on tools using Microsoft Excel based models will be used to provide a practitioner’s perspective. We will review and demo contemporary asset allocation optimization and forecasting techniques, new asset class pricing and valuation, performance and risk attribution, tail risk measurement and management tools etc. using real time vendor based (third party) solutions. As prerequisites - the student should have class exposure to investment and portfolio analysis, Excel, stats, and basic regressions.

Prerequisite: FNGB 7421.

FNGB 74BF. Financial Innova & Institu. (3 Credits)
This course will introduce major financial institutions, such as commercial and investment banks, insurance companies, mutual funds, hedge funds, and credit rating agencies with a focus on their risk contributions to the modern financial system. We will examine their credit risk in depth, and how to model and analyze credit risk and products. We will also understand new financial sector regulations and systemic risk by focusing on Dodd-Frank, market based stress-testing. Comprehensive Capital Analysis and Reviews (CCAR), and other methods. This course will help prepare students for the job market at financial institutions and regulators.

FNGB 74BG. Auto Trading Systems - Intro. (3 Credits)
This course discusses key issues involved in the design of an Auto (Algorithmic) Trading Systems, and provides hands-on experience. The end product is a prototype Auto Trading System designed by students that successfully trades in the real market (stock, futures, option) using live data feeds from exchanges. Issues covered include: typical structures of trading systems; efficient processing of live information; minimizing trade slippages; handling large number of securities; asynchronous information processing; GUI interfaces; etc. Industry experts are invited to discuss new developments. Key programming techniques will be reviewed at the beginning, very briefly. The course is suitable for students in MSGF, MSQF, and other master level students with programming skills equivalent to one formal course (e.g., R, Matlab, VBA, etc.). Students with less programming skill may take the course if approved by instructor.

Attributes: ABFF, BUAN.

FNGB 74BH. Investing in European Union. (3 Credits)
The EU is the largest market for US exports and foreign direct investment. The objective of the course is to familiarize students with the process of regional integration and monetary unification in Europe and the opportunities and challenges which this has created for foreign investors. Regulatory differences between the US and EU in competition laws and financial sector will related to the investment climate for foreign companies. The course will highlight that despite the deep economic and financial integration in the EU, significant country- and regional differences exist. This will be assessed through the analysis of several Harvard Business case studies covering different country- and industry experiences.

FNGB 74BJ. Financial Media. (3 Credits)
Financial Media examines the complex interactions between business, politics, and the press. The course is designed to help students achieve a better understanding of how business content is delivered and retrieved in the current media environment. The course focuses on the dynamics of reporting about companies and business industry leaders who are using the media to deliver critical messages to several stakeholder groups, including investors and consumers. The course provides numerous examples of business or political leader interactions with the media and debates their communication strategy as well as their outcomes.

FNGB 74BK. FinTech - An Introduction. (3 Credits)
FinTech is a new and emerging field of technology that is disrupting the way that many companies are conducting business. FinTech has already “forever” changed many sectors including mobile payments, social media, money transfers, loans, fundraising, travel, trading and asset management. It has completely revolutionized the way companies are developing products, conducting research, establishing directed sales and marketing plans, and utilizing start-up technology. Business are using FinTech to expand their products and services at a fraction of its previous cost. Entrepreneurs are utilizing FinTech as a central foundation for research, funding, and product development. Customers are already utilizing FinTech as part of their daily lives - mobile apps, social media, banking, online shopping, entertainment and gaming. This course will introduce students to the breadth of FinTech, and touch upon the technical underpinnings.

Attribute: ABEP.

Prerequisites: FNGB 6411 or GBA Waiver Fin Environment with a score of 070.
FNGB 748L. Stress Tests and Cap Adequacy. (3 Credits)
The financial crisis of 2007-08 taught us all a lesson: that preparedness is everything. How resilient and prepared will we be, and how fast will we be able to recover? This is the key focus of this course: how to plan for moments of distress so that firms such as yours have capital of a sufficient quality to survive potential storms. We will demonstrate how to create a robust capital plan and test it for moments of hypothetical stress. We will investigate exactly how a bank holding company and an insurance company should conduct their capital plan, highlighting the significant differences between the two industries. By the end of the course, you will be able to create a capital plan for your business on your own.

FNGB 748M. Empirical Value Investing. (3 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed.

FNGB 748N. Investor Relations. (3 Credits)
Investor Relations program formulates and communicates the financial performance and strategic direction of diversified corporations to the global investment community. Investor Relations professionals are well versed in accounting, compliance, finance, governance, marketing and communications. They collaborate with senior management and the Board of Directors to convey and interpret corporate matters to the public. This course will teach students the skills and competencies required to become a corporate Investor Relations professional. The course utilizes a course textbook, case studies, investor relations guest speakers and participation in investor relations events.

FNGB 748P. Wharton-Impact Investment Workshop. (3 Credits)
Students will attend workshops on ESG (Environmental, Social, and Corporate Governance) and Impact Investing. They will compete in teams of three to five against other nationwide schools to construct a 100% Impact Portfolio. Since this is a two-semester competition, only students who participated in Fall may register in Spring.

FNGB 748Q. Contemp Develop in Corp Fin. (3 Credits)
This course will cover a number of important topics of current interest to the corporate finance industry, such as: executive compensation and governance; utilizing and responding to fintech; importance of the growth of intangible assets; importance of large corporate cash holdings invested in risky assets, such as hedge funds and private equity.
Prerequisite: FNGB 7422.

FNGB 748R. Behavioral Finance. (3 Credits)
Over the past several decades, the field of finance has developed a successful paradigm based on the notions that investors and managers are generally rational and that the prices of securities are generally efficient. In recent years, however, anecdotal evidence as well as theoretical and empirical research has shown this paradigm to be insufficient to describe various features of actual financial markets. In this course we will use psychology and more realistic settings to guide and develop alternative theories of financial markets. We will examine how the insights of behavioral finance complement the traditional paradigm and shed light on investors' trading patterns, the behavior of asset prices, corporate finance, and various financial market practices through lectures, case studies, and our own discussions.
Prerequisite: FNGB 7421.

FNGB 748S. Student Managed Investment Fund: ESG-Impact. (3 Credits)
In this joint graduate and undergraduate course, students will apply their investment and portfolio skills in the analysis and selection of a real set of securities and opportunities. Selection will focus on ESG investments and/or those that stress societal impact.

FNGB 748T. Fintech Lending & Payments. (3 Credits)
This course will consider modern on-line methods of lending and borrowing that may be outside of the traditional banking environment. The main players in the space will be analyzed, as well as their websites. Students will learn their business models, methods of credit analysis, and measures of return to investors.
Attribute: ABFF.

FNGB 748U. Global Financial Markets and the Macro-Economy. (3 Credits)
The overarching goal of this course is to give students an understanding of the forces affecting real income growth, inflation, and asset prices in the world economy. The specific topics the course will address include: the operation of monetary and fiscal policy; how those policies affect financial markets and the broader economy; the determinants of countries' long-term rates of growth; the factors behind the recent financial crises in the US and EU; the features of currency crises, business cycles, and financial crises historically; and the relationships linking global interest rates, exchange rates, and inflation rates. The course will combine economic theory and empirical evidence to provide a toolbox of skills that students can use to analyze these and similar issues going forward.

FNGB 748V. Practical Exploration of M&A. (1.5 Credits)
This class will provide an introduction to the essential elements of large-cap merger and acquisition (M&A) transactions from the perspective of real, recent examples taught by a senior investment banker.
Prerequisite: FNGB 6411.

FNGB 748W. Corporate Valuation. (1.5 to 3 Credits)
The objective of the course is to learn firm, debt, and equity valuation methods from both a conceptual and practical framework. It combines both accounting and finance into practical valuation frameworks. Adequate accounting and finance backgrounds are required. Working knowledge of Microsoft Excel is important.
Prerequisite: FNGB 6411.

FNGB 7811. Finance Internship. (1 to 3 Credits)
FNGB 8009. M&A and Leverage Acquisition. (1.5 Credits)
The course covers corporate debt solutions and provides an overview of credit risk principles. It will focus on corporate acquisitions and LBOs, and analyze different sources of funding, from senior to subordinated. Students will hear from many guest speakers, learn main capital structure issues, and be exposed to the current market environment.

FNGB 8405. Iss. Fin: Delevgd Fin. (1.5 Credits)
This course discusses the use of debt in Leveraged Buyouts, recapitalization, restructuring and refinancing, including Debtor-in-Possession (DIP) financing. Students develop practical insights by utilizing case studies from several public highly leveraged firms; practical insights are critically reviewed.
Prerequisite: FNGB 7421.

FNGB 8408. Acquisition & Leverage Fin. (1.5 Credits)
The course covers corporate debt solutions and provides an overview of credit risk principles. It will focus on corporate acquisitions and LBOs, and analyze different sources of funding, from senior to subordinated. Students will hear from many guest speakers, learn main capital structure issues, and be exposed to the current market environment.
Prerequisite: FNGB 7422.
FNGB 8414. Modern Financial Analysis. (1.5 Credits)
Learn how the financial services industry applies valuation techniques in a deal context! In this mini-course, you will demystify the theory behind the analytics and ultimately appreciate the "art" and "science" of valuation analytics. What is a company worth? What is someone willing to pay? The answers depend on: who the seller is; who the potential buyer(s) is; the context of the transaction and the current market conditions.

Attribute: ABEP.
Prerequisite: FNGB 7421 (may be taken concurrently).

FNGB 8415. Fin'lmks: Cncepts/Methods/Trd. (1.5 Credits)
This course provides a real-life, hands-on experience of financial market activity and its impact on the broader economy. Throughout the course, students will participate in a trading game (which is explained in more details below) to assess and manage real world factors such as counterparty risk, liquidity, leverage, etc. They will also learn the impact of various policy issues on the markets and thus the economy (ex: impact of limiting foreclosures), some of the mathematics behind the markets, and the broad spillover effects of various investor / issuer decisions. Class sessions will be divided into two parts, lectures and trading. No prior market experience is required, but students are expected to have a passion to learn about financial market activity and stay aware of current market and political conditions. Trading Game: Students participate in 5 sessions of the trading game. Essentially, this game operates in a closed economy with various market participants (sell side, buy side, central bank, etc.) that trade a wide variety of assets, including stocks, bonds, loans, indices, commodities, CDs, currencies, and options, and do so in the context of the current, real world market environment (ex: record Treasury issuance). Each class will have an active trading session, and all market participants are expected to keep and update their trade books to track their P and L.

Prerequisite: FNGB 7421.

FNGB 849C. Fin'lmks: Cncepts/Methods/Trd. (1.5 Credits)
This course provides a real-life, hands-on experience of financial market activity and its impact on the broader economy. Throughout the course, students will participate in a trading game to assess and manage real world factors such as counterparty risk, liquidity, leverage, etc.

FNGB 849G. Mergers and Acquisitions. (1.5 Credits)
Mergers and acquisitions constitute some of the most important growth, diversification, and globalization strategies for firms. Finance, specifically corporate finance, plays an important role in M&A because the completion of a deal requires careful attention to valuation, risk management, and the designing of an appropriate payment package. That design is an important part of a deal for reasons ranging from accounting and tax to synergies and stock price. In this course, students will examine these features through a number of cases and readings. We will also briefly discuss issues of corporate governance, securities law, and corporate law whenever the context requires us to do so.

Prerequisite: FNGB 849J.

FNGB 849H. Advanced Finan Modeling. (1.5 Credits)
FNGB 849I. Blockchain. (1.5 Credits)
The course will explore the role currency plays in the economy, the emerging technologies pioneering new forms of digital money, and the impact these technologies will have on currency, the economy and the broader category of capital.

Attributes: ABBC, ABEP, ABFF.
Prerequisite: FNGB 849J (may be taken concurrently).

FNGB 849J. Digital Currencies. (1.5 Credits)
Digital Currencies-New Revolution. The course will leverage what was taught in Digital Currency to explore specific examples of new technologies being used to develop new forms of currency and digital money, and redefine the broader category of capital. The course will use real products/service to explore these topics.

Attributes: ABBC, ABEP, ABFF.

FNGB 849K. Valuation and Modeling for Accounting. (1.5 Credits)
This course expands on valuation techniques discussed in Modern Financial Analysis and Valuation Techniques. Students will have the opportunity to learn the modeling techniques used by today's Wall Street practitioners associated with Discounted Cash Flow Analysis, Merger Analysis, Purchase Price Allocations and Synergy DCFs.

Prerequisite: FNGB 8414 (may be taken concurrently).

FNGB 849L. Empirical Value Investing - A. (1.5 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The 'A-section' will examine several topics / methods. It is a pre-req for the 'B-section,' which will investigate the same issues more fully.

Prerequisite: FNGB 7421.

FNGB 849M. Empirical Value Investing - B. (1.5 Credits)
This course examines historical data to consider empirical aspects of Value Investing. Excel or other programming will be important to the course. Theoretical and institutional issues will also be discussed. The 'A-section' is a pre-req for the 'B-section,' which will investigate the same issues more fully.

Prerequisite: FNGB 849L (may be taken concurrently).

FNGB 849N. Disruption in Finan Services. (1.5 Credits)
Graduate students will learn directly from industry experts how new technologies, changing demographics and investor preferences are significantly impacting the delivery of wealth management, creation of investment products and capital market mechanisms. From the global adoption of crypto currencies to the trillion dollar tsunami of money flowing into passively managed ETFs, students will be exposed to the current and future implications of these 'disruptions' and gain helpful insight and intelligence impacting their careers. We will focus on one "disruption" per week with subject matter experts explaining the economic and cultural implications for both winners and losers. This course will be valuable to all students navigating future employment opportunities in financial services.

Attributes: ABEP, ABFF.

FNGB 8999. Independent Study. (3 Credits)

Global Finance Courses

GFGB 6000. CFA Prep. (0 Credits)
Student prep for the CFA exam; second year students and alumni along with faculty help students study and prepare for the CFA exam.

GFGB 6002. Basics of Finance. (1 to 3 Credits)
This course is an introduction to the financial system and the basic techniques in valuation of financial and physical assets. The course is primarily meant for someone who has not had a formal introduction to financial markets, institutions, and instruments. The course will cover the topics of Financial Statement Analysis, Time Value of Money, Valuation of Stocks and Bonds, Capital Budgeting, Cost of Capital, and the Efficient Market Hypothesis.
GFGB 6003. Managerial Economics. (1 to 3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Examines microeconomic theory and concepts that strive to explain economic decisions of businesses in the marketplace. The dominant issues addressed are the factors of supply and demand and the relationship of production costs, output and market structures to pricing. Designed to provide the economic foundation for management decisions.

GFGB 6005. Financial Modeling. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Develops (using Excel) the type of financial models that businesses use every day to analyze a wide range of financial problems and make decisions. Covers modeling of financial statements and models in many other important practical areas, such as time value of money, project evaluation, bonds, investment management and derivatives. Emphasizes on using most powerful and useful tools in Excel, such as logical functions, PivotTables, Data Table, Scenario Manager, Goal Seek to solve problems that closely resemble real-life situations.

Attribute: BUAN.

GFGB 6006. International Financial Management. (3 Credits)
This course will explain the concepts of corporate finance and their applications in an international setting. We will examine opportunities and problems that are faced specifically by multinational and foreign corporations and will compare corporate finance practices around the world. Topics covered in the course include foreign exchange rate mechanics, international parity theories, forecasting and hedging, international cost of capital, capital budgeting, capital structure, and valuation of foreign investments.

GFGB 6007. Global Investment Principles. (3 Credits)
The objective of this course is to introduce the student to investment principles in the U.S. and in the global capital market. We will understand existing assets and investment vehicles, the functioning of capital market, the theoretical principles that underline asset pricing, and its applications in the valuations of fixed income and equity securities.

GFGB 6008. Financial Econometrics. (3 Credits)
This course covers estimation of parametric and non-parametric techniques commonly used in finance, applying high-frequency financial databases. We will discuss properties of financial data; linear time-series data analysis; and the basic theory of statistical inference with linear models, general linear models, conditional Heteroskedasticity models, nonlinear models, and Bayesian inference and estimation.

GFGB 6010. Global Financial Markets. (3 Credits)
This course is intended as an introduction to Global Financial Markets. We will discuss the instruments traded in the markets, the institutions that support and frame the markets, the trading mechanisms and the regulatory structure. The course is intended to be descriptive and conceptual. The aim is to familiarize you with the breadth and scope of equity, debt, and derivative markets. We shall discuss the recent developments in the US and the development of financial markets globally.

GFGB 6011. Basics of Accounting. (1 to 3 Credits)
This course provides a basic understanding of the preparation and analysis of corporate financial statements; introduces generally accepted accounting principles (GAAP) and the standard-setting process; and discusses current issues in the reporting process, such as the benefits and problems of the Sarbanes-Oxley Act.

GFGB 6020. Updated: 07-27-2020

GFGB 6012. Basics of Statistics. (1 Credit)
This course introduces the basic statistical concepts essential for business research and decision-making. These include descriptive statistics, probability distributions, statistical inference, and simple and multiple regressions.

GFGB 6013. Communicating Finance Theory. (0 Credits)
This lecture series will provide a summary of many financial topics. The class will also train students to communicate knowledge of this material to professionals at financial institutions.

GFGB 6014. MSGF—Industry Applications. (0 Credits)
This course is required for all new students in the Master of Science in Global Finance (MSGF) program. The program director will lead lectures and bring in many industry professionals to expose MSGF students to a range of financial applications and opportunities. Grading will be Pass/Fail.

GFGB 6015. MSGF Roundtable. (0 Credits)
This course is required for all new students in the Master of Science in Global Finance program. The program director will lead small group seminars of 15 to 20 students. Topics will be focused on student interests and needs. Each student will select two sessions to attend during the term, one in the first half and in the second half. Grading will be Pass/Fail.

GFGB 6016. Introduction to Financial Data and Analytics. (3 Credits)
This course introduces students to the different financial data sources used in practice and in research. Students will learn how to access and download data from Bloomberg, financial data websites, and research databases. Students will also be introduced to data manipulation tools and basic statistical tools in Python and will engage in short projects that use the data and implement the tools developed in class. The focus is to provide a knowledge of financial data, Python data-frame techniques, and data visualization and inferences using Python.

GFGB 7000. Residency. (0 Credits)
Residency is a multi-day experience in New York City, which is required for online students.

GFGB 7001. Global Financial Markets. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Provides a comprehensive overview of global financial markets, the functions and goals of key financial institutions and the role played by central banks and regulatory agencies. Covers international money markets, international equity markets, the foreign exchange market, forward markets for commodities and financial instruments, bond markets and derivative markets.

Prerequisites: GFGB 6001 and GFGB 6003.

GFGB 7002. Contemp Issues Global Finance. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Explores current issues relevant to the global financial system, including international commercial and investment banking and international investments. It emphasizes the underlying conditions and fundamental trends in various sectors of international finance.

Attributes: GFCF, GFCR, GFIM.

Prerequisites: GFGB 6001 and GFGB 6005.
GFGB 7004. Global Equity Portfolio Mgt. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Provides a comprehensive overview of equity portfolio management in theory and practice. Examines portfolio objectives and links them to appropriate investment strategies. It covers pricing of equities, the asset-allocation decision, return enhancement/risk control techniques, performance evaluation and recent changes in international fund management. Analyzes international investment strategy and the relative merits of various approaches.
Attribute: GFIM.

GFGB 7005. Global Corp Governance. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Examines how modern publicly traded corporations are governed in the global markets. It discusses the roles of the board of directors, corporate management, institutional investors, and other shareholders, and also discusses the effects of the recent legislation and financial market developments on corporate governance. Provides international comparisons of corporate governance structures and issues arising in contests for corporate control. Prerequisites: GFGB 6001 PRINCIPLES OF MODERN FINANCE, GFGB 6005-FINANCIAL MODELING.
Attributes: GFCF, GFCR.
Prerequisites: GFGB 6000 and GFGB 6005.

GFGB 7006. Global Risk Management. (3 Credits)
AVAILABLE ONLY TO STUDENTS IN THE MSGF PROGRAM. Covers market risk and volatility, calculation of VaR (value at Risk), Monte Carlo Simulation, credit risk and use of credit derivatives, operational risk, counterparty risk and other topics. Discusses risk regulations, including Basel II, recent developments in Basel III, and recent regulations on the banking industry in the U.S.
Attributes: GFCF, GFCR, GFIM.
Prerequisites: GFGB 6001 and GFGB 6005.

GFGB 7007. Raising Capital and Investing in Global Financial Markets. (3 Credits)
Raising Capital & Inv in Glob.
Attribute: GFCF.
Prerequisites: GFGB 6001 and GFGB 6004.

GFGB 7009. Money Credit Interest Rates. (3 Credits)
Studies the role of money, credit and interest rates in the efficient and ethical functioning of domestic and global financial markets. This building-block course assumes a background in macroeconomics and finance, and it establishes a foundation for further study in all areas of finance. Topics include: flow of funds and interdependency within the financial system; the Federal Reserve System and its role in money creation; interest rates; the links between interest rates and the growth of money; and the effects of inflation and term structure.
Attribute: GFCF.

GFGB 7010. Investment Banking. (3 Credits)
This course is intended to give students a practical introduction to investment banking and its role in helping corporations raise capital from the global capital markets. Topics include: venture capital, public offerings, private placements, going public, stock and bond financing, convertible loans and other hybrid instruments, design of innovative securities, swaps and other derivative instruments, mergers and acquisitions and leveraged buyouts.
Attribute: GFCF.

GFGB 7011. Hedge Fund. (3 Credits)
The course provides in-depth analysis of hedge fund strategies including absolute-return; controlled risk arbitrage; equity market neutral, long short, and statistical arbitrage; derivatives including options and credit derivatives; fixed income, currency and global macro arbitrage; distressed debt and emerging markets. It examines the role of various participants including regulators, banks, brokerage firms, market makers and investors, both private and institutional.
Attribute: GFIM.

GFGB 7013. Fixed Income Securities. (3 Credits)
Introduces fixed-income securities, basic fixed-income concepts, the different sectors of the fixed-income market and basic bond mathematics. Studies quantitative fixed-income analysis and its use in valuing bonds and quantifying risk-return characteristics. Involves extensive training in the mathematical formulation of bond valuation problems and in the use of the existing models and software to solve these problems.
Attribute: GFIM.

GFGB 7014. Futures and Options. (3 Credits)
Examines the institutional aspects of options and futures markets and discusses the strategies of hedgers, arbitrageurs and speculators. Provides an introductory analytical foundation for pricing futures and option contracts.
Attribute: GFIM.

GFGB 7015. Credit Management. (3 Credits)
This course focuses on the analytic approach (stemming from Basel II capital accord) and will help students make wise credit decisions and manage lending portfolios. Topics include the latest lending techniques based on cash flow, advanced forecasting methods (including simulation and stochastic optimization), pricing, portfolio management, default probability, valuation analysis risk rating and credit derivatives.

GFGB 7016. Real Estate Capital Markets. (3 Credits)
This Real Estate Capital Markets course will cover both the primary and secondary debt and equity markets linked to real estate assets. While the underlying real estate assets in the primary markets will be covered, a greater portion of the class will be devoted to the secondary debt and equity markets, mainly dealing with mortgages, mortgage backed securities, and Real Estate Investment Trusts (REITs). A distinguishing aspect of this course is the focus on the intersection of the primary and secondary real estate capital markets, investor perspectives, and the impact of macroeconomic factors. Additionally, this course will include a robust mix of quantitative and qualitative factors in order to provide a holistic, less technical perspective on the real estate capital markets, and the real estate industry at large.

GFGB 7017. Real Estate Finance. (3 Credits)
Discusses the major factors affecting the valuation and financial structuring of real estate, including general tax and depreciation policies. Presents the roles of principal lending institutions, mortgage banks and investment banks in real estate lending, syndications and partnerships. Also surveys real estate-related securities and their markets.

GFGB 7018. Adv Global Portfolio Mgt. (3 Credits)
The course will review (1) basics of modeling of securities’ returns and volatility in the context of portfolio management / "buy-side"; (2) theoretical basis and empirical evidence of risk-return tradeoff and investor preferences; (3) main approaches to portfolio construction and challenges with their practical application; (4) performance evaluation, and other relevant portfolio management topics.
GFGB 7019. Equity Analysis. (3 Credits)
This course explores techniques and skills required to evaluate the attractiveness of investment opportunities. Experts in the field will be invited to join the class and lead discussions on issues facing analysts, how analysis is used by money managers in making investment decisions, wealth management, and private equity analysis. The course is a combination of guest lectures, case studies and team projects. Students will be expected to analyze an industry as well as engage in a discussion with guest speakers and class participants.

GFGB 7020. Value Investing Student Mgt Fund. (3 Credits)
This course aims to familiarize the student with the principles and techniques of value investing, the investment philosophy pioneered by Graham and Dodd during their years at Columbia Business School. This will be done through a combination of formal lectures, in-class valuation discussions (see below) and three presentations by leading investors.

GFGB 7021. Emerging Markets. (3 Credits)
This course will focus on government policies, their motivation, transmission and limitations. Students will learn how a country's investment possibilities and potential GDP is driven by its labor force and productivity. In turn, the level of productivity can be affected by a confluence of monetary, fiscal, currency and regulatory policies developing at the "emerging growth" phase when political goals and legal structures are still in transition, financial and government institutions are not yet fully formed and consumer spending behavior and market availability are evolving.

Attribute: GFIM.

GFGB 7022. Venture Capital Financing. (3 Credits)
We will examine the changes in the asset class over time - from the formation of American Research and Development in 1946 to the formation of some of the angel-type funds of the present. We also will examine the geographical differences between venture funds - West Coast and East Coast. We also will look at specialization – the beginnings of IT-focused investing and the move into healthcare and finally into energy. Finally we will examine the phenomenon of global venture capital. How does that vary from the way venture capital is practiced in the US. The class will be taught in modules and we also will rely on practitioners and experts to visit with the class. Where possible, the students will be asked to visit venture capital fund presentations, expert briefings as well as personal briefings.

Attribute: ABEP.

GFGB 7024. Fintech Compliance-Asia to Us. (3 Credits)
An overview of the components of an effective global Corporate Compliance Program. Examination of the Part C Risk Assessment and the Seven Steps of a corporate compliance and ethics program. Review of compliance program design and best practices, including the roles of the corporate compliance office and in-house counsel, risk assessments, Foreign Corrupt Practices Act, global codes of conduct, corporate governance, monitoring and re-evaluation.

Attribute: GFCR.

GFGB 7025. Advanced Corporate Finance. (3 Credits)
This course teaches the art of applying corporate finance theory and essential tools and techniques to strategic decision-making in critical real-life situations faced by organizations. The course enhances the students' understanding of corporate finance by providing a comprehensive examination of selected advanced topics, such as alternative valuation methods, real options in corporate finance, decision trees, international operations, mergers and acquisitions, risk arbitrage, debt capacity and leveraged buyouts, private equity, warrants and convertibles, and ethical issues.

Attribute: GFCF.

GFGB 7026. Alternative Investments. (3 Credits)
The course is an introduction to the rapidly evolving universe of alternative investments. Delivered in modules, the course covers a broad array of alternative strategy classes (Quantitative/Systematic, Fundamental Long/Short, Global Macro, Private Equity) ranging across all major asset classes (Equities, Fixed Income, Currencies, Commodities, Derivatives).

Attribute: GFIM.

GFGB 7027. Algorithm Trading. (3 Credits)
Electronic algorithms are being used by major institutions, investment banks, and hedge funds to trade stocks, bonds, currencies, and a plethora of financial derivatives. Algorithms are being used for all aspects of trading - from asset allocation and stock selection, to execution and implementation, and for risk management and regulatory and compliance reporting. In this course, students will learn the necessary skill sets, and underlying math, statistics, and programming skills to build, develop, manage, and implement profitable algorithms across all asset classes.

GFGB 7028. Technical Analysis. (3 Credits)
This course is designed to inform students about how the markets and individual stocks behave (i.e., technical analysis), and how they differ from the economy and individual companies (i.e., fundamental analysis).

GFGB 7029. Student Managed Investment Fund. (3 Credits)
Students will be trained on construction of a disciplined investment process using "Value Investing" strategy as the core foundation based on research work accentuated by Benjamin Graham and David Dodd. Students are expected to develop relationships with the Wall Street "sell-side analyst(s) covering his or her stocks as well as the Investor Relationship (IR) person(s) of the targeted stocks. A team of industry experts, fundamental analysts, portfolio managers, risk managers and other investment professionals will work closely with students to ensure that the students are exposed to various tools and methods that are currently being employed in the industry.

GFGB 7030. CFA Competition and Workshop. (0 Credits)
While this course is for zero credit, it has a heavy work load and provides valuable practical experience. Students will be arranged into teams. Each team will write a full sell-side coverage report, build out a presentation, and pitch it to Fordham Wall Street alumni.

GFGB 7031. Seminar in Value Investing. (3 Credits)
This survey course is designed to introduce the fundamentals of the Graham and Dodd value approach to investment analysis. The course will be segmented into two parts: the basic structure of the analytical approach to value investing and its relationship to many of the elements of the MBA curriculum will be described through lectures, exercises, readings, in-class discussions and homework assignments; the last sessions of the course will be devoted to student presentations of their investment recommendations.

GFGB 7032. Applied Capital Markets and Financial Regulations. (3 Credits)
