BIOINFORMATICS MINOR

A minor in bioinformatics is available on both the Rose Hill and Lincoln Center campuses. Bioinformatics is an emerging interdisciplinary field fusing mainly biological sciences and computer sciences and encompassing the knowledge and tools of other science disciplines. Bioinformatics studies the sequence, structure, and function of genes and proteins in all living organisms, including the human species. When dealing with an influx of raw information, a significant amount of effort is spent on how to effectively and efficiently warehouse and access these data and on new methods and algorithms aimed at mining this warehoused data in order to make novel discoveries in biology, medicine, and pharmaceuticals. Some examples of the topics are genomics, proteomics, phylogenetics, systems biology, DNA microarray gene expression, protein chip, and next generation sequencing (NGS) data analysis, genomic medicine, biomarkers for cancer and disease, drug discovery and design for disease and disorders, database and data mining, network form and function, and ESL (ethical, societal, and legal) issues.

For more information
Visit the Bioinformatics minor program webpage.

Requirements
The following courses are required for the Bioinformatics minor.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM/NSCI 1321</td>
<td>General Chemistry I (no lab)</td>
<td>4</td>
</tr>
<tr>
<td>CHEM/NSCI 1322</td>
<td>General Chemistry II (no lab)</td>
<td>4</td>
</tr>
<tr>
<td>MATH 1206</td>
<td>Applied Statistics (or equivalent)</td>
<td>3</td>
</tr>
<tr>
<td>BISC 2539</td>
<td>General Genetics</td>
<td>3</td>
</tr>
<tr>
<td>BISC 2549</td>
<td>General Genetics Lab</td>
<td></td>
</tr>
<tr>
<td>NSCI 3133</td>
<td></td>

<td>Bioinformatics</td>
<td>4</td>
</tr>
<tr>
<td>BISC/NSCI 1403</td>
<td>Introductory Biology I</td>
<td>3</td>
</tr>
<tr>
<td>BISC/NSCI 1413</td>
<td>Introductory Biology Lab I</td>
<td>2</td>
</tr>
<tr>
<td>BISC/NSCI 1404</td>
<td>Introductory Biology II</td>
<td>3</td>
</tr>
<tr>
<td>BISC/NSCI 1414</td>
<td>Introductory Biology Lab II</td>
<td>2</td>
</tr>
</tbody>
</table>

Intro Biology I & II with Lab must be taken to fulfill the Natural Science Core Requirement.

Certain majors are required to complete certain additional courses (often taken as electives in their major) to earn the Bioinformatics minor.

Computer Science majors must also take:
- CISC 2500 Information and Data Management
- CISC 4631 Data Mining.

Biological Sciences (RH) majors must also take:
- CISC 3500 Database Systems
- CISC 1400 Discrete Structures

Natural Science (LC) majors must also take:
- CISC 3500 Database Systems
- CISC 4597 Artificial Intelligence
- CISC 4631 Data Mining
- BISC 2539 General Genetics/BISC 2549 General Genetics Lab taken toward the major.
- Either BISC 3754 Cell Biology or BISC 3752 Molecular Biology as an elective toward the major.

General Science (RH) majors must also take:
- CISC 3500 Database Systems
- CISC 4597 Artificial Intelligence
- CISC 4631 Data Mining
- BISC 2539 General Genetics/BISC 2549 General Genetics Lab taken toward the major.
- Either BISC 3754 Cell Biology or BISC 3752 Molecular Biology as an elective toward the major.

Availability
The minor in bioinformatics is available at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham’s School of Professional and Continuing Studies may minor in bioinformatics only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

Fordham College at Rose Hill students: The requirements above are in addition to those of the Core Curriculum.

Fordham College at Lincoln Center students: The requirements above are in addition to those of the Core Curriculum.
