ECONOMICS MAJOR

Students majoring in economics take a program of studies that will prepare them to work in a variety of private industries and public institutions as well as for graduate studies in economics, international affairs, public affairs, business, or law.

Students who plan to work after graduation from Fordham University will find that many job recruiters are favorably impressed by students who have selected this challenging, liberal arts discipline.

Majors find careers in investment analysis, data science, environmental policy, financial institutions, management consulting, and the public sector, among many other career possibilities.
