

ECONOMICS

Economics draws upon history, political science, philosophy, and mathematics to analyze topics ranging from how firms, consumers, and governments make sound decisions to societal issues such as unemployment, discrimination, inflation, crime, and environmental decay. It is a challenging discipline which offers students a clear and concise way of thinking about the ordinary business of life and a preparation for a wide array of professional careers. Alumni surveys indicate that over 50 percent of the majors from Fordham College at Rose Hill continue their education at some point in their lives. Of these, 34 percent receive degrees in law and 30 percent complete an M.B.A. Others pursue an M.A. or a Ph.D. in economics, education, or public affairs.

Students majoring in economics can design a program of studies that will prepare them for graduate studies in economics, international affairs, public affairs, business, or law or for directly entering the labor force. Students who plan to work after graduation from Fordham College will find that many job recruiters are favorably impressed by students who have selected this challenging liberal arts discipline. Majors find careers in academics; corporate business, including retailing, financial and consulting services; and the public sector.

Accelerated Master's Program

Please read the Graduate School of Arts and Sciences Accelerated Master's Programs section of this bulletin for more information. Admission to the accelerated M.A. economics program is open to undergraduates who are majoring in economics, the interdisciplinary math & economics program, or international political economy (IPE), and who have a cumulative GPA of 3.2 or better. Applicants must apply during their junior year of undergraduate study for the economics M.A. program through the Graduate Admissions Office. The requirement of GRE scores is waived. The accelerated M.A. program is available to students at any of the following colleges: FCRH, FCLC, and PCS. All of our graduate courses are held at the Rose Hill campus.

The Accelerated M.A. in Economics is a 30-credit, 10-course degree program plus a comprehensive exam. During senior year, admitted undergraduate students can take up to three graduate courses that double-count toward their undergraduate major and the M.A. degree in economics. Graduate courses taken by students who are current undergraduates need to be approved by the director of graduate studies for the economics department. Most students admitted to the accelerated M.A. program will take ECON 5710 Mathematical Analysis in Economics in the fall semester and ECON 6910 Applied Econometrics in the spring semester of senior year. Please note that ECON 5710 Mathematical Analysis in Economics (a graduate class) does not substitute for ECON 3154 Math for Economists (an undergraduate class) which is required for the undergraduate economics major. Economics majors interested in the accelerated M.A. should complete ECON 3154 Math for Economists by the second semester of junior year. Students should also plan to complete ECON 2142 Statistical Decision Making, ECON 3116 Macroeconomic Analysis, and ECON 3118 Microeconomic Theory before their senior year so as to be prepared for graduate work.

After completing the bachelor's degree program, students continuing in the M.A. program full time typically take ECON 6010 Microeconomic Theory I and ECON 6020 Macroeconomic Theory I plus two graduate economics elective courses in the fall semester, and their remaining electives in spring. The comprehensive examination, which is based primarily on ECON 6010 Microeconomic Theory I and ECON 6020

Macroeconomic Theory I, can be taken once core coursework in microeconomics and macroeconomics is complete. Applications are made online through the Graduate School of Arts and Sciences website.

Program Activities

Honors in Economics

An economics major who maintains a cumulative grade point average of 3.2 and an index in economics of 3.3 or better may be invited to participate in the Honors Program in Economics. To receive Honors in Economics, a major must complete a research paper in economics. The research paper will normally be the outgrowth of a topic selected while taking a 3000-level elective in economics. The paper will usually be started during the second semester of junior year, but no later than the fall semester of senior year. It will be due during the tenth week of the student's final undergraduate semester and must be approved by a committee of three members of the economics faculty. The student will receive a grade of pass when the paper is accepted; this will be noted on the student's transcript as a one-credit course titled Honors Seminar in Economics. Graduation "with honors in economics" will appear on the student's transcript.

College Fed Challenge

Students from the Economics Department participate in the annual College Fed Challenge, sponsored by the Federal Reserve Bank of New York and the Eastern Economic Association. During the competition, each team gives a 15 minute presentation, consisting of an analysis of current economic and financial conditions, a forecast of economic and financial conditions for the near-term, a discussion of risks to the economy of special concern to the Fed, and a monetary policy prescription, followed by a 15 minute question- and-answer session from the judges. We are proud to be one of the 25 participating teams.

Omicron Delta Epsilon

The Economics Department houses the Gamma Chapter of Omicron Delta Epsilon, the International Honor Society in Economics. Each spring, the Department honors its outstanding seniors (majors and minors) by induction into this prestigious society.

American Academy of Political and Social Science

The American Academy of Political and Social Science recognizes undergraduates who have an outstanding grasp of theories and methods, an enthusiasm for understanding social issues, and the promise of making contributions to the social sciences in the future. Our nominees for 2005 and 2006 were among 150 undergraduates from leading social science departments across the United States elected as Junior Fellows of the Academy.

Economics Society

The Department is the home of the active Economics Society, a student-organized-and run club for anyone interested in economics. In the past, the society's activities have included trips to the New York Stock Exchange and the Federal Reserve Bank; presentations by companies and individuals about internships and career paths; publication of a biweekly newsletter; and résumé-building workshops. Each year, the Society hosts a Career Evening featuring a discussion by an alumni panel and socializing afterwards.

Visit the Economics department web page.

Contribution to the Core

Economics offers ECON 1100 Basic Macroeconomics and ECON 1200 Basic Microeconomics which fulfill the introduction to the social science core requirement. Either one of the two introductory courses will satisfy the social science core requirement. Many of the department's upper-level courses will satisfy one of the advanced disciplinary course requirement in social science. In addition, the department regularly offers courses that fulfill the American Pluralism, Global Studies and Value Seminar/EP4 core requirements.
