HONORS PROGRAM AT FCLC

Courses

HPLC 0045. Honors Thesis Completion. (0 Credits)
This is a 0-credit administrative course in which all Fordham College at
Lincoln Center Honors students enroll in the spring of their senior year,
when completing their Honors Thesis requirement. A passing grade
indicates successful completion of the Honors Thesis.

HPLC 1001. Honors Philosophy. (3 Credits)
Borrowing the Thomistic idea of philosophy as a perennial discourse,
the honors philosophy course encourages seminar participants to
cultivate their own intellectual grounds through the study of classic and
contemporary philosophical works. Topics may include the nature of
philosophical discourse, of consciousness, of knowledge, of existence,
and of human nature.

HPLC 1011. Honors: Speech and Rhetoric I. (1 Credit)
1 credit lab session in effective speaking techniques to be combined with
the honors core.

HPLC 1201. Honors: English. (3 Credits)
Beginning with the premise that works of literature and criticism
constitute an ongoing dialogue that shapes and is shaped by historical,
cultural, and aesthetic movements, seminar participants will be
encouraged to develop their own voices in that literary dialogue.

HPLC 1401. Honors: Theology. (3 Credits)
Introduces students to the issues and methodologies of theology,
providing a foundation for the exploration of religious traditions from
various perspectives while focusing on the common and varying
approaches of those traditions. Ethical, social, and political impacts of
religion, along with major historical figures and periods in the history of
religion, will be incorporated.

HPLC 1603. Honors: Natural Science I. (4 Credits)
This course is the first half of a yearlong science honors sequence. In
the fall semester, we focus on the interactions of matter and energy. The
course begins with a discussion of the advent of modern physics and
chemistry during the Enlightenment and moves through thermodynamics,
quantum mechanics, and the contemporary conception of the four
fundamental forces and the standard model of modern physics. The
course then covers how energy and matter interacted to generate the
universe and our world (cosmology and earth science), and how energy
and matter interact in the biosphere (metabolism and ecology). We meet
for two and a half hours of lecture and three hours of laboratory work each
week.

HPLC 1801. Honors: History. (3 Credits)
Study of the Western cultural tradition from the Enlightenment to the
Postmodern era by focusing on the quest for modernity. Course work
will focus on the philosophical debates, the search for utopia, the role
of the avant-garde, and the cultural tensions that make up the Western
experience.

HPLC 1811. Honors: Writing Intensive. (2 Credits)
This is a two-credit workshop on writing and research skills, offered in the
first semester of the Honors Program.

HPLC 1999. Tutorial. (1 Credit)
Supervised individual project designed by the student in concert with one
or more members of the faculty. [Each course must be approved by the
Honors Committee.]

HPLC 2501. Honors: Art History at the Museums. (3 Credits)
This course offers an introduction to the study of global art history,
approached through the lens of New York’s museums and galleries.
We will analyze works from Asia, the Americas, Africa, and Europe to
explore the roles of painting, sculpture, and architecture in the formation
and communication of cultural identities. Using the collections at the
Metropolitan Museum of Art and other museums throughout the city as
primary sources, we will study the role of museums, analyze the form
and function of a variety of objects, and consider the roles of patron,
artist, and audience. Students will have the opportunity to study major
monuments of world art in person and to gain an understanding of artists
and the periods in which they worked. In addition, this course aims to
develop visual literacy skills, helping students analyze and interpret visual
information. Some classes will be held at Fordham, but most classes will
be held in museums.

Mutually Exclusive: ARHI 1101.

HPLC 2510. Globalization: Seminar. (3 Credits)
This course will introduce you to a comprehensive set of frameworks for
the understanding and analysis of globalization understood as a process
of global system formation. It provides you with the ability to survey
and understand the wide variety of information regarding the historical
development of globalization and prepares the student to assess the
possibilities for the global future and its impact on our lives.

Attributes: INST, ISIN.

HPLC 2800. Internship. (2 Credits)
Internship.

HPLC 2803. Honors: Trends in NYC. (3 Credits)
In this course, we will analyze topics illustrating the development over
time of New York City’s populace, governance, economy, and social and
cultural organization.

HPLC 2811. Honors Sacred Texts. (3 Credits)
Through a selection of primary texts from the Hebrew Bible, the New
Testament, the Talmud, the Qur’an, and early Muslim writings, students
will reflect on the social, historical, and theological contexts in which
each writing emerged. Primary emphasis will be placed on the similar yet
different ways humans construct themselves and their worlds in relation to
the sacred.

Attributes: JWST, MEST, REST, STXT, THEO.

HPLC 2999. Tutorial. (2 Credits)
Supervised individual project designed by the student in concert with one
or more members of the faculty. Each course must be approved by the
Honors Committee.

HPLC 3800. Internship. (3 Credits)
Internship.
HPLC 3999. Tutorial. (3 Credits)
Supervised individual project designed by the student in concert with one or more members of the faculty. [Each course must be approved by the Honors Committee.]

HPLC 4050. Honors: Senior Values Seminar. (4 Credits)
Using a combination of literary, theological, and philosophical texts, this class will explore an ethical issue or issues that are relevant to our contemporary global society. Recent examples include human rights for people with disabilities and the intersection of environmental and social justice. The class will focus on the history and basis for human rights, and in particular the question of whether we can justify the claim that there are universal basic rights: (1) Are universal rights consistent with a wide array of varying cultures and ways of life? (2) Are concepts of rights somehow inherently "western" or 'individualist,' or can relativist doubts about human rights be answered? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Attribute: ENGL.

HPLC 4500. Thesis Workshop. (3 Credits)
This course is for seniors in the FCLC Honors program. Participants will workshop thesis drafts and work on presentation skills for both the research showcase and the Honors Program presentation.

HPLC 4800. Internship. (4 Credits)
Combines work with an artist, writer, scientist, or other expert with directed series of academic readings relevant to that experience. (Each course must be approved by the Honors Committee.) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HPLC 4888. Honors: Internship. (3 Credits)
Combines work with an artist, writer, scientist, or other expert with directed series of academic readings relevant to that experience. [Each course must be approved by the Honors Committee.]

HPLC 4999. Honors Tutorial. (4 Credits)
Supervised individual project designed by the student in concert with one or more members of the faculty. [Each course must be approved by the Honors Committee.]
