HONORS PROGRAM AT FCLC

Courses

HPLC 0045. Honors Thesis Completion. (0 Credits)
This is a 0-credit administrative course in which all Fordham College at
Lincoln Center Honors students enroll in the spring of their senior year,
when completing their Honors Thesis requirement. A passing grade
indicates successful completion of the Honors Thesis.

HPLC 1001. Honors Philosophy. (3 Credits)
Borrowing the Thomistic idea of philosophy as a perennial discourse,
the honors philosophy course encourages seminar participants to
cultivate their own intellectual grounds through the study of classic and
contemporary philosophical works. Topics may include the nature of
philosophical discourse, of consciousness, of knowledge, of existence,
and of human nature.

HPLC 1011. Honors: Speech and Rhetoric I. (1 Credit)
1 credit lab session in effective speaking techniques to be combined with
the honors core.

HPLC 1201. Honors: English. (3 Credits)
Beginning with the premise that works of literature and criticism
constitute an ongoing dialogue that shapes and is shaped by historical,
cultural, and aesthetic movements, seminar participants will be
encouraged to develop their own voices in that literary dialogue.
Attribute: TC.

HPLC 1401. Honors: Theology. (3 Credits)
Introduces students to the issues and methodologies of theology,
providing a foundation for the exploration of religious traditions from
various perspectives while focusing on the common and varying
approaches of those traditions. Ethical, social, and political impacts of
religion, along with major historical figures and periods in the history of
religion, will be incorporated.

HPLC 1403. Honors: Natural Science I. (4 Credits)
First semester of a two-semester laboratory science course open to
Fordham's strongest students who have not declared a science major.
This interdisciplinary course emphasizes problem solving and analysis
of classic experiments to explore the interrelationships of chemistry,
biochemistry, and physics in advancing our understanding of the principles
that govern the natural world. The first semester focuses on two major
themes: the interaction of matter and energy and the processing of
information and logic by biological systems. The second semester
applies the concepts from the first semester to analyze the origin and
functioning of complex systems ranging from the early cosmos to the
human brain.

HPLC 1500. Internship. (2 Credits)
Mutually Exclusive: ARHI 1101.

HPLC 1604. Honors: Natural Science II. (4 Credits)
Second semester of a two-semester laboratory science course open to
Fordham's strongest students who have not declared a science major.
This interdisciplinary course emphasizes problem solving and analysis
of classic experiments to explore the interrelationships of chemistry,
biochemistry, and physics in advancing our understanding of the principles
that govern the natural world. The first semester focuses on two major
themes: the interaction of matter and energy and the processing of
information and logic by biological systems. The second semester
applies the concepts from the first semester to analyze the origin and
functioning of complex systems ranging from the early cosmos to the
human brain.

HPLC 1605. Internship. (2 Credits)
Mutually Exclusive: ARHI 1101.

HPLC 2501. Honors: Art History at the Museums. (3 Credits)
This course is designed as an introduction to the major periods of
Western art and to the key issues of art history. Using the collections at
the Met and other museums throughout the city as primary sources, we
will study the role of museums, analyze the form and function of a variety
of objects, and consider the roles of patron, artist, and audience. Students
will have the opportunity to study major monuments of Western art in
situ and to gain an understanding of artists and the periods in which
they worked. In addition, this course aims to develop visual literacy skills,
helping students analyze and interpret visual information. Some classes
will be held at Fordham, but most classes will be held in museums.

HPLC 2610. Globalization: Seminar. (3 Credits)
This course will introduce you to a comprehensive set of frameworks for
the understanding and analysis of globalization understood as a process
of global system formation. It provides you with the ability to survey
and understand the wide variety of information regarding the historical
development of globalization and prepares the student to assess the
possibilities for the global future and its impact on our lives.
Attributes: INST, ISIN.

HPLC 2800. Internship. (2 Credits)
Internship.

HPLC 2803. Honors: Trends in NYC. (3 Credits)
Analysis of topics illustrating the development over time of New
York City's populace, governance, economy and social and cultural
organization.
HPLC 2811. Honors Sacred Texts. (3 Credits)
Through a selection of primary texts from the Hebrew Bible, the New Testament, the Talmud, the Qur’an, and early Muslim writings, students will reflect on the social, historical, and theological contexts in which each writing emerged. Primary emphasis will be placed on the similar yet different ways humans construct themselves and their worlds in relation to the sacred.
Attributes: JWST, MEST, REST, STXT, THEO.

HPLC 2999. Tutorial. (2 Credits)
Supervised individual project designed by the student in concert with one or more members of the faculty. Each course must be approved by the Honors Committee.

HPLC 3800. Internship. (3 Credits)
Internship.

HPLC 3999. Tutorial. (3 Credits)

HPLC 4050. Honors: Senior Values Seminar. (4 Credits)
Using a combination of literary, theological, and philosophical texts, this class will explore an ethical issue or issues that are relevant to our contemporary global society. Recent examples include human rights for people with disabilities and the intersection of environmental and social justice. The class will focus on the history and basis for human rights, and in particular the question of whether we can justify the claim that there are universal basic rights: (1) Are universal rights consistent with a wide array of varying cultures and ways of life? (2) Are concepts of rights somehow inherently “western” or ‘individualist,’ or can relativist doubts about human rights be answered? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: ENGL.

HPLC 4500. Thesis Workshop. (3 Credits)
This course is for seniors in the FCLC Honors program. Participants will workshop thesis drafts and work on presentation skills for both the research showcase and the Honors Program presentation.

HPLC 4800. Internship. (4 Credits)
Combines work with an artist, writer, scientist, or other expert with directed series of academic readings relevant to that experience. (Each course must be approved by the Honors Committee.) Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

HPLC 4888. Honors: Internship. (3 Credits)
Combines work with an artist, writer, scientist, or other expert with directed series of academic readings relevant to that experience. [Each course must be approved by the Honors Committee.]

HPLC 4999. Honors Tutorial. (4 Credits)
Supervised individual project designed by the student in concert with one or more members of the faculty. [Each course must be approved by the Honors Committee.]
