

# INTEGRATIVE NEUROSCIENCE MAJOR

## Requirements

The course requirements for the integrative neuroscience major consist of four components: nine foundation courses required of all integrative neuroscience majors; three required, concentration-connected neuroscience courses that emphasize the different concentrations within the major; three concentration courses that allow the student to enhance their study within their chosen concentration; and a research experience lasting a minimum of two semesters, beginning as early as is reasonable for the student and project, but no later than the summer/fall after the junior year.

All majors must also enroll in a capstone research seminar course for students in all concentrations to share and discuss the results of their research with other integrative neuroscience majors.

A minimum grade of C- is required for courses to count towards the major.

<sup>1</sup> AP Calculus AB (MATH 12AB) or AP Calculus BC (MATH 12BC) credit may fulfill this requirement.

<sup>2</sup> Serves as Foundation Course for students pursuing the Systems/Computational Concentration only. Students who take CISC 1600 during Fordham's Summer Session do not take CISC 1610, as the summer lecture and lab are offered in a combined format.

<sup>3</sup> PSYC 1200 Foundations of Psychology credit from AP Psychology (score of 4 or 5) may fulfill this requirement.

## Availability

The integrative neuroscience major is available to students at Fordham College at Rose Hill and Fordham College at Lincoln Center. Students in Fordham's School of Professional and Continuing Studies may major in integrative neuroscience only if they receive the approval of their advising dean and/or department, and their schedules are sufficiently flexible to permit them to take day courses at the Rose Hill or Lincoln Center campuses.

**Fordham College at Rose Hill students:** The requirements above are in addition to those of the Core Curriculum.

**Fordham College at Lincoln Center students:** The requirements above are in addition to those of the Core Curriculum.

**Professional and Continuing Studies students:** The requirements above are in addition to those of the PCS Core Curriculum and any additional electives that may be required to earn a minimum of 124 credits.
