PHIL 1000. Philosophy of Human Nature. (3 Credits)
This course is a philosophical reflection on the central metaphysical and epistemological questions surrounding human nature, which includes discussion of some or all of the following problems: the body/soul distinction and the mind/body problem; the problem of knowledge (relativism, skepticism, the objectivity of knowledge, faith, and reason); free will and determinism; self and society (subjectivity, personhood, sociality, historicity, and tradition); and the elements of identity (such as race, gender, sexuality, ability, and socioeconomic status). At least 60% of each section of the course is devoted to readings from Plato, Aristotle, Augustine or Aquinas, and Descartes. Each section includes some writings by at least one contemporary figure and one figure coming from a group traditionally underrepresented in philosophy. Selected sections will be offered as Eloquentia Perfecta I seminars.

Attributes: FRPT.

PHIL 1003. Lost Interlocutor: Philosophy of Human Nature. (3 Credits)
This course examines the philosophical views of pre-Socratic thinkers, Plato, Aristotle, Augustine, Aquinas, Descartes, and Ignatius of Loyola and their connections to contemporary science, religion, and Jesuit education. We analyze primary texts, critique theories, compose philosophical arguments, and critically challenge the thinking of multiple perspectives. These skills comprise the greater philosophical tradition that stems from the ancients to us today. Salient themes of our lives—knowledge, understanding, truth, falsity, doubt, goodness, mortality, reality, evidence, belief, love—stir fundamental questions that need systematic investigation in order to make sense of our human nature and give greater purpose to life. Since this Manresa course satisfies the FCRH first year Eloquentia Perfecta I requirement, it stresses critical spoken dialogue and writing-intensive assignments. It also consists of interactive (and fun) out-of-class learning experiences, and the professor even feeds you at most of these. This course satisfies the Philosophy of Human Nature Core requirement for both FCRH and Gabelli students.

Attributes: FRPT, MANR, PHFR, SL.

PHIL 1010. Introduction to Critical Thinking. (3 Credits)
The course is intended to sharpen a student’s ability to think clearly, consistently, critically, and creatively. The course objective considers principles of sound judgment and helps students learn how to recognize and analyze arguments present in ordinary spoken and written language, how to distinguish correct reasoning from incorrect reasoning, and how to construct valid, sound arguments.

PHIL 1999. Tutorial. (1 Credit)
Independent research and reading with supervision from a faculty member.

Prerequisites: PHIL 3000 or HPLC 1001 or HPRH 1002 or HPRH 1003.

PHIL 3000. Philosophical Ethics. (3 Credits)
This course involves philosophical reflection on the major normative ethical theories underlying moral decision-making in our everyday lives. The principal focus of the course is a systematic introduction to the main normative ethical theories, i.e., eudaemonism, natural law ethics, deontological ethics, utilitarianism, virtue ethics, and feminism. The differences among these approaches are illuminated by studying various moral issues. In each section of the course, at least half of the readings will be selected from Aristotle and Kant. Each section will include writings by at least one contemporary figure and one figure coming from a group traditionally underrepresented in philosophy.

PHIL 3109. Environmental Ethics. (4 Credits)
This senior values seminar surveys major theories in environmental ethics dealing with our moral duties regarding nature: for example, environmental stewardship, sustainable development, environmental justice, ecological virtue ethics, animal rights, biocentrism, Leopold's land ethic, and ecological feminism. It has not only philosophical but also scientific, economic, political, and design dimensions as it deals with such topics as global warming, alternative energy, pollution control, suburban sprawl, deforestation, biodiversity loss, and the prospect of a sixth mass species extinction event threatening the future of human and nonhuman life as we know it. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3125. Hume's Ethics. (4 Credits)
David Hume famously (or infamously) declared that “[r]eason is, and ought only to be the slave of the passions, and can never pretend to any other office than to serve and obey them” (THN 2.3.3). But what does moral theory look like when feelings are the foundation for morality? In this course, we will explore Hume's sentimentalist moral theory, examining Hume's "A Treatise on Human Nature" and "An Enquiry Concerning the Principles of Morals," along with supplementary excerpts from Hume's letters and essays, and occasional pieces of secondary literature. We will study Hume's views on meta-ethics, moral psychology (the passions/emotions and sympathy), moral motivation and freedom, moral judgment, virtue (including justice), and happiness. While this course is primarily focused on Hume's own views, we will also engage with present-day Humean positions in moral philosophy. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3131. Philosophy of Economics. (4 Credits)
Economics grew out of philosophy, carrying forward key philosophical ideas that continue to operate as grounding assumptions, goals, and regulatory ideals in the discipline. Some of these philosophical ideas have been challenged on the grounds of realism, coherence, usefulness, consequences, and compatibility with important values like justice, fairness, human dignity, democracy, liberty, equality, and the general welfare. Philosophy of Economics analyzes, criticizes, and creatively rethinks both classical and contemporary texts that deploy and challenge the philosophical ideas that continue to guide economics as a discipline that has great influence in framing and rationalizing public policy.

Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attribute: PHMP.
Prerequisites: PHIL 3000 or HPLC 1001 or HPRH 1002 or HPRH 1103.

PHIL 3140. Market Failures, Public Goods, and Justice. (4 Credits)
This course focuses on a fundamental question for social justice: Which goods and services should be provided by free markets, which should generally be supplied by nonprofits (NGOs), and what is the remainder that should be secured by government? No economic background is assumed on the part of the student, but the course will examine economic conceptions of public goods that markets cannot optimally supply, as well as debates about expanding this category. We will consider arguments that some choices concern objective goods and harms that should not simply be left up to consumer decisions in free markets, and consider what the institutional preconditions of effective markets include. A range of public goods, including some at the global level, will also be debated. Readings will include recent popular works on types of market failure that are now widely debated, some philosophical work on public goods, and an introduction to elementary game theory with simple matrices. We will also consider a few recent articles and book chapters arguing that some functions often performed by government should be taken over by the nonprofit sector, and will question what social justice concerns the rapid growth of this sector may raise. Students of all political orientations are welcome! Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3145. Democracy and Constitutional Order: Classical American Philosophy. (4 Credits)
Democratic justice has two main poles: popular sovereignty and constitutional order. Founders of the American federal government in the Revolutionary period sought to balance these values, but the idea that people might vote for slavery brought them into crisis. This forced civic republicans, including Lincoln, to articulate the moral preconditions of legitimate democracy in a clearer way. With federalist arguments for more centralized power as a starting point, this course will consider alternative conceptions of democratic justification that emerged from the American debates with an eye to contemporary applications. In particular, we will clarify and debate proposed constitutional reforms that are being considered today.
Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: PHMP.
Prerequisites: PHIL 3000 or HPLC 1001 or HPRH 1002 or HPRH 1103.

PHIL 3181. Philosophy of Technology. (4 Credits)
This course will explore the philosophy of technology, seeking to understand the way in which technology is transforming our relationships to ourselves, to other people, and to our world. Guiding questions for the course include: What is technology? Is technology necessarily good or bad for human flourishing, or is it just neutral? How are science and technology related? Do we need a special ethics of technology? The course will explore multiple traditions and historical periods, with special emphasis on analytic and continental philosophy in the 20th and 21st centuries. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3204. Symbolic Logic. (4 Credits)
Humans are capable of altering their behavior, verbal and otherwise, in light of deductive consequences and in conformity with standards of logical consistency. Although Aristotle, the Stoics, and others developed formal techniques for the evaluation of logical consequence and consistency, the early 20th Century witnessed an unprecedented expansion in the scope and power of those techniques through the construction of formal languages based on mathematical principles. Students consider the modern development of formal logical techniques including propositional logic, first-order logic, and if time permits, a system of intentional logic (e.g. modal logic), and then explore some of the philosophical issues surrounding them. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
Attributes: LING, PHKM.
Prerequisites: PHIL 1000 or HPLC 1001 or HPRH 1002 or HPRH 1103.

PHIL 3230. How to Keep an Open Mind: Philosophical and Scientific Perspectives. (4 Credits)
Our world is full of information that we can use to learn truths and correct our mistakes, but it is often difficult to recognize when and how to take advantage of it. When should we have an open mind and when should we stop looking into matters? And what are possible steps we can take to keep our minds open? The course will explore a series of issues on this topic from the perspectives of philosophy and the social sciences, including the nature of epistemic virtue and vice, informational aggregation and "the wisdom of crowds," rational ignorance, precommitment, adversarial inquiry, and more. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3238. Idealism and Realism. (4 Credits)
Do minds have a privileged position in the world? Do objects, moral values, beauty, and truth exist independently of the mind? Or might objects, moral values, beauty, and truth depend in some way on minds? And if so, how? This course will examine various answers to these and related questions from both historical figures and contemporary figures.
Attribute: PHME.
Prerequisites: PHIL 3000 or HPLC 1001 or HPRH 1002 or HPRH 1103.

PHIL 3243. Philosophy of Cognitive Science. (4 Credits)
Unlike inanimate objects such as rocks, we are aware of the world around us. Energy from the sun heats both the rock and you, but unlike the rock you also feel the heat, you know that it comes from the sun, you can understand what it is, and can think about it even when it is absent. How exactly are we able to do this? What makes us capable of thinking, feeling, and perceiving? Cognitive science is an interdisciplinary attempt to answer questions like these. This course explores some of the dominant research programs in cognitive science with an eye to understanding and critically evaluating the philosophical assumptions on which they depend. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3257. Skepticism. (4 Credits)
Skepticism about the possibility of knowledge, and in particular about our knowledge of the external world, has a long history, from Sextus Empiricus to Hume and Berkeley up to a wide array of present-day debates. As it is plausible that epistemological theory emerges from a dialectic with skepticism, analysis of skeptical arguments gives substance to our claims to have achieved knowledge. This course examines many of these arguments, historical and contemporary. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3258. Relativism and Skepticism. (4 Credits)
On the road to knowledge, skepticism is a “go slow” or perhaps a “stop” sign, while relativism says “the speed limit is yours to determine”. Both views challenge sedate norms of epistemology and each other. This course examines in detail contemporary versions of skeptic and relativistic claims about our knowledge of and judgments about, the world and ourselves. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

This course is devoted to an intensive study of one important and innovative book: Maurice Merleau-Ponty's Phenomenology of Perception, one of the most groundbreaking and influential works of philosophy in the 20th century. Rejecting the assumption that mind and body are separate, Merleau-Ponty offers an account of the sensorimotor body as the subject of experience rather than giving that role to consciousness or a disembodied mind. His rich, first-person, descriptive account of perception demonstrates that the animate body in sensation and movement is our original meaning-making relation to the world. While our study will focus on reading systematically through this single primary text, we will also have a few readings that contextualize influences on Merleau-Ponty, as well as his impact on current scholarship. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3667. Philosophy of Space and Time. (4 Credits)
Space and time are fundamental features of the physical universe in which we live, and are essential to our consciousness of the world. Philosophers from Augustine to Leibniz and Kant have asked what time is, whether it is a real feature of the causal order of nature or rather imposed by our conscious experience. Developments in 20th century physics and philosophy have forced us to rethink the relation of space and time, reconsider whether the future might be as real as the past, and whether time really "moves" forward. The course will explore the leading contemporary theories and draw connections with developments in science. No advanced background in physics is required. PHIL 3673. Existentialism and Literature. (4 Credits)  
Existentialism and Literature seeks to examine how the ideas of existentialist philosophy—in such thinkers as Kierkegaard, Nietzsche, Heidegger, Marcel, Sartre, Camus, Blanchot and Merleau-Ponty—are expressed in and through literature. Alongside philosophical writings, we will read literary works by such writers as Dostoevsky, Rilke, Kafka, Sartre, de Beauvoir, and Camus. Themes include the nature and structure of the self; authenticity and inauthenticity; alienation and the fear of death; meaning and meaninglessness, and the existence or absence of God. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: COLI, PHHC.  
Prerequisites: PHIL 3000 or HPLC 1001 or HPRH 1002 or HPRH 1103.

Readings will be from authors such as Euripides, Racine, Pascal, Freud, Lukacs, Goldmann, Freud, and Girard. Note: This four-credit course will be reading-intensive. In addition to the philosophical literature, students will be expected to read Flaubert’s “Madame Bovary” and Dostoevsky’s “Demons” in their entirety. PHIL 3701. Human Rights Theories: Foundations and History. (4 Credits)  
This course will introduce students to the main philosophical theories of human rights, including both “political-legal” accounts and “moral” (or orthodox) theories that focus on the “inherent dignity” of persons. The main goal is to understand and evaluate proposed justifications and critiques of human rights in historical context. We will consider how modern and non-Western approaches to human rights grew out of natural law and early modern accounts of natural rights—especially in Enlightenment ethical thought—before being globalized in the 20th century. The course will include readings addressing challenges based on cultural differences, and non-Western approaches to human rights. While considering 20th- and 21st-century proposals, we will also assess libertarian opposition to social and economic rights, and whether human political rights have different grounds than basic personal liberties. We will also consider historical and imaginative examples, and how to understand more specific human rights as opposed to highly general categories. But the focus of this course is on the philosophical accounts, rather than on ways that human rights inform global institutions and connect with issues concerning global justice more broadly. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3702. Rights, Justice, and Global Governance. (4 Credits)  
This course introduces students to three philosophical accounts of global justice, and related weaker and stronger conceptions of regional and global governance institutions that may be needed to realize global justice. To evaluate institutional proposals, we will use some elementary game theory to explain the concept of global public goods, along with a handful of closely related economics concepts that are useful in evaluating global trade, finance, the work of international NGOs, treaty regimes, and other global systems. No background in these areas is assumed; everything needed will be supplied in the course content. Using these tools, we will consider cases that illustrate threats and obstacles, including military and economic pressures from tyrannical regimes, democratization, extreme poverty and popular growth, environmental challenges and sustainable resource use, oppression of women, and certain emerging technologies. We will also explore how human rights ideals may be qualified or appear differently within such an institutional framework and a sketch of “basic structures” at regional and global levels. This course builds on Theories of Human Rights, but that is not a prerequisite. The course does not cover treaties and concepts related to Just War Theory in any depth, as these are the focus of another elective. The course involves no ideological litmus test; all political views (including agnosticism) are welcome in our conversations. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: PHKM, PJCR, PJEC, PJST.

This course focuses on intersections between philosophical theories of justice and healthcare. Topics covered include distributive justice and issues involving scarce resources, such as the allocation of organs to transplant, prioritization for ICU beds in a pandemic, and triage methods in disaster scenarios; issues of social, political, and structural justice, such as access to tertiary care, social determinants of health, and structural competency in medical education; and issues of epistemic justice, such as allegations of medical error, assessments of medical expertise, and judgments of patients’ decisional capacity and competency. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.  
Attributes: BEHR, BIOE, PHMP.  
Prerequisites: PHIL 3000 or HPLC 1001 or HPRH 1002 or HPRH 1103.

PHIL 3711. Humanitarianism and Philosophy. (4 Credits)  
We are all familiar with aid agencies asking for donations to support their life-saving work. Often these appeals aim to stimulate compassion for the suffering of distant strangers in ways that prompt us to act. This course takes humanitarian action broadly construed as organized attempts to alleviate the suffering of distant strangers as a point of departure for analyzing a range of issues using the tools of moral and political philosophy. We will attempt to better understand the nature and scope of our moral obligations to distant strangers as well as the nature and value of moral sentiments like compassion and their relation to justice. We will engage different frameworks for evaluating various modes of humanitarian action by non-governmental organizations, governments, and international bodies. We will also critically examine the modes of representation used to portray the suffering of distant strangers. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3713. Human Rights and Global Justice. (4 Credits)
This interdisciplinary class will focus on the development of the human rights paradigm in international law and philosophical questions about how we can justify universal basic rights. For example, are universal rights consistent with a wide array of varying cultures and ways of life? Are concepts of rights somehow inherently "western" or "individualist", and can relativist doubts about human rights be answered? We will also look at some debates about the content of such rights, e.g. rights to educational opportunity, to welfare or subsistence, to basic health care, to membership in a culture, to immigration, to a sustained environment and other controversial cases. We will also consider humanitarian intervention in the name of rights, problems with the UN system, and ways that the international order could be restructured if we take seriously the idea that there are universal basic rights to freedom from tyranny and to development out of poverty. Note: Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

During the second part of the course, we will examine both Hegel's criticisms of Kant's philosophy and the ways in which Hegel's philosophy, nevertheless, attempts to develop particular Kantian insights. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

George Santayana thought our humanity diminished without a proper emotional life: "The young man who has not wept is a savage, and the old man who will not laugh is a fool." **PHIL 3920. Evil Choices. (4 Credits)**
What makes a bad choice evil? And what motivates somebody to do evil? Are only morally depraved persons capable of making evil choices? Or can an evil choice be made by someone who might be considered good or even admirable under other circumstances? Is it possible to choose evil for evil’s sake? Or is every evil choice motivated by a desire to obtain some good, for oneself or for others? This course explores these questions with the help of great philosophers throughout history. We consider ancient accounts of evildoing (Plato and Aristotle), medieval views on Lucifer (Augustine, Anselm, and Aquinas), modern approaches to radical evil (Kant), and contemporary reflections on the Holocaust. We will also read some contemporary psychological research. What is the purpose of life? Are technological advances a blessing or curse? Moreover, good philosophical theorizing can help us imaginatively inhabit disparate worlds, to explore the boundaries of what exists, what could be possible, and even what should be the case. This course will cover topics predominant in science fiction, which may include: transhumanism, consciousness and personhood, personal identity and social situatedness, race and gender, the nature of time and time travel, free will, possibility and other worlds, and the meaning of life. PHIL 3980. Contemporary Issues in Metaethics. (4 Credits)
Metaethics steps back from moral debates to ask metaphysical, epistemological, and semantic questions about morality itself. The metaphysical questions seek to understand the nature of morality, asking questions such as: are there objective moral facts, or is morality culturally determined? If there are objective moral facts, are they like scientific facts? The epistemological questions seek to understand how we can know or be justified in believing moral claims. The semantic questions seek to understand what we mean when we use moral terms: are we making truth claims or are we just expressing our feelings? In this course, we will explore contemporary answers to these kinds of questions. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 3981. Ethics and the Internet. (4 Credits)
More and more of us are living our lives online, and much of our social infrastructure is increasingly mediated by digital networks. These realities present us with a host of new ethical and political questions. For example, is the internet good for ordinary users, or does it represent a massive threat to their mental or physical health? What has become of the right to privacy in the digital age? What should we think about the idea that social media users are actually products and not consumers? Do social media sites represent important tools for positive social change, or do they promote and enable violence and extremism? And what should we make of the potentially disturbing phenomenon of online shaming? In this course, students will engage with all of these questions, examining both classic and recent work by moral philosophers and social theorists. Students will leave this course better equipped to understand and critically analyze the internet and the role it plays in our lives. That’s a platitude, but in this course we will try to say more. Through reading and discussion of classic and recent work by philosophers and psychologists, we'll think carefully about error and the significance of error for our intellectual lives. What factors lead us to err? What kinds of mistakes are there to make? What’s the reasonable response to learning that we may have made an error? What can be done to get things right more often? This course examines the relationship between theoretical ideas of modernity and the literature and art criticism of modernism, with London as its cultural geography. Philosophical descriptions of modernity and theories of Marx, Darwin and Freud serve as a basis for understanding transformations in human self-understanding that characterize the mid 19th to early 20th centuries. We examine modern literary works influenced by these transformations, all written and set in London, by Dickens, Kipling, Rhys, Woolf, Eliot, Yeats, and the modernist art critics Fry and Hulme. PHIL 4310. Human Rights in Context. (4 Credits)
Human rights have become a universal language of protest. When and how did this happen? What are human rights and how are they justified? Do they mean the same thing in all the contexts in which they are invoked around the world? To address such questions we focus on how different methodologies – mainly historical, philosophical, and ethnographic – produce knowledge about human rights. For instance, what can we learn by identifying historical continuities and discontinuities between different conceptions of rights? What can we learn about human rights from the kind of conceptual analysis that many philosophers do? How can the “thick description” of ethnography help us understand the meaning and effects of human rights discourse in various settings? Finally, can historical, philosophical, and ethnographic approaches to human rights be fruitfully combined? Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

Scientific progress is astounding. In a few short centuries, human civilization has gone from not knowing what the speed of light is, to measuring gravitational waves in distant galaxies and sending messages to one another on invisible electromagnetic waves that permeate the space around us. But understanding exactly what it means to say that progress was made in a particular episode in the history of science is a difficult historical and philosophical puzzle. Our class focuses on characterizing scientific progress, and to do so, we'll draw on resources from both the history of science and the philosophy of science. This course will examine ethical and political questions regarding freedom of expression and toleration. We live in a world of diverse viewpoints and diverse religious beliefs. In the United States, the freedom to express these viewpoints and exercise those religious beliefs is guaranteed by the First Amendment. But what ethical and political values can be taken to underlie these rights? How should the state act in order to uphold those ethical and political values? How should the state act in order to uphold those ethical and political values? How should individuals react when encountering viewpoints and beliefs at odds with their own? And how might underlying ethical and political values guide us regarding controversial cases of free expression? This course will attempt to answer these questions. The course will focus primarily on the philosophical foundations of free express and religious toleration but will also consider how those philosophical foundations relate to further controversial cases of speech. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4410. Love and Empire. (4 Credits)
The course is an examination of philosophy as practiced in ancient Rome. The Romans took to philosophy just as the Republic was teetering on the brink of collapse and the Empire taking shape. In this era, most people sought peace but found only strife. Some insisted that the purpose of life was pleasure, others duty. Nearly all agreed that there was no time for academic obscurities, only the big questions: the meaning of life, the possibility of knowing, the nature of love, the value of friendship, the best form of government, the rightness of empire, and the character of death. Philosophy was a passionate search for the wisdom that would lead to the good human life and the well-run empire. It was "ordinary people" who engaged in philosophy, from every walk of life, whether emperor (Marcus Aurelius) or slave (Epictetus), politician (Cicero) or poet (Vergil). Seneca philosophized while serving as the Emperor Nero's chief advisor; Marcus Aurelius wrote his meditations while fighting barbarians on the frontier. Students will study all five of the major schools of Hellenistic philosophy that arose after the conquests of Alexander the Great—Stoicism, Skepticism, Cynicism, Epicureanism, and Neo-Platonism—each found disciples in the Roman Empire. The Roman philosophers were often outstanding writers—masters of rhetoric—who presented their philosophy in poems, plays, or personal diaries. Hence special attention will be given to the philosophical "battle of the poets," Lucretius vs. Vergil, as they fought for the soul of the Roman world. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.

PHIL 4455. Respectful Disagreement. (4 Credits)
This seminar concerns a problem that has broad practical implications, concerns how we should conduct our intellectual lives, and is of great interest in philosophy: what should we do when we find out that someone we consider just as intelligent and informed as we are is on a certain topic disagrees with us on that topic? If we stick with our opinion are we being arrogant? If we give up our old belief are we considered spineless? We all hold opinions we know are denied by people we consider our peers or even superiors on the relevant topic, whether it’s religious, political, or specific to our favorite fields of study. This seminar examines this common situation. Previously PHIL 3255. This senior seminar will survey key themes in American political philosophy from the Federalist Papers to the Lincoln-Douglas Debates, focusing on rival conceptions of the moral conditions that must be met for democratic government to count as legitimate, or capable of making law that deserves our principled allegiance. Using famous texts by Henry Jaffa and Gary Wills, we will consider the relation between popular sovereignty and human rights; the balance between personal conscience and constitutional order; and arguments for greater centralization of power for essential coordination and to secure basic justice. We will reconstruct this ideal of democratic justice from the tradition of ‘civic republicanism’ as it developed in the Federalist and Whig parties up to 1860. Before investigating just war theory, students will examine two rival ethical theories about war, namely, pacifism and realism. The closing weeks of the semester will focus on current issues and challenges for just war doctrine, especially preemptive war, terrorism, and counter-insurgency. Four-credit courses that meet for 150 minutes per week require three additional hours of class preparation per week on the part of the student in lieu of an additional hour of formal instruction.
