SUSTAINABLE BUSINESS MINOR

People, planet, and profit: Sustainable business strikes a balance among these three factors. Sustainability is becoming a national phenomenon, and companies are taking notice, from the smallest startups to the largest multinational banks. A minor in this field is now open to Gabelli School students and their peers at Fordham College Rose Hill. The sustainable business program aligns seamlessly with Fordham's mission to "promote research and education that assist in the alleviation of poverty, the promotion of justice, the protection of human rights, and respect for the environment."

This minor incorporates business, social science, natural science, and building-design curricula. It can enhance a student's career opportunities in traditional business markets and in the emerging “green sector.” Students who pursue this minor take the foundations course, Sustainable Business, and six additional courses. Courses vary depending on whether the student is a Gabelli School student, an FCRH student majoring in a science, or an FCRH student pursuing in a nonscience major.
