

THEATRE MINOR

The theatre minor is recommended for students who want a strong, general education in theatre while majoring within another program or department.

Learning Goals

The minor's learning goals are designed to ensure that students gain a foundational education that balances practical skills with theoretical knowledge and fosters both personal and professional growth.

1. Develop ability to express ideas, emotions, and narratives through artistic expression.
2. Gain proficiency in technique in a theatrical discipline.
3. Acquire knowledge of global theater history and explore cultural, social, and political contexts through a theatrical lens.
4. Develop the ability to critically analyze and interpret dramatic texts.
5. Enhance collaboration skills through experiential learning.
